Note, *Parker v. Brown Revisited: The State Action Doctrine After Goldfarb, Cantor and Bates*, 77 Colum.L.Rev. 898, 916 (1977) (emphasis in original). The Note, at the end of the relevant section, was even more definite: "To summarize, a state action defense against injunctive relief should be available for private conduct only if the state has specifically required the conduct in question without abdicating final decisionmaking authority to private parties." *Id.* at 918.

The same footnote in the *Midcal* opinion also cited *Norman's on the Waterfront, Inc. v. Wheatley*, [444 F.2d 1011, 1018 \(3d Cir. 1971\)](#), and *Asheville Tobacco Bd. v. FTC*, [263 F.2d 502, 509-10 \(4th Cir. 1959\)](#), in which state action defenses were refused. Although both cases are ambiguous as to the requirements for state action, neither one implies that compulsion is not necessary for private parties.

state action exists.¹⁸ Unless it is the state [*542] rather than the individual or corporation that decides to act anticompetitively, a state action defense would be inconsistent with the wording and intent of the Sherman Act.

Appellants also urge that if we uphold the injunction against collective ratemaking and require competition among carriers, carriers will face the burden [**29] of additional expense in preparing individual rate filings. They also assert that the ability of state regulators to perform their task will be undermined. Even if these assertions were supported in the record,¹⁹ they would be irrelevant to proper antitrust analysis. Appellants' objections amount to the argument that competition does not work well, so the antitrust laws should not apply. This argument has consistently been rejected by the Supreme Court. See *National Society of Professional Engineers v. United States*, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978); *United States v. Socony-Vacuum Oil Co.*, 310 U.S. 150, 220-22, 60 S. Ct. 811, 842-843, 84 L. Ed. 1129 (1940). Moreover, if collective ratemaking is as desirable as appellants insist, then it should be but a small step for the states to compel it of all carriers. This latter point underscores a critical element of the state action issue. [HN19](#)[↑] Congress has instructed courts not to treat lightly overt collusion by private parties in setting prices. Permitting states to confer antitrust immunity on private parties who voluntarily elect state regulation would, in our view, open the way for the creation of large [**30] loopholes in federal **antitrust law**, loopholes whose contours would be difficult to contain. If a state wishes to displace federal antitrust laws, it should be permitted to do so only if it speaks in the clearest and strongest possible terms -- by compelling private parties to submit to its own regulatory system.

For the reasons stated above, we conclude that the district court properly decided that appellants were not entitled to claim state action immunity. On application for rehearing en banc appellants suggest no fault with the panel's determination that the Sherman Act was violated or that the *Noerr-Pennington* doctrine does not apply to the challenged activities. Accordingly, we reinstate that part of the panel opinion dealing with these issues, [672 F.2d 469, 476-81](#) [**31] (*5th Cir. 1982*),²⁰ and AFFIRM the judgment of the district court.

Dissent by: HILL; CLARK

Dissent

JAMES C. HILL, Circuit Judge, with whom R. LANIER ANDERSON, III, and THOMAS A. CLARK, Circuit Judges, join dissenting:

Once again, I respectfully dissent from the court's ruling that compulsion is an essential element of state action immunity when a state action defense is raised by a private defendant. I write not to profess great admiration for the existence of a state action exemption to federal antitrust laws, but rather to uphold what the Supreme Court has clearly articulated to be the status of the law in this area. The majority view that the Supreme Court could not possibly have meant what it said [**32] in *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc.*, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980), seems presumptuous at worst, and unsound policy as it pertains to the facts of this case at best. The *Midcal* test is clear and explicit. It should not be ignored simply because a different conclusion can be reached by reexamining the same line of cases already analyzed by the

¹⁸ Thus, a state may exempt a specific subclass of carriers from regulation or, as in *Parker*, it may predetermine a set amount or type of activity that may remain in the free market. In both of these cases, the state controls and sets the terms of the individual decision as to whether to compete. But where the option to compete or join a system of state regulation at all is up to the private party, state action does not exist.

¹⁹ We note that the government did not seek to enjoin the rate bureaus from performing joint rate studies or from undertaking joint publication of individual rates and agreements involving two or more parties who provide joint service.

²⁰ We also agree with the panel's determination that [HN20](#)[↑] there is no implied immunity from the antitrust laws resulting from the antitrust exemption granted motor carriers under [49 U.S.C.A. § 10706](#), or from the existence of pervasive state regulation permitted by [49 U.S.C.A. § 10521\(b\)](#). See [672 F.2d at 475 n. 9](#).

Supreme Court. In addition, the arbitrary nature of the compulsion requirement imposed by the majority today [*543] will significantly interfere with state trucking regulation. Like the federal government, the states interested in this litigation have adopted a sound program of regulation which embraces both the cost benefits of collective ratemaking and the added measure of competition that is preserved by permitting individual rate submissions. A compulsion requirement, as defined by the court, precludes such regulation -- no matter how clearly the state's policy may be expressed and supervised.

The principal flaw in the majority's position is not that it misinterprets the line of cases developing the doctrine of state action immunity. The court's analysis leading [***33] to its conclusion that compulsion is an essential element of the immunity for a private defendant certainly is plausible. However, the Supreme Court reached a different conclusion after examining the same line of cases, and the structure of the federal court system demands that we adhere to its ruling.

After reviewing the state action cases commencing with *Parker v. Brown*, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943), the Supreme Court set forth two standards for determining when the state's involvement is sufficient to justify immunity for the challenged conduct. "First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' by the State itself." *Midcal*, 445 U.S. at 105, 100 S. Ct. at 943 (citing *City of Lafayette v. Louisiana Power & Light Co.*, 435 U.S. 389, 410, 98 S. Ct. 1123, 1135, 55 L. Ed. 2d 364 (1978) (opinion of Brennan, J.)). In reaching this conclusion, the Court did not limit its analysis to those cases involving only state defendants, but instead examined all of its major decisions construing the state action exemption. The Court began its analysis [***34] by focusing on the state's involvement in the challenged restraint in light of the fact "that immunity for state regulatory programs is grounded in our federal structure." 445 U.S. at 103, 100 S. Ct. at 942. *Parker*, it argued, "found in the Sherman Act no purpose to nullify state powers. Because the Act is directed against 'individual and not state action,' . . . state regulatory programs could not violate it." *Midcal*, 445 U.S. at 104, 100 S. Ct. at 942 (construing *Parker*, 317 U.S. at 352, 63 S. Ct. at 314).

Using *Parker* as its foundation, the Court went on to evaluate several recent decisions applying *Parker*'s analysis. The line of cases discussed in this portion of *Midcal* include those involving private defendants, *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975), and *Cantor v. Detroit Edison Co.*, 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976), as well as those involving governmental defendants, *Bates v. State Bar of Arizona*, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977) and *New Motor Vehicle Board v. Orrin W. Fox Co.*, 439 U.S. 96, 99 S. Ct. 403, 58 L. Ed. 2d 361 (1978). After discussing [***35] each of these cases, a unanimous Court concluded that "these decisions establish two standards for antitrust immunity under *Parker v. Brown*," and proceeded to enunciate the two-part test set forth above. 445 U.S. at 105, 100 S. Ct. at 943. The Court did not purport to restrict application of its test to governmental entities; nor did it purport to derive the substance of its test from those cases involving governmental defendants. Indeed, as evidenced by the facts of the present case, to have drawn such a distinction on the basis of the identity of the defendant would have proven unreasonable and inconsistent with the federalism concerns underlying the doctrine.

When a state enacts a regulatory scheme characterized by a clearly articulated state policy and active and effective supervision over implementation of that policy, but its policy is that of permissive joint ratemaking, the state's policy will be undermined whether governmental entities or private participants are the subject of the lawsuit; few private companies will be foolish enough to participate in valid and constructive state programs when such participation [*544] is clouded by the threat of antitrust liability. [***36] ¹ [***38] As Justice Stewart noted in *Cantor*,

¹ There may be substantive limits on what conduct the state may immunize by making the challenged restraint a state policy. Indeed, there is some suggestion in Supreme Court precedent that federal antitrust laws do place substantive limits on the content of state economic regulation. See, e.g., *Schwegmann Bros. v. Calvert Distillers Corp.*, 341 U.S. 384, 71 S. Ct. 745, 95 L. Ed. 1035 (1951) (invalidating a Louisiana fair trade statute containing a "non-signer" provision under which a retailer could be enjoined from knowingly underselling another retailer whose prices were set under a resale price maintenance contract, exempt from antitrust laws under the Miller-Tydings Act, with a supplier). But see P. Areeda & D. Turner, *Antitrust Law* para. 212 at 70 (1978) (interpreting this decision as an inadequate supervision case). See generally Posner, *The Proper Relationship Between*

If *Parker v. Brown* . . . could be circumvented by the simple expedient of suing the private party against whom the State's "anticompetitive" command runs, then that holding would become an empty formalism, standing for little more than the proposition that Porter Brown sued the wrong parties.

Cantor, 428 U.S. at 616-17 n. 4, 96 S. Ct. at 3130 n. 4 (Stewart, J., dissenting). Cf. id. at 604, 96 S. Ct. at 3124 (Burger, C.J., concurring) (for *Parker* purposes, focus should be "on the challenged activity, not upon the identity of the parties to the suit."); City of Lafayette, 435 U.S. at 420, 98 S. Ct. at 1140 (Burger, C.J., concurring in part and dissenting in part) (same). "The *Parker* state action exemption reflects Congress' intention to embody in the Sherman Act the federalism principal that States possess a significant measure of sovereignty under our Constitution." Community Communications Co. v. City of Boulder, 455 U.S. 40, 102 S. Ct. 835, 842, 70 L. Ed. 2d 810 (1982); see also Parker, 317 U.S. at 351, 63 S. Ct. at 313-314.² That sovereignty is subverted when federal law prohibits **[**37]** private companies from participating in well-developed and actively supervised state programs.

Unlike an arbitrary compulsion requirement, the *Midcal* test affords states greater flexibility in the formation of constructive regulatory programs so long as the state clearly and affirmatively expresses its intent to do so and remains continuously and actively involved. *Midcal* demands a very high degree of state involvement before state action immunity may be claimed. The Court did not purport to expand application of the doctrine, or to overrule *Goldfarb*. Instead, *Midcal* **[**39]** simply clarifies that the focus for immunity purposes should be upon the extent of the state's involvement in the challenged activity -- that is upon the kind of imprint of state authority the anticompetitive activity bears. Compulsion certainly remains a relevant factor in this determination. Indeed, it is the best evidence that a challenged restraint is a "clearly articulated and affirmatively expressed" state policy. As Professor Areeda has observed, after *Midcal*, "literal compulsion is powerful evidence, if not determinative, of the existence of state policy, but is neither necessary nor sufficient for *Parker* immunity." P. Areeda, Antitrust Law para. 212.5 at 62 (Supp.1982); see also Turf Paradise, Inc. v. Arizona Downs, 670 F.2d 813, 823 n. 8 (9th Cir.), cert. denied, 456 U.S. 1011, 102 S. Ct. 2308, 73 L. Ed. 2d 1308 (1982). See generally M. Handler, *Reforming Antitrust Laws* 64-65 **[*545]** (1982); Page, *Antitrust, Federalism, and the Regulatory Process: A Reconstruction and Critique of the State Action Exemption After Midcal Aluminum*, 61 B.U.L.Rev. 1099, 1122 n. 141 (1981).

Nevertheless, the majority insists that compulsion must be the litmus **[**40]** test for the first prong of *Midcal* for a nongovernmental defendant. It relies primarily upon the fact that *Midcal* did not expressly overrule the compulsion language in *Goldfarb*. Admittedly, *Goldfarb* does suggest that as the state action exemption was developing the Supreme Court anticipated that some type of compulsion might be incorporated into the doctrine.³ **[**42]** The

State Regulation and the Federal Antitrust Laws, 49 N.Y.U.L.Rev. 693 (1974). These limits may be reached in areas that have not been traditionally regulated by states.

Here, however, the states are involved in a type of private utility regulation. The ability to regulate motor carriers involved in intrastate activities not only is a traditional state regulatory function, but also is an authority conferred on the states by the Congress. 49 U.S.C.A. § 10521(b) (West Supp.1982).

² In *Parker* the Court concluded that "The Sherman Act makes no mention of the state as such, and gives no hint that it was intended to restrain state action or official action directed by a state." 317 U.S. at 351, 63 S. Ct. at 313. The state action doctrine therefore was enacted to effectuate Congressional intent that state restraints on competition would not be prohibited. However, "there is nothing to indicate that the Congress of 1890 intended to leave state-compelled restraints intact but to subject state-authorized restraints to antitrust." M. Handler, *Reforming Antitrust Laws* 64-65 (1982).

³ At least one commentator has suggested that "the compulsion requirement was an overreaction to the facts presented in *Goldfarb*, where the conduct challenged was actually contrary to the pronouncements of the state, and in *Cantor*, where the state agency never addressed the practice involved in any meaningful manner." M. Handler, *supra* at 64. Professor Areeda also agrees with this assessment:

Indeed, *Goldfarb* and *Cantor* may be readily explained as decisions resting not on the absence of compulsion, but rather on the absence of any sort of meaningful state participation in the challenged conduct. In *Goldfarb*, the defendants were private groups enforcing fee schedules without adequate state authority or supervision. The essence of *Cantor* was the

Court's early references to compulsion, however, were ill-defined and were not restricted to cases involving private defendants. As noted in footnote ten of the majority's opinion, compulsion was discussed in both *Bates* and *Parker* wherein governmental defendants were the subject of antitrust scrutiny. Scholars and lower courts also were uncertain about the nature of the compulsion requirement and whether it was a requirement at all.⁴ In *Midcal*, however, the Supreme Court reviewed its earlier treatment of compulsion, and concluded that the state action doctrine had developed to the point where a single test could provide the necessary analysis and satisfy the concerns articulated in *Goldfarb*. Thus, as the Ninth Circuit already has observed, "It appears that the statement in *Goldfarb* regarding [**41] compulsion refers to a combination of the criteria that there be both a clear articulation of state policy and active supervision by the state itself. [421 U.S. at 788-91, 95 S. Ct. at 2013-2015.](#)" *Turf Paradise, Inc. v. Arizona Downs*, 670 F.2d 813, 823 n. 8 (9th Cir.), cert. denied, 456 U.S. 1011, 102 S. Ct. 2308, 73 L. Ed. 2d 1308 (1982).

Clearly, "a state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful." [Parker, 317 U.S. at 351, 63 S. Ct. at 314](#). The Court in *Midcal* recognized this limitation [**43] on state action immunity, [445 U.S. at 106, 100 S. Ct. at 943-944](#), and thus formulated a test which examines the extent of the state's involvement at two levels -- first, at the level of articulation of state policy in favor of the challenged restraint and second, at the level of implementation of that policy through active supervision. Significant involvement at both levels is necessary to support a state action exemption. And it is the combination of these two criteria that effectively guarantees that the state has considered the course of its conduct and has chosen to replace open market pricing with state regulation. Hence, the balance struck in *Midcal* between the federal policy of competition and state sovereignty is thus: [*546] the state may choose to displace competition with economic regulation by making clear its intention to do so; having made that choice, however, the state bears the burden of ensuring that this policy is furthered and that the state itself remains the ultimate decision maker.

The Court's recent decision of [Community Communications Co. v. City of Boulder, 455 U.S. 40, 102 S. Ct. 835, 70 L. Ed. 2d 810 \(1982\)](#), amply illustrates the degree [**44] of directness and clarity necessary to satisfy the first prong of *Midcal*. In *Boulder*, the Court ruled that because the State's constitutional delegation of home rule authority to municipalities was not a "clear articulation and affirmative expression" of state policy in the area of cable television, a city's cable television moratorium was not afforded state action immunity. [102 S. Ct. at 843](#). In other words, when a home rule provision was added to Colorado's constitution, the state could not foresee that it was expressly authorizing a cable television moratorium. *Boulder* therefore can be fairly read to stand for the proposition that the state must be fully aware of what it is doing when it articulates and affirmatively expresses its policy to supplant open market competition. *Boulder* also is significant because a majority of the Court appears to have ruled that "a municipality may invoke the *Parker* doctrine only to the same extent as can a private litigant." [102 S. Ct. at 850](#) (Rehnquist, J., dissenting); accord M. Handler, *supra*, at 64 ("*Boulder*, however, indicates that municipalities enjoy no more liberal a standard of immunity than private parties.").

[**45] The majority, however, would adhere to the position that the only way a state can articulate a clear and express policy (when a private defendant is sued) is by compelling all carriers to engage in collective rate-making. Thus, the court maintains that if a motor carrier is permitted to join in the development and submission of joint rates

state's presumed indifference to the utility's "free" light bulb program; state approval, even if deliberate, was not intended to displace the antitrust laws.

Areeda, *Antitrust Immunity for "State Action" After LaFayette*, 95 Harv.L.Rev. 435, 439 n. 19 (1981).

⁴ Prior to *Midcal*, Professors Areeda and Turner observed that the precise meaning of the compulsion test and its role in determining immunity was left unclear by *Goldfarb* and *Cantor*. 1 P. Areeda & D. Turner, *Antitrust Law* para. 215 at 93 (1978); accord *Caribe Trailer Systems, Inc. v. Puerto Rico Maritime Shipping Authority*, 475 F. Supp. 711, 724-25 (D.D.C. 1979). Thus, they proposed that two requirements were essential to sustain a defense of state action immunity: "(1) adequate public supervision and (2) a clear state purpose to displace *antitrust law*." Areeda & Turner, *supra*, para. 212 at 71. The similarity between this proposal and the test eventually adopted in *Midcal* suggests that the Court perceived the reasonableness of dropping its earlier compulsion language and adopting a simple and clear rule of general applicability.

through the bureaus, at its election, such a program cannot be a clearly and affirmatively expressed state policy. Initially, it seems clear that a state can articulate clearly a policy which incorporates both the benefits of joint ratemaking and separate filings. Indeed, such a policy of permissive joint ratemaking may be far superior to the complete mandatory joint ratemaking suggested by the majority. As the district court suggested, rate bureaus provide important support services to state regulatory bodies such as the staff experts and facilities necessary to collate data for the preparation of cost studies. See *United States v. Southern Motor Carriers Rate Conference, Inc.*, 467 F. Supp. 471, 476 (N.D.Ga. 1979). See generally H.R. Rep. No. 1100, 80th Cong., 1st Sess. (1947). However, individual rate submissions also provide an important [**46] check on rate bureaus and preserve a certain degree of competition. For example, if an individual rate submission is significantly lower than a bureau rate proposal, the regulatory body is alerted to possible abuse of the privilege of collective ratemaking, and is better able to enforce and supervise its program than if there is no possibility of an individual rate proposal.

The irony of this litigation is that the Government seeks to enjoin states from implementing a transportation policy which parallels our national transportation policy. Federal law regulating interstate motor carriers adopts a policy of permissive joint ratemaking, and if a carrier chooses to participate in government approved collective ratemaking it is expressly exempt from antitrust liability. 49 U.S.C.A. § 10706(b)(2) (West Supp. 1982), former 49 U.S.C.A. § 5(b) (1959). Drafters of the original federal exemption for collective interstate ratemaking, upon which North Carolina's law is modeled, stated the following with respect to the conflict between the antitrust laws and national transportation policy:

It is recognized by all who are familiar with the problems of transportation that the carriers [**47] subject to the Interstate Commerce Act cannot satisfactorily meet their duties and responsibilities thereunder and the basic purposes of the Act cannot be effectively carried out, unless such carriers are permitted to engage in joint activities to a substantial extent. . . . It is obvious that confusion [*547] and uncertainty are inevitable where these two principles of public policy [antitrust laws and national transportation policy], administered and enforced by different agencies, are applied in such a way that there is conflict between them.

H.R. Rep. No. 1100, 80th Cong., 1st Sess. 4-5 (1947); S. Rep. No. 44, 80th Cong., 1st Sess. 3-4 (1947). Although there have been modifications of the statutory exemption for interstate carriers engaged in collective ratemaking, and there are those who would disagree with the current status of the federal regulatory framework, few would seriously argue that the federal government had not clearly articulated and affirmatively expressed a national transportation policy of permissive joint ratemaking.

Further evidence of a state articulation of state policy is the fact that all rates are closely supervised by the state.⁵ [**49] This [**48] also illustrates the importance of satisfying both prongs of the *Midcal* test, for together they satisfy the function served by the *Goldfarb* formulation. The active supervision requirement is essential to the *Midcal* test because it inhibits the influence of economic self interest of the companies involved in the rate setting process. Such private self interest does not warrant the cloak of state action immunity. But, by requiring that a state actively supervise implementation of its economic policy, the *Midcal* test ensures that the state has determined that the challenged activity is in furtherance of the state's policy. When the state ceases to be the real party in interest, the sovereignty of the state cannot be said to be impaired by withholding state action immunity.⁶ But when the

5

While we treat these as separate requirements, we nevertheless want to stress their interrelationship. The existence of state supervision over anticompetitive behavior may, for example, indicate the requisite state intent as well. Similarly, inaction on the part of the state may both represent a failure of supervision and reflect an ambiguous state purpose.

1 P. Areeda & D. Turner, *Antitrust Law* P212 at 71 (1978).

6

The existence of a state action immunity enables states, like the federal government itself, to define areas inappropriate for market control. Moreover, the adequate supervision criterion ensures that state-federal conflict will be avoided in those areas in which the state has demonstrated its commitment to a program through its exercise of regulatory oversight. At the same time, it guarantees that when the Sherman Act is set aside, private firms are not left to their own devices. Rather,

state is the real party in interest, its continuous and active supervision evidences its intent to impose state regulation in lieu of open market competition, and withholding antitrust immunity does impair state sovereignty.

Because it is the requirement of active supervision which deters abuse of joint ratemaking procedures, if any distinction is to be drawn between public and private defendants, it should be in the amount of supervision deemed necessary to satisfy this portion of the *Midcal* test. It makes no sense to require compulsion for private and not public defendants when [**50] in both instances the same state policy will be thwarted by the threat of antitrust liability. Looking to the degree of active supervision, on the other hand, may be more relevant in a suit against a private defendant because it is possible that abuse of the state system may be an issue.⁷ Nevertheless, because the Government does not challenge the adequacy of any state's supervision in the present case, there is no reason to draw this distinction.

[**51] [*548] The only issue in this case, therefore, is whether the individual states involved clearly articulated and affirmatively expressed state policy in favor of permissive ratemaking. As set forth in my original dissent, I think it clear that the states of North Carolina, Tennessee and Georgia have such a policy. Nevertheless, because the district court entered a final judgment before the Supreme Court's pronouncements in *Midcal*, I would remand the case for further development of the factual record and for evaluation under the *Midcal* test.

THOMAS A. CLARK, Circuit Judge, with whom RONEY, Circuit Judge, joins dissenting:

I concur in Judge Hill's dissent and his thorough analysis of *Midcal* which demonstrates that compulsion is not a prerequisite for application of the state action exception.

Differing interpretations of Supreme Court opinions are not uncommon. What disturbs me so deeply about the majority opinion is that it completely ignores the Interstate Commerce Act, public policy, history, and fairness. As pointed out by Judge Hill, the functions of rate bureaus or conferences declared illegal by the majority have been accepted national policy for more [**52] than thirty years. These same defendants have performed the identical functions¹ for interstate carriers whose rates are fixed by the Interstate Commerce Commission. These functions, when performed by these bureaus for interstate carriers are exempted from the Antitrust Act by the Interstate Commerce Act:

As provided by this subsection, a motor common carrier of property providing transportation or service subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title may enter into an agreement with one or more such carriers concerning rates (including charges between carriers and compensation paid or received for the use of facilities and equipment), allowances, classifications, divisions, or rules related to them, or procedures for joint consideration, initiation, or establishment of them. . . . If the Commission approves the agreement, it may be made and carried out under its terms and under the conditions required by the Commission, and the antitrust laws, as defined in the first section of the Clayton Act ([15 U.S.C. 12](#)), do not apply to parties and other persons with respect to making or carrying out the agreement.

[49 U.S.C.A. \[**53\] § 10706\(b\)\(2\)](#).

immunity will be granted only when the state has substituted its own supervision for the economic constraints of the competitive market.

1 P. Areeda & D. Turner, [Antitrust Law](#) para. 213 at 73 (1978) (footnotes omitted).

⁷ Professor Areeda has even suggested that *Midcal*'s active supervision requirement may be inapplicable to governmental defendants. Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv.L.Rev. 435, 445 n. 50 (1981) ("A few courts erroneously appear to use the *Midcal* formula (clearly articulated state policy plus active supervision of private parties) to require state supervision of governmental defendants.") In *Community Communications Co. v. City of Boulder*, however, the Supreme Court expressly declined to decide whether the active supervision criterion must be met by a municipality with respect to the challenged ordinance. [455 U.S. 40, 102 S. Ct. 835, 841 n. 14, 70 L. Ed. 2d 810 \(1982\)](#).

¹ Described in the majority opinion, at 534.

The states involved here likewise permit joint filings of rates by carriers through the medium of a bureau or conference, and permit individual carriers to file their own rates. Thus, not all carriers are compelled to file rates through a conference or bureau. The majority holds that if a state compelled uniform action by the carriers, such a state statute would meet the *Parker v. Brown* requirement of state action and joint action would be exempt from the antitrust statute. Again, I turn to the Interstate Commerce Act and find that the national act forbids exclusive rate-fixing in the following manner:

(2) The Commission may not approve an agreement under this section --

* * *

(C) establishing a procedure for determination of a matter through joint consideration unless the Commission finds that each party to the agreement has the absolute right under it to take independent action before or after a determination is made under that procedure.

[**54] [49 U.S.C.A. § 10706\(d\)\(2\)](#). Thus, as can be seen, the Commission does not compel carriers to participate in the agreement. The state statutes are patterned very much after the national act, permitting joint action through the bureaus and conferences, but also permitting individual action.

By way of hypothecation, Southern Motor Carriers Rate Conference, Inc. may file with the Interstate Commerce Commission rates for the carriage of carpeting from Rome, Georgia, to Nashville, Tennessee. [*549] That same Conference may perform the identical function for the intrastate carriage of carpeting from Rome to Macon, Georgia, approximately the same distance. This has been done for three decades prior to the filing of this action in 1976. It is patently unfair at this late date to declare that these defendants violated the antitrust act when following identical procedures that are not violative of the antitrust act when done in interstate commerce.

HN2[ Guilty Pleas, Allocution & Colloquy

District courts are required to act in substantial compliance with the dictates of [Fed. R. Crim. P. 11](#), although "ritualistic" compliance is not required. If a district court, in accepting a guilty plea, fails to comply substantially with [Rule 11](#) requirements, the guilty plea should be set aside and the defendant allowed to plead anew.

HN3 Sherman Act, Penalties

A sentence imposed by a district judge, if within statutory limits, is generally not subject to review.

Counsel: J. Clifford Gunter III, Michael Kuhn, Bracewell & Patterson, Houston, Texas, for Appellant, Missouri Valley Construction Co.

Robert V. Allen, Richard J. Braun, Department of Justice, Chicago, Illinois, William F. Baxter, Assistant Attorney General, Barry Grossman, Stephen F. Ross, Department of Justice, Washington, District of Columbia, for Appellee.

Judges: Heaney, John R. Gibbon, Circuit Judges, and Dumbauld, Senior District Judge. * Dumbauld, Senior District Judge, dissenting.

Opinion by: GIBSON

Opinion

[*1027] JOHN R. GIBSON, Circuit Judge.

The significant issue [*2] before us is whether the district court erred in failing to advise [*1028] the representative of defendant Missouri Valley Construction Company that it was not entitled to withdraw a guilty plea, based on a recommendation of sentence under [Fed. R. Crim. P. 11\(e\)\(1\)\(B\)](#). The corporate defendant, in entering its guilty plea, was told that the recommendation was not binding on the court but was not advised that the plea could not be withdrawn, as required by [Fed. R. Crim. P. 11\(e\)\(2\)](#). We hold that the district court erred and reverse and remand for further proceedings.

On December 23, 1981, the United States and Missouri Valley entered into a pre-indictment plea agreement. Missouri Valley, a subsidiary of Peter Kiewit Sons, Inc., agreed to plead guilty to a two-count indictment alleging violations of [section 1](#) of the Sherman Act, [15 U.S.C. § 1 \(1976\)](#). In return, the Government agreed not to prosecute several Kiewit companies or employees for bid rigging in Nebraska, Oklahoma, and Kansas (with a named exception) and further agreed to recommend to the district court a fine of \$1,000,000 in accordance with [Fed. R. Crim. P. 11\(e\)\(1\)\(B\)](#). The agreement stated that the Government's [*3] recommendation was not binding on the sentencing judge and that conviction under the two-count indictment could result in a maximum fine of \$2,000,000.

On January 14, 1982, Missouri Valley was indicted on two counts alleging that Missouri Valley had conspired with other contractors to rig bids and allocate highway construction contracts, in violation of the Sherman Act, [15 U.S.C. § 1 \(1976\)](#). On the same date, Missouri Valley entered a plea of guilty to the two-count indictment. Before accepting appellant's plea of guilty, the district court questioned the company's representative, Mr. Thoendel, concerning the existence and nature of the plea agreement. The following colloquy occurred:

THE COURT: You understand, do you not, Mr. Thoendel, . . . that this plea agreement calls upon the United States Attorney to make certain recommendations and you realize that those recommendations are only recommendations and that while I will listen carefully to them and give them full consideration that they are not binding upon me, that is to say, I need not accept them? You understand that?

MR. THOENDEL: Yes, Your Honor.

* The Honorable Edward Dumbauld, Senior District Judge, United States District Court for the Western District of Pennsylvania, sitting by designation.

THE COURT: Let me explain that more carefully because I use the [**4] word accept and I shall explain that. I mean that the plea agreement calls for there to be recommendations to me. But you realize that I may or may not give to the corporation some sentence which is different from the recommendation?

MR. THOENDEL: Yes, Your Honor.

THE COURT: And I do that upon the basis of my own thinking and it may not match their recommendation.

MR. THOENDEL: Yes, Your Honor.

THE COURT: All right, sir. Very well. In that tone, then, I will accept the plea of guilty on behalf of the corporation as to Counts I and II.

On February 19, 1982, the district court rejected the sentencing recommendation of the Government, and fined Missouri Valley \$1,000,000 on each count, a total of \$2,000,000.

Missouri Valley's meritorious contention raised in its reply brief is that the district court did not comply with the requirements in [Fed. R. Crim. P. 11\(e\)\(2\)](#) when it accepted the guilty plea, in that it did not advise defendant that if the recommendation for sentencing were not accepted, the defendant would have no right to withdraw the plea.¹

[**5] There is no dispute that the plea agreement here is of the type specified in [Fed. R. Crim. P. 11\(e\)\(1\)\(B\)](#). Under the type (B) agreement, a prosecutor promises only to make a recommendation, or agree not to oppose the defendant's request, for a particular sentence, with the understanding that [*1029] such recommendation or request shall not be binding upon the court. It is distinguishable from other types of plea agreements in that an agreement to recommend or not to oppose is discharged when the prosecutor performs as he agreed to do. Advisory Committee Note to [Fed. R. Crim. P. 11\(e\)\(2\)](#). By contrast, the remaining types of plea agreements specified in [rule 11\(e\)\(1\)](#), types (A) and (C), provide for a particular disposition, whether it be charge dismissal or an agreed-to sentence. The distinction is significant because in a type (B) plea agreement neither the acceptance provisions of [rule 11\(e\)\(3\)](#) nor the rejection provisions of [rule 11\(e\)\(4\)](#) are applicable.² Advisory Committee Note to [Fed. R. Crim. P. 11\(e\)\(2\)](#). Thus, if a district court imposes a sentence different from that recommended in a type (B) agreement, under [rule 11](#) it need not offer the defendant an opportunity [**6] to withdraw his plea.³

To ensure that defendants would fully understand the nature of a type (B) agreement, an amendment was added to [rule 11\(e\)\(2\)](#), effective August 1, 1979. The amendment provides that "If the agreement is of the type specified in subdivision (e)(1)(B), the court shall advise the defendant [**7] that if the court does not accept the recommendation or request the defendant nevertheless has no right to withdraw his plea".⁴ The rationale for the amendment is summarized in the Advisory Committee Note as follows:

¹ Missouri Valley also contends (1) that the district court failed to comply with [Fed. R. Crim. P. 11\(e\)\(4\)](#) by not affording it an opportunity to withdraw its plea, and (2) that the district court abused its discretion in assessing the maximum fine under the Sherman Act, [15 U.S.C. § 1 \(1976\)](#).

² Appellant's contention with respect to the district court's alleged violation of [Fed. R. Crim. P. 11\(e\)\(4\)](#) is thus rejected.

³ Nor is there any constitutional requirement that a district court permit a defendant to withdraw a guilty plea when that court decides after the hearing not to accept a recommendation for sentencing. Cf. [Lindner v. Wyrick](#), 644 F.2d 724, 728 (8th Cir.) (when defendant is aware that plea is not in exchange for particular sentence but hopes state trial court will follow sentence recommendation, defendant not misled so as to undermine voluntariness of plea if court rejects sentence recommendation), cert. denied, 454 U.S. 872, 70 L. Ed. 2d 178, 102 S. Ct. 345 (1981).

⁴ The full text of amended [rule 11\(e\)\(2\)](#) provides as follows:

(2) **HN1** [↑] *Notice of Such Agreement.* If a plea agreement has been reached by the parties, the court shall, on the record, require the disclosure of the agreement in open court or, on a showing of good cause, in camera, at the time the plea is offered. If the agreement is of the type specified in subdivision (e)(1)(A) or (C), the court may accept or reject the agreement, or may defer its decision as to the acceptance or rejection until there has been an opportunity to consider the presentence report. If the agreement is of the type specified in subdivision (e)(1)(B), the court shall advise the defendant

Because a type (B) agreement is distinguishable from the others in that it involves only a recommendation or request not binding upon the court, it is important that the defendant be aware that this is the nature of the agreement into which he has entered. The procedure contemplated by the last sentence of amended subdivision (e)(2) will establish for the record that there is such awareness.

[**8] The established rule in this circuit is that [HN2](#) district courts are required to act in substantial compliance with the dictates of [rule 11](#), although "ritualistic" compliance is not required. See [United States v. Scharf, 551 F.2d 1124, 1129 \(8th Cir., cert. denied, 434 U.S. 824, 54 L. Ed. 2d 81, 98 S. Ct. 70 \(1977\)\)](#); [United States v. Lambros, 544 F.2d 962, 966 \(8th Cir. 1976\)](#), cert. denied, 430 U.S. 930, 51 L. Ed. 2d 774, 97 S. Ct. 1550 (1977). If a district court, in accepting a guilty plea, fails to comply substantially with [rule 11](#) requirements, the guilty plea should be set aside and the defendant allowed to plead anew. See [United States v. Riegelsperger, 646 F.2d 1235, 1237 \(8th Cir. 1981\)](#); [United States v. Cammisano, 599 F.2d 851, 855, 857 \(8th Cir. 1979\)](#).

In this case, the district court went only half way in meeting the notice requirements of [rule 11\(e\)\(2\)](#). Although the court informed the defendant that the court was not required to accept the recommendation contained in the plea agreement, it failed to go further and to advise the defendant that if the court did not accept the recommendation, the defendant would have no right to withdraw [**9] the plea. [Rule 11\(e\)\(2\)](#) clearly, precisely, and unequivocally requires that "the court *shall* advise the defendant that if the court does not accept the recommendation or request the defendant nevertheless has no right to withdraw his plea" (emphasis added). The district court did not comply with this mandate.

The Government argues that the defendant has shown no prejudice because it was aware that it was entering into a type (B) agreement and thus knew the risks it was taking in making that agreement. The Government points to three factors in particular: the written plea agreement itself, which states that it is a type (B) agreement; the trial court's oral admonishments that it was not required to accept the sentence recommended in the plea agreement; and appellant's adequate representation by retained counsel. Under [McCarthy v. United States, 394 U.S. 459, 22 L. Ed. 2d 418, 89 S. Ct. 1166 \(1969\)](#), we do not believe appellant is required to show prejudice to obtain relief on this direct appeal. See [id. at 471](#) ("prejudice inheres in a failure to comply with [Rule 11](#)"). See generally 9 *Federal Procedure, Lawyers Edition* § 22:548, at 216 (1982). Even so, it [**10] is our view that the district court's failure to give the mandated warning resulted in evident prejudice to appellant.

Because of the failure to comply with the clear mandate of [rule 11\(e\)\(2\)](#), we reverse the conviction and remand with instructions that the defendant be given an opportunity to plead anew.⁵

[**11]

Dissent by: DUMBAULD

that if the court does not accept the recommendation or request the defendant nevertheless has no right to withdraw his plea.

Prior to the 1979 amendment, [rule 11\(e\)\(2\)](#) read as follows:

(2) *Notice of Such Agreement.* If a plea agreement has been reached by the parties, the court shall, on the record, require the disclosure of the agreement in open court or, on a showing of good cause, in camera, at the time the plea is offered. Thereupon the court may accept or reject the agreement, or may defer its decision as to the acceptance or rejection until there has been an opportunity to consider the presentence report.

⁵ We need not reach appellant's alternative argument that the district court abused its discretion in assessing the maximum fine under the Sherman Act, [15 U.S.C. § 1 \(1976\)](#). We observe, however, that [HN3](#) a sentence imposed by a district judge, if within statutory limits, is generally not subject to review. [United States v. Tucker, 404 U.S. 443, 447, 30 L. Ed. 2d 592, 92 S. Ct. 589 \(1972\)](#); [United States v. Ross, 666 F.2d 1163, 1165 \(8th Cir. 1981\)](#). We further observe that the district court gave careful consideration not only to the severity of the offense but also to arguments urged by appellant in mitigation. Finally, we note that the district court allowed the appellant to pay the fine over a five-year period so as not to bring appellant "to its knees," and that other Kiewit corporations were protected from antitrust prosecution for bid rigging.

Dissent

DUMBAULD, Senior District Judge, dissenting:

In my opinion, the conclusion reached by the majority, although warrantably based upon the *language* of [Rule 11\(e\)\(2\) F.R.Cr.P.](#), exalts form over substance and defeats the *policy* of that rule. It also contravenes the wise policy that criminal procedure should be as free as possible from unnecessary complexities, since the greater the number of artificial niceties that must be scrupulously heeded with punctilious exactitude, the greater will be the volume of litigation unrelated to the guilt or innocence of the defendant.

The majority insists upon the ritualistic incantation of "talismanic phrases" such as the indispensable common law formula "warrantizando vendidit or barganizasset," which Justice Frankfurter scathingly denounced in [Yonkers v. I.C.C., 320 U.S. 685, 698, 88 L. Ed. 400, 64 S. Ct. 327 \(1944\)](#).

It must be confessed that to some extent the terms of [Rule 11](#) itself transgress this sound policy. For example, the Rule provides that the sentencing judge must "personally address the defendant" and point out the rights which the defendant waives by entering a plea of guilty. Carried to its logical [\[**12\]](#) conclusion, this necessitates that the judge pronounce the defendant's name in the vocative case. Such a requirement is hardly essential, since the defendant is usually standing at the bar at the side of his attorney, and is personally aware of every word that is spoken, whether or not he is [\[*1031\]](#) specifically identified as the addressee of the court's inquiries. It is also questionable whether the prescribed procedure is more impressive or efficacious than the former practice where the prosecutor or the defendant's own attorney enunciated the "laundry list" of rights waived by entry of a plea of guilty, and the judge merely reinforced the enumeration by stressing some of the crucial points.

Whatever the means used, the basic and fundamental purpose of the Rule is to minimize frivolous post-conviction claims that the plea was not voluntary but clearly placing on the record admissions by the defendant which preclude the assertion of such claims.¹ Any method of attaining this objective should be sufficient insofar as substance is concerned.

[\[**13\]](#) It is true that the majority's view finds support in [McCarthy v. U.S., 394 U.S. 459, 464, 22 L. Ed. 2d 418, 89 S. Ct. 1166 \(1969\)](#), where it is stated that "any noncompliance with [Rule 11](#) is reversible error" and that the remedy for such violation (a remedy formulated in exercise of the Supreme Court's supervisory authority) is to permit withdrawal of the plea.

The McCarthy case is one of the less successful products of the "Warren Court"² and the Advisory Committee's Note points out the existence of "uncertainty as to the continued vitality and the reach of McCarthy."³

To eliminate the evil effects of *McCarthy* the committee proposed its new [Rule 11\(h\)](#), proclaiming that:

Any variance from the procedures required by this rule which does not affect substantial rights shall be disregarded.

In further criticism of the *McCarthy* automatic reversal rule the Advisory Committee Note [\[**14\]](#) explains that:

Though the *McCarthy* per se rule may have been justified at the time and in the circumstances which obtained when the plea in that case was taken, this is no longer the case. For one thing, it is important to recall that

¹ Advisory Committee Note to proposed [Rule 11\(h\)](#), in *Preliminary Draft of Proposed Amendments to the Federal Rule of Criminal Procedure*, October 1981, 25-30. The proposed [Rule 11\(h\)](#) was approved by the Judicial Conference of the United States at its September, 1982 meeting. 14 *The Third Branch* (No. 10, October 1982) 7.

² The opinion is by the former Chief Justice himself.

³ *Op. Cit.* note 1, *supra*, at 26.

McCarthy dealt only with the much simpler pre-1975 version of [Rule 11](#), which required only a brief procedure during which the chances of a minor, insignificant and inadvertent deviation were relatively slight. This means that the chances of a *truly* harmless error . . . are much greater under [Rule 11](#) than under the version before the Court in *McCarthy*. It also means that the more elaborate and lengthy procedures of present [Rule 11](#), again as compared with the version applied in *McCarthy*, make it more apparent than ever that a guilty plea is not "a mere gesture, a temporary and meaningless formality reversible at the defendant's whim," but rather "a grave and solemn act", which is 'accepted only with care and discernment.' . . . A plea of that character should not be overturned, even on direct appeal, when there has been a minor and technical violation of [Rule 11](#) which amounts to harmless error.⁴

[**15] The complex character of [Rule 11](#) in its present form is described by the Advisory Committee Note as follows:

Prior to the amendments which took effect on Dec. 1, 1975, [Rule 11](#) was very brief; it consisted of but four sentences. The 1975 amendment increased significantly the procedure which must be undertaken when a defendant tenders a plea of guilty or nolo contendere, but this [*1032] change was warranted by the "two principal objectives" then identified in the Advisory Committee Note: (1) ensuring that the defendant has made an informed plea; and (2) ensuring that plea agreements are brought out into the open in court. An inevitable consequence of the 1975 amendments was some increase in the risk that trial judge, in a particular case, might inadvertently deviate to some degree from the procedure which a very literal reading of [Rule 11](#) would appear to require.

This being so, it became more apparent than ever that [Rule 11](#) should not be given such a crabbed interpretation that ceremony was exalted over substance. As stated in *United States v. Scarf*, [sic] [551 F.2d 1124 \(8th Cir. 1977\)](#), concerning amended [Rule 11](#): "It is a salutary rule, and district courts are [**16] required to act in substantial compliance with it although * * * ritualistic compliance is not required."

* * *

Two important points logically flow from these sound observations. One concerns the matter of construing [Rule 11](#): it is not to be read as requiring a litany or other ritual which can be carried out only by word-for-word adherence to a set "script." The other, specifically addressed in a new subdivision [sic] (h), is that even when it may be concluded [Rule 11](#) has not been complied with in all respects, it does not inevitably follow that the defendant's plea of guilty or nolo contendere is invalid and subject to being overturned by any remedial device then available to the defendant.⁵

To my mind, the policy set forth in support of the proposed [Rule 11\(h\)](#) approved by the Judicial Conference is conclusive and convincing, and should control the decision of the case at bar.

That [Rule 11](#) should be interpreted as requiring "substantial rather than ritualistic" compliance [**17] with its terms is the established rule in this Circuit. [U.S. v. Scharf, 551 F.2d 1124, 1129-30](#) (C.A. 8, 1977); [U.S. v. Lambros, 544 F.2d 963, 966](#) (C.A. 8, 1976). In the case at bar there is no doubt that the existence and terms of the plea bargain have been clearly recorded in writing, and that the government has fully performed its undertakings set forth in the agreement. For the defendant to be permitted to upset the agreement at this late date would be prejudicial to the government, especially in the light of the terms of the agreement relating to abandonment of prosecutions in other States than Nebraska. (See [544 F.2d at 967](#)).

⁴ *Ibid.*, at 28-29. So too, this Court in [U.S. v. Lambros, 544 F.2d 962, 965](#) (C.A. 8, 1976) said: "[Rule 11](#) proceedings are not an exercise in futility. The plea of guilty is a solemn act not to be disregarded because of belated misgivings about the wisdom of the same."

⁵ *Ibid.*, at 25-26.

The substantial compliance test was recently applied with respect to waiver of jury trial under Rule 23 in [U.S. v. DeMichael, 692 F.2d 1059, 1061](#) (C.A. 7, 1982):

From the foregoing summary gleaned from the transcript, it seems clear that the defendant knowingly and intentionally waived his right to jury trial. The contention in this Court to the contrary is an obvious afterthought. He sat through and took part in steps specifically designed to eliminate the impending jury trial and empower the Court to dispose of the case on the basis [**18] of stipulated facts, preserving for appellate review the defenses upon which he really relied. . . .

It is true that we feel misgivings in the departure from the normal practice of requiring that jury trial be waived "in writing with the approval of the court and the consent of the government" in accordance with FRCrP 23(a). In substance and fact, however, there was a waiver in writing, signed by the defendant, and approved by the Court and the Government. It would be adhering to form over substance, in view of the circumstances of the case at bar, to insist upon an additional separate piece of paper and further colloquy.

We think it proper to emphasize, however, that the proper practice, which should uniformly be observed in the absence of unusual circumstances, is as stated in [U.S. v. Scott, 583 F.2d 362, 364 \(7th Cir. 1978\)](#).

[*1033] The substantial performance standard should be applied in the case at bar.

The plea bargain itself discloses that it constitutes an "agreement in accordance with [Rule 11\(e\)\(1\)\(B\)](#)." Surely the subscribing corporation through its officers, experienced businessmen involved in [antitrust law](#) entanglements, and represented by able [**19] counsel, must have been familiar with the text of [Rule 11](#) and the nature and characteristics of type (B) pleas. They knew what they were doing and did it knowingly and intentionally and voluntarily.⁶

The sophistication of the parties involved in this plea is shown by the fact that negotiations for the plea were undertaken *before any indictment was returned* and that in execution of the agreed-upon steps the plea was entered on the same day that the contemplated indictment was returned.

The agreement itself was a five-page written document, drafted with the complexity and care of a business contract or a piece of tax legislation.⁷

[20]** Moreover, the terms of the agreement were highly advantageous to defendant. The plea not only disposed of the pending litigation in its incipency, but obligated the government not to prosecute any present or former Kiewit⁸ employees or to seek their testimony without a grant of immunity, or to further prosecute Kiewit for antitrust violations in two other States besides Nebraska.⁹ These advantages were obtained by the plea, and would not have been available if defendant had elected a jury trial.

[Rule 11\(e\)\(1\)\(B\)](#) describes a category of plea bargain which does not bind the Court and can be fully performed by the prosecutor by carrying out his promises, either to recommend a particular sentence or to refrain from opposing the defendant's [**21] recommendations to the Court. It differs in that respect from bargains under [Rule 11\(e\)\(1\)\(A\)](#) and [Rule 11\(e\)\(1\)\(C\)](#). (A) and (C)¹⁰ pleas must either be "rubberstamped" (i.e., accepted without

⁶ To ensure the voluntary nature of the plea and to manifest that nature indisputably on the record are the two main objectives of [Rule 11](#). See note 1, *supra*.

⁷ The executed agreement in writing surely constitutes the definitive memorialization of the plea bargain in the record which forms the second objective of [Rule 11](#). See note 6, *supra*.

⁸ This refers to the company of which defendant is a subsidiary, and all other subsidiaries in Kansas and Oklahoma, in addition to Nebraska.

⁹ In other States than Kansas, Oklahoma, and Nebraska the government reserved the right to prosecute Kiewit companies or employees.

change) by the Court [under [Rule 11\(e\)\(3\)](#)] or rejected [under [Rule 11\(e\)\(4\)](#)]. In case of rejection the defendant is free to withdraw the plea.

As was clearly stated in the plea itself in the case at bar, and as the court emphatically stressed at the time of sentence, the court was not bound, in this category (B) plea arrangement, to agree to the recommended sentence.

It is clearly the policy of [Rule 11](#) that a type (B) plea cannot be withdrawn by the defendant, whether the Court accepts or rejects [\[**22\]](#) the recommendation made by the parties. Unfortunately, the draftsmen of the Rule, instead of stating that proposition clearly and categorically in a separate subsection, as was done to describe the consequences of acceptance or rejection of (A) and (C) pleas, left it to be inferred from the direction contained in the last sentence of [Rule 11\(e\)\(2\)](#) that the Court should remind the defendant "that if the court does not accept the recommendation or request the defendant nevertheless has no right to withdraw his plea."

The majority hold that because the sentencing judge neglected to deliver this "talismanic" reminder, the defendant shall be free to escape from its type (B) plea,¹¹ in [\[*1034\]](#) the teeth of the clear policy of [Rule 11](#) that type (B) pleas cannot be withdrawn.

[\[**23\]](#) Because of this square conflict between the majority's permission to plead anew and the policy of [Rule 11](#) that (B) pleas cannot be withdrawn, I would interpret "shall" in [Rule 11\(e\)\(2\)](#) as directory rather than mandatory,¹² and conclude that the sentencing judge's failure to remind the defendant of this characteristic of its class (B) plea was harmless error, not affecting the defendant's substantial rights, and should be disregarded. Hence, the sentence as pronounced should stand. I therefore respectfully dissent.

[\[**24\]](#)

End of Document

¹⁰ This classification of pleas reminds one of the categories of reorganization under the Internal Revenue Code, [26 U.S.C. 368](#), of which practitioners discourse blithely as "B reorganizations" and the like. See Rabkin and Johnson, *Federal Income, Gift and Estate Taxation*, Vol. III, chapter 32, § 32.01 et seq.

¹¹ Under the remedy fashioned by the Supreme Court under its supervisory power ([394 U.S. at 464](#)), withdrawal of the plea is the appropriate remedy for any deviation from the procedures prescribed by [Rule 11](#). In the case at bar, however, such a consequence clearly conflicts with the policy which characterizes a (B) plea as one which cannot be withdrawn because of rejection by the Court of the sentencing recommendation contained in the type (B) plea.

CARTER, District Judge

OPINION

Motion for Summary Judgment

Defendants' motion for summary judgment is denied. This is the first in a series of motions now grown to seven, all voluminous, which have been filed on the eve of the projected trial of this complex antitrust suit. Defendants' 3(g) statement, filed in purported compliance with our local rules requiring a motion for summary judgment to be accompanied by a statement of material facts as to which there is no dispute, is fatally defective. Defendants' initial 3(g) statement was rejected by the court because it was not a statement of undisputed material facts but instead a series of conclusory assertions that set out defendants' version of the core issues in this controversy. The revised 3(g) statement, except for its being mercifully less wordy, [*2] does not remedy the original defect. It still fails to state material facts not in dispute and remains wholly conclusory.

The first alleged undisputed material fact is illustrative of the whole. Defendants state:

Hartz" alleged illegal conduct did not prevent plaintiff from selling its pet products to a substantial portion of high tariff retail outlets. Indeed, plaintiff was not excluded from selling its pet products to any high tariff outlet by Hartz" alleged illegal conduct.

It is a mystery to me how defendants can submit that assertion as a part of a 3(g) statement purporting to indicate that there are no disputed issues of fact to be tried. See *Fournier v. Canadian Pacific Railroad*, 512 F.2d 317, 318 (2d Cir. 1975) (motion for summary judgment to be denied when dispute as to material facts). Indeed, if plaintiff did not dispute this and other 3(g) assertions, it would be required to withdraw from the lawsuit. In fairness, it should be said defendants state that these assertions or more properly their converse must be proved by plaintiff at trial to sustain its burden of proof. Defendants argue that plaintiff will be unable to prove the converse, e.g., its proof will [*3] not establish defendants' responsibility for barring plaintiff's pet products from high tariff outlets. I do not know how I am to determine without a trial what proof plaintiff will or will not adduce.

Moreover, as I understand the law, **HN1[ plaintiff makes out a prima facie antitrust claim by establishing (1) a violation, as alleged, of Sections 1 and 2 of the Sherman Act, 15 U.S.C. §§ 1 and 2, Sections 2, 3 and 7 of the Clayton Act, 15 U.S.C. §§ 13, 14, 18, (2) a nexus between the established violations and its claimed resultant injury, and (3) the extent of the monetary damages suffered as a consequence. See, e.g., *Windham v. American Brands, Inc.*, 565 F.2d 59, 65 (4th Cir. 1977) (en banc), cert. denied, 435 U.S. 968 (1978). Plaintiff's case stays in court if it succeeds in the above respect as to any one of the asserted violations.**

What defendants have really done is file what is in effect a motion for a directed verdict which may be appropriate when plaintiff has concluded presentation of all its evidence.[Rule 50\(a\), F.R.Civ.P.](#) Such a motion is now premature, and in any event, it cannot at the pretrial stage take the place of a motion for summary judgment. See [Armco Steel \[*4\] Corp. v. Realty Investment Co., 273 F.2d 483, 484-85 \(8th Cir. 1960\)](#) (explaining difference between motion for summary judgment and motion for directed verdict).

Defendants cite [Solargen Electric Motor Car Corp. v. American Motors Corp., 530 F. Supp. 22, 25-26 \(S.D.N.Y. 1981\)](#) (Carter, J.), aff'd mem., 697 F.2d 297 (2d Cir.), cert. denied, U.S. 103 S.Ct. 217 (1982). That case provides no support for defendants' contentions here. Critical to plaintiff's claims in that case were its discrete assertions concerning activities taken by American and General Motors. Plaintiff alleged the existence of a contract with American Motors to sell equipment to plaintiff at a specific price; an unlawful breach of that agreement; and after plaintiff had agreed nonetheless to the higher price, a deliberate delay in discovery in furtherance of a conspiracy between American and General Motors to sabotage plaintiff's operations.

After discovery had been completed in Solargen, it was clear that plaintiff could not establish an agreement as to a price below the so called higher price. It was also clear that any delay in delivery was the fault of plaintiff, not defendant, American Motors, [*5] and finally it was evident that plaintiff's allegations of a conspiracy could not be substantiated. Summary judgment was, therefore, appropriate without the necessity of a time-consuming and expensive trial.

Carter-Wallace's case does not collapse so quickly. It has arguable claims of antitrust violations. I may conclude after all of plaintiff's proof is in that the evidence is insufficient to warrant sending the case to the jury. That, however, certainly cannot be done before trial.

Motion to Exclude Plaintiff's Damage Calculations

The motion to exclude plaintiff's damage calculations at trial is also denied. Defendants and the court are again far apart in the realm of conceptualism. Defendants contend that plaintiff's experts who are expected to testify about plaintiff's damage theory did not calculate or perform various critical elements that are the foundation of the damage claim. This work was done, they allege, by unknown Carter-Wallace personnel. Ergo the expert testimony should be barred. As a rule, an expert's testimony cannot be challenged, much less proscribed, because he did not himself perform certain steps which are part of the methodology essential to [*6] his thesis. As long as the methodology is his and the steps taken were at his direction, the credibility of the expert has not been breached. Moreover, if the assistance given has gone beyond the methodology and instructions set out by the expert and the expert will not be able to explain what was done, which is what defendants seem to be saying here, no case is made to bar the expert before he testifies. In that instance, it would appear that the expert has left himself open to a scathing attack on cross examination which could seriously jeopardize the jury's acceptance of the expert's testimony. If the expert cannot give a cogent explanation as to what was done and how at trial, a motion may then be in order to strike his testimony and bar his exhibits. Again, however, such relief must await developments at trial.

The only basis for a valid pretrial claim to bar expert testimony in this case is if plaintiff denied defendants pretrial access to these witnesses. There may also be a basis for a claim to bar testimony by the Carter-Wallace personnel, if plaintiff calls them, provided defendants sought and were barred access to them. Neither situation is raised in the instant [*7] motion.

The court would be hard pressed to bar or place rigid strictures on plaintiff's evidentiary proof on its damage claims before the claims are presented, since damages in antitrust suits "are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts", [Zenith Radio Corp. v. Hazeltine Research Inc., 395 U.S. 100, 123 \(1969\)](#); and "[w]here there is a basis on which a jury can reasonably infer significant antitrust injury, [the court] should be very hesitant before determining that damages cannot be awarded." [Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 304 \(2d Cir. 1979\)](#), cert. denied, 444 U.S. 1093 (1980). This does not mean that plaintiff is free to introduce irrelevant matters or immaterial calculations. However, I simply cannot rule that plaintiff will be prohibited from presenting its damage theory to the jury through its experts. Defendants will have ample opportunity to put the experts' credibility and reliability to the test. Accordingly, the motion is denied.

Motion to Bar Proof of Lost Profits Claims that Include an Inflation Factor

The alternative motion to bar proof of past damage claims that include [*8] a built-in inflation factor seems to be on sounder ground. While I do not agree that taking account of the effects of inflation at present for profits allegedly lost in 1976 is the same as prejudgment interest, it does add an unwarranted equation to the calculations. Plaintiff's argument, citing Judge Newman's discussion in [*Doca v. Marina Mercante Nicaraguense, S.A., 634 F.2d 30, 35 \(2d Cir. 1980\)*](#), cert. denied, 451 U.S. 971 (1981), and cases cited at page 9 of its Memorandum in Opposition, that inflation is being taken into account in calculating lost future earnings is not persuasive. Lost past earnings and lost future earnings are not the same. Lost past earnings are calculated and awarded without being discounted. What is shown to have been lost may be recovered, and as Judge Weinfeld indicated in [*Meinrath v. Singer Co., 87 F.R.D. 422, 427 \(S.D.N.Y. 1980\)*](#), to allow plaintiff to increase such awards for losses already incurred to compensate for inflation is not favored. Generally, in such cases prejudgment interest is considered sufficient, and to allow recovery of both interest and an inflation factor is considered a double recovery. See [*Carter v. Shop Rite Foods, Inc., 503 F. Supp. 680, 687-89 \(N.D. Tex. 1980\)*](#).

HN2[1] When lost future earnings are considered, a lump sum award is discounted to the present value by prevailing interest rates. See, e.g., [*United States v. English, 521 F.2d 63, 75 \(9th Cir. 1975\)*](#). This approach is increasingly being considered unjust since it does not reflect the fact that if one were to continue to work, one would receive cost of living increases to keep pace with inflation. [*Doca v. Marina Mercante Nicaraguense, S.A., supra, 634 F.2d at 34-40*](#). The fact that courts increasingly favor taking account of inflation in lost future earnings awards does not support the argument that such account is necessarily appropriate for lost past earnings.

Moreover, to paraphrase in part the statement in [*Trans World Airways v. Hughes, 449 F.2d 51, 80 \(2d Cir. 1971\)*](#) rev'd on other grounds, [*409 U.S. 363 \(1973\)*](#), "[i]t is reasonable to interpret Congress' silence on the matter as indicating that trebled damages are sufficient penalty and [that compensation for inflation] need not be included," seems to answer the question. No cases to the contrary in the antitrust field have been brought to my attention. Accordingly, the motion to bar plaintiff [*10] from including calculations for inflation in its damage claim is granted.

Motion to Bar Proof of Diminished Going Concern Value

Defendants' argument that plaintiff is barred from seeking damages for diminished going concern value because Carter-Wallace is still in business strikes me as unsound. An antitrust plaintiff who at the time of trial still operates a going concern should be able to recover damages for loss of the going concern value of the business (generally referred to as diminution of assets) so long as such damages do not overlap with damages for lost or future profits. The cases do not support defendants' contention, although in almost all the cases cited, the plaintiff had either left or been driven from the market at the time of trial. One case, [*Atlas Building Products Co. v. Diamond Block & Gravel Co., 269 F.2d 950, 958-59 \(10th Cir. 1959\)*](#), expressly holds that damages for loss of going concern value may be awarded even though the complainant was still in the market. Cf. [*Northeastern Telephone Co. v. American Telephone & Telegraph Co., 651 F.2d 76, 95 n.30 \(2d Cir. 1981\)*](#), cert. denied, 455 U.S. 943 (1982).

The issue may prove to be academic in any event [*11] since I have grave doubts that plaintiff will be able to establish as diminished going concern value something that is not merely another version of lost past profits.

Motion to Exclude Certain Evidence

Defendants seek to exclude from trial evidence of phony credit memoranda, the use of prostitutes, gifts to buyers, document destruction and subornation of perjury in the Robins case, severance agreements with employees, the FTC investigation and consent decree and prior antitrust litigation.

The part of the motion to exclude evidence of phony credit memoranda, use of prostitutes, gifts to buyers and severance agreements with Hartz employees is denied. It is plaintiff's theory that these various activities were part of Hartz" successful effort either to exclude it altogether from, or damage its competitive position in, the marketplace. Because these acts constitute dirty tricks does not render them any less relevant as long as plaintiff establishes that they were among the series of acts which Hartz utilized to destroy or damage plaintiff as a

competitor. *Associated Radio Service Co. v. Page Airways, Inc.*, 624 F.2d 1342, 1346-48, 1354-57, reh. denied, 632 F.2d 894 (5th Cir. [*12] 1980), cert. denied, 450 U.S. 1030 (1981). Plaintiff cannot, of course, merely introduce this evidence to smear defendants and prejudice the jury. The evidence must be a part of its showing of defendants' anti-competitive activity, and such evidence is clearly admissible. Accordingly, the motion is denied.

The part of the motion to exclude evidence of document destruction and subornation of perjury in Robins is granted. The question will be discussed below as a part of the discussion concerning the witnesses who have asserted their *fifth amendment* privilege in refusing to respond to questions put at depositions.

The part of the motion to exclude evidence concerning the FTC investigation of Hartz and the consequent FTC consent decree is granted. As I understand it, sometime in the past the FTC undertook an investigation of Hartz to determine whether its activities constituted antitrust violations. The matter ended in a consent decree that settled the issue without a finding by the FTC or an admission by Hartz that Hartz had violated the law. Reference to this matter will not advance the issues raised in this case but only serve to prejudice Hartz. See Chambers & Barber, Inc. [*13] v. General Adjustment Bureau, Inc., 60 F.R.d 455, 457 (S.D.N.Y. 1973) (Gurfein, J.); *Control Data Corp. v. IBM*, 306 F. Supp. 839, 844 (D. Minn. 1969), aff'd, [430 F.2d 1277 \(8th Cir. 1970\)](#); .

Plaintiff argues that evidence of this FTC investigation and of various acts in Robins now under grand jury investigation and other antitrust litigation against Hartz "explain[s] the true nature and motivation of many of Hartz" business practices" and that Robins "in particular affords the background for appropriate inferences concerning destroyed documents and other evidentiary considerations." Plaintiff's Memorandum at 26. I am not persuaded. Plaintiff wants to utilize this kind of evidence to condition the jury to accept as established that Hartz is an antitrust law violator thus easing its own burden of proof. Any activity which Hartz engaged in in the relevant period which plaintiff establishes was an antitrust violation which affected its position in the marketplace is admissible. That Hartz was investigated by the FTC or was sued by Robins is not relevant to that question.

Motion to Exclude Evidence of *Fifth Amendment* Assertions at Trial

Defendants have moved for an order or [*14] ruling to prevent plaintiff from introducing at trial *fifth amendment* assertions made in pretrial proceedings by various Hartz executives, employees, former employees and third parties. Defendants argue that the *fifth amendment* assertions are lacking in probative value because plaintiff cannot establish a relationship of the privilege to the allegations plaintiff must establish. Defendants' Memorandum in Support of their Motion at 2. Defendants also argue that *fifth amendment* assertions by persons other than parties are not admissible; id. at 6; that the assertions are more prejudicial than probative and should be barred under *Rule 403, F.R.Evid.*; id at 9, and that plaintiff should not be allowed to call persons it knows will invoke the *fifth amendment* and should be required to use their deposition testimony, if such testimony is allowed. Id. at 14. Plaintiff takes the rather expansive position that it is entitled to call all the various parties within the reach of the subpoena power of the court who refused to give pretrial testimony on *fifth amendment* grounds, put to them such questions as will require them to assert their *fifth amendment* privilege, and urge the jury to draw [*15] adverse inference against Hartz based on those assertions. Plaintiff's Memorandum in Opposition at 34-35.

The issue is further informed by an April 5, 1983 conference in chambers when the court announced, after a telephone conversation with the Assistant United States Attorney from the Eastern District of Virginia in charge of a grand jury investigation of perjury, subornation of perjury and obstruction of justice in connection with pretrial proceedings in an antitrust case A. H. Robins had filed against Hartz, that it saw no need to grant defendants' request for continuance of the scheduled trial in this case until that investigation had been concluded and a decision made whether to prosecute certain Hartz officials. The focus of the grand jury investigation concerns whether Hartz executives ordered parties to lie under oath in giving testimony in Robins, ordered documents destroyed, or themselves committed perjury.

Defendants' contentions that *fifth amendment* assertions by persons other than a party are not admissible has no merit. *Fifth amendment* assertions by current employees, former employees who were responsible for carrying out Hartz' activities to restrict Carter-Wallace's [*16] competitive position in the marketplace, and other persons who acted under Hartz orders may be admissible. *Rule 403, F.R.Evid.* places no blanket proscription on the introduction

of this type of testimony. While Hartz's position may indeed be prejudiced if the jury is made aware of the fact that its personnel have refused to testify, this is not the kind of prejudice that Rule 403 is designed to prevent. See, e.g., Brink's, Inc. v. City of New York, 539 F. Supp. 1139, 1141-42 (S.D.N.Y. 1982) (Weinfeld, J.). To be admissible in this proceeding, however, the fifth amendment assertions must have come in response to questions concerning activities relevant to plaintiff's antitrust thesis, i.e., antitrust activities that affected Carter-Wallace's market position.

Hartz personnel who took the fifth amendment and refused to testify at pretrial, as I understand it, believed themselves to be targets of a grand jury investigation that was concerned with allegations that during 1978-1979, when A. H. Robins' antitrust case was in trial preparation, they were implicated in the destruction of records, subornation of perjury and perjury. That investigation is not related to what plaintiff [*17] has to prove in this case. Apparently, plaintiff wants to bring out defendants' malfeasance in the Robins case as a substitute for its own obligation to develop antitrust violations by Hartz at trial.

As I understand it, various persons who refused to testify did not do so to evade answering questions concerning their alleged antitrust activities which could arguably be said to have affected Carter-Wallace's competitive place in the market. They asserted the privilege as a protection in the event the grand jury investigation resulted in their being indicted for obstructing justice, perjury or subornation of perjury.

Plaintiff's position that it is entitled to bring these assertions to the attention of the jury at trial is not supported by Judge Weinfeld's holding and analysis in Brink's. There New York city sued to recover revenues stolen in the course of being collected by Brink's employees. The questions that Judge Weinfeld ruled permissible were those asking whether these employees had alone or in concert with others stolen money from parking meters while working for Brink's. Of course, that evidence is relevant, and indeed answers to those questions or refusals to answer are [*18] admissible. Similarly, here questions put to Hartz' employees, executives, consultants, etc. about actions that they took or were ordered to take that are relevant to the antitrust claims plaintiff seeks to develop are appropriate; the answers to or the refusals to answer those questions are admissible and come within Judge Weinfeld's analysis in Brink's. The fact, however, that testimony was refused because of a criminal investigation of obstruction of justice in another case is not pertinent to plaintiff's antitrust claims.

Plaintiff brings the court's attention to a statement in a memorandum opinion filed on October 27, 1981, now reported at Carter-Wallace, Inc. v. Hartz Mountain Industries, 92 F.R.D. 67, 70 (S.D.N.Y. 1981) (Carter, J.). There I said:

Robins involved substantially similar allegations of Hartz' monopoly power and anticompetitive activities to those propounded by C-W. And, the conduct which led to both lawsuits occurred during overlapping periods of time. Testimony by Hartz witnesses pertaining to its practices in the market is arguably as relevant to this action as to Robins and, therefore, should be produced so that C-W can review it for possible use in this [*19] case.

First, the quoted comment by the court concerns an entirely different issue, i.e., whether plaintiff was entitled during discovery in this case to require Hartz to turn over to it depositions taken in Robins concerning Hartz' antitrust activities. I agreed with plaintiff that the depositions should be turned over and that Carter-Wallace should not be required to depose these same people independently. That, however, does not mean that Carter-Wallace can now inquire at this trial concerning acts of perjury, destruction of documents, etc., in Robins.

I do not propose to try Robins or the government's putative obstruction of justice charges. While the plaintiff could utilize the depositions in Robins for discovery purposes in this case, it does not follow that such matters are relevant at trial. In pretrial depositions the standards for the admissibility of evidence are considerably lower than at trial. At the pretrial stage, the evidence need only be reasonably calculated to lead to the discovery of admissible evidence. Westhemeco Ltd. v. New Hampshire Ins. Co., 82 F.R.D. 702, 709 (S.D.N.Y. 1979) (Cooper, J.), modified, 484 F. Supp. 1153 (1980); Xerox Corp. v. IBM, 75 F.R.D. 668, 670-71 (S.D.N.Y. 1977) (Edelstein, J.); United States v. IBM, 66 F.R.D. 180, 185-86 (S.D.N.Y. 1974) (Edelstein, J.). For use at trial the evidence has to be relevant and pertinent to Carter-Wallace's antitrust claims. United States v. Schiff, 612 F.2d 73, 80 (2d Cir. 1979). It should be added that a showing through documents generated during discovery in Robins of a nexus between antitrust violations by defendants and injury to Robins does not ipso facto reveal a link between defendants' wrongdoing and

injury to plaintiff. It is the latter nexus that plaintiff must prove at trial. In short, the fact of the Robins litigation and the similarity of the claims alleged in Robins and in this case do not render the claims the same for evidentiary purposes in a trial to determine whether defendants are guilty of Sherman and Clayton Act violations injuring plaintiff and entitling it to a treble damage award. At trial plaintiff must establish its own antitrust case.

Accordingly, the motion to exclude evidence of document destruction and subornation of perjury in Robins is granted. The motion to exclude evidence that various parties have asserted the [fifth amendment](#) privilege [*21] at pretrial is granted. These parties may be called at trial, and plaintiff will be free to ask them any questions concerning their alleged antitrust activities in this case that are relevant, as has been defined, to the issues raised in this case.

The Motion to Exclude the Hurney Tape

A tape was made by John Hurney, an employee of J & R Distributing, recording a visit in December, 1977 to Hurney in Pittsfield, New Hampshire by Walter Albuquerque, then the Hartz vice president for sales for the eastern regions, and James Spina, a Hartz regional manager. The tape was made without the knowledge or consent of Albuquerque or Spina, which renders the making of the tape unlawful under New Hampshire law. Defendants argue that the tape is not admissible at the trial pursuant to the provisions of [18 U.S.C. § 2511\(d\)\(2\)](#). The argument is that since the recording of this tape constituted an unlawful act under New Hampshire law, it was intercepted "for the purpose of committing a criminal act" under the laws of New Hampshire and hence is not admissible under the cited statute.

The applicable case law is to the contrary. The admissibility of the tape is governed by federal law, and [*22] the more restrictive New Hampshire law does not affect admissibility of the tape in this court. See [United States v. Zemek, 634 F.2d 1159, 1164 n.4 \(9th Cir. 1980\)](#), cert. denied, 452 U.S. 905 (1981). That making the tape without the consent of all the parties constitutes a criminal act under New Hampshire law does not bring the tape within the proscription of [18 U.S.C. § 2511\(d\)\(2\)](#). The motion to exclude the tape is denied.

IT IS SO ORDERED.

Patent Law > ... > Claims > Claim Parts > Preambles

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN6 [] Specifications, Description Requirement

The presumption of validity attaching to an issued patent rests on the assumption that in issuing a patent the Patent Office has considered all pertinent prior art, therefore, the presumption of validity does not attach to prior art not considered by the Patent Office.

Patent Law > Infringement Actions > Defenses > General Overview

Patent Law > ... > Claims > Claim Parts > Preambles

HN7 [down] **Infringement Actions, Defenses**

Even though not cited as a reference by the Patent Examiner, there is no presumption in a patent infringement proceeding that patents not cited were overlooked, since they may have been considered and cast aside as not pertinent. It is as reasonable to conclude that a prior art patent not cited was considered and cast aside because not pertinent, as it is to conclude that it was inadvertently overlooked. However, the question whether the failure of the Examiner to cite certain art is consistent with its examination and rejection depends on the pertinency of the uncited art.

Opinion by: PERRY, JR.

Opinion

[***242] [*422] ORDER

Plaintiff AB Iro (hereinafter Iro), a corporation of Sweden, is the owner by assignment [***423**] (Plaintiffs' Exhibit 3) of United States Patent No. 3,796,386 (P. Exh. 1), which issued on March 12, 1974, to Karl Tannert, a citizen of West Germany. Iro brought this action against Otex, Inc. (hereinafter Otex), a corporation of South Carolina, and Roj Electrotex s.p.a., (hereinafter Roj), a corporation of Italy, for infringement of the Tannert patent. Plaintiff Iro initiated this action in October, 1977. Subsequently, Roj and Otex filed a counterclaim against Iro and Iro's United States distributor, Wesco Division of the Torrington Company (hereinafter Wesco), alleging numerous antitrust violations. Wesco was joined in the action as an involuntary plaintiff. Trial was held on December 3 through 7, 1979. Subsequently, the Court has received from all parties voluminous briefs arguing the various positions.

The contentions of the parties can be grouped under three general headings: (1) Defendants' claims that the Tannert patent is invalid because of obviousness; (2) Plaintiffs' claims that the defendants, [****2**] by manufacturing and marketing the West 840 and West 1000 model yarn feeders, have infringed the Tannert patent, U.S. Patent 3,796,386; and (3) defendants' counterclaims that the plaintiffs by bringing their action, have violated sections 1 and 2 of the Sherman Antitrust Act, 15 U.S.C. §§ 1 & 2. In like manner, this opinion consists of three parts, the first addressing the question of obviousness, the second dealing with infringement, and a third dealing with the antitrust counterclaim.

I.

VALIDITY OF THE TANNERT PATENT

At the outset, I confess no expertise in the field of patent law, and further acknowledge that this is an area which demands considerable expertise. In order to make my course of reasoning clear, I will include matters which patent experts may consider obvious. The disdain of the experts notwithstanding, I prefer the cautious course of reciting the obvious, in the hope of resolving the complex questions this case raises.

To begin, the Tannert patent, U.S. Patent 3,796,386, the subject of this case, is embodied in a documentary exhibit, plaintiffs' Exhibit 1, which consists of 18 sheets, contained fifteen intimidatingly technical drawings, or "figures," followed [****3**] by a 22-column written explanation of the invention. Beginning at column 16, line 48 are 41 Claims of the patent, that is, to quote the jargon of the exhibit "what it is desired to secure by Letters Patent of the United States."

It is the plaintiffs' contention that the West 840 and West 1000 yarn feeders infringe Claims 1, 9, 10, 11, 12, 28 and 39 of the Tannert patent. Defending against this claim, the defendants press two arguments: obviousness and noninfringement.

In order to explain these claims and defenses, it is necessary that I undertake an admittedly lengthy discussion of yarn feeders and patents.

A. THE DISCLOSURE OF THE TANNERT PATENT.

The specification and drawings of the Tannert patent (P. Exh. 1) disclose a "Thread Feeder for Textile Machines." The specification of the Tannert patent at col. 1, lines 10-25 describes the type of thread feeders which the inventions of the patent in suit comprise. Such thread feeders are described as devices which are disposed between a thread storage spool (or the like) and an operating point of a textile weaving or knitting machine. Such thread feeders have a coiling or winding body, sometimes referred to as a drum. The feeder [****4**] withdraws thread from the storage spool and coils, that is, winds the thread onto the stationary winding body. The feeder includes means for moving the thread coils along the length of the winding body. The textile weaving machine takes thread from the winding body as it needs thread by pulling it off overhead; i.e., over one end of the winding body. With a

weaving machine, the thread is withdrawn by the weaving machine in a rapidly varying [*424] pattern alternatingly withdrawing thread and not withdrawing thread.

As the specification points out, such apparatus is generally known and the primary purpose of it is to eliminate variations and fluctuations in tension caused by different factors such as thread size, coil size, and the like. The end result is to enable the textile machine to receive thread at a continuous, although not necessarily constant, rate without problems occasioned by tension variation, thread breakage, and depletion of the storage spool of thread. For example, when a storage spool has been emptied a sensing device turns the textile machine off. There is a normal momentary delay until the machine actually [***243] stops. The presence of a number of thread turns [**5] in the coil store on the thread feeder during this momentary delay enables the textile machine to continue for that moment without damaged fabric being produced.

Conventionally the thread is initially taken from the supply package by a rotating element on the thread feeder. In one basic variation of prior art thread feeders (rotating drum feeders) the winding body is the rotating element. It rotates and, in effect, wraps itself in a coil of thread withdrawn from the thread source.

An alternative basic variation of prior art thread feeders utilizes a non-rotating winding body and a rotating arm or cage encircling the winding body. In this prior art device it is the rotating arm or cage which withdraws thread from the storage spool and coils it onto the winding body.

In either case the coil turns are laid onto the winding body at one end of the body in a fixed location relative to the axis of the body and then are moved down the body toward its other end, as more thread turns are added. As the Tannert specification points out at col. 1, lines 21-25 (P. Exh.1), thread feeders are conventionally provided with some means for axially displacing the coil progressively along the winding [**6] body.

Thread is then pulled off "overhead", i.e., "over . . . (the other) end" of the winding body by the weaving machine as it uses thread, as pointed out at col. 1, lines 24-25, of the specification (P. Exh.1). As it does so the coil store on the winding body is depleted from that end. As is necessary, means are provided to start the coiling operation each time the coil store is depleted to a certain minimum length along the winding body and stop the coiling operation again when the coil store reaches a certain maximum length along the winding body. By the very nature of the thread feeder construction thought necessary for many years, regardless of whether a rotating or non-rotating drum was employed, it was impossible to employ simple and inexpensive, yet accurate and maintenance free, internal thread coil store length measuring devices.

The Tannert patent thread feeder invention eliminates the problems inherent in rotating body feeders by employing a non-rotating body. It also eliminates the problems of complexity, expense, and lack of reliability which was thought to be inherent in non-rotating bodies, as the Tannert patent specification points out at col. 1, lines 51-53 [**7] (P. Exh.1).

The specification of the Tannert patent points out at col. 1, lines 54-67 (P. Exh.1), that the solution is achieved by assembling thread feeder in a way not contemplated before. First, the coiling body was rigidly mounted on the chassis of the thread feeder so that no complex magnet or weight imbalance system or the like had to be employed to keep the winding body stationary. A stationary drum allowed the use of a simple coil-store length sensing device, a simple mechanical feeler, for example, having a direct connection, without rotating contacts, to the power source for driving a thread laying guide. The rotating thread laying guide was moved to the opposite end of the winding body from that which the prior art had taught; i.e., the end of the winding body toward the weaving machine rather than the end facing the thread storage spool. Thread was then run from the thread storage spool through the center of the winding body and radially outwardly to the thread laying guide (as shown as Embodiment A, pictured below in figure 1, [*425] taken from the Tannert patent file, P. Exh. 1), or through a cage-like extension or arm of the thread laying guide and then radially [**8] inwardly to the winding body (as shown as Embodiment B, pictured below in figure 2, taken from P. Exh. 1). Thread would then be layed onto the coiling body at the end opposite the storage spool from which it was being withdrawn and would progressively move axially along the winding body toward the end facing the thread storage spool. From this other end the thread would be stripped axially off the winding body in the manner of a spin casting reel paying out fishing line. In embodiment A this stripping would take place axially

back in the direction of the one end of the winding body or drum directly toward the weaving machine operating point. In embodiment B the thread is stripped axially away from the smaller end of the winding body, the direction of travel would then reverse and the thread would go axially through the fixed winding body toward the weaving machine. (As in embodiment A, the thread travels through the shaft moving away from the source, toward the weaving machine; the coil store travels away from the weaving machine and toward the thread source).

The specification of the Tannert patent goes on to explain at col. 2, lines 1-9, that the use of either of embodiment [**9] A or embodiment B thread feeders, with a winding body or drum rigidly and stationarily mounted on the thread feeder chassis, permits using a simple and inexpensive, yet positively acting and reliable, control means for the coil laying drive wherein the control means operates the thread laying guide as a function of the length of the coil store. The advance noted here is the simplicity, low cost, and reliability of a system which controls thread coiling by sensing [***244] the length of the coil store. Such systems in more complex form had been available in the prior art as the specification acknowledges at col. 1, lines 45-47.

The specification then summarizes at col. 2, lines 15-39, by describing the generic combination of the thread feeder invented by Tannert in broad terms under the heading SUMMARY OF THE INVENTION. A thread feeder combination is provided, as indicated at col. 2, lines 15-22 of the specification. Its winding body is stationary and coils wound on the body are shifted axially along it, as pointed out at col. 2, lines 22-27, the stationary body permits of the use of a simple sensing means to control the amount of thread coiled on the body, as pointed out at col. 2, lines [**10] 28-33. To achieve the stationary body the thread passes through the axial center of the winding body in a direction opposite the coil movement along the body, as further pointed out at col. 2, lines 33-38.

Figures 1 and 2 show the two basic embodiments of the Tannert patent. In some ways, these are two very different devices: the thread paths are, in effect, the reverse of each other. In Embodiment A (figure 1), the thread (101-101-a) travels through the center shaft, moving from left to right in the figure, is wound onto the tapered surface (21), with the coils of thread gradually pushing one another along the drum (2) from the right back to the left. The thread is then stripped off the outside of the machine. In Embodiment B, the thread (101) is brought to the tapered surface (21) on the outside of the machine. As in Embodiment A, however, the coils again move from right to left, that is opposite the initial direction of the thread path. When the thread coils are stripped off the drum, the thread is pulled through the center shaft.

Although the two Embodiments are different, the claims of the Tannert patent -- that is, those features which Karl Tannert, and now plaintiff [**11] Iro as his assignee, (See Assignment of U.S. Patent 3,796,386, from Karl Tannert to AB Iro, 11 July 1977, P. Exh. 3) contend are the patented invention -- apply equally to both Embodiments. Further, the comparison of these claims to the feature of the West 840 and West 1000 thread feeders show that these machines combine features found in Embodiment B and in a variation of Embodiment A (Embodiment A2). It is therefore necessary to discuss the features found in each of the basic embodiments.

[*426] Embodiment A of the storage feeder invention claimed is illustrated in Figure 1 and described in col. 4, line 22 -- col. 6, line 63, of the specification. At col. 4, lines 22-30, the specification states that the feeder comprises a housing (1) illustrated in sectional view which is mounted on a weaving machine, the weaving machine itself not being shown. The feeder is designed to take thread from a storage spool 100 and transmit that thread to a weaving machine to the right of the feeder in Figure 1.

At col. 4, lines 30-41, there is described cylindrical thread winding body (2) secured to the housing (1). At its right end the winding body (2) has an integrally formed, tapered [**12] thread feed lip (21). The winding body (2) has a hollow bore extending axially through it from end to end and hollow shaft (3) is rotatable in that bore. The shaft has a drive pulley (4) secured to its drive (left) end and a thread feed rotor (5) secured to its head (right) end. The drive pulley, and with it the shaft (3), is rotated by a belt (41) from a suitable belt drive (411), a conventional electric motor.

At col. 4, lines 42 -- col. 5, line 2, the specification describes the rotor (5) which serves to wind the thread onto the winding body (2). The rotor includes a hub (unnumbered) on the shaft. A thin conical disk (unnumbered) extends radially outwardly of the hub and terminates in an annular hood (51). The annular edge of the hood on the left in

Figure 1 is turned radially inwardly so that it covers at least a portion of the tapered thread feed guide (21) on the winding body (2). The hood has a thread winding eye (52) mounted on it. The conical disk (unnumbered) of the rotor is radially slotted (in the plane of the drawing as seen in Figure 1) so that a thread reversing idler wheel (50) and its support (unnumbered) can be mounted on the rotor as illustrated. In operation [**13] of the feeder the thread comes through the shaft (3), out of its right end, and passes over the idler wheel (50), whereupon the thread is fed through the winding eye (52) and is laid down on the tapered feed guide (21). The hood (51) and its contents, the guide wheel, are covered by a cap 53 frictionally seated into the hood. The cap (53) serves, in effect, to enclose the head end of the feeder itself.

At col. 5, lines 3-22, of the specification a simple and inexpensive feed control mechanism possible for the first time in a non-rotating winding body feeder is described in general terms. It is mounted in a recess (22) in the winding body (2), the recess extending radially of the winding body along a substantial portion of its axial length in the plane of the drawing. In operation of the feeder, as the coil of thread builds upon the winding body (2), the coil begins to cover this recess from right to left in Figure 1. Adjacent to recess, in the feeder housing, a radial slot (unnumbered) is formed. Mounted in this slot for [***245] pivoting movement in the plane of the drawing on a pin (8) is a simple wire lever having two arms (71 and 72). One arm (71) extends into the recess while the [**14] other arm (72) remains in the radial slot formed in the housing. The second arm (72) carries a permanent magnet (73 degrees) on its free end and a small magnet operated electrical switch (6) is mounted in the housing 1 slot with electrical leads (61 and 62) extending therefrom to the belt drive mechanism 411. The switch 6 then controls the drive mechanism (411) in response to action of the lever arms (71 and 72), which action is, in turn, controlled by the number of thread coils which accumulate on the winding body or drum (2).

At col. 5, lines 23-48 (P. Exh. 1), the operation of the sensing lever (71/72) is discussed in greater detail. The lever arm (71) engages the thread coil (102) from beneath in the recess (22) and, when just a few thread coil turns are present, the arm (71) is in its solid line position, as is the lever arm (72). At this time the lever arm (72) is up against the stop (unnumbered) in the housing (1) slot immediately adjacent to switch (6) and the switch is closed, as is conventional with magnetic switches under the effect of a magnetic field (from the permanent magnet (73 degrees) on the lever arm (72)). With the switch closed, the belt drive (411) is energized [**15] and rotates the rotor (5) to feed [*427] thread onto the winding body (2). As the rotor lays more coil turns on the winding body the coil store advances (to the left in Figure 1) from a point 102e to a point 102a, at the latter of which it has forced the lever arm inwardly to its dotted line position. The lever arm (71) carries the lever arm (72) with it to the dotted line position, which is far enough from the switch so that the magnet is no longer effective and the switch contacts open, stopping the rotor from laying more coil turns onto the winding body.

The specification goes on at col. 5, line 49 -- col. 6, line 51, to describe the operation of embodiment A of the thread feeder illustrated in Figure 1. When the rotor is rotating, thread is being drawn from the spool through a thread breaking device which keeps some tension on it, and then into the shaft (3) from which the thread emerges, passes over the guide wheel (50), and then through the winding eye (52) onto the tapered feed guide (21) of the winding body. At this point the thread tension created by the rotor pulling the thread through the breaking device, coupled with the axially sliding movement (to the left in [**16] Figure 1) of the thread turns being successively formed on the tapered feed guide (21), pull the thread tighter as the coils are formed so that the coils slide down onto the cylindrical surface of the winding body. As more coils are added they force previously formed coils axially to the left in the direction W. This continues until the thread coils reach point 102a and the lever (71/72) reaches its dotted line position, finally shutting off the belt drive (411) and the thread laying operation by opening the switch when it reaches this position. With a weaving machine in operation, it is, in the meantime, pulling thread over the right end of the feeder through a thread guide (12). Its thread needs are intermittent. Accordingly, the rotor intermittently succeeds in filing the winding body with a thread coil up to a preset point (102a). When this happens the switch opens, as has been pointed out. Further use of the thread by the weaving machine depletes the thread coil 102 store. Because the magnetic switch (6) requires a relatively large magnetic flux to close its contacts but will stay closed until the magnetic flux effective on it has been reduced to a relatively smaller amount, [**17] the switch will not close again until the lever reaches its solid line position. This is true even though in the opposite travel direction going from its solid line position to its dotted line position, when coils 102 are added to the winding body, the switch 6 will remain closed. It is the general nature of such magnetic switches. In practice this speed at which the rotor 5

can lay coils on the winding body 2 is slightly greater than the speed at which the weaving machine can trip them off so that the feeder can never be completely stripped of coils.

The specification goes on in col. 6, line 64 -- col. 7, line 67 (P. Exh. 1), to describe the embodiment of the invention illustrated in Figure 2 and designated B1 herein for ease of reference. As the specification points out this embodiment B1 differs essentially from embodiment A1 of the feeder in the direction of thread travel through the center of the apparatus. In contrast to embodiment A1 of the winding body 2 of the embodiment B1 is on the left end and the drive pulley 4 is on the right end, as seen in Figure 2. The thread passes through the winding body after departing the coil store rather than before reaching the coil [**18] store on the winding body, as in embodiment A1.

As described in col. 7, lines 3-17 (P. Exh. 1), the construction of embodiment B1 provides for the feeder housing and the winding body to be secured together by pins (one of them shown, unnumbered) and to have aligned central axis passageways which form a coextensive thread guide way. To the right of the winding body a pulley is journaled on the housing and a belt (41) drives the pulley. The pulley mounts on L-shaped thread laying arm (45) which extends axially along the winding body and rotates around the winding [***246] body. Thread guide eyes (111 and 112) are formed on the arm (45).

In col. 7, lines 19-36 (P. Exh. 1), of the specification, thread (101) travel from the storage spool onto the winding body is described. [*428] The thread passes through the thread eyes (111 and 112) on the rotating arm. The rotating thread eye (112) is located so that as the thread emerges, it is laid directly on the tapered thread feed guide surface at the right end of the spool. Like embodiment A1 of the feeder, turns of thread constrict and slide down the tapered surface to the cylindrical surface of the winding body where they form the coil store [**19] which moves to the left in the direction W. In this feeder embodiment B1 thread from the coil store is stripped; i.e., pulled axially in the manner of a spin casting reel, off the left hand end of the winding body over the bead-like edge (23). The drawing illustrates such a bead or bead-like surface as to rounded surface which guides the thread from the coil store over the left end of the winding body into the passage (3A), as illustrated, lifting the thread radially off the winding body surface. The thread (now numbered 101a), passes out of the guide way (3A) in the direction F (to the right) to the weaving machine.

Specification at col. 7, lines 37-67, describes the control of the thread feeder embodiment B1 by the switch (83). The switch is operated by a two arm wire lever (74/75) mounted on a pin in a radial recess in the winding body (in the plane of the drawing). The switch is connected by electrical leads (84 and 85) to the belt drive for the belt. The lever is mounted so that when just a few coils of thread are on the winding body surface, as shown in Figure 2, the switch arm (75) permits the switch (83) contacts to remain closed. The switch contacts are spring biased [**20] to their closed positions so that as the coil of thread moves to the left on the winding body the lever arm is forced inwardly but is not effective to cause the lever arm (73) to exert enough pressure on the switch (83) contacts to open them until a substantial number of thread coil turns have been laid on the winding body. When such a substantial number of coil turns are laid on the winding body the switch opens and belt drive stops, stopping the laying on of thread turns. As thread is then stripped from the winding body in the manner previously described, the coil store is depleted and the lever permits the switch 83 contacts to close again. The feeder starts once more to accumulate thread.

The remaining five thread feeder variations illustrated in Figures 3-15 are all variations of either embodiment A or embodiment B. They all differ principally from two basic embodiments in that, in addition to the tapered feed guide lip of these basic embodiments, the other variations employ positive acting feed devices for moving the thread coils axially along the winding body and those "active" feed devices are coupled to the drive which rotates the thread laying guide. Only one of the [**21] infringed claims, Claim 12, is concerned with such an axial positive feed device and then only in the broadest terms; i.e., it calls for "a positive axial feed device coupled with said means for driving the . . . thread laying guide." As such, only one variation of the principal embodiments, that is embodiment A2 illustrated in Figures 3-8 and described at col. 9, line 1 -- col. 12, line 41, of the specification is discussed, since it provides all the support required in the disclosure for the subject matter of Claim 12.

Col. 9, line 1 -- col. 10, line 41, describes the thread feeder A2 as it is illustrated schematically in Figures 3-5. Col. 10, line 42 -- col. 12, line 41, goes into details of the actual structure and its operation is illustrated in Figures 6-8.

The winding body in embodiment A2 is made up of a plurality of circumferentially arranged rods 24 mounted on and extending parallel to each other away from the thread feeder housing. These rods in effect comprise the thread winding body, as pointed out at col. 10, lines 44-57. As in embodiment A1, a shaft (3) extends through the housing is rotated by a pulley at one end (left), and rotates a rotor carrying a thread laying **[**22]** guide (52) at its opposite end. This is pointed out in col. 10, lines 58-65.

In col. 10, line 66 -- col. 11, line 47, an inner cylindrical feed roll member (13) is described as being mounted within the hollow body formed by the rods. The feed roll (13) is mounted on the shaft (3) through an **[*429]** eccentric shaft section (30). The feed roll 13 is essentially a solid member but has a plurality of radially extending, axially parallel ribs (130) which are designed to protrude outwardly through and between the rods of the winding body. On the shaft the eccentric shaft section (30) is arranged so that the axis of the body, and angularly skewed from that axis at an angle. As a result, when the shaft rotates to lay thread on the body defined by the rods the cage does not actually rotate but moves in a planetary and wobbling manner, with its outwardly extending ribs penetrating between the interstices of the rods in interdigitating fashion; i.e., each rib moves radially outward of a bracketing pair of rods and then radially inwardly thereof as the feed roll moves in planetary fashion within the body. In its planetary movement, which embodies radially outward movement and wobbling **[**23]** movement **[***247]** relative to the axis of the feeder, the feed roll lifts the coil turns of thread from one location on the rods, moves them axially off the rods, and deposits them back on the rods at a distance determined by the amount of eccentricity of the bearing axis relative to the shaft axis and the angle of eccentricity of the bearing axis to the shaft axis.

This complex technical material is the disclosure of the Tannert patent, and it sets forth what the plaintiffs contend is Mr. Tannert's invention. With this disclosure in mind, I turn to the one issue in this case which presents a close legal question: is the Tannert invention obvious in light of prior art? Many of the other questions in this case, although factually complex largely present problems of deciphering great blocks of technical material with which the Court has no prior experience. Once the pattern amid the technical complexities was finally discerned, the legal questions were easily resolved. The issue of the validity of the Tannert patent is of a different sort. The factual and technical questions are difficult enough, but more, the underlying legal question is far closer than the questions presented elsewhere **[**24]** in this case, of which are factually complex but legally clear cut.

B. ADEQUACY OF DISCLOSURE IN THE TANNERT PATENT.

As a preliminary matter, the defendants have contended that the disclosure in the original Tannert patent application was inadequate under 35 U.S.C. § 112. Although they do not press this issue in their post-trial memorandum, the Court addresses the question as a matter of caution: better the issue should be resolved than the suggestion arises that it was overlooked. It appears that the defendants' argument is that the Patent Office found the disclosure in the initial application inadequate, and that the continuation-in-part did not correct this fault, so that the Tannert patent as issued should not be considered valid.

I would note, first of all, that the inventor Tannert did not appeal the adverse determination on his initial application, but elected instead to file a continuation-in-part. Under these circumstances, no *res judicata* effect follows from the initial, adverse determination of the Patent Office. *Application of Ackermann, 58 C.C.P.A. 1405, 444 F.2d 1172 (1971); Application of Russell, 58 C.C.P.A. 1081, 439 F.2d 1228 (1971); Application [**25] of Hitchings, 52 C.C.P.A. 1141, 342 F.2d 80 (1965).* This Court is free to consider the adequacy of the disclosure of the application as a whole.

HN1  The test concerning the disclosures of a patent application is whether a skilled practitioner would find the disclosures adequate. *Application of Goodwin, 576 F.2d 375 (C.C.P.A. 1978), aff'd, 599 F.2d 1060 (C.C.P.A. 1979); Application of Edwards, 568 F.2d 1349 (C.C.P.A. 1978); Application of Cescon, 474 F.2d 1331, 1335 (C.C.P.A. 1973); Application of Forman, 59 C.C.P.A. 1178, 463 F.2d 1125 (1972); Application of Moore, 58 C.C.P.A. 1042, 439 F.2d 1232, 1236 (1971); Application of Feinberg, 58 C.C.P.A. 960, 437 F.2d 1405 (1971).*

During the trial, the plaintiff's expert, Mr. Chadwick, testified that the disclosures contained in the Tannert patent

application were wholly adequate. (Tr. 124-25.) More significantly, the defendants' own expert, Dr. Amed [***430**] Tayebi, testified that the disclosures in the original application (P. Exh. 7) were "most definitely" adequate. (Tr. 446-47.) Given this acknowledgment by the defendants' expert, I find that the disclosures contained in the Tannert patent application was [****26**] adequate to meet the requirements of [35 U.S.C. § 112](#).

C. NONOBVIOUSNESS AND THE STATUTORY PRESUMPTION OF VALIDITY.

The key question in this case, as in many patent cases is whether the plaintiff's Tannert patent meets the test of nonobviousness under [35 U.S.C. § 103](#). The pertinent language of [§ 103](#) provides:

HN2[] A patent may not be obtained . . . if the difference between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

The defendants contend that the Tannert device is obvious in light of two particular prior art patents, Pfarrwaller, U.S. Patent 3,411,548 (D. Exh. 6; P. Exh. 4), and Pourtier, West German Patent DT-PS 1,191,197 (D. Exh. 5; P. Exh. 35).

The test for the determination of obviousness is set forth in [Graham v. John Deere Company, 383 U.S. 1, 15 L. Ed. 2d 545, 86 S. Ct. 684 \(1966\)](#):

HN3[] Under [§ 103](#), the scope and content of the prior art are to be determined; differences between the prior art and the claims at issue are to be ascertained; and the level [****27**] of ordinary skill in the pertinent art resolved. [****248**] Against this background, the obviousness or nonobviousness of the subject matter is determined. Such secondary consideration as commercial success, long felt but unresolved needs, failure of others, etc., might be utilized to give light to the circumstances surrounding the origin of the subject matter to be patented. As indicated of obviousness or nonobviousness, these inquiries may have relevancy. [Id. at 17-18](#).

The question of the validity of the Tannert invention does not, of course, come to this Court on a clean slate. In considering this question, this Court in essence reviews the determination of the Patent Office that the Tannert patent (P. Exh. 1) should issue. In *Graham*, the Supreme Court reiterated a principle which has been apparent throughout the history of the patent system: Primary responsibility for determining patentability rests with the Patent Office with its reservoir of experience and expertise. [383 U.S. at 18-19](#). Accord, [Tights, Inc. v. Acme-McCrory Corp., 541 F.2d 1047, 1053-54 \(4th Cir.\)](#), cert. denied, 429 U.S. 980, 97 S. Ct. 493, 50 L. Ed. 2d 589 (1976); [Georgia-Pacific Corp. v. United States Plywood Corp., 258 F.2d 124 \(2d Cir. 1958\)](#), cert. denied, 358 U.S. 884, 3 L. Ed. 2d 112, 79 S. Ct. 124 (1958); [S.A.B. Industries AB v. Bendix Corp., 199 U.S.P.Q. 95, 102 \(E.D. Va. 1978\)](#).

This expertise has led to a presumption that an issued patent is valid, a presumption now codified in [35 U.S.C. § 282](#):

HN4[] A patent shall be presumed valid. Each claim of a patent (whether in independent or dependent form) shall be presumed valid independently of the validity of the other claims, dependent claims shall be presumed valid even though dependent upon an invalid claim. The burden of establishing validity of a patent or any claim thereof shall rest on the party asserting it.

Because of this statute and long-standing judicial policy, the plaintiffs are entitled to rely on the presumption that the Tannert patent is valid. **HN5**[] The defendants bear the burden of proving obviousness by clear and convincing evidence. [Mumm v. Decker & Sons, 301 U.S. 168, 57 S. Ct. 675, 81 L. Ed. 983 \(1936\)](#); [Speed Shore Corp. v. Denda, 605 F.2d 469, 470-71 \(9th Cir. 1979\)](#); [Lee Blacksmith, Inc. v. Lindsay Bros., Inc., 605 F.2d 341 \(7th Cir. 1979\)](#); [Santa Fe-Pomeroy, Inc. v. P & Z Co., 569 F.2d 1084, 1091 \(9th Cir. 1978\)](#); [Blumcraft of Pittsburgh v. Citizens & Southern National Bank, 407 F.2d 557 \(4th Cir.\)](#), cert. denied, 395 U.S. 961, 23 L. Ed. 2d 747, 89 S. Ct. 2103, reh'g denied, [396 U.S. 870, 24 L. Ed. 2d 125, 90 S. Ct. 39](#), reh'g denied, 396 U.S. 949, 24 L. Ed. 2d 254, 90 S. Ct. 369 (1969); [Colgate-Palmolive Co. v. Carter Products, Inc., 230 F.2d 855 \(4th Cir.\)](#), cert. denied, 352

U.S. 843, 1 L. Ed. 2d 59, 77 S. Ct. 43, reh'g denied, 352 U.S. 913, 1 L. Ed. 2d 120, 77 S. Ct. 152 (1956); [Lundy Electronics & System, Inc. v. Optical Recognition Systems, Inc.](#), 362 F. Supp. 130 (E.D. Va. 1973), aff'd, 493 F.2d 1222 (4th Cir. 1974); [Esco Corp. v. Tru-Rol Co., Inc.](#), 352 F. Supp. 416, 425 (D. Md. 1972), aff'd, 489 F.2d 699 (4th Cir. 1974).

In challenging this presumption, the defendants contend that the most pertinent prior art patents with respect to the Tannert patent are Pfarrwaller and Pourtier. In issuing the Tannert patent, the Patent Examiner did not cite the Pfarrwaller patent (D. Exh. 6; P. Exh. 4). The Examiner did cite the Pourtier patent (D. Exh. 5; P. Exh. 35).

HN6[] The presumption of validity [**30] attaching to an issued patent rests on the assumption that in issuing a patent the Patent Office has considered all pertinent prior art. It is therefore well established that the presumption of validity does not attach to prior art not considered by the Patent Office. [Blohm & Voss AG v. Prudential-Grace Lines, Inc.](#), 489 F.2d 231, 244 (4th Cir. 1973), cert. denied, 419 U.S. 840, 42 L. Ed. 2d 67, 95 S. Ct. 70 (1974); [Eisele v. St. Amour](#), 423 F.2d 135, 138-39 (6th Cir. 1970); [Bentley v. Sunset House Distributing Corp.](#), 359 F.2d 140, 146 (9th Cir. 1966); [Heyl & Patterson, Inc. v. McDowell Co.](#), 317 F.2d 719 (4th Cir. 1936); [Crane Packing Co. v. Spitfire Tool & Machine Co.](#), 276 F.2d 271 (7th Cir. 1960), cert. denied, 363 U.S. 820, 4 L. Ed. 2d 1517, 82 S. Ct. 1259 (1960); [Sabel v. Wickes Corp.](#), 345 F. Supp. 1227, 1229 (D.S.C. 1971); [National Steel Corp. v. Baltimore & Ohio R. R.](#), 313 F. Supp. 934, 941 (D. Md. 1970); [Uniroyal, Inc. v. Daly-Herring Co.](#), 294 F. Supp. 754, 757 (E.D.N.C. 1968). Relying on this rule, the defendants insist that the Tannert Patent must be considered without the benefit of any presumption in its favor because the Examiner [**31] did not cite Pfarrwaller.

The defendants have overstated the effect of the failure of the Patent Office to cite the Pfarrwaller patent in the Tannert patent. While the failure of the Patent Office to cite a single patent *may* be sufficient to defeat the presumption of validity, [Dresser Industries, Inc. v. Smith-Blair, Inc.](#), 322 F.2d 878 (9th Cir. 1963), the presumption does not automatically cease to exist on showing [**249] that a prior art patent was not cited by the Patent Examiner.

To weaken the presumption of validity which attaches to the Tannert patent, there must be some showing that pertinent prior art was not considered by the Patent Examiner, not merely that it was not cited. As the court in [Lundy Electronics & Systems, Inc. v. Optical Recognition Systems Co., Inc.](#), 362 F. Supp. 130, 142 (E.D. Va. 1973), explained:

HN7[] Even though not cited as a reference by the Patent Examiner, there is no presumption in a patent infringement proceeding that patents not cited were overlooked, since they may have been considered and cast aside as not pertinent. [Davis v. Buck-Jackson Corp.](#), 138 F. Supp. 908 (E.D.S.C. 1955) aff'd, 230 F.2d 655 (4th Cir.), cert. denied [**32], 351 U.S. 950, 100 L. Ed. 1474, 76 S. Ct. 846 (1956). It is as reasonable to conclude that a prior art patent not cited was considered and cast aside because not pertinent, as it is to conclude that it was inadvertently overlooked. However, the question whether the failure of the Examiner to cite certain art is consistent with its examination and rejection depends on the pertinency of the uncited art. [Maschinenfabrik Rieter, A.G. v. Greenwood Mills](#), 340 F. Supp. 1103 (D.S.C. 1972); [Technograph Printed Circuits, Ltd. v. Bendix Aviation Corp.](#), 1218 F. Supp. 1 (D. Md. 1963), aff'd, 327 F.2d 497 (4th Cir.), cert. denied, 379 U.S. 826, 13 L. Ed. 2d 36, 85 S. Ct. 53 (1964)].

Further, **HN8**[] where the file wrapper of a patent indicates that the Patent Examiner searched the class and sub-class which contains the prior art cited by the party attacking the validity of a patent, it is presumed [*432] that the Patent Examiner considered all pertinent prior art in the sub-class. [Panduit Corp. v. Burndy Corp.](#), 517 F.2d 535, 538 (7th Cir.), cert. denied, 423 U.S. 987, 46 L. Ed. 2d 304, 96 S. Ct. 395 (1975); [Uarco Inc. v. Moore Business Forms, Inc.](#), 440 F.2d [**33] 580, 585 (7th Cir. 1971); [Canaan Products, Inc. v. Edward Don & Co.](#), 388 F.2d 540, 544-45 (7th Cir. 1968); [Minnesota Mining & Manufacturing Co. v. Berwick Industries](#), 393 F. Supp. 1230, 1234-35 (M.D. Pa. 1975), aff'd, 532 F.2d 330 (2d Cir. 1976); [Deering Milliken Research Corp. v. Beaunit Corp.](#), 382 F. Supp. 403, 410 (W.D.N.C. 1974), rev'd on other grounds, 538 F.2d 1022 (4th Cir. 1976), cert. denied, 426 U.S. 936, 49 L. Ed. 2d 388, 96 S. Ct. 2651 (1976); [Amerace Esna Corp. v. Highway Safety Devices Inc.](#), 330 F. Supp. 313 (N.D. Tex. 1971); [Lage v. Caldwell Manufacturing](#), 221 F. Supp. 802 (D. Neb. 1963).

In this instance, the Patent Examiner's search included Class 242, sub-class 47.12, the class and sub-class which contained the Pfarrwaller patent. Therefore, although the Examiner did not cite the Pfarrwaller patent, there is a strong presumption that he considered it. His reason for not citing this patent may well have been that he considered it no more pertinent than the other prior art patents which he did cite. [A. R. Inc. v. Electro-Voice, Inc., 311 F.2d 508 \(7th Cir. 1962\)](#). The Examiner's citation of Rosen suggests this is what occurred. [**34] Rosen cites Pfarrwaller (see P. Exh. 5).

Even assuming *arguendo* that the Examiner did not consider the Pfarrwaller patent, this alone would not void the presumption of validity which attaches to the Tannert patent. It would weaken that presumption only insofar as the Pfarrwaller patent is prior art more pertinent than the art cited and considered by the Patent Examiner. [La Salle Street Press, Inc. v. McCormick & Henderson, Inc., 445 F.2d 84, 93 \(7th Cir. 1971\)](#); [TSC Industries Inc. v. International Harvester Co., 406 F.2d 53, 57 \(7th Cir. 1968\)](#); [National Dairy Products Corp. v. Borden Co., 394 F.2d 887, 891 \(7th Cir.\)](#), cert. denied, 393 U.S. 953, 21 L. Ed. 2d 364, 89 S. Ct. 378 (1968); [Ekstrom-Carlson & Co. v. Onsrud Machine Works, Inc., 298 F.2d 765, 768 \(7th Cir.\)](#), cert. denied, 369 U.S. 886, 8 L. Ed. 2d 287, 82 S. Ct. 1160 (1962); [Brennan v. Hanger, Inc., 479 F. Supp. 1215, 203 U.S.P.Q. 697, 702 \(S.D.N.Y. 1979\)](#); [Dennison Mfg. v. Ben Clements & Sons, Inc., 467 F. Supp. 391, 203 U.S.P.Q. 895, 907 \(S.D.N.Y. 1979\)](#); [State Bank of Annawan v. Rendispos Corp., 173 U.S.P.Q. 136, 143 \(S.D. Ill. 1971\)](#); [Mercantile National Bank of Chicago v. Quest, Inc., 303 F. Supp. 926 \(N.D.Ind. 1969\)](#); [Illinois Tool Works, Inc. v. Continental Can Co., 273 F. Supp. 94, 111 \(N.D. Ill. 1967\)](#).

In this case, the Patent Examiner did cite the Rosen U.S. Patent 3,720,384 (P. Exh. 5), and the defendants' expert, Dr. Tayebi, testified that in terms of the teaching relevant to this case, this first Rosen Patent is equivalent to the later Rosen Patent (U.S. patent 3,796,384; D. Exh. 10), and is equivalent to the Pfarrwaller patent (P. Exh. 4; D. Exh. 6) (Tr. 396, 417-18).

My own examination of the patents in question convinces me that Dr. Tayebi was correct in this view. The earlier Rosen patent (P. Exh. 5), and the later Rosen patent (D. Exh. 10) each contain five technical figures [***250] which are identical in every respect. The earlier patent adds two other figures, but these illustrate features not pertinent to this inquiry. Although there are differences between the two written abstracts of the patent, much of the language is again identical. The defendants would totally discount the significance of the earlier Rosen patent, pointing out that it was never put to a commercial use, and that it was intended for use in knitting rather than [**36] weaving applications. I find neither reason persuasive. [HNG\[↑\]](#) The significance of a patent in this context is its teaching as prior art, not its commercial impact. The authorities are unanimous that commercial impact is a secondary consideration. Secondly, although knitting machines are distinct from weaving machines, the Rosen patent is unquestionably pertinent art. [Cathodic Protection Service v. American Smelting & Refining Co., 594 F.2d 499, 507 \(5th Cir. 1979\)](#).

The Pfarrwaller patent (P. Exh. 4, D. Exh. 6) is superficially different from the Rosen patents. The defendants, however, cite the [*433] Pfarrwaller patent for only a single feature: that it teaches the control of yarn feeding onto the winding body in response to the length of the thread store on the winding body. (Tr. 359-61; Defendants' Brief at 2, 4). As Dr. Tayebi has acknowledged, the Rosen patent (P. Exh. 5) teaches the same concept. (Tr. 396).

Having carefully examined the Pfarrwaller patent and compared it with the Rosen patent cited by the Patent Examiner, I do not believe that the Pfarrwaller patent is more pertinent to the determination of the obviousness or nonobviousness than the Rosen patent [**37] is. Therefore, the presumption of validity under [35 U.S.C. § 282](#) is not weakened by the Patent Office's failure to cite the Pfarrwaller patent.

As noted above, the Patent Examiner did cite the Pourtier patent. Where the Patent Office has cited the prior art on which a defendant relies in challenging the validity of a patent, the presumption of validity is greatly strengthened. [Universal Athletic Sales Co. v. American Gym, Recreational & Athletic Equipment Corp., Inc., 546 F.2d 530, 540 n. 28 \(3d Cir. 1976\)](#); [Chicago Rawhide Mfg. Co. v. Crane Packing Co., 523 F.2d 452, 458 \(7th Cir. 1975\)](#), cert. denied, 423 U.S. 1091, 47 L. Ed. 2d 103, 96 S. Ct. 887 (1976); [Tracor, Inc. v. Hewlett-Packard Co., 519 F.2d 1288, 1292 \(7th Cir. 1975\)](#); [Research Corporation v. Nasco Industries, Inc., 501 F.2d 358 \(7th Cir. 1974\)](#); [Ling-Temco-Vought,](#)

Inc. v. Kollsman Instrument Corp., 372 F.2d 263, 268 (2d Cir. 1967); Marston v. J.C. Penney Co., 353 F.2d 976, 982 (4th Cir. 1965), cert. denied, 385 U.S. 974, 17 L. Ed. 2d 437, 87 S. Ct. 515 (1966); Arnold Pipe Rentals Co. v. Engineering Enterprises, Inc., 350 F.2d 885, 890 (5th Cir. 1965); Shumaker v. Gem Manufacturing Co., 311 F.2d 273 (7th Cir. 1962); Power Curbers, Inc. v. Etnyre & Co., 298 F.2d 484, 492-93 (4th Cir. 1962); Jeoffroy Manufacturing, Inc. v. Graham, 219 F.2d 511, 519 (5th Cir. 1955); Southern States Equipment Corp. v. U.S.C.O. Power Equipment Corp., 209 F.2d 111 (5th Cir. 1953); Dart Industries, Inc. v. E. I. du Pont de Nemours & Co., 348 F. Supp. 1338, 1355 (N.D. Ill. 1972); Shields-Jetco, Inc. v. Torti, 314 F. Supp. 1292, 1295 (D. R. I. 1970); Arthur J. Schmitt Foundation v. Stockham Valves & Fittings, Inc., 292 F. Supp. 893, 907 (N.D. Ala. 1966), aff'd 404 F.2d 13 (5th Cir. 1968), cert. denied, 398 U.S. 965, 26 L. Ed. 2d 549, 90 S. Ct. 2177 (1970); Illinois Tool Works, Inc. v. Continental Can Co., 273 F. Supp. 94, 111 (N.D. Ill. 1967).

Thus, there is a strong presumption in this case that the Tannert patent is valid and not obvious. While the question is not foreclosed and requires an independent consideration by this Court, reasonable doubt must be resolved in favor of a finding that the plaintiffs' Tannert patent is valid. Radio Corp. of America v. Radio Engineering Laboratories, 293 U.S. 1, 7, 79 L. Ed. 163, 54 S. Ct. 752 (1934). [**39]

D. THE TANNERT PATENT AND ANTICIPATION, 35 U.S.C. § 102.

Although the defendants rest their attack on the validity of the Tannert patent primarily on the contention that the invention is obvious and the patent therefore invalid under 35 U.S.C. § 103, there is a sufficient contention of anticipation under 35 U.S.C. § 102 to warrant the Court's attention.

The defendants contend that, without reference to other art, the Pourtier device can be modified to achieve the patented device. (Tr. 359-61, 369; Defendants' brief at 4). Assuming *arguendo* that this contention is true, I find it is not sufficient to make out a case of anticipation as that term is construed in the cases interpreting 35 U.S.C. § 102. **HN10** Anticipation is established only when a single device in the pertinent prior art includes all of the claimed elements of the invention in question. American Original Corporation v. Jenkins Food Corp., 696 F.2d 1053, 1058-59 (4th Cir. 1982); [**251] Carter-Wallace, Inc. v. Gillette Co., 675 F.2d 10, 15 (1st Cir. 1982); Arbrook, Inc. v. American Hospital Supply Corp., 645 F.2d 273, 276-77 (5th Cir. 1981); Milgo Electronic Corp. v. United Business Communications, Inc. [**401], 623 F.2d 645, 654 (10th Cir.), cert. denied, 449 U.S. 1066, 66 L. Ed. 2d 610, 101 S. Ct. 794 (1980); Application of Marshall, 578 F.2d 301 (C.C.P.A. 1978); [*434] Tights, Inc. v. Acme-McCrory Corp., 541 F.2d 1047, 1056 (4th Cir. 1976); Illinois Tool Works, Inc. v. Sweetheart Plastics, Inc., 436 F.2d 1180, 1182-83 (7th Cir. 1971) and cases cited therein; Plasser American Corporation v. Canron, Inc., 546 F. Supp. 589 (D.S.C. 1980); Thomas & Betts Corp. v. Winchester Electronics Division of Litton Systems, Inc., 519 F. Supp. 1191 (D. Del. 1981); Wycuff v. Motorola, Inc., 502 F. Supp. 77 (N.D. Ill. 1980); Duplan Corp. v. Deering Milliken, Inc., 444 F. Supp. 648 (D.S.C. 1977), aff'd in part, rev'd in part on other grounds, 594 F.2d 979 (4th Cir. 1979), cert. denied, 444 U.S. 1015, 100 S. Ct. 666, 62 L. Ed. 2d 645 (1980). As the defendants admit, the Pourtier device responds to the length of the coil store on the winding body by engaging and disengaging the coil removal function. In a weaving situation, this would mean that the loom would have to continually start and stop. This is impractical in a weaving situation. This alone is sufficient [**41] to defeat any claim of anticipation, and I conclude that the Tannert patent was not anticipated by the Pourtier patent, or by any other cited prior art.

E. SCOPE AND CONTENT OF THE PRIOR ART.

The prior art patents upon which Roj and Otex rely are the Pourtier German patent No. DT 1,191,197 (P. Exh. 35, D. Exh. 5) and the Pfarrwaller U.S. patent No. 3,411,548 (P. Exh. 4, D. Exh. 6). These are described in the following pages. In addition to this, because of their equivalence to the Pfarrwaller patent, the Rosen U.S. patent No. 3,720,384 (P. Exh. 5) and the Rosen U.S. patent No. 3,796,384 (D. Exh. 10) are also described.

1. Pourtier German Patent No. 1,191,197

(P. Exhs. 35A, 35B, 36)

As described in the translation (P. Exh. 35B), the drawing (P. Exh. 36) and Mr. Chadwick's testimony (Tr. 514-18), this German patent cited by the Patent Office shows a device for feeding wire cable. It comprises a drum which is rigidly fixed to a shaft. The shaft is, in turn, rigidly mounted on the framework of the storage device.

The storage device is designed to take up and store wire cable being continuously delivered from a manufacturing process during those periods when drums are not [**42] being filled with the wire for marketing; i.e., when a drum has been filled and is being removed and an empty drum substituted for it. Viewing the storage device in the single figure of the patent drawing, the wire is received from the wire manufacturing machine at the right through a guide. It proceeds to a pulley mounted on the periphery of a rotatable disc. The disc is rotated through a drive pulley by a belt drive.

The disc rotates relative to the fixed drum. As it does so, it circumferentially lays wire in successive coils on the drum adjacent to a wobbling ring also rotated by the disc. The disc is rotated at the speed at which the wire is being manufactured so as to continuously lay it on the drum as the wire is manufactured.

The wobbling ring successively nudges each new coil to the right on the drum to make way for the next coil. In this way the coils are built upon and moved to the right along the drum. Notably, the coils move toward the source.

To remove wire from the drum a marketing spool to which the wire coming from the left end of the devices is attached, is rotated. The wire is pulled through the passage in the shaft from the right end of the shaft over [**43] a wire reversal guide. It reaches the guide by being circumferentially unwrapped from the drum over a pulley. The pulley is mounted on a radial arm of a bushing rotatable on the shaft.

Rotation of the marketing spool thus causes the arm and the pulley to rotate. Wire is circumferentially unwrapped from the drum, drawn over the pulley as the pulley rotates, and passes in the opposite direction through the shaft to the rotating spool. The spool is rotated under the control of a switch operated by two photocells and on the drum. When the coils on the drum are reduced in number to a point [*435] where the photocells receive a sufficient light signal from the light source, the spool is stopped and wire removal ceases until sufficient coils again build up on the drum to cover the cells. During this period, a full spool may be removed and an empty spool put in its place to begin filling it when spool rotation again is called for. Wire continues to be laid on the drum at all times. [***252]

2. Pfarrwaller U.S. Patent No. 3,411,548

(P. Exh. 4, D. Exh. 2)

Referring to the patent and Mr. Chadwick's testimony (Tr. 63-67), the Pfarrwaller patent (see esp. Fig. 2) discloses a weft [**44] thread feeder for looms. The feeder takes thread from the storage bobbin and coils it on its drum. The thread is removed from these coils on the drum by a gripper shuttle. The feeder includes a supporting arm which is fixed to the loom frame. The arm mounts bearings which rotatably carry a hollow shaft.

At the left end of the shaft a pulley is loosely seated on it. A clutch plate on the pulley cooperates by magnetic coupling with a disc fixed to the shaft to cause the shaft to rotate with the pulley when the magnetic coupling is energized.

At the right end of the shaft, an eye and bore is provided through which the weft thread passes from the inside to the outside of the shaft. The shaft has affixed to its right end a hollow conical body which functions as a flyer arm. At the outer edge of the flyer arm is provided a thread feeding eye through which the weft thread is passed.

The shaft, at its right end, includes an extension inside the hollow cone. A drum is rotatably supported with respect to the shaft in this space on ball bearings. Whereas the shaft with its right end rotates, the drum is held against any substantial rotation by two permanent magnets supported within [**45] a ring which encircles the right end of the drum so as to leave an annular space between the ring and the drum. The drum carries two armatures which cooperate with the magnets to substantially prevent the drum from following the rotation of the shaft. In effect, these magnets and armatures counter-rotate the drum relative to the shaft.

The support arm additionally carries a light source whose beam is obliquely incident on the drum. The reflected beam of light impinges on a photocell which is shielded from the source by means of a mask. The photocell is connected by conductors to the switching device.

During operation of the loom, rotation of the cone continuously pulls weft thread from the bobbin through the hollow shaft and through the eye formed on the cone or flyer, and the thread so withdrawn is wound onto the drum. During each pick by the weaving shuttle, the thread unwinds from the drum under the brushes of the braking ring.

As the coils of thread are laid on the drum by the eye, they are laid on the conical enlargement of the drum. The drum has a polished surface so that the arriving coils cause those already wound to slip to the right, and thus move onto the cylindrical [**46] portion of the drum. After several revolutions have been executed by the shaft, several turns will build up on the cylindrical portion. By reason of the polished nature of the drum surface and because of the looseness with which the turns are wound, each coil will be shifted to the right by the coil to the left of it. In contrast to the Pourtier and Tannert devices, the coils in the Pfarrwaller device are shifted away from the source.

If the axial length of the space occupied by the coils of thread on the drum extends to the right so as to cover the point at which the light beam is reflected, the reflected beam will be interrupted. The photocell and a switching device are so adjusted that with this reduction of light incident on the photocell, the supply of current to the magnetic coupling is interrupted and the hollow shaft and cone come to rest.

When, after one or more additional picks, enough coils are withdrawn from the drum so as to uncover the spot at which the light beam is incident on the drum, the photocell will again receive the reflected beam so [*436] that the magnetic coupling will be restored by operation of the photocell and the switching device will cause [**47] the cone to resume rotation with the shaft and once more with raw weft thread from the bobbin and wind it on the drum.

In a modified embodiment of the thread feeder, the drum includes an eccentric mass which causes the drum to be unbalanced. The weight of the mass hinders rotation of the drum so as to make the ring magnet and armatures unnecessary. Again, the effect is to counter-rotate the drum relative to the shaft.

3. Rosen U.S. Patent No. 3,720,384

(P. Exh. 5)

As shown in the patent and Mr. Chadwick's testimony (Tr. 67-71), the Rosen patent (P. Exh. 5) discloses a thread feeder also. The feeder comprises a chassis housing in which a shaft is journaled on ball bearings. The shaft has a hollow projecting arm bent downwardly at its outer end. Thread comes from a supply package through the hollow shaft and out of the arm where it is laid on the cylindrical surface of the winding body by the rotation of the shaft and arm. A pulley wheel driven by a belt is connected to the shaft and rotates it.

The winding body is mounted on the shaft also but it is held against rotation with the shaft. This is accomplished by a complicated [***253] arrangement of a gear ring fixed on the housing, [**48] a gear ring of identical size mounted on the winding body, and a pair of sprockets which run around these two rings on a pin as the shaft rotates. This planetary gear arrangement keeps the winding body stationary. As in the Pfarrwaller device the effect is one of counter-rotation.

As the arm rotates it lays thread on the stationary winding body in precisely the same location relative to the axis of the winding body with each rotation. These turns of thread are successively and progressively moved axially down the winding body by the pressure of an inclined, toothed disk. The disk is mounted on the rotating shaft with bearings so that it does not rotate. Its teeth protrude outwardly of the winding body cylindrical surface. Although the disk does not rotate with the shaft, its bearing mounting plate does so that the disk wobbles as the shaft rotates. This wobbling forces thread laid on the winding body to be forced axially down the winding body with each rotation.

The disk is actually maintained in its inclined position by the pressure of a spring. When a predetermined number of yarn coil turns have accumulated in the yarn store on the winding body, the increasing frictional [**49] resistance of this growing reserve overpowers the spring whereupon the disk moves to a more horizontal position. This

permits a pin to become disengaged from a ring on the drive pulley and rotation of the shaft as well as the thread laying arm is stopped.

4. Rosen U.S. Patent No. 3,796,384

(D. Exh. 10)

Insofar as its disclosure of a non-rotating drum is concerned, this patent is identical to the earlier Rosen Patent (P. Exh. 5). It discloses control of the thread laying arm as a function of the thread store length in a manner identical to the earlier Rosen Patent. Dr. Tayebi admits that the two patents are identical in this teaching (Tr. 418). Dr. Tayebi also admits that the teaching of the Rosen patents with regard to thread laying arm control as a function of thread storage coil length is the same as the Pfarrwaller (P. Exh. 4, D. Exh. 6) thread feeder (Tr. 418).

F. DIFFERENCES BETWEEN THE PRIOR ART AND THE CLAIMED INVENTION.

The device defined by Claim 1 of the Tannert patent (P. Exh. 1) in suit is critically different than the prior art Pourtier wire storage (P. Exhs. 35, 36, D. Exh. 5). The Tannert invention:

- a) Is a "thread feeder" for taking, storing, and feeding **[**50]** "thread" to a textile machine.
- b) Is a "Thread feeder" with a thread coil storage or winding body which is "fixed" to the feeder chassis or support.
- [*437]** c) Is a "thread feeder" wherein a "thread laying guide" is rotated by "driving means" and that "driving means" is under the control of a "control device . . . operated in response to the length . . . (of the thread coil) store."
- d) Is a "thread feeder" wherein the thread moves in a passageway through the thread coil winding body in a direction opposite to the direction in which thread coils are shifted on the outside of the winding body.
- e) Is a thread feeder wherein thread is stripped from the second end of the thread coil store, i.e., pulled axially over the winding body end.

Referring to the patent (P. Exh. 35A), translation (P. Exh. 35B), drawing (P. Exh. 36) and Mr. Chadwick's testimony (Tr. 522-29) the Pourtier device, in contrast:

- a) Is an *electric cable* storage device which receives and stores *cable* being manufactured by a cable manufacturing machine, as Dr. Tayebi admits (Tr. 433).
- b) Is a storage device wherein cable laying onto its storage drum is *not* under control of a control device operated **[**51]** in response to the length of the coiled cable store, as Dr. Tayebi admits (Tr. 348).
- c) Is a storage device where the drum constantly receives cable from a constantly rotating arm, as Dr. Tayebi admits (Tr. 433-34).
- d) Is a cable storage device where the wire is not guided by a "bead-like means" as it departs, as Dr. Tayebi admits (Tr. 442).
- e) Is a storage device wherein cable is not stripped off the drum by being pulled over the drum end but rather is unwound from the drum circumferentially over a rotating arm and pulley, as Mr. Chadwick testified (Tr. 518).

In reviewing these differences between the Pourtier art and the Tannert art, I find that the last difference, the unwinding device in the Pourtier art, is particularly critical. Given the speed at which the modern high-speed loom draws off picks of thread, a passive unwinding device would be simply unworkable. It would, almost undoubtedly reintroduce such an element of tension that the very function of a thread feeder would be defeated. Alternatively, an active unwinding device would require the sort of powerful driving **[***254]** force and braking mechanism found in rotating drum feeders which has been cited as one of their key **[**52]** disadvantages. I believe my impressions are borne out by the apparent absence of an unwinding in any nonrotating drum feeder brought to my attention. In short, I find that there are significant differences between the Pourtier art and the Tannert art.

The device defined by Claim 1 is also critically different than the Pfarrwaller (P. Exh. 4), Rosen (P. Exh. 5), and Rosen (D. Exh. 10) prior art device. For purposes of their prior art value, these patents are identical as Dr. Tayebi admits (Tr. 418). The Tannert invention:

- a) Is a thread feeder with a thread coil storage drum or winding body which is "fixed" to the feeder chassis or support.
- b) Is a thread feeder which, because the drum is "fixed" to the chassis, permits the use of a simple and inexpensive yarn coil store sensing device within the drum.
- c) Is a thread feeder wherein the thread moves in a "passageway" through the thread coil winding body in a direction opposite to the direction in which thread coils are shifted on the outside of the winding body.

The Pfarrwaller, Rosen, and Rosen prior art devices, in contrast, are:

- a) Thread feeders with thread coil storage drum or winding bodies which are *not* "fixed" to ****53** the feeder chassis or support. They are, as has been discussed in great detail, loosely mounted on the support and prevented from rotating (or, so to speak, counter-rotated relative to the shaft) by complicated magnetic or unbalanced weight means.
- b) Thread feeders which, because their thread coil storage drums are not "fixed", must use yarn coil store sensing devices mounted on separate structure outside the drum (Pfarrwaller) or complicated and expensive ***438** connecting devices inside the drum (Rosen).
- c) Are thread feeders wherein the thread does *not* move in a passageway through the thread coil winding body in a direction opposite to the direction in which the thread coils are shifted on the outside of the winding body nor is it guided to this passageway by "bead-like means."

I consider the change from a non-rotating drum mounted on a rotating shaft to a fixed drum significant. In the Rosen and Pfarrwaller art, means must be introduced to maintain the drum in a fixed position on an intermittently rotating shaft. Unbalancing weights, although relatively simple, introduce the problem that they restrict the positioning of the thread feeder: the shaft must be kept in ****54** a horizontal position. Alternatively, magnet and armature arrangements introduce elements of complexity and expense. With either adaptation, there is the problem of maintaining the bearings or other means on which the drum rotates. A feeder without these additional bearings, weights, magnets, or armatures would be an advance over the Rosen or Pfarrwaller art.

G. THE LEVEL OF ORDINARY SKILL IN THE PERTINENT ART.

The third of the major factors set forth in *Graham v. John Deere Co., 383 U.S. at 17*, is the level of ordinary skill in the pertinent art. This is certainly the most amorphous of the three elements of the test, as Judge Learned Hand cogently commented:

The test laid down is indeed misty enough. It directs us to surmise what was the range of ingenuity of a person "having ordinary skill" in an "art" with which we are totally unfamiliar; and we do not see how such a standard can be applied at all except by recourse to the earlier work in the art, and to the general history of the means available at the time. To judge on our own that this or that new assemblage of old factors was, or was not, "obvious" is to substitute our ignorance for the acquaintance with ****55** the subject of those familiar with it.

Reiner v. I. Leon Co., 285 F.2d 501, 503-04 (2d Cir. 1960), cert. denied, 366 U.S. 929, 6 L. Ed. 2d 388, 81 S. Ct. 1649 (1961). A particular danger to any court attempting such a determination is the projection of hindsight on the problem. The old quip "the solution to this problem, once discovered, will be completely obvious," hangs over any determination of the level of ordinary skill in an art which requires an expertise far outside the learning of the law. Courts have repeatedly and rightly cautioned against determinations based on hindsight. E.g., *Yoder Bros., Inc. v. California-Florida Plant Corp., 537 F.2d 1347, 1378-79 (5th Cir. 1976)*, cert. denied, 429 U.S. 1094, 97 S. Ct. 1108, 51 L. Ed. 2d 540 (1977); *Charvat v. Commissioner of Patents, 164 U.S. App. D.C. 47, 503 F.2d 138, 144-45 (D.C.*

Cir. 1974); Application of Bodley, 57 C.C.P.A. 1142, 426 F.2d 390, 394 (1970); Kaiser Industries Corp. v. McLouth Steel Corp., 400 F.2d 36, 42 (6th Cir. 1968), cert. denied, 393 U.S. 1119, 22 L. Ed. 2d 124, 89 S. Ct. 992 (1969); Zegers v. Zegers, Inc., 365 F.2d 156, 159 (7th Cir.), cert. denied, 385 U.S. [**56] 948, 17 L. Ed. 2d 226, 87 S. Ct. 320 (1966); Berry Bros. [***255] Corp. v. Sigmon, 317 F.2d 700, 704 (4th Cir. 1963); Honolulu Oil Corp. v. Shelby Poultry Co., 293 F.2d 127, 131 (4th Cir. 1961); Manville Boiler Company v. Columbia Boiler Company of Pottstown, 269 F.2d 600, 603-04 (4th Cir. 1959); Lundy Elect. & Systems, Inc., *supra*, 362 F. Supp. 130, 148; Hunt Industries, Inc. v. Fibra Boats, Inc., 299 F. Supp. 1145, 1148 (S.D. Fla. 1969) ("the test of obviousness is not hindsight"); Blumcraft of Pittsburgh v. Citizens & Southern National Bank of South Carolina, 286 F. Supp. 448, 455-56 (D.S.C. 1968).

HN11[To avoid a hindsight reconstruction of the relevant art, which would cloud any determination of the level of ordinary skill, it is essential to examine the development of the pertinent art. As another court, faced with a problem comparable to the one raised in this case commented:

We must ultimately resort to a review of the history of the art before and after the invention. Incidentally, such a review in combination with the prescribed [*439] prefatory analysis of the prior patents and publication, is also usually the best, and frequently the only, way [**57] to determine "the level of ordinary skill in the art" as further directed by Graham.

Plantronics, Inc. v. Roanwell Corporation, 403 F. Supp. 138, 142 (S.D.N.Y. 1975), aff'd, 535 F.2d 1397 (2d Cir., cert. denied, 429 U.S. 1004, 50 L. Ed. 2d 617, 97 S. Ct. 538 (1976), reh'g. denied, 429 U.S. 1079, 50 L. Ed. 2d 800, 97 S. Ct. 826 (1977); and, see generally, Safety Car Heating & Lighting Co. v. General Electric Co., 155 F.2d 937 (2d Cir. 1946).

HN12[Concomitantly, the practitioner having "the level or skill in the art" is charged with a comprehensive knowledge of the pertinent prior art. Continental Can Company v. Crown Cork & Seal Co., 415 F.2d 601, 603-04 (3d Cir. 1969); David & David, Inc. v. Myerson, 388 F.2d 292, 294 (2d Cir. 1968); Anthony v. Ranco, Inc., 316 F.2d 509, 511-12 (5th Cir. 1963) (the inventor is conclusively presumed to know prior art, whether or not he has actual knowledge); Andis Clipper Co. v. Oster Corp., 481 F. Supp. 1360, 1376 (E.D. Wis. 1979); Novelart Mfg. Co. v. Carlin Container Corp., 363 F. Supp. 58 (D.N.J. 1973); Lundy Electronics & Systems, Inc. v. Optical Recognition Systems, Inc., 362 F. Supp. 130, 148 [**581] (E.D. Va. 1973); Blair v. Westinghouse Elec. Corp., 291 F. Supp. 664, 668-69 (D. C. 1968).

Accordingly, to define and evaluate the level of ordinary skill in the art, I turn to a discussion of the development of yarn feeders, directed towards an assessment of the significance (or absence of significance of the plaintiff's invention.

H. EARLY THREAD FEEDERS.

The weaving looms with which most lay-people are familiar are simple hand looms. On these, there are two sets of vertical threads, and weaving is accomplished by passing a shuttle between them. The shuttle carries the yarn which is laid out as the cross-threads or wefts in the fabric. Modern commercial weaving is done on shuttleless looms. Thread is taken from external spools and forced between the sets of vertical strands, with the looms laying down several hundred wefts per minute.

In high-speed weaving, the tension of the wefts must be kept relatively constant. Where thread is unwound directly from a spool or bobbin, the necessary constancy of tension cannot be maintained. This has led to the development of devices which draw a small store of weft material and feed it, with relatively constant tension into the [**59] weaving machine. Such devices are variously called thread feeders, yarn storage feeders, and yarn accumulators. (Tr. 50). In this opinion, for the sake of consistency, I will use the term thread feeder.

The purpose of thread feeders is multifold. Primarily they prevent potential variations in thread tension caused by a poorly wound or damaged thread package from being transmitted to the loom (Tr. 51). In a shuttleless loom, for example, a sudden increase in tension, coupled with the extremely high speeds at which the weft thread is pulled from the thread source, may result in a broken thread and, consequently, loom shutdown.

Mr. Arthur Chadwick, discussing the history of the development, testified that the first device referred to as a thread feeder by skilled practitioners in the textile machinery art was made by Anton Junkers in Germany around 1925. (See U.S. Patent 1,849,983, P. Exh. 37).

Subsequent to the development of the Junkers feeders, it was not until the late 1950's that the next innovation in thread feeders appeared. In 1959 Gebreuder Sulzer of Winterthur, Switzerland, developed the feeder illustrated in U.S. patent No. 3,131,729. (P. Exh. 38). This feeder [**60] incorporated a rotating drum which drew thread from the feed package. (Tr. 531-32). As will be explained [***256] below, one of the significant developments in modern thread feeders is the development of feeders having stationary storage drum. By 1961, the firm of Sobrevin Brevests Industrielles (hereinafter "Sobrevin"), an Italian company with headquarters in Lichtenstein, whose experts were A.G. Sarfati and Giuseppe Vischiani, developed the thread feeder disclosed in the [*440] Sarfati et al., United States Patent No. 3,225,446. (P. Exh. 10). Like the Junkers thread feeder, Sarfati's thread feeder relied upon rotation of a drum rotatably mounted on the framework of the textile machine to draw thread from the supply source and, in effect wrap itself in coil after coil of thread (Tr. 532).

These early rotating drum thread feeders successfully prevented unwanted variations in tension caused by thread spool damage or other problems at the thread source. Unfortunately, these feeders also caused undesired effects. If the thread is twisted while being woven or knit, it either gets a tighter twist or it untwists and becomes fluffy, weakening it and tending to cause it to disintegrate. [**61] The rotating drum construction was found, unhappily, to introduce just such an unwanted twist. Specifically, since the drum rotates, it naturally carries the coil store with it. When no thread is being drawn off by the weaving machine, the thread between the endmost coil and the weaving station is rapidly twisted in the direction the drum rotates and substantial unwanted twist is created until the coil store is full and the drum rotation stops. When weaving does start, the twisted thread segment is woven into the fabric and creates a striation in the fabric because of the difference of the tightness of its twist compared to the thread alongside it. (Tr. 74-85).

The rotating drum also presented other problems. Since the drum itself was constantly starting and stopping or speeding and slowing, its mass had to be taken into consideration with regard to the power required for starting-driving the drum and the braking force required for slowing-stopping the drum. A small but relatively powerful motor and a commensurately strong braking system was required. The result was relatively sophisticated construction, and thus a relatively expensive feeder. (Tr. 55-57, 74-85).

These various [**62] problems associated with rotating drum feeder led in about 1960 to efforts to develop a thread feeder in which the drum would be stationary, and the thread would be coiled around the drum by means of a rotating arm of considerably smaller mass commensurately easier to start and stop.

I. NON-ROTATING THREAD FEEDERS.

The Pourtier cable-winding device (P. Exh. 35, D. Exh. 5) preceded the development of thread feeders having a non-rotating winding-body. In the Pourtier device, the winding body, is fixed on a shaft, so that it cannot rotate. There are two rotating arms, one at either end of the winding body. The rotating arm at the end away from the cable source is situated so that the cable coming to it travels outside the winding body. This arm lays cable continuously on the drum, with the coil-store moving back toward the cable source. (This, of course, contrasts with the movement of the coil-store in Pfarrwaller, in which the coil-store moves away from the source). A second arm operates intermittently to circumferentially unwind cable from the end of the drum closer to the source. The cable is then pulled through the hollow shaft, thus passing through the drum. The rotation [**63] of the second arm is controlled by two photo-electric cells mounted on the drum, which are activated by an external light source when the thread store is depleted. When the cells are activated, the unwinding arm is disengaged, allowing additional coil store to build up on the drum. This additional coil store covers the cells, and the unwinding arm is then re-engaged.

While this device was patented in West Germany in 1965, there is no evidence in the record of this case indicating that its art was adapted for use in thread feeders before the introduction of the Tannert device.

By 1960, yarn feeding experts had concluded that the various problems associated with a rotating-drum feeder required the development of a device in which the drum remained stationary. The first practical fixed-drum thread

feeder was invented in 1965 by Erwin Pfarrwaller, and is shown in U.S. patent 3,411,548 (P. Exh. 4), which is extensively discussed in the prior art section, [*441] *supra*. This device did include a winding body which did not rotate, but it was kept stationary only through the use of complex and relatively expensive means: a magnet and armature system acting from outside the drum, [**64] or unbalancing weights inside the drum. (Tr. 535-36). Further, because the drum is mounted on an intermittently rotating shaft rather than on any fixed object, any device for controlling the thread-laying arm in response to the length of the coil store on the drum either had to be placed outside the drum, or had to have an intricate mechanism for carrying the start-stop signals from the stationary drum through the rotating shaft.

At the time Erwin Pfarrwaller introduced his device, he had the Pourtier patent for a cable-winding device available for his use. [***257] Despite a lengthy career as an extraordinarily prolific inventor in the field of textile machinery, including six patents directed specifically to thread feeders and over 100 American patents concerning textile machinery and methods (see P. Exh. 42), Pfarrwaller built a device which did not take advantage of the advantages of the Pourtier construction concerning yarn path, advantages which are now quite apparent.

The next significant advance in the art of thread feeders came in 1970, with the patenting of another Pfarrwaller device, U.S. patent 3,761,031 (P. Exh. 14). Again, the drum, although stationary, is mounted on a rotating [**65] shaft and must be kept stationary (or counter-rotated) by magnets or eccentric weights. Further, the device for sensing the length of the coil store is, as in the earlier Pfarrwaller device (P. Exh. 4), external to the winding body.

This device was followed by others, such as the Sobrevin device, U.S. patent 3,791,598 (P. Exh. 16); the Ruti devices, U.S. patents 3,519,025 (P. Exh. 31), and 3,575,025 (P. Exh. 32); the Teijin Limited device, West German patent (DT-PS 2,039,716 (P. Exh. 33); the earlier Rosen device, U.S. patent 3,720,384 (P. Exh. 5), extensively discussed above; and the Wesco device, U.S. patent 3,737,112 (P. Exh. 40). An examination of each of these patents shows that the inventor stationed a winding body on a rotating shaft, and then faced the two problems mentioned previously: the need to create a counter-rotational effect, and the requirement of having either an external device for measuring the size of the coil store or an intricate mechanism for carrying the signal from the stationary drum across an intermittently rotating shaft.

This was the state of the prior art at the time of the plaintiffs' claimed invention underlying U.S. patent 3,796,386 (P. Exh. 1). [**66] A practitioner having the level of ordinary skill would be familiar with rotating winding-body feeders, which prove unworkable in the weaving context; with the Pfarrwaller art and subsequent feeders having a non-rotating, rotatably-mounted winding bodies; and with the Pourtier art for cable making machines, with its fixed drum and reversed winding path.

I believe that from this collection of devices, all of the various elements of the plaintiff's device *could* be found. Prior to the Tannert invention, however, no one had put all of these elements together. [HN13](#)↑ The want of a successful combination before Tannert's suggests invention. [United States v. Adams, 383 U.S. 39, 15 L. Ed. 2d 572, 86 S. Ct. 708 \(1963\)](#).

Until the Tannert invention, there had been no device which provided the particular advantages that that device provides in the thread feeder art. After a very lengthy examination of the pertinent prior art as cited by the parties, consideration of the testimony of the opposing expert witness, and review of the relevant authorities, I can see how the Tannert invention can be developed from the prior art. I cannot be certain, however, that any such understanding of the [**67] evolution of thread feeder art is fundamentally the product of hindsight. In this case, I feel it is appropriate to turn to the secondary consideration mentioned in [Graham v. John Deere Company, 383 U.S. at 18](#), because, if at all possible, this Court must render a determination based on objective rather than subjective analysis. [Honolulu Oil Corp. v. \[**442\] Shelby Poultry Co., 293 F.2d 127, 131-32 \(4th Cir. 1961\)](#).

J. COMMERCIAL IMPACT OF THE TANNERT PATENT.

The Tannert patent illustrated the first thread feeder embodying a fixed winding body and a thread path in which the coil store moves on the winding body towards the thread store. The plaintiffs cite abundant art subsequent to the Tannert invention which adopts this configuration. Many of these devices were patented by the same companies

which had previously developed thread feeders following the basic teaching of Pfarrwaller. (See Sobrein West German patent DT-OS 2,142,486 P. Exh. 52; U.S. Patent 3,921,925, P. Exh. 21; U.S. Patent 3,999,447, P. Exh. 22; Wesco U.S. patent 3,782,661, P. Exh. 24; Elitex West German application DT-OS 2,410,791, P. Exh. 46; Savio U.S. patent 4,037,802, P. Exh. 50; Memminger [**68] West German application DT-OS 2,415,413, P. Exh. 41; See also P. Exh. 15, various patents in which Tanner has rights or licenses).

Beyond the tribute paid to the Tannert invention by other inventors who have followed his teaching, the Tannert device has enjoyed considerable commercial success. AB Iro took a non-exclusive license under which it pays a royalty rate of one percent. For this license, it has made payment of approximately \$230,000.00 (Tr. 638-40). Wesco took a license from Tannert (P. Exh. 67), under which they advanced Tannert \$60,000 against a four percent royalty on the net selling price of all feeders sold by Wesco or any sub-licensee. In return, Wesco became the exclusive licensee subject to the previously granted non-exclusive licenses held by Iro and Memminger. In anticipation of substantial commercial success, Wesco agreed to pay royalty minimums for 20,000 thread feeders in [***258] 1977 and 30,000 thread feeders every year thereafter while it held an exclusive license. While I discount the significance of these licenses somewhat because of the significant participation of the plaintiffs, I believe it is relevant to the determination of the question of obviousness. [**69] [Tights, Inc. v. Acme-McCrory Corp.](#), 541 F.2d 1047, 1059 (4th Cir.), cert. denied, 429 U.S. 980, 97 S. Ct. 493, 50 L. Ed. 2d 589 (1976); [Shaw v. E.B. & A.C. Whiting Company](#), 417 F.2d 1097, 1105-06 (2d Cir. 1969); [Otto v. Koppers Co.](#), 246 F.2d 789, 799-800 (4th Cir. 1956), cert. denied, 355 U.S. 939, 2 L. Ed. 2d 420, 78 S. Ct. 427 (1958).

Sulzer, even though it has the services of the prolific inventor Pfarrwaller, has bought Iro's IWF feeders for their weaving machines rather than using any of the Pfarrwaller designs. Sulzer has purchased or ordered between four and five thousand IWF units. (Tr. 666.) Given the importance of Pfarrwaller, I regard this purchase as clearly indicating the commercial success of the Tannert device.

Considerable evidence of the impact of the Tannert device is also indicated by the fact that the plaintiffs hold a considerable share of the market, some 15% in 1979. To anticipate the ruling concerning infringement set forth *infra*, the defendant's share of the market (some 30% as of 1979) must be added to this figure. The total share of the market, some 45 percent indicates HN14[¹⁴] a prompt and dramatic shift to the Tannert teaching. This [**70] is evidence of non-obviousness. [Eibel Process Co. v. Minnesota & Ontario Paper Co.](#) 261 U.S. 45, 54-56, 67 L. Ed. 523, 43 S. Ct. 322 (1923); [Marvel Specialty Co. v. Bell Hosiery Hills, Inc.](#), 330 F.2d 164, 172 (4th Cir.), cert. denied, 379 U.S. 899, 85 S. Ct. 187, 13 L. Ed. 2d 175 (1964); [Berry Brothers Corp. v. Sigmon](#), 317 F.2d 700, 703 (4th Cir. 1963); [Rohm & Haas Co. v. Roberts Chemicals](#), 245 F.2d 693, 696-97 (4th Cir. 1957); [Diamond International Corp. v. Walterhofer](#), 289 F. Supp. 550 (D. Md. 1968).

A final factor which this Court considers relevant to the determination of the obviousness question again anticipates the ruling concerning infringement, *infra*: I find that the defendants have essentially copied the Tannert device in their West 840 and West 1000 thread feeders. I believe that this brings the case within the rule that the HN15[¹⁵] defendants' imitation of an allegedly obvious patent suggests that the invention is not obvious. [Diamond Rubber Co. v. Consolidated Rubber Tire Co.](#), 220 U.S. 428, 441, 55 L. Ed. 527, 31 S. Ct. 444 (1911); [Shaw v. E.B. & A.C. Whiting Company](#), 417 F.2d 1097, 1107 (2d Cir. 1969); [Ling-Temco-Vought, Inc. v. Kollsman Instrument Corp.](#), 372 F.2d 263, 269 (2d Cir. 1967); [Strong-Scott Mfg. Co. v. Weller](#), 112 F.2d 389, 395 (8th Cir. 1940); [Trico Products Corp. v. Ace Products Corp.](#), 30 F.2d 688, 691 (D. Conn. 1929).

Considering all of these factors together, I find that they establish that the Tannert patent has had considerable commercial success. Under the test in [Graham, supra](#), this is a secondary factor. It cannot counter obviousness. On the other hand, in an otherwise close case, this commercial success suggests nonobviousness.

I also mention two other factors which I have weighed in this critical determination, to acknowledge that the parties have raised these legitimate points.

First, each side has presented a well-credentialed expert witness: Mr. Arthur Chadwick for the plaintiffs, and Dr. Amed Tayebi for the defendants. Each man is an established expert in his field, having far more extensive knowledge of these technical matters than this member of the Court possesses. While I mean no criticism of Dr.

Tayebi, in my evaluation of the evidence in this case, I am more attracted to the opinions presented by Mr. Chadwick, especially on the question of obviousness. [**72] I found particularly that his long practice in the field of textile machinery development gives him a greater degree of credibility on these issues.

Second, decisions from German and Italian courts have been cited to the Court. These have given me cause, but they have played very little in the determination of this case. This Court has no experience with the patent laws of those foreign countries, and no resources with which to evaluate them.

K. CONCLUSION: THE TANNERT PATENT IS NONOBVIOUS AND VALID.

Having carefully reviewed the many documentary exhibits and the extensive testimony which both parties have submitted on this question, I conclude that the presumption of validity which attaches to a patent is not disturbed; that the Tannert invention is not anticipated by prior art; that there are significant differences between the Tannert device and prior art; that the Tannert device has achieved significant commercial success. From these conclusions, I am led to a further conclusion, that the Tannert invention would not have been obvious to one of ordinary skill in the art at the time of the invention. Therefore, I conclude that the defendants have not shown that the plaintiff's [**73] patent is invalid as [***259] obvious under [35 U.S.C. § 103](#). I further conclude that the plaintiff's patent is valid and enforceable.

II.

INFRINGEMENT OF THE TANNERT PATENT

Having determined that the Tannert patent is valid, and therefore enforceable against those who infringe, I turn to the question of infringement.

A. THE CLAIMS OF THE TANNERT PATENT.

The Tannert patent in suit (P. Exh. 1) contains forty-one (41) claims. Many of these claims cover forms of the invention which are not at issue here, however. Iro has charged Roj and Otex with infringement of only Claims 1, 9, 10, 11, 12, 28 and 39 of the Tannert patent. "It is elementary patent law that one looks to the claims to find out what 'the invention' is." [Application of Kirchner, 49 C.C.P.A. 1234, 305 F.2d 897, 900 \(1962\)](#); accord [Aro Manufacturing Co. v. Convertible Top Replacement Co., 365 U.S. 336, 339, 5 L. Ed. 2d 592, 81 S. Ct. 599](#) reh. denied 365 U.S. 890, 81 S. Ct. 1024, 6 L. Ed. 2d 201 (1961) ("the claims made in the patent are the sole measure of the grant"); [Continental Paper Bag Company v. Eastern Paper Bag Co., 210 U.S. 405, 419, 52 L. Ed. 1122, 28 S. Ct. 748 \[*444\]](#) (1908); [Lockheed Aircraft \[**74\] Corporation v. United States, 213 Ct. Cl. 395, 553 F.2d 69 \(1977\)](#); [Technitrol, Inc. v. Control Data Corp., 550 F.2d 992, 998 \(4th Cir.\)](#) cert. denied, 434 U.S. 822, 54 L. Ed. 2d 79, 98 S. Ct. 65 (1977); [Richen-Gemco, Inc. v. Heltra, Inc., 540 F.2d 1235 \(4th Cir. 1976\)](#); [Duplan Corp. v. Deering Milliken, Inc., 370 F. Supp. 769 \(D.S.C. 1973\)](#); [Maschinenfabrik Rieter, A.G. v. Greenwood Mills, 340 F. Supp. 1103, 1118 \(D.S.C. 1972\)](#); [Welch v. General Motors Corporation, 330 F. Supp. 80 \(E.D. Va. 1970\)](#); [Powell Manufacturing Company, Inc. v. Long Mfg. Company, 319 F. Supp. 24, 31 \(E.D.N.C. 1970\)](#); [Wilcox Mfg. Co. v. Eastern Gas & Fuel Associates, 278 F. Supp. 34 \(S.D.W. Va. 1967\)](#), aff'd, 400 F.2d 960 (4th Cir. 1968), cert. denied, 393 U.S. 1051, 89 S. Ct. 691, 21 L. Ed. 2d 693 (1969); [Triumph Hosiery Mills, Inc. v. Alamance Industries, Inc., 191 F. Supp. 652, 659 \(M.D.N.C. 1961\)](#), aff'd, 299 F.2d 793 (4th Cir.), cert. denied, 370 U.S. 924, 8 L. Ed. 2d 504, 82 S. Ct. 1566 (1962). Therefore, I set forth Claims 1, 9, 10, 11, 12, 28, and 39, displayed in a format which will facilitate evaluation of these claims, plaintiff Iro's contentions of infringement, [**75] and Roj and Otex's defenses.

Claim 1) A thread feeder adapted to be interposed between a supply source and textile machine in which the thread feeder is adapted to accumulate at least several coils of thread for storage purposes axially along a winding body,

said coils of thread forming a store of coils,

the thread feeder being constructed to add coils at one end of the store from the supply source,

and the textile machine adapted to strip coils from the second end of the store,

the thread feeder adapted to have the coils shifted in the direction from the one end of the store to the second end thereof,

said thread feeder comprising:

- A. a support for mounting on a textile machine,
- B. a winding body being fixed to said support and
 - i. being stationary relative thereto and
 - ii. adapted to have coils of thread wound thereon to form a store of coils extending side by side along the length of said winding body,
 - iii. the winding body being elongated and generally circular in cross section, and
 - iv. the store forming a geometrical arrangement symmetrically about and coaxial with the axis of said winding body,
- C. a rotating thread-laying **[**76]** guide mounted on said support for rotation coaxially with the axis of the winding body
 - i. the thread adopted to be fed from the supply source to said thread-laying guide,
 - ii. said thread-laying guide being located to lay a coil of thread onto said winding body at a location constituting the beginning and one end of said store,
 - iii. said location remaining fixed at all times during the operation of said thread feeder,
- D. means for axially shifting said coils in a direction away from said location while said thread-laying guide is rotating to form said store,
 - i. the coil furthest from said location comprising the second end of said store,
 - ii. the number of coils in the store and hence the position of said second end being variable,
- E. means for driving said rotating thread-laying guide,
- F. a control device for controlling said driving means and **[**260]**
 - i. operated in response to the length of said store, and
- G. a passageway through said winding body approximately at the axis thereof and
 - i. means for guiding said thread during the operation of said thread feeder to move through said passageway in a direction **[**77]** opposite to the direction in which said coils are shifted.

[*445] Claim 9) The thread feeder as claimed in claim 1 in which

- A. the thread from said supply source is adapted to be fed directly to said thread-laying guide and enters said passageway after being stripped off said winding body.

Claim 10) The thread feeder as claimed in claim 9 in which

- A. the structure forming said passageway is fixed to said support.

Claim 11) The thread feeder as claimed in claim 1 in which

- A. the coils of thread are stripped from said store in the same direction as said coils of said store are shifted in the forming of said store and
- B. bead-like means are provided to guide the thread of said stripped-off coils into said passageway on to said textile machine.

Claim 12) The thread feeder as claimed in claim 1 in which

- A. said means for axial shifting of said coils comprise a positive axial feed device
 - i. coupled with said means for driving the said thread-laying guide.

Claim 28) The thread feeder as claimed in claim 1 in which

- A. the winding body and store are frusto-conical.

Claim 39) In a thread feeder for **[**78]** feeding thread from a supply source to a textile machine and which includes a support,

a winding body carried on said support, means for winding a plurality of coils on said winding body to form a store of axially arranged side by side coils connected between the supply source and the textile machine, means for progressively shifting the coils of said store from one end thereof to the second end in the direction that the coils are being shifted:

the invention herein comprising:

A. the winding body being fixed to said support and being stationary,

B. said winding means including

i. driven rotating means journaled on said support and

ii. driving means for operating said driven means,

iii. a rotating thread-laying guide coupled with said driven means and rotated thereby for laying thread onto said winding body to form said store

iv. means for leading thread from said supply source to said thread-laying guide,

C. Control means for controlling the operation of said driving means in response to the length of said store

D. means fixed relative to said support and winding body forming a passageway passing through the winding [**79] body axially of the coils forming said store, and

E. bead-like means for guiding the thread being stripped off said second end of the store to pass through said passageway in a direction opposite the direction in which the coils are shifted and thereafter to pass said textile machine.

It is these claims which the plaintiff Iro asserts are infringed by the defendants' thread feeders.

B. PLAINTIFF IRO'S PRIMA FACIE CASE OF INFRINGEMENT.

To establish its infringement case, the plaintiff relied on the testimony of its expert witness, Mr. Arthur Chadwick, whose expertise the Court acknowledges. Mr. Chadwick studied a West 1000 feeder, and conjunctively studied the West 1000 Instruction and Spare Parts Book, (P. Exh. 29) and a schematic diagram of the West 1000 thread feeder originally prepared by Roj (P. Exh. 30, which is appended hereto). (Tr. 166-67.) In his studies, Mr. Chadwick identified thirteen features on the West 1000 thread feeder which he regarded as covered by the various claims listed above. For ease of presentation, Mr. Chadwick set forth these thirteen features in charts (P. Exh. 19A-19D), and then drew up a second series of charts showing that each of the [**80] thirteen identified features of the West [*446] 1000 feeder was described in the patent claims (P. Exh. 20A-20H). Mr. Chadwick testified that, based on his examination of the West 1000 feeder and the supporting materials for that machine, he found that claims of the Tannert patent set forth above described the various features described in his charts (Tr. 168-76, 182-202); that is the West features read on the Tannert patent claims.

For ease of understanding, I have combined the description found in Plaintiffs' Exhibits 19 and 20, and set forth the resulting comparison here: [***261]

Claim Limitations	West 1000 Features	
1) A thread feeder adapted to be interposed between a supply source and a textile machine in which the thread feeder is adapted to accumulate at least several coils of thread for storage purposes axially along a winding body, said coils of thread forming a store of coils, the thread feeder being constructed to add coils at one end of	is adapted to be interposed between a thread supply source and a textile machine;	Feature 1

D. means fixed relative to said support and winding body forming a passageway passing through the winding body axially of the coils forming said store, and	includes a control device for controlling the operation of the driving means in response to the axial length of the store of coils;	Feature 10
E. bead-like means for guiding the thread being stripped off said second end of the store to pass through said passageway in a direction opposite the direction in which the coils are shifted and thereafter to pass to said textile machine.	includes means fixed relative to the support and winding body forming a passageway axially through the winding body and coils forming the store approximately at the axis of the winding body;	Feature 12
	includes bead-like means which lift the thread in each coil as it is stripped off the winding body radially outwardly of the winding body and,	Feature 12a
	guides the stripped-off thread in such a manner as to reverse its direction of travel and guide it into the passageway on the way to the textile machine, in a direction opposite the direction in which the coils are being shifted on the winding body.	

[**81]

In preparing this table, I have made certain changes in the wording used to describe the feature found by Mr. Chadwick in order to clarify the language. Except for these minor modifications, this table is a verbatim reproduction of Plaintiffs' Exhibits 19 and 20. I believe these changes only clarify and do not alter Mr. Chadwick's meaning.

[*454] The plaintiff Iro contends that, having found the features described by Mr. Chadwick on the West feeder and shown that these features correspond to claims in the Tannert patent, it has shown patent infringement.

Countering, the defendants contend that Mr. Chadwick's testimony and charts are not a direct comparison of the defendants' device and the patent claims as required by law, and are therefore inadequate to show infringement. Having reviewed the testimony and the documentary exhibits, I find the defendants' argument untenable. The defendants begin their argument by noting that the plaintiffs did not introduce a West 1000 thread feeder into evidence [**82] as an exhibit. They suggest that without introducing an actual thread feeder the plaintiffs cannot make valid evaluations as to what features are found on this device. I do not believe this argument is sound. The law requires direct [***264] comparison, not literal introduction. With massive machinery, such a requirement would be impossible; with super-miniaturized products, it would be pointless; with volatile chemicals, it would be hazardous. In this case, it was not required.

The defendants' argument might have merit if the evidence before the Court was inadequate to allow full evaluation of the defendants' device. The defendants do not argue that the evidence is inadequate. I find it is quite sufficient. While the Court does not have an actual West 1000 thread feeder in evidence, it does have technical drawings, originally prepared by the defendants (P. Exh. 30), the accuracy of which is not disputed; the Instruction and Spare Parts Book (P. Exh. 29), which was prepared by defendants; and numerous other exhibits including photographs, brochures, drawings, and descriptions. I also note that in response to a Request for Admissions, the defendants stated that

Defendants admit [**83] that the West 1000 thread feeder and the West 840 thread feeder have been manufactured and sold by Roj and Otex, respectively, in accordance with brochures and other technical data which has already been supplied by defendants herein to the plaintiff from which plaintiff should be fully informed and capable of drawing its own conclusions concerning infringement. . . .

(Defendants' Response to Plaintiff Iro's Request for Admission #5, P. Exh.79.) Further William L. Lehmann, Executive Vice-President of OTEX, Incorporated, indicated in his deposition that the Instructions and Spare Parts Book was sufficient to familiarize users of West 1000 feeders with the working of the device. Referring to that book and the drawing (P. Exh. 30), Mr. Lehmann was able to discuss fully the features of the device. (See Deposition of William L. Lehmann, P. Exh. 30, at 55-73.) Finally, I note that in presenting their case contending that the West 1000 feeder stemmed from prior art rather than the Tannert patent, the defendants did not introduce an actual thread feeder, but like the plaintiffs, relied on diagrams, drawings, and descriptions. I find the evidence of record was sufficient to allow [**84] this Court to discern the features of the West 1000 feeder (and the earlier version West 840 thread feeder), and to determine whether those features infringe the Tannert patent.

[*455] Defendants criticize Mr. Chadwick's evaluations as an *ex parte* examination, citing *Reynolds Metals Company v. Aluminum Company of America*, 457 F. Supp. 482 (N.D. Ind. 1978), and *Popeil Bros., Inc. v. Schick Electric, Inc.*, 356 F. Supp. 240, 250 (N.D. Ill. 1972), aff'd 494 F.2d 162 (7th Cir. 1974). I find these cases, and *Illinois Tool Works, Inc. v. Foster Grant Company, Inc.*, 547 F.2d 1300 (7th Cir. 1974), cert. denied, 431 U.S. 929, 53 L. Ed. 2d 243, 97 S. Ct. 2631 (1977) which is cited in *Reynolds Metals, supra*, inapposite. Each case deals with patents covering process as distinguished from a mechanical device as in this case. On close reading of these cases, I believe that the objection to the tests was not that they were performed outside the presence of the court or the opposing party, but that they were one-sided and of questionable validity. In *Illinois Tool Works, supra*, for example, the Court noted that the tests left to chance many variables which could [**85] influence the results. See *547 F.2d at 1314*. Similarly, in *Popeil Bros., supra*, the court discounted the credibility of tests in which a party could not assure the court that the tests had followed the process in issue. See *356 F. Supp. at 250*.

In this case, this Court has reviewed the process by which Mr. Chadwick gathered the information which set forth in the table above. Mr. Chadwick examined a West 1000 feeder and documents of undisputed reliability (Tr. 174, 175). He prepared the various charts which have been introduced into evidence (P. Exhs. 19 & 20) in order to facilitate an understanding of the questions in issue in a complicated, technical matter. I have reviewed the relevant exhibits and Mr. Chadwick's testimony, and I find no indication that his articulation of the various features introduced any inaccuracy or bias which would undercut the validity of his opinions.

The defendants contend this is not a direct comparison of the defendants' device with the plaintiffs' patent claims. I disagree. I find that the features of the defendants' West 1000 (and West 840) thread feeders fall clearly within the

language of the enumerated claims. There is thus [**86] infringement under the test set forth by the Supreme Court in *Graver Tank Company v. Linde Air Products Company*, 339 U.S. 605, 607, 94 L. Ed. 1097, 70 S. Ct. 854 (1950):

HN16[¹⁵] In determining whether an accused device or composition infringes a valid patent, resort must be had in the first instance to the words of the claim. If accused material falls clearly within the claim, infringement is made out and that is the end of it.

This is the accepted test for cases of this sort. *Studiengesellschaft Kohle v. Eastman Kodak Company*, 616 F.2d 1315, 1324 (5th Cir. 1980); *Cardinal of Adrian, Inc. v. Peerless Wood Products, Inc.*, 515 F.2d 534, 540 (6th Cir. [**265] 1975); *Laser Alignment, Inc. v. Woodruff & Sons, Inc.*, 491 F.2d 866, 872 (7th Cir.), cert. denied, 419 U.S. 874, 42 L. Ed. 2d 113, 95 S. Ct. 135 (1974); *Ziegler v. Phillips Petroleum Company*, 483 F.2d 858, 868 (5th Cir.), cert. denied, 414 U.S. 1079, 94 S. Ct. 597, 38 L. Ed. 2d 485 (1973); *Orthman Manufacturing v. Chromalloy American Corporation*, 512 F. Supp. 1284, 1295 (C.D. Ill. 1981); *B & J Manufacturing Company v. Hennessy Industries, Inc.*, 493 F. Supp. 1105, 1125 (N.D. Ill. 1979); *Swift* [**87] *Chemical Company v. Usamex Fertilizers, Inc.*, 490 F. Supp. 1343 (E.D. La. 1980); *Duplan Corporation v. Deering Milliken, Inc.*, 370 F. Supp. 769, 772 (D.S.C. 1973); *Lundy Electronics & Systems, Inc. v. Optical Recognition Systems, Inc.*, 362 F. Supp. 130, 159 (E.D. Va. 1973), aff'd 493 F.2d 1222 (4th Cir. 1974); *Phillips Electronic and Pharmaceutical Industries Corporation v. Thermal and Electronics Industries, Inc.*, 311 F. Supp. 17, 40 (D.N.J. 1970); *Eagle Iron Works v. McLanahan Corporation*, 303 F. Supp. 1029, 1044 (W.D. Pa. 1969).

The evidence also shows and I find that subsequent to March 12, 1974, the issue date of the Tannert patent in suit, and prior to the filing of this action for infringement, defendant Otex, Inc. sold West 840 and West 1000 thread feeders in South Carolina. (Defendants' Responses to Plaintiffs' Requests for Admissions, #1 and #1, P. Exh. 79.) During that same period defendant, Roj Electrotex, s.p.a. used the West 840 and West 1000 thread feeders at trade shows in [*456] South Carolina. (Lehmann deposition at 22-24; P. Exh. 55.) During this period, and while selling West 840 and West 1000 thread feeders in South Carolina, Otex [**88] acted as Roj's agent in the United States pursuant to an Agency Agreement. (P. Exh. 27.) Roj referred to Otex as their agent. Roj set the prices Otex would charge. Roj personnel came on regular visits to South Carolina to assist Otex in maintenance of the thread feeders which Otex sold. Otex said in a letter to Roj that it wanted to remain an agent of Roj rather than a distributor until it determined whether the Roj unit (West 840 at that time) infringed any U.S. patents. (P. Exh. 28.) Otex alleges the agreement was changed in approximately February, 1976, so that Otex would purchase thread feeders from Roj and resell them in the U.S. There is, however, no evidence of record which establishes such a change.

I conclude that these facts make out a *prima facie* case of patent infringement against both defendants, which, unless refuted by the defendants, entitle the plaintiff Iro to relief on its patent claim.

C. THE DEFENSE OF NON-INFRINGEMENT.

The plaintiffs allege that the defendants' West 840 and West 1000 thread feeders infringe claims 1, 9, 10, 11, 12, 28, and 39 of the Tannert patent. Claims 9 through 11 and Claim 28 are dependent claims, that is, they incorporate [**89] by reference earlier independent claims. Claim 1 is incorporated by reference into Claims 9, 11, 12, and 28. Claim 10 in turn incorporates by reference Claim 9.

For the defendants' devices to infringe the dependent claims, they must infringe the independent claims. This rule of law is clearly stated in *Lundy Electronics & Systems, Inc. v. Optical Recognition Systems, Inc.*, 362 F. Supp. 130, 164 (E.D. Va 1973), aff'd 493 F.2d 1222 (4th Cir. 1974):

35 U.S.C. § 112 HN17[¹⁵] provides that a claim may be written in independent or dependent form. If written in dependent form, it must be construed to include all limitations of the claim incorporated by reference into the dependent claim The dependent claims are, therefore, limited to the same extent as the claims that they incorporate by reference. A dependent claim can be infringed only if the independent claim (which is incorporated by reference therein) is infringed.

Weatherhead v. Coupe, 147 U.S. 322, 333, 37 L. Ed. 188, 13 S. Ct. 312 (1893); Dresser Industries, Inc. v. United States, 193 Ct. Cl. 140, 432 F.2d 787, 792 n. 1 (1970); Autogiro Company of America v. United States, 181 Ct. Cl. 55, I**90] 384 F.2d 391, 408 (1967); Application of Schutte, 44 C.C.P.A. 922, 244 F.2d 323 (1957); Cardiac Pacemakers, Inc. v. Coratomic, Incorporated, 535 F. Supp. 280, 284 (D. Minn. 1982); Leesona Corporation v. Varta Batteries, Inc., 522 F. Supp. 1304, 1314 n. 23 (S.D.N.Y. 1981).

Further, each of the independent claims, Claims 1 and 39, contains numerous elements in combination. These independent claims are infringed only if the defendants' device contains each of these elements or its substantial equivalent. To state the converse of this proposition, the defendants can demonstrate non-infringement by showing that their device does not contain the substantial equivalent of any one element of each of the two independent claims. Deepsouth Packing Company v. Laitram Corporation, 406 U.S. 518, I***266] 32 L. Ed. 2d 273, 92 S. Ct. 1700 (1972); Weatherhead v. Coupe, 147 U.S. 322, 333, 37 L. Ed. 188, 13 S. Ct. 312 (1893); Prouty v. Draper Ruggles, 41 U.S. (16 Pet.) 336, 10 L. Ed. 985 (1842); Decca Limited v. United States, 225 Ct. Cl. 326, 640 F.2d 1156, 1168 (1980); Strumskis v. United States, 200 Ct. Cl. 668, 474 F.2d 623, 628 (1973), cert. denied, 414 U.S. 1067, I**91] 38 L. Ed. 2d 472, 94 S. Ct. 576 (1973), reh'g denied, 414 U.S. 1147, 39 L. Ed. 2d 103, 94 S. Ct. 902 (1974); Morpul, Incorporated v. Glen Raven Knitting Mill, Inc., 357 F.2d 732, 734 (4th Cir. 1966); Marston v. J.C. Penney Co., 353 F.2d 976, 985 (4th Cir. 1965), cert. denied, 385 U.S. 974, 17 L. Ed. 2d 437, 87 S. Ct. 515 (1966); Power Curbers, Inc. v. E.D. Etnyre & Company, 298 F.2d 484 (4th Cir. 1962); Welch v. General Motors Corporation, 330 F. Supp. 80, 82 (E.D. Va. 1970).

Relying on these principles, the defendants base their defense of non-infringement on contentions that their device contains [*457] nothing substantially equivalent to three elements in Claims 1 and 39, limitations C and D of Claim 1 and limitation E of Claim 39. These limitations are as follows:

1) A thread feeder adapted to be interposed between a supply source and a textile machine in which the thread feeder is adapted to accumulate at least several coils of thread for storage purposes axially along a winding body, said coils of thread forming a store of coils, the thread feeder being constructed to add coils at one end of the store from the supply source and the textile machine [**92] adapted to strip coils from the second end of the store, the thread feeder adapted to have the coils shifted in the direction from the one end of the store to the second end thereof, said thread feeder comprising:

- C. a rotating thread laying guide mounted on said support for rotation coaxially with the axis of the winding body,
 - i. the thread adapted to be fed from the supply source to said thread-laying guide,
 - ii. said thread-laying guide being located to lay a coil of thread onto said winding body at the location constituting the beginning and one end of said store,
 - iii. said location remaining fixed at all times during operation of said thread feeder,
- D. means for axially shifting said coils in a direction away from said location while said thread-laying guide is rotating to form said store,
 - i. the coil furthest from said location comprising the second end of said store,
 - ii. the number of coils in the store and hence the position of said second end being variable.

39) In a thread feeder for feeding thread from a supply source to a textile machine and which includes support, a winding body carried on said support, means for winding a plurality of coils [**93] on said winding body to form a store of axially arranged side by side coils connected between the supply source and the textile machine, means for progressively shifting the coils of said store from one end thereof to the second end thereof, the coils at the second end adapted to be freely stripped off said second end in the direction that the coils are being shifted, the invention herein comprising:

- E. bead-like means for guiding the thread being stripped off said second end of the store to pass through said passageway in a direction opposite the direction in which the coils are shifted and thereafter to pass to said textile machine.

Having reviewed the claims made out in the patent, the testimony of the competing expert witnesses, the documentary exhibits to which the parties have referred, and the relevant law on the question, I find the defendants' argument unpersuasive.

It is a basic principle of patent law that the claims of a patent define the patentee's invention. *Graver Tank and Manufacturing Company v. Linde Air Products Company*, 339 U.S. 605, 94 L. Ed. 1097, 70 S. Ct. 854 (1950); *Smith v. Snow*, 294 U.S. 1, 11, 79 L. Ed. 721, 55 S. Ct. 279 (1934); [**94] *Continental Paper Bag Company v. Eastern Paper Bag Company*, 210 U.S. 405, 419, 52 L. Ed. 1122, 28 S. Ct. 748 (1908); *Technitrol, Incorporated v. Control Data Corporation*, 550 F.2d 992, 998 (4th Cir.), cert. denied, 434 U.S. 822, 54 L. Ed. 2d 79, 98 S. Ct. 65 (1977); *Richen-Gemco, Incorporated v. Heltra, Incorporated*, 540 F.2d 1235, 1239 (4th Cir. 1976); *Duplan Corporation v. Deering Milliken, Inc.*, 370 F. Supp. 769 (D.S.C. 1973); *Lundy Electronics & Systems, Inc. v. Optical Recognition Systems, Inc.*, 362 F. Supp. 130 (E.D. Va. 1973); *Maschinenfabrik Rieter A.G. v. Greenwood Mills*, 340 F. Supp. 1103 (D.S.C. 1972).

HN18 [↑] The Patent Code requires that the patentee, in his specifications, disclose structural and operational information which will support the language of the claims and will illustrate the application of the invention, [35 U.S.C. § 112](#); *Application of Cescon*, 474 F.2d 1331, 1335 (C.C.P.A. 1973). [*458] The Code and the cases require only that the specifications disclose a single application of the claimed invention. [***267] **HN19** [↑] The language of the claims, not the language of the supporting specifications, defines the invention, and includes all applications [**95] within the scope of the claims. The specifications are not limitations, and the invention is not limited or restricted to the language of the specifications. As Judge Learned Hand said on this question:

A claim must of course read upon the specifications, but the specifications unless so declared, are only an example of what the claim is intended to cover; it is a species of a broader genus, else no claims would cover anything not literally described in the specifications.

Reiner v. I. Leon Company, 285 F.2d 501, 504 (2d Cir. 1960). Along the same lines, the Supreme Court in *Continental Paper Bags Co., supra*, wrote:

An inventor must describe what he conceives to be the best mode, but he is not confined to that. If this were not so most patents would be of little worth. "The principle of the invention is a unit, and invariable; the modes of its embodiment in the concrete invention may be numerous and in appearance very different from each other." 2 Robinson, Patents, § 485. The invention, of course, must be described and the mode of putting it to practical use, but the claims measure the invention. [210 U.S. at 418-19](#).

Smith v. Snow, supra [**96] , 294 U.S. at 11, 16; *CTS Corp. v. Piher International Corp.*, 527 F.2d 95, 100 (7th Cir. 1975), cert. denied, 424 U.S. 978, 47 L. Ed. 2d 748, 96 S. Ct. 1485 (1976); *Application of Cescon, supra*; *Maxon v. Maxon Construction Co.*, 395 F.2d 330, 334-35 (6th Cir. 1968); *King-Seeley Thermos Co. v. Tastee Freez Industries*, 357 F.2d 875 (7th Cir.), cert. denied, 385 U.S. 817, 17 L. Ed. 2d 56, 87 S. Ct. 38 (1966); *Arnold Pipe Rentals Co. v. Engineering Enterprises, Inc.*, 350 F.2d 885 (5th Cir. 1965); *Edward Valves, Inc. v. Cameron Iron Works, Inc.*, 286 F.2d 933, 944 (5th Cir.), modified on other grounds, 289 F.2d 355 (5th Cir.), cert. denied, 368 U.S. 833, 82 S. Ct. 55, 7 L. Ed. 2d 34 (1961); *Deere & Co. v. International Harvester Co.*, 460 F. Supp. 523, 534 (S.D. Ill. 1978), rev'd on other grounds without opinion, 618 F.2d 110 (7th Cir. 1980); *Dart Industries, Inc. v. E.I. du Pont de Nemours & Co.*, 348 F. Supp. 1338, 1356 (N.D. Ill. 1972), rev'd on other grounds, 489 F.2d 1359 (7th Cir. 1973), cert. denied, 417 U.S. 933, 41 L. Ed. 2d 236, 94 S. Ct. 2645 (1974) ("Having described his invention and shown its principle, a patentee is deemed [**97] to claim every form in which his invention may be copied"); *Maschinenfabrik Rieter A.G., supra*, 340 F. Supp. 1103; *Eversharp Inc. v. Fisher Pen Company, Inc.*, 204 F. Supp. 649, 672 (N.D. Ill. 1961).

The patent holder had made out a claim of literal infringement, by showing that an accused device falls within the language of the claim. The defendants cannot defeat this contention of infringement by showing that its device represents an application of the patent different from that shown in the particular specifications and drawings of the patent. If the accused device falls within the language of the claims infringement is proven. *Smith v. Snow, supra*, 294 U.S. at 20; *CTS Corp. v. Piher International Corp., supra*; *Reiner v. I. Leon Co., supra*; *Deere & Co. v. International Harvester Company, supra*; *Maschinenfabrik Rieter A.G., supra*, 340 F. Supp. at 1118-19 and cases cited therein; see also *Graver Tank, supra*.

Applying these principles of patent law to the defendants' claim of non-infringement, I find that the defense must fail. As discussed above, the plaintiffs have presented, through expert testimony and supporting exhibits, evidence showing that the defendants' **[**98]** West series thread feeder embodies every limitation of claims 1, 9, 10, 11, 12, 28 and 39 of the Tannert patent. (Chadwick testimony, Tr. 183-202.) In rebuttal, through the testimony of their expert, Dr. Amad Tayebi, the defendants have focused the Court's attention on limitations C and D of Claim 1 and limitation E of Claim 39. Reviewing Dr. Tayebi's testimony, however, I find that he did not testify that the West series thread feeder was outside the literal **[*459]** language of these limitations. Dr. Tayebi explained that the actual structure and operation of certain parts of the West series feeder differed from their counterparts set forth in the specifications and drawings of the Tannert patent. (Testimony of Dr. Amad Tayebi, Tr. 386-95). After a careful review of this testimony, I find that the differences between the West series feeder and the construction set forth in the specifications and drawings of the Tannert patent do not take the West series feeder out of the claims of the Tannert patent.

With respect to limitations C and D of Claim 1 of the Tannert patent, Dr. Tayebi noted that the West thread feeders use an oscillating disc to move the thread coils along the **[**99]** yarn feeder, while the Tannert patent, as it is illustrated in the figures in the patent, relies on a tapered cone working in conjunction with the tension of the thread. **[**268]**

Referring to the language of the limitations, however, I find no mention of the tapered cone, a passive mechanism for moving the coils of thread, or of an active mechanism such as the defendants' oscillating disc. Limitation C indicates only that there will be a thread-laying guide which, while fixed in a coaxial, plane rotates around the winding body. This plane will define the beginning and one end of the thread store. Limitation D of Claim 1 indicates only that there will be "*means for axially shifting said coils*" [emphasis added] away from the thread-laying guide. There is nothing in either limitation which indicates that these means will be active or passive.

Because of this, I believe that this issue falls squarely within the rule enunciated by Judge Learned Hand in *Riener v. I. Leon Company, supra*. As in the instant case, Judge Hand confronted a defense of non-infringement in which the defendant contended that it had not infringed the patent because its device employed an embodiment of the patent **[**100]** from that used by the patentee. Dismissing this contention, the Court said:

It is also plain that its language reads, not only on the specification, but upon the defendant's "clamp." The distinction suggested that the "resilient integral extension" i.e., the springs, pulls instead of pushes, the members together as in the defendant's "clamp" is irrelevant. Claim three does not contain as an element either method, and covers both. [285 F.2d at 504](#).

In the same way, I find that Claim 1 of the Tannert patent covers both passive and active means for moving the coils of thread along the winding body. The defendants use an active means, an oscillating disc, as opposed to the passive means illustrated in the drawings in the Tannert patent. This does not take them out of the coverage of the patent claim. In terms of the patent, this change is inconsequential.

I note also that in his deposition, Mr. Edward Lehmann acknowledged that the oscillating disc came within the literal terms of the limitations of Claim 1 (see Lehmann deposition, P. Exh. 55 at 62-69, 76), and this admission is not directly contradicted or overcome by the testimony of Dr. Tayebi (Tr. 386-90).

Limitation **[**101]** E of claim 39 calls for a bead-like mechanism to guide the thread from the second end of the store into the passageway and to the textile machine. In his testimony, Mr. Chadwick testified that the West thread feeder does have a bead-like mechanism and thus comes within the terms of the claim. (Chadwick testimony, Tr. 202.)

The defendants stress the fact that on the West 100 thread feeder, the collar, as they label the element, does not have a raised edge as is shown in the Tannert device as illustrated in the patent (P. Exh. 1). Therefore, the collar on the West series feeders does not perform the thread-lifting function which Mr. Chadwick attributed to the bead-like means on the Tannert device. (Tayebi testimony, Tr. 390-94). The language of the claim however, makes no mention of a thread-lifting function, nor does it indicate that the bead-like mechanism must be raised in the manner illustrated in the **[*460]** Tannert patent. The precise configuration of the mechanism is unspecified, and the single

required function this mechanism is to control is to guide the thread. As Mr. Chadwick testified, although the structures are somewhat different, the "collar" of the West series [**102] thread feeder and the raised rim of the Tannert illustrations produce the same result. (Chadwick testimony, Tr. 202.) Mr. Lehmann acknowledged that the collar performed this function. (Lehmann deposition, Plts' Exh. 55 at 69, 70, 72.) In his testimony, Dr. Tayebi does not specifically refute that this structure falls within the scope of this limitation. (Tayebi testimony, Tr. 390-94.)

In their briefs, the defendants stress a second function performed by the collar of the West series thread feeders: that it secures the rods which form the winding body of the feeder. This it does. This does not alter the fact that the collar also performs the specific function of the bead-like mechanism of the Tannert claim, and the fact that it has some auxiliary function does not take it out of that claim. As the Supreme Court noted in [Graver Tank and Manufacturing Company, supra](#), it is a "dull and very rare type of infringement" in which the patented device is duplicated exactly. [339 U.S. at 607](#). The defendants' device falls within the scope of the claims of the Tannert patent, and any differences between the defendants' device and the illustrations of the Tannert patent notwithstanding, [**103] it infringes that patent.

The defendants stress the fact that the oscillating disc and the collar found on the West series thread feeders are also found on prior art. That this is so does not make out a defense of non-infringement. In the Tannert patent, there is no claim that the tapered winding body or the raised edge are novel or unique devices. The singular warrant for the patent is that the various elements occur in a combination in which there is a novel invention. It is this novel combination that is claimed by the patent and entitled to protection from infringement. [Deepsouth Packing I***2691 Company v. Laitram Corp., supra; Prouty v. Ruggles, supra.](#)

I have examined the various cases which the defendants cite, and find that they are inapposite to this factual situation. In [Stewart-Warner Corp. v. Lone Star Gas Company, 195 F.2d 645 \(5th Cir. 1952\)](#); [Nash Motors Company v. Swan Carburetor Company, 105 F.2d 305 \(4th Cir. 1939\)](#); and [Specialty Equipment and Machinery Corporation v. Zell Motor Car Company, 113 F. Supp. 161 \(D. Md. 1953\)](#), the reviewing court in each case found that the patent did not cover the accused device. In this case, the patent covers the defendants' [**104] device. In [Morpul, Inc. v. Glen Raven Knitting Mill, Inc., 357 F.2d 732 \(4th Cir. 1966\)](#); and [General Plywood Corporation v. Georgia-Pacific Corp., 362 F. Supp. 700 \(S.D. Ga. 1973\), aff'd, 504 F.2d 515 \(5th Cir. 1974\)](#), the court in each case found in prosecuting the application for his patent, the patentee had specifically claimed only narrow limitations for his patent, foregoing broad readings of the claims. In subsequent litigation, each patentee sought to revive the expansive claims foregone in securing the patent, and the court ruled in each case that the patentee was estopped from reviving these expansive readings of his claims. These rulings rest on the doctrine of file wrapper estoppel. In the instant case, I have found no indication that there was any file wrapper estoppel, any narrowing of claims in the pursuit of the patent which would now restrict the patentee to an especially narrow reading of the claims of the Tannert patent, and the defendants have not cited any clear evidence that there was file wrapper estoppel. Accordingly, these cases are inapplicable.

Thus, I find that the defendants have not shown that the West series feeders fall beyond the scope [**105] of the claims of the Tannert patent, and therefore infringement is established.

III.

DEFENDANTS' ANTITRUST COUNTERCLAIM

By their Amended Answer, defendants have charged that plaintiff Iro has, in conspiracy with Wesco, committed various violations [*461] of [sections 1 and 2](#) of the Sherman Antitrust Act. [15 U.S.C. §§ 1 and 2](#). Thereafter, Wesco was joined in this action as an involuntary plaintiff.

In evaluating the antitrust contentions, the facts are determinative. In the briefs, each side has cited numerous cases, but the applicability or inapplicability of this case authority depends on the facts of each case taken as a whole. Because of this, I undertake an extended discussion of the facts of this case as they bear on the various contentions the defendants have advanced.

A. AB IRO'S ACQUISITION OF THE TANNERT PATENT.

The underlying litigation in this case is Iro's suit against the defendants to enjoin their alleged infringement of the Tannert patent, U.S. Patent No. 3,796,386. Iro acquired that patent from the original inventor, Karl Tannert, in 1977. (See Contract between Mr. Karl Tannert and AB Iro, AB Iro, March 14/16, 1977; D.Exh. 18). Defendants allege [**106] that Iro had an illicit predatory motive in acquiring this patent and that the acquisition was part of the Iro/Wesco conspiracy to destroy defendants.

I find that the evidence does not support this claim. Iro initially acquired a non-exclusive license in 1973. Under this license, Iro did not have the right to bring suits in its own name to enjoin infringement. (See Agreement between the company Ab Iro and Mr. Karl Tannert, May 30 -- June 8, 1973; D.Exh.16.) This was over two full years before defendants first entered the yarn-feeder market. Iro expended resources developing and marketing its IWF yarn feeder, and paid royalties to Tannert under the licensing agreement. (Hermann testimony, Tr. 651-54).

Under these circumstances, Iro was left with two options: seek release from its license with Tannert, looking to continue developing its yarn feeders free from royalty obligations; or enjoin Roj's patent infringement. Because it could not bring suit in its own name, Iro negotiated with both Tannert and Wesco, seeking to have a suit brought. Wesco indicated that it was willing to bring the suit and Iro initially offered to cover the cost of a patent enforcement action.²

[**107] Eventually Iro concluded that its interests required that it acquire the right to bring suit in its own name. The evidence does not disclose whether Iro reached this conclusion before or after October 8, 1976, when Karl Tannert offered to sell the Tannert patent to either Wesco or Iro. (Letter of Karl Tannert, Oct. 8, 1976, doc. 4 to Defendants' Memorandum [***270] in Opposition to Wesco's Motion for Summary Judgment). Given this letter, Wesco was aware of the possibility that Iro might purchase the rights to the Tannert patent. Further, on February 23 and 28, 1977, Mr. Sven Uddenburg of Iro sent Mr. Geiger of Wesco telex messages (Feb. 23, 1977, Uddenberg to Geiger, telex message, Feb. 23, 1977 docs. 10 and 11 respectively, Defendants' Memorandum in Opposition to Motion for Summary Judgment). These telex messages, particularly that of February 23, suggest that Iro was contemplating litigation independent of Wesco. The language of the message is, however, somewhat ambiguous, and it does not compel this reading.³ Even giving these messages, the reading most favorable to defendants' position, the greatest involvement in Iro's acquisition of the Tannert patent which can be attributed [**108] to Wesco is that Wesco may have been able to infer that Iro was acquiring the Tannert patent.⁴ There is absolutely no evidence [*462] that Wesco played any role in this acquisition.

[**109] Considering all of the evidence, I find, first, that plaintiff Iro had a legitimate and non-predatory purpose in seeking the Tannert patent in 1977; and, second, that Wesco played no role in Iro's acquisition of this patent.

B. AB IRO/WESCO'S ALLEGED REFUSAL TO GRANT LICENSES.

Defendants contend with great vigor, that the plaintiffs have individually and collectively refused to grant licenses under the Tannert patent to defendants. I find that the record does not support this allegation.

² The Court specifically does not address the question whether a suit brought under these terms would violate any antitrust laws. The suit was not brought under these terms, and any questions relative to them are therefore moot.

³ The telex of February 23 reads in pertinent part: "Before we start litigation against Roj we must have a binding confirmation that you will fulfill the conditions of your exclusive license for at least a certain period of time."

⁴ And cf. Kinkeldey testimony, Tr. 638 (Iro did not consult with Wesco concerning its acquisition of the Tannert patent); Geiger testimony, Tr. 679 (Q [by counsel for Wesco]: Did Wesco play any part in the acquisition of the Tannert patent by Iro? A: No, none. In fact, we didn't even learn of it until well after it was finalized, apparently.)

Even assuming *arguendo* that Wesco knew that Iro was acquiring the Tannert patent in February, 1977, knowledge without more does not make Wesco a conspirator in the acquisition of this patent. *Peck v. United States*, 470 F. Supp. 1003 (S.D.N.Y. 1979); *Byrd v. Local Union No. 24, International Brotherhood of Electrical Workers*, 375 F. Supp. 545 (D. Md. 1974). Certainly where there is no participation by Wesco in Iro's acquisition, there can be no basis for finding that Wesco joined a conspiracy to acquire the patent.

Dr. Hermann Kinkeldey, a patent attorney from the Federal Republic of Germany, testified concerning what I discern to be the normal course of conduct followed in disputes of this sort. He testified that the normal course of conduct is that the patent holder believing there is infringement contacts the alleged infringer, announces that it holds the patent, and requests that the infringer cease its offensive activity. The alleged infringer may then choose among three courses of action: it may cease its offensive activity; it may seek a license from the patent holder; or it may, by continuing its infringing activity and, making no response to the patent holder's request, indicate that it intends [**110] to contest the claim of infringement and/or the validity of the patent. (Kinkeldey testimony, Tr. 635, 653, 658-59, 663-64). The defendants have not contended that this is not the normal course of dealing in patent infringement contests, nor have they offered evidence suggesting a different course was followed in this case; nor have they suggested that, as sophisticated and experienced business people advised by counsel, they did not understand that this was the course of conduct which they faced.

Dr. Kinkeldey testified that before this action was filed, he, as patent counsel for Iro, contacted Roj and advised Roj that the marketing of the West Feeder was an infringement of the Tannert patent. Roj never responded. (Kinkeldey testimony, T. 653-54). Dr. Kinkeldey testified further that after the suit was filed, Mr. Uddenburg, Iro's general manager, telephoned Roj to discuss the possibility of settling the suit on the basis of a license. Roj refused to discuss any license under which it would pay royalties.⁵ (Kinkeldey testimony, Tr. 651-52)

[**111] In like manner, officers of Wesco contacted officials of Otex, advised them that Wesco felt the West feeders which Otex was marketing infringed the Tannert patent, and asked them to desist. "(Lehmann testimony, Tr. 283; [***271] Geiger testimony, Tr. 691-93). Otex officials elected not to seek a license from Wesco (Lehmann testimony, Tr. 278079)." Again, Otex does not contend that the course of conduct in the trade is other than as outlined above, or that they did not understand it to be so."

From this evidentiary record, I find that plaintiffs Iro and Wesco initiated contacts [*463] by which they reasonably presented the possibility of granting licenses to the defendants, and in the normal course of conduct left defendants with the opinion of responding and the obligation to respond if they wished to avoid litigation. The defendants, by their failure to exercise these options, indicated that they were not interested in acquiring a license from Iro or Wesco, but preferred to litigate. Given these facts, I find the contention that the plaintiffs individually or collectively refused to grant a license to the defendants is without merit.⁶

[**112] C. IRO BONA FIDE BELIEF IN THE VALIDITY OF THE TANNERT PATENT.

Much of defendants' argument on the antitrust counterclaim is premised on the contention that plaintiffs have known from the outset of this case that the Tannert patent is invalid. The defendants contend that Iro cannot be acting in good faith in bringing this suit because they earlier filed an opposition to Karl Tannert's application for a patent in Britain, which would have been the equivalent of the Tannert patent, U.S. Patent No. 3,796,386, D. Exh. 12. From the fact that Iro filed this opposition, defendants would have this Court infer that Iro does not believe that the

⁵ In their brief, defendants suggest that this offer to license came so belatedly that it was not an action taken in good faith. (Defendants' Reply Brief, at 6). I find this contention without merit. Roj's failure to respond to Dr. Kinkeldey's initial message indicated its election to contest Iro's position on the Tannert patent. Under these circumstances, I find nothing to suggest that Mr. Uddenburg's offer was anything less than a good faith offer to settle the controversy without litigation.

Defendants also suggest, though citing no authority, that to resolve this dispute by taking a license would have required that they join an illegal conspiracy in violation of the antitrust laws. (Defendants' Reply Brief, at 6.) I regard this suggestion as specious.

⁶ In view of this finding, I do not address the question, whether, as patent holders the plaintiffs or either of them could refuse to grant Roj or Otex licenses under these patents. Cf. *E. Bement & Sons v. National Harrow Co.*, 186 U.S. 70, 46 L. Ed. 1058, 22 S. Ct. 747 (1902) (agreement between patent holder and exclusive licensee that any other requests for licenses will be refused does not violate **antitrust law**); *United States v. Huck Manufacturing Company*, 227 F. Supp. 791, 804 (E.D. Mich. 1964) (patent holder has the right to refuse to grant licenses to prospective licensees); *United States v. E.I. Du Pont De Nemours & Co.*, 118 F. Supp. 41 (D. Del. 1953); *Hercules Powder Co. v. Rohm & Haas Co.*, 66 F. Supp. 899 (D. Del. 1946).

Tannert patent is valid. (Defendants' Brief at 13-14). Officials for Iro explained that the initial filing of the opposition to the British patent was a tactical maneuver taken to enhance their bargaining position with Karl Tannert concerning license and patent rights. (Kinkeldey testimony, Tr. 633-34, 644-45). I find this explanation credible and reasonable. Further once this opposition was filed, even though it was subsequently withdrawn, British patent authorities were presumably on notice of the possible invalidity of the patent. Because **[**113]** the opposition was withdrawn, these questions were not litigated as completely as they might have been. The fact that the question was raised and subsequently resolved in favor of granting the patent however, suggests that the validity of the patent is an open-and-shut question.

Having heard and considered all of the evidence, I believe it is clear that reasonable minds can differ on this question. Persons of impeccable credentials have appeared for either side and pressed their respective positions vigorously. In considering the patent issues, I have found that question very closely drawn. Having reviewed the evidence, I find that Iro believed that the Tannert patent was valid. Plaintiff Iro consulted with American counsel concerning the Tannert patent before bringing this suit, and was advised that the patent was valid. (Kinkeldey testimony, Tr. 642-43, 660-61; opinion letter of Richard Lione, January 2, 1977, D. Exh. 59C). Further, the litigation which Iro has undertaken is a direct contest against the alleged infringer, in which they would expect from the outset that the validity of the patent would be fully contested. This is in contrast with cases in which parties asserting **[**114]** patents of questionable validity have carefully brought suits only against those whom they expected would compromise rather than undertake full-scale litigation. See e.g., [Automated Building Components, Inc. v. Trueline Truss Co.](#), 318 F. Supp. 1252 (D. Ore. 1970); [United States v. Krasnov](#), 143 F. Supp. 184 (E.D. Pa. 1956). Further, plaintiffs have never threatened suit against any customer of Roj or Otex, have never otherwise sought to enforce their patent except through this litigation. Defendants acknowledge there has been no such activity **[*464]** (Lehmann testimony, Tr. 274, 279). Again, this contrasts with the tactics used by those seeking to assert patents of questionable validity while trying to avoid litigation which would actually test their patents. See, e.g., [Kobe, Inc. v. Dempsey Pump Co.](#), 198 F.2d 416 (10th Cir. 1952); [United States v. Krasnov, supra](#).

After a thorough review of this record, I find that there is no basis for the contention that plaintiffs have not acted in good faith in bringing this suit. This conclusion is not affected by any finding adverse to plaintiffs as to the Tannert patent itself. **[***272]**

D. DEFENDANTS' CONTENTION THAT WESCO **[**115]** SHOULD BE REGARDED AS IRO'S COMPETITOR FOR PURPOSES OF ANTITRUST ANALYSIS.

It is elementary to **antitrust law** that "horizontal" arrangements, arrangements between competitors, are treated differently from "vertical" arrangements, such as those between a producer and its distributor. The leading case illustrating this proposition is [United States v. General Electric Co.](#), 272 U.S. 476, 71 L. Ed. 362, 47 S. Ct. 192 (1926). Therein the Supreme Court approved arrangements by which General Electric licensed Westinghouse to make, use, and sell electric lamps, with all retail prices and terms of sale fixed by G.E. Needless to say, such explicit price-fixing would have illegal *per se* under **section 1** of the Sherman Act had it been between horizontal competitors. The arrangement was permissible because the relationship was vertical: Westinghouse was a licensee under G.E. patents.

In this case, defendants argue that Wesco would compete with Iro but for the alleged conspiracy into which they have entered to destroy Roj and Otex. I find this contention unwarranted. The single fact which supports the idea that Wesco would compete with Iro is that Wesco at one time spent more than \$500,000 **[**116]** trying to develop a yarn feeder. (Geiger testimony, Tr. 677-78). This fact alone does not make Wesco a competitor with Iro. Wesco was able to market a few of its own yarn feeders, (Geiger testimony, Tr. 708), but it was unable to enter this market as a viable producer. The evidence shows that Wesco became and remains Iro's distributor independent of any considerations concerning Roj and Otex. There is no evidence suggesting that any conspiracy played any part in Wesco's decision to become Iro's distributor.

E. DEFENDANTS' CONTENTION THAT WESCO MADE PAYMENTS TO IRO TO SUPPORT THIS LITIGATION.

In this case, the attorneys for all parties have pressed their various positions forcefully. The case is highly technical, and I express admiration and appreciation for the manner in which these complex matters have been presented so as to educate the Court on matters which are certainly beyond its prior knowledge.

At times, however, the attorneys have allowed their fervor to oversway their objectivity. A certain contentiousness is tolerable, but truth sets an outer limit to the scope of adversarial license. I believe that on one matter, the defendants have unfortunately, overstepped [**117] that limit. In their brief, the defendants assert:

Moreover the terms of a proposed written agreement (D-19), . . . included an obligation on the part of Wesco to pay IRO approximately eighty five thousand dollars (\$85,000.00) ostensibly as minimum royalties but obviously to defray the costs of patent acquisition and the bringing of this suit. Wesco admitted that they made this payment.

Defendants' Brief, at 14-15

There is no citation to the trial record or to evidentiary materials other than the proposed agreement, an agreement which, as defendants concede, was never consummated. In its Reply Brief, plaintiff Wesco strongly protested that these allegations were false. Supporting its position with numerous citations to the evidentiary record, it noted that the \$85,000 payment was a royalty payment which Wesco owed to the [*465] owner of the Tannert patent under the Wesco-Tannert agreement of 1974. Wesco paid Iro only because Iro had acquired the Tannert patent in 1977. Wesco made these royalty payments to retain its exclusive licensing rights under the Wesco-Tannert agreement. Wesco dismissed defendants' contention that the payment was in support of [**118] this litigation as unsupported. (Post-Trial Reply Brief of Wesco, 67).

In their Reply Brief, defendants reiterated their contentions:

The conspiracy herein is made even more aggravated than in *Singer United States v. Singer Mfr. Co.* by the fact that Wesco conspired and contributed by payments to IRO in its litigation costs (Defendants' Opposition to Summary Judgment Motion, documents 10, 11 and Geigier, pp. 705-07).

I have carefully examined Defendants' Exhibit 19, the two documents cited in defendants' reply brief, and Mr. Geiger's testimony. Defendants' Exhibit 19 contains the Registered Letter of Jan-Ake Johannesson, August 30, 1977, to which were attached the two draft agreements which Wesco officials had signed and submitted to Iro, but had then withdrawn.

The primary agreement, concerning a patent infringement suit to be brought against Roj, reads, at page 4, paragraph numbered 6:

All expenses incurred in prosecuting the infringement action or actions pursuant to this Agreement shall be borne by Iro, except that Wesco shall pay the expenses of its own counsel's participation in any such action. In this connection, all arrangements entered [**119] into with lawyers and others involved in prosecuting said infringement action shall clearly provide that all payments [***273] to be made in connection with said action shall be Iro's sole responsibility. In the event such action or actions result in an award of attorney's fees or other penalties against Wesco, Iro shall pay such award as a part of the expenses of the litigation. Iro hereby indemnifies Wesco against all awards, damages, or any other charges or penalties which may be assessed against Wesco as a result of any infringement action instituted pursuant to this Agreement.

Under the agreement Wesco does not assume any financial obligation towards Iro.

The other draft agreement attached to the Uddenburg letter, also signed by Geiger for Wesco, and also subsequently withdrawn, is a Second Amendment to the original Wesco-Tannert agreement of July, 1974. It recites initially that Tannert and Wesco entered into the original agreement, that the agreement was amended in 1975, that Iro has now acquired all of the rights earlier held by Tannert, and that the present amendment will modify the original Wesco-Tannert agreement. By this draft, Wesco would have agreed not to convert [**120] from an exclusive to a non-exclusive license. Because of this, Wesco would remain obligated to make minimum royalty payments. The second paragraph of the draft amendment recites the basis for computation of the minimum royalty payments.

This amendment declared a commitment by Wesco not to exercise its right to convert from an exclusive to a non-exclusive license.⁷ The minimum royalty payments were established under the original Wesco-Tannert agreement, and are not created or charged by this agreement. There is nothing in the draft amendment even suggesting that the payments were in support of the litigation.

[**121] Wesco's obligation to make minimum royalty payments continued absent the conversion of its license to a non-exclusive license. [*466] Wesco did not convert its license, though they remained free to do so at all times. Documents 10 and 11 to Defendants' Opposition are the telex messages of February 22 and February 28, 1977. They are barren of any suggestion that Wesco was to make payments to support this litigation. The testimony of Mr. Geiger does mention the \$85,000 payment, but both the questions by defense counsel and Mr. Geiger's answers show unquestionably that these payments were royalty payments which Wesco was obligated to make under the original Wesco-Tannert licensing agreement.

Given this evidence, can it be reasonably said that the payments made by Wesco were "obviously to defray the costs of patent acquisition and the bringing of this suit?" If there is any evidence to support this contention, I am at a loss to discover it. Indeed, this contention is at odds with Iro's acknowledged and consistently documented position that it would fund this litigation.

Having considered this matter, I find no basis for the defendants' assertions that Wesco made payments to [**122] support this litigation. I am compelled by the record to agree with plaintiff Wesco that this contention is unsupported.

F. DEFENDANTS' CLAIM THAT PLAINTIFFS HAVE VIOLATED SECTION 1 OF THE SHERMAN ANTITRUST ACT.

The primary thrust of the defendants' antitrust counterclaim is that the plaintiffs have brought this suit pursuant to an agreement to use the Tannert patent as a vehicle for driving Roj and Otex from the yarn-feeder market. They contend that plaintiffs' agreement to force them from the market violates section 1 of the Sherman Antitrust Act, 15 U.S.C. § 1.

HN20 [↑] In order to make out a violation of section 1 of the Sherman Act, the defendants must show that there was an agreement involving a plurality of actors. Poller v. Columbia Broadcasting System, 368 U.S. 464, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962). This agreement must be one to achieve illegal ends or to achieve its end through illegal means. American Tobacco Company v. United States, 328 U.S. 781, 90 L. Ed. 1575, 66 S. Ct. 1125 (1945). While the defendants are not required to show an express agreement between the plaintiffs, United States v. General Motors Corporation, 384 U.S. 127, 16 L. Ed. 2d 415, [**123] 86 S. Ct. 1321 (1966), the defendants must produce evidence which shows that the plaintiffs came to a meeting of the minds. Windsor Theatre Company v. Walbrook Amusement Co., 94 F. Supp. 388 (D. Md. 1950), aff'd, 189 F.2d 797 (4th Cir. 1951). If there is no meeting of the minds -- or if the resultant agreement is one which would achieve only legally permissible ends through legally permissible means -- then there is no violation of section 1, and the plaintiffs are free to act as they will. [***274]

Attempting to show an agreement between plaintiffs, the defendants rely primarily on the draft agreement of July, 1977, under which Wesco promised Iro that there would be no license granted to Roj or its distributors. (Defendants' Exhibit 19). While this document is not without probative significance, it shows no combination for the simple reason that it was never consummated. The plaintiffs negotiated the agreement; Wesco prepared the draft and signed it; but Wesco then withdrew the draft before Iro officials could sign it. Defendants' Exhibit 19 contains a copy of this agreement, showing only the signatures of the Wesco representative. The cover letter, from Jan-Ake

⁷ The first substantive paragraph of the amendment states:

Wesco agrees that it shall not exercise its right under paragraphs 5.(a) and 5.(b) of the agreement of July 5, 1974, as first amended, to convert its exclusive license to a non-exclusive license on the third anniversary (July 5, 1977) and on November 1, 1977, whereby Wesco shall be obligated to pay minimum royalties for the calendar years 1977 and 1978 in the manner defined in paragraphs 4.(a) and 4.(b), respectively, of the agreement of July 5, 1974, as first amended.

Johannesson [**124] to Robert Geiger aptly describes this agreement: "Proposed . . . signed by you on behalf of Wesco . . . but not thereafter consummated."

Defendants argue that while this formal document was not signed, there was a "*de facto*" agreement between the plaintiffs, under which Iro and Wesco adhered to all of the terms of the July, 1977 pact despite Wesco's withdrawal. (Defendants' Brief, at 15). A determination of whether or not there was a "*de facto* agreement" along the lines of the proposed agreement between Iro and Wesco requires a review of the [*467] various documents which passed between plaintiffs.

The earliest document which defendants contend is relevant to this issue is a telex from Sven Uddenburg of Iro to Paul Kashden of Wesco, dated August 19, 1976. (Defendants' Memorandum in Opposition to Summary Judgment, Document 2). This message indicates that at this time, Iro wanted litigation brought against Roj and was negotiating to have Wesco bring a suit. In the first Paragraph of the message, Uddenburg recites the various agreements signed by the two parties, and states that Wesco has now been given the U.S. Distributorship for Iro products. The second and third [**125] paragraphs which the defendants regard as particularly significant, read:

In my opinion we have thus given you more than was originally agreed to be given by us in return for our right to go after Roy [sic] Electrotex by means of the Tannert patent.

I therefore now ask you to confirm by telex that we now have this right.

While this telex lends support to the contention that there was some connection between Wesco's acquisition of the Iro distributorship and Iro's suit against the defendants, it does not show that there was a meeting of the minds concerning the bringing of a suit. Certainly, there is no suggestion of Wesco guaranteeing that it would not grant sublicenses. Any suggestion that there was an agreement at this time is destroyed by subsequent events. In March of 1977, Iro bought the rights to the Tannert patent, acquiring the right to sue in its own name. It thereafter did not need Wesco's permission to pursue the defendants had there been an agreement even along the lines suggested by the August 19 telex, Iro's purchase of the Tannert patent would have been a pointless and unnecessary expense. This leads me to the conclusion that there was no [**126] agreement between the plaintiffs at this time.

The next document which defendants cite is a letter from Sven Uddenburg, dated April 1, 1977 to Norman Cook. (Defendants' Memorandum in Opposition to Summary Judgment, Document 12). By this time, Iro had acquired the rights to the Tannert patent, and the Torrington Company had acquired or was acquiring Wesco. The letter discusses a number of problems arising from Torrington's entry into the Iro-Wesco relationship. Defendants emphasize certain material at page 2 of the letter. I find that this material is significant, because it characterizes this litigation along the lines Iro has represented it to this Court: this is a patent infringement litigation, brought against Roj (and Otex) to stop their infringement of the Tannert patent. I note that in their briefs, defendants contended that there was no evidence that patent infringement was the actual reason for this case. (Defendants' Reply Brief, 7-8, 10-11; see also Defendants' Proposed Order, Findings of Fact, para. 47, p. 25; Conclusion of Law para. 11, p. 30):

At negotiations with Bob Geiger regarding the possibility of stopping Roj Electronics' sales in USA due to [**127] patent-infringement, we were all the time of the the opinion that you had the rights to this patent, and that it was your intention to transfer the rights to Iro so that we could take legal actions against Roj. We also took it for granted that if we started these legal actions, it should not be possible to dissolve or even turn these patent-rights into a license for Roj Electronics. We therefore expected you to fulfill all eventual obligations in your agreement with Tannert. Correspondence as well as discussions with Bob Geiger reflects this understanding. Therefore, I have to stress that I am really surprised, perhaps even shocked over what I heard from you concerning your ideas on selling these rights to any of our existing or presumptive competitors. In order to avoid being completely eliminated, we have, however, meanwhile acquired the patent rights from Tannert, i.e. that Iro and not Tannert is the licensor in your corresponding license-agreement. In connection with this acquisition we took it for granted that [**275] you either would maintain the exclusive license-rights with a minimum license reimbursement to Tannert/Iro or [*468] withdraw from the contract. A possible granting [**128] of an under-license to any of our competitors must under these circumstances be regarded by us as an unfriendly action from your side that cannot be accepted.

These two indications, a possible sale of the patent-rights and your request for selling Storage Feeders outside the territory, underline our suspicion that you seriously consider a liquidation of the Wesco-activities.

The defendants emphasize the comments at the end of the second quoted paragraph. Given the context in which they occur, however, I do not find them at all unusual. The Torrington Company's acquisition of Wesco forced a reassessment of the extent Iro-Wesco relationship, and for Iro to regard a possible sale of a license to the defendants as unacceptable is not surprising. The firm tone of Uddenburg's letter does not reflect agreement between Iro and Wesco. Rather, it suggests that relations between the two companies were at this point quite strained.

The next document, a letter from Uddenburg to Robert Geiger of April 14, 1977, (Defendants' Memorandum in Opposition to Summary Judgment, Document 13), reflects this same tone of strain and possible disagreement between the two companies. The statement **[**129]** "For me it is very hard to believe that our present cooperation will be satisfactory in case you sell a license to e.g. Roj Electronics," emphasized by defendants, seems little more than a statement of Iro's view of its own best interest. It was contemplating a patent infringement suit against Roj. It could hardly approve of Wesco licensing Roj's infringement. Had Wesco granted a license to Roj under these circumstances, Iro's franchises would hardly have been an unreasonable response.⁸

The next document cited by the defendants is the letter from Robert Geiger to Jan-Arta Anderson of June 16, 1977. (Defendants' Opposition to Summary Judgment, Document 16). This letter discusses various technical problems related to using IWF yarn-feeders in American installations. The language which the defendants find so telling is a single sentence in a paragraph dealing **[**130]** with the marketing of these yarn feeders. Defendants emphasize this sentence shows clearly the predatory nature of the plaintiffs' conduct but considered in its context, it is simply so ambiguous that it cannot be regarded as especially significant. "Stopping Roj-Electrotex will also help us." It can be viewed either as announcing an illicit purpose or relating to a completely legitimate suit to stop patent infringement. Absent some indication to the contrary, I believe that the Court should read it as reflecting a permissible rather than an illicit purpose.

Next, defendants cite the letter of July 22, 1977, from Hermann Kinkeldey to Henry Lerner. (Defendants' Memorandum in Opposition to Summary Judgment, Document 17). As with the earlier Uddenburg-to-Cook letter, this document reflects the fact that Iro was interested in bringing this suit to stop patent infringement:

The Wesco-Tannert agreement is not explicit on the question whether the licensee is entitled to sub-license a party that has been sued for infringement under Article 8.a(3) of the agreement. It appears to be doubtful whether it would be equitable for the licensee to jeopardize the licensor's chances of **[**131]** winning a lawsuit that the licensee previously has refused to join. I think that we can leave this question open for the moment. With Iro and Wesco being both desirous of closely cooperating on the US Market, I take it for granted that Wesco would consult with Iro before considering to sublicense Roj

Defendants' key contention is that Wesco agreed with Iro that it would not give Roj (or Otex) a license. Yet in this letter, Iro's German attorney and Wesco's attorney in New York left the question open rather than requiring an explicit agreement between the companies. That Dr. Kinkeldey **[*469]** also indicated that he would "take it for granted that Wesco consult with Iro before" granting a license to defendants indicates that he felt that Wesco understood that withholding a license under these circumstances was in Wesco's best interests. Thus, it appeared to Kinkeldey that there was no need for an express agreement whereby Wesco would forego their right to grant sublicenses: they would decline to grant a sublicense to Roj for their own interests, independent of an agreement with Iro.

The defendants next refer to a letter of August 3, 1977, from Henry Lerner to Dr. Kinkeldey, **[**132]** written in response to Dr. Kinkeldey's letter of July 22. (Defendants' Memorandum in Opposition to Summary Judgment, Document 18). In the first substantive paragraph of this letter, Mr. Lerner indicates that Wesco is aware of Iro's

⁸ Cf. testimony of Robert Geiger, Tr. 694 (Wesco officials believed that Iro would have terminated Wesco as its distributor had Wesco licensed Roj).

intention to sue Roj, and states that, given the non-consummation [***276] of the Iro/Wesco agreement (D. Exh. 19), whether Wesco wishes to have this litigation proceed is an academic question, but that Wesco does wish Iro success. The next paragraph reads:

As we view the agreement, paragraph 9 grants Wesco the unqualified right during the life of this agreement to sublicense others. We would think, however, that Wesco would only exercise such right if it felt it to be in its own best interest and we do know that at the moment it is to Wesco's interest to maintain the best possible relations with Iro.

I do not believe that this letter can be read as expressing agreement by Wesco that it would not grant a license to Roj or Otex. Rather, I believe it is simply a statement of fact. Wesco was aware that Iro planned to sue Roj. It was aware of its own interests in a continuing favorable relationship with Iro. Wesco needed no unusual insight to [**133] realize that to grant a license to Roj or Otex under these circumstances would destroy the relationship with Iro.

Finally, defendants cite the letter of Dr. Kinkeldey to Iro, August 10, 1977, of which I find only a portion in the records of this case. (Defendants' Opposition to Summary Judgment, Document 19). The critical language of this letter is a sentence which reads: "Furthermore, I have the impression that at the moment no danger exists of Wesco granting Roj a license."

The Webster's Third New International Dictionary defines "impression" as (definition 7) "a usually indistinct or imprecise notion, remembrance, belief, or opinion." Defendants contend that Dr. Kinkeldey's letter of August 10, along with Mr. Lerner's letter to Kinkeldey of August 3, clearly show that there was an agreement between the two parties. (Defendants' Reply Brief at 2). While I would agree that at this point Iro's impression that Wesco would grant no license to Iro was sufficiently strong that Iro felt secure in bringing suit against Roj and Otex, I am not certain that there was an agreement between them. Dr. Kinkeldey did not report that Wesco had made any commitment that it would not grant a license [**134] to Roj. He did not indicate that Wesco had agreed to grant no license to Roj. He used the word "impression," and I am compelled to evaluate this document based on his use of that word. I believe that this document indicates a failure of the parties to come to a clear cut agreement on the question of possible license to Roj. It does not, as defendants contend, strongly evince the prior existence of an agreement.

Weighed against these documents is the testimony of the various persons involved. I approach this testimony with a certain healthy scepticism: the witnesses are involved in the controversy and are interested in the outcome. Giving due regard to this, I nevertheless, draw from a careful review of the testimony the same conclusion that I reached on considering the documentation: there was no specific agreement between Iro and Wesco whereby Wesco in fact joined in any conspiracy to refuse to grant a license to Roj or Otex during the pendency of this litigation.⁹

[**135] [*470] In their briefs, defendants stress two facts as showing that plaintiffs violated the antitrust laws: Iro asked Wesco not to grant Roj a license under the Tannert patent during the pendency of this suit; Wesco has not granted Roj or Otex a license under the Tannert patent. From these two facts, defendants would have this Court conclude that Wesco agreed that it would withhold a license.

I find that this line of reasoning is unsound both factually and legally. As to the facts, as indicated above, this Court has heard uncontradicted testimony that the normal course of dealings in a patent infringement contest is that once the patent holder contacts the alleged infringer and announces the claim of infringement, the infringer has the option of selecting the course it wishes to pursue. For an infringer to do as Roj and Otex did in refusing to discuss licenses indicated that they preferred litigation to licensing. There is no suggestion in the record that the defendants did not understand the normal course of conduct, or that they thought that the normal course of conduct was otherwise. Thus, they realized that their course invited litigation, and they are hardly in a position [**136] to

⁹ Kinkeldey test, 656-56, 662-63 (Wesco never agreed to forego its right to grant sublicenses); Geiger testimony, 680-91, 698-99 (Iro sought to restrict Wesco's licensing rights; to protect its own business interest, Wesco refused).

complain that this is what they got. On the factual record, this Court does not believe that the defendants can reasonably suggest that either Wesco or Iro ever refused to grant them a license.

Additionally, legally, I find that this case falls into the area of "conscious parallelism."¹⁰ As courts have often noted in cases [***277] alleging conspiracy, action of several parties may be the result of joint behavior pursuant to an agreement, or it may be the result of independent actions with no common agreement. Where plural parties maintain parallel courses, this parallelism is circumstantial evidence which may support a finding of agreement. It does not, however, compel such a finding. As the Supreme Court said in [*Theatre Enterprises v. Paramount Film Distributing Corp.*, 346 U.S. 537, 540-41, 98 L. Ed. 273, 74 S. Ct. 257 \(1954\)](#):

To be sure, business behavior is admissible circumstantial evidence from which the fact finder may infer agreement. [citations omitted]. But this Court has never held that proof of parallel business behavior conclusively establishes agreement or, phrased differently, that such behavior itself constitutes a Sherman Act offense. Circumstantial [**137] evidence of consciously parallel behavior may have made heavy inroads into the traditional judicial attitude toward conspiracy; but "conscious parallelism" has not yet read conspiracy out of the Sherman Act entirely. [footnote omitted].

[**138] [*471] The leading modern case applying the ideas set forth in [*Theatre Enterprises is Bogosian v. Gulf Oil Corp.*, 561 F.2d 434 \(3rd Cir. 1977\)](#); cert. denied, 434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978). Therein, Chief Judge Seitz said:

The law is settled that proof of consciously parallel business behavior is circumstantial evidence from which an agreement, tactic or express, can be inferred but that such evidence, without more, is insufficient unless the circumstances under which it occurred make the inference or rational, independent choice less attractive than that of concerted action. Compare [*Interstate Circuit, Inc. v. United States*, 306 U.S. 208, 83 L. Ed. 610, 59 S. Ct. 467 \(1939\)](#), with [*First National Bank v. Cities Service Co.*, 391 U.S. 253, 274-88, 20 L. Ed. 2d 569, 88 S. Ct. 1575 \(1968\)](#). We recently articulated those circumstances in [*Venzie Corp. v. United States Mineral Products, Co.*, 521 F.2d 1309 \(3d Cir. 1975\)](#):

"(1) a showing of acts by defendant in contradiction of their own economic interests . . .; and

"(2) satisfactory demonstration of a motivation to enter an agreement . . ." [*Id. at 1314*](#) (citation [**139] omitted).

[561 F.2d at 446.](#)

¹⁰ Defendants rely primarily on [*United States v. Singer Manufacturing Company*, 374 U.S. 174, 10 L. Ed. 2d 823, 83 S. Ct. 1773 \(1963\)](#), as the controlling authority. I find *Singer* distinguishable from the instant situation. In *Singer*, the actors who joined in a conspiracy, were competitors. As discussed in [*Part D, supra*](#), Iro and Wesco are not competitors. In *Singer*, the Court found that there was a conspiracy among the parties. As I conclude infra, defendants have failed to prove the existence of a conspiracy.

HN21 [↑] Conspiratorial cross-licensing and patent pooling by one group of competitors attempting to exclude others go far beyond the limited monopoly that a valid patent affords. See A. Neale & D. Godyer, *The Antitrust Laws of the U.S.A.: A Study of Competition Enforced By Law* 300-02 (3d ed. 1980). The Supreme Court unequivocally condemned an attempt to abuse patent rights in this way in *Singer*. The Court made clear, however, that its ruling did not preclude a patent holder from the legitimate enforcement of his rights under a patent: There is no claim . . . that it is illegal for one merely to acquire a patent in order to exclude his competitors; or that the owner of a lawfully acquired patent cannot use the patent laws to exclude all infringers of the patent, or that a licensee cannot lawfully acquire the covering patent in order better to enforce it or his own account, even when the patent dominates an industry in which the licensee is a dominant firm.

[374 U.S. at 189.](#)

This language is *dicta* in *Singer* in the sense that it did not address the actual facts therein. The language is however pertinent to the situation herein, whereas the specific holding of *Singer* resting on distinguishable facts, is inapposite to this case.

Bogosian has been widely cited and is the leading modern statement of this issue.¹¹

[**140] I find one of the cases which the Court of Appeals relied on in *Bogosian, supra*, is particularly instructive with respect to the present situation. The factual situation in *Venzie Corporation v. United States Mineral Products Co.*, 521 F.2d 1309 (3rd Cir. 1975), is quite close to that in the instant case. Mineral Products manufactured a fireproofing compound (DC/F), and used Armstrong as its exclusive licensee in the Philadelphia area. Plaintiff Venzie Corporation held a fireproofing contract which they found required the use of DC/F. Venzie approached Mineral Products seeking a license. Mineral Products refused to grant a license, and Venzie's other efforts to obtain DC/F proved unavailing. [**278] Eventually, Venzie had to withdraw from its contract, which was then awarded to Armstrong.

Venzie sued Mineral Products and Armstrong alleging a conspiracy to refuse to sell DC/F. As defendants do in the instant case, Venzie based its contentions on the fact that both Mineral Products and Armstrong refused to deal with Venzie.¹² Discussing the standard to be used to evaluate the significance of such circumstances, the court said there were "two elements generally considered critical [**141] in establishing conspiracy from evidence of parallel business behavior (521 F.2d at 1314): action against the alleged conspirators from evidence of parallel business behavior" (521 F.2d at 1314): action against the alleged conspirator's own best economic interest, and motivation [*472] to enter a conspiracy. The court continued, saying:

The absence of action contrary to one's economic interests renders consciously parallel behavior "meaningless and in no way indicates agreement" Turner, *The Definition of Agreement Under The Sherman Act: Conscious Parallelism and Refusals to Deal*, 75 Harv. L. Rev. 655, 681 (1962).

521 F.2d at 1314.

[**142] The lesson of Dr. Turner's seminal article and of the conscious parallelism cases is clear: to make out a showing of conspiracy on their counterclaim, the defendants must do more than present a fact situation in which conspiracy might be inferred; they must present evidence which cannot be reconciled with a contrary innocent explanation. If the evidence, taken as a whole, is consistent with innocent nonconspiratorial behavior -- even if it is also consistent with conspiracy then the defendants have not met their burden. L. Sullivan, *Handbook of the Law of Antitrust* 315-19 (1977). Behavior contrary to plaintiffs' economic interests would be, of course, irreconcilable with innocence. Reviewing the record, I find no evidence which is compatible with a theory of independent behavior.¹³

¹¹ *Ambook Enterprises v. Time Inc.*, 612 F.2d 604 (2d Cir. 1979), cert. dismissed, 448 U.S. 914, 101 S. Ct. 35, 65 L. Ed. 2d 1179 (1980); *De Jong Packing Co. v. U.S. Dep't of Agriculture*, 618 F.2d 1329 (9th Cir. 1980), cert. denied, 449 U.S. 1061, 66 L. Ed. 2d 603, 101 S. Ct. 783 (1980) (finding conspiracy); *Schoenkopf v. Brown & Williamson Tobacco Corporation*, 637 F.2d 205, 208 (3d Cir. 1980); *Federal Prescription Service v. American Pharmaceutical Association*, 214 U.S. App. D.C. 76, 663 F.2d 253, 267 (Cir. 1981), cert. denied, 455 U.S. 928, 102 S. Ct. 1293, 71 L. Ed. 2d 472 (1982); *Southway Theatres, Inc. v. Georgia Theatre Co.*, 672 F.2d 485, 494 (5th Cir. 1982) ("Inference of conspiracy is always unreasonable when it is based solely on parallel behavior that can be explained as the result of the independent business judgment of the defendant."); *Proctor v. State Farm Mutual Auto Ins. Co.*, 218 U.S. App. D.C. 289, 675 F.2d 308, 327 (D.C. Cir. 1982), cert. denied, 459 U.S. 839, 103 S. Ct. 86, 74 L. Ed. 2d 81 (1982); *Zenith Radio Corporation v. Matsushita Electric Industrial Co., Ltd*, 513 F. Supp. 1100, 1172-76 (E.D. Pa. 1981); see also *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke Liquors, Ltd.*, 416 F.2d 71, 84-85 (9th Cir. 1969), cert. denied, 396 U.S. 1062, 24 L. Ed. 2d 755, 90 S. Ct. 752 (1970).

¹² In *Venzie Corporation v. United States Mineral Products Co.*, 521 F.2d 1309 (3d Cir. 1975), the facts were more favorable to Venzie Corporation than are the facts for the defendants in the instant counterclaim: Venzie made several good faith offers to acquire a license on terms favorable to Mineral Products Corporation and Armstrong. By contrast, defendants herein refused to discuss any licensing agreement under which they would have to pay royalties.

¹³ I note that a comparable standard prevails in conspiracy cases outside the antitrust field. To show conspiracy, a party must produce evidence which is not only consistent with a theory of conspiracy, but evidence which is inconsistent with a theory of innocent behavior. *Rutledge v. Electric Hose and Rubber Company*, 327 F. Supp. 1267 (C.D. Cal. 1971); *Fink v. Sheridan Bank of Lawton, Oklahoma*, 259 F. Supp. 899 (W.D. Okla. 1966); *Seneca Falls Machine Company v. McBeth*, 246 F. Supp. 271 (W.D.

[**143] Evaluating the circumstances of this case, the testimony of the witnesses, and the various documents cited, I find that the defendants have failed to demonstrate the existence of a conspiracy. While some of the evidence is consistent with the idea that the plaintiffs conspired to destroy the defendants, there is a great deal of evidence which cannot be reconciled with the theory. Particularly the correspondence between officials at Iro and those at Wesco shows something far less than a meeting of the minds. By contrast, I find that virtually none of the evidence is inconsistent with a theory of independent parallel actions. Iro decided to bring this suit to try to stop what it believed to be infringement of a valid patent. Wesco, though deciding not to join in this litigation, found it in its independent best interest not to offer Roj or Otex a license. Though the results were parallel courses of action, I conclude, there was no conspiracy, and there was therefore no violation of [section 1](#) of the Sherman Antitrust Act.
14

[**144] G. DEFENDANTS' CONTENTION THAT IRO HAD ATTEMPTED TO MONOPOLIZE THE YARN-FEEDER MARKET.

Defendants contend that Iro, by its bringing of this action, has attempted to drive Roj [***279] from the yarn-feeder market. [HN22](#)¹⁴ Defendants argue that this is an attempt to monopolize that market, [section 2](#) of the [*473] Sherman Antitrust Act, [15 U.S.C. § 2](#). To make out an attempt to monopolize in violation of [section 2](#), defendants must show that in the relevant market Iro had economic capacity which came dangerously close to monopoly power and had a specific intent to monopolize.¹⁵

Penn. 1965), vacated in part on other grounds, [368 F.2d 915 \(3d Cir. 1965\)](#); *Johnson v. Branch*, [242 F. Supp. 721, 732 \(E.D.N.C. 1965\)](#), rev'd and remanded on other grounds, [364 F.2d 177 \(4th Cir. 1966\)](#), cert. denied, [385 U.S. 1003, 87 S. Ct. 706, 17 L. Ed. 2d 542 \(1967\)](#) ("When proof establishes a factual situation which would just as well justify defendants' conduct as to lead to an inference of conspiracy, then plaintiff has failed to carry her burden.").

¹⁴ Even assuming *arguendo* that there was between Iro and Wesco some measure of agreement, Iro clearly never obtained a veto over possible future sublicenses. Where there is no control over licensing, coordination and cooperation in *bona fide* efforts to enforce patent rights against infringement are permissible under the [antitrust law](#). *United States v. L.D. Caulk and Company*, [126 F. Supp. 693, 703 \(D. Del 1954\)](#) ("Not only does this seem to be unobjectionable, but necessary and proper"); see also *Grantham v. McGraw-Edison Company*, [444 F.2d 210 \(7th Cir. 1971\)](#) (approving cooperative efforts by patent holder and licensee as necessary to protect patent rights); *United States v. E.I. Du Pont de Nemours and Company*, [118 F. Supp. 41, 229 \(D. Del. 1953\)](#), affirmed, [351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 \(1956\)](#); see generally A. Neale & D. Godyer, *supra*, at 288-96 (though scrutinizing arrangements closely, courts permit arrangements necessary to allow the patent holder the legitimate benefits of his invention).

¹⁵ *Lorain Journal Co. v. United States*, [342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 \(1951\)](#); *United States v. Columbia Steel Company*, [334 U.S. 495, 532, 92 L. Ed. 1533, 68 S. Ct. 276 \(1905\)](#) (Justice Holmes' seminal statement of the elements of attempt to monopolize); *White Bag Co. v. International Paper Co.*, [579 F.2d 1384, 1387 \(4th Cir. 1974\)](#); *Yoder Bros., Inc. v. California-Florida Plant Corp.*, [537 F.2d 1347, 1368 \(5th Cir. 1976\)](#), cert. denied, [429 U.S. 1094, 51 L. Ed. 2d 540, 97 S. Ct. 1108 \(1977\)](#); *United States v. Empire Gas Corp.*, [537 F.2d 296 \(8th Cir.\)](#), cert. denied, [429 U.S. 1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 \(1977\)](#); *Central Savings & Loan Association of Chariton, Iowa v. Federal Home Loan Bank Board*, [422 F.2d 504 \(8th Cir. 1970\)](#); *American Football League v. National Football League*, [323 F.2d 124 \(4th Cir. 1963\)](#); *United States v. Aluminum Company of America*, [148 F.2d 416, 432 \(2d Cir. 1945\)](#); *Kinnett Dairies, Inc. v. Dairymen, Inc.*, [512 F. Supp. 608, 641-42 \(M.D. Ga. 1981\)](#); *Joe Westbrook, Inc. v. Chrysler Corp.*, [419 F. Supp. 824, 844 \(N.D. Ga. 1976\)](#); *Bowl America Incorporated v. Fair Lanes Inc.*, [299 F. Supp. 1080, 1093-95 \(D. Md. 1969\)](#); *United States v. American Oil Company*, [249 F. Supp. 799, 808-09 \(D.N.J. 1966\)](#). As Professor Sullivan notes in his Handbook of the Law of Antitrust 134 (1977), through these two elements, specific intent and dangerous probability, make up the normal test of attempt to monopolize, "yet, the scope of the offense remains unclear, in part because it is usually charged conjunctively with monopolization, conspiracy to monopolize, or conspiracy in restraint of trade, and in the course of adjudication analytical focus is placed elsewhere, and in part because of conflicting attitudes about policy and the uses of economic concepts in antitrust adjudication."

The most comprehensive discussion of attempts to monopolize is Cooper, *Attempts and Monopolization: A Mildly Expansionary Answer to the Prophylactic Riddle of Section Two*, 72 Mich. L. Rev. 373 (1974).

[**145] I find that the relevant market in this case is the market for shuttleless weaving looms in the United States. In this market, the dominant firm is Sarfarti, which controlled some 50 to 60% of the market as of April, 1979, the last point for which market figures have been presented to the Court.¹⁶ Iro controls approximately 10 to 20% of this same market, and the evidence shows its market share has declined since Roj introduced the West-series feeders.¹⁷ These figures indicate that plaintiff Iro's economic power does not dangerously approach monopoly power in the relevant market.

In some courts, specific intent to monopolize has been read expansively to include "intent to indulge in means that are in some sense untoward,"¹⁸ and some cases have suggested that untoward practices may support a finding [**146] of attempt to monopolize even in the absence of dangerous probability of the actual monopolization.¹⁹ [*474] What Iro has done by bringing this litigation is to assert its right to enforce its patent. Under that patent, Iro is granted a legal monopoly, a legal right to exclude others from the use of the invention embodied in the patent. For this Court to rule that the assertion of patent right is an attempt to monopolize would render the patent worthless. Indeed, because there were here and will be in almost any instance, costs in acquiring a patent, the result of such a ruling would be to make a patent a liability. [***280]

[**147] The defendants state in their Reply Brief that Iro had the right to develop yarn feeders under the Tannert patent under its original non-exclusive license.²⁰ The defendants argue from this fact that there was no legitimate purpose in Iro's acquisition of the Tannert patent itself or in the bringing of this litigation.²¹ It is true that Iro, as a non-exclusive licensee, had the right to develop yarn feeders under the Tannert patent. As the inventor, however, Mr. Karl Tannert, or his successors to the patent had and has more than a right to develop a yarn feeder under this patent. [HN23](#)²² The patent holder has the right to exclude all others from the development of this invention, or to admit them to the use of the patent under whatever licensing terms the patent holder wishes to impose.²²

¹⁶ Plaintiffs' Exhibit 61A, Deposition of William L. Lehmann, May 1, 1979, at 7-9, 14-15; Plaintiffs' Exhibit 64, Deposition of John L. Conn, II, April 23, 1979, at 86.

¹⁷ Plaintiffs' Exhibit 64, at 85-86.

¹⁸ Cooper, *supra* note 13, at 395.

¹⁹ See, e.g., *Moore v. Jas. H. Matthews & Co.*, 550 F.2d 1207, 1219 (9th Cir. 1977); *Lessig v. Tidewater Oil Co.*, 327 F.2d 459 (9th Cir. 1964); *Huron Valley Publishing Co. v. Booth Newspapers, Inc.*, 336 F. Supp. 659, 662 (E.D. Mich. 1927).

In *Ray v. United Family Life Insurance Company, Inc.*, 430 F. Supp. 1353 (W.D.N.C. 1977), Judge McMillan endorsed this view, stating:

Although proof of the defendants' market power may be an alternative to direct evidence of intent to monopolize, it is not necessarily an element of an attempt to monopolize. A showing of anti-competitive acts accompanied by a specific intent to monopolize should be sufficient to make out a case of attempt. See P. Areeda, *Antitrust Analysis*, 241-49, 258 (2d Ed. 1974). [430 F. Supp. at 1358](#) (emphasis in original).

In view of the Court of Appeals apparent adherence to the more traditional view that dangerous probability is a necessary element of attempt to monopolize, I am not certain that this could be described as the rule of this circuit. See *White Bag Co. v. International Paper Co.*, 579 F.2d 1384, 1387 (4th Cir. 1974).

I accept this more liberal standard here for purposes of discussion to make clear that even under this standard, the defendants have not made the showing necessary to establish an attempt to monopolize.

²⁰ Defendants' Reply Brief at 7; see also Defendants' Proposed Orders at 30.

²¹ Defendants' Brief at 14; Defendants' Reply Brief at 3, 7-8, 10-11; see also Defendants' Proposed Order at 25, 30, 31-33.

²² "The special feature of the patent is a right to exclude others from practicing the invention

"Every patent is a grant of monopoly power by the state and, as such, is necessarily immune from the prohibitions of antitrust; for if it were a case of illegal monopolization to take out a patent, there would be no point in the patent system Not only the

[**148] Courts are rightly careful to scrutinize assertions of patent rights to insure that these do not exceed the legitimate bounds of patent law.²³ Accordingly, I have carefully examined this record, and I find that in acting as it has, plaintiff Iro has not gone beyond the legitimate rights accorded by the patent laws. Further, I believe that a contrary ruling, one which would find in a course of action such as this a violation of section 2 of the Sherman Antitrust Act, would so restrict the range of actions permitted to a patent holder that it would have an unworkable result.

Therefore, I conclude that on the record before this Court, defendants have failed to establish that the plaintiffs, by acquiring or asserting the Tannert patent, has attempted to monopolize in violation of section 2 of the Sherman Antitrust Act.

IV.

CONCLUSION

Based on the foregoing analysis, three general conclusions shape the result in this case: First, the Tannert patent is valid and nonobvious; [**149] second, the defendants' West series thread feeders infringe on the Tannert patent; third, the plaintiffs have not violated the antitrust laws in pursuing this action.

Accordingly, the plaintiffs are entitled to and are hereby granted a permanent injunction against the defendants prohibiting the further infringement of the Tannert patent, and an award of damages to be determined by an accounting. Judgment will be entered for the plaintiffs on the defendants' counterclaim.

The parties are directed to collaborate in the preparation of the accounting, and are to submit these materials to the Court thirty (30) days after the issuance of this Order.

[*475] When the parties reassemble for the presentation of the final accounting and the injunction, they may also make submissions and present argument concerning the questions of whether the defendants' conduct warrants either treble damages or the award of attorney fees. These questions are held in abeyance pending these submissions and argument.

IT IS SO ORDERED.

APPENDIX

As an aid to understanding the working of the various devices described in this opinion, I have attached drawings of the devices which figure most prominently [**150] in the discussion. The first six pages are a full set of drawings from the Tannert U.S. patent 3,796,386, plaintiffs' exhibit 1. Following this are technical drawings showing the Pfarrwaller, Pourtier, and Rosen devices, and the defendants' West device.

[*481] A single red X mark, likely indicating a redacted section of the document.

Taken from Plaintiffs' Exhibit 4, this figure shows the Pfarrwaller device, U.S. patent 3,411,548. As shown in this figure, thread is taken from a bobbin (1), and passes through a rotating shaft (2). As rotating arm (3), then lays the thread onto a winding body (4). This winding body is mounted on the rotating shaft and is rotatable. It is held stationary through the action of devices such as an armature and magnet arrangement (5), or eccentric weights. The rotation of the thread-laying arm is controlled by a light source and light-sensing device (6 & 7).

monopoly in the patented article, but also certain kinds of restrictive agreements made by the patent holder may be no more than a legitimate exercise of rights inseparable from the grant of the patent." A. Neale & D. Godyer, *The Antitrust Laws of the U.S.A.: A Study of Competition Enforced by Law* 288 (3d ed. 1980).

²³ See generally, [id. at 288-309](#).

[*482] This drawing, taken from Defendants' Exhibit 5, shows the Pourtier device, West German patent 1,191,197. For clarity of presentation, the feature numbers shown on the original drawing have been deleted and the features renumbered. In this device, wire is taken from a manufacturing [**151] machine, not shown. The wire travels from right to left in this drawing, as shown by the signal WT. The wire is taken up by a continuously rotating arm (1), and laid on a non-rotating drum (2). The coil store travels as shown by the signal CT. Wire is circumferentially lifted from the drum by a second rotating arm (3), passes over a guide (4), and through a shaft (5). The wire-lifting arm rotates intermittently, and this rotation is controlled by signal generated from two photo-electric cells (6 & 7), which are activated by an external light source (8).

[*483] This figure is taken from the Rosen U.S. patent 3,720,384, plaintiffs' exhibit 4, and is identical to figures in Rosen U.S. patent 3,796,384, defendants' exhibit 10. The device illustrated consists of a shaft (1), which is rotatably mounted on bearings. A winding body (2) is mounted rotatably on this shaft. The winding body is kept from rotating (or, so to speak, counter-rotated relative to the shaft) by a system of gear rings (3 & 4) and a pair of sprockets and a connecting pin (5 & 6). A rotating arm (7) lays coils of thread (T) onto the winding body. The coil store is moved along [**152] the winding body by the action of an inclined toothed disk (8), which does not rotate relative to the winding body, but is made to oscillate by the rotation of a mounting plate (9). As the coil store builds up, the frictional resistance overpowers the spring (10), causing the pin (11) to disengage and interrupting the laying of thread by the arm (7).

This figure, taken from defendants' exhibit 9 shows the defendants' West 1000 series device. Thread (T) passes through an outer hood, and is then laid on the cage-like winding body (1) by means of a rotating arm (2). The thread is moved positively [*484] along the winding body by means of an oscillating disc (3), with the coil-store moving in the direction CT. The thread is then pulled over the end of the winding body and passes to the weaving machine.

HN8 [down arrow] **Judicial Review, Standards of Review**

When the agency disagrees with the administrative law judge (ALJ), deference still runs in favor of the agency; the ALJ's contrary findings will simply be weighed along with the other evidence opposing the agency's decision.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

HN9 [down arrow] **Exemptions & Immunities, Exempt Cartels & Joint Ventures**

The probable danger standard under the Newspaper Preservation Act, [15 U.S.C.S. §§ 1801-1803](#), is, by the plain meaning of its words, primarily an economic standard: Is the newspaper suffering losses which more than likely cannot be reversed? The existence of interested buyers may be relevant to this determination. Also, poor management practices may show that, with managerial improvement, the paper's economic problems can be overcome.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

HN10 [down arrow] **Exemptions & Immunities, Exempt Cartels & Joint Ventures**

The ultimate burden of persuasion under the Newspaper Preservation Act, [15 U.S.C.S. §§ 1801-1804](#), lies with the proponents of the joint operating agreement (JOA). [28 C.F.R. § 48.10\(4\) \(1982\)](#). Generally, however, that burden only entails a showing of (1) the economic fact of probable failure (downward spiral, irreversible losses), and (2) reasonable management practices. In an adversarial situation, parties opposed to the JOA may rebut the evidence by showing the paper's losses did not in fact exist or were due to unreasonable management practices.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

HN11 [down arrow] **Exemptions & Immunities, Exempt Cartels & Joint Ventures**

Under the Newspaper Preservation Act, [15 U.S.C.S. §§ 1801-1804](#), a newspaper is defined as failing if it is in probable danger of financial failure regardless of its ownership or affiliations. [15 U.S.C.S. § 1802\(5\)](#).

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

Communications Law > Overview & Legal Concepts > Ownership > General Overview

HN12[Exemptions & Immunities, Exempt Cartels & Joint Ventures

Generally, ownership is not to be a factor in considering whether a newspaper is failing under the Newspaper Preservation Act, [15 U.S.C.S. §§ 1801-1804](#); an exception to the general rule is that ownership may be analyzed to ensure the owner has not created a failing company through creative bookkeeping.

Opinion by: ANDERSON

Opinion

[*469] J. BLAINE ANDERSON, Circuit Judge:

This action presents issues of first impression concerning the scope and operation of the Newspaper Preservation Act. This Act permits competing newspapers that meet certain qualifications to enter into joint arrangements which otherwise would be violative of the antitrust laws. In a memorandum opinion, the district court overturned the Attorney General's action approving a joint operating agreement proposed between the Seattle Post-Intelligencer and the Seattle Times. We reverse and reinstate the Attorney General's decision.

I. BACKGROUND

On March 27, 1981, the Seattle Times Company, owner of the Seattle Times (the "Times"), [*2] and The Hearst Corporation, owner of the Seattle Post-Intelligencer (the "P-I"), applied to the United States Attorney General for approval of a joint operating agreement ("JOA") pursuant to the Newspaper Preservation Act (the "Act"), [15 U.S.C. §§ 1801-1804](#).¹ The Times, founded [*470] in 1896, and the P-I, founded in 1891, have been the only

¹ **HN1**[The Newspaper Preservation Act provides:

[§ 1801](#). Congressional declaration of policy

In the public interest of maintaining a newspaper press editorially and reportorially independent and competitive in all parts of the United States, it is hereby declared to be the public policy of the United States to preserve the publication of newspapers in any city, community, or metropolitan area where a joint operating arrangement has been heretofore entered into because of economic distress or is hereafter effected in accordance with the provisions of this chapter.

[§ 1802](#). Definitions

As used in this chapter --

(1) The term "**antitrust law**" means the Federal Trade Commission Act and each statute defined by section 4 thereof as "Antitrust Acts" and all amendments to such Act and such statutes and any other Acts in pari materia.

(2) The term "joint newspaper operating arrangement" means any contract, agreement, joint venture (whether or not incorporated), or other arrangement entered into by two or more newspaper owners for the publication of two or more newspaper publications, pursuant to which joint or common production facilities are established or operated and joint or unified action is taken or agreed to be taken with respect to any one or more of the following: printing; time, method, and field of publication; allocation of production facilities; distribution; advertising solicitation; circulation solicitation; business department; establishment of advertising rates; establishment of circulation rates and revenue distribution: *Provided*, That

metropolitan daily newspapers in Seattle for some time. For approximately the last 15 years, the P-I has been losing ground to the Times in terms of circulation and advertising revenue. From 1969 through 1980, the P-I lost over \$14 million.

[**3] The Newspaper Preservation Act gives the United States Attorney General the authority to approve joint operating agreements between competing newspapers. This approval provides the agreement with a limited antitrust immunity. The Attorney General is required to make two findings as a condition to approving a JOA under the Act: first, one of the newspapers must be "failing," defined as a "publication which, regardless of its ownership or affiliations, is in probable danger of financial failure," [15 U.S.C. §§ 1802\(5\), 1803\(b\)](#); second, the JOA must "effectuate the policy and purpose" of the Act. [15 U.S.C. § 1803\(b\)](#). Pursuant to Department of Justice regulation,

there is no merger, combination, or amalgamation of editorial or reportorial staffs, and that editorial policies be independently determined.

(3) The term "newspaper owner" means any person who owns or controls directly, or indirectly through separate or subsidiary corporations, one or more newspaper publications.

(4) The term "newspaper publication" means a publication produced on newsprint paper which is published in one or more issues weekly (including as one publication any daily newspaper and any Sunday newspaper published by the same owner in the same city, community, or metropolitan area), and in which a substantial portion of the content is devoted to the dissemination of news and editorial opinion.

(5) The term "failing newspaper" means a newspaper publication which, regardless of its ownership or affiliations, is in probable danger of financial failure.

(6) The term "person" means any individual, and any partnership, corporation, association, or other legal entity existing under or authorized by the law of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any foreign country.

§ 1803. Antitrust exemptions

(a) It shall not be unlawful under any antitrust law for any person to perform, enforce, renew, or amend any joint newspaper operating arrangement entered into prior to July 24, 1970, if at the time at which such arrangement was first entered into, regardless of ownership or affiliations, not more than one of the newspaper publications involved in the performance of such arrangement was likely to remain or become a financially sound publication: *Provided*, That the terms of a renewal or amendment to a joint operating arrangement must be filed with the Department of Justice and that the amendment does not add a newspaper publication or newspaper publications to such arrangement.

(b) It shall be unlawful for any person to enter into, perform, or enforce a joint operating arrangement, not already in effect, except with the prior written consent of the Attorney General of the United States. Prior to granting such approval, the Attorney General shall determine that not more than one of the newspaper publications involved in the arrangement is a publication other than a failing newspaper, and that approval of such arrangement would effectuate the policy and purpose of this chapter.

(c) Nothing contained in the chapter shall be construed to exempt from any antitrust law any predatory pricing, any predatory practice, or any other conduct in the otherwise lawful operations of a joint newspaper operating arrangement which would be unlawful under any antitrust law if engaged in by a single entity. Except as provided in this chapter, no joint newspaper operating arrangement or any party thereto shall be exempt from any antitrust law.

§ 1804. Reinstatement of joint operating arrangements previously adjudged unlawful under antitrust laws

(a) Notwithstanding any final judgment rendered in any action brought by the United States under which a joint operating arrangement has been held to be unlawful under any antitrust law, any party to such final judgment may reinstitute said joint newspaper operating arrangement to the extent permissible under [section 1803\(a\)](#) of this title.

(b) The provisions of [section 1803](#) of this title shall apply to the determination of any civil or criminal action pending in any district court of the United States on July 24, 1970, in which it is alleged that any such joint operating agreement is unlawful under any antitrust law.

the Attorney General is to refer the JOA application to the Assistant Attorney General in charge of the Antitrust Division. The Assistant Attorney General then recommends either approval of the JOA or that a hearing be held before an administrative law judge ("ALJ"). 28 C.F.R. § 48.7 (1982). If a hearing is held, the Antitrust Division becomes a party to the proceeding, *id.* at § 48.10(b), and other interested parties may intervene, *id.* at § 48.11. The Attorney General must base his decision on the hearing record, **[**4]** the ALJ's recommendation, and any exceptions filed thereto. *Id.* at § 48.13(b).

In this case, the Attorney General followed the Antitrust Division's recommendation to hold a hearing. The Committee and **[*471]** other interested organizations were allowed to intervene. The hearing before Administrative Law Judge Daniel Hanscom lasted through most of November, 1981.

After reviewing the lengthy hearing record, ALJ Hanscom issued his decision recommending approval of the JOA in January of 1982. The ALJ supported his recommendation with 162 findings of fact and several conclusions of law. These findings will be discussed more thoroughly below in the context of the issues to which they pertain. For now, a brief summary will suffice. The ALJ first discussed the dominant position attained by the Times in the Seattle newspaper market. He then described the trend in this country away from competition in many major markets. Newspapers have been folding at an alarming rate; many areas which had two competing newspapers now only have one.

The ALJ then analyzed what he found to be the P-I's poor financial condition. He believed the P-I had been caught in the phenomena that **[**5]** is called the "downward spiral effect," in which a newspaper's declining circulation and lessening advertising revenue feed off one another, eventually forcing it to close. ALJ Hanscom did not find the evidence to support the allegations that mismanagement of the P-I by the Hearst Corporation ("Hearst") had caused the P-I's difficulties. Instead, it was the economics of the newspaper industry, highlighted by the "downward spiral effect," which led to the P-I's failing financial health. Finding the P-I's financial difficulties to be irreversible, the ALJ concluded that Hearst and the Times Company had met their burden of proving the P-I was in a state of "probable financial failure." He therefore recommended approval of the JOA. Importantly, ALJ Hanscom made this recommendation even though he found that, although Hearst had not attempted to sell the P-I and had rebuffed inquiries about a sale, the paper could in all probability be sold to a third party who would continue its independent existence.

The Attorney General followed Judge Hanscom's recommendation in spite of the opposition of the intervenors and the Antitrust Division. Smith adopted all of the ALJ's findings, except **[**6]** for the one stating the P-I could in all probability be sold, which he did not believe to be supported by the evidence. The Attorney General's order approving the agreement was entered on June 15, 1982, and was scheduled to take full effect 10 days later.

The Committee for an Independent P-I ("the Committee" or "plaintiffs"), et al., intervenors below, immediately filed suit against Hearst, the Times Company, and the Attorney General to strike down the approval for the agreement. The district court granted the Committee's motion to stay the effective date of the Attorney General's approval of the JOA. Each side moved for summary judgment. The district court found for defendants on all issues except one. The district court concluded that the Attorney General could not validly approve the JOA when the evidence showed the alternative of a sale to a third party was possible. Judgment for the Committee was entered on August 30, 1982.

Hearst and the Times appeal. The Attorney General filed a separate appeal and the Committee cross-appeals. The three appeals were consolidated and expedited by an order of this court.

II. DISCUSSION

There are four substantive issues presented **[**7]** by this action. First, what role, if any, is proof of interested third-party purchasers to play in the determination that a newspaper is in probable danger of financial failure? Second, must it be shown that the failing newspaper would probably close if the proposed joint operating agreement is not allowed? Third, must the Attorney General determine that the proposed JOA is not unnecessarily competitive and that it would not impair the editorial voices of smaller newspapers in the affected market? Fourth, is the Newspaper Preservation Act unconstitutional under the first amendment?

A. Standard of Review

Each side agrees that our [HN3](#)[↑] review of the district court's decision is *de novo*. District [\[*472\]](#) court review of agency action is entitled to no particular deference from this court; being limited to the agency record, the district court is in no better position to review agency action than the appellate court. [*Asarco, Inc. v. U.S. Environmental Protection Agency*, 616 F.2d 1153, 1161 \(9th Cir. 1980\)](#). The parties dispute, however, the proper standard of review of both the factual and legal determinations of the Attorney General. The dispute, as one might anticipate, [\[**8\]](#) involves how much deference the factual and legal findings of the Attorney General deserve.

We do not believe the issue of the standard of review of factual findings to be critical to our decision. The parties debate whether the arbitrary and capricious standard or the substantial evidence standard of review applies. The Attorney General argues that the Administrative Procedure Act's arbitrary and capricious standard governs our review because the Newspaper Preservation Act does not require that a hearing be held. See [5 U.S.C. §§ 554, 556, 706\(2\) \(E\); 28 C.F.R. § 48.8\(c\)](#). The Committee asserts that, nevertheless, a hearing was *held* and the regulations require that all hearings be conducted pursuant to [5 U.S.C. § 556](#) of the APA. [28 C.F.R. § 48.10\(4\)](#). In turn, the APA's substantial evidence standard applies to all "case[s] subject to [section . . . 556](#)." [5 U.S.C. § 706\(2\) \(E\)](#). The Second and Seventh Circuits have held that, in the area of administrative rulemaking, the arbitrary and capricious standard of review applies when the agency conducts a hearing by virtue of its regulations rather than required by statute. [*Automobile Club of New York, Inc. v. Cox*, 592 F.2d 658, 664 \(2d Cir. 1979\)](#); [*Amusement & Music Operators Ass'n v. Copyright Royalty Tribunal*, 676 F.2d 1144, 1149-1152 \(7th Cir. 1982\)](#). However, we find it unnecessary to resolve this issue, as our analysis will indicate.

Review under either standard is narrowly prescribed. We do not need to decide this issue, however, because our review of the record as a whole persuades us the Attorney General's decision is supported by substantial evidence, i.e., "such relevant evidence as a reasonable mind might accept as adequate to support a conclusion." [*Universal Camera Corp. v. NLRB*, 340 U.S. 474, 477, 71 S. Ct. 456, 95 L. Ed. 456, 462 \(1951\)](#). Since we find that the Attorney General's decision was supported by substantial evidence, which allows broader appellate review than the arbitrary and capricious test, there is no question that the Attorney General did not act in an arbitrary and capricious fashion. K. Davis, *Administrative Law Treatise*, § 29.00 at 519 (1982 Supp.); see [*Abbott Laboratories v. Gardner*, 387 U.S. 136, 143, 18 L. Ed. 2d 681, 688, 87 S. Ct. 1507 \(1967\)](#).

The standard of review of legal issues presents somewhat more difficult questions. [HN4](#)[↑] The APA mandates [\[**10\]](#) that the reviewing court "decide all relevant questions of law [and] interpret constitutional and statutory provisions. . . ." [5 U.S.C. § 706](#). Conceding this to be the general rule, the Attorney General argues that [HN5](#)[↑] the courts must nonetheless grant great deference to the interpretation of a statute by the agency charged with its administration. [*Udall v. Tallman*, 380 U.S. 1, 16, 13 L. Ed. 2d 616, 625, 85 S. Ct. 792 \(1965\)](#). We agree. The Committee correctly points out that there has not been a long-standing interpretation of the Newspaper Preservation Act. But a long-term interpretation is not a necessary precondition to our deferring to an agency's construction of a statute. [*Columbia Basin Land Protection Ass'n v. Schlesinger*, 643 F.2d 585, 600 \(9th Cir. 1981\)](#). Also, the assertion that we should not defer to the Attorney General's interpretation of the Act because, in the Committee's view, he lacks substantial expertise in the antitrust field is without merit.² [*Doyon, Ltd. v. Bristol* \[\\[*473\\]\]\(#\)](#) [*Bay Native Corp.*, 569 F.2d 491, 497 \(9th Cir.\), cert. denied, 439 U.S. 954, 58 L. Ed. 2d 345, 99 S. Ct. 352 \(1978\)](#).

[\[**11\]](#) Assuredly, our deference to the views of the Attorney General is tempered by the factors noted above. We do not imply that deference to an agency's interpretation of the law equates with blind faith. [HN6](#)[↑] A court is obliged to accept the administrative construction of a statute only so far as it is reasonable, [*Columbia Basin*, 643 F.2d at 600](#), and consistent with the intent of Congress in adopting the statute. [*Espinoza v. Farah Manufacturing*](#)

² The Committee also argues that we should not defer to the Attorney General's interpretation of the Newspaper Preservation Act when there has been a prior interpretation inconsistent with his present view of the Act. See [*United States v. Leslie Salt Co.*, 350 U.S. 383, 396, 100 L. Ed. 441, 451, 76 S. Ct. 416 \(1956\)](#); [*Power Brake Company v. United States*, 427 F.2d 163, 164 \(9th Cir. 1970\)](#). We agree with that proposition but, as will be discussed below, we do not believe the prior interpretation is substantially different from what Attorney General Smith presently believes to be a proper interpretation of the Act.

Co., 414 U.S. 86, 94-95, 38 L. Ed. 2d 287, 295, 94 S. Ct. 334 (1973). Our review of the Newspaper Preservation Act and its interpretation by the Attorney General is guided by an additional rule developed out of the court's recognition of the fundamental importance of the antitrust laws -- HN7[[↑]] exemptions to the antitrust laws are to be narrowly construed. See, e.g., Group Life and Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 231, 59 L. Ed. 2d 261, 280, 99 S. Ct. 1067 (1979).

B. Background of the Newspaper Preservation Act

The Newspaper Preservation Act was passed in July of 1970 as Public Law No. 91-353. An understanding of the circumstances leading to its passage provides substantial insight into the intent of the Act. What [**12] follows is distillation of its history, taken primarily from the House and Senate Reports. S. Rep. No. 535, 91st Cong., 1st Sess. (1969); H.R. Rep. No. 1193, 91st Cong., 2d Sess., reprinted in 1970 U.S. Code Cong. & Ad. News 3547.

In 1964, the Department of Justice began investigating joint newspaper operating arrangements. At that time, approximately 22 JOA's were in force, some dating from the 1930's. The investigation resulted in an antitrust action being filed against one such arrangement in Tucson, Arizona. The district court held the arrangement to be a violation of § 1 of the Sherman Act (price fixing, profit pooling and market allocation), § 2 of the Sherman Act (monopolization), and § 7 of the Clayton Act (illegal merger). United States v. Citizen Publishing Co., 280 F. Supp. 978 (D. Ariz. 1968).

Soon after the Citizen Publishing case was filed, a number of bills were introduced in Congress to exempt then-existing JOA's from the antitrust laws. The foremost of these was S. 1312, the Failing Newspaper Act, introduced in March, 1967, by Senator Hayden and 14 cosponsors. A similar bill, H.R. 7446, was introduced in the House by Representative Matsunaga.

[**13] In 1968, the Antitrust and Monopoly Subcommittee of the Senate Committee on the Judiciary held 21 days of hearing on S. 1312. The Subcommittee reported the bill favorably with amendments. Due to time constraints, the bill was never acted upon by the 90th Congress. The House also held hearings on its version of the bill, but did not act upon it.

In January of 1969, Representative Matsunaga and 108 cosponsors introduced another bill, H.R. 279, now called the Newspaper Preservation Act. In March of 1969, the Supreme Court affirmed the district court in Citizen Publishing v. U.S., 394 U.S. 131, 22 L. Ed. 2d 148, 89 S. Ct. 927 (1969). Within two weeks, Senator Inouye introduced S. 1520 on behalf of 33 cosponsors. Three more days of hearings were held in the Senate in June of 1969. The House held hearings in September and October of 1969. Both the Senate and House Committees reported the bills favorably with amendments.

The House and Senate versions of the bill were similar in many respects. The reports emphatically state that the primary intent of the bills was to reverse the result of the Supreme Court's holding in *Citizen Publishing*, which strictly applied the [**14] "failing company" doctrine to newspaper JOA's. This doctrine provides a defense to otherwise illegal mergers and agreements when it is shown that one of the businesses is a "failing" [*474] company," which means it is on the brink of collapse, its prospects for reorganization are dim or nonexistent, and no other noncompeting buyers are available. 394 U.S. at 137-138, 22 L. Ed. 2d 155-156. The Court, in other words, applied the failing company defense quite narrowly; the JOA had to be, in the words of Justice Douglas' opinion, "the last straw." *Id.* *Citizen Publishing* did not prove it was in such dire financial straits and the JOA was held to be a clear violation of the antitrust laws. Congress attempted to reverse the result of *Citizen Publishing* by allowing newspapers to enter into a JOA prior to the time the financially troubled newspaper is on its deathbed. As stated by Senator Bennett: "The Court failed to articulate a doctrine which recognized the fundamental importance of placing a failing newspaper on a sound financial basis in order to preserve these two voices before there is a grave possibility of failure." 116 Cong. Rec. 1786 (1970).

Both the House and the [**15] Senate believed that authorizing certain joint action between newspapers would serve the best interest of the people of the United States and the first amendment. This interest is served by preserving the independent editorial voice of the newspaper in financial distress. Unique economic forces were

considered to be at work in the newspaper industry. These forces necessitated allowing newspapers to enter joint agreements before they reached the point of distress required by *Citizen Publishing*. The permissible scope of a JOA is limited, however. Although the House and Senate bills allow the competing newspapers to share the business aspects of newspaper publication (printing, circulation, production facilities, advertising, revenue), the editorial and reportorial functions of the two newspapers must remain separate. See [15 U.S.C. § 1802\(2\)](#).

The two bills diverged in an area that is of critical importance here. This divergence involves the question of the extent of Congress' repudiation of *Citizen Publishing*'s failing company standard. Originally, the Senate bill defined a "failing newspaper" simply as one "not likely to remain or become financially sound." This [**16] standard was applicable to both existing JOA's and those to be entered in the future. Later, the Senate added the test that the paper be either not "financially sound" or in "probable danger of failure." See S. Rep. No. 535 at 1-2. The House considered this disjunctive definition too loosely drawn for prospective JOA's. Instead, for the purposes of future JOA's, a failing newspaper was defined as one in "probable danger of financial failure." This was the standard that was enacted into law. See [15 U.S.C. § 1802\(5\)](#). The Newspaper Preservation Act, modeled largely on H.R. 279, easily passed both houses in July of 1970.

This brief background of the Act provides a starting point for determining whether the Attorney General acted properly by approving the JOA at issue here. More legislative history will be discussed below, but at this point it is evident that the standard "in probable danger of financial failure" falls somewhere in between the failing company standards of *Citizen Publishing* and the "not likely to remain or become financially sound" definition used in the rejected Senate version of the Act.

C. The Prospective Buyers Issue

The rejected standard of [**17] *Citizen Publishing* contained an element that required the failing company to show no prospective purchasers were available. [394 U.S. at 137, 22 L. Ed. 2d at 155](#). This required not only that the failing company accept and act on offers to purchase, but also that it make affirmative attempts to sell. [394 U.S. at 137, 22 L. Ed. 2d at 156](#). In this context, the district court found the Attorney General had acted improperly for two reasons: first, he incorrectly rejected the ALJ's proposed Finding of Fact 158, which stated in essence that the P-I could in all probability be sold at fair market value to a third party who [*475] would continue to operate it;³ second, the Attorney General failed to construe the Act to require that non-anticompetitive alternatives to a JOA be explored. The facts showed the existence of interested and able purchasers, but Hearst never pursued that course. The Committee, of course, agrees with the district court. The Attorney General and Hearst believe the court erred both on the factual issue regarding the existence of ready, willing and able buyers and on the legal standard utilized. We agree with the district court to the extent it held that alternatives [**18] to a JOA are relevant to the determination that a newspaper qualifies under the Act. We find, however, that Hearst met its burden of showing that the alleged alternatives did not offer a solution to the P-I's difficulties.

We do not find the dispute concerning Finding of Fact 158 crucial to our resolution of the buyer issue. On the one hand, we agree with the Attorney General's argument that the evidence did not require him to [**19] adopt Finding of Fact 158.⁴ While the evidence showed that six individuals or entities inquired into the possible sale of the P-I, it

³ Finding of Fact 158 provides:

Considering that the Post-Intelligencer is not, and has not been for sale, and that all inquiries regarding possible purchase have been rebuffed by The Hearst Corporation with statements to that effect, and that responsible prospective purchasers nevertheless continue to appear and express an interest in buying the Post-Intelligencer, it must be concluded that the Post-Intelligencer could in all probability be sold at fair market value to a person or firm who could, and would, continue it in operation as an independent metropolitan daily.

⁴ We must emphasize that in this situation our review is of the Attorney General's decision, not the ALJ's. [HN8↑](#) When the agency disagrees with the ALJ, deference still runs in favor of the agency; the ALJ's contrary findings will simply be weighed along with the other evidence opposing the agency's decision. See, e.g., [NLRB v. Brooks Cameras, Inc.](#), 691 F.2d 912, 915 (9th Cir. 1982).

did not show that the P-I could in all probability be sold to a buyer who would continue its operation as an independent newspaper. The "inquiries" were just that: they were not offers.⁵ **[**20]** We recognize that Hearst responded to most of these inquiries with the simple statement that the "P-I was not for sale." Hearst's failure to offer the paper for sale and to favorably respond to such inquiries does not, however, compel the conclusion made by the ALJ in Finding of Fact 158.⁶

[*476] Our affirmation of the Attorney General on the Finding of Fact 158 issue does not, as he and Hearst seem to argue, end our analysis. The facts are undisputed that purchase inquiries did occur and that Hearst did not cultivate these inquiries. See Findings of Fact 156 and 157. A close reading of the district court's decision shows that it was premised on these underlying facts and not simply on Finding of Fact 158. While we disagree with the district court's conclusion that an attempt to sell the paper is necessary to prove no reasonable alternatives to the JOA exist, we do agree that reasonable alternatives to a JOA are relevant to our analysis.

The starting point **[**21]** for our analysis must begin with the Congressional intent to repudiate *Citizen Publishing*'s application of the failing company defense. We believe that Congress intended a total rejection of the failing company defense as used in *Citizen Publishing*, including the requirement that the applicant attempt to sell the newspaper. See, e.g., S. Rep. No. 535, *supra, at 4*; H. Rep., *supra*, 1970 U.S. Code Cong. & Ad. News at 3547, 3555; Remarks of Sen. Inouye, 116 Cong. Rec. 1785; Remarks of Sen. Bennett, *Id.* at 1786-1787; Remarks of Rep. Railsback, *Id.* at 23,154. The Federal Trade Commission opposed the Act because, among other reasons, it did not require the "search for an available purchaser." S. Rep. No. 535, *supra, at 10*. Holding that there is no per se sale requirement does not mean, however, that proof of interested purchasers is irrelevant.

The district court agreed that Hearst need not have attempted to sell the paper. But the court held that without such an attempt, Hearst had failed to carry its burden of proving that no reasonable alternatives to the JOA were available. The court's determination that reasonable alternatives must be explored **[**22]** was based on the recommended decision of Administrative Law Judge Donald Moore in a prior application under the Newspaper

⁵ There was evidence of seven purchase inquiries. Apparently, all the inquiries were by individuals or groups who had the potential means to back up any offers they might have made. Briefly, the nature of these inquiries and Hearst's response were as follows:

- (1) In 1975, a Mr. Bailey asked the P-I's Seattle attorney what the asking price of the P-I was. The P-I privately advised Mr. Bailey that the paper was not for sale.
- (2) In 1976, Mr. Eller made a similar inquiry and received a similar response.
- (3) Mr. Cunningham made an inquiry in 1977. He was also told the paper was not for sale.
- (4) In 1978, Mr. Guzzo, on behalf of another party, asked Hearst whether the paper was for sale. Hearst replied it was not.
- (5) In May of 1981, after the proposed JOA was announced, Mr. Cunningham made another inquiry. While Hearst replied it had no present intention of selling, it did state it would carefully consider any responsible bona fide offer. No offer was ever submitted.
- (6) In October of 1981, Rupert Murdoch stated that if the JOA failed to go through, he would like to be considered as a buyer.
- (7) On November 24, 1981, a Mr. Snellman made it known that he was interested in buying the P-I at a price to be set by an appraiser. This inquiry was made on the last day testimony was to be taken at the hearing and after the close of the intervenor's case. The closing date for the hearing was set for November 28. The ALJ allowed the letter indicating Mr. Snellman's interest into evidence but, due to the last minute nature of the offer and time constraints, did not allow Mr. Snellman to testify. Apparently, Hearst never responded to this late inquiry.

Findings of Fact 156 and 157.

⁶ Our review on this point is narrow: Was it proper to reject Finding of Fact 158? We will discuss in more detail below the ramifications of Hearst's failure to hold the paper up for sale and its rebuff of potential buyers. For now, we should note that the requirement of attempting to sell the financially distressed company was one of the *Citizen Publishing* requirements rejected by the Newspaper Preservation Act.

Preservation Act involving the Cincinnati Post. *Recommended Decision of Administrative Law Judge Moore on the Application of the Cincinnati Enquirer and the E.W. Scripps Co.*, Department of Justice Docket No. 43-03-24-4 (1979). ALJ Moore recognized that the significance of evidence of prospective buyers was not clearly set forth in the Act's legislative history. *Recommended Decision of ALJ Moore* at 120. He believed, however, that Congress did intend the "probable danger of financial failure standard" to be interpreted with reference to the Bank Merger Act and the gloss put upon it by the Supreme Court in [United States v. Third National Bank, 390 U.S. 171, 19 L. Ed. 2d 1015, 88 S. Ct. 882 \(1967\)](#). [Id. at 121](#). Judge Moore correctly pointed out that the Senate Report refers to the Bank Merger Act and *Third National Bank* for guidance in interpreting the probable danger of financial failure standard, S. Rep. No. 535, [supra, at 2](#), as did Representative Kastenmeier, the floor leader, during the debates on the House bill, 116 Cong. Rec. 23,146. [**23](#) ⁷ [Id. at 121-122](#). Judge Moore recognized that the actual standards used to judge the permissibility of bank mergers are quite different than the standards for newspaper JOA's. See [12 U.S.C. § 1828\(c\)\(5\)](#). He believed it was reasonable, however, to conclude that Congress intended the Supreme Court's interpretation of the Bank Merger Act in *Third National Bank* to be applicable to newspaper JOA's. [Id. at 122-123](#). We agree.

[**24](#) The Bank Merger Act creates an antitrust exemption for certain bank mergers. The Act utilizes a balancing test, weighing the anticompetitive effects of the proposed [*477](#) merger against the public interest. [12 U.S.C. § 1828\(c\)\(5\)](#). In *Third National Bank*, the Court interpreted this balancing test to require the proponents of the merger to "reliably establish the unavailability of alternative solutions." [390 U.S. at 190, 19 L. Ed. 2d at 1029](#). Where it had been shown that managerial deficiencies were the crux of the bank's financial difficulties, the possibility of a sale or the infusion of new management must be considered. 390 U.S. at 190-191, 19 L. Ed. at 1029-1030.

Based on *Third National Bank*, ALJ Moore fashioned the following test to judge whether a newspaper qualifies as failing under the Act:

Accordingly, an applicant which has not sought or considered a noncompeting buyer must establish that it would be futile to require attempts to sell, either because of an unavailability of qualified purchasers or because it is unlikely that the paper's condition would be materially improved by the infusion of new ownership and new management.

Recommended [**25](#) *Decision of ALJ Moore* at 127.

Both the Attorney General and Hearst argue against Judge Moore's analysis. Specifically, they maintain that the Act utilizes a purely intrinsic economic test; alternatives in general and the presence of interested purchasers in particular are relevant, if at all, only to the extent they establish the newspaper operation is not probably failing. They contend primarily that ALJ Moore's analysis need not be considered because it was not expressly adopted by then Attorney General Civiletti. It is true that the Civiletti decision adopted only those conclusions of law necessary to the determination that the Cincinnati Post was a failing newspaper. Just what portions of Judge Moore's recommendations were necessary to his approval of the JOA is not easily answered. Nonetheless, Judge Moore presents a reasonable construction of the somewhat nebulous statements in the legislative history. While we do not adopt in whole the test he utilized, we nevertheless find that his analysis of the failing newspaper standard provides a sound foundation for our interpretation of the Act. And, as will be discussed below, our interpretation is not much different, if at [**26](#) all, than that proffered by the Attorney General.

As noted earlier in the discussion of the background of the Newspaper Preservation Act, the House modified the proposed Senate definition of a failing newspaper applicable to future JOA's. The probable danger standard was intended to be "far more stringent" than the financially sound standard. Statement of Rep. Kastenmeier, 116 Cong.

⁷ In reference to the amendment which disjunctively added the danger of probable failure standard to the unlikely to remain financially sound definition of a failing paper, the report states: "This phrase is taken from the Bank Merger Act and has been the subject of a Supreme Court opinion in *U.S. v. Third National Bank*."

Rep. Kastenmeier, in response to the objection that the probable danger standard was loosely drawn, stated: "The term . . . is one that has a legislative history. It comes out of the Bank Merger Act. It is understood by the courts in the field, and happens to be a term that is well known."

Rec. 23,146. Representative McCulloch, a cosponsor of the House bill, stated that the antitrust exemption for future JOA's is "carefully circumscribed. . . . [It] should be limited only to those situations where a joint newspaper operating arrangement is demonstrably essential to prevent a newspaper failure. . . ." *Id.* at 23,148. Requiring the Attorney General to consider alternatives to the JOA effectuates the intent of Congress to create a tougher standard. We also find support for that analysis in the statements of the sponsors of the Act who described the factors one should analyze to determine if a newspaper meets the financially sound standard. These statements strongly imply that this standard was to be based solely on economic considerations. See, e.g., Remarks of Sen. Bennett, [\[**27\]](#) *Id.* at 1787; Remarks of Rep. Lloyd, *Id.* at 23,155; S. Rep. No. 535, [supra, at 5](#). Hearst and the Attorney General nonetheless contend that this stricter test is still a purely economic standard; Congress intended only to require an applicant to make a stronger showing of the likelihood of failure. We disagree with that argument only to the extent that it rejects the consideration of economic factors which are arguably extrinsic to the newspaper operation.⁸ We base our disagreement with this [\[*478\]](#) argument not only on the legislative history and our evaluation of the reasonableness of the foregoing analysis, but also on the well-recognized rule that antitrust exemptions must be narrowly construed. [*Group Life & Health Ins. Co. v. Royal Drug*, 440 U.S. at 231, 59 L. Ed. 2d at 280 \(1979\).](#)

[\[**28\]](#) The Act should receive a commonsense construction. [HN9](#)[] The probable danger standard is, by the plain meaning of its words, primarily an economic standard: Is the newspaper suffering losses which more than likely cannot be reversed? The existence of interested buyers may be relevant to this determination. Also, poor management practices such as concerned the Supreme Court in *Third National Bank* may show that, with managerial improvement, the paper's economic problems can be overcome. We noted earlier in this discussion that the Attorney General and Hearst conceded that interested purchasers *may* be relevant to the determination a newspaper is failing. In particular, the Attorney General does not argue strongly against either ALJ Moore's or the district court's analysis. Significantly, the Attorney General's order approving the JOA application stated that "evidence of purchaser offers or negotiations may be pertinent in assessing the financial conditions and prospects of the allegedly failing newspaper." Attorney General's Order No. 979-82 at 11. The pertinence of interested purchasers, as the Attorney General apparently concedes, may require a JOA applicant to prove that [\[**29\]](#) the "new ownership and management could not convert the [paper] into a profitable enterprise without resort to a joint operating arrangement." *Recommended Decision of ALJ Moore* at 127; see [*Third National Bank*, 390 U.S. at 189, 19 L. Ed. 2d at 1029](#). This interpretation of the Act is not burdensome. Its primary effect is to prevent newspapers from allowing or encouraging financial difficulties in the hope of reaping long-term financial gains through a JOA. A JOA applicant should not be allowed to engage in poor business practices or maintain inept personnel in anticipation that it may later qualify for an antitrust exemption in the future. See S. Rep. No. 535, [supra, at 5](#); Remarks of Sen. Bennett, 116 Cong. Rec. 1788. In this respect, "alternatives" to a JOA are relevant to both the causes of a newspaper's financial decline and its future prospects.

Our discussion is in substantial agreement with the district court's opinion. We do not agree, however, that the facts are insufficient to support the Attorney General's order. The critical question is whether it was shown that the P-I's financial condition was such that new management might be successful in reversing [\[**30\]](#) the P-I's difficulties. There is sufficient evidence in the record supporting a negative answer.

ALJ Hanscom made detailed findings on the condition of the P-I and the Seattle newspaper market. He found the P-I had lost over \$14,000,000 since 1969, Finding of Fact 59, and that the P-I was in a "downward spiral," see Finding of Fact 130. The ALJ also rejected the argument that Hearst had mismanaged the P-I. Instead, he found the P-I management had acted competently and reasonably in an effort to return the newspaper to profitability. Finding of Fact 94. Judge Hanscom also explored numerous positive prospects and possible remedial measures

⁸There are few, if any, things that affect a business's success which can truly be characterized as noneconomic. A good example is the political viewpoint of a publisher. That viewpoint certainly shows up in the editorial policies of a newspaper. Those policies in turn may either attract or reduce readership. We do not wish to imply that a newspaper must explore the alternative of changing its editorial policies prior to entering a JOA. The Attorney General and Hearst tend to argue that any factors extrinsic to the newspaper operation are "noneconomic." That, however, is a shortsighted view, and we reject it so far as it leads to the conclusion that proof of interested purchasers is "noneconomic" and therefore irrelevant under the Act.

proposed by the intervenors in their effort to show the P-I can be returned to profitability. He rejected them as being "ungrounded in reality." Finding of Fact 146; see also Findings of Fact 137-155. Based on these findings, we believe there is ample support in the record for the Attorney General's adoption of Finding of Fact 109, which stated:

[*479] Although some of the witnesses in this proceeding were critical of the handling of the Post-Intelligencer, the evidence does not establish that new management would be **[**31]** any more successful than Hearst and current management of the Post-Intelligencer in returning it to profitability.

Despite Finding of Fact 109, the district court held that Hearst had not sustained its burden of proving new management could not succeed in turning the P-I around, apparently because Hearst did not respond favorably to purchase inquiries. In light of the existence of substantial evidence in support of Finding of Fact 109, this was in error. In the absence of a showing that there is a likelihood new management would succeed, Hearst's failure to consider purchase inquiries lost importance. We therefore reverse the district court's holding.

Also, the district court misperceives the proper scope of the burden of proof under the Act. It is true that [HN10](#) the ultimate burden of persuasion lies with the proponents of the JOA. [28 C.F.R. § 48.10\(4\) \(1982\)](#). Generally, however, that burden only entails a showing of (1) the economic fact of probable failure (downward spiral, irreversible losses), and (2) reasonable management practices. In an adversarial situation such as here, parties opposed to the JOA may rebut this evidence by showing the paper's losses did not **[**32]** in fact exist or were due to unreasonable management practices.⁹ **[**33]** The opponents also might offer, as they did here, proof of parties interested in purchasing the newspaper. This evidence might show the paper is not actually in probable danger of failure because reasonable changes can return the paper to profitability.¹⁰ When the proponents of the JOA established, as they did here, that the paper was managed reasonably and its trend toward failure is irreversible *under any management*, we have no difficulty concluding that the burden of proof has been met. Cf. [Third National Bank, 390 U.S. at 189, 19 L. Ed. 2d at 1029](#) (where proof adduced at trial showed "failing" bank's problems were due to mismanagement, bank had burden of showing reasonable attempts to solve management difficulties were made, or that they would be unlikely to succeed).

[34] D. Proof of Probable Closure**

⁹ We note that the Antitrust Division will always be a party when a hearing is held. Other interested parties may intervene. [28 C.F.R. § 48.10\(b\)](#). Also important is the requirement that the applicants for a JOA must provide substantial financial documentation concerning their newspapers to the Attorney General. [28 C.F.R. § 48.4](#). This information is generally open to public view and could be used to rebut an applicant's evidence. In fact, the intervenors did rely on that information in attacking the proposed JOA. Also, interested buyers could have used this information to come up with a reasonable plan to return the paper to profitability.

¹⁰ The Committee argues that because parties are interested in purchasing the P-I, it cannot actually be failing. Various bits of legislative history are cited in support of this contention. We disagree, however, with this argument which, in effect, states that a newspaper that meets the definition of failing under the Act cannot be sold. The statements of various congressmen more closely relate to the belief that once a newspaper reaches the point of financial difficulty required by *Citizen Publishing*, the paper may very well have little value as an acquisition or as a party in a proposed JOA; it may very well be more advantageous for the dominant paper to let the ailing paper die and enjoy the benefits of a natural monopoly rather than entering a joint agreement. See, e.g., House of Representatives Hearings before the Antitrust Subcommittee on H.R. 279, 91st Cong., 1st Sess. 12 (1969); S. Rep. No. 535, [supra, at 4](#); Remarks of Sen. Inouye, 116 Cong. Rec. 1786, Remarks of Rep. Annunzio, *Id.* at 23,168; cf. Remarks of Rep. Feighan, *Id.* at 23,156 (objects to the Act for the reason it will allow a paper to be considered failing even though it could be sold).

Also, on December 15, 1982, the Committee requested this court to take judicial notice of the sale of a Hearst newspaper, the Boston Herald-American, allegedly in "probable danger of failure," to the News America Publishing Company. We deny this request. Based on our interpretation of the Act, this sale is not relevant to the determination that the Post-Intelligencer is in probable danger of financial failure.

As an alternative ground for overturning the approval of the Post-Intelligencer/Times [***480**] joint operating agreement, the Committee contends that the Attorney General failed to interpret the Act to require proof the P-I would be closed if the JOA application were disapproved. The district court held for defendants on this issue. It found it sufficient the Attorney General concluded that, but for the ownership of Hearst, the P-I would probably be closed. We agree.

For purposes of this issue, we accept the Committee's assertion that Hearst never considered closing the P-I, even should the joint operating agreement not be allowed. Our focus, however, is on other language in the failing newspaper definition not yet discussed. **HN11** A newspaper is defined as failing if it is in probable danger of financial failure "regardless of its ownership or affiliations." **15 U.S.C. § 1802(5)**. This language supports the ALJ's and the Attorney General's conclusion that the financial strength of Hearst need not be considered in determining whether the P-I is failing. We therefore agree with the district court's resolution of this issue: substantial evidence [****35**] establishes that the P-I is in dire financial trouble and, without the backing of Hearst, it would probably close.

We do not dispute the Committee's assertions that a primary intent of the Newspaper Preservation Act was to promote the diversity of editorial voices among newspapers. Congress was of the opinion that unique economic forces operate in the newspaper industry, forces which caused the decline and closure of numerous newspapers since the turn of the century. S. Rep. No. 535, *supra at 2-3*; H.Rep. No. 1193, *supra*, at 3548-3549. In order to maintain editorial diversity, it is beyond question that the purpose of the Act is to prevent the *closure* of the ailing newspaper. See, e.g., Remarks of Sen. Goldwater, 116 Cong. Rec. 1795; Remarks of Sen. Ellender, *Id.* at 1785; Remarks of Sen. Inouye, *Id.* at 1786; Remarks of Rep. Matsunaga, *Id.* at 23,153; Remarks of Rep. McCulloch, *Id.* at 23,148. We note, however, that Congress was just as concerned with the loss of an independent editorial voice through a merger, as with an actual closure of a newspaper. Remarks of Rep. Matsunaga, *supra*.

We do not accept Hearst's argument that requiring proof [****36**] of probable closure is the same as requiring the paper be on the brink of collapse, an element of the "failing company" defense which was clearly repudiated by the Newspaper Preservation Act. We adhere to our belief that Congress intended the phrase "probable danger of failure" to mean a probability that the paper would be closed and an editorial voice lost. We do not agree, however, with the Committee's assertion that proof of probable closure is a per se rule applicable to all JOA applications. Our conclusion that Congress intended that there be a showing the newspaper will likely close must be interpreted in light of the language that a newspaper's failing status should be determined without regard to its ownership or affiliations.

We believe the intent of the "regardless of ownership" language is quite clear. It means simply that the ailing newspaper should be analyzed as a free-standing entity, as if it were not owned by a corporate parent. The legislative history does not contradict the plain meaning of this language. The Senate Report concisely describes the purpose of this language:

The phrase "regardless of its ownership or affiliations" was included to focus [****37**] the attention of the court on the business entity before it rather than the related business enterprises. Whether a newspaper is failing should be determined on the basis of the operation in the particular city rather than on the basis of the sweep of the newspaper owner's business interests. However, the phrase shall not preclude court examination of transactions between the newspaper seeking exemption and related companies which supply goods and services or which are customers. If such examination were precluded, it would make it possible to create [a] "failing newspaper" by artificial bookkeeping entries and that is not intended.

[***481**] S. Rep. No. 535, *supra, at 5*. Similarly, Senator Hruska stated the purpose of this language was to insure that judicial interpretation on the question whether a paper is failing be "based upon the financial operations of that paper, and not upon the presence or absence of financial support from other newspaper business activities in other cities or from other financial activities of the owners of the failing newspaper." 116 Cong. Rec. 2006; see also Remarks of Reps. Eckhardt and Kastenmeier, *Id.* at 23,147; cf. [****38**] Letter from Paul Rand Dixon to Sen. James Eastland (July 25, 1969), *attached to* S. Rep. No. 535, *supra, at 9-11* (Mr. Dixon, then the Chairman of the Federal Trade Commission, objected to the passage of the Act because, among other reasons, "every failing newspaper

may enter a joint operating arrangement without reference to the identity or financial resources of its owner or owners.")

We find that the above-quoted portion of the Senate Report sums up the importance of the phrase "regardless of ownership or affiliations" quite well: [HN12](#)¹¹ generally, ownership is not to be a factor in considering whether a newspaper is failing; an exception to the general rule is that ownership may be analyzed to ensure the owner has not created a failing company through creative bookkeeping. The Committee apparently does not dispute that the P-I as a separate entity is in financial trouble. It instead asserts that, based on an "incremental analysis," Hearst is receiving net benefits from the P-I's financial problems for tax and other reasons. As the Attorney General held, these arguable benefits to Hearst do not counter that the P-I, as a separate entity, is in severe financial trouble and would [**39](#) likely close if not owned by Hearst. We affirm the district court on this issue.

E. Harm to Competing Newspapers

The Committee also argues that the order approving the JOA must be overturned because the Attorney General did not consider the potential injury to other newspapers in the market and did not limit the terms of the JOA to the least anticompetitive approach possible. The argument is that these conditions are implied in the requirement that the Attorney General find that the JOA "effectuate[s] the policy and purpose of the Act." The district court held against the Committee on this issue. For the following reasons, we affirm.

The policy of the Act is stated in its first section. That policy is to maintain editorial and reportorial independence among newspapers through the preservation of newspaper publication in areas "where a joint operating agreement has been heretofore entered into because of economic distress or is hereafter effected in accordance with the provisions of this chapter." [15 U.S.C. § 1801](#). This declaration and the legislative history compel the conclusion that the Act itself is a policy determination that the preservation of editorial diversity [**40](#) through joint operating agreements outweighs any potentially anticompetitive effects this antitrust exemption might cause. Congress struck the balance in favor of the Act notwithstanding opposition that decried the potential harm to smaller, usually suburban newspapers competing in the market area. As stated in the House Report: "Although commercial competition may have been affected to some extent by these arrangements, they have achieved the more important objective of preserving separate editorial voices." H. Rep. No. 1193, *supra*, at 3549. Representatives MacGregor and Mikva objected to the Act because "it will preserve certain newspapers but will stifle competition in ideas by crippling the growth of competing dailies." *Id.* at 3558; see also Remarks of Rep. MacGregor, 116 Cong. Rec. 23,149-50; Remarks of Sen. McIntyre, *Id.* at 1815-1817.

The Act itself contains an important safeguard which prevents the parties to a JOA from engaging in any conduct which would violate the antitrust laws if done by a single entity. [15 U.S.C. § 1803\(c\)](#). As explained in the Senate Report, this section is designed "to protect the competitive position of newspapers which share the [**41](#) market with a joint operating arrangement." S. Rep. [\[*482\]](#) No. 535, *supra, at 5*. It can easily be garnered from this and the other language cited above that Congress considered the question of harm to other newspapers and resolved it in favor of the antitrust exemption.¹¹

¹¹ The Committee's only support for its position is a statement by Senator Dirksen during the Senate hearings. Senator Dirksen's amendment added the requirement of Attorney General approval for prospective JOA's. He explained: "In this way, the interest of the suburban papers and the unions will be considered by the Justice Department before any new arrangements are authorized." Senate Hearings before the Antitrust and Monopoly Subcommittee on S. 1520, 91st Cong., 1st Sess. 5 (1969). Senator Dirksen later explained his intent in proposing this amendment: "Before authorizing such arrangements in the future, the Department could hear from other interested parties -- competing papers, unions, etc. -- as well as make its own investigation, in order to be certain the new arrangement is essential and justified." *Id. at 9*. Although Senator Dirksen's statements do not refer to the requirement that the JOA "effectuate the policy and purpose of the Act," it is evident he intended primarily to allow interested parties a chance to voice their views. The regulations adopted by the Attorney General permit this and that is what in fact happened in the proceedings below.

[**42] We reject the argument that the terms of the proposed JOA do not effectuate the policy and purpose of the Act.¹² Title [15 U.S.C. § 1802\(2\)](#) discloses the proper subjects of a newspaper joint operating agreement. Joint action with respect to the following is allowed: sharing printing and production facilities; joint business, advertising and circulation departments; the setting of circulation and advertising rates; and revenue distribution. The express limit on this joint activity is that editorial and reportorial functions must remain separate and independent. The Attorney General found and the Committee does not seriously dispute that the proposed JOA meets these restrictions. It is evident that Congress determined what it considered to be the permissible scope of a newspaper JOA. Again, opponents of the Act argued against it because they felt it was an unnecessary and broad exemption from the antitrust laws. See S. Rep. No. 535, [supra, at 7](#) and 10 for the FTC's objections that the Act placed no time limits on potential JOA's. Representatives MacGregor and Mikva voiced a similar objection. H. Rep. No. 1193, [supra, at 3557](#).

[**43] We conclude that the district court correctly rejected the Committee's claims on this issue. Congress recognized that the approval of a JOA may have anticompetitive ramifications. This was a national policy choice Congress was free to make. It believed those possibly harmful effects were outweighed by other considerations and sufficiently alleviated by the requirements of the Act. The JOA is not inconsistent with the Act.

F. [First Amendment](#) Issues

The Committee also argues the Newspaper Preservation Act as a whole is invalid by virtue of the [first amendment](#). The challenge is two-pronged: first, that the Act is invalid as applied because approval of the JOA would impair the [first amendment](#) rights of smaller newspapers in the market; second, that the Act is invalid on its face as an overbroad and vague delegation of power in an area affecting [first amendment](#) rights. Although these arguments are imaginative, they lack substantial merit.

The district court rejected the claim that the Act is unconstitutional as applied, basing its decision largely on two district court decisions dealing with the same argument. [Bay Guardian v. Chronicle Publishing Co., 344 F. Supp. 1155 \(N.D. Cal. 1972\)](#); [City and County of Honolulu v. Hawaii Newspaper Agency, Inc., 7 Media L. Rep. \(BNA\) 2495 \(D. Hawaii 1981\)](#). We agree with the district court's rejection of the Committee's assertion that these cases are distinguishable because the plaintiffs there were challenging preexisting joint operating agreements. In either situation, the courts are faced with the claim that this antitrust [*483] exemption may cause economic injury to smaller newspapers, which might lessen circulation, which in turn affects the "breadth" of one's freedom of press.

It is obvious that the Newspaper Preservation Act's antitrust exemption will not affect the *content* of speech of these smaller newspapers. The Act is an economic regulation which has the intent of promoting and aiding the press. At most, the Act *may* affect the number of "readers" a newspaper has. But that the Act may have such an effect is no different, in our view, than any other economic regulation of the newspaper industry. [Associated Press v. NLRB, 301 U.S. 103, 132-133, 81 L. Ed. 392 \(1937\)](#); [Mabee v. White Plains Publishing Co., 327 U.S. 178, 184, 90 L. Ed. 607, 613, 66 S. Ct. 511 \(1946\)](#); [**45] [Oklahoma Press Publishing Co. v. Walling, 327 U.S. 186, 193-194, 90 L. Ed. 614, 620-621, 66 S. Ct. 494 \(1946\)](#).

[Grosjean v. American Press Co., 297 U.S. 233, 80 L. Ed. 660, 56 S. Ct. 444 \(1935\)](#), is cited by the Committee in support of its [first amendment](#) argument. In *Grosjean*, the Supreme Court struck down a statute which imposed a special tax on newspapers having a circulation of over 20,000 copies. The court overturned the statute not because it had an economic impact on newspapers but because it was designed to stifle opposition to the Louisiana political machine. Simply put, this facially neutral statute was intended to regulate the content of speech. Nor is [Associated Press v. United States, 326 U.S. 1, 89 L. Ed. 2013, 65 S. Ct. 1416 \(1945\)](#), on point. There the Court held only that the [first amendment](#) does not insulate news-gathering organizations from the antitrust laws.

¹² The Committee's primary objection is that the agreement is too long (50 years) and that it will not cease to exist even if the P-I becomes profitable in the future.

Whether or not the Newspaper Preservation Act's limited antitrust exemption should be considered a license, as the Committee argues, we do not find *first amendment* rights implicated. While we recognize the importance of the antitrust laws in our economic system, one cannot lose sight that **[**46]** these laws are the creation of Congress. They are not mandated by the *first amendment* or anywhere else in the Constitution. What Congress has passed, it may repeal. Apparently, the Committee's actual dissatisfaction with the Act is based on its belief that certain newspapers are treated differently, i.e., preferentially. But there is no question that other newspapers in the Seattle area, large or small, may participate in a joint operating agreement if they qualify.

Finally, we see no "vague and overbroad" delegation of power to the Attorney General. First of all, as discussed above, we fail to see any clearly defined *first amendment* injury. Secondly, our interpretation of the Act rejects the argument that it is overly vague. The Attorney General must base his approval of a proposed JOA on the requirements in the Act as we have interpreted them in this opinion. Nothing more definite is required. See, e.g., [*Arnett v. Kennedy*, 416 U.S. 134, 159, 40 L. Ed. 2d 15, 36, 94 S. Ct. 1633 \(1974\)](#).

III. CONCLUSION

We agree with the district court to the extent it held that the alternatives to a joint operating agreement, including sale to a capable noncompeting buyer, are relevant **[**47]** to the determination that a newspaper qualifies for an antitrust exemption under the Newspaper Preservation Act. It is evident, however, that the Times Company and Hearst sufficiently negated the possibility that any such alternatives were available in this case. We reverse the district court for that reason.

The other arguments in support of overturning the Attorney General's approval of the Post-Intelligencer's joint operating agreement are better placed before Congress. The Newspaper Preservation Act was not intended to create antitrust immunities for any newspapers which simply allege they are having difficulties. However, neither does it contain an array of implied conditions which in effect would reinstate the *Citizen Publishing* standards. Simply put, we will not emasculate the Act in the guise of narrowly construing it. We therefore affirm the district court on the issues raised by the Committee's cross-appeal.

[*484] Costs are awarded to appellants.

The decision of the district court is

AFFIRMED IN PART and REVERSED IN PART.

HN1 [down arrow] Injunctions, Preliminary & Temporary Injunctions

In order for a party to obtain a preliminary injunction, the court must find that the party has satisfied four criteria: (1) that the party will suffer irreparable injury if the injunction is not granted; (2) that such injury outweighs any harm which granting injunctive relief would inflict on the opposing party; (3) that the party has exhibited a likelihood of success on the merits; and (4) that the public interest will not be adversely affected by the granting of the injunction.

HN2 [down arrow] Monopolies & Monopolization, Actual Monopolization

The purpose of the prohibitions of [15 U.S.C.S. § 2](#) of the Sherman Act is to go beyond [15 U.S.C.S. § 1](#)'s proscription of contracts, combinations, or conspiracies in restraint of trade, which applies to conduct by two or more actors, in order to proscribe conduct by a single economic entity which may stifle competition. The first step in

a court's analysis of a claim of monopolization or an attempt to monopolize must be an examination of the relevant market to determine if the alleged monopolizer's conduct is likely to affect competition adversely.

[Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview](#)

[Antitrust & Trade Law > Sherman Act > General Overview](#)

[HN3](#) [] Regulated Practices, Market Definition

A relevant market is defined as the narrowest market which is wide enough so that products from adjacent areas or from other producers in the same area cannot compete on substantial parity with those included in the market.

[Antitrust & Trade Law > Sherman Act > General Overview](#)

[Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview](#)

[Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview](#)

[Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview](#)

[HN4](#) [] Antitrust & Trade Law, Sherman Act

As a general rule, a company has the unfettered right to deal with whom it pleases and to refuse to deal with whom it pleases, so long as the determination is made unilaterally. Courts must not yield to the long resisted temptation to create a federal common law of unfair competition. The purpose of the Sherman Act is not to maintain friendly business relations among firms in the same industry nor was it designed to keep these firms happy and gleeful. In some circumstances, however, a monopolist who controls a facility, access to which is essential for a competitor to enter a market, may be under a duty to make the facility accessible. When an essential facility exists, the firm that controls the facility can block access to the market by excluding competitors.

[Governments > Legislation > Interpretation](#)

[HN5](#) [] Public Enforcement, US Federal Trade Commission Actions

The Massachusetts unfair competition act is to be construed consistently with the interpretations given by federal courts and the Federal Trade Commission in construing § 5(a)(1) of the Federal Trade Commission Act (Act). [Mass. Gen. Laws ch. 93A, § 2\(b\)](#). The Act is somewhat broader than the Sherman Act and the Act prohibits incipient

violations of the Sherman Act and the Clayton Act as well as some practices which violate neither the letter nor the spirit of the antitrust laws. However, to violate the Act or the Massachusetts statute, a practice must be unfair, immoral, oppressive, unethical, unscrupulous, or cause substantial injury to consumers or competitors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6 Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

Refusals to sell, without more, do not violate the law. It is the right of one engaged in private business to refuse to deal, or discontinue dealing, with anyone, for any reason, unless the dealer combines with others in a concerted effort to hinder free trade.

Opinion

[*1236] MEMORANDUM AND ORDER DENYING DEFENDANT'S MOTION FOR PRELIMINARY INJUNCTION

SKINNER, J.

The plaintiff, The Interface Group, Inc. (Interface), is a Massachusetts corporation which is in the business of producing computer and communications conferences, trade shows, and expositions in the United States and abroad. Plaintiff brought this suit for preliminary injunctive relief and a declaratory judgment under [28 U.S.C. §§ 2201](#) and [2202](#). The defendant, Gordon Publications, Inc. (Gordon), is the publisher of some 15 specialty trade magazines, three of which, *Computer Dealer*, *Computer Products*, and *Software Retailing*, are specifically directed to the computer trade. The plaintiff wants to keep the defendant from selling or distributing a "show daily" from the exhibition floor of any of plaintiff's shows unless the defendant and the plaintiff enter into a contract which authorizes the defendant to do so. The defendant filed an answer and a counterclaim, **[**2]** alleging that the defendant has a contract right to distribute defendant's show daily at plaintiff's exhibitions and alleging that plaintiff's efforts to exclude the defendant constitute violations of the United States antitrust laws and the Massachusetts law proscribing unfair methods of competition.

For the past few weeks, the parties have been engaged in a process of expedited discovery so this court would have the opportunity to rule on a motion for a preliminary injunction before the plaintiff's upcoming trade show, Comdex/Spring '83, which will be held at the Georgia World Congress Center in Atlanta, Georgia, April 26-29, 1983. At this point in the proceedings, the court has before it defendant's **[*1237]** motion for a preliminary injunction. Both parties have submitted extensive filings in support of their respective positions and the court heard oral argument on April 20, 1983.

The Comdex shows, or Computer Dealer Exhibition shows, are a series of computer trade shows sponsored by Interface at which most of the exhibitors are manufacturers or other suppliers of computers or computer-related products. These exhibitors will be there to sell to the show attendees. The **[**3]** attendees or buyers are not individual consumers buying personal home computers, but rather are resellers, which include independent sales

organizations such as dealers, distributors, systems houses, computer retailers, turnkey vendors, value adders, mass merchandisers, and others. Interface sponsored the first Comdex show late in 1979 and now sponsors three Comdex shows each year. Two are held in the United States and one is held in Europe. The largest show is Comdex/Fall, which this year was held in Las Vegas, Nevada. The next largest show is Comdex/Spring, which is held annually in a city in the eastern United States. The first Comdex/Europe was held last year in Amsterdam, The Netherlands, and Comdex/Europe '83 is also scheduled to be held in Amsterdam.

In addition to the exhibitors who purchase booth space so they can sell computers and computer products, some of the purchasers of Comdex booths are publishers of computer trade magazines. The defendant, Gordon Publications, Inc., is in the business of publishing business and technical trade journals for several technical fields, such as biology, metallurgy, and, of course, computers. Gordon has participated as an exhibitor [**4] at every single one of Interface's Comdex shows since Interface started producing the Comdex series in 1979. At the shows, Gordon distributes its three computer journals: *Computer Dealer*, *Computer Products*, and *Software Retailing*. In addition, ever since the second Comdex show, Comdex/Spring '80, Gordon has published and distributed a "show daily" as part of its Comdex exhibit.

A "show daily" resembles a program for a trade show. It contains information about the exposition, the exhibitors, and the happenings at the show and in the industry. It is also filled with advertising. Show dailies contain advertising both from the exhibitors concerning their company and their wares and from area hotels and other merchants concerning services in the city where the exposition is held. In the computer trade show industry, show dailies, including Gordon's, are distributed free of charge to the people who attend the shows, and the advertising revenue covers the costs of writing, printing, and distributing the publication. Gordon's show dailies are tabloid newspapers which contain articles about trade developments, product announcements, and information about the show. In addition, [**5] Gordon's show daily is filled with advertising, mostly by exhibitors in the show. The advertisements stay the same throughout the show, but the articles are changed slightly so a different edition of the show daily is distributed each day of the show. The show dailies distributed by Gordon in Las Vegas were 168 pages in length. Almost every page contained advertising and approximately 100 pages contained only advertising. Gordon sold all of that advertising space and distributed thousands of free copies.

Gordon uses its show daily as an inducement to the industry to advertise in its principal computer trade publication, *Computer Dealer*, by offering reduced rates in the show daily to advertisers in *Computer Dealer*. Gordon sets its show daily advertising rates below the prevailing market rate for other computer trade publications, including other show dailies in the computer trade.

From Comdex/Spring '80 through and including Comdex/Spring '82, Interface allowed and even encouraged Gordon to publish and distribute its show daily. Interface, as the management of these trade shows, supplied much of the information about the show and the exhibitors which became the editorial [**6] and news content of Gordon's show dailies.

[*1238] Over the years, the Comdex shows grew. From 157 exhibitors and 2100 attendees at Comdex/Fall '79, the show has grown to 1106 exhibitors and 30,500 attendees at Comdex/Fall '82. Over the same period, advertising in Gordon's show dailies has grown. From Spring, 1980 through Spring, 1982 Gordon was the only firm distributing a show daily at Comdex shows and, as a result, as the show audience grew and Gordon's distribution and circulation grew with it, advertisers became more interested in advertising in Gordon's show daily, a publication that would be distributed to all who attended. For example, Gordon grossed \$ 105,000 in advertising revenue for its show dailies which were distributed at Comdex/Fall '82 in Las Vegas.

During 1982 a dispute developed between the parties, resulting in this litigation. It was the view of Sheldon Adelson, President of Interface, that because Gordon was distributing its show daily on premises leased by Interface to an audience assembled through Interface's efforts, Interface was entitled to a share of the show daily revenue. Interface told Gordon that Interface would not agree to allow Gordon [**7] to distribute its show dailies at future Comdex shows unless Gordon agreed to pay Interface 25 to 30% of the gross show daily advertising revenue. Gordon refused.

On October 15, 1982 Interface returned Gordon's application and deposit for an exhibit booth at the Comdex/Europe '82 show in Amsterdam, which was held November 8-11, 1982. In November, 1982 Interface rejected Gordon's applications for exhibit space at the Comdex/Fall '82 and Comdex/Spring '83 expositions. The Comdex/Europe '82 and Comdex/Fall '82 shows were held and Gordon attempted, with varying degrees of success, to distribute its show daily at these shows, despite Interface's refusal to license such distribution or to sell Gordon exhibit space. There were court cases in Amsterdam and Las Vegas concerning distribution of Gordon's show dailies at these shows. Gordon alleges that in addition to seeking to keep Gordon from distributing its show dailies in the Comdex exhibition halls, Interface interfered with Gordon's distribution of show dailies from hotels in Amsterdam and Las Vegas.

Interface has refused to accept Gordon's application for an exhibit booth at Comdex/Spring '83 in Atlanta, so Gordon will not be allowed [**8] to distribute its show daily or its three computer magazines from the exhibition floor in Atlanta if an injunction does not issue. Whether or not Gordon is allowed to distribute show dailies from the exhibition floor, Gordon has arranged to distribute its show dailies from hotels and other areas in Atlanta where Gordon might reach those attending the exposition without entering premises leased by Interface to do so.

In addition, Interface has decided to enter the market and will be publishing and distributing its own show daily at the Comdex/Spring '83 exposition. All of the advertising for both plaintiff's and defendant's show dailies has already been solicited, and both parties are ready to go to print with their respective publications.

Gordon seeks a preliminary injunction preventing interference from keeping Gordon's show daily off the exhibition floor. [HN1](#)[] In order for Gordon to prevail, the court must find that Gordon has satisfied four criteria:

- (1) that [Gordon] will suffer irreparable injury if the injunction is not granted; (2) that such injury outweighs any harm which granting injunctive relief would inflict on [Interface]; (3) that [Gordon] has exhibited a [**9] likelihood of success on the merits; and (4) that the public interest will not be adversely affected by the granting of the injunction.

[Auburn News Co., Inc. v. Providence Journal Co.](#), 659 F.2d 273, 277 (1st Cir. 1981), cert. denied, 455 U.S. 921, 71 L. Ed. 2d 461, 102 S. Ct. 1277 (1982) (citation omitted). See also Section 16 of the Clayton Act, [15 U.S.C. § 26](#).

I turn first to assess the likelihood of success of Gordon's contract and antitrust claims. The evidence shows that companies wishing to participate in an Interface exposition must complete an application form for that exposition. The application form [*1239] states that no contract for exhibit space exists until Interface accepts the application in writing. Interface literature explains the AO Procedure, a first-come, first-served, priority system. AO stands for assignment order and the AO procedure provides that exhibit booth space at Comdex shows will be assigned on the basis of how many prior shows the exhibitor has attended.

For example, under the AO procedure, the first exhibitor at the first Comdex show would be given AO priority number 1 (one). As long as he paid his exhibit rental [**10] fee on time, kept his contractual commitments, and did not miss two consecutive shows, he would keep AO priority number 1 (one). Exhibitors are allowed to select which exhibit booths they want to occupy at each show on the basis of their respective AO priority numbers. The holder of AO priority number 1 (one) gets his first choice concerning which exhibit booth he wants. Gordon contends that its prior contracts, course of dealing, and the AO procedure have given Gordon an option or a contract right to participate in all future Comdex shows. Interface contends that the AO procedure simply establishes what an exhibitor's selection priority will be if Interface agrees to enter into a contract renting an exhibition booth to that exhibitor. In my view, Gordon is not likely to succeed on the merits of this contract claim.

Gordon further contends that by refusing to sell Gordon an exhibit booth, Interface is violating [Sections 1 and 2](#) of the Sherman Act, [15 U.S.C. §§ 1 and 2](#).

Gordon's [Section 1](#) claim is that Interface contacted hotels in Las Vegas and Amsterdam to convince them to prohibit Gordon from distributing show dailies from their hotels and these communications coupled [**11] with concerted action establish a concerted refusal to deal. See [Klor's Inc. v. Broadway-Hale Stores, Inc.](#), 359 U.S. 207,

[70 S. Ct. 705, 3 L. Ed. 2d 741 \(1966\)](#); [Fashion Originators' Guild of America v. FTC, 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703 \(1941\)](#). However, Gordon has not produced any evidence that this conduct, even if it took place as alleged, is likely to continue at future Comdex expositions. Rather, all evidence is to the contrary. Interface has acknowledged that Interface has no right to interfere with Gordon's distribution of its show dailies at hotels and all other areas which have not been leased by Interface. Therefore, since Gordon will be entitled to treble damages, costs and a reasonable attorneys' fee if it proves at trial that Interface engaged in such conduct and that conduct was a violation of Sherman Act [§ 1](#) and caused Gordon damages, because there is no immediate danger of irreparable loss or damage, Gordon's [Section 1](#) allegations do not merit preliminary injunctive relief. See Clayton Act §§ 4 and 16, [15 U.S.C. §§ 15, 26](#).

Gordon also contends that Interface's unilateral refusal to sell exhibition space to Gordon violates [Section 2](#) of [\[**12\]](#) the Sherman Act. Gordon has outlined four separate theories under which it believes that Interface's conduct violates the [Section 2](#) proscriptions against monopolization and attempts to monopolize. Interface's conduct is challenged as: (1) an attempt to monopolize, (2) an unlawful exclusion of Gordon from an essential facility, (3) use or leverage of monopoly power in one market to foreclose competition in another market, and (4) an effort by Interface to extend or abuse its monopoly power.

HN2 [↑] The purpose of the prohibitions of [Section 2](#) of the Sherman Act is to go beyond [Section 1](#)'s proscription of contracts, combinations, or conspiracies in restraint of trade, which applies to conduct by two or more actors, in order to proscribe conduct by a single economic entity which may stifle competition. See [Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 272 \(2d Cir. 1979\)](#), cert. denied, 444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980). The first step in this court's analysis of a claim of monopolization or an attempt to monopolize must be an examination of the relevant market to determine if Interface's conduct is likely to affect competition adversely. See, e.g., [\[**13\] United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391-393, 100 L. Ed. 1264, 76 S. Ct. 994 \(1956\)](#); [\[*1240\] Home Placement Service, Inc. v. Providence Journal Co., 682 F.2d 274, 278-281 \(1st Cir. 1982\)](#).

The Court of Appeals [HN3](#) [↑] defines a relevant market as "the narrowest market which is wide enough so that products from adjacent areas or from other producers in the same area cannot compete on substantial parity with those included in the market." [Home Placement Service, Inc. v. Providence Journal Co., 682 F.2d at 280](#), quoting L. Sullivan, Handbook of the Law of Antitrust 41 (1977). Applying that standard and the Supreme Court's "reasonable interchangeability" formulation to this case, see [United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 \(1956\)](#), it appears that the relevant product market is not show dailies at Comdex shows as Gordon suggests, but rather is advertising in computer trade publications which have a substantial circulation to independent sales organizations (ISO's), original equipment manufacturers (OEM's) and other firms which are in the market for the products hawked at Comdex shows.

It is important [\[**14\]](#) that show dailies are not sold to the people who attend trade shows. The attendees are not the buyers and the show dailies are not the product. Rather, the product in this case is advertising space in a computer publication which will be distributed to the people who attend Interface's Comdex expositions. The critical question is whether the advertisers who buy space in the show dailies believe that advertising by other means is not a reasonable substitute for advertising in a show daily. Compare the *Home Placement* case, for example, wherein the Court of Appeals explained that weekly newspapers were not an adequate substitute for daily newspapers when the product being advertised was rental property, and therefore daily newspaper rental advertising was the relevant market. Rental properties went on and off the market daily and renters needed an up-to-date listing of what properties were available in this volatile market. Therefore, firms and individuals who advertised rental property did not perceive daily and weekly newspapers as "reasonably interchangeable." [Home Placement Service v. Providence Journal Co., 682 F.2d at 280](#). In this case, however, the evidence suggests [\[**15\]](#) that the relevant product market is broader.

There is significant evidence that show dailies are included in this broader computer dealer trade publication advertising market and do not constitute a relevant submarket. First, Interface's show daily editor set the advertising rates for Interface's show daily by reference to the rates charged by other computer trade publications.

This demonstrates his perception that his rates had to be competitive with the rates for advertising in other trade publications; otherwise, the advertisers would not purchase ads in his publication. Second, the same advertisers who advertised in Gordon's computer trade publications, such as *Computer Dealer*, also advertised in Gordon's show daily. Both show daily ads and ads in other computer trade publications identify the advertiser, its products, and extol its products' virtues. Advertisers often place the same ad in show dailies and other computer trade publications, such as Gordon's *Computer Dealer*. Both media also circulate to the same audience; many trade publications develop their mailing lists by referring to lists of those who exhibit at or attend trade shows. Third, while the minor [**16] daily updating of the "news" content of the show dailies may have been peripherally interesting to the attendees at Comdex shows, there has been insufficient evidence submitted that this daily updating affected the advertisers. There was no daily updating of advertisements. The ads ran in all three editions of the show daily. All of the ads for the upcoming Comdex/Spring '83 show have already been placed. Therefore, unlike the *Home Placement* case in which daily newspapers gave rental advertisers a chance to inform the public about rental availability on a day-to-day basis, show daily advertisements are submitted well in advance, as are ads in other computer trade publications. Fourth, Gordon's advertisements in its own [*1241] show dailies evidence that several of its publications are sent to the same organizations which attend Comdex shows. In addition, while the primary advertisers in show dailies are the exhibitors, only 12% of the Comdex/Fall '82 exhibitors advertised in Gordon's show daily; the other 88% evidently spent their advertising dollars elsewhere. Fifth, Gordon reports that some of the advertisers who had placed ads in Gordon's *Computer Dealer* publication [**17] pulled their ads when they learned Gordon might not be allowed to distribute *Computer Dealer* at Comdex/Spring '83. This is because advertisers do not just reach the people who attend trade shows through show dailies. They also reach the people who attend these shows through the other computer trade publications distributed at the shows. The evidence presented to this point indicates that *Computer Dealer* and show dailies are in the same market, the market for advertising in computer dealer trade publications. Gordon believes the computer dealer trade publication market is very competitive and its expert, Professor Cady of the Harvard Business School, agrees with that assessment. Therefore, in my view, Interface's show daily is entering a very competitive *product* market in which Interface will have a very small market share and will compete with many other computer trade publications for advertising revenue.

Similarly, since there are non-Comdex trade shows which are attended by many of the same people who attend the Comdex shows and many OEM's and ISO's which do not attend the Comdex shows,¹ I find that Gordon has not shown that show dailies distributed at these other [**18] competing trade shows are not in the same relevant geographic market as show dailies distributed at Comdex shows.

Gordon is of course correct that show dailies distributed at Comdex shows are a very valuable marketing device for those trying to reach independent computer sales organizations and other computer dealers because show dailies can be distributed at low cost to a large group of people whom the advertiser wants to reach. Similarly, a program distributed at theatres is a valuable marketing vehicle, what Gordon calls a "rifle shot," for advertisers who wish to reach patrons of the theatre. However, there are other ways to contact patrons of the theatre to inform them about products they may wish to purchase and these other advertising methods are included in the same relevant market if they are reasonably interchangeable substitutes which sufficiently limit the market power of the firm distributing the program. See 2 P. Areeda & D. Turner, [*19] ***Antitrust Law*** P 518 (1978). There are also other ways to reach computer dealers. In my view, at this stage of the proceedings, the best evidence argues for a product market which includes, at a minimum, computer dealer trade publications.

Gordon also claims that Interface is attempting to monopolize in violation of ***Section 2*** of the Sherman Act. To establish a likelihood of prevailing on the merits of this claim, Gordon must demonstrate that Interface acted with specific intent to achieve a monopoly position in a relevant market and that there is a dangerous probability that Interface will succeed. See [American Tobacco Co. v. United States, 328 U.S. 781, 785, 90 L. Ed. 1575, 66 S. Ct. 1125 \(1946\)](#); [United States v. Empire Gas Corp., 537 F.2d 296, 298-299 \(8th Cir. 1976\)](#), cert. denied, 429 U.S.

¹ See discussion of trade show monopoly *infra*.

1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 (1977). Gordon has not produced sufficient evidence that there is a dangerous probability that Interface will monopolize a relevant market.

Gordon argues that the fact that Interface's advertising rates for ads placed in its show daily are five times the rates charged by Gordon shows that by excluding Gordon Interface has achieved a monopoly [**20] position and is charging monopoly prices. However, the evidence is that Interface has set a competitive price to compete with advertising in other trade publications. Gordon's lower prices reflect Gordon's marketing strategy to use its show daily to attract advertising in its other publications, in effect, [*1242] using the show daily something like a "loss leader." See, e.g., *Lormar v. Kroger Co.*, 1979 Trade Cas. P 62498 (S.D. Ohio 1979). Under Gordon's analysis, before Interface entered the show daily business Gordon had a monopoly position and could have charged very high advertising rates. Yet, even at that time Gordon charged less than the prevailing market rates. Therefore, a comparison between the rates charged by Interface and Gordon for show daily advertising does not demonstrate that Interface is earning monopoly profits.

Gordon's second Section 2 theory is based on the "essential facility doctrine" or "bottleneck analysis" outlined by the Supreme Court in *Otter Tail Power Co. v. United States*, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973) and anticipated by our Court of Appeals twenty-one years earlier in *Gamco, Inc. v. Providence Fruit & Produce Bldg., Inc.*, 194 F.2d 484 (1st Cir. 1952). HN4 [↑] As a general rule, a company has the unfettered right to deal with whom it pleases and to refuse to deal with whom it pleases, so long as the determination is made unilaterally. *Byars v. Bluff City News Co., Inc.*, 609 F.2d 843, 854 (6th Cir. 1979); *Associated Press v. United States*, 326 U.S. 1, 14-15, 89 L. Ed. 2013, 65 S. Ct. 1416 (1945); *United States v. Colgate & Co.*, 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 (1919). Courts must not yield to the "long resisted temptation to create a federal common law of unfair competition." *George R. Whitten, Jr., Inc. v. Paddock Pool Bldrs., Inc.*, 508 F.2d 547, 560 (1st Cir. 1974) (citation omitted), cert. denied, 421 U.S. 1004, 44 L. Ed. 2d 673, 95 S. Ct. 2407 (1975). "The purpose of the Sherman Act . . . is not to maintain friendly business relations among firms in the same industry nor was it designed to keep these firms happy and gleeful." *Berkey Photo, Inc. v. Eastman Kodak Co.*, 603 F.2d 263, 291 (2d Cir. 1979), cert. denied, 444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980) (citation omitted).

In some circumstances, however, under the *Otter Tail* case, [**22] a monopolist who controls a facility, access to which is essential for a competitor to enter a market, may be under a duty to make the facility accessible. When an essential facility exists, the firm that controls the facility can block access to the market by excluding competitors. See generally Note, Refusals to Deal by Vertically Integrated Monopolists, 87 Harv. L. Rev. 1720, 1740-1752 (1974).

Gordon has not demonstrated a likelihood of prevailing on this theory for two reasons. First, Gordon has not made a sufficient showing that Interface has monopoly power in the computer trade show industry. *The Sizzle Sheet*, a computer publication, identifies approximately 200 computer and computer-related trade shows scheduled for 1983 in its "1983 Information Trade Show Calendar." Gordon contends that Comdex shows are "unique" dealer-to-dealer shows, unlike all the other computer trade shows. However, examination of *The Sizzle Sheet's* calendar demonstrates that while the Comdex shows may be the largest, there are approximately one hundred other computer trade shows which are attended by ISO's, OEM's, and other dealers. There is significant evidence that the trade show industry [**23] in general is growing extremely quickly and computer-related shows are the fastest-growing segment. While Gordon's experts may prove to be correct that there are some economies of scale in the computer trade show market, there is also evidence that there are diseconomies of scale and if a show tries to grow too large it may lose some business. See P. Alker, For Convergent, Comdex is Too Big to Be Effective, in Computer System News 91 (March 14, 1983) (Exhibit E to Affidavit of Sheldon G. Adelson). A survey conducted by Gordon's own *Computer Dealer* magazine found that only 44.1% of the dealers responding attended Comdex shows, 61.2% attend the NCC show, 15.5% attend the NOMDA show, and 44.9% attend other shows (Exhibit F to Affidavit of Sheldon G. Adelson). Therefore, a sufficient showing of Interface's monopoly power has not been presented.

In addition, there has not yet been a sufficient showing that the Comdex show is an "essential facility" for a firm in the business of selling advertising space in computer [*1243] trade publications. In my view, this is not the same type of case as those relied upon by Gordon. In *United States v. Terminal R.R. Assoc. of St. Louis*, 224

U.S. 383, 393, 56 L. Ed. 810, 32 S. Ct. 507 (1912), the defendant railroads gained control of all railroad switching facilities in St. Louis "to obtain the control of every feasible means of railroad access to St. Louis." Despite Professor Cady's characterization of Comdex as a "market maker" or a computer "exchange," excluding a publisher of computer trade magazines from a Comdex show is not the same as excluding a securities broker-dealer from access to the New York Stock Exchange as in Silver v. New York Stock Exchange, 373 U.S. 341, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963). Similarly, this is not a case like Gamco Inc. v. Providence Fruit & Produce Bldg., Inc., 194 F.2d 484 (1st Cir. 1952), in which the defendants excluded the plaintiff, a Providence, Rhode Island buyer and reseller of produce, from access to the Providence produce building. The produce building was adjacent to the Providence Railroad Station's main freight lines and all local produce trade was centered in the building. The Court of Appeals in that case found that to exclude Gamco from the Produce Building would effectively exclude him from the Providence produce market. In this case, given [**25] that there are many other shows and Interface does not control access to the market, Gordon has not made a sufficient showing that the essential facility doctrine is applicable.

Gordon's final two Section 2 theories, that Interface leveraged monopoly power in one market to foreclose competition in another and that exclusion of Gordon was an effort by Interface to abuse or extend its monopoly power, both require a showing that Interface has monopoly power or is likely to obtain monopoly power in the computer trade show market. See, e.g., United States v. Griffith, 334 U.S. 100, 105-108, 92 L. Ed. 1236, 68 S. Ct. 941 (1948); Gamco, 194 F.2d at 486-487; Berkey Photo, 603 F.2d at 275; Home Placement, 682 F.2d at 281. Because it is my view that Gordon is not likely to be able to establish that Interface possessed or will possess such monopoly power, I do not believe Gordon is likely to prevail on the merits under either of these theories.

With respect to Gordon's antitrust claims under state law, I reach the same result: Gordon is not likely to prevail on the merits. As Gordon points out, HN5 [↑] the Massachusetts unfair competition act is to be construed consistently with the [**26] interpretations given by federal courts and the Federal Trade Commission in construing § 5(a)(1) of the Federal Trade Commission Act. See M.G.L. c. 93A, § 2(b). The Federal Trade Commission Act is somewhat broader than the Sherman Act and the Supreme Court has said that the Federal Trade Commission Act prohibits incipient violations of the Sherman Act and the Clayton Act as well as some practices which violate neither the letter nor the spirit of the antitrust laws. See FTC v. Sperry & Hutchinson Co., 405 U.S. 233, 239, 31 L. Ed. 2d 170, 92 S. Ct. 898 (1972). However, to violate the Federal Trade Commission Act or the Massachusetts statute, a practice must be unfair, immoral, oppressive, unethical, unscrupulous, or cause substantial injury to consumers or competitors. See PMP Associates, Inc. v. Globe Newspaper Co., 366 Mass. 593, 321 N.E.2d 915 (1975); FTC v. Sperry Hutchinson Co., supra.

Gordon has not made a sufficient showing that the state antitrust laws should be interpreted to prohibit unilateral refusals to deal by non-monopolists. The Massachusetts Supreme Judicial Court, in one of the principal cases relied upon by Gordon, stated:

Although [**27] most of the "refusal to deal: cases have arisen under the anti-trust acts, the analysis therein is applicable to the instant case. . . . HN6 [↑] "Refusals to sell, without more, do not violate the law." Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 625, 97 L. Ed. 1277, 73 S. Ct. 872 (1953). In each of these cases, the court emphasized that more than a mere refusal to deal would be required to violate the Federal acts. . . . It is the right of one engaged in private business to refuse to deal, or [**1244] discontinue dealing, with anyone, for any reason, unless the dealer combines with others in a concerted effort to hinder free trade.

PMP Associates, Inc. v. Globe Newspaper Co., 366 Mass. at 597 (citations omitted). Compare Auburn News Company, Inc. v. Providence Journal Co., 659 F.2d at 278. Gordon has not shown that Interface's refusal to deal or its decision to replace Gordon's show daily with its own show daily as the exclusive show daily at Comdex shows will affect competition adversely. Similarly, there has been no showing that it was in any sense unfair, immoral, oppressive, unethical or unscrupulous for Interface to refuse to enter into a [**28] contract selling Gordon booth space at upcoming Comdex shows when Interface gave Gordon notice well in advance that its application would

not be accepted. Gordon has not demonstrated that Massachusetts law prohibits such conduct. See also P. Areeda, Antitrust Analysis 832-834 (3d Ed. 1981).

It is therefore my view that Gordon is not likely to prevail on either its state or federal antitrust claims, so preliminary injunctive relief should not be granted. In addition, Gordon has not demonstrated that relief at law would be inadequate. Should Gordon prevail at trial, treble damages, attorneys' fees and costs would be an adequate remedy. Gordon's main argument in support of its contention that damages would be an inadequate remedy is based on Professor Cady's statement that if Gordon loses market share during the pendency of this suit Gordon will lose credibility with its advertisers and will be unable to recover that market share. However, the only reason Gordon gives for this loss of credibility is that the advertisers will see that Gordon is not distributing its show daily at Comdex shows. If this court orders Interface to sell Gordon booth space at future shows, Gordon [**29] will be able to use this court's orders as assurance to advertisers that Gordon will be present at future shows. Therefore, Gordon has not given this court any reason to believe that under the facts of this case it would be difficult for Gordon to regain its market share. Gordon has not shown that it will suffer irreparable injury if the injunction is not granted.

Accordingly, Gordon's motion for preliminary injunction is DENIED.

HN4 Summary Judgment, Opposing Materials

A non-moving party cannot create a genuine issue of fact to defeat summary judgment by presenting inadmissible double hearsay contradicting the admission of its own witness. The very object of summary judgment is to separate real and genuine issues from those that are formal or pretended, so that only the former may subject the moving party to trial.

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN5 Affirmative Defenses, Fraud & Misrepresentation

Under California law, a defendant cannot be liable for fraud by omission unless it had a duty to disclose. A non-contractual duty to disclose only arises if the defendant (1) has a confidential relationship with the plaintiff; (2) made a representation to the plaintiff likely to mislead absent disclosures; or (3) is a party to the sale and knew that the plaintiff did not know and could not reasonable discover the terms of the contact, and those terms are material to the sale. Under certain circumstances active concealment of the terms of a contract could be a basis for fraud by omission.

Torts > Intentional Torts > Abuse of Process > Elements

Torts > Intentional Torts > Malicious Prosecution > General Overview

Torts > ... > Malicious Prosecution > Elements > General Overview

HN16[Complaints, Requirements for Complaint

To establish abuse of process, in contrast to malicious prosecution, a plaintiff need not show favorable termination or lack of probable cause. However, a plaintiff must show both "an ulterior purpose" and a wilful act in the use of the process not proper in the regular course of the proceedings.

Torts > Intentional Torts > Malicious Prosecution > General Overview

HN17[Intentional Torts, Malicious Prosecution

Merely filing a suit for a collateral purpose is not enough to show an improper act in the use of judicial process where a party is entitled to process.

Opinion by: [*1] PATEL

Opinion

ORDER RE CROSS MOTIONS FOR SUMMARY JUDGMENT [April 25, 1983]

I. PBSI's Motion for Summary Judgment against Audio

A. Background

U.S. Audio ("Audio") was a distributor of Philips Business Systems Incorporated's ("PBSI") Norelco office dictation products from July 1, 1964 until June 30, 1981 under a series of four different contracts. Three of these contracts, dated July 1, 1964, August 16, 1966 and June 1, 1978, provided that Audio would be PBSI's exclusive authorized distributor in a territory designated by PBSI. The January 1975 contract, however, appointed Audio an authorized but not exclusive distributor. Other terms of the contracts also varied. Audio's territory changed under the different contracts, although the basic area was Northern California. The 1964 and 1966 agreements were terminable upon 30 days notice by either party; the 1975 agreement was to expire without notice on December 31, 1979; and the 1978 agreement expired without further notice on June 30, 1981. Each contract provided that the written agreement constituted the entire agreement.

Edward Wright and Russell Adamson purchased Audio from its previous owner, William Scott, on April [*2] 1, 1981. Wright had been on Audio's Board of Directors since 1975 and had complete access to its books and records from that time. Adamson became Audio's controller in March, 1980 and had complete access to its books and records from that time.

Upon the expiration of the 1978 contract by its own terms on June 30, 1980, PBSI offered to enter into a new contract with Audio providing for a nonexclusive dealership in those areas where Audio had a direct sales office. PBSI also offered direct sale agreements to dealers who had purchased from Audio while the 1978 agreement was in effect. Thus, in contrast to the prior agreement, the new contract would allow dealers in Audio's former territory

to purchase directly from PBSI. Audio refused to sign the 1981 agreement as offered. Nevertheless, PBSI continued to sell to Audio until September 1981, when Audio's debt for product sold and delivered exceeded \$150,000.

Audio brought suit in state court against PBSI on October 13, 1981, and PBSI removed to this court. Audio's primary claim is that PBSI fraudulently misrepresented and concealed its intention not to renew Audio's distribution agreement on the same or similar terms as the [*3] 1978 contract. In addition, Audio claims PBSI breached implied covenants of good faith and fair dealing under the 1978 and 1981 agreements and tortiously interfered with Audio's prospective business relationship with its dealers. PBSI crossclaimed against Audio for abuse of process, breach of contract and related torts. PBSI also filed a separate suit on June 19, 1982, charging Audio with violations of the Sherman Act, the California Cartwright Act and state common law. PBSI has moved for summary judgment against all of Audio's claims. Audio has moved for summary judgment against PBSI'S antitrust and abuse of process claims only. PBSI's motion is granted. Audio's is granted in part and denied in part.

B. Fraud

HN1 [↑] The elements of fraud in California are (1) misrepresentation; (2) knowledge of falsity; (3) intent and induce reliance; (4) justifiable reliance; and (5) resulting damages. [Seeger v. Odell, 18 Cal.2d 409, 414 \(1941\)](#); [Girard v. Ball, 125 Cal. App. 3d 772, 783 \(1981\)](#). Audio has failed to present evidence creating and disputed issue of material fact as to any of these elements.

1. Affirmative Misrepresentation

Audio claims that PBSI both affirmatively misrepresented [*4] and concealed the planned terms of the new agreement despite a duty to disclose. PBSI has produced competent evidence to the contrary, and Audio has failed to come forward with competent evidence to create a disputed issue of material fact.

In all the deposition extracts, exhibits, affidavits and 84 page opposition filed by Audio, Audio points to only three alleged affirmative misrepresentations by PBSI about the terms of the new contract. The first is an alleged statement in 1980 by defendant Paul Dentone, then Vice President of Marketing for PBSI's dictation products, at a meeting of Norelco dealers at which admittedly no one from Audio was present.¹ Audio's evidence of this statement is inadmissible and hence cannot create a question of fact to defeat summary judgment. Audio presents minutes of the meeting allegedly received by Scott and discussed with Wright, which are not only unauthenticated but also double hearsay. In addition, Audio points to the hearsay testimony of a dealer unrelated to Audio who claims to have been present (although the minutes do not list him as present). There is no claim that he

¹ The minutes of the July 24-25, 1980 meeting of the Independent Norelco Distributors Association, Plaintiff's Exhibit No. 1 to Watkins deposition, state in relevant part:

Presented herein are the highlites (sic) of this meeting by subject category.

NEW CONTRACT:

The present distributors contract expires on June 30, 1981. Before the end of the year Paul [Dentone] will deliver a rough draft of the proposed new contract which will bear the "Evergreen" concept. That is, it will be based on performance and will have no pre-determined expiration date. It continues indefinitely as long as the sales performance for the designated territory remains at quota.

The profit margins will be as good or better under the new contract.

A recent survey report verified the fact that the distributor/dealer method for marketing dictating machines is the only way (sic) to go and therefore, the present Norelco distributors are vital to the success of PBSI. Paul reiterated (Sic) several times that he is personally committed to the success of this business and that the continued relationship with all distributors is essential.

The model 585 will be included under the new contract. But no mention of 196 or 640.

The rough draft of the contract will be in our hands by January 1, 1981, so that we may review it on an association level, with legal council (sic) if necessary, and mutually, make recommendations for change.

communicated his impressions of the meeting to anyone at Audio. [HN2\[\]](#) [*5] Unauthenticated documentary evidence must be ignored. See [*Hamilton v. Keystone Tankship Corp.*, 539 F.2d 684, 686 \(9th Cir. 1976\)](#). Similarly, inadmissible hearsay is not competent under [*Rule 56\(e\), Fed.R.Civ.P. McGuire v. Columbia Broadcasting System*, 399 F.2d 902, 905 \(9th Cir. 1968\)](#). In any case, as discussed below, in light of PBSI's subsequent statements about the need for changes in the marketing system, any duty to correct Dentone's earlier statement was discharged and there was no justifiable reliance on that earlier statement.

[*6] Second, Audio points to Wright's account of his telephone call to defendant Ralph Fiorie, National Sales Manager for PBSI's dictation products, on March 31, 1981, literally on the eve of Wright's purchase of Audio. Wright testified that he had already made the decision to purchase Audio by January. He testified that he telephoned Fiorie the day before the purchase, told him he was ready to purchase the company and asked, in substance, "Is there any reason why I shouldn't buy the company?" and that Fiorie replied "Absolutely not." Wright admits he did not ask Fiorie what the terms of the new contract would be, but only when it would be available. Thus, Wright asked for and received only a general statement of opinion. He did not ask for its basis.[HN3\[\]](#)

Mere expressions of opinion, absent certain exceptional circumstances, are not actionable. See, e.g., [*Pacesetter Homes, Inc. v. Brodkin*, 5 Cal.App.3d 206, 211 \(1970\)](#). Audio has not shown any such exceptional circumstances here. Fiorie's alleged statement did not imply a factual basis and was not expressed as a fact, and there is no evidence that he did not believe it. The only exceptional circumstance arguable applicable would be [*7] PBSI's superior knowledge. However, Fiorie was present at the prior January 1981 meeting with Audio (discussed in more detail below) at which PBSI's President, Hanrahan, warned that Audio's new contract might be different if it continued to sell below quota. Moreover, Fiorie did not know the terms of Wright's purchase of Audio, and Wright did. Finally, although Wright knew that Hanrahan and Dentone, not Fiorie, were the policy makers for PBSI, Wright made no effort to contact anyone at PBSI between the January meeting and the eve of his purchase, and then, when he could not reach Hanrahan or Dentone immediately, he simply called Fiorie. Thus, even if Fiorie's statement were misleading, Wright had no right to rely upon it.

Audio attempts to alter Wright's clear testimony that he did not ask Fiorie about the terms of the contract by introducing Adamson's second-hand account of Wright's report to Adamson about the conversation. [HN4\[\]](#) Audio cannot create a genuine issue of fact to defeat summary judgment by presenting inadmissible double hearsay contradicting the admission of its own witness. "The very object of summary judgment is to separate real and genuine issues from those that [*8] are formal or pretended, so that only the former may subject the moving party to trial." [*Radobenko v. Automated Equipment Corp.*, 520 F.2d 540, 543-44 \(9th Cir. 1975\)](#). See also *Mesirow v. Pepperidge Farm, Inc.*, No. 81-3371, slip op. at 352 (9th Cir. Jan. 25, 1983).

There is one other affirmative statement by PBSI which Audio claims was misleading and lulled Audio into expecting the terms of the new contract to be roughly the same as the old one: a letter dated May 1, 1981 from Hanrahan to all PBSI Distributors. This letter postdated Wright's and Adamson's April 1, 1981 purchase of Audio, so they obviously did not rely on it as to the purchase. The only conceivable relevance would be to Audio's claim that it hired an additional salesperson in anticipation that PBSI would not change its marketing system, although Audio does not argue that he was hired exclusively to sell Philips products or in fact did so. In any case, the letter does not promise the continuation of the status quo; to the contrary, it states that PBSI is considering several innovative marketing alternatives. Although the letter states that PBSI expects the distributors to continue as part of the marketing program, [*9] this statement was not false. PBSI offered distributors the opportunity to continue to purchase from PBSI at a volume discount which would enable them to compete for dealer sales.

2. Concealment

Audio also argues that PBSI deceived it by concealing the terms of the new contract. Yet Wright and Adamson knew that the 1978 contract was going to expire four months after their purchase without any requirement that PBSI provide notice about the terms of any succeeding contract, or indeed any right to renew at all. Moreover, the contract expressly provided that its terms could not be varied by oral statements. Therefore, it is difficult to see how the terms could be modified by silence.

Moreover, even if the court looks beyond the contact itself, no factors are present which would impose a duty upon PBSI to disclose the terms of the new contract. [HN5↑](#) Under California law, PBSI cannot be liable for fraud by omission unless it had a duty to disclose. [Goodman v. Kennedy, 18 C.3d 335, 346 \(1976\)](#). A noncontractual duty to disclose only arises if PBSI (1) had a confidential relationship with Audio; (2) made a representation to Audio likely to mislead absent disclosures; or (3) was a [*10] party to the sale and knew that Audio did not know and could not reasonable discover the terms of the new contact, and those terms were material to the sale. Under certain circumstances active concealment of the terms of the new contract could be a basis for fraud by omission. [18 Cal.3d at 346-47](#). Since none of these factors are present here, PBSI had no duty to Audio to disclose the terms of the new contract.

PBSI did not have a confidential relationship with Wright and Adamson, the purchasers of Audio. To the contrary, when Scott asked PBSI to waive the 1978 contract provision against assignment as to Wright, PBSI did not know Wright and only agreed on condition that Scott -- the known entity -- remain "active" in the business. Also, as discussed above, PBSI did not make any affirmative statements of fact that were misleading absent further disclosures.

Audio argues that PBSI actively concealed the terms of the new contract. The undisputed competent evidence is to the contrary. It shows that PBSI discussed with Audio and other distributors the need for some kind of marketing changes because PBSI's sales and market share had declined dramatically. In January 1981, Hanrahan, [*11] Fiorie and Watkins (PBSI's regional sales manager) met with Scott and Wright as part of a series of meetings set up by PBSI with its distributors to explain the need for improved sales. Several important facts about the meeting with Audio are beyond dispute. First, Hanrahan conveyed that he was very upset about business, and showed Scott and Wright charts and data about PBSI's declining sales and Audio's failure to meet its quota. Second, neither Scott nor Wright asked generally what PBSI intended to do about the poor business situation or specifically whether the new contract would reflect any changes in the marketing system. The only question they asked about the new contract was when they would get a copy, and the answer was "shortly". Third, Hanrahan told them that PBSI had to have the same opportunity to sell to "customers" as its distributors had. Although Audio argues that "customers" does not include "dealers," Audio presented no evidence to counter the plain meaning that it does.

The competent evidence also shows that Hanrahan discussed the need to make marketing changes, although Audio tries to manufacture a conflict of fact out of self-serving statements by Wright [*12] and Scott which are contradicted by both their own testimony and each other's. At his deposition, Scott initially testified that Hanrahan did not discuss the need to make marketing changes to offset declining sales. However, Scott also specifically stated that he believed based on the meeting that PBSI might sell to some dealers directly, although he added that Audio would be excepted from this change if it filled its sales quota. Similarly, Wright admitted that Hanrahan told him PBSI might go out of business unless it changed its marketing system. Audio attempts to counter this admission with Wright's qualification that the change would not apply to Audio "because Audio was doing a good job." Yet Wright admitted that Hanrahan discussed the fact that Audio's sales were below quota at the meeting, and the undisputed competent evidence shows that Audio's sales were poor. Thus, Wright's [HN6↑](#) unsupported, self-serving statement that Audio would be exempted from any marketing change is not competent evidence that can defeat summary judgment. See [Radobenko, 520 F.2d at 543-44](#); Mesirow at 352; cf. [Comfort Trane Air Conditioning Co. v. Trane Co., 592 F.2d 1373, 1383 \(5th Cir. 1979\)](#) (upholding [*13] directed verdict on the ground that "[u]nsupported, self-serving testimony is not substantial evidence sufficient to create a jury question").²

² Wright also stated in his deposition: "I was kind of in shock because of the way the Mr. Hanrahan and Mr. Fiorie were acting, and I think that any game plan that we went in that room with was set aside by their actions" in response to the question: "Were you interested in questions like [what marketing ideas Hanrahan had to remain profitable]?" Wright admitted that he already intended to buy Audio when he first came into the meeting. PBSI argues that this statement constitutes a clear admission that he changed his mind about buying the company. However, the meaning of "game plan" is ambiguous. Wright could have been referring to his plans for the meeting. Thus, even ignoring Wright's subsequent declaration purporting to explain what he meant, which is not competent evidence, Mesirow at 352, Wright's statement is not dispositive.

There is also undisputed evidence that Hanrahan held similar discussions with other distributors in January 1981 about the possibility of direct sales to dealers. Although PBSI told the distributors [*14] to keep the meetings confidential, they admitted in depositions that they had no reason not to tell Wright about these discussions if he had inquired, but that even though he did talk with some of them about the meetings, he did not inquire. There is also undisputed evidence that when other distributors did ask Hanrahan in March 1981 and May 1981 about the terms of the new contract, Hanrahan told them that it would be "evergreen," i.e., not terminable except for cause, and "non-exclusive."

Finally, Audio argues that in response to several requests for copies of the new contract, PBSI stated that it was not yet printed in order to avoid disclosing the terms. However, the undisputed evidence shows that Audio never asked about the terms.

3. Intent to Defraud

Audio has also failed to raise any question of fact that PBSI intended to defraud Audio, another requirement for fraud. [HN7](#) Where there is no misrepresentation, there is no scienter. *Girard v. Ball*, 125 Cal.App.3d 772, 784 (1981). Moreover, Audio's claim is that PBSI defrauded it by inducing Wright and Adamson to purchase Audio, which they would not have done had they known the terms of the new contract. Yet Audio produced [*15] no direct or indirect evidence that PBSI had any such intent to induce reliance. PBSI had no interest in their purchasing Audio at all, much less that they purchase it prior to the presentation of the new contract. Indeed, PBSI required Scott, a known entity, to remain active in the firm after the sale because it knew nothing about Wright. The only possible motive PBSI could have had to conceal the terms of the new contract would be to ensure that Audio hired an additional salesperson before the new contract was available. Yet Audio has not produced any evidence that PBSI even knew of these plans, much less intended to induce them.

4. Reliance

Audio also failed to present any competent evidence of reliance on PBSI's alleged concealment of the terms of the new contract, much less of reasonable reliance. Adamson admitted in his deposition that he relied solely upon Wright in deciding to purchase Audio. As controller of Audio, he had full access to Audio's records. These records include letters from Scott to PBSI voicing concern about the absence of renewal provisions and other protections against marketing changes in prior contracts. Yet Adamson admitted at his deposition [*16] that he never looked at the records. His subsequent declaration claiming reliance on PBSI creates only a sham issue and should be ignored. *Radobenko v. Automated Equipment Corp*, 520 F.2d at 543-4; Mesirow at 352.

Wright also could not have relied on PBSI's alleged silence about the terms of the new contract in deciding to purchase Audio on April 1, 1981, because he knew that the old contract was set to expire without further notice or any renewal provision on July 1, 1981, and knew that he had not seen the new contract. Moreover, at the January 1981 meeting, PBSI told him that there was a possibility of marketing changes if Audio continued its poor performance. Wright also had access to all of Audio's records. At most, he and Scott "speculate[d]" about the new contract. Speculation, of course, is not competent evidence, any more than it is reasonable reliance.

Audio's theories of reliance are confused. Audio argues in its opposition that Scott and Wright believed, based on their knowledge that PBSI had in the past temporarily and without success taken away part of Audio's territory to try to increase sales and add new dealers, that PBSI would not try to do so again. [*17] Obviously, this is not reliance on PBSI but a calculated risk which did not pay off. Second, Audio argues that the reason Wright and Adamson purchased on April 1, 1981, prior to seeing the new contract was the availability of financing at that time. This, too, clearly is not reliance on PBSI. If the terms of the new contract had been an important factor in their purchase, they could have waited three months. Scott testified that he was in no hurry to complete the sale and would have allowed them to delay their purchase.

Finally, several cases cited by Audio lack relevance here because they involved unsophisticated plaintiffs and sophisticated defendants. For example, in *Brady v. Carman*, 179 Cal.App.2d 63 (1960), plaintiffs purchased real estate subject to an easement without knowing what an easement was based on the salesman's inaccurate

explanation in response to their direct question. By contrast, Wright and Adamson were knowledgeable and experienced businessmen. Indeed, they had some particularly relevant experience. Both worked for Playtex while it changed the marketing system of a business sold to it by Wright from one of marketing exclusively through wholesalers to [*18] one of direct sales. Wright admitted that companies constantly change their marketing strategies in this manner.

5. Damages

Audio also did not present any evidence that it was damaged by PBSI's change in marketing system, much less PBSI's alleged concealment of its plans to do so. Audio's tax returns show that its profits increased after July 1, 1981, the date the new contract was offered, whereas its profits had declined during the previous two years under the old contract. Audio did not respond with evidence sufficient to create a material issue of fact as to damages. Adamson's declaration presents incomplete profit and loss data from financial statements which he claims are more accurate than the tax returns. Yet the financial statement data show essentially the same pattern:

Ca	+\$24,900
len	
der	
ye	
ar	
19	
82	
FY	-\$79,500
81	
(en	
din	
g	
6/3	
0/8	
1	
FY	+\$ 6,800
80	

Moreover, Audio presented no evidence of causation. Adamson's self-serving, unsupported and conclusory statement that Audio's dealer sales fell after the new contract was offered is insufficient as a matter of law to prove damages caused by PBSI's alleged concealment of the terms of its new contract.

[*19] C. Tortious Interference Claim

Audio complains that PBSI interfered with its supposed "right to be free from competition from PBSI in dealing with their [i.e., Audio's] dealer customers." [HN8](#) The elements of a tortious interference claim are (1) a right to or expectancy of a business relationship; (2) knowledge on the part of defendant of that right or expectancy; (3) intentional acts primarily motivated to disrupt the right or expectancy; (4) actual disruption of the right or expectancy; (5) reasonably certain damages proximately caused by the conduct; and (6) absence of the privilege of competition. *Buckaloo v. Johnson*, 14 Cal.3d 815, 827 (1975); *Lowell v. Mother's Cake & Cookie Co.*, 79 Cal.App.3d 13, 18 (1978); *DeVoto v. Pacific Fidelity Life Insurance Co.*, 618 F.2d 1340, 1347 (9th Cir. 1980).

PBSI has produced uncontradicted evidence showing that none of these elements were present. Most importantly, Audio had no right or expectancy of any exclusive relationship with its previous dealers once the 1978 contract expired. The evidence is undisputed that PBSI did not interfere with Audio's exclusive relationship with its dealers while the contract was in effect, and that PBSI [*20] obtained Audio's customer list by legitimate means. Audio voluntarily turned over the list to PBSI for use in the General Services Administration catalogue and other legitimate business purposes. Once the contract expired, PBSI could incur no liability to Audio by offering those dealers the opportunity to make direct purchases. The dealers were:

[c]ustomers not things to be owned by anyone. They are the life-stream of trade and commerce; are free to choose for themselves and to be chosen by those whose only motive is to advance their own welfare and to do no harm to others.

A.B.C. Distrib. Co. v. Distillers Distrib. Corp., 154 Cal.App.2d 175, 192 (1957). Moreover, Audio has not presented any evidence to counter PBSI's evidence that its change to direct sales was pro-competitive and hence protected by the privilege of competition.

Institute of Veterinary Pathology, Inc. v. California Health Laboratories, Inc., 116 Cal.App.3d 111 (1981), does not lead to a different conclusion. In that case, plaintiff and defendant had engaged in a joint venture conducting laboratory work and analysis relating to veterinary pathology under an oral contract without a fixed term. The defendant [*21] laboratory owner secretly obtained plaintiff's customer list, terminated the relationship suddenly without notice or good cause, and conducted an advertising blitz to obtain plaintiff's customers. In the words of the court, "[a]ll this was done at a time when [defendant] knew the sudden termination of [plaintiff], without notice, and simultaneous denial of any further lab facilities or services to [plaintiff] would result in its inability to continue its veterinary pathology business unless it could immediately arrange for equivalent lab services, a task virtually impossible in the position it found itself." 116 Cal.App.3d at 127. As a result, plaintiff was forced out of business. Citing the fiduciary implications of the joint venture relationship between plaintiff and defendant, the court found that defendant's conduct constituted "more than a breach of contract" and was not privileged. 116 Cal.App. 3d at 127.

Although Audio argued that the facts of Institute of Veterinary Pathology bear "an incredibly striking resemblance" to their case, this court fails to see the similarity. Audio had prior notice that the contract would expire on a set date; PBSI did not surreptitiously [*22] obtain Audio's customer list; PBSI did not breach any contract with Audio; and PBSI had no expectation that competition would force Audio out of the dictation business, as indeed it did not. Moreover, PBSI and Audio were not in a fiduciary relationship. Finally, PBSI's abolition of exclusive territories was privileged because it enhanced competition.

D. Implied Covenants of Good Faith and Fair Dealing

1. The 1978 Agreement

Audio claims that PBSI "breached their agreement with plaintiffs by willfully deceiving them to alter their position to their injury." This claim fails for the same reasons Audio's fraud claim failed. In addition, HN9 absent compelling public policy reasons not present here, California law will not imply covenants which contravene the express term of the contract. See, e.g., A.B.C. Distrib. Corp., 154 Cal.App.2d at 183-85. Where, as here, the written contract provides an express expiration date and sets forth no obligation to renew or notify distributors of the terms of the new contract, if any, the court will not imply any such requirement.

2. The 1981 Agreement

Audio also claims that PBSI breached express and implied covenants of good faith and fair [*23] dealing in the 1981 Agreement. This contention is wholly frivolous. Both Wright and Anderson admit that they did not sign the contract offered to them by PBSI but instead altered its terms by interlineations, returned it to PBSI and never received any acceptance by PBSI. Elementary principles of contract law teach that HN10 acceptance of an offer must be unqualified to create a contract. Audio merely made a counteroffer which was never accepted. As PBSI had no duty to respond, its silence in the face of a counteroffer could not constitute acceptance.

Audio also complains that PBSI agreed to continue dealing with Audio after the 1978 agreement expired, but changed its credit terms and then cut off shipments after Audio's admitted failure to pay its account exceeding \$150,000. This contention merits no further discussion.

Finally, Audio complains that PBSI's reduction of its prices after the 1978 contract expired reduced the value of Audio's inventory. The 1978 contract clearly contemplated that PBSI could change its prices at will. After its expiration, PBSI's freedom to reduce prices was hardly any less. A rule of law implying such a restriction would be

highly detrimental [*24] to competition and consumers, and there is no authority to support one. Finally, Audio admitted that its excessive inventory problem was of its own making.

Because of Audio's failure to raise any disputed issues of material fact as to any of its claims against PBSI, summary judgment is granted for defendant on Audio's claims.

II. Audio's Motion for Summary Judgment against PBSI

A. Antitrust Claims

PBSI charges that Audio engaged in a horizontal conspiracy to divide the market for dictation products, to fix prices, boycott and refuse to deal with PBSI in violation of § 1 of the Sherman Act, and attempted to monopolize the dictation market in violation of § 2. In addition, PBSI charges Audio with violating the California Cartwright Act based on the same alleged anticompetitive conduct. In essence, PBSI claims that Audio and unnamed co-conspirators, who are other former PBSI distributors and their trade associations, conspired to restore exclusive territories for wholesale distribution of Norelco, PBSI's dictation productline, after the 1978 contract expired in order to reduce competition and maintain prices artificially high. PBSI claims that Audio agreed to (1) withhold [*25] money owed to PBSI to coerce it to alter the 1981 contract to restore exclusive territories; (2) institute sham lawsuits for the same purpose; (3) interfere with PBSI's attempt to appoint competing dealers in the formerly exclusive territories; (4) pressure trade associations to encourage dealers not to deal with PBSI except on the horizontally-agreed terms of exclusive territories; and (5) encourage dealers of Norelco to switch to competing products marketed through exclusive territories. Audio moved for summary judgment based on insufficient evidence of conspiracy under § 1 and absence of proof of relevant market and dangerous probability of monopolization under § 2. In addition, Audio asserts the defenses of Noerr-Pennington³ and in pari delicto.⁴

1. § 1 Violations

HN11 [+] PBSI may rely on circumstantial evidence of conspiracy because conspiracies can rarely [*26] be proven directly. E.G., *Blair Foods, Inc. v. Ranchers Cotton Oil*, 610 F.2d 665, 671 (9th Cir. 1980). Moreover, PBSI need not prove express agreement; the agreement may be tacit. E.g., *C-O-Two Fire Equipment Co. v. United States*, 197 F.2d 489 (9th Cir.), cert. denied, 344 U.S. 892 (1952). Once PBSI creates a material issue of fact as to the existence of a conspiracy to restrain trade, it need produce only slight evidence to show that Audio was a member of the conspiracy. E.G., *United States v. Cadillac Overall Supply Co.*, 568 F.2d 1078, 1087 (5th Cir. 1978). PBSI has met its burden here, as the following brief summary of the facts which can fairly be inferred from the evidence shows.

(a) The Evidence

PBSI has introduced substantial evidence that Wright, Kilpatrick (a PBSI distributor located in Texas) and other Norelco distributors opposed the new 1981 agreement because it took away protected territories and portended increased competition. Audio admits in its papers that the distributors shared the common goal of returning to the status quo ante of exclusive territories. There is also evidence that the distributors, including Audio, met, agreed upon and took concerted action [*27] to achieve this goal.

Wright, Adamson, Kilpatrick and other members of the Independent Norelco Dealers Association ("INDA") participated in three meetings in Las Vegas in late July 1981. The first meeting was composed of distributors of Norcom, a dictation product which competes with Norelco and, according to Wright, sells at list price because it is marketed through exclusive territories. Wright addressed the meeting and suggested that dealers show Norcom products to purchasers interested in Norelco. In light of the other evidence discussed below, PBSI has raised an

³ *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127 (1961); *United Mineworkers v. Pennington*, 381 U.S. 657 (1965).

⁴ Audio also argued that PBSI improperly asserted claims of intra-enterprise conspiracy against it, but PBSI conceded at oral argument that it made no such claim.

issue of fact whether Wright did so as part of an anticompetitive agreement to convert customers to Norelco, rather than as legitimate competitive conduct.

More importantly, PBSI has presented evidence of a second meeting at which INDA members discussed their dissatisfaction with the 1981 agreement and an attorney outlined tactics to combat the agreement. There is evidence that three methods of putting pressure on PBSI to alter the agreement were discussed: (1) withholding money owed to PBSI; (2) refusing to sign the 1981 Agreement; and (3) bringing individual law suits. A vote was taken on who would sue PBSI, [*28] with 15 members including Wright voting to sue. There may also have been a vote on whether to sign the 1981 contract. Wright and others admitted discussing withholding money from PBSI to coerce it to change the contract, although Wright claimed that the discussion was not serious. Wright and at least three others did withhold money, although they apparently also owed money before the meeting. After the meeting, INDA members elected Kilpatrick as their spokesperson.

At the third meeting, distributors met with Gordon Adams, Chair of the Manufacturer-Dealer Relations Committee of the National Office Machine Dealers Association ("NOMDA"), a trade association, and a NOMDA attorney. NOMDA had previously approved PBSI's 1981 agreement at PBSI's request. NOMDA approval influences whether dealers will sign an agreement. At the meeting, distributors complained that they wanted the exclusive territory marketing system restored. There is evidence that Adams agreed to pressure PBSI and give it unfavorable publicity. After the meeting, one member wrote dealers that NOMDA would withdraw its approval. From the evidence concerning these two meetings, it is reasonable to infer that former [*29] PBSI distributors and Adams agreed to pressure PBSI to reinstitute exclusive distributorships.

After the Las Vegas NOMDA meeting, telephone transcripts show that Adams spoke several times with Kilpatrick about Adams' actions with respect to the PBSI contract, culminating in Adams' recommendation to NOMDA's President that NOMDA withdraw its approval of the contract. Yet as late as August 1, 1981, Adams admitted that the new contract conformed to all of NOMDA's requirements for approval and that distributors objected to it because of the lack of exclusive territories. PBSI has also presented evidence that Kilpatrick told Adams that distributors were considering suing Adams and NOMDA for its approval of the contract and that one distributor raised the possibility of such a suit to Adams directly. Adams stated that he did not perceive these communications as threats. But the statements themselves and Adams' letter to NOMDA's President, mentioning the possibility of such suits and recommending withdrawal, create a disputed issue of fact as to whether NOMDA withdrew its approval as a result of pressure by distributors. Furthermore, when Adams read the letter recommending withdrawal [*30] to Kilpatrick, he made a comment about it that could be interpreted as admitting that NOMDA had no valid reason for withdrawing its approval. Kilpatrick told Adams that withdrawal of approval would lead PBSI to change the contract.

On December 23, 1981, NOMDA did withdraw its approval of the PBSI 1981 contract, and publicized the withdrawal. The withdrawal of prior NOMDA approval was unprecedented. Subsequently, in response to a letter from Kilpatrick, Adams acknowledged that Wright's problems in San Francisco included "[p]rice deterioration." In addition, in fall 1981 or early winter 1982, former PBSI distributors met in Atlanta and discussed litigation against PBSI. Some offered to share documents, and at least one distributor felt pressured by the others to sue. Thus, a question of fact exists whether the meeting was merely for informational purposes or was part of an antitrust conspiracy.

In March 1982, PBSI offered the 1981 dealer agreement to Trend, a San Francisco dealer whom it considered to be the strongest prospective seller of Norelco in the area. Audio sent a letter to Trend which claimed that Trend's employees had falsely disparaged Audio by stating that [*31] Audio was not an authorized Norelco dealer and was unable properly to service Norelco products. The letter threatened litigation unless Trend retracted. Although Audio never signed the 1981 contract with PBSI, it is undisputed that Audio continued to hold itself out as an "authorized" Norelco dealer for Northern California based on Kilpatrick's purported appointment of it to that position. Audio argues that a disputed question of fact exists as to whether Kilpatrick had the authority to appoint Audio as an authorized Norelco dealer. In his deposition, however, Adamson appeared to admit that he knew Kilpatrick did not have such authority. Trend subsequently declined to sign the PBSI agreement and PBSI claims that it lost sales of over \$240,000 as a result. Audio claims that it did not know when it sent the letter that Trend had been offered the contract, but Adamson equivocated in his deposition as to when he learned of the offer. A jury

could reasonably infer that the letter constituted a threat of litigation designed to exclude a potential competitor from what was formerly Audio's exclusive territory.

PBSI entered a dealer agreement with Van's Office Machines in Berkeley [*32] in March 1982. Van Gelder testified at his deposition that Adamson called him shortly thereafter and threatened suit based on vague allegations that Van's employee had disparaged Audio's products. Van Gelder perceived the call as a threat designed to stop him from competing with Audio in sales of Norelco. Audio also sent a letter in June 1982 to Dictation Systems, who had signed a contract with PBSI in March 1982, threatening a lawsuit unless it retracted alleged defamatory statements. There is sufficient evidence to create a material issue of fact whether these threats of litigation were part of a plan to reduce competition.

b. PBSI's § 1 Theories and Audio's Defense

PBSI argues that the evidence discussed above is sufficient to survive summary judgment on four § 1 theories: (1) horizontal conspiracy to divide the market into exclusive territories; (2) horizontal conspiracy to boycott PBSI; (3) concerted refusal to deal; and (4) horizontal conspiracy to fix prices. All are per se violations. *Gough v. Rossmoor Corp.*, 585 F.2d 381, 386 (9th Cir. 1978), cert. denied, 440 U.S. 936 (1979). The court agrees, although it questions in particular whether PBSI can survive a directed [*33] verdict at trial on the price-fixing theory.

PBSI's evidence of the distributors' efforts to pressure PBSI to return to a marketing system based on exclusive territories and to exclude competitors from the formerly authorized territories creates a question of fact whether Audio conspired to divide the market in violation of the Sherman Act. The evidence concerning NOMDA's withdrawal of approval of the 1981 contract also raises a question of fact whether Audio engaged in an illegal boycott. Under the principals of *Fashion Originators' Guild of America, Inc. v. Federal Trade Commission*, 312 U.S. 457 (1941), proof that the distributors exerted group pressure on their trade association to withdraw the service of approval of the PBSI supplier-dealer contract and that such a withdrawal tends to reduce the number of dealers who will sign the contract may establish a boycott in violation of § 1. Similarly, PBSI may establish a concerted refusal to deal based on a collective decision not to sign the 1981 contract in order to force PBSI to return to exclusive territories.

PBSI's theory that Audio conspired with other distributors and trade associations to fix prices is a closer question. [*34] PBSI has shown little more so far than that the distributors' desire to return to exclusive territories may have stemmed in part from a desire to maintain prices above the level they would fall to if competitors sold Norelco in those territories. Because summary judgment is disfavored in antitrust cases, *Poller v. Columbia Broadcasting System*, 368 U.S. 464 (1962), and because of the significant overlap in proof of PBSI's different theories, the court will not now preclude PBSI from proceeding on the price-fixing theory. The court doubts, however, whether PBSI can prevail on this theory unless it presents evidence from which a jury could infer conspiracy to manipulate prices which goes beyond any evidence of a conspiracy to restore exclusive territories. Otherwise, all conspiracies to divide the market into exclusive territories would automatically also be conspiracies to fix prices.

The affirmative defenses asserted by Audio against PBSI's § 1 claims, as well as § 2 claims discussed below, under the Noerr-Pennington⁵ and in pari delicto doctrines do not support summary judgment against PBSI's antitrust claims. Audio argues that under Noerr-Pennington it is immune from antitrust [*35] liability for instituting the present suit against PBSI even if the suit were part of an antitrust conspiracy. However, *HN12*[ Noerr-Pennington does not immunize an otherwise legitimate lawsuit which is part of a larger antitrust conspiracy. *Clipper Express v. Rocky Mountain Motor Tariff*, 674 F.2d 1252, 1273 (9th Cir. 1982). PBSI has raised a question of fact as to whether this was such a lawsuit.

Baseless lawsuits which are a "mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor" are also not immune from antitrust liability. *Noerr*, 365 U.S. 127, 144 (1961). Clipper Express made clear that a single lawsuit instituted without regard to merit and for

⁵ See footnote 3.

anticompetitive purposes rather than the genuine purpose of achieving the judicial relief prayed for in the complaint comes within this "sham" exception. [674 F.2d at 1262-27](#). PBSI introduced sufficient evidence to raise a question of fact whether Audio had such an improper motive. Moreover, Audio's failure to survive a motion for summary judgment, while not conclusive, is further indication of the requisite sham intent. [Clipper Express \[*361 at 1264; Ernest W. Hahn, Inc. v. Codding, 615 F.2d 830, 841 n. 13 \(9th Cir. 1980\)](#).

It appears, however, although it is not entirely clear, that plaintiff must show that defendant abused the judicial process not only by instituting the suit for an unlawful anticompetitive purpose, but also by committing specific acts related to the suit but outside the normal judicial process. [Energy Conservation, Inc. v. Heliodyne, Inc., 698 F.2d 386, 389 \(9th Cir. 1983\); Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342, 138 \(5th Cir. 1980\)](#), cert. denied, 450 U.S. 1030 (1981) (cited by Heliodyne with approval). In Heliodyne, the court held that allegations that defendant instituted a baseless lawsuit to generate adverse publicity about a competitor were sufficient for the claim to come within the sham exception. [698 F.2d at 389](#). In Page, the court held that defendant's use of spurious lawsuits based on false affidavits to delay payment of its debt to its competitor in order to deprive its competitor of funds was not immune under [Noerr-Pennington, 624 F.2d at 1347, 1358](#). As discussed below in reference to PBSI's abuse of process claim, PBSI has not produced evidence of improper [*37] acts by Audio outside the normal judicial process in relation to the lawsuit. However, since this court finds that for purposes of summary judgment PBSI has come within the other exception to Noerr-Pennington, it is not necessary to decide whether PBSI could also come within the sham exception.

Audio also argues that even if it conspired to force PBSI to reinstitute exclusive distributorships, PBSI cannot recover because PBSI itself originally established the exclusive distributorship system. Audio exhibits a basic misunderstanding of **antitrust law**. Even assuming that an *in pari delicto* defense to antitrust liability exists, which Audio admits is a hotly disputed issue, such a defense could not apply here. PBSI's vertical imposition of exclusive territories under prior contracts is subject to a rule of reason analysis, whereas a horizontal conspiracy by distributors to pressure PBSI to impose vertical restraints is a *per se* violation. Compare [United States v. Topco Associates, 405 U.S. 596 \(1972\)](#), with [Consumer Product Safety Comm. v. GTE Sylvania, Inc., 447 U.S. 102 \(1980\)](#). Audio has not even attempted to show that PBSI's prior contracts were not vertically imposed but instead [*38] resulted from horizontal pressure by Audio and other distributors and therefore constituted a *per se* violation. Accordingly, Audio has not raised any question of fact that PBSI itself violated the antitrust laws and is therefore barred from recovering against Audio.

2. § 2 Attempt to Monopolize Claim

Audio also moved for summary judgment on PBSI's claim that Audio attempted to monopolize the market for United States sales of dictation products. [HN13](#) Attempt to monopolize has three elements: "(1) specific intent to control prices or destroy competition in some part of commerce; (2) predatory or anticompetitive conduct directed toward accomplishing the unlawful purpose; and (3) a dangerous probability of success." *General Business Systems v. North American Philips Corp.*, slip op. at 389 (9th Cir. Jan. 28, 1983). The same evidence which enabled PBSI to survive summary judgment on its § 1 *per se* claims supports its § 2 claims. PBSI has raised material issues of fact as to whether Audio engaged in anticompetitive conduct to restrain trade. Specific intent to destroy competition can be inferred from the same conduct. See, e.g., *Mesirow* at 353. [HN14](#)

Evidence of market power is relevant [*39] to intent and to dangerous probability of success. See, e.g., [Blair Foods, Inc. v. Ranchers Cotton Oil, 610 F.2d 665, 669 \(9th Cir. 1980\)](#). PBSI has introduced no evidence of Audio's market share. It acknowledged that PBSI's share of the national dictation products market is well under 50%, with two companies sharing over half the market and approximately ten others including PBSI sharing the rest. Since PBSI products were sold by many distributors and dealers besides Audio, the court may infer that Audio's share of PBSI sales is quite small. Yet PBSI's evidence appears to show at most that Audio attempted to exclude competitors from the market for PBSI dictation products. In appropriate circumstances, [Lessig v. Tidewater Oil Co., 327 F.2d 459 \(9th Cir. 1964\)](#), rehearing denied per curiam, [327 F.2d 478 \(9th Cir. 1964\)](#), cert. denied, 377 U.S. 993 (1964), and its progeny have stated that dangerous probability of success may be inferred from *per se* violations of § 1 which clearly threaten competition without proof of market power. This court is mindful, however, that "[t]he rules of decisions in antitrust cases must not be construed too literally, but should be viewed within the [*40] context of the

particular factual situations presented." [Ernest W. Hahn v. Coddling](#), [615 F.2d at 841](#). This court does not believe that the circumstances in this case support such an inference absent any proof of market power. In view of the policy against granting summary judgment in antitrust cases, the court will permit PBSI to proceed on its § 2 claim. However, the court will explain its view on proof of dangerous probability of success in order to provide guidance for trial.

Lessig itself held only that plaintiff need not prove that defendant held a dominant position in the market where it showed by other evidence that defendant attempted to monopolize "an appreciable segment of interstate sales." [327 F.2d at 475](#) (emphasis added). This suggests that some showing that Audio had the potential to monopolize a significant portion of the market is necessary. PBSI has not suggested any satisfactory method other than showing market power. Moreover, not only has Lessig's position that proof of market power is not necessary to show dangerous probability of success been rejected by the majority of circuits and implicitly by the Supreme Court, see 16B Von Kalinowski, Business Organizations [*41] § 9.01 [3] n.41, and criticized by commentators, see, e.g., P. Areeda and D. Turner, [Antitrust Law](#) 341-43 (1978); but even within the Ninth Circuit itself Lessig has not been uniformly followed. See, e.g., [Cornwell Quality Tools Co. v. C.T.S.C. Co.](#), [446 F.2d 825, 832 \(9th Cir. 1971\)](#), cert denied, [404 U.S. 1049](#) (plaintiff must prove defendant had sufficient market power to come dangerously close to success); [Columbia S.S. Co. v. American Mail Line](#), [510 F.2d 29 \(9th Cir. 1975\)](#), cert. denied, [424 U.S. 969](#) (1976); E. Cooper, Attempts and Monopolization, 72 Mich.L.Rev. 373, 420 (1974) and cases cited therein. Other Ninth Circuit cases have recited the Lessig doctrine but then held on other grounds that plaintiff failed to establish an attempt to monopolize. See, e.g., [Hallmark Industry v. Reynolds Metals Co.](#), [489 F.2d 8 \(1973\)](#); [M.A.P. Oil Co., Inc. v. Texaco, Inc.](#), [691 F.2d 1303 \(9th Cir. 1982\)](#).

The Ninth Circuit has recently recognized the problematic status of the Lessig doctrine: "[w]hether 'dangerous probability of success' must be alleged and proved in an attempt to monopolize claim has been controversial, even within this circuit, since this court's decision in Lessig." [*42] [Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc.](#), [627 F.2d 919, 925 \(9th Cir. 1980\)](#) (citations omitted). The Hunt-Wesson court cautioned that because the purpose of the dangerous probability of success requirement is to assure that the unilateral acts under attack would, if unchecked, result in monopoly power, courts must adopt a "flexible approach toward the "mix" of conduct, actor, and market conditions that make up the offense." [Hunt-Wesson at 925](#). In Hunt-Wesson itself, the court relied on the allegation that defendant possessed a 65% market share as providing the requisite basis for inferring monopoly power in a § 2 claim. [Id. at 926](#). In this case, there has been no comparable showing. Therefore, the court will not mechanically apply Lessig and its progeny to draw an inference of dangerous probability of success which appears unwarranted by the particular facts of this case. Accordingly, at trial PBSI will have to prove that Audio has at least some market power in an appreciable segment of the relevant market. Defendant may, of course, also introduce evidence that market conditions rendered any attempt to monopolize unlikely to succeed. [William Inglis & Sons Baking Co. v. ITT Continental Baking Co.](#), [668 F.2d 1014, 1030 \(9th Cir. 1981\)](#).

3. PBSI's Motion for Reconsideration of the Magistrate's Denial of Its Motion to Compel

PBSI moved to compel Audio and its principals to testify about discussions with attorney Hammond in July 1981 at the Las Vegas meeting and with distributors and their attorneys in Atlanta, Georgia in late fall or winter 1981-82, as well as all other discussions with distributors in the presence of attorneys on the subject of distributor action against PBSI as a result of the 1981 agreement. PBSI argued that these conversations with attorneys were not privileged because they were part of a crime, i.e., an antitrust conspiracy. The Magistrate denied the motion to compel on the ground of insufficient evidence of an antitrust conspiracy.

The Magistrate correctly recognized that if PBSI made a prima facie showing of a per se Sherman Act violation, the attorney-client privilege would not apply under [United States v. Hodge and Zweig](#), [548 F.2d 1347, 1354 \(9th Cir. 1977\)](#) [United States v. King](#), [536 F.Supp. 253, 258-62 \(C.D.Cal. 1982\)](#) and other cases from this circuit. Since the Magistrate's decision, additional evidence has been submitted. [*44] This court has found that there is sufficient evidence of an antitrust conspiracy to withstand summary judgment. Moreover, [HN15](#) it is no longer necessary to provide evidence of improper motive for attorney-client consultation independent of evidence about the consultation itself in order to defeat the privilege. King at 192. Therefore, the evidence by other distributors present at the Las Vegas meeting that the consultations may have been in furtherance of an antitrust conspiracy is sufficient

to compel discovery about that meeting as well as other consultations. Moreover, even if independent evidence were required, PBSI has produced sufficient independent evidence that Audio conspired in violation of the antitrust laws to compel the discovery PBSI seeks. Accordingly, PBSI's motion for reconsideration is granted.

B. Abuse of Process Claim

PBSI cross-claimed against Audio for abuse of process in the suit filed by Audio. PBSI alleged that Audio filed that suit for the collateral purpose of avoiding its debt to PBSI. Although PBSI did not also allege that Audio filed the suit for the collateral purpose of furthering an antitrust conspiracy, the court will construe the pleading [*45] as encompassing that claim to achieve substantial justice. [Fed.R.Civ.P. 8\(f\)](#). Audio is not prejudiced thereby because the same issues arose in the antitrust suit.[HN16](#)[

To establish abuse of process, in contrast to malicious prosecution, plaintiff need not show favorable termination or lack of probable cause. However, plaintiff must show both "an ulterior purpose" and "a wilful act in the use of the process not proper in the regular course of the proceedings". [Barquis v. Merchants Collection Association, 7 Cal.3d 94, 103-04 \(1972\)](#), (citations omitted); Witkin, Summary of California Law, § 263 at 2538-39 (8th Ed. 1974 and 1982 Supplement). PBSI has met the first requirement for purposes of Audio's motion for summary judgment with its evidence from which it could be inferred that Audio filed suit to further an antitrust conspiracy. PBSI presented no evidence, however, from which it could be inferred that Audio filed suit to avoid its debt to PBSI. The sole evidence on that point is the testimony by PBSI's employee that Adamson told him that Audio would not pay its debt to PBSI because Audio had filed a lawsuit. That statement by itself cannot reasonably be construed to mean that [*46] Audio filed the lawsuit for the purpose of improperly avoiding its debt.

PBSI had failed to meet the second requirement. It has provided no evidence that Audio committed any improper act in its use of the judicial process. [HN17](#)[] Merely filing a suit for a collateral purpose is not enough where a party is entitled to process. E.g., [Tellefsen v. Key System Transit Lines, 198 Cal.App.2d 611, 613-14 \(1961\)](#); [Golden v. Dungan, 20 Cal.App.2d 884 \(1951\)](#), the court held that a creditor did not abuse process by properly executing an attachment to collect a debt even though he did so solely for the purpose of destroying the debtor financially. By contrast, in Barquis, the court held that creditors abused process because they committed improper acts by filing suits based on statutorily inadequate pleadings in courts where venue was not proper for the collateral purpose of obtaining default judgments and coercing inequitable settlements. [7 Cal.3d 94](#). PBSI has made no such showing of improper acts by Audio in connection with its lawsuit against PBSI. Therefore, Audio's motion for summary judgment on PBSI's abuse of process claim must be granted.

In accordance with this opinion, IT IS HEREBY ORDERED [*47] THAT PBSI's motion for summary judgment against Audio's claims is GRANTED and Audio's suit is DISMISSED WITH PREJUDICE; Audio's motion for summary judgment against PBSI's antitrust claims is DENIED; Audio's motion for summary judgment against PBSI's abuse of process claim is GRANTED; and PBSI's motion for reconsideration of the magistrate's discovery order is GRANTED.

Order re Clarification of Prior Order

[April 29, 1983]

PATEL, D.J.: The court's April 25, 1983 Order granting defendant Philips Business Systems Incorporated ("PBSI")'s motion for summary judgment against U.S. Audio's claims did not expressly state that the Order also granted the parallel motions of co-defendants North American Philips Corporation, parent corporation of PBSI, and individuals Arthur Hanrahan, Ralph J. Fiorie, Paul Dentone and Joseph DeVito, employees of PBSI. This order clarifies that the ruling granting summary judgment with respect to PBSI included those co-defendants.

[**HN1**](#) Antitrust & Trade Law, Regulated Industries

The Unfair Milk Sales Act, Tenn. Code Ann. §§ 52-331 to 52-334, is not a resale price maintenance or "fair trade" statute but is designed to prevent "loss-leader" sales and other unfair sales practices. Among other things it prohibits retailers of milk from selling below a "lawful minimum price," subject to certain exceptions.

Antitrust & Trade Law > Regulated Industries > General Overview

HN5  Antitrust & Trade Law, Regulated Industries

Retailers are prohibited from selling milk below their cost. This cost is defined as the sum of the invoiced cost to the retailer, as shown on the schedules provided by wholesalers and producers, plus 8 percent, representing their presumed cost of doing business in the absence of proof to the contrary.

Antitrust & Trade Law > Regulated Industries > General Overview

HN6  Antitrust & Trade Law, Regulated Industries

The Unfair Milk Sales Act, Tenn. Code Ann. §§ 52-331 to 52-334, does not, either in theory or in practice, permit processors or wholesalers to "fix" or to establish the minimum retail prices charged by any retail grocer. A presumed cost of doing business of 8 percent is added to the wholesale cost filed by the processors with the Tennessee Department of Agriculture, but no retailer is required to sell at that figure if he can establish that his actual costs are less than 8 percent. The retailer, not the wholesaler, has control of that aspect of the pricing.

Antitrust & Trade Law > Regulated Industries > General Overview

HN7  Antitrust & Trade Law, Regulated Industries

Under Tenn. Code Ann. § 52-334(7), any milk product may be sold by a retailer below the price fixed by the Tennessee Department of Agriculture if such sale is made in good faith to meet competition, provided that such prices shall not be cut more than once, nor in any event cut below the price of competition.

Antitrust & Trade Law > Regulated Industries > General Overview

HN21 [blue icon] Consumer Protection, Deceptive & Unfair Trade Practices

The Unfair Milk Sales Act, Tenn. Code Ann. §§ 52-331 to 52-334, is not a price-fixing statute in any sense. It is simply designed to prevent unfair and deceptive trade practices with respect to the advertising and sale of essential farm commodities, milk and milk products.

Antitrust & Trade Law > Regulated Industries > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN22 [blue icon] Antitrust & Trade Law, Regulated Industries

The Unfair Milk Sales Act, Tenn. Code Ann. §§ 52-331 to 52-334, does not involve the Commissioner of the Tennessee Department of Agriculture in determining what is or is not a desirable minimum milk price from the standpoint of the consuming public. That is not its purpose. Neither does he fix a maximum retail price.

Antitrust & Trade Law > Regulated Industries > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

Governments > Police Powers

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

HN23 [blue icon] Antitrust & Trade Law, Regulated Industries

The Unfair Milk Sales Act, Tenn. Code Ann., §§ 52-331 to 52-334, is designed to prevent deceptive advertising and loss-leader sales by the continued advertising and sale of milk below the retailer's cost, that cost being his invoice price plus 8 percent unless he shows otherwise by specific evidence. The Commissioner of the Tennessee Department of Agriculture does in fact actively and continuously supervise this statutory program which was held by the supreme court of Tennessee to be a purpose affected with the public interest and quite properly within the state's police power.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN24 [blue icon] Regulated Practices, Price Fixing & Restraints of Trade

The Unfair Milk Sales Act, Tenn. Code Ann. §§ 52-331 to 52-334, does not demonstrate a passive submission by the state in letting wholesalers or milk processors set retail prices in a monopolistic or anticompetitive fashion.

[Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview](#)

[Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions](#)

[Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview](#)

[Antitrust & Trade Law > Regulated Industries > General Overview](#)

[Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview](#)

[Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview](#)

[**HN25** \[+\] Consumer Protection, False Advertising](#)

The varying rebates which are given to large volume retailers cause presumed lawful statutory minimum prices of different retailers to vary. Since any other retailer can set his retail price to meet any lawful price, the effect of the Unfair Milk Sales Act, Tenn. Code Ann. §§ 52-331 to 52-334, is not to set a uniform price in the market in any sense, but simply to prevent deceptive advertising and sales practices. The Department of Agriculture monitors those practices which are actually followed by the retailers and monitors the price lists submitted by the wholesalers and processors. The role of the state in the administration of this statute is not passive in any sense, in our opinion, nor is the state fostering monopolistic practices, engaging in them itself, or permitting, expressly or impliedly, combinations in restraint of trade.

[Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview](#)

[Constitutional Law > Supremacy Clause > Federal Preemption](#)

[Constitutional Law > Supremacy Clause > General Overview](#)

[**HN26** \[+\] Exemptions & Immunities, Parker State Action Doctrine](#)

In determining whether the Sherman Act preempts a state statute, the court applies principles similar to those which it employs in considering whether any state statute is preempted by a federal statute pursuant to the Supremacy Clause. As in the typical preemption case, the inquiry is whether there exists an irreconcilable conflict between the federal and state regulatory schemes. The existence of a hypothetical or potential conflict is insufficient to warrant the preemption of the state statute. A state regulatory scheme is not preempted by the federal antitrust laws simply because in a hypothetical situation a private party's compliance with the statute might cause him to violate the antitrust laws. A state statute is not preempted by the federal antitrust laws simply because the state scheme might have an anticompetitive effect.

[Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview](#)

[Constitutional Law > Supremacy Clause > General Overview](#)

[**HN27** \[+\] Exemptions & Immunities, Parker State Action Doctrine](#)

A party may successfully enjoin the enforcement of a state statute only if the statute on its face irreconcilably conflicts with federal antitrust policy.

Opinion

[*358] These consolidated cases involve enforcement proceedings under the state "Unfair Milk Sales Act," T.C.A. §§ 52-331 to -334. An evidentiary hearing was held upon application of the Tennessee Department of Agriculture for a preliminary injunction. The injunction was denied. The parties thereafter submitted the record of that hearing along with supplemental materials for disposition of a motion for summary judgment filed by appellees [**2] who attacked the constitutionality of the regulatory statutes. The Chancellor held that the Unfair Milk Sales Act conflicted with the Sherman Antitrust Act, [15 U.S.C. § 1 et seq.](#), and accordingly violated the supremacy clause in Article VI of the United States Constitution. We respectfully disagree and remand for further proceedings.

A. The Present Proceedings

HN1 [+] The Unfair Milk Sales Act, as hereinafter discussed, is not a resale price maintenance or "fair trade" statute but is designed to prevent "loss-leader" sales and other unfair sales practices. Among other things it prohibits retailers of milk from selling below a "lawful minimum price", subject to certain exceptions as hereinafter discussed.

The record reveals that an unstable milk pricing situation had prevailed in the Chattanooga marketing area since 1976. In 1978 an enforcement proceeding was begun by the Commissioner of Agriculture against several of the

retailers involved in this case. They voluntarily agreed to comply with the statute and to cease selling milk below cost. Thereafter in 1978 the Commissioner suspected further violations and caused a conference to be held with several of the principal retailers, **[**3]** including the four parties defendant to one of the present consolidated actions. Subpoenas were issued for several of the retailers. Again voluntary compliance was agreed upon. However, when further violations appeared to have occurred in 1979, the present proceedings were instituted.

B. The Regulatory Statutes

The present milk-pricing statutes were adopted in 1961, replacing earlier statutes enacted in 1955 and in 1957. According to the legislative debates, the earlier statutes were designed primarily to prevent "surplus milk states" from "dumping" their excess milk in Tennessee "in huge quantities," thereby creating a "big monopoly," contrary to the interests of small milk plants and farmers within the state. A Senate sponsor of the 1955 statute stated that such "dumping" was engaged in to obtain a quick profit and to eliminate small companies.

The "Unfair Milk Sales Act" now under consideration replaced the earlier statutes. A House sponsor described it as a bill "to police against monopoly" among large processors and to prevent "subtle forms of price-fixing" among them to the ultimate detriment of the consumer. **HN2**¹ The Act was intended to prevent a conspiracy to sell **[**4]** **[*359]** milk below cost on a sustained basis. If it violates federal antitrust measures, this most certainly was not the intent of its sponsors, according to its legislative history. As stated, the statute is not a "fair trade" or resale price maintenance statute in any sense. Tennessee had such a statute, but it has long since been repealed.¹

HN3¹ Milk wholesalers and distributors subject to the Act are required regularly to file price lists both at wholesale and retail of all items of milk and dairy products sold by them and of all changes in and amendments thereto, these filings to be mailed to the Department at least ten days prior to the effective date thereof. The statute provides:

"Said price list shall be certified as correct by a duly authorized officer if that of a corporation or association or by the owner, a partner or duly authorized manager if that of an enterprise other than a corporation or association." **HN4**¹ T.C.A. § 52-331(2)(c). **HN5**¹

[5]** Retailers are prohibited from selling milk below their cost. This cost is defined as the sum of the invoiced cost to the retailer, as shown on the schedules provided by wholesalers and producers, plus eight percent (8%), representing their presumed cost of doing business in the absence of proof to the contrary.

Presumably the Commissioner and his staff are entitled to rely upon the sworn or certified price lists furnished by the processors and distributors, unless they have other information indicating that these are not correct. It is clear from the testimony of Mr. Kelsey Jones, staff attorney for the Department, that the Department does not accept the filed price lists as conclusive or binding.

Further, the record is clear that **HN6**¹ the statute does not, either in theory or in practice, permit processors or wholesalers to "fix" or to establish the minimum retail prices charged by any retail grocer. A presumed cost of doing business of eight percent is added to the wholesale cost filed by the processors with the Department, but no retailer is required to sell at that figure if he can establish that his actual costs are less than eight percent. The retailer, not the wholesaler, **[**6]** has control of that aspect of the pricing.

Further, **HN7**¹ under T.C.A. § 52-334(7), any milk product may be sold by a retailer below the price fixed by the Department if such sale

". . . is made in good faith to meet competition, provided that such prices shall not be cut more than once, nor in any event cut below the price of competition."

The statutes **HN8**¹ prohibit a number of advertising and sales practices by processors, distributors, and retailers of milk, an essential agricultural commodity. T.C.A. § 52-332. The following section, **HN9**¹ T.C.A. § 52-333,

¹ See T.C.A. §§ 69-201 to -205 (repealed).

contains statutory authorization for the imposition of sanctions, both civil and criminal, against persons who may violate the Act. [HN10](#)[¹] These statutes have been implemented by rather detailed regulations issued by the Department of Agriculture. See [Tennessee Rules and Regulations, Section 0080-3-5-.01](#) to -.03. A number of exemptions from the regulatory statutes are provided. See T.C.A. § 52-334.

C. Decisions Under the Sherman Act

In [Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 \(1943\)](#), the Supreme Court of the United States held [HN11](#)[¹] that state regulatory statutes may limit competition without conflicting [^{**7}] with federal antitrust statutes. That case involved a challenge to a California intra-state raisin market program, and the Court enunciated a "state action" doctrine of antitrust immunity. In holding that the California statute did not violate the Sherman Act, the Court noted that [HN12](#)[¹] federal legislation should never be interpreted as superseding a state's exercise of its sovereign police powers unless the purpose of Congress to do so is clearly manifested. The Sherman Act was found not to manifest any such purpose. The California raisin program was upheld as a proper exercise of the state's police powers for the benefit and protection of the public welfare.

[*360] Parker and subsequent decisions established [HN13](#)[¹] two standards for antitrust immunity for state regulatory schemes. First, the challenged restraint must be "one clearly articulated and affirmatively expressed as state policy"; second, the policy must be "actively supervised" by the state itself. [City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123 \(1978\)](#). See also [California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 63 L. Ed. 2d](#) [^{**8}] 233, 100 S. Ct. 937 (1980). As hereinafter discussed, we find that the Tennessee statutes and regulations here under consideration meet both of these criteria.

The cases principally cited and relied upon by appellees and by the Chancellor below involved a California resale price maintenance or "fair trade" statute, which was wholly different in theory and in practice from the statutes here under consideration. That statute indeed permitted the processor of wine to set the retail price, and variations from that price could only be granted "for good cause" by the administrative agency charged with enforcement. In holding the statute violative of the Sherman Act, the California Supreme Court said:

"We have not been referred to any instance in which the department allowed a retailer to sell below the listed price 'for good cause.'" [Rice v. Alcoholic Beverage Control Appeals Board, 21 Cal. 3d 431, 579 P.2d 476, 483, 146 Cal. Rptr. 585 \(Cal. 1978\)](#).

The entire statutory scheme in California was quite different from the Tennessee statutes involved here. That scheme was also held to violate the Sherman Act by the Supreme Court of the United States in [California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 \(1980\)](#).

In that case, the Supreme Court suggested that the level of state involvement which would have justified immunity from the Sherman Act would have included establishment of prices, review of the reasonableness of prices, or regulation and pointed re-examination of the program.² Each of these levels of involvement is present in the operation of the Unfair Milk Sales Act, as hereinafter discussed, thus meeting the second standard required to protect "anti-competitive activity" from antitrust challenge.

In another case relied upon by appellees, [Cantor v. Detroit Edison Co., 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 \(1976\)](#), the Supreme Court found violative of the Sherman Act the passive approval of a utility tariff by a Michigan administrative agency. In the course of its opinion, however, the Supreme Court said:

² Note, California Retail Liquor Dealers Ass'n. v. Midcal Aluminum Co., Inc. *Limitation on State Action Antitrust Exemption*, 6 J. Corporation L. 681, 690 (1981). See also, *The State Action Exemption in Antitrust From Parker v. Brown to Cantor v. Detroit Edison*, 1977 Duke L.J. 871 (1977).

"Unquestionably [HN14](#)[¹⁵] there are examples of economic regulation in which the very purpose of the government control is to avoid the consequences of unrestrained competition. Agricultural marketing programs, such as that involved in *Parker*, were of that character." [428 U.S. at 595](#).

D. Analysis of the Tennessee Statute and the Present Record

In our opinion the Tennessee regulatory statute involved here meets both of the standards or criteria set by the United States Supreme Court to prevent its conflicting with the Sherman Act.

The Chancellor recognized that the statute clearly articulated and affirmatively expressed a valid state policy, but was of the opinion that that policy was not sufficiently supervised by the state itself. In their briefs in this Court counsel for appellees appear to have conceded that the Tennessee statute is constitutional upon its face, but they attack the validity of its enforcement by the Department of Agriculture, at least during [**11] the period of time covered by this record.

[*361] The Chancellor found that the statute permits milk wholesalers to set retail prices and that the State "cannot vary the privately established minimum prices even if it determines that the prices are contrary to the purpose of the Act."

In our opinion this statement is not borne out by the record or by the provisions of the statute. In sustaining the statute against a due process challenge this Court said:

"The [HN15](#)[¹⁵] Legislature gave the Commissioner broad and general power in order that he could bear the burden of enforcing the Act at the instance of injured parties or on his own volition, in accordance with the duties and responsibilities imposed upon him by the Act." *Hogue v. Kroger Co.*, 213 Tenn. 365, 377, 373 S.W.2d 714, 719 (1963).

The provisions of the statute and of the regulations promulgated thereunder make this abundantly clear.

We have previously alluded to the requirement that milk processors and distributors file certified lists of their wholesale prices and, if they sell at retail, of their retail prices. [HN16](#)[¹⁵] T.C.A. § 52-333 is replete with statutory authorization for the imposition of sanctions, both criminal [**12] and civil, against any person who may violate the Act, whether this be a processor, distributor or a retailer. The statute spells out in great detail actions which may be taken by the Commissioner, including the swearing out of criminal warrants, civil injunctions, complaints to the District Attorney, or the holding of administrative hearings. Among other sanctions which may be imposed by the Commissioner are revocation of plant licenses and registration privileges of violators.

[HN17](#)[¹⁵] The Commissioner initially approves or establishes minimum lawful prices. He has issued detailed regulations which confirm a policy of active enforcement and supervision. All distributors and retailers of milk and milk products covered by the Act are required to retain invoices for a period of ninety days, subject to inspection by the Commissioner or his duly authorized representative. They are required to keep bills of sale, purchase contracts and lease arrangements of equipment used for storing, transporting or selling milk products. Cost records of their operations during the preceding three months are to be maintained. These include invoices, cost of materials, salaries, rebates or discounts, lease [**13] agreements, purchase contracts, depreciation and tax computations.

[HN18](#)[¹⁵] The regulations require separate filings for sales in private label cartons, and lists of customers involved in sales on a store door or a store platform service or plant dock. Any amendment in price schedules must be filed with the Commissioner, including those made for the purpose of meeting competitive prices or lawful competitive conditions. Records concerning changes to meet competition are required to be preserved for a period of one year, together with information and statements detailing the surrounding circumstances. See [Tennessee Rules and Regulations, §§ 0080-3-5-.01](#) to -.03.

It is difficult to conceive that this panoply of civil and criminal sanctions and regulations is not sufficient to "vary" prices which the Commissioner determines to be fixed contrary to the purposes of the regulatory statutes.

There is testimony from an inspector of the Department, Mr. Ansel Harper, to the effect that he simply administers prices fixed by two particular distributors. The Chancellor seized upon this testimony, but we believe that it must be taken in context. It had reference to the Chattanooga situation being **[**14]** considered in this litigation and is testimony from a mere retail inspector, not an official of the Department. Mr. Harper was a retail price inspector whose duties involved checking retail markups and wholesale invoices against filings which he had received from the Commissioner's office. He specifically testified that it was not his responsibility or a part of his employment to determine whether a violation of the statute had or had not occurred. Decisions as to whether a violation was occurring, decisions setting the lawful minimum prices and decisions as to whether to **[*362]** take corrective actions were not made by Harper, but were made by other state officials.

Mr. Harper testified that he did not undertake independent investigations as to whether retail prices were reasonable or justified. He simply stated that if they did not represent eight percent above invoiced cost, he would correspond with Mr. Jones, staff attorney of the Department, and Mr. Jones would make a determination as to what should be done.

At another point in his lengthy testimony Mr. Harper was asked:

"Q. Mr. Harper, is it part of your purpose to see that everybody sells the same kind of **[**15]** milk at the same price?

"A. No. No.

"Q. Well isn't that the practical effect of what you do?

"A. No.

"Q. Don't you try to make that the effect of what you do, Mr. Harper?

"A. No."

It is perfectly clear from the testimony of this witness, taken in context, that he was nothing more than an inspector, and that if he found in the course of checking retail prices against invoices a situation which he felt to be suspicious or contrary to the statutes, he would report this to his superiors for appropriate investigation and action.

The Chancellor stated in his opinion:

"No evidence was offered to establish that the Department of Agriculture has ever made any investigation of any of the prices filed by wholesalers during the 25 years the Act has been in effect."

In our opinion this finding is clearly erroneous. Both Mr. Harper and Mr. Jones testified that as to two of the parties defendant, Kroger and Golden Gallon, sufficient cost figures had not been supplied to the Department of Agriculture. Adequate cost figures had been supplied by the other wholesale suppliers, Flav-O-Rich and Mayfield. The Commissioner found nothing suspicious or unreliable **[**16]** about the latter cost figures, but, being dissatisfied with those supplied by the other two processors, he was causing an investigation to be made into their cost figures and had been contemplating the issuance of administrative subpoenas for that purpose. Both Golden Gallon and Kroger were milk processors and retailers. They therefore had no regular wholesale cost figures to supply to the Department, and the Department had to rely upon their cost for raw milk, transportation costs, cost of containers and the like in order to compile a wholesale cost figure to then be marked up by the statutory eight percent in order to fix a minimum retail price for milk sold by these two processor-retailers. The record shows that the Department was actively supervising the cost figures of these two companies, making inquiries about them and was actively engaged in seeing that the policies embraced in the statute were being carried out -- that is, that there be no deceptive trade practices or sustained sales below cost in order to divert trade or to engage in any of the other practices prohibited by **HN19**  T.C.A. § 52-332. The latter statute prohibits a number of practices both by processors and distributors **[**17]** and by retailers. It is by no means addressed solely to retail pricing.

We have already alluded to the fact that **HN20**  the statute does not permit processors or wholesalers to fix or establish a minimum retail price. No retailer is required to sell at the figure fixed by the Department if he can establish that his actual costs are less. Further, as previously pointed out, T.C.A. § 52-334(7) permits any milk product to be sold below the legal cost price fixed by the Department if it is made in good faith to meet competition.

The voluminous transcript in this case was compiled at a hearing dealing not with the constitutionality of the statutes in question, but with whether a preliminary or temporary injunction should be issued against the four defending retail grocery companies. The Chancellor found that all of them were selling below their cost and were violating the Act in that sense, but he found that they did not make such sales with intent to violate it and found that most of the sales were made for the purpose [*363] of meeting competition under the exception quoted above. The Chancellor held in other proceedings that "milk is milk", regardless of brand name, and that any [**18] retailer could cut his price on any brand to meet a lawful retail price established by any competitor.³ Under that holding of the Chancellor, no wholesaler or processor could possibly fix the price at which its product would be sold at retail, because the retailer might well sell below his projected "cost" (based upon the wholesale figure plus the statutory markup) if his actual costs were less than that computed under the statutory formula or if a retail sale was made in order to meet a lawful competitive price. As stated, therefore, [HN21](#)[] the statute is not a price-fixing one in any sense. It is simply designed to prevent unfair and deceptive trade practices with respect to the advertising and sale of essential farm commodities, milk and milk products.

The Chancellor correctly stated that the statute [HN22](#)[] does not involve the Commissioner in determining [**19] what is or is not a desirable minimum milk price from the standpoint of the consuming public. That is not its purpose. Neither does he fix a maximum retail price. [HN23](#)[] The statute is designed to prevent deceptive advertising and loss-leader sales by the continued advertising and sale of milk below the retailer's cost, that cost being his invoice price plus eight percent unless he shows otherwise by specific evidence. The Commissioner does in fact actively and continuously supervise this statutory program which was held by this Court in *Hogue v. Kroger Co., supra*, to be "a purpose affected with the public interest and quite properly within the State's police power." 213 Tenn. at 372, 373 S.W.2d at 717.

Continuing, the Court said:

"The method adopted by the Legislature to attain this end was to prohibit retailers from selling milk below their cost. This "cost" was defined as the sum of their invoiced price, plus eight per cent of their invoiced price for cost of doing business (the eight per cent being the presumed cost of doing business in absence of proof to the contrary).

"The Act is not for the purpose of guaranteeing to anyone a profit. It is not a price-fixing statute. [**20] Under it, the retailer may set any price he chooses so long as it is above his 'cost'. Its purpose, as set out above, would be defeated if retailers could avoid its limitations directly or indirectly so as to sell at prices effectively below 'cost'." 213 Tenn. at 372, 373 S.W.2d at 717.

It is clear from the testimony of both Mr. Harper and Mr. Jones that the Department does not exercise any control over the pricing of raw milk to the farmer. This is controlled by federal marketing orders, which are expressly recognized by the Tennessee statutes. T.C.A. § 52-331(1)(m). Mr. Jones testified, however, that his Department had definitely undertaken to ascertain actual costs both from Golden Gallon and from Kroger, since they did not file the wholesale price list required by the statute, for the reasons stated above. Mr. Jones testified that he had real reservations about using the eight percent markup figure as retailers' cost in connection with the products of both of these companies. He said that he had no way to ascertain the Kroger cost other than to use the procedures outlined by law, such as by investigation and subpoenas. Kroger apparently purchases its milk in the midwest [**21] and has it shipped into the Chattanooga area.

Describing the actual involvement of the Department of Agriculture in the administration of the present statute, Mr. Jones testified as follows:

"Q. What is your understanding of your involvement insofar as the government is concerned of setting the price of milk?

"A. I administer a law which regulates unfair trade practices in the sale of dairy products to the extent that particular methods of pricing are included as unfair trade practices.

³ Milk is classified and priced according to butterfat content. The Chancellor deemed 3.5 percent butterfat milk of one brand to be equivalent to that of another.

[*364] "Then, I feel that we have an impact on pricing.

"I don't feel that we set it at any point.

"Let me elaborate on that a little more.

"The particular sale -- the most common unfair trade practice which comes to our attention is the sale below cost. And obviously there is a direct impact on price there, because if someone is selling a product at a price which is below their cost, well, then, we feel that it is a violation of the law and take action, some action to correct the problem."

Mr. Jones said that he ordinarily took action against a retailer which he felt was initiating price cuts below cost, and not against others who made cuts for the purpose of meeting competition. [**22] As stated, the transcript of testimony indicates that the four defending retailers in the present case for many months were selling below their cost as computed by the Commissioner from such data as he had. It may be that he was unwise in instituting an enforcement proceeding when he did not have at hand the actual cost of either Kroger or Golden Gallon, since the other defending parties insisted that they cut their prices to meet competition by sales of those competing products. Nevertheless the record indicates that the Department is kept currently aware of price trends in the milk industry, of rising or falling costs of raw milk, containers and other equipment, and that it at all times has current information as to what actual costs should ordinarily be.

HN24 [+] Neither the statute by its terms nor the record in this case, in our opinion, demonstrates a passive submission by the State in letting wholesalers or milk processors set retail prices in a monopolistic or anti-competitive fashion as found by the Chancellor.

The record in this case dealt with one narrow marketing area of the state. It dealt with a market that had been unstable for a period of years because of a variety of factors [**23] shown in the record, including the proximity of competing markets in the neighboring state of Georgia. To conclude from this record that the entire statutory scheme puts the State in the position of fixing prices in a monopolistic fashion, in our opinion, is unjustified. As stated previously, the testimony which was adduced in this regard was taken before a constitutional issue had been formally raised, and was taken on a hearing for a temporary injunction prior to the filing of responsive pleadings by the defending parties. It is therefore not surprising that there is absent from the record a detailed history of the enforcement of the statute in other parts of the state or during other periods than the short time covered by this record.

The finding of the Chancellor that there had not been active supervision by the Department failed to take note of the fact that the Department was in fact investigating the prices filed by both Kroger and Golden Gallon when the present enforcement proceedings were begun. It further ignores the following testimony of Mr. Jones:

"Q. All right, sir. Now, as I understand from Mr. Harper's testimony, your Department does not undertake to [**24] go behind the price filings made by the wholesalers; is that correct? You accept their wholesale price filings at whatever figure they give you.

"A. Well, we generally do, Mr. Smith.

"That is not to say that we will always do that.

"If a price were filed that was inordinately low, it looked suspiciously low, arouse our suspicion, then that would probably be cause for us to try to proceed administratively to look behind that figure.

"But as a general rule, the prices that are filed are routinely in order -- rarely -- well, they have never to me given an indication -- there is always an increase, I guess.

"Q. All right, sir. So, what you do, or what your department does when you get the price filing, you take the rebate, is that correct, which gives you a net price to the retailer?

"A. Yes. The rebate is part of the price filing.

[*365] "Q. All right, sir. And then you take this mathematical figure out of the statute, eight percent in the case of the retailers involved here, and then you take that percentage and add it to the net price to get their minimum retail price; is that correct?

"A. The law allows us to presume eight percent for their [**25] cost of doing business.

"We don't always allow them, but most of the time we do.

"Q. So, for all practical purposes, when you receive from Mayfield and Flav-o-Rich a price filing as to what their wholesale prices are, you effectively, except for doing two mathematical calculations, permit Mayfield and Flav-o-Rich to set the minimum price for their product; is that not correct?

"A. I will have to qualify the answer to that.

"Q. All right, sir.

"A. In the usual sense, that's probably true.

"That would be a Fair Trade Law, obviously, a resale price maintenance arrangement.

"The law is not that, and I believe the Court can come to that conclusion.

"But if there is a lower lawful price on the market, then they can go down to that price regardless of what their costs are.

"So, in that sense, the wholesaler would have no control over the eventual retail price of this commodity.

"Q. All right, sir. But when they do go below that cost, they are taking advantage of the provision in the code that they are selling below cost to meet competition?

A. True.

Q. All right, sir. But what I'm saying is that Mayfield and Flav-o-Rich, effectively, by filing [**26] with you a price, set the minimum price, the minimum cost of milk in this market; is that not right?

"A. I couldn't agree with that, either. I mean, effectively, no. Because we've got -- Golden Gallon here, I'm not at this time prepared to challenge the \$1.69, \$1.49, \$1.29. That may be, and in fact that could be, depending upon the whim of Golden Gallon, if they choose to establish their price there, then other merchants in the market could also go down to that apparently lawful price to meet it."

In further testimony, Mr. Jones stated that the Department did not require retailers to use the eight percent markup over wholesale invoice. He said:

"We don't require them to mark that up. We tell them what, based upon the presumption in the law, the lawful minimum price would be.

"I have always made it clear to them that if they can establish actual cost less than that presumption, that they are welcome to use some figure less than eight percent of the invoice.

"And I have also made it known to them that if there is a competitor in the market who is pricing less than what they are and less than what their wholesale cost is, and lawfully doing so, that they are entitled [**27] to meet him.

"Q. Let me get back to my question first.

"The effect of your application of the laws require retailers, if they follow your orders, to mark up wholesale milk by eight percent; is it not, sir? I'm talking about the practical effect now. Isn't that what they do?

"A. As a practical matter, the eight percent figure probably has some significance, true. But, again, eight percent, if it's standard service -- I don't know -- there may be some merchants in the market who are receiving drop shipment. I'm not sure.

"But in the sense that they are receiving standard service and where they do not care to offer evidence to the contrary, they do use the eight percent, and that's the minimum price over their wholesale invoice."

Mr. Jones testified positively that the practical effect of the administration of the statute by his Department was not to set a [*366] uniform price throughout the market. He said:

"As I have stated to you earlier, there are other factors in the market. They have the right to meet competition which, as you know, in this market is something that is done very frequently.

"And they have the right to acquire milk from a different [**28] source.

"We are not requiring that they acquire their milk from these particular wholesalers; although, you say as a practical matter they do.

"But I couldn't agree that they set the price in the market, no."

Mr. Jones did testify that after his administrative hearing in 1978, retail grocers raised their price above cost and all of them ultimately arrived at the same price. This was action taken by the retailers, however, not by wholesalers or

processors, and came after the Department had called a conference of retailers pursuant to pricing complaints which it had received.

It is clear from the testimony that [HN25](#)[] the varying rebates which are given to large volume retailers cause presumed lawful statutory minimum prices of different retailers to vary. Since any other retailer can set his retail price to meet any lawful price, the effect of the statute is not to set a uniform price in the market in any sense, but simply to prevent deceptive advertising and sales practices. The Department monitors those practices which are actually followed by the retailers and monitors the price lists submitted by the wholesalers and processors. The role of the State in the administration of [\[**29\]](#) this statute is not passive in any sense, in our opinion, nor is the State fostering monopolistic practices, engaging in them itself, or permitting, expressly or impliedly, combinations in restraint of trade.

E. Federal and State Interpretation of Similar Statutes

The involvement of the Commissioner of Agriculture, the state dairy administrator, and their staffs is markedly similar to the powers of the Connecticut Liquor Commission in [*Serlin Wine & Spirit Merchants, Inc., v. Healy, 512 F. Supp. 936 \(D. Conn. 1981\)*](#), and the Alcohol and Tobacco Tax Division of the Maryland State Comptroller's Office in [*George W. Cochran Co. v. Comptroller of the Treasury, Alcohol and Tobacco Tax Division, 292 Md. 3, 437 A.2d 194 \(Md. 1981\)*](#). These cases, which dealt with statutory prohibitions against below-cost selling, upheld unfair sales acts which are similar in design and purpose to the Unfair Milk Sales Act against antitrust challenges. In each case the level of state supervision and enforcement was held to satisfy the second state action requirement for exemption from Sherman Act violation.

Indeed appellees have cited little authority for holding an unfair sales statute, such as [\[**30\]](#) that involved here, violative of federal anti-trust statutes. However, the Commissioner has cited and relies upon [*Baseline Liquors v. Circle K Corp., 129 Ariz. 215, 630 P.2d 38 \(1981\)*](#), in which an Arizona appellate court expressly distinguished between resale price maintenance laws and those designed to prevent "loss-leader" sales or other unfair sales practices. Citing and distinguishing the *Rice* case, *supra*, from California, the Arizona court said:

"The Rice opinion dealt with a fair trade law in California. It found that the law violated the Sherman act and was not protected by the state action exemption to the law. That is not the situation here, since this statute is not a fair trade act, but one which prohibits below-cost sales for the purpose of injuring competition. That there is a difference is manifested by the fact that until 1976, Arizona had *both* a fair trade act *and* an act prohibiting below-cost sales. The former was repealed." [630 P.2d at 45](#).

The Arizona court also noted that the California court had not stricken down "loss-leader" statutes of that state and had indicated that those statutes would be sufficient to achieve fundamental [\[**31\]](#) goals of price maintenance laws without contravening the Sherman Act. Review of the Arizona decision was denied by the Supreme Court of the United States. See [*Skaggs Drug Centers, \[*367\] Inc. v. Baseline Liquors, 454 U.S. 969, 102 S. Ct. 515, 70 L. Ed. 2d 387 \(1981\)*](#).

In the recent case of [*Rice v. Norman Williams Co., 458 U.S. 654, 102 S. Ct. 3294, 73 L. Ed. 2d 1042 \(1982\)*](#), the Supreme Court of the United States sustained certain California liquor statutes against a Sherman Act attack. These statutes required that wholesalers be designated as authorized importers by distillers in order to purchase or accept delivery of the distillers' brands of beverages. While those statutes were quite different from the agricultural commodity regulations involved in the present case, the following statement from the opinion of the Court is instructive:

"In [HN26](#)[] determining whether the Sherman Act preempts a state statute, we apply principles similar to those which we employ in considering whether any state statute is preempted by a federal statute pursuant to the Supremacy Clause. As in the typical preemption case, the inquiry is whether there exists an irreconcilable conflict between [\[**32\]](#) the federal and state regulatory schemes. The existence of a hypothetical or potential conflict is insufficient to warrant the preemption of the state statute. A state regulatory scheme is not preempted by the federal antitrust laws simply because in a hypothetical situation a private party's compliance with the

statute might cause him to violate the antitrust laws. A state statute is not preempted by the federal antitrust laws simply because the state scheme might have an anti-competitive effect. [Citations omitted.]

"A [HN27](#)¹ party may successfully enjoin the enforcement of a state statute only if the statute on its face irreconcilably conflicts with federal antitrust policy." [102 S. Ct. at 3299](#).

F. Our Conclusions

In our opinion [HN28](#)¹ the regulatory statutes involved in this case do not, in theory or in practice, violate any federal antitrust legislation. They fall well within the state police power as recognized by both state and federal decisions, deal with a vital farm commodity and are important in the regulation of the milk industry in this state.

After a lengthy hearing in this case, the Chancellor denied a temporary injunction because he did not find that the violations [\[**33\]](#) of the statute committed by the four defending parties were intentional, and he found that some of their below-cost prices were lawfully fixed in order to meet competition as permitted by the statute. No additional evidence was offered after answers were filed and motion for summary judgment heard. It may be that upon remand he will see fit to deny injunctive relief, but that is a far different thing from striking this statute from the books as conflicting with federal anti-trust legislation. It seems to us to do just the opposite -- that is, to involve the State in preventing deceptive pricing, advertising, and sales practices and to prevent the use of milk and dairy products as loss-leaders in the wholesale and retail business. In this sense it resembles several other state statutes designed to prevent unfair trade practices.⁴

[\[**34\]](#) The judgment of the Chancellor is reversed and this cause is remanded for further proceedings which he may deem appropriate. Costs incident to the appeal are taxed to appellees. All other costs will be assessed by the Chancellor.

Fones, C.J.; Cooper and Drowota, JJ., concur;

Brock, J., files dissenting opinion.

Dissent by: BROCK

Dissent

BROCK, J.

I respectfully dissent from the majority opinion.

On or about May 1, 1979, Ansel Harper, who was employed by the Tennessee Department of Agriculture to monitor retail dairy prices in the Chattanooga/Hamilton [\[*368\]](#) County area, observed that Bruno's was selling milk at prices that violated Tennessee's "Unfair Milk Sales Act," T.C.A., §§ 52-331 -- 52-334. Harper reported Bruno's prices to his superiors in the Department. Bruno's pricing of milk at prices below cost, as computed pursuant to T.C.A. § 52-331(1)(n), resulted in this enforcement action by the Commissioner.

The Chancellor held that the Act conflicted with the Sherman Antitrust Act, [15 U.S.C. § 1](#), and was, therefore, proscribed according to the dictates of the supremacy clause in Article VI of the federal constitution. The case reaches us by direct appeal.

⁴ E.g., T.C.A. §§ 52-335 to -341 (Unfair Frozen Dessert Law); T.C.A. §§ 69-301 to -306 (Unfair Sales Law); T.C.A. §§ 69-401 to -413 (Unfair Cigarette Sales Law); T.C.A. §§ 69-101 to -115 (Unlawful Restraint of Trade and Discrimination); T.C.A. §§ 69-601 to -607 (Unfair Trade Practice and Advertising Act).

The Unfair Milk [**35] Sales Act is an anticompetitive measure first adopted by the legislature in 1955. Ostensibly, the Act was designed to prevent destruction of the small retailer by financially strong competitors who are able to sell below their costs for extended periods of time. *Hogue v. Kroger Co.*, 213 Tenn. 365, 373 S.W.2d 714 (1963). To achieve that end the Act establishes a "lawful minimum price" and makes it unlawful for a retailer to sell milk below this statutory minimum. The method adopted by the legislature to attain this end was to prohibit retailers from selling milk below their cost. This "cost" is defined as the sum of (1) the retailer's invoiced price plus (2) their "cost of doing business" which is presumed to be 8% of the invoiced price, in the absence of proof to the contrary. Wholesalers and producers file price schedules with the Department of Agriculture and the 8% markup is applied to those schedules.

The Sherman Act was enacted in 1890 and declared: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states or with foreign nations is declared to be illegal." The Miller-Tydings Act and the [**36] McGuire Act were enacted by Congress in 1937 and 1952, respectively, for the purpose of permitting "fair trade" contracts and laws which prescribe minimum resale prices for certain goods, and allowing "non-signer" provisions which make minimum resale prices enforceable against a retailer who has not entered into a "fair trade" contract. The Tennessee legislature enacted the Unfair Milk Sales Act in 1955.

In 1975, the U.S. Congress enacted the "Consumer Goods Pricing Act" which effectively repealed Miller-Tydings and McGuire. The result has been a restoration of the Sherman Act's ban on resale price maintenance unless the industry or program enjoys a special antitrust immunity.

In [*Parker v. Brown*, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 \(1943\)](#), the Supreme Court acknowledged that a state may engage in anti-competitive conduct and not run afoul of the Sherman Act. The court's *ratio decidendi* is revealed in its conclusion that, "there is no suggestion of a purpose to restrain state action in the [Sherman] Act's legislative history." [317 U.S. at 351](#). This so-called "state action exemption" is limited, however, to those situations in which a state exercises its legislative [**37] authority in promulgating regulations and in prescribing the conditions of their application. In effect, *Parker* holds that the Sherman Act does not forbid the State itself to fix non-competitive prices, but that a state statute which purports to permit private parties to engage in non-competitive price fixing is in violation of the Sherman Act. The anticompetitive conduct, therefore, requires more than mere state approval before it is granted immunity. [*Cantor v. Detroit Edison Co.*, 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 \(1976\)](#); [*Goldfarb v. Virginia State Bar*, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 \(1975\)](#).

Recently in [*California Retail Liquor Dealers Asso. v. Midcal Aluminum, Inc.*, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 \(1980\)](#), the Supreme Court once again addressed the issue of antitrust immunity, and articulated the following standards based on *Parker v. Brown* and its progeny:

"These decisions establish two standards for antitrust immunity under *Parker v. Brown*. First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' [**369] [**38] by the State itself. [*City of Lafayette v. Louisiana Power & Light Co.*, 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123 \(1978\)](#)." [445 U.S. at 105](#).

The Unfair Milk Sales Act, as interpreted in *Hogue v. Kroger Company*, *supra*, comports with the first standard set forth in *Midcal* requiring that state policy of noncompetition be clearly articulated. The second requirement, active supervision and promotion of that policy by designated state authorities, however, is not present in the Act; and, the evidence reveals that in practice the supervisory activity of the Department of Agriculture is so minimal as to disqualify the Act from the qualified antitrust immunity allowed to the states in *Parker v. Brown*.

The regulatory scheme challenged in *Parker* permitted the organization of local cooperatives to develop marketing policies for the California raisin crop. The program was administered under the auspices of the State Agricultural Prorate Advisory Commission. The Advisory Commission, which was appointed by the Governor, was empowered to disallow the implementation of any cooperative policies if those policies were deemed to be in derogation of the objectives of [**39] the program. Owing to the high degree of direct involvement and supervision by state authorities, the Supreme Court held in *Parker* that the Sherman Act did not apply. In *Midcal* the court was

attempting to further define the parameters of the state action exemption, and referring to the *Parker* decision stated, "Without such (state) oversight, the result could have been different."

The testimony of an employee of the Tennessee Department of Agriculture, whose duties include checking the prices of milk at retail stores, reveals the extent to which the state is involved in administering the Unfair Milk Sales Act. The employee testified as follows:

"Q. I'm talking about the price filings that are made by your department from Mayfield and Flav-o-rich, as to what they are selling at wholesale; you accept those at face value, do you not?

"A. That's right.

"Q. You don't go behind those numbers. So really, all you are doing is you are administering a statute, the minimum prices of which are fixed by Mayfield Dairies and Flav-o-rich, are you not?

"A. That's right."

The activity described above does not rise to the level of state involvement required [**40] to immunize anticompetitive conduct from the strictures of the Sherman Act. Indeed, it more closely resembles the wine pricing scheme that was condemned by the Supreme Court in *Midcal*, the court saying:

"The State simply authorizes price-setting and enforces the prices established by private parties. The State neither establishes nor reviews the reasonableness of the price schedules; nor does it regulate the terms of fair trade contracts. The State does not monitor market conditions or engage in any 'pointed reexamination' of the program. The national policy in favor of competition cannot be thwarted by casting such a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement." [445 U.S. at 105-106](#).

The learned Chancellor analyzed the Tennessee Unfair Milk Sales Act in the context of the affirmative responsibilities that state authorities must undertake to avoid application of the Sherman Act. In a thorough and well reasoned opinion he found as follows:

"Under the terms of the Tennessee Unfair Milk Sales Act, the state has no power to undertake investigations to determine what minimum price will best serve the public interest [**41] and best achieve the purposes of the Act. The state cannot vary the privately established minimum prices even if it determines that the prices are contrary to the purposes of the Act. In fact, the small retailer which the Act purports to protect is placed at a competitive disadvantage by volume discounts [*370] afforded by wholesalers and producers to the large retailers."

This anomaly is the result of rebates included in the price schedules filed by wholesalers. The quoted testimony that follows is that of Mr. Kelsey Jones, staff attorney with the Tennessee Department of Agriculture and administrator of the "milk law," and it demonstrates the effect of these rebates. Mr. Jones testified as follows:

"Q. When you get these wholesale reports that are filed, they are required to be filed is that true, sir?

"A. That's correct.

"Q. And where they file these discounts, rebates, I think they call them -- those rebates are based on volume; is that correct?

"A. Correct.

"Q. So, therefore, the larger the purchaser, the bigger the purchase, the larger the volume of purchase, the cheaper they got the milk; is that true.

"A. Yes.

"Q. And [**42] then, I think, as you answered to Mr. Harris, when it comes to the small Mom and Pop operation, they don't get the discount and therefore their cost is higher, is that correct?

"A. That's correct.

"Q. And I think you indicated their only alternative, other than to sell at what it costs them is to cut their price down to supermarket level; is that right?

"A. Cut their price down, correct.

"Q. And then, over an extended period of time, they are constantly losing money on the sale of their milk; is that correct?

"A. That's correct."

This testimony substantiates the Chancellor's conclusion that, "In fact, the small retailer which the Act purports to protect is placed at a competitive disadvantage by volume discounts afforded by wholesalers and producers to the large retailers."

The California appellate court based its ruling in *Midcal* on a prior decision by the California Supreme Court in which similar pricing restrictions were invalidated because of passive state involvement. That case was [*Rice v. Alcoholic Beverage Control Appeals Bd., 21 Cal.3d 431, 579 P.2d 476, 146 Cal. Rptr. 585 \(1978\)*](#), wherein the court described a situation very similar [**43] to that in the case at bar.

"In the price maintenance program before us, the state plays no role whatever in setting the retail prices. The prices are established by the producers according to their own economic interests, without regard to any actual or potential anticompetitive effect; the state's role is restricted to enforcing the prices specified by the producers." [*579 P.2d at 486.*](#)

The point was made in *Rice* that the vertical control exerted over wine prices by producers resulted in effectively destroying horizontal competition. I conclude, after reviewing the record evidence, that the Tennessee Unfair Milk Sales Act has the same effect in this regard. Mr. Kelsey Jones, an attorney with the Tennessee Department of Agriculture, whose testimony was quoted *supra*, further testified as follows:

"Q. All right, sir. When you contacted the defendants who have been named in this suit after the administrative hearing and told them what you thought the legal price of milk was, did they all establish the same price after your contact, sir?

"A. They all established a price above those lawful, what I considered to be the lawful minimum prices.

"Q. [**44] That is the same price for like items?

"A. I believe that they did arrive at the same prices."

It is obvious on the face of the record that horizontal competition is substantially impeded by enforcement of the Unfair Milk Sales Act and, since the Sherman Act forbids the kind of price fixing shown here, the Tennessee enactment should yield under the [*supremacy clause of the Constitution of the United States.*](#)

[*371] I would affirm the decree of the Chancellor.

Opinion by: HEANEY

Opinion

[*1007] HEANEY, Circuit Judge.

The issue we face here is whether the City of Kansas City, the Metropolitan Ambulance Services Trust (MAST), and various other defendants¹ violated the federal and state antitrust laws and the United States Constitution by implementing a single-operator ambulance system to provide all of the city's emergency and nonemergency service. We hold that Kansas City, MAST, and the consultants they retained are shielded from federal and state antitrust liability because they established the municipal ambulance system [*2] pursuant to state authorization and a clearly articulated and affirmatively expressed state policy to displace free competition in the ambulance business. We further hold that none of the defendants deprived the plaintiffs of their constitutional rights to due process. The district court's judgment, therefore, is affirmed.

I.

BACKGROUND

Kansas City, Missouri, has established a municipal ambulance system under which a municipal trust, MAST, contracts with a single private operator to provide all of the ambulance service -- both emergency and nonemergency -- within the city. In November, 1979, MAST awarded the initial [*1008] exclusive [*3] contract to Ambulance Service, Inc. (ASI), a corporation which had been formed earlier that year by the merger of the five existing private ambulance companies located in Kansas City. MAST has since renewed this contract and ASI continues to be Kansas City's exclusive provider of ambulance service.

Because ASI holds the city's sole ambulance license, other ambulance companies in the metropolitan area are denied access to most of the Kansas City market. They can transport into Kansas City patients whom they have picked up outside the city limits, and they can travel through the city on their way to other municipalities. They cannot, however, pick up any patients within the Kansas City borders.

Dissatisfied with these restrictions, plaintiffs Gold Cross Ambulance, Inc. (Gold Cross), and Transfer and Standby Services, Inc. (Transfer) -- two private companies located in suburban Independence, Missouri -- brought this five-count action, alleging that the defendants had violated federal and state antitrust laws and deprived the plaintiffs and Kansas City residents of various constitutional rights.²

[*4] On May 7, 1982, the district court granted summary judgment in favor of defendants Kansas City, MAST, Jack Stout and Fourth Party, Inc., on the plaintiffs' antitrust claims, but denied it to the individual shareholders of ASI on these counts. [538 F. Supp. 956, 967-970 \(W.D. Mo. 1982\)](#). The court also granted summary judgment in favor of all defendants on the plaintiffs' constitutional claims. [Id. at 970-973](#). The plaintiffs now appeal.³

¹ In addition to Kansas City and MAST, the plaintiffs named as defendants Ambulance Service, Inc. (ASI), the current holder of the city's exclusive ambulance license; four individual shareholders of ASI who had consolidated their previously private companies; Jack Stout, a consultant who helped develop the city's ambulance system; and Stout's company, Fourth Party, Inc.

² The plaintiffs originally filed their action in state court, alleging only Missouri antitrust law violations and constitutional claims under the fourteenth amendment and 42 U.S.C. § 1983. Defendant MAST removed the case to federal court, and filed a counterclaim alleging that the plaintiffs violated the federal antitrust laws. The plaintiffs then amended their complaint to include their Sherman Act claims.

³ The appeal is properly before this Court because the district court directed entry of final judgment pursuant to Fed. R. Civ. P. 54(b) on plaintiffs' claims against which it granted summary judgment.

II.

FACTS

Kansas City for many years provided emergency ambulance services to its citizens by operating a public ambulance system through the Kansas City General Hospital and, later, through the city Fire Department. In the early 1970s, however, Kansas City began to contract with five competing, private companies for emergency ambulance service. A central dispatch center [**5] allocated calls among the various companies on a "round-robin" basis. In 1973, the dispatch center adopted a policy of dispatching the closest available ambulance to the scene of the accident, regardless of which company owned the vehicle.

In 1978, a controversy developed concerning the slow response time by the private ambulance companies to emergency calls. As a result, the city formed a Public Safety Improvement Committee to investigate alternatives for improving emergency medical service. The Committee reported its findings to the city council on March 21, 1979, and recommended that the city adopt a publicly controlled ambulance system which utilized a single provider for both emergency and nonemergency services. Within two weeks, the city council approved a resolution committing Kansas City to such a system. In April, 1979, the city retained a consulting firm to study the implementation of a single-provider system.

Jack Stout, the consultant, was the recognized developer of the so-called "public utility model" of ambulance service in which a single operator replaces competing private companies. This model is designed to eliminate the incentive created by free-market delivery [**6] of ambulance service by private companies to neglect emergency ambulance service in favor of the more profitable nonemergency business.

This incentive to neglect emergency service arises from the cost structure of the [*1009] ambulance business. The fixed cost of providing emergency service is very high because expensive advanced life support equipment is required and because sufficient capacity to meet peak demand within an adequate response time must be maintained, even though that full emergency capacity is seldom utilized. In contrast, the cost of handling nonemergency ambulance service with the idle excess capacity is low. Moreover, the fee-collection rate for nonemergency service is substantially higher than for emergency service. Thus, nonemergency calls are significantly more profitable than emergency calls, and private ambulance companies operating in an unregulated market have a strong incentive to concentrate on providing nonemergency service rather than quick, high quality emergency care.

To resolve these problems, the public utility model advocates the following approach: first, a city contracts with a single operator to provide all municipal ambulance service [**7] within medical care and response time standards set by public officials. The city then collects from each patient the fee for services rendered by the company. If the ambulance company fulfills its contractual requirements, it receives payment regardless of whether the city has been able to collect all fees due. If the city collects insufficient fees to cover the amount owed to the ambulance company, the city makes up the deficit as a government subsidy. Finally, the city owns all the ambulance service equipment to prevent service from being interrupted if the operator encounters financial difficulty.

Thus, the public utility model, in theory at least, eliminates the incentive to favor nonemergency calls because the operator is paid only the contractual sum and this payment is not conditioned on the collection of user fees. For this model to be economically feasible, however, the municipally-licensed operator should be the only ambulance service allowed to do business in the city. If other private companies are permitted to operate in the city, they will retain the strong incentive to take the high profit nonemergency calls and leave the less-profitable emergency business to [**8] the city system.

In September, 1979, the Kansas City council passed an ordinance formally adopting the public utility model for city ambulance service and creating a nonprofit public trust, MAST, to implement and manage the new system. Several problems prevented Kansas City from implementing its plan, however. Missouri law requires all ambulance service

operators to have a state-issued license,⁴ which MAST did not possess. Moreover, MAST did not own the equipment necessary to provide full ambulance service to the city. Thus, MAST could not provide a bidder with either the license or the equipment necessary to implement the public utility model.

Consequently, in October, 1979, the city council repealed its September ordinance, while retreating from full implementation of the public utility model, reiterated Kansas City's commitment to the concept. Thereafter, MAST contracted with ASI, which possessed the requisite state license and equipment, **[**9]** to provide the city's ambulance service. MAST apparently issued the exclusive municipal license to ASI without complying with the competitive bidding procedures required by city ordinance because, according to defendant Kansas City, ASI was the only state-licensed company in the area that possessed sufficient equipment to provide ambulance service on a single-provider basis.

Eventually, in December, 1980, the city council directed MAST to fully implement the public utility model.⁵ In September, 1981, MAST purchased all of ASI's outstanding stock, thereby obtaining the company's equipment and state license. Thereafter, on December 17, 1981, the city council passed Ordinance 53539, which directed **[*1010]** MAST to fully implement the public utility model.⁶

[10]** Thus, pursuant to Ordinance 53539, Kansas City has adopted a publicly controlled, single-operator ambulance system. The plaintiffs challenge that system, contending that the defendants have violated the federal and state antitrust laws and the United States Constitution by implementing it.

III.

ANTITRUST CLAIMS

The district court found that the state action doctrine shields defendants Kansas City, MAST, Jack Stout and Fourth Party, Inc., from liability under the federal antitrust laws.⁷

[11] A. The State Action Doctrine.**

In *Parker v. Brown*, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943), the Supreme Court first addressed the question of whether the federal antitrust laws prohibit a state from exercising its sovereign powers to impose certain anticompetitive restraints. It held that a marketing program enacted by the California legislature to create price supports for raisins was exempt from challenge under the Sherman Act because the program "derived its authority * * * from the legislative command of the state." *Id. at 350*. The Court stated:

⁴ [Mo. Rev. Stat. §§ 190.105, 190.125](#).

⁵ Shortly thereafter, Gold Cross and Transfer filed their action in state court. After the plaintiffs commenced their lawsuit, no further action apparently was taken on the license applications they had pending with MAST.

⁶ Ordinance 53539, of course, requires MAST to contract with a single operator to provide all of Kansas City's ambulance service. In addition, it establishes an Emergency Physicians Advisory Board which appoints an ambulance service Medical Director and makes recommendations for the improvement of ambulance service. The ordinance also gives the city's Director of Health authority to promulgate rules, regulations and standards necessary to implement the public utility system. The Director of Health is empowered to establish standards for clinical performance, patient care, response time and medical protocols, and to develop procedures for medical control over the delivery of advanced life support by ambulance personnel. Finally, the ordinance requires all ambulance drivers, attendants, and dispatchers to obtain permits from the Director of Health.

⁷ The district court held that because the state action doctrine exempted these four defendants from liability under the federal antitrust laws, it also exempted them under Missouri's antitrust statutes. [538 F. Supp. 956, 970 \(W.D. Mo. 1982\)](#). It held that Stout and Fourth Party, Inc., shared the state action exemption of Kansas City and MAST because they did nothing beyond what they were authorized to do by the city and MAST. *Id. at 969-970*. The plaintiffs do not challenge either of these conclusions by the court below; rather, they contend that it erred in holding that the state action doctrine is applicable here.

We find nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

Id. at 350-351.

Subsequent decisions have refined the *Parker* state action doctrine. E.g., *Goldfarb v. Virginia* [**121] *State Bar*, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975); *Cantor v. Detroit Edison Co.*, 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976); *Bates v. State Bar of Arizona*, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977). In *City of Lafayette v. Louisiana Power & Light Co.*, 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978), the Supreme Court faced the question of whether the state action doctrine protected a municipality from federal antitrust liability. A plurality of four justices rejected the claim that the state action doctrine extended to "all governmental entities, whether state agencies or subdivisions of a State * * * simply by reason of their status as such." *Id. at 408*. The justices nonetheless recognized that *HN1*[↑] municipalities are instrumentalities of the state, and their actions may reflect state policy. ... *Id. at 413*. The plurality thus held that *HN2*[↑] "the Parker doctrine exempts only anticompetitive conduct engaged in * * * by [municipalities], pursuant to state policy to displace competition with regulation or monopoly public service." *Id.*

[*1011] The plurality observed that a state policy to displace competition could [**13] not be found "in the absence of evidence that the state authorized or directed a given municipality to act as it did." *Id. at 414*. It concluded, however, that "an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is 'found from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of.'" *Id.* at 915 (citation omitted) (emphasis added).

Recently, in *Community Communications Co. v. City of Boulder*, 455 U.S. 40, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982), the Supreme Court had another opportunity to address the application of the state action doctrine to municipal conduct. It held that the doctrine did not shield the city from antitrust liability when the regulation in question was based only on the state's broad grant of home rule power to the municipality. *Id.*

In rejecting Boulder's state action defense, the Court held that the *HN3*[↑] city failed to establish the requirement that its challenged restraint constituted either "the action of the State of Colorado itself in its sovereign capacity, * * * [or] municipal action" [**14] in furtherance or implementation of clearly articulated and affirmatively expressed state policy." *Id. at 52* (citations omitted). The Court emphasized that this standard for determining the applicability of the state action doctrine was fully consistent with the one adopted by the plurality in *City of Lafayette v. Louisiana Power & Light Co.*, *supra*.⁸

[**15] B. The Present Case.

⁸The Court stated:

[The view of the *Lafayette* plurality that municipal conduct is not exempt unless it is "pursuant to a state policy to displace competition"] was simply a recognition that a State may frequently choose to effect its policies through the instrumentality of its cities and towns. It was stressed, however, that the "state policy" relied upon would have to be "clearly articulated and affirmatively expressed." [435 U.S.] at 410. * * * This standard has since been adopted by a majority of the Court. *New Motor Vehicle Board of California v. Orrin W. Fox Co.*, 439 U.S. 96, 109, 158 L. Ed. 2d 361, 99 S. Ct. 403 (1978); *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc.*, 445 U.S. 97, 105, 163 L. Ed. 2d 233, 100 S. Ct. 937 (1980). [Footnote omitted.]

There is no claim here that Ordinance 53539 enacted by Kansas City constitutes the action of the State of Missouri itself in its sovereign capacity. Thus, the issue is whether it constitutes action in furtherance or implementation of a clearly articulated and affirmatively expressed state policy. [Community Communications Co. v. City of Boulder, supra, 455 U.S. at 52.](#)

HN4 [+] An expression of state policy that is sufficient to establish *Parker* immunity is comprised of two elements: The legislature must have authorized the challenged activity, and it must have done so with an intent to displace competition. See Areeda, [Antitrust Law](#) para. 212.3a, at 53 (1982 Supp.). See also [Community Communications Co. v. City of Boulder, supra, 455 U.S. at 51-52;](#) [City of Lafayette v. Louisiana Power & Light Co., supra, 435 U.S. at 415.](#)

The first element of this test is plainly satisfied here. The State of Missouri has enacted a comprehensive regulatory scheme which expressly authorizes the various elements of the single-operator ambulance system adopted by Kansas City. See [supra, at 1009-1010](#) & n.6 (describing the city ambulance system). The state permits **[**16]** cities to provide ambulance service to its citizens, to acquire the necessary equipment, to "contract with one or more" operators to provide the ambulance service, and to promulgate rules to regulate the provision of that service. [Mo. Rev. Stat. § 67.300.](#)⁹

[17] [**1012]** The state has enacted additional laws concerning ambulance service in Chapter 190 of Missouri Revised Statutes.¹⁰ This chapter permits municipalities to impose their own restrictions on ambulance service in addition to those imposed by the state. Section 190.105.4 provides that the issuance of a state license does not authorize operation of an ambulance "without a franchise in any county, municipality or political subdivision which has enacted an ordinance making it unlawful to do so." Section 190.105.5 provides that municipalities may adopt ambulance service ordinances that do not conflict with state law.

[18]** The foregoing statutes plainly establish that the first element of the *Parker* doctrine is present here: Missouri has authorized Kansas City's single-operator ambulance system. The second and more difficult question is whether Missouri has intended to displace competition with regulation or monopoly service. See [supra, at 1011.](#) The district court found that such an intent existed, stating that "the state's policy [was] to place anticompetitive restraints on ambulance service," and that its regulatory scheme "clearly indicates an intent to regulate the provision of ambulance service on the basis of public need rather than to allow unbridled competition." [538 F. Supp. at 965.](#)

⁹ [Section 67.300 of Missouri Revised Statutes](#) provides:

1. Any county, city, town or village may provide a general ambulance service for the purpose of transporting sick or injured persons to a hospital, clinic, sanatorium or other place for treatment of the illness or injury, and for that purpose may
 - (1) Acquire by gift or purchase one or more motor vehicles suitable for such purpose and may supply and equip the same with such materials and facilities as are necessary for emergency treatment, and may operate, maintain, repair and replace such vehicles, supplies and equipment;
 - (2) Contract with one or more individuals, municipalities, counties, associations or other organizations for the operation, maintenance and repair of such vehicles and for the furnishing of emergency treatment;
 - (3) Employ any combination of the methods authorized in subdivisions (1) and (2) of this section.
2. The municipality or county shall formulate rules and regulations for the use of the equipment and may fix a schedule of fees or charges to be paid by persons requesting the use of the facilities and provide for the collection thereof.

* * *

¹⁰ Section 190.105.1 requires all ambulance operators to be licensed by the State of Missouri, and [Section 190.125](#) requires an annual showing of need for each state ambulance license issued. Sections 190.115 and 190.120 set out the equipment and the kind of insurance coverage which each licensed ambulance must have. Section 190.145 lists the qualifications which ambulance service personnel must meet, and Section 190.175 details the records which each ambulance license holder must maintain.

The Supreme Court has made clear that "a specific, detailed legislative authorization" of monopoly service need not exist to infer the necessary state intent. *City of Lafayette v. Louisiana Power & Light Co., supra, 435 U.S. at 415*. It is sufficient that "the legislature contemplated the kind of action complained of." *Id.* (citation omitted).¹¹ In other words, a [*1013] sufficient state policy to displace competition exists if the challenged restraint is a necessary or reasonable consequence [**19] of engaging in the authorized activity. Areeda, *Antitrust Law*, *supra*, Para. 212.3, at 54; Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv. L. Rev. 435, 446 (1981).

[**20] *Section 67.300 of Missouri Revised Statutes*, which permits a city to "contract with one or more" operators to provide ambulance service, plainly contemplates the conduct about which the plaintiffs complain here. Because monopoly service is the necessary consequence of having only one municipal ambulance operator as authorized by Missouri law, this statute alone supports the district court's finding that the state intended to displace unregulated competition in the ambulance industry.

Moreover, the state has also enacted its own anticompetitive scheme for regulating ambulance service in Missouri, which applies in addition to any municipal regulation. *Mo. Rev. Stat. §§ 190.100 et seq.* This chapter requires all ambulance operators and vehicles to be licensed by the state; mandates the necessary equipment and insurance coverage for all ambulances; details the types of records that all ambulances must keep; and provides that *no* ambulance may be licensed without an annual determination by the state license officer that "public convenience and necessity require the proposed ambulance service." See note 10, *supra*. Indeed, the Missouri Supreme Court, in *City of Raytown* [*211] *v. Danforth*, 560 S.W.2d 846 (Mo. 1977) (en banc), expressly held that *Mo. Rev. Stat. § 67.300*, which authorizes cities to set up their own ambulance systems, does *not* allow a city to circumvent the state's licensing and regulatory requirements contained in *Mo. Rev. Stat. §§ 190.100 et seq.* The "thrust of the Licensing Law," the court concluded, was "toward control of destructive competition and improvement of service." *Id. at 849*.

Accordingly, we believe the Missouri legislature has evinced its intent to displace competition in the ambulance industry, and that the state action doctrine thus applies in this case. The plaintiffs, however, vigorously argue that the Supreme Court's decision in *Community Communications Co. v. City of Boulder*, *supra*, renders the doctrine inapplicable here. In that case, the city council passed an ordinance prohibiting a cable television operator in Boulder from expanding its business for three months while the council drafted an ordinance to regulate the cable television market in the city. *455 U.S. at 45-46*. The Supreme Court held that Boulder could not invoke the state action doctrine because the home rule amendment to the Colorado [*22] constitution upon which the city based its moratorium was not a sufficient "clear articulation and affirmative expression" of a state policy to restrain trade in the cable television business. *Id. at 52-56*. The Court reasoned:

¹¹ The plaintiffs contend that state authorization or contemplation of municipal action is insufficient to satisfy the state action doctrine; rather, they apparently suggest that the state must compel or command the city's action. We disagree. *Accord Town of Hallie v. City of Eau Claire*, 1983-1 Trade Cases para. 65,227, at 69,337 (7th Cir. Feb. 17, 1983).

In *Community Communications, Inc. v. City of Boulder*, 455 U.S. 40, 54-57, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982), the Supreme Court did not require state compulsion of the city's conduct as a prerequisite to state action immunity. In fact, the *Community Communications* Court, *id. at 55-56*, repeated with approval the language regarding state authorization or contemplation of the challenged restraint used by the plurality in *City of Lafayette v. Louisiana Power & Light Co.*, 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978). See Areeda, *Antitrust Law* Para. 212.5, at 59-61 (1982 Supp.) (concluding that state need not compel the challenged restraint as a prerequisite to application of the *Parker* doctrine to municipal conduct).

In fact, the Supreme Court has used language demanding state compulsion only in cases involving private defendants. *E.g., Cantor v. Detroit Edison Co.*, 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976); *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975). In any event, in its most recent case involving private conduct, the Supreme Court required, as prerequisites for *Parker* immunity, a state policy to displace competition and active state supervision rather than state compulsion of the challenged practice. *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc.*, 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980).

Plainly the requirement of "clear articulation and affirmative expression" is not satisfied when the State's position is one of mere *neutrality* respecting the municipal actions challenged as anticompetitive. A State that allows its municipalities to do as they please can hardly be said to have "contemplated" the specific anti-competitive actions for which municipal liability is sought.

Id. at 55 (emphasis included).

The plaintiffs contend that Missouri's position in [*Mo. Rev. Stat. § 67.300*](#) is similarly one of "mere neutrality" regarding municipally operated ambulance service because it permits cities "to contract with one or more" providers. We disagree. In *Community Communications*, the Supreme Court emphasized that the home rule provision on which the city relied did not even address the subject of cable television and no other state cable television regulation existed.¹² See Note, *Municipalities and the [*1014] [**23] Antitrust Laws: Home Rule Authority is Insufficient to Ensure State Action Immunity*, 35 Vand. L. Rev. 1041 (1982).

In this case, there has been an "affirmative addressing of the subject by the State," the [**24] decisive factor missing in *Community Communications*. Indeed, [*sections 67.300*](#) and 190.100 et seq. of Missouri Revised Statutes show that the state has not only affirmatively addressed the subject of ambulance service on the local level, but has "clearly articulated and affirmatively expressed" a state policy which authorizes Kansas City to provide ambulance service to its residents by means of a single provider. The state action test articulated by the Supreme Court in *Lafayette* and *Community Communications*, therefore, is satisfied.

The district court, relying on [*California Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 104-106, 63 L. Ed. 2d 233, 100 S. Ct. 937 \(1980\)*](#), concluded that the state action doctrine also required that the challenged restraint must be actively supervised by the state. We do not agree with that conclusion.¹³

[**25] The Supreme Court has required active state supervision of the challenged restraint only in cases in which the defendants were private entities or individuals. See, e.g., [*California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., supra, 445 U.S. at 99; Cantor v. Detroit Edison Co., supra, 428 U.S. at 582; Goldfarb v. Virginia State Bar, supra, 421 U.S. at 775*](#). In this context, the state supervision requirement is intended to control the potential for abuse created by authorizing private persons to make anticompetitive decisions and to insure that those decisions are consistent with the clearly articulated and affirmatively expressed state policy at stake. Because municipal officials generally are politically accountable to the citizens they represent for their decisions regarding the challenged restraint, state supervision is not as necessary to prevent abuse as in the private context. See *Town of Hallie v. City of Eau Claire*, *supra*, 1983-1 Trade Cases at 69,338-69,339.

Moreover, because the *Parker* doctrine requires that the state delegate to the local government the authority to engage in the challenged conduct, state supervision of Kansas City's [**26] conduct is unnecessary to find state action. *Id.* at 69,639. As a leading commentator recently noted:

¹² The Supreme Court stated:

Nor can those actions [by the city] be truly described as "comprehended within the powers granted," since the term, "granted," necessarily implies an affirmative addressing of the subject by the State. The State did not do so here: The relationship of the State of Colorado to Boulder's moratorium ordinance is one of precise neutrality. As the majority in the Court of Appeals below acknowledged: "We are here concerned with City action in the absence of any regulation whatever by the State of Colorado. Under these circumstances there is no interaction of state and local regulation. We have only the action or exercise of authority by the City."

[*Community Communications Co. v. City of Boulder, supra, 455 U.S. at 56*](#) (citation omitted) (emphasis included).

¹³ The provision of ambulance service by Kansas City is a traditional governmental function designed to protect public health and safety. See Note, *The Supreme Court, 1981 Term, 96 Harv. L. Rev. 268-278 (1982)*. We need not address the question of whether municipal conduct which is outside the scope of such a traditional governmental function and which may pose a more significant threat to competition may require active state supervision to qualify for protection under the *Parker* doctrine. *Id.*

requiring state authorization for local conduct is analogous to requiring active supervision of private conduct; it tests whether challenged local activity is truly state action and therefore entitled to immunity.

Areeda, **Antitrust Law**, *supra*, para. 212.2a, at 47 (footnote omitted).

We also believe that requiring active state supervision over a municipal function such as the one present here is unwise. The State of Missouri has authorized its municipalities to provide ambulance service because it believes that such service is a proper local activity. To require the state to supervise Kansas City's ambulance system once the city has elected to exercise its authority to establish the system makes little sense. As the dissent in *Community Communications Co. v. City of Boulder*, *supra*, 455 U.S. at 470-471 & n.6 (Rehnquist, J., dissenting), [*1015] observed in concluding that the state supervision requirement does not apply to municipal conduct, "it would seem rather odd to require municipal ordinances to be enforced by the State rather than the city [**27] itself." ¹⁴ Finally, requiring state supervision could force the state and its municipalities to engage in duplicative, wasteful regulation and could erode the local autonomy that the state has sought to encourage. See *Town of Hallie v. City of Eau Claire*, *supra*, 1983-1 Trade Cases at 69,339.

Accordingly, we believe that the state action doctrine is applicable in this case regardless of whether Missouri actively supervised Kansas City's implementation of Ordinance 53539. ¹⁵ Therefore, the district court's finding that the state action doctrine exempts defendants Kansas City, MAST, Stout, and Fourth Party, Inc., from Sherman Act liability is affirmed. ¹⁶ [**28]

IV.

CONSTITUTIONAL CLAIMS

Counts IV and V of the plaintiffs' complaint allege various violations of their rights to substantive due process, procedural due process, and equal protection. The district court granted summary judgment in favor of all defendants on these claims. ¹⁷

The plaintiffs [**29] allege that they have been denied substantive due process because Kansas City's ambulance system deprives them of the freedom to contract with potential customers and freedom to engage in a lawful business. The district court rejected these contentions, holding that a rational basis existed for Ordinance 53539. We affirm this holding.

We agree with the court below that the challenged ordinance is designed to promote the public health, safety and welfare; and that it does not infringe on any fundamental constitutional right. **HN5** There is no absolute right to contract free of state regulation under the police power. See, e.g., *New Motor Vehicle Board v. Orrin W. Fox Co.*, 439 U.S. 96, 106-107, 58 L. Ed. 2d 361, 99 S. Ct. 403 (1978).

Because the challenged ordinance does not involve a fundamental right or suspect class, the defendants need only demonstrate that the ordinance is designed to accomplish an objective within the government's police power, and that a rational relationship existed between the ordinance's provisions and its purpose. See *Hughes v. Alexandria*

¹⁴ Because the majority in *Community Communications, Inc. v. City of Boulder*, *supra*, found that the challenged restraint was not in furtherance of a clearly articulated and affirmatively expressed state policy, it explicitly declined to determine whether the "active state supervision" requirement applied to municipal conduct. 455 U.S. at 51 n.14.

¹⁵ In any event, the district court's finding that adequate state supervision of Kansas City's ambulance system existed here was not clearly erroneous.

¹⁶ Because we hold that the state action doctrine shields these defendants from antitrust liability, we need not address the issue of whether the plaintiffs' Sherman Act claims against them are barred by the tenth amendment to the United States Constitution.

¹⁷ The plaintiffs do not appeal from the district court's finding that they were not denied equal protection under the fourteenth amendment.

Scrap Corp., 426 U.S. 794, 813-814, 49 L. Ed. 2d 220, 96 S. Ct. 2488 (1976). The ordinance "need not be drawn [**30] so as to fit with precision the legitimate purposes" underlying it. *Id.*

The court below found that Ordinance 53539 satisfied the rational basis test. It stated:

The Kansas City ordinance challenged by plaintiffs meets the "rational relationship" standard. Kansas City's stated purpose in passing this ordinance was to protect public health and safety by improving Kansas City's ambulance service. Kansas City officials were concerned that competition in the ambulance service industry was harming the public. Setting up the monopoly public utility model, in which the receipt of payment for ambulance service is not based on a company's [*1016] ability to compete for business, is a reasonable means of improving service. Kansas City's ordinance is not arbitrary or capricious; it is reasonably related to the purpose it seeks to achieve.

538 F. Supp. at 970-971.

After carefully reviewing the record and briefs, and hearing oral argument, we find no error in this conclusion. It therefore is affirmed.

The plaintiffs also contend that the citizens of the Kansas City metropolitan area have been deprived of their right to select the ambulance company to provide service [**31] to them. The district court found that the plaintiffs lacked standing to assert this claim. We agree.

HN6 [↑] A litigant "may not claim standing * * * to vindicate the constitutional rights of some third party." Barrows v. Jackson, 346 U.S. 249, 255, 97 L. Ed. 1586, 73 S. Ct. 1031 (1953). The plaintiffs acknowledge this general rule, but they claim that they have standing under the exception recognized in Singleton v. Wulff, 428 U.S. 106, 49 L. Ed. 2d 826, 96 S. Ct. 2868 (1976).

In *Singleton*, the Supreme Court held that a physician had standing to assert the rights of women patients to be free from governmental interference with their decision concerning abortion. Id. at 118. In so holding, the Court emphasized two factors: (1) the relationship of the litigant to the persons whose rights the litigant seeks to further; and (2) the ability of the third parties to assert their own rights. Id. at 114-116.

In this case, the plaintiffs would not be effective proponents of the rights of the citizens of Kansas City. There is no close, confidential relationship between the plaintiffs and Kansas City residents. Moreover, the interests of the two are in substantial conflict. [**32] Gold Cross and Transfer are principally interested in operating their businesses profitably, while Kansas City-area residents are principally concerned with receiving high quality ambulance service at the lowest possible cost. Cf. Singleton v. Wulff, supra, 428 U.S. at 113-117.

In addition, the factors in *Singleton* that made it difficult for the third parties to assert their rights are not present here. Unlike the abortion decision in *Singleton*, the right in question here does not involve an intimate, private decision, nor is it affected by concerns of imminent mootness. Cf. id., at 113-117. Accordingly, we agree with the district court that the plaintiffs lacked standing to assert any rights possessed by the citizens of the Kansas City area.

Finally, the plaintiffs allege that their procedural due process rights were violated because Kansas City issued its exclusive ambulance license to ASI and renewed that license without following the requirements of its ordinances and without giving the plaintiffs notice and an opportunity to be heard. The court below held that the plaintiffs were not entitled to any procedural due process because they possessed no protected [**33] property or liberty interest.

To sustain their procedural due process claim, the plaintiffs must first establish that they possessed "a legitimate claim of entitlement" to the ambulance license issued by Kansas City. Board of Regents v. Roth, 408 U.S. 564, 577, 33 L. Ed. 2d 548, 92 S. Ct. 2701 (1972). The plaintiffs could demonstrate such a claim of entitlement by showing that they had a reasonable expectancy of receiving the municipal license based upon state or local statutes or regulations, or upon an express contract or mutual understanding with the defendants. See id. at 577-

[578; Perry v. Sindermann, 408 U.S. 593, 600-603, 33 L. Ed. 2d 570, 92 S. Ct. 2694 \(1972\); Brockell v. Norton, 688 F.2d 588, 590-591 \(8th Cir. 1982\)](#). Gold Cross and Transfer, however, have pointed to nothing which gives them a legitimate claim of entitlement to the Kansas City ambulance license.¹⁸ Their unilateral expectation [*1017] of being awarded a license is insufficient to sustain their procedural due process claim. [Board of Regents v. Roth, supra, 408 U.S. at 577](#). Thus, the district court's grant of summary judgment against that claim is affirmed.

[**34] V.

CONCLUSION

We hold that the district court did not err in granting summary judgment in favor of defendants Kansas City, MAST, Jack Stout, and Fourth Party, Inc., on the plaintiffs' antitrust claims and in favor of all defendants on the plaintiffs' constitutional claims. Accordingly, that judgment is affirmed.

End of Document

¹⁸ To the extent that the district court's opinion suggests that a legitimate claim of entitlement can never arise from the procedures established in the statutes or regulations adopted by a state or its subdivisions, we disagree. See, e.g., [Wilson v. Robinson, 668 F.2d 380, 382-383 \(8th Cir. 1981\)](#) (county ordinance requiring two weeks notice prior to the termination of nonprobationary sheriff's deputies creates a property interest protectable under the [fourteenth amendment](#)). We hold only that in this case, Gold Cross and Transfer have failed to demonstrate that there are any Missouri or Kansas City statutes or regulations, or alternatively any agreement between the various parties, which gave the plaintiffs a legitimate claim of entitlement to a municipal ambulance license.

MLC, Inc. v. North American Philips Corp.

United States District Court for the Southern District of New York.

May 3, 1983

No. 78 Civ. 6080 (GLG).

Reporter

1983 U.S. Dist. LEXIS 17230 *; 1983-1 Trade Cas. (CCH) P65,351

MLC, Inc. v. North American Philips Corp., Philips Business Systems, Inc., and N. V. Philips Gloeilampenfabrieken.

Core Terms

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN1 [down arrow] Regulated Practices, Monopolies & Monopolization

In considering any monopoly claim, the starting point is the question of the relevant market involved. However, there may, in addition to the relevant market, also be a submarket delineated by industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN2 [down arrow] Regulated Practices, Price Fixing & Restraints of Trade

The termination of a dealer by a supplier for violation of a distribution restraint is, if it is a restraint at all, at most, a vertical one. It should not matter that the dealer was terminated by a supplier in part as a result of comments by that dealer's competitor. The restraint is still vertical. The fact that there are anticompetitive effects on intraband competition as a result of the termination is beside the point. That is true with respect to all vertical restraints. The simple fact is that many dealer termination cases, because they involve unilateral refusals to deal, would not even survive the initial pleadings (or, at best, summary judgment) stage -- much less a full rule of reason analysis.

Antitrust & Trade Law > Sherman Act > General Overview

HN3 Antitrust & Trade Law, Sherman Act

If the sale of assets has an affect on competition, it occurs whether or not appellant was harmed. There is thus lacking the essential connection between injury and the aims of the antitrust laws necessary to give appellant standing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

HN4 Per Se Rule & Rule of Reason, Per Se Violations

A per se violation of the antitrust laws, predicated upon an alleged vertical combination, cannot stand absent a showing of some form of price fixing or resale price maintenance.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Restraints solicited by a distributor but implemented by a manufacturer are not automatically per se violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Compliance > ... > Distributorships & Franchises > Termination > Antitrust Issues

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN6 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In applying a rule of reason to the termination of an exclusive distributorship, anticompetitive impact on the relevant market may not be the only consideration and that a conspiracy to eliminate a distributor may be sufficient.

Counsel: [*1] Murphy & O'Connell, New York, N.Y. (by Kathleen M. O'Connell and Patrick J. Murphy, of counsel), for plaintiff

Gifford, Woody, Palmer & Serles, New York, N.Y. (by James P. O'Neill, of counsel), for defendant

Opinion by: GOETTEL

Opinion

GOETTEL, D.J.: In this antitrust action, the parties cross-move for summary judgment.¹

The complaint presently contains seven causes of action. In the first count, plaintiff alleges that defendants violated section 1 of the Sherman Act, 15 U.S.C. § 1 (1976), by engaging in a combination and conspiracy in unlawful restraint of trade. The second count charges a refusal to deal and to fix prices. The third count charges a conspiracy to monopolize trade. The fourth count makes the same charge with respect to the defendants and certain German manufacturers, who are not parties to this action. The fifth count is a trying claim under 15 U.S.C. § 14 (1976), but this count is being withdrawn by plaintiff. The sixth count, brought under section 7 of the Clayton Act, 15 U.S.C. § 18 (1976 & Supp. V 1981), charges an attempt to create a monopoly by taking over plaintiff's business. [*2] The seventh count charges a violation of the Wilson Tariff Act, 15 U.S.C. §§ 8-11 (1976), by entering into a combination and conspiracy to restrain trade with respect to imported goods. These various legal claims fall basically under one of two headings: restraint of trade (counts one, two, and seven) and monopoly (counts three, four, and six). The plaintiff seeks treble damages in the amount of \$9 million under 15 U.S.C. § 15 (1976 & Supp. V 1981). Plaintiff also seeks injunctive relief under 15 U.S.C. § 26 (1976).

This seemingly awesome legal battle actually grows out of a rather minor business relationship.²

The Facts

N.V. Phillips Gloeilampenfabrieken ("N.V. Philips") is a Netherlands corporation which is the parent of the other two corporate defendants.³ (The defendants and their parent are sometimes referred to, collectively, as "Philips.") From 1969 to 1978, N.V. Philips manufactured a small business computer in West Germany which was distributed in the United States by defendant Philips Business Systems, [*3] Inc. ("PBSI"). This machine was the successor to the electronic accounting machine of earlier decades. The Philips computer, like some of its competitors, stored information on magnetic ledger cards. (Other computers of the same era used hard or flexible discs, magnetic tape, or other means.) The Philips machine was never particularly successful in the United States. Throughout, it never achieved as much as a five percent share of the market for such machines, as measured by units sold annually.

The magnetic ledger cards (called "mlc's" for short) were an essential component of the Philips system. These cards are made of paper with a stripe of magnetic ink impregnated on one of the lateral margins of the card. The mlc's, like certain other components used in the machine, were not made by Philips but rather were purchased from independent vendors. In this instance, the manufacturers were two West German companies, Jollenbeck & Kasten ("JK") and Magnetdruck ("MD"). Philips provided these manufacturers with the specifications [*4] and technical assistance necessary to manufacture the original cards, which required exact tolerances. Philips contends that the information it furnished consisted of trade secrets and confidential specifications.

The Philips accounting computer was first sold in the United States in 1969. At that time, accounting computers were almost the only type of small business computer. (Since then, mini-computer-based systems and small electronic data processing systems have virtually eliminated the accounting computer in the small business computer field.) Philips marketed three different series of the computers, not all of which used the magnetic ledger cards. A number of other companies also had systems using mlc's of a sort different than that used by Philips. Today, the magnetic ledger card is little used, having been replaced completely by other types of more sophisticated and versatile information storage devices. Indeed, Philips's sales started dropping off in 1976 and 1977. Philips stopped importing and selling these accounting computers in November of 1978.

¹ Plaintiff's cross-motion is limited to two of its causes of action.

² In addition to this action, there is a parallel state court action alleging common law claims brought by the plaintiff against the same defendants.

³ N.V. Philips was named as a defendant in this action but was dismissed from the action in February 1982 due to plaintiff's failure to prosecute.

During the ten-year period that Philips was marketing its computers in the United States, the magnetic ledger cards [*5] were a critical part of the system. Apparently, it had simply intended to purchase cards from the inventories of existing manufacturers. It found, however, that the performance standards of existing magnetic ledger cards were not adequate for the operation of its computers. (In the field of magnetic ledger cards, the Philips system could store more information than others, providing that an adequate storage medium was available.) Consequently, Philips contends, it created its own specifications for magnetic ledger cards for its own computers and set up quality control standards. As mentioned earlier, Philips turned to two German printing companies for the production of these cards. Philips contends that the German manufacturers' ability to produce reliable cards resulted from their having both the requisite specifications and the assistance provided by Philips. Indeed, the cards that they manufactured bore the trade name "Philips." It was apparent that Philips's sales efforts depended in great part upon a dependable supply of magnetic ledger cards, since its system was valueless without them, and there were no general sources of supply for usable cards.

For the first few years, [*6] PBSI itself distributed the magnetic ledger cards that were produced for it in Germany. In April 1972, PBSI's marketing manager, John J. Fitzsimmons, decided to change this.⁴ Ultimately, he arranged for a boyhood friend of his, Thomas Donaghy, to form a New York corporation by the name of MLC, Inc. ("MLC").⁵ (The corporation was not legally extant until December 1972.) The agreement between Fitzsimmons and Donaghy was that Donaghy's company would import and distribute the magnetic ledger cards from Germany and PBSI would make all of its purchases from his company. In addition, PBSI agreed to support Donaghy's efforts by making his company the only authorized distributor of the magnetic ledger cards used in the Philips machines.⁶

[*7] Donaghy set up his business in his home and eventually obtained a warehouse in Queens. He was President of the company and the only full-time employee, although his wife acted as the corporate secretary. (Other employees were hired occasionally on a per diem basis, but at no time were there more than six part-time employees.) MLC had no sales organization, owned no commercial space, and had no printing facilities.⁷ Fitzsimmons introduced Donaghy to the German manufacturers and also to the customers of PBSI. MLC entered into distribution contracts first with JK at Mr. Fitzsimmons's suggestion, and later, on its own initiative, with MD. Pursuant to these agreements, MLC imported the blank forms, at wholesale prices, into the United States and sold them to PBSI and its customers. However, there was never a formal written agreement between MLC and any of the Philips companies. Although MLC had taken over the distribution, PBSI still retained responsibility for working out production problems with the German manufacturers. Indeed, at one point, Donaghy was using PBSI's telex facilities to transmit his communications to the suppliers as well as to obtain responses. Subsequently, [*8] Donaghy was to contend that MLC was no more than a "de facto employee" of Philips. Donaghy Letter of April 23, 1974.

The relationship between Philips and MLC proceeded in this fashion for several years. During this period, however, Donaghy's friend, Fitzsimmons, was replaced by Frank Buckley, who became head of the PBSI Data Systems Division. Buckley wanted PBSI to regain control of the distribution of the mlcs because they were a necessary component in the operation of the Philips system and because he thought the business might be profitable. He discussed this possibility with Donaghy, who, needless to say, was not pleased with the suggestion. Donaghy

⁴ At one point, a New Jersey corporation called MLC, Inc. was formed by Fitzsimmons's brother, Cornelius, apparently to distribute the cards. Its business and purpose is not known to this Court. However, both the Fitzsimmons brothers are in litigation against the defendants in this Court and in the Eastern District of New York.

⁵ Mr. Fitzsimmons explains his giving of this exclusive distributorship to his friend in the following words: "At that time our data system division was a young struggling accounting machine business and mlcs were a collateral business which I found was better handled by MLC Inc. and Thomas J. Donaghy." Affidavit of John J. Fitzsimmons at 3.

⁶ One way of achieving this was by initiating a new service policy in April 1972, informing users of Philips machines (as well as its salesmen) that the manufacturer's warranty and customer service contracts would not be honored should the customer employ cards bought from anyone other than an "authorized distributor."

⁷ The mlcs were not usually sold directly to the customer, but rather to independent printers, who would print graphics, columnar headings, and other markings on the cards, pursuant to the orders of the users.

argued that Philips still controlled the sales and distribution of the cards and that he was really functioning cheaply and efficiently as an integral part of the Philips distribution system. Buckley was not impressed with these arguments and directed members of his staff to formulate a plan to regain control [*9] of the distribution of the cards.

The problems involved in this change were discussed at some length with the German manufacturers, who agreed to cooperate with PBSI, as well as with Philips's counsel. (The consultation with counsel was prompted by Donaghy's threat of litigation in the event that PBSI resumed distribution of the cards.) The cooperation of the German suppliers was apparently easily obtained since, among other things, they had been concerned about slow payments by MLC and had asked PBSI to guarantee payments which, in fact, it had done. PBSI consequently negotiated prices it would pay to the German manufacturers. By July 1974, new price quotations had been obtained from the German manufacturers by PBSI. Thomas Dickson, the PBSI representative responsible for this, has maintained that his negotiations were carried on in good faith, and without any intent to injure MLC, but rather to preserve PBSI's ability to provide its branch offices and customers with an adequate supply of cards.

Although Philips could see many advantages to again becoming the sole supplier of its cards,⁸ it was nevertheless extremely concerned over Donaghy's threat of suit. At one point, [*10] there was an exchange of correspondence in which PBSI had simply taken the position that it would terminate its relationship with MLC and that MLC could continue as a distributor in the field to such parties as wished to purchase from it, and that PBSI would do nothing to prevent MLC from purchasing the cards from the German manufacturers. PBSI pointed out that if Donaghy were correct in his claim that he could operate the business much less expensively than PBSI, he would be able to undersell PBSI. MLC's counsel disputed this, and claimed his client's rights were being violated.⁹

[*11] Consequently, negotiations were entered into with Donaghy and his attorney for PBSI to buy out MLC and its inventory. These negotiations lasted over a period of some months. Finally, an agreement was signed on December 3, 1974, in which Philips agreed to purchase all the assets and inventory of MLC as of April 30, 1975, and to reassume the right to be the sole source for supplying branch offices with mlc's for resale to customers.(MLC retained the right to sell cards to agencies, or their printing agents, until May 1, 1975.) MLC and Donaghy were paid slightly in excess of \$300,000 for all of MLC's assets, including its goodwill, inventory, and accounts receivable.¹⁰

During the next few years that Philips was marketing the computers, it continued to be the sole source of supply for the magnetic ledger cards. In November 1978, it announced that it was discontinuing all operations in the small office computer field, and sold its activities in these areas (including the mlc business) to Pertec Computer Corporation.

MLC's claim is that it had no alternative except [*12] to agree to this buy-out, since PBSI had sufficient leverage in the market to take over the distribution in one manner or another, and that it (MLC) was helpless to avoid this. MLC contends, moreover, that Philips's motives in this buy-out and the manner in which it was accomplished were in effect, violations of the antitrust laws.¹¹ In its attack upon the motives and methods of the defendants, plaintiff has had available to it a memorandum prepared by defendants' counsel concerning the possible legal ramifications of

⁸These advantages, as outlined in a memorandum of December 23, 1974, were as follows: (1) Although Philips had a responsibility to its customers, it had no legal protection from MLC in its relationship with it, so that while MLC could make all of the profit, it had no obligations; (2) as the responsible party, Philips was entitled to the profits; and (3) there would be indirect benefits in customer contact which could result in future hardware sales.

⁹One of the alleged tactics objected to by plaintiff was defendants' purported request that JK demand that MLC place a very large order (ten times its usual size), which created the need for the financial guarantees sought from PBSI.

¹⁰This included an agreement for consulting services by Donaghy, which appear to be primarily a tax gimmick.

¹¹Nevertheless, the terms on which the acquisition was ultimately consummated were reasonably close to those which had been proposed by plaintiff's counsel at the beginning of its five-month negotiation with the defendants.

various actions taken by defendants in the course of negotiating with plaintiff.¹² These legal discussions encompass virtually every legal argument that plaintiff could have made (and in fact has made) in this case.

As mentioned [*13] earlier, Philips sold its computer business in November 1978, a few years after it acquired plaintiff's business. Despite this, plaintiff seeks \$9 million in treble damages plus attorneys' fees. Plaintiff bases this large claim on the profits it alleges defendants must have obtained from the sale of mlc's during those years.¹³ At the same time, plaintiff argues, inconsistently, that the cost of the cards was an insignificant part of the system and that MLC could sell the cards for less than could the defendants.

It is clear, however, that by the time of defendants' acquisition of plaintiff, Philips was facing competition from more sophisticated computers that used disc memories and cathode ray tube displays, which threatened the Philips system with obsolescence. Indeed, in 1976, Philips was negotiating to expand in the disc field, both through its own model and that of another manufacturer. Philips, however, never successfully entered the disc or cathode ray tube field in the United States. In *General Business [*14] Systems v. North American Philips Corp.*, 699 F. 2d 965, 973 (9th Cir. 1983), discussed at length below, the Ninth Circuit found that "the mlcs' cost was a substantial part of total cost for many users." The court noted that competitors used the high cost of the mlc's as a sales factor in convincing customers to buy other kinds of computers. The market for magnetic ledger cards was a doomed one, even by the middle of 1975. As the Ninth Circuit observed, Philips's subsequent attempts at continuing in the business of mlc-dependent machines, rather than switching to more sophisticated equipment, was a business error. However, it was not an error that hurt the plaintiff in any fashion.

Monopoly Claims

Plaintiff acknowledges, as it must, that Philips's insignificant position in the small business computer market is such that it could not possibly have monopolized that market. Consequently, plaintiff takes the position that the magnetic ledger cards produced for use with the Philips machine are the relevant product market.

It is obvious that HN1[] in considering any monopoly claim, the starting point is the question of the relevant market involved. However, as the Supreme Court indicated [*15] in *Brown Shoe Co. v. United States*, 370 U.S. 294 (1961), there may, in addition to the relevant market, also be a submarket delineated by "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id. at 325* (footnote omitted). If the magnetic ledger cards used in the Philips machines are viewed as a separate submarket, then plaintiff had 100% (or close to it) of the market in the United States before the buy-out, and defendants took over that 100% control thereafter.

Plaintiff argues that the outer boundaries of a product market are determined by the interchangeability of use or the cross-elasticity of demand between the product and its substitutes, citing *Brown Shoe Co. v. United States*, id. However, plaintiff's definition of this submarket as consisting of mlc's makes no economic sense. If magnetic ledger cards were interchangeable among the various machines and systems of competitors, Philips would have had less than 5% of that market. It is by viewing the product only from the perspective [*16] of its relation to the particular Philips system that a monopoly can be inferred.

Plaintiff argues that the cards are a distinct supply item and that a consumable product is distinct from the main product with which it is used, like any other ancillary product. It points out, for example, that gasoline is essential to the running of internal combustion engines and that time clocks cannot function without punch cards. Plaintiff's Reply Memorandum of Points and Authorities in Support of Its Cross Motion for Summary Judgment at 42. But

¹² These memoranda became available through inadvertence in a companion action, *General Business Systems v. North American Philips Corp.*, 699 F. 2d 965 (9th Cir. 1983), which will be discussed hereafter.

¹³ Plaintiff contends that defendants' gross sales are the measure of damages, since, purportedly, it would have had no costs whatsoever in selling the cards.

plaintiff's argument overlooks the fact that there is a mutual dependency in this case. The system could not function without the cards and the cards did not work in any other system. Even though the users of the Philips systems may have been locked into these data cards, that does not make the cards themselves a relevant market. See, e.g., *Kaplan v. Burroughs Corp.*, 611 F. 2d 286, 295 (9th Cir., cert. denied, 447 U.S. 924 (1980)) (the relevant market for computer processing services geared to a particular system consisted not only of current users of the system but also of all potential users of comparable systems). The "lock-in" theory of relevant [*17] market was also rejected in In *Re Data General Corp. Antitrust Litigation*, 529 F. Supp. 801 (N.D. Cal. 1981), where the court noted:

Under the "lock-in" theory, the market is defined not in terms of the competitive alternatives available to the potential customer when he makes his initial decision to purchase, but rather after the customer has already decided to purchase RDOS, and has thereafter become committed to that product. Such an approach to market definition is untenable, and submarkets based on customer commitment to a given product have been rejected by other courts as too narrow as a matter of law.

Id. at 820 (footnote omitted) (emphasis added).

Nor does the fact that plaintiff operated in a single market itself make that a relevant market for antitrust purposes. As the Fifth Circuit held in *Spectrofuge Corp. v. Beckman Instruments, Inc.*, 575 F. 2d 256, 282 (5th Cir. 1978), cert. denied, 440 U.S. 939 (1979), "[t]he fact that a company limits its competitive activity to a single firm's products (and at only one competitive level) cannot control the definition of the relevant market."

If the situation were not obvious enough, the recent Ninth Circuit decision [*18] in *General Business Systems, Inc. v. North American Philips Corp., supra*, 699 F. 2d 965, certainly disposes of the issue, since the product was the same and the defendants were the same. Indeed, plaintiff in that case was in a stronger position than this plaintiff since it was a competitor of the defendant for the sale of Philips' mlc's until, allegedly, the action of the defendants forced it out of the market.

In General Business Systems, the plaintiff had begun importing the cards from one of the two German manufacturers in early 1976.¹⁴ It then sold them in competition with the Philips for a period of time. The defendants then persuaded the German company to cease its shipments to General Business Systems ("GBS"), which in turn commenced the California litigation. The central focus of that case was whether the defendants had committed antitrust violations with respect to an alleged market for magnetic ledger cards compatible with the Philips system. The district court granted Philips's motion for summary judgment, finding that a relevant market for antitrust purposes did not exist in such a narrow field.¹⁵ The dismissal was appealed to the Ninth Circuit which, on January [*19] 28, 1983, unanimously affirmed the district court's decision, agreeing as a matter of law that there was no relevant market in Philips-compatible magnetic ledger cards. In reaching its conclusion, the Ninth Circuit made the following observations:

(1) During the 1970's Philips's share of the small business computer market never exceeded 5% and its magnetic ledger cards worked only in the Philips system. *Id. at 969.*

¹⁴ General Business Systems ("GBS") had been a Philips distributor for Northern California since 1972. It had agreed not to market competitive hardware. (Its area of operations was extended to St. Louis, Missouri, in 1974.) In 1978, Philips exercised a buy-out option, terminating the agency relationship.

In 1974, GBS contacted the German manufacturers and attempted to purchase the cards directly. One of the companies refused to deal with GBS, believing that it (the card manufacturer) had an exclusive dealing relationship with Philips. The other company, however, in 1976, began sales to GBS.

The litigation also concerned a counterclaim by Philips against GBS for dealing with a competing computer manufacturer.

¹⁵ The original complaint in this action was modeled on the General Business Systems complaint.

[*20] (2) With respect to the monopolization claim, the cards were produced in Germany, pursuant to stringent Philips specifications and were not sold for use in other manufacturers' computers and, indeed, the majority of dealers handling the cards dealt only in Philips products. [Id. at 972](#). (The court made extensive findings concerning the interrelationship between the manufacturer of the cards and Philips, which will be discussed below. [Id. at 969-70](#).)

(3) As noted previously, the nature of these cards' production resulted in a price several times as high as other systems' cards, thereby reducing the competitiveness of the Philips system, so that Philips was a victim and not a beneficiary of the high prices of its cards. [Id. at 973](#).

(4) The mlc's were sold separately from the computers because of the dynamics of use (after market), and not because of market differentiation. *Id.*

(5) The cards are an essential component of the system and that the computer was useless without the cards, whose quality determined the overall performance of the system. [Id. at 972-73](#).

(6) Philips was driven from the market by intense systems competition. Taken to its logical conclusion, plaintiff's [*21] argument concerning the single aspect of the product would mean that a manufacturer, facing competition against which it cannot prevail in the sale of its own product, could be found to monopolize the market for each unique component that went into the product. The court noted that "this is surely to lose sight of the forest because of fascination with the trees." [Id. at 975](#).

The crucial finding of the Ninth Circuit in General Business Systems was that "the undisputed facts permit only one conclusion, viz., that the market for mlcs cannot be separated from the general market for smalll business computer systems." [Id. at 972](#). The Ninth Circuit noted, as we already have, that because the cards were an essential component, the system was useless without them. The system was thus differentiable from other appliance-type items that could constitute a separate market, such as automobile air conditioners. The court also rejected a claim of attempted monopolization, finding that the plaintiff had made no showing of predatory conduct whatsoever. Indeed, as the court noted, the defendant competed "ineffectually in the market for small business computers and their accessory products." [*22] [Id. at 976](#).

Consequently, we conclude that MLC's monopolization claims against defendants must be dismissed. In doing so, we also note that its claim stems from a desire to retain a monopoly over an asserted market for itself. The loss of its own monopoly would not be an "injury of the type the antitrust laws were intended to prevent. . ." [Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489 \(1977\)](#).

Restraint of Trade

Both sides have cross-moved for summary judgment on the causes of action for restraint of trade. Essentially, it is plaintiff's contention that defendants entered into a conspiracy with the German manufacturers of the cards to boycott the plaintiff and exclude it from the market as a distributor of these cards. Plaintiff contends that defendants' motivation was to eliminate competition and to fix prices. Plaintiff alleges further that there had been two competitors for the distributorship business, PBSI and itself, and that by eliminating their competition, defendants obtained complete control of distribution. Defendants respond to these charges as follows:

- (1) There was no competitor to eliminate, since there was only a vertical arrangement [*23] with a single distributor.
- (2) Even if defendant did exclude plaintiff from this market, it was entitled to do so because of its contractual arrangements with the German manufacturers.

(3) If plaintiff has any cause of action at all, it sounds not in antitrust but rather in contract or business tort.¹⁶ See, e.g., *Reisner v. General Motors Corp.*, 511 F. Supp. 1167, 1178 n. 25 (S.D.N.Y. 1981), aff'd, 671 F. 2d 91 (2d Cir.), cert. denied, 51 U.S.L.W. 3256 (Oct. 4, 1982).

Vertical restraints, such as exclusive distributorships, have had an uneven history before the Supreme Court in recent years. In 1967, in *United States v. Arnold, Schwinn & Co.*, 388 U.S. 365 (1967), the Supreme Court held that vertical territorial and customer restraint were per se unlawful. However, ten years later, in *Continental T.V., Inc. v. GTE Sylvania Inc.* [*24] *Inc.*, 433 U.S. 36, 58 (1977), it backed away from that position and held that these same restraints are to be judged under the rule of reason.

We note initially that there is a factual disagreement as to whether the German manufacturers, upon the defendants' urging, had subsequently refused to deal with MLC. During the period in question, defendants issued some self-serving letters which indicate, they argue, that they were not attempting to prevent MLC from continuing in the market. However, we conclude that plaintiff has the better of this argument and will probably prevail in proving that, had a buy-out agreement not been consummated, defendants would have prevailed upon the German manufacturers to refuse to deal with plaintiff. Another alternative discussed by defendants' counsel was allowing plaintiff to purchase the cards and to be a distributor, but to compel it to purchase them through defendants at a markup, which would give defendants a price advantage. This suggestion was never adopted.

If, at the time in question, plaintiff and defendants had been competitors, and if defendants had no contractual control over the manufacturers' supplies, it is reasonably clear [*25] that a joint refusal to deal would have been a per se violation of the Sherman Act. See, e.g., *United States v. Hilton Hotels Corp.*, 467 F. 2d 1000 (9th Cir. 1972), cert. denied, 409 U.S. 1125 (1973). However, on the facts presented, the instant case is somewhat closer to a unilateral foreclosing of a dealer on exclusive distributorship grounds, a situation which might well not constitute an antitrust violation. See *Continental T.V., Inc. v. GTE Sylvania Inc.*, *supra*, 433 U.S. at 58. The only aspects of the instant case not in harmony with such a description are that the defendants were the manufacturers not of the cards themselves, but of the total system, and that there was an aftermarket in the sale of the cards. But these facts by themselves are not sufficient to constitute the antitrust violation that plaintiff is claiming.

The strongest argument that can be made in plaintiff's favor is that, although there may have been legal ways in which the defendants could, as a practical matter, have forced it out of the field, the method threatened was one that prevented plaintiff from becoming a potential competitor. Although a unilateral decision to terminate an exclusive dealership [*26] for any reason would not necessarily constitute a violation of the antitrust laws, it might under certain circumstances. Where the termination comes from the manufacturer of the component upon the insistence of the distributor of the system, such a situation might arguably be controlled by the reasoning in *Albrecht v. Herald Co.*, 390 U.S. 145 (1968).¹⁷ In Albrecht, the per se rule of illegality was applied to a maximum resale price ceiling imposed by a supplier to protect the public from an overcharging retailer who was insulated from price competition by virtue of an exclusive territory. Whether Albrecht applies here would depend on the weight accorded the fact that the termination in the instant case was instigated by the manufacturer-distributor of the overall product, rather than by the manufacturer of a specific component. This difference between the two situations could well be so critical as to prevent the Albrecht rule from applying here.

Even were Albrecht held to apply to this situation, defendants' conduct might nevertheless fail [*27] to constitute an antitrust violation under it. This is because Albrecht has tended to blur the distinctions between vertical and horizontal distributorships. As one noted commentator has observed:

¹⁶ See *supra* note 2.

As we noted earlier, plaintiff, as a sole vendor and distributor, would have been considered a monopolist were the magnetic ledger cards for Philips computers a relevant market. Consequently, in talking about unfair competition, plaintiff is not seeking to protect competition per se, but rather to protect its own position.

¹⁷ This is a much criticized opinion. See, e.g., Handler, Reforming the Antitrust Laws, *82 Colum. L. Rev.* 1287, 1299-1307 (1982).

HN2[] The termination of a dealer by a supplier for violation of a distribution restraint is, if it is a restraint at all, at most, a vertical one. It should not matter that the dealer was terminated by a supplier in part as a result of comments by that dealer's competitor. The restraint is still vertical. The fact that there are anticompetitive effects on intraband competition as a result of the termination is beside the point. That is true with respect to all vertical restraints. . . . The simple fact is that many dealer termination cases, because they involve unilateral refusals to deal, would not even survive the initial pleadings (or, at best, summary judgment) stage -- much less a full rule of reason analysis -- if not for the creative conspiracy concepts of Albrecht.

Handler, Reforming the Antitrust Laws, [82 Colum. L. Rev. 1287, 1305 \(1982\)](#).

The simple facts of the instant case demonstrate the point made above. Defendants gave the card business to plaintiff. Plaintiff then [*28] sold it back to the defendants, and defendants continued to sell the same proportion of the product in the market that plaintiff had. This, of necessity, eliminated plaintiff from the market. However, it is not of itself sufficient for a Sherman Act violation.

Plaintiff argues that defendants took this step to raise the price of the cards, which is to say to fix prices, and to make a large profit for themselves.¹⁸ For a period of time, plaintiff held off pressing this claim because of the companion litigation described above involving GBS. The claim of restraint of trade was rejected in that case for a number of reasons, including the fact that the defendants were not engaged in anti-competitive activity with others at the same level of the marketing scale. The court, applying a rule of reason, stated that restraints solicited by a distributor, but implemented by a manufacturer, are not automatically per se violations of the Sherman Act unless they "clearly had or [were] likely to have a pernicious effect on competition and lacked any redeeming virtue." [General Business Systems v. North American Philips Corp., supra, 699 F.2d at 978](#) (citations omitted). As the First Circuit [*29] held in [A.D.M. Corp. v. Sigma Instruments, Inc., 628 F.2d 753, 754 \(1st Cir. 1980\)](#), **HN3**[] "if the sale of assets had an affect on competition, it would have occurred whether or not appellant was harmed. There is thus lacking the essential connection between injury and the aims of the antitrust laws necessary to give appellant standing."

Plaintiff relies heavily on [Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164 \(3d Cir. 1979\)](#). In that case, the Third Circuit found that a per se violation of the Sherman Act might exist where a distributor convinces its supplier to cease dealing with a competing distributor. However, many cases have since concluded that **HN4**[] a per se violation of the antitrust laws, predicated upon an alleged vertical combination, cannot stand absent a showing of some form of price fixing or resale price maintenance. See, e.g., [Borger v. Yamaha International Corp., 625 F.2d 390, 396-98 \(2d Cir. 1980\)](#). Under such decisions, defendants could not have been guilty of an antitrust violation unless their action was intended to affect the [*30] entire market for all magnetic ledger cards, rather than merely that for their own. Threatening a supplier with a discontinuation of business if it deals with a competitor of the distributor is not, perforce, an antitrust violation. [Determined Productions, Inc. v. R. Dakin & Co., 514 F. Supp. 645 \(N.D. Cal. 1979\)](#), aff'd mem., 649 F.2d 866 (9th Cir. 1981).

As indicated earlier, the Ninth Circuit in General Business Systems rejected an unfair competition claim similar to that made by plaintiff here. Among its critical findings was that the district court was correct in concluding that the market for Philips-type cards was not insulated from the competitive struggle between computer systems, so that

Philips had little or no power to raise the price of its mlcs without reducing its profits because any such increase would diminish sales of its computer system and very likely adversely affect aggregate profits. Were mlc prices significantly increased, computer system buyers quickly could shift to other sellers who, in turn, could profitably expand their output to meet the new demand. We agree with the district court that the undisputed facts permit only one conclusion, viz., that [*31] the market for mlcs cannot be separated from the general market for small business computer systems.

[General Business Systems, supra, 699 F.2d at 972.](#)

¹⁸ This contention flies in the face of the fact that defendants were actually hurt by the cost of their cards rather than helped.

The General Business Systems court also rejected the claim that Philips's exclusive dealing arrangement with the German companies violated [section 1](#) of the Sherman Act under either a per se or rule of reason analysis, on the ground that the defendants were not engaged in concerted anticompetitive activity with others at the same level of market organization. The court noted that

[e]xclusive dealerships usually escape the proscriptions of [section 1](#) because, as already indicated, they establish a vertical relationship among firms that do not compete with each other. See [A.H. Cox & Co. v. Star Machinery Co., 653 F. 2d 1302, 1306 \(9th Cir. 1981\)](#); [Gough v. Rossmoor Corp., 585 F. 2d 381, 387 \(9th Cir. 1978\)](#), cert. denied, 440 U.S. 936 (1979).

HN5 Restraints solicited by a distributor but implemented by a manufacturer are not automatically per se violations.

Id. at 978.

Another basis for the court's finding was the conclusion that Philips had a contractual right to designate the distributors for the cards manufactured in Germany. [*32] In this action, however, plaintiff has offered some evidence indicating that such an exclusive distributorship right did not exist. Affidavit of John J. Fitzsimmons at PP15, 16, 17 & 19. Plaintiff also argues that the cooperation of the manufacturers does not constitute an exclusive distributorship, but rather a form of boycott. Furthermore, plaintiff claims that, in contrast to the usual manufacturer-distributor relationship, the distributor in this instance was a powerful company capable of controlling the manufacturers.

Exclusive dealing arrangements have been a source of mischief in the antitrust laws for a considerable period of time. Indeed, the recent issuance of the second edition of the Restatement of Contracts, dealing with covenants in restraint of trade, has promoted further discussion over the subject because of its deletion of exclusive dealing arrangements. See, e.g., Handler & Lazaroff, Restraint of Trade and the *Restatement (Second) of Contracts*, 57 N.Y.U.L. Rev. 669, 707-09.¹⁹ Of course, the obtaining of the exclusive dealership does not create a monopoly, since the relevant market, business computers, is one in which the competition actually occurs. See, [*33] e.g., [Packard Motor Car Co. v. Webster Motor Car Co., 243 F. 2d 418, 420](#) (D.C. Cir.), cert. denied, 355 U.S. 822 (1957).

Despite the above, the Second Circuit's opinion in [Oreck v. Whirlpool Corp., 563 F. 2d 54 \(2d Cir. 1977\)](#), cert. denied, 439 U.S. 946 (1978), reh. denied, 439 U.S. 1104 (1979), suggests that **HN6** in applying a rule of reason to the termination of an exclusive distributorship, anticompetitive impact on the relevant market may not be the only consideration and that a conspiracy to eliminate a distributor may be sufficient.²⁰ This approach is more acceptable in the instant case if MLC is viewed not merely as defendants' exclusive distributor but also as a potential competitor in sales of replacement cards to existing owners. Defendants respond even if such a theoretical cause of [*34] action could be constructed, one is not factually applicable here since, as the Ninth Circuit found, there was a preexisting contractual agreement between Philips and the German manufacturers under

¹⁹ Professor Handler argues that "[i]n sum, the anticompetitive consequences that flow from exclusive representation agreements are not so pernicious as to require or justify the application of a per se rule of illegality either at common law or under federal [antitrust law](#)." Handler & Lazaroff, Restraint of Trade and the *Restatement (Second) of Contracts*, 57 N.Y.U. L. Rev. 669, 712.

²⁰ The court's actual statement was

"Oreck was required to show not only conspiratorial conduct by Sears and Whirlpool in order to recover under [§ 1](#) of the Sherman Act but also credible proof that the net result and effect of the allegedly conspiratorial conduct of the defendants was anticompetitive in the vacuum cleaner industry as a whole or that the conspiracy was designed to drive Oreck out of the vacuum cleaner business."

[Oreck Corp. v. Whirlpool Corp., supra, 563 F. 2d at 58](#) (emphasis added).

which they would distribute only to those companies authorized by Philips. [General Business Systems, supra, 699 F.2d at 969-70.](#)

The Ninth Circuit, in General Business Systems, determined that there had been no restraint of trade on the basis of the above-mentioned distribution agreement between Philips and the German manufacturers. The court also found that, regardless of whether this arrangement amounted to an exclusive dealing relationship, the German manufacturers sold exclusively [*35] to Philips affiliates or designees. [Id. at 970.](#) In addition, the court found that there were alternative sources of mlc's from other suppliers. [Id. at 979.](#) Finally, in light of its view of the relevant market, the Ninth Circuit found that there was not sufficient evidence to indicate that Philips used a worldwide market position to coerce the German manufacturers into refusing to deal with GBS.²¹ [Id. at 978-79.](#)

Despite this rather persuasive authority, we decline to grant defendants' motion for summary judgment on the restraint of trade counts. The documents which allegedly establish an exclusive dealing arrangement between the German manufacturers and Philips or its designees were not produced in the discovery of this case, but came out, rather, in the General Business Systems action. Plaintiff has produced certain evidence in opposition to defendants' motion, indicating that some of those involved in the dealings between Philips and the German manufacturers did not believe there to [*36] be any exclusive distributorship arrangement between them, or that there was any basis in trade secrets or other assistance which justified such an agreement. Affidavit of John J. Fitzsimmons at PP15, 16, 17 & 19. An issue also is raised as to whether, assuming such agreements existed after 1975, they were in existence during the period MLC dealt with the defendants.²² (The California courts were aware of the fact that MLC was the distributor until 1975, speaking of it as a Philips designee.) Plaintiff also argues that certain aspects of the California case are based on factual findings which are not controlling in this action. Plaintiff's Reply Memorandum of Points and Authorities in Support of its Cross Motion for Summary Judgment at 15-25.

[*37] In the final analysis, we may find, as did the Ninth Circuit in General Business Systems that (1) the plaintiff has not proven a violation of [section 1](#) of the Sherman Act because it failed to show that defendants were engaged in concerted anticompetitive activities on the same level as itself, and (2) exclusive dealerships escape the proscriptions of [section 1](#), unless they have a pernicious effect on competition and lack any redeeming value.²³ We are also reasonably confident that the retaking of the distributorship was not for the purpose of fixing prices on the cards, since that was a self-defeating technique with respect to sales of the overall system. In sum, we may find that this case is controlled by the decision in *Continental T.V., Inc. v. GTE Sylvania Inc.*, 537 F.2d 980 (9th Cir. 1976), aff'd [433 U.S. 36 \(1977\)](#), where the Ninth Circuit held that "[t]here is a veritable avalanche of precedent to the effect that, absent sufficient evidence of monopolization, a manufacturer may legally grant such an exclusive franchise even if this effects the elimination of another distributor." [Id. at 997](#) (Citations omitted).

[*38] For the time being, and in light of the very high threshold for the granting of summary judgment in this Circuit, see. e.g., [Wilson Rich v. Don Aux Associates, Inc., 524 F. Supp. 1226, 1229 \(S.D.N.Y. 1981\)](#), we deny the restraint of trade portion of the motion and grant only that part which seeks summary judgment on the monopoly counts (including the sixth count under brought section 7 of the Clayton Act).²⁴ Defendants' motion is, therefore, granted in part and denied in part, and plaintiff's cross-motion is denied.

²¹ The court did, however, indirectly recognize the possibility of pressure to prevent dealing within the United States market. [General Business Systems, supra, 699 F.2d at 979.](#)

²² On the other hand, defendants have introduced evidence that their specifications for the manufacture of the cards had a legend in German which stated as follows: "All rights expressly reserved. Reproduction or disclosure to third parties in whatever form is forbidden without the written consent of the owner." Affidavit of Thomas W. Dickson at 2. Defendants have also offered evidence suggesting that the exclusive distributorship arrangement existed as early as 1969.

²³ Under such a conclusion, plaintiff may still have some remedy against defendants, but it does not sound in antitrust.

²⁴ The section 7 claim must fail because the relevant product market does not consist of mlc's, so that there could be no substantial lessening of competition in the relevant market by the acquisition of the card distributorship. Cf. [United States v. General Dynamics Corp., 415 U.S. 486 \(1974\)](#) (coal producer found not to have violated section 7 of the Clayton Act because

Civil Procedure > Parties > Intervention > Time Limitations

HN1[] Intervention, Intervention of Right

Fed. R. Civ. P. 24(a) sets up a four-prong test for intervention of right: (1) The application for intervention must be timely; (2) the applicant must have an interest relating to the property or transaction which is subject of the action; (3) the applicant must be so situated that disposition of the action may, as a practical matter, impair or impede his ability to protect that interest; (4) the applicant's interest must be inadequately presented by the existing parties to the suit. In order to intervene as a matter of right, all four of the aforementioned requirements must be met.

Civil Procedure > Parties > Intervention > Intervention of Right

Civil Procedure > Parties > Intervention > General Overview

HN2[] Intervention, Intervention of Right

The "interest" requirement contained in *Fed. R. Civ. P. 24(a)* cannot be viewed separately from the third requirement of intervention of right, that of impairment of the interest.

Civil Procedure > Parties > Intervention > Intervention of Right

Civil Procedure > Parties > Intervention > General Overview

HN3 Intervention, Intervention of Right

The final requirement for intervention as a matter of right is that the applicant's interest be inadequately represented by the existing parties to the suit. According to the U.S. Supreme Court, this requirement of the rule is satisfied if the applicant shows that representation of his interest may be inadequate. The burden of making that showing should be treated as minimal.

Civil Procedure > Parties > Intervention > Intervention of Right

Civil Procedure > Parties > Intervention > General Overview

HN4 Intervention, Intervention of Right

Where there is a likelihood that applicants for intervention, if permitted to intervene, would more vigorously represent themselves and present more compelling arguments on their own behalf, this factor is sufficient to fulfill the requirement of inadequate representation under [Fed. R. Civ. P. 24\(a\)](#).

Civil Procedure > Parties > Intervention > Intervention of Right

Civil Procedure > Parties > Intervention > General Overview

HN5 Intervention, Intervention of Right

Numerous cases recognize the inadequacy of governmental representation of the interests of private parties for purposes of [Fed. R. Civ. P. 24\(a\)](#).

HN6 Specific Cases Removed, Federal Questions

A party seeking removal bears the burden of satisfying each of the following conditions: (1) a federal question must be an essential element of plaintiff's cause of action; (2) the federal question that is the predicate for removal must be disclosed upon the face of the complaint, unaided by the answer or by the petition for removal; and (3) the federal question raised must be a substantial one.

HN10 [blue icon] **Administrative Law, Judicial Review**

The language of the Bank Merger Act of 1966 (the 1966 Act), its legislative history and the relevant case law all confirm that it was intended to impose a uniform federal standard to be applied in any judicial review of a bank merger of insured banks, be they state or federally chartered. Indeed, state courts which are asked to review a proposed merger under state antitrust laws are required to apply the federal standards set forth in the 1966 Act. There is no statement in the legislative history of the 1966 Act or any case law which would suggest or imply that a state court could continue to apply state antitrust standards following the enactment of the 1966 Act with respect to

actions challenging bank mergers. A House report summarizes the legal effect of the bill as follows: The bill would establish a single set of standards for the consideration of future mergers by the banking supervisory agencies, the Department of Justice, and the courts under the antitrust laws. Thus, there is no question but that is was Congress's intent to create a pervasive regulatory scheme designed to assure "uniformity" among the federal banking supervisory agencies, the Department of Justice and the judiciary through the establishment of a single set of standards for testing the legality of all bank mergers.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

HN11[] Removal, Specific Cases Removed

The courts will not permit plaintiff to use artful pleadings to close off defendant's right to a federal forum. A removal court will always seek to determine whether the real nature of the claim is federal, regardless of plaintiff's characterization.

HN15 [blue icon] Preliminary Considerations, Removal

If a federal officer acts to remove a cause of action against him to federal court, the power of the state court is ended not only as to his case, but as to any other removed cases which have been consolidated with his case. Moreover, even if subsequent to removal, the federal officer is eliminated from the case, the federal court does not lose jurisdiction over the related consolidated cases. [28 U.S.C.S. § 1442\(a\)\(1\)](#) authorizes removal of the entire case even though only one of its controversies might involve a federal officer or agency; thus [§ 1442\(a\)\(1\)](#) creates a species of ancillary jurisdiction over the nonfederal elements of the case. In other instances of ancillary jurisdiction over the nonfederal elements of the case. In other instances of ancillary jurisdiction elimination of the "principal" controversy in a case does not deprive the court of power to dispose of the ancillary matters even though the court would not have had jurisdiction over these matters but for ancillarity.

Banking Law > ... > Banking & Finance > Commercial Banks > Mergers & Consolidations

Civil Procedure > Trials > Consolidation of Actions

HN16 [blue icon] Commercial Banks, Mergers & Consolidations

[Fed. R. Civ. P. 42\(a\)](#) provides in part that when actions involving a common question of law or fact are pending before the court, it may order a joint hearing or trial of any or all the matters in issue in the actions and it may order all the actions consolidated.

Civil Procedure > Trials > Consolidation of Actions

HN17 [blue icon] Trials, Consolidation of Actions

The purpose of [Fed. R. Civ. P. 42\(a\)](#) is to give the court broad discretion to decide how cases on its docket are to be tried so that the business of the court may be dispatched with expedition and economy while providing justice to the parties. In the Fifth Circuit, district judges have been urged to make good use of [Rule 42\(a\)](#) in order to expedite the trial and eliminate unnecessary repetition and confusion.

Civil Procedure > Trials > Consolidation of Actions

HN18 [blue icon] Trials, Consolidation of Actions

The fact that there are some questions not common to all the actions does not bar consolidation so long as there is at least one common question.

Opinion by: SCHWARTZ

Opinion

ORDER

This matter came on for hearing before the Court on May 4, 1983, on the following motions of the above-captioned parties: (1) the motions of the bank defendants in C.A. 83-1908 to intervene in each of the other two suits above; (2) the motions of plaintiff to remand to state court both the suit against the bank defendants, C.A. 83-1908, and the suit against Mr. Wagner, C.A. 83-2261; (3) the motions of [*2] the bank defendants in C.A. 83-1908 to consolidate all three suits above; (4) the motion of plaintiff for ex parte consideration of motion for summary judgment and of

motion for preliminary injunction in the suit against the bank defendants, C.A. 83-1908; and (5) the motion of plaintiff to schedule a hearing on a preliminary injunction in the suit against Mr. Conover, C.A. 83-2021; (6) the motion of plaintiff for shortened discovery in the suit against the bank defendants; and (7) the motion of plaintiff to strike in the suit against the bank defendants.

At the hearing, pursuant to [F.R.C.P. 42\(a\)](#), the Court ordered initially that there would be a joint hearing and trial of all matters at issue. Following oral argument, and considering the record in this matter and the applicable law, for the reasons hereinafter set out, the Court ruled as follows on the above-numbered motions: (1) granted; (2) denied; (3) granted; (4) denied; (5) granted, with hearing set for May 17, 1983 at 9:00 A.M. on the preliminary injunction; (6) granted pursuant to a schedule to be arranged by the parties and approved by the Court; and (7) denied.

Before setting forth the bases for the Court's rulings [*3] on the various motions heard, a background history of the case is in order.

On November 9, 1982, defendants First Commerce Corporation ("FCC") and New Orleans Bancshares, Inc. ("NOBS") entered into Agreement and Plan of Reorganization ("the Agreement"), whereby the Bank of New Orleans and Trust Company ("BNO"), a state-chartered bank, would be merged into First National Bank of Commerce ("FNBC"), a national bank, with FNBC being the surviving institution.¹ In accordance with federal law, [12 U.S.C. § 1828\(c\)](#) and [12 U.S.C. § 215\(a\)](#), application for approval to consummate this transaction was submitted to the United States Comptroller of the Currency ("OCC"). Following receipt of competitive reports from the Attorney General of the United States and the Board of Governors of the Federal Reserve System, each of whom reported that the transaction would not be in violation of the federal antitrust laws, and after receiving public comment, the OCC issued its approval on April 12, 1983. (Exhibit A).

[*4] On February 25, 1983, prior to the OCC having approved the proposed merger, plaintiff's counsel filed suit in this Court on behalf of Frederic P. Aiken ("Aiken") against defendants, which was docketed as Civil Action No. 83-866 and allotted to Section "A" of the Court. This suit complained that the proposed merger constituted a violation of [Sections 1 and 2](#) of the Sherman Act, [15 U.S.C. §§ 1, 2](#), as well as Section 7 of the Clayton Act, [15 U.S.C. § 18](#), and sought to enjoin the transaction. Not insignificantly, it is these same antitrust statutes, as modified by provisions of the Bank Merger Act of 1966, [12 U.S.C. § 1828\(c\)](#), which must be found not to be violated by the merger, in order for the OCC to issue its approval.

Shortly after filing the first suit in federal court, plaintiff's counsel filed a second suit on behalf of Aiken in the Civil District Court for the Parish of Orleans, State of Louisiana, No. 83-3265, which also sought to enjoin the merger. The facts recited in the state court suit were identical in all material respects to the facts recited in the first suit filed on behalf of Aiken in this Court. The only difference in the two suits was the fact that [*5] plaintiff claimed a violation of the Louisiana antitrust laws in the state court action.

On March 7, 1983, at a status hearing in the federal action complaint, this Court advised counsel for plaintiff, that in the event a preliminary injunction were granted, a substantial bond would be imposed, in accordance with [15 U.S.C. § 26](#). On March 14, 1983, the suit filed on behalf of Aiken in the state court was removed to this Court, was docketed as Civil Action No. 83-1195, and was subsequently transferred to Section "A" as a case related to Civil Action No. 83-866. On March 18, 1983, a motion was filed with this Court to withdraw Aiken as the plaintiff in Civil Action No. 83-866 and to substitute Louis R. Koerner, Jr., plaintiff's counsel, as the plaintiff in that action. This

¹ Pursuant to the Agreement, NOBS will first merge into NOBS Financial Corporation, all of the stock of which will be owned by BNO (the "preliminary merger"). As a result of this preliminary merger, shareholders of NOBS will become shareholders of BNO and NOBS will cease to exist. At this point in the reorganization BNO stock will no longer be owned by NOBS or by any other bank holding company. BNO, which after the preliminary merger will be a publicly held state banking association, will then merge into FNBC, a national banking association, and the separate existence of BNO will cease pursuant to [12 U.S.C. § 215a\(e\)](#). Thus, prior to the time of the merger challenged herein, BNO will be a separate and independent state bank, unaffiliated with any bank holding company.

Court denied the motion of Mr. Koerner to substitute himself as plaintiff and dismissed the suit with prejudice as to Aiken in Civil Action Nos. 83-866 and 83-1195.

During the conference on March 18, 1983, plaintiff's counsel advised the Court that he believed that he had "another plaintiff" and that he would refile the suit in state court. Subsequently, a state court action on behalf of Stephen R. Vial [*6] ("Vial") was filed by Mr. Koerner on March 22, 1983, in the Civil District Court for the Parish of Orleans, Docket No. 83-4834. The state action on behalf of Vial alleges the same facts as the two prior actions filed on behalf of Aiken, and , like Aiken's state court suit, alleges that the proposed bank merger violates the Louisiana antitrust laws, LSA-R.S. 51:122 et seq. In addition, the state court action filed on behalf of Vial alleges, for the first time, that the proposed bank merger violates the Louisiana Bank Holding Company Act, LSA-R.S. 6:1001 et seq. Similarly, the Vial suit also seeks to enjoin the proposed merger.

Shortly thereafter, on April 18, 1983, Mr. Koerner instituted suit on behalf of Vial against C. T. Conover, Comptroller of the Currency, in the Civil District Court for the Parish of Orleans, Deocket No. 83-4834, alleging many of the same facts and reciting the same state statutes as are present in the instant litigation, plus the further allegations that the OCC violated provisions of the National Bank Act, [12 U.S.C. § 36](#), the Bank Merger Act, [12 U.S.C. § 1828\(c\)](#), as well as the Administrative Procedure Act, [5 U.S.C. § 701](#), by allegedly failing to take [*7] into consideration the comments of plaintiff and his counsel opposing the merger.² This suit also attempts to enjoin the merger by seeking to nullify the OCC's approval.

The Vial suit against the banks was removed to this Court on April 13, 1983, on the grounds that plaintiff's claim was entirely federal in nature. On April 20, 1983, the OCC also removed his suit to this Court, Civil Action No. 83-2021, pursuant to [28 U.S.C. § 1442\(a\)\(1\)](#).

On April 27, 1983, Vial instituted suit in the 19th [*8] Judicial District Court for the Parish of East Baton Rouge, Docket No. 266-248, against Hunter O. Wagner, Jr., Commissioner of Financial Institutions of Louisiana ("Commissioner"). This suit seeks effectively to enjoin the consummation of the merger by seeking to have the act of the Commissioner to issue a "Certificate of Merger" declared illegal. On May 2, 1983, the Commissioner removed this suit to the United States District Court for the Middle District of Louisiana, which Court that same day transferred the matter to this Court.

Thus, at this juncture, there are three separate actions pending in federal court instituted by plaintiff against separate defendants or groups of defendants, each directly seeking to prevent the proposed merger herein.

1. Motions of Bank Defendants to Intervene

Defendants move for intervention of right in both the suit against the OCC and the suit against the Commissioner Wagner, pursuant to [F.R.C.P. 24\(a\)](#).

The Fifth Circuit, in [International Tank Terminals, Ltd. v. M/V Acadia Forest](#), 579 F.2d 964, 967 (5th Cir. 1978), has held that [HN1](#) Rule 24(a) sets up a four-prong test for intervention of right:

- (1) The application for intervention must [*9] be timely; (2) the applicant must have an interest relating to the property or transaction which is subject of the action; (3) the applicant must be so situated that disposition of the action may, as a practical matter, impair or impede his ability to protect that interest; (4) the applicant's interest must be inadequately presented by the existing parties to the suit.

² It should be noted by way of background that in early March 1983, Mr. Koerner, acting as counsel for Aiken, submitted a comment to the OCC opposing the approval of the application to merge on the grounds that the merger was violative of Section 7 of the Clayton Act and [Sections 1](#) and [2](#) of the Sherman Act. As recently as March 20, 1983, Mr. Koerner filed additional comments in opposition to the merger with the OCC urging alleged violation of federal [antitrust law](#) and state laws. It is not clear whether Mr. Koerner was representing himself or either Aiken or Vial in connection with the submission to the OCC, since the most recent submission occurred inter-plaintiff, as it were.

In order to intervene as a matter of right, all four of the aforementioned requirements must be met. [*Id. at 967.*](#)

It is obvious and beyond argument that the motions to intervene have been timely filed.

The second requirement that must be fulfilled in order to intervene as of right is that of an "interest" relating to the property or transaction which is the subject of the action.

Clearly, each of the applicants has the requisite interest in the subject of this lawsuit to be entitled to intervene herein as of right. The issue of this lawsuit is the legality and permissibility of the proposed merger between FNBC and BNO. Not only do applicants have property interests involved herein, but they are inextricably entangled in the transaction which is sought to be enjoined by this lawsuit. Applicants may have [*10] an even greater interest in this lawsuit than the original defendant himself; they clearly have a greater interest than the plaintiff. Surely applicants have the direct and litigable interest in the lawsuit required by [F.R.Civ.P. 24\(a\)](#) to entitle them to intervene as of right. [Donaldson v. U.S., 400 U.S. 517 \(1971\); Nuesse v. Camp, 385 F.2d 694 \(D.C. Cir. 1976\).](#)

[HN2](#) The "interest" requirement contained in [Rule 24\(a\)](#) cannot be viewed separately from the third requirement of intervention of right, that of impairment of the interest. [Natural Resources Defense Counsel, Inc. v. The United States Nuclear Regulatory Commission, 578 F.2d 1341, 1345 \(10th Cir. 1978\).](#) Clearly, the applicants' ability to protect their interest would be impaired or impeded by the disposition of this action. A decision in this case will, for all practical purposes, determine the applicants' right and ability to go forward with the proposed merger.

[HN3](#) The final requirement for intervention as a matter of right is that the applicant's interest be inadequately represented by the existing parties to the suit. According to the U.S. Supreme Court, this requirement of the rule is satisfied "if the applicant shows that [*11] representation of his interest "may be" inadequate. . . ." [Trbovich V. United Mine Workers of America, 404 U.S. 528](#), 538 N. 10 (1972). In Trbovich, the Supreme Court further ruled that "the burden of making that showing should be treated as minimal." *Id.* (Emphasis supplied.)

In the two suits at issue, neither plaintiff nor the defendants can or will adequately represent any of the applicants' interest in the subject of the litigation. The plaintiff's interests are completely adverse to those of each of the applicants. The interests of the Comptroller and the Commissioner are also dissimilar to those of the applicants. Both are public officials charged with the duty of protecting the interests of the public generally. As such, this duty would conflict with its ability to represent the more particularized interests of the applicants in this lawsuit. The Comptroller is not concerned with protecting the applicants' interests but with protecting the interests of the public at large. **[HN4](#)** There is a likelihood, therefore, that the applicants, if permitted to intervene in this suit, would more vigorously represent themselves and present more compelling arguments on their own behalf. The [*12] courts have held this factor sufficient to fulfill the requirement of inadequate representation. See, e.g., [N.Y. Pub. I.R.G. v. Regents, 516 F.2d 350 \(2d Cir. 1975\)](#). Moreover, **[HN5](#)** numerous cases recognize the inadequacy of governmental representation of the interests of private parties. See, e.g., [National Farm Lines v. I.C.C., 564 F. 2d 381 \(10th Cir. 1977\); Planned Parenthood v. Citizens for COMM. ACTION, 558 F.2d 861 \(8th Cir. 1977\); Holmes v. Government of Virgin Islands, 61 F.R.D. 3 \(D. St. Croix 1973\); General Motors Corp. v. Burns, 50 F.R.D. 401 \(D. Hawaii 1970\).](#)

Therefore, since the bank defendants satisfy all requirements necessary for intervention of right, the motions to intervene in plaintiff's suits against the Comptroller and the Commissioner are granted.

2. Motions of Plaintiff to Remand

Plaintiff has moved to remand based on the fact that his complaints in both the suit against the banks and the suit against the state commissioner contain no allegations other than violations of the laws of Louisiana. Defendants contend, on the other hand, that the complaints reveal the existence of a federal question which entitles them to removal.

[HN6](#) A party seeking removal [*13] bears the burden of satisfying each of the following conditions: (1) a federal question must be an essential element of plaintiff's cause of action; (2) the federal question that is the predicate for

removal must be disclosed upon the face of the complaint, unaided by the answer or by the petition for removal; and (3) the federal question raised must be a substantial one. *Gully v. First National Bank of Meridian*, 299 U.S. 109 (1936); *Hagans v. Lavine*, 415 U.S. 528 (1974); *Maxwell v. First National Bank of Monroeville*, 638 F.2d 32 (5th Cir. 1981); In *Re Carter*, 618 F.2d 1093 (5th Cir. 1980); *Matter of Marriage of Smith*, 549 F. Supp. 761 (W.D. Tex. 1982).

In this case, plaintiff's state court petitions, on their face, necessarily raise a federal question under [HN7](#)[] the Bank Merger Act of 1966, 80 Stat. 7, Pub. L. 89-356, [12 U.S.C. § 1828\(c\)](#). That law provides:

In any judicial proceeding attacking a merger transaction approved under paragraph (5) on the ground that the merger transaction alone and of itself constituted a violation of any antitrust laws other than [section 2](#) of Title 15 [[section 2](#) of the Sherman Antitrust Act], the standards applied by the Court shall be identical with [*14] those that the banking agencies are directed to apply under paragraph (5). [12 U.S.C. § 1828\(c\)\(F\)](#).[HN8](#)[]

These standard set forth in the 1966 Act are as follows:

The responsible agency shall not approve --

(A) any proposed merger transaction which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(B) any other proposed merger transaction whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless it finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served. [12 U.S.C. § 1828\(c\)\(5\)](#).[HN9](#)[]

Subparagraph (A) of this section tracks the language of the Sherman Antitrust Act, [Section 2](#), [15 U.S.C. § 2](#), and subparagraph (B) of this section tracks the language of [Section 1](#) of the Sherman Act and Section 7 of the Clayton Act, [15 U.S.C. §§ 1, 18](#). In addition, [*15] the last sentence of this section provides that even a merger where the effect "may be substantially to lessen competition" shall be approved if the anticompetitive effects are "clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served."

[HN10](#)[] The language of the Bank Merger Act of 1966, its legislative history and the relevant case law all confirm that it was intended to impose a uniform federal standard to be applied in any judicial review of a bank merger of insured banks, be they state or federally chartered. See, e.g., [Washington Mutual Savings Bank v. Federal Deposit Insurance Corporation](#), 482 F.2d 459 (9th Cir. 1973).

Indeed, state courts which are asked to review a proposed merger under state antitrust laws are required to apply the federal standards set forth in the 1966 Act. There is no statement in the legislative history of the 1966 Act or any case law which would suggest or imply that a state court could continue to apply state antitrust standards following the enactment of the 1966 Act with respect to actions challenging bank mergers. House Report (Banking and Currency Committee) [*16] No. 1221, January 24, 1966, summarized the legal effect of the bill as follows: "The bill would establish a single set of standards for the consideration of future mergers by the banking supervisory agencies, the Department of Justice, and the courts under the antitrust laws . . . U.S. Code Cong. & Admin. News 1860 (1966)."

Thus, there is no question but that is was Congress' intent to create a pervasive regulatory scheme designed to assure "uniformity" among the federal banking supervisory agencies, the Department of Justice and the judiciary through the establishment of a single set of standards for testing the legality of all bank mergers.

Moreover, as the term "antitrust laws" in the Bank Merger Act is not limited to federal antitrust laws, since the Act defines the term "antitrust laws" as the Sherman Act, the Clayton Act, and "any other acts in pari materia," U.S.

Code Cong. & Admin. News at 1865, a state court proceeding testing the legality of a bank merger must in its decision yield to the standards set forth in the Bank Merger Act. Thus, any judicial review of the instant bank merger will involve the interpretation and application of federal law and is therefore within [*17] the federal question jurisdiction of this Court.

An examination of plaintiff's state court petitions demonstrates that all the operative facts relate to the pending merger of the BNO into the FNBC. While plaintiff mentions no federal statute in his state court proceedings and asserts that he does not rely or plan to rely on federal law, the facts and allegations in his pleadings disclose a claim cognizable under federal law. [HN11](#)[¹¹] The courts will not permit plaintiff to use artful pleadings to close off defendant's right to a federal forum. A removal court will always seek to determine whether the real nature of the claim is federal, regardless of plaintiff's characterization. [*Federated Department Stores, Inc. v. Moitie, 452 U.S. 394, 101 S. Ct. 2424, 2427, n.2 \(1981\)*](#).

Simply stated, plaintiff seeks through his three separate proceedings only one goal: to prevent a bank merger by substituting criteria for such other than the scheme devised by Congress to assure a uniform method of providing for mergers of insured banks.³ To conclude that there is no federal jurisdiction here would require this Court to disregard a century and a half of case law beginning with *McCulloch v. Maryland* [*18] which has established that [HN12](#)[¹²] the regulations of the National Banking System are a matter of federal law and preempt any state law to the contrary. See e.g., [*First National Bank of Logan, Utah v. Walker Bank and Trust Co., 385 U.S. 252 \(1966\)*](#); [*Franklin National Bank v. New York, 347 U.S. 373, 378 \(1954\)*](#); [*Mercantile National Bank v. Langdeau, 371 U.S. 555, 558-59 \(1962\)*](#).

Therefore, this Court concludes that a substantial federal question exists in this case which entitles defendants to removal.

Finally, [*19] to the extent that plaintiff raises any non-federal claims in these suits, [HN13](#)[¹³] such claims are within the pendent jurisdiction of this Court, as being closely related to and arising out of a common nucleus of operative facts upon which the federal claims are based. [*Gibbs v. United Mine Workers, 383 U.S. 715, 725 \(1966\)*](#). Considerations of judicial economy, expense, and convenience and fairness to the litigants compel this Court to thus exercise its discretion to find pendent jurisdiction over such non-federal claims. [*Id. at 726*](#).

By instituting separate actions on the same factual predicate, plaintiff has attempted to split whatever causes of action he had in order to get three bites of the apple. [HN14](#)[¹⁴] Courts have long condemned the practice of splitting a single cause of action, the practice of bringing only some of the theories of recovery applicable to a single cause of action in a proceeding, or suing only some of the potential defendants. See e.g., [*Norman Tobacco and Candy Co. v. Gillette Safety Razor Co., 295 F.2d 362 \(5th Cir. 1961\)*](#); [*Harper Plastics, Inc. v. Amoco Chemicals Corp., 657 F.2d 939 \(7th Cir. 1981\)*](#). Unless this Court asserts its removal jurisdiction and hears all the theories [*20] of recovery against all of the potential defendants, those defendants, as well as the courts, will be subjected to a massive waste of time and energy.

Furthermore, extensive precedent supports the proposition that [HN15](#)[¹⁵] if a federal officer acts to remove a cause of action against him to federal court, the power of the state court is ended not only as to his case, but as to any other removed cases which have been consolidated with his case. Moreover, even if subsequent to removal, the federal officer is eliminated from the case, the federal court does not lose jurisdiction over the related consolidated cases. As stated in [*IMFC Professional Services of Florida, Inc. v. Latin American Home Health, Inc., 676 F.2d 152, 158 \(5th Cir. 1982\)*](#):

³ Plaintiff's actions reveal that while masquerading as a state antitrust claimant, he is in reality pursuing a federal remedy, pursuant to [5 U.S.C. § 705](#). He was not content to rely solely upon his state court antitrust proceeding and his state action directed against Commissioner Wagner. He also felt compelled to seek injunctive (and other) relief against the OCC, admittedly a proceeding involving a federal question. This tactic, in itself, results in a tacit admission of the involvement of a federal question, since it demonstrates that these actions are totally interrelated, raise identical issues, arise out of the same operative facts, and seek the same ultimate relief.

Section 1442(a)(1) authorizes removal of the entire case even though only one of its controversies might involve a federal officer or agency . . . thus § 1442(a)(1) creates a species of ancillary jurisdiction over the nonfederal elements of the case. In other instances of ancillary jurisdiction over the nonfederal elements of the case. In other instances of ancillary jurisdiction elimination of the "principal" controversy in a case does not deprive [*21] the court of power to dispose of the ancillary matters even though the court would not have had jurisdiction over these matters but for ancillarity . . .

See also, Allman v. W. H. Hanley, 302 F.2d 559 (5th Cir. 1962); D. Fowler v. Southern Bell Telephone & Telegraph Company, 343 F.2d 150 95th Cir. 1965); and, State of Tennessee v. Davis, 100 U.S. 257 (1880).

Therefore, plaintiff's motions to remand both the suit against the banks and the suit against Commissioner Wagner are denied.

3. Motions of Bank Defendants to Consolidate

The bank defendants have moved to consolidate all three of the above-captioned suits ⁴ for all purposes, pursuant to HN16 [↑] Rule 42(a) of the Federal Rules of Civil Procedure, which provides, "[w]hen actions involving a common question of law or fact are pending before the court, it may order a joint hearing or trial of any or all the matters in issue in the actions [and] it may order all the actions consolidated. . . .

The purpose of Fed.R.Civ.Proc. 42(a) "is to give the court broad discretion to decide how cases on its docket are to be tried [*22] so that the business of the court may be dispatched with expedition and economy while providing justice to the parties." Wright and Miller, Federal Practice and Procedure, § 2381 at 253 (1971).

"In this Circuit, district judges have been urged to make good use of Rule 42(a) . . . in order to expedite the trial and eliminate unnecessary repetition and confusion." "In re Air Crash Disaster at Florida Everglades, 549 F.2d 1006, 1013 (5th Cir. 1977), quoting Gentry v. Smith, 487 F.2d 571, 581 (5th Cir. 1973), which quoted Dupont v. Southern Pacific Co., 366 F.2d 193, 195 (5th Cir. 1966), cert. den., 386 U.S. 958, 87 S. Ct. 1027, 18 L.Ed.2d 106 (1967).

Consolidation is particularly appropriate here. The named plaintiff is the same in both actions. The operative facts -- the proposed merger of BNO into FNBC -- are the same in both actions; and virtually all of the plaintiff's legal theories -- violations of federal and state antitrust and banking laws -- are identical. ⁵

[*23] In a similar factual situation, Pinehurst Airlines, Inc. v. Resort Air Services, Inc., 475 F. Supp. 543 (M.D.N.C. 1979), the court ordered consolidation. In that case plaintiff brought two suits against different defendants, alleging that each defendant violated state and federal antitrust laws. Both suits arose from the same factual situation. The court ordered the suits consolidated, stating:

"the plaintiff is the same in both actions, common questions of law and fact abound, and a consolidation of the actions should result in a substantial savings of time and effort." Pinehurst Airlines, 476 F. Supp. at 559.

Here, as in Pinehurst, the same plaintiff is suing different defendants, alleging violations of antitrust laws arising from the same factual context. The court there, recognizing the judicial waste and inconvenience arising from two separate actions which would use the same evidence and require proof or disproof of the same facts, consolidated the cases.

⁴ Neither the Comptroller nor the Commissioner objects to this consolidation, though plaintiff does. HN17 [↑]

⁵ However, HN18 [↑] the fact "that there are some questions not common to all the actions [does not bar consolidation] so long as there is at least one common question." 9 Wright and Miller, Federal Practice and Procedure, § 2384 at 267-69 (1971); Central Motor Co. v. United States, 583 F.2d 470 (10th Cir. 1978) Jordan v. Jones, 563 F.2d 148 (5th Cir. 1977); Botazzi v. Petroleum Helicopters, Inc., 664 F.2d 49 (5th Cir. 1981).

Similarly, in this case, considerations of judicial economy, avoidance of a multiplicity of actions, possible prejudice to the merging defendants, and the absence of prejudice to the plaintiff, all militate in favor [*24] of consolidation. Accordingly, the motion of the bank defendants to consolidate is granted.

4. Motion of Plaintiff for ex parte consideration of motion for summary judgment and of motion for preliminary injunction in C.A. 83-1908

Plaintiff's motion is too frivolous to merit comment, except to say it is in obvious contravention of [28 U.S.C. § 1446\(e\)](#), [F.R.C.P. 81\(c\)](#), and the relevant case law. See e.g., [Granny Goose Foods, Inc. v. Brotherhood of Teamsters](#), [415 U.S. 423, 438 \(1974\)](#); [Bush v. Allstate Ins. Co.](#), [425 F.2d 393 \(5th Cir. 1970\)](#), cert. denied [400 U.S. 833](#), reh. denied [400 U.S. 985](#). Therefore, the motion is denied.

5. Motion to set hearing on preliminary injunction

Since the bank merger is due to proceed to completion on May 23, 1983, a preliminary injunction hearing must be held prior to that time. Therefore, the motion to set a hearing on the preliminary injunction is granted, such hearing to be on May 17, 1983, at 9:00 A.M.

6. Motion of plaintiff to shorten discovery

Plaintiff has requested that the Court shorten the time within which the defendants may respond to discovery so that answers or other responses are due to interrogatories, requests for admission, [*25] and requests for production prior to the hearing on the preliminary injunction. Plaintiff argues that the documents and other information which are the subject matter of these discovery requests are critical to the ability of plaintiff to adequately prepare for such hearing.[HN19](#)[

[Rules 33\(a\), 34\(b\), and 36\(a\) of the Federal Rules of Civil Procedure](#) provide that the court may shorten the time for each of these types of discovery. Defendants' responses to plaintiff's discovery requests are presently due to be filed no later than May 19, 1983. The Court, therefore, finds that plaintiff's motion will not cause substantial inconvenience to defendants and will substantially further the interests of justice in determining whether a preliminary injunction should issue. Thus, it is ordered that the parties set up a discovery schedule, with approval of the Court, to insure that said discovery will be completed prior to the hearing on the preliminary injunction.

7. Motion of plaintiff to strike

Plaintiff has moved the Court to strike all allegations of the petition of removal in the bank defendants' case concerning or referring to Frederic P. Aiken or any actions filed by him in connection [*26] with the bank merger as redundant and immaterial defenses, pursuant to [F.R.C.P. 12\(f\)](#).[HN20](#)[

Motions to strike on such grounds are generally not favored, unless it can be shown that no evidence in support of the allegations would be admissible and that the allegations will cause prejudice to the moving party. See, e.g., [Lipsky v. Connecticut, Commonwealth United Corp.](#), [551 F.2d 887 \(2nd Cir. 1976\)](#); [Tivoli Realty, Inc. v. Paramount Pictures, Inc.](#), [80 F. Supp. 800 \(D.C. Del. 1948\)](#); Wright & Miller, Federal Practice and Procedure, Civil § 1382, p. 806, et. seq.

In this case, the plaintiff has not satisfied either requirement. First, the references to Mr. Aiken and his lawsuit against the banks may be relevant to a determination of the present plaintiff's standing in the present controversy, and, in any case, is certainly relevant in connection with an understanding of the procedural background to this case. Second, there has been absolutely no showing of prejudice to plaintiff by the inclusion of these allegations. This is not a jury case, and the Court is perfectly able to disregard allegations which may later turn out to be immaterial. Therefore, the motion to strike is denied.

[*27] EXHIBIT NO. A

DECISION OF THE COMPTROLLER OF THE CURRENCY ON THE APPLICATION TO MERGE THE BANK OF NEW ORLEANS AND TRUST COMPANY, NEW ORLEANS, LOUISIANA, INTO FIRST NATIONAL BANK OF COMMERCE, NEW ORLEANS, LOUISIANA, UNDER THE CHARTER AND TITLE OF FIRST NATIONAL BANK OF COMMERCE

DECISION

Introduction

On January 4, 1983, application was made to the Office of the Comptroller of the Currency, pursuant to the Bank Merger Act, 12 U.S.C. 1828(c), for permission to merge The Bank of New Orleans and Trust Company, New Orleans, Louisiana (FNBC). The application is based on a written agreement executed by the banks on November 9, 1982.

Financial Institutions Involved

FNBC, established in 1933, is a wholly-owned subsidiary of First Commerce Corporation (Corporation), and is the second largest of 33 commercial banking institutions in the New Orleans market, with total deposits of \$851 million as of December 31, 1981. It operates 14 branches in Orleans Parish and is prohibited from branching outside its home office parish.

BNO, established in 1943, is a wholly-owned subsidiary of New Orleans Bancshares, Inc. (Bancshares), and is the fourth largest commercial banking institution [*28] in the New Orleans market, with total deposits of \$525 million as of December 31, 1981. It operates 18 offices in Orleans Parish and cannot branch outside the home office parish.

Bancshares will merge into a wholly-owned subsidiary of BNO and BNO will then merge into FNBC. The resulting bank will be a wholly-owned subsidiary of Corporation.

The Competitive Analysis

FNBC and BNO are located and compete directly with other depository institutions in the New Orleans metropolitan area. The relevant geographic market of both FNBC and BNO consists of the New Orleans Racially Metropolitan Area (RMA), less the portion lying within St. Charles Parish and adding the community of Covington in St. Tammany Parish. The RMA includes all of Orleans Parish, the northern portions of Jefferson and St. Bernard Parish, the southern portion of St. Tammany Parish and the northern portion of Plaquemines Parish.

There are 33 commercial banking organizations and 45 savings and loan associations in the New Orleans RMA. FNBC ranks second in the market with 9.1 percent of total deposits and BNO ranks fourth with 4.8 percent of total deposits. The combined institution will rank second in the market [*29] with 13.9 percent. The before merger Herfindahl Index is 509 and the consummation of the proposed merger will result in a modest increase of 88 points, for a total of 597. The relevant market will remain very unconcentrated and the merger cannot be expected to result in a substantial lessening of competition.

There has been a shift of population and economic activity from New Orleans to the surrounding parishes. This shift has caused the major New Orleans banks to seek customers from the suburban areas, despite restrictive branching laws which limit a bank's offices to its home parish. The New Orleans banks are losing ground and their deposit position has been deteriorating rapidly. The applicants have been soliciting customers from all the surrounding parishes. Despite the fact that FNBC and BNO offices are confined to Orleans Parish, they are convenient alternatives for customers throughout the RMA. Because of the movement to the surrounding parishes and the effort of the New Orleans banks to promote business with customers in the suburbs, the geographic market within which FNBC and BNO compete is the New Orleans RMA. Because alternative suppliers of financial services [*30] abound in this market, the combining of FNBC and BNO will have a negligible effect on the market structure. After the merger, a total of 32 commercial banking organizations will continue to serve the area's businesses. Savings and loans, which unlike commercial banks, are permitted to establish branches throughout the metropolitan area, and in fact statewide, have grown rapidly in recent years than their commercial bank

competitors, and will continue to become stronger competitors when they begin to use their new authority to solicit business loans and deposits in the same way as commercial banks.

The merger of FNBC and BNO will add to the competitive performance of the New Orleans market by strengthening the capabilities of the combined bank to compete with the dominant firm in the New Orleans business market. The largest competitor in the market, Whitney National Bank with 31 percent of the market's commercial loans, is able to compete aggressively by offering below prime rate loans because of its low overhead and low non-interest expenses. The resulting bank, with its increased resources and economies, will likely provide Whitney National Bank with some strenuous competition. [*31] See e.g. Department of Justice Merger Guidelines, page 20, line 33. Such improved capabilities will be particularly important during the 1980's, because of the changes in the retail banking environment that will result from deregulation of deposit interest rates, increased competition from savings and loans and other nonbank competitors, increased utilization of telecommunications and computer technology, and increased sophistication of customers in their demand for services.

The Banking Factors

The Bank Merger Act requires this Office to consider ". . . the financial and managerial resources and future prospects of the existing and proposed institutions, and the convenience and needs of the community to be served." The financial and managerial resources of both FNBC and BNO are satisfactory and the future prospects of the combined entity are good. The merger will provide the combined bank with greater financial and managerial resources and will result in the bank being better able to serve the financial needs of the community. The combined entity will be in a better position to compete for larger customers as its capital base will enable it to increase its loan limit to individual [*32] customers. It will also have broader branch coverage and will be in a better position to develop innovative retail services to respond to the initiatives of competitors.

Community Reinvestment Act

A review of the record of this application and other information available to this Office as a result of its bank regulatory responsibilities revealed no evidence that the applicants' record of helping to meet the credit needs of their community, including the low and moderate income neighborhoods, is less than satisfactory.

Conclusion

This decision is the prior written approval required by the Bank Merger Act for the applicant to proceed with the proposed merger.

[**HN1**](#) **Trials, Judgment as Matter of Law**

On motions for directed verdict and for judgment notwithstanding the verdict, the court should consider all of the evidence -- not just that evidence which supports the non-mover's case -- but in the light and with all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly in favor of one party that the court believes that reasonable men could not arrive at a contrary verdict, granting of the motions is proper. On the other hand, if there is substantial evidence opposed to the motions, that is, evidence of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment might reach different conclusions, the motions should be denied and the case submitted to the jury.

HN6 Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

While a plaintiff is not required to prove that a refusal to deal is the sole cause of its business's decline, it must show that the refusal to deal was a material cause of the decline.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN7 Price Fixing & Restraints of Trade, Vertical Restraints

A case of illegal resale price maintenance is made out when a price is announced and some course of action is undertaken or threatened contingent on the willingness or unwillingness of the retailer to adopt the price. The action need not necessarily fit under the rubric "coercion," but it must involve making a meaningful event depend on compliance or non-compliance with the suggested or stated price.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN8 Monopolies & Monopolization, Conspiracy to Monopolize

As a matter of law, it appears that a parent corporation may conspire with its subsidiaries, and subsidiaries of the same parent may conspire. However, an important element in this capacity to conspire has been that the separate corporations be in the position of competitors. To determine whether corporate entities are separate enough to be capable of conspiracy, a court must examine the particular facts of the case before it. If the intra-enterprise entities hold themselves out as competitors, the rule that they cannot avoid Sherman Act, [15 U.S.C.S. § 1 et seq.](#) liability by hiding behind their common ownership and control is especially applicable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN9 Antitrust & Trade Law, Sherman Act

The elements of an attempt to monopolize are: (1) specific intent to accomplish the illegal result; and (2) a dangerous probability that the attempt will be successful. However, monopoly cannot be judged in a vacuum. A necessary backdrop to any [§ 2](#) of the Sherman Act, [15 U.S.C.S. § 1 et seq.](#) attempt claim is the definition of the relevant product and geographic market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

[**HN10**](#) [blue icon] **Monopolies & Monopolization, Attempts to Monopolize**

A single manufacturer's products might be found to comprise, by themselves, a relevant market for the purposes of a monopolization claim, if they are so unique or so dominant in the market in which they compete that any action by the manufacturer to increase his control over his product virtually assures that competition in the market will be destroyed.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Opinion by: REAVLEY

Opinion

[*789] REAVLEY, Circuit Judge:

Plaintiff brought this antitrust suit under [§§ 1](#) and [2](#) of the Sherman Act. [15 U.S.C. § 1 et seq.](#) The defendants counterclaimed for malicious prosecution. The district court directed a verdict against plaintiff on the antitrust claims but allowed the malicious prosecution claim to go to the jury. The jury returned a verdict for plaintiff. Both sides appeal. We affirm the district court's disposition on all points.

[2] *The Parties***

Plaintiff is J.T. Gibbons, Inc. ("Gibbons") located in New Orleans. It is principally an exporter of a variety of goods, ranging from foodstuffs to valves and pipe fittings. The two principals of Gibbons are Cecil Keeney, chairman of the Board, and his son Richard, president.

Defendant Crawford Fitting Co. ("Crawford") is an Ohio-based corporation engaged in manufacturing valve and pipe fittings. Crawford's corporate structure includes a complicated system of separately incorporated manufacturing and warehousing subsidiaries. There are five manufacturing companies, producing different product lines. Crawford also has several incorporated regional warehouses, enabling it to reduce the lag time between receipt of orders and delivery of the product. Two of these warehouses are relevant to this suit: Southern Swagelok in Birmingham, Alabama and Microventil, the European warehouse [*790] located in Switzerland. All of these companies are owned and managed by two men, Fred Lennon and his nephew (by marriage), Francis Callahan.

Crawford's products are sold to end-users through a network of independent distributors, who buy at wholesale prices from the regional [**3] warehouses. There are two distributors named as defendants: Capital Valve and Fitting Co., in south Louisiana owned by Robert Jennings and Thomas A. Read & Co., located in Houston and owned by Thomas Read. Several other distributors are involved in this suit: Glasgow Valve and Aberdeen Valve, the Crawford distributors in Scotland; and Potomac Valve, a Maryland distributor.

Background Facts

The valve and pipe fitting industry is a highly competitive industry. As of 1977, there were over 700 manufacturers of valves and pipe fittings. Crawford is not one of the four top companies in the industry, and the four top companies do not control even 20% of the market.

Crawford, to compete in the industry, devised a system of independent distributors. Its marketing strategy emphasizes the need for the distributor to service the product and the customer, by conducting safety meetings and inspecting or replacing damaged parts. As part of this strategy, Gibbons devised its 5% plan. This plan requires a distributor who ships the product into another distributor's territory to pay 5% of the invoice price to Crawford, who sends it to the second distributor. This payment is to compensate [**4] the second distributor for any service performed.

In 1977 the Keeneys acquired Gibbons. Richard Keeney had, prior to coming to Gibbons, worked as a salesman for Capital. Richard had Gibbons expand into sales of valves and pipe fittings and solicit business in Scotland and the North Sea area. In 1977 and the first half of 1978, Gibbons' sales expanded rapidly. Gibbons initially bought Crawford Products from Capital, and then shipped directly to Prestwick Airport in Scotland.

In May of 1978, however, Capital refused to deal further with Gibbons. Gibbons then approached Read, Crawford's Houston distributor, who also refused to deal with Gibbons. Gibbons then contacted Crawford directly, threatening litigation for these refusals to deal. Crawford responded by arranging a meeting and offer from Crawford's Birmingham distributor. Gibbons rejected this offer, and proposed that Crawford make it a distributor. Unbeknownst to Crawford, however, Gibbons had obtained another source of supply through Potomac Valve and Fitting, Crawford's Maryland distributor.

Plaintiff then brought this suit. It claimed: (1) that defendants' refusal to deal constituted an unreasonable restraint [**5] of trade; (2) that all defendants conspired to eliminate Gibbons' competition in the North Sea market; (3) that Crawford set resale prices for its distributors; and (4) that Crawford's subsidiary and manufacturing companies engaged in horizontal price fixing. Defendants counterclaimed for malicious prosecution alleging that Gibbons filed this suit to extort a distributorship from Crawford. The district court directed a verdict against plaintiff on all antitrust claims. The defendant's counterclaim went to the jury, who decided for plaintiff. Defendant's motions for judgment n.o.v. and for a new trial were overruled.

I. The Antitrust Claims

A. Standard of Review

Preliminarily, we note that we review plaintiff's claims in light of *Boeing Co. v. Shipman*, 411 F.2d 365, 374 (5th Cir. 1969) (en banc):

HN1 [↑] On motions for directed verdict and for judgment notwithstanding the verdict the Court should consider all of the evidence -- not just that evidence which supports the nonmover's case -- but in the light and with all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly in favor [**6] of one party that the Court believes that reasonable men could not arrive at a [*791] contrary verdict, granting of the motions is proper. On the other hand, if there is substantial evidence opposed to the motions, that is, evidence of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment might reach different conclusions, the motions should be denied and the case submitted to the jury.

B. Concerted Refusal to Deal

Gibbons claims that Crawford, Capital and Read engaged in a concerted refusal to deal. Gibbons argues that because Crawford had an equity interest in the Scottish distributorship, it had a motive to eliminate Gibbons' competition in the North Sea market. Gibbons then points to the specific evidence that Capital and Read refused to deal with Gibbons.¹

[**7] **HN2** [↑]

In order to collect damages for a violation of § 1 of the Sherman Act: "plaintiff must prove (1) the existence of an agreement (2) which unreasonably restrains trade (3) to the damage of the plaintiff." *Abadir & Co. v. First Mississippi Corp.*, 651 F.2d 422, 424 (5th Cir. 1981). Because we conclude that plaintiff has failed to prove any damage, we affirm the directed verdict.

HN3 [↑] Section 4 of the Clayton Act [15 U.S.C. § 15] provides that: "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" may sue and recover treble damages. Thus, § 4 engrafts on any private cause of action proof of some damage or injury. We have described its requirements as:

the plaintiff must prove that the defendants violated the antitrust laws, that this breach caused injury in fact, and . . . the actual dollar amount of the damage.

Jot-Em-Down Store (JEDS) Inc. v. Cotter & Co., 651 F.2d 245, 247 (5th Cir. 1981). See *Malcolm v. Marathon Oil Co.*, 642 F.2d 845, 852 (5th Cir.), cert. denied, 454 U.S. 1125, 102 S. Ct. 975, 71 L. Ed. 2d 113 (1981).

¹ An unspoken premise of this argument is that Crawford took some action to force both Capital and Read to cooperate in this scheme, since, as a practical matter, Gibbons did not compete with either Capital or Read. We need not dwell on the validity of this premise, however, given our disposition on the lack of damage.

Traditionally, somewhat different standards apply in proving the [**8] fact of damage versus the amount of damage. In *In re Plywood Antitrust Litigation*, 655 F.2d 627, 635 (5th Cir. 1981), cert. granted *sub nom* Weyerhaeuser Co. v. Lyman Lamb Co., 456 U.S. 971, 102 S. Ct. 2232, 72 L. Ed. 2d 844 (1982), we described this difference as, **HN4**[¹] "once anti-trust plaintiffs have proved the fact of damage, their burden on proving the measure of damages becomes lighter." Plaintiff must prove fact of damage by a preponderance of the evidence. See L. Sullivan, Handbook of the Law of Antitrust § 251 (1977) ("There has been no tendency to lighten plaintiff's burden [on the fact of damage]; the preponderance of the evidence rule applies in unqualified form.") Of course, since this case arises on a directed verdict, plaintiff need only show that reasonable minds could differ as to its proof of injury.

We do not think the Supreme Court's recent decision in *J. Truett Payne Co. v. Chrysler Motors Corp.*, 451 U.S. 557, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981) disturbed these differing standards of proof. The Court vacated our opinion directing a dismissal because of the plaintiff's failure to prove injury. The petitioner argued that its proof should have [**9] been evaluated in light of the more lenient standard for proving the amount of damages. The Court vacated because the lenient standard of proof is applied only once an antitrust violation has been proved and no finding on this issue had been made. The Court stated:

If the court determines on remand that respondent did violate the Act, the court should then consider the sufficiency of petitioner's evidence of injury in light of the cases discussed above. We, of course, intimate no views as to how that issue should be decided. We emphasize that even if there has been a violation . . . petitioner is not excused from his burden of proving antitrust injury and damages. [*792] It is simply that once a violation has been established, that burden is to some extent lightened.

451 U.S. at 568, 101 S. Ct. at 1930. This language could be construed as abolishing the differing standards of proof. We do not think, however, that the Court would have abolished such a well established rule without some discussion. We also note that both the majority and dissent cite *Story Parchment Co. v. Paterson Parchment Co.*, 282 U.S. 555, 51 S. Ct. 248, 75 L. Ed. 544 (1931), from [**10] which the distinction between the fact and the amount of damage arose. There is no indication that the majority intended to overrule *Story Parchment*.

We have not interpreted *Truett* as changing the *Story Parchment* rule. In *Truett* upon remand, we stated: "only when the plaintiff has demonstrated the fact of injury may the court be lenient in the amount of evidence required to prove damages." *Chrysler Credit Corp. v. J. Truett Payne Co.*, 670 F.2d 575, 582 (5th Cir. 1982), cert. denied, 459 U.S. 908, 103 S. Ct. 212, 74 L. Ed. 2d 169 (1982).

Thus, the plaintiffs may not take advantage of the more lenient standards of proof in showing the fact of damage. We note however, that we have assumed for purposes of this discussion, that the defendants did in fact conspire to eliminate Gibbons' competition. As we stated in *Malcolm*, "in cases where the defendants' acts are motivated by intent to injure the plaintiff, the inferential leap to the finding of fact of damage, is not great." *642 F.2d at 855*. In light of the unique facets of this case, however, we find that this "inferential leap" cannot be made.

We start with the nature of the antitrust violation here: [**11] a refusal to deal. The *sine qua non* of the injury caused by a refusal to deal would be inability to obtain the product. From this failure to obtain the product would flow subsidiary consequences: loss of sales or market share because of the failure to sell or utilize the product.

Our first inquiry should therefore be, was Gibbons unable to obtain supplies of Crawford valves and pipe fittings? The answer to this question is clearly no. Gibbons stipulated that it never received an order for Crawford products which it was unable to fill.

This does not end our inquiry however. As we said in *Malcolm*:

a plaintiff who does tap an alternative source may still prove some injury if a change of suppliers results in other losses such as increased costs or decreased revenues.

642 F.2d at 863, n. 29. Thus, if plaintiff could show some damage from its having to switch from Capital to Potomac, it would have demonstrated sufficient injury in fact.

Plaintiff alleges three factors showing that switching suppliers damaged it: (1) increased costs in the price of the product; (2) longer transportation delays and delivery costs; and (3) evidence that Gibbons' sales in **[**12]** the North Sea decreased after Capital stopped selling to Gibbons. We deal with each of these contentions separately.

Appellant's strongest point is that in purchasing from Potomac, it paid Bernie Pemberton a commission of 1.5% to place Gibbons' orders with Potomac in Pemberton's name. This was done, according to Richard Keeney, because of his fear that Crawford would cut him off if it found out that the orders were from Gibbons.

We first note that there is no evidence that this subterfuge was necessary. In fact, by the time of trial, Gibbons was placing its orders directly with Crawford. In light of the fact that it may not be plaintiff's burden to justify this cost,² however, and that Cecil Kenney testified that Pemberton performed certain services that Gibbons' employees could have performed, we assume that the cost of Pemberton's commission must be figured in the cost to Gibbons of purchasing Crawford products through Potomac.

[13] [*793]** The record shows, however, that even adding Pemberton's commission to the actual cost of Gibbons' purchases, the cost was lower. This was due to the difference in Capital's and Potomac's "blanket" with Gibbons. A blanket is a discount to the customer based on the volume purchased. Even adding in Pemberton's commission, Potomac's cost to Gibbons was substantially cheaper.³ Therefore, Gibbons was not damaged by increased costs in purchasing from Potomac.

[14]** Gibbons also claims that delivery time from Potomac to Scotland was longer than that from Capital to Scotland. Plaintiff relies on Richard Keeney's testimony that having Pemberton place the orders was not an efficient way to do business, and on deposition testimony by one of its customers, Simon Thornhill, that Gibbons' delivery time was longer in 1979 than in 1978.

This testimony does not raise a jury question. As we stated in *Truett*, [HN5](#) "conclusory statements by the plaintiff, without evidentiary support, as to the fact of damage caused by the alleged antitrust violation are not sufficient." 670 F.2d at 581. The only specific evidence produced in this case regarding processing time for filling orders and the transit time for those orders was produced by defendants. They showed through expert testimony that processing time, transit time, and transportation costs were actually faster and cheaper from Potomac than from Capital.⁴ Thornhill's testimony is also not supported by the record. His statement that "it [delivery time] was

² In *Malcolm*, we held that the plaintiff in a refusal to deal case is not required to show a lack of alternative supply. Thus, it may well be Crawford's burden to disprove the reasonableness of this cost.

³ From June 1978 to October 31, 1978, Gibbons placed \$207,330.80 worth of orders with Potomac. Pemberton's commission would have been \$3,110. The total cost of these same products through Capital would have been \$212,699.56. Invoicing through Potomac was \$2,253.76 cheaper overall. From November 1, 1978 to February 28, 1979, Potomac invoiced \$149,869.25 to Gibbons. Pemberton's commission would have been \$2,248. The cost of the same goods from Capital was \$152,617.99. Purchasing through Potomac for this period therefore saved Gibbons approximately \$500.

We also note that for some periods, Pemberton's commission was only 1%. Thus, the difference in cost between Capital and Potomac would be even greater.

⁴

Average

Average

Delivery

Transportation

longer in 1978 than in the first half of 1978" contradicts his prior statements. Earlier in his deposition, Thornhill stated he always received [**15] fittings from Gibbons in the latter half of 1978 "in exact accordance with our requirement." He also stated that he had no idea what the average delivery time for products was from Gibbons. In light of defendant's testimony and plaintiff's failure to come forward with other than conclusory statements, reasonable men would have to find that utilizing Potomac did not impose any increased transportation costs or delays on Gibbons.

Gibbons bases much of its case on damages on evidence showing that after Capital refused to deal with Gibbons, Gibbons' rate of growth in the North Sea slowed substantially. Gibbons relies on *Lehrman v. Gulf Oil Corp.* [**16] [500 F.2d 659-68 \(5th Cir.1974\)](#), cert. denied, 420 U.S. 929, 95 S. Ct. 1128, 43 L. Ed. 2d 400 (1975), for the proposition that proof of injury by showing sales before and after the cutoff is accepted.

\$ 160.83

We first note that *Lehrman* dealt with the measurement of damages, not the fact of damage. Second, we think that given the admittedly unique facts of this case, this proof is irrelevant. As stated previously, the *sine qua non* of the refusal to deal here would be a failure to obtain the product, or increased costs or transportation delays. Since none of these consequences from the refusal to deal arose here, it follows that the before and after proof is irrelevant.

Another way of viewing the problem with the before and after evidence is in terms of causation. [HN6\[!\[\]\(d8c72e656701e95965778abdbf815cd0_img.jpg\)\]](#) While Gibbons is not [[*794](#)] required to prove that the refusal to deal was the sole cause of its business' decline, it must show that the refusal to deal was a material cause of the decline. [Malcolm, 642 F.2d at 861](#). Since, as shown above, the refusal to deal caused no adverse effect on Gibbons' ability to obtain Crawford valves and fittings, the refusal to deal could not be a cause of Gibbons' decline [[**17](#)] in growth. Defendants also showed that this decline was caused by other factors. Gibbons had two main customers in the North Sea area: Roermateriel in Norway and Hydrasun in Scotland. The evidence showed that Roermateriel made a large purchase of pipes and fittings for inventory in the first half of 1978. In the second half of 1978 and 1979, because much of this product did not sell and because of a depression in Norway, Roermateriel reduced its purchases from Gibbons and ceased stocking Crawford valves and fittings. In regard to Hydrasun, Gibbons had agreed to sell only to Hydrasun in Scotland. Gibbons had therefore tied its fortunes to Hydrasun's, and any decrease in Gibbons' sales is directly attributable to a decrease in Hydrasun's business.⁵

From the foregoing, it is clear that plaintiff did not submit sufficient "substantial evidence . . . of such quality and weight that reasonable [[**18](#)] and fair-minded men . . . might reach different conclusions" regarding the fact of damage. The district court properly directed a verdict against plaintiff on the refusal to deal claim.

C. Resale Price Maintenance

Plaintiff claims that Crawford engaged in resale price maintenance. As evidence of this, plaintiff cites correspondence from Capital to Crawford indicating that Crawford established a "blanket" for Gibbons. There are two types of blankets: (1) a factory blanket between the distributor and the factory and (2) a customer blanket between the distributor and the customer. A factory blanket is noncancelable and commits the distributor to purchasing a specific quantity of valves or fittings. Capital argues that the correspondence refers to a factory blanket and gives rise to no inference of resale price maintenance. Gibbons responds that it is for the jury to decide whether the correspondence referred to a factory or a customer blanket.

Even assuming that the jury should have been allowed to draw this inference, Gibbons has not established all the elements of resale price maintenance. In [Aladdin Oil Co. v. Texaco, Inc., 603 F.2d 1107 \(5th Cir.1979\)](#) we discussed [[**19](#)] these elements:

[HN7\[!\[\]\(18db75d244ef12adc43a6e1d0d7d8c68_img.jpg\)\]](#) a case of illegal resale price maintenance is made out when a price is announced and some course of action is undertaken or threatened contingent on the willingness or unwillingness of the retailer to adopt the price. The action need not necessarily fit under the rubric "coercion", but it must involve making a meaningful event depend on compliance or non-compliance with the 'suggested' [sic] or stated price.

[*Id. at 1117-18*](#), quoting [Butera v. Sun Oil Co., 496 F.2d 434, 436-37 \(1st Cir.1974\)](#).

Gibbons argues that *Aladdin* does not control here, and that [Greene v. General Foods Corp., 517 F.2d 635 \(5th Cir.1975\)](#), cert. denied, 424 U.S. 942, 96 S. Ct. 1409, 47 L. Ed. 2d 348 (1976), shows that Gibbons does not have to prove some action by Crawford to enforce its resale prices. Gibbons' reliance on *Greene* is misplaced. *Greene*

⁵ We note that there is no evidence in the record of any anti-competitive activity's effect on Hydrasun's business.

involved whether a distributor's participation in the price fixing barred its antitrust suit. The case addresses the distributor's actions, not the manufacturer's activities in enforcing its resale prices.⁶

[**20] [*795] Applying *Aladdin* here, it is clear that the district court properly directed the verdict. There is no evidence that Crawford took any action to enforce its price list or even its suggested price to Capital. Gibbons approached four different Crawford distributors and received four different price quotations.

D. Horizontal Price Fixing

Gibbons alleges that Crawford is guilty of conspiring to set the prices for its manufacturing subsidiaries and its regional warehouses. It is undisputed that Lennon and Callahan set the prices for all these companies. Lennon and Callahan also owned all the stock in these corporations. Gibbons argues, however, that since these entities were separately incorporated and at the same level in the distribution chain, the elements of a conspiracy to fix prices existed.

HN8 [↑] As a matter of law, it appears that a parent corporation may conspire with its subsidiaries, *H & B Equipment Co. v. International Harvester Co.*, 577 F.2d 239, 244 (5th Cir. 1978), and subsidiaries of the same parent may conspire. *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons*, 340 U.S. 211, 215, 71 S. Ct. 259, 261, 95 L. Ed. 219 (1951). However, an important [**21] element in this capacity to conspire has been that the separate corporations be in the position of competitors. *Id.*, H & B, 577 F.2d at 244. In *Las Vegas Sun, Inc. v. Summa Corp.*, 610 F.2d 614, 617 (9th Cir.), cert. denied, 447 U.S. 906, 100 S. Ct. 2988, 64 L. Ed. 2d 855 (1980), the court explained:

To determine whether corporate entities are separate enough to be capable of conspiracy, a court must examine the particular facts of the case before it (citations omitted). If the intra-enterprise entities "hold themselves out as competitors," the rule that they cannot avoid Sherman Act liability by hiding behind their common ownership and control is "especially applicable."

Applying these principles to the case before us, it is apparent that the directed verdict was proper. Gibbons produced no evidence that Crawford's manufacturing and warehouse subsidiaries either competed or held themselves out as competitors. The manufacturing subsidiaries each produced a separate product line that did not compete. The regional warehouses were limited to specific territories and there is no evidence that they competed for distributors' business. This lack of [**22] competition, in combination with the fact that this alleged conspiracy is, as a practical matter, the unilateral decision of the two men who own these companies, convinces us that the manufacturing companies and regional warehouses lacked the capacity to conspire.

E. Attempt to Monopolize

Gibbons alleged a claim under § 2 of the Sherman Act for an attempt to monopolize the North Sea valve and pipe fitting market. **HN9** [↑] The elements of an attempt to monopolize are: "(1) specific intent to accomplish the illegal result; and (2) a dangerous probability that the attempt will be successful." *Spectrofuge Corp. v. Beckman Instruments, Inc.*, 575 F.2d 256, 276 (5th Cir. 1978), cert. denied, 440 U.S. 939, 99 S. Ct. 1289, 59 L. Ed. 2d 499 (1979). However, monopoly cannot be judged in a vacuum. A necessary backdrop to any § 2 attempt claim is the definition of the relevant product and geographic market. *In re Municipal Bond Reporting Antitrust Litigation*, 672 F.2d 436, 441 (5th Cir. 1982).

Gibbons asserts that the relevant product market here is the market for Crawford valves and fittings. The Supreme Court in *United States v. E.I. Du Pont de Nemours & Co.*, 351 U.S. 377, [**23] 76 S. Ct. 994, 100 L. Ed. 1264

⁶Indeed, it was clear from the facts of *Greene* that a "meaningful event" did occur when the distributor ceased to comply -- namely, General Foods terminated Greene's distributorship.

Gibbons also advances *United States v. Bausch & Lomb Optical Co.*, 321 U.S. 707, 64 S. Ct. 805, 88 L. Ed. 1024 (1944) as support for its contention. Yet the Court there noted specifically that material deviations from the manufacturer's resale price would result in termination of the wholesaler's franchise. *Id. at 719-20, 64 S. Ct. at 811-12.*

(1956) discussed at length the definition of the relevant product market. The Court stated: "that market is composed of products that have reasonable interchangeability for the purposes which they are produced -- price, use and qualities considered." Id. at 404, 76 S. Ct. at 1012. The Court implied however, that the relevant product market could, under certain circumstances, be limited to one manufacturer's product.

This possibility has been discussed in later cases. In Bushie v. Stenocord Corp., 460 F.2d 116, 121 [**796] (9th Cir. 1972) the court stated:

HN10[ A single manufacturer's products might be found to comprise, by themselves, a relevant market for the purposes of a monopolization claim, if they are so unique or so dominant in the market in which they compete that any action by the manufacturer to increase his control over his product virtually assures that competition in the market will be destroyed.

(Citations omitted). In Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342 (5th Cir. 1980), cert. denied, 450 U.S. 1030, 101 S. Ct. 1740, 68 L. Ed. 2d 226 (1981), we upheld a jury finding limiting **[**24]** the relevant product market to the outfitting of one particular model of airplane, instead of all similar aircraft. We held:

there was ample evidence of high entry barriers and of the difficulty outfitters encountered in switching back and forth from one model of aircraft to the next to allow the jury to find a relatively narrow market.

624 F.2d at 1349 (footnotes omitted).

Gibbons asserts two bases for defining the relevant product market as only Crawford fittings. First, that many of the fittings were patented. Second, that Crawford fittings are not compatible with its competitor's fittings, i.e., that once installed, replacement parts must be from Crawford.

We think these facts are insufficient to raise a question for the jury. The fact that an article is patented does not affect the question of whether other products are reasonably interchangeable. For example, in *Du Pont*, the fact that cellophane was patented did not prevent the court from holding that the relevant product market could not be limited solely to cellophane.

Gibbons' second point, we think, is irrelevant. The evidence was overwhelming that the valve and pipe fitting industry **[**25]** was intensively competitive, and that there existed other valves or pipe fittings which performed the same functions for approximately the same price. The fact that Crawford fittings were not compatible with its competitor's fittings has no significance. For that matter, Ford cars cannot have GM parts installed on them, yet this does not mean that in determining the relevant product market, the product market may be limited solely to Ford cars.

Gibbons failed to define the relevant product market. We think, however, that as a matter of law, Crawford's evidence established the relevant product as all pipes and valve fittings. As part of the attempt claim however, Gibbons needed to prove a dangerous probability that the attempt would be successful. Given the competitive nature of the valve and pipe fitting industry, and Crawford's small share of that market, as a matter of law there was no dangerous probability of success. We therefore affirm the district court's directed verdict on the attempt to monopolize claim.

F. Conspiracy to Monopolize

HN11[ The elements for a conspiracy to monopolize offense under Section 2 differ from the attempt offense. Plaintiff must prove: **[**26]**

(1) the existence of a combination or conspiracy; (2) overt acts done in furtherance of the combination or conspiracy; (3) an effect upon a substantial amount of interstate commerce; and (4) the existence of specific intent to monopolize.

Cullum Electric & Mechanical, Inc. v. Mechanical Contractors Association of South Carolina, 436 F. Supp. 418, 425 (D.S.C.1976), affirmed, 569 F.2d 821 (4th Cir.1978), cert. denied, 439 U.S. 910, 99 S. Ct. 277, 58 L. Ed. 2d 255 (1978). 3 J. Von Kalinowski, Antitrust Laws & Trade Regulation § 9.02[1] (1982).

There is some uncertainty within this circuit as to whether a plaintiff need prove the relevant product and geographic market in a conspiracy claim. The rule in other circuits is that such proof is not required. Salco Corp. v. General Motors Corp., 517 F.2d 567, 576 (10th Cir.1975) ("Specific intent to monopolize is the heart of a conspiracy [*797] charge, and a plaintiff is not required to prove what is the 'relevant market. "'); see United States v. Consolidated Laundries Corp., 291 F.2d 563 (2d Cir.1961). Our cases have not spoken to this issue specifically. In Sulmeyer v. Coca Cola Co. [**27] , 515 F.2d 835, 851 (5th Cir.1975), cert. denied, 424 U.S. 934, 96 S. Ct. 1148, 47 L. Ed. 2d 341 (1976), however, we did state in regard to a conspiracy claim that: "a jury could reasonably have found that Coca Cola did not have the specific intent to prevent Bubble-Up from obtaining lemon-lime franchises *in the relevant market*". It may be that even in a conspiracy claim under Section 2, plaintiff must prove the relevant market.

We need not delve into this rather murky area of **antitrust law** however, because of our holding regarding plaintiff's Section 1 conspiracy claim. While a conspiracy claim under Section 1 is different from a similar claim under Section 2, see United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n. 59, 60 S. Ct. 811, 845 n. 59, 84 L. Ed. 1129 (1940), the requirement of injury in fact under Section 4 of the Clayton Act applies equally to Sections 1 and 2. Since Gibbons did not prove any injury for its Section 1 conspiracy it follows that the exact same actions would not constitute injury under Gibbons' Section 2 conspiracy.

II. The Cross Appeal

Appellees contest the district court's entry of the verdict on the malicious prosecution [**28] counterclaim. They assert two grounds for reversal: (1) that the special interrogatories contained erroneous statements of the law; and (2) that the district court should have granted appellees' motion for new trial because of opposing counsel's prejudicial argument. We address each issue separately.

A. Malicious Prosecution

The malicious prosecution issue was presented to the jury by special interrogatories. The ones relevant to this appeal are:

- (1) Did Gibbons bring this lawsuit in good faith after full disclosure of the facts within the knowledge of Messrs. Richard and Cecil Keeney to their attorneys?
- (2) Did Gibbons bring this lawsuit in bad faith for the purpose of obtaining a distributorship arrangement from Crawford?

The jury was told that if it responded "yes" to the first interrogatory it should not proceed to the second interrogatory.

Defendants argue that under Louisiana law, the first interrogatory is erroneous. Crawford asserts that under Louisiana law, good faith and full disclosure to one's attorney are discrete elements, *i.e.*, that even if the Keeneys informed their attorneys of all the relevant facts, the Keeneys are still liable [**29] if their purpose in bringing the suit was to extort a distributorship from Crawford and not to vindicate any legal rights that their attorneys told them had been violated.

We decline to speculate on Louisiana law in this area, because defendants waived their right to protest any error. Federal Rule of Civil Procedure 51 governs objections to the court's charge, stating:

no party may assign as error the giving or the failure to give an instruction unless he objects thereto before the jury retires to consider its verdict . . .

Defendants concede that they did not object to the form of the first interrogatory or the order in which the questions were submitted. They argue, however, that subsequent events during the course of the jury's deliberations restored their right to object.

After the jury retired, they sent a series of questions to the judge regarding the definition of good faith in the first interrogatory. After receiving the first request from the jury, the district court discussed the charge and gave the jury several definitions of good faith.⁷ Defendants at this juncture again did not object to the charge.

[30] [*798]** The court received a second inquiry from the jury, stating: "Judge, we agree that Gibbons gave all of the information to their attorneys, however, we can't agree on the term good faith." It was at this point that counsel objected to the interrogatories and suggested that the jury answer the second interrogatory even if they answered the first interrogatory "yes." The district court overruled the objection stating: "There is too much water over the dam for me to give this instruction."

Defendants argue that this case falls within the rule of *Alverez v. J. Ray McDermott & Co.*, 674 F.2d 1037 (5th Cir. 1982) and *Mercer v. Long Mfg. N.C., Inc.*, 671 F.2d 946 (5th Cir. 1982). These cases are inapposite. They deal with whether failure to make a motion to resubmit jury issues waives the point on appeal when the jury has reached inconsistent answers to special issues. These cases deal with a situation not covered by Rules 49 and 51. Here, the express terms of Rule 51 govern, and defendants waived their objection.

Defendants advance one other argument to avoid the consequences of their failure to object. They argue that the district court, in answering the jury's second **[**31]** question, essentially redefined the second issue and told the jury it could equate full disclosure with good faith.⁸

We disagree. The court, **[**32]** after a prolonged discussion with counsel, decided to repeat his earlier instructions, which did not equate good faith and full disclosure. Secondly, a fair reading of Judge Palmieri's statement convinces us that the instructions did not redefine this issue.⁹ Lastly, we note that defense counsel did not object to the language allegedly equating good faith and full disclosure. If Judge Palmieri misspoke, a prompt

⁷ We note that the district court's description of the issue comported with defendant's contention on appeal. There is no indication from reading the instruction that full disclosure equaled good faith. For example, Judge Palmieri said:

I also told you that you could find that there was full disclosure by the Keeneys if there was a conscientious attempt by them to tell their attorneys . . . whatever they knew about the case, whether the Keeneys acted *in good faith for the purpose* of seeking guidance from the attorneys, *and* whether they made a full and complete report to them are questions for you to determine.

⁸ Defendants rely upon the following section of Judge Palmieri's discussion:

The problem as I see it is for you to determine whether in making this disclosure to the attorneys they were setting in motion a series of legal events which added up to a legal process that was all done for a collateral and ulterior purpose.

If that was done for that purpose, if this was all set in motion for the purpose of coercing the defendants to make a distributorship arrangement, with Gibbons, then it would be a bad motive; it would not be good faith.

If, on the other hand, the full disclosure was made to the attorneys, *irrespective of any such motivation*, and *solely for the purpose of vindicating the rights which they had based upon that full disclosure*, then there would not be any question of bad faith or the absence of good faith. . . . (Emphasis ours)

⁹ Judge Palmieri in discussing this issue with counsel said:

if they [the Keeneys] put facts before the attorneys but really not intending to do anything except to force these defendants into giving them a distributorship, they were not seeking advice in good faith; they were seeking to abuse legal process for an ulterior purpose.

This indicates that Judge Palmieri did not, at least at this point, equate good faith and full disclosure.

objection could have cured the error. We therefore hold that the defendants waived any errors in the interrogatories, and the entry of the jury's verdict was proper.¹⁰

[33] B. Prejudicial Closing Argument**

Defendants argue that the district court erred in denying their motion for new trial. This motion was based on the prejudicial nature of opposing counsel's closing argument. We affirm the district court's denial of this motion.

[*799] Our standard of review on this issue is necessarily limited:

HN12 it is well established that a motion for new trial based upon inflammatory remarks is addressed to the sound discretion of the trial judge, and his ruling thereon will not be disturbed absent an abuse of that discretion.

[Meyers v. Moody, 693 F.2d 1196, 1220-21 \(5th Cir. 1982\).](#)

The district court, in a lengthy opinion agreed that opposing counsel's argument was prejudicial,¹¹ but found that countervailing considerations indicated that the motion should be denied. These considerations were: (1) the court's instruction to the jury; (2) defense counsel's ability to reply to plaintiff's allegations; and (3) this was not a case which tended to incite the jury's emotions.

[34]** We agree with the district court's characterization of the argument as prejudicial. We cannot, furthermore, say that the district court abused its discretion in denying the new trial motion. The court's lengthy instruction to the jury made it clear that the jury was to decide the case on the evidence and not the statements of counsel. Defense counsel did answer many of opposing counsel's charges and responded effectively to opposing counsel's argument of its antitrust claims.

Defendants assert that [Edwards v. Sears, Roebuck & Co., 512 F.2d 276 \(5th Cir. 1975\)](#) and [Draper v. Airco, Inc., 580 F.2d 91 \(3d Cir. 1978\)](#) mandate reversal. In both cases the court reversed the district court's denial of a motion for new trial. The court in *Draper*, for example stated:

Counsel for the plaintiff breached a number of the rules of proper argument. Specifically, he committed the following improprieties: (1) he attempted to prejudice the jurors through repeated inappropriate references to the defendants' wealth; (2) he asserted his personal opinion of the justness of his client's cause; (3) he prejudicially referred to facts not in evidence; and (4) without provocation or **[**35]** basis in fact, he made several prejudicial, vituperative and insulting references to opposing counsel.

[580 F.2d at 95](#). Defendants argue that opposing counsel's remarks fit the improprieties set out in *Draper*.

¹⁰ Defendants also assert that, the district court should have granted judgment n.o.v. on this issue. We think that, applying the *Boeing* standard, reasonable men could reach different conclusions regarding the motives of the Keeneys in bringing this lawsuit. While there was much evidence that the Keeneys brought this suit to extort a distributorship, the Keeneys testified to the contrary. Such credibility choices are traditionally the province of the jury. ***Doucet v. Diamond M. Drilling Co., 683 F.2d 886, 889, n.2 (5th Cir. 1982), cert. denied, 459 U.S. 1127, 103 S. Ct. 1234, 75 L. Ed. 2d 468 (1983).***

¹¹ The district court made clear in no uncertain terms that Gibbons' counsel had overstepped the bounds of proper closing argument. The court stated:

At times, counsel for plaintiff presented arguments and made references to defendants based on facts wholly unsupported by the record and unduly inflammatory in nature . . . Plaintiff's counsel repeatedly characterized defendants . . . in a manner prejudicial to defendants. Defendants were repeatedly referred to, explicitly and implicitly, in terms denoting unsavory and illegal characteristics

The district court acknowledged the force of these cases, but distinguished them because they involved wrongful death actions by individuals against large corporate defendants. Defendants argue that this distinction is irrelevant and the law should treat the individual and the corporation equally. We agree with the district court, however. This distinction does not treat the parties differently. Instead it looks to the jury and the potential prejudicial/inflammatory effects that the remarks may have. The purpose of the district court's inquiry is to determine whether the remarks were prejudicial, and if so, were they so prejudicial as to require a new trial. This inquiry does not proceed in a vacuum -- it must be undertaken in light of the totality of the circumstances -- including, among other things, the relative positions of the parties. The district court properly denied the motion for new trial.

The judgment of the district court is, in all respects,

[36] AFFIRMED.**

[HN1](#) [] Heightened Pleading Requirements, Fraud Claims

The Federal Rules require only a short and plain statement of the claim showing that the pleader is entitled to relief. Fed. R. Civ. P. 8(a). Fed. R. Civ. P. 9(b) articulates a stricter standard to be applied when alleging fraud. It requires the circumstances constituting fraud to be stated with particularity. Reconciling these two rules to strike a sound balance is not an easy task. However, it is a serious matter to charge a person with fraud and hence no one is permitted to do so unless he is in a position and is willing to put himself on record as to what the alleged fraud consists of specifically.

[**HN2**](#) [down] Heightened Pleading Requirements, Fraud Claims

S.E.C. [Rule 10b-5](#) violations will not pass scrutiny if they do not allege with some specificity the statements allegedly constituting fraud. Mere conclusory allegations are insufficient. The pleading must apprise the defendants of the substance of plaintiffs' claim with sufficient detail to enable the defendants to answer. However, this rule is not to be applied with draconian strictness.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

[**HN3**](#) [down] Pleadings, Heightened Pleading Requirements

[Fed. R. Civ. P. 9\(b\)](#) must be read in conjunction with the liberal pleading rules, which eschew technicalities. [Rule 9](#) lists the actions in which slightly more is needed for notice.

[**HN4**](#) [down] Pleadings, Heightened Pleading Requirements

From a practical standpoint, if defendants have access to all of the records of the transactions and can glean from them the information needed to respond, and if it is unclear whether plaintiffs have access to such detailed information, a plaintiff should not be precluded from suing if he or she does not. Fundamentally, although [Fed. R. Civ. P. 9\(b\)](#) requires specificity, to demand this quantum of detail at this stage would totally undermine the letter and spirit of [Fed. R. Civ. P. 8\(a\)](#) and the liberalized pleading envisaged under the Federal Rules of Civil Procedures.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

[**HN5**](#) [down] Pleadings, Heightened Pleading Requirements

Generally, allegations plead on "information and belief" do not satisfy the specificity requirements of [Fed. R. Civ. P. 9\(b\)](#). However, the objective of this rule may be satisfied if the allegations are accompanied by a statement of the facts upon which the belief is founded. The rule may also be relaxed as to matters within the adverse party's knowledge, although some courts have required an accompanying statement of facts as well.

[**HN6**](#) [down] Federal & State Interrelationships, Federal Common Law

565 F. Supp. 476, *476L^A983 U.S. Dist. LEXIS 17101, **1

On the basis of statutory construction and the superior reasoning of those courts who follow the minority rule, the court decline to imply a private cause of action under § 17(a) of the Securities Act of 1933, [15 U.S.C.S. § 77q\(a\)](#).

Securities Law > ... > Securities Exchange Act of 1934 Actions > Implied Private Rights of Action > General Overview

[HN7](#) [↓] Implied Private Rights of Action, Deceptive & Manipulative Devices

Section 17(a) of the Securities Act of 1933, [15 U.S.C.S. § 77q\(a\)](#), is not limited to fraud in the purchase or sale of securities. Most importantly, it appears that scienter is not required to state a cause of action under §§17(a)(2) or (a)(3) of the Act. Scienter is required under § 17(a)(1) of the Act, but not under §§ (a)(2) or (a)(3). It is doubtful that a different interpretation would be given if an implied private cause of action is found to exist. Thus, the implication of a private right of action under § 17(a) of the Act would allow and encourage the total circumnavigation of the new restrictions the U.S. Supreme Court has placed on a cause of action under § 10(b) of the Securities Exchange Act of 1934, [15 U.S.C.S. § 78j](#).

HN10 [blue download icon] **Federal & State Interrelationships, Federal Common Law**

In determining whether to imply a private right of action, the touchstone is Congressional intent -- not whether this court thinks it can improve upon that statutory scheme that Congress enacted into law. In order to divine this Congressional intent, the Court established a four prong analysis in *Cort v. Ash*. This analysis asks: First, is the plaintiff one of the class for whose especial benefit the statute was enacted, -- that is, does the statute create a federal right in favor of the plaintiff? Second, is there any indication of legislative intent, explicit or implicit, either to create such a remedy or to deny one? Third, is it consistent with the underlying purposes of the legislative scheme to imply such a remedy for the plaintiff? And finally, is the cause of action one traditionally relegated to state law, in an area basically the concern of the states, so that it would be inappropriate to infer a cause of action based solely on federal law? While all four factors are relevant, they are not accorded equal weight. The first three, which more directly impact upon Congressional intent, are more important.

Governments > Legislation > Interpretation

Securities Law > ... > Civil Liability > Fraudulent Interstate Transactions > General Overview

HN11 [blue download icon] **Legislation, Interpretation**

The legislative history of the Securities Act of 1933 indicates that §§ 11 and 12 of the Act, [15 U.S.C.S. §§ 77k](#) and [77l](#), were perceived as the only civil liability provisions of the statute. In addition, the existence of express remedies within the same statute militates against a finding of Congressional intent to imply further remedies. This is especially true for § 17 of the Act, [15 U.S.C.S. § 77q\(a\)](#), as § 17(a) of the Act is sufficiently broad to cover virtually all activities addressed by §§ 11 and 12 of the Act. Section 17(a) of the Act does not have the internal restrictions and defenses found in §§ 11 and 12 of the Act. Thus, if a private right of action were to be implied under § 17(a) of the Act, it would become the preferable remedy, rendering §§ 11 and 12 of the Act entirely superfluous. The complex scheme which Congress wove in the express civil liability sections would be totally undermined.

HN12 [blue download icon] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

Under the Racketeer Influenced and Corrupt Organizations Act of 1970 (RICO), [18 U.S.C.S. §§ 1961-1968](#), engaging in a "pattern of racketeering" within the confines of an "enterprise" becomes an offense separate from the

565 F. Supp. 476, *476L^A983 U.S. Dist. LEXIS 17101, **1

predicate violations. To understand the structural mechanism of RICO, some definitions are in order. [18 U.S.C.S. § 1961\(1\)](#) defines "racketeering activity" as specified state law offenses punishable by incarceration for more than one year, as well as any violation of a long list of federal statutes. A "pattern of racketeering activity" is defined as the commission of at least two predicate acts within ten years. [18 U.S.C.S. § 1961\(5\)](#). The statutory definition of "enterprise" is broad enough to encompass just about any group of individuals. [18 U.S.C.S. § 1961\(4\)](#). However, it is [18 U.S.C.S. § 1962](#) which actually sets out the proscribed activities.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Securities Law > RICO Actions > General Overview

[HN14](#) [] Racketeer Influenced & Corrupt Organizations, Remedies

In addition to criminal remedies, the Racketeer Influenced and Corrupt Organizations Act of 1970 (RICO), [18 U.S.C.S. §§ 1961-1968](#), provides a private right of action for any person injured in his business or property by reason of a violation of [18 U.S.C.S. § 1962](#). Treble damages attach to a RICO verdict as well. [18 U.S.C.S. § 1964\(c\)](#). However, the civil plaintiff is not required to prove a prior conviction, and must only prove the statutory elements of a cause of action by a preponderance of the evidence. Finally, in interpreting and applying all of RICO's provisions, Congress has dictated that the statute shall be liberally construed to effectuate its remedial purposes.

[HN15](#) [] Racketeering, Racketeer Influenced & Corrupt Organizations Act

The overwhelming majority of courts to address this issue have concluded that the Racketeer Influenced and Corrupt Organizations Act of 1970, [18 U.S.C.S. §§ 1961-1968](#), was not intended to be, and should not be limited to, the organized crime context.

[**HN19**](#) [L] **Racketeer Influenced & Corrupt Organizations Act, Elements**

The goal of **antitrust law** is to promote free competition. Frivolous antitrust suits might ruin defendants, who are legitimate business persons. One less business in a given area will increase concentration, thus decreasing competition. In the organized crime context, it does not matter if an illegal business activity is ruined -- indeed that is exactly what the Racketeer Influenced and Corrupt Organizations Act of 1970 (RICO), [15 U.S.C.S. §§ 1961-1968](#), is endeavoring to accomplish. Thus, the policy underlying the limits placed on private antitrust suits is inapposite in the RICO milieu.

[**HN20**](#) [L] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

Reading a competitive injury requirement into [18 U.S.C.S. § 1964\(c\)](#) would create an insurmountable practical problem. This approach would literally require plaintiff to be in competition with defendant. In the situation where an illegitimate enterprise is endeavoring to infiltrate and take over a competing business, this requirement would not be a problem. However, all potential plaintiffs will not fit into this category, leaving certain targeted behavior unpunished. The difficulty in proving causation may be significant for those plaintiffs who cannot prove infiltration. This interpretation would be inconsistent with the broad remedial purposes behind the Racketeer Influenced and Corrupt Organizations Act of 1970, [18 U.S.C.S. §§ 1961-1968](#). To conclude otherwise would leave undisturbed racketeers whose activity does not infringe on their competitor's markets. It is untenable to suggest that Congress intended such a result.

The Racketeer Influenced and Corrupt Organizations Act of 1970 (RICO), [18 U.S.C.S. §§ 1961-1968](#), does not require proof of a commercial or competitive injury. RICO was broadly aimed at striking a mortal blow against the property interests of organized crime. The court is reluctant to undermine that broad mission of RICO by engrafting onto its civil provisions a competitive injury requirement.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

[HN22](#) [+] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

A Racketeer Influenced and Corrupt Organizations Act of 1970 (RICO), [18 U.S.C.S. §§ 1961-1968](#), plaintiff must prove the existence of both an "enterprise" and a "pattern of racketeering activity." The "enterprise" is not the "pattern of racketeering activity;" it is an entity separate and apart from the pattern of activity in which it engages. The existence of an enterprise at all times remains a separate element which must be proven. On a very common-sense level, the enterprise is the actors and the pattern is the unlawful acts. The enterprise need not be a legitimate entity and RICO applies with as much force to enterprises formed for wholly illegal purposes.

Opinion

[*479] MEMORANDUM

GILES, J.

Various defendants have filed motions to dismiss the amended complaint in this action. For the reasons which follow, their motions shall be granted in part and denied in part.

This now complex securities fraud case had rather humble beginnings. On June 25, 1982, Murray Kimmel filed a four page, two count complaint against John Peterson, alleging a violation of section 10(b), [Rule 10b-5](#) and common law fraud. However, this relative simplicity was short-lived. On September 10, 1982, an amended complaint was filed. Dr. Kimmel was joined by four other plaintiffs -- his wife and children -- in suing sixteen defendants. The amended complaint, stretching some thirty four pages, contains twelve counts which allege violations of sections 11, 12(2), 15 [*2] and 17(a) of the Securities Act of 1933, [15 U.S.C. § 77k](#), [77l\(2\)](#), 77o, 77q(a) (1976), sections 10(b) and 20 of the Securities Exchange Act of 1934, [15 U.S.C. § 78j](#); 78t (1976), as well as claims under the Racketeer Influenced and Corrupt Organizations Act of 1970 ["RICO"], 18 U.S.C. § 1961-68 (1976). Pendent state claims include common law fraud, misrepresentation, negligence, infliction of emotional distress, and a count under the Pennsylvania Securities Act, [Pa. Stat. Ann. tit. 70 § 1-201 et seq.](#) (Purdons 1982-1983 Supp.).

I. FACTS

Taking as true the well-pled allegations in the complaint, as I must on a motion to dismiss,¹ the factual scenario giving rise to this litigation may be summarized as follows: Dr. Kimmel responded to an advertisement in a financial journal placed by Muir, an investment banking and brokerage firm.² He was contacted by defendant Peterson, one of Muir's brokers, and Dirks, a partner in and manager of Muir. Kimmel related that he had a thriving medical practice and wanted to make some prudent investments. As a busy physician, he had little time to follow the wanderings of the stock market. Therefore, he needed a broker upon whom he [**3] could rely heavily to choose investments. He emphasized that although he was seeking investments which would be profitable, they must be safe. Peterson and Dirks detailed their expertise in the area and assured him that all investments chosen would be thoroughly investigated to ensure their safety.

The fraudulent activities alleged fall into two related categories. The first involves the types of securities purchased by defendants. Despite Kimmel's admonitions, Peterson acquired highly speculative stock for the account. Many of the high risk purchases were new issues underwritten by Muir. Kimmel was often consulted and urged to purchase [**4] these securities on the basis of insufficient, false or misleading information. The prospectus contained similarly deficient information, causing artificial overvaluation and thus manipulation of the market for these securities. In addition, Kimmel was advised to increase his holdings by purchasing stock on margin, without being apprised of the accompanying risks. In essence, Dirks and Peterson actively ignored Kimmel's wishes, utilizing his money to inure to the benefit of Muir.

The second category of alleged fraudulent transactions relates to the evolution of the relationship between Kimmel and Muir. On the advice of Peterson and Dirks, Kimmel became a subordinated creditor of Muir. Defendants continually tried to convince him that Muir was a safe investment, pointing to its famous general partners, such as Mario Andretti, Jimmy Connors and John Denver. When Peterson invited the Kimmel family to the Montreal Grand Prix, Mario Andretti was introduced as a general partner of Muir and did not protest or deny [*480] the title.³ Thereafter, Peterson and Dirks tried to persuade Kimmel to increase his holdings in Muir, again representing it to be a safe investment. This time, [**5] Kimmel became a limited partner with an investment of an additional \$200,000. However, defendants did not disclose the risks inherent in this investment or the fact that Muir was fast becoming a vehicle for the underwriting of speculative new issues. The complaint further alleges a course of fraudulent conduct surrounding Kimmel's partnership interest in Muir, all revolving about the non-disclosure of crucial information on the firm's financial health. For example, it is alleged that a financial statement misrepresented Muir's status by failing to reflect the overvaluation of the new issues. An increased investment of \$450,000.00 which was to be applied to Kimmel's subordinated loan was, without his knowledge, used to increase his partnership interest. Unfavorable publicity caused Kimmel to once again inquire into the safety of his investments. Even after Muir had called in the Securities and Exchange Commission, Peterson still insisted that all investments were safe. On August 17, 1981, Muir closed and a trustee was appointed. It was only then that Peterson advised Kimmel to remove his investments from Muir. However, by that point, he was unable to save his investments. Both [**6] Dirks and Peterson promised to reimburse Kimmel for part of his losses; however, both refused to put that promise in writing or honor it.

Although Peterson and Dirks allegedly were principally responsible for these events, many Muir associates and affiliates were also implicated. As a result of defendants' activities, the Kimmels lost their life savings and allegedly suffered tremendous mental anguish. In addition, the funds earmarked for their children's educations were lost.⁴

¹ See, e.g., *Miree v. DeKalb County*, 433 U.S. 25, 27, 53 L. Ed. 2d 557, 97 S. Ct. 2490 n.2 (1977); *Rogin v. Bensalem Township*, 616 F.2d 680, 685 (3d Cir. 1980); *Bogosian v. Gulf Oil Corp.*, 561 F.2d 434, 444 (3d Cir. 1977).

² Muir was a limited partnership which, according to the complaint, went into receivership in August of 1981. Amended Complaint para. 5.

³ During the period involved, from the summer of 1978 until 1981, Peterson and his associate Nancy Rochford, regularly entertained Dr. and Mrs. Kimmel to further cement their relationship of trust.

Peterson moves to dismiss, or in the alternative, for [**7] a more definite statement. In support of his motion, he raises four grounds: (1) the entire complaint lacks adequate specificity; (2) there is no private right of action under section 17(a) of the Securities Act of 1933; (3) the RICO count should be dismissed for failure to state a cause of action and (4) the count claiming infliction of emotional distress should also be dismissed for failure to state a cause of action. Raymond and Jessie Dirks move to dismiss, relying upon the grounds and arguments offered by Peterson. Mario Andretti also moves to dismiss for failure of the amended complaint to state a cause of action against him.

II. DISCUSSION

A. Overall Specificity

Peterson argues that the complaint lacks the specificity required under [Rule 9\(b\) of the Federal Rules of Civil Procedure](#). In support of his claim that the complaint is so vague that it defies intelligent response, Peterson cites the absence of details surrounding each securities transaction. In addition, the complaint is assailed for its use of "information and belief" pleading. Plaintiffs counter, asserting that the complaint gives defendants adequate notice with sufficient detail to allow them to answer. [**8] Responding to the "information and belief" contention, plaintiffs argue that the matters are peculiarly within defendants' knowledge. Moreover, it is a "technical point of pleading," see Plaintiffs' Memorandum in Opposition to the Motion to Dismiss at 10, and plaintiffs offer to stipulate with defendants to remove the offending language and stand on their allegations in the complaint.

[Rule 8\(a\) of the Federal Rules of Civil Procedure](#) sets the general tone of the federal pleading rules. Unlike its pleading predecessors, [HN1](#) the Federal Rules require only "a short and plain statement of the claim showing that the pleader is entitled to relief." [*481] [Fed. R. Civ. P. 8\(a\)](#). [Rule 9\(b\)](#) articulates a stricter standard to be applied when alleging fraud. It requires "the circumstances constituting fraud . . . [to] . . . be stated with particularity." [Fed. R. Civ. P. 9\(b\)](#). Reconciling these two rules to strike a sound balance is not an easy task. See [Credit Finance Corp., Ltd. v. Warner & Swasey Co.](#), 638 F.2d 563, 566 (2d Cir. 1981); [Schlick v. Penn-Dixie Cement Corp.](#), 507 F.2d 374, 378-80 (2d Cir. 1974), cert. denied, 421 U.S. 976, 44 L. Ed. 2d 467, 95 S. Ct. 1976 [*9] (1975). However, the oft quoted language from Wright and Miller endeavors to explore the rationale behind [Rule 9\(b\)](#): "It is a serious matter to charge a person with fraud and hence no one is permitted to do so unless he is in a position and is willing to put himself on record as to what the alleged fraud consists of specifically." 5 C. Wright & A. Miller, *Federal Practice and Procedure*, § 1298 at 413 (1969) (footnotes omitted) see [Segal v. Gordon](#), 467 F.2d 602, 607 (2d Cir. 1972). In *Segal*, the Second Circuit attempted to articulate a standard, noting that "10b-5 [HN2](#) violations will not pass scrutiny if they do not allege with some specificity the statements allegedly constituting fraud." [467 F.2d at 607](#). The court went on to note that "mere conclusory allegations . . . are insufficient." *Id.* Accord [Decker v. Massey-Ferguson, Ltd.](#), 681 F.2d 111, 115 (2d Cir. 1982); [Mauriber v. Shearson/American Express, Inc.](#), 546 F. Supp. 391, 393 (S.D.N.Y. 1982); [Merrill Lynch, Pierce, Fenner & Smith v. Del-Valle](#), 528 F. Supp. 147, 149 (S.D. Fla. 1981). The pleading must apprise the defendants of the substance of plaintiffs' claim with sufficient detail to enable the defendants [**10] to answer. See, e.g., [Gottreich v. San Francisco Investment Co.](#), 552 F.2d 866 (9th Cir. 1977); [Landmark Savings & Loan v. Rhoades](#), 527 F. Supp. 206, 207 (E.D. Mich. 1981); [Beascochea v. Sverdrup & Parcel Assoc., Inc.](#), 486 F. Supp. 169, 174 (E.D. Pa. 1980). However, this rule is not to be applied with draconian strictness. As the court in *Beascochea*, noted, [Rule 9\(b\)](#) [HN3](#) "must be read in conjunction with the liberal pleading rules, which eschew technicalities." [486 F. Supp. at 174](#). Similarly, in [Adair v. Hunt International Resources Corp.](#), 526 F. Supp. 736 (N.D. Ill. 1981), after noting that [Rules 8](#) and [9](#) are to be "read together," the court stated; "with these principles in mind, the purpose of [Rule 9](#) becomes clear. [Rule 9](#) lists the actions in which *slightly* more is needed for notice." [526 F. Supp. at 744](#) (quoting [Tomera v. Galt](#), 511 F.2d 504, 508 (7th Cir. 1975)) (emphasis in original).

After reviewing the amended complaint, I conclude that the dictates of [Rule 9\(b\)](#) have been satisfied. With respect to the purchase of securities, other than the interests in Muir, the complaint identifies the parties and their roles in the transactions involved. Dr. [**11] Kimmel's request for safe investments is emphasized and the repeated breaches of his trust are detailed. Specific acts of knowing misrepresentations and omissions are alleged. As

⁴ Defendants' had also convinced the Kimmels to make their children subordinated creditors of Muir as well.

defendant points out, the complaint does fail to describe each of the alleged transactions by date, name of stock, amount and purchase price. Defendant fears that the complaint "encompasses every single stock transaction engaged in by Kimmel from 1978 to August 1981." See Defendants' Memorandum in Support of the Motion to Dismiss at 12-13. This may well be the case. Yet, dismissal is not warranted. This case does not involve one or two or even ten isolated allegations of fraud, but rather over two years of continued fraudulent securities transactions. The complaint contains more than mere conclusory allegations of wrongdoing. It details a course of conduct during which defendants invested Dr. Kimmel's money for their own or Muir's benefit. Concerns over frivolous assertions of fraud, which originally prompted the enactment of [Rule 9\(b\)](#), do not apply here. Plaintiff has alleged far more than boilerplate claims of misrepresentation. The basic charge is very specific -- managing Dr. Kimmel's entire [\[**12\]](#) investment portfolio in a manner involving great risk without his knowledge and against his express wishes. I find the complaint adequately places defendants on notice and allows them to respond.

HN4 From a practical standpoint, defendants have access to all of the records of the [\[*482\]](#) transactions and can glean from them the information needed to respond. It is unclear whether plaintiffs have access to such detailed information and a plaintiff should not be precluded from suing if he or she does not. Fundamentally, although [Rule 9\(b\)](#) requires specificity, to demand this quantum of detail at this stage would totally undermine the letter and spirit of [Rule 8\(a\)](#) and the liberalized pleading envisaged under the Federal Rules of Civil Procedures.⁵ Finally, assuming plaintiff does have access to the information, requiring amendment will accomplish little more than delay. Plaintiffs would add detail to the allegations and defendants would, in all probability, make the same denials as would be made without the added detail. Only through discovery will both sides gain the information required to assert their respective claims and defenses.

[\[**13\]](#) As regards the allegations surrounding the loans to and interest in Muir, their specificity is sufficient. The complaint sets out dates, the sums lent, the express representations made by defendants and why those representations were fraudulent.

HN5 Generally, allegations plead on "information and belief" do not satisfy the specificity requirements of [Rule 9\(b\)](#). 2A *Moore's Federal Practice* para. 9.03 (2d ed. 1982). However, the objective of this rule may be satisfied if the allegations are accompanied by a statement of the facts upon which the belief is founded, see [Schlick v. Penn-Dixie Cement Corp., 507 F.2d 374, 379 \(2d Cir. 1974\)](#), cert. denied, 421 U.S. 976, 44 L. Ed. 2d 467, 95 S. Ct. 1976 (1975). The rule may also be relaxed as to matters within the adverse party's knowledge, although some courts have required an accompanying statement of facts as well. See [Segal, 467 F.2d at 608; Arpet Ltd. v. Homans, 390 F. Supp. 908, 913 \(W.D. Pa. 1975\)](#). The amended complaint does detail the factual allegations upon which the beliefs are grounded and much of the substance of the allegations is within defendants' knowledge. Moreover, plaintiffs have stated that they are [\[**14\]](#) willing to strike the offending language and stand on their allegations. Plaintiff's Memorandum in Opposition of the Motion to Dismiss at 10-11. In light of that concession, defendants' objections are moot. Since I conclude that the amended complaint in no way offends [Rule 9\(b\)](#), defendants' motion to dismiss on this ground shall be denied.

B. Section 17(a) of the Securities Act of 1933

Plaintiffs' complaint contains a count brought under section 17(a) of the Securities Act of 1933, [15 U.S.C. § 77q \(1976\)](#). Defendants argue that there is no private cause of action under that section and, as an unspoken corollary,

⁵ The Ninth Circuit eschewed an overly stringent reading of [Rule 9\(b\)](#) and expressed a similar concern over losing sight of the liberality of the pleading rules. In [Gottreich, 552 F.2d 866 \(9th Cir. 1977\)](#) the court stated:

Defendants say that an allegation that they knew that the representations were false is not the equivalent of an allegation that they were false. How could defendants know that they were false if they were not false? We had thought that this kind of nit-picking had disappeared in 1938, when the Federal Rules of Civil Procedure were first adopted.

[552 F.2d at 867](#). Although I do not mean to suggest that defendants' contentions are along the same vein, the expressed concern over the Federal Rules is applicable to this case.

urge that one should not be implied. Although the numerical weight of authority is in favor of implying a private right of action,⁶ [**16] neither the Third [*483] Circuit nor the Supreme Court has spoken. See *Aaron v. SEC*, 446 U.S. 680, 689, 64 L. Ed. 2d 611, 100 S. Ct. 1945 (1980) (declining to rule on the issue); *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 733-34, 44 L. Ed. 2d 539, 95 S. Ct. 1917 n.6 (1975) (same). This is a difficult issue, especially in light of the implication of a private right of action under section 10(b) on the one hand, [**15] and the Supreme Court's recent retrenchment from the implication of private remedies on the other. See, e.g., *Transamerica Mortgage Advisors, Inc. v. Lewis*, 444 U.S. 11, 24, 62 L. Ed. 2d 146, 100 S. Ct. 242 (1979) (refusal to imply private remedy under section 206 of the Investment Advisors Act); *Touche Ross & Co. v. Redington*, 442 U.S. 560, 570-71, 61 L. Ed. 2d 82, 99 S. Ct. 2479 (1979) (refusal to imply private right of action under section 17(a) of the Securities Exchange Act of 1934). See also *Walck v. American Stock Exchange, Inc.*, 687 F.2d 778, 780 (3d Cir. 1982) (no implied right of action under sections 6 and 7 of the Securities Exchange Act of 1934). But see *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Curran*, 456 U.S. 353, 102 S. Ct. 1825, 1847-48, 72 L. Ed. 2d 182 (1982) (private cause of action implied under the Commodities Exchange Act).⁷

A majority of the courts which have implied a private right of action under section 17(a) have done so with little discussion or analysis. In the first case to imply a private remedy, *Osborne v. Mallory*, 86 F. Supp. 869 (S.D.N.Y. 1949), the court simply paralleled section 17(a) to section 10(b), deciding that if a private right existed under the latter, it should also exist under the former. *86 F. Supp. at 879*. More recent decisions cite only to Judge Friendly's concurrence in *SEC v. Texas Gulf Sulphur Co.*, 401 F.2d 833 (2d Cir. 1968), cert. denied, sub nom., *Coates v. SEC*, 394 U.S. 976, 22 L. Ed. 2d 756, 89 S. Ct. 1454 (1969), where he noted that although a private [**17] remedy was never intended, "there seemed little practical point in denying the existence of such an action under § 17 . . . once it had been established . . . that an aggrieved buyer has a private action under § 10(b) of the 1934 Act." *401 F.2d at 867*. See, e.g., *Stephenson v. Calpine Conifers II, Ltd.*, 652 F.2d 808, 815 (9th Cir. 1981); *Kirshner v. United States*, 603 F.2d 234, 241 (2d Cir. 1978). In *Newman v. Prior*, 518 F.2d 97 (4th Cir. 1975), the Fourth Circuit concluded a private right of action should be implied by merely citing to an earlier case, *Johns Hopkins University v. Hutton*, 488 F.2d 912 (4th Cir. 1973), which had assumed without discussion the existence of a private remedy. *Newman*, 518 F.2d at 99. In sharp contrast, many of those who refuse to imply a private right of action have written scholarly and persuasive opinions. See, e.g., *Landry v. All American Assurance Co.*, 688 F.2d 381 (5th Cir. 1982); *Hill v. Der*, 521 F. Supp. 1370 (D. Del. 1981); *Reid v. Mann*, 381 F. Supp. 525 (N.D. Ill. 1974). **HN6** [↑] On the basis

⁶ Of the courts of appeal to address the issue, four have implied a private right of action, see *Stephenson v. Calpine Conifers II, Ltd.*, 652 F.2d 808, 815 (9th Cir. 1981); *Lincoln National Bank v. Herber*, 604 F.2d 1038, 1040 n.2 (7th Cir. 1979); *Kirshner v. United States*, 603 F.2d 234, 241 (2d Cir. 1978); cert. denied, sub nom., *Goldberg v. Kirshner*, 444 U.S. 995, 62 L. Ed. 2d 426, 100 S. Ct. 531 (1979); *Newman v. Prior*, 518 F.2d 97, 99 (4th Cir. 1975); two have refused to do so, see *Landry v. All American Assurance Co.*, 688 F.2d 381, 391 (5th Cir. 1982); *Shull v. Dain, Kalman & Quail, Inc.*, 561 F.2d 152, 159 (8th Cir. 1977), cert. denied, 434 U.S. 1086, 55 L. Ed. 2d 792, 98 S. Ct. 1281 (1978) and one appears undecided, leaning slightly toward joining the majority, see *Gutter v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 644 F.2d 1194, 1196 (6th Cir. 1981), cert. denied, 455 U.S. 909, 71 L. Ed. 2d 447, 102 S. Ct. 1256 (1982). However, the implied right of action under § 17(a) has not fared as well on the district court level. See, e.g., *Hill v. Der*, 521 F. Supp. 1370, 1378 (D. Del. 1981); *Ingram Industries v. Nowicki*, 502 F. Supp. 1060, 1069 (E.D. Ky. 1980); *McFarland v. Memorex Corp.*, 493 F. Supp. 631, 652 (N.D. Cal. 1980); *Martin v. Howard, Weil, Labouisse, Friedricks, Inc.*, 487 F. Supp. 503, 507 (E.D. La. 1980); *Reid v. Mann*, 381 F. Supp. 525, 528 (N.D. Ill. 1974); *Dyer v. Eastern Trust & Banking Co.*, 336 F. Supp. 890, 903 (D. Me. 1971). But see, *Campito v. McManus, Longe, Brockwehl, Inc.*, 470 F. Supp. 986, 993 (N.D.N.Y. 1979); *DeMarco v. Security Planning Service, Inc.*, 462 F. Supp. 1066, 1069 (D. Ariz. 1978); *In re Gap Stores Securities Litigation*, 457 F. Supp. 1135, 1142 (N.D. Cal. 1978). In this district a private right of action has been implied. See, e.g., *Engl v. Berg*, 511 F. Supp. 1146, 1151-52 (E.D. Pa. 1981); *Wulc v. Gulf & Western, Inc.*, 400 F. Supp. 99, 103 (E.D. Pa. 1975); *B & B Investment Club v. Kleinert's, Inc.*, 391 F. Supp. 720, 726 (E.D. Pa. 1975). See also *Mifflin Energy Sources Inc. v. Brooks*, 501 F. Supp. 334, 336-37 (W.D. Pa. 1980).

⁷ The trend away from implying private remedies can be witnessed outside the securities area. See, e.g., *Middlesex County Sewerage Authority v. National Sea Clammers Ass'n*, 453 U.S. 1, 69 L. Ed. 2d 435, 101 S. Ct. 2615 (1981); *California v. Sierra Club*, 451 U.S. 287, 68 L. Ed. 2d 101, 101 S. Ct. 1775 (1981); *Universities Research Ass'n, Inc. v. Coutu*, 450 U.S. 754, 67 L. Ed. 2d 662, 101 S. Ct. 1451 (1981).

of statutory construction and the superior reasoning of those courts who follow the minority rule, I decline to imply a private [**18] cause of action under section 17(a) of the 1933 Act.

[*484] Before embarking on the familiar [Cort v. Ash, 422 U.S. 66, 45 L. Ed. 2d 26, 95 S. Ct. 2080 \(1975\)](#) analysis, a historical note will lend perspective to the issue. As one court observed: "the main reason for the somewhat awkward development of the law under § 17(a) of 1933 Act is the fact that it has traditionally lived in the shadow of another area of securities law: [Rule 10b-5](#)." [Landry, 688 F.2d 381, 386 \(5th Cir. 1982\)](#). A private right of action was initially implied under section 10(b) of the Securities Exchange Act of 1934, and its implementing [rule, 10b-5, 17 C.F.R. § 240.10b-5 \(1982\)](#), in this district. [Kardon v. National Gypsum, 69 F. Supp. 512, 513-14 \(E.D. Pa. 1946\)](#). For several decades thereafter, the parameters of this cause of action were defined largely by the lower federal courts. See generally, [Wachovia Bank and Trust Corp. v. National Student Marketing Co., 209 U.S. App. D.C. 9, 650 F.2d 342, 351](#) and 351 n.20 (D.C. Cir. 1980), cert. denied, 452 U.S. 954, 101 S. Ct. 3098, 101 S. Ct. 3099, 69 L. Ed. 2d 965 (1981). When the Supreme Court finally considered the issue, it affirmed the [**19] implication of a private right of action without much discussion. See [Superintendent of Insurance v. Bankers Life & Cas. Co., 404 U.S. 6, 13, 30 L. Ed. 2d 128, 92 S. Ct. 165 n.9 \(1971\)](#). However, the Supreme Court later characterized this decision as mere acquiescence to a twenty-five year tradition established by the lower federal courts. See [Cannon v. University of Chicago, 441 U.S. 677, 690-93, 60 L. Ed. 2d 560, 99 S. Ct. 1946 n.13 \(1979\); Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 730, 44 L. Ed. 2d 539, 95 S. Ct. 1917 \(1975\)](#). Therefore, the private remedy under section 10(b) was essentially thrust upon a Court unwilling to overturn twenty-five years worth of precedent.

Until recently section 10(b) was an extremely broad remedy -- lacking the internal restrictions found in the express remedy provisions.⁸ The judicially evolved cause of action was even being utilized as a vehicle for the redress of breaches of state-created fiduciary duties. See [Superintendent of Insurance, 404 U.S. at 10-12](#). However, the Supreme Court intervened and began to narrow the scope of the remedy. In *Blue Chip Stamps*, the Court ruled that an individual must be either [**20] a purchaser or seller of securities in order to have standing under section 10(b).⁹ [**22] [421 U.S. at 754-55](#). In [Santa Fe Industries, Inc. v. Green, 430 U.S. 462, 51 L. Ed. 2d 480, 97 S. Ct. 1292 \(1977\)](#), the Supreme Court ruled that essentially state created causes of action for mismanagement and other breaches of fiduciary duties were not cognizable under section 10(b). [Santa Fe, 430 U.S. at 477, 479-80](#). Perhaps most importantly, [Ernst & Ernst v. Hochfelder, 425 U.S. 185, 201, 47 L. Ed. 2d 668, 96 S. Ct. 1375 \(1976\)](#) added a scienter requirement to the section 10(b) cause of action.¹⁰ As it has now become more difficult to state a cause of action under section 10(b), plaintiffs are turning increasingly to the heretofore ignored anti-fraud provisions of section 17(a). Section 17(a) [HN7](#)[↑] is not limited to fraud in the [*485] purchase or sale of securities, see note 9 *supra*. Most importantly, it appears that scienter is not required to state a cause of action under section 17(a)(2) or (a)(3). In [Aaron v. SEC, 446 U.S. 680, 64 L. Ed. 2d 611, 100 S. Ct. 1945 \(1980\)](#), in the context of an SEC enforcement action, the Court held that scienter was required under section [**21] 17(a)(1), but not under subsections (a)(2) or (a)(3). [446 U.S. at 697](#). It is, as the *Landry* Court noted; "doubtful that a different interpretation would be given if an implied private cause of action is found to exist," [688 F.2d at 387](#). Compare [Aaron v. SEC, 446](#)

⁸ For example, sections 11 and 12 of the 1933 Act are subject to the statute of limitations contained in section 13. As an implied cause of action, there is no statutory statute of limitations for actions brought under section 10(b). The most nearly analogous state statute applies, which is often longer than the period found in section 13.

⁹ [HN8](#)[↑] By its very language, section 17(a) is broader than section 10(b), as it encompasses fraud in the "offer" or "sale" of securities, rather than just fraud in the purchase or sale.

¹⁰ In [Herman & MacLean v. Huddleston, 459 U.S. 375, 103 S. Ct. 683, 74 L. Ed. 2d 548, 51 U.S.L.W. 4099 \(1983\)](#) the Supreme Court reiterated the logic employed in *Ernst & Ernst*. The coverage of section 10(b), because of its broad language, necessarily overlaps with some of the express remedies granted in the Securities Act of 1933, specifically section 11. Section 11, which can be triggered by negligent conduct, has certain procedural safeguards, such as a set statute of limitations and a bond for costs provision. Section 10(b) lacks these procedural obstacles. Thus, were 10(b) to cover negligent actions, section 11 and its procedures would be rendered superfluous, "thereby nullify[ing] the effectiveness of the carefully drawn procedural restrictions on these express actions." [Herman, 51 U.S.L.W. at 4102](#), (quoting [Ernst and Ernst, 425 U.S. at 210](#)). This statutory analysis is applicable to section 17(a) as well.

U.S. at 695. (scienter required in SEC injunctive suit under [Rule 10b-5](#)) with [Ernst & Ernst, 425 U.S. at 201](#) (scienter required in private cause of action under 10b-5). Thus, the implication of a private right of action under section 17(a) would allow and encourage the total circumnavigation of the new restrictions the Court has placed on a section 10(b) cause of action.¹¹

[**23] Section 17(a) provides:

- (a) [HN9](#) It shall be unlawful for any person in the offer or sale of any securities by the use of any means or instruments of transportation or communication in interstate commerce or by the use of the mails, directly or indirectly --
 - (1) to employ any device, scheme, or artifice to defraud, or
 - (2) to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or
 - (3) to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon the purchaser.

[15 U.S.C. § 77q \(1976\)](#). This anti-fraud provision is found in the Securities Act of 1933, flanked by the express private remedy provisions of sections 11 and 12. The latter provisions are complex and carefully crafted, containing internal defenses and restrictions unknown to section 17(a). For example, although section 11 is triggered by negligent conduct, a potential defendant, other than the issuer, is granted a "due diligence" defense. Section 11(b), [15 U.S.C. \[**24\] § 77k\(b\) \(1976\)](#). In addition, a defendant may be absolved of liability under section 11(a) if it can be proven that the plaintiff knew about the misstatement or omission. [15 U.S.C. § 77k\(a\)](#). The same is true under section 12(2) and liability thereunder is limited to the victim's immediate seller. Section 12(2) also contains a due diligence defense. [15 U.S.C. § 77l](#). By contrast, section 17(a) is written as an absolute liability provision and its language is sufficiently broad to encompass all of the behavior addressed by sections 11 and 12.

[HN10](#) In determining whether to imply a private right of action, the touchstone is Congressional intent -- "not whether this court thinks it can improve upon that statutory scheme that Congress enacted into law." [Touche-Ross & Co. v. Redington, 442 U.S. 560, 578, 99 S. Ct. 2479, 61 L. Ed. 2d 82 \(1979\)](#). See also [Walck v. American Stock Exchange, Inc., 687 F.2d 778, 782 \(3d Cir. 1982\)](#). In order to divine this Congressional intent, the Court established a four prong analysis in [Cort v. Ash, 422 U.S. 66, 45 L. Ed. 2d 26, 95 S. Ct. 2080 \(1975\)](#). This analysis asks:

First, is the plaintiff "one of the class for whose especial [**25] benefit the statute was enacted," -- that is, does the statute create a federal right in favor of the plaintiff? Second, is there any indication of legislative intent, explicit or implicit, either to create such a remedy or to deny one? Third, is it consistent with the underlying purposes of the legislative scheme to imply such a remedy for the plaintiff? And [*486] finally, is the cause of action one traditionally relegated to state law, in an area basically the concern of the States, so that it would be inappropriate to infer a cause of action based solely on federal law?

[422 U.S. at 78](#) (citations omitted). The Court in *Redington* indicated that while all four factors are relevant, they are not accorded equal weight. The first three, which more directly impact upon Congressional intent, are more important. [Redington, 442 U.S. at 575-76](#).

By proscribing fraudulent activities in the offer or sale of securities, section 17(a) was obviously enacted to prevent fraud, thus protecting potential victims. Accord [Hill v. Der, 521 F. Supp. 1370, 1376 \(D. Del. 1981\)](#). See also [Transamerica, 444 U.S. at 24](#) (section 206 of Investment Advisors Act, worded much [**26] like section 17(a), designed to benefit a particular class); [Walck v. American Stock Exchange, Inc., 687 F.2d 778, 783 \(3d Cir. 1982\)](#)

¹¹ Many lower courts have developed interesting solutions to this perceived procedural escapism. See, e.g., [Feldman v. Simkins Industries, Inc., 679 F.2d 1299, 1305 \(9th Cir. 1982\)](#) (under section 17(a)) must prove scienter or a duty to disclose non-public information); [Collins v. Signetics Corp., 443 F. Supp. 552, 555 \(E.D. Pa. 1977\)](#) (implied right of action under section 17(a) subject to limitations found in section 12(2) of the 1933 Act).

(section 6 of the 1934 Act, setting registration standards for securities exchanges, was enacted to protect investors). In [United States v. Naftalin, 441 U.S. 768, 60 L. Ed. 2d 624, 99 S. Ct. 2077 \(1979\)](#), the Court reviewed the legislative history behind section 17(a) and concluded that its purpose was "to protect the investing public and honest business. . ." [441 U.S. at 775-76](#) (quoting S. Rep. No. 47, 73d Cong., 1st Sess., 1 (1933)). Accord, [Reid v. Mann, 381 F. Supp. 525, 526 \(N.D. Ill. 1974\)](#). Thus, I find that the first prong of the *Cort* test is satisfied -- plaintiff, as an investor, is a member of the class "for whose especial benefit the statute was enacted." ¹² However, "the mere fact that the statute was designed to protect [investors] does not require the implication of a private cause of action for damages on their behalf . ." [Walck, 687 F.2d at 783-84](#) (quoting [Transamerica Mortgage Advisors v. Lewis, 444 U.S. 11, 24, 62 L. Ed. 2d 146, 100 S. Ct. 242 \(1979\)](#) (citations omitted)).

[**27] The second factor under *Cort* is whether there is any legislative intent to create or deny a cause of action. [HN11](#) [↑] The legislative history of the 1933 Act indicates that sections 11 and 12 were perceived as the only civil liability provisions of the statute. See [SEC v. Texas Gulf Sulphur, 401 F.2d 833, 867](#) (2d Cir.), cert. denied *sub nom.*, [Coates v. SEC, 394 U.S. 976, 22 L. Ed. 2d 756, 89 S. Ct. 1454 \(1968\)](#) (Friendly, J., concurring) (citing H. Rep. No. 85, 73d Cong., 1st Sess. 9-10 (1933)). Accord, [Landry, 688 F.2d at 389](#) and n. 35; [Dyer v. Eastern Trust and Banking Co., 336 F. Supp. 890, 904-05 \(D. Me. 1971\)](#); Ruder, *Civil Liability Under Rule 10b-5: Judicial Revision of Legislative Intent*, 57 Nw. U.L. Rev. 627, 656-57 (1963). In addition, the existence of express remedies within the same statute militates against a finding of Congressional intent to imply further remedies. See, e.g., [Middlesex County Sewerage Authority v. National Sea Clammers Ass'n, 453 U.S. 1, 14-15, 69 L. Ed. 2d 435, 101 S. Ct. 2615 \(1981\)](#); [Transamerica, 444 U.S. at 19-21](#); [Redington, 442 U.S. at 571-74](#); [Walck, 687 F.2d at 784](#). This is especially true here, as section 17(a) [**28] is sufficiently broad to cover virtually all activities addressed by sections 11 and 12. As mentioned earlier, however, section 17(a) does not have the internal restrictions and defenses found in sections 11 and 12.¹³ [**30] [*487] Thus, if a private right of action were to be implied under section 17(a), it would become the preferable remedy, rendering sections 11 and 12 entirely superfluous. The complex scheme which Congress wove in the express civil liability sections would be totally undermined. As the Court noted in *Redington*, it is "reluctant to imply a cause of action in § 17(a) that is significantly broader than the remedy that Congress chose to provide." [442 U.S. at 574](#). Along the same lines, in [Reid v. Mann, 381 F. Supp. 525 \(N.D. Ill. 1974\)](#) the Court noted that "[to] impose a greater responsibility [than that provided by §§ 11 and 12] . . . would unnecessarily restrain the conscientious administration of honest business with no compensating advantage to the public." [381 F. Supp. at 526](#) (quoting [Texas Gulf Sulphur, 401 F.2d at 867](#) (Friendly, J., concurring)). This same reasoning led the Supreme Court to require scienter under section 10(b), which again [**29] lacks the procedural barriers written into sections 11 and 12. A negligence standard under section 10(b) would similarly eviscerate the structure of the express liability sections, as plaintiffs would always prefer the former to the latter.¹⁴ See note 10

¹² In *Landry*, the Fifth Circuit found the first prong of *Cort* wanting, as "the statutory language does not suggest a private cause of action." [688 F.2d at 389](#). The provision is only "a general censure of fraudulent practices." *Id.* This argument is specious. A statute which lacks an express cause of action will rarely have language which "suggests a private cause of action." That the provision is a general proscription does not impact upon whether it was intended to protect a certain group of people. The mere fact that someone can be enjoined or criminally punished under section 17(a) inures to the benefit of potential victims. Finally, this conclusion ignores the Supreme Court's ruling to the contrary in *Naftalin*.

¹³ Section 13 is the statute of limitations section that applies to sections 11 and 12. See note 8 *supra*. Professor Loss notes that to allow an implied cause of action 17(a) would be "to attribute to Congress the rather elaborate intention that a purchaser may avoid the statute of limitations prescribed in § 13, as well as the possibility of having to post security for costs and perhaps the necessity of proving his own lack of knowledge of the falsity as in § 12(2) . ." 3 L. Loss, *Securities Regulation* at 1786 (2d ed. 1961) [hereinafter cited as Loss].

¹⁴ While discussing the propriety of implying a private remedy under section 10(b), Professor Loss explained the interrelationship of all of the statutory provisions:

The question is simply whether there is the same justification for implying such liability under the 1933 act as there is under the 1934 act. It is one thing to imply a private right of action under § 10(b) or the other provisions of the 1934 act, because the specific liabilities created by [§§ 9\(e\), 16\(b\)](#) and [18](#) do not cover all the variegated activities with which that act is concerned. But it is quite another thing to add an implied remedy under § 17(a) of the 1933 act to the detailed remedies

supra. As noted earlier, if *Aaron v. SEC* is any indicator, scienter will not be required under section 17(a)(2), and (a)(3). Therefore, the implication of a private remedy under section 17(a) would also undermine the Supreme Court's efforts to narrow the scope of a section 10(b) cause of action. The barriers placed around section 10(b) were established, at least in part, to save the remaining vitality of sections 11 and 12. See *Herman, 51 U.S.L.W. at 4102; Ernst & Ernst, 425 U.S. at 210*. Thus, the implication of a private cause of action under section 17(a) would not only write sections 11 and 12 out of the statute, but would also render meaningless the Supreme Court's efforts in the 10(b) area.

[**31] Interestingly, the language of section 17(a) is very similar to section 206 of the Investment Advisors Act of 1940, a provision under which the Supreme Court refused to imply a private right of action. See *Transamerica, 444 U.S. 11, 100 S. Ct. 242, 62 L. Ed. 2d 146 (1979)*. There, the court decided that the second prong of *Cort* was not satisfied, noting that the provision was proscriptive and was not intended to create civil liabilities. *Id. at 19*. Since Congress had provided other judicial and administrative methods for enforcing section 206, the Court stated it was "highly improbable that Congress absentmindedly forgot to mention an intended private action." [*488] *Id. at 20*. This applies with stronger force here, where Congress has indeed provided an explicit private remedy. The Court remarked that "obviously, then, when Congress wished to provide a private damage remedy, it knew how to do so and did so expressly." *Id. at 21*.

Nor is the third prong of *Cort* met, which requires consistency with the underlying purposes of the statutory scheme. In *Piper v. Chris-Craft Industries, 430 U.S. 1, 51 L. Ed. 2d 124, 97 S. Ct. 926 (1977)*, the court phrased [**32] the inquiry in terms of whether the legislative purposes "are likely to be undermined absent private enforcement" or whether it "is necessary to effectuate Congress' goals." *430 U.S. at 25, 26*. Measured against any of those standards, an asserted private right of action under section 17(a) fails. Rendering sections 11 and 12 effectively impotent is neither necessary to, nor consistent with, the legislative purposes of the 1933 Act. In those sections, Congress accorded aggrieved individuals private remedies, limiting these remedies as it saw fit. The broader sweeping provisions of section 17(a) were meant to be used and are still available for purposes of SEC enforcement.

In light of the foregoing conclusions respecting the first three parts of the *Cort* test, analysis of the fourth and least important element is not necessary. Being convinced that Congress did not intend section 17(a) to be used as a private remedy, I must respect that intent.¹⁵ Hence, the count of the complaint purporting to assert a claim thereunder shall be dismissed.

[**33] C. THE RICO COUNT

specifically created by §§ 11 and 12. The 1933 act is a much narrower statute. It deals only with disclosure and fraud *in the sale of securities*. It has but two important substantive provisions, §§ 5 and 17(a). Non-compliance with § 5 results in civil liability under § 12(1). Faulty compliance results in liability under § 11 and § 17(a) has its counterpart in § 12(2). It all makes a rather neat pattern. Within the area of §§ 5 and 17(a), §§ 11 and 12 (unlike §§ 9(e), 16(b) and 18 of the 1934 act) are all embracing. This is not to say that the remedies afforded by §§ 11 and 12 are complete. But the very restrictions contained in those sections and the differences between them -- for example, the fact that § 11 but not § 12 imposes liability on certain persons connected with the issuer without regard to their participation in the offering and the fact that § 12(2) does not go so far in relation to § 17(a) and § 12(1) goes in relation to § 5 -- make it seem the less justifiable to permit plaintiffs to circumvent the limitations of § 12 by resort to § 17(a). Particularly is this so in view of the fact that § 11, together with the statute of limitations in § 13, was actually tightened in the 1934 amendments to the Securities Act.

Loss at 1785.

¹⁵ Many of the same arguments could be made as regards the implication of a private right under section 10(b). The arguments would not be as persuasive, however. As Professor Loss pointed out, the express remedies in the 1934 Act are not as broad as in the 1933 Act. See note 14 *supra*. Thus, there is arguably more need for a private action under section 10(b). The fact that a private right of action has been implied thereunder is not a determining factor. As noted earlier, the section 10(b) right of action was essentially thrust on the Supreme Court, which like many of the lower federal courts, accepted its existence without much analysis. See *Redington, 442 U.S. at 577-78 n. 19; Hill v. Der, 521 F. Supp. at 1378 n.4*.

Defendants move to dismiss Count VI of the amended complaint which asserts a civil claim under the Racketeer Influenced and Corrupt Organizations Act of 1970 ("RICO"), 18 U.S.C. § 1961-1968 (1976). Plaintiffs seek to recover treble damages under the statute's civil remedy provision, [18 U.S.C. § 1964\(c\)](#). Defendants rest their contention that the complaint fails to state a cause of action on four grounds: (1) use of RICO in the absence of any alleged link to organized crime contravenes the statute's purpose; (2) the complaint fails to adequately allege injury "by reason of" a violation of [18 U.S.C. § 1962](#); (3) the complaint does not distinguish the "enterprise" from the "pattern of racketeering activity" and (4) the complaint does not state a violation of [18 U.S.C. § 1962\(a\)](#) against defendant Peterson.

1. The Statute

RICO was enacted as Title IX of the Organized Crime Control Act of October 15, 1970, Pub. L. No. 91-452, 84 Stat. 922 (1970). It represents the culmination of two decades of inquiry into potential solutions to the pervasive problem of organized crime.¹⁶ The statute was envisaged as a much needed weapon with which to battle organized crime's **[**34]** infiltration into legitimate business. As Congress stated in its findings:

[*489] The Congress finds that (1) organized crime in the United States is a highly sophisticated, diversified, and widespread activity that annually drains billions of dollars from America's economy by unlawful conduct and the illegal use of force, fraud, and corruption; (2) organized crime derives a major portion of its power through money obtained from such illegal endeavors as syndicated gambling, loan sharking, the theft and fencing of property, the importation and distribution of narcotics and other dangerous drugs, and other forms of social exploitation; (3) this money and power are increasingly used to infiltrate and corrupt legitimate business and labor unions and to subvert and corrupt our democratic processes; (4) organized crime activities in the United States weaken the stability of the Nation's economic system, harm innocent investors and competing organizations, interfere with free competition, seriously burden interstate and foreign commerce, threaten the domestic security, and undermine the general welfare of the Nation and its citizens; and (5) organized crime continues to grow **[**35]** because of defects in the evidence-gathering process of the law inhibiting the development of the legally admissible evidence necessary to bring criminal and other sanctions or remedies to bear on the unlawful activities of those engaged in organized crime and because the sanctions and remedies available to the Government are unnecessarily limited in scope and impact.

It is the purpose of this Act to seek the eradication of organized crime in the United States by strengthening the legal tools in the evidence-gathering process, by establishing new penal prohibitions, and by providing enhanced sanctions and new remedies to deal with the unlawful activities of those engaged in organized crime. Pub. L. No. 91-452, 84 Stat. 922, title IX § 1 (1970). The result is a sweeping statute with a whole panoply of procedural tools to aid law enforcement officials, as well as a civil treble damage provision.

[36] [HN12](#)** Under RICO, engaging in a "pattern of racketeering" within the confines of an "enterprise" becomes an offense separate from the predicate violations. To understand the structural mechanism of RICO, some definitions are in order. [Section 1961\(1\)](#) defines "racketeering activity" as specified state law offenses punishable by incarceration for more than one year, as well as any violation of a long list of federal statutes. A "pattern of racketeering activity" is defined as the commission of at least two predicate acts within ten years. [18 U.S.C. § 1961\(5\)](#). The statutory definition of "enterprise" is broad enough to encompass just about any group of individuals. [18 U.S.C. § 1961\(4\)](#). However, it is [section 1962](#) which actually sets out the proscribed activities. It provides in pertinent part:

¹⁶ The infiltration of organized crime into legitimate business was isolated by the Kefauver Committee as early as 1951. The McClellan Committee documented the infiltration of labor unions and the existence of "La Cosa Nostra." The problem was also studied in 1967 by the President's Commission on Law Enforcement and Administration of Justice. See generally, Blakey & Gettings, Racketeer Influenced and Corrupt Organizations (RICO): Basic Concepts -- Criminal and Civil Remedies, 53 Temp. L.Q. 1009, 1014-15 (1980). For an exhaustive legislative history of RICO, see Blakey, The RICO Civil Fraud Action in Context: Reflections on *Burnett v. Berg*, [58 Notre Dame L. Rev. 237, 249-80 \(1982\)](#). [Hereinafter cited as *Blakey*].

(a) [HN13](#) It shall be unlawful for any person who has received any income derived, directly or indirectly, from a pattern of racketeering activity or through collection of an unlawful debt in which such person has participated as a principal within the meaning of [section 2, title 18, United States Code](#), to use or invest, directly or indirectly, any part of such income, or the proceeds of such **37 income, in acquisition of any interest in, or the establishment or operation of, any enterprise which is engaged in or the activities of which affect interstate or foreign commerce. A purchase of securities on the open market for purposes of investment, and without the intention of controlling or participating in the control of the issuer, or of assisting another to do so, shall not be unlawful under this subsection if the securities of the issuer held by the purchaser, the members of his immediate family, and his or their accomplices in any pattern or racketeering activity of the collection of an unlawful debt after such purchase do not amount in the aggregate to one percent of the outstanding securities of any one class, and do not confer, either in law or in fact, the power to elect one or more directors of the issuer.

(b) It shall be unlawful for any person through a pattern of racketeering activity **490 or through collection of an unlawful debt to acquire or maintain, directly or indirectly, any interest in or control of any enterprise which is engaged in, or the activities of which affect, interstate or foreign commerce.

(c) It shall be unlawful for any person **38 employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

[18 U.S.C. § 1962 \(1976\)](#)

[HN14](#) In addition to criminal remedies, RICO provides a private right of action for "any person injured in his business or property by reason of a violation of [section 1962](#)." Treble damages attach to a RICO verdict as well. [18 U.S.C. § 1964\(c\)](#). However, the civil plaintiff is not required to prove a prior conviction, see, e.g., [Usaco Coal Co. v. Carbomin Energy, Inc.](#), 689 F.2d 94, 95 n.1 (6th Cir. 1982); [Mauriber v. Shearson/American Express, Inc.](#), 546 F. Supp. 391, 396 (S.D.N.Y. 1982); [State Farm Fire & Cas. Co. v. Estate of Caton](#), 540 F. Supp. 673, 675-77 (N.D. Ind. 1982); [Glusband v. Benjamin](#), 530 F. Supp. 240, 241 (S.D.N.Y. 1981); [Heinold Commodities, Inc. v. McCarty](#), 513 F. Supp. 311, 314 (N.D. Ill. 1979), and must only prove the statutory elements of a cause of action by a preponderance of the evidence, see [United States v. Cappetto](#) **391, 502 F.2d 1351, 1357 (7th Cir. 1974); [Parnes v. Heinold Commodities, Inc.](#), 487 F. Supp. 645, 647 (N.D. Ill. 1980); [Farmers Bank of Delaware v. Bell Mortgage Company](#), 452 F. Supp. 1278, 1280 (D. Del. 1978). Finally, in interpreting and applying all of RICO's provisions, Congress has dictated that the statute "shall be liberally construed to effectuate its remedial purposes." Pub. L. No. 91-452, 84 Stat. 922, title IX § 904(a) (1970).

2. Connection With Organized Crime

Resting on RICO's articulated purpose, defendants argue that the failure of the complaint to allege any link to organized crime is fatal to plaintiffs' claim. Citing [United Steelworkers of America v. Weber](#), 443 U.S. 193, 201, 61 L. Ed. 2d 480, 99 S. Ct. 2721 (1979), defendants contend that although the claim may be within the letter of the statute, it does not fall within its spirit. Defendant's Memorandum in Support of their Motion to Dismiss at 39. Implicit within defendants' position is the notion that the RICO treble damage provision was not intended to be used to supplant or supplement the already extant remedies under the federal securities laws. This argument, limiting RICO to the organized **40 crime context, has a facial appeal and has garnered some judicial support. See, e.g., [Wagner, et al. v. Bear, Stearns & Co., et al.](#), [Current]Fed. Sec. L. Rep. (CCH) P 99,032 at 94,913 (N.D. Ill. 1982) (RICO not intended to apply to securities fraud cases in absence of any nexus to organized crime); [Noonan v. Granville-Smith](#), 537 F. Supp. 23, 29 (S.D.N.Y. 1981) (same); [Waterman Steamship Corp. v. Avondale Shipyards, Inc.](#), 527 F. Supp. 256, 260 (E.D. La. 1981) (no cause of action under RICO for failed couplings installed on ships absent link to organized crime); [Adair v. Hunt International Resources Corp.](#), 526 F. Supp. 736, 747-48 (N.D. Ill. 1981) (land sale scam, while technically within the ambit of RICO, should not be accorded a cause of action without involvement of organized crime); [Barr v. WUI/TAS, Inc.](#), 66 F.R.D. 109, 112-13 (S.D.N.Y. 1975) (price fixing did not state a cause of action without organized crime involvement). However, defendants' purported allegiance to the purpose of the statute ignores both the language of RICO and its legislative history.

Congress clearly intended RICO to be applicable in the securities fraud area in certain situations [**41] as one of the predicate offenses listed is "fraud in the sale of securities." [18 U.S.C. § 1961\(1\)\(D\)](#). The more fundamental issue presented here is whether RICO was intended to apply to *any* predicate offense in the absence of some allegation of the involvement of organized crime. [HN15](#)¹⁵ The overwhelming majority of courts to address this issue have concluded that RICO [*491] was not intended to be, and should not be limited to, the organized crime context. See e.g., [Schacht v. Brown, 711 F.2d 1343](#), slip op. at 20 (7th Cir. 1983); [Bennett v. Berg, 685 F.2d 1053, 1063 \(8th Cir. 1982\)](#), pet. for reh. en banc granted, September 17, 1982; [Cenco, Inc. v. Seidman & Seidman, 1982 Fed. Sec. L. Rep. P 98,615 at 93,057 \(7th Cir. 1982\)](#); [United States v. Thordarson, 646 F.2d 1323, 1328-29 n. 10](#) (9th Cir.) cert. denied, 454 U.S. 1055, 102 S. Ct. 601, 70 L. Ed. 2d 591 (1981); [United States v. Uni Oil, Inc., 646 F.2d 946, 953 \(5th Cir. 1981\)](#), cert. denied sub nom., [Corbitt v. United States, 455 U.S. 908, 102 S. Ct. 1254, 71 L. Ed. 2d 446 \(1982\)](#); [United States v. Aleman, 609 F.2d 298, 303 \(7th Cir. 1979\)](#) cert. denied, 445 U.S. 946, 63 L. Ed. 2d 780, 100 S. Ct. [**42] 1345 (1980); [United States v. Forsythe, 560 F.2d 1127, 1136 \(3d Cir. 1977\)](#); [United States v. Campanale, 518 F.2d 352, 363 \(9th Cir. 1975\)](#); cert. denied sub nom., [Grancich v. United States, 423 U.S. 1050, 96 S. Ct. 777, 46 L. Ed. 2d 638 \(1976\)](#); [Mauriber v. Shearson/American Express, Inc., 546 F. Supp. 391, 396 \(S.D.N.Y. 1982\)](#); [Hanna Mining Co. v. Norcen Energy Resources, Ltd., 1982 Fed. Sec. L. Rep. \(CCH\) P 98,742 at 93,737 \(N.D. Ohio 1982\)](#); [Maryville Academy v. Loeb Rhoades & Co., Inc., 530 F. Supp. 1061, 1069 \(N.D. Ill. 1981\)](#); [Hellenic Lines, Ltd. v. O'Hearn, 523 F. Supp. 244, 247-48 \(S.D.N.Y. 1981\)](#); [Spencer Companies, Inc. v. Agency Rent-a-Car, Inc., 1981-82 Fed. Sec. L. Rep. \(CCH\) P 98,361 at 92,214 \(D. Mass. 1981\)](#); [Engl v. Berg, 511 F. Supp. 1146, 1155 \(E.D. Pa. 1981\)](#); [Heinold Commodities, Inc. v. McCarty, 513 F. Supp. 311, 313 \(N.D. Ill. 1979\)](#); [United States v. Vignola, 464 F. Supp. 1091, 1095-96](#) (E.D. Pa.), aff'd mem., 605 F.2d 1199 (3d Cir. 1979), cert. denied, 444 U.S. 1072, 100 S. Ct. 1015, 62 L. Ed. 2d 753 (1980); [United States v. Mandel, 415 F. Supp. 997, 1018-19 \(D. Md. 1976\)](#). Accord, [Blakey](#) supra note 16 at 284-84; [**43] Note *Application of the Racketeer Influenced and Corrupt Organizations Act (RICO) to Securities Violations*, 8 J. Corp. L. 411, 429 (1983). Indeed, to the extent that the Third Circuit has decided this issue, albeit in a criminal context,¹⁷ I am bound by that ruling. In *Forsythe*, the Third Circuit noted that "the legislative intent was to make RICO violations dependent upon behavior, not status." [Forsythe, 560 F.2d at 1136](#). That is the extent of the court's analysis. However, a brief exploration of RICO's legislative history will prove the validity of the *Forsythe* position and that of the other courts cited above.

At the outset, I note that the statute [*44] does not use the term "organized crime" or attempt to define that nebulous concept. According to the legislative history, this was a conscious decision by Congress. Fashioning a definition was recognized as a difficult task which would be of dubious benefit. See, e.g., 116 Cong. Rec. 35,204-206 (Oct. 6, 1970); 116 Cong. Rec. 35, 343-345 (Oct. 7, 1970). For example, an amendment was proposed that would have made the mere membership in La Cosa Nostra an offense. 116 Cong. Rec. 35,343 (Oct. 7, 1970) (Rep. Biaggi). This was rejected as overly narrow and potentially unconstitutional. *Id.* at 35,344-346. However, the topic of the scope of the statute was hotly debated throughout the Congressional hearings. As Professor Blakey noted, during the 1970 House hearings, the Association of the Bar of the City of New York criticized the proposed Title IX as reaching beyond the scope of organized crime. See *Blakey*, supra note 16 at 272-73. A report issued by that body lambasted the addition of certain offenses, including securities fraud cases.¹⁸ [**46] Relating to the Control

¹⁷ Criminal decisions on this issue should have the same precedential import as civil rulings. See [Eaby, et al. v. Richmond, et al., 561 F. Supp. 131](#), slip op. at 4-5 (E.D. Pa. 1983). If a court is amenable to extending criminal sanctions to those not linked with organized crime, no sound reason exists for not extending civil liability.

¹⁸ The Bar Association Report stated:

On the one hand, the crimes listed as "racketeering activity" include several categories which are plainly beyond the intention of the Senate Committee, as expressed in the Report, and which should not, in our view, be subjected to the severe penalties of Title IX. The Senate Report states: "'Racketeering activity' is defined in terms of specific State and Federal criminal statutes now characteristically violated by members of organized crime." Senate Report 34. This statement is not supported, however, by the language of the statute, which includes as racketeering activity such things as theft from an interstate shipment regardless of the value of the property stolen ([18 U.S.C. § 659](#)), unlawful use of a stolen telephone credit card ([18 U.S.C. § 1343](#)), the "mom and pop" variety of illegal gambling business which, as we point out

of Organized Crime in the [*492] United States: Hearings on S.30 and Related Proposals Before Subcomm. [**45] No. 5 of the Comm. on the Judiciary, 91st Cong., 2d Sess. at 329 (1970) (emphasis added). The report stated:

Within the definition of "racketeering activity" is "fraud in the sale of securities." Against the background of expanding securities regulation, this definition could include the various officers, directors, and employees of corporations and underwriters of securities who have been found guilty of fraud in the sale of securities in some of the recent Rule 10(b)5 cases. Fraud in the sale of securities is simply not synonymous with racketeering activity.

Relating to the Control of Organized Crime in the United States: Hearings on S.30 and Related Proposals Before Subcomm. No. 5 of the Comm. on the Judiciary, 91st Cong., 2d Sess. at 401 (1970). Thus, RICO's reach beyond the talismanic "organized crime" into the field of securities fraud was well recognized by the Congress. Yet, section 1961(1)(D) was still enacted listing securities fraud as a predicate offense. The only inference to be drawn is that Congress intended to reach securities fraud cases as well as other types of cases which might not have a nexus to organized crime.¹⁹

In addition, many of the Congressmen verbally recognized that RICO was not intended to be so limited. Representative Poff stated that "the concept of organized criminal activity is broader in scope than the concept of organized crime; it is meant to include any criminal activity collectively undertaken . . ." 116 Cong. Rec. 35,293 (October 7, 1970). Senator McClellan remarked:

the curious objection has been raised to S.30 as a whole, and to several of its provisions in particular, that they are not somehow limited to organized crime itself . . . as if organized crime were a precise and operative legal concept [**47] like murder, rape or robbery. Actually, of course, it is a functional concept like white collar crime, serving simply as a shorthand method of referring to a large and varying group of criminal offenses committed in diverse circumstances.

116 Cong. Rec. 18,913 (June 9, 1970). These comments illustrate not only recognition of the broad scope of the statute, but they also point up some of the practical problems which would ensue, were RICO limited to "organized crime." For example, it would not be easy for a putative plaintiff to prove a defendant's affiliation with a certain organization. If it were easy enough for a private plaintiff to prove, then RICO would probably not have been necessary in the first instance. See e.g., *Hanna Mining*, 1982 Fed. Sec. L. Rep. P 98,742 at 93,736-37. This burden of proof might well emasculate the private remedy provision. See Mauriber, 546 F. Supp. at 396. Perhaps more important, as Representative Poff's statement implied, limiting application of the statute might have the effect of contravening its purpose. Some of the targeted behavior could "slip through the cracks" because it might not fit comfortably into some artificial [**48] [*493] definition of organized crime.²⁰ To define the concept is to limit RICO's application -- a result clearly at odds with the "liberal construction" proviso.

above, would be covered by Title VIII (proposed 18 U.S.C. § 1955), any securities fraud case, and virtually any state felony or federal misdemeanor involving drugs -- which would clearly include marijuana violations.

¹⁹ Commenting on the New York Bar Association's objections, Professor Blakey noted that:

Despite this testimony, Title IX was not only reported out, but the treble damage clause was added. Accordingly, those who seek to have the courts restrict the scope of the statute to curtail its application to fraud are refighting in the judicial forum a battle they lost in the legislative arena

Blakey, *supra* note 16, at 273 n. 112. (Emphasis in original).

²⁰ Senator McClellan, in explaining that RICO attempts to proscribe the type of crimes often committed by organized crime, praised their ingenuity:

Members of La Cosa Nostra and smaller organized crime groups are sufficiently resourceful and enterprising that one constantly is surprised by the variety of offenses that they commit. It is impossible to draw an effective statute which reaches most of the commercial activities of organized crime, yet does not include offenses commonly committed by persons outside organized crime as well.

HN16[] In light of Congress's recognition of RICO's broad scope, the refusal to omit such offenses as securities fraud from the list of predicate acts and in light of the liberal construction mandate, I conclude that a link to organized crime is not a requirement [****49**] of a civil RICO cause of action. Defendants' motion to dismiss on this ground is therefore denied.

3. Causation

HN17[] In order to collect treble damages under [section 1964\(c\)](#), a plaintiff must show that his injuries arise "by reason of a violation of [section 1962](#)." [18 U.S.C. § 1964\(c\)](#). Defendants contend that the complaint fails to allege a sufficient nexus between plaintiffs' injuries and the alleged violation of [section 1962](#). However, defendants are not really arguing that plaintiff did not suffer monetary damages as a result of the alleged fraudulent transactions. Rather, they are attacking the complaint for its failure to allege the *appropriate kind* of injury. See [Bennett v. Berg, 685 F.2d 1053, 1058-59 \(8th Cir. 1982\)](#) (arguing no injury to property). It is defendants' position that something more than merely the injury occasioned by the commission of two or more predicate acts must be alleged. Specifically, a plaintiff must allege some type of "racketeering enterprise injury" or an injury to commercial or competitive interests. Characterized as a "standing" requirement, this position is not without judicial support. See, e.g., [Harper v. New Japan Securities, I**501 International, Inc., 545 F. Supp. 1002, 1007 \(C.D. Cal. 1982\)](#); [Erlbaum v. Erlbaum, 1982 Fed. Sec. L. Rep. \(CCH\) P 98,772 at 93,922 \(E.D. Pa. 1982\)](#); [Van Schaick v. Church of Scientology, 535 F. Supp. 1125, 1136-37 \(D. Mass. 1982\)](#) (commercial, not competitive injury); [Landmark Savings & Loan v. Rhoades, 527 F. Supp. 206, 209 \(E.D. Mich. 1981\)](#) (racketeering enterprise injury); [North Barrington Development, Inc. v. Fauslow, No. 80-2644 \(N.D. Ill. Oct. 9, 1980\)](#). See also [Spencer Cos. v. Agency Rent-A-Car, Inc., 1981 Fed. Sec. L. Rep. \(CCH\) P 98,361 at 92,216 \(D. Mass. 1981\)](#) (discussing infiltration as a possible requirement). But see, e.g., [Schacht, 711 F.2d 1343, slip. op. at 30](#); [Bennett, 685 F.2d at 1059](#); [Hanna Mining, \[Current\]Fed. Sec. L. Rep. \(CCH\) P 98,742 at 93,737](#). Defendants' attempt to erect artificial barriers around a RICO cause of action is not warranted by the language, purpose or history of the statute.²¹

[**51] The concept of competitive or commercial injury is one borrowed from the field of antitrust. Although the courts requiring it have failed to define it, apparently it involves injury to plaintiffs' ability to compete. The court in *Landmark*, allegedly eschewing a competitive injury requirement, defined, by way of illustration, the concept of a "racketeering enterprise injury." [527 F. Supp. at 209](#). A plaintiff can sue under [section 1964\(c\)](#), the court opined, [**494**] "if a civil RICO defendant's ability to harm the plaintiff is enhanced by the infusion of money from a pattern of racketeering activity into the enterprise." *Id.* Despite the *Landmark* court's protestations to the contrary, I conclude that, as defined, **HN18**[a racketeering injury is indistinguishable from a competitive or commercial injury. The *Hanna* court, endeavoring to explain the latter concept, drew a scenario remarkably similar to the *Landmark* description. A plaintiff has a cause of action for an "illegal advantage gained by a defendant who operated or invested in an enterprise through racketeering activity." *Hanna*, 1982 Fed. Sec. L. Rep. (CCH) P 98,742 at 93,737.

Borrowing antitrust concepts [****52**] for application in the civil RICO context has a great deal of support in the legislative history. RICO was intended to combat the threat to the free market system posed by racketeer infiltration of legitimate business. Indeed, the antitrust laws were a model for RICO's civil provisions. Senator Hruska, in introducing a version of the civil statute noted:

116 Cong. Rec. at 18,940 (June 9, 1970).

²¹ The requirement of a commercial or competitive injury, like the necessity of proving a link to organized crime, may be reflective of judicial discomfort with the broad sweep of RICO. Indeed, the statute federalizes many state offenses and provides supplemental remedies in areas where remedies already exist. The *Harper* court expressed this sentiment by noting that "it is simply incomprehensible that a plaintiff suing under the securities laws would receive one-third the damages of a plaintiff suing under RICO for the same injury." [545 F. Supp. at 1007-08](#). Although a valid concern, it is one which is within the province of Congress. It is not the place of the judiciary to narrow a purposely broad statute by judicial fiat. As Professor Blakey commented, "the blunt truth is that some lower courts have been more intent on redrafting than reading RICO." *Blakey, supra* note 16, at 285.

Patterned closely after the Sherman Act, it provides for private treble damage suits, prospective injunctive relief, unlimited discovery procedures and all the other devices which bring to bear the full panoply of our antitrust machinery in aid of the businessman competing with organized crime.

...

The bill is innovative in the sense that it vitalizes procedures which have been tried and proven in the antitrust field and applies them where they have been seldom used before.

115 Cong. Rec. 6993 (March 20, 1969). [Section 1964\(c\)](#) closely tracks the language of section 4 of the Clayton Act.²²

[**53] However, there is a limit upon what translates well from the antitrust genre to organized crime. The American Bar Association rejected a proposal for amending the Sherman Act to provide a civil RICO remedy, preferring instead separate statutes. The Report of the Antitrust Division of the American Bar Association noted that "by placing the antitrust-type enforcement and discovery procedures in a separate statute, [from the antitrust statutes] a commingling of criminal enforcement goals *with the goals of regulating competition is avoided.*" 115 Cong. Rec. at 6995 (emphasis added). The Report went on to say:

On the other hand, by inserting in the Sherman Act a provision which does not have as its primary objective the establishment or maintenance of free competition, may result in an undesirable blending of otherwise laudatory statutory objectives. Criminal conduct which violates existing antitrust laws can be proceeded against under those laws. Additional conduct sought to be reached should be attacked under separate legislation.

Moreover, the use of antitrust laws themselves as a vehicle for combating organized crime could *create inappropriate and unnecessary* [**54] *obstacles in the way of persons injured by organized crime who might seek treble damage recovery.* Such a private litigant would have to contend with a body of precedent -- appropriate in a purely antitrust context -- setting strict requirements on questions such as "standing to sue" and "proximate cause."

115 Cong. Rec. at 6995 (emphasis added). This recommendation, which was adopted, recognized as inappropriate the application of the antitrust commercial injury-standing requirement in the RICO context. The court in *State Farm Fire and Cas. Co.*, observed that [section 1964\(c\)](#) was "cast as a separate statute intentionally to avoid the restrictive precedent of antitrust jurisprudence." [540 F. Supp. at 680](#). Along the same vein, Professor Blakey stated, "any suggestion that RICO actions be limited by antitrust-type limitations -- "competitive," "commercial," or "direct/indirect" injuries -- flies in the face of the very consideration that led to the drafting of RICO as a [*495] separate statute from the antitrust statutes that are so limited." *Blakey, supra* note 16, at 255 n. 52.

The American Bar Association Report also points up the different policies underpinning [**55] the antitrust and organized crime laws. The Eighth Circuit noted this policy distinction, stating that "although RICO borrowed the tools of antitrust law to combat organized criminal activity . . . Congress did not see the objectives of RICO and the antitrust laws as coterminous." [Bennett v. Berg, 685 F.2d at 1059](#) (citing S. Rep. No. 617 at 81-82; 115 Cong. Rec. 6993 (statement of Sen. Hruska); *id.* at 9567 (statement of Sen. McClellan); 116 Cong. Rec. at 607 (statement of Sen. Byrd); *id.* at 35, 193 (statement of Rep. Poff)). The limitations simply have no place in the organized crime context. [HN19](#)[↑] The goal of antitrust law is to promote free competition. Frivolous antitrust suits might ruin defendants, who are legitimate business persons. One less business in a given area will increase concentration, thus decreasing competition. In the organized crime context, it does not matter if an illegal business activity is ruined -- indeed that is exactly what RICO is endeavoring to accomplish. [Bennett, 685 F.2d at 1059](#). Thus, the policy underlying the limits placed on private antitrust suits is inapposite in the RICO milieu.

Finally, [HN20](#)[↑] reading a competitive injury requirement [**56] into [section 1964\(c\)](#) would create an insurmountable practical problem. This approach would literally require plaintiff to be in competition with defendant.²³ In the situation where an illegitimate enterprise is endeavoring to infiltrate and take over a competing business,

²² This similarity in language was a result of a suggestion made by the American Bar Association. *Hearings on S.30, 91st Cong., 2d Sess.* at 543-44 (1970) (testimony of Edward Wright, President Elect of the American Bar Association).

this requirement would not be a problem. However, all potential plaintiffs will not fit into this category, leaving certain targeted behavior unpunished. As one commentator noted: "the difficulty in proving causation may be significant for those plaintiffs who cannot prove infiltration." Note, *Application of the Racketeer Influenced and Corrupt Organization Act (RICO) to Securities Violations*, 8 J. Corp. L. 411, 435 (1983). This interpretation would be inconsistent with the broad remedial purposes behind RICO. As the court in *Hanna Mining* noted, "to conclude otherwise . . . would leave undisturbed racketeers whose activity does not infringe on their competitor's markets. It is untenable to suggest that Congress intended such a result." 1982 Fed. Sec. L. Rep. P 98,742 at 93,737. Accord, *Hellenic Lines, Ltd. v. O'Hearn*, 523 F. Supp. 244, 248 (S.D.N.Y. 1981).

[**57] Given the legislative history and statutory objectives, I conclude that [HN21](#)[↑] RICO does not require proof of a commercial or competitive injury. As the Seventh Circuit recently observed: "RICO was broadly aimed at 'striking . . . a mortal blow against the property interests of organized crime.' This court is reluctant to undermine that broad mission of RICO by engraving onto its civil provisions a competitive injury requirement." *Schacht*, 711 F.1d at 1357 (citations omitted). Plaintiffs' allegations that their monetary losses were a result of defendants' innumerable acts of securities fraud are sufficient to state a cause of action under [section 1964\(c\)](#).

4. Collapse of "Enterprise" Into Predicate Acts

Defendants claim that the amended complaint must be dismissed for failure to allege an "enterprise" separate and distinct from the "pattern of racketeering." Muir is undistinguishable from the alleged acts of securities fraud, they contend, pointing to language in the complaint to the effect that defendants were "transforming the nature of the firm into a vehicle for underwriting speculative new issues." (Complaint at para. 29). This argument misperceives the nature of both [**58] the law and the facts, as set forth in the amended complaint.

Defendants are correct in insisting that [HN22](#)[↑] a RICO plaintiff must prove the existence of both an "enterprise" and a "pattern" [*496] of racketeering activity." As the United States Supreme Court observed; "the 'enterprise' is not the 'pattern of racketeering activity;' it is an entity separate and apart from the pattern of activity in which it engages. The existence of an enterprise at all times remains a separate element which must be proven." [United States v. Turkette](#), 452 U.S. 576, 583, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981). On a very common-sense level, the *Turkette* court characterized the enterprise as the actors and the pattern as the unlawful acts.²⁴ *Id.* The court decided that the enterprise need not be a legitimate entity and that RICO applies with as much force to enterprises formed for wholly illegal purposes. [452 U.S. at 584-85](#).

[**59] The enterprise alleged by plaintiffs is the partnership Muir. The statute specifically mentions a "partnership" as an appropriate entity for an enterprise.²⁵ The pattern alleged is an ongoing scheme of securities fraud, perpetrated by defendants, who are affiliated in various ways with Muir. However, Muir has an existence distinct from this pattern of fraud. Even though the complaint alleges that defendants were transforming Muir into a vehicle for the underwriting of speculative issues, it is also alleged that Muir was a brokerage and investment banking firm until it went into receivership in August of 1981. (Complaint at para. 5). As such, it still rendered services to its customers apart from the alleged acts of fraud.

[**60] The Eighth Circuit rejected a remarkably similar argument in [Bennett v. Berg](#), 685 F.2d 1053 (8th Cir. 1982). In *Bennett*, plaintiffs were former residents of the John Knox Village retirement community. They sued the Village,

²³ Plaintiffs pose the following rhetorical question; "who would have standing to sue a group of racketeers who are engaged in a pattern of arson fraud? The gangster's competitors?" Brief in Opposition to Defendants' Motion to Dismiss at 26.

²⁴ The court defined [HN23](#)[↑] the enterprise as "an entity, for present purposes a group of persons associated together for a common purpose of engaging in a course of conduct." [452 U.S. at 583](#). The pattern of racketeering "is, on the other hand, a series of criminal acts as defined by the statute." *Id.*

²⁵ [HN24](#)[↑] Enterprise is defined as "any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." [18 U.S.C. § 1961\(4\)](#). Thus an enterprise can either be a legal entity or an association of some form. See [Bennett v. Berg](#), 685 F.2d 1053, 1060 & 1060 n. 9 (8th Cir. 1982).

various officers and directors, its founder, mortgage lender, insurance company, former accountant and attorneys, alleging, *inter alia*, fraud, breaches of fiduciary duties and a RICO claim. [685 F.2d at 1057](#). An Entrance Endowment paid by those wishing to live in the Village entitled them to a specified apartment for life. An additional monthly charge covered food, laundry, medical services, transportation and building maintenance. The alleged fraud surrounded defendants promise of "affordable life care" and misrepresentations with respect to the financial well being of the Village, which was, at the time of suit, on the verge of bankruptcy. [Id. at 1056-57](#). The complaint depicted the Village as "pervasively fraudulent." [Id. at 1060](#). This allegation parallels the averred transformation of Muir. Defendants in *Bennett* argued that there were insufficient allegations of an enterprise distinct from the pattern of racketeering. The court noted [**61] that the complaint alleged that the Village "provided numerous legitimate services," and went on to conclude that "as an entity providing such services, and as an incorporated body under the laws of the State of Missouri, the John Knox Village corporation has an ascertainable structure apart from any predicate acts of mail fraud." *Id.* Muir, like the Village, has a structure apart from the predicate acts and apparently still provided legitimate brokerage services to its customers. Muir is also a legal entity, as was the Village.²⁶ Thus, under the *Bennett* approach, Muir would qualify as an "enterprise" for RICO purposes.

In support of their position, defendants cite [United States v. Lemm, 680 F.2d 1193 \(8th Cir. 1982\)](#), a case which actually undercuts [*497] their contention. In *Lemm*, the Eighth [**62] Circuit found the requisite separation between the enterprise and the pattern where the "enterprise" consisted of a loose federation of persons involved in an arson-insurance fraud ring.²⁷ Mail fraud constituted the predicate acts. [680 F.2d at 1201](#). A licensed insurance adjuster named Gamst recruited individuals to find property to purchase and then hired people to set fires to the properties and collected the insurance proceeds. The defendants in *Lemm* were Gamst's recruits. [Id. at 1196-97](#). The court stated:

The arson ring, through hand-delivery of insurance claims, could have conducted its activities without any predicate acts of mail fraud. In other words, if we eliminate for purposes of argument the predicate acts of mail fraud, the evidence still shows an on-going structure which engaged in legitimate purchases and repairs of property as well as acts of arson.

[Id. at 1201](#). Similarly, if the predicate acts of securities fraud were eliminated, Muir still had an on-going structure as a brokerage house. Moreover, despite the *Lemm* court's distinction, defendants' link to one another was only the perpetration of arson. Here, defendants are linked [**63] through a separate, legitimate business. Thus, I conclude that Muir was an enterprise distinct from the alleged securities fraud. Defendants' motion is therefore denied.

5. [Section 1962\(a\)](#)

Defendants' final RICO argument involves plaintiffs' failure to adequately allege a violation of [section 1962\(a\)](#) against defendant Peterson. [Section 1962\(a\)](#), set out in full *supra*, [HN25](#) [↑] basically prohibits an individual from using money received through a pattern of racketeering to invest in the enterprise. Peterson was a broker for Muir, but the complaint does not allege that he ever had any ownership interest in Muir, nor was it alleged that Peterson used the 5% commission he [**64] earned on plaintiffs' transactions to invest in the partnership. Thus, I conclude that on the face of the complaint, the requisites of a [section 1962\(a\)](#) are absent.²⁸ Defendants' motion on this point shall be granted. The [section 1962\(a\)](#) claim against Peterson is dismissed without prejudice to file a more specific pleading.

D. INFILCTION OF EMOTIONAL DISTRESS

²⁶ The *Bennett* court noted that an entity is more likely to be deemed an "enterprise" distinct from acts of racketeering when it is a creation of the law. [685 F.2d at 1060-61](#) and 1060 n. 9.

²⁷ The court in *Lemm* held that a RICO enterprise must meet three tests: (1) a shared purpose; (2) continuity of personnel and (3) a structure distinct from the pattern. [680 F.2d at 1198](#). The defendants, as affiliates of Muir had a shared purpose to defraud plaintiff. The continuity of personnel and requisite structure are also present.

²⁸ Plaintiffs' only rebuttal to this argument is the assertion that a claim was stated and the suggestion that the appropriate remedy is requiring a more specific pleading, rather than dismissal.

Count XI of the amended complaint purports to set out a claim for infliction of emotional distress, alleging that plaintiffs suffered significant mental and physical trauma as a result of defendants acts and that defendants knew or should have known that this would occur. Defendants move to dismiss this count, asserting that plaintiffs have not stated a cause of action for either negligent or intentional infliction of emotional distress.

At the outset, [**65] I note that it is not altogether clear whether plaintiffs are claiming negligent infliction of emotional distress. Although the count is labeled simply "infliction of emotional distress," the averment that defendants knew or should have known the results of their conduct bespeaks intentional action. In addition, plaintiffs responded to defendants' motion only on the intentional infliction issue, rendering unopposed defendants' motion on the negligent infliction issue. However, in the event that plaintiffs did intend to allege negligent infliction as well, I must agree with defendants that no cause of action has been established. Giving plaintiffs' factual allegations the most expansive reading possible, this case simply does not rise to the [*498] level of negligent infliction of mental distress. See, e.g., *Niederman v. Brodsky*, 436 Pa. 401, 403-04 261 A.2d 84, 90 (1970) (plaintiff can recover for injuries suffered as a result of watching son being struck by automobile when he was also in grave danger of being struck himself); *Sinn v. Burd*, 486 Pa. 146, 173, 404 A.2d 672, 686 (1979) (mother can recover for distress resulting from watching minor daughter struck and [**66] killed by automobile without herself being in the zone of danger); *Yandrich v. Radic*, 495 Pa. 243, 244, 433 A.2d 459, 460-61 (1981) (no recovery for plaintiff not present at all when son injured; equally divided court affirming court below). See also *Kutner v. Eastern Airlines, Inc.*, 514 F. Supp. 553, 558-59 (E.D. Pa. 1981) (no cause of action for distress suffered when plaintiffs drove home by car in bad weather conditions allegedly because airline failed to apprise them of their ability to take a bus or stay overnight).

With respect to the claim of intentional infliction of emotional distress, defendants argue that the alleged behavior does not rise to the level of "extreme and outrageous" conduct. Plaintiffs contend that whether the conduct was extreme and outrageous is a factual question for the jury to decide. Viewing all factual allegations and reasonable inferences drawn therefrom in a light most favorable to the plaintiff, I conclude that plaintiffs' complaint fails to establish outrageous conduct as a matter of law.

Section 46 of the Restatement (Second) of Torts defines the intentional infliction of emotional distress as follows:

HN26 [↑] One who by extreme and [**67] outrageous conduct intentionally or recklessly causes severe emotional distress to another is subject to liability for such emotional distress, and if bodily harm to the other results from it, for such bodily harm.

Restatement (Second) of Torts § 46(1)(1965). Although Pennsylvania has apparently adopted the Restatement formulation *sub silentio*, see *D'Ambrosio v. Pennsylvania National Mutual Casualty Insurance Co.*, 494 Pa. 501, 511 n.8, 431 A.2d 966, 971-72 n.8 (1981); *Papievas v. Lawrence*, 437 Pa. 373, 379, 263 A.2d 118, 121 (1970); *Jones v. Nissenbaum, Rudolph & Seidner*, 244 Pa. Super. 377, 382, 368 A.2d 770, 772 (1976), there is a paucity of caselaw on this topic. The Restatement definition has been broken into four elements by the Third Circuit: (1) the conduct must be extreme and outrageous; (2) the conduct must be intentional or reckless; (3) it must cause emotional distress and (4) the distress must be severe. See *Chuy v. Philadelphia Eagles Football Club*, 595 F.2d 1265, 1273 (3d Cir. 1979). For purposes of their motion, defendants assume that plaintiffs have satisfied the last three elements -- contesting only whether the conduct was extreme and outrageous.

[**68] Only in very extraordinary cases have plaintiffs been held to state a cause of action under this tort. In *Chuy v. Philadelphia Eagles Football Club*, 595 F.2d 1265 (3d Cir. 1979), the Third Circuit, predicting how Pennsylvania Supreme Court would rule, affirmed a district judge's decision to send the intentional infliction issue to the jury. There the team doctor had told a sportswriter that a famous football player was suffering from a fatal disease, polycythemia veria, knowing that he did not have that disease. Plaintiff later read this public prognosis and suffered severe mental anguish. This conduct, reasoned the court "could reasonably be regarded as extreme and outrageous." 595 F. Supp. at 1274. Similarly, in *Papievas v. Lawrence*, 437 Pa. 373, 263 A.2d 118 (1970) the court found a cause of action for intentional infliction established where defendant struck plaintiff's son, killing him and, without informing anyone except a friend, hid the body. After a few days in his garage, the body was moved and

placed in a hand dug grave. The minor's parents were not informed until the partially decomposed remains were found and returned to plaintiffs. [437 Pa. at 375, 263 A.2d **691 at 121.](#)

These egregious situations must be compared with those cases denying a cause of action for intentional infliction. In [Mullen v. Suchko, 279 Pa. Super. 499, 421 A.2d 310 \[*499\] \(1980\)](#) a woman was asked by her lover to leave her job so she would be more free to travel with him. In return, he promised to care for her financially for the rest of her life. She left a job of thirty-three years and soon thereafter, he followed suit and left her. The court sympathetically noted that although defendant's actions were "inconsiderate and unkind," they were not "extreme and outrageous." [279 Pa. Super. at 505, 421 A.2d at 313.](#) In [Jones v. Nissenbaum, Rudolph & Seidner, 244 Pa. Super. 377, 368 A.2d 770 \(1976\)](#), a law firm hired by a credit company informed plaintiffs, by letter, that their homes were going to be sold from under them to satisfy their debts. The firm knew that under law, they could not hold a sale absent a hearing. Additionally, one plaintiff was verbally told, in front of neighbors, that he had 30 days in which to move his "junk" out. Again the court found that this failed to rise to the level of outrageous conduct. [244 Pa. Super. at 383-85, 368 A.2d at \[**70\] 744.](#) See also [D'Ambrosio, 494 Pa. at 511 n.8, 431 A.2d at 971-72 n.8](#) (insurance company's alleged "bad faith" failure to honor a claim does not rise to level of extreme or outrageous conduct); [Forster v. Manchester, 410 Pa. 192, 199-200, 189 A.2d 147, 151-52](#) (not outrageous to follow an accident victim, conducting surveillance to determine the extent of the injury); [Mazzula v. Monarch Life Insurance Co., 487 F. Supp. 1299, 1302 \(E.D. Pa. 1980\)](#) (not outrageous to refuse to continue to pay disability insurance).

Although this case does not fall neatly into either category, it most certainly is closer to the latter cases than the former. Plaintiffs strenuously argue that this is not a "garden variety" securities fraud case, but rather a course of fraudulent conduct perpetrated by a trusted advisor. However, that does not mean that the case rises to the level of outrageous conduct. It involves the mere loss of money, not the more personal loss of a life or health as in *Papieves* or *Chuy*. Comment (d) to [section 46](#) indicates:

HN27 [↑] Liability has been found only where the conduct has been so outrageous in character, and so extreme in degree, as to go beyond all possible [**71] bounds of decency, and to be regarded as atrocious, and utterly intolerable in a civilized society. Generally, the case is one in which the recitation of facts to an average member of the community would arouse his resentment against the action, and lead him to exclaim "outrageous."

This case simply does not fit the above description and Count XI shall be dismissed.²⁹ To hold otherwise would transform every sophisticated confidence scheme into an action for intentional infliction of mental distress in clear derogation of the narrow scope accorded this tort by the Pennsylvania courts.

[**72] E. AIDING AND ABETTING

Defendant Mario Andretti moves to dismiss those counts of the amended complaint which attempt to characterize him as a participant in this securities fraud scheme. According to the amended complaint, Andretti's only involvement surrounds his introduction to the Kimmels during the Montreal Grand Prix in September of 1979. Dirks introduced Andretti as one of Muir's general partners at a party and "Andretti gave plaintiffs no reason to believe he was not a General Partner." Amended Complaint at para. 28. Andretti is apparently only a limited, rather than general, partner. This is the sole allegation against Andretti, with the exception of plaintiff's assertion that his conduct constitutes "aiding and abetting."

Defendant cites several grounds for his motion, some of which rely on extraneous evidence, reference to which would require me to treat this as a motion for summary judgment. Since I can dispose of this issue [*500] on the face of the complaint itself, I will not refer to this extraneous material.³⁰

²⁹ In his motion to dismiss, defendant Mario Andretti also notes that Count XI should be dismissed, as his failure to correct Mr. Peterson as to his status as a limited, rather than general partner in Muir fails to state a cause of action for intentional infliction. For all of the reasons stated above, I agree. Mr. Andretti's conduct is simply not "outrageous," as that term has been defined under Pennsylvania law. Count XI shall be dismissed against all defendants.

[**73] [HN28](#)[↑] In order to establish a claim of aiding and abetting in this Circuit, the plaintiff must satisfy a tripartite test. The plaintiff must allege and prove that (1) there was an underlying violation of the securities laws; (2) that the aider-abettor had knowledge of the violation and (3) that the aider-abettor "knowingly and substantially participated in the wrongdoing." [Monsen v. Consolidated Dressed Beef Co., Inc.](#), 579 F.2d 793, 799 (3d Cir. 1978), cert. denied, 439 U.S. 930, 99 S. Ct. 318, 58 L. Ed. 2d 323 (1979); [Gould v. American-Hawaiian Steamship Co.](#), 535 F.2d 761, 779 (3d Cir. 1976); [Landy v. Federal Deposit Insurance Corp.](#), 486 F.2d 139, 162-63 (3d Cir. 1973), cert. denied, 416 U.S. 960, 40 L. Ed. 2d 312, 94 S. Ct. 1979 (1974); [Keller v. Coyle](#), 499 F. Supp. 1031, 1033 (E.D. Pa. 1980). Many courts have couched the third prong in terms of "substantial assistance" in the achievement of the underlying violation. See, e.g., [SEC v. Seaboard Corp.](#), 677 F.2d 1289, 1296 (9th Cir. 1982); [Herm v. Stafford](#), 663 F.2d 669, 684 (6th Cir. 1981); [ITT, An International Investment Trust v. Cornfeld](#), 619 F.2d 909, 922 (2d Cir. 1980).

I will assume for purposes [**74] of this motion that an underlying violation of the securities laws has been established, thus satisfying the first prong. However, the complaint fails to allege that Andretti had any knowledge of the web of fraud allegedly woven by the other defendants. This violates the Third Circuit's directive that [HN29](#)[↑] an aider-abettor have "conscious involvement in impropriety or constructive notice of intended impropriety" or even a "general awareness that his role was part of an overall activity that is improper." [Monsen](#), 579 F.2d at 799 (citations omitted). In the absence of an allegation that Andretti knew of defendants' scheme, the motion to dismiss must be granted. *Accord*, [Keller v. Coyle](#), 499 F. Supp. 1031, 1034 (E.D. Pa. 1980) (motion for summary judgment granted in favor of defendants lacking knowledge of fraud).

In addition, the amended complaint fails to satisfy the final prong of the test. [HN30](#)[↑] Substantial assistance or participation is required to establish liability as an aider-abettor. The *Monsen* court noted that mere inaction without conscious participation does not rise to the level of aiding and abetting. [579 F.2d at 800](#). That is exactly what occurred here. Andretti [**75] failed to correct Dirks, but as far as the complaint is concerned, did so without knowledge or the intent to participate. Moreover, even if Andretti had knowledge or the necessary intent, there would still be a serious question as to whether his activity could rise to the level of substantial assistance. It is highly unlikely that Andretti's silence as to his type of partnership interest substantially assisted the other defendants in their quest to dupe Kimmel into becoming a partner. Andretti's alleged role in this venture was so minuscule as to be incapable of supporting a claim of aider-abettor liability. For these reasons, Mario Andretti's motion to dismiss for failure to state a claim shall be granted.

An appropriate order follows.

ORDER

AND NOW, this 6th day of May, 1983, for the reasons stated in the foregoing Memorandum, it is hereby ORDERED that Defendants' Motion to Dismiss shall be GRANTED in part and DENIED in part.

1. Count II of the Amended Complaint, asserting a cause of action under section 17(a) of the Securities Act of 1933 is DISMISSED with prejudice.
2. Count XI of the Amended Complaint, asserting a cause of action for infliction of emotional distress [**76] is DISMISSED with prejudice.
3. The allegation in Count VI accusing Peterson of violations of [18 U.S.C. § 1962\(a\)](#) is DISMISSED without prejudice.

³⁰ Defendant argues that since Kimmel had to sign the partnership agreement before becoming a partner and since that agreement listed Andretti as a limited partner, Kimmel had notice and no fraud occurred. Were I to rest my decision on the partnership agreement submitted by Andretti, I would probably agree. This impacts upon the materiality of the misrepresentation. While it is dubious in the abstract, whether Andretti's misrepresentation would be material to Kimmel's decision to become a limited partner in Muir, knowledge would certainly defeat materiality. I note that it is not clear that Andretti had a duty to correct Dirks' misstatement.

4. The aiding and abetting allegations directed at Andretti in Counts I and IV are DISMISSED without prejudice.

ORDER

AND NOW, this 27th day of May, 1983, it is hereby ORDERED that the Memorandum dated May 6, 1983 is MODIFIED as follows:

1. Page 2, line 7 should read "the well-pled allegations"
2. Page 22, line 14 should read "This same reasoning led"
3. Page 22, line 17 should read "would similarly eviscerate"
4. Page 28, line 13 should read "as specified state law"
5. Page 28, line 14 should begin with the word "offenses."
6. Page 28, line 20 should begin "U.S.C. [§ 1961 \(4\)](#)."
7. Page 58, line 12 should read "Mario Andretti's motion"

BY THE COURT: James T.Giles, Judge

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Business & Corporate Compliance > ... > Sales of Goods > Remedies > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

HN1[Private Actions, Purchasers

Direct purchasers-retailers of defendants' goods are entitled to their entire damages, even though all or part of those damages may be passed on to plaintiffs' customers. The rule is that a defendant may not use a "defensive pass-on theory."

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN2[Private Actions, Purchasers

A pass on theory may not be used offensively by an indirect purchaser. An indirect purchaser would be denied the right to recover for unlawful overcharges by the manufacturers that are passed on to plaintiff-indirect purchasers by the retailers.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN3[Private Actions, Purchasers

Actions by the indirect purchasers is precluded. Exceptions to that rule would be made only where there is no danger that the middleman or subsidiary would also sue, thereby making defendant subject to multiple liability and where there is relatively straight forward proof of the passing on.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN4 **Private Actions, Purchasers**

Under an umbrella theory, the result of any attempt to ascertain with reasonable probability whether the non-conspirators' prices resulted from defendants' purported price-fixing conspiracy or from numerous other pricing considerations would be speculative. The causal effect of each pricing decision would have to be pursued through the chain of distribution.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN5 **Private Actions, Purchasers**

A method of measuring damages, known as the "before and after" theory, may be used only where there is some showing that the market conditions in the two periods are similar but for the impact of the violation.

Opinion

Order

BILBY, D.J.: This Matter comes before the Court upon the motions by defendants to strike the report of plaintiffs' expert, Dr. Raymond J. Folwell and for summary judgment.

Background

This antitrust action was filed in 1975. After seven years of litigation, trial was set for September, 1983. Plaintiffs allege that the defendants, who are Pacific Northwest fertilizer manufacturers, conspired from 1971 to 1975 to fix their wholesale prices artificially high. This unlawful wholesale overcharge was passed on to end users who are plaintiffs or potential members of one of the plaintiff classes. Defendants' subsidiary retailers are not named

defendants. No retailer, whether a defendant's outlet or an independent retailer, is alleged to be a co-conspirator or to have participated in any antitrust conduct.

On February 2, 1983, plaintiffs filed the "Statement of Opinions, and Bases Therefor, of Dr. Raymond Folwell." Dr. Folwell is an agricultural economist at Washington State University. His report is the basis of plaintiffs' damages theory, both as to fact of damages [*3] and amount of damages. After his report was filed, defendants deposed Dr. Folwell and submitted the twelve volume deposition to the Court with their motions. Both parties understood that this report would be the entire and final basis of plaintiffs' damages theory and that, therefore, if the Court rejected it, litigation would be at an end.

Defendants claim the Dr. Folwell's report is inadmissible. There are three grounds for their challenge:

1. Plaintiffs' damages claim for the alleged unlawful wholesale overcharge plus the total retail mark-up is wrong as a matter of law.
2. Regardless of the measure of damages to which plaintiffs would be entitled in law, Dr. Folwell's methodology is fatally flawed by the use of a 1971-1973 base period (during which time a federally imposed price freeze was in effect), which is not comparable to the 1973-1975 period of the alleged unlawful conduct.
3. Dr. Folwell's opinions are inadmissible because they are based on matters outside his expertise.

The Measure for the Amount of Damages in an Antitrust "Pass On" Case

The plaintiffs claim that they are entitled to damages in an amount which is the difference between actual retail [*4] prices and what retail prices would have been absent the illegal activity. In essence their claim is based on two arguments. First, they assume that the entire wholesale overcharge was passed on by the retailers to the plaintiffs and that the unlawful overcharge perhaps tainted the retail operation so that cost saving efforts were undermined. Second, to sort out the legitimate retail costs and mark-ups which were unaffected by the wholesale overcharge is too complex and burdensome. Defendants' position is that where an ultimate purchaser is allowed to sue a manufacturer or wholesaler in a "pass on" case, the amount of damages is limited to, at most, the illegal overcharge at the wholesale level.

Royal Printing Co. v. Kimberly-Clark Corp., 621 F.2d 323 (9th Cir. 1980) controls this case. In Royal Printing, two plaintiffs, Haythornewhite and Royal Printing, sued various paper manufacturers for violations of the Sherman Act including price fixing. The district court dismissed the action on the ground that plaintiffs were not direct purchasers as required by *Illinois Brick Co. v. Illinois, 431 U.S. 720 (1977)*. After analyzing *Hanover Shoe, Inc. v. United Shoe Machinery Co., 392 F.2d 481 (1968)* and Illinois Brick, the leading "pass on" cases,¹ the Court of Appeals affirmed as to Haythornewhite because its paper purchases were made from independent wholesalers. *621 F.2d at 328*. The Court reversed as to Royal Printing, holding that Illinois Brick does not bar an indirect purchaser's suit where the direct purchaser is a division or subsidiary of a co-conspirator and where there is no danger of multiliability to the defendant and no undue complexity of proof of damages. *Id. at 326*.¹

[*6] The Court made clear that the measure of damages was the unlawful overcharge. The only question was whether or not plaintiffs were entitled to the entire illegal overcharge or had to trace how much of the illegal

¹ In Hanover the Supreme Court held that plaintiffs, *HN1*[↑] direct purchasers-retailers, of defendants' goods were entitled to their entire damages, even though all or part of those damages may have been passed on to the plaintiffs' customers. The case established the rule that a defendant may not use a "defensive pass-on theory." In Illinois Brick the Court again confronted the question of whether the overcharged direct purchaser should be deemed to have suffered the full injury from the alleged wholesale overcharge; but the issue was presented in the context of a suit by an indirect purchaser seeking to show its injury by establishing pass on by the direct purchaser. The Court held that, in keeping with Hanover, *HN2*[↑] a pass on theory may not be used offensively by an indirect purchaser. Indirect purchasers would be denied the right to recover for unlawful overcharges by manufacturers which were passed on to the plaintiff-indirect purchasers by retailers.

overcharge was passed on to them by the wholesaling subsidiary. The Court held that Royal Printing could sue the defendants for the entire illegal overcharge:

Determining what portion of the illegal overcharge was "passed on" to the Royal Printing and what part was absorbed by the middlemen would involve all the evidentiary and economic complexities that Illinois Brick clearly forbade. [431 U.S. at 731-32](#) . . . Thus Royal Printing cannot sue the appellees only for the portion of the overcharge that was passed on to it through the wholesaling subsidiary and division.

[*Id. at 327.*](#)

The Court made clear that Illinois Brick would most often preclude [HN3](#) actions by indirect purchasers. Exceptions to that rule would be made only where there was no danger that the middleman or subsidiary would also sue, thereby making the defendant subject to multiple liability and where there is relatively straight forward proof of the passing on. From the foregoing it held that:

The [*7] only alternatives are to allow Royal Printing to sue the appellees for the entire amount of the overcharge to the wholesalers, or not to allow Royal Printing to sue the appellees at all. *Id.* See also II Areeda and Turner, [**Antitrust Law**](#) P337a, p. 183 (1978).

At oral argument plaintiffs contended that Royal Printing applies only to declining market situations. Nothing in that opinion supports such an interpretation. Furthermore the Ninth Circuit's rejection of the "umbrella theory" of damages in antitrust price fixing cases supports this Court's conclusion. *In re Coordinated Pretrial Proceedings In Petroleum Products Antitrust Litigation*, [691 F. 2d 1335 \(9th Cir. 1982\)](#) dealt with a suit brought by various western states against 16 oil companies alleging a conspiracy to raise prices of refined petroleum products. Plaintiffs argued that defendants' successful price fixing conspiracy created a "price umbrella" or market situation where non-conspiring competitors of the defendants were able to raise their prices at or near the fixed price; because defendants created the situation, they should be held responsible for damages resulting from their competitors' higher prices. [691 F. 2d 1338-39](#). The umbrella damages theory is very close to the one which plaintiffs offer here. The Ninth Circuit rejected it under the rationale of Illinois Brick and concluded that the measure of damages could only be the original unlawful overcharge. [*Id. at 1339.*](#)

Although we recognize that the "difficulty of ascertainment should not be confused with a right of recovery . . .," we nevertheless must consider whether "a claim rests at bottom on some abstract conception or speculative measure of harm."

[HN4](#) Under an umbrella theory, the result of any attempt to ascertain with reasonable probability whether the non-conspirators' prices resulted from the defendants' purported price-fixing conspiracy or from numerous other pricing considerations would be speculative to some degree. . . . The causal effect of each pricing decision would have to be pursued through the chain of distribution.

[*Id. at 1341.*](#)

Plaintiff's damages calculation was done using retail prices. Plaintiffs rejected a damages claim for the amount of the unlawful wholesale increase arguing that such a claim would be inadequate recompense for their injury. Their damages claim is wrong as matter of law.

Recognizing [*9] the Court's position on this question, the plaintiffs at oral argument moved to amend their damages report claiming that within two weeks they could gather a wholesale data base to run through the computer and estimate damages based on a wholesale price increase. Counsel represented that the data Dr. Folwell would use would not correspond well with reality, but that plaintiffs were willing to "presume their way out of reality" into the Court's interpretation of Royal Printing. Aside from the fact that such a procedure would most likely take in excess of two months and that the Court had instructed plaintiffs that they would have but one opportunity to present a damages theory, there is an entirely separate basis both for denying plaintiffs' motion to amend and for striking Dr. Folwell's report.

Dr. Folwell's Methodology

Dr. Folwell used a straight line regression analysis to estimate the amount of damages. It is not necessary to discuss how this method works except that Dr. Folwell relies on a base period of 1971 through October, 1973. Pacific Northwest retail fertilizer prices were analyzed so as to chart a sloping straight line which tracked the rate of price increases during [*10] that period. During that time the federal price freeze was in effect. The line was then extended to predict what prices would have been in 1973 to 1975 in the absence of illegal price fixing. Defendants say that, regardless of whether one charts retail or wholesale prices, Dr. Folwell's use of the federal price control period as a period of comparison is irrational and untrustworthy. Logic and common sense suggest that defendants are correct.

In [*Pacific Coast Agricultural Export Ass'n v. Sunkist Growers, Inc., 526 F. 2d 1196, 1206-1207 \(9th Cir. 1976\)*](#), the Ninth Circuit stated:

Plaintiffs' [HN5](#) method of measuring damages, known as the "before and after" theory, may be used only where there has been some showing that the market conditions in the two periods were similar but for the impact of the violation.

Although Dr. Folwell testified that he knew, in general, how the price controls worked, nothing before the Court shows that he or counsel for the plaintiffs attempted to study how the price controls in fact worked in relation to Pacific Northwest fertilizer prices.

Rather than offering a factual, economic analysis which might justify the use of the freeze period, plaintiffs [*11] offer a logical argument which fails to stand up. They state that whatever price increases did occur during the freeze had to be approved by the federal government based upon costs. They assume without any basis in logic or fact that increases during that time reflected all actual costs. These assumptions are mere speculation which render Dr. Folwell's report invalid and inadmissible. See [*Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F. 2d 71, 86-87 \(9th Cir. 1969\)*](#) cert. denied, 396 U.S. 1062 (1970); [*Allegheny Pepsi-Cola Bottling Co. v. Mid-Atlantic Coca-Cola Bottling Co., Inc., 690 F. 2d 411, 414 \(4th Cir. 1982\)*](#).

Even if the Court were inclined to allow plaintiffs to recalculate damages on the basis of wholesale, rather than retail, prices, the Court finds that Dr. Folwell's method which is based upon an invalid period of comparison is inadmissible under [*Federal Rules of Evidence 702*](#). It is logically unsound and without value for a jury. See [*Zenith Radio Corp. v. Matsushita Electric Industrial Co., 505 F. Supp. 1313, 1353-54 \(E.D.Pa. 1980\)*](#).

Conclusion

Based on the foregoing reasoning, it is unnecessary to address defendants' third argument.

It Is [*12] Ordered that defendants' motions to strike Dr. Folwell's report and for summary judgment are Granted.

[**HN1**](#) **Civil Procedure, Sanctions**

The contempt judgment is a final order, reviewable by the court; and if a party is willing to pay the price of being punished for contempt or suffering an equivalent sanction such as dismissal of the complaint if the validity of the order he has disobeyed is ultimately upheld, he may get immediate review of that order by appealing from the contempt judgment.

HN2[ Appellate Jurisdiction, Final Judgment Rule

Where the validity of an underlying order is held not to be reviewable on appeal from the judgment of contempt, the order can be appealed as of right directly, which discovery orders cannot be. The right to have a discovery order reviewed on appeal from a contempt judgment thus serves as a safety valve in the final-judgment rule of [28 U.S.C.S. § 1291](#). Such an order may impose heavy and irrecoverable costs on a party; yet to make discovery orders appealable as of right would lead to unacceptable delays in federal litigation. Confining the right to get appellate review of discovery orders to cases where the party against whom the order was directed cared enough to incur a sanction for contempt is a crude but serviceable method of identifying the most burdensome discovery orders and waiving the finality rule only for them.

HN3[ Judges, Discretionary Powers

Fed. R. Civ. P. 26(c) empowers the district court to make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including that discovery not be had, and *Rule 26(d)* empowers the court, upon motion, for the convenience of parties and witnesses and in the interests of justice, to control by order the sequence and timing of discovery. Although the effective management of complex litigation requires that the district judge be allowed broad discretion in guiding the discovery process and therefore in exercising his powers under *Rules 26(c) and (d)*, his discretion is not unlimited, and if the court has a firm conviction that he has made a mistake the court must reverse.

Civil Procedure > ... > Discovery > Methods of Discovery > General Overview

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > Discovery & Disclosure > Discovery > Undue Burdens in Discovery

HN4[ Discovery, Methods of Discovery

In ruling on a motion to limit discovery the district judge must compare the hardship to the party against whom discovery is sought, if discovery is allowed, with the hardship to the party seeking discovery if discovery is denied. He must consider the nature of the hardship as well as its magnitude, and thus give more weight to interests that have a distinctively social value than to purely private interests. He must go through the same analysis under *Fed. R. Civ. P. 26(d)* except that obviously an order merely postponing a particular discovery request should be granted more freely than an order denying the request altogether. The hardship to the party seeking discovery is less if he is just being told to complete his other discovery first, or just to let the other party have some discovery first, than if he is being told to do without forever.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN5 Summary Judgment, Opposing Materials

Fed. R. Civ. P. 26(d) provides a method of accommodating competing interests with minimal damage to either. If there is other discovery that the plaintiffs must complete in order to be able to resist a motion by the defendant for summary judgment, and thus a significant chance that the plaintiffs' case will fail regardless of what the internal files that they are seeking may show, the district judge should use his power under *Rule 26(d)* to require the plaintiffs to complete the other, nonsensitive discovery first. His power to do so cannot be questioned. Nor his duty, in an appropriate case. As a threshold matter, the court should be satisfied that a claim is not frivolous, a pretense for using discovery powers in a fishing expedition.

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > Discovery & Disclosure > Discovery > Relevance of Discoverable Information

Civil Procedure > Discovery & Disclosure > Discovery > Undue Burdens in Discovery

HN6 Discovery, Methods of Discovery

Discovery of sensitive documents is sometimes sought not in a sincere effort to gather evidence for use in a lawsuit but in an effort to coerce the adverse party, regardless of the merits of the suit, to settle it in order not to have to disclose sensitive materials. The use of the liberal discovery provisions of the Federal Rules of Civil Procedure to harass opponents is common, and requires the vigilance of the district judges to prevent. The power granted by *Fed. R. Civ. P. 26(d)* to control the sequence and timing of discovery is one of the district courts' too little used tools for preventing the predatory abuse of discovery. Judges should not hesitate to exercise appropriate control over the discovery process.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Boycotts are illegal per se only if used to enforce agreements that are themselves illegal per se -- for example, price-fixing agreements. Boycotts cannot be deemed illegal per se on the basis of their impact on competitors rather than on the consuming public, if there is no direct effort to influence the supply of, or demand for, a competitor's product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Membership restrictions by trade organizations not possessed of significant economic or operational leverage are more appropriately evaluated according to the standards of the rule of reason. What is "significant economic or operational leverage" is a matter of proof.

Opinion by: POSNER

Opinion

[*1492] POSNER, Circuit Judge.

This is an appeal from a judgment for criminal contempt for disobeying a discovery order. The appeal was originally decided by this panel in an opinion published at [692 F.2d 1083 \(7th Cir. 1982\)](#), with Justice Stewart dissenting, *id. at 1096*. Rehearing *en banc* was granted, but shortly before argument was scheduled to be [**2] heard it became apparent that the reservations of the judges who had voted to rehear the case concerned the breadth of the panel's majority opinion, and that if the panel majority was willing (as it was) to write a more narrowly focused opinion, *en banc* consideration could be obviated. This is that opinion. It has been circulated to all the members of the court in regular active service so that the court could decide, not whether it wants to adopt this opinion as the opinion of the court *en banc*, but whether it wants to go ahead with the scheduled *en banc* rehearing of the prior opinion; and the court by majority vote has decided to vacate the order granting rehearing *en banc*.

The American Academy of Orthopaedic Surgeons is a private association to which most orthopaedic surgeons in the United States belong. The plaintiffs, two orthopaedic surgeons practicing in Evansville, Indiana, and Chicago, respectively, were denied membership in the Academy without a hearing or a statement of reasons. Although membership in the Academy is alleged to confer certain professional advantages, it is not a prerequisite either to being certified to practice as an orthopaedic surgeon [**3] or to obtaining hospital staff privileges; each of the plaintiffs is certified to practice orthopaedic surgery, and has staff privileges at several hospitals.

The plaintiffs first sued the Academy in an Illinois state court, claiming a right under Illinois law to a hearing on their application and to reasonable standards for membership. They lost; the Illinois Appellate Court held that the complaint failed to state a claim because membership in the Academy is not an "economic necessity." [Treister v. American Academy of Orthopaedic Surgeons, 78 Ill. App. 3d 746, 755-56, 396 N.E.2d 1225, 1232, 33 Ill. Dec. 501 \(1979\)](#). They then sued the Academy in federal district court, seeking injunctive relief and damages under [section 1](#) of the Sherman Act, [15 U.S.C. § 1](#). The complaint alleged that the Academy is "a monopoly in its field, possessed of substantial power to control the market for orthopaedic surgical services," and that the plaintiffs, though fully qualified for membership under the announced criteria of the Academy, were denied membership for "extraneous" reasons, which in the case of Dr. Treister (no particulars were given for Dr. Marrese) included "(a) his supposed willingness [**4] to offer expert testimony against other orthopaedic surgeons in medical malpractice cases; (b) his known willingness to consult surgical out-patients on a relatively high-volume basis; and (c) his nonconformity of personality and personal attitudes with those of most established orthopaedic surgeons and in particular those who were already members of the academy." The complaint alleged that the effect of denying the plaintiffs' applications for membership had been "to limit competition and enforce conformity with current business practices" and to injure the plaintiffs in the practice of their profession.

Discovery began. The plaintiffs asked the Academy to produce all of its correspondence and other documents relating to the denial of the plaintiffs' applications for membership and to all other denials of membership applications between 1970 and 1980. The Academy refused, even after the court ordered it to produce the requested documents. The court held the Academy in criminal contempt and fined it \$10,000, and this appeal followed.

* Judge Sprecher was originally the third member of the panel, but his untimely death prevented his participation in the decision of this case. Judge Posner took his place and read the briefs and pertinent portions of the record and listened to the tape recording of the oral argument.

The Academy asks us to hold that the discovery order was improper, but the plaintiffs point out that it is not a final order and argue that we [**5] cannot review it because the district court has not certified it for an immediate appeal under [28 U.S.C. § 1292\(b\)](#). [HN1](#)[¹] The contempt judgment, however, [*1493] is a final order, reviewable by us; and if a party is willing to pay the price of being punished for contempt or suffering an equivalent sanction such as dismissal of the complaint if the validity of the order he has disobeyed is ultimately upheld, he may get immediate review of that order by appealing from the contempt judgment. E.g., [United States v. Ryan, 402 U.S. 530, 532-33, 29 L. Ed. 2d 85, 91 S. Ct. 1580 \(1971\)](#); [Ryan v. Commissioner of Internal Revenue, 517 F.2d 13, 19-20 \(7th Cir. 1975\)](#); [Hanley v. McHugh Constr. Co., 419 F.2d 955, 957 \(7th Cir. 1969\)](#); [National Util. Serv., Inc. v. Northwestern Steel & Wire Serv., Inc., 426 F.2d 222 \(7th Cir. 1970\)](#); [Hastings v. North East Independent School Dist., 615 F.2d 628, 631 \(5th Cir. 1980\)](#).

True, some cases hold, in apparent contradiction to the above, that where as in this case the judgment is for criminal rather than civil contempt the validity of the underlying order may not be questioned on appeal from the contempt judgment. E.g., [United States](#) [**61] [v. United Mine Workers of America, 330 U.S. 258, 291-94, 91 L. Ed. 884, 67 S. Ct. 677 \(1947\)](#); [ITT Community Development Corp. v. Barton, 569 F.2d 1351, 1356 \(5th Cir. 1978\)](#). Yet our decision in *Hanley*, for example, involved criminal contempt; and the two lines of cases can be reconciled, see [Hanley v. McHugh Constr. Co., supra, 419 F.2d at 957](#); [United States v. Ryan, supra, 402 U.S. at 532 n.4](#); 13 Wright, Miller & Cooper, Federal Practice and Procedure § 3537, at pp. 340-41 (1975), by noting that [HN2](#)[¹] in the cases where the validity of the underlying order was held not to be reviewable on appeal from the judgment of contempt the order could have been appealed as of right directly, which discovery orders cannot be. The right to have a discovery order reviewed on appeal from a contempt judgment thus serves as a safety valve in the final-judgment rule of [28 U.S.C. § 1291](#). Such an order may impose heavy and irrecoverable costs on a party; yet to make discovery orders appealable as of right would lead to unacceptable delays in federal litigation. Confining the right to get appellate review of discovery orders to cases where the party against whom the order was directed [**7] cared enough to incur a sanction for contempt is a crude but serviceable method of identifying the most burdensome discovery orders and waiving the finality rule only for them.

The validity of the discovery order that the Academy disobeyed is therefore properly before us. *Rule 26(c) of the Federal Rules of Civil Procedure* [HN3](#)[¹] empowers the district court to "make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including . . . that discovery not be had . . .," and *Rule 26(d)* empowers the court, "upon motion, for the convenience of parties and witnesses and in the interests of justice," to control by order the sequence and timing of discovery. Although the effective management of complex litigation requires that the district judge be allowed broad discretion in guiding the discovery process and therefore in exercising his powers under *Rules 26(c)* and (d), [Chrysler Corp. v. Fedders Corp., 643 F.2d 1229, 1240 \(6th Cir. 1981\)](#), his discretion is not unlimited, and if we have a firm conviction that he has made a mistake we must reverse. [Silkwood v. Kerr-McGee Corp., 563 F.2d 433, 436 \(10th Cir. 1977\)](#). [**8]

[HN4](#)[¹] In ruling on a motion to limit discovery the district judge must compare the hardship to the party against whom discovery is sought, if discovery is allowed, with the hardship to the party seeking discovery if discovery is denied. He must consider the nature of the hardship as well as its magnitude, and thus give more weight to interests that have a distinctively social value than to purely private interests. He must go through the same analysis under *Rule 26(d)* except that obviously an order merely postponing a particular discovery request should be granted more freely than an order denying the request altogether. The hardship to the party seeking discovery is less if he is just being told to complete his other discovery first (or just to let the other party have some discovery first) than if he is being told to do without forever.

[*1494] In an effort to show that more than purely private interests are at stake, the Academy argues that its correspondence and other documents relating to denials of applications for membership are protected by the [First Amendment](#). This argument, if meant to establish a complete immunity from discovery of these materials in a lawsuit, is [**9] untenable. See, e.g., [Memorial Hospital for McHenry Cty. v. Shadur, 664 F.2d 1058, 1063 \(7th Cir. 1981\)](#) (per curiam), rejecting a claim of privilege for a hospital's records of disciplinary proceedings against staff physicians. Even if the Academy were engaged in advocating controversial views and the publication of its internal files would expose members to retaliation for those views, it would not have an absolute privilege against discovery,

though the plaintiffs would then have the burden of showing that the information sought was essential to their case and unobtainable by other means that would be less likely to discourage such advocacy. See [Hastings v. North East Independent School Dist., supra, 615 F.2d at 632](#); [In re Petroleum Prods. Antitrust Litigation, 680 F.2d 5, 7 \(2d Cir. 1982\)](#); [Gray v. Board of Educ. of City of N.Y., 692 F.2d 901, 903-05 \(2d Cir. 1982\)](#).

Yet there is in this case, if not a [First Amendment](#) right, at least a [First Amendment](#) interest -- maybe two [First Amendment](#) interests -- which the discovery sought by the plaintiffs would impair and which differentiates this from the usual antitrust case, where discovery is sought of invoices or salesmen's [**10](#) reports or the minutes of a corporation's board of directors. The Academy is a forum for exchanges of information about surgical techniques and related matters of substantial public interest. These exchanges may be inhibited if the Academy has to disclose its membership files. The protective order that the district judge entered is not a complete answer, not only because it is the kind of lawyers' arrangement that laymen instinctively distrust but also because the particular order allows the plaintiffs themselves, and not just their counsel -- allows, in other words, two disappointed applicants for memberships -- to get hold of their files. If the Academy complies with the discovery order its members may be reluctant to offer candid evaluations of applicants in the future, and the atmosphere of mutual confidence that encourages a free exchange of ideas will be eroded. Cf. [NAACP v. Alabama ex rel. Patterson, 357 U.S. 449, 2 L. Ed. 2d 1488, 78 S. Ct. 1163 \(1958\)](#), where in a case involving resistance to disclosure of membership information in discovery proceedings the Supreme Court recognized a [First Amendment](#) right of association for the purpose of expression and advocacy of [**11](#) ideas. And setting aside constitutional considerations, one should not have to raise the ghosts of Aristotle and de Tocqueville to be reminded that voluntary associations are important to many people, Americans in particular, that voluntary professional associations are important to American professionals (a proposition that is the premise of the plaintiffs' antitrust suit as it was of their Illinois suit), that confidentiality of deliberations on membership applications is essential to the voluntary character of an association, and therefore that the involuntary disclosure of the membership files of a voluntary association may harm worthy private interests.

Although disclosure of the files sought by the plaintiffs would thus be costly, nondisclosure might make it impossible for them to prove their antitrust case or even to discover whether they have a meritorious case. Since the interest in the confidentiality of an association's membership deliberations is not absolute, the balance of hardships may therefore seem even. But *Rule 26(d) of the Federal Rules of Civil Procedure* (control of the sequence and timing of discovery) [HN5](#) provides a method of accommodating the competing interests [**12](#) with minimal damage to either. If there is other discovery that the plaintiffs must complete in order to be able to resist a motion by the defendant for summary judgment, and thus a significant chance that the plaintiffs' case will fail regardless of what the internal files that they are seeking may show, the district judge should use his power under *Rule 26(d)* to require the plaintiffs to complete the other, nonsensitive discovery first. [*1495](#) His power to do so cannot be questioned. See 8 Wright, Miller & Cooper, *Federal Practice and Procedure* §§ 2040, 2047 (1976). Nor, we think, his duty, in an appropriate case. As the First Circuit stated recently in dealing with the related question of discovery of newsmen's confidential sources, "As a threshold matter, the court should be satisfied that a claim is not frivolous, a pretense for using discovery powers in a fishing expedition. In this case, *plaintiff should show that it can establish jury issues on the essential elements of its case not the subject of the contested discovery.*" [Bruno & Stillman Co. v. Globe Newspaper Co., 633 F.2d 583, 597 \(1st Cir. 1980\)](#) (emphasis added).

[HN6](#) Discovery of sensitive documents is sometimes [**13](#) sought not in a sincere effort to gather evidence for use in a lawsuit but in an effort to coerce the adverse party, regardless of the merits of the suit, to settle it in order not to have to disclose sensitive materials. The use of the liberal discovery provisions of the Federal Rules of Civil Procedure to harass opponents is common, and requires the vigilance of the district judges to prevent. The power granted by *Rule 26(d)* to control the sequence and timing of discovery is one of the district courts' too little used tools for preventing the predatory abuse of discovery and we are at a loss to understand why the power was not used here. "Judges should not hesitate to exercise appropriate control over the discovery process." [Herbert v. Lando, 441 U.S. 153, 177, 60 L. Ed. 2d 115, 99 S. Ct. 1635 \(1979\)](#).

Of course, if the plaintiffs did not need anything beyond the contents of the Academy's membership files to prove their case, there would be no other essential discovery they could be asked to do before getting access to the Academy's files. But it does not appear that the plaintiffs are attempting to prove a per se antitrust offense that

would be complete if the Academy's [**14] files showed that the Academy had an anticompetitive motive in denying their applications for membership. The denial was a collective refusal by the Academy's members to deal with the plaintiffs on the identical terms on which they deal with each other, and hence a boycott. Although it used often to be said that boycotts were illegal per se, that was never entirely true. The best known statement of the Rule of Reason is found in a boycott case, *Board of Trade of City of Chicago v. United States*, 246 U.S. 231, 62 L. Ed. 683, 38 S. Ct. 242 (1918), which involved the legality of an internal rule of a commodities exchange designed to limit competition from some of its members, a rule whose violation would have been punishable by expulsion. In any event, it is clear today that [HN7](#) [↑] boycotts are illegal per se only if used to enforce agreements that are themselves illegal per se -- for example, price-fixing agreements. See *United States Trotting Ass'n v. Chicago Downs Ass'n*, 665 F.2d 781, 787-90 (7th Cir. 1981) (en banc), for the general principle, and *Spray-Rite Serv. Corp. v. Monsanto Co.*, 684 F.2d 1226, 1234-36 (7th Cir. 1982), cert. granted, 460 U.S. 1010, 103 S. Ct. 1249, [**15] 75 L. Ed. 2d 479 (1983), for the price-fixing exception. At least that is the rule for organized associations having some lawful purposes; we need not decide whether a conspiracy or other ad hoc "association," if anticompetitive in intent, would be treated under a harsher standard.

True, some cases such as *United States v. Terminal Railroad Ass'n of St. Louis*, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 (1912), hold or imply that a boycott that totally excludes a competitor from a market is, for that reason alone, illegal; and that could be viewed as a species of per se illegality. Since there has been, at least as yet, no suggestion that the American Academy of Orthopaedic Surgeons has the power to prevent anyone from practicing orthopaedic surgery, these cases are of doubtful relevance. And there is a question to what extent, with their emphasis on the welfare of competitors rather than consumers (the excluded railroad in the *Terminal Ass'n* case appears to have been complaining about its exclusion from a cartel!), they can survive the consumer-oriented view of antitrust that prevails today. See, e.g., *Reiter [*1496] v. Sonotone Corp.*, 442 U.S. 330, 343, 60 L. [**16] Ed. 2d 931, 99 S. Ct. 2326 (1979). Reviewing them recently, this court held that boycotts cannot be deemed illegal per se on the basis of their impact on competitors rather than on the consuming public, if there is no "direct effort to influence the supply of, or demand for, a competitor's product." *Phil Tolkan Datsun, Inc. v. Greater Milwaukee Datsun Dealers' Advertising Ass'n, Inc.*, 672 F.2d 1280, 1286 (7th Cir. 1982). None is alleged in this case. The plaintiffs are competitors of Academy members, and membership may be valuable in competing with both member and nonmember orthopaedists, but there is no contention that the Academy is interfering directly with the plaintiffs' access to suppliers or customers, as by trying to get their hospital staff privileges revoked. The alleged effect of denial of membership on the plaintiffs' ability to practice orthopaedic medicine is indirect, just as denying a trial lawyer membership in the American College of Trial Lawyers would have only an indirect effect on his ability to obtain clients. We are speaking of matters of degree of course, but an "indirect" effect, by which we mean one falling far short of complete exclusion from the market, [**17] will not support a per se attack on a boycott.

Nor do the plaintiffs allege a price-fixing conspiracy among orthopaedic surgeons, a conspiracy to which the exclusion of the plaintiffs from membership in the Academy might be ancillary. Even if, as we very much doubt, a price-fixing allegation could be teased out of the statement in the complaint that Dr. Treister is willing "to consult surgical out-patients on a high-volume basis" -- "high volume" perhaps implying low price -- the plaintiffs have given no indication of wanting to rest their entire case on this tenuous link to the per se doctrine. They want to go further and prove a boycott that is illegal if at all only under the Rule of Reason, and to do that they will have to prove at trial some "anticompetitive market effect" from the boycott. *Lektro-Vend Corp. v. Vendo Co.*, 660 F.2d 255, 268 (7th Cir. 1981); *Dos Santos v. Columbus-Cuneo-Cabriini Medical Center*, 684 F.2d 1346, 1352 (7th Cir. 1982); *Havco of America, Ltd. v. Shell Oil Co.*, 626 F.2d 549, 558 (7th Cir. 1980). As in *Phil Tolkan Datsun, supra*, 672 F.2d at 1287, "we decline to accept plaintiff's apparent contention that any denial of membership by [**18] an ongoing trade association constitutes a per se violation [HN8](#) [↑] Membership restrictions by trade organizations not possessed of significant economic or operational leverage are more appropriately evaluated according to the standards of the rule of reason." And, of course, what is "significant economic or operational leverage" is a matter of proof too.

Thus, to get over the hurdle of a defense motion for summary judgment at the completion of pretrial discovery the plaintiffs will have to have other evidence besides whatever delicious morsels they may find in the Academy's files on denials of membership applications. They do not have the other evidence yet, though they may get it through

additional discovery. According to their counsel the vast majority of the nation's orthopaedic surgeons who have been practicing orthopaedic medicine for at least three years (one of the plaintiffs' counsel said 99 percent) are members of the Academy, and it has 10,000 members in all. The plaintiffs do not suggest that the Academy places any restrictions on its members. Even the Academy's meetings are open to nonmembers, though the plaintiffs object, frivolously as it seems to us, to having [**19] to wear nonmember badges. This does not appear to be a case where an association is making a "direct effort to influence the supply of, or demand for, a competitor's product." [Phil Tolkan Datsun, supra, 672 F.2d at 1286.](#)

In these circumstances, if all of the Academy's members were in the same market the consumer interest in effective competition could not be seriously harmed by the exclusion of the plaintiffs and others like them -- not that such exclusion is in the cards: the plaintiffs do not argue that the Academy controls entry into the practice of orthopaedic surgery. Ten thousand is a vast number of competitors. Unless they explicitly agreed not to compete and backed [*1497] up the agreement with enforcement machinery to prevent individual members from cheating, the consumer would be assured the benefits of buying in a competitive market. And though there is a sense in which the exclusion of any competitor reduces competition, it is not the sense of competition that is relevant to antitrust law. [Products Liability Ins. Agency, Inc. v. Crum & Forster Ins. Cos., 682 F.2d 660, 663-64 \(7th Cir. 1982\); University Life Ins. Co. of America v. Unimarc Ltd., 699 F.2d 846, 853 \(7th Cir. 1983\).](#) HN9[] The policy of competition is designed for the ultimate benefit of consumers rather than of individual competitors, and a consumer has no interest in the preservation of a fixed number of competitors greater than the number required to assure his being able to buy at the competitive price. Maybe the older, competitor-protection view would survive in a case of naked aggression resulting in the total exclusion of a competitor from the market, but that would be a per se case (if anything) and this is not.

The 10,000 members of the Academy do not, however, all compete in the same market. Assume that the market for orthopaedic surgery is local -- that Dr. Marrese competes with other orthopaedists in Evansville, Dr. Treister with other orthopaedists in Chicago. The plaintiffs will still have the burden at trial of showing that in these local markets the number of orthopaedic surgeons who belong to the Academy is so few that competition among them -- competition that the Academy apparently does not attempt to limit or regulate -- cannot be relied on to give the consuming public the benefits of competition. Unless they can show this they will be unable to [**21] ask the trier of fact to draw an inference that either the exclusion of an individual orthopaedist from a local market or the possible effect of that exclusion on the competitive behavior of other aspirants to membership could result in a higher price or lower quality of orthopaedic surgery in these communities.

The plaintiffs have made no effort yet in discovery to show a probable anticompetitive effect along the foregoing lines or any others, nor have they yet laid an adequate predicate for a per se theory of liability. We emphatically do not decide that they will not be able to make the required showing; since discovery is not yet complete, all statements of fact in this opinion are tentative. But at this early stage of the case, where virtually the only facts of record bearing on competitive effect are that the Academy has thousands of members, does not regulate their behavior, and does not control entry, the plaintiffs cannot be said to have made the required showing. The district court should not in these circumstances have ordered discovery of the Academy's membership files before there was any discovery on the issue of competitive effect. It was not enough for the court [**22] to observe that "nothing in the Federal Rules of Civil Procedure or the case law requires the imposition of such a bifurcation [of discovery] on plaintiffs." As we have pointed out, HN10[] a district court has the power under *Rules 26(c) and (d) of the Federal Rules of Civil Procedure*, and in a clear case the duty, to defer a burdensome discovery request pending completion of discovery on an issue that may dispose of the entire case and thereby make the request moot. We are speaking here only of postponement, and not of denial, of discovery. There would have been no hardship to the plaintiffs in requiring them to conduct their discovery on competitive effect before getting into the Academy's membership files. The sequence of discovery may well have been intended to coerce the Academy to settle but in any event the balance of hardships is clear enough to make us conclude that in refusing to postpone discovery of the membership files the able district judge committed clear error.

The judgment of criminal contempt is therefore reversed. Although the Academy also asks us to order the complaint dismissed on grounds of res judicata, the district judge's denial of the Academy's motion to [**23]

dismiss was an interlocutory order appealable only under [28 U.S.C. § 1292\(b\)](#), which requires the district judge to certify in writing that he is "of the opinion that [the order] involves a controlling question of law as to which there is substantial ground for difference of opinion and that [*1498] an immediate appeal from the order may materially advance the ultimate termination of the litigation . . ." Rightly or wrongly, [HN11](#)[ the judge refused to make the certification, and we therefore have no jurisdiction to review his interlocutory order. [In re Watkins, 271 F.2d 771 \(5th Cir. 1959\)](#).

REVERSED.

Dissent by: STEWART

Dissent

STEWART, Justice (Retired), dissenting.

Much that is said in the opinion of the Court strikes me as correct. Specifically, I agree that a district court has the power, and sometimes the duty, under *Rules 26(c) and (d) of the Federal Rules of Civil Procedure*, to defer a burdensome discovery request pending completion of discovery on an issue that may dispose of the entire case. But for reasons stated in my dissent from the Court's original opinion, see [692 F.2d, at 1097-1098](#), I cannot agree with the Court's ultimate conclusion that the District Court's [\[*24\]](#) refusal to postpone discovery of the Academy's application files in this case was "clear error."

At the heart of the controversy before us is the conflict between the Academy's legitimate concern for preserving the confidentiality of its records, and the appellants' need for evidence with which to prove their antitrust claim. The Academy's interest, however characterized, in preserving the secrecy of its deliberations is substantial. If those charged with determining the qualifications of applicants to membership in a professional organization cannot be assured that their evaluations will remain confidential, they may be less than candid in their assessments, and the organization's legitimate interest in limiting its membership to qualified persons may be impaired.

The District Court was fully cognizant of these concerns. In its order denying the Academy's request to delay discovery of its files, the District Court explicitly acknowledged that public disclosure of the contents of the application files would have a "chilling effect" on the Academy's future deliberations. But the District Court also determined that the sought-after materials were critically important to appellees' [\[*25\]](#) case and therefore declined to "bifurcate" the proceedings. Instead, the District Court imposed a protective order strictly limiting appellees' access to the application materials, finding that "under those restrictive conditions, the confidentiality of the Academy's admission process is largely preserved."

As the Court acknowledges, a district judge must have substantial discretion in controlling how cases proceed in the district court. That discretion is particularly broad with respect to discovery. See e.g., [Voegeli v. Lewis, 568 F.2d 89, 96 \(8th Cir. 1977\)](#). If the authority of the district courts to dispose of discovery matters is to be preserved, an appellate court may not interpose its judgment on such matters unless the lower court's decision leaves it with the firm conviction that a mistake has been made.

In this case, the District Court carefully considered the competing interests and reasonably determined that they could best be accommodated through discovery pursuant to a restrictive protective order. Other judges could reasonably reach other conclusions, but I cannot say that the decision before us was an abuse of discretion. Accordingly, I respectfully [\[*26\]](#) dissent.

HN1 Remedies, Injunctions

Section 16 of the Clayton Act states that any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief against threatened loss or damage by a violation of the antitrust laws. [15 U.S.C.S. § 26](#).

707 F.2d 1147, *1147* 1983 U.S. App. LEXIS 28061, **1

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN2 Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Price restraints accompanying a partial integration escape per se invalidation only when the integration renders markets more, rather than less, competitive and when the restraints are properly ancillary to the integration. In other words, the parties must be cooperating in an economic activity other than the elimination of rivalry, and the agreement must be capable of increasing the effectiveness of that cooperation and no broader than necessary for that purpose.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN3 Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Noneconomic considerations, however worthy, cannot be used to justify restraints that adversely affect competition.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN4 Regulated Industries, Higher Education & Professional Associations

The Sherman Act, [15 U.S.C.S. § 1 et seq.](#), will not countenance an argument that the nature of a product or an industry structure is such that something other than competition is desirable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Determining under a rule of reason whether arrangements are by their nature or character unreasonable requires assessment of the restraints in the context of the market in which they operate. The court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint, and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Market power is the power to control prices or exclude competition. Whether market power exists or can be exercised in the relevant geographic market depends upon the existence of competing products to which a purchaser can turn when faced with relative price increases. Whether product competition exists is determined by

two factors: (a) The reasonable interchangeability of use to which two or more products can be put. This factor, in turn, is satisfied when two or more products (i) have essentially similar physical characteristics, or (ii) can be put to use for the same purpose. (b) The cross-elasticity of demand, i.e., the extent to which consumer preference shifts freely between two or more products.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN7 Practices Governed by Per Se Rule, Boycotts

In the context of associational activities, the existence of an expulsion sanction does not by itself constitute a boycott. Unless resort to the expulsion sanction constitutes a naked attempt to exclude competition, the antitrust implications of an expulsion sanction turn on the competitive reasonableness of the rule being enforced.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN8 Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

An association's rule or practice can in certain circumstances be considered facially unreasonable, and thus can be summarily invalidated as an illegal boycott. However, when the reasonableness of the practice cannot be assessed summarily, it is improper to affix the label "boycott" and end all inquiry unless the proffered rule-enforcement justification appears to be merely a sham for some anticompetitive purpose.

Judges: Logan, Barrett, and Seymour, Circuit Judges. Barrett, Cir. J., dissenting.

Opinion by: LOGAN

Opinion

[*1149] LOGAN, Cir. J.:

This is an appeal from a district court judgment holding the football television regulations of the National Collegiate Athletic Association to be in violation of [sections 1](#) and [2](#) of the Sherman Act and invalidating contracts entered into between the NCAA and ABC Sports, Inc., CBS Sports, Inc., and Turner Broadcasting System, Inc. The plaintiffs-appellees are The Board of Regents of the University of Oklahoma and the University of Georgia Athletic Association. They want to be free to contract for the sale of broadcast rights to the football games of their universities. After a nonjury trial, the district court held that under [section 1](#) of the Sherman Act the NCAA's television plan and the contracts are invalid per se because they constitute **[*1150]** price fixing and group boycotts, and are also unlawful under rule of reason analysis. The court held that the NCAA violated [section 2](#) by monopolizing the intercollegiate football broadcasting market. [546 F. Supp. 1276 \(W.D. Okla. 1982\)](#). **[**2]**

To resolve this appeal we consider: (1) whether the plaintiffs suffer antitrust injury and have standing to sue; (2) whether the television plan and contracts constitute price fixing unlawful per se; (3) whether the television plan and contracts are unlawful under rule of reason analysis; (4) whether the plan and contracts constitute group boycotts illegal per se; and (5) whether the relief granted below is overly broad.

The challenged NCAA regulations are found in the "1982-1985 NCAA Football Television Plan." Under the network television contracts entered into pursuant to the plan, ABC and CBS share exclusive first rights to negotiate with NCAA member institutions regarding the live broadcast of football games. In return for these negotiation rights ABC and CBS each guarantees to pay a "minimum aggregate compensation" of \$131,750,000 over the four year contract period.¹ **[**4]** The contracts essentially eliminate competition between ABC and CBS for broadcast rights to the same games. See [546 F. Supp. at 1292-93](#). Both ABC and CBS are to broadcast 14 "exposures" per season -- seven or eight exposures are one- or two-game national or semi-national telecasts and the rest are three- **[**3]** to six-game regional exposures. Within the 14 exposures at least 70 teams are to appear on each network. At least 82 different schools must be featured on each network over the course of two seasons; the goal is to feature 115 different teams between the two networks. Although the contracts contemplate that most telecasts will be of "major" university (Division I-A) games, they obligate the networks to telecast a few small-college games and Division I-AA, II, and III championship playoff games. The television plan limits schools to six appearances every two years, with a maximum of four appearances the first year and five the second. These appearances must be divided evenly between ABC and CBS. During 1982 and 1983 Turner Broadcasting System, Inc. is permitted to select and cablecast over its Atlanta station games not selected by ABC or CBS. For 19 games each season Turner pays a minimum aggregate compensation of \$17,696,000 over the two year contract period. Schools may sell the broadcast rights to their games to ABC, CBS, and Turner only.²

I

Relying on [Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 \(1977\)](#), the NCAA asserts that the plaintiffs lack standing to assert antitrust violations because they allege injuries that are not of the type the antitrust laws were designed to redress. The violation claimed by the plaintiffs is that the television plan constitutes a marketwide horizontal price fixing conspiracy. They allege that to facilitate the pricing arrangement individual schools are precluded from exercising independent judgment with regard to output and price. Furthermore, they allege that the NCAA will expel **[**5]** and boycott institutions that violate the television plan.³

In *Brunswick*, the Court stated:

[*1151] [T]hey must prove more than injury causally linked to an illegal presence in the market. Plaintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful.

Id. at 489. The television plan at issue here restricts the plaintiffs' revenues, market share, and output; the **[**6]** plan "cripples the freedom of traders and thereby restrains their ability to sell in accordance with their own judgment." [Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 213, 95 L. Ed. 219, 71 S. Ct. 259 \(1951\)](#). This effect is potentially inconsistent with the Sherman Act's mandate of free competition and is virtually

¹ The "minimum aggregate compensation" fee sets forth the total amount the networks must pay to the individual schools for the rights to particular games. If at the end of the season the minimum has not been paid, the balance is paid to the NCAA.

² A minor deviation from this rule is the "exception telecast." Essentially, games that qualify as exception telecasts are those (1) that are sold out or are being played more than 400 miles from the area in which the game is to be telecast, and (2) that will not be telecast within a certain distance of other football games unless those games are sold out. These telecasts occur infrequently and do not affect our analysis of the television plan and network contracts.

³ Although the boycott claim presents a double contingency -- the plaintiffs must sell broadcast rights in violation of the television plan and the NCAA must boycott the plaintiffs -- the claim is ripe. The plaintiffs have adequately evidenced their desire to be free of the restrictions; indeed, Oklahoma executed a contract for the broadcast of its games. Also, the NCAA has publicly threatened to sanction institutions that violate its television plan. See [546 F. Supp. at 1286, 1302](#).

identical to injuries redressable in the vertical restraint context. Furthermore, compliance with the television plan is coerced by the threat of expulsion and boycott, sanctions which clearly have anticompetitive potential.

Although many of the injuries alleged by the plaintiffs are in the nature of vertical restraint injuries rather than the allocative efficiency/deadweight loss classically attributed to cartelization, we think the plaintiffs have standing to challenge the plan as a horizontal pricing conspiracy. The standing limitation expressed by *Brunswick* does not apply with full rigor to the instant case. *Brunswick* was an action for treble damages; here the plaintiffs seek injunctive relief only.⁴ Section 16 of the Clayton Act [HN1](#) states that "any person, firm, corporation, or association shall be entitled to sue for and have [**7] injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws." [15 U.S.C. § 26](#). The plaintiffs allege antitrust injury inextricably intertwined with a horizontal price fixing conspiracy. See [Blue Shield of Virginia v. McCready](#), [457 U.S. 465, 478-85, 102 S. Ct. 2540, 2548-52, 73 L. Ed. 2d 149, 50 U.S.L.W. 4723, 4726-28 \(1982\)](#). Inasmuch as the plaintiffs may challenge the clauses of the television plan that injure the members of the conspiracy, no valid reason appears why they should be foreclosed from challenging clauses that injure the victims of the conspiracy. The statute evinces no such limitation, and we are not inclined to engraft one upon it. To do so would hinder the congressional policy of eliminating artificial restraints from the marketplace. See [Jeffrey v. Southwestern Bell](#), [518 F.2d 1129, 1132 \(5th Cir. 1975\)](#); [In re Multidistrict Vehicle Air Pollution Litigation](#), [481 F.2d 122, 130-31 \(9th Cir.\), cert. denied, 414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 \(1973\)](#); 2 P. Areeda & D. Turner, [Antitrust Law](#) § 335e (1978). Cf. [Hawaii v. Standard Oil Company of California](#), [405 U.S. 251, 260-61, 31 L. Ed. 2d 184, 92 **81 S. Ct. 885 \(1972\)](#) (State of Hawaii as parens patriae).

We are not persuaded by the NCAA's contention that the plaintiffs are merely seeking a "bigger slice of the [cartel] pie" or are seeking to "promote internal cartel management" by reforming the cartel "so that the cartel members may obtain their benefits while avoiding their burdens." See Appellant's Brief at 53. In [Perma Life Mufflers, Inc. v. International](#) [\[*91 Parts Corp., 392 U.S. 134, 20 L. Ed. 2d 982, 88 S. Ct. 1981 \(1968\)\]](#), similar arguments were made and rejected. In that case, the plaintiffs were Midas franchisees who alleged that certain clauses in the franchise agreement were illegal. The Court stated:

Although petitioners may be subject to some criticism for having taken any part [*1152] in respondents' allegedly illegal scheme and for eagerly seeking more franchises and more profits, their participation was not voluntary in any meaningful sense. They sought the franchises enthusiastically but they did not actively seek each and every clause of the agreement. Rather, many of the clauses were quite clearly detrimental to their interests, and they alleged that they had continually objected to them. Petitioners apparently accepted many of these restraints solely because their acquiescence was necessary to obtain an otherwise attractive business opportunity. The argument that such conduct by petitioners defeats their right to sue is completely refuted by the following statement from *Simpson* [v. [Union Oil Co., 377 U.S. 13, 12 L. Ed. 2d 98, 84 S. Ct. 1051 \(1964\)](#)]: 'The fact that a retailer can refuse to [**10] deal does not give the supplier immunity if the arrangement is one of those schemes condemned by the anti-trust laws.'

Id. [392 U.S. at 139-40](#). That the plaintiffs recognize the need for and accept the NCAA's regulation of intercollegiate athletics does not preclude their suit to challenge the television plan as violating the antitrust laws. We think that the allegations of the plaintiffs reflect antitrust injury and confer standing to sue under [15 U.S.C. § 26](#).

II

⁴ *Brunswick* does not mandate the result sought by the NCAA for another reason. In *Brunswick* a vertical merger prevented Pueblo Bowl-O-Mat, Inc. from reaping profits that would have accompanied an increase in market concentration. Pueblo sued for those profits, alleging that the merger was unlawful. The Court denied recovery, stating that the lost profits Pueblo would have derived from a decrease in competition were not injury of the type the antitrust laws were intended to prevent. [429 U.S. at 489](#). Here, the plaintiffs seek the right to compete in a market free from artificial restrictions.

At the outset we must determine whether the NCAA's television plan and the network contracts constitute price fixing illegal per se under [section 1](#) or whether they should be scrutinized under the rule of reason. The district court found them illegal per se. [546 F. Supp. at 1311](#). The nearly 600 institutional members of the NCAA, which include all "major" football powers, have agreed to market all of their football games to be offered for television viewing exclusively through the NCAA. By this agreement the teams have restricted the number of games to be telecast per season. The NCAA has negotiated fixed minimum total prices for the packages, which apparently have also always been the maximum. Although [\[**11\]](#) in theory the networks can pay different prices for different games, in practice the compensation paid does not vary from game to game.⁵

To the extent that the provisions of the television plan are naked attempts to restrict output and manipulate price, they are illegal per se under [Arizona v. Maricopa County Medical Society, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48, 50 U.S.L.W. 4687 \(1982\)](#). The NCAA argues, however, that the restraints are not naked but accompany an integration [\[**12\]](#) of functions, that the restraints should be scrutinized under [Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 \(1979\)](#), and therefore that the restraints should be analyzed under the rule of reason. While the NCAA is correct in asserting that *Broadcast Music* applies to restraints accompanying integrations, it incorrectly argues that *Broadcast Music* necessarily precludes application of the per se rule. Rather, the inquiry under *Broadcast Music* is "whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output . . . or instead one designed to 'increase economic efficiency and render markets more, rather than less, competitive.'" [441 U.S. at 19-20](#). "The scrutiny occasionally required must not merely subsume the burdensome analysis required under the rule of reason or else we should apply the rule of reason from the start." [Id. at 19 n. 33](#) (citation omitted).⁶

⁵ Because the networks possess exclusive rights to negotiate with the schools, the establishment of the minimum fee ensures that the schools will receive a "reasonable" payment for the broadcast rights. However, the fee also eliminates any incentive on the part of the networks to reward games of greater merit with higher payments. This effect does not necessarily reflect anticompetitive price enhancement (price fixing/allocative inefficiency in the economic sense), but it does reflect a distortion of free market forces.

⁶ The United States' amicus brief suggests that because the trial court scrutinized the procompetitive justifications proffered by the NCAA, it employed a form of rule of reason analysis. The brief argues that it is improper to characterize a case as "per se" after assessing and rejecting proffered justifications. *Broadcast Music* holds otherwise. Permitting facial consideration of attempts to justify restraints accompanying partial integrations does no violence to the concept of per se rules. Essentially, per se rules were developed in the interest of litigation efficiency.

"*Per se* rules always contain a degree of arbitrariness. They are justified on the assumption that the gains from imposition of the rule will far outweigh the losses and that significant administrative advantages will result. In other words, the potential competitive harm plus the administrative costs of determining in what particular situations the practice may be harmful must far outweigh the benefits that may result. If the potential benefits in the aggregate are outweighed to this degree, then they are simply not worth identifying in individual cases."

[United States v. Container Corp. of America, 393 U.S. 333, 341, 21 L. Ed. 2d 526, 89 S. Ct. 510 \(1969\)](#) (Marshall, J., dissenting). See also [Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 \(1958\)](#); [Arizona v. Maricopa County Medical Society, 457 U.S. 332, 344](#) & n. 14, [102 S. Ct. 2466, 2473](#) & n. 14, [73 L. Ed. 2d 48, 50 U.S.L.W. 4687, 4690](#) & n. 14 (1982). In the context of restraints ancillary to integration, however, it cannot be said that in the aggregate "the gains from imposition of the rule will far outweigh the losses." The integration of productive activities may permit efficiencies of scale regarding research, advertising, and manufacturing; output may be enhanced; new entry into various markets may be facilitated. See Brodley, *Joint Ventures and Antitrust Policy*, 95 Harv. L. Rev. 1523, 1527-29 (1982); R. Bork, *The Antitrust Paradox* 263-66 (1978); L. Sullivan, *Handbook of the Law of Antitrust* § 77, at 207 (1977). Cases applying the per se rule to naked price restraints confirm that in some circumstances price restraints ancillary to an integration of functions will escape the per se rule. "If a clinic offered complete medical coverage for a flat fee, the cooperating doctors would have the type of partnership arrangement in which a price fixing agreement among the doctors would be perfectly proper." [Maricopa County, 50 U.S.L.W. at 4693](#).

[**13] [*1153] Under *Broadcast Music*, [HN2](#) price restraints accompanying a partial integration escape per se invalidation only when the integration "renders markets more, rather than less, competitive" and when the restraints are properly ancillary to the integration. In other words, "the parties must be cooperating in an economic activity other than the elimination of rivalry, and the agreement must be capable of increasing the effectiveness of that cooperation and no broader than necessary for that purpose." R. Bork, *The Antitrust Paradox* 279. See also [United States v. Addyston Pipe & Steel Co.](#), 85 F. 271, 282-83 (6th Cir. 1898), aff'd as modified, [175 U.S. 211, 20 S. Ct. 96, 44 L. Ed. 136 \(1899\)](#); [United States v. Columbia Pictures Corp.](#), 189 F. Supp. 153, 185-92 (S.D.N.Y. 1960); L. Sullivan, *Handbook of the Law of Antitrust* § 131. Our analysis of the television plan and contracts, including a comparison of these agreements to the arrangements in *Broadcast Music*, leads us to affirm the district court's conclusion that the plan and contracts constitute per se illegal price fixing. The NCAA television arrangement is so fraught with anticompetitive potential [**14] that it "appears to be one that would always or almost always tend to restrict competition."

A

The NCAA is essentially an integration of the rulemaking and rule-enforcing activities of its member institutions. It performs many functions for its members, many of them noncommercial. It is the guardian of amateurism in the athletic programs of its members in essentially all intercollegiate sports. The NCAA determines playing rules, sets eligibility requirements, regulates recruiting, and establishes the requirements for and the number of scholarships that may be offered. It establishes when the seasons may start and must end, determines the number of games that may be played, and fixes the number of coaches a team may have. One sanction often levied for violation of these rules is the restriction of television appearances. The NCAA argues that the television plan is ancillary to this cooperative activity because the restraints promote the effectiveness of the cooperation by protecting live attendance at games and by promoting competitive balance, thereby improving the excitement of and the interest in both televised and live games.

The first argument, that the restraints promote [**15] rather than restrict output by protecting [*1154] live attendance, does not qualify the restraints as ancillary. The NCAA argues that in the process of "manufacturing" football, two products are produced that are marketed to different consumers: the right to attend a game, which is sold to spectators, and the right to televise a game, which is sold to broadcasters. The NCAA contends that by restricting the sale of broadcast rights, consumption by spectators is increased.⁷ We doubt on its face the argument that the output may be properly characterized as viewership. Even if we assume that consumption or viewership may be considered to be output, we think that total viewership -- both live and televised -- must be considered. An argument that total viewership is enhanced by restricting the sale of broadcast rights is speculative. The record contains some evidence that supports the conclusion the plan enhances live viewership, but no evidence was adduced to permit the court to gauge total viewership.⁸ Finally, even if the television plan has the effect of promoting spectator consumption, this effect is not unambiguously procompetitive. It is at best competitively neutral. [**16] The plan promotes live attendance by restricting the availability of other options. It potentially creates inefficiencies, such as the reduced output of desired products and the increased consumption of less desirable products. Therefore, the restraints do not increase the efficiencies of the integration.

[**17] The second argument, that the restraints promote athletically balanced competition, also fails to meet the ancillary test. First, this appears on its face to be a noneconomic justification. [HN3](#) Noneconomic

⁷ Another twist on this argument is that promoting spectator consumption ensures that gate receipts will be large enough to enable institutions to fund football and other athletic programs. It is argued that in this manner the plan ensures an adequate number of teams to permit intercollegiate competition. To a certain extent, this argument is not unlike the contention that something other than competition is needed in the industry. Such an argument is not permitted under the Sherman Act. [National Society of Professional Engineers v. United States](#), 435 U.S. 679, 689, 696, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978). If a market structure other than competition is necessary to engage in a line of commerce, Congress must be petitioned for an exemption from the antitrust laws.

⁸ The district court ultimately rejected the argument that the plan enhances live viewership. [546 F. Supp. at 1295-96](#).

considerations, however worthy, cannot be used to justify restraints that adversely affect competition. [National Society of Professional Engineers v. United States, 435 U.S. 679, 687-96, 55 L. Ed. 2d 637, 98 S. Ct. 1355 \(1978\)](#). Furthermore, as the district court noted, the argument that the restraints are necessary to promote athletic balance shades into the argument that competition will destroy the market. See [546 F. Supp. at 1310. HN4](#)⁹ The Sherman Act will not countenance an argument that the nature of a product or an industry structure is such that something other than competition is desirable. [National Society of Professional Engineers, 435 U.S. at 689, 696](#). And, even if we assume the justification to be legitimate, the district court found on adequate evidence that any contribution the plan made to athletic balance could be achieved by less restrictive means.

The restraints contained in the television plan do not increase the efficiency of the rulemaking integration [**18](#) and are broader than necessary to achieve asserted procompetitive goals. Therefore, they are not ancillary to the rulemaking integration and do not escape per se invalidation under *Broadcast Music* on the basis of that integration.
9

B

The NCAA also asserts that the television plan is ancillary to an integrated marketing arrangement. It argues that the restraints enable NCAA football to be marketed as a [\[*1155\]](#) television series and improve its competitive position against other television programming. Essentially, the television plan contains two groups of restraints, those that create an exclusive franchise arrangement [**19](#) with the networks and those that distort the prices paid for the individual games.¹⁰ Under the plan, ABC, CBS, and Turner share the exclusive right to broadcast NCAA football. The grant of exclusivity restricts the buyers to whom schools may sell and prevents other broadcasters from purchasing broadcast rights. In connection with the exclusive rights the NCAA established a price -- the minimum aggregate compensation fee. Both the grant of exclusivity and the setting of the minimum aggregate compensation price appear anticompetitive: exclusivity creates the risk of foreclosure of competition and price setting implicates monopoly power.¹¹

[**20](#) The NCAA attempted to prove that the exclusive franchise restraints were necessary to penetrate the network programming market.¹² [**21](#) The NCAA asserts that the restraints permit college football to be promoted as a series, like "Dallas" or "M*A*S*H," in competition with other television programming. In essence, the NCAA is arguing that the plan restrains intrabrand competition (competition among football games) in order to stimulate interbrand competition (competition between NCAA football and other entertainment programming).¹³ Stimulating interbrand competition at the expense of intrabrand competition is potentially procompetitive. [Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 51-57, 53 L. Ed. 2d 568, 97 S. Ct. 2549 \(1977\)](#). It can result in a more vigorous marketing of the product, facilitating market penetration and increasing market share. Because the marketing

⁹ The trial court's findings suggest that it placed the burden of proving the effectiveness and necessity of these restraints upon the NCAA. We believe that is the proper placement of the burden when considering whether to apply per se or rule of reason analysis to admitted price restraints that the defendant attempts to justify as properly ancillary to a legitimate integration.

¹⁰ The price-distorting restraints, articles 10 and 13 of the television plan, relate to fostering athletic balance and enhancing live viewership -- arguments rejected above.

¹¹ The establishment of a minimum aggregate compensation is a necessary incident to the conferral of exclusive rights: it prevents the networks from abusing their position vis-a-vis the individual schools. Therefore, in cases in which the granting of an exclusive right is appropriate, the setting of a price for that exclusive right may also be appropriate.

¹² The evidence consists largely of the testimony of Paul Klein. Klein testified that football would constitute viable network programming only if the network and advertising sponsors were granted exclusivity. That is, the networks would be unable to attract advertising sponsors if football programming competed head-to-head with other football programming. According to Klein, the plan's effect of permitting schools to sell only to ABC, CBS, and Turner is essential to the joint marketing arrangement.

¹³ This argument assumes that NCAA football may be viewed as a single brand, a product of the joint venture rather than of the individual schools, and that football is in the same product market as other television programming. Upon the facial examination appropriate in the per se context these assumptions appear unlikely to be true.

integration could increase interbrand competition, the NCAA argues that the integration and its accompanying restraints should be assessed under the rule of reason.

Whether stimulating interbrand competition by restraining intrabrand competition is procompetitive depends in part on the nature of the interbrand product market. *Continental T.V., Inc. v. GTE Sylvania Inc.*, 433 U.S. at 52 n. 19; ABA Section of **Antitrust Law**, *Vertical Restrictions Limiting Intrabrand Competition* 60-71 (Monograph No. 2, 1977). Therefore, it is difficult to assess the validity of the NCAA's argument without getting into the "enormous complexities of market definition that the per se rule seeks to avoid." R. Bork, *The Antitrust Paradox* 269. *Broadcast Music* makes clear that in assessing the facial validity of an integration, courts are not to engage in rule of reason analysis. *441 U.S. at 19 n. 33*. Yet we need not fully explore [**22] the plan's effect on the interbrand market because we conclude that the marketing integration itself is so fraught with anticompetitive potential that it must be considered invalid per se.¹⁴ A comparison [*1156] of the integration in *Broadcast Music* with the integrated marketing scheme in the instant case highlights the anticompetitive risks that inhere in the television plan and network contracts.

As did the performing rights societies in *Broadcast Music*, the NCAA offers a product -- exclusive broadcast rights to all NCAA games -- that is different from that which the individual schools could offer. However, unlike the blanket license at issue in *Broadcast Music*, the new [**23] and different product in this case comes at the expense of the product that would otherwise be offered by the schools. In *Broadcast Music*, the copyright holders retained the right to negotiate individual contracts: they could sell outside the blanket licensing arrangement. Under the television plan at issue here schools are not permitted to sell outside the network contracts. Not only does this restraint inhibit the freedom of the individual schools, it also poses a greater risk of cartelization than was present in *Broadcast Music*. There, the right of the copyright holders to sell outside the blanket licensing arrangement ensured the presence of potential competition to inhibit the exercise of market power by the performing rights societies. Here, every producer of commercially salable intercollegiate football is bound to sell through the television plan only. There is no potential competition from producers of intercollegiate football. Furthermore, the contracts restrict the total number of games to be broadcast; the district court found that more games would be shown in the absence of the controls. The television plan also poses vertical anticompetitive risks that [**24] were not present in *Broadcast Music*. The rights to NCAA football are sold on an exclusive basis whereas an unlimited number of blanket licenses were offered for sale in *Broadcast Music*. Unless there exist readily available substitutes for NCAA football, then, the television plan creates substantial vertical foreclosure. Moreover, because the football rights are sold only as a package, those broadcasters that are unable to bid for the entire package are permanently foreclosed from the market. The television plan and network contracts pose substantially greater anticompetitive risks than were present in *Broadcast Music*.

C

In summary, the plan on its face suppresses product diversity and restricts output. It poses substantially greater risks of cartelization and vertical foreclosure than were present in *Broadcast Music*. The price distorting restraints are broader than necessary to promote the efficiencies of the integration. And while the ancillarity of the exclusive franchise restraints cannot be fully assessed without a rule of reason inquiry, the plan contemplates an impermissible integration: a combination of virtually all the producers, actual or potential, [**25] of a differentiated product -- commercially salable intercollegiate football. In these circumstances we conclude that the television plan is one "that would always or almost always tend to restrict competition and decrease output." *441 U.S. at 19-20*. We affirm the district court's ruling that the television plan constitutes per se illegal price fixing.¹⁵

¹⁴ This conclusion, of course, obviates the necessity of examining whether the plan's restraints enhance the effectiveness of the marketing integration or are no broader than necessary for that purpose. When an integration is itself impermissible, the restraints justified as accompanying it are likewise impermissible.

¹⁵ To the extent that the procompetitive justifications offered by the NCAA do not relate to an integration, but are offered to show the generally procompetitive nature of the television plan, they are foreclosed by *Maricopa County*.

[**26] [*1157] III

Although we have upheld the trial court's judgment that the NCAA's television plan and the network contracts are illegal per se, we consider them under rule of reason analysis. We do so because given the state of the record and the prospect of review by the Supreme Court, scrutinizing the plan and contracts under the rule of reason promotes litigation efficiency. The trial court held that the plan failed under rule of reason analysis, and we affirm that conclusion.

In assessing the television plan under the rule of reason, the district court applied the test formulated in *Standard Oil Co. of New Jersey v. United States*, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911), which prohibits contracts that are "unreasonably restrictive of competitive conditions." *Id. at 58*. "Unreasonableness under [the Standard Oil] test could be based either (1) on the nature or character of the contracts, or (2) on surrounding circumstances giving rise to the inference or presumption that they were intended to restrain trade and enhance prices." *National Society of Professional Engineers v. United States*, 435 U.S. 679, 690, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978) [**27] (footnote omitted). **HN5**[↑] Determining whether arrangements are by their nature or character unreasonable requires assessment of the restraints in the context of the market in which they operate.

The court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint, and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts.

[Chicago Board of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 \(1918\).](#)

The television plan has a substantial impact on the structural characteristics of competition for the sale and purchase of intercollegiate football television rights. First, NCAA members are permitted to sell the broadcast rights to their games in accordance with the television plan only. There is only one vendor of intercollegiate football broadcast rights in the market; therefore, there exists no price competition among the schools for the sale of broadcast rights. Second, the [**28] broadcast rights are sold to three buyers: ABC, CBS, and Turner share the rights to broadcast NCAA football games. The rules set out in article 10 of the television plan restrict price competition among these buyers with regard to the rights to individual games. The plan therefore increases concentration in the marketplace in which broadcast rights to intercollegiate football are bought and sold: the market is composed of one seller and three buyers. There is no price competition among schools or among the buyers once contracts have been awarded. Furthermore, because the broadcast rights are sold only as a package, if a broadcaster does not have the financial ability to bid for the entire package or does not want the entire package, it cannot purchase football rights except within the narrow constraints of the exception telecast. Therefore, the number of broadcasters that can seek to become buyers of NCAA football broadcast rights is limited. This creates a potential for vertical foreclosure because only certain broadcasters have the resources necessary to become buyers of NCAA football rights.

The television plan has broader market implications than merely limiting the number [**29] of buyers and sellers of televised NCAA football. The plan presents market-wise anticompetitive risks of both a horizontal and a vertical nature. The horizontal risk is cartelization, with its accompanying supracompetitive pricing. Because the injuries

"The respondents' principal argument is that the *per se* rule is inapplicable because their agreements are alleged to have procompetitive justifications. The argument indicates a misunderstanding of the *per se* concept. The anticompetitive potential inherent in all price fixing agreements justifies their facial invalidation even if procompetitive justifications are offered for some. Those claims of enhanced competition are so unlikely to prove significant in any particular case that we adhere to the rule of law that is justified in its general application."

[457 U.S. at 351, 102 S. Ct. at 2477, 50 U.S.L.W. at 4692](#) (footnote omitted).

that inhere in cartelization are incurred only if the NCAA possesses market power, whereas the asserted marketing efficiencies of the television plan are achievable in the absence of such power, scrutiny of the cartelization risk requires assessment of market power. The vertical anticompetitive risk is that potential buyers are foreclosed from purchasing a product for which no satisfactory substitute exists. Assessing [*1158] this risk requires an analysis of readily interchangeable substitutes, an inquiry subsumed by an analysis of market power. Therefore, gauging the television plan's net effect on competition requires an assessment of market power.

HN6 [↑] Market power is the power to control prices or exclude competition. *United States v. E. I. du Pont de Nemours & Co.*, 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). Whether market power exists or can be exercised in the relevant geographic market depends upon [**30] the existence of competing products to which a purchaser can turn when faced with relative price increases. Whether product competition exists is determined by two factors:

- (a) The reasonable interchangeability of use to which two or more products can be put. This factor, in turn, is satisfied when two or more products (i) have essentially similar physical characteristics, or (ii) can be put to use for the same purpose.
- (b) The cross-elasticity of demand, i.e., the extent to which consumer preference shifts freely between two or more products.

2 J. Von Kalinowski, *Antitrust Laws and Trade Regulation* § 6G.04[1] (1982) (emphasis omitted). The "market is composed of products that have reasonable interchangeability for the purposes for which they are produced -- price, use and qualities considered." *United States v. E.I. du Pont de Nemours & Co.*, 351 U.S. at 404. Accord *United States v. Grinnell Corp.*, 384 U.S. 563, 571, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966). We look, then, to the ready availability of substitutable products.

The district court concluded that NCAA football constitutes a unique type of Saturday afternoon programming. This conclusion [**31] has adequate evidentiary support in the record. In terms of audience share NCAA football dominates Saturday afternoon programming. Furthermore, the cost per viewer for advertising time during NCAA football telecasts is more than 2 1/2 times greater than the average per viewer cost for other programming. This presumably is caused by the unique demographic makeup of the viewers of NCAA football -- persons in middle to upper income brackets and college graduates. The characteristics of the programming most often scheduled opposite NCAA football -- comedies, cartoons, and old movies -- support the inference that NCAA football is unique in its time slot. Testimony at trial indicated that such programming does not appeal to the same audience; it does not seem to be readily interchangeable for NCAA football. Even professional baseball, which is broadcast opposite NCAA football during September, apparently is not readily interchangeable. The evidence showed that the cost per 1000 households for baseball advertising was \$3.04, compared with \$5.35 for NCAA football. In 1980, a 30-second advertising spot on NCAA football cost \$47,900, compared with \$17,100 for baseball. The demographics [**32] also vary significantly: the NCAA's share of households having income greater than \$15,000 was twice baseball's share of these households. Professional football, which is perhaps the most logical substitute for NCAA football, is effectively precluded by the terms of its limited antitrust exemption from being broadcast on Saturday afternoon during the NCAA football season. See *15 U.S.C. §§ 1291, 1293, 1294*. Another indication that NCAA football is a unique form of Saturday programming is that when ABC had the exclusive right to televise, CBS "went dark" rather than compete against NCAA football -- CBS offered no network programming but instead left its affiliated stations to fend for themselves. The record supports the trial court's conclusion that, considering price, use, and quality, NCAA football is a product for which there are no readily available substitutes.

It is true, as the NCAA argues, that the networks' willingness to pay supracompetitive prices is limited by their ability to recover the payments from advertisers. This does not arrest the inference that the NCAA has market power, however. Even if advertisers are willing, in the face of [*1159] relative price [**33] increases, to substitute across different days of the week or across different programming, the networks cannot freely do so; they need programming to offer on Saturday afternoon. Furthermore, even if at current price levels both the networks and the

advertisers consider other programming to be readily substitutable for NCAA football, the conclusion that the NCAA has market power is not foreclosed. The NCAA may already be pricing at supracompetitive levels and extracting supracompetitive profits, thereby making otherwise nonsubstitutable products attractive because prices are artificially high. See *L. Sullivan, Handbook of the Law of Antitrust* § 16, at 56-57.

To inquire into market power in rule of reason cases is not to invoke a [section 2](#) monopolization inquiry. In monopolization cases the court searches for the degree of market power possessed by a firm with an extremely large market share. See 2 E. Kintner, *Federal Antitrust Law* § 12.6, at 352, 356-57 (1980) (collecting cases and noting that market share must approach 80% of the relevant market). Under the rule of reason, a more modest degree of power is sufficient. Therefore, any concern that the market definition [\[**34\]](#) may overstate power may be assuaged by attributing less significance to the market share possessed. *L. Sullivan, Handbook of the Law of Antitrust* § 17, at 61. The district court found that the NCAA controlled virtually 100% of the relevant market, televised college football. See [546 F. Supp. at 1319-23](#). Even assuming that the market definition is too narrow, the NCAA's total control over televised intercollegiate football, when combined with NCAA football's apparent uniqueness from the perspective of broadcasters, supports the inference that the NCAA possesses some degree of market power.¹⁶ Because the NCAA possesses market power the risks of cartelization and price enhancement are imminent. Also, because there exist no readily available substitutes for NCAA football the television plan creates substantial vertical foreclosure. Both these results are anticompetitive.

[\[**35\]](#) Non-economic Justifications

The NCAA seeks to justify the restraints contained in the plan by asserting that they promote athletically balanced competition among the schools and that they are necessary to penetrate the network programming market. As noted above, these assertions do not overcome the anticompetitive effects of the restraints. The trial court found that the disparity in revenues between schools can be reduced by means that do not threaten to cartelize the market or to restrict the number of buyers and sellers of NCAA football. A properly drawn system of pass-over payments to ensure adequate athletic funding for schools that do not earn substantial television revenues is one possibility. See [White Motor Co. v. United States, 372 U.S. 253, 270-71, 9 L. Ed. 2d 738, 83 S. Ct. 696 \(1963\)](#) (Brennan, J., concurring); [Ohio-Sealy Mattress Manufacturing Co. v. Sealy, Inc., 585 F.2d 821, 828-29 \(7th Cir. 1978\)](#), cert. denied, 440 U.S. 930, 59 L. Ed. 2d 486, 99 S. Ct. 1267 (1979); [United States v. Topco Associates, Inc., 1973-1 TRADE CASES \(CCH\) P74,391](#), modified, [1973-1 TRADE CASES \(CCH\) P74,485](#) (N.D. Ill.), aff'd mem., 414 U.S. 801, 94 S. Ct. 116, [\[**36\]](#) 38 L. Ed. 2d 39 (1973); ABA Section of *Antitrust Law*, *Vertical Restrictions Limiting Intrabrand Competition* 20-25 & n. 63 (Monograph No. 2, 1977). Furthermore, the district court found that without the restraints imposed by the television plan more games would be shown at the local level. [546 F. Supp. at 1307](#). This would have the effect of equalizing revenues. To whatever extent the television plan reduces the disparity of revenues devoted to football and [\[*1160\]](#) other athletic programs, the same result can be accomplished by means that do not violate the antitrust laws.

The television plan's contribution to penetrating the network programming market does not save the plan under the rule of reason. The district court concluded that there exist no readily available substitutes for NCAA football. This being the case, there is no interbrand competition in the network programming market to prevent the NCAA from extracting supracompetitive prices. Consequently, the removal of intrabrand competition among the schools totally eliminates price competition from the market. Finally, we note that the plan's restrictions affect NCAA Division I-A universities almost exclusively [\[**37\]](#) since they are the ones whose games might be commercially salable. Fewer than 100 schools fall within Division I-A; of these, 61 are members of the College Football Association, which has strongly manifested its displeasure with the television plan. See [546 F. Supp. at 1324-25](#). The district court

¹⁶ The NCAA makes no separate argument urging reversal of the trial court's monopolization holding under [section 2](#) of the Sherman Act. It notes the court's conclusion that the relevant market was the sale of rights to televise live college football games, in which the NCAA "obviously has the dominant share." Appellant's Brief at 10. The NCAA refers to its market definition argument, contending only that it does not possess market power and not that such power if possessed was lawfully obtained. Because of this and our disposition of the [section 1](#) issues, we do not consider the monopolization claim. A reversal of the court's [section 2](#) ruling would not affect the scope of relief granted.

concluded on adequate evidence that the 61 schools' ultimate decision to submit to the restraints in the television plan was the product of fear of NCAA sanctions, in football and other sports. *Id.* It is apparent that the schools whose games are used to penetrate the network programming market are not pleased with the cost at which this penetration is achieved. Rather, the district court concluded that the NCAA used its dominance in the regulation of intercollegiate athletics to obtain control of broadcast rights to intercollegiate football. In these circumstances we are not particularly disposed to consider the plan's impact on competition within the larger network programming market to be redeeming procompetitive.

We affirm the district court's conclusion that the television plan is unreasonably restrictive of competitive conditions and therefore unlawful. It increases concentration **[**38]** in the marketplace; it prevents producers from exercising independent pricing and output decisions; it precludes broadcasters from purchasing a product for which there are no readily available substitutes; it facilitates cartelization. Against this array of antitrust injuries the NCAA's justifications are insufficient.

IV

We agree with the NCAA that the trial court erred in holding that the television plan and network contracts constitute a group boycott illegal per se under [section 1](#) of the Sherman Act. The court reasoned:

NCAA members have agreed not to sell their product -- football games -- to certain buyers. Every broadcast and cable network in the country, other than ABC, CBS and TBS, are being boycotted. Further, those local broadcasters which are not affiliated with ABC or CBS are allowed to buy football games only in very limited circumstances.

[546 F. Supp. at 1312](#). However, the NCAA television plan and contracts lack a necessary predicate to the existence of an illegal boycott. "The crucial element is an effort [by one competitor] to exclude or cause disadvantage to one or more [of its] competitors by cutting them off from trade relationships **[**39]** which are necessary to any firm trying to compete." L. Sullivan, *Handbook of the Law of Antitrust* § 91, at 260. See also *id.* § 83. The television plan and contracts do not constitute an attempt by NCAA members to shield themselves from competition offered by broadcasters: broadcasters are not in competition with NCAA members. The market relationship between the NCAA and the television industry is vertical. There is no contention here that the successful broadcasters have conspired with the NCAA to seek the exclusive arrangements in order to freeze out their competitors. The exclusivity features were used by the NCAA to extract the highest possible prices from the networks. The opportunity to purchase the rights to the NCAA football package was offered to all broadcasters. That certain networks were unsuccessful bidders, or did not bid at all, does not turn the contracts into boycotts.¹⁷ **[*1161]** Given the vertical market relationship between the NCAA and the broadcasters and the open opportunity to bid for the package, on its face the television plan does not constitute an attempt by competitors at one level to foreclose competition by traders at the same level. **[**40]**

The cases cited by the district court do not compel a different conclusion. In [Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 \(1959\)](#), a retailer induced wholesalers and manufacturers to refuse to supply its competitor. In [Fashion Originators' Guild of America, Inc. v. Federal Trade Commission, 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703 \(1941\)](#), clothing manufacturers organized a boycott of retailers who dealt in the clothing of competing manufacturers. In [Radiant Burners, Inc. v. Peoples Gas Light & Coke Co., 364 U.S. 656, 5 L. Ed. 2d 358, 81 S. Ct. 365 \(1961\)](#), manufacturers of gas heaters coerced an adverse "seal of approval" decision with **[**41]** regard to the product of a competitor. Each of these cases reflects conduct by one firm inducing concerted action to deprive competing firms of necessary trade relationships, a characteristic absent here. We conclude that the NCAA's practices do not constitute a boycott of the networks not awarded broadcast rights.

¹⁷ Because the rights were sold as a package only, broadcasters who lacked the financial resources necessary to purchase the package were foreclosed from bidding. We need not decide whether this constitutes an unlawful restraint under other antitrust theories; it does not implicate the per se rule against boycotts.

The district court also held that by threatening to sanction schools that violated the television plan, the NCAA threatened a per se illegal boycott of those schools. [546 F. Supp. at 1295](#). Again we disagree. [HN7](#)[¹] In the context of associational activities, the existence of an expulsion sanction does not by itself constitute a boycott. Unless resort to the expulsion sanction constitutes a naked attempt to exclude competition, the antitrust implications of an expulsion sanction turn on the competitive reasonableness of the rule being enforced. 2 J. Von Kalinowski, *Antitrust Laws and Trade Regulation* § 61.02; L. Sullivan, *Handbook of the Law of Antitrust* § 88, at 247-48. Cf. [United States v. Realty Multi-List, Inc., 629 F.2d 1351, 1374-85 \(5th Cir. 1980\)](#) (multiple listing service membership rules assessed for competitive reasonableness even though the rules effectively [**42] excluded certain realtors from membership); *Florists' Nationwide Telephone Delivery Network -- America's Phone-Order Florists, Inc. v. Florist's Telegraph Delivery Association*, [371 F.2d 263, 267-69 \(7th Cir. 1967\)](#) (membership rules that caused members of defendant association to cease dealing with plaintiff scrutinized for competitive reasonableness). [HN8](#)[¹] An association's rule or practice can in certain circumstances be considered facially unreasonable, see *Fashion Originators' Guild; Radiant Burners; Associated Press v. United States*, [326 U.S. 1, 89 L. Ed. 2013, 65 S. Ct. 1416 \(1945\)](#), and thus can be summarily invalidated as an illegal boycott. However, when, as here, the reasonableness of the practice cannot be assessed summarily, it is improper to affix the label "boycott" and end all inquiry unless the proffered rule-enforcement justification appears to be merely a sham for some anticompetitive purpose. See [North American Soccer League v. National Football League, \[670 F.2d 1249, 1258-59 \\(2d Cir.\\), cert. denied, 459 U.S. 1074, 103 S. Ct. 499, 74 L. Ed. 2d 639, 51 U.S.L.W. 3442 \\(1982\\)\]\(#\); \[United States Trotting Association v. Chicago Downs Association, Inc.\]\(#\), \[665 F.2d 1**431 781, 787-90 \\(7th Cir. 1981\\)\]\(#\) \(en banc\); \[Smith v. Pro Football, Inc.\]\(#\), \[593 F.2d 1173, 1177-82 \\(D.C. Cir. 1978\\)\]\(#\); 2 J. Von Kalinowski, *Antitrust Law and Trade Regulation* §§ 60.03\(4\), 61.02, 61.07\[2\]. The NCAA's expulsion sanction appears to be an enforcement mechanism and not a sham for an anticompetitive purpose. We have affirmed the trial court's ruling that the NCAA's television plan is illegal; hence, we need not assess the competitive reasonableness of the expulsion sanction in the context of the plan.](#)

V

The NCAA contends that the injunction granted by the trial court should be modified [*1162] because it is too vague and too broad. The plaintiffs agree that standing alone the injunction is lacking in specificity and is overly broad, but argue that read in light of the violations found by the district court the injunction is proper. The NCAA specifically challenges paragraphs one, three, and four:

(1) The right to telecast college football games is the property of the institutions participating in the games, and that right may be sold or assigned by those institutions to any entity at their discretion;
; * * *

(3) National Collegiate Athletic Association, [**44] its officers, agents and employees, shall be and hereby are enjoined from enforcing or attempting to enforce the provisions of the contracts above described and from making any other contract of similar kind or nature in the future;

(4) National Collegiate Athletic Association, its officers, agents or employees, shall be and hereby are enjoined from prohibiting member institutions from selling or assigning their rights to telecast the college football games in which they participate, and from requiring as a condition of membership that those institutions grant to National Collegiate Athletic Association the power to control those institutions' rights to telecast college football games.

The NCAA argues that the phrase in paragraph three, "other contract of similar kind or nature in the future," is vague and could be read to prohibit the NCAA from arranging for the broadcast of championship tournaments in Divisions I-AA, II, and III. It also argues that paragraph three can be construed to bar arrangements that it contends are lawful, such as a membership-wide contract with opt-out and pass-over payment provisions, or blackout rules. Finally, the NCAA contends that paragraph [**45] four could be read to prevent the NCAA from imposing sanctions for violations of non-television regulations and to prevent it from reserving Friday night for high school football only.

We hold that the NCAA should present its concerns regarding these paragraphs to the district court. Nevertheless, we comment on some of the arguments as an aid to the district court on remand. Paragraph four might be construed to prevent the NCAA from imposing television sanctions on schools that violate regulations unrelated to

the television plan.¹⁸ Paragraph four might also be read to preclude the NCAA from prohibiting games on Friday night. Neither of these effects is warranted by the violations found. Furthermore, paragraphs one and four appear to vest exclusive control of television rights in the individual schools. While we hold that the NCAA cannot lawfully maintain exclusive control of the rights, how far such rights may be commonly regulated involves speculation that should not be made on the record of the instant case. The NCAA's arguments regarding the specificity and self-sufficiency of the injunction should also be addressed by the district court.

[**46] We remand to permit the district court to consider its injunction in light of the views expressed in this opinion. In all other respects consistent herewith the judgment of the district court is affirmed.

Dissent by: BARRETT

Dissent

BARRETT, Cir. J., dissenting:

I would reverse the judgment of the district court, quash the injunction and hold that the NCAA television regulations and contracts are valid and lawful. It is my view that the district court's findings, affirmed by the majority opinion, that the NCAA television contracts, and its adjunct rules, constitute *per se* price fixing violations under [15 U.S.C. § 1 \(1976\)](#) and monopolization violations under [15 U.S.C. § 2 \(1976\)](#) are clearly erroneous. I am convinced that although there is evidence to support the trial court findings, my review of the entire evidence leads me to a firm conviction that a mistake has been committed. [United States v. United States Gypsum \[*1163\] Co., 333 U.S. 364, 68 S. Ct. 525, 92 L. Ed. 746 \(1948\)](#).

I.

In concluding that the NCAA television contracts constitute *per se* price fixing violations, the district court found, *inter alia*: (a) that although it is true that membership in [**47] the NCAA is voluntary in the sense that a member institution may withdraw from the NCAA at any time, still, as a practical matter, membership in the NCAA is a prerequisite for institutions wishing to sponsor a major, well-rounded athletic program; (b) NCAA membership is not voluntary for Oklahoma and Georgia, or for many other member institutions for which athletic excellence is an institutional priority; (c) college football is a business, operated by professionals and, like any business, the schools participate in intercollegiate football to maximize revenue and minimize expense "while at the same time maintaining the level of quality which makes their product attractive to the buying public"; and (D) even though Oklahoma and Georgia properly challenge the NCAA television contracts as violative of the antitrust laws causing them injury, still they "believe that NCAA has an important role in regulating such matters as the rules of play, standards of amateurism and academic eligibility."

In concluding that college football is a business operated by professionals to maximize revenue and minimize expense, the district court specifically found:

Oklahoma's intercollegiate football [**48] program has, over the years, produced many outstanding and highly-ranked teams. Oklahoma is capable of attracting large national television audiences for its televised games. Football is the only sport sponsored by Oklahoma which actually generates revenue beyond the costs of fielding a team. The profits generated by the football team support all of the other sixteen men's and women's sports in which Oklahoma participates. In recent years, these programs have become more and more expensive to maintain due to increasing costs and the expansion of athletic programs for women. As a result, Oklahoma seeks to maximize its revenues from football television. Like Oklahoma, Georgia has compiled a record of outstanding success with its intercollegiate football program, and football is the major revenue

¹⁸ The athletic director of the University of Southern California has stated that paragraph four has this effect. See Sports Illustrated, Sept. 27, 1982, at 9, 12.

producing sport for Georgia. Budgetary pressures have forced cuts in Georgia's athletic program, including the elimination of its intercollegiate wrestling program. Georgia also seeks to maximize the revenues generated from the televising of its football games.

Board of Regents v. NCAA, 546 F. Supp. 1276, 1282 (W.D. Okla. 1982).

These findings do not address the purposes [**49] and objectives of the NCAA, i.e., preserving a competitive balance in intercollegiate athletics, insuring the amateurism of college athletics and avoiding the aura of professional sports. It is my view, as set forth more fully hereinafter, that the NCAA television plan's primary purpose is not anti-competitive. Rather, it is designed to further the purposes and objectives of the NCAA, which are to maintain intercollegiate football as an amateur sport and an adjunct of the academic endeavors of the institutions. One of the key purposes is to insure that the student athlete is fully integrated into academic endeavors. These are the "redeeming virtues" which did not impress the trial court or the majority. They are so compelling, in my opinion, that under the "rule of reason" analysis the public interest and that of the parties is served by sustaining the restraint as reasonable.

II.

The NCAA is an unincorporated, nonprofit, educational association with some 883 active members, consisting of private and public colleges and universities in the United States. The NCAA was formed in 1906 to regulate and supervise college athletics throughout the United States, and is dedicated [**50] to preserving amateurism in athletic activities among its member institutions, with the goal of maintaining those activities on an ethical plane in keeping [*1164] with the dignity and high purpose of education. Thus, its goals are an integral part of the academic scheme. Of the approximate 883 members, participation in intercollegiate athletics involves about 271 members in Division I, 188 members in Division II and 281 members in Division III. Approximately 143 member institutions do not engage in intercollegiate athletics.

All divisions are subject to NCAA rules governing academic standards in intercollegiate athletics in keeping with the fundamental policy of the NCAA to maintain intercollegiate athletics "as an integral part of the educational program and the athlete as an integral part of the student body." Student-athletes must meet various academic standards in order to become and remain eligible for participation in NCAA sanctioned athletic events. These requirements are designed to insure that those who engage in college athletics are genuine students. One of the recent bylaws requires proof that the student-athlete makes proper progress toward a degree within [**51] prescribed terms to remain eligible for competition. Obviously, the success of the NCAA goal is in large measure dependent upon the good-faith approach to compliance by the member institutions.

In addition to a variety of rules designed to insure adequate academic achievement by student athletes, the NCAA has complex and detailed rules and regulations dealing with recruiting, financial aid or benefits (intended to foster participation in intercollegiate sports by genuine amateurs in the sense that the student-athlete is primarily dedicated to academic goals), and limitations on the coaching staffs. These goals are in large measure accomplished by a strong, vigilant investigative area of the NCAA dedicated to insuring that its member institutions abide the various rules, standards and bylaws designed to maintain the competitive amateur status of intercollegiate football within the academic framework. The complexity of the NCAA bylaws, rules and interpretations evidence the association's effort to maintain and protect academic standards applicable to amateur student athletes.

The NCAA's committee on infractions is responsible for enforcement of the NCAA program. It receives complaints, [**52] and in reliance on its investigative staff, determines facts and violations, and fixes penalties. Charles Alan Wright, Chairman of the Infractions Committee, testified that the work of this committee is dedicated to the NCAA policy of maintaining intercollegiate athletics as an integral part of the educational program, with the athlete an integral part of the student body, thus retaining a clear line of demarcation between college athletics and

professional sports. The district court gave no credence or recognition to this testimony or similar testimony of other witnesses.

III.

There are relatively few federal court decisions speaking to the issue of amateur athletics' inclusion under the federal antitrust laws. However, *professional* basketball, golf and hockey have been consistently held to be within the meaning of the Sherman Act. See Annot., 18 A.L.R. Fed. 489 (1974) (citing federal court decisions applying federal antitrust laws exclusively to the "business of professional sports.")

In *Hennessey v. NCAA*, 564 F.2d 1136 (5th Cir. 1977), the court was presented with a challenge to the NCAA bylaws limiting the number of assistant football coaches that a member [**53] institution could employ. The contention was made that the court was without jurisdiction because there had not been demonstrated sufficient impact on interstate commerce by virtue of the rule to bring the case within § 1 of the Sherman Act. The court held otherwise on this issue but upheld the NCAA bylaws there challenged and pertinently observed:

A goal of the NCAA, one which is endowed with certain benefits to society, is to "retain a clear line of demarcation between college athletics and professional sports." Colleges with more successful programs, both competitively and economically, were seen as taking advantage of their success by expanding their programs, [*1165] to the ultimate detriment of the whole system of intercollegiate athletics. Financial pressures upon many members, not merely to "catch up", but to "keep up", were beginning to threaten both the competitive, and the amateur, nature of the programs, leading quite possibly to abandonment by many. "Minor" and "minority" sports were viewed as imperiled by concentration upon the "money makers", such as varsity football and basketball.

[The NCAA regulation in question] was, with other rules adopted [**54] at the same time, intended to be an "economy measure". In this sense it was both in design and effect one having commercial impact. But the fundamental objective in mind was to preserve and foster competition in intercollegiate athletics -- by curtailing, as it were, potentially monopolistic practices by the more powerful -- and to reorient the programs into their traditional role as amateur sports operating as part of the educational processes.

Id. at 1153.

I believe that the trial court disregarded the purposes and objectives of the NCAA set forth in *Hennessey, supra*. Instead of recognizing the NCAA goal of fostering balanced amateur competition among the respective division colleges and universities, the trial court viewed intercollegiate football competition not only as a business, but as a "pot of gold" business for those colleges and universities which have consistently recruited top athletes in keeping with their institutional priority of attaining athletic excellence. I believe that Oklahoma, Georgia and other college football powers which desire to be free from the provisions of the NCAA television rules and bylaws, and assert their "right" to contract [**55] independently for television dollars, in truth and effect insist on the best of two worlds. While solemnly proclaiming their allegiance to all other NCAA rules and regulations pertaining to intercollegiate football, they insist on invalidating the NCAA television contracts and the provisos relative to distribution of the receipts therefrom, based on the additional monetary rewards that their excellent football programs command in national television. I firmly believe that to the extent that the NCAA's television restraints upon Oklahoma and Georgia and other member institutions with excellent football programs are anticompetitive, these restraints are fully justified under the rule of reason in that they are necessary to maintain intercollegiate football as amateur competition.

IV.

In *Chicago Board of Trade v. United States*, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918), the Supreme Court succinctly stated the rule of reason to be: "The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy

competition." It is my view that the district court [**56] failed to adequately focus on the procompetitive features of the NCAA television plan-contracts when considered in light of the entire NCAA design and purpose, the central objective of which is to maintain intercollegiate athletics on an amateur competitive basis.

In *Broadcast Music, Inc. v. CBS, Inc., 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*, the basic question before the Court was whether the issuance of blanket licenses to copyrighted musical compositions at fees negotiated by American Society of Composers, Authors and Publishers (ASCAP) and Broadcast Music, Inc. (BMI) constituted a *per se* price fixing in violation of the antitrust laws. The district court dismissed the CBS complaint, concluding that the blanket license was not price fixing and a *per se* violation of the Sherman Act. The court of appeals reversed, holding that the blanket license issued to television networks was a form of price fixing illegal *per se* and also copyright misuse. The Supreme Court reversed the court of appeals and remanded for further proceedings under the "rule of reason". Mr. Justice White delivered the opinion for the Court. Mr. Justice Stevens was the sole dissenter. [**57] The majority pertinently observed:

[*1166] In construing and applying the Sherman Act's ban against contracts, conspiracies, and combinations in restraint of trade, the Court has held that certain agreements or practices are so "plainly anticompetitive", *National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*, and so often "lack . . . any redeeming virtue", *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*, that they are conclusively presumed illegal without further examination under the rule of reason generally applied in Sherman Act cases. This *per se* rule is a valid and useful tool of antitrust policy and enforcement. And agreements among competitors to fix prices on their individual goods or services are among those concerted activities that the Court has held to be within the *per se* category. But easy labels do not always supply ready answers.

To the Court of Appeals and CBS, the blanket license involves "price fixing" in the literal sense: [**58] the composers and publishing houses have joined together into an organization that sets its price for the blanket license it sells. But this is not a question simply of determining whether two or more potential competitors have literally "fixed" a "price". . . . The . . . literal approach does not alone establish that this particular practice is one of those types or that it is "plainly anticompetitive" and very likely without "redeeming value". . . .

Consequently, as we recognized in *United States v. Topco Associates, Inc., 405 U.S. 596, 607-608, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*, "it is only after considerable experience with certain business relationships that courts classify them as *per se* violations. . . ." See *White Motor Co. v. United States, 372 U.S. 253, 263, 9 L. Ed. 2d 738, 83 S. Ct. 696 (1963)*. We have never examined a practice like this one before. . . .

* * *

More generally, in characterizing this conduct under the *per se* rule, our inquiry must focus on whether the effect and, here because it tends to show effect, see *United States v. United States Gypsum Co., 438 U.S. 422, 436 n.13, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*, the purpose [**59] of the practice are to threaten the proper operation of our predominantly free-market economy -- that is, whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output and in what portion of the market, or instead one designed to "increase economic efficiency and render markets more, rather than less, competitive." *Id., at 441 n.16*; see *National Society of Professional Engineers v. United States, 435 U.S., at 688; Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S., at 50 n. 16, Northern Pac. R. Co. v. United States, 356 U.S., at 4*.

Broadcast Music, Inc., supra 441 U.S. at 7-10, 19-20. (Footnotes omitted, emphasis supplied).

I recognize that if the rule of reason does not apply to the instant case, the NCAA television contracts may, by virtue of *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*, constitute *per se* illegal price fixing. This would result because the "maximum" sum is "fixed" by virtue of the contracts which

are binding on the NCAA member schools. *Maricopa* holds that the *per se* rule applies when there exists [**60] "a price restraint that tends to provide the same economic rewards to all practitioners [colleges] regardless of their skill, their experience, their training, or their willingness to employ innovative and difficult procedures in individual cases." *Id. at 2475*. *Per se* violations of § 1 of the Sherman Act are agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore [*1167] illegal. *White Motor Co. v. United States*, 372 U.S. 253, 9 L. Ed. 2d 738, 83 S. Ct. 696 (1963); *Northern Pacific Railway Co. v. United States*, 356 U.S. 1, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958).

My research indicates that all of the reported cases wherein the *per se* rule has been applied have involved true competitive *business enterprises* operating in the interstate market where the goal is exclusively that of seeking a profit from the product or service offered to the public. See *Broadcast Music, Inc. v. CBS, Inc.*, 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979); *National Society of Professional Engineers v. United States*, 435 U.S. 679, 55 L. Ed. 2d 637, [**61] 98 S. Ct. 1355 (1978); *United States v. Topco Associates, Inc.*, 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972). Restraints on competition or on the course of trade in merchandising products moving in interstate commerce are not violative of the Sherman Act unless the restraint is shown to affect market prices or otherwise deprive purchasers and consumers of the advantages to which they are entitled from free competition in the market place. *Apex Hosiery Co. v. Leader*, 310 U.S. 469, 84 L. Ed. 1311, 60 S. Ct. 982 (1940).

Maricopa, supra, *National Society of Professional Engineers, supra*, and *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975), involved prohibitive price restraints, even though those restraints were enmeshed with overall programs designed to accommodate needs of people who would benefit therefrom. At the core, however, was the fact that in each case the professionally skilled participants were seeking profits from their services. Thus, their activities constituted business enterprises in a pure competitive sense. I do not view the NCAA television contracts as falling in that category, because they are not [**62] designed to render the greatest profit for a *business purpose*.

V.

If the narrow focus in this case be placed, as I believe the trial court placed it, on the competition for television proceeds from contracts that are exclusively entered into by the NCAA and binding on its member schools, and contracts which may be entered into individually by the established intercollegiate football powers, I have little doubt that the total monetary benefits derived by the football powers would far exceed those received by them via the NCAA contracts. On that measure, then, the NCAA television contracts do constitute an anticompetitive restraint when compared with the potential dollars which the major football powers may command in the so-called "open market".

Nevertheless, I conclude that the NCAA restraints are completely defensible under the rule of reason. The restraints upon Oklahoma and Georgia and other colleges and universities with excellent football programs insure that they confine those programs within the principles of amateurism so that intercollegiate athletics supplement, rather than inhibit, academic achievement. As thus measured, the restraint is not unreasonable in [**63] its effect on competition; its procompetitive effect clearly outweighs the anticompetitive effect. See *Continental T.V., Inc. v. GTE Sylvania Inc.*, 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977). Furthermore, there is no showing that the NCAA restraints laid upon Oklahoma and Georgia have injured the consumer public, i.e., those who view intercollegiate athletic events on television. Thus, the "fall back" position taken by the district court -- that antitrust regulation applies when, as here, an association wields exclusive control over television contracts involving the conduct of intercollegiate football -- must fail. The district court erroneously focused on the inhibition placed upon Oklahoma and Georgia and those NCAA member institutions similarly situated who likely could command far greater individual (institution-wise) monetary return for television rights to their football games if permitted to contract independent of the NCAA.

In addition to the amateurism goals promoted by the NCAA, the NCAA's television contract restraints do, on balance, promote competition and enhance viewership at intercollegiate [*1168] football contests. The NCAA television [**64] plan and its television contracts enhance overall viewership when one considers "output" -- as entertainment -- in the sense urged by the NCAA: those who view the games in the stadiums and those who view

the games on television. If viewers are the "consumers", as certainly they must be for antitrust purposes, overall viewership for all games between all participating NCAA members engaging in football, whether Division I, II or III, is increased, rather than reduced by virtue of the NCAA television plan. Critically, live viewership at games is protected by virtue of the plan.

I note that there is a sharp dispute whether NCAA sets or dictates the television "package" with the networks. In *Maricopa, supra*, the Supreme Court applied the *per se* rule to the medical society's practice of setting maximum prices doctor members could claim in full payment for health services provided to policyholders of specified insurance plans. There was no dispute in *Maricopa* that the *maximum* price restraint tends to provide the same economic rewards to all medical practitioners, regardless of their dedication, skill or experience. There is no basis for comparing the medical practitioners [**65] in *Maricopa* with the NCAA member institutions. It is significant that the *Maricopa* majority observed that the "rule of reason" exception set forth in *Continental T.V., Inc., v. GTE Sylvania Inc., supra*, is the preferred method of determining whether a particular practice is in violation of the antitrust laws.

VI.

It is my conclusion that the rule of reason militates in favor of the NCAA. Its television contracts allow for near equal per-game payments to member universities. I agree with NCAA's contention that, in the context of the Association's goals and purposes, this is no more "price fixing" than that involved in a law partnership's division of profits. The NCAA provisions on the division of television proceeds simply allocate those revenues among member institutions. This distribution does not affect television output. It does, however, foster competition among its members in keeping with its goal to assure amateurism in intercollegiate athletics and to maintain the primary status of the athlete as a student.

The NCAA distribution is aimed to assure a minimum of competitive balance on the playing fields. The NCAA is, then, a form of joint venture, and [**66] its television plan and contracts are an integral, all-important aspect of its purposes and goals. As such, the television contracts do not have the "pernicious effect on competition and lack of any redeeming virtue" stated in *Northern Pacific Railway Co. v. United States, supra* 356 U.S. at 5.

The "Fundamental Policy" stated in the NCAA constitution, *i.e.*, that of maintaining intercollegiate athletics as an integral part of the educational program, cannot be considered a profit-oriented goal. I conclude that the district court erred by subjugating the NCAA's educational goals (and, incidentally, those which Oklahoma and Georgia insist must be maintained in any event) to the purely competitive commercialism of "every school for itself" approach to television contract bargaining. The statement of "Purposes" for NCAA television contracts for the years 1982-1985, in sum, reveals the district court's error in refusing to recognize that under the rule of reason, the NCAA television contracts under challenge do not violate the federal antitrust laws:

The purposes of this Plan shall be to reduce, insofar as possible, the adverse effects of live television . . . upon football [**67] game attendance and, in turn, upon the athletic and related educational programs dependent upon the proceeds therefrom; to spread football television participation among as many colleges as practicable; to reflect properly the image of universities as educational institutions; to promote college football through the use of television, to advance the overall interests of intercollegiate athletics, and to provide college football television to the public to the extent compatible with these other objectives.

Plaintiff's Exhibit "LT".

I would reverse the judgment of the district court.

Hayden Pub. Co. v. Cox Broadcasting Corp.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1 **Summary Judgment, Entitlement as Matter of Law**

This court is ever mindful that summary judgment procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles. In the proper circumstances however, where plaintiffs have been afforded ample opportunity for discovery, it is clear that summary judgment does apply to antitrust suits. While an antitrust case ripe with issues of fact concerning motive, intent and credibility would seemingly be impervious to Fed. R. Civ. P. 56 application, the mere fact that a case is based upon the antitrust laws does not suspend utilization of the rule.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

566 F. Supp. 503, *503L^A 1983 U.S. Dist. LEXIS 16820, **1

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > General Overview

HN6 **Monopolies & Monopolization, Attempts to Monopolize**

The initial requirement under [15 U.S.C.S. § 2](#), that a defendant possess monopoly power in the relevant market, compels a determination as to the definition and extent of that relevant market. Indeed, an antitrust plaintiff cannot prove a defendant's ability to monopolize trade absent a showing that the defendant is able to do so within the relevant economic market. Thus, illegal monopoly power may only be appraised in terms of the competitive market for the product. Moreover, courts are not free to accept whatever market is suggested by the plaintiff, but must examine commercial realities within the industry in question, so as to determine whether plaintiff has met the burden of proving the relevant market. In so doing, this court recognizes that the antitrust laws were enacted for the protection of competition, not competitors. While determination of the relevant market is essentially a question of fact, there are specific legal guidelines which are applicable to all cases.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7 **Monopolies & Monopolization, Actual Monopolization**

In defining the relevant product market, the Supreme Court determined that the market is composed of products that have reasonable interchangeability for purposes for which they are produced. It is, therefore, the use of the product by consumers rather than the nature of the product itself, which determines the relevant product market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN8 **Monopolies & Monopolization, Actual Monopolization**

The purchaser readiness to substitute criterion is designed to measure cross-elasticity of demand or reasonable interchangeability by determining the responsiveness within the marketplace of the sales of one product to price changes of another product.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9 **Monopolies & Monopolization, Actual Monopolization**

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

[**HN10**](#) Monopolies & Monopolization, Actual Monopolization

Selling price between commodities with similar uses and different characteristics may vary, is merely reflective of commercial reality. To divide product lines strictly by price is simply unrealistic.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Sherman Act > General Overview

[**HN11**](#) Monopolies & Monopolization, Actual Monopolization

While the emphasis on advertising impact contrasts with the general rule within the commercial world where price is often the determining factor, it does not in and of itself create a separate product market or submarket. Quality of service can substitute without difficulty for price as the primary competitive variable, particularly where a sophisticated consumer, as opposed to the general public, has the ability to make the necessary qualitative distinctions.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

[**HN12**](#) Monopolies & Monopolization, Actual Monopolization

A relevant market for a product may not be defined by focusing merely on a single factor such as sensitivity to price change, but must instead include an evaluation of the limits of that product's competition with other products.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

[**HN13**](#) Actual Monopolization, Claims

The essential elements of Attempted Monopolization under [15 U.S.C.S. § 2](#) are a dangerous probability of success in monopolizing a given product market, and the specific intent to destroy competition or build monopoly. Like actual monopolization, the attempt to monopolize cannot exist without first establishing the framework within which the specific intent to destroy competition exists. Thus proof of relevant product market is a necessary element of a cause of action for monopolization or attempted monopolization.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN14 [blue icon] Regulated Practices, Price Fixing & Restraints of Trade

[15 U.S.C.S. § 1](#) provides in pertinent part that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is declared to be illegal.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15 [blue icon] Regulated Practices, Price Fixing & Restraints of Trade

Under the rule of reason analysis, the elements of restraint of trade are an agreement among two or more persons or distinct business entities which is intended to harm or unreasonably restrain competition and which actually causes injury to competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN16 [blue icon] Monopolies & Monopolization, Attempts to Monopolize

It is the impact upon competitive conditions in a definable product market which distinguishes the antitrust violation from the ordinary business tort.

Judges: Costantino, D.J.

Opinion by: COSTANTINO

Opinion

[*505] Memorandum of Decision and Order

COSTANTINO, D.J.:

In the above-entitled antitrust action, defendants have moved for summary judgment pursuant to [Rule 56 of the Fed. R. Civ. P.](#) In addition to opposing the motion, plaintiff has cross-moved for partial summary judgment. For the reasons set forth below, defendants' motion for summary judgment on all causes of action is hereby granted in its entirety.¹

Plaintiff Hayden Publishing Company ("Hayden") commenced this antitrust action charging both defendants Cox Broadcasting Corporation ("Cox") and United Technical Publications, Inc. ("UTP"), a wholly-owned subsidiary of Cox, with violating [Section 1](#) of the Sherman Act, [15 U.S.C. § 1](#), and charging defendant UTP with violating [Section 2](#). [15 U.S.C. § 2](#). The [Section](#) [\[*21\]](#) claim charges that both defendants conspired in an unlawful combination and in unreasonable restraint of trade and commerce in advertising in electronic catalog directories. The [Section 2](#) claim alleges that UTP's electronic trade reference publication, "Electronic Engineers Master" ("EEM"), has monopolized or attempted to monopolize the market for product data advertising in electronic catalog directories.

¹ As the court has determined that defendants' motion be granted in its entirety, plaintiff's cross-motion for partial summary judgment is accordingly denied.

Defendants' summary judgment motion is premised upon the allegation that the plaintiff's Sherman Act causes of action are dependent upon a showing that Hayden's publication ("Gold Book") and EEM, comprise the entire "relevant product market" for sales of advertising for the electronics trade. Defendants argue that this narrow product market conflicts with commercial reality by excluding actual competitors of both publications. Accordingly, defendants contend that plaintiffs' causes of action must fail as a matter of law.

Summary Judgment

HN1[] This court is ever mindful that "summary [judgment] procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles . . ." *Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, [*3] 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962); see *Aladdin Oil Co. v. Texaco, Inc.*, 603 F.2d 1107, 1110 (5th Cir. 1979). In the "proper circumstances" however, where plaintiffs have been afforded ample opportunity for discovery, it is clear that summary judgment does apply to antitrust suits. See *McDaniel v. General Motors Corp.*, 480 F. Supp. 666, 669-670 (E.D.N.Y. 1979), aff'd, 628 F.2d 1345 (2d Cir. 1980). While an antitrust case ripe with issues of fact concerning motive, intent and credibility would seemingly be impervious to *Rule 56* application, see generally Moore's Federal Practice and Procedure §§ 56.17[1],.17[5], the mere fact that a case is based upon the antitrust laws does not suspend utilization of the rule. *Aladdin Oil Co. v. Texaco, Inc.*, 603 F.2d at 1111; *McDaniel v. General Motors Corp.*, 480 F. Supp. at 670.

HN2[] Summary judgment is appropriate where, as here, there is no genuine issue of material fact and the movant is entitled to judgment as a matter of law. See *Northrop Corp. v. McDonnell Douglas Corp.*, 700 F.2d 506, 525 (9th Cir. 1983). A party opposing summary judgment must present "significant probative evidence tending to support the [*4] complaint," *First National Bank v. Cities Service*, 391 U.S. 253, 290, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968); *General Business Systems v. North Am. Philips Corp.*, 699 F.2d 965, 971 (9th Cir. 1983) setting forth "concrete particulars." *Dressler v. The MV Sandpiper*, 331 F.2d 130, 133 (2d Cir. 1964).

In the instant action, the court has drawn the facts of the case from the voluminous discovery record, including extensive affidavits submitted by the parties. **HN3**[] Wherever reasonable inference can be drawn regarding the evidence, the court has taken that inference most favorable to the plaintiff. See *Reisner v. General Motors Corp.*, 671 F.2d 91, 93 (2d Cir.), cert. denied, 459 U.S. 858, 103 S. Ct. 56, 74 L. Ed. 2d 112 (1982). [*506] With these principles in mind, the court has determined that summary judgment is appropriate. The matter has been sufficiently developed with extensive discovery proceedings. As the movants have carried their burden of demonstrating that there are no genuine issues of material fact concerning resolution of these claims, they are ripe for decision in defendants' favor.

Section 2 Monopolization Claim

HN4[] In order to state a valid [*5] claim of monopolization under S.2,² a plaintiff must allege that the defendant possesses monopoly power in the relevant market and has willfully acquired or maintained this power, as distinguished from enjoying it solely as a consequence of superior product, growth, development or historic accident. *United States v. Grinnell Corp.*, 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966); *Schaben v. Samuel Moore & Co.*, 462 F. Supp. 1321 (S.D. Iowa 1978), aff'd, 606 F.2d 831 (8th Cir. 1979). Monopoly power is the power to control prices or to exclude competition within the relevant market. *United States v. Grinnell Corp.*, 384 U.S. at 570-71; *ALW, Inc. v. United Air Lines*, 510 F.2d 52, 55 (9th Cir. 1975).

² **HN5**[] 15 U.S.C. § 2 provides:

Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars, or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court.

[**6] **HN6** The initial requirement, that a defendant possess monopoly power in the relevant market, compels a determination as to the definition and extent of that relevant market. Indeed, an antitrust plaintiff cannot prove a defendant's ability to monopolize trade absent a showing that the defendant is able to do so within the relevant economic market. See *Nifty Foods Corp. v. Great Atlantic & Pac. Tea Co.*, 614 F.2d 832, 840 (2d Cir. 1980) ("Nifty Foods"); *FLM Collision Parts, Inc. v. Ford Motor Co.*, 543 F.2d 1019, 1030 (2d Cir. 1976), cert. denied, 429 U.S. 1097, 51 L. Ed. 2d 545, 97 S. Ct. 1116 (1977). Thus, illegal monopoly power may only be appraised in terms of the competitive market for the product. *United States v. E.I. duPont de Nemours & Co.*, 351 U.S. 377, 393, 100 L. Ed. 1264, 76 S. Ct. 994 (1956) ("duPont"); see *Nifty Foods*, at 840; *Berkey Photo, Inc. v. Eastman Kodak Co.*, 603 F.2d 263, 272 (2d Cir. 1979), cert. denied, 444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980). Moreover, courts are not free to accept whatever market is suggested by the plaintiff, but must examine commercial realities within the industry in question, *JBL Enterprises*, [**7] *Inc. v. Jhirmack Enterprises, Inc.*, 698 F.2d 1011, 1016 (9th Cir. 1983) so as to determine whether plaintiff has met the burden of proving the relevant market. *Acme Precision Products, Inc. v. American Alloys Corp.*, 484 F.2d 1237 (8th Cir. 1973); see *duPont*, 351 U.S. at 381. In so doing, this court recognizes that "the antitrust laws . . . were enacted for the protection of competition, not competitors." *Gianna Enterprises v. Miss World (Jersey) Ltd.*, 551 F. Supp. 1348, 1353 (S.D.N.Y. 1982) (emphasis in original) (quoting *Brown Shoe Co. v. United States*, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962) ("Brown Shoe").

While determination of the relevant market is essentially a question of fact, see, e.g., *United States v. Grinnell Corp.*, 384 U.S. 563, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966); *International Boxing Club v. United States*, 358 U.S. 242, 3 L. Ed. 2d 270, 79 S. Ct. 245 (1959), there are specific legal guidelines which are applicable to all cases.

HN7 In defining the "relevant product market," the Supreme Court in *duPont*, determined that the market is composed of products that have "reasonable interchangeability" for purposes for [**8] which they are produced. 351 U.S. at 395. It is, therefore, the use of the product by consumers rather than the nature of the product itself, which determines the [*507] relevant product market. *Warner Amex Cable v. American Broadcasting*, 499 F. Supp. 537, 546 (S.D. Ohio 1980); *United States v. Chas. Pfizer & Co.*, 245 F. Supp. 737 (E.D.N.Y. 1965).

The Relevant Product Market

In support of its summary judgment motion, defendants argue that in addition to EEM and Gold Book, there are a number of other publications which compete within the relevant product market. Both EEM and Gold Book are published annually and derive revenue through the sale of advertising space to suppliers of electronic products. The advertisements are then published within each publication and distributed without charge to the electronics trade. The product market, which Hayden's Section 2 claim alleges has been monopolized, consists of that market which competes for the sale of advertising.

Defendants have published EEM since 1958 while Gold Book entered the market in 1974. Defendants have asserted that the following publications compete with EEM and Gold Book within the relevant market: [**9]

- (1) Micro Waves Product Data Directory ("MPDD") *
- (2) Electronic Buyers' Guide ("EBG")
- (3) Electronic Distributors Master Catalog ("EDMC") **
- (4) I C Master **
- (5) Electronic Industry Telephone Directory ("EITD")
- (6) Who's Who In Electronics
- (7) Thomas Register
- (8) Control Equipment Master ("CEM")
- (9) Interference Technology Engineers Master ("ITEM")

* Published by Hayden

** Published by UTP

Hayden argues that the various competitors denominated by the defendants are not "functionally interchangeable" with EEM and further, that the defendants have failed to establish that there is a "purchaser readiness to substitute" between EEM and defendants' nominees.

HN8 [↑] The "purchaser readiness to substitute" criterion is designed to measure "cross-elasticity of demand" or "reasonable interchangeability" by determining the responsiveness within the marketplace of the sales of one product to price changes of another product. See [Borden, Inc. v. F.T.C., 674 F.2d 498, 507 \(6th Cir. 1982\)](#), *petition for cert. filed*, 51 U.S.L.W. 3150 (U.S. Aug. 25, 1982) (No. 82-328). In support of its argument, Hayden cites a study purporting to [**10] show minimal switching away from EEM to other publications when EEM raised its advertising prices.

Hayden also insists that no other publication other than EEM responded to Gold Book's entry into the market by lowering its advertising rates.³

[**11] Finally, Hayden argues that even if the court were to accept all the defendants' arguments, defendants' motion should not be granted in that there has been no showing of the defendants' product market share.

The defendants cite *Brown Shoe*, for the proposition that **HN9** [↑] "the outer boundaries of a product market are determined by the reasonable interchangeability of use [*508] or the cross-elasticity of demand between the product itself and substitutes for it. [370 U.S. at 325](#). Once the outer boundaries of the product market are thus delineated, *Brown Shoe* enumerates further criteria for ascertainment of "submarkets." Included therein are "such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id.*

In the case at bar, ample evidence has been proffered (including surveys, studies, questionnaires, internal memoranda and letters) which persuades the court that reasonable interchangeability exists between EEM and the other publications cited by the defendants. [**12] In so holding, this court is guided primarily by the "reality of the marketplace." See [United States v. Empire Gas Corp., 537 F.2d 296, 303 \(8th Cir. 1976\)](#), *cert. denied*, 429 U.S. 1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 (1977), Case- [Swayne Co. v. Sunkist Growers, Inc., 369 F.2d 449, 456 \(9th Cir. 1966\)](#), *rev'd on other grounds*, [389 U.S. 384, 19 L. Ed. 2d 621, 88 S. Ct. 528 \(1967\)](#).

It is clear that those publications cited by defendants are utilized to obtain product information concerning electronic products throughout the electronics industry. Suppliers of these products utilize all the publications cited (as well as EEM and Gold Book) for the purpose of advertising their products. In addition, Hayden's own studies indicate its marketing observation that publications other than EEM were in fact in competition with both Gold Book and EEM. For example, the *Fairchild Study*, prepared by Hayden, polled prospective industry customers as to their choice between EEM, Gold Book and EBG, as "the best publication" to reach the market. Further, defendants have cited numerous readership surveys conducted by electronic manufacturers (the potential customers of both Gold [**13] Book and EEM) which indicate clearly that the manufacturers considered a wide range of publications as interchangeable with EEM and Gold Book. Despite minor differences between these publications as to format, it is the interchangeability in end use of the product rather than the product itself which determines the relevant market.

³ Hayden argues that the failure of other publications to lower their prices in response to Gold Book's entry onto the market is evidence that none considered Gold Book a competitor. Thus, concludes Hayden, none should be included within the relevant product market. The court cannot accept plaintiff's argument.

Any test, solely designed to measure the reaction of other publications to Gold Book's entry onto the market, would seem to focus on the wrong side of issue. By ignoring consumers and concentrating instead upon the reaction of other sellers, plaintiff's argument is of extremely limited value. See [L.G. Balfour Company v. F.T.C., 442 F.2d 1, 11 \(7th Cir. 1971\)](#); [United States v. Bethlehem Steel Corp., 168 F. Supp. 576 \(S.D.N.Y. 1958\)](#). The court notes further, that while failing to reduce prices, most of the publications cited by defendants did not raise their prices either. More importantly, the particular gauge of competitor response urged by Hayden cannot be deemed as dispositive as to this issue. The record is replete with examples of identical or equivalent advertising in editions of Gold Book and a number of the other publications, including EEM.

United States v. Chas. Pfizer & Co., 246 F. Supp. 464 (E.D.N.Y. 1965); see Acme Precision Products, Inc. v. American Alloys Corp., 484 F.2d at 1242.

Thus, while the reasonable interchangeability of a product is not the sole test for determining the relevant market, United States v. CBS, Inc., 459 F. Supp. 832, 837 (C.D. Cal. 1978), a determination that product interchangeability does exist, enables this court to ascertain that the "outer boundaries" of the relevant product market are not limited to EEM and Gold Book.

As to whether a valid "submarket" exists consisting solely of EEM and Gold Book, here too plaintiff is unable to substantiate its market definition.

Submarket Analysis

In making its submarket determination, this court is guided by the analysis of such markets by the Supreme Court in *Brown Shoe*.⁴ The parties to [**14] this lawsuit have saturated the court with exhibits, attempting to document the relevant submarket criteria as enunciated in Brown Shoe, 370 U.S. at 325. The court has waded through the entirety of this material and concludes that no submarket exists which would limit the relevant product market for antitrust purposes to EEM and Gold Book.

In examining the first submarket criterion advanced in *Brown Shoe*, this court finds no showing by plaintiff regarding industry or public recognition of a separate economic entity consisting solely of EEM and Gold Book. *Id.* at 325. To the contrary, the evidence before this court indicates [*509] [**15] that the electronics industry recognizes a number of other publications as legitimate competitors of both.

As for the "particular characteristics and uses" of the directories, *id.*, plaintiff has demonstrated a degree of dissimilarity between defendants' nominees and Gold Book and EEM. Some are published on a weekly or monthly basis while EEM and Gold Book are issued annually. Plaintiff alleges further that due to their digest form, EEM and Gold Book are more likely to be retained for use in the purchase of the products advertised therein, than are the magazine-format publications cited by defendants. This court does not concur. While noting that certain distinctions between the publications do exist, this court finds nonetheless that all are within the mainstream of the electronics advertiser market such that a fluid interchange exists between advertisers of these products. See Buffalo Courier-Exp. v. Buffalo Evening News, Inc., 441 F. Supp. 628, 634 (W.D.N.Y. 1977) vacated on other grounds, 601 F.2d 48 (2d Cir. 1979). Hayden's own 1977 Annual Report states that Gold Book and EEM compete for advertising pages with EBG. The fact remains that notwithstanding cosmetic [**16] differences, all of these publications share essentially similar functions in that they are used as advertising vehicles throughout the electronics industry.

Concerning the *Brown Shoe* criteria of "distinct customers" and "unique production facilities," 370 U.S. at 325, plaintiff has failed to demonstrate that any distinction or uniqueness exists.

As for any "distinct[ion] [in] prices," *id.*, the court notes that the fact that HN10 [**17] "selling price between commodities with similar uses and different characteristics may vary," is merely reflective of commercial reality. duPont, 351 U.S. at 396. To divide product lines strictly by price is simply unrealistic. Brown Shoe, 370 U.S. at 326; see Liggett & Myers, Inc. v. F.T.C., 567 F.2d 1273, 1274 (4th Cir. 1977); Acme Precision Products, Inc. v. American Alloys Corp., 484 F.2d 1237. The particular commodity here in question (advertising space) can hardly be distinguished strictly on a price-per-page basis. Hayden's own internal memoranda indicate that customer interest in the effectiveness of the publication in which they advertise outweighs any interest solely in cost-per-page.

⁴ While *Brown Shoe* concerned violation of Section 7 of Clayton Act, the rule of the case has been applied to cases arising under Section 2 of the Sherman Act. United States v. Grinnell Corp., [1966 TRADE CASES P 71,789], 384 U.S. 563, 572-73, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966); Borden Inc. v. F.T.C., [1982 TRADE CASES P 64,558], 674 F.2d at 509-10.

Consumer interest in factors other [**17] than price, negates Hayden's emphasis on the next *Brown Shoe* criterion, "sensitivity to price change." [370 U.S. at 325](#). In attempting to portray a dualistic product market and therefore defeat defendants' motion, Hayden argues that customers (i.e. advertisers) do not substitute or switch when there is a change in price of one of the publications. Hayden's studies indicate that where, for example, EEM increased its price by 22% and MPDD stood firm, no significant switching of advertisers, to MPDD took place. Similar results for other of the competitors nominated by defendants were noted as well.

Plaintiffs' reliance on this issue is not well founded. As previously noted, consumer interest in the quality of advertising impact (including such variables as EEM's past performance, art direction and writing support and industry-wide credibility) rather than low prices, is of primary importance to consumers. [HN11](#)[] While the emphasis on advertising impact contrasts with the general rule within the commercial world where price is often the determining factor, it does not in and of itself create a separate product market or submarket. Quality of service can substitute without difficulty [**18] for price as the primary competitive variable, [Robinson v. Magovern, 521 F. Supp. 842, 877 \(W.D. Pa. 1981\)](#) particularly where, as here, a sophisticated consumer, as opposed to the general public, has the ability to make the necessary qualitative distinctions. Cf. [Pontius v. Children's Hosp., 552 F. Supp. 1352, 1365-66 \(W.D. Pa. 1982\)](#); [Williams v. Kleaveland, 534 F. Supp. 912, 919 \(W.D. Mich. 1981\)](#) citing 7 Am. J. of Law and Medicine, Vol. 1, 1981 at iii.

Further, the court notes that [HN12](#)[] a relevant market for a product may not be defined by focusing merely on a single factor such as [*510] sensitivity to price change, but must instead include an evaluation of the limits of that product's competition with other products. See [George R. Whitten, Jr., Inc. v. Paddock Pool Bldrs., Inc., 508 F.2d 547 \(1st Cir. 1974\)](#) cert. denied, 421 U.S. 1004, 44 L. Ed. 2d 673, 95 S. Ct. 2407 (1975).

Accordingly, this court has determined that Hayden has failed to meet its threshold burden of substantiating its market definition limiting the relevant product market or submarket to one consisting solely of EEM and Gold Book. Meeting this burden is a necessary predicate for establishing [**19] a claim under [Section 2](#). See, e.g., [Fount-Wip, Inc. v. Reddi-Wip, Inc., 568 F.2d 1296, 1301 \(9th Cir. 1978\)](#); [City of Cleveland v. Cleveland Elec., Etc., 538 F. Supp. 1306 \(N.D. Ohio 1980\)](#); [United States v. Chas. Pfizer & Co., 246 F. Supp. at 470](#). Plaintiff endeavors to ignore the marketplace realities in its insistence upon an artificial two-publication market theory. This court has concluded that plaintiff has failed to demonstrate that such a limited product market exists. Accordingly, the court need not compute defendants' "monopoly power" within the relevant product market. See [Fount-Wip, Inc. v. Reddi-Wip, Inc., 568 F.2d at 1302 n. 3](#); [United States v. Chas. Pfizer & Co., 246 F. Supp. at 470](#).

[Section 2](#) Attempted Monopolization Claim

[HN13](#)[] The essential elements of Attempted Monopolization under [Section 2](#) are (1) a "dangerous probability of success" in monopolizing a given product market, and (2) the specific intent to "destroy competition or build monopoly." [Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 626, 97 L. Ed. 1277, 73 S. Ct. 872 \(1953\)](#); [Nifty Foods, 614 F.2d at 841](#); [Levitch v. Columbia Broadcasting System, Inc., 495 F.2d 649, 668 \(S.D.N.Y. 1980\)](#), aff'd, [697 F.2d 495 \(2d Cir. 1983\)](#). Like actual monopolization, the attempt to monopolize cannot exist without first establishing the framework within which the specific intent to "destroy competition" exists. [M.A.P. Oil Co., Inc. v. Texaco, Inc., 691 F.2d 1303, 1309 \(9th Cir. 1982\)](#). Thus "proof of relevant product market is a necessary element of a cause of action for monopolization or attempted monopolization." [Nifty Foods, 614 F.2d at 840](#); [Jennings Oil Company, Inc. v. Mobil Oil Corp., 539 F. Supp. 1349, 1351 \(S.D.N.Y. 1982\)](#). This court has previously determined that Hayden's relevant product market theory is fatally flawed. Accordingly, defendant's motion for summary judgment dismissing the [Section 2](#) claims of monopolization and attempted monopolization, is granted. See [McDaniel v. General Motors, 480 F. Supp. at 675](#).

[Section 1](#) Restraint of Trade Claim

In its motion for summary judgment, defendants contend that since plaintiff has alleged *unreasonable restraints of trade* rather than any *per se* violation of [Section 1](#),⁵ the legality of the activity alleged must be measured in terms of its effect upon the [**21] relevant product market. Thus, defendant argues, plaintiff's [Section 1](#) claim stands or falls with its [Section 2](#) claims, and must therefore fail upon this court's rejection of plaintiff's dual market theory. For its part, Hayden insists that different legal criteria govern determination of market power in a "rule of reason" [Section 1](#) case than in a [Section 2](#) monopolization case.

Hayden concedes that this case is not governed by any of the *per se* standards of [antitrust law](#) violation. See, e.g., [United States v. Topco Associates, 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 \(1972\)](#) (horizontal territorial divisions); [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 \(1940\)](#) (price fixing); [Bogosian v. Gulf Oil Corp., 561 F.2d 434](#) (3rd Cir.), cert. [**22] denied, 434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978) (tie-in claim). Therefore, the defendants' alleged restraint must be analyzed under the "rule of reason" standard in the context of relevant product market. [United States v. Columbia Steel Co., 334 U.S. 495, 92 L. Ed. 1533, 68 S. Ct. \[*511\] 1107 \(1948\)](#); [North American Soccer v. National Football League, 670 F.2d 1249 \(2d Cir. 1982\)](#), cert. denied, 459 U.S. 1074, 103 S. Ct. 499, 74 L. Ed. 2d 639 (1982); [White and White, Inc. v. American Hospital Supply, 540 F. Supp. 951, 979 \(W.D. Mich. 1982\)](#).

[HN15](#) [↑] Under the rule of reason analysis, the elements of restraint of trade are:

- (1) An agreement among two or more persons or distinct business entities;
- (2) which is intended to harm or unreasonably restrain competition;
- (3) and which actually causes injury to competition.

[Kaplan v. Burroughs Corp., 611 F.2d 286, 290 \(9th Cir. 1979\)](#), cert. denied, 447 U.S. 924, 65 L. Ed. 2d 1116, 100 S. Ct. 3016 (1980). A crucial determination therefore, is whether or not the alleged conduct of the defendant has impact upon competition in general, [DeVoto v. Pacific Fidelity Life Ins. Co., 618 F.2d 1340, 1344](#) (9th Cir.), cert. denied, 449 U.S. 869, 66 L. Ed. 2d 89, 101 S. Ct. 206 (1980); [Kaplan v. Burroughs Corp., 611 F.2d at 291](#), as [HN16](#) [↑] "it is the impact upon competitive conditions in a definable product market which distinguishes the antitrust violation from the ordinary business tort." *Id.*

The foregoing discussion leaves little doubt that a determination as to the boundaries of the relevant product market is essential in order to measure the anti-competitive effect if any, of defendants' activities.⁶ [American Aloe Corp. v. Aloe Cream Laboratories, Inc., 420 F.2d 1248, 1256](#) (7th Cir.), cert. denied, 400 U.S. 820, 27 L. Ed. 2d 47, 91 S. Ct. 37 (1970); see [Kaplan v. Burroughs Corp., 611 F.2d at 291](#). While Hayden concedes that a market determination is required, it argues that a "different (and much less difficult to prove) standard is mandated than that used to determine [Section 2](#) monopoly power." Plaintiffs' Reply Memorandum at 6. Nonetheless, Hayden has not met the burden required under [Section 2](#), of demonstrating any anti-competitive effect upon the relevant market, see [McDaniel v. General Motors Corp., 480 F. Supp. at 674](#), thereby failing [**24] to make out a *prima facie* case under the rule of reason analysis. See [Independence Tube Corp. v. Copperweld Corp., 691 F.2d 310, 323 \(7th Cir. 1982\)](#) petition for cert. filed, 51 U.S.L.W. 3567 (U.S. Jan. 28, 1983) (No. 82-1260); [Dougherty v. Continental Oil Co., 579 F.2d 954, 962 \(5th Cir. 1978\)](#).

Assuming *arguendo* that this court were to accept Hayden's "much less difficult to prove" standard of product market definition, consideration of the effects of the defendants' alleged conduct upon the relevant market is still

⁵ [HN14](#) [↑] [15 U.S.C. § 1](#) provides in pertinent part that:

every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal . . .

⁶ Had plaintiff alleged a *per se* violation of [Section 1](#), such a determination would not be required. See [Klor's v. Broadway-Hale Stores, Inc. \[1959 TRADE CASES P 69,316\], 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 \(1959\)](#); [Langston Corp. v. Standard Register Co. \[1982-83 TRADE CASES P 65,118\], 553 F. Supp. 632, 638 \(N.D. Georgia 1982\)](#).

566 F. Supp. 503, *511 (1983 U.S. Dist. LEXIS 16820, **24

required. See George R. Whitten, Jr., Inc. v. Paddock Pool Bldrs., Inc., 508 F.2d at 560. Hayden's failure to adequately define [**25] the relevant product market or to demonstrate any indication of anti-competitive effect upon that market, is thus fatal to its Section 1 claim. Langston Corp. v. Standard Register Co., 553 F. Supp. 632, 640 (N.D. Georgia 1982).

Accordingly, defendants' motion for summary judgment on plaintiffs' Sherman Act Sections 1 and 2 causes of action is hereby granted and the action is dismissed in its entirety.

So ordered.

Opinion by: GRAY

Opinion

Memorandum of Decision

Gray, Sr. D.J.: In transferring this action to this court, as the transferee Judge in Case No. MDL-150, the Multidistrict Panel authorized this Court to adjudicate the plaintiff's motion that the case be remanded to the state court of California. The issue has been thoroughly briefed, argued, and submitted for decision. The motion now is granted and the case will be ordered remanded.

Such dispositive action is believed to be mandated by the square holding in the case of *In re: Sugar Antitrust Litigation*, MDL-201, [588 F. 2d 1270 \(9th Cir. 1978\)](#). There, the plaintiff filed originally in federal district court, alleging violations of the Sherman and Clayton Acts, and, while that suit was pending, filed an action against the same defendants in state court, this time based solely upon allegations of violations of California antitrust laws. The defendants caused removal to the federal court and the plaintiff appealed the refusal of the district judge to remand. The Court of Appeals held that the California action was not ". . . founded on a claim arising under the . . . laws of the United States . . .," within [*3] the meaning of Title [28 U.S.C. § 1441\(b\)](#) and that the district court there lacked

removal jurisdiction. In arriving at such conclusion, the Court of Appeals discussed and then rejected the defendant's contention that the plaintiffs were seeking improperly to avoid federal jurisdiction through use of what is referred to here as "artful pleading."

This action presents even a stronger case for remand than did Sugar, because unlike the situation there, neither the plaintiffs nor their counsel have sought the aid of the federal court or federal antitrust laws in pursuit of a claim for relief. Their initial and only charge against the defendants has been and is under state **antitrust law**.

Both here and in Sugar, the complaints allege that the respective plaintiffs and the class members that they seek to represent have been exclusively indirect purchasers of products from the defendants and their alleged co-conspirators. As everyone here concerned is thoroughly aware, the Supreme Court has held that, under federal anti-trust laws, such indirect purchasers may not claim and recover damages resulting from price fixing. [Illinois Brick Co. v. Illinois, 431 U.S. 720 \(1977\)](#). In rendering [*4] the decision of the Court of Appeals in Sugar, Judge Merrill adverted to the holding by the Supreme Court and said:

It follows from Illinois Brick that the consumer class action claims of these plaintiffs, if construed by us as arising under federal law, would be dismissed in federal court. While the process of removal of state actions looks to trial of the removed cause in a more appropriate forum, here removal will assure that the cause will never be tried at all. It would be incongruous for us to construe these state law consumer class claims as arising under federal law when, under federal law as announced in Illinois Brick, it would appear that they never arose at all. On the other hand, under California state law they may not be foreclosed. [588 F.2d at 1273.](#)

Likewise, in this case, if the removal to this court were to stand, the first thing that I would do would be to dismiss the action, under the mandate of Illinois Brick. I therefore conclude that I am bound by the decision in Sugar and am obliged to remand.

The defendants contend that in Sugar the Court of Appeals failed to distinguish between the right of this court to accept jurisdiction and the question of what [*5] will happen on the merits once the case is properly removed. My response is that it is my obligation to follow a square holding of the Court of Appeals, rather than to volunteer a re-examination of the correctness of that decision.

The defendants also suggest that Sugar has been overruled sub silentio by the Supreme Court in [Federated Department Stores, Inc. v. Moitie, 452 U.S. 394 \(1981\)](#). The procedural facts in Moitie, which are somewhat complicated, were clearly set out in Justice Rehnquist's opinion, and need not be recited again here. The defendants in this case point out certain similarities between the facts in Moitie and those here concerned, and they rely particularly upon comments in footnote 2 in the Moitie opinion which indicate that both the Ninth Circuit and the Supreme Court were of the view that the cases properly had been removed because of "artful pleading."

However, Justice Rehnquist began the opinion of the Court in Moitie by stating: "The only question presented in this case is whether the Court of Appeals for the Ninth Circuit validly created an exception to the doctrine of res judicata." The "only issue" with which the Supreme Court was concerned has nothing [*6] to do with the present litigation. Certainly, any comments about the propriety of the removals to the federal court were not made in resolution of a litigated issue and were not necessary to the decision, except to the extent that the matter of res judicata would not have been before the Court if there had been no such removals. Thus, this Court declines to assume that the dictum comments in a footnote in Moitie have removed the binding effects of Sugar.

Even if it were to be inferred that the Supreme Court in Moitie somehow did rule on the appropriateness of the removals, I believe that other factors in this case significantly distinguish it from Moitie. There, the only original plaintiff that ultimately was before the Supreme Court (Brown) had filed his initial action in federal court, alleging violation of United States anti-trust laws. The district judge dismissed the action and Brown refiled in state court, using allegations similar to those in his original complaint. It was this action that was removed to federal court and was the subject of the litigation before the Supreme Court. Under those circumstances, application of the "artful pleading" doctrine would have considerable [*7] validity.

To the contrary here, as has been discussed earlier in this memorandum, these plaintiffs and their counsel have relied, from the beginning, upon state antitrust laws and upon the state court as their forum. The defendants seek to persuade the Court to reject this distinction. They point to the complaint filed by the California Attorney General in the MDL-150 litigation, in which the plaintiff class did include the indirect purchasers of petroleum products on behalf of whom the present action by the Retail Clerks Union is brought. Such named class members will be precluded from recovery in the MDL-150 action, in light of Illinois Brick. The defendants thus insist that the class members named in the Retail Clerks Union case have been before this Court and have lost, and that the antitrust action subsequently brought on their behalf in state court therefore must be deemed to involve "artful pleading" and may be removed here for dismissal.

I am not able to accept this rationale. Certainly, if the very complaint brought by the Retail Clerks Union had been filed in state court before the California MDL-150 action was initiated, it could have been prosecuted under California [*8] law. I do not see how the fact that the California Attorney General previously had elected to bring suit under the Sherman Act on behalf of a class that included members of the class named later in the Retail Clerks Union action can preclude subsequent recourse to state court on behalf of the latter. Those potential class members had no part in the decision to file the MDL-150 action, nor have they been given the opportunity to opt out of that litigation. The fact that the Retail Clerks Union has learned from Illinois Brick, in which they had no part, that indirect purchasers cannot recover in federal court for violations of the Sherman Act, cannot forestall their recourse to the antitrust laws of California in the courts of that state.

It is acknowledged here that this conclusion is troublesome to this court. The policy of the courts of the United States, as thoroughly explained in Illinois Brick, is that indirect purchasers may not recover damages for antitrust violations growing out of price fixing. The duty of this Court is to uphold such policy, and the reasons for it are just as applicable to suits under state antitrust laws as they are under federal antitrust laws. I [*9] therefore have a reluctance to sanction the prosecution of the present action in any court. However, the California Legislature has expressly announced a contrary policy, and I am in no position to preclude it from being implemented in the courts of that state. As Judge Merrill said in Sugar, to hold otherwise would mean that ". . . the state would be deprived of any power to legislate other than in accordance with the Clayton Act as construed in Illinois Brick." [588 F. 2d at 1273](#).

Accordingly, pursuant to the motion of the plaintiff, this case will be ordered remanded to the Superior Court of San Francisco County, California.

Opinion

[*1311] MEMORANDUM OPINION

ERWIN, District Judge

This matter is before the court on the parties' cross-motions for summary judgment pursuant to [Rule 56 of the Federal Rules of Civil Procedure](#). The court has reviewed the voluminous record compiled in this case and for the reasons stated herein, grants the defendant's motion for summary judgment as to plaintiff's claims under [Section 1](#) of the Sherman Antitrust Act, [15 U.S.C. § 1](#); [Section 2](#) of the Sherman Antitrust Act, [15 U.S.C. § 2](#); Section 3 of the Clayton Act, [15 U.S.C. § 14](#); as well as plaintiff's claims under Chapter 75 of the North Carolina General Statutes, plaintiff's allegation of a breach of the distributorship agreement between the parties, and plaintiff's [*1312] claims of unfair competition under common law. The court denies the plaintiff's motion for summary judgment.

Carolina Acoustics Company, Inc. (CAC), a former distributor of several products manufactured by defendant GenRad, Inc. [**2] (GenRad) commenced this private antitrust suit in September 1979. The original complaint alleged violations of various federal and state antitrust statutes and a breach of the distributorship agreement between the parties. In August 1982, CAC amended its complaint and thereby substituted Richard M. Stearns, Trustee in Bankruptcy for CAC, as the plaintiff in this action and added a claim of common law unfair competition to the complaint.

CAC became a non-exclusive distributor of GenRad portable sound measurement products on or about December 10, 1974.¹ Those sound measurement products included sound level meters, dosimeters, octave band analyzers, and accessories for those measurement devices. In January 1979, GenRad notified CAC that it would be terminated as a distributor effective February 5, 1979 pursuant to the distributorship agreement. The stated reason for the termination was an effort to reduce distribution costs. The plaintiff alleges that during the period it was a distributor of GenRad and upon the unilateral termination of its distributorship agreement with GenRad, a course of conduct followed which was anti-competitive, monopolistic, and resulted in a restraint [**3] of trade.

The court is mindful that [HN1](#) summary judgment should be sparingly granted in complex antitrust actions, especially where intent and motive play an important role in the case. [Poller v. Columbia Broadcasting](#), 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962); [Morrison v. Nissan Motor Co.](#), 601 F.2d 139, 141 (4th Cir. 1979). On the other hand, it is quite clear that [HN2](#) [Rule 56 of the Federal Rules of Civil Procedure](#) [**4] still applies to antitrust actions and that where, as in the instant case, the action is not so complex and does not necessarily turn upon intent and motive, summary judgment is a proper means of disposing of the litigation.

Sherman Act § 1 Violations

Count One of the amended complaint alleges activity by defendant GenRad during the period of December 1974 through February 1979 which the plaintiff contends was violative of [Section 1](#) of the Sherman Act, [15 U.S.C. § 1](#). That alleged activity includes exclusive dealing, full line forcing, resale price maintenance, imposition of territorial restrictions, imposition of customer restrictions, and preemption of CAC's market by termination of CAC as a

¹CAC was also a *commissioned sales representative* for Grason-Stadler audiometric products during the entire period of time it was a GenRad distributor, having become such a sales representative prior to 1974 and having remained such until sometime after this litigation was commenced. Grason-Stadler was first a subsidiary and later an unincorporated division of GenRad, until it was spun off on January 1, 1978. All of the claims in this litigation relate to CAC's relationship with GenRad as one of its sound product *distributors* and not to its relationship with Grason-Stadler.

GenRad distributor. CAC also alleges that the above activity unreasonably restrained interstate commerce and damaged CAC at least to the extent of \$6,000,000.00.

Section 1 of the Sherman Act, [15 U.S.C. § 1](#), provides: "Every [HN3](#) contract, combination . . . or conspiracy, in restraint of trade or commerce among the several states . . . is declared to be illegal."

[HN4](#) A cause of action under [§ 1](#) of the Sherman Act may be sustained by proof of the existence of a contract, combination, or conspiracy [\[**5\]](#) which produced adverse, anticompetitive effects within relevant product and geographic markets along with proof that the objects of and the conduct pursuant to the agreement were illegal, and the plaintiff was injured as a proximate result of the agreement. [Martin B. Glauer Dodge Co. v. Chrysler Corp., 570 F.2d 72, 81 \(3rd Cir. 1977\)](#). "Unless [HN5](#) the particular restraint falls within a category that has been judicially determined to be illegal per se, the legality of a restraint challenged under [§ 1](#) of the Sherman Act must be assessed under the rule of reason." [Id. at 82](#).

[*1313] [HN6](#) Per se violations of [§ 1](#) of the Sherman Act presently consist of price fixing, whether horizontal or vertical, [United States v. Trenton Potteries Co., 273 U.S. 392, 397-98, 71 L. Ed. 700, 47 S. Ct. 377 \(1927\)](#); [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224-26, 84 L. Ed. 1129, 60 S. United States, 332 U.S. 392, 92 L. Ed. 20, 68 S. Ct. 12 \(1947\)](#); and horizontal allocation of markets by customer or territory, [United States v. Topco Associates, Inc., 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 \(1972\)](#); [United States v. Sealy, Inc., 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 \(1967\)](#). Other activity which is alleged to violate Section 1 of the Sherman Act must be judged by the rule of reason, which requires some analysis of the effect of the alleged restraint upon overall competition in the relevant market. [Continental TV, Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 \(1977\)](#); [Rice Tire Co. v. Michelin Tire Corp., 638 F.2d 15 \(4th Cir. 1981\)](#). [HN7](#) Under the rule of reason, the court should focus on the [\[**7\]](#) preservation of competition, not individual competitors. [Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 \(1962\)](#).

Exclusive Dealing

CAC contends that when CAC became a distributor, GenRad required CAC to discontinue handling competing products. CAC's proffered evidence in support of this claim consists of the testimony of CAC's former president and owner, Doyle Chandler, to the effect that: (1) CAC was forced by GenRad, under threat of termination, to drop the Columbia line when it took on GenRad in December 1974; (2) CAC was not thereafter allowed by GenRad to carry any other type of sound level meter; (3) CAC did in fact eliminate its Columbia inventory about sixty days after it became a GenRad distributor; and (4) CAC sold no competing sound level meters or dosimeters from that time until CAC was terminated by GenRad in January 1979. CAC also offered the affidavit of Robert Guinta, another former GenRad distributor, to the effect that an unnamed GenRad representative announced at a meeting attended generally by GenRad distributors that GenRad did not want its distributors handling competing lines. The court notes that CAC's proffered [\[**8\]](#) evidence of an exclusive dealing arrangement would appear to strain the credibility of any reasonable jury, since CAC's own documents demonstrate, contrary to the testimony proffered, that CAC did not eliminate its Columbia inventory after it became a GenRad distributor. Those documents indicate that CAC carried Columbia inventory throughout the time it was a GenRad distributor and continued to make sales of competing sound level meters and dosimeters during most of the period it was a GenRad distributor. CAC's own documents also demonstrate that it was Columbia which elected to terminate its relationship with CAC because CAC failed to pay the company for Columbia products that CAC had ordered and received. Consequently, this court questions whether, in the face of such documentary evidence generated by the complaining party, there is any genuine issue of material fact on the basis of which any jury could reasonably determine that GenRad imposed

an exclusive dealing arrangement upon CAC. Assuming that a factual issue does exist regarding the imposition of an exclusive dealing arrangement, summary judgment for GenRad is nevertheless appropriate on this issue because CAC has failed [**9] to undertake to meet its burden of demonstrating the requisite effect upon competition. In *Tampa Electric Co. v. Nashville Coal Co.*, 365 U.S. 320, [*1314] 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961), which still appears to be the leading case on exclusive dealing arrangements, the Supreme Court stated as follows:

In practical application, [HN8](#)[↑] even though a contract is found to be an exclusive dealing arrangement, it does not violate the Section unless the court believes it probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected. . . . In short, the threatened foreclosure of competition must be in relation to the market affected. . . .

. . . The competition foreclosed by the contract must be found to constitute a substantial share of the relevant market. That is to say, the opportunities for other traders to enter into or remain in that market must be significantly limited as was pointed out in *Standard Oil Company v. United States, supra*.

365 U.S. at 327.

The only effort undertaken by CAC to demonstrate the effect of the alleged exclusive dealing arrangement on competition consists of "guesstimates" [**10] by its former president and its expert witness of gross sales allegedly lost by CAC as a result of not having been able to continue to carry the Columbia and possibly other lines competitive with GenRad products. That type of showing, even if made, falls far short of demonstrating the requisite effect upon competition. That type of evidence does not demonstrate the ability of GenRad's competitors to reach the ultimate consumer with their competing products, nor does it demonstrate the ability of the consuming public to make a purchasing decision from among the various competitors in the field. CAC has made no attempt to determine who the other competitors were in the market, whether other distributors were available to those competitors, whether those competitors in fact needed distributors to get their competing products to the consumer, and what, if any, effect the alleged exclusive dealing arrangement may have had upon the ultimate consumer of and competition in the products in question. Nor has CAC made any attempt to show whether other GenRad distributors sold competing lines of products while they were GenRad distributors. In short, CAC has not shown, nor has it attempted [**11] to show, any adverse effect on overall competition in any line of commerce or relevant market resulting from the alleged exclusive dealing arrangement. For that reason, GenRad is entitled to summary judgment on this issue. *Tampa Electric Co. v. Nashville Coal Co.*, 365 U.S. 320, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961); *Lupia v. Stella D'Oro Biscuit Co.*, 586 F.2d 1163 (7th Cir. 1978); *Elder-Beerman Stores Corp. v. Federated Department Stores, Inc.*, 459 F.2d 138 (6th Cir. 1972); *Smith v. Scrivner-Boogaart, Inc.*, 447 F.2d 1014, 1017 (10th Cir. 1971), cert. denied, 404 U.S. 1059, 30 L. Ed. 2d 747, 92 S. Ct. 740 (1972).

Full Line Forcing

CAC also contends that GenRad forced its full line of measurement instruments upon CAC in quantities exceeding CAC's reasonable requirements or demands. The evidence proffered by CAC on this issue indicates that CAC's complaint is that GenRad forced an excessive amount of inventory in certain products upon CAC. Mr. Doyle Chandler testified in his deposition that CAC's inventory of GenRad equipment was as high as \$140,000 and that a reasonable level of inventory would have been between \$80,000 and \$100,000; however, Mr. Chandler [**12] also testified that there was no specific requirement that CAC carry the \$140,000 inventory and that much of the \$140,000 inventory consisted of Grason-Stadler products which are not at issue in this litigation.

Documents produced by the plaintiff in discovery refute any claim of excessive inventory. Those documents demonstrate that the highest level of CAC's inventory of GenRad products was \$25,963 on January 31, 1976. In addition, the plaintiff has made no attempt to analyze or demonstrate any adverse effect upon overall competition in any relevant market as a result of the alleged conduct by GenRad.

HN9[] Full line forcing is a violation of the antitrust laws only if the effect of such [*1315] forcing "may be to substantially lessen competition . . . in any line of commerce." In order to establish such a transgression, it must be shown that the seller had economic power in the market for the forcing item and that a substantial amount of commerce relating to the forced item was foreclosed.

Pitchford v. Pepi, Inc., 531 F.2d 92, 100 (3rd Cir. 1976) (footnotes omitted) (quoting [15 U.S.C. § 14](#)). CAC has made no showing of any anti-competitive effect in any relevant [**13] market. Therefore, the defendant is entitled to summary judgment on the issue of full line forcing.

Resale Price Maintenance

The plaintiff alleges that GenRad attempted to restrict the price at which CAC could sell GenRad products to its customers by limiting CAC discount sales to state agencies. The only evidence in the record to support such claim is the deposition testimony of Mr. Doyle Chandler, who testified that GenRad did not like discounting and told him that CAC should try to keep its prices at a high level and discount GenRad products no more than five percent.

HN10[] An illegal combination to fix prices results "if the producer secures adherence to his suggested prices by means which go beyond his mere declination to sell to a customer who will not observe his announced policy." *United States v. Parke, Davis & Co., 362 U.S. 29, 43, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)*. There is no evidence that GenRad used any coercive measures to induce CAC to charge any particular resale price for GenRad products. CAC's own documents reveal that CAC sold GenRad products to the State of North Carolina at various levels of discount above five percent. The court is of the opinion [**14] that no genuine issue as to any material fact exists regarding the claim of resale price maintenance. In addition, the plaintiff has failed to show any antitrust injury. The deposition testimony of Mr. Chandler reveals only one instance of sales loss by CAC as a result of its alleged adherence to GenRad's suggestion and that loss was recaptured by CAC. "One **HN11**[] of the essential elements for recovery under the antitrust laws is that the claimant be injured or damaged." *Gray v. Shell Oil Co., 469 F.2d 742, 748 (9th Cir. 1972)*. GenRad is entitled to summary judgment on the issue of resale price maintenance.

Territorial and Customer Restrictions

CAC's allegations relating to territorial and customer restrictions include claims that (1) CAC was restricted to sales in a geographical territory that included North Carolina, South Carolina, Georgia, Alabama, and Eastern Tennessee, (2) CAC was prohibited from selling or attempting to sell GenRad products to the General Services Administration (GSA), and (3) CAC was prohibited from selling GenRad products to other Grason-Stadler division sales representatives who were not GenRad distributors.

Once again CAC has made no attempt to [**15] show any adverse effect upon competition in any relevant market as a result of the alleged territorial and customer restrictions. CAC has made no study or other analysis of the other competitors in the market, or to what extent, if any, overall competition has been impaired as a result of the alleged restrictions. CAC has limited its analysis to its own very rough estimates of its gross sales allegedly lost as a result of the alleged imposition of territorial and customer restrictions. Consequently, the defendant GenRad is entitled to summary judgment on this issue. *Continental TV, Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*; *Sherman v. British Leyland Motors Limited, 601 F.2d 429, 450 (9th Cir. 1979)*; *The Sports Center, Inc. v. Riddell, Inc., 673 F.2d 786, 791 (5th Cir. 1982)*.

Although it is undisputed that GenRad (and not CAC) was the manufacturer of the products in question and that CAC acted solely as a distributor of some of these products, CAC argues that because GenRad elected to make direct sales through its own sales force in addition to indirect sales through distributors such as CAC, GenRad and CAC were therefore competitors [**16] operating at the same level of [*1316] the market; and that the alleged imposition of territorial and customer restrictions by GenRad were therefore "horizontal" rather than "vertical," thereby mandating *per se* antitrust treatment pursuant to the teaching of *United States v. Topco Associates, 405*

U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972). That argument must be rejected by the court due to the absence of evidence that the alleged restrictions emanate from and work to the benefit of other distributors who are competitors of the injured distributor, which is not even alleged here. Rice Tire Co. v. Michelin Tire Corp., 638 F.2d 15 (4th Cir. 1981), cert. denied, 454 U.S. 864, 70 L. Ed. 2d 164, 102 S. Ct. 324 (1981); Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001 (5th Cir. 1981), cert. denied, 454 U.S. 827, 102 S. Ct. 119, 70 L. Ed. 2d 102 (1981); The Sports Center, Inc. v. Riddell, Inc., 673 F.2d 786 (5th Cir. 1982); Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348 (9th Cir. 1982). CAC has offered no evidence nor has it even contended that the alleged territorial and customer restrictions originated anywhere other than [**17] with GenRad. Consequently, the court considers rule-of-reason analysis to be appropriate to this issue, which mandates summary judgment for defendant GenRad.

Termination of CAC

Even though the amended complaint at Paragraph 9 specifically alleges the "period involved" in Count One to be December 1974 until February 1979, read in the light most favorable to the plaintiff CAC and considered in conjunction with the entire record, it appears to include a complaint of unlawful termination by GenRad of CAC's distribution rights to GenRad products. Furthermore, in its answer to Interrogatory No. 2, CAC affirmatively states its contention that GenRad conspired with its former Grason-Stadler division and its president, Rufus Grason, in terminating CAC as a distributor. Consequently, for the purpose of these cross-motions for summary judgment, the court will consider CAC's claims to include one claim to the effect that GenRad unlawfully conspired with Grason-Stadler and Rufus Grason to terminate CAC's distributorship. A careful and close review of the entire record indicates no evidence of a conspiracy between Grason-Stadler and GenRad. CAC's own witnesses have testified to the [**18] contrary. Mr. Doyle Chandler testified that "a decision had been made at a corporate level [at GenRad] to sell direct and bypass distributors" and that he had no information regarding the termination other than the information contained in the letter he received from GenRad (GenRad Exhibit 62). Other former CAC employees confirmed GenRad's position that it made an internal, unilateral decision to terminate CAC and its other distributors. The documentary evidence before the court, as well as deposition testimony from GenRad personnel, is uniform to the effect that GenRad's decision was internal and unilaterally made. The voluminous documentary evidence in the record is also uniform to the effect that GenRad was motivated by a desire to reduce distribution costs in terminating all of its remaining distributors. There is no evidence in the record which indicates that GenRad in any way singled out CAC or that GenRad's decision to terminate its distributors was anything other than a unilateral decision to terminate all distributors in an effort to reduce distribution costs.

Since there is no evidence in the voluminous record that GenRad's action in terminating CAC and its other [**19] remaining distributors was other than unilaterally made, GenRad is entitled to summary judgment on this issue. United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919); Virginia Academy of Clinical Psychologists v. Blue Shield of Virginia, 624 F.2d 476, 483 (4th Cir. 1980); Hester v. Martindale-Hubbell, Inc., 659 F.2d 433, 436 (4th Cir. 1981); Call Carl, Inc. v. BP Oil Corp., 554 F.2d 623 (4th Cir. 1977), cert. denied, 434 U.S. 923, 54 L. Ed. 2d 280, 98 S. Ct. 400 (1977).

Clayton Act, § 3 Violations

Count Two of CAC's amended complaint alleges that GenRad imposed an exclusive dealing requirement upon CAC, thereby violating § 3 of the Clayton Act, 15 U.S.C. [*1317] § 14, in addition to Section 1 of the Sherman Act, 15 U.S.C. § 1, as discussed above.

Section 3 of the Clayton Act, 15 U.S.C. § 14, provides in pertinent part: HN12 [↑]

It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods . . . or other commodities . . . for use, consumption, or resale within the United States . . . on the condition, agreement, or understanding that the lessee [**20] or purchaser thereof shall not use or deal in the goods . . . or other commodities of a competitor or competitors of the lessor or seller, where

the effect of such lease, sale, or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

Exclusive dealing arrangements normally take the form of an agreement whereby a purchaser agrees to purchase exclusively for a significant period of time from one supplier. The perceived evil in such an agreement is that it may foreclose the supplier's competitors from the market represented by the purchaser for the period of time involved. Exclusive dealing arrangements have traditionally been treated somewhat more leniently than tying arrangements because of the recognition that exclusive dealing arrangements may have pro-competitive effects and may be motivated by other than anti-competitive desires on the part of the seller. Consequently, exclusive dealing arrangements have not been considered *per se* illegal, and before reaching a decision, the courts have made at least some analysis of the competitive effects of the exclusive dealing [**21] arrangement. *Tampa Electric Co. v. Nashville Coal Co.*, 365 U.S. 320, 329, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961). In *Tampa Electric*, the Court made it clear that [HN13](#) [↑] no liability for exclusive dealing arises under either § 3 of the Clayton Act or [§ 1](#) of the Sherman Act absent a showing that there is a probability of foreclosure of competition in a substantial share of the line of commerce affected. *Tampa Electric*, 365 U.S. at 335.

The record in the instant case lacks any evidence of an exclusive dealing arrangement.² Assuming, however, the existence of an exclusive dealing arrangement, summary judgment is nevertheless appropriate in this case because the plaintiff has failed to present the relevant economic analysis. There is no evidence that GenRad's competitors or the ultimate consumers of portable sound measurement products were affected in any way. CAC has not attempted to show any adverse impact on overall competition resulting from the alleged exclusive dealing arrangement. In addition, the plaintiff has failed to show any injury to it due to the alleged conduct. Consequently, the defendant is entitled to summary judgment on this issue.

[**22] Attempt to Monopolize

[HN14](#) [↑] [Section 2](#) of the Sherman Act makes it unlawful to "attempt to monopolize . . . any part of the trade or commerce among the several states." [15 U.S.C. § 2](#).

The basic principles governing application of [§ 2](#) of the Sherman Act have been concisely stated by the Fourth Circuit. "There [HN15](#) [↑] is no attempt to monopolize within the prohibition of [§ 2](#) of the Sherman Act, unless there is both an intent to monopolize and a "dangerous probability" that an actual monopoly will be achieved." *White Bag Co. v. International Paper Co.*, 579 F.2d 1384, 1387 (4th Cir. 1974) (citations omitted). Consequently, the first task that must be undertaken by any antitrust plaintiff alleging attempted monopolization under [§ 2](#) of the Sherman Act is to define and establish a relevant market, consisting both of a relevant product market and a relevant geographic market. While the parties agree that the relevant geographic market is the United States, the parties do not agree on the relevant product market. More importantly, the record is void of any attempt by CAC to ascertain the facts from which the relevant product market contended by it [*1318] might be inferred. CAC contends [**23] that the relevant product market consists of portable sound measuring devices of the type sold by GenRad to its distributors. However, there is no basis in the record from which a reasonable jury could infer that the relevant product market in this action should be limited to only those portable sound measuring devices which GenRad sold to CAC while it was a distributor. CAC has provided the court with absolutely no analysis relating to functional interchangeability of products or the cross-elasticity of demand for products, which is its [HN16](#) [↑] burden in order to establish a relevant product market. *United States v. E.I. DuPont de Nemours & Co.*, 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). In *DuPont*, the Supreme Court summarized the rule as follows:

The "market" which one must study to determine when a producer has monopoly power will vary with the part of commerce under consideration. The tests are constant. That market is composed of products that have reasonable interchangeability for the purposes for which they reproduced -- price, use, and qualities considered.

² See Sherman Act, [§ 1](#) Violations, *supra*.

DuPont, 351 U.S. at 404. Here, CAC has assumed a product market limited to products it [**24] purchased from GenRad. That assumption does not meet CAC's burden of providing some analysis of functional interchangeability and cross-elasticity of demand and supply from which a jury could reasonably find a product market. Consequently, CAC's § 2 claim fails initially because of plaintiff's failure to establish a relevant product market. United States v. Empire Gas Corp., 537 F.2d 296 (8th Cir. 1976), cert. denied, 429 U.S. 1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 (1977).

The voluminous record established by the parties in this litigation also fails to demonstrate a dangerous probability of GenRad's achieving monopoly power in any relevant market. There is no evidence that GenRad achieved the dominance of the market necessary to create a monopoly assuming GenRad did possess the requisite intent. CAC does not contend that GenRad ever achieved more than a fifty percent market share, which negates the element of a dangerous probability of success. CAC accepts GenRad's estimate of forty-nine percent as GenRad's market share. That alone is insufficient to show a dangerous probability of success. Empire Gas, supra; Hiland Dairy, Inc. v. Kroger Co., 402 F.2d 968, 974 [***25] (8th Cir. 1968), cert. denied, 395 U.S. 961, 23 L. Ed. 2d 748, 89 S. Ct. 2096. CAC has also failed to show any impact on any relevant market attributable to any activity of GenRad. That failure negates the element of dangerous probability of success. Pacific Eng'r & Prod. Co. v. Kerr-McGee Corp., 551 F.2d 790 (10th Cir. 1977), cert. denied, 434 U.S. 879, 98 S. Ct. 234, 54 L. Ed. 2d 160 (1977). Summary judgment is appropriate as to the issue of attempted monopolization.

North Carolina Antitrust Claims

Count Four of CAC's amended complaint alleges that the same acts and conduct on the part of GenRad which CAC contends violate § 1 of the Sherman Act also violate §§ 75-1, 75-5(b)(2), 75-5(b)(3), and 75-1.1 of the North Carolina General Statutes. For the reasons stated above as to why GenRad is entitled to summary judgment on CAC's claims under § 1 of the Sherman Act, GenRad is also entitled to summary judgment under these sections of the North Carolina "antitrust" statutes. Rose v. Vulcan Materials Co., 282 N.C. 643, 655, 194 S.E.2d 521, 530 (1973). In addition, the court notes that HN17 [**26] whether or not a certain act or practice violates N.C. Gen. Stat. § 75-1.1 [**26] is a question of law to be determined by the court. In this regard, taking the evidence in the light most favorable to the plaintiff CAC, the court sees no act or practice demonstrated in the record on the part of GenRad which would be violative of N.C. Gen. Stat. § 75-1.1. Finally, as was noted above, CAC has made absolutely no effort to demonstrate any effect upon overall competition in any relevant market. Johnson v. Phoenix Mutual Life Insurance Co., 300 N.C. 247, 266 S.E.2d 610 (1980); Marshall v. Miller, 302 N.C. 539, 276 S.E.2d 397 (1981).

[*1319] Breach of Contract

CAC contends that GenRad breached the terms and provisions of the distributor agreement as follows:

1. By failing to refer customer orders as required;
2. By withholding measurement instruments from CAC and pre-empting CAC's territory by making direct sales to CAC's customers;
3. By conducting a telephone sales campaign in which GenRad allegedly secretly contacted and misled CAC's customers for the purpose of making direct sales to them; and
4. By engaging in conduct and activities which impaired and eventually nullified CAC's rights under the distributor agreement.

[**27] Although the written agreement between the parties is silent on the subject of referral of customer orders, GenRad's "Statement of General Radio Company Distributor Policy" contains the following provision regarding referral of customer orders:

Customer orders received at GenRad district offices for small quantities of standard catalog items are to be referred to the nearest distributor subject to the following. All referrals will be based on the known availability of the required items in the distributor's stock. The distributor is expected to refer to GenRad all orders falling

below the quantity limits normally handled by the distributor in the usual course of business and orders for items requiring modification or special design.

CAC offers no testimony or documentary evidence which tends to show that GenRad breached the foregoing provision of its distributor policy, assuming that such policy was a part of the agreement between the parties.

The only evidence in the record that GenRad withheld products from CAC is to the effect that GenRad did so when CAC was on "credit hold" and was not paying for products which CAC had ordered and which GenRad had already shipped [**28] to CAC. The court finds no evidence of GenRad's withholding any products from CAC in violation of the agreement between the parties.

With regard to GenRad's direct telephone selling campaign, the court again finds no evidence that GenRad secretly contacted or misled any of CAC's customers for any purpose. There is evidence in the record that GenRad conducted a direct telephone selling campaign beginning in the spring of 1978. However, there is no evidence that any calls were made which were not authorized by the agreement between the parties; nor is there any evidence that GenRad said or did anything improper in the course of any such calls. The agreement between the parties allowed GenRad to compete directly with CAC in the sale of GenRad products. Consequently, the fact of the direct telephone selling campaign and the fact of GenRad's making sales calls on customers or potential customers which CAC either was soliciting or wanted to solicit is specifically authorized under the agreement.

Finally, the record is clear that GenRad complied with the agreement between the parties in terminating CAC as a distributor. GenRad gave CAC the notice in writing to which it was entitled [**29] before terminating the distributor agreement between the parties.

For the foregoing reasons, GenRad is entitled to summary judgment with regard to CAC's claim for breach of contract.

Common Law Unfair Competition

The final contention is that GenRad, by engaging in the acts and conduct which CAC contends violate § 1 of the Sherman Act, also violated the common law of unfair competition, both in the United States and in North Carolina.

At the outset, the court questions whether there is any separate federal law of unfair competition. In Erie R. Co. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 822, 82 L. Ed. 1188 (1938), Justice Brandeis, writing for the Supreme Court, said: "Except HN18[[↑]] in matters governed by the Federal Constitution or by acts of Congress, the law to be applied in any case is the law of the State . . . [*1320] There is no Federal general common law."

Traditionally at common law, including that of North Carolina, HN19[[↑]] the tort of unfair competition consisted of acts or practices by a competitor which are likely to deceive the consuming public. Charcoal Steak House of Charlotte, Inc. v. Staley, 263 N.C. 199, 139 S.E.2d 185 (1964). The tort has traditionally [**30] been applied to practices such as trademark or trade name infringement, imitation of a competitor's product or its appearance, interference with a competitor's contractual relations, disparagement of a competitor's product or business methods, and misappropriation of a competitor's intangible property rights such as advertising devices or business systems. Note, "Unfair Competition -- Law of Unfair Competition in North Carolina," 46 N.C.L.R. 856 (1967-68).

A thorough review of the record before this court discloses no evidence that GenRad has damaged CAC by engaging in any practice heretofore determined to constitute common law unfair competition, nor does it disclose any evidence of any practice by GenRad which, though not yet crystallized as an act of unfair competition, would shock the judicial sensibilities of this court. Consequently, GenRad is entitled to summary judgment on that issue.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN1[] Public Enforcement, State Civil Actions

Similar standards should govern judicial review of proposed settlements in both parens patriae actions and private class actions. The essential inquiry is whether the proposed settlement is fair, adequate, and reasonable. The relevant analysis is bifurcated into inquiries on the fairness and the adequacy of the proposed settlement.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN2[] Settlements, Settlement Agreements

The factors tending to reveal the fairness of a settlement are those which indicate the presence or absence of collusion among the parties. Because of the danger of counsel's compromising a suit for an inadequate amount for the sake of insuring a fee, the court is obligated to ascertain that the settlement was reached as a result of good-faith bargaining at arm's length. The good faith of the parties is reflected in such factors as the posture of the case at the time settlement is proposed, the extent of discovery that has been conducted, the circumstances surrounding the negotiations and the experience of counsel.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN3 Settlements, Settlement Agreements

In evaluating the adequacy of a proposed settlement, the court must weigh the likelihood of the plaintiff's recovery on the merits against the amount offered in settlement. This necessarily requires the court to make a careful assessment of all the facts and a thorough analysis of the applicable law. It is not, of course, necessary or desirable to try the case to determine whether a settlement is adequate since the very purpose of settlement is to avoid the trial of sharply disputed issues and to dispense with wasteful litigation.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN4 Settlements, Settlement Agreements

In assessing the adequacy of the proposed settlement, courts should weigh the amount tendered to the plaintiffs against such factors as: (1) the relative strength of the plaintiffs' case on the merits, (2) the existence of any difficulties of proof or strong defenses the plaintiffs are likely to encounter if the case goes to trial, (3) the anticipated duration and expense of additional litigation, (4) the solvency of the defendants and the likelihood of recovery on a litigated judgment, and (5) the degree of opposition to the settlement.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Criminal Law & Procedure > Preliminary Proceedings > General Overview

Evidence > ... > Preliminary Questions > Admissibility of Evidence > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN5 Class Actions, Compromise & Settlement

In a class action, the determination of whether a proposed settlement is fair and reasonable is normally at least a two-step procedure. The first step involves a preliminary determination of whether to give notice of the proposed settlement to members of the class and whether to schedule a hearing at which to receive evidence in support of and in opposition to the proposed settlement. Unless the judge is preliminarily satisfied that the proposed settlement is within the range of possible approval, there is no point in proceeding with notice and a hearing. Accordingly, rather than automatically accepting the assurances of counsel that the proposed settlement is a good one and should be submitted to the class members, it is usually desirable to have a preliminary hearing.

Civil Procedure > Judicial Officers > Judges > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN6 Judicial Officers, Judges

A preliminary hearing on whether a proposed settlement is fair and reasonable is not a definitive proceeding, and the judge must be careful to make clear that the determination permitting notice to members of the class is not a finding that the settlement is fair, reasonable, and adequate. In appraising the possibilities and probabilities of recovery and the possible range of damages for the purposes of submitting or approving the settlement proposal, the judge should carefully avoid expression of any opinion that constitutes a prejudgment of the outcome of the litigation or a final judgment on the merits. On the contrary, he should make clear that it is simply a determination that there is, in effect, probable cause to submit the proposal to members of the class and to hold a full-scale hearing on its fairness, at which all interested parties will have an opportunity to be heard and after which a formal finding on the fairness of the proposal will be made.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN7 Settlements, Settlement Agreements

While a court might insist on certain different provisions if it had participated in the settlement negotiations, the court should not substitute its business judgment for the business judgment of the parties whose business is involved.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN8 Settlements, Settlement Agreements

Whether the commitment the settling defendants make to cooperate with plaintiffs will certainly benefit the classes, is an appropriate factor for a court to consider in approving a settlement.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN9 Settlements, Settlement Agreements

The presence of public law enforcement officers in the settlement process is an appropriate element for the court to consider in approving that settlement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Justiciability > Standing > General Overview

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

HN10 Prerequisites for Class Action, Adequacy of Representation

The primary purpose of *Fed. R. Civ. P. 23(e)* is to protect the absentee class member from the entry of a binding judgment when his interests have not been adequately represented. Consequently, while the contexts, results and formulations have varied somewhat, the general rule is that a non-settling defendant has no standing to object to a proposed settlement unless his formal, legal rights are prejudiced by the settlement. Non-settling defendants have standing to object to proposed court approval only when the settlement would alter their formal, legal rights. In particular, non-settling defendants do have standing to object to proposed court approval of a settlement which would bar their rights of contribution and indemnity from settling defendants.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Settlements > Settlement Agreements > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN11[**Class Actions, Compromise & Settlement**

The unique res judicata aspects of a class action judgment mandate judicial solicitude on behalf of the absentee class members at the time of a proposed class action settlement, but this does not compel the court to assume the unaccustomed role of general arbiter of the substantive fairness of a settlement vis-a-vis all parties to the action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN12[**Class Actions, Certification of Classes**

The conditional determination of a temporary settlement class does not constitute an all purposes certification, and in particular does not certify a litigation class should the supervising court subsequently disapprove the proposed settlement.

Opinion

[*1380] MEMORANDUM OPINION AND ORDER

YOUNG, United States District Judge

The above numbered action is a multidistrict antitrust litigation involving six *parens patriae* actions, [15 U.S.C. § 15c](#), and two private treble damage actions, [15 U.S.C. § 15](#). See generally *In Re Mid-Atlantic Toyota Antitrust Litigation*, [560 F. Supp. 760 \(D. Md. 1983\)](#). All plaintiffs and several defendants have submitted a proposed settlement ("the Settlement") to the Court for approval pursuant to [15 U.S.C. \[*1381\] § 15c\(c\)](#) and [Fed.R.Civ.P. 23\(e\)](#). The Court has heard the parties' comments on the terms of the Settlement at open hearings on April 29, 1983 and May 26, 1983. In addition, all parties have submitted lengthy memoranda outlining [**2] their views on the merits of the Settlement. After careful consideration of the parties' contentions and the relevant authorities, the Court enters an

order preliminarily approving the Settlement in its entirety and conditionally determining a temporary settlement class ancillary to the main *parens patriae* classes. The Court stresses the preliminary and conditional nature of these two rulings; they will be followed by another hearing and ruling on 1) the final approval of the Settlement and 2) the possible certification of a permanent settlement class. The principal legal effect of the present order is to allow notice to issue to the potential beneficiaries of the Settlement. The Court will make a final adjudication of the rights of these potential beneficiaries only after they have had a full opportunity to be heard and to exercise any "opt-out" rights they may possess. A fuller explanation of the details of and legal basis for these rulings follows.¹

[**3] All plaintiffs have sued two classes of defendants: Toyota dealers in Delaware, Maryland, Pennsylvania, Virginia, West Virginia, and the District of Columbia ("Dealer defendants"); and several entities essentially comprising the single Toyota distributor for the six jurisdictions ("Distributor defendants").² The plaintiffs allege that both sets of defendants have conspired together in violation of § 1 of the Sherman Act, 15 U.S.C. § 1, to force purchasers of certain new 1980 Toyotas to pay more for their cars than they would have paid in the absence of a conspiracy. After extensive briefing by the parties, the Court, at some length, denied the bulk of defendants' motions for summary judgment and held that the case could proceed to trial under a *per se* theory of liability. *In Re Mid-Atlantic Toyota Antitrust Litigation, 560 F. Supp. 760 (D. Md. 1983)*.

[**4] While the summary judgment motions were *sub curia*, counsel for the plaintiffs and Distributor defendants commenced serious settlement negotiations in December, 1982. The negotiating parties did not permit Dealer defendants to participate in these discussions, although they informed Dealer defendants of the basic form of the Settlement by the middle of March, 1983. After four months of intensive negotiations, plaintiffs and Distributor defendants signed the Settlement on April 14, 1983. The Settlement does not purport to seek an order of the Court unilaterally altering any of the formal, legal rights of the non-signatory Dealer defendants. However, the Settlement does give each Dealer defendant the option of joining in the Settlement on or before May 29, 1983. An attempt at a "global" resolution of this litigation, the Settlement explicitly informs the Dealer defendants of the rights and liabilities they would assume if they choose to join. In addition, the Settlement warns them, in advance, that plaintiffs have reserved the option to rescind their agreement with any individual Dealer defendant if the number of Dealer defendants joining the Settlement does not reach a certain [**5] "critical mass."³ The Settlement is intended to be [*1382] final as between the plaintiffs and Distributor defendants regardless of the number of Dealer defendants who elect to join.

The Settlement is lengthy and complex and the Court will summarize only its most salient features, focusing primarily on the results contemplated if all Dealer defendants join the Settlement. In such a situation, the Settlement mandates the issuance of "certificates" or "scrips" to eligible class members. With one small exception, each of the certificates may be redeemed for (1) \$250.00 worth of retail value goods, services or trade-in allowance from a participating Dealer defendant, (2) \$135.00 in cash, or (3) some proportionate mixture of the two. While [**6] the certificates are freely negotiable for redemption in cash, only the initial recipient of the certificate may exercise the goods, services or trade-in allowance option. These certificates will be distributed to all those who purchased a

¹ While the United States Court of Appeals for the Fifth Circuit has detailed at length why an interlocutory order preliminarily approving a proposed settlement and conditionally determining a temporary settlement class is not appealable, *In Re Beef Industry Antitrust Litigation, 607 F.2d 167, 180-83 (5th Cir. 1979)* (Wisdom, J.), the Court has attempted to provide counsel with a written opinion on relatively "short order" should any party choose to seek immediate appellate relief. Consequently, this opinion cannot be quite as comprehensive as might otherwise be appropriate. The Court refers the reader interested in the nature and background of this litigation to its recent summary judgment opinion. *In Re Mid-Atlantic Toyota Antitrust Litigation, 560 F. Supp. 760 (D. Md. 1983)*.

² The Court has on occasion referred to the "Distributor defendants" as the "Weisman defendants" to stress the role played within them by defendant Frederick R. Weisman. The terms "Distributor defendants" and "Weisman defendants" should be considered to be synonyms.

³ Section 26 of the Settlement mandates that the plaintiffs retain a right of rescission against participating Dealer defendants unless Dealer defendants settling in at least two thirds of the relevant sales of 1980 Toyotas join the Settlement on or before May 29, 1983.

new 1980 Toyota from one of the Dealer defendants, provided that the vehicle purchased had an accessory which (1) had a list or "sticker" price of at least \$425.00 and (2) had at least two of the five components of the so-called "Protective Package" which has formed the basis of this litigation: rust-proofing, exterior paint sealant, undercoating, fabric or vinyl interior protection, and a motor club membership.

The Settlement provides an elaborate procedural mechanism, complete with an adjudicative "Settlement Committee," for determining the identities and number of the actual beneficiaries of the Settlement. While its intricacies need not be outlined here, the Court stresses that all who purchased a new 1980 Toyota from one of the Dealer defendants will be provided with notice and an opportunity to be heard on the issue of whether they qualify as beneficiaries of the Settlement.

The cost of redeeming the certificates will be borne by a Settlement **[**7]** Fund. The Fund shall consist of a contribution of up to \$2,900,000.00 from the Distributor defendants, a contribution of up to \$1,925,000.00 from the Dealer defendants, and accrued interest. The defendants will be permitted to make less than their maximum contributions only if the total number of identified beneficiaries falls below the 35,000 currently estimated by the parties. The anticipated accrual of interest will allow the issuance of certificates for their full value for up to 36,500 beneficiaries. If the number of beneficiaries exceeds 36,500, then the value of an individual certificate may be reduced.

A Settlement beneficiary may either (1) cash the certificate directly, (2) obtain goods, services or trade-in value from a Dealer defendant, or (3) obtain a proportionate combination of cash, goods, services or trade-in allowance from a Dealer defendant.⁴ If the beneficiary exercises any of these options with a Dealer defendant, the Distributor defendants will reimburse the Dealer defendant \$135.00, and will in turn be reimbursed by the Settlement Fund \$135.00. Thus, as the certificate entitles the beneficiary to \$250.00 worth of retail value goods, services or trade-in **[**8]** allowance, but the Dealer is only reimbursed \$135.00 in cash, the Dealer defendant absorbs the \$115.00 differential of lost retail profit, overhead, or direct costs.

Plaintiffs waive all rights to attorney's fees, except that they reserve the right to receive, in an amount approved by the Court, a segment of any excess Settlement Fund interest remaining after all claims and certain costs have been satisfied. Plaintiffs' counsel currently estimate that they will receive only a small fraction of the fees they have incurred in this case.⁵

The above **[**9]** scenario will only occur if all of the Dealer defendants join in the Settlement. The result occurring if less than all of the Dealer defendants join depends upon the number who join. If Dealer defendants accounting for at least two-thirds of the relevant 1980 transactions opt in, then plaintiffs will either (1) reduce the value of **[*1383]** the certificates or (2) delay their disbursement to allow accrued interest and possible executed judgments to make up the shortfall. If less than two-thirds opt in, then plaintiffs will elect either to (1) accept payments from the joining Dealer defendants or (2) rescind the Settlement with all joining Dealer defendants and continue the litigation with the Dealer defendants as a group. In any of these scenarios, the Distributor defendants will be dismissed from the case upon their payment of the amounts agreed upon and their cooperation in any continuing litigation against Dealer defendants.

The Settlement sets out the following schedule:

May 29, 1983 Deadline for Dealer defendants to join Settlement;

June 1, 1983 Distributor defendants pay 58.6% and Dealer defendants pay 30% of their total contributions;

*July **[**10]** 1, 1983 Parties complete preliminary identification of beneficiaries;*

⁴The only restriction upon the last option is that the beneficiary must use the certificate for at least \$100.00 worth of goods, services or trade-in allowance.

⁵While the Settlement is not clear, it appears that plaintiffs' counsel in the private actions will share in this award of fees.

August 1, 1983 Settlement Committee completes resolution of disputes over preliminary identification of beneficiaries;

September 1, 1983 Notice mailed to purchasers of new 1980 Toyotas from Dealer defendants informing them of the preliminary identification of their status to participate/not participate in Settlement;

September 1, 1983 Distributor defendants pay approximately 38.4% and Dealer defendants pay 30% of their contributions;

October 1, 1983 Deadline for recipients of notice who were not preliminarily identified as beneficiaries to submit contrary evidence;

November 1, 1983 Settlement Committee makes final determination of eligible beneficiaries;

November 15, 1983 Relevant purchasers informed of Settlement Committee's decisions of November 1, 1983;

December 1, 1983 Deadline for requesting reconsideration by Settlement Committee;

January 1, 1984 Settlement Committee files final list of beneficiaries with Court;

February 1, 1984 To extent necessary, Distributor defendants pay \$100,000.00 and Dealer defendants pay 40% of remaining [**11] contributions; and

March 1, 1984 Earliest possible date of disbursement to beneficiaries.

Obviously, the above schedule will be delayed if an insufficient number of Dealer defendants choose to opt in. Payments from the Distributor defendants and any eligible Dealer defendants will accumulate interest in the Settlement Fund, but disbursement will await the outcome of the continuing litigation with the remaining Dealer defendants.

STANDARDS FOR PRELIMINARY APPROVAL

HN1[] Similar standards should govern judicial review of proposed settlements in both *parens patriae* actions and private class actions. In *Re Montgomery County Real Estate Antitrust Litigation*, 83 F.R.D. 305, 315 n.9 (D. Md. 1979). The essential inquiry is whether the proposed settlement is fair, adequate, and reasonable. See, e.g., In *Re Corrugated Container Antitrust Litigation*, 643 F.2d 195, 207 (5th Cir. 1981); In *Re Beef Industry Antitrust Litigation*, 607 F.2d 167, 179-80 (5th Cir. 1979); *Montgomery County*, 83 F.R.D. at 305; *Manual for Complex Litigation* § 1.46 at 56-57 (5th Ed. 1982). The late Judge Blair of this District bifurcated the relevant analysis into inquiries on [**12] the "fairness" and the "adequacy" of the proposed settlement. On the element of "fairness," Judge Blair indicated:

HN2[] The factors tending to reveal the fairness of a settlement are those which indicate the presence or absence of collusion among the parties. Because of the danger of counsel's compromising a suit for an inadequate amount for the sake of insuring a fee, the court is obligated to ascertain that the settlement was reached as a result of good-faith bargaining at arm's length. The good faith of the parties is reflected in such factors as the posture of the case at the time settlement is proposed, the extent of discovery that has been conducted, the circumstances [*1384] surrounding the negotiations and the experience of counsel.

Montgomery County, 83 F.R.D. at 315 (citations omitted). Judge Blair then addressed the second element of "adequacy":

HN3[] In evaluating the 'adequacy' of a proposed settlement, the court must weigh the likelihood of the plaintiff's recovery on the merits against the amount offered in settlement. This necessarily requires the court to make a careful assessment of all the facts and a thorough analysis of the applicable law. [**13] It is not, of course, necessary or desirable to 'try' the case to determine whether a settlement is adequate since the very purpose of settlement is 'to avoid the trial of sharply disputed issues and to dispense with wasteful litigation.'

HN4 In assessing the adequacy of the proposed settlement, courts should weigh the amount tendered to the plaintiffs against such factors as (1) the relative strength of the plaintiffs' case on the merits; (2) the existence of any difficulties of proof or strong defenses the plaintiffs are likely to encounter if the case goes to trial; (3) the anticipated duration and expense of additional litigation; (4) the solvency of the defendants and the likelihood of recovery on a litigated judgment; and (5) the degree of opposition to the settlement.

Id. at 315-16 (citations omitted).

The Court must apply these two general standards within the unique context of a preliminary approval determination. While neither *Fed.R.Civ.P. 23(e)* nor *15 U.S.C. § 15c(c)* specify that a court must follow any particular procedure, the Court has chosen to utilize § 1.46 of the *Manual on Complex Litigation* as a rough procedural framework for reviewing the Settlement. **[**14]** The *Manual* is not mandatory authority, and itself stresses that its "suggestions" need not be strictly adhered to in every application. *Manual on Complex Litigation, supra*, at xx. However, the Court will give the *Manual's* recommendations every consideration when appropriate in the particular instance. The *Manual* specifically recommends a preliminary approval procedure:

HN5 In a class action, the determination of whether a proposed settlement is fair and reasonable is normally at least a two-step procedure. The first step involves a preliminary determination of whether to give notice of the proposed settlement to members of the class and whether to schedule a hearing at which to receive evidence in support of and in opposition to the proposed settlement. Unless the judge is preliminarily satisfied that the proposed settlement is within the range of possible approval, there is no point in proceeding with notice and a hearing.

Accordingly, rather than automatically accepting the assurances of counsel that the proposed settlement is a good one and should be submitted to the class members, it is usually desirable to have a preliminary hearing.

Such **HN6** a preliminary **[**15]** hearing is not, of course, a definitive proceeding on the fairness of the proposed settlement, and the judge must be careful to make clear that the determination permitting notice to members of the class is not a finding that the settlement is fair, reasonable, and adequate. In appraising the possibilities and probabilities of recovery and the possible range of damages for the purposes of submitting or approving the settlement proposal, the judge should carefully avoid expression of any opinion that constitutes a prejudgment of the outcome of the litigation or a final judgment on the merits. On the contrary, he should make clear that it is simply a determination that there is, in effect, "probable cause" to submit the proposal to members of the class and to hold a full-scale hearing on its fairness, at which all interested parties will have an opportunity to be heard and after which a formal finding on the fairness of the proposal will be made.

Id., § 1.46 at 62, 64-65. See *Armstrong v. Board of School Directors*, 616 F.2d 305, 314 (7th Cir. 1980); *Montgomery County*, 83 F.R.D. at 313. The Court adopts this general procedure for the present case.

[*1385] **[16]** "FAIRNESS" OF THE SETTLEMENT**

Probable cause exists that the Settlement was reached as a result of good faith bargaining at arms length. The four primary participants in the negotiations were two of the chief law enforcement officers of the State of Maryland, a senior partner in one of the most prominent litigation firms in the country, and a former Attorney General of the United States. The Settlement emerged only after several years of hard but honestly fought litigation which has produced one interlocutory appellate decision and four lengthy rulings by the Court. The very intricacy and comprehensiveness of the Settlement suggests the professionalism of its origins. While the Court in no way prejudges the issue of "fairness," and stands ready to entertain any evidence which may subsequently be submitted on the issue, the Court has no problem in finding at the present that probable cause exists that the Settlement was arrived at in an appropriate manner.

"ADEQUACY" OF THE SETTLEMENT

Similarly, the "adequacy" of the Settlement is well within the range of "possible approval." **HN7** While the Court might have insisted on certain different provisions had it been a participant in the **[**17]** negotiations, the Court

should not substitute its business judgment for the business judgment of the parties whose "business" is involved. *McDonald v. Chicago Milwaukee Corp.*, 565 F.2d 416, 426-27 (7th Cir. 1977). Focusing instead on the factors Judge Blair suggested, the Court notes that its recent summary judgment ruling implies that the case would probably go to the jury on a *per se* theory of antitrust liability.⁶ On the other hand, the summary judgment ruling only resolves the issue of antitrust "injury" on the level of facial allegations, and does not foreclose a subsequent directed verdict for defendants on that basis should it appear appropriate. In *Re Mid-Atlantic Toyota Antitrust Litigation*, 560 F. Supp. 760, slip op. at 63-67. If the case does go to the jury, the Court's experience with antitrust trials suggests that a finding of liability is a significant possibility.

[**18] The precise extent of damages, closely related to the existence of antitrust "injury" in the present case, is not altogether clear. *Id.* Indeed, the governing legal measure of damages was only recently specified by the Court. *Id.* slip op. at 66-67. However, as the summary judgment ruling indicates, each individual purchaser of a new 1980 Toyota with a Protective Package suffered damages (assuming liability) within the *specific range* of \$0 to \$535.00. If a sufficient number of Dealer defendants join the Settlement, then the previously described certificates will be issued to all such injured purchasers. The value of these certificates falls within the middle of the range of individualized damages, and may well be an appropriate balancing of the possibly fatal indeterminacy of damages⁷ [**19] on the one hand, *id.* slip op. at 63-66, and the potential trebling of damages on the other, see [15 U.S.C. §§ 15\(a\), 15c\(a\)\(2\)](#).⁸

If, alternatively, a sufficient number of Dealer defendants do not join the Settlement, then the "adequacy" of the Settlement would merit perhaps less scrutiny. [*1386] As federal **antitrust law** currently provides no right of contribution, *Texas Industries, Inc. v. Radcliff* [*20] *Materials, Inc.*, 451 U.S. 630, 68 L. Ed. 2d 500, 101 S. Ct. 2061 (1981), the classes would still be entitled to all of their potential recoveries. The Distributor defendants do appear to be the "deeper" and perhaps more uniformly solvent "pocket," but the \$80.00 per purchaser contribution they would make is certainly within the range of possible approval as "adequate."⁹ In addition, [HN8](#)[↑]] the commitment Distributor defendants have made to cooperate with plaintiffs will certainly benefit the classes, and is an appropriate factor for a court to consider in approving a settlement. In *Re Ampicillin Antitrust Litigation*, 82 F.R.D. 652, 654 (D. D.C. 1979); cf. *Wainwright v. Kraftco Corp.*, 58 F.R.D. 9, 12 (N.D. Ga. 1973) (fact that settling defendant will open files to plaintiff is a factor in concluding that class will not be prejudiced by partial settlement). Similar comments would apply to any Dealer defendant who joins a partial settlement.

[**21] Turning to some of the other factors Judge Blair enumerated, the Court agrees with the parties that continuation of this massive litigation will certainly entail significant costs for all involved. As some doubt exists about the solvency of certain Dealer defendants, approval of a settlement in which all of them participate might be prudent, although the Court places little weight upon this factor. Finally, [HN9](#)[↑]] the presence of public law enforcement officers in the settlement process is an appropriate element for the Court to consider in approving that settlement. *Mendoza v. United States*, 623 F.2d 1338, 1353 (9th Cir. 1980); *Marshall v. Holiday Magic, Inc.*, 550

⁶The Court again refers the reader interested in a more detailed assessment of the potential evidence to the April 4, 1983 summary judgment ruling.

⁷The Court stresses that the issue of "damages", like the issue of "injury," has only been resolved at the level of facial allegations. The Court in no way prejudgets the resolution of either of these issues when the matters are more fully developed.

⁸Dealer defendants assert that the Court would irrevocably err by preliminarily approving the Settlement before examining the States' economic evidence. While the *Manual on Complex Litigation* does suggest that a court examine the economic evidence before issuing a preliminary approval, *Manual on Complex Litigation*, *supra*, § 1.46 at 64, the Court believes that rigid application of this recommendation would not be appropriate in the present context. Production of economic evidence would necessitate several months delay, and would disrupt the Settlement's carefully negotiated timetable and equilibrium. In addition, the Court's thorough familiarity with the possible range of recoverable damages in this action leaves it fully satisfied that the Settlement falls within the possible range of adequate settlements.

⁹This is particularly true when one considers the interest which would accrue on their contribution pending resolution of the continuing litigation against non-settling Dealer defendants.

F.2d 1173, 1178 (9th Cir. 1977). Considering all of these factors, but once again not prejudging the issue, the Court finds the Settlement to be within the "possible range" of "adequacy."

The Court notes with some concern the contractual provisions providing for (1) a return to the defendants of certain unclaimed principal and (2) an award to the plaintiffs of attorney's fees from certain excess, unclaimed interest. These terms theoretically provide both sides with some financial incentive to minimize the number of **[**22]** beneficiaries. However, the Settlement has elaborate procedural safeguards favoring the identification of beneficiaries. In addition, the vast majority of beneficiaries will have their interests represented not by private counsel but instead by their respective attorneys general. In any event, the actual results of the identification process will come before the Court again. While these terms do give the Court pause, and certainly should be explored at the final approval hearing, they do not remove the Settlement from the range of possible approval. Similarly, some exploration of the competitive effect of the certificates might be merited later, but it should not derail the orderly workings of the settlement process at this point. Finally, the Court notes that the Settlement paints with a broad brush by providing identical awards to consumers who may have suffered disparate injuries and by giving benefits to certain groups who would not be entitled to participate in a judgment at all. However, the Court recognizes the administrative difficulties in "fine tuning" the Settlement to any greater level of precision than the twenty-four page document already contains. At present, **[**23]** the Court finds these disparities to be no grounds for summarily rejecting the carefully crafted proposal. If settling defendants choose to lavish their money on those they could not be legally liable to, that is their prerogative.

DEALER DEFENDANTS' OBJECTIONS

Numerous Dealer defendants have strongly objected to various provisions of the Settlement as unduly unfair to them. As of yet, these Dealer defendants have not become parties to the Settlement. The Court frankly acknowledges that, as it pointed out at the April 29 conference, many terms of the Settlement do impose burdens upon the Dealer defendants which do not appear to be equally shared by the Distributor defendants. Indeed, given the **[*1387]** fact that the States negotiated the Settlement exclusively with the Distributor defendants, one could scarcely expect otherwise. However, HN10¹⁰ the primary purpose of Fed.R.Civ.P. 23(e) is to protect the absentee class member from the entry of a binding judgment when his interests have not been adequately represented. Piambino v. Bailey, 610 F.2d 1306, 1327 (5th Cir. 1980); Shelton v. Pargo, 582 F.2d 1298, 1303 (4th Cir. 1978); Norman v. McKee, 431 F.2d 769, 774 **[**24]** (9th Cir. 1970); 7A C. Wright & A. Miller, Federal Practice and Procedure § 1797 at 226 (1972). Consequently, while the contexts, results and formulations have varied somewhat, the general rule is that a non-settling defendant has no standing to object to a proposed settlement unless his formal, legal rights are prejudiced by the settlement. Beef Industry, 607 F.2d at 172-73; 172-73 (5th Cir. 1979); *In Re Nissan Motor Co. Antitrust Litigation*, 552 F.2d 1088, 1103 n.17 (5th Cir. 1977) (blanket statement of no standing); *In Re Ampicillan Antitrust Litigation*, 82 F.R.D. at 654 (blanket statement of no standing); Seiffer v. Topsy's International, Inc., 70 F.R.D. 622, 631 n.11 (D. Kan. 1976) (blanket statement of no standing); Wainwright v. Kraftco Corp., 53 F.R.D. 78, 81 (N.D. Ga. 1971) (stating rule but refusing to issue ruling which would alter legal rights of non-settling defendants); Philadelphia Electric Co. v. Anaconda American Brass Co., 42 F.R.D. 324, 326 n.1 (E.D. Pa. 1967) (blanket statement of no standing); 3 Newberg on Class Actions, *supra*, § 5660b, at 564-65; cf. *In Re Viatron Computer Systems Corp. Litigation*, 614 F.2d 11, 14 (1st **[**25]** Cir. 1980) ("non-settling defendant does not ordinarily have standing to object to a court order approving a partial settlement"). Although some of these cases on occasion speak rather broadly of "prejudice" to the "rights" of the non-settling defendants, a careful analysis of the actual results reached in these decisions reveals that non-settling defendants have standing only when the settlement would alter their formal, legal rights. In particular, non-settling defendants do have standing to object to proposed court approval of a settlement which would bar their rights of contribution and indemnity from settling defendants. See Altman v. Liberty Equities Corp., 54 F.R.D. 620 (S.D. N.Y. 1972); Wainright v. Kraftco Corp., 53 F.R.D. at 81; 3 Newberg on Class Actions, *supra*, § 5660b, at 565. ¹⁰ In the present case, Dealer

¹⁰ Florida Power Corp. v. Granlund, 82 F.R.D. 690 (M.D. Fla. 1979), is the only case which has gone beyond protecting the non-settling defendants rights to indemnity and contribution. In *Granlund*, the court refused to approve a settlement which would create a previously non-existent right of indemnification in the settling defendant, expose the non-settling defendants to the risk

defendants have presented no arguments demonstrating that approval of the Settlement would produce a judicial order unilaterally altering their formal, legal rights.¹¹ **[**28]** While the Settlement does purport to outline various rights and responsibilities for the Dealer defendants, these rights and duties become obligatory upon an individual Dealer defendant **[**26]** only if that Dealer defendant chooses to assume them. In effect, the Dealer defendants request the Court to relieve them of the burden of making a tactical litigation decision which they regard as a Hobson's Choice. The Dealer defendants complain that they must choose between joining a burdensome settlement or proceeding through a protracted and expensive litigation with the Distributor defendants realigned against them. However, litigation is not an activity for the kind of heart or the gentle of **[*1388]** spirit. Fear of prosecution for a capital offense may impel a criminal defendant to plead guilty to a lesser charge, but this in no way implies that the plea is not voluntary, knowing, and intelligent. *Brady v. United States*, 397 U.S. 742, 755, 25 L. Ed. 2d 747, 90 S. Ct. 1463 (1970). Similarly, plaintiffs in ordinary civil actions routinely engage in a "divide and conquer" settlement strategy among multiple defendants. **HN11**[↑] The unique *res judicata* aspects of a class action judgment mandate judicial solicitude on behalf of the absentee class members at the time of a proposed class action settlement, but this does not compel the Court to assume the unaccustomed role **[**27]** of general arbiter of the substantive fairness of a settlement vis-a-vis all parties to the action.¹² The Court holds that the arguments made by Dealer defendants are not relevant to the preliminary determination of whether the Settlement is fair, adequate and reasonable.

[29] FORMATION OF A TEMPORARY SETTLEMENT CLASS**

The present *parens patriae* actions are pursued on behalf of natural persons currently residing within the respective plaintiff States who have not previously "opted out" of these actions. By negative implication, purchasers of new 1980 Toyotas in the Mid-Atlantic region who are "non-natural" commercial entities, who have since moved from the Mid-Atlantic region, or who have previously "opted out" of the *parens* actions are not currently participants in this litigation. Nevertheless, in keeping with its "global" scope, the Settlement purports to provide benefits to all who purchased a new 1980 Toyota from one of the Dealer defendants with an accessory which had a suggested retail price of at least \$425.00 and which included two or more items of the "Protective Package." To remedy this disparity between the compositions of the (1) current plaintiffs and (2) the proposed beneficiaries, the Court enters

of multiple litigation, and prohibit the non-settling defendants from exercising an otherwise valid *in pari delicto* defense. The Court notes that all of the rights vindicated in *Granlund* were once again formal, legal rights.

¹¹ Dealer defendants make no arguments relative to the potential impairment of their contribution rights. No right to contribution exists under the federal antitrust laws. *Texas Industries, Inc. v. Radcliff Materials, Inc.*, 451 U.S. 630, 68 L. Ed. 2d 500, 101 S. Ct. 2061 (1981). While the complaint also asserts violations of various state statutes, Section 28 of the Settlement expressly provides for a *pro rata* reduction of damages recovered by the plaintiffs against the non-settling defendants should a court subsequently determine that a right of contribution exists. Such a reduction would remove the right to contribution, since the non-settling defendants would not be liable for more than their proportionate share. See *Altman v. Liberty Equities Corp.*, 54 F.R.D. at 624.

¹² Dealer defendants attempt to distinguish the overwhelming mass of authority reviewed above on the grounds that none of the settlements under scrutiny in those cases purported to establish the terms upon which a non-signatory could join the agreement. While the Settlement does appear to be unique in that respect, the argument provides Dealer defendants with no relief. Under the above authorities, Dealer defendants would have had no standing to object to a pure partial settlement between plaintiffs and Distributor defendants which did not curtail their formal, legal rights. The fact that Distributor defendants would subsequently cooperate with the plaintiffs would be a "well established" ground for *approving* such a partial settlement. In *Re Ampicillin Antitrust Litigation*, 82 F.R.D. at 654. Given the Dealer defendants' clear lack of standing in a pure partial settlement, the fact that the signatory parties have attempted to give the Dealer defendants an alternative option to proceeding alone in this protracted litigation does not suddenly create standing. The "opt in" provisions of the Settlement do not lie at the root of the Dealer defendants' objections; the prospect of continuing this expensive litigation alone does. In purely practical terms, the existence of the global settlement with its "opt in" provision leaves the Dealer defendants better off than if Distributor defendants and plaintiffs had struck the standard "separate deal." As the signatory parties had the unquestioned right to leave the Dealer defendants as the sole defendants in this case, they certainly are free to provide the Dealer defendants with a potentially more palatable alternative to that situation. Simply put, "standing" cannot be conferred on Dealer defendants because of provisions in the Settlement which can only help the Dealer defendants.

an order conditionally determining a Temporary Settlement Class ¹³ [**32] in the "umbrella" multi-district action MDL-456. Counsel for the plaintiffs in Civ. Action Nos. Y-81-806 and Y-81-2954 shall be joint counsel for the Temporary Settlement [**30] Class. Current plaintiffs in Nos. Y-81-806 and Y-81-2954 [*1389] shall be the representative parties of the Temporary Settlement Class. The Temporary Settlement Class shall automatically expire when the Court issues a joint ruling on the issues of (1) the final approval or disapproval of the Settlement and (2) the certification or non-certification of a permanent settlement class.¹⁴ The Temporary Settlement Class shall consist of all purchasers of a new 1980 Toyota from a Dealer defendant who are not natural persons, who no longer reside in the Mid-Atlantic states (Delaware, Maryland, Pennsylvania, Virginia, West Virginia or the District of Columbia), or who have opted out of one of the six pending *parens patriae* actions. The Court has specifically expanded the Temporary Settlement Class to include some purchasers ostensibly not entitled to benefits under the Settlement. The reason for this expansion is to provide all purchasers of a new 1980 Toyota from a Dealer defendant with the procedural safeguards which the Settlement establishes for the accurate identification of its beneficiaries. Consequently, membership in the Temporary Settlement Class does not necessarily [**31] indicate membership in any later permanent settlement class. Members of the Temporary Settlement Class shall receive appropriate notice of their inclusion in the Temporary Settlement Class at the same time they receive notice of the Court's preliminary approval of the Settlement shall be mailed September 1, 1983, counsel should provide the Court with a Proposed Notice for Temporary Settlement Class members by August 1, 1983. This Proposed Notice should be fully supported by legal authority. See, e.g., *Beef Industry*, 607 F.2d at 178-79 (discussing legal sufficiency of notice).

Judge Minor Wisdom of the United States Court of Appeals for the Fifth Circuit has provided a comprehensive review of the authorities and policies supporting the creation of a temporary settlement class. *Beef Industry*, 607 F.2d at 173-78.¹⁵ The Court will not repeat those arguments here, except to note that the principal practical benefit of a joint order preliminarily approving a proposed settlement and conditionally determining a temporary settlement class is that it clearly establishes the financial benefits of participating in a class settlement and hence provides the putative class members with a more informed choice for opting in or out of the class. As Judge Wisdom summarized:

It is fair to state that as the law now stands, tentative or temporary settlement classes are favored when there [**33] is little or no likelihood of abuse, and the settlement is fair and reasonable and under the scrutiny of the trial judge.

¹³ A temporary settlement class is a class tentatively formed for the purposes of anticipated settlement only. Completely ancillary to the proposed settlement, it lasts only as long as the period between the preliminary approval of the settlement and the court's final determination on the settlement. At the time of the court's final adjudication of the proposed settlement, the court decides whether or not to certify a permanent settlement class. In effect, a temporary settlement class serves only as a procedural vehicle for providing notice to putative members of a proposed class of the terms of the anticipated settlement and of their opportunity to "opt out" and/or object. See generally *Beef Industry*, 607 F.2d at 173-78; 3 Newberg on *Class Actions*, *supra*, at § 5570c.

¹⁴ If a sufficient number of Dealer defendants do not join the Settlement, and notice to consumers does not issue, the Temporary Settlement Class will also automatically expire. The Court would then consider "recreating" a Temporary Settlement Class at any later date that notice might issue.

¹⁵ The Court stresses that the "temporary settlement class" being addressed today was *not* considered by the United States Court of Appeals for the Fourth Circuit in *Shelton v. Pargo, Inc.*, 582 F.2d at 1298. *Shelton* held that potential class members need only be given notice of a proposed *precertification* settlement if the district court determines after a hearing that the precertification settlement has been the product of collusion or that putative class members have detrimentally relied upon the assumed maintenance of the class action. As the Fourth Circuit noted, a precertification settlement "binds solely the individual plaintiff and not absentee class members." *Shelton v. Pargo, Inc.*, 582 F.2d at 1303. In the present case, on the other hand, the signatory parties clearly intend that the Settlement will bind members of the Temporary Settlement Class. To avoid any confusion in this area of occasional terminological looseness, the Court reiterates that it is presiding over the "temporary settlement class" discussed in *Beef Industry* and not the "precertification settlement" considered in *Shelton*.

Beef Industry, 607 F.2d at 174. The primary "abuse" feared by the courts is that defendants will play potential class counsel off against each other to find the "lowest bidder" at the expense of the members of the nascent class. These concerns are simply not present here. The Settlement has been negotiated not by private counsel but by public law enforcement officers.

[**34] If the Settlement receives approval, the eligible members of the Temporary Settlement Class will receive benefits identical to [*1390] those conferred upon the members of the *parens* classes. The unique circumstances of the present case, with the Temporary Settlement Class essentially "parallel" to the main *parens* actions, leaves the Court confident that the abuses extensively discussed in *Beef Industry* are not present here.¹⁶ As the Court has preliminarily determined the Settlement to be "fair" and "reasonable," and as the Settlement is under the continuing scrutiny of the Court, all of the prerequisites identified in *Beef Industry* for the conditional determination of a temporary settlement class exist here.

[**35] HN12 [↑] The conditional determination of a temporary settlement class does not constitute an "all purposes" certification, and in particular does not certify a litigation class should the supervising court subsequently disapprove the proposed settlement. Consequently, it is unclear whether the full findings required for a formal class certification need to be made. See Beef Industry, 607 F.2d at 177-78; 3 Newberg on *Class Actions*, *supra*, § 5570c, at 477-79. To the extent they are required, the Court finds that the Temporary Settlement Class, as a temporary settlement class, fulfills all of the prerequisites of Fed.R.Civ.P. 23(a)¹⁷ and Fed.R.Civ.P. 23(a)(3).¹⁸ In particular, the "adequacy" requirement of Fed.R.Civ.P. 23(a)(4) is met within the limited context of the proposed settlement. The Court of course recognizes that it has previously denied ordinary class certification to two groups of aspiring representative plaintiffs on the grounds that the cost reimbursement arrangements of the representative plaintiffs' counsel violated the disciplinary rules of the relevant jurisdictions and hence rendered suspect their ability to fairly and adequately protect the interests of [**36] their classes. In Re Mid-Atlantic Toyota Antitrust Litigation, 93 F.R.D. 485 (D. Md. 1982). The Court stresses that it does not retreat from this prior holding: if the Court does not give final approval to the Settlement, then the Temporary Settlement Class will automatically dissolve, and attempts at ordinary class certification for full litigation purposes will still be governed by the principles enunciated in the earlier opinion. However, the "representatives" of the members of the present Temporary Settlement [*1391] Class have

¹⁶ These same factors serve to distinguish the present case from the primary appellate discussion of temporary settlement classes since Beef Industry, Plummer v. Chemical Bank, 668 F.2d 654 (2nd Cir. 1982). In *Plummer*, counsel for the putative class had negotiated the proposed settlement prior to the filing of the complaint, and the named plaintiffs appeared to receive more favorable settlement terms than the unnamed members of the prospective class did. The district court disapproved the settlement, and the Circuit Court affirmed stressing the factors noted above. As outlined previously, no such indicia of collusion or overreaching exist in the present case. It should also be noted that *Plummer* involved a final disapproval of a settlement and a denial of certification for a permanent settlement class. The step mandated by the present ruling, notice to prospective members of a permanent settlement class, was in fact undertaken without comment in *Plummer*. Plummer, 668 F.2d at 657.

¹⁷ As the estimated membership in the proposed class exceeds 3000, joinder is impracticable. Fed.R.Civ.P. 23(a)(1). As outlined in detail in the April 4, 1983 opinion, members of the class may have suffered at the hands of a large antitrust conspiracy, so common questions of law and fact obtain. Fed.R.Civ.P. 23(a)(2). Similarly, the antitrust claims of the representatives are typical of the antitrust claims that any purchaser of a new 1980 Toyota from a Dealer defendant would attempt to assert. Fed.R.Civ.P. 23(a)(3). The "adequacy" determination of Fed.R.Civ.P. 23(a)(4) is discussed *infra* in the body of the opinion.

¹⁸ While damages may vary among individual purchasers, common questions of law and fact clearly predominate, and a class action certainly is superior to other methods, if any are available, of fairly and efficiently adjudicating this controversy. As the amount of damages suffered by an individual purchaser is relatively small, the purchaser would have little interest in maintaining a separate action. Fed.R.Civ.P. 23(b)(3)(A). Litigation over factually identical claims is currently before the Court and it makes excellent sense to resolve these matters simultaneously. Fed.R.Civ.P. 23(b)(3)(B). The fact that the Panel on Multi-district Litigation has transferred all actions relating to these matters to the Court indicates the desirability of concentrating the litigation of the class claims in this forum. Fed.R.Civ.P. 23(b)(3)(C). Finally, any "difficulties likely to be encountered in the management of a class action," if they exist in the instant action, are already being encountered by the Court in the parallel *parens* actions. Fed.R.Civ.P. 23(b)(3)(D).

in effect been public law enforcement officers, who, as stressed before, have negotiated identical settlement for their own citizens on the basis of essentially equivalent factual claims. In light of the unique factors of this proposed settlement, and the conditional nature of this determination, the Court cannot say that the class representative will not fairly and adequately protect the interests of the class members during its brief and limited existence. As Judge Wisdom has observed:

it is altogether proper and consistent for a court to certify a class for settlement purposes while it might have had more difficulty reaching this **[**37]** determination in a different context.

Beef Industry, 607 F.2d at 178 (quoting 3 *Newberg on Class Actions, supra*, § 5570c at 479-80).

[38]** For the foregoing reasons, it is this 27th day of May, 1983, by the United States District Court for the District of Maryland, ORDERED:

1. That plaintiffs' and Distributor defendants' motions for the preliminary approval of the proposed Settlement BE, and the same ARE, hereby GRANTED;
2. That a Temporary Settlement Class BE, and the same IS, hereby CONDITIONALLY DETERMINED in accordance with the rulings enunciated above; and
3. That defendants who are not signatories to the Settlement shall have until 5:00 p.m., June 3, 1983 to elect to join the Settlement, pursuant to the agreement of the signatory parties in open court on May 26, 1983.

Opinion by: [*1] CAHILL

Opinion

Memorandum and Order

CAHILL, D.J. This matter is before the Court on a motion to strike the defendants' affirmative defense filed by Broadcast Music, Inc.

Broadcast Music commenced this action seeking injunctive relief against the defendants' alleged copyright infringement. As an affirmative defense, the defendants maintain that Broadcast Music's cause of action is barred because of Broadcast Music's violation of [§ 1](#) of the Sherman Antitrust Act, [15 U.S.C. § 1](#).

Broadcast Music's motion argues that "as a matter of law, an allegation that plaintiff has violated the [antitrust law](#) is not a defense to a claim for copyright infringement." After viewing Broadcast Music's motion, which is unopposed, and the case law cited in the memorandum in support of the motion, the Court agrees that the affirmative defense in question should be stricken. [Orth-o-vision, Inc. v. Home Box Office, 474 F. Supp. 672 \(S.D.N.Y. 1979\)](#); [Broadcast Music, Inc. v. Grant's Cabin, Inc., 204 USPQ 633 \(E.D. Mo. 1979\)](#). Accordingly

It Is Ordered that Broadcast Music's motion to strike is Granted.

MEMORANDUM OPINION AND ORDER

This action presents claims for relief for alleged anti-competitive practices under Sections 1 and 2 of the Sherman Act, [15 U.S.C. § 1](#) and [§ 2](#). The matter arises for consideration of various motions for summary judgment and partial

summary judgment and a motion for a protective order filed by the defendant Lawyer's Title Insurance Company.¹ The plaintiff asserts jurisdiction pursuant to [28 U.S.C. § 1331](#) and [§ 1337](#) [*2] and [15 U.S.C. § 15](#) and [§ 26](#).

The plaintiff was in the title insurance business in the Denver metropolitan area between 1977 and 1981. The metropolitan area constitutes the relevant market for the purposes of this case and includes six Colorado counties: Adams, [*3] Arapahoe, Boulder, Denver, Douglas, and Jefferson.² [*4] Discovery clarified certain factual misstatements contained in the original Complaint, however, the subsequently filed motions and supporting documents clear the factual background.³

The defendants⁴ are members, owners, and in some cases, founders of two organizations which are quite exclusive: S-K-L-D, Inc. and Take-Off, Inc. Take-Off, Inc. was organized by six title insurance companies in December of 1959 for the purpose of making a daily "take-off" or photocopy of all recorded instruments affecting the titles to real property in the City and County of Denver or its environs.⁵ Subsequently, in 1961, four of the Take-Off participants formed S-K-L-D, Inc. (hereinafter SKLD). SKLD's original purpose was the creation of a single abstract or title plant for the City and County of Denver, and Adams, Arapahoe, Boulder, and Jefferson Counties. A title "plant" is, in essence, a sophisticated library containing copies of all instruments, documents, [*5] and maps affecting the titles to real property including copies of plats and various geographical and names indices.⁶

¹ The motions pending include a Motion for Partial Summary Judgment (Statute of Limitations) filed by all of the defendants except defendant Commonwealth which joined in the motion and filed its own Motion for Summary Judgment. The plaintiff filed a partial summary judgment motion raising several bases for partial summary judgment and four of the defendants filed a Motion for Partial Summary Judgment Regarding Take-Off, Inc. The plaintiff had also filed a Motion to Amend Complaint which was withdrawn at the hearing on these motions. I heard argument on the questions presented by the various summary judgment motions. The defendant Lawyers Title Insurance Corporation's Motion for Protective Order was submitted on the briefs.

² The Complaint defines the relevant market as the 6-county area. From the late 1950's until at least 1967, there were four counties considered as part of the metropolitan area for the purposes of this case: Denver, Adams, Arapahoe, and Jefferson. See letter of April 13, 1967, from Colorado Title Company contained in Appendix V to plaintiff's Motion for Partial Summary Judgment, item 49. Subsequently, the reach of the defendants' allegedly concerted activities through SKLD and Take-Off, Inc. (identified and discussed *infra*) expanded to include activity in Boulder and Douglas counties as well as in Larimer, Eagle, Clear Creek and Weld counties. See generally Take-Off, Inc., 1981 Annual Report to Stockholders contained in Appendix V, item 47 and Appendix III, item 31 -- Schedule J, plaintiff's Motion for Partial Summary Judgment. For the purposes of this memorandum, the 6-county area will be considered as the Denver metropolitan area during the relevant time period: 1977 to 1981, as set forth in the Complaint.

³ The plaintiff had filed a Motion to Amend Complaint which would have clarified certain of the factual allegations contained in the Complaint, however, this motion was withdrawn. The proposed amended Complaint deleted the "plaintiff's claims under [§ 2](#) of the Sherman Act and the defendants stipulated to the dismissal of those claims.

⁴ At the time I heard this Motion, the defendants included Ticor Title Insurance Company which was originally named Pioneer National Title Insurance Company. I approved a Stipulation for Dismissal of this action against Ticor on May 18, 1983.

⁵ See Bylaws of Take-Off, Inc. and Memorandum of Working Agreement contained in Appendix IV, items 33 and 34, to plaintiff's Motion for Partial Summary Judgment which indicate that the founding Take-Off members were Record Abstract and Title Insurance Co., The Title Guaranty Co. [now Transamerica Title], Titles, Inc. [now U.S. Life Title], Security Title Guaranty Co, Kansas City Title Insurance Co. [now Chicago Title] and Lawyers Title Insurance Co. Take-Off includes non-SKLD members and one of its founders reportedly was (and is) the oldest and largest title company in Denver. This company is neither a defendant nor an SKLD member.

⁶ See generally SKLD Articles of Incorporation and Agreement in Appendix I, items 1 and 2, plaintiff's Motion for Partial Summary Judgment.

[*6] For the first decade of its existence, the four original members of SKLD eschewed the advances of other title companies who sought access to the SKLD plant.⁷ However, in 1967, they decided that if, anyone was going to be permitted to buy an SKLD membership the price tag should be \$ 1,175,000.00.⁸ This figure reflected one member's assessment of the cost to a new company of assembling a plant covering only a four-county metropolitan area and the difference of operating costs borne solely by a new title company versus the type of cost sharing arrangement available to SKLD members. Even with membership valued at in excess of \$ 1 million, the calculations suggest that access to the SKLD plant could be a worthwhile expenditure for one in the title business. Finally, in the early 1970's two new members were accepted to SKLD: Pioneer National Title and Fidelity National Title.⁹ [*8] The two new members reportedly paid \$ 750,000.00 for their ownership interests in SKLD and Take-Off. Subsequently, in 1974, Land Title and First American Title were afforded an opportunity to participate to a limited extent in SKID under a ten-year service contract.¹⁰ First American apparently participated [*7] in a substitution agreement with Stewart Title in 1978 whereby Stewart gained access to SKLD under the contract. In 1981 Stewart Title learned that the payments it and First American Title had made under the contract since 1974 exceeded \$ 500,000.00 and could be applied toward the purchase of an ownership interest in SKLD.¹¹

A full membership in SKLD includes, among other things, participation in a free "starter" exchange.¹² This particular incident of ownership is allegedly one of the more valuable aspects of participation in SKLD. A "starter" in the title insurance business is a prior title insurance policy or commitment for the same piece of property. Starters are sought after because they provide a jumping off point for research into the title history of a particular piece of real estate. With a prior policy or title commitment in hand, the title company will generally rely on the previous policy issuer's research and merely bring the title history up to date. As one title insurance man averred, "in all cases, it's a tremendous value."¹³ Of course, having access to a complete plant in which to conduct the research is a major convenience to title researchers who need not travel to a particular county recorder's office [*9] in order to search grantor, grantee, or tract indices and other records.

SKLD also offers a delivery or courier service which, for a time, was open to a number of other non-SKLD member title companies. The delivery service would pick up and deliver items from the entities with which title companies normally work including banks, credit unions, savings and loan institutions, mortgage brokerages, realtors, developers, builders, attorneys, government agencies and other title companies.¹⁴ The delivery service was designed to save money and fuel. Title companies could pool their metropolitan area transportation needs and resources by subscribing to the SKLD Courier Service. However, after [*10] two years of permitting non-SKLD members to participate, the service was changed and limited exclusively to SKLD shareholders.¹⁵

⁷ In 1965 the First American Title Insurance Co. of California was turned down for membership and in 1966 the SKLD board rejected the overtures of St. Paul Title Insurance Co. See Appendix I, item 3, plaintiff's Motion for Partial Summary Judgment. Attorneys Title also sought membership in SKLD according to plaintiff's counsel's argument at the motions hearing.

⁸ See Appendix 5, item 49, to plaintiff's Motion for Partial Summary Judgment. Letter of 4/13/67 from Charles Willis re: Sale of an Interest in SKLD, Inc.

⁹ Fidelity's assets, including the SKLD and Take-Off memberships, were sold to Commonwealth in the spring of 1981. See Appendix III, item 31, plaintiff's Motion for Partial Summary Judgment. The basic purchase price was \$ 1,400,000.00 for the business with a possible \$ 400,000.00 in additional consideration based on performance.

¹⁰ See Appendix I, item 4, and Appendix V, item 55, plaintiff's Motion for Partial Summary Judgment.

¹¹ See Appendix V, item 55, plaintiff's Motion for Partial Summary Judgment.

¹² Starter exchange is limited to SKLD members. See SKLD memo of 10/16/75 re: Agreement to Exchange Policies and Commitments at Appendix V, item 53, plaintiff's Motion for Partial Summary Judgment.

¹³ Excerpt of deposition of William Vollbracht, Appendix V, item 50, plaintiff's Motion for Partial Summary Judgment.

¹⁴ See Appendix II, item 23, plaintiff's Motion for Partial Summary Judgment.

¹⁵ See generally Appendices I and II, items 5-30, plaintiff's Motion for Partial Summary Judgment. The record indicates that there were service problems with such a large delivery operation which included misdeliveries and delays. Even though there were

In this case, the plaintiff asserts that the SKLD and Take-Off organizations have operated in contravention of the anti-trust laws to eliminate the plaintiff from the title insurance business in the Denver Metropolitan area market. Specifically, the plaintiff contends that it was rejected by SKLD when it tried to [*11] obtain title services in 1977. *The plaintiff alleges that its participation in Take-Off was permitted, but only at a cost substantially in excess that charged SKLD members.* With regard to the starter exchange among SKLD members, the plaintiff views the *members-only exchange* policy as an anti-competitive practice. The plaintiff also contends that the rebuff of its attempt to receive SKLD information and benefits on a limited "moving forward" basis¹⁶ was motivated by the defendants' continuing conspiracy in restraint of trade. In addition, the plaintiff complains that its exclusion from participation in the joint delivery service maintained by SKLD was but another incident illustrating the anti-competitive consortium operated by the defendants.

Through the pending motions, both sides claim that there are no material facts in dispute with regard to some issues and that partial summary judgment is appropriate. *The [*12] plaintiff moves for judgment in its favor on its allegations that the following three conspiratorial activities resulted in restraints of trade in violation of § 1 of the Sherman Act:* 1. the exclusion from the joint delivery service; 2. the excessive charges for *non-owner/member participation in Take-Off*; and 3. *the defendants' refusal to exchange starters.*

The defendants' motions request that I find the four year statute of limitations under the Clayton Act, 15 U.S.C. § 15b, bars certain aspects of, the plaintiff's Sherman Act § 1 claim. The defendants also contend that the allegations against Take-Off fail to state an anti-trust claim. Defendant Commonwealth moves for dismissal of the entire complaint on the basis that it only became a member of SKLD and Take-Off a month before the plaintiff sold its business and, therefore, it could not have shared in any conspiracy to drive the plaintiff out of the Denver title insurance market. Defendant Lawyers moves for a protective order requiring the plaintiff to return a document inadvertently produced in the course of discovery.

In considering the issues presented by the various motions, I will [*13] address first those associated with the plaintiff's Sherman Act § 1 claim, then the Lawyers' protective order question, and finally, the status of plaintiff's claims under § 2 of the Sherman Act. The summary judgment motions basically are directed to the § 1 claim of anti-competitive practices by the allegedly conspiring defendants. *In seriatim*, this memorandum will consider the following Sherman Act § 1 issues: statute of limitations questions; starters; Take-Off's activities; the SKLD delivery service; and the question presented by defendant Commonwealth.

I. Sherman Act § 1 Claim, 15 U.S.C. § 1.

A. Applicability of Clayton Act § 4b, 15 U.S.C. § 15b.

The defendants assert that the plaintiff's claims for relief are barred by a four year statute of limitations governing anti-trust claims. The motion characterizes the primary thrust of plaintiff Frontier's claim by concluding that the plaintiff believed terms for membership in SKLD were unreasonable. The defendants' motion argues that to the extent the plaintiff sought a limited membership in SKLD, that claim is barred because the determinative act occurred more than four years prior [*14] to the filing of the complaint. During the hearing on this matter, counsel extended the SKLD statute of limitations issue to raise the question of whether an anti-trust claim ever accrued with regard to full membership in SKLD because Frontier never applied to SKLD nor was ever rejected for regular membership.

With regard to Frontier's application for limited membership on a "forward moving" basis, the statute the defendants contend applies to bar this claim is 15 U.S.C. § 15b.¹⁷ [*15] Defendants assert that a request was made by

¹⁶ See Appendix to defendant's Motion for Partial Summary Judgment, item J at 53.

¹⁷ The statute provides in pertinent part, that:

Frontier for a limited participation in SKLD by a letter dated July 11, 1977, and that SKLD rejected this request by letter dated August 17, 1977.¹⁸ This suit was filed on September 11, 1981. The defendants rely upon [Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77 \(1971\)](#), and its progeny for the proposition that "a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business." [Id. at 338.](#)

In opposition, the plaintiff advances three arguments: 1. that the refusal of services was effective in October of 1977 rather than in August; 2. that the plaintiff's damages were not ascertainable in August, and therefore the statute of limitations must be tolled; and 3. that, in any event, all of the defendants' actions are but one grand conspiracy, and thus, the motion should be denied.

Considering first the denial of plaintiff's request for limited participation in SKLD, [*16] I find that the denial of service on a moving forward basis without access to SKLD's historical plant was effective with the August 17 SKLD letter. I cannot find any support for the proposition that limited services were denied in October instead of August of 1977, nor do I feel that there is any rationale for tolling the statute of limitations.¹⁹ Thus, I find no merit to plaintiff's argument that damages were unduly speculative in August of 1977 because of plaintiff's fledgling status in the title insurance business. Plaintiff provided no legal support for its "one grand conspiracy" theory, and I find it requires no further consideration. Moreover, even where a plaintiff has properly plead the elements of a conspiracy, without subsequent evidence of overt acts or clear pleading and proof of fraudulent concealment, there is no basis for tolling the statute or finding a continuing conspiracy. [Charlotte Telecasters v. Jefferson-Pilot Corp., 546 F.2d 570 \(4th Cir. 1976\)](#). In this case, the plaintiff has isolated several overt acts as part of its Sherman Act claim, and I think that the view adopted by the Fifth Circuit makes clear that those overt acts which fall within [*17] the four year period are timely, while those beyond are barred by [§ 15\(b\). Poster Exchange, Inc. v. National Screen Service Corp., 517 F.2d 117 \(5th Cir. 1975\)](#).

There remains, however, a question of whether the statute of limitations should bar the plaintiff's broader claim of denial of access to SKLD. Neither the defendants' motion nor the plaintiff's complaint clearly separated these issues, however Mr. Hautzinger discussed the distinction at the hearing on this matter. In essence, plaintiff's SKLD full membership complaint centers on plaintiff's conclusion that the price for full membership would be too high. If the plaintiff did inquire following receipt of the August 17 letter about the cost of full participation in SKLD,²⁰ the record is clear that plaintiff, of its own volition, never pursued further a full membership in the title plant. [*18] The price tag for SKLD membership was described as something between \$ 1.25 million and \$ 1.75 million, which admittedly is a substantial sum of money. Nevertheless, the plaintiff has shown no indication that there was a refusal to deal, nor that the asking price for full SKLD membership was *per se* unreasonable. In addition, there is no actual showing of any overt action which injured the plaintiff in connection with its efforts to get access to the SKLD plant.

"Any action to enforce any cause of action under [the antitrust laws]...shall be forever barred unless commenced within four years after the cause of action accrued."

¹⁸ The text of the refusal letter states:

This acknowledges receipt of your letter dated July 11, 1977, wherein you requested the S-K-L-D, Inc. Board of Directors to consider providing title plant services to you.

The aforementioned directors met recently, and considered your request. They were very unreceptive to any type of arrangement for title plant services others than a full membership in S-K-L-D, Inc.

If you are interested in such a membership or if you have any question related to the action of the directors, please contact Robert Ludlow of Pioneer Title who is president of S-K-L-D.

¹⁹ Furthermore, as argued by the defendants, the plaintiff's "speculative nature of damages" argument undermines its position on the merits.

²⁰ Frontier claims it did so in October.

Frontier's case differs from the other title companies it contends were previous victims in the defendants' alleged continuing conspiracy. For example, the minutes of the SKLD Board meetings of September 25, 1965 and September 28, 1966,²¹ might well have supported refusal to deal claims²² [*20] under the Sherman Act by First American Title Insurance Company of California and St. Paul Title Insurance Company fifteen or more years ago. However, by the spring of 1967, SKLD members were considering changing [*19] their exclusionary policy, and they set about attempting to value SKLD as an asset for the purposes of setting a sales price.²³ At that time, at least one SKLD member's representative estimated a shareholder's interest in the corporation should be valued at \$ 1,175,000.00. Subsequently, shares sold in 1972 to Fidelity and Pioneer for \$ 1.5 million or \$ 750,000.00 apiece. The prices were high, but apparently both negotiable and (in the minds of the buyers) worthwhile. With the growth of the SKLD plant and the Denver metropolitan area, by 1977 a price in excess of \$ 1 million cannot be considered as unreasonable *per se*.

In evaluating the plaintiff's contention that the restraint in this case is unreasonable, I am mindful that numerous factors must be considered before a determination of reasonableness can be made.²⁴ And, it is well established that reasonableness is but one prong of the inquiry into whether a particular type of activity comes within the proscription of the Sherman Act's Section 1.

For activities to constitute a Section 1 violation, the following five elements must be present: (1) the activities must be in or affect interstate commerce or foreign commerce; (2) the activities must be performed by two or more persons; (3) the activities must be the result of concerted action; (4) the concerted action must constitute a restraint on trade or commerce; and (5) the restraint must be unreasonable.

II Kintner, *Federal Antitrust Law*, § 9.1 at 5 (1980).

In this case the plaintiff has alleged the requisite factors; however, I question seriously whether Frontier has shown or can prove that the million dollar plus cost of SKLD membership was unreasonable, [*21] given the value of as complete a title insurance plant as that assembled by SKLD during its nearly twenty year existence. The antitrust laws do not require that a newcomer to a market be given a valuable asset in order to compete. As the Supreme Court noted in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) citing *Brown Shoe Co. v. United States*, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962), "[t]he

²¹ Note 7, *supra*.

²² Concerted refusal to deal or group boycotts have been determined to be inherently anti-competitive, and therefore the Supreme Court considers them to be *per se* unreasonable. In *Northern Pacific Railway Co. v. United States*, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1957), Justice Black concluded:

[T]here are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. This principal of *per se* unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable--an inquiry so often wholly fruitless when undertaken.

²³ Note 8, *supra*.

²⁴ As summarized by antitrust commentator Earl W. Kintner, the former Chairman and general counsel of the Federal Trade Commission:

These factors include the nature of the restraint; the degree of market power exerted by the defendant; and the effect of the restraint, probable or actual, upon competitive market conditions. Often the process of weighing and evaluating these factors involves a complex procedure which consumes a substantial amount of judicial resources.

antitrust laws, ...were enacted for 'the protection of *competition*, not *competitors*.'" (emphasis in original). Further, I do not find evidence in the voluminous material before me²⁵ which proves that the plaintiff suffered an antitrust injury in connection with the proposed sale of an SKLD membership. The plaintiff never attempted to negotiate for itself a deal for an SKLD ownership interest. Frontier never applied for membership at the asking price, nor ever offered to buy a membership at a lesser price. The plaintiff claims, but has not shown, any direct actual injury nor resulting restraint on trade from the fact that it thought SKLD membership would be too expensive. In fact, in 1977, when it first [*22] inquired about limited SKLD participation, Frontier's business scheme was directed exclusively to developers of new residential real estate. Thus, Frontier really was only interested in access to the SKLD title plant on a "moving forward" basis, and access to the SKLD historical plant was not part of its original business plan.

The denial of access [*23] to the plant on a "from this day forward" basis, if it is an antitrust injury,²⁶ [*24] is not part of this case because of the untimeliness of the complaint. Yet, this claim illustrates the point that when the plaintiff wanted to get into the booming real estate title insurance business in Denver in 1977, it sought only to benefit from SKLD, but it was unwilling to pay part of the cost for the plant as a "capital asset." From the beginning, it was obvious that Frontier was only interested in limited SKLD participation, as this letter of inquiry from Commonwealth on Frontier's behalf in April of 1977 illustrates:

We have an Agent who would like to lease the right to use the SKLD Plant. I understand that currently there are two leases in effect. I therefore, would like to know what the terms of your lease arrangements are and I would assume that if leasing rights are now available to a title agency they would also be available to others.

The Agent would not consider, or be in a position to buy an interest in the Plant, therefore, you may limit your proposal to a lease only.

(emphasis added)²⁷

Thus, it is obvious, that the plaintiff either could not afford or did not want to join SKLD in 1977. Accordingly, I find that with regard to plaintiff's claims of denial of SKLD membership, they are either barred as untimely or they never accrued.

B. Starter Exchange

The plaintiff has moved for summary judgment on the limited basis that the exchange of starters among SKLD members and no others in the title insurance business in the Denver metropolitan area was violative of the Sherman Act [§ 1](#). In 1967, participation in the starter exchange program was valued at \$ 50,000.00.²⁸ [*25] The plaintiff points to the defendants' reaffirmation in 1975 of the rule that starters could be exchanged among members only²⁹ as clear evidence of the anti-competitive practices engaged in by the defendants.

I cannot concur with the plaintiff that there are no material facts in dispute on this issue. On the contrary, it is reasonable to assume that the defendants can show and argue that protection of the starter exchange is protection of its *research facility or title plant in which Frontier did not choose to participate*. A jury reasonably could find this to be a legitimate business decision, and thus, would deny recovery to the plaintiff. Hence, with regard to the starter exchange, a question of fact exists, and the plaintiff's motion must be denied.

C. Take-Off, Inc.

²⁵ Plaintiff's Appendix to its Motion for Partial Summary Judgment is 5 volumes and nearly 4 inches thick.

²⁶ Although the point is or will soon be moot for the purposes of this case, I question whether plaintiff could have proved that the denial of limited SKID membership was for other than legitimate reasons.

²⁷ Defendants' Motion for Partial Summary Judgment Appendix item E at 44, Letter of Paul J. Kennedy, Commonwealth Land Title Insurance Co. dated April 6, 1977.

²⁸ Appendix V, item 49 at 2, plaintiff's Motion for Partial Summary Judgment; Note 12, *supra*.

²⁹ Appendix V, item 53, plaintiff's Motion for Partial Summary Judgment.

Parties on both sides have moved for partial summary judgment in their favor on the issues presented by the existence and activities of Take-Off, Inc. The motions and the briefs which accompany them illustrate that significant factual issues are presented with regard to the pricing differential for Take-Off participation between members and non-members. The burden of establishing the absence of any genuine issues of material fact is on the moving [*26] party, [Adickes v. S. H. Kress and Company, 398 U.S. 144, 157, 90 S. Ct. 1598, 26 L. Ed. 2d 142 \(1970\)](#), and, in this instance, neither party has met its burden.

D. The SKLD Delivery Service

The third part of the plaintiff's motion for partial summary judgment concerns the exclusion of non-SKLD members from participation in the courier service after various non-member companies had been invited to join and did participate for several years. A careful reading of the documents presented in the Plaintiff's Appendix at Volumes I and II indicates that the defendants may be able to show that legitimate business considerations prompted SKLD to cut-back to non-members.³⁰ Because inferences drawn from the underlying facts "must be viewed in the light most favorable to the party opposing the motion," [United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 \(1962\)](#), the motion must be denied.

E. Motion [*27] of Commonwealth Land Title Insurance Company for Summary Judgment

Through its motion Commonwealth joins in the motion of the other defendants for partial summary judgment based on the application of the statute of limitations while concurrently moving for dismissal of all claims presented in the Complaint against it individually. The thrust of Commonwealth's argument is that because it did not become affiliated with SKLD until the spring of 1981, it should not be held responsible for the alleged anti-competitive acts of the co-conspirator SKLD members which occurred prior to the time that it joined the organization. Commonwealth reasons that because Frontier was completely out of the title insurance business by October of 1981, Commonwealth is not, and was not, responsible for any of the activities of which Frontier complains.

[Fed. R. Civ. P. 56\(c\)](#) provides that a summary Judgment motion should be granted only if, *as a matter of law*, the "pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact..." The record before me reveals that Commonwealth acquired the [*28] assets of Fidelity National Title Insurance Company pursuant to an agreement executed on March 27, 1981.³¹ Through the purchase of Fidelity, Commonwealth acquired an SKLD membership and became a Take-Off participant.

At the Take-Off Annual Corporate Stockholders Meeting on May 5, 1981, Commonwealth was represented by Benjamin Kelly who was elected Chairman of the organization for the 1981-82 term.³² The minutes indicate Kelly apparently also voted to raise non-member companies' monthly charges by \$ 250.00 effective June 1, 1981. This price increase came at a time when Frontier was still in business, and the plaintiff claims that this and previous price increases to non-SKLD members were part of the defendants' anti-competitive scheme. Thus on the facts alone, this motion must be denied with regard to Commonwealth's participation in Take-Off. Commonwealth also agreed at P11(f), pages 12-13, of the Fidelity/Commonwealth sales [*29] agreement to be bound by all SKLD rules and regulations.³³ Therefore, if the members-only starter exchange is found to be an anti-competitive practice, Commonwealth may also be liable for damages accruing from its participation therein.

With regard to the delivery service exclusion claim raised by the plaintiff, the decision to eliminate delivery service to non-SKLD members was made December 6, 1979, and the courier service to non-members was cut off January 30, 1980.³⁴ [*30] Frontier and Continental Title Company were among the non-members who had participated in the

³⁰ Appendix II, item 18, plaintiff's Motion for Partial Summary Judgment.

³¹ Appendix III, item 31, plaintiff's Motion for Partial Summary Judgment.

³² Appendix IV, item 39, plaintiff's Motion for Partial Summary Judgment.

³³ See note 30, *supra*.

service beginning in 1978, but who were shut out nearly two years later. By the end of August, 1980, the delivery service included all SKLD members and no others,³⁵ however, by February of 1981, one of the SKLD members withdrew of its own accord.³⁶

While generally the law is clear that one who joins a conspiracy late in the game is equally liable with the other conspirators who were involved at an earlier date, in this instance one must assume that Commonwealth suffered equally with the other title companies who could not participate in the delivery service after January 30, 1980. As a general rule, a plaintiff's anti-trust cause of action accrues on the date that the defendant commits an act which injures the plaintiff's business. *Curtis v. Campbell-Taggart, Inc.*, 687 F.2d 336, 337 (10th Cir. 1982); *Zenith Radio Corp. v. Hazeltine Research, Inc.*, 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971). Because the plaintiff's cause of action with regard to exclusion from the delivery service accrued more than a year before Commonwealth became a participant in the alleged conspiracy, and because Commonwealth itself could have been a victim of the same purported [*31] anti-competitive practice, I find that this particular issue should be resolved in the defendant's favor.

Finally, it goes without saying, if 15 U.S.C. § 15(b) operates as a bar to the Sherman Act Section 1 claim against the other defendants with regard to SKLD membership, so too does it bar the plaintiff's claim on this issue against the defendant Commonwealth. It should be noted that it was in fact Commonwealth which was acting as the agent for Frontier during 1977 when Frontier was attempting to gain access to the SKLD plant on a limited basis. Furthermore, from a factual perspective it is difficult to understand why Commonwealth should be liable as a co-conspirator with the defendants when it was acting as the plaintiff's agent at the time in question.

II. Motion for Protective Order

The defendant Lawyers Title Insurance, Corporation has moved for a protective order. Through the motion Lawyers seeks the return of all copies of a document which was produced to the plaintiff in the normal course of discovery in this case. The defendant alleges that the document was and remains privileged and that its production was the result of inadvertence. "People [*32] -- even lawyers -- make mistakes. But a single lapse in document screening will not, under the circumstances of this case, support the conclusion that the privilege has been waived." Memorandum of Lawyers Title at 1.

In response, the plaintiff skirts the waiver issue while asserting that Lawyers cannot claim the privilege. The document in question is an opinion letter³⁷ [*33] written in 1975 by the law firm of Holme, Roberts and Owen to its client, SKLD. Lawyers is represented by Holland and Hart. Because Lawyers was not the client which received the communication, and because SKLD is not a party to this action, the plaintiff contends that Lawyers lacks standing to invoke the privilege. One must read between the lines to reach the plaintiff's response to the waiver issue: only the holder of the privilege can claim or waive it. Therefore, in the plaintiff's view, whether Lawyers intended to waive the privilege is irrelevant if it is not the party which could invoke the privilege in the first place.³⁸

The Supreme Court "has assumed that the (attorney-client) privilege applies when the client is a corporation," which is a creature of law rather than a human individual. *Upjohn Co. v. United States*, 449 U.S. 383, 389-390, 101 S. Ct. 677, 66 L. Ed. 2d 584 (1981). In drawing this assumption, the Court concedes that complications are inherent in the application of the privilege to an artificial and oftentimes amorphous entity. Moreover, in *Upjohn*, the Court made clear that no "abstractly formulated and unvarying 'test' will necessarily enable courts to decide questions such as

³⁴ Appendix II, item 18, plaintiff's Motion for Partial Summary Judgment.

³⁵ Appendix II, item 24, plaintiff's Motion for Partial Summary Judgment.

³⁶ Appendix II, item 27, plaintiff's Motion for Partial Summary Judgment.

³⁷ The plaintiff indicates that the contents of the letter concern a key issue in this case: the illegality of the denial of SKLD services to non-member competitors.

³⁸ As Lawyers' counsel points out in its .reply, the plaintiff apparently concedes that the privilege was not waived by the mere inadvertent release of the document.

this with mathematical precision." *Id. at 393*. Indeed, such a rigid formula would contravene the intent of Congress in fashioning the privilege rule, *Fed. R. Evid. 501*, that "recognition of a privilege based on a confidential relationship ... should be determined on a case-by-case basis." S. Rep. No. 93-1277.

Neither I nor counsel [*34] have found a reported case which is precisely on point with the privilege question before me. To resolve this issue, I begin by re-examining the nature of SKLD and its relationship to the defendant Lawyers. SKLD is a Colorado corporation which maintains and indexes land title information for the use of six member title insurance companies. Lawyers is a member or shareholder of SKLD. Pursuant to the SKLD articles and by-laws, each member selects one representative to the SKID board of directors. Apparently each member/shareholder has an ownership share equal to the shares of all other members, and each has an equal proportional right to participate in the management of the corporation. See Articles of Incorporation of S-K-L-D, Inc., Fourth section at 2-3, Appendix 1, item 1, Plaintiff's Motion for Partial Summary Judgment; see also defendant Lawyers' memoranda in support of its Motion for Protective Order.

The letter which is the subject of the instant controversy was written and produced for SKID at the request of its board of directors. Each board member received a copy of the letter in July of 1975. Although SKLD would have been billed directly for the cost of producing the letter, [*35] the individual member/shareholders would have been indirectly but proportionately liable for their share of the legal fee. McLaughlin Affidavit at 4. The uncontested affidavit³⁹ of David M. McLaughlin, the current president of SKLD and the Lawyers' representative to the board in 1975, indicates that "by virtue of its (Lawyers') shareholding in SKLD, communications between Lawyers Title and attorneys for S-K-L-D were confidential." McLaughlin Affidavit at P6. McLaughlin sent the opinion letter to the defendant's assistant corporate counsel at Lawyers' home office in August of 1975. McLaughlin Affidavit at P7. The recipient of the opinion letter in the home office affirms that:

While the law firm was formally retained by S-K-L-D, it is my perception, understanding and belief that the law firm was acting both in the interest of the corporation and the member companies as shareholders. Accordingly, I regarded and treated the communications between the law firm and representatives of Lawyers Title Insurance Corporation as confidential and privileged.

Rumsey Affidavit at 5.

[*36] The opinion letter languished in Lawyers' files until this controversy arose. Rumsey Affidavit at P6. Prior to filing, it had been shown only to Lawyers' senior management and attorneys. Mayes Affidavit at P4. Last year it was turned over to Lawyers' outside counsel in connection with the plaintiff's request for production. According to Lawyers' Regional Counsel, G. H. Mayes, Jr., the documents were tendered to Holland and Hart "with the express understanding that the documents would be screened and that documents subject to the attorney client privilege would not be produced to the plaintiff." Mayes Affidavit at P5.

Despite screening by two lawyers and a paralegal which resulted in the document being listed on a "privileged log," somehow the opinion letter was among the documents produced by Lawyers on October 11, 1982. See generally, Hartley Affidavit. Plaintiff's counsel alerted Mr. Hartley to the fact that the opinion letter had been received but refused to return the document. As counsel for the defendant Lawyers, Mr. Hartley swears that he did not intend to produce the opinion letter nor to waive the privilege claim associated with it on behalf of his client.⁴⁰

³⁹ The plaintiff has filed no conflicting affidavits in support of its opposition to this motion; thus, all of the defendant's affidavits are uncontested.

⁴⁰ Mr. Hartley's Affidavit states, in part:

9. Lawyers Title has produced over 4,000 documents in this case. The other defendants and third-party witnesses have produced thousands more. I do not know how our screening process failed to identify and segregate the document in question. I do know that had I realized the document was included in those produced to plaintiff, I would have certainly withheld it. In fact, another copy of the same letter was located and withheld.

10. I have not been authorized by my client to waive the attorney-client privilege in this case with respect to the subject document or its subject matter. On no occasion have I intended to do so, and it was not my intention to produce this letter for plaintiff to inspect and copy.

[*37] It is well settled that the attorney-client privilege, which preserves in confidence the communications between those two parties, belongs to the client. *Hunt v. Blackburn*, 128 U.S. 464, 470, 9 S. Ct. 125, 32 L. Ed. 488 (1888). "Only the client can waive this privilege and, to support a finding of waiver, there must be evidence that he intended to waive it." *Connecticut Mutual Life Insurance Co. v. Shields*, 18 F.R.D. 448, 451 (S.D.N.Y. 1955). The privilege applies only if the holder is a client communicating with a lawyer concerning a confidential matter relative to either "(i) an opinion on law or (ii) legal services or (iii) assistance in some legal proceeding" but not for the purpose of committing a crime or tort. *United States v. United Shoe Machinery Corporation*, 89 F. Supp. 357, 358 (D. Mass. 1950). Further the privilege must have been claimed and not waived by the client. *Id. at 359*.

The question is simply whether Lawyers, as a shareholder and member of the board of directors of SKLD, can assert the privilege on its own behalf and as an SKLD representative. I cannot find any evidence of intentional waiver of the privilege [*38] as required by *Connecticut Mutual, supra*.⁴¹ I clearly find that the privilege was claimed by representatives of each member/owner title company and SKLD, who, in this case, appear to be the same individual. See McLaughlin Affidavit at P2 and P9. Furthermore, all other aspects of the *United Shoe* test are met so that the only real issue to be resolved is the standing to assert the privilege problem.

[*39] According to the McLaughlin affidavit, it appears that when received, the SKLD opinion letter was delivered to each board member of SKLD and at the time, the president of the board was Lawyers' own representative, Mr. McLaughlin. McLaughlin Affidavit at P3 and P5. McLaughlin, like every other board member, wore two hats: SKLD director and representative of one of the title company member/shareholders of SKLD. SKLD was (and is) a very closely held corporation whose sole reason for being was for the purpose of providing title services to the member companies. As is obvious from the way the plaintiff has structured this case, by suing the individual members for their participation in SKLD but not joining SKLD itself, the plaintiff itself sees SKLD as little more than a collective alter-ego for the alleged anti-competitive conspiracy of the individual title company defendants. Thus, in my view, the plaintiff's attempt to differentiate the status of the SKLD directors from the organizations they represent in order to capitalize on a document production error is fatuous and twists Frontier's own theory of the case mercilessly. Moreover, the objective evidence supports the conclusion that [*40] a legal opinion to SKLD was indirectly intended for each individual title company member/shareholder of the SKLD corporate entity.

Accordingly, the motion for a protective order must be granted as it is obvious that the individual title companies themselves through their representatives to the SKLD board form the "control group" of SKLD. Moreover, it is well established that "control" of a corporation is not presumptively found in an individual person. *Dunn Chemical Co. v. Sybron Corp.*, 1975-2 Trade Cas. (CCH) 67,458, 67,460 (S.D.N.Y. 1975). The situation in *Dunn* is somewhat similar in that communications from one corporate figure to the corporation's in-house counsel were found to be covered by the attorney-client privilege. Finally, to the extent that waiver remains an issue, I find absolutely no indication of intentional waiver of the privilege in this matter; thus, the confession of defendant's counsel is heeded, and I find absolution is appropriate in this case.⁴²

[*41] III. Plaintiff's Sherman Act § 2 Claims

The plaintiff's second claim for relief arises under the monopolization section of the Sherman Act, *15 U.S.C. § 2*. Through a motion to amend the complaint, the plaintiff proposed to drop the claims under *§ 2* noting in its motion that "[d]iscovery has also enabled Plaintiff to determine that its claims under *§ 2* of the Sherman Act should be deleted and therefore, the *§ 2* claims have been deleted." The defendants objected to some aspects of the plaintiff's

⁴¹

Indeed, as indicated previously, plaintiff apparently does not assert evidence of intentional waiver through the mere release of the document. *C. F. Johnson v. Zerbst*, 304 U.S. 458, 464, 58 S. Ct. 1019, 82 L. Ed. 1461 (1938). Instead, plaintiff argues that McLaughlin's act of sending the document to the Lawyers' home office demonstrates intent to waive the privilege by breaching confidentiality through the exposure of this document to persons not on the SKLD board. This argument is not persuasive. See *Dunn Chemical Co. v. Sybron Corp.*, 1975 U.S. Dist. LEXIS 15801, 1975-2 Trade Cas. (CCH) at P60,561 (S.D.N.Y. 1975).

⁴² Mr. Hartley's comment "People -- even lawyers -- make mistakes," I can only reply "To err is human, to forgive divine."

proposed amended complaint; however, their memorandum in opposition contained a "Stipulation in Dismissal of Plaintiff's Second Claim for Relief."

At the hearing on these motions, plaintiff withdrew the Motion to Amend. However, in my view, the decision not to proceed with an amended complaint should not have altered the decision to delete the monopolization claim to which the defendants had stipulated. My review of the extensive memoranda submitted and the many pages of deposition testimony and documents in connection with the motions reviewed here indicates that plaintiff's determination to delete the monopolization claim was appropriate in this case. [*42] Accordingly, it is

ORDERED:

1. The defendants' motion for partial summary judgment on the statute of limitations question is granted;
2. The plaintiff's motion for partial summary judgment is denied;
3. The defendants' motion for partial summary judgment on Take-Off is denied;
4. The defendant Commonwealth's motion for summary judgment is granted as to the statute of limitations and the delivery service issues, but denied as to its participation in Take-Off and the starter exchange;
5. The defendant Lawyers' motion for a protective order is granted;
6. The complaint is amended to delete the second claim for relief arising under [§ 2](#) of the Sherman Act.

DATED at Denver, Colorado, this 3rd day of June, 1983.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > General Overview

HN1 Antitrust & Trade Law, Sherman Act

The interstate commerce component of an antitrust cause of action may be established in two ways. First, plaintiff may allege and prove that defendant's conduct is "within" the stream of interstate commerce. Alternatively, plaintiff may allege and prove that defendant's conduct, although entirely local or confined to one state, nonetheless "affects" interstate commerce.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Real Property Law > Brokers > Right to Commissions

Transportation Law > ... > Federal Powers > Powers of Congress > Substantial Relations

Antitrust & Trade Law > Sherman Act > General Overview

HN2 Antitrust Actions, Facilities

The Ninth Circuit has extracted from McLain a general rule that the requisite impact on interstate commerce may be established by any of a defendant's business activities independent of the violations. However, the First and Tenth Circuits have read McLain more narrowly to mean that an antitrust plaintiff must show an effect upon interstate commerce resulting from defendant's unlawful conduct, either an effect that has already occurred or is likely to occur.

Antitrust & Trade Law > Sherman Act > General Overview

HN3 [] **Antitrust & Trade Law, Sherman Act**

The court agrees with the First and Tenth Circuits that it would not be prudent to extract from McLain a generalized rule that antitrust jurisdiction can be established simply by showing that some aspects of a defendant's business have a relationship to interstate commerce. Rather the inquiry must be whether the defendant's activity that has allegedly been "infected" by unlawful conduct can be shown as a matter of practical economics to have a not insubstantial effect on the interstate commerce involved.

Antitrust & Trade Law > Sherman Act > General Overview

HN4 [] **Antitrust & Trade Law, Sherman Act**

A plaintiff must allege sufficient facts concerning the alleged violation and its likely effect on interstate commerce to support an inference that the defendants' activities infected by illegality either have had or can reasonably be expected to have a not insubstantial effect on commerce.

Counsel: Harold M. Weiner, New York, New York (Sandra M. Goodman, New York, New York, on the brief), for Plaintiff-Appellant.

Robert Lang, New York, New York (Edward N. Meyer, David W. Shapiro, Cole & Deitz, New York, New York, on the brief), for Defendant-Appellee Long Island College Hospital.

Diana L. Nicholson, New York, New York (Corner, Finn, Nicholson & Charles, New York, New York, on the brief), for Defendants-Appellees Owre and Long Island Anesthesiology Associates, P.C.

Judges: Feinberg, Chief Judge, Timbers and Newman, Circuit Judges.

Opinion by: NEWMAN

Opinion

[*923] NEWMAN, Circuit Judge:

This is an appeal from a judgment of the United States District Court for the Eastern District of New York (Charles P. Sifton, Judge) entered upon an order dismissing, with leave to amend, a Sherman Act complaint for failure to allege adequately the required connection to interstate commerce. Though [*924] we do not agree with all of the District Court's analysis of the relevant standards for assessing the sufficiency of an allegation of interstate commerce effects, we agree that the complaint, in its present form, was properly dismissed.

I.

The following facts were alleged in the complaint and subsequently filed affidavits. Plaintiff-appellant Monica Furlong is a licensed physician and surgeon and a National Board certified anesthesiologist. Dr. Furlong began

work at the Long Island College Hospital (LICH) in 1968. In 1974, Dr. Stewart Owre, chief of the Department of Anesthesiology at LICH, appointed Dr. Furlong to the position of Assistant Director of Anesthesiology. By 1977, appellant had become a fully privileged staff member of LICH with senior privileges in anesthesiology.

In May 1978, Dr. Owre established a professional corporation, Long Island Anesthesiology Associates (LIAA). Although the other anesthesiologists associated with LICH joined LIAA, Dr. Furlong was not asked to become a member. On May 10, 1978, LIAA executed a contract with LICH, which granted LIAA the exclusive right to provide anesthesiological services to LICH, and which obliged LIAA to **[**3]** provide such services on a 24-hour, seven-days-per-week basis.

Notwithstanding the exclusivity provision of its contract with LIAA, LICH did not dismiss Dr. Furlong from her staff position. Dr. Owre, however, deprived Dr. Furlong of certain economic benefits that she had consistently received prior to the formation of LIAA. In addition, Dr. Owre removed Dr. Furlong from her position as Assistant Director of Anesthesiology and sought to prevent her assignment to surgical cases.

On April 15, 1979, Dr. Furlong requested and received a leave of absence from LICH. Some time during her leave, Dr. Furlong found alternative employment as an anesthesiologist. On August 14, 1981, Dr. Furlong instituted this action, alleging, among other things, that LICH, LIAA, and Dr. Owre acted together to restrain trade and fix prices in violation of section 1 of the Sherman Act, 15 U.S.C. § 1 (1976).

To establish that her claim was cognizable under federal antitrust law, Dr. Furlong alleged several connections between the parties' business activities and interstate commerce. The connections specified were Dr. Furlong's receipt of third-party payments from out-of-state, LIAA's **[**4]** receipt of such payments, LIAA's practice of purchasing goods and services in interstate commerce, and LICH's receipt of federal subsidies. It was not alleged that any of these connections to interstate commerce were or would be affected by the claimed antitrust violation.

Defendants filed motions to dismiss the complaint, pursuant to Fed. R. Civ. P. 12(b)(6), for failure to allege adequately the effect on interstate commerce required to permit application of the Sherman Act. In the supporting affidavits, defendants asserted that neither the amount of out-of-state payments received nor the amount of goods and services purchased had been or would be altered by their alleged conduct.

On June 16, 1982, the District Court filed a memorandum opinion and order dismissing the claim.¹ **[**6]** In its opinion, the Court held that "as a matter of logic,' the extent of defendants' activities in interstate commerce, in and of itself, 'is irrelevant in a denial of hospital staff privileges . . . [since] their denial of staff privileges to [plaintiff] has no possible effect on their own activities in interstate commerce; the only potential effect relates to plaintiff['s] practice of medicine, **[**5]**" quoting Cardio-Medical Associates, Ltd. v. Crozer-Chester Medical Center, 536 F. Supp. 1065 (E.D. Pa. 1982). Focusing solely on plaintiff's professional **[*925]** activities, Judge Sifton concluded that plaintiff's receipt of third-party payments from out of state did not provide a cognizable relation to interstate commerce within the scope of the Sherman Act.² He therefore dismissed the complaint "without prejudice to the filing of an amended complaint that would state a claim within the Court's jurisdiction." Declining the District Court's invitation to amend, plaintiff appealed from the judgment entered upon the order of dismissal.

II.

¹ The District Court assessed only the sufficiency of the complaint and did not render an adverse summary judgment, even though the submission of affidavits might have permitted the defendants' motion to dismiss to be treated as a motion for summary judgment. See Fed. R. Civ. P. 12(c). This testing of the complaint alone, a course that inured to the plaintiff's advantage, since the dismissal was with leave to amend, was proper.

² The District Court also concluded that, if the complaint was endeavoring to allege jurisdiction based on the interstate movement of plaintiff's patients, this basis was legally insufficient. On appeal, plaintiff does not claim that her complaint should be understood as making such an allegation, and we therefore do not consider it.

HN1[] The interstate commerce component of an antitrust cause of action may be established in two ways. First, plaintiff may allege and prove that defendant's conduct is "within" the stream of interstate commerce. *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975). Alternatively, plaintiff may allege and prove that defendant's conduct, although entirely local or confined to one state, nonetheless "affects" interstate commerce. *United States v. Employing Plasterers Association*, 347 U.S. 186, 189, 98 L. Ed. 618, 74 S. Ct. 452 (1954). Both sides in this case agree that the complaint seeks to plead antitrust [**7] jurisdiction under the "affecting commerce" approach. What divides the parties on the substantive aspect of the commerce issue is a dispute concerning the scope of business activities relevant in determining the requisite relationship to interstate commerce. This dispute concerns two issues: (1) whether, in any antitrust case, a court may examine all of the business activities of a defendant or only the defendant's activities affected by the conduct alleged to be unlawful; (2) whether, in a case like Dr. Furlong's, involving a doctor's alleged loss of hospital staff privileges, a court may examine the relevant activities of either party or only those of the plaintiff.

The first dispute requires consideration of the Supreme Court's decision in *McLain v. Real Estate Board*, 444 U.S. 232, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980), which sustained the jurisdictional allegations of a complaint by real estate buyers and sellers accusing New Orleans real estate brokers of conspiring to fix commission rates. The Court ruled that the plaintiffs need demonstrate a substantial effect on interstate commerce resulting only from defendants' "brokerage activity," not from the "alleged [**8] conspiracy to fix commission rates." *Id. at 242*. **HN2**[] The Ninth Circuit has extracted from *McLain* a general rule that the requisite impact on interstate commerce may be established by any of a defendant's business activities "independent of the violations." *Western Waste Service Systems v. Universal Waste Control*, 616 F.2d 1094, 1097 (9th Cir.), cert. denied, 449 U.S. 869, 66 L. Ed. 2d 88, 101 S. Ct. 205 (1980).³ However, the First and Tenth Circuits have read *McLain* more narrowly to mean that an antitrust plaintiff must show an effect upon interstate commerce resulting from defendant's unlawful conduct, either an effect that has already occurred or is likely to occur. *Cordova & Simonpietri Insurance Agency v. Chase Manhattan Bank*, 649 F.2d 36, 45 (1st Cir. 1981); *Crane v. Intermountain Health Care, Inc.*, 637 F.2d 715, 722 (10th Cir. 1981) (en banc). At first glance, this narrower approach seems inconsistent with the language in *McLain* that explicitly rejected a requirement that the plaintiffs [**9] must show an effect on commerce caused by the alleged price-fixing or other activity alleged to be unlawful. *444 U.S. at 242-43*. However, as Judge Breyer's opinion for the First Circuit in *Cordova* indicates, the narrower view [**9] does not require an explicit showing of a causal link between the unlawful conduct and interstate commerce; instead, it requires only sufficient facts to support an inference that the unlawful conduct has affected or is likely to affect commerce, and in drawing this inference a court will focus upon the link between the defendant's activities "infected" by illegality, *649 F.2d at 45* (quoting *McLain, supra*, *444 U.S. at 246*), and interstate commerce.

[**10] **HN3**[]

We agree with the First and Tenth Circuits that it would not be prudent to extract from *McLain* a generalized rule that antitrust jurisdiction can be established simply by showing that some aspects of a defendant's business have a relationship to interstate commerce. Rather the inquiry must be whether the defendant's activity that has allegedly been "infected" by unlawful conduct can be shown "as a matter of practical economics' to have a not insubstantial effect on the interstate commerce involved." *McLain, supra*, *444 U.S. at 246*, quoting *Hospital Building Co. v. Rex Hospital Trustees*, 425 U.S. 738, 745, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976). The requisite showing will vary with the type of unlawful conduct alleged. With a price-fixing allegation, as in *McLain*, the link between the "infected" activities and an ultimate effect on commerce was easily posited, since price-fixing is generally recognized as tending to restrict output, and the complaint adequately alleged interstate activities -- real estate financing and title insurance -- that [**11] would be adversely affected if the local brokerage activities of the defendants were diminished. In prior cases, the Court has spelled out in more detail the causal chain by which the alleged illegality could be expected to affect the relevant lines of commerce. *Burke v. Ford*, 389 U.S. 320, 19 L. Ed. 2d 554, 88 S. Ct.

³ Though *Western Waste* announced a broad rule focusing on defendant's activities "independent of the violation," *616 F.2d at 1097*, Judge Kennedy's opinion was careful to detail numerous respects in which the alleged illegality could be expected to affect interstate commerce. *Id. at 1097-99*.

[443 \(1967\); Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 235-44, 92 L. Ed. 1328, 68 S. Ct. 996 \(1948\)](#). We therefore conclude that [HN4](#) [↑] a plaintiff must allege sufficient facts concerning the alleged violation and its likely effect on interstate commerce to support an inference that the defendants' activities infected by illegality either have had or can reasonably be expected to have a not insubstantial effect on commerce.

The second substantive issue is whether in a case like the pending one the requisite relationship with commerce may be based on the activities of both plaintiff and defendants, or only, as the District Court ruled, on those of the plaintiff. On this issue, we think the District Court too readily [**12] put aside any consideration of the defendants' activities.⁴ Judge Sifton adopted the view, expressed in *Cardio-Medical Associates, supra*, that in a case involving a hospital's denial of staff privileges, the alleged violation can never affect the hospital's receipt of goods and services. However, this view ignores the rationale behind the Sherman Act's condemnation of such anti-competitive schemes as price-fixing and group boycotting. Such schemes are prohibited because they permit those who perpetrate them to constrict supply, raise prices, and lower output. If output decreases, a defendant's demand for the goods and services it uses will also decrease. Thus, as a matter of substantive [antitrust law](#), there is no defect in a complaint that alleges that a denial of staff privileges, undertaken in furtherance of a price-fixing or group boycotting scheme, may ultimately affect certain of the activities that connect a hospital to interstate commerce.

[**13] With these substantive principles in mind, we now consider whether the complaint adequately alleged the requisite jurisdictional element of an antitrust claim. We are mindful of McLain's caution that the plaintiffs there were not required to make a "particularized showing" of an effect on interstate commerce in order to [[*927](#)] survive a motion to dismiss, but we also must assume that the Court was willing to accept a somewhat general allegation because the causal connection to identified lines of commerce from activities subject to restriction by reason of price-fixing was so readily inferable. That is not the situation with Dr. Furlong's complaint. Though her complaint mentions "price-fixing" in a caption to her antitrust cause of action, she has not alleged the classic agreement between competitors that concerned the Court in *McLain*. There is no claim that competing hospitals or associations of anesthesiologists have conspired to fix the prices for their services. In fact, there is no allegation of price-fixing in any of the operative language of the complaint. Though we do not doubt that a price-fixing conspiracy or a group boycotting scheme can be shown "as a matter [**14] of practical economics" to have an adverse effect on the perpetrator's interstate activities, this complaint fails to set forth any facts from which it is inferable that the defendants' activities, infected with the particular illegality alleged, are likely to have a substantial effect on commerce. That omission is not surprising, since it is not easy to imagine how the exclusion of Dr. Furlong from LIAA and the various harassments alleged to have prompted her withdrawal from the LICH medical staff might be shown to have a predictable tendency to restrict the defendants' purchase of supplies from out of state. Though we do not agree with Judge Sifton that defendants' activities are irrelevant as a matter of logic, we do agree that the complaint in its present form fails to set forth facts from which the jurisdictional element, based on defendants' activities, is inferable.

Whether the jurisdictional element was adequately pleaded with respect to plaintiff's own activities is a closer question. Plaintiff alleged that as a result of defendants' conduct she lost \$120,000 of income and that she derives a "substantial portion" of her income from third-party payments by out-of-state [**15] insurers.⁵ In *Rex Hospital* the Supreme Court included an antitrust plaintiff's loss of revenue from out-of-state insurers among a "combination of factors" that sufficed as an adequate pleading of a substantial effect on commerce where the revenue loss, plus diminished out-of-state purchases, totaled "thousands and perhaps hundreds of thousands of dollars." [425 U.S. at 744](#). However, out-of-state insurance payments alone have been held inadequate to establish the jurisdictional

⁴ It is possible that Judge Sifton was rejecting consideration of defendants' activities not as a matter of substantive law, but only as a matter of procedure for lack of an adequate pleading; if the latter is the case, we are in agreement with him, as our subsequent discussion will reveal.

⁵ In her brief Dr. Furlong alleges that she is prepared to prove that defendants' conduct affected interstate commerce by diminishing her purchase of out-of-state equipment and supplies. However, the complaint contains no allegation to this effect, much less an adequate claim of an amount of diminished out-of-state purchases that could be evaluated by the District Court against the standard of a "not insubstantial" effect on commerce. Plaintiff's opportunity to amend her complaint will enable her to plead such an allegation if it can be made in good faith.

element when they constituted only 1/4 of one percent of a plaintiff's income. [*Hahn v. Oregon Physicians' Service, 508 F. Supp. 970, 977 \(D. Ore. 1981\)*](#), rev'd on other grounds, [*689 F.2d 840 \(9th Cir. 1982\)*](#).

[**16] We are mindful of the generous approach to pleading outlined in [*Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 \(1957\)*](#), which has been applied in the antitrust context. [*McLain, supra, 444 U.S. at 246*](#). However, we think that *Conley* permits a pleader to enjoy all favorable inferences from facts that have been pleaded, and does not permit conclusory statements to substitute for minimally sufficient factual allegations. Antitrust suits like Dr. Furlong's, which are at best at the very margin of the Sherman Act's coverage, ought not to be initiated without some specificity concerning the jurisdictional facts readily within the plaintiff's knowledge. Moreover, while *Conley* cautions against hastily denying a plaintiff access to a court, it does not impair a district court's authority to dismiss with leave to amend a complaint of borderline jurisdictional sufficiency so that more refined allegations may be formulated and then definitively assessed for legal adequacy. Finally, [*928] a more detailed pleading requirement in such cases obliges a plaintiff to give some thought to the theory of his case, thought that may [**17] well reveal to him that he does not, after all, have a case worth pursuing in a federal jurisdiction; it also obliges his attorney to reckon with the "good ground" standard of [*Fed. R. Civ. P. 11*](#) when he endeavors to plead factual allegations.

Though we are not prepared to say that a diminution of a doctor's out-of-state payments cannot satisfy the jurisdictional element of an antitrust claim, we think Dr. Furlong should be more specific as to the jurisdictional facts of her claim before a district court can be asked to rule whether her claim involves a not insubstantial effect on commerce.

For these reasons, the judgment dismissing the complaint without prejudice is affirmed.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1 [down arrow] **Injunctions, Preliminary & Temporary Injunctions**

In order to grant a preliminary injunction in this circuit, the standards which require consideration are: (1) the threat of irreparable harm to the movant; (2) the state of the balance between this harm and the injury that granting the injunction will inflict on other parties litigant; (3) the probability that movant will succeed on the merits; and,(4) the public interest.

Antitrust & Trade Law > Sherman Act > General Overview

HN2 [down arrow] **Antitrust & Trade Law, Sherman Act**

Liability under the Sherman Act, [15 U.S.C.S. § 2](#), can be determined upon a showing of: (1) the possession of monopoly power in the relevant market, and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident. The plaintiff must demonstrate that it has been injured in its business or property by the acts of the defendant. A finding of monopoly power can best be described as a showing that the defendant has the power to control prices or exclude competition. The existence vel non of monopoly power depends on the market that is used as the measuring stick for the defendants' power. Both the geographic area and the products are concerns in a market definition. Once that market has been defined, the defendant's power over it must be determined.

Antitrust & Trade Law > Sherman Act > General Overview

[HN3](#)[] Antitrust & Trade Law, Sherman Act

Use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage or to destroy a competitor is unlawful.

Antitrust & Trade Law > Sherman Act > General Overview

[HN4](#)[] Relevant Market, Geographic Market Definition

In determining whether there has been a use of monopoly power in some proscribed manner, the court must in the first step in this analysis, define the relevant product and geographic market. The bounds of the relevant product market are determined by looking to whether the commodities are reasonably interchangeable by consumers for the same purposes. Determining whether two products are the same frequently can rest in part on the cross-elasticity of demand, i.e., whether consumers would likely be prone to shift from one product to another based on relative prices. The analysis to determine the bounds of the local advertising market for the first claim suffices to define the advertising market relating to the second claim. The second phase of defining a relevant market is to define the geographic market.

Opinion

Memorandum and Order on Motion for Preliminary Injunction

URBOM, Ch. J.: The plaintiff, Sun Newspapers, Inc., has asked for a preliminary injunction to restrain the defendants from engaging in certain alleged anticompetitive conduct in violation of [§ 2](#) of the Sherman Act, [15](#)

U.S.C. § 2, and § 7 of the Clayton Act, 18 U.S.C. § 18. Adequate jurisdictional facts concerning the connection of the parties to interstate commerce were shown in the stipulated facts. Those facts will not be repeated in this memorandum.

I.

Sun Newspapers, Inc. publishes weekly newspapers circulated in the Omaha, Nebraska, area under seven separate names, as well as five shopper-type advertising papers for distribution in the Omaha area. It also publishes the Bellevue Leader, a weekly newspaper circulated in Bellevue, [*2] Nebraska, and a weekly newspaper titled Air Pulse, printed under contract with the United States Air Force and circulated to Offutt Air Force Base in Sarpy County.

Each of the newspapers bearing the Sun's name and each of the shoppers is circulated in different areas of Douglas and Sarpy counties. The advertising appearing in each of the newspapers and the shoppers is sold separately, enabling potential advertisers to reach a segment of the residents within the area. Advertising in the Bellevue Leader and Air Pulse is also sold separately from that in the other Sun papers and that shoppers. The Sun newspapers include items of news and editorial comment common to all and a certain amount of news and editorial comment that is particular to the area in which the paper is circulated. In 1972 Sun Newspapers was awarded a Pulitzer prize for reportorial work.

The Omaha World-Herald is a daily newspaper in Omaha, Nebraska, owned by the Omaha World-Herald Company, a Delaware corporation with its principal offices in Omaha, Nebraska. The World-Herald newspaper is published in a number of editions each day of the week and is circulated over a wide area, including Douglas and Sarpy [*3] counties. In the year preceding March 31, 1981, the average paid circulation of the Omaha World-Herald in Douglas and Sarpy counties was in excess of 130,000 for the daily editions and in excess of 140,000 for the Sunday edition. These figures comprise over one-half of the total daily circulation and slightly under one-half of the Sunday circulation. In 1980 the World-Herald Company, through a subsidiary corporation called Suburban Newspapers, Inc., purchased the stock of Papillion Times Printing Co., which published the Papillion Times/La Vista News, the Ralston Recorder/Millard Edition, Springfield Monitor, Gretna Breeze, and a shopper known as the Suburban Signal. As of the end of November 1982, the circulation of the Papillion papers was around 6,700 copies and the Signal about 11,000 copies a week. Each of the Papillion publications is circulated in a different part of Douglas and Sarpy counties.

In mid-1981 World-Herald Company created a subsidiary called Printers and Mailers, Inc. and with it purchased the stock of Rapid Printers and Lithographers, Inc., merged the two entities, and formed Rapid Printers and Mailers, Inc.; Rapid Printers and Mailers, Inc. is believed [*4] by the parties to be the largest printer of newspaper advertising inserts in Nebraska. For several years prior to January 1981, the plaintiff's Step-Saver shoppers were printed by Rapid.

Beginning in September of 1981, Rapid Printers and Mailers embarked on a venture to mail advertising circulars to almost all of the residences in Douglas and Sarpy counties. The circulars involved a "marriage mailer" concept, whereby the advertising of several advertisers is placed in a single tabloid paper. Rapid prints some but not all of the inserts that are put together to form the mailer, called the Golden Courier.

From March to November of 1982, the World-Herald Company distributed pre-printed advertising in a program termed Circulation Plus. The concept of the program was to offer advertisers distribution of preprinted advertising materials to the subscribers of the Omaha World-Herald through the regular newspaper distribution channels and to nonsubscribers of the newspaper through mail delivery. Rapid assisted the World-Herald in the preparation of the mailing list for the Circulation Plus program, which was designed to reach most of the homes in Douglas and Sarpy counties.

Suburban [*5] offered local advertisers distribution of advertising materials in the areas where the particular publications were circulated.

In February 1981 the stock of Sun Newspapers, Inc. was purchased by Bruce Sagan. Neither the Golden Courier nor the Circulation Plus program was in existence at that time. After his purchase of Sun Newspapers, Sagan purchased the Step-Saver publications and then consolidated the Sun operations with those of the Step-Savers and eliminated a publication called the Bargain Finder that was being published by the Sun organization and was similar to the Step-Savers in advertising content.

When Sagan purchased the Sun, it had been losing money on the newspapers for many months. The losses continued every month through November 1981, when the papers made their first profit, \$4,593.00, but no profit has apparently been made since. Sagan testified that he felt the one month's profit was the result of the reorganization efforts he had undertaken. He also testified that the Golden Courier, Circulation Plus, and Suburban have eroded the profitability of the Sun, because they have taken key advertising accounts from the Sun that would have kept the operations [*6] profitable.

In early 1981, Sagan had discussions with Rapid concerning its printing all of the Sun newspapers. At that time, Rapid was printing the weekly Step-Savers; the Sun newspapers and Air Pulse were being printed at a printing plant in Norfolk, Nebraska. Sagan wanted to have all of the Sun publications printed at Rapid and on a single day each week, but Rapid was unable to do that. In January 1982 Sagan began printing all of the Sun publications at a printing plant he owns in Chicago, Illinois. He testified that he began printing in Chicago because Rapid was then owned by the World-Herald Company, a competitor, thereby giving it price control over the Sun and competitive information. Sagan felt that the price control was being used to the detriment of the Sun, because the Sun was paying a slightly higher price than world have been necessary.

The Sun newspapers are weekly and appear on Wednesday of each week. As previously mentioned, each edition contains news, features, and editorials common to the others and some that appear only in a particular paper. The Sun newspapers are circulated in particular zones that cover the majority of Douglas and Sarpy counties; certain [*7] portions of the county not covered by regular carrier delivery can receive the Sun newspapers by mail. Sagan testified that there is no carrier delivery downtown or in several of the rural areas where there are insufficient people living to justify the service but that mail delivery is adequate to service the subscribers in those areas. The Step-Savers are delivered to residences of those who do not subscribe to the Sun newspapers.

The Sun's advertising is sold by a regular sales force. An advertiser seeking non-classified advertising in a single edition of the Sun newspaper without purchasing it in another edition or may purchase it in a combination that represents less than all of the papers. Classified advertising must be purchased for the entire set of the Sun papers. Advertising space is sold in various sizes ranging from classified to full-page ads. The Sun newspapers also employ seventy-seven full-time and forty-four part-time employees in addition to approximately 150 carriers to deliver the papers.

The Omaha World-Herald is a much larger operation. The daily editions are delivered to 75 percent of the homes in Douglas and Sarpy counties and the Sunday editions [*8] are delivered to 80 percent of the homes in the two-county area. The percentage of homes covered by the World-Herald diminishes somewhat when the Omaha Standard Metropolitan Statistical Area (SMSA) or the Omaha Retail Trading Zones (

Z) are used as the basis for determining the percentages. The Omaha SMSA includes the two counties plus one county in Iowa; the daily editions are delivered to 67 percent of the SMSA homes and the Sunday editions to 73 percent. The RTZ includes a number of counties surrounding the Omaha area; the daily percentage falls to 57 percent of the RTZ and the Sunday to 65 percent when this area is used as the base.

The Omaha World-Herald sells advertising in a sales force that is separate from that of the Golden Courier or the Suburban. Advertising is offered in a number of varieties, including the run-of-the-paper (ROP) and zoned inserts. ROP advertising involves placing an ad that is to appear in every newspaper printed. The inserts are separately printed advertising circulars that are manually inserted into the newspaper. It is possible to buy placement of inserts for less than the full run of the World-Herald in a "zone" within certain portions [*9] of the Douglas and Sarpy counties area. John Gottschalk, vice president for general management of the Omaha World-Herald Company, testified that the number of different combinations of zones was limited to four, a limit necessitated by the physical

size of the plan in which the World-Herald is printed and distributed to carriers. The zoning is limited on Wednesday and Sunday, because frequently the requests for zoning on those days -- prime advertising days -- exceed the paper's capabilities to zone.

According to Gottschalk, the acquisition of Suburban by World-Herald was made for a number of reasons: the newspapers were in growing communities and thereby represented good investments, and Papillion Publications printed its papers with offset presses, a different type than that used by the World-Herald to print its newspaper and the offset press capability was thought to be a good tool for learning techniques of that type of printing. There was also a concern about how well the World-Herald could manage acquired companies.

The World-Herald began the Circulation Plus program in March 1982 in an effort to provide a total-market-coverage advertising vehicle. Copies of Circulation [*10] Plus were inserted in the Omaha World-Herald destined for Douglas and Sarpy county subscribers and were mailed to nonsubscribers in the same areas. The endeavor apparently was never a success and was discontinued in November of 1982, because it was unable to attract sufficient advertisers. During the start-up phase of the project, Rapid assisted the World-Herald in preparation of a mailing list. The list needed to be tailored to the Circulation Plus program, because addresses of subscribers of the World-Herald were to be eliminated from the mailing list. Rapid's computer was used to perform this task and the World-Herald was charged for the service.

The Golden Courier was started by Rapid in September 1981, after it had been acquired by the World-Herald Company. According to testimony at the hearing, the concept of the Golden Courier as a "marriage mailer" was feasible only a short time before September. Prior to that time the United States Postal Service had required separate postage for each different advertiser in a particular mailer. When the Service changed its interpretation of a regulation, several advertisers could have ads in a mailer and postage was charged only [*11] for the entire mailer itself. This allowed businesses such as Rapid to assemble advertising from several advertisers and place it in a single tabloid mailer. There was testimony at the hearing that John Brown, one of the co-owners of Rapid before it was acquired by the World-Herald Company, had described a marriage mailer as an idea of his "that was just waiting to happen" when he was negotiating with Berkshire-Hathaway concerning the sale of Rapid; his statement was made well in advance of the change in the interpretation of the postal service regulation.

The Golden Courier is distributed on Wednesday of each week by mail. There was agreement among those testifying that Wednesday is the most desirable day of the week for a tabloid such as the Golden Courier to reach consumers. Print advertising tends to have a delayed effect upon consumers' behavior, necessitating its reaching them by Wednesday in order to influence buying behavior on Saturday, typically the peak day for retail sales.

Brown testified that not all of the inserts that go into the Golden Courier are printed by Rapid; that soon after World-Herald acquired Rapid it infused substantial amounts of capital into [*12] the enterprise to purchase new presses and a building to house them; that the new presses are not used to print the Golden Courier and the printing for the Golden Courier did not require the new presses in order to free up time on the old presses; and that Rapid had accesss to adequate capital funding to begin the Golden Courier before it was acquired by the World-Herald Company.

Generally, the Golden Courier sells advertising of a minimum size of a full tabloid page. On at least two occasions, however, it sold advertising for a smaller size ad in a section called Food Fare; the Food Fare portion of the Golden Courier only appeared twice and has not been used since. That type of supplement allowed the Golden Courier to reach advertisers who desired to place less than a full page ad. The Sun newspapers all contain a great deal of display advertising that is less than a full tabloid page.

At the time the World-Herald Company acquired Suburban the latter was losing money. There had been no significant competition between the World-Herald and Suburban. The rates for advertising in the two papers were and are vastly different; the Suburban papers were published weekly, the World-Herald [*13] daily. Gottschalk testified that Suburban does not perform an appreciable amount of work for the World-Herald and could recall only two instances where Suburban performed work for the World-Herald and neither exceeded \$1,000.00. Gottschalk also testified that Suburban's sales staff is separate from that of the World-Herald.

The Suburban newspapers are circulated primarily in the Ralston and Papillion, Nebraska, areas. At the hearing Sagan made allegations that the Papillion paper was attempting to expand its territory into Bellevue, where one of his papers is circulated. Terry Ausenbaugh, who is president of the Suburban newspapers, testified that the Papillion Times was available at four stores in Bellevue for one week in November of 1982 and only twelve copies were sold; that they were placed in those locations because local election results were printed in the paper; and that since November 1982 the Papillion Times has been sold at a convenience store in Bellevue, the sales averaging about five copies a week.

At some time after the Suburban papers were acquired by the World-Herald Company they began a new paper called the MWR Revue that was circulated on the Offutt Air Force [*14] Base in Sarpy County. There was no testimony or other evidence to show whether the MWR Revue had any effect on the Sun's publication, Air Pulse, that is circulated on the air base. The MWR Revue like Air Pulse, is printed under a contract from the federal government. Suburban sells advertising space in the MWR Revue. There was no evidence as to the extent of those sales or whether there has been any advertising sales taken from the Sun publication.

A logical place to begin when considering any monopolization case under the Sherman and Clayton Acts is to define the relevant market. Such a definition takes on a number of aspects, including the geographic area, the product, and the manner in which other similar products compete with the product in question. In this regard the plaintiff presented extensive evidence through an expert witness, John S. Coulson.

Coulson identified two distinct types of advertisers within print media advertising. One group is the national advertiser who seeks to promote the image of a particular product. The purpose of the advertising is not to promote purchasing of a product in a particular location but only the eventual purchase of a product [*15] at some location. Typically, large manufacturers purchase national advertising. Local advertising on the other hand, is geared toward encouraging a purchase at a particular store or outlet and is not much concerned with what brand of goods is purchased. The advertisers tend to be local businesses, placing ads in media close to their place of business. National advertising uses a more complex chain of distribution, involving several intermediaries, while local advertising tends to involve only the advertiser and the representatives of the particular medium. The markets for local and national advertising are recognized as separate by trade publications reporting advertising data.

In studying the Omaha market, Coulson divided advertising into local and national, based on the content of the ad. Local advertising was defined as containing a local addresss of the business. Coulson used three local areas in his study: the Omaha SMSA, the Omaha RTZ, and Douglas and Sarpy counties. Using statistical sampling methods and other reported data, he arrived at an estimated total dollar volume of advertising contained in electronic media, billboards, directories, direct mail advertising, [*16] transit advertising, and newspapers in Omaha for 1981. While the estimate of revenues is for 1981-1982, 1982 advertising rates were used. Of his estimated total of a market for \$64.2 million for the Omaha SMSA and \$57.7 million for Douglas and Sarpy counties, Coulson estimated that the Omaha World-Herald and its subsidiaries account for 50 percent of the total local advertising market in the Omaha SMSA and 54 percent of the total local advertising market for Douglas and Sarpy counties.

Coulson excluded several media from the study to determine the share of the print media market that the Omaha World-Herald and its subsidiaries occupied in 1981. He excluded electronic media, directories (including yellow pages of the telephone book), billboards, and transit advertising, because he felt that they did not serve the same function as newspaper advertiisng. Electronic media are able to project a verbal or visual image for a short period of time; the image does not last more than a few seconds and the consumer cannot refer back to it, as with newspaper advertising. Directories differ from newspaper advertising, because they contain an exhaustive listing of businesses without the "here [*17] and now" aspect that a newspaper ad may contain. Newspaper ads can be tailored to the particular time at which they are run, while directories are published infrequently and often do not contain more than location and general business information. Billboards and transit advertising were excluded because they are similar to directories; both are able to use only a very limited number of words and pictures to convey a message and their limited nature deprives them of the "here and now" aspect that newspaper advertising is able to convey. It would also seem that their limited message capability would make them unlike newspaper advertising, because consumers could not refer back to the ad at a later time for information. When these categories were eliminated from the total of advertising revenues, the Omaha SMSA yielded \$42.1 million in print

advertising and Douglas and Sarpy counties yielded \$37.8 million under Coulson's study. Of that total, Coulson calculated that the World-Herald companies held 77 percent of the Omaha SMSA market and 82 per cent of the Douglas and Sarpy county market.

Coulson arrived at the dollar and percentage figures by examining sample issues of the publications [*18] and determining the total linage of the advertising and converting that to dollar volume by multiplying the rates in rate cards by the linage. Only standard rates were used; no attempt was made to determine whether revenues could vary because of rates that were negotiated off the rate card. Coulson felt that if there was any error in determining the dollar amount under this method it would work to underestimate the World-Herald companies' share of the market. His comment was also directed at the use of the 1982 rates in computing revenue figures for a period in both 1981 and 1982.

There was a certain amount of dispute between the parties as to a number of aspects of Coulson's study that bear on its validity to prove the relevant market. One of those areas was his noninclusion of electronic media and directories. Gottschalk testified that the Omaha World-Herald competes with electronic media and directories, such as the telephone yellow pages, for advertising. In addition, the defendants' counsel sought to show, without success, that certain ads in the newspaper lacked the "here and now" aspect discussed by Coulson, thereby making directory advertising and newspaper advertising [*19] sufficiently comparable that directories should be included in the relevant market. The defendants' attack on the study does not seem to assail it seriously. Gottschalk's opinion, unsubstantiated by any foundation, is not convincing in comparison to the detailed analysis used by Coulson. The yellow page ads used tended to differ in content from the newspaper ads in that the latter conveyed some aspect of "here and now," while the yellow pages ads did not.

The second line of attack used by the defendants was that even if Coulson's exclusions prove valid, the local advertising market in which the World-Herald and the Sun newspapers compete is different and cannot be used as a valid means of comparison to determine the relevant market. What this line of reasoning seems to suggest is that it is necessary to break down further the World-Herald companies' revenues into categories that represent areas in which the Sun organization and the World-Herald organization truly compete. This is supposedly necessitated by the difference in the products offered by the two organizations, the contention being that the Sun offer advertising to customers who wish to advertise in a publication that [*20] appears only weekly, while advertisers in the World-Herald could be attracted by the fact that it is a daily publication. It should be noted, of course, that the Golden Courier and the Suburban publications would likely compete for the advertiser seeking to place advertising in a weekly publication, because they appear weekly. It should also be noted that a portion of the World-Herald's advertising is weekly in nature. Testimony at the hearing indicated that a disproportionate number of advertisers sought to place inserts in the World-Herald on Wednesday and Sunday. This would seem to add a weekly characteristic to the World-Herald's advertising market that the defendants' counsel's arguments tend to ignore. By arguing that weekly advertising is separate from daily advertising, the defendants are placing themselves in the precarious position of seeking to constrain the relevant market to include even less than the plaintiff included in its study. At best this seems to be an inadequate effort to cloud the plaintiff's study. While there appear to be less than mathematically certainty with respect to the accuracy of the plaintiff's study, it is supported by logical, well explained [*21] reasoning and appears to follow a consistent methodology that was testified to as being in accordance with normal statistical procedure. The number of subcategories of local advertising could go on ad infinitum. Logic and good judgment suggest that subdividing of the market must cease somewhere in order to define the relevant market. The defendants have not shown that weekly advertising is sufficiently different from daily to justify a separate sub-market analysis. The defendants' attempt to cast a shadow on the study by pointing to some alleged inconsistency does not persuade me that the study is invalid to show that the World-Herald companies have a dominant market position in the print advertising market in the Douglas Sarpy county area. I am persuaded that the differences between print and other types of local advertising testified to by Coulson are sufficiently significant to allow the exclusion of electronic media, directories, billboard, and transit advertising from the relevant market in which the World-Herald companies compete. The defendants' attempted refutation of the rationale for this exclusion through the testimony of Gottschalk that the World-Herald competes with [*22] the other forms of media for advertising is not sufficient. The degree of competition referred to by Gottschalk is not specified

in the testimony. The competition may be only a minimal area with each type of media having a distinct market. The distinctions drawn by Coulson appear to be valid.

There was evidence presented at the hearing by which the plaintiff attempted to show that the World-Herald companies had exercised their monopoly power within the relevant market to the plaintiff's detriment. A part of the evidence dealt with the World-Herald's attempt to create a total-market-coverage vehicle through the Circulation Plus program. As previously discussed, World-Herald used the Rapid computer to develop a nonsubscriber mailing list. Circulation Plus began in March 1982, after the Golden Courier had begun to be mailed by Rapid. The Circulation Plus program encountered difficulties from the beginning, as the Postal Service would not guarantee the World-Herald that it would be delivered on Wednesday. The days that the mailed copies of the Circulation Plus appeared varied from Tuesday to Thursday, and, according to Gottschalk, this caused Circulation Plus to lose business, [*23] because many would not run advertisements unless Wednesday delivery was assured. The Circulation Plus endeavor was unable to attract sufficient advertising accounts to remain in existence and it was phased out in November 1982; the final issue contained ads from only one advertiser.

Sagan claimed that the deliveries on Tuesday or Thursday were an intentional effort by the World-Herald to preempt the market by having an advertising supplement on Wednesday in the form of the Golden Courier and on either Tuesday or Thursday with Circulation Plus. The testimony of Gottschalk indicated that the delivery on either Tuesday or Thursday was the result of limited postal service, rather than a design by the World-Herald to preempt the entire midweek advertising market.

Sagan also complained of what he felt was another improper exercise of the World-Herald's monopoly power: the timing of the Golden Courier. About the same time as the Golden Courier began, the Sun was negotiating with K-Mart stores to provide total market coverage for the Omaha area and the World-Herald was attempting to start the Circulation Plus program but was having difficulty with it. Sagan testified that he felt that [*24] the Golden Courier was speedily launched to capture the K-Mart account before Sun was able to compose a total-market-coverage system. There was scant evidence at the hearing concerning the underlying reasons for the timing of the Golden Courier's introduction. Although John Brown apparently had the idea for beginning a "marriage mail" program long before the Golden Courier began, he did not testify as to any rationale for the date of the start-up of the mailer. While there is insufficient evidence to demonstrate that the introduction of the Golden Courier was intended to rob the Sun organization of an opportunity to begin its own total-market-coverage advertising medium, the effect of the timing of the start-up can hardly said to have been less than devastating to the Sun organization.

Another alleged use of the monopoly power by the World-Herald organization is through the interselling of accounts. Sagan alleged that the sales staffs of the Golden Courier, the World-Harold, and the Suburban publications were engaging in the interselling of accounts. He based his allegations on some incidents that he observed where an advertiser would change from one of the World-Herald publications [*25] to another. The Sun's general manager, Dixie Cavner, testified that some accounts had shifted from Circulation Plus to the Golden Courier. Gottschalk testified that the sales staffs of the Golden Courier, the World-Herald, and Suburban are separate and do not work together. The plaintiff has shown only isolated instances of an advertising account's shifting from one World-Herald entity to another, without any testimony that the shifts were the result of interselling. Based on that evidence, I do not believe there has been a showing that the World-Harold entities were interselling.

Cavner related another alleged illicit use of monopoly power by the World-Herald through its Rapid subsidiary. Rapid first began the Golden Courier by selling advertising for the full run of the mailing list only, but as time progressed Rapid began to zone the distribution and as a final step created zones as small as 5,000 mailing addresses. Cavner testified that this had a debilitating effect on the Sun, because the Golden Courier was then able to appeal to small grocery businesses that had previously been a staple item among Sun's advertisers. There was no testimony concerning whether the down-zoning [*26] of the Golden Courier's distribution was a deliberate attempt to drive the Sun newspapers out of the market. The effect of the reduction in the Golden Courier's zones on the Sun's operation can easily be seen; it was then possible, as Cavner testified, for the Golden Courier to offer advertising to businesses wishing to saturate only a small portion of the Douglas and Sarpy counties area. This seriously challenged the Sun, because previously it had held out as its forte the ability to segment advertising into small zones.

Another alleged use of monopoly power by the Golden Courier was through its rate structure for insert advertising. World-Herald rate cards introduced into evidence indicate that the full rate for inclusion in the Omaha World-Herald ranged from \$41.25 to \$61.50 per thousand. Certain discounts are available, depending upon the frequency and the degree of circulation covered. The Sun's rate card for insertion shows rates varying from \$20.00 to \$35.00 per thousand for newspaper insertion. The Golden Courier offers a number of rates, the lowest of which was under the "50-50" program. In that program the advertiser must sign a contract agreeing to place a four-page [*27] tabloid in the Golden Courier for fifty weeks. A price of \$50.00 per thousand is charged for printing and insertion with a 5,000-copy minimum. This price is considerably lower than the rate offered for only the insertion of an advertiser's tabloid in the Golden Courier. The "50-50" program offers a four-week test period during which advertisers can try the Golden Courier and can withdraw without penalty or further commitment. Brown testified that there are currently about ten "50-50" contracts outstanding and that ten contracts were entered into at the initiation of the program.

The combination of the rate structure, the "50-50" program, and the smaller zones can easily be seen to have created a strong threat to the Sun's advertising sales: businesses could be given greater control over their advertising costs through the use of smaller, more-targeted zones, and long-term contracts with the Golden Courier than had previously been possible with the Sun.

There was testimony and other evidence presented concerning the publication of Suburban titled the MWR Revue. Because, as discussed earlier in this memorandum, there was no evidence to demonstrate the effect of the MWR Revue [*28] on Air Pulse's ability to attract advertising, I am unable to determine whether Suburban's publication of MWR Revue was detrimental to Sun's publication, Air Pulse. Therefore, there can be no determination as to the anticompetitive effects, if any, that were occasioned by the introduction of the MWR Revue by the World-Herald organization.

The plaintiff also complains about Suburban's attempts to sell advertising to merchants located in the Park Drive Shopping Center in South Omaha. It does not appear that these efforts were anything but bona fide efforts to sell advertising in an area that seems to be within the circulation area of the Suburban papers. Ausenbaugh testified that the Park Drive merchants logically would seek to advertise in the Suburban publications because many of their customers came from the regions served by the Suburban publications.

II.

The plaintiff seeks to have the defendants enjoined during the pendency of this action from engaging in certain anticompetitive actions. Specifically, the Sun requests this court to order the World-Herald, Rapid, and Suburban from publishing and distributing the Golden Courier, or a similar publication, in Douglas and [*29] Sarpy counties, distributing a publication in the nature of Circulation Plus in either of the counties, or distributing a weekly shopper-type publication in the circulation area of the Suburban publications. HN1 In order to grant a preliminary injunction in this circuit, the standards set forth by Dataphase Systems, Inc. v. C L Systems, Inc., 640 F. 2d 109, 114 (C.A. 8th Cir. 1981), must be met. Dataphase requires consideration of:

- (1) the threat of irreparable harm to the movant;
- (2) the state of the balance between this harm and the injury that granting the injunction will inflict on other parties litigant;
- (3) the probability that movant will succeed on the merits; and
- (4) the public interest.

The parties have vigorously contested each of the elements under Dataphase. The probability of success on the merits, however, is clearly the most vigorously contested, and I shall discuss it first.

A.

The plaintiff has introduced evidence that may possibly bear on four alternative causes of action under federal **antitrust law**, three of which are based on § 2 of the Sherman Act, 15 U.S.C. § 2, and one which is based on § 7 of the Clayton Act, 15 U.S.C. § 18. This court is [*30] authorized to enter forms of injunctive relief by § 4 of the Sherman Act, 15 U.S.C. § 4, and by § 16 of the Clayton Act, 15 U.S.C. § 26.

(1)

The first cause of action under § 2 of the Sherman Act is a claim that the Omaha World-Herald used its monopoly power in a daily newspaper market to smother competition in the weekly local advertising market, the allegation being that the World-Herald has done this through the acquisition of Rapid and Suburban, coupled with the use of the Golden Courier by Rapid and the expansion of the territory of Suburban. The plaintiff has also alleged that there was interselling among the three entities, although this was not borne out by the evidence. This aspect of the plaintiff's case draws on the interpretation of § 2 of the Sherman Act found in United States v. Griffith, 334 U.S. 100 (1948), and seeks to hold the World-Herald liable for using monopoly power in one market to gain an advantage in another market. See, also, Berkley Photo, Inc. v. Eastman Kodak Co., 603 F. 2d 263, 275 (C.A. 2nd Cir. 1979).

HN2 [↑] Liability under a § 2 claim can be determined upon a showing of:

(1) the possession of monopoly power in the relevant market and

[*31] (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident.

United States v. Grinnell Corp., 384 U.S. 563, 570-571 (1966).

In addition, the plaintiff must demonstrate that it has been injured in its business or property by the acts of the defendant. Sargent-Welch Scientific Co. v. Ventron Corp., 567 F. 2d 701, 709 (C.A. 7th Cir. 1977).

A finding of monopoly power can best be described as a showing that the defendant has the "power to control prices or exclude competition." United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391 (1956). The existence vel non of monopoly power depends on the market that is used as the measuring stick for the defendants' power. Both the geographic area and the products are concerns in a market definition. Id., at 404; Paschall v. Kansas City Star Co., 695 F. 2d 322, 326, n. 3 (C.A. 8th Cir. 1982). Once that market has been defined, the defendant's power over it must be determined. Id.

The plaintiff urges that the relevant geographic market should be limited to Douglas and Sarpy counties. Failing that, it urges [*32] that the maximum size of the market should be held to encompass only the Omaha SMSA which would add portions of Pottawatamie County, Iowa, to the market. I am persuaded that the Douglas and Sarpy county area is the best geographic market for determining whether the World-Herald possesses a daily newspaper market. A crucial aspect to determine the scope of the relevant market is the ability of a firm to sell its product in certain locations. II Areeda & Turner, Antitrust Law P522 (1978). Statistics derived from plaintiff's Exhibit 13 are helpful. At the hearing the penetration of a newspaper in a locale was considered indicative of its market power. This figure appears to be derived by dividing the number of copies distributed in an area by the total number of households. In Douglas County, the Omaha World-Herald paid subscriptions, as shown by the exhibit, appear to go to over 83 per cent of the households on Sunday and about 79 per cent on other days. The figures for Sarpy County are about 79 per cent for Sunday and 69 per cent for weekdays. The figures in Pottawatamie County, Iowa, are about 36 per cent for Sunday and 26 per cent for weekdays, a drastic difference from Douglas [*33] and Sarpy counties. In Douglas and Sarpy counties, the combined penetration appears to be about 82 per cent for Sundays and 77 per cent for weekdays.

It appears that the Omaha World-Herald is very effective at selling its product in Douglas and Sarpy counties but that the effectiveness falls off significantly in Pottawatamie County. Exhibit 13 also shows that the World-Herald does not attain penetration percentages anywhere near those figures throughout Iowa and Nebraska. The importance of the Douglas and Sarpy county area circulation of the World-Herald is further illustrated by the fact

that it represents over 50 per cent of its total Sunday paid circulation and over 57 per cent of the combined daily circulation. It appears that the Douglas and Sarpy county market is the mainstay of the World-Herald operation and should be considered as the relevant market for determining whether it is a monopoly daily newspaper.

The percentage figures developed above concerning market penetration do not have sufficient relevance to determine the existence vel non of the World-Herald's daily newspaper monopoly without some discussion of the other daily newspapers sold in Omaha. For example, [*34] some other newspaper could conceivably have a circulation reaching the same percentage of Omaha households as the World-Herald if those households subscribed to more than one newspaper. The evidence at the hearing demonstrated that no other daily newspaper had even a five percent penetration in the Douglas and Sarpy county area. The circulation of other daily newspapers in the two-county area appears, therefore, to be only negligible. The defendants did not contest the dominance of the World-Herald in the daily newspaper market.

Given all the evidence, I conclude that the Omaha World-Herald possesses a monopoly position in a daily newspaper market in the two counties.

This conclusion, of course, is based on an assumption regarding the relevant product market. Specifically, the relevant product market was assumed to be comprised only of local daily newspapers. Weekly local newspapers, magazines, and other such publications differ significantly from a local daily newspaper. The testimony of Sagan was enlightening on the difference. Daily newspapers, with their frequency, are able to carry current news of a wide variety; they tend to carry a number of stories written by wire [*35] services covering national and international events. Local weekly newspapers are more restricted in their news coverage and tend to have considerably less emphasis on news with a short-lived time value; they tend to carry more news and feature stories concerned with events around the community than national or international news. National and international news stories in local weeklies differ from those in a daily, because they do not contain extremely time-critical material. Local weekly newspapers also tend to carry less national advertising and fewer syndicated features and comics than daily newspapers. The sum of the differences between daily and weekly newspapers makes it clear that they cater to different interests and should be grouped in different product markets. This conclusion results in the exclusion of nondaily newspapers from the market for purposes of ascertaining whether the Omaha World-Herald has a daily newspaper monopoly in the two-county area.

I also believe that magazines and other such publications should be excluded from the market. The testimony of Coulson leaves me with the impression that only one or two magazines have an edition that is specially [*36] tailored to the midwest region surrounding Omaha. Both of the magazines mentioned readily appear to cater to a specialized audience and not to the general public, asa does a daily newspaper. In addition, the frequency of the magazines' being less than daily would dictate sufficiently different contents to distinguish them from a daily newspaper.

Although the evidence shows a probability that the plaintiff will be able to show at trial that the Omaha World-Herald has a monopoly in the daily newspaper market, the plaintiff to be entitled to relief must show that the World-Herald somehow used the daily newspaper monopoly as a lever to gain an advantage in another market. See United States v. Griffith, supra, 334 U.S. at 108; Berkey Photo, Inc. v. Eastman Kodak Co., supra, 603 F. 2d at 275. Realistically, the only thing the plaintiff has shown in this regard is that the World-Herald used its financial resources to purchase Rapid and Suburban. Ido not believe that there has been a sufficient showing that there was any use of the World-Herald's monopoly power in other ways, such as interselling or account shifting. The issue then is whether the use of its financial resources amounted [*37] to an impermissible use of monopoly power to gain an advantage in the markets served by Rapid and Suburban. I believe that the advantage sought, if any, was in the local advertising market. The bounds of that market are discussed in my analysis, immediately below, of the plaintiff's second § 2 claim.

The mere acquisition of Rapid would not have been enough by itself to find improper conduct under the Griffith rationale. The evidence, however, is sufficiently clear for me to infer that Rapid was a potential competitor of the World-Herald in a related market -- local advertising. As my findings of fact given above indicate, Brown considered a "marriage mailer" like the Golden Courier as an "idea just waiting to happen" when the sale of Rapid was being

negotiated with Berkshire-Hathaway in 1980. The idea surely must have been "just waiting to happen," for he testified that Rapid, without any financial assistance from the World-Herald Company, would have been fully able to start the Golden Courier. Rapid possessed adequate capital and credit reserves to provide the financing for the operation. Only a minimal amount of capital expenditures was necessary; a few tables needed to [*38] be built and some additional space rented, but no new presses or major equipment was necessary. Given that set of circumstances, it is curious that the World-Herald Company was willing to pay a premium of about \$1.5 million over the price for which the owners of Rapid had been willing to sell to Berkshire-Hathaway only a few months earlier. Even the name of the World-Herald subsidiary formed for the Rapid acquisition, Printers and Mailers, Inc., suggests that there was some inclination at the time of the acquisition to do some mailing. The acquisition of Rapid obviated the need for the World-Herald to move quickly with a total-market-coverage mailer to avert the potential competition of Rapid, as well as the problems in going forth with such a program, which would have been similar to Circulation Plus. The World-Herald had a great deal of difficulty in beginning the Circulation Plus program because of problems in preparing a nonsubscriber list for the mailed copies. Rapid readily assessed in this task with its computer and the data concerning mailing addresses that had been previously acquired.

The defendants assert that the acquisition of Rapid should not be held to be an [*39] unlawful use of monopoly power, because the introduction of the Golden Courier -- the true gist of plaintiff's complaint against the World-Herald and Rapid -- represents aggressive competition on the merits through innovation. See *Berkey Photo, Inc. v. Eastman Kodak Co., supra, 603 F. 2d at 281*. I cannot agree with the defendants' assertion. The supposed innovation -- use of a marriage mailer -- was abundantly testified to at the hearing as an idea not unique to Rapid or the World-Herald. There was testimony that the Des Moines Register and another company, Avco, had engaged in similar projects in other cities prior to the time of the introduction of the Golden Courier. The innovation sought to be permitted by the Berky decision was of a wholly different character and represented the introduction of a novel product into the marketplace. Such conduct, even by a monopolist, should not be discouraged. But, as in this case, when the conduct is not an innovation, it is more properly viewed as an unlawful act of a monopolist: there is a suppression of competition without any corresponding benefits.

The result with respect to the acquisition of Suburban should be the same, although [*40] for slightly different reasons. Suburban represented a small competitor with the World-Herald for a portion of its business in local advertising revenues. The acquisition of it by the World-Herald Company thereby tended to reduce the competition that the World-Herald had to face outside its fold of companies. The World-Herald could be quite happy for Suburban to seek aggressively advertising accounts at the expense of the World-Herald, when the revenues would ultimately come to rest in the same corporate coffers.

The only remaining barrier to the plaintiff's relief is an answer to whether the World-Herald Company's actions in purchasing Rapid and Suburban in some way harmed the plaintiff. There was adequate evidence to show that the plaintiff was harmed by the purchase of Rapid and the attendant start-up of the Golden Courier. The plaintiff has lost a number of advertising accounts to the Golden Courier that would have contributed to a reduction in its money-losing financial picture or possibly to profitability of its operation. The acquisition of Rapid allows the World-Herald to reap the profits that a potential competitor would have made in the submarket of local advertising [*41] in a weekly mailer at the expense of some of the World-Herald's insert accounts or Circulation Plus accounts.

As to the acquisition of Suburban, the plaintiff has not presented sufficient evidence for me to find that it has been harmed by the elimination of competition. The evidence at the hearing demonstrated that the overlap of the Suburban papers with the Sun papers is minimal. Only a few copies of the Papillion Times are sold in Bellevue each week. In addition, there was little evidence that would convince me that the Sun's Air Pulse was being harmed by the presence of the World-Herald's MWR Revue on Offutt Air Force Base. The evidence concerning the Park Drive Shopping Center advertising is not concrete enough for me to believe that the Sun newspapers actually lost an account to Suburban.

Accordingly, the plaintiff has shown a probability of success on the merits with respect to this theory as to the World-Herald's acquisition of Rapid, but not as to the acquisition of Suburban.

The plaintiff's second cause of action under § 2 of the Sherman Act is also based on a theory that the World-Harold monopolized the market in Omaha by acquiring Rapid and Suburban. The relevant [*42] market, however, differs slightly under this theory. This theory again relies on the language in United States v. Grinnell Corp., supra, and looks to the possession of monopoly power within the relevant market, coupled with either willful acquisition or maintenance of that power. The Supreme Court of the United States in United States v. Griffith, supra, 334 U.S. at 107, was instructive in this regard, when it stated that the "HN3" use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage or to destroy a competitor is unlawful." Another variant on the doctrine holds that unlawfully acquired monopoly power itself is "anathema even when kept dormant." Berky Photo, Inc. v. Eastman Kodak Co., supra, 603 F. 2d at 275.

The plaintiff has not demonstrated that the monopoly power that the World-Herald may have gained through the acquisition of Rapid and Suburban was unlawfully acquired through coercive tactics or other impermissible means. The inquiry, then, HN4 must turn to whether there has been a use of monopoly power in some proscribed manner.

The first step in this analysis, as discussed in the previous section, is to define the relevant product [*43] and geographic market. The bounds of the relevant product market are determined by looking to whether the commodities are "reasonably interchangeable by consumers for the same purposes." United States v. E.I. du Pont de Nemours & Co., supra, 351 U.S. at 395. Determining whether two products are the same frequently can rest in part on the cross-elasticity of demand -- i.e., whether consumers would likely be prone to shift from one product to another based on relative prices. Superturf, Inc. v. Monsanto Co., 660 F.2d 1275, 1278 (C.A. 8th Cir. 1981). The analysis to determine the bounds of the local advertising market for the first claim suffices to define the advertising market relating to the second claim.

The kingpin of the plaintiff's desired definition of the relevant market is the testimony of its expert, John S. Coulson. His testimony lends itself to a conclusion that the advertising market can be viewed as a whole with several sub-markets. This type of analysis is a recognized tool in antitrust cases where markets are frequently divided into sub-markets and the sub-markets considered as relevant markets for monopoly analysis. See Superturf, Inc. v. Monsanto Co., supra. [*44]

Coulson considered the sub-market of "local newspaper advertising" to comprise the relevant market. His analysis would define local newspaper advertising by making several exclusions from the advertising market as a whole. First, he excluded national advertising, which he defined as advertising that was directed more at product image promotion than to promotion of purchasing at a business in a particular locality. As discussed in the earlier portion of this memorandum, there are numerous differences in the distribution networks of local and national advertising as well as the type of businesses purchasing the advertising. It is clear that different markets exist for local and national advertising, mirroring the different purposes of the two types. The industry recognizes the difference. The World-Herald, for example, has different advertising rates for local and national advertising. Given the widely accepted differences, I do not believe that there is a strong cross-elasticity of demand between national and local advertising. The difference in purpose and advertisers and recognition of that difference through different rate structures lead me to believe that Coulson's exclusion [*45] of national advertising is reasonable, and his methodology of counting local advertising as that with an address in Douglas and Sarpy counties only is reasonable. The fact that the method exclusion does not produce results to a mathematical certainty does not concern me and is not required; all that is required is a reasonable methodology that is consistently applied and produces estimates in which the court can be reasonably confident. See United States v. Empire Gas Corp., 537 F.2d 296, 303 (C.A. 8th Cir. 1976), cert. denied, 429 U.S. 1122 (1977). I note that the defendants did not seriously challenge Coulson's method of excluding national advertising.

Coulson also excluded four types of local advertising from the market -- television, radio, billboard, and transit advertising. Their exclusion rested basically on the same premise: their inability to convey the same amount of information as print advertising and their inability to be referred to later. Coulson's testimony concerning the rationale for this distinction was discussed earlier in this memorandum and appears to be reasonable. The defendants sought to show that they directly compete with radio and television, at [*46] least, for local advertising,

Gottschalk testifying that the World-Herald competes with the electronic media for local advertising. No specifics were given nor any statistics concerning the amount of business the World-Herald loses to the two electronic media. The testimony given is simply not enough to refute the plaintiff's evidence.

Coulson's most controversial exclusion from the local advertising market was directories and similar publications. His reasons for doing so were discussed earlier in the memorandum. As was also stated there, the defendants' attempt at casting doubt on the exclusion failed. Given these circumstances, I shall consider the relevant market as not including directory advertising.

The second phase of defining a relevant market is to define the geographic market. I conclude that the area to be considered is the Douglas and Sarpy county area. Much of the reasoning for deciding that the World-Herald possesses a monopoly in the daily newspaper market is applicable here. Local advertising is a sub-market of the daily newspaper market and would necessarily be inextricably bound to the circulation of the World-Herald with respect to the geographic market.

[*47] Another reason for holding that the Douglas-Sarpy county area is the relevant geographic market is that this is the area in which the plaintiff and the defendants effectively compete. *TV Signal Co. of Aberdeen v. American T. & T. Co.*, 462 F.2d 1256, 1260 (C.A. 8th Cir. 1972). The evidence at the hearing demonstrated that the Sun newspapers are circulated almost exclusively within Douglas and Sarpy counties; some rural areas are covered only by mail subscriptions and there is no delivery in the downtown Omaha area. The World-Herald circulates throughout Douglas and Sarpy counties, as does the Golden Courier. The suburban publications cover only certain portions of Sarpy county and their circulation area is not entirely overlapping with the Sun circulation area.

The defendants brought out a fair amount of evidence concerning the lack of the exactness of the Sun's circulation area and the circulation areas of the World-Herald, the Golden Courier, and the Suburban publications. The obvious thrust of this evidence was to support an allegation that the plaintiff's attempted definition of the geographic market was inadequate, because it failed to take into account incongruities between [*48] the various publications' circulation areas. It is difficult, if not plainly impossible, to define a geographic market with mathematical precision. There is always some inherent fuzziness in an attempt to define the geographic market. See *United States v. Philadelphia National Bank*, 374 U.S. 321, 360, n. 37 (1963). In the present case the defendants quibbled with the plaintiff's evidence but did not introduce any evidence as to the significance of market area incongruities.

Within the Douglas-Sarpy county area Coulson's study found that the World-Herald companies accounted for 82 percent of the total revenues from local print advertising. Within the Omaha SMSA the percentage decreases only slightly, to 77 per cent, thereby making the choice between the Douglas-Sarpy county area and the Omaha SMSA as the relevant geographical market less critical than if there were greater disparity in the figures.

The competitor with the next largest market share is the Sun newspapers, with about a seven per cent share of the total local print advertising market. Coulson's report contains estimates that all but one of the remaining competitors are below four per cent of total market share. [*49] The two largest competitors -- the Sun and the Daily Record -- have financial troubles. Given the World-Herald's high share of the market and the total lack of a strong competitor, either in market share or financially, it cannot be seriously questioned that the World-Herald group of companies possesses a monopoly share of the market. The fact that the monopoly is dispersed in a total of three corporate entities, the World-Herald, Rapid, and Suburban, should not alter the result with respect to the finding of monopoly. Separate corporate existence is properly ignored in this case. See *Kiefer-Stewart Co. v. Seagram & Sons*, 340 U.S. 211, 215 (1951).

Given that the World-Herald group possesses monopoly power over the local print advertising market, the next issue is whether that monopoly power has been improperly acquired to used. See *United States v. Grinnell Corp., supra*. I conclude that there is inadequate evidence to demonstrate that the World-Herald unlawfully acquired the monopoly power. There is no evidence of predatory pricing or coercive tactics to acquire a monopoly. The spearhead of the plaintiff's attack under this theory is that the World-Herald group engaged [*50] in various

activities to maintain a monopoly. The plaintiff's counsel clearly stated that this was the direction of the plaintiff's case. See transcript of preliminary injunction hearing at 371, lines 12-25.

Under the guise of maintenance of a monopoly I am presented with two competing lines of analysis. The one advocated by the plaintiff would have me hold that the acquisitions of Rapid and Suburban, coupled with the later product introductions and changes, are an unlawful acquisition and maintenance of a monopoly. The defendants would have me focus on the post-acquisition period and call the activities of the World-Herald entities aggressive competition on the merits, following the Berky decision. I am persuaded that the plaintiff's line of reasoning more closely reflects the legal significance of the facts that were presented at the hearing.

At the time the World-Herald Company acquired Rapid the idea of the Golden Courier was already conceived. Rapid was then poised and ready to enter the market as a competitor to the World-Herald, but this entry was not possible until the change in the interpretation of the postal regulation that allowed marriage mailers. The World-Herald [*51] was already into the same sub-market with its zoned inserts. By acquiring Rapid, the World-Herald was able to assure itself of retention of a dominant position in local advertising. The evidence does not show the extent of the pre-Golden Courier dominance of the World-Herald. It does show, however, that the World-Herald possessed about an 80 percent share of the local advertising market at the time of Coulson's study, without the revenues of either the Golden Courier or the Suburban group. The acquisition of Rapid, without more, would then violate §2. See [Paschall v. Kansas City Star Co., supra, at 329.](#)

The situation with respect to the Suburban publications acquisition is somewhat different. The testimony reflects that the Suburban newspapers and the World-Herald publications did not compete in any significant degree for advertising, and they have vastly different rate structures. The limited circulation of the Suburban publications restricted the local businesses that would want to advertise in them. The advertising carried by Suburban, however, can still be considered as local advertising under Coulson's definition. Thus, the World-Herald Company through the Suburban [*52] acquisition was able to eliminate an independent purveyor of local advertising by making it a part of the World-Herald aggregate of companies. The aim of the antitrust laws is to preserve healthy competition. See [Berky Photo, Inc. v. Eastman Kodak Co., supra.](#) To accomplish this end, monopolists should not be permitted to lessen competition through expansion of their domain by corporation acquisitions. The defendants point out that the Suburban papers were a losing operation prior to the acquisition by World-Herald and have since been returned to financial health. Nearly any monopolist could make a similar argument. Except in the case of a failing company, such acquisitions are suspect, inasmuch as they tend to lessen competition. The defendants have not made an attempt to avail themselves of the failing company doctrine. Thus, I hold that the acquisition of Suburban was improper.

In addition to the language in Grinnell proscribing acquisition of a monopoly, there is language that proscribes the maintenance of a monopoly. That language has been interpreted as requiring some form of exclusionary conduct by the monopolist. See [Paschall v. Kansas City Star Co., supra, 695 F.2d \[*53\] at 326.](#) Of course, the acquisition of potential competitors, as discussed above, could be termed exclusionary, because it removes one source of competition and helps erect a greater barrier to entry by further cementing the monopolist's market position and displaying a willingness to acquire any of those who dare to compete. The primary actions that the plaintiff has brought to issue in this case, however, are the rates and sales practices of the Golden Courier, Suburban, and, to a limited degree, the World-Herald in competing for local advertising sales.

The plaintiff's attack on the Golden Courier's practices focuses on the rate structure and the zoning of its sales. It also raises an issue as to whether certain issues of the Golden Courier containing the Food Fare section were a further attempt by the World-Herald to smother the Sun newspapers as a competitor. As to the rates of the Golden Courier, there does not appear to be any form of predatory pricing. Typically, such pricing involves sales below costs in order to drive a rival out of business. See III Areeda & Turner, [Antitrust Law](#) P710 et seq. (1978). The plaintiff did not present sufficient evidence to demonstrate [*54] that the prices for the Golden Courier were below cost. John Brown testified that the Golden Courier "50-50" program was cost-feasible because of a standardized print layout for each advertiser plus smaller, lightweight paper. The "50-50" program was the only serious challenge

that the plaintiff made to the Golden Courier rate structure and the evidence adduced falls far short of showing predatory pricing.

The plaintiff also has not produced sufficient evidence to show that the zoning of the Golden Courier was exclusionary. This aspect of the marriage mailer clearly seems to be aggressive competition on the merits, as described in Berky. The use of the Food Fare supplements does not present a problem either, as it falls under the same permissible principle as the zoning of the Golden Courier. It simply appears to be aggressive competition on the merits that cannot be characterized as exclusionary.

As to Suburban, the plaintiff has not shown anything that could be termed exclusionary. The placing of the papers in Bellevue and the start of the MWR Revue all represent aggressive competition on the merits and are not condemned under the antitrust laws.

(3)

The plaintiff's [*55] third theory under [§ 2](#) of the Sherman Act is that the defendants attempted to monopolize the local print medial advertising market in Douglas and Sarpy counties. [HN5](#)↑ An attempt to monopolize as proscribed by [§ 2](#) involves at a minimum the specific intent to monopolize, some conduct in furtherance of that intent, and a dangerous probability of success. [Times-Pacayune Publishing Co. v. United States, 345 U.S. 594, 626 \(1953\)](#); [Swift & Co. v. United States, 196 U.S. 375, 396 \(1905\)](#); III Areeda & Turner, [Antitrust Law](#) P820 et seq. (1978).

There is a critical lack of proof in the plaintiff's attempted monopoly case. There has been virtually no evidence that would sustain a finding that the defendants had the requisite intent. A specific intent "to destroy competition or build monopoly is essential" to an attempted monopolization case. [Times-Pacayune Publishing Co. v. United States, supra](#). The evidence of the plaintiff does not provide me with any basis for inferring that the World-Herald Company lowered its guns and put the Sun newspapers in its sights in hopes of destroying them, nor is there any evidence of specific intent to build a monopoly. The most probative evidence I have on [*56] this matter is the testimony of Gottschalk, who stated that the acquisitions of Rapid and Suburban were made for corporate reasons independent of any desire to monopolize or destroy competition. Furthermore, the decisions to begin the Golden Courier and modify its operations appear to have been made, at least from the evidence adduced at the hearing, without any proscribed intent. The plaintiff has failed on a critical element of proof of this claim and has not demonstrated a probability of success on the merits under it.

(4)

The plaintiff's final claim is that the World-Herald's acquisition of Rapid and Suburban violated [§ 7](#) of the Clayton Act. [HN6](#)↑ The essentials of such a cause of action are a merger or corporate acquisition in any line of commerce where the effect may be to lessen competition substantially or tend to create a monopoly in a substantial portion of commerce. [United States v. Falstaff Brewing Corp., 410 U.S. 526, 531 \(1973\)](#). A variant on the prohibition that the plaintiff has pursued is a merger or acquisition involving a company that is a potential competitor to another company in a market. [Id. at 532](#).

I believe that the plaintiff has shown a substantial probability [*57] of success on the merits of this claim. There are several factors that should be considered in determining whether the acquisition of Rapid and Suburban substantially lessened competition. See [Brown Shoe Co. v. United States, 370 U.S. 294, 311-323 \(1962\)](#). Those factors have been covered in the earlier discussion of the Sherman Act claims relating to monopolization in the local print advertising market. Those acquisitions do affect a substantial portion of commerce; the total advertising market of Rapid and Suburban amounted to substantial revenues. The acquisition of Rapid -- a potential competitor to the World-Herald in the local print advertising market -- would clearly tend to lessen competition. The acquisition of Suburban would also tend to have that effect, because it would eliminate an advertising source that was unconnected to the World-Herald. As stated earlier, there was not been a showing that Suburban was a failing company, thereby eliminating that line of defense.

In summary, there is a probability of success on the merits under three of the four theories that I perceive the plaintiff to be advocating.

B.

Dataphase Systems, Inc. v. C L Systems, Inc., supra, I^{*581} 640 F.2d at 114, requires a finding that the plaintiff will suffer irreparable injury in the absence of the requested relief. HNT↑ The requisite injury to sustain the burden under this facet of the test is not a static amount but is dependent upon the degree of the demonstrated probability of success on the merits and the state of the balance of the harms. Those equitable principles are fully applicable in antitrust cases. See 15 U.S.C. §§ 4 and 26.

The plaintiff has shown adequate irreparable injury. Sagan testified that the Sun newspapers are literally at the end of their rope; that the long string of losses has put the papers in a position of exhausting available financial reserves through lenders; and that he personally cannot further borrow to save the Sun newspapers. The import of this testimony is that the total collapse of the Sun organization is imminent, barring some sort of relief from this forum. There was also testimony that to begin again with the Sun newspapers after a shutdown would be extremely difficult if not impossible. Sagan testified that it would be akin to beginning a new paper, because reader loyalty and good will would quickly dissipate after cessation [*59] of operations. The magnitude of the injury to the plaintiff, coupled with the showing of substantial probability of success on the merits, indicates that some form of relief should be forthcoming, unless the balance of harms tips decidedly in favor of the defendants.

C.

The third of the four Dataphase factors is the balancing of harms between the parties. The evidence shows that the balance of harms tips decidedly in favor of the plaintiff. The plaintiff is faced with total shutdown of its operations. This would amount to a number of individuals losing their jobs, and the cessation of the publication of the Sun newspapers likely would be permanent, because of the rapid loss of subscriber loyalty and good will that would make a later resumption of the operations unfeasible. The harm to the World-Herald Company by the proposed relief, even in the extreme form of requiring the Golden Courier to cease distribution in Douglas and Sarpy counties and prohibiting other World-Herald entities from entering the market in place of the Golden Courier, would be less than the threatened harm to the plaintiff. The Golden Courier's operations are not limited to Douglas and Sarpy counties; [*60] it has marriage mailer distribution in Lincoln and Fremont, Nebraska, and Council Bluffs, Iowa, totaling over 100,000 copies. It should also be pointed out that the Golden Courier operation is only a portion of Rapid's printing enterprise; Rapid would still be able to engage in its production and printing of tabloid inserts for newspapers throughout the United States. Some of those tabloids might well be distributed in Douglas and Sarpy counties.

There was also testimony that Rapid would be able to maintain a constantly updated address file without a great deal of expense. Therefore, if any prohibition by this court of Rapid's distribution of the Golden Courier in Douglas and Sarpy counties were lifted, its task of market reentry would be much less than that of the Sun, because it does not depend on subscribers to determine the extent of its distribution. Only advertisers would have to be solicited and the Golden Courier mailed to the addresses on the mailing list; there would be no need to reestablish reader loyalty and good will to have a full circulation.

As to the Suburban papers, the harm from the only form of relief that I can determine is arguably possible -- preventing [*61] it from picking up the Golden Courier's operations -- would be minimal. The injunction would serve only as a prophylactic measure. The same would be true for the World-Herald, because it is not presently operating a total-market-coverage advertising publication other than the Golden Courier.

D.

The fourth Dataphase factor is the consideration of the public interest. Without serious question, this factor runs to the favor of the plaintiff. In the absence of some form of preliminary relief the plaintiff is doomed to collapse and extinction. This would silence an independent editorial voice in Douglas and Sarpy counties. There is a public interest in preserving such independent voices, as exhibited by Congress' passing certain exceptions to the

antitrust laws for newspapers in the Newspaper Preservation Act of 1970, Pub. L. No. 91-353, 84 Stat. 466 (1970). Congress felt that the antitrust laws should give way in certain instances to preserve independent editorial voices. It would seem that where the antitrust laws could be used reasonably to further the same purpose, they should be.

It is also in the public interest, as exhibited by the very existence of the antitrust laws, [*62] to try to preserve competition. The requested relief can be fashioned so as to further that end. Even the most extreme of the relief requested by the plaintiff would not insulate it from competitive forces in the marketplace. Another firm or firms could begin one or more marriage mail programs in the Douglas and Sarpy county area. Be that as it may, the new entrant would not hold a monopoly position over the local advertising market in Douglas and Sarpy counties and would fit within the framework of competition envisioned in the antitrust laws. The defendants should not be heard to cry that their market dominance will be lost. The plaintiff has made a significant showing that the defendant possesses a monopoly over the local print advertising market and has used a daily newspaper monopoly to gain leverage in the local print media advertising market.

III.

Although I have determined that the tests of Dataphase have been met, it still remains to be determined whether there are equitable defenses that would bar or alter the form of the preliminary injunction and what form the preliminary injunction should take.

As an equitable defense, the defendants raise the doctrine of [*63] unclean hands. There is some authority to support the proposition that this defense is properly considered with regard to preliminary relief. See *Heldman v. United States Lawn Tennis Assoc.*, 354 F.Supp. 1241, 1249-52 (U.S.D.C., S.D.N.Y. 1973). This defense is based on two attempts by Sagan to combine the Sun newspapers with the World-Herald Company. On one occasion, Sagan apparently approached the World-Herald with a proposal that a "joint operating agreement" between the Sun newspapers and the World-Herald be entered into. On another occasion, Sagan approached the World-Herald with a proposal that it acquire the Sun newspapers.

As to the first proposal, I can see no reason to consider it an instance of unclean hands. *HN8*[

Joint operating agreements between newspapers have specifically been exempted from the prohibitions of the antitrust laws. See *15 U.S.C. § 1803*. There is no evidence that Sagan was proposing a joint operating agreement outside the confines of the exemption.

The second proposal also is not a basis for application of the unclean hands doctrine. Sagan's proposal for the acquisition of the Sun by the World-Herald was premised, apparently, on the belief that [*64] the Sun newspapers could be considered a failing company. Mergers of corporations where one is a healthy business and one is a "failing one which no longer can be a vital competitive factor in the market," *Brown Shoe Co. v. United States, supra*, 370 U.S. at 319, are not proscribed by the antitrust laws.

The defendants also raise a defense to any preliminary injunctive relief by asserting that such relief would encroach on their *First Amendment* rights, relying on *Central Hudson Gas v. Public Service Comm. of N.Y.*, 447 U.S. 557 (1982), for the contention that their activities, as commercial speech, are protected by the *First Amendment*. That authority, however, belies their contention. In Central Hudson the Supreme Court held that government may ban forms of commercial speech that are related to illegal activity. Commercial speech related solely to proposing a commercial transaction is subject to regulation by the government in greater proportions than other forms of speech. See *Pittsburgh Press Co. v. Human Relations Commission*, 413 U.S. 376, 384-386 (1973). I believe that the regulation may properly be extended to encompass the antitrust laws, given the facts of this case, for [*65] *HN9*[

the "[f]reedom to publish is guaranteed by the Constitution, but freedom to combine to keep others from publishing is not." *Associated Press v. United States*, 326 U.S. 1, 20 (1945).

The last assertion by the defendants is that the relief requested is "totally unprecedented" and would not be available to the plaintiff in the event of ultimate success on the merits. Courts, particularly courts of equity, are frequently faced with situations with a lack of precedent for the relief that they must fashion. If a court of equity were so bound to look to the past for a precedent, it would be unable to act in many cases. I recognize that the

proposed relief amounts to some alteration of the status quo and that drastic alterations of the status quo in preliminary relief contexts should be permitted only where there has been a strong showing of success on the merits in favor of the movant. See, e.g., [Exhibitors Poster Exch., Inc. v. National Screen Serv. Corp.](#), [441 F.2d 560, 56-62 \(C.A. 5th Cir. 1971\)](#). In this case, however, the showing of probable success on the merits is adequate to allow some alteration of the status quo. I am persuaded as well that such an alteration should not allow [*66] the plaintiff to proceed in other than an expeditious manner toward an ultimate trial on the merits.

The defendants also argue that the preliminary relief sought cannot be allowed, because similar relief would be unavailable should the plaintiff ultimately prevail on the merits. In support of this claim they cite [ABA Distributing, Inc. v. Adolph Coors Co.](#), [661 F.2d 712 \(C.A. 8th Cir. 1981\)](#). That case does not support the proposition for which it is cited. ABA Distributing dealt with a failure of the plaintiff to demonstrate that there was a substantial probability of success on the merits, because it had failed to comply with a contract arbitration clause and thereby might have been unable to prevail because of a provision in Missouri law requiring such exhaustion. [Id., at 715-716](#). The case is not an equation of relief available after trial with that available, as preliminary relief but is simply an application of the probability-of-success-on-the-merits element of the Dataphase test. Inasmuch as I have made a determination that there is a probability of success on the merits, that element is fulfilled.

IV.

The sole task remaining in the disposition of the plaintiff's [*67] motion is the framing of the preliminary relief. The plaintiff has proposed a form of preliminary injunction that would enjoin distribution of the Golden Courier or a similar vehicle by Rapid, the World-Herald, and Suburban and would prevent Suburban from publishing the MWR Revue or any other new newspapers. I am persuaded that the plaintiff has demonstrated the need for relief running only to the distribution of the Golden Courier in Douglas and Sarpy counties, but I do not believe that there has been a sufficient showing that the Suburban group of newspapers has engaged in tactics that truly are the source of the plaintiff's economic difficulties. Accordingly, the preliminary injunction will run only to prohibit the World-Herald, Rapid, and Suburban, and any subsequently acquired subsidiary of the three, from distributing a marriage mailer or similar total-market-coverage vehicle in Douglas or Sarpy County. This would include a nonsubscriber mailer operation such as Circulation Plus.

As previously mentioned, the preliminary injunction should not take effect unless the plaintiff is willing to proceed to trial in an expeditious manner. What is an expeditious manner will depend [*68] on a number of factors that include the necessary discovery and the proposed length of the trial. The defendants at trial wished to participate in further proceedings to frame the terms of the injunction. I shall allow this in the form of briefs and affidavits and, if I deem it necessary after seeing the briefs and affidavits, oral argument.

One other factor will be considered in framing a preliminary injunction. The plaintiff must propose an expeditious trial date, and the defendants must respond to that proposal.

It Therefore Hereby Is Ordered:

1. That the parties are given twenty days from the date of this order to submit bids and affidavits with respect to the makeup of the preliminary injunction; and
2. That the plaintiff is given ten days from the date of this order to submit a proposal for the date of the trial of this case, consistent with the memorandum, and the defendants are given ten days thereafter to respond to the plaintiff's proposed trial date.

Judges: Oakes, Van Graafeiland and Meskill, Circuit Judges.

Opinion by: VAN GRAAFEILAND

Opinion

[*89] VAN GRAAFEILAND, Circuit Judge:

Saxe, Bacon & Bolan, P.C., a New York professional legal service corporation, and twelve of its affiliated attorneys appeal from a summary judgment of the United States District Court for the Southern District of New York (Sweet, J.) dismissing their claims for damages and injunctive relief under New York's Donnelly Act, N.Y. Gen. Bus. Law §§ 340-347 (McKinney 1968 & Supp. 1982). We affirm.

Martindale-Hubbell, Inc. (Martindale), a Delaware corporation with its principal place of business [*2] in New Jersey, publishes the Martindale-Hubbell Law Directory. The lawyer-listing portion of this publication is divided into two sections, "Geographical", which lists the members of the United States' and Canadian Bars, and "Biographical", which publishes at prescribed rates the "professional cards" of subscribing law offices. Aided by confidential recommendations from lawyers and judges, Martindale gives firms legal ability ratings ranging from a high of "a" to a low of "c" and decides whether to award each firm a general recommendations rating reflecting that firm's adherence to ethical standards. Only those firms that receive both a general recommendations rating and either an "a" or "b" legal ability rating are eligible for inclusion in the Biographical Section.

Appellants commenced this action in Supreme Court, New York County, in August of 1980, alleging that Martindale's refusal to list Saxe, Bacon in the Biographical Section constituted a violation of the Donnelly Act. Martindale removed the action to the Southern District of New York on the ground of diversity, 28 U.S.C. § 1441(a), and Judge Sweet twice denied motions to remand. By opinion dated [*3] June 25, 1982, Judge Sweet granted

Martindale's motion for summary judgment addressed to appellants' second amended complaint. This appeal followed.

Motions to Remand

Saxe, Bacon says that the district court's decision not to remand this suit was error, since, in Saxe, Bacon's view, professional corporations must be treated as partnerships for diversity purposes. We disagree. [HN1](#) For purposes of removal under [section 1441\(a\)](#), a corporation is deemed a citizen of any State by which it has been incorporated and of the State where it has its principal place of business. [28 U.S.C. § 1332\(c\)](#). Whether Saxe, Bacon, a New York firm, is a corporation for diversity purposes must be determined by New York law. [Baer v. United Services Auto. Ass'n, 503 F.2d 393, 394-95 \(2d Cir. 1974\); Brocki v. American Express Co., 279 F.2d 785, 786](#) (6th Cir.), cert. denied, 364 U.S. 871, 5 L. Ed. 2d 92, 81 S. Ct. 113 (1960).

Saxe, Bacon was organized under Article 15 of the New York Business Corporation Law. [N.Y. Bus. Corp. Law §§ 1**41 1501 et seq.](#) (McKinney Supp. 1982). Article 15 was enacted to permit professionals "to utilize the corporate form of business to permit them to organize their activities more efficiently and to make available to them and to their employees Federal tax benefits now accorded to executives and employees in all other business endeavors." [Udel v. Udel, 82 Misc.2d 882, 883, 370 N.Y.S.2d 426 \(1975\)](#) (quoting N.Y. Legis. Ann., 1970, p. 529). Although the ethical and professional obligations which individual shareholders of professional corporations owe their clients preclude the grant to them of all the benefits of incorporation, *id.*, see Bus. Corp. Law §§ 1504-1512, except as so limited, the provisions of New York's Business Corporation Law applicable to ordinary business corporations are also applicable to professional corporations. Bus. Corp. Law § 1513. See, e.g., [Connell v. Hayden, 83 A.D.2d 30, 58-59, 443 N.Y.S.2d 383 \(1981\)](#). Saxe, Bacon is a corporation under New York Law and is therefore a citizen of New York for purposes of [28 U.S.C. § 1332\(c\)](#).

The question whether the New Jersey residence of three of the individual [\[*5\]](#) plaintiffs destroys the complete diversity required for federal jurisdiction has been answered in the negative by the district court in an opinion reported in 521 F. Supp. at 1046. We will not attempt to enlarge [\[*90\]](#) upon the district court's thorough and well-reasoned discussion.

We find no merit in appellants' contention that, assuming the district court had jurisdiction in this matter, it nonetheless should have abstained from exercising it. See [Colorado River Water Conservation Dist. v. United States, 424 U.S. 800, 813-19, 47 L. Ed. 2d 483, 96 S. Ct. 1236 \(1976\); Quinn v. Aetna Life & Cas. Co., 616 F.2d 38, 41 \(2d Cir. 1980\)](#).

The Merits

[HN2](#) New York's Donnelly Act prohibits "every contract, agreement, arrangement or combination" which establishes a monopoly or restrains the free exercise of competition in any business, trade or commerce in [New York. Gen. Bus. Law § 340](#) (McKinney 1968 & Supp. 1982). Appellants have made no showing that Martindale's allegedly wrongful conduct falls within this statutory prohibition. Despite [\[*6\]](#) appellants' allegations upon information and belief that appellee acted in concert with three named individuals, it is clear, from the uncontested affidavits of those persons and appellants' Local Rule 3(g) statement, that there is no genuine issue of fact concerning the falsity of this allegation.

[HN3](#) The New York courts have interpreted the Donnelly Act to require the existence of a "reciprocal relationship of commitment between two or more legal or economic entities" before liability may be found, [State v. Mobil Oil Corp., 38 N.Y.2d 460, 464, 381 N.Y.S.2d 426, 344 N.E.2d 357 \(1976\)](#), at least where the defendant is not a public utility subject to the New York Public Service Law, *id. at 466 n.4*. We already have taken cognizance of that interpretation, [Venture Technology, Inc. v. National Fuel Gas Co., 685 F.2d 41, 42](#) & n.1, 45 (2d Cir.), cert. denied, [459 U.S. 1007, 103 S. Ct. 362, 74 L. Ed. 2d 398 \(1982\)](#), and have no reason to believe that this was done in error. As in the case of [Hester v. Martindale-Hubbell, Inc., 659 F.2d 433 \(4th Cir. 1981\)](#), [\[*7\]](#) cert. denied, 455 U.S. 981, 71 L. Ed. 2d 691, 102 S. Ct. 1489 (1982), which was decided under the similar provisions of [section 1](#) of the

Sherman Act, [15 U.S.C. § 1](#), Martindale's unilateral refusal to publish Saxe, Bacon's "professional card" was not unlawful.

Assuming for the argument that a unilateral refusal to deal falls within the scope of the Donnelly Act, appellants do not contend that appellee's refusal to list Saxe, Bacon had, or was intended to have, an anti-competitive effect in the market in which appellee competes -- the publishing of legal directories. See [United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 \(1956\)](#). Under established principles of [antitrust law](#), appellee had the right in such circumstances to exercise its independent discretion as to the parties with whom it would deal. [United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 \(1919\)](#); 3 Von Kalinowski, [Antitrust Laws and Trade Regulation](#) § 8.02[4] (1982); see [Official Airline Guides, Inc. v. FTC, 630 F.2d 920 \(2d Cir. 1980\)](#), cert. denied [\[**8\]](#), 450 U.S. 917, 67 L. Ed. 2d 343, 101 S. Ct. 1362 (1981); [Dior v. Milton, 9 Misc.2d 425, 441, 155 N.Y.S.2d 443](#), aff'd, 2 A.D.2d 878, 153 N.Y.S. 2d 826 (1956).

The judgment of the district court is affirmed.

HN1 [down arrow] **State & Territorial Governments, Claims By & Against**

An expression of state policy is sufficient to establish immunity if it is comprised of two elements. The legislature must have authorized the challenged activity and it must have done so with an intent to displace competition. A specific, detailed legislative authorization of monopoly service need not exist to infer the necessary state intent.

Patrick Nupent, Sioux City, Iowa, Lance A. Coppock and Edward W. Remsburg, Des Moines, Iowa, for City of Sioux City; Timothy W. Shuminsky, Sioux City, Iowa, for Metro Center, for defendants

Opinion by: O'BRIEN

Opinion

O'BRIEN, D.J.: This matter comes before the Court pursuant to the defendants' motion to reconsider this Court's Order of May 3, 1983 in light of the recent opinion of the Eighth Circuit Court of Appeals in *Gold Cross Ambulance v. City of Kansas City*, No. 82-1913 (8th Cir. 4/26/83). In the alternative, the defendants request that this Court certify an interlocutory appeal pursuant to 28 U.S.C. 1292. The Court held a hearing in this matter at which plaintiffs and defendants were represented. This Court, having reconsidered its May 3, 1983 Order in light of *Gold Cross Ambulance*, now grants the defendants' motion for summary judgment.

The facts and circumstances leading to the filing of the complaint in this matter have been adequately set forth in this Court's prior opinions. This Court has twice denied motions for summary judgment when the defendants raised the state action immunity [*2] of Parker v. Brown 317 U.S. 341 (1943). In this Court's Order of December 17, 1982, the Court held that state zoning laws do not confer Parker immunity on the defendants in this case. In doing so, the Court relied heavily on the case of Westborough Mall v. City of Cape Girardeau, 693 F.2d 733 (8th Cir. 1982). In this Court's Order of May 3, 1983, a claim of Parker immunity under Iowa urban renewal law was rejected. However, it appears to the Court that its analysis of Parker immunity in the May 3, 1983 Order has been rendered inaccurate by the Eighth Circuit Court of Appeals' ruling in *Gold Cross Ambulance*.

This Court's May 3, 1983 Order

There were several concerns that prompted the Court to reject Parker immunity based on Iowa urban renewal law. First, this Court examined what it believed to be strong language in Community Communications v. City of Boulder, 455 U.S. 40 (1982), and Westborough Mall, supra, requiring that the state policy "clearly articulate and affirmatively express" an approval of the challenged anti-competitive activity. Analogizing this case to Boulder, this Court held that "the powers of eminent domain and rezoning do not necessarily contemplate that these [*3] powers will be

used in an anticompetitive manner.¹ (Emphasis added.) In light of Gold Cross Ambulance, the Court now believes that its use of the words "necessarily contemplate" was inaccurate.

Second, this Court was persuaded that the "active supervision" requirement for state action immunity set forth in *California Liquor Dealers v. Midcal Aluminum*, 445 U.S. 97 (1980), applied in cases involving municipal defendants. As authority for this proposition, this Court noted that the Midcal case cited *Lafayette v. Louisiana Power and Light*, 435 U.S. 387 (1978), for the active supervision requirement. Lafayette, of course, was a case involving a municipal defendant.² However, this portion of this Court's May 3, 1983 opinion is also rendered questionable in light of Gold Cross Ambulance.

Finally, in support of their motion for summary judgment, the defendants cited Areeda, Antitrust Immunity for "State Action" after Lafayette, 95 Harv. L. Rev. 435 (1981). This Court discounted the persuasiveness of this law review article because it appeared to be critical of recent Supreme [*4] Court cases and was, in this Court's opinion, directed more towards the author's view of what the law ought to be as opposed to what the law is. This conclusion is also somewhat inaccurate after Gold Cross Ambulance.

The Effect of Gold Cross Ambulance on Parker Immunity Claims

Under Gold Cross Ambulance, it would appear to this Court that **HN1**[[↑]] an expression of state policy is sufficient to establish Parker immunity if it is comprised of two elements. The legislature must have authorized the challenged activity and it must have done so with an intent to displace competition. The Gold Cross Court emphasized language in *Lafayette v. Louisiana Power and Light, supra*, stating that a specific, detailed legislative authorization of monopoly service need not exist to infer the necessary state intent.

In other words, a **HN2**[[↑]] sufficient state policy to displace competition exists if the challenged restraint is a necessary or reasonable consequence of engaging in the authorized activity. Areeda, *Antitrust Law*, supra, para. 212.3, at 54; Areeda, Antitrust Immunity for "State Action" after Lafayette, 95 Harv. L. Rev. 435, 446 (1981).³

In [*5] the context of the matter now before this Court, an important portion of the Gold Cross Ambulance case is the holding that active state supervision is not an element of Parker immunity for government defendants exercising traditional government functions such as the protection of public health and safety. This is also consistent with the opinion of Professor Areeda, who states that the courts requiring active supervision of governmental defendants are in error, Areeda, Antitrust Immunity for "State Action" after *Lafayette, supra*, at n. 50.

Application of Gold Cross Ambulance to Scott v. City of Sioux City

This Court, in its May 3, 1983 Order, noted the broad authority given to the City to conduct urban renewal activities. Among those activities authorized are as follows:

403.6 Powers of the Municipality. Every municipality shall have all the powers necessary or convenient to carry out and effectuate the purposes and provisions of this chapter, . . .

HN3[[↑]] 403.12 Powers of the Municipality.

1. For the purpose aiding in the planning, undertaking or carrying out of an urban renewal project located within the area in which it is authorized to act, any public body may, upon such [*6] terms, with or without consideration, as it may determine:

* * *

¹ May 3, 1983 Order at p. 7.

² Actually, the municipality was a defendant to a counterclaim.

³ Gold Cross Ambulance slip op. at pp. 12-13.

(c) Do any and all things necessary to aid or cooperate in the planning or carrying out of an urban renewal project;

* * *

(h) Plan or replan, zone or rezone any part of the public body or make exceptions from building regulations.

(Code of Iowa Chapter 403) (emphasis added). Thus, it appears from these sections and others contained in Chapter 403 that the municipality was given both general and specific powers to effectively provide for urban renewal.

The second question under Gold Cross Ambulance is whether the legislature authorized the activity with an intent to displace competition. If the challenged restraint is a necessary or reasonable consequence of engaging in the authorized activity, then the element of intent is satisfied. In Central Iowa Refuse Systems v. Des Moines Metropolitan Area Solid Waste Agency, No. 79-32-1 (S.D. Iowa 12/9/82), Chief Judge Stuart found, in the context of a solid waste disposal operation, that anticompetitive activity was necessary in order to assure financial protection for investors who bought bonds to support the project. If this example of "necessity" is accurate, [*7] it would surely apply to the matter now before this Court since approximately \$30 million in public financing was raised to support the Sioux City urban renewal project.

Under Gold Cross Ambulance, [HN4](#) [↑] the challenged restraint does not have to be necessary in order for the Court to find legislative intent to displace competition. If the challenged restraint is merely a reasonable consequence of engaging in urban renewal projects, then there is a sufficient inference of state intent to displace competition. The term "reasonable" has been defined as "fit and appropriate to the end in view," Black's Law Dictionary, 4th ed., p. 1431. The goal of urban renewal, of course, is to rehabilitate portions of the city that have suffered severe economic setbacks by concentrating municipal resources in the blighted area in an attempt to promote economic prosperity in the area. In light of the goals of urban renewal, the broad authority afforded the City to accomplish it, and the practical difficulties in achieving such a task, the Court cannot say that the displacement of competition in outlying areas was an unreasonable consequence of engaging in urban renewal.

The [plaintiffs] attempt [*8] to distinguish Gold Cross Ambulance by arguing that urban renewal is not a "traditional governmental function" as was present in Gold Cross Ambulance. The Court, in its May 3, 1983 Order, held that it is a traditional government function, p. 7. This conclusion is supported by the declaration of policy contained in the Iowa Urban Renewal Law, Code of Iowa Chapter 403:

It is hereby found and declared that there exist in municipalities of the state slum and blighted areas, as herein defined, which constitute a serious and growing menace, injurious to the public health, morals and welfare of the residents of this state; that the existence of such areas contributes substantially and increasingly to the spread of disease and crime, constitutes an economic and social liability imposing onerous municipal burdens . . . and that the prevention and elimination of slums and blighted areas is a matter of state policy and state concern in order that the state in its municipalities shall not continue to be endangered by areas which are focal centers of disease, promote juvenile delinquency and consume an excessive portion of state revenues because of the extra services required for police, fire, [*9] accident, hospitalization and other forms of public protection, services and facilities.

Thus, the Court still believes that urban renewal is a traditional governmental function as the term is used in Gold Cross Ambulance.

The [plaintiffs] also direct the Court's attention to [*Neyens v. Roth, 326 N.W. 2d 294 \(Iowa 1982\)*](#), a state unfair competition case, wherein the Iowa Supreme Court refused to extend the state statutory counterpart of Parker immunity to actions taken pursuant to the Iowa home rule amendment. The Court notes that the Neyens opinion requires "active state supervision" as part of its Parker immunity. Gold Cross Ambulance, as previously noted, has specifically abandoned this requirement in federal antitrust cases. The Neyens opinion did not address Iowa urban renewal law. For these reasons, the Neyens case is distinguishable.

In this Court's Order of December 17, 1982, the Court denied the City Council defendants' claim of legislative immunity under [*42 U.S.C. 1983*](#) for two reasons. First, the case of [*Gorman Towers v. Bogoslavsky, 626 F. 2d 607*](#)

(8th Cir. 1980), seriously questioned whether zoning fell into the category of legislative functions protected by [*10] the immunity. Second, the Court held that a conspiracy to restrain trade and to monopolize were outside of the scope of clear legislative functions. The preceding analysis with respect to state action immunity suggests that the defendants were acting to authority given them under the law of the State of Iowa. Therefore, the defendants who were sued as members of the City Council have absolute immunity from suit under 42 U.S.C. 1983. On this basis, these defendants' motion for summary judgment is sustained. Having determined that a rational (reasonable) relationship existed between the challenged activities and Iowa urban renewal law, the Court will sustain the City of Sioux City's motion for summary judgment which attacks plaintiffs' equal protection claim. As in Gold Cross Ambulance, no fundamental right or suspect class is involved here and, thus, the Court looks only to see if a rational relationship exists between the challenged activity and the statute. The Court has found that such a relationship exists.

In granting defendants' motion for summary judgment, the Court sympathizes with the plaintiff landowners. One day they had something very valuable and, within a matter [*11] of years, the City sacrificed it for its project. However, the Court cannot write a new antitrust law that flies in the face of Gold Cross Ambulance. This Court has denied summary judgments on the premise that it was confining the exercise of state granted power to anticompetitive activities that were "clearly articulated and affirmatively expressed" as state policy. Gold Cross Ambulance expands the parameters to all situations where anticompetitive activity is reasonable under a state statutory scheme. On this basis, the Court concludes that the defendants acted within the Parker immunity.

Upon the foregoing,

IT IS Therefore Ordered that defendants' motion to reconsider is granted. The defendants' motion for summary judgment on all claims is granted.

IT IS Further Ordered that the Clerk of Court for the Northern District of Iowa shall enter judgment in favor of the defendants and against the plaintiffs on all claims for relief. This action is therefore dismissed.

No brief filed for appellee.

Judges: JUSTICE HARTMAN delivered the opinion of the court. DOWNING, P.J., and STAMOS, J., concur.

Opinion by: HARTMAN

Opinion

[*697] [**1339] [****460] This controversy arises out of the business decision of defendant Collagen Corporation (Collagen) not to sell a product called Zyderm Collagen Implant (Zyderm) to plaintiff Annette Lotter, M.D. Count I of Lotter's amended complaint charged defendants Collagen, Judy Abbey, Robert Swartz, M.D., and Richard Roe, M.D., *inter alia*, with violating the Illinois Antitrust Act (Ill. Rev. Stat. 1981, ch. 38, par. 60 -- 1 *et seq.*) and the common law by conspiring together to restrain trade or commerce. Count II alleged that defendants violated the Uniform Deceptive Trade Practices Act (Ill. Rev. Stat. 1981, ch. 121 1/2, par. 311 *et seq.*) by making certain false representations with respect to Lotter. On August [***2] 19, 1982, the circuit court entered a written order granting Lotter's motion for a preliminary injunction from which this interlocutory appeal proceeds. 87 Ill. 2d R. 307(a)(1).

The issues raised on appeal include whether: Lotter established the prerequisites for preliminary injunctive relief; defendants were denied due process of law; the order complied with section 11 -- 101 of the Code of Civil Procedure (Ill. Rev. Stat. 1981, ch. 110, par. 11 -- 101); and the court properly allowed into evidence the letters written by Lotter's patients and the photographs of some of her patients. We reverse and remand with instructions.

At the hearing on Lotter's motion for a preliminary injunction, the president of Collagen, Howard Palefsky, stated that a patent, issued [*698] to Stanford University on the application of soluble collagen for soft tissue reconstruction, was ultimately licensed to Collagen for its use. Collagen has engaged in developmental and clinical testing, as well as marketing and sale of Zyderm since it received United States Food and Drug Administration clearance in July 1981. Collagen is concerned that the initial use of this product by physicians who may abuse [***3] it could ultimately ruin its availability for everyone. Under adverse examination, Palefsky stated that Collagen refuses to sell Zyderm [**1340] [****461] to Lotter because of her unfavorable reputation in the medical community.

The vice-president of marketing at Collagen, Judith Boshart, also testified as an adverse witness. She sought out information from others concerning the reputations of physicians with whom Collagen would be involved. Dr. Lotter had an inordinate number of lawsuits filed against her, lost her hospital privileges and had a patient die in her office from a phenol peel, which is a very common procedure. She made no independent investigation of Lotter.

Dr. Lotter testified that she belonged to numerous medical societies, won several academic awards and authored many publications. Since starting private practice in 1972, she performed over 8,000 surgical procedures. Of these, only 25, or three-tenths of one percent, had resulted in lawsuits against her, a much lower percentage than the national average. Most of the malpractice suits were settled; none resulted in a judgment against her. She resigned from her position at Grant Hospital because she [***4] was unable to comply with the hospital's bylaw requiring her to carry personal malpractice insurance. She was not then under investigation by the Illinois Department of Registration and Education. Based on her education and experience, she would be able to use Zyderm professionally and competently.

Zyderm is designed to elevate depressions in the skin and reduce disfigurement. The safety of the product is insured by pretesting the patient through administering a very small dosage. Two hundred of her patients were in need of Zyderm. She identified 21 sets of photographs, received in evidence, showing the specific skin problems of 21 patients. All had been treated to the fullest extent possible. Zyderm is the only further treatment available. All the patients desire this further treatment. Two of her patients were suicidal due to the nature of their appearance. Lotter introduced documentary evidence revealing that, until that time, the Medical Disciplinary Board of the State of Illinois found her not guilty of gross medical malpractice, "manifest" professional incompetence, or poor standards of care in her treatment of the patient who died in her office.

[*699] On the [***5] seventh day of the hearing, during Collagen's direct examination of its first defense witness, Palefsky, the court stated that it had "heard enough," and was ready to order injunctive relief. It refused to allow Collagen to complete Palefsky's testimony or to put on the remainder of its defense. Collagen offered to prove that Lotter lost her malpractice insurance because the insurance company felt that she presented an excessive risk due to the number of malpractice suits filed against her. Collagen was also prepared to introduce a certificate showing that Lotter was currently under investigation by the Illinois Department of Registration and Education.

The court's written order required: Collagen to "prepare" Lotter for use of Zyderm; Collagen to ship to Lotter two six-syringe boxes of "test" doses; Lotter to transmit to Collagen case report forms denoting the results of Zyderm testing; Collagen to ship one six-syringe box for each patient showing negative test results in accordance with Collagen's customary procedures, to a maximum of 12 boxes. This interlocutory appeal followed. On September 1, 1982, this court stayed the order of the circuit court during the pendency of the [***6] appeal.

I

Lotter previously moved to dismiss the interlocutory appeal, contending that the controversy is moot because of this court's stay of the preliminary injunction order and the lapse of time since the latter order was entered. She

115 Ill. App. 3d 696, *699 IL⁴50 N.E.2d 1338, **1340 IL⁴983 Ill. App. LEXIS 1937, ***6 IL⁴71 Ill. Dec. 459, ****461

asserted that the emergency status of her patients "no longer exists" and she would no longer object to the vacation of the preliminary injunction order. That motion was denied on March 1, 1983. We briefly comment on the reason for that denial. Although an appellate court will not review a case merely to resolve moot or abstract questions, to establish precedent, or to render a judgment to guide future potential litigation ([La Salle National Bank v. City of Chicago \(1954\)](#), 3 Ill. 2d 375, 379, [****462] [**1341] 121 N.E.2d 486; [Kohan v. Rimland School for Autistic Children \(1981\)](#), 102 Ill. App. 3d 524, 527, 430 N.E.2d 139), Lotter's motion failed to explain how the passage of time eliminated the emergency status of the patients in need. Her motion is contrary to the evidence she introduced at the proceeding before the circuit court, and her subsequent contention, that her inability to provide treatment requiring the "use of Zyderm [***7] * * * [was] effectively destroying her medical practice." More importantly, her motion declares an intent to proceed at the trial level with the merits of her complaint. Among the prayers for relief therein set forth is one for a permanent injunction based upon the same theories that were utilized at the preliminary injunction hearing. On the other hand, Collagen [*700] seeks a judicial determination as to its rights and duties, to which it is entitled. ([Two Hundred Nine Lake Shore Drive Building Corp. v. City of Chicago \(1971\)](#), 3 Ill. App. 3d 46, 49, 278 N.E.2d 216.) Accordingly, the motion to dismiss the appeal as moot was denied.

II

Lotter has failed to file a brief on appeal. Nevertheless, we elect to decide the merits of the case. [First Capitol Mortgage Corp. v. Talandis Construction Corp. \(1976\)](#), 63 Ill. 2d 128, 133, 345 N.E.2d 493.

Collagen contends that the circuit court erroneously entered the preliminary injunction because Lotter failed to establish any of the prerequisites for injunctive relief. In particular, Collagen maintains that Lotter did not demonstrate that she has a clearly ascertained right to purchase Zyderm from Collagen. [HN1](#)[¹] In order for [***8] a preliminary injunction to issue, the movant must show, *inter alia*, he or she has a lawful right in need of protection. [Kaplan v. Kaplan \(1981\)](#), 98 Ill. App. 3d 136, 141, 423 N.E.2d 1253.

Collagen maintains that it has the unilateral right to determine with whom it will and will not deal, asserting that [HN2](#)[¹] in the absence of a purpose to create or maintain a monopoly, an **antitrust law** does not limit the right of the manufacturer engaged in an entirely private business, freely to exercise its own independent discretion as to parties with whom it will deal. ([United States v. Colgate & Co. \(1919\)](#), 250 U.S. 300, 307, 63 L. Ed. 992, 997, 39 S. Ct. 465, 468; see [Reeves, Inc. v. Stake \(1980\)](#), 447 U.S. 429, 438-39, 65 L. Ed. 2d 244, 252, 100 S. Ct. 2271, 2278.) [HN3](#)[¹] Central to a patentee's legal monopoly is the right to prevent others from utilizing its discovery without its consent. ([Zenith Radio Corp. v. Hazeltine Research, Inc. \(1969\)](#), 395 U.S. 100, 135, 23 L. Ed. 2d 129, 155, 89 S. Ct. 1562, 1583.) [HN4](#)[¹] Incidental to the monopoly grant of a patent are the rights in the patentee to choose the licensees who will be authorized to practice the teaching of the patent. ([La Salle](#) [***9] [Street Press, Inc. v. McCormick & Henderson, Inc. \(7th Cir. 1971\)](#), 445 F.2d 84, 95.) [HN5](#)[¹] The antitrust laws do not require a patent holder to forfeit the exclusionary power inherent in his patent the moment the patent affords him monopoly power over a pertinent market. ([SCM Corp. v. Xerox Corp. \(2d Cir. 1981\)](#), 645 F.2d 1195, 1204, cert. denied (1982), 455 U.S. 1016, 72 L. Ed. 2d 132, 102 S. Ct. 85.) [HN6](#)[¹] A private manufacturer retains his right to decide with whom he will deal so long as he does not intend to restrain competition or expand his monopoly and does not act coercively. ([Official Airline Guides, Inc. v. FTC \(2d Cir. 1980\)](#), 630 F.2d 920, 927-28, cert. [¹*701] denied (1981), 450 U.S. 917, 67 L. Ed. 2d 343, 101 S. Ct. 1362.) Although the foregoing authorities dealt with Federal, rather than State, antitrust laws, under our Illinois Antitrust Act, our courts are bound to follow Federal court construction of statutes similarly worded, as in this case. Ill. Rev. Stat. 1981, ch. 38, par. 60 -- 11.

In the case *sub judice*, Lotter offered no evidence that defendants conspired together to unreasonably restrain competition or to expand their monopoly. The circuit [***10] court's decision to issue the preliminary injunction was not based upon any finding that defendants violated the antitrust laws. Rather, during the course of the proceedings, the court formed the foundation for its decision as follows:

[**1342] [****463] "I don't think that a human being['s] well-being because of a patent is something to be restricted because of a patent. * * * I can see where an opener for a bottle cap has a patent. That would be something entirely different. But when you [Collagen's counsel] are telling me that a drug is something that you have a right to determine who in the world is going to get it, I disagree with you."

Thus, the circuit court apparently believed that since the product involved here was a medical drug to be used for purposes of health care, Collagen did not have the right to refuse to sell to Lotter. No precedent was offered to support the court's theory. In the absence of an antitrust violation or some other illegal purpose, Collagen had the right to decide not to sell Zyderm to Lotter and was not required to justify its business judgment by showing that Lotter was unqualified or incompetent. Lotter failed to establish [***11] a right to purchase Zyderm from Collagen on any other basis. Accordingly, the preliminary injunction was improperly entered and must be vacated upon reversal. In light of the foregoing disposition, other issues raised by appellant need not be addressed.

Reversed and remanded with instructions.

HN1[] Regulated Industries, Transportation

Under 49 U.S.C.S. § 1(4), the railroads are required to provide and furnish transportation upon reasonable request therefore, and to establish reasonable through routes with other such carriers, and just and reasonable rates, fares, charges, and classifications applicable thereto. Similarly, 49 U.S.C.S. § 1(10) and (11) mandate that the railroads establish reasonable rules with respect to the interchange of locomotives, rail cars, and other railroad property. However, despite the need for cooperation between the railroads and notwithstanding the Interstate Commerce Commission's oversight of that cooperation, the Interstate Commerce Act does not necessarily provide an impermeable shield of implied immunity from the antitrust laws for the railroad industry.

HN3 [down] **Common Carrier Duties & Liabilities, Rates & Tariffs**

Congress has written an express immunity provision into the Interstate Commerce Act. Recognizing the need for cooperative activity among the railroads, Congress in 1948 amended the Interstate Commerce Act by adding 49 U.S.C.S. § 5b. Under § 5b, rail carriers are permitted to reach agreements as to rates, fares, classifications and a number of other railroad matters. Section 5(b)(9) provides that the railroads are relieved from the operation of the antitrust laws with respect to the making of such an agreement and with respect to the carrying out of such agreement in conformity with its provisions and in conformity with the terms and conditions prescribed by the Interstate Commerce Commission. However, the pervasive regulation of railroad ratemaking activities by the Interstate Commerce Commission does not impliedly immunize all railroad ratemaking activities from the antitrust laws.

The Interstate Commerce Act, 49 U.S.C.S. § 5b(9), expressly authorizes certain agreements between competing railroads relating to rates, classifications, and other transportation matters. The section also allows the participating railroads to establish rules, regulations, and procedures for the joint consideration and implementation of rate schedules and classification systems, etc. When an agreement under this section is approved by the Interstate Commerce Commission, the participating railroads are expressly immunized from the operation of the antitrust laws with respect to the making of such agreement, and with respect to the carrying out of such agreement in conformity with its provisions and in conformity with the terms and conditions prescribed by the Commission.

HN10 [down] Interstate Commerce, Restraints of Trade

The Interstate Commerce Act, 49 U.S.C.S. § 15a(3), only ensures that the Interstate Commerce Commission (ICC) will not disallow a reduced rail rate merely because it could potentially divert traffic away from competing modes of transportation such as trucks or airplanes. Section 15a(3) cannot in any way be read as stating that the ICC's approval of an agreement under the Act, 49 U.S.C.S. § 5a, shields a subsequent conspiracy to eliminate a direct competitor from the antitrust laws.

Governments > Legislation > Interpretation

HN11 [down] Legislation, Interpretation

The fears and doubts of the opposition to certain proposed legislation are no authoritative guide to the construction of that legislation. It is the sponsors that a court looks to when the meaning of the statutory words is in doubt. Remarks of the opposition made in the course of legislative debate or hearings other than by persons responsible for the preparation or the drafting of a bill are entitled to little weight. This is especially so with regard to the statements of legislative opponents who in their zeal to defeat a bill understandably tend to overstate its reach.

Antitrust damages may be recovered against rail carriers when they result from an enveloping conspiracy with its own illegal ends, the damages being measured not merely by the consequences flowing from the preference, but by those flowing from the conspiracy in all its comprehensive unity.

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > Rates & Tariffs

HN14 [blue icon] Common Carrier Duties & Liabilities, Rates & Tariffs

With respect to transportation, a commodity rate is a rate on a specific commodity, or article, moving between specific points, sometimes in a specific direction, and sometimes for a specific minimum quantity. The purpose of the commodity rate is generally to provide a lower rate to reflect lower costs resulting from large scale movement or otherwise. The commodity rate can be higher than a class rate, but it usually is not.

Governments > Legislation > Statute of Limitations > General Overview

HN15 [blue icon] Common Carrier Duties & Liabilities, Rates & Tariffs

With respect to transportation, a class rate is a rate resulting from a rating provided in a classification. While commodity rates are available only on limited commodities, a class rate can be found on practically any commodity. The rate in the class rate tariff is normally on class 100 commodities. To determine the class rate it is necessary to multiply the first class rate by a percentage figure applicable on its rating. In the uniform freight classification, the percentage of first class is automatically provided in the classification. That is, a class 87 would mean 87 percent of first class. Class rates were created to simplify the preceding process providing a specific rate on each commodity moved. A class tariff is a tariff containing only class rates.

[**HN17**](#) Antitrust & Trade Law, Regulated Industries

Acts which are in themselves legal lose that character when they become constituent elements of an unlawful scheme. A conspiracy to eliminate a competitor and monopolize an industry falls outside the bounds of day-to-day railroad ratemaking. For this reason, such a conspiracy is subject to the harsh consequences of the antitrust laws.

[**HN18**](#) Standing, Clayton Act

Section 4 of the Clayton Act, [15 U.S.C.S. § 15](#), provides a treble-damages remedy to any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. Although § 4 of the Clayton Act's language is broad, questions of antitrust standing cannot be answered simply by reference to the broad language of § 4. Instead, the question requires a court to evaluate a plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them. There are several factors to be analyzed by district courts in deciding antitrust standing questions. In addition to the threshold requirement that the claim be encompassed by the Clayton Act, these include (1) the nature of the plaintiff's alleged injury; (2) the directness or indirectness of the asserted injury; (3) whether the damage claims are highly speculative; and (4) the need to keep the scope of complex antitrust trials within judicially manageable limits.

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > General Overview

HN19 [] Antitrust & Trade Law, Clayton Act

Section 4 of the Clayton Act, [15 U.S.C.S. § 15](#), plainly focuses on tangible economic injury. It may therefore be appropriate to consider whether a claim rests at bottom on some abstract conception or speculative measure of harm. Difficulty of ascertainment should not be confused with a right of recovery. Another factor for consideration in determining the issue of standing under the Clayton Act is the strong interest in keeping the scope of complex antitrust trials within judicially manageable limits. Cases have stressed the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN20 [] Reviewability, Jurisdiction & Venue

The doctrine of primary jurisdiction applies where a claim is originally cognizable in the courts, and comes into play whenever enforcement of the claim requires the resolution of issues which, under a regulatory scheme, have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views. No fixed formula exists for applying the doctrine of primary jurisdiction. In every case the question is whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation.

Opinion

[*862] [**2] Memorandum and Order

THOMAS, Sr. J.

In separate but related motions filed on April 15, 1982, defendants Baltimore & Ohio Railroad Company (B&O), Chesapeake & Ohio Railway Company (C &O), CSX Corporation, Chessie Systems, Inc. (sometimes collectively referred to as Chessie), Norfolk & Western Railway Company (N&W), and Bessemer & Lake Erie Railroad Company (B&LE) move to dismiss plaintiff Pinney Dock & Transport Company's (Pinney) complaint seeking damages for alleged

injuries to plaintiff's business and property caused by defendants' violations of [Sections 1](#) and [2](#) of the Sherman Act, [15 U.S.C. §§ 1](#) and [2](#), [section 3](#) of the Clayton Act, [15 U. S. C. § 14](#) . . . and Ohio's Valentine Act.¹

Each defendant argues that the alleged activities underlying plaintiff's claims are expressly and impliedly immunized from the antitrust laws by the Interstate Commerce Act (ICA), and that the Interstate Commerce Commission (ICC) has exclusive jurisdiction over the substance of plaintiff's claims. Each defendant additionally asserts that plaintiff's treble damage claims are barred by the doctrine of [Keogh v. Chicago & Northwestern Ry., 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. \[**3\] 47 \(1922\)](#). Defendant B&LE further contends that certain of plaintiff's claims should be dismissed either for lack of standing or "because they could not as a matter of law have caused direct or cognizable injury to plaintiffs." Finally, each defendant asserts that if this court does not dismiss plaintiff's complaint, "the case should be referred to the ICC under the doctrine of primary jurisdiction."

Since each of the parties has submitted factual exhibits in arguing the various issues, the court will apply [Rule 56 of the Federal Rules of Civil Procedure](#)'s summary judgment standards. Defendants' motions will be granted only if "there is no genuine issue as to any material fact and [defendants are] entitled to a judgment as a matter of law."

Before analyzing the various branches of defendants' motions, it is essential to review the principal allegations [**4] in this antitrust case.

Plaintiff, an Ohio corporation, provides dock and terminal services in Ashtabula, Ohio for goods moving over the Great Lakes. In its first amended complaint, plaintiff alleges that "from at least the mid-1950's" the defendants conspired and acted to monopolize "the business of providing dock services for iron ore and other goods moving over docks on the lower [*863] Great Lakes, and the business of providing land transportation for iron ore and other goods moving over such docks." Plaintiff further alleges that defendants concomitantly conspired and acted to "restrain trade in the business of providing water carriage for iron ore and other goods moving over docks on the lower Great Lakes, and in the business of building ships for such carriage."

Plaintiff asserts that defendants advanced the ends of the alleged conspiracy through a series of overt acts and practices, some of which are specifically set forth in the first amended complaint. The alleged overt acts include refusing to grant a competitive rail rate for the carriage of iron ore from Pinney Dock, arbitrarily placing Pinney Dock in a switching district where it was ineligible for competitive [**5] rail rates, and imposing unjustifiably high switching charges on the cars of a railroad competitor which sought to carry iron ore from Pinney Dock at competitive rail rates. Defendants are additionally accused of "deliberately and purposefully foreclosing Pinney Dock's development as an iron ore handling facility by . . . preventing and postponing the construction and use of the self-unloading vessels which Pinney Dock was designed to serve."

Plaintiff maintains that the above alleged overt acts and practices (and others) were planned and carried out through a series of unauthorized secret meetings and discussions and that coercion and intimidation were used to

¹The court does not address the related motion of defendant Penn Central Corporation at this time. See this court's memorandum and order of November 9, 1982.

- (1) [force] railroads to forego their right of independent action with respect to rail rates and services and other matters;
- (2) [force] railroads not to serve self-unloading vessels at railroad-owned docks; and
- (3) [force] railroads not to lower their dock handling charges on iron ore.

Plaintiff charges that defendants' alleged antitrust violations have effectively stifled technological progress and development in the construction and use of efficient dock facilities and vessels and impeded and prevented **[**6]** the development of non-rail modes of land transportation. Additional effects allegedly resulting from the charged conspiracy are: (1) that shippers were subjected to artificially and unjustifiably high rates and charges for dock and land transport services; and (2) that needed improvements in the efficiency, economy and competitiveness of dock and transport facilities were subverted.

Plaintiff further states that

as a direct and proximate result of the foregoing acts and violations, [plaintiff] has been greatly injured in its business and property because it was forestalled and excluded from participating in the business of providing dock services for various commodities, including iron ore, coal, and coke.

Plaintiff seeks treble damages under the federal antitrust laws and an order enjoining defendants from further violations of the federal and state antitrust laws.

I.

The court first addresses defendants' separate but parallel contentions that "the complaint should be dismissed because the matters at issue are within the exclusive jurisdiction of the Interstate Commerce Commission." Defendants argue that the Interstate Commerce Commission's pervasive regulation **[**7]** of railroad ratemaking activities supersedes the federal antitrust laws as to all "matters concerning the establishment of railroad rates." More precisely, defendants contend that the existence of the Interstate Commerce Act impliedly immunizes them from plaintiff's present antitrust action.

In support of their argument, defendants point out that the Interstate Commerce Act seeks to substitute collective action among the railroads under the supervision of the Interstate Commerce Commission for unrestrained competition between the railroads. Without question, the nature of the railroad industry necessitates collective action among competing carriers. For example, it is frequently necessary for one railroad to deliver freight to a destination located on the tracks of a competitor. Thus, [HN1](#)[↑] under 49 **[*864]** U. S. C. § 1(4), the railroads are required to "provide and furnish transportation upon reasonable request therefore, and to establish reasonable through routes with other such carriers, and just and reasonable rates, fares, charges, and classifications applicable thereto. . . ." Similarly, 49 U.S.C. § 1(10) and (11) mandate that the railroads establish reasonable rules with respect **[**8]** to the interchange of locomotives, rail cars, and other railroad property.²

However, despite the need for cooperation between the railroads and notwithstanding the ICC's oversight of that cooperation, the Interstate Commerce Act does not necessarily provide an impermeable shield of implied immunity from the antitrust laws for the railroad industry. In [Gordon v. New York Stock Exchange, 422 U. S. 659, 682-83, 45 L. I^{**91} Ed. 2d 463, 95 S. Ct. 2598 \(1975\)](#), the Supreme Court quoted language which has been oft repeated in the context of antitrust cases involving regulated industries:

Certain axioms of construction are now clearly established. [HN2](#)[↑] Repeal of the antitrust laws by implication is not favored and not casually to be allowed. Only where there is a 'plain repugnancy between the antitrust and regulatory provisions' will repeal be implied. . . .

With that language in mind, the court turns to the relevant case law.

² The Interstate Commerce Act, 49 U. S. C. § 1, et seq., was recodified in 1978 as [49 U. S. C. § 10101, et seq.](#) While that recodification was not intended to make any "substantive change in the law" (see [section 3\(a\)](#) of P.L. 95-473, 92 Stat. 1466), it extensively revised the structure and language of the Act. Moreover, beginning in 1976, Congress made substantive changes in the Act culminating in the Staggers Rail Act of 1980, 94 Stat. 1895. This court will cite to the pre-1978 version of the ICA since its provisions were in effect during most of the period covered by the complaint.

In *Georgia v. Pennsylvania R. Co.*, 324 U.S. 439, 89 L. Ed. 1051, 65 S. Ct. 716 (1945), the state of Georgia filed an antitrust suit against approximately 20 railroad companies³ alleging that the defendants conspired to fix railroad rates so as to discriminate against the state of Georgia and that the defendants used coercion in the fixing of discriminatory joint through rates. After examining selected provisions of the Interstate Commerce Act, including 49 U.S.C. §§ 1(4) and 6, the Court addressed the defendants' contention that the ICC had exclusive jurisdiction over railroad rate cases. Unequivocally emphasizing that the railroads were "subject to the antitrust laws," [**10] *id. at 456*, the Court observed that "conspiracies among carriers to fix rates were included in the broad sweep of the Sherman Act" and that Congress had never adopted legislation legalizing rate-fixing combinations. Failing to find a "clear repugnancy" between the Sherman Act and the Interstate Commerce Act, the Court left it to Congress to statutorily create any antitrust immunity which the railroad industry needed to function efficiently.

Similarly, in *Carnation Co. v. Pacific Conference*, 383 U.S. 213, 15 L. Ed. 2d 709, 86 S. Ct. 781 (1966), defendant shipping conferences argued that the Shipping Act "repealed all antitrust regulation of the rate-making activities of the shipping industry." Finding that the defendant associations of shipping companies' unlawful rate-making activities were not expressly immunized [**11] from Sherman and Clayton Act coverage by *section 15* of the Shipping Act, 46 U.S.C. § 814, the Court continued:

We do not believe that the remaining provisions of the Shipping Act can reasonably be construed as an implied repeal of all antitrust regulation of the shipping industry's rate-making activities . . . we have long recognized that the antitrust laws represent a fundamental national economic policy and have therefore concluded that we cannot lightly assume that the enactment of a special regulatory scheme for particular aspects of an industry was intended to render the more general provisions of the antitrust [*865] laws wholly inapplicable to that industry. We have, therefore, declined to construe special industry regulations as an implied repeal of the antitrust laws even when the regulatory statute did not contain an accommodation provision such as the exemption provisions of the Shipping and Agricultural Acts.

Id. at 217-18. The Court further observed that the express immunity language inserted into the Shipping Act by Congress

must have been selected as a matter of deliberate choice in order to indicate the extent to which the industry's [**12] rate-making activities remain subject to the antitrust laws as well as the extent to which those activities are exempted from antitrust regulation.

Id. at 219-20.

As with the Shipping Act, **HN3**[] Congress has written an express immunity provision into the Interstate Commerce Act. Recognizing the need for cooperative activity among the railroads and responding in part to the Court's decision in *Georgia v. Pennsylvania R. Co., supra*, Congress in 1948 amended the Interstate Commerce Act by adding 49 U.S.C. § 5b. See H.R. Rep. No. 1100, 80th Cong., 2nd Sess. 1845-1848, reprinted in 1948-2 U.S. Code Cong. & Ad. News 1844. Under section 5b, rail carriers are permitted to reach agreements as to rates, fares, classifications and a number of other railroad matters. 49 U.S.C. § 5(b)(9) provides that the railroads are "relieved from the operation of the antitrust laws with respect to the making of such [an] agreement and with respect to the carrying out of such agreement in conformity with its provisions and in conformity with the terms and conditions prescribed by the [Interstate Commerce] Commission."

This court concludes that the "pervasive regulation of railroad ratemaking [**13] activities by the Interstate Commerce Commission" does not impliedly immunize all railroad ratemaking activities from the antitrust laws. Any immunity which the defendants can invoke in this case must be found in the Interstate Commerce Act's express grant of antitrust immunity. To the scope and breadth of that immunity, attention is now turned.

³The suit was filed in Georgia's capacity as both *parens patriae* and as a proprietor to redress wrongs suffered by the state as the owner and operator of various other state institutions.

II.

A.

Defendants argue that plaintiff's antitrust allegations are based upon coordinated ratemaking activities which were conducted in accordance with a joint ratemaking agreement expressly approved by the Interstate Commerce Commission. Defendants contend that their joint ratemaking activities are expressly immunized from the antitrust laws by section 5a of the Interstate Commerce Act, as amended by the Reed-Bulwinkle Act, 49 U.S.C. § 5(b) (1948).

HN4 [↑] 49 U.S.C. § 5b(9) expressly authorizes certain agreements between competing railroads relating to rates, classifications, and other transportation matters. The section also allows the participating railroads to establish rules, regulations, and procedures for the joint consideration and implementation of rate schedules and classification systems, etc. When an agreement under this section [**14] is approved by the ICC, the participating railroads are expressly immunized

from the operation of the antitrust laws with respect to the making of such agreement, and with respect to the carrying out of such agreement in conformity with its provisions and in conformity with the terms and conditions prescribed by the Commission.⁴

⁴ **HN5** [↑] 49 U.S.C. § 5b(9) sets the standard for ICC approval of an agreement among rail carriers:

Application to Commission for approval of agreements, rules and regulations

(2) Any carrier party to an agreement between or among two or more carriers relating to rates, fares, classifications, divisions, allowances or charges (including charges between carriers and compensation paid or received for the use of facilities and equipment), or rules and regulations pertaining thereto, or procedures for the joint consideration, initiation or establishment thereof, may, under such rules and regulations as the Commission may prescribe, apply to the Commission for approval of the agreement, and the Commission shall by order approve any such agreement (if approval thereof is not prohibited by paragraph (4), (5), or (6) of this section) if it finds that, by reason of furtherance of the national transportation policy declared in this Act, the relief provided in paragraph (9) of this section should apply with respect to the making and carrying out of such agreement; otherwise the application shall be denied. The approval of the Commission shall be granted only upon such terms and conditions as the Commission may prescribe as necessary to enable it to grant its approval in accordance with the standard above set forth in this paragraph.

HN6 [↑] 49 U.S.C. § 5b(9), the express immunity provision, provides in full:

Relief from operation of antitrust laws

(9) Parties to any agreement approved by the Commission under this section and other persons are, if the approval of such agreement is not prohibited by paragraph (4), (5), or (6) of this section, relieved from the operation of the antitrust laws with respect to the making of such agreement, and with respect to the carrying out of such agreement in conformity with its provisions and in conformity with the terms and conditions prescribed by the Commission.

The validity of the ICC approved *Eastern Railroads -- Agreements, infra*, is not at issue in this case. Thus, none of the prohibitions in paragraphs (4), (5), and (6) set out below are claimed or found to be applicable. However, the plaintiff is not precluded from arguing that defendants agreed to forego their rights of independent action in violation of their agreement as part of a conspiracy to eliminate competition.

Agreements between carriers of different classes

(4) The Commission shall not approve under this section any agreement between or among carriers of different classes unless it finds that such agreement is of the character described in paragraph (2) of this section and is limited to matters relating to transportation under joint rates or over through routes; and for purposes of this paragraph carriers by railroad, express companies, and sleeping-car companies are carriers of one class; pipe-line companies are carriers of one class; carriers by motor vehicle are carriers of one class; carriers by water are carriers of one class; and freight forwarders are carriers of one class.

Pooling or division agreements

[**15] [*866] Defendants in this case have jointly participated in a formal ICC approved eastern railroads rate bureau agreement since 1950. See *Section 5a Application No. 3, Eastern Railroads-Agreements*, 277 I.C.C. 279 (1950). Since the ICC approved agreement has (with minor modifications not relevant to this case) been in effect throughout the period of the alleged conspiracy, defendants argue that any rate actions they took which affected either Pinney Dock or iron ore traffic in general fell within the scope of section 5b(9)'s express grant of antitrust immunity. In response, plaintiff Pinney contends that defendants' conduct is not expressly immune under the Reed-Bulwinkle Act. Plaintiff urges that

the group boycott charged in this case is not protected by the Reed-Bulwinkle Act and is unapprovable by the ICC. Section 5a [49 U.S.C. § 5b] does not immunize conspiracies which have the purpose and effect of eliminating a competitor.

In determining whether the activities of defendants alleged by the plaintiff fall within the scope of section 5b(9)'s express grant of antitrust immunity, this court's analysis must commence with a study of the statute itself.

B.

[**16] Defendants maintain that their argument is supported by the "statutory language." This court, however, reads that statute's language differently than defendants. Certainly, the making of the Eastern Railroads Agreement approved by the ICC in 1950 is immunized from the reach of the antitrust laws by 49 U.S.C. § 5b(9). Nonetheless, the issue confronting this court is whether the ICC's approval of the defendants' basic 5a agreement operates as either an express or implied approval of a later [*867] "agreement" to eliminate a competitor and monopolize a market. Nothing in the actual language of section 5b(9) set forth earlier either suggests that it does or permits that implication.

Nonetheless, defendants argue that apart from the language of section 5b(9), "the structure of section 5a suggests that there is no need to create a predatory intent exception because such complaints are covered by the ICC's regulation." In support of this argument, defendants correctly observe that under 49 U.S.C. § 5b(2) the ICC only approves those "agreements" which are "in furtherance of the national transportation policy." However, nothing in the present record indicates that the ICC ever "approved" [*17] or even was aware of defendants' alleged predatory conspiracy to boycott and eliminate plaintiff as a competitor. The 1950 Eastern Railroads Agreement, which merely establishes the procedures for discussing rate matters and reaching rate agreements, cannot be read as impliedly or expressly "approving" such a predatory conspiracy.

In an attempt to bolster their "structure" argument, defendants note that under 49 U.S.C. § 5b(7) the ICC is authorized to investigate and determine whether any agreement it has approved conforms with the terms and conditions upon which its approval was earlier granted. Moreover, the ICC can modify or terminate an existing agreement where necessary.⁵ [*19] But the conformance of the Eastern Railroads Agreement of 1950 to the

(5) The Commission shall not approve under this section any agreement which it finds is an agreement with respect to a pooling, division, or other matter or transaction, to which section 5 of this title is applicable.

Agreements for determining matters through joint consideration

(6) The Commission shall not approve under this section any agreement which establishes a procedure for the determination of any matter through joint consideration unless it finds that under the agreement there is accorded to each party the free and unrestrained right to take independent action either before or after any determination arrived at through such procedure.

⁵ [HN8](#) [↑] 49 U.S.C. § 5b(7) reads in full:

(7) The Commission is authorized, upon complaint or upon its own initiative without complaint, to investigate and determine whether any agreement previously approved by it under this section, or terms and conditions upon which such approval was granted, is not or are not in conformity with the standard set forth in paragraph (2) of this section, or whether any such terms and conditions are not necessary for purposes of conformity with such standard, and, after such investigation, the Commission shall by order terminate or modify its approval of such agreement if it finds such action necessary to insure conformity with such standard, and shall modify the terms and conditions upon which such approval was granted to the

ICC's requirements is not an issue in this case. The issue is whether defendants illegally conspired to boycott and eliminate a direct competitor so as to monopolize a market. [HN7](#) Nothing in the structure of the Interstate Commerce Act suggests that the ICC can approve such a conspiratorial agreement,⁶ or provide a remedy under the antitrust laws for the damages resulting from one. See [Carnation Co. v. Pacific Conference, 383 U.S. 213, 181 224, 15 L. Ed. 2d 709, 86 S. Ct. 781 \(1966\)](#).

Defendants additionally point to 49 U.S.C. § 15a(3) and argue that its language is "inconsistent" with applying the antitrust laws to rail carriers. Defendants cite the [\[**20\]](#) portion of [HN9](#) section 15a(3) which states:

Rates of a carrier shall not be held up to a particular level to protect the traffic of any other mode of transportation, giving due consideration to the objectives of the national transportation policy. . . .

[\[*868\] HN10](#) Section 15a(3) only ensures that the ICC will not disallow a reduced rail rate merely because it could potentially divert traffic away from competing modes of transportation such as trucks or airplanes. See [ICC v. New York, New Haven & Hartford Railroad, 372 U.S. 744, 83 S. Ct. 1038, 10 L. Ed. 2d 108 \(1963\)](#). Section 15a(3) cannot in any way be read as stating that the ICC's approval of a 5a agreement shields a subsequent conspiracy to eliminate a direct competitor from the antitrust laws.

The court therefore concludes that neither the actual language of 49 U.S.C. § 5b(9) nor the structure of section 5a as a whole can be read as shielding the conspiracy alleged by plaintiff from the antitrust laws.

C.

Defendants argue that the legislative history of the Reed-Bulwinkle Act illustrates "that Congress did not contemplate a predatory intent exception to section 5a because plenary and exclusive regulation [\[**21\]](#) of collective ratemaking, including control of any predatory conspiracies, was vested with the ICC."

By way of background, joint railroad bureaus, associations, committees and conferences existed in large numbers before the passage of section 5b, the Reed-Bulwinkle Amendment. See H.R. Rep. No. 1100, 80th Cong., 2nd Sess., reprinted in 1948 U. S. Code Cong. & Ad. News, 1844-1845. Cooperative action among the railroads was recognized by Congress as critical for integrating the country's railroad into a single efficient shipping network. For instance, "carriers could not be expected to adjust their rates intelligently so as to fulfill the requirements of the [Interstate Commerce Act] unless they were permitted to organize. . . ." *Id.* at 1849. As the House Report states:

The carriers cannot effectively meet the requirements of the law, or provide the type of transportation that the public has come to expect and demand of them, if each is to be compelled to go it alone without a reasonable degree of consultation and agreement with other carriers. . . .

Id. at 1851. The Reed-Bulwinkle Amendment was seen as necessary to ensure that the railroads could engage [\[**22\]](#) in cooperative ratemaking without fear that their activities might be subject to prosecution under the

extent it finds necessary to insure conformity with such standard or to the extent to which it finds such terms and conditions not necessary to insure such conformity. The effective date of any order terminating or modifying approval, or modifying terms and conditions, shall be postponed for such period as the Commission determines to be reasonably necessary to avoid undue hardship.

Paragraph 2 is set forth slip op. at 11, *supra*.

⁶Indeed, in *Iron Ore Rate Cases*, 44 I.C.C. 368, 376 (1917), the ICC discussed the issue of dock rates for iron ore at Lake Erie ports and observed:

It is of course in the interest of the carriers that the ore should move over their own docks, since the cost per ton for overhead expenses tends to decrease as the tonnage handled over the docks increases; *but the right of the shippers or others to operate docks of their own can not be denied*, and if they can perform the service at a less cost per ton than the carriers charge, of if they elect to assess a lower charge for the service than the maximum allowed to the carriers, these are matters with which, as the situation is now understood, we are not concerned . . . Any service performed by the private docks in the way of loading, handling or storing the ore prior to the time of shipment is a matter to be disposed of between the dock and the shipper of ore.

antitrust laws. To reach a proper accommodation between the antitrust laws and the national transportation policy, Congress provided that

rate conferences, when approved by the ICC, and whose rate decisions are under final control of the ICC, shall not be subject to the antitrust laws with respect to the making and carrying out of such agreement in conformity with the Commission's requirements.

Remarks of Representative Bulwinkle, 94 Cong. Rec. Append. 4032 (1948).

Defendants contend that the congressional debates "leave no doubt that I.C.C. approval of a 5a agreement was intended to confer absolute antitrust immunity." Defendants point to colloquies such as the following to support their argument:

MR. WHITE: Is it not true that for many years the Congress has over and over again directed that the procedure should be through the regulatory body and by means of the regulatory process, rather than through indictment in the courts for violation of the antitrust statutes?

MR. REED: Yes; the whole procedure has been through the strengthening of regulations, [**23] rather than to use the severe and sometimes arbitrary methods of proceeding under the antitrust act.

43 Cong. Rec. 6594 (June 9, 1947).

Although such colloquies lend support to defendants' position, the legislative history must be read in its full context. At no point in time did either Senator Reed or Representative Bulwinkle say that the bill would blanket the railroads with absolute antitrust immunity. Indeed, their consistent remarks suggest the opposite. Throughout the Senate hearings, opponents of the amendment, including Senator Russell of Georgia and others, argued that [*869] its passage would completely immunize the railroads from the reach of the antitrust laws. Senator Reed steadfastly rejected this position. The following exchanges are illustrative:

[Referring to a report of the Senate Small Business Committee, coauthored by one of its employees, Mr. Childe]

MR. SPARKMAN. I know Mr. Childe, and have a very high regard for him. I am particularly interested in seeing his testimony in the volume before us. I should like to read a little further from the testimony, where he says this:

However, I do not believe there is any necessity or reason for [**24] relieving carriers from liability under the antitrust laws.

That is Mr. Childe's testimony, and if I understand correctly, the pending bill does that very thing.

MR. RUSSELL. That is the purpose of it.

MR. SPARKMAN. That is Mr. Childe's testimony.

MR. REED. Mr. President, will the Senator from Georgia yield? I should like to submit a little more of the testimony.

MR. RUSSELL. I want to get along; but I yield.

Continuing with Mr. Childe's testimony, Senator Reed read:

I believe that the rate committees and other conferences of the carriers should be regulated by the Interstate Commerce Commission to make them more effective in the public interest and to guard against abuses, and that the antitrust laws should remain in full force and effect, as a protection against any combinations or conspiracies for unlawful purposes.

THE CHAIRMAN. Let me ask you there -- in one breath you say they should be under the supervision or regulatory power of the Interstate Commerce Commission; and in the next you say they should be subject to prosecution under the Sherman antitrust law. Of course, these two things are inconsistent for the simple reason that if you say they can make [**25] an agreement, regulated by the Interstate Commerce Commission, the Government could not prosecute them under the Sherman antitrust law unless coercion could be shown.

MR. CHILDE. That is true. I think prosecution under the antitrust law should be against collusive practices for unlawful purposes.

Senator Reed then added: "With that I agree." 93 Cong. Rec. 6613-14 (1947).

Senator Reed later continued:

Mr. President, the merits of this bill require consideration by the Congress, regardless of the pending antitrust litigation against the railroads.

This bill is prospective in its operation and does not have the effect of giving the railroads immunity for anything illegal that they may have done in the past.

Georgia's suit in the Supreme Court against the railroads is a suit that charges the railroads with having combined and conspired to fix rates, by coercion, that discriminate against Georgia.

He then emphasized:

This bill does not give any immunity to any coercive combination. Paragraph 6 leaves such a combination subject to the antitrust laws, just as it is today.⁷

⁷ At the time of the statement, paragraph 6 of S. 110, the Senate Bill, contained the following language inserted at the behest of Senator Russell:

Nothing in this section and no approval of any agreement by the Commission under this section shall be so construed as in any manner to remove from the purview of the antitrust laws any restraint upon the right of independent action by means of boycott, duress, or intimidation.

This language was removed by the House Conference Committee before passage of the final bill. The legislative history is barren of specific reasons as to why this language was removed. Hence, no legislative intent may be inferred from the removal of Senator Russell's amendment to the Senate bill. But it appears from the following exchange with Senator O'Mahoney (Montana) that Senator Reed felt that the Russell amendment was not needed:

MR. O'MAHONEY. Just another quotation, with the Senator's indulgence. This was an amendment which was inserted by the Senate in order to make sure that no conspiracies would be permitted under the Bulwinkle-Reed bill. I read from paragraph (6):

Nothing in this section and no approval of any agreement by the Commission under this section shall be so construed as in any manner to remove from the purview of the antitrust laws any restraint upon the right of independent action by any carrier by means of boycott, duress, or intimidation.

In other words, the Senate said there should be no approval of any device by which boycott, duress, or intimidation should be applied to any carrier. The conference eliminated that amendment. Is that the way to prevent conspiracy?

MR. REED. When some useless language is inserted in a bill for political purposes, and accepted by the Senator in charge of the bill at the end of 5 days' debate in order to get the bill through the Senate, and the conferees on the part of the House say, "If you expect us to consider that kind of bunk seriously you are mistaken."

MR. O'MAHONEY. Does the Senator say it is useless to prevent boycott, coercion, or intimidation, and can it be prohibited when exemption is being granted from the law which enforces it?

MR. REED. Of course we are not granting any exemption. The constant misstatements of the Senator from Wyoming -- I wish he would make them in his own time --

Mr. O'MAHONEY. There is no limitation on debate.

MR. REED. No; and certainly the Senator from Wyoming exercises his privilege very freely in that respect.

MR. O'MAHONEY. Does the Senator object to being catechised on this subject?

MR. REED. It would not do any good to object to the Senator from Wyoming utilizing his privilege as a Senator and taking a lot of time in debate.

MR. O'MAHONEY. The Senator can substitute personalities for argument, and I have no objection to that, because I know the RECORD will show that personalities cannot outweigh the facts. The facts are that the Senate put in the bill a prohibition against boycott, intimidation, and coercion, and the conferees took it out.

MR. REED. It is in the law, anyway.

MR. O'MAHONEY. Where?

MR. REED. I shall call attention to it later. I ask the Senator from Wyoming to permit me to complete my statement, and then make his speech and make his statements, including his misstatements, in his own time.

93 Cong. Rec. 7204 (1947).

[**26] A somewhat similar colloquy occurred during the course of an argument over [*870] whether the case of *Georgia v. Pennsylvania R. Co., 324 U.S. 439, 89 L. Ed. 1051, 65 S. Ct. 716, (1945)* (see slip op. at 7, *supra*) would be mooted by passage of the amendment:

MR. MCFARLAND. The Department of Justice informed the Senator from Arizona that so far as the rate part of that case is concerned it will do away with it. Where does the Senator get his information? Is it the result of his own analysis, or is it from the attorneys for the defendants in those cases?

MR. REED. Mr. President, the case of the State of Georgia rests upon the allegation of a conspiracy between the railroads to establish rates which were illegal because discriminatory. The bill has no relation at all to any case that rests upon conspiracy. The bill, if enacted into law as I firmly believe it will be today, will not affect the Georgia case or the Lincoln case in the slightest degree.

Additional portions of the legislative history further reveal that the authors of the amendment never intended it to put conspiracies to drive competitors out of business beyond the reach of the antitrust laws.⁸ [**28] [**27] For example, after the final bill was [*871] passed in both Houses over the veto of President Truman, Representative Bulwinkle addressed the House with the "desire to state what the law will do and what it will not do." 94 Cong. Rec. Append. 4032 (1948). Firmly stating that the amendment would not moot the charge in *Georgia v. Pennsylvania R. Co., supra*, that certain railroads had violated the antitrust laws, Representative Bulwinkle stated:

The charge made against the railroads in the Georgia case is that they combined and conspired to fix rates by coercion and to discriminate against Georgia. A *combination or conspiracy of that kind would not be protected or immunized by S. 110.*⁹

MR. O'MAHONEY. Will the Senator be good enough to point out my misstatements?

MR. REED. I do not yield.

94 Cong. Rec. 8417 (1948).

⁸The court accords greater weight to the statements of the bill's authors as to the scope and breadth of the bill than to the assertions of the bill's opponents that its adoption would permit the railroads to engage in "boycotts, coercion, or intimidation." The opponents' warnings do not override the intent of the bill's framers. As the Supreme Court stated in *Schwegmann Bros. v. Calvert Corp., 341 U.S. 384, 394-95, 95 L. Ed. 1035, 71 S. Ct. 745 (1951)*:

HN11 [↑] The fears and doubts of the opposition are no authoritative guide to the construction of legislation. It is the sponsors that we look to when the meaning of the statutory words is in doubt.

Similarly, in *Ernst & Ernst v. Hochfelder, 425 U.S. 185, 204, 47 L. Ed. 2d 668, 96 S. Ct. 1375, n. 24 (1976)*, the court observed:

Remarks of this kind made in the course of legislative debate or hearings other than by persons responsible for the preparation or the drafting of a bill are entitled to little weight. See, e.g., *United States v. United Mine Workers, 330 U.S. 258, 276-77, 91 L. Ed. 884, 67 S. Ct. 677 (1947); United States v. Wrightwood Dairy Co., 315 U.S. 110, 125, 86 L. Ed. 726, 62 S. Ct. 523 (1942)*. This is especially so with regard to the statements of legislative opponents who "in their zeal to defeat a bill . . . understandably tend to overstate its reach." *NLRB v. Fruit Packers, 377 U.S. 58, 66, 12 L. Ed. 2d 129, 84 S. Ct. 1063 (1964)*. See *Schwegmann Bros. v. Calvert Distillers Corp., 341 U.S. 384, 394-395, 95 L. Ed. 1035, 71 S. Ct. 745 (1951)*.

⁹ Representative Bulwinkle continued:

The conspiracy charged by the State of Georgia is a conspiracy to fix rates by coercion and to discriminate against the State of Georgia in the rates so fixed. This is the way the Supreme Court construed Georgia's pleading; it was this kind of a cause of action that the Supreme Court permitted the State to bring. . . .

The Supreme Court in its opinion granting the State of Georgia leave to file its amended bill of complaint held that a certificate issued under a statutory provision similar to S. 110 did not prevent the Court from granting the State of Georgia equitable relief if the State could prove its charges. This holding was made with respect to the effect of certificate 44 which

[**29] Moreover, the final House and Senate Reports observed:

The bill leaves the antitrust laws to apply with full force and effect to carriers, so far as they are now applicable, except as to such agreements or arrangements between them as may have been submitted to the Interstate Commerce Commission and approved by that body upon finding that, by reason of furtherance of the national transportation policy as declared in the Interstate Commerce Act, relief from the antitrust laws should be granted.

H. R. Rep. No. 110, 80th Cong. 2nd Sess., reprinted in 1948 U.S. Code Cong. & Ad. News, 1848.

These excerpts from the legislative history contradict defendants' contention that the Reed-Bulwinkle Amendment was enacted with the intent of conferring absolute antitrust immunity upon railroads who are signatories to a 5a agreement. The legislative history, read as a whole, strongly suggests that the Reed-Bulwinkle Amendment's authors never envisioned its grant of antitrust immunity as being absolute. As a result, this court is unable to embrace defendants' assertion that the legislative history "leaves no doubt" that approval of a section 5a agreement by the ICC necessarily confers [**30] antitrust immunity upon signatories [*872] who conspire to eliminate a competitor.

D.

The court now turns to the relevant case law cited by each side to support their respective positions. In support of its argument against defendants' motions, plaintiff cites several cases. Plaintiff's lead case is *Atchison, Topeka & Santa Fe Railway v. Aircoach Transportation Association*, 102 U.S. App. D.C. 355, 253 F.2d 877 (D.C. Cir. 1958), cert. denied, 361 U.S. 930, 80 S. Ct. 372, 4 L. Ed. 2d 354 (1960).

In *Aircoach*, four supplemental air carriers and the transportation association to which they belonged sued forty railroads and two rate committees for treble antitrust damages and an injunction. Plaintiffs alleged that two specific practices of the railroads in connection with their charges for United States military traffic violated sections 1 and 2 of the Sherman Act. The practices included the railroads' concerted quotations of "variable spot bids" for military traffic at rates below their published schedules, and the making of "package bids" in which the railroads agreed to carry military personnel only on an "all or nothing" or "package" basis.

The defendants argued [**31] that their rate quotations "were made pursuant to section 22 of the Interstate Commerce Act and [were] immunized from the operation of the antitrust laws by an agreement approved by the Interstate Commerce Commission pursuant to section 5a of that Act." *Id.* at 880. The district court ruled that section 22 rate quotations were excluded from section 5a agreements and, therefore, left unprotected from the antitrust laws. The D.C. Circuit reversed the ruling and held that section 22 rate activities, like other commercial railroad rate activities, were in certain circumstances entitled to express antitrust immunity protection under 49 U.S.C. § 5b(9). The court remanded the case to the district court with instructions to initially submit the case to the ICC to determine whether the activities at issue were carried out pursuant to the railroads' section 5a agreements.

had been issued under section 12 of the act of June 11, 1942. The provisions of that act were analogous to the provisions of S. 110. The act authorized the Chairman of the War Production Board to issue certificates which provided that the antitrust law should not apply to certain kinds of activity which were found by the Chairman of the War Production Board to be requisite to the prosecution of the war. Such a certificate had been issued by the Chairman of the War Production Board with respect to the rate conferences and committees involved in the Georgia case. The Supreme Court held that this certificate did not prevent the State of Georgia from bringing suit in the Supreme Court. Speaking of certificate 44 the Court said: It does not sanction the use of coercion. It does not authorize any combination to discriminate against a region in the establishment of rates. ([Georgia v. Pennsylvania R. Co., 324 U.S. 439, 459, 65 S. Ct. 716, 89 L. Ed. 1051](#)), footnote 7.)

This holding of the Supreme Court is a decisive answer to the suggestion that if S. 110 becomes law the Georgia case will be moot and the Supreme Court will be prevented from granting relief to the State of Georgia.

It follows that if the State of Georgia can prove that, in fact, the railroads have combined and conspired to fix rates by coercion and to discriminate against the State of Georgia, nothing in S. 110 will prevent the Supreme Court from issuing an injunction that prohibits the railroads from engaging in that kind of activity.

In instructing the district court to initially submit the case to the ICC, the circuit court attached a critical condition to its order. The court stated:

One further substantive legal question must be considered. Even though it should be found in the end that the practices as such have been validly immunized by [**32] section 5a approved agreements, nevertheless, if they are part of an effort by railroads in combination or conspiracy to eliminate the competition of Aircoach, rather than used merely to meet that competition, the practices would be removed from the protection of section 5a(9). We do not think the Act or any agreement which has been approved under it can be construed as authorizing the use of such practices for the purpose of eliminating the competition of Aircoach for the section 22 transportation involved.

Id. at 887. The court further stated that "This aspect of the case need not be submitted for consideration or initial decision by the Commission as to either questions of fact or law." *Id.* If Aircoach prevailed on this aspect of the case, defendants "would be liable in damages, and an appropriate injunction also could be granted." *Id.*

Aircoach was immediately followed by *Riss & Company v. Association of American Railroads*, 170 F. Supp. 354 (D.D.C. 1959), cert. denied, 361 U.S. 804, 80 S. Ct. 108, 4 L. Ed. 2d 57 (1959). *Riss* involved a suit by a trucking company against first class railroads for allegedly conspiring to destroy the trucking company's [**33] business and to acquire a monopoly of land transportation of property in the United States. The railroads argued that the case involved ratemaking over which the ICC had primary jurisdiction. Defendants argued that their rates had been approved by the ICC, and were immune from the antitrust laws under 49 U.S.C. § 5(b)(9).

The *Riss* court pursued the path laid down in *Aircoach*:

[*873] It is clear from the . . . language in the ACTA case that a court need not refer to the Commission the issue of whether a rate quotation was made as a part of a combination or conspiracy to eliminate a competitor. This follows logically because such a joint act if combined with the unlawful intent of eliminating a competitor would fall outside of the immunity granted by 49 U.S.C. § 5b(9) regardless of a possible I.C.C. ruling that the methods of arriving at the new rate conformed to prior procedural agreements filed with and sanctioned by the Commission.

170 F. Supp. at 362. Summarizing, the court stated:

. . . if it should develop at trial that the plaintiff can prove that the rate reduction . . . was one of several overt acts alleged, and prove that this rate reduction [**34] was made for the purpose of effectuating one of the principal objects of the conspiracy charged therein; that is, the elimination of plaintiff as a competitor with the railroads for explosives traffic, then under ACTA no amount of coverage by approved agreements and no degree of immunity under 49 U.S.C.A. § 5b(9) could remove the rate reduction from the prohibitions of the Sherman Act . . . it would seem that the antitrust immunity that defendants invoke was designed to protect ordinary rate-making in the course of regular business so as to adjust to changing costs and to meet the challenges of outside competition . . . Even if a given joint act of reducing rates were to be considered as lawful standing by itself, it may still be properly alleged as one of the means used to effectuate a conspiracy to accomplish an unlawful object.

Id. at 366.

Thus, *Aircoach* and *Riss* do not attack regulated rates in and of themselves; they assail predatory conspiracies to eliminate competition within regulated industries. Nevertheless, defendants launch a direct assault on *Aircoach*. They argue that the D.C. Circuit cited no direct authority for its "remarkable revision of [**35] the clear language of the [Interstate Commerce] Act." As seen, however, the actual language of the Reed-Bulwinkle Amendment cannot be read as shielding conspiracies to eliminate competitors from the antitrust laws. Moreover, the citation of authority in *Aircoach* confirms that the decision stands upon solid ground.

The court in *Aircoach* cited *Georgia v. Pennsylvania R. Co.*, 324 U.S. 439, 89 L. Ed. 1051, 65 S. Ct. 716 (1945) as a leading authority for its proposition that neither the Interstate Commerce Act nor any agreement approved under it

can be construed as shielding from the antitrust laws conspiratorial conduct undertaken to eliminate a competitor. *253 F.2d at 887*. In *Georgia*, the Supreme Court grappled with defendants' contention that a discriminatory conspiracy carried out through the coercive fixing of rates was shielded from the antitrust laws by an immunity provision similar to 49 U.S.C. § 5b(9). In a footnote, the Court observed:

We have considered the argument that Certificate No. 44, issued March 20, 1943 under § 12 of the Act of June 11, 1942 (56 Stat. 357) by the *Chairman of the War Production Board* (8 Fed. Reg. 3804) protects this alleged combination [**36] from the charges contained in the bill. That certificate approves joint action by common carriers through rate bureaus and the like in the initiation and establishment of rates. We do not stop to analyze it beyond observing that in no respect would it be a bar to the present action. It does not purport to be retroactive. It does not sanction the use of coercion. It does not authorize any combination to discriminate against a region in the establishment of rates. Moreover, legal means may be employed for an illegal end.

324 U.S. at 459, 65 S. Ct. 716, 89 L. Ed. 1051 n. 7. The *Aircoach* court's reliance on *Georgia* was correct because as previously shown, *Georgia* continued to represent binding precedent after the passage of the Reed-Bulwinkle [**874] Amendment. See slip op. at 26, *supra*.

The *Aircoach* court also relied on the persuasive legal analysis in *Slick Airways v. American Airlines*, 107 F. Supp. 199 (D.N.J. 1952), *appeal dismissed sub nom.*, *American Airlines, Inc. v. Forman*, 204 F.2d 230 (3rd Cir.), cert. denied, 346 U.S. 806, 98 L. Ed. 336, 74 S. Ct. 54 (1953). In *Slick*, plaintiff alleged that defendant American conspired with other [**37] airlines to drive it out of business in order to monopolize the business of air freight transportation. Plaintiff maintained that as part of a conspiratorial campaign, defendants engaged in a series of predatory rate activities. Similar to the Interstate Commerce Act, the Civil Aeronautics Act provides express antitrust immunity for air carriers carrying out any acts authorized, approved, or required under an agreement filed with the Civil Aeronautics Board. As in this case, defendants contended that the alleged combination and conspiracy was immunized by an agreement which had been approved by the CAB. But the court did not "concur with the suggestion that a conspiracy to drive a competitor out of business . . . is the type of agreement encompassed within the statute and subject to the primary jurisdiction of the CAB for approval or disapproval and for possible immunity from the antitrust laws." *Id. at 207*. The court explained:

The defendants misconceive the nature of the complaint by confusing the means allegedly used with the result to be achieved. They view the complaint as alleging combinations or conspiracies to waste the resources of the plaintiff through predatory [**38] rate policies, to abuse the privilege of intervention in CAB proceedings, and to conduct a campaign of unfair competitive practices which amount to contracts and agreements within the purview of § 492. It is in this that they fall into error for these alleged acts rather constituted the means and methods by which the defendants conspired to drive the plaintiff out of business in violation of the anti-trust laws. As the Supreme Court said in *American Tobacco Co. v. United States*, 328 U.S. 781, 809, 66 S. Ct. 1125, 1139, 90 L. Ed. 1575: "It is not the form of the combination or the particular means used but the result to be achieved that the statute condemns. It is not of importance whether the means used to accomplish the unlawful objective are in themselves lawful or unlawful. Acts done to give effect to the conspiracy may be in themselves wholly innocent acts. Yet, if they are part of the sum of the acts which are relied upon to effectuate the conspiracy which the statute forbids, they come within its prohibition."

Id.

Several recent cases have applied an *Aircoach* type analysis in regulated industry antitrust suits. For example, *BBD Transportation Co. v. U.S.* [**39] *Steel Corp.*, 1976-2 TRADE CASES (CCH) P 61,079 (N.D. Col. 1976), held that a plaintiff motor carrier's allegations that defendant steel companies and railroads conspired to reduce railroad rates in order to force the trucking industry to lower its rates could not be eliminated on a motion for summary judgment. The allegations, the court stated, "if eventually proven to be true . . . would strip away immunity otherwise conferred by 49 U.S.C. § 5b(9)." *Id.* at p. 69,873. Similarly, *United States v. Baltimore & Ohio R.R.*, 538 F. Supp. 200 (D.D.C. 1982), the criminal analogue of the present case, adopted *Aircoach*'s holding that "section 5a immunizes the

collusive making of rates but does not immunize the collusive making of rates which are intended to eliminate competitions." *Id. at 207-08.*¹⁰

[**40] The court now turns to defendants' contention that "the better reasoned cases [***875**] hold that lawsuits charging railroads with predatory ratemaking are precluded by § 5a." As their lead case, defendants cite *Asbury Graphite, Inc. of California v. Dehyco Co.*, 1981-1 TRADE CASES (CCH) P 63,980 (N.D. Cal. 1980). In *Asbury*, the court confronted a claim by a processor of furfural residue that another processor had conspired with ten railroads to monopolize the market in the Pacific Northwest by means of a railroad tariff allegedly favoring the competitor. The court ruled that [49 U.S.C. § 10706](#), which now replaces section 5(b) (see n. 2, *supra*), "on its face" immunized the defendants from the antitrust laws:

Even if the ratemaking were actually 'conspiratorial' and 'monopolistic,' as alleged, since it unquestionably took place within the context of amending an approved freight bureau rate, the antitrust laws are inapplicable.

Id. at p. 76,072.

The *Asbury* court based its decision upon its finding that the enactment of 49 U.S.C. § 5(b) resulted from an adverse congressional reaction to [*Georgia v. Pennsylvania R. Co., supra*](#). As previously [**41] seen, this court does not read the legislative history or the words of 49 U.S.C. § 5(b)(9) as nullifying the impact of [*Georgia v. Pennsylvania R. Co., supra*](#). Nor does this court find persuasive the *Asbury* court's citation of [*McLean Trucking Co. v. United States*, 321 U.S. 67, 88 L. Ed. 544, 64 S. Ct. 370 \(1944\)](#). In *McLean*, a trucking company challenged under the antitrust laws an ICC approved merger of seven motor carrier companies. Since 49 U.S.C. § 5(11) expressly immunizes ICC approved mergers from the antitrust laws, the Court in *McLean* held that the Commission had the power to approve and thereby immunize a merger which might otherwise violate the antitrust laws. Consequently, the holding in *McLean* has little if any bearing on the issue of whether the ICC's approval of a section 5a railroad agreement completely shields from the antitrust laws signatory railroads that conspire to eliminate a competitor.¹¹ Therefore, this court finds the reasoning in *Asbury* to be unpersuasive.

¹⁰ The Aircoach reasoning has been applied in the context of a variety of other regulated industries. For example, see [*U.S. v. Braniff Airways, Inc.*, 453 F. Supp. 724 \(W.D. Tex. 1978\)](#) (conspiracy to eliminate an air competitor not immunized by the Federal Aviation Act's express immunity provision), and [*Aloha Airlines, Inc. v. Hawaiian Airlines, Inc.*, 489 F.2d 203 \(9th Cir. 1973\)](#), cert. denied, *417 U.S. 913, 41 L. Ed. 2d 217, 94 S. Ct. 2612 (1974)*. Also see [*United States v. American Telephone & Telegraph Co.*, 461 F. Supp. 1314, 1328-29 \(D.D.C. 1978\)](#), in which the court ruled:

This complaint alleges a broad conspiracy to monopolize various aspects of the telecommunications industry through a symbiotic relationship among AT&T, Western Electric, Bell Labs, and the Bell Operating Companies (see p. 1350, *supra*). Even if it be assumed, *arguendo*, that the Commission exercised explicit regulatory authority over some segments of the activities challenged in the complaint, it does not follow that defendants are immune from antitrust liability even with respect to them. Defendants' purpose is alleged to be the monopolization of the telecommunications service and equipment market, and the bulk of their conduct, including that revolving around Western Electric and Bell Labs, cannot under any reasonable view be regarded as immune from antitrust enforcement by virtue of regulation. In that circumstance, the remainder of the challenged conduct is likewise subject to antitrust consideration, both because it constitutes a means for achieving an unlawful end [*California Motor Transport v. Trucking Unlimited*, 404 U.S. 508, 515, 92 S. Ct. 609, 30 L. Ed. 2d 642 \(1972\)](#), and because it represents one facet of a larger monopolistic scheme.

Id. at 1329-30.

¹¹ As noted in the House Report accompanying the Reed-Bulwinkle Amendment with respect to 5a agreements:

It is important to note . . . that in the case of a rate association, or any similar joint organization, it is not the rates or other collective actions resulting from the association procedures that the bill contemplates will be submitted by the carriers to the Commission for approval. What is to be submitted in such case is the basic agreement setting up the association and defining the nature and scope of its activities and its mode of procedures.

H. Report at p. 1855. Unlike the plaintiff in *McLean*, plaintiff Pinney is not challenging the immunity of the ICC approved agreement. Rather, plaintiff alleges that the defendants acted outside of and contrary to the agreement by conspiring to eliminate it as a competitor and monopolize the industry.

[**42] Calling attention to antitrust cases raised in the context of other regulated industries, [*876] defendants argue that they are inconsistent with the holding in *Aircoach*. In [*Dreisbach v. Murphy*, 658 F.2d 720 \(9th Cir. 1981\)](#), plaintiff owner of a ship devanning facility in Los Angeles alleged that a rival devanner and three shipping companies conspired to boycott his company's services. Pursuant to a [section 15](#) agreement¹² the defendant carriers had agreed to exclusively use the devanning services of one of plaintiff Dreisbach's competitors.¹³ The court held that the joint choice of an exclusive devanning company was the type of "routine operating practice" within the scope of the carriers' FMC approved [section 15](#) agreement. *Id. at 729*. It was, therefore, outside the reach of the antitrust laws. Because the Ninth Circuit found it "unnecessary to determine whether there was a conspiracy," *id. at 729, n. 9*, defendants argue that *Dreisbach* is inconsistent with the *Aircoach* ruling that "a purpose to destroy competition . . . would have the legal result of removing [the] railroads from any possible protection from the antitrust laws." 253 F.2d at 887. [**43] However, the anticompetitive activities and conspiracy which Pinney alleges in this case involve far more than the established industry-wide practice which the *Dreisbach* court evaluated.¹⁴

For the reasons outlined, the court also finds [*Interstate Investors, Inc. v. Transcontinental Bus Sys., Inc.*, 310 F. Supp. 1053 \(S.D.N.Y. 1970\)](#), cited by the defendants, to be inapplicable to the present case. See also [*Hughes Tool Co. v. Trans World Airlines*, 409 U.S. 363, 34 L. Ed. 2d 577, 93 S. Ct. 647 \(1973\)](#), and [*Pan American World Airways v. United States*, 371 U.S. 296, 9 L. Ed. 2d 325, 83 S. Ct. 476 \(1963\)](#).

Two additional cases cited by defendants as supporting the *Asbury* decision are also inapposite. In [*Monticello Heights, Inc. v. Morgan Drive Away, Inc.*, 1974-2 TRADE CASES \(CCH\) P 75,282 \(S.D.N.Y. 1974\)](#), plaintiff's antitrust claims were dismissed on the grounds that they were barred by [*Keogh v. Chicago & N.W. Ry. Co.*, 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47 \(1922\)](#). The *Keogh* doctrine and its applicability to this case are discussed in section III, *infra*.

[*Baltimore & O.R. Co. v. New York, N.H.&H.R. Co.*, 196 F. Supp. 724 \(S.D.N.Y. 1961\)](#), concerned a suit to recover per diem rental rates for the use by defendants of plaintiffs' freight cars. As a defense, defendants claimed that despite the existence of a binding contract, they were not bound to pay the contractual rate because plaintiffs had fixed the rates and forced defendants to pay them in violation of section 5A of the ICA and the Sherman Act. The court ruled that a finding by the Interstate Commerce Commission in a previous hearing that the plaintiffs had not engaged in the alleged activities precluded (under the doctrine of collateral estoppel) the defendants from relitigating the issue before the court.

Neither the *Monticello* court nor the *Baltimore & O.R. Co.* court ever addressed the immunity issue facing this court.

¹² [Section 15](#) of the Shipping Act, 46 U.S.C. § 814, permits water carriers to file with the Federal Maritime Commission (FMC) agreements relating to rates and other matters. When an agreement is approved by the FMC, it is immunized against the operation of the antitrust laws. But see [*Carnation Co. v. Pacific Conference*, 383 U.S. 213, 15 L. Ed. 2d 709, 86 S. Ct. 781 \(1966\)](#), and [*In re Ocean Shipping Antitrust Litigation*, 500 F. Supp. 1235 \(S.D.N.Y. 1980\)](#), for statements that [section 15](#) antitrust immunity does not extend to the implementation of agreements unapproved by the FMC.

¹³ The court observed that "the plain language of the [section 15](#) agreements on the present record encompasses carriers' agreement to use Murphy as their one devanner in Los Angeles, and that agreement is not directly contested by appellant Dreisbach. . . ." *Id. at 724*.

¹⁴ The Ninth Circuit noted that plaintiff Dreisbach's allegations were not "supported by evidence." [*658 F.2d at 729, n. 9*](#), and at 730, n. 11. Moreover, the court stated:

There is no evidence, and no allegation, that the Carriers here are the only carriers requiring a devanning service in Los Angeles, or that Dreisbach was impeded in any manner from seeking to render devanning services in Los Angeles to other carriers.

[*658 F.2d at 729, n. 10*](#). The *Dreisbach* court correctly observed that "every agreement of carriers to use one supplier of a service can be said to confer monopoly status and antitrust immunity on that supplier, at least insofar as rendering the service to those carriers is concerned." In this case, plaintiff alleges that the railroads conspired to completely eliminate them as a direct competitor in the dock handling of iron ore. Rather than choosing among competing services, as in *Dreisbach*, defendants in this case are alleged to have conspired to eliminate a competing service, thereby foreclosing the choices of their customers.

[**44] As additional support for their position, defendants cite [*U.S. v. Rock Royal Co-op., 307 U.S. 533, 59 S. Ct. 993, 83 L. Ed. 1446 \(1939\)*](#). The issue in the case concerned "the validity of Order No. 27 of the Secretary of Agriculture, issued under the Agricultural Marketing Agreement Act of 1937, regulating the handling of milk in the New York metropolitan area." [*307 U.S. at 541*](#). Certain milk dealers refused to comply with the provisions of the order. When the United States sought an order requiring them to comply, the dealers [*877] argued that the order was invalid because its adoption was secured by misrepresentations and because certain private organizations had sought to obtain a monopoly by means of the order. The district court concluded that the order was not enforceable because coercive tactics were used to secure the drafting, acceptance and adoption of the order so as to obtain a monopoly.

Under the Agricultural Marketing Act, the Secretary was authorized to issue orders applying to milk to establish and ensure orderly conditions in its marketing. On appeal, the Supreme Court ruled that the initial adoption of the order met with the required statutory standards. [**45] After then noting that efforts to compel dealer support of the order by the threat of diverting milk sales were "ineffective upon these defendants," the Court stated:

These associations of producers of milk have a vital interest in the establishment of an efficient marketing system. This adequately explains their interest in securing the adoption of an order believed by them to be favorable for this purpose. If ulterior motives of corporate aggrandizement stimulated their activities, their efforts were not thereby rendered unlawful. If the Act and Order are otherwise valid, the fact that their effect would be to give cooperatives a monopoly of the market would not violate the Sherman Act or justify the refusal of the injunction.

[307 U.S. at 560.](#)

Although the defendants correctly argue that the Court minimized the importance of the "influences which caused the producers to favor" the order issued by the regulatory agency, the issue in this case is not whether any order of the ICC is constitutional or enforceable. The issue is whether the defendants acted outside the scope of 49 U.S.C. § 5b(9)'s limited grant of antitrust immunity by conspiring to exclude plaintiff as [**46] a competitor.¹⁵ Therefore, this court does not read *Rock Royal* as a mandate to hold that the activities alleged by plaintiff in this case are beyond the reach of the antitrust laws.

[**47] Defendant B&LE, in a supplemental letter, calls to the court's attention *National Association of Recycling Industries v. American Mail Line, Ltd.*, No. CV82-895-LTL (D.C. Cal. 12/3/82) (NARI). NARI involved an antitrust suit by a trade association for the paper recycling industry and three of its member firms against a number of ocean carriers and their rate conference. Plaintiffs alleged "that the rates charged by defendants for transporting plaintiffs' wastepaper to the Far East [were] so 'exceedingly high and unjustly discriminatory' that plaintiffs [could] not successfully compete against shippers of processed wood pulp and virgin wood chips, raw materials in direct competition with wastepaper." The court dismissed the complaint, holding that defendants' ratemaking activities were immunized from the antitrust laws by the Shipping Act "regardless of whether those rates [were] later found to

¹⁵ Citing [*Eastern Railroad Presidents' Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 \(1961\)*](#), and [*United Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 \(1965\)*](#), defendants argue that "the Supreme Court has more recently confirmed that conduct which is otherwise immune from the antitrust laws cannot give rise to antitrust liability simply because it was undertaken with predatory intent." However, this court agrees with the following language of Judge Parker in [*United States v. Baltimore & O.R.R., 538 F. Supp. 200, 207 \(D.D.C. 1982\)*](#):

. . . These cases [*Noerr* and *Pennington*] provide [defendants] no solace. At issue was the question whether the lobbying of the legislature and the executive (*Noerr*) or the attempt to influence public officials (*Pennington*) would be immunized from the antitrust laws by the [*First Amendment*](#) even when the actions were intended to eliminate competition. *Aircoach*, on the other hand, was concerned not with whether activity otherwise illegal under the Sherman Act is impliedly immunized by a constitutional provision but, rather, with whether such conduct is explicitly immunized by the Reed-Bulwinkle Act. In other words, the *Aircoach* Court was guided not by abstract constitutional principles but, rather, by the legislative history and statutory intent behind section 5a.

be violative of substantive provisions of the Shipping Act." This court [***878**] finds *NARI* to be "analytically distinguishable" from *Aircoach*, and not inconsistent with it.¹⁶

[**48] E.

Having examined the actual language of the Interstate Commerce Act, the pertinent legislative history, and the relevant case law, the court concludes that it should apply an analysis similar to that employed in *Aircoach* and its progeny. Since [HN12](#)¹⁷ a conspiracy to eliminate a competitor cannot fall within 49 U.S.C. § 5b(9)'s limited grant of express antitrust immunity, plaintiff is entitled to prove its allegations that the defendants conspired to eliminate it as a competitor in order to monopolize the business of providing dock services for the unloading of ex-lake iron ore.

III.

As a separate ground for dismissal, defendants contend that "this case falls squarely within the *Keogh* doctrine, which bars plaintiff's claim for damages." The *Keogh* doctrine was developed in [*Keogh v. Chicago & Northwestern Railway Co., 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47 \(1922\)*](#). Plaintiff *Keogh*, a manufacturer of excelsior and flax tow, sued eight railroad companies under the antitrust laws arguing that the uniform rates they set by agreement were arbitrary and unreasonable. As a defense, the railroads contended that the rates at issue had been approved by the Interstate Commerce [****49**] Commission. The Court held that "*Keogh*, a private shipper, [could not] recover damages under [the antitrust laws] because he lost the benefit of rates still lower which, but for the conspiracy, he would have enjoyed." [*Id. at 162*](#). The Court explained:

The legal rights of shipper as against carrier in respect to a rate are measured by the published tariff. Unless and until suspended or set aside, this rate is made, for all purposes, the legal rate, as between carrier and shipper. The rights as defined by the tariff, cannot be varied or enlarged by either contract or tort of the carrier (citations omitted). This stringent rule prevails, because otherwise the paramount purpose of Congress -- prevention of unjust discrimination -- might be defeated. If a shipper could recover under section 7 of the Anti-Trust Act for damages resulting from the exaction of a rate higher than that which would otherwise have prevailed, the amount recovered might, like a rebate, operate to give him a preference over his trade competitors"

[*Id. at 163.*](#)

The Court reaffirmed [*Keogh in Georgia v. Pennsylvania R. Co., 324 U.S. 439, 89 L. Ed. 1051, 65 S. Ct. 716 \(1945\)*](#). [****50**] See slip op. at 7, *supra*. The Court held that "it [was] clear from the *Keogh* case alone that Georgia [could] not recover damages even if the conspiracy alleged were shown to exist." [*Id. at 453*](#). The Court reiterated that under *Keogh*, "a rate was not necessarily illegal because it was the result of a conspiracy in restraint of trade." *Id.*

¹⁶ Finding the case before it to be "analytically indistinguishable" from [*Sabre Shipping Corp. v. American President Lines, Ltd., 285 F. Supp. 949 \(S.D. N.Y. 1968\)*](#), cert. denied, [*407 F.2d 173 \(2nd Cir.\)*](#), cert. denied, [*395 U.S. 922, 23 L. Ed. 2d 239, 89 S. Ct. 1774 \(1969\)*](#), the *NARI* court criticized the portion of the *Sabre* opinion which held that filed but unapproved rates established under the authority of an FMC-approved agreement are shielded from antitrust attack only if they meet the substantive requirements of the Shipping Act. Significantly, however, the *NARI* court never faced the one issue in *Sabre* which bears directly on this case.

In *Sabre*, an independent shipping line charged that defendant shipping lines and conferences conspired to unreasonably restrain and monopolize the Hong Kong -- United States and Japan -- United States shipping trade. Plaintiff alleged that in furtherance of the conspiracy, defendants plotted to drive it out of business through a series of predatory rate cuts. The *Sabre* court held that "predatory rate cutting . . . cannot be immunized by the Commission from the antitrust laws under [*Section 15*](#)." *Id. at 957.*

Since plaintiffs in *NARI* never alleged that defendants conspired to eliminate them as competitors (plaintiffs in *NARI* did not compete with the ocean lines), the case has little bearing on the issues confronting this court.

[*879] This court does not read either *Keogh* or *Georgia* as precluding plaintiff Pinney from recovering damages under the antitrust laws if it is able to prove the allegations in its first amended complaint. Plaintiff alleges that the defendants conspired to monopolize the business of providing dock services for iron ore and other goods moving over docks on the lower Great Lakes. In order to carry out the ends of the conspiracy, it is alleged that the railroads actively plotted to eliminate plaintiff as a competitor. To accomplish their alleged predatory ends, it is asserted that defendants committed various overt acts including refusing to grant shippers a competitive rate for the carriage of iron ore from Pinney Dock.

Unlike the plaintiff in *Keogh*, plaintiff Pinney does not bring its antitrust suit simply [**51] to recover an alleged discriminatory overcharge. Plaintiff seeks to recover damages for the loss of business it allegedly suffered as a direct competitor of defendants. Plaintiff alleges that defendants plotted and carried out a conspiracy to eliminate it as a direct competitor. Unlike in *Keogh*, plaintiff Pinney competed with defendant railroads for the same customers, and plaintiff could serve those customers only if it in turn was served by defendants. Thus, plaintiff asserts that discriminatory rail rates were merely "a symptom or an incident" of a conspiracy to eliminate it as a competitor. See [Terminal Warehouse v. Pennsylvania R. Co., 297 U.S. 500, 510, 80 L. Ed. 827, 56 S. Ct. 546 \(1936\)](#). As *Terminal Warehouse* points out, [HN13](#)¹⁵ antitrust damages may be recovered against rail carriers when they result from "an enveloping conspiracy with its own illegal ends . . . the damages being measured not merely by the consequences flowing from the preference, but by those flowing from the conspiracy in all its comprehensive unity."

[297 U.S. at 511, 516.](#)

Defendants correctly point out that in [Georgia v. Pennsylvania R. Co., supra](#), the state of Georgia sued not only in its [**52] *parens patriae* capacity, but in its "capacity as a proprietor to redress wrongs suffered by the State as the owner of a railroad . . .", [324 U.S. at 439](#); the Court nonetheless held that *Keogh* blocked its claims for monetary damages. However, the Supreme Court in its decision never treated the state as a direct competitor of the defendants. The Court based its holding on the statement in *Keogh* that a recovery by a shipper under the antitrust laws for a rate higher than that which otherwise would have prevailed would operate as a rebate to give the shipper a preference over his trade competitors. In the present case it cannot be said that plaintiff will unfairly benefit in its status as a competitor of the railroads if it is permitted to recover damages resulting from a conspiracy by those very same competitors to drive it out of business and monopolize the industry.

Approaching the issue from another angle, defendants argue that this case lies within *Keogh*'s bounds because "Pinney's claimed injury derives solely from alleged unreasonably high or discriminatory rail rates and charges." As support, defendants submit the various ICC approved iron ore rail tariffs in effect [**53] during the period of the alleged conspiracy. For example, Freight Tariff 93-K of the Pennsylvania Railroad Company issued on July 29, 1961 sets "commodity" rates for the transportation of iron ore from railroad docks to various destinations.¹⁷ Defendants argue that the following 93-K tariff section expressly limited iron ore "commodity rates" to iron ore that was transported from railroad owned docks:

[*880] Charges for Unloading Ore From Vessels . . .

On Iron Ore arriving by vessel at the ports of Ashtabula Harbor, Ohio, Buffalo, N.Y. and Cleveland, Ohio, and unloaded by means of the machinery and other facilities owned and furnished by the Pennsylvania Railroad Company, the charge against the vessel for taking the Ore from the hold of the vessel to the rail of the vessel will be 28 cents per ton of 2240 pounds.

Service will be performed only where said machinery and facilities are able to unload the vessel.

Dock Ore Rates From Ashtabula Harbor, Ohio . . .

¹⁷ The Transportation Logistics Dictionary contains the following definition for a "commodity rate":

[HN14](#)¹⁸ **Commodity Rate.** A rate on a specific commodity, or article, moving between specific points, sometimes in a specific direction, and sometimes for a specific minimum quantity. The purpose of the commodity rate is generally to provide a lower rate to reflect lower costs resulting from large scale movement or otherwise. The commodity rate can be higher than a class rate, but it usually is not.

The rates published in this tariff, as applying on Dock Ore from The Pennsylvania Railroad Docks at Ashtabula Harbor, Ohio, will also apply on Dock Ore from the Dock of the New York Central Railroad Company [**54] (Western District) at Ashtabula Harbor, Ohio, But Only When Such Ore is Delivered to The Pennsylvania Railroad Company at Ashtabula, Ohio.

Similarly, supplement 3 to Freight Tariff 2152-K of the Chesapeake and Ohio Railway Company read:

Item No.	Subject	Rules and Other Governing Provisions
		Special Rules and Regulations-Unlimited
125-A	Charge for unloading Ore From Vessel	On ore arriving by vessel at the port of Toledo Dock, Ohio, and unloaded by means of the machinery and other facilities owned and furnished by The Chesapeake and Ohio Railway Company, the charge against the vessel for taking the ore from the hold of the vessel to the rail of the vessel will be twenty-eight (28) cents per ton of 2,240 pounds.
		Defendant Note. -- This service will be performed only where said machinery and facilities are able to unload the vessel.

[**55] Defendants contend that these rates, by their express terms, did not apply to shipments of iron ore from Pinney Dock, so that iron ore shipments from Pinney were relegated to the higher "class rate" system in effect.¹⁸ For example, defendant B&LE states that "from February 1958 until April 1978 Pinney enjoyed class rates on any iron ore shipments tendered."

[**56] Several exhibits submitted as part of defendants' motion to dismiss based on the statute of limitations show that class freight rates applied off Pinney Dock. For example, G. B. Weir, Pinney's traffic manager, observed in an August 24, 1970 file memorandum:

The freight rate from Pinney Dock to Youngstown Sheet & Tube is roughly \$ 5.00.

The freight rate from public ports and certain private docks for iron ore pellets (a commodity rate) is \$ 2.08.

Similarly, in a June 9, 1971 memorandum, R. T. Beeghly, president of the Standard Slag Company, noted:

Shipment of ore can now be made from other Ashtabula docks to the steel mills at a \$ 2.60 rate, whereas the established rate from Pinney Dock is \$ 5.25.

¹⁸ The Transportation Logistics Dictionary contains the following definitions for "class rate" and "class tariff":

HN15 Class Rate. It is a rate resulting from a rating provided in a classification. While commodity rates are available only on limited commodities, a class rate can be found on practically any commodity. The rate in the class rate tariff is normally on class 100 commodities. To determine the class rate it is necessary to multiply the first class rate by a percentage figure applicable on its rating. In the uniform freight classification, the percentage of first class is automatically provided in the classification. That is, a class 87 would mean 87% of first class. Class rates were created to simplify the preceding process providing a specific rate on each commodity moved.

Class Tariff. A Tariff containing only class rates.

Additionally, in June 1975, J. A. Del Priore, Pinney Dock's director of sales, informed J. Hagen, vice president-operations and facilities planning, United States Railway Association:

Our present rate on iron ore is \$ 15.90 per gross ton to Pittsburgh and \$ 11.42 per gross ton to the Youngstown area versus \$ 4.83 per gross ton to Pittsburgh and [*881] \$ 3.62 per gross ton to Youngstown for the other facilities.

Nevertheless, it is disingenuous [**57] for B&LE to suggest that Pinney "enjoyed" ICC prescribed iron ore rates because "class rates" applied to Pinney Dock.¹⁹ [**59] As previously illustrated, [HN16](#) railroad rates for ex-lake iron ore historically have been regarded as separate and distinct from the rates on all other commodities. In *Iron Ore Rate Cases*, 41 I.C.C. 181 (1916), the Commission carefully set maximum rates for ex-lake iron ore from Ashtabula Harbor, Ohio to various destinations. The Commission stated:

The *maximum rates herein found reasonable* as set forth in the foregoing table include, as heretofore explained, only the rail-line service from the line-haul carriers' tracks at the lake ports, after the ore has been loaded into the cars, to the points at destination where the carriers' tracks connect with the private industry tracks that serve the furnace plants. They do not include the dock service and the service of placing carload shipments of ore at the point of unloading on private industry tracks at destination, for which services separate charges should be established.

Id. at 219. Since the transportation of ex-lake iron ore has historically been treated under a distinct commodity rate scheme, [**58] defendants cannot realistically argue that under the ICC's approved rate schedules, ore shipments from Pinney Dock were automatically covered by published and ICC approved "class rate" tariffs.²⁰

¹⁹ B&LE asserts that "this rate system was prescribed by the ICC in *Class Rate Investigation*, 1939, [281] I.C.C. 213 (1951)."

Neither the case cited by B&LE nor its earlier companion, *Class Rate Investigation*, 1939, 262 I.C.C. 447 (1945), provides any justification for defendants' assertions. The focus of these cases was an investigation by the ICC (on its own motion) into "the lawfulness of interstate class rates, all-rail, all-water, and rail-and-water, applicable in the United States generally, except in mountain-Pacific territory and between that territory and the remainder of the country." 262 I.C.C. at 454. Nothing in the Commission's wide-ranging findings supports defendants' statement that under ICC rules, they were justified in quoting "class rates" for iron ore shipments off of private docks at the same time that they were assessing approved "commodity iron-ore rates" for shipments off of their own docks. Indeed, if such were the case, private docks such as Pinney could never have hoped to compete with the railroads in the handling of ex-lake iron ore because the existing freight class rates were so much higher than the published commodity iron ore rates. Yet, as previously pointed out, *supra*, at 16, the ICC itself observed:

It is of course in the interest of the carriers that the ore should move over their own docks, . . . but the right of the shippers or others to operate docks of their own cannot be denied.

44 I.C.C. at 376.

²⁰ S. S. McKinley of the B&O noted in a letter of March 4, 1958 to S. I. Thompson:

You have no doubt received copy of proceedings of the joint meeting held at Pittsburgh, Pa. February 26, distributed by Chairman Kern March 3.

As additional information, after much discussion the attorneys agreed that we could not very well defend publication of higher specific line haul rates from the so-called public docks (Pinney at Ashtabula and Cleveland Stevedore at Cleveland) than are presently published from railroad and steel company private docks. You will recall higher rates previously had been suggested as a means of discouraging the handling of ore over public docks.

Therefore, it was decided to docket a proposal with the Coal, Coke & Iron Ore Committee, C.T.R., on behalf of all lines publishing rates from railroads docks, to restrict the application of the line haul rates so they will only apply on ore received over the railroads' own docks (see CTR Submittal 10448, as amended).

Along the same lines in a Penn Central interoffice memorandum of November 21, 1968 to F. R. Weis, R. L. Wilson concluded that under *Iron Ore Rate Cases*, *supra*, Penn Central "would have to publish 'line haul' rates from Ashtabula Harbor, Ohio [for Pinney Dock]."

[**60] Moreover, defendants' argument that plaintiff's claims are barred by *Keogh* because the injury resulted from discriminatory rail rates misses the heart of plaintiff's claim. It is the alleged conspiracy itself, rather than the implements used to carry the conspiracy out, which makes this more than a "simple ICC rate case." As the Supreme Court observed in [*Continental Co. v. Union Carbide, 370 U.S. 690, 707, \[**882\] 8 L. Ed. 2d 777, 82 S. Ct. 1404 \(1962\)*](#):

It is well settled that [HN17](#) acts which are in themselves legal lose that character when they become constituent elements of an unlawful scheme.

A conspiracy to eliminate a competitor and monopolize an industry falls outside the bounds of day-to-day railroad ratemaking. For this reason, such a conspiracy is subject to the harsh consequences of the antitrust laws. Therefore, plaintiff is entitled to prove its allegations that defendants used the iron ore rate system to further a conspiracy to eliminate the direct competition of plaintiff in providing dock services for ex-lake iron ore. Should plaintiff prove its allegations, it will not be barred by [*Keogh v. Chicago & Northwestern Railway Co., supra*](#), from [**61] recovering damages.

IV.

Defendant B&LE separately argues that "certain of plaintiff's claims should be dismissed for lack of standing to assert them or because [the anticompetitive acts alleged] could not as a matter of law have caused direct or cognizable injury to plaintiffs."

[HN18](#) Section 4 of the Clayton Act, [15 U.S.C. § 15](#), provides a treble-damages remedy to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." As the Court recently observed in [*Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 156, 102 S. Ct. 2540 \(1982\)*](#):

. . . the lack of restrictive language reflects Congress' "expansive remedial purpose" in enacting § 4: Congress sought to create a private enforcement mechanism that would deter violators and deprive them of the fruits of their illegal actions, and would provide ample compensation to the victims of antitrust violations. [Citations omitted] "The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated."

Although section 4 of the Clayton Act's language is broad, the [*Court \[**62\] in Associated General Contractors v. Carpenters, 459 U.S. 519, 103 S. Ct. 897, 907, 74 L. Ed. 2d 723, \(1983\)*](#), emphasized that questions of antitrust standing "cannot be answered simply by reference to the broad language of § 4. Instead, . . . the question requires the [court] to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." The Court in *Associated* set forth several factors to be analyzed by district courts in deciding antitrust standing questions.²¹ In addition to the threshold requirement that " the claim be encompassed by the Clayton Act," these include (1) "the nature of plaintiff's alleged injury;" (2) "the directness or indirectness of the asserted injury;" (3) whether the damage claims are "highly speculative;" and (4) the need to keep "the scope of complex antitrust trials within judicially manageable limits." [Id. at 543](#).

²¹ Under [*Chrysler Corp. v. Fedders Corp., 643 F.2d 1229, 1235 \(6th Cir. 1981\)*](#), to establish standing in an antitrust action, the sixth circuit requires:

- (1) that the plaintiff allege injury in fact and
- (2) that the interest which the plaintiff seeks to protect is arguably within the zone of interests protected by the statute in question."

In [*Associated, supra*](#), the Court noted the sixth circuit's standing test, as well as the tests of several other circuits. The Court then observed that "these labels may lead to contradictory and inconsistent results." The Court stated "In our view, courts should analyze each situation in light of the factors set forth in the text, *infra*." at 536 n. 33.

[**63] Plaintiff's claims meet the Court's threshold requirement of being "encompassed by the Clayton Act."²² The thrust [**883] of plaintiff's complaint is that it was injured in its business and property by a conspiracy among the defendants to monopolize the business of providing dock services for iron ore and other goods moving over docks on the lower Great Lakes. Plaintiff contends that the alleged conspiracy was carried out through a series of anticompetitive activities: monopolizing ownership of docks on the lower Great Lakes used for the handling of iron ore; boycotting private docks; effectively tying the use of railroad-owned docks to the use of railroad lines; fixing and maintaining dock and railroad rates and charges; dividing markets; and raising spurious challenges to the legitimate business activities of competitors. Plaintiff's allegations meet section 4 of the Clayton Act's requirement that a plaintiff allege injury to its "business or property by reason of [something] forbidden in the antitrust laws."

[**64] Since plaintiff meets the threshold test, the court takes up the additional factors deemed pertinent to antitrust standing in *Associated*. Focusing first on the nature of plaintiff's alleged injury, the court notes that plaintiff is a direct competitor of defendants. As the Court stated in [*United States v. Topco Associates, Inc., 405 U.S. 596, 610, 31 L. Ed. 2d 515, 92 S. Ct. 1126 \(1972\)*](#):

Antitrust laws in general, and the Sherman Act in particular, are the Magna Carta of free enterprise . . . And the freedom guaranteed each and every business, no matter how small, is the freedom to compete -- to assert with vigor, imagination, devotion, and ingenuity whatever economic muscle it can muster.

Since Pinney Dock could not effectively compete with defendants unless it had access to railroad lines, a railroad conspiracy to boycott it could effectively stifle its ability to compete in the business of providing dock services for the Great Lakes iron ore trade. Thus, the injury alleged by plaintiff is the type for which the Sherman Act seeks to provide a remedy.

An additional factor under *Associated* "is the directness or indirectness of the asserted injury." [**65] [*Id. at 540*](#). In this case, the chain of causation between plaintiff's alleged injury and defendants' alleged antitrust violations is directly linked. According to the complaint, defendants sought to eliminate plaintiff as a competitor by boycotting it and charging it higher rates. Plaintiff was the direct target of defendants' alleged antitrust violations; defendants' alleged antitrust activities had as their ostensible purpose directly injuring plaintiff's ability to compete in the unloading of ex-lake iron ore.

In *Associated*, the Court expressed concern with allowing a party to proceed where its damage claims are "highly speculative." The Court noted its earlier ruling in [*Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 158 n. 11, 102 S. Ct. 2540 \(1982\)*](#) that:

HN19 [↑] Section 4 plainly focuses on tangible economic injury. It may therefore be appropriate to consider whether a claim rests at bottom on some abstract conception or speculative measure of harm.

In this case, the nature of the alleged economic injury suffered by plaintiff is the amount of business it lost as a result of defendants' alleged efforts to drive it out of the iron ore business. [**66] ²³ Although determining a precise dollar figure for the alleged injury could prove to be an arduous task, "difficulty of ascertainment [should not be]

²² In paragraph 1 of its complaint, plaintiff seeks redress for injuries to its business and property caused by defendants' alleged violations of [section 3](#) of the Clayton Act, [15 U.S.C. § 14](#). In pertinent part, that section reads:

It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies, or other commodities . . . or fix a price charged therefor, . . . where the effect . . . may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

On its face, [15 U.S.C. § 14](#) applies only to "commodities." Since plaintiff's suit deals with dock and railroad "services," the interests plaintiff seeks to protect are not encompassed by [15 U.S.C. § 14](#). Therefore, plaintiff does not have standing to raise [15 U.S.C. § 14](#) in this case. See [*Capital Temporaries of Hartford, Inc. v. Olsten Corp., 383 F. Supp. 902, 904, n. 8 \(D. Conn. 1974\)*](#).

²³ Defendant B&LE also moves for the dismissal of plaintiff's claims relating to coal and coke. The court reserves ruling on the issue in view of earlier discovery rulings, see transcript of December 4, 1980 hearing in this case.

confused with a right of recovery." *Bigelow v. RKO Radio Pictures*, 327 U.S. 251, 265, [*884] 90 L. Ed. 652, 66 S. Ct. 574 (1946). Thus, plaintiff's damage claims are sufficiently tangible and non-speculative to meet the Court's concern that antitrust damage allegations not be "highly speculative."

A fourth factor for consideration set forth in *Associated* is

the strong interest, identified in . . . prior cases, in keeping the scope of complex antitrust trials within judicially manageable limits. These cases have stressed the importance of avoiding either the risk of duplicate recoveries on the one hand, or the [**67] danger of complex apportionment of damages on the other.

Associated, supra, at 543-44. Since plaintiff was a direct competitor of defendants in providing dock services for ex-lake iron ore, plaintiff's claim that it was injured by a railroad boycott and conspiracy to eliminate it as a competitor does not create the "risk of duplicate recoveries . . . or the danger of complex apportionment of damages. . . ." To the extent that plaintiff can prove that its ability to compete with defendants was damaged by the alleged conspiracy, its injury will have been sufficiently discrete and individualized to permit it to recover antitrust damages. Thus, plaintiff's complaint satisfies the Court's requirement that "the scope of complex antitrust trials [be kept] within judicially manageable limits."

As seen, plaintiff's complaint satisfies each of the factors deemed pertinent to antitrust standing by the Court in *Associated*. Therefore, plaintiff has standing to seek treble damages pursuant to section 4 of the Clayton Act.

Defendant B&LE takes its standing argument a step further and argues that even if plaintiff has standing to raise claims relating to an alleged boycott of [**68] its dock, it does not have standing to seek damages based on its allegations that defendants conspired to restrain "the business of providing water carriage for iron ore . . . moving over docks on the lower Great Lakes, and . . . the business of building ships for such carriage." Defendant B&LE further contends that plaintiff cannot show "cognizable injury in fact as a result of the alleged agreement to assess the same dock handling charges for bulkers and self-unloaders."²⁴

[**69] Defendant B & LE errs in seeking to have this court treat the alleged anticompetitive activities as a series of separate and unrelated events. Plaintiff claims that it was injured by a multi-pronged conspiracy partially aimed at eliminating the competition of private docks in the handling of iron ore. As the Supreme Court stated in *Continental Co. v. Union Carbide*, 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962):

In [conspiracy] cases such as this, plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each. "The character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." *United States v. Patten*, 226 U.S. 525, 544, 57 L. Ed. 333, 33 S. Ct. 141 . . .

The alleged conspiracy to maintain dock handling charges in order to discourage the development and use of self-unloaders relates directly to plaintiff's claim that defendants sought to eliminate its competition in the dock handling of ex-lake iron ore. Thus, plaintiff must be afforded the [*885] [**70] opportunity to prove its theory that defendants sought to buttress their alleged conspiratorial scheme to thwart the development and use of iron ore self-unloaders on the Great Lakes by seeking to eliminate private dock competition.

Defendant B&LE additionally asserts that Pinney Dock lacks standing to pursue its paragraph 12 allegation that defendants conspired to eliminate competition in and monopolize "the business of providing land transportation for

²⁴In a supplemental letter to this court, defendant B&LE reiterates its argument that "plaintiff lacks standing to complain of defendants' iron ore dock handling charges. . . ." Defendant B&LE argues that under *Associated General Contractors v. Carpenters, supra*, plaintiff could not have been directly injured by the alleged conspiracy to fix dock handling charges. Defendant B&LE states:

Steel company shippers are the parties which incur -- and are directly affected by -- iron ore dock handling charges . . . Indeed, the alleged maintenance of handling charges . . . would necessarily aid Pinney as competitor of defendants.

iron ore and other goods moving over [docks on the lower Great Lakes]." The court agrees that plaintiff is not a proper party to raise such allegations. The alleged conspiracy to monopolize the land transportation of iron ore presents legal and factual issues wholly distinct from those generated by the alleged conspiracy to monopolize dock services. But as previously stated, plaintiff is entitled to prove that a group boycott of its dock effectively precluded it from competing with defendants. In so doing, plaintiff may offer evidence showing that alternate methods of iron ore transportation from Pinney Dock were either infeasible or unacceptable to Pinney's potential customers. Moreover, plaintiff may also attempt to prove its allegation [**71] that defendants conspiratorially harassed it in its attempts to truck iron ore from its dock, subject to the limitations imposed by *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961). Additional questions relating to the scope of evidence plaintiff may offer in support of its case can be more appropriately handled at pretrial or trial.

V.

Since the court has ruled against defendants' motion to dismiss on each of the grounds raised, the court must address defendants' argument that this "case should be referred to the Interstate Commerce Commission in deference to that agency's primary jurisdiction." Defendants argue that the ICC should be afforded an opportunity to reach determinations as to the scope of the railroads' express immunity under section 5a and the validity of plaintiff's rate claims.

HN20 [Footnote] The doctrine of primary jurisdiction, as presented by the Supreme Court in *United States v. Western Pacific R. Co.*, 352 U.S. 59, 64, 1 L. Ed. 2d 126, 77 S. Ct. 161 (1959),

applies where a claim is originally cognizable in the courts, and comes into play whenever enforcement of the claim requires the resolution [**72] of issues which, under a regulatory scheme, have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views.

The Court described the test to be applied in deciding whether the doctrine should be invoked:

No fixed formula exists for applying the doctrine of primary jurisdiction. In every case the question is whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation.

Id. The court then emphasized the purpose and importance of the doctrine:

Uniformity and consistency in the regulation of business entrusted to a particular agency are secured, and the limited functions of review by the judiciary are more rationally exercised, by preliminary resort for ascertaining and interpreting the circumstances underlying legal issues to agencies that are better equipped than courts by specialization, by insight gained through experience, and by more flexible procedure.

Id. at 65, quoting *Far East Conference v. United States*, 342 U.S. 570, at 574-575, 96 L. Ed. 576, 72 S. Ct. 492 (1952).

Applying the Court's language, the relevant question in this case is whether considerations of uniformity in regulation and technical expertise mandate that the ICC be given an opportunity to pass on the [*886] questions before this court. See also *Nader v. Allegheny Airlines*, 426 U.S. 290, 304, 48 L. Ed. 2d 643, 96 S. Ct. 1978 (1976).

Taking up first the question of uniformity and consistency in the regulation of the railroad industry, this court repeats its earlier conclusion that defendants are subject to the antitrust laws unless they acted within the narrow protective scope of the section 5a Eastern Railroads Agreement. Since the alleged conspiracy to eliminate plaintiff as a competitor in order to monopolize the business of providing ex-lake iron ore dock services is not and can not be

immunized by the ICC approved Eastern Railroad Agreement, any determination by the ICC as to the scope of defendants' antitrust immunity under their section 5a agreement is unnecessary.²⁵

[**74] Nor does this court find that the ICC's technical expertise in the area of railroad ratemaking is needed to properly adjudicate plaintiff's antitrust claims. As has been previously stated, plaintiff's claims amount to more than a "rate discrimination case."²⁶ The issue before this court is not whether the defendants' rates for hauling ex-lake iron ore were reasonable. The issue is whether defendants violated sections 1 and/or 2 of the Sherman Act by conspiring to eliminate Pinney Dock as a competitor and by seeking to monopolize the business of providing dock services for the handling of ex-lake iron ore. The antitrust issues must be decided on the merits in a district court. Since the ICC has neither the jurisdiction nor the unique expertise to decide the antitrust issues before this court, reference to the Commission is deemed unnecessary and inexpedient. Therefore, defendants' motion to refer this case to the ICC is overruled.

[**75] VI.

Treating the several motions as [Rule 56](#) summary judgment motions, it is concluded that there are genuine issues of material fact as to the issues raised in these motions. On the basis of the grounds raised in these motions, defendants are not entitled to judgment as a matter of law.

It Is So Ordered.

End of Document

²⁵ Defendants argue that the court should refer this case to the ICC under [United States Navigation Co. v. Cunard Steamship Co., 284 U.S. 474, 76 L. Ed. 408, 52 S. Ct. 247 \(1932\)](#), and [Far East Conference v. United States, 342 U.S. 570, 96 L. Ed. 576, 72 S. Ct. 492 \(1952\)](#). As the Court made plain in [Carnation Co. v. Pacific Conference, 383 U.S. 213, 220, 15 L. Ed. 2d 709, 86 S. Ct. 781 \(1966\)](#):

Those cases merely hold that courts must refrain from imposing antitrust sanctions for activities of debatable legality under the Shipping Act in order to avoid the possibility of conflict between the courts and the Commission.

Since the conspiracy alleged in this case will, if proven, not be debatably legal under the Interstate Commerce Act, there is no possibility of conflict between the court and the Commission.

²⁶ Defendants argue that plaintiff is precluded from seeking relief under the antitrust laws because it could have sought relief for any unfair rates from the ICC. However, "the rights which [plaintiff] claims under the antitrust laws are entirely collateral to those which [plaintiff] might have sought under the [Interstate Commerce Act]." [Carnation Co. v. Pacific Conference, 383 U.S. 213, 224, 15 L. Ed. 2d 709, 86 S. Ct. 781 \(1966\)](#). Plaintiff's alleged failure to pursue any potential ICC remedies does not prevent it from seeking antitrust damages based on a conspiracy to eliminate it as a competitor.

Mergers & Acquisitions Law > Merger Guidelines

[**HN2**](#) [down] Railroads & Rail Transportation, Consolidation & Merger

In making the "public interest" determination for a proposed merger of two "class I" railroads, the Interstate Commerce Commission must consider five specific (but not exclusive) factors: (A) the effect of the proposed transaction on the adequacy of transportation to the public; (B) the effect on the public interest of including, or failing to include, other rail carriers in the area involved in the proposed transaction; (C) the total fixed charges that result from the proposed transaction; (D) the interest of carrier employees affected by the proposed transaction; (E) whether the proposed transaction would have an adverse effect on competition among rail carriers in the affected region. 49 U.S.C.S. §11,344(b)(1).

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > US Interstate Commerce Commission

HN7[Railroads & Rail Transportation, Consolidation & Merger

In weighing potential harm to the public, the Interstate Commerce Commission considers two principal factors -- the degree of reduction of competition from a merger and the harm, if any, to essential services. In determining whether competition will be significantly reduced, the Interstate Commerce Commission considers both "intramodal" competition among rail carriers and "intermodal" competition with trucks, barges, pipelines, and ships. [49 C.F.R. §1180.1\(c\)\(2\)\(i\) \(1982\)](#).

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > US Interstate Commerce Commission

HN8[Regulated Industries, Transportation

The Interstate Commerce Commission defines rail service as essential if there is a sufficient public need for the service and adequate alternative transportation is not available. [49 C.F.R. §1180.1\(c\)\(2\)\(ii\) \(1982\)](#). The Interstate Commerce Commission does not take into account potential harm to individual competitors (except insofar as harm to competitors significantly reduces competition) because it is concerned only with rail service to the public, not the survival of particular carriers. [49 C.F.R. §1180.1\(c\)\(2\)\(ii\) \(1982\)](#).

Mergers & Acquisitions Law > Merger Guidelines

HN9 [blue icon] **Regulated Industries, Transportation**

The Interstate Commerce Commission believes that protective conditions are generally not in the public interest because they may lessen the benefits of a consolidation to both the carrier and the public. [49 C.F.R. §1180.1\(d\)\(1\) \(1982\)](#). It recognizes that competition creates an incentive to provide efficient service and therefore will impose conditions when needed to ameliorate potential anticompetitive effects of a consolidation. But it will not normally impose conditions on a merger to protect a carrier unless the conditions are needed to preserve essential services and will neither impose unreasonable costs on the consolidated carrier nor frustrate the ability of the consolidated carrier to obtain the anticipated public benefits.

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

HN10 [blue icon] **Regulated Industries, Transportation**

711 F.2d 295, *295 U.S. App. LEXIS 26338, **1

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > US Interstate Commerce Commission

Administrative Law > Judicial Review > Standards of Review > General Overview

HN12 [blue icon] **Standards of Review, Deference to Agency Statutory Interpretation**

The standard of review for the Interstate Commerce Commission's decision is well established. The Interstate Commerce Commission's interpretation of its governing statute, like that of any regulatory agency, is entitled to deference. A reviewing court must accept the Interstate Commerce Commission's interpretation if it is sufficiently reasonable, even if it is not the only reasonable one or even the reading the court would have reached on its own.

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > US Interstate Commerce Commission

Administrative Law > Judicial Review > Standards of Review > General Overview

HN13 [blue icon] **Standards of Review, Substantial Evidence**

The Interstate Commerce Commission's substantive conclusions are subject to review under the "substantial evidence" test of the Administrative Procedure Act, [5 U.S.C.S. § 706\(2\)\(E\)](#). Under that test, the Interstate Commerce Commission's factual findings must be supported by enough evidence to justify a refusal to direct a verdict the other way in a case tried to a jury. When the facts are uncertain, the agency will so state and go on to identify the considerations it found persuasive. Moreover, the Interstate Commerce Commission must consider the relevant factors and articulate a rational connection between the facts found and the choice made.

Administrative Law > Judicial Review > Standards of Review > General Overview

HN14 [blue icon] **Judicial Review, Standards of Review**

A court can insist that the agency's reasons and policy choices do not deviate from or ignore the ascertainable legislative intent. Beyond that, however, it is not for the court to strike down conclusions that are reasonably drawn from the evidence and findings in the case.

Business & Corporate Compliance > ... > Transportation Law > Rail Transportation > Consolidation & Merger

Mergers & Acquisitions Law > Merger Guidelines

HN15 [blue icon] **Railroads & Rail Transportation, Consolidation & Merger**

There are two potential results from consolidations which would ill serve the public -- reduction of competition and harm to essential services. [49 C.F.R. § 1180.1\(c\) \(2\) \(1982\)](#).

Opinion by: WALD

Opinion

[*300] WALD, Circuit Judge:

We review here a decision of the Interstate Commerce Commission (ICC or Commission) approving unconditionally the merger of the Maine Central Railroad with the Boston & Maine Railroad. *Guilford Transportation Industries -- Control -- Boston & Maine Corp., 366 I.C.C. 292 (1982)* [hereinafter cited as *Boston & Maine Merger*].¹ Petitioners, competitors of the Boston & Maine, asked the ICC to protect them from competitive harm due to the merger by imposing various conditions on the merged entity (including sale of track, trackage rights, and preservation of swift traffic interchanges). The ICC declined to impose any protective conditions, finding that none of the petitioners had shown that [*3] the conditions it requested were needed to prevent the loss of "essential services."

Petitioners appeal to this court, claiming that the ICC's "essential services" test for imposing protective conditions is too strict and does not comply with the statutory directive that the ICC consider the effect of the merger on "adequacy of transportation to the public." 49 U.S.C. § 11,344(b)(1). Petitioners also argue that some of the ICC's findings are not supported by substantial evidence and that the ICC committed [*4] a variety of procedural errors. We reject the procedural challenges as either without merit or not constituting prejudicial error. We conclude, however, that the ICC's essential services test, as applied to petitioner Lamoille Valley Railroad, does not comport with the statute. We also find flaws in the agency's reasoning with regard to protective conditions requested by petitioner Canadian National Railway. We therefore affirm in part, reverse in part, and remand to the ICC to determine whether protective conditions are needed to protect the public's right to adequate transportation.

I. STATUTORY AND FACTUAL BACKGROUND

A. The Statutory Scheme

1. Specific Provisions Governing Railroad Mergers

HN1 [↑] The Interstate Commerce Act, 49 U.S.C. § 11,343(a), requires the ICC to review all railroad mergers.² [*6] The ICC must approve any merger that is "consistent with the public interest," but can impose conditions on the merger when needed to advance the public interest:

* Sitting by designation pursuant to 28 U.S.C. § 294(d).

¹ The ICC shortly thereafter approved unconditionally the merger of the combined Boston & Maine/Maine Central with the Delaware & Hudson Railroad. *Guilford Transp. Indus. -- Control -- Delaware & Hudson Ry., 366 I.C.C. 396 (1982)* [hereinafter cited as *Delaware & Hudson Merger*]. We review the ICC's decision concerning the Delaware & Hudson in a companion case to this one, also issued today. *Central Vt. Ry. v. ICC, 711 F.2d 331 (D.C. Cir. 1983)*.

² 49 U.S.C. § 11,343(a) provides, in pertinent part:

HN3 [↑] The following transactions . . . may be carried out only with the approval and authorization of the Commission:

(1) consolidation or merger . . . of at least 2 carriers into one corporation. . . .

. . .

(3) acquisition of control of a carrier by any number of carriers.

(4) acquisition of control of at least 2 carriers by a person that is not a carrier.

(5) acquisition of control of a carrier by a person that is not a carrier but that controls any number of carriers.

The Commission shall approve and authorize a [merger] when it finds the transaction **[**5]** is consistent with the public interest. The Commission may impose conditions governing the transaction.

[*301] *Id.* § 11,344(c).³ **[**7]** [**HN2**](#) In making the "public interest" determination for a proposed merger of two "class I" railroads,⁴ the ICC must consider five specific (but not exclusive) factors:

- (A) the effect of the proposed transaction on the adequacy of transportation to the public.
- (B) the effect on the public interest of including, or failing to include, other rail carriers in the area involved in the proposed transaction.
- (C) the total fixed charges that result from the proposed transaction.
- (D) the interest of carrier employees affected by the proposed transaction.
- (E) whether the proposed transaction would have an adverse effect on competition among rail carriers in the affected region.

Id. § 11,344(b)(1).

2. Congressional Policy on Railroad Mergers

[**HN5**](#) These statutory provisions must be interpreted in light of the longstanding congressional policy favoring railroad mergers that increase efficiency and quality of service. Since 1920, the ICC has operated under "the congressional policy of encouraging consolidation of the Nation's railroads." [Penn-Central Merger & N&W Inclusion Cases, 389 U.S. 486, 492, 19 L. Ed. 2d 723, 88 S. Ct. 602 \(1968\)](#). The Railroad Revitalization and Regulatory Reform Act of 1976 ("4R Act"), Pub. L. No. 94-210, 90 Stat. 31 (current version in scattered sections of 45, 49 U.S.C.), reinforces that policy.

The 4R Act did not alter the substantive **[**8]** "public interest" standard for ICC approval of railroad mergers, but did provide new, expedited procedures for ICC review of merger proposals as an alternative to the existing procedures.

⁵ It also declared Congress' purposes to include:

- the encouragement of efforts to restructure the [rail] system on a more economically justified basis, including . . .
- . an expedited procedure for determining whether merger and consolidation applications are in the public interest.

Id. [§ 101\(a\)\(2\), 45 U.S.C. § 801\(a\)\(2\)](#).

The Senate committee report explained that the new procedures were needed because "the cumbersome, slow process of . . . processing merger proposals . . . has drastically slowed change needed in the industry." S. Rep. No. 499, 94th Cong., 1st Sess. 2-3 (1975), *reprinted* **[**9]** in 1976 U.S. Code Cong. & Ad. News 14, 16. The

We use the term "merger" as shorthand for the achievement of common control in any of these ways.

³ The sentence in § 11,344(c) referring to conditions does not explicitly refer to the "public interest." Nevertheless, the context strongly suggests, and the legislative history establishes beyond cavil, Congress' intent that the Commission apply the same "public interest" test both to the basic merger and to any conditions it imposes on the merger. Prior to 1978, the Act directed the ICC to approve a merger if the Commission "finds that, subject to such terms and conditions and such modifications as it shall find to be *just and reasonable*, the proposed transaction is . . . consistent with the public interest." 49 U.S.C. § 5(2)(b) (1976) (emphasis added). The Interstate Commerce Act was recodified to its current form in 1978 "without substantive change." 49 U.S.C. note preceding § 10, [101](#). The revisers deleted the words "just and reasonable" as redundant "in view of the words 'the transaction is consistent with the public interest.'" 49 U.S.C. § 11,344 revision note.

We therefore reject the suggestions by Guilford and the ICC that the Commission has broader discretion in imposing conditions on a merger than in approving or rejecting the merger as a whole.

⁴ [**HN4**](#) The ICC defines "class I" railroads as those railroads with annual operating revenues of \$ 50 million or more. 49 C.F.R. § 1240.1(a) (1982). Under that definition, both the Maine Central and the Boston & Maine are class I railroads.

⁵ See 4R Act, §§ 402 (amending existing law), 403 (providing new, alternative procedures), 90 Stat. 31, 62-66 (1976) (current version at 49 U.S.C. §§ 11,345, 11,346).

committee expected the new procedures to "encourage mergers, consolidations and joint use of facilities that tend to rationalize and improve the Nation's rail system." *Id.* at 20, 1976 U.S. Code Cong. & Ad. News at 34. Similarly, the House expected that the new procedures would permit railroads "to voluntarily rationalize the system in a short period of [*302] time." H.R. Rep. No. 725, 94th Cong., 1st Sess. 63 (1975).⁶

The Staggers Rail Act of 1980, [**10] Pub. L. No. 96-448, 94 Stat. 1895 (amending 49 U.S.C. §§ 10,101-11,917), also shows Congress' endorsement of mergers that enhance railroad efficiency. The Staggers Act did not change the Interstate Commerce Act provisions governing mergers of two or more class I railroads. However, it substantially deregulated the railroad industry in a variety of ways (notably rate-setting practices) and established "the policy of the United States Government . . . to minimize the need for Federal regulatory control over the rail transportation system" and "to foster sound economic conditions in transportation." 49 U.S.C. § 10,101a(2), (5).

B. ICC Railroad Merger Policy

In response to the congressional directives in the 4R Act and the Staggers Rail Act, the ICC has established policy guidelines which favor railroad mergers that improve efficiency and disfavor imposing conditions on a merger that might reduce potential efficiency gains. [49 C.F.R. § 1180.1 \(1982\)](#); see [Railroad Consolidation Procedures, 363 I.C.C. 200 \(1981\)](#) (statement of basis and purpose).⁷ In general, the Commission "encourages . . . rationalization of the [*11] nation's rail facilities and reduction of its excess capacity." [49 C.F.R. § 1180.1\(a\) \(1982\)](#). [HN6](#)[↑] In deciding whether a merger is in the public interest, the Commission "performs a balancing test," weighing "the potential benefits to applicants and the public against the potential harm to the public." *Id.* [§ 1180.1\(c\)](#).

[HN7](#)[↑] In weighing potential harm to the public, the ICC considers two principal factors -- the degree of reduction of competition from a merger and the harm, if any, to "essential services." In determining whether competition will be significantly reduced, the Commission considers both "intramodal" competition among rail [**12] carriers and "intermodal" competition with trucks, barges, pipelines, and ships. *Id.* [§ 1180.1\(c\)\(2\)\(i\)](#). [HN8](#)[↑] The ICC defines rail service as "essential" if "there is a sufficient public need for the service and adequate alternative transportation is not available." *Id.* [§ 1180.1\(c\)\(2\)\(ii\)](#). The Commission does not take into account potential harm to individual competitors (except insofar as harm to competitors significantly reduces competition) because it is concerned only with rail service to the public, "not the survival of particular carriers." *Id.* [§ 1180.1\(c\)\(2\)\(ii\)](#).

[HN9](#)[↑] The ICC believes that protective conditions are generally not in the public interest because they "may lessen the benefits of a consolidation to both the carrier and the public." *Id.* [§ 1180.1\(d\)\(1\)](#). It recognizes that competition creates an incentive to provide efficient service and therefore will impose conditions when needed to "ameliorat[e] potential anticompetitive effects of a consolidation." But it "will not [*13] normally impose conditions" on a merger "to protect a carrier" unless the conditions are needed to preserve "essential services" and will neither impose "unreasonable" costs on the consolidated carrier nor "frustrate the ability of the consolidated carrier to obtain the anticipated public benefits." *Id.* [§ 1180.1\(c\)\(2\)\(ii\)](#).

⁶ See also H.R. 10,979, 94th Cong., 1st Sess. [§ 101\(3\)-\(4\)](#), reprinted in H.R. Rep. No. 725, 94th Cong., 1st Sess. 3 (1975):

The Congress finds and declares that --

...

(3) a clear need exists to eliminate duplication, inefficiency, and deterioration of the rail plant and equipment of the Nation's railroads;

(4) procedures . . . with respect to . . . mergers and consolidation . . . have become obsolete and have often been an obstacle to the improvement of rail efficiency. . . .

⁷ At the time the ICC issued its decision in this case, these guidelines were codified at [49 C.F.R. § 1111.10 \(1981\)](#). For convenience, we cite to the current codification in [49 C.F.R. § 1180.1](#).

⁸ [49 C.F.R. § 1180.1\(d\)\(1\) \(1982\)](#) provides:

[14] [*303] C. The Railroads Involved in this Case**

Guilford Transportation Industries (Guilford) is a holding company that is 100% owned by Timothy Mellon. Guilford owns the Maine Central Railroad, a profitable railroad with a near-monopoly over rail service to the Maine paper and forest products industries.

The bulk of the traffic carried by the Maine Central originates in Maine and travels west (to Montreal, Buffalo, Chicago, etc.) or south (to Boston, New York, and the mid-Atlantic states); there are also significant shipments of grain from the Midwest to the Maine poultry industry. Rail traffic that originates on the Maine Central can move *south* over the Boston & Maine Railroad. Traffic from the Maine Central can move *west* over four routes: over the Canadian National Railway to Montreal and points west; over the Canadian Pacific Railroad to Montreal and points west; over the Lamoille Valley Railroad to the Canadian National to Montreal and points west; and over the Boston & Maine to Albany and from there via Conrail or the Delaware & Hudson Railroad to Buffalo and points west.

The Canadian National and the Canadian Pacific are large and profitable transcontinental **[**15]** railroads. The Lamoille Valley operates a single 98-mile east-west line between Swanton, Vt. (its western gateway, connecting to the Canadian National) and St. Johnsbury, Vt. (its eastern gateway, connecting to the Maine Central). Only a small volume of traffic originates or terminates on Lamoille Valley's line. Thus, it depends on "overhead" traffic (carried from the Maine Central over the Lamoille Valley to the Canadian National or vice-versa) for financial viability. Even with its current level of overhead traffic, the Lamoille Valley has been only marginally profitable, and then only because the State of Vermont spent some \$ 16 million during the 1970's in upgrading Lamoille Valley's track and equipment.

The Boston & Maine operates east-west and north-south rail lines in Vermont, New Hampshire, Massachusetts, Connecticut, and New York. It is bankrupt and has been in reorganization since 1970. The Boston & Maine has lost money for the last 25 years; its revenue insufficient to support its extensive network of rail lines.⁹

[16]** The Providence & Worcester is a small, profitable railroad serving Rhode Island and Connecticut. It connects primarily with the Boston & Maine and the Canadian National in the north and Conrail in the west.

D. Proceedings Below

On October 28, 1981, Guilford applied to the ICC for permission to acquire the Boston & Maine. Its plan to make the Boston & Maine profitable depended on three major elements: federal subsidy (in the form of low-interest loans); operating cost savings from merging the Boston & Maine with the Maine Central; and increased revenue from diverting to the Boston & Maine some of the east-west traffic that now travels over the Canadian National, the Canadian Pacific, or the Lamoille Valley.

1. Conditions Requested by the Boston & Maine's Competitors

HN10 The Commission has broad authority to impose conditions on consolidations, including those that might be useful in ameliorating potential anticompetitive effects of a consolidation. However, the Commission recognizes that conditions may lessen the benefits of a consolidation to both the carrier and the public. Therefore, the Commission will not normally impose conditions on a consolidation to protect a carrier unless essential services are affected and the condition: (i) is shown to be related to the impact of the consolidation; (ii) is designed to enable shippers to receive adequate service; (iii) would not pose unreasonable operating or other problems for the consolidated carrier; and (iv) would not frustrate the ability of the consolidated carrier to obtain the anticipated public benefits. Moreover, the Commission believes that indemnification is ordinarily not an appropriate remedy in consolidation proceedings. Indemnification conditions can be anticompetitive by requiring the consolidated carrier to subsidize carriers who are no longer able to compete efficiently in the marketplace.

⁹ See *In re Boston & Maine Corp.*, 46 Bankr. 930, mem op. at 2 (D. Mass. 1983), *appeal filed*, No. 83-1086 (1st Cir. Feb. 3, 1983).

Petitioner Lamoille Valley did not oppose the basic merger. Lamoille Valley claimed, however, that diversion of east-west traffic from it to the Boston & Maine would cause [*304] it to go bankrupt. Lamoille Valley therefore sought to obtain a substitute source of revenue by purchasing part of a Boston & Maine line that would carry some of the diverted traffic.

Petitioner Canadian National¹⁰ [**17] also did not oppose the overall merger. It was concerned, however, that Guilford might seek to increase traffic diversion from the Maine Central/Canadian National east-west route to the Maine Central/Boston & Maine route by delaying the interchange of traffic between the Maine Central and the Canadian National. This would reduce the time advantage of the Maine Central/Canadian National route over the Maine Central/Boston & Maine route. Canadian National therefore asked the ICC to require Guilford to maintain current interchange service at Danville and Yarmouth Junctions, Maine.¹¹

[**18] Petitioner Providence & Worcester is not a direct competitor of the Boston & Maine but rather carries north-south traffic that originates on the Boston & Maine to Connecticut and Rhode Island. Providence & Worcester opposed the merger on the grounds that the merged railroad would not be financially viable and would be unable to maintain current service over those Boston & Maine lines that connect with the Providence & Worcester.

2. The ICC's Decision

The ICC approved the merger and denied all requests for protective conditions. It found that the "quintessential public benefit" from the merger was "the emergence of the [Boston & Maine] from reorganization as part of a potentially strong unified rail network." *Boston & Maine Merger*, 366 I.C.C. at 336. The Commission also found that "the primary competitive impacts of the [merger] are favorable." *Id.* at 340. There would be no direct reduction of competition because the Boston & Maine and the Maine Central "meet end-to-end" and "do not operate any parallel lines." *Id.* at 341. In addition, the combined Maine Central/Boston & Maine would be a stronger competitor against [**19] "the Canadian lines and Conrail." *Id.*

The ICC further found that the merger would not lead to cessation of essential services. The Commission rejected Canadian National's request for protective conditions on traffic interchanges at Danville and Yarmouth Junctions for several reasons. In particular, it was not convinced that Guilford intended to delay interchanges. Also, Canadian National's "ratemaking flexibility" gave it "sufficient competitive leverage to adequately combat any possible diversions of traffic." *Id.* at 352.

As for Lamoille Valley's request to buy track from the Boston & Maine, the ICC agreed that the diversion of much of Lamoille Valley's overhead traffic to the Boston & Maine would be a "devastating" financial blow to Lamoille Valley. *Id.* at 353. Nevertheless, it rejected Lamoille Valley's request because Lamoille Valley's service was not "essential" -- shippers could use truck transportation instead. While truck transportation was more expensive than rail transportation, it was not so expensive that shippers would be "forced out of business." *Id.*

E. Issues Presented

Lamoille Valley, supported by intervenors [**20] Eastern Magnesia Talc Co. (a shipper that uses the Lamotte Valley) and State of Vermont, claims that the ICC's test for whether a rail line provides "essential services" -- will shippers go out of business if the line shuts down -- is too strict and does not comport with the statutory directive that the ICC consider "adequacy of transportation to the public." 49 U.S.C. § 11,344(b)(1)(A). Lamotte Valley also claims that the Commission [*305] erred in not requiring Timothy Mellon, the sole owner of Guilford, to join the merger application and in failing to consider the interests of Lamotte Valley employees who may lose their jobs as a result of the merger.

¹⁰ Canadian National's co-petitioners -- Central Vermont Railway, Grand Trunk Western Railroad, and Detroit, Toledo & Ironton Railroad -- are wholly-owned subsidiaries of Canadian National. We use the name "Canadian National" to refer to any and all of these railroads.

¹¹ Canadian Pacific, the other principal competitor of the Boston & Maine, also sought protective conditions before the ICC and petitioned this court for review, but later made its separate peace with Guilford and withdrew its petition for review.

Canadian National joins Lamoille Valley in arguing that the ICC's essential services test is too strict. It also charges that the Commission misanalyzed both Guilford's incentive to delay interchanges at Danville and Yarmouth Junctions and the effect of such an action on Canadian National's willingness to remain in competition with the Boston & Maine. Finally, Canadian National argues that the expedited procedural schedule used by the ICC in considering the merger was a "rule" within the meaning of [**21] the Administrative Procedure Act (APA), [5 U.S.C. §§ 551\(4\), 553](#), and was improperly issued without notice and comment.

Providence & Worcester joins Lamoille Valley in objecting to the ICC's failure to require Timothy Mellon to join the control application. In addition, it objects to the Commission's finding that the Boston & Maine would be financially viable after the merger. Finally, Providence & Worcester raises several procedural objections: the ICC improperly failed to exercise jurisdiction over Guilford's issuance of securities to Timothy Mellon in connection with the merger; the ICC erred in approving Guilford's acquisition of the Vermont & Massachusetts Co. (which owns a single 56-mile long rail line leased by the Boston & Maine under a 999-year lease) without requiring a formal control application; and the ICC allowed Guilford prematurely to control the Boston & Maine.¹²

[**22] Intervenors Guilford and Trustees of the Boston & Maine support the ICC's decision.

In part II of this opinion, we defer, under principles of equitable abstention, to the reorganization court's finding that the merged Boston & Maine will be financially viable, and conclude that the ICC properly approved the merger as a whole. In part III, we find that the ICC's "essential services" test for determining when protective conditions may be needed, *on its face*, complies with the statute. Nevertheless, we find that the test, *as applied* to Lamoille Valley, is too strict. In part IV, we find that the ICC failed adequately to explain why Guilford would not downgrade service at Danville and Yarmouth Junctions and that the Commission placed undue weight on Canadian National's system-wide revenues in assessing Canadian National's willingness to provide service to Maine. In part V, we conclude that the ICC properly declined to take into account the interests of Lamoille Valley's employees in continued employment.

Part VI deals with the procedural issues. We conclude that the ICC's failure to require Timothy Mellon to join the merger application, if error, is not prejudicial in this [**23] case. We further conclude that the expedited procedural schedule used by the ICC is exempt from the APA's notice and comment requirements as a "rule[] of agency . . . procedure," [5 U.S.C. § 553\(b\)\(A\)](#), and that Providence & Worcester's various procedural objections are without merit. Part VII is a conclusion.

II. THE FINANCIAL VIABILITY OF THE BOSTON & MAINE

HN11 [+] The ICC has a statutory responsibility to decide both whether the merger of the Maine Central with the Boston & Maine is [*306] "consistent with the public interest" under the Interstate Commerce Act, 49 U.S.C. § 11,344(c), and whether the reorganization of the Boston & Maine is "compatible with the public interest" under Bankruptcy Act § 77(d), 11 U.S.C. § 205(d) (1976) (current version at [11 U.S.C. § 1172](#)). As part of its "public interest" determination under the Bankruptcy Act, the Commission found that the merged Boston & Maine would be financially viable. *Boston & Maine Merger*, 366 I.C.C. at 310-13. Finding [**24] that the other requirements of Bankruptcy Act § 77 were also satisfied, the Commission certified the reorganization plan to the reorganization court. *Id.* at 318. The reorganization court agreed that the merged Boston & Maine would be viable and approved

¹² The Boston & Maine Trustees argue that Providence & Worcester's alleged injury from the merger -- downgrading of the Boston & Maine's service connecting with the Providence & Worcester -- is too speculative to satisfy the "injury in fact" requirement for standing. See [Control Data Corp. v. Baldridge](#), 210 U.S. App. D.C. 170, 655 F.2d 283, 288-89 (D.D. Cir. 1981), cert. denied, 454 U.S. 881, 70 L. Ed. 2d 190, 102 S. Ct. 363 (1981) (3-part test for standing under the APA). We agree that the asserted injury is less than certain to occur. We note, however, that the ICC must have thought Providence & Worcester's objections were substantial enough to warrant addressing them on the merits. We shall do likewise. We defer to the ICC's expert judgment that there was a real possibility of harm to Providence & Worcester from an unconditioned merger. (An agency's assessment that the probability of injury from the agency's action is too low to confer standing would present a different case that we need not address here.)

the plan. *In re Boston & Maine Corp.*, 46 Bankr. 930, mem. op. at 33-42 (D. Mass. opinion issued Feb. 23, 1983), appeal filed, No. 83-1086 (1st Cir. Feb. 3, 1983).

In considering whether the merger was "consistent with the public interest" under Interstate Commerce Act § 11,344(c), the ICC saw "no need to repeat" its analysis of the viability of the reorganization plan. Relying on that analysis, the Commission again found that the merged Boston & Maine would be financially viable. *Boston & Maine Merger*, 366 I.C.C. at 339.

Providence & Worcester claims that the ICC wrongly decided that the reorganized and merged Boston & Maine would be financially viable.¹³ The ICC and the Boston & Maine Trustees respond that we lack jurisdiction to review the Commission's finding of viability because review of that finding lies exclusively in the reorganization court.¹⁴ We agree with [**25] this response, though we would characterize the issue as one of equitable abstention rather than lack of jurisdiction.

The *New Haven Inclusion Cases*, 399 U.S. 392, 419-30, 26 L. Ed. 2d 691, 90 S. Ct. 2054 (1970), involved a situation similar to this one. The ICC had approved the merger of the bankrupt New Haven Railroad with the Penn Central Railroad. The parties appealed the Commission's valuation of the New Haven's assets both to a three-judge district court with jurisdiction to review the ICC's approval of the merger and to the reorganization court charged with reviewing the New Haven's reorganization plan. The two courts reached conflicting valuations. The Supreme Court held that the three-judge district court, although it had jurisdiction "in a technical sense," *id. at 427*, should have "stayed its hand" and [**26] permitted the reorganization court to decide the valuation question, *id. at 428*.

We think abstention is likewise called for here. To be sure, in the *New Haven Inclusion Cases*, valuation was the sole issue still to be decided, so that the two courts were considering "identical issues." *Id. at 428*. Here, in contrast, we must decide numerous issues under the Interstate Commerce Act that were not and could not have been presented to the reorganization court. But the policy considerations that led the Court to order abstention in the *New Haven Inclusion Cases* also counsel abstention here.

First, the standard for determining financial viability is the same under the Bankruptcy Act and the Interstate Commerce Act. Thus, there is "no danger that application of [Bankruptcy Act § 77] would yield results different from those to be produced by [Interstate Commerce Act § 11,344(c)]." *Id. at 424*. Second, for this court to decide an issue that the reorganization court must also decide "would tend greatly to foment conflicts between coordinate courts and compel creditors, in the protection of their interests, to ride the circuit, [**27] demonstrating the basis of their positions in successive courts." *Id. at 427* (quoting *In re New York, N.H. & H.R. Co.*, 26 F. Supp. 18, 23 (D. Conn.), aff'd sub nom. *Palmer v. Warren*, 108 F.2d 164 (2d Cir. 1939), aff'd, 310 U.S. 132, 84 L. Ed. 1118, 60 S. Ct. 865 (1940)).

[*307] Third, Providence & Worcester has already had a full opportunity to present its arguments to the reorganization court, which rejected them. Thus, it cannot complain of unfairness because we do not give it a second bite at the apple. Cf. *id. 399 U.S. at 428 n.57* ("At no time has anyone questioned Penn Central's status as a party litigant in the reorganization court or challenged its right to make a full presentation of its case there. . . .").¹⁵

[**28] Finally, the major policy reason counseling against abstention -- "the importance of an expedited determination of the merits," *id. at 424* -- is not a factor in this case since the reorganization court has already issued its decision.

¹³ Providence & Worcester Brief at 42-47; Providence & Worcester Reply Brief at 19-24.

¹⁴ ICC Brief at 87 & n.59; Boston & Maine Trustees Brief at 37-40.

¹⁵ The reorganization court found that Providence & Worcester lacked standing to object to the plan of reorganization. *In re Boston & Maine Corp.*, *supra* note 9, mem. op. at 34. Nevertheless, the court went on to reject Providence & Worcester's claim on the merits. *Id. at 34-42*.

For the foregoing reasons, we defer to the reorganization court's conclusion that the ICC properly found that the merged Boston & Maine would be financially viable. The parties raise no other objection to the substantive basis for the ICC's approval of the merger as a whole, and we find in part VI *infra* no basis for reversing the Commission on procedural grounds. We therefore affirm the Commission's decision that the merger is "consistent with the public interest." 49 U.S.C. § 11,344(c).

III. LAMOILLE VALLEY'S REQUEST FOR PROTECTIVE CONDITIONS

A. Standard of Review

HN12[¹] The standard of review for the ICC's decision is well established. The Commission's interpretation of its governing statute, like that of any regulatory agency, is "entitled to deference." *Federal Election Commission v. Democratic Senatorial Campaign Committee*, 454 U.S. 27, 32, 70 L. Ed. 2d 23, 102 S. Ct. 38 (1981). [**29] We must accept the Commission's interpretation if it is "sufficiently reasonable," even if it is not "the only reasonable one or even the reading the court would have reached" on its own. *Id. at 39*; see *National Wildlife Federation v. Gorsuch*, 224 U.S. App. D.C. 41, 693 F.2d 156, 166-71 (D.C. Cir. 1982).

HN13[¹] The ICC's substantive conclusions are subject to review under the "substantial evidence" test of the Administrative Procedure Act, [5 U.S.C. § 706\(2\) \(E\)](#). See *Illinois Central Railroad v. Norfolk & Western Railway*, 385 U.S. 57, 66, 17 L. Ed. 2d 162, 87 S. Ct. 255 (1966). Under that test, the Commission's factual findings must be supported by enough evidence "to justify . . . a refusal to direct a verdict" the other way in a case tried to a jury. *Id.* We also expect that when the facts are uncertain, the agency will "so state and go on to identify the considerations [it] found persuasive." *Industrial Union Department, AFL-CIO v. Hodgson*, 162 U.S. App. D.C. 331, 499 F.2d 467, 476 (D.C. Cir. 1974). [**30] Moreover, the Commission must "consider[] the relevant factors and articulate[] a rational connection between the facts found and the choice made." *Baltimore Gas & Electric Co. v. Natural Resources Defense Council, Inc.*, 462 U.S. 87, 103 S. Ct. 2246, 76 L. Ed. 2d 437, 51 U.S.L.W. 4678, 4683 (1983); see *Sierra Club v. Costle*, 211 U.S. App. D.C. 336, 657 F.2d 298, 323 (D.C. Cir. 1981).

Having assured ourselves that the agency has fully considered an issue and given reasons for its conclusions, we have only limited power to second-guess those reasons. "We **HN14**[¹] can and do insist that the agency's reasons and policy choices do 'not deviate from or ignore the ascertainable legislative intent.' " *Small Refiner Lead Phase-Down Task Force v. United States Environmental Protection Agency*, 227 U.S. App. D.C. 201, 705 F.2d 506, 520 (D.C. Cir. 1983) (quoting *Greater Boston Television Corp. v. FCC*, 444 F.2d 841, 850 (D.C. Cir. 1970), cert. denied, 403 U.S. 923, 91 S. Ct. 2233, 29 L. Ed. 2d 701 (1971)). Beyond that, [**31] however, "it is not for the court to strike down conclusions that are reasonably drawn from the evidence and findings in the case." *Illinois Central*, 385 U.S. at 69; see [¹⁰⁸] *Seaboard Coast Line Railroad v. United States*, 599 F.2d 650, 652 (5th Cir. 1979).

B. The ICC's Decision

The Lamoille Valley operates a single 98-mile-long east-west line between St. Johnsbury, Vt. in the east (where it connects with the Maine Central) and Swanton, Vt. in the west (where it connects with the Canadian National). It depends for financial viability on "overhead" traffic which it carries from the Maine Central to the Canadian National or vice-versa. The merger of the Maine Central with the Boston & Maine gives Guilford an incentive to divert traffic from the Maine Central/Lamoille Valley/Canadian National line to the competing Maine Central/Boston & Maine line. 16

[**32] Guilford estimated that its diversion efforts would reduce Lamoille Valley's gross revenues by about \$ 180,000, based on 1980 traffic data. See *Boston & Maine Merger* app. [C, 366 I.C.C. at 370](#). Lamoille Valley

¹⁶ Guilford's subsequent acquisition of the Delaware & Hudson, which we approve today in *Central Vt. Ry. v. ICC*, 229 U.S. App. D.C. 53, 711 F.2d 331 (D.C. Cir. 1983), extends the Boston & Maine's east-west route further west and thus increases Guilford's incentive to divert traffic from the Maine Central/Lamoille Valley/Canadian National route to the Maine Central/Boston & Maine/Delaware & Hudson route.

challenged Guilford's assumptions and counterestimated traffic diversion of as much as \$ 300,000.¹⁷ The ICC found flaws in Guilford's analysis and concluded that Guilford's diversion estimates -- both for the Lamoille Valley and for other carriers -- "are understated and can be considered as bare minimum estimates of traffic and revenue diversions." *Id. at 372.*

For the Lamoille Valley, the ICC found it unnecessary to make its own estimate of traffic diversion. It concluded that "even using [Guilford's] figures, which we have found to be minimum estimates, [Lamoille Valley] stands to lose . . . over [**33] 15 percent of its 1980 gross revenue. Such a financial blow would be devastating to [Lamoille Valley]." *Id. at 353.*

Despite this bleak outlook, the ICC denied Lamoille Valley's request for protective conditions because Lamoille Valley's services were not "essential." Lamoille Valley's overhead service was not essential "since a number of other connections to the Canadian routes exist." *Id. at 354.* Moreover, trucks could substitute for Lamoille Valley's local service. While truck service would undeniably cost more, shippers sometimes used trucks even now and no shippers would be "forced out of business" if they had to rely exclusively on trucks:

Even assuming that . . . there would be a cessation of operations, we cannot conclude that essential services would be affected. It appears from the evidence presented by shippers . . . that they can be served by motor carriers. All three supporting shippers . . . are either presently being served in part, or have been served previously, by truck. . . . While motor carrier service is more costly, it is a reasonably adequate substitute for [rail] service. None of the supporting shippers has [**34] indicated that it would be forced out of business if [Lamoille Valley] discontinued service.⁴³

Id. at 353.

Relying on this passage, Lamoille Valley asserts that the Commission used a "business termination" test to determine if Lamoille Valley's local service was "essential," and that this test does not comply with the statutory directive that the ICC consider "adequacy" of transportation. 49 U.S.C. § 11,344(b) (1) (A).¹⁸ Lamoille Valley also claims that the ICC failed to analyze the reduction in competition for east-west traffic from the Lamoille Valley going out of business. ICC counsel replies that the Commission, in finding that Lamoille Valley's [*309] services were not "essential," relied solely on the fact that the shippers were now or recently had been served by truck. Counsel asserts that the Commission has "never adopted or recommended" a business termination test and that the Commission's reference to shippers being "forced out of business" [**35] was mere dictum.¹⁹ As for possible reduction in competition from the Lamoille Valley going out of business, the Commission evaluated it and found it to be negligible.

¹⁷ See Verified Statement of Edward Lewis, General Manager of Lamoille Valley Railroad, at 12 (Jan. 6, 1982), reprinted in Joint Appendix (J.A.) at 1690, 1701.

⁴³. . . Eastern Magnesia Talc Company notes that costs of motor carrier transportation are "prohibitively expensive," but does not add that operations would be terminated.

¹⁸ Lamoille Valley Brief at 8-30; Lamoille Valley Reply Brief at 1-9.

¹⁹ ICC Brief at 46-47. ICC counsel also asserts that the Commission "was unconvinced that the potential revenue diversions . . . would put [Lamoille Valley] out of business." *Id. at 42.* Counsel relies on the ICC's speculation whether "the State of Vermont would walk away from its substantial investment in [Lamoille Valley]" and whether the Lamoille Valley's "excessive dependence on revenue from overhead traffic" might indicate "unrealistically low" rates for local traffic, in which case the Lamoille Valley could raise its local rates to offset lost revenues from overhead traffic. *Boston & Maine Merger*, 366 I.C.C. at 353-54.

We think that these comments by the ICC, read in context, are dicta. Moreover, the Commission's speculations are not, so far as we can tell, based on any evidence in the record. Thus, if we believed that this line of reasoning was critical to the ICC's decision, we would remand to the Commission for lack of substantial evidence to support its conclusion that the Lamoille Valley would continue operating.

[**36] C. *The Essential Services Test*

The ICC's policy statement on railroad mergers explains that [HN15](#) there are "two potential results from consolidations which would ill serve the public -- reduction of competition and harm to essential services." [49 C.F.R. § 1180.1\(c\) \(2\) \(1982\)](#). [HN16](#) The Commission defines "essential services" as:

A service is essential if there is a sufficient public need for the service and adequate alternative transportation is not available.

Id. [§ 1180.1\(c\) \(2\) \(ii\).](#) [HN17](#) The ICC treats the existence of harm to competition or to essential services as a *threshold* test for when conditions *may* be needed to reduce the adverse effects of a merger. It will never impose protective conditions unless a merger will cause significant reduction in competition or harm to essential services. If a merger will reduce competition or harm essential services, the Commission [\[**37\]](#) will decide whether conditions are desirable by balancing the costs and benefits of imposing conditions. This subsection considers the ICC's use of conditions to protect essential services; subsection D considers the ICC's use of conditions to preserve competition.

In general, the ICC's use of the "essential services" test as a threshold test for when protective conditions deserve further consideration is unobjectionable. Leaving aside the requirement -- not at issue in this case ²⁰ -- of a "sufficient public need," the ICC defines an "essential service" as one for which an "adequate alternative . . . is not available." This definition simply restates the statutory requirement that the ICC consider "adequacy of transportation to the public." 49 U.S.C. § 11,344(b) (1) (A). ²¹ Accord [Brotherhood of Maintenance of Way Employees v. ICC](#), 698 F.2d 315, 319 n.14 (7th Cir. 1983) ("Essential services are basically those the deprivation of which would result in inadequate service to the public."); cf. [Missouri-Kansas-Texas Railroad v. United States](#), 632 F.2d 392, 400-04 (5th Cir. 1980) (approving the ICC's use of an [\[**38\]](#) earlier definition of "essential services"), cert. denied, 451 U.S. 1017, 101 S. Ct. 3004, 69 L. Ed. 2d 388 (1981).

[**39] It remains to consider whether the ICC properly applied the essential services test to Lamoille Valley. The ICC gave three reasons for concluding that there were adequate alternatives to Lamoille Valley's rail service. First, all three shippers who testified in favor of Lamoille Valley's request for protective conditions "are either presently being served in part, or have been served previously, by truck." Furthermore, one shipper, E.T. & H.K. Ide Co., "has access to [Canadian Pacific] rail in St. Johnsbury, [Vt.]" Finally, no shipper claimed that "it would be forced out of business if [Lamoille Valley] discontinued service." *Boston & Maine Merger*, 366 I.C.C. at 353.

1. *Current or Past Truck Service*

The Commission's first reason for believing that Lamoille Valley's service is not essential has some probative force. It is plausible that a shipper formerly served by truck can again use trucks and that a shipper now served partially by truck can adequately be served entirely by truck. We must still determine, however, whether the record supports

²⁰ Guilford asserts that Lamoille Valley failed to show a "sufficient public need" for its service. Guilford Brief at 14-18. The ICC, however, did not refer in its decision to the "sufficient public need" requirement. Thus, the meaning of that phrase is not at issue in this case, and we express no view on how the Commission may permissibly interpret it.

²¹ The ICC also explained the close connection between the statutory standard of "adequacy of transportation to the public" and the essential services test in its decision in this case. See *Boston & Maine Merger*, 366 I.C.C. at 348 ("the issue of whether conditions should be applied in a consolidation . . . goes essentially to the question of whether the transaction will result in a lessening of the adequacy of transportation to the public").

The ICC has repeated this statement in almost all of its recent merger decisions. See Union Pac. Corp. -- Control -- [Missouri Pac. Corp.](#), 366 I.C.C. 459, 562 (1982), appeal filed sub nom. [Southern Pac. Transp. Co. v. ICC](#), 237 U.S. App. D.C. 99, 736 F.2d 708 (D.C. Cir. 1983); *Delaware & Hudson Merger*, *supra* note 1, 366 I.C.C. at 412; Norfolk S. Corp. -- Control -- [Norfolk & W. Ry.](#), 366 I.C.C. 171, 235 (1982); CSX Corp. -- Control -- [Chessie Sys.](#), 363 I.C.C. 518, 577 (1980), aff'd sub nom. [Brotherhood of Maintenance of Way Employees v. ICC](#), 698 F.2d 315 (7th Cir. 1983); St. Louis Sw. Ry. -- Purchase (Portion) -- [Chicago, Rock Island & Pac. R.R.](#), 363 I.C.C. 320, 380 (1980).

the Commission's belief that the individual shippers now served by the Lamoille Valley can be adequately served [**40] by truck.

We pass quickly over the one shipper, E.T. & H.K. Ide Co., which has access to Canadian Pacific's rail service, for that service is surely an adequate substitute for Lamoille Valley's service. For a second shipper, Lamoille Grain, the record shows that the price difference between rail and truck service is small. Indeed, as recently as 1980, Lamoille Grain switched from rail to truck because truck rates were slightly lower. It switched back only after Lamoille Valley reduced its rates to make them competitive with truck rates.²² Thus, Lamoille Grain can be served adequately by truck.

The third shipper, Eastern Magnesia Talc Co., presents a much harder case. It operates a talc mine from which it ships talc by truck to some nearby locations and by rail (usually 110-ton hopper cars) to more distant locations. Eastern Magnesia Talc Explain to the ICC that the cost of "loading [**41] to truck, hauling to a railhead, unloading, . . . and loading to railroad cars" would be "prohibitively expensive" and would effectively prevent it from serving distant locations.²³

In light of Eastern Magnesia Talc's uncontradicted statement about the need for rail service for a substantial part of its business, the Commission could not reasonably conclude that because Eastern Magnesia Talc uses trucks for part of its business, trucks are an adequate substitute for rail for the remainder of its business. We turn therefore to the Commission's alternate reason for concluding that Eastern Magnesia Talc could switch to truck service -- that Eastern Magnesia Talc had [**42] not asserted that it would be "forced out of business" if it loses rail service.

2. Business Termination

As an initial matter, and despite Commission counsel's denial, it seems clear to us that the ICC is indeed using a "business termination" test to determine whether a substitute for rail service is "adequate." The ICC's explanation, though terse, is unambiguous:

[*311] While motor carrier service is more costly, it is a reasonably adequate substitute for [rail] service. None of the supporting shippers has indicated that it would be forced out of business if [Lamoille Valley] discontinued service.

Boston & Maine Merger, 366 I.C.C. at 353 (footnote omitted). Similarly, in approving Guilford's acquisition of the Delaware & Hudson, the ICC explained that the north-south service provided by Canadian National was not essential because, in part:

Nowhere in the record has it been shown that any of [its] customers would go out of business if [Canadian National's] rail service would be terminated.

Delaware & Hudson Merger, *supra* note 1, 366 I.C.C. at 420. The ICC has used similar phraseology [**43] in several recent cases approving abandonment of rail service. See, e.g., *Missouri Pacific Railroad -- Abandonment -- Between Port Barre & Jefferson Island*, Docket No. AB-3 (Sub-No. 27), slip op. at 5 (July 21, 1982) (not printed) (protesting shipper did "not contend that the loss of rail service would put it out of business").²⁴

²² See Verified Statement of Kenneth Gilman, co-owner of Lamoille Grain Co., at 1 (Jan. 7, 1982), J.A. at 1718, 1718.

²³ Verified Statement of J. Howard Shafer, General Manager, Eastern Magnesia Talc co., at 2 (Jan. 8, 1982), J.A. at 1720, 1721. Eastern Magnesia Talc's asserted need for rail service is given added credibility by its purchase in 1977 of a 26% interest in the Lamoille Valley. See Lamoille Valley Brief at ii; Eastern Magnesia Talc Brief at 3.

²⁴ See also Illinois Cent. Gulf R.R. -- Abandonment -- Between Milepost 0.0 at Cherokee & Milepost 96.47 at Sioux Falls, Docket No. AB-43 (Sub-No. 47), slip op. at 22 (Jan. 18, 1983) (not printed) ("Calumet [a shipper] admits that it will continue to survive if abandonment is authorized."); Louisville & Nashville R.R. -- Abandonment -- In Fannin County, Docket No. AB-2 (Sub-No. 38), slip op. at 7 (Sept. 10, 1982) (not printed) ("Abandonment of the Murphy Branch would not leave [shippers] entirely without an alternative means of distributing their products. . . . Motor carriage . . . is not so inadequate as to burden shippers with

[**44] We can find no justification in the statute for use of a "business termination" test to determine whether alternative service is adequate, and indeed neither the ICC nor Guilford offers any.²⁵ The legislative history does not explain what Congress meant when it instructed the ICC to consider "adequacy of transportation to the public."²⁶ Thus, we must give the word "adequate" its ordinary meaning.

[**45] A refusal to consider protective conditions unless alternative service is so expensive that shippers will be forced out of business does not comport with the statutory directive to take into account "adequacy" of transportation. The term "adequate," as the Supreme Court noted long ago in a similar context, is "a relative expression." *Atlantic Coast Line Railroad v. Wharton*, 207 U.S. 328, 335, 52 L. Ed. 230, 28 S. Ct. 121 (1907). For a shipper, loss of a service that it currently uses generally portends some decrease in profit, which can be anywhere from minor to devastating. If the additional cost involved in using an alternative service is small, the ICC need not be concerned. At the other extreme, if the added cost is so grave as to force bankruptcy, the alternate service is clearly inadequate, at least for that shipper. Somewhere between these two extremes, we pass from adequate to inadequate service. Within reason, the Commission has discretion to draw the dividing line as it sees fit. The business termination test, however, is too far to one extreme to be a reasonable definition of "adequacy."

In seeking on remand to draw a better line, the Commission [**46] should inquire into how much more costly a proposed alternative is and whether loss of existing service will cause substantial harm to the local economy or to shippers who now use that service. With regard to individual shippers, if a shipper can use alternate service and still earn a fair return on capital, sufficient to generally maintain current operations and justify reinvestment of earnings, the [*312] alternate service would seem adequate. The same is true if the shipper can switch production to another plant without serious harm to the local economy. On the other hand, if a shipper cannot earn a fair return, or can do so only by sharply curtailing operations, the Commission probably ought to inquire further into the desirability of protective conditions. It is worth stressing that the essential services test is not a test for *imposing* conditions, but a test for when it is worthwhile to *consider* doing so. The ICC may do well, in close cases, to err on the side of reaching the merits of the underlying question whether protective conditions are in the public interest.

Sometimes, the profitability of individual shippers may be hard to assess, or a railroad may [**47] serve a large number of small shippers, insignificant individually but important in aggregate. The Commission may then want to consider whether most shippers in a particular industry rely on rail service. If not, that suggests that alternate transportation is probably an adequate substitute for shippers in that industry. If most shippers do rely on rail service, then alternate service is probably not an adequate substitute.

The Commission will also need to assess the importance of individual shippers. If the major shipper or shippers on a rail line can switch to truck, the Commission can reasonably find that truck service is adequate even if a few minor shippers cannot switch. Conversely, alternate service may be inadequate if a major shipper whose facility is important to the local economy cannot switch, even if most shippers can use the alternate service. Again, we urge the Commission, in cases of doubt, to proceed beyond the threshold "essential services" stage of its inquiry.

We note that our interpretation of "adequacy" of alternative transportation as meaning more than just not going out of business is consistent with past ICC interpretations. While there is no useful [**48] case law involving protective conditions for mergers (until recently, the ICC imposed a set of standard conditions on virtually every rail merger²⁷ [**50]), abandonment cases provide a close analogy.²⁸ The abandonment cases do not define "adequacy," but

²⁵insurmountable transportation problems.") (emphasis added), *rev'd sub nom. Georgia Pub. Serv. Comm'n v. United States*, 704 F.2d 538 (11th Cir. 1983).

²⁶Guilford, like ICC counsel, denies that the Commission is using a business termination test. See Guilford Brief at 16-17.

²⁷The Transportation Act of 1940, Pub. L. No. 76-785, sec. 7, § 5(2)(c)(1), 54 Stat. 898, 906, added the requirement that the ICC consider the effect of a merger "upon adequate transportation service to the public." This requirement has been carried forward without substantive change in the current law. The relevant committee reports do not explain what Congress meant by "adequate transportation." See H.R. Rep. No. 1217, 76th Cong., 1st Sess. 12 (1939); H.R. Rep. No. 2832 (Conf. Rep.), 76th Cong., 3d Sess. 68-69 (1940).

they do show that the ICC, in determining the public need for rail service, has inquired into the relative costs of rail and truck service. For example, in *Northwestern Pacific Railroad Abandonment (Portion) Sausalito Branch*, 312 I.C.C. 783, 789 (1962), the Commission found that abandonment was not warranted even though most of the shippers objecting to the abandonment "use motortrucks for part of their shipments." The Commission noted that a distiller "would be handicapped by the narrowing of the area in which it could purchase raw materials"; a dealer in heavy diesel engines would incur "added expense" in shipping disassembled [*313] engines by truck and assembling them at destination; and a sailboat manufacturer would incur "40 to 50 percent higher [costs]" in shipping sailboats by truck. *Id.* The Commission did not insist that the affected shippers claim they would be forced out of business by loss of rail [**49] service.²⁹

[**51] Recent court decisions are in accord. See [*Georgia Public Service Commission v. United States*, 704 F.2d 538, 545 \(11th Cir. 1983\)](#) (reversing ICC approval of a rail abandonment):

The uncontested testimony . . . is that . . . the "additional" transportation costs [of truck service] would be prohibitive. . . . If the phrase "alternative [transportation]" is to have any meaning it must be interpreted to include transportation both logically and economically feasible.

See also [*Indiana Sugars, Inc. v. ICC*, 694 F.2d 1098, 1101 \(7th Cir. 1982\)](#) (abandonment would "inflict serious hardships" on sugar company that depended on rail for much of its inbound traffic).

3. Conclusion

We conclude that the ICC misconstrued its governing statute and failed to justify its belief that Eastern Magnesia Talc can be served adequately by trucks. Therefore, we remand to the ICC to reconsider Eastern Magnesia Talc's ability to switch to trucks. If Eastern Magnesia Talc cannot switch, the Commission will also need to consider two questions this opinion does not address -- whether the needs of a single shipper make Lamoille Valley's service [**52] essential and, if so, whether the protective conditions sought by Lamoille Valley are in the public interest.³⁰ [**53] We order as follows: As discussed in part II *supra*, the merger as a whole is approved, but the

²⁷ These protective conditions required a merging carrier to keep open and maintain current service on all existing joint routes with competing carriers. They were called " DT&I Conditions" after the case in which they were first standardized. *Detroit, Toledo & Ironton R.R. Control*, 275 I.C.C. 455, 492-93 (1950), aff'd sub nom. [*New York, C. & St. L.R. Co. v. United States*, 95 F. Supp. 811 \(N.D. Ohio 1951\)](#) (3-judge court). The Commission imposed the DT&I Conditions on all mergers until 1979, when it declined to impose conditions in *Norfolk & W. Ry. -- Control* -- [*Detroit, Toledo & Ironton R.R.*, 360 I.C.C. 498, 526-27 \(1979\)](#), aff'd in part & remanded in part sub nom. [*Norfolk & W. Ry. v. United States*, 639 F.2d 1096 \(4th Cir. 1981\)](#). The ICC has since concluded that the DT&I Conditions "are anticompetitive and contrary to the public interest." [*Rulemaking Concerning Traffic Protective Conditions in Railroad Consolidation Proceedings*, 366 I.C.C. 112, 112 \(1982\)](#), appeal filed sub nom. [*Detroit, Toledo & Ironton R.R. v. United States*, 725 F.2d 47 \(6th Cir. 1982\)](#).

²⁸ Lamoille Valley also cites a number of cases involving proposed *additional* service which suggest that a minor improvement in quality of service is enough to make existing service inadequate. E.g., [*Pennsylvania R.R. v. United States*, 323 U.S. 588, 591-93, 89 L. Ed. 478, 65 S. Ct. 543 \(1945\)](#); [*Denver & Rio Grande W.R.R. v. Union Pac. R.R.*, 351 U.S. 321, 333-34, 100 L. Ed. 1220, 76 S. Ct. 982 \(1956\)](#). We find these cases of little precedential value. The Commission can reasonably use one standard of adequacy when considering whether to authorize new entry into a market and a different standard in considering whether to allow market forces to dictate the loss of all rail service to an area.

²⁹ See also [*Baltimore & Ohio R.R. Abandonment, Landenburg Branch*, 354 I.C.C. 67, 72 \(1977\)](#) (disapproving abandonment because of the "serious, adverse effects" on shippers; one major shipper would have to spend a substantial annual sum to ship by truck to the nearest railroad); *Norfolk S. Ry. Abandonment*, 282 I.C.C. 622, 625 (1952) (denying abandonment and noting that although affected peach growers could use trucks, "peaches shipped by rail are salable longer . . . and they reach more distant markets").

³⁰ The Commission did not reach the question whether the conditions requested by Lamoille Valley are in the public interest, but we have grave doubts whether they are. Essentially, Lamoille Valley has asked the Commission to award it a new and profitable route so that it can use the profits to subsidize losses on its existing route. That request appears to violate [HN18](#) [↑] the

ICC shall expeditiously consider whether it is in the public interest to impose protective conditions in order to preserve the Lamoille Valley's service.³¹

D. Anticompetitive Effect

HN19 In **[**54]** reviewing a merger, the ICC must consider not only adequacy of transportation but also "whether the proposed **[*314]** transaction would have an adverse effect on competition among rail carriers in the affected region." 49 U.S.C. § 11,344(b) (1) (E). The ICC found that the Maine Central and the Boston & Maine "do not operate any parallel lines, but meet end-to-end." *Boston & Maine Merger*, 366 I.C.C. at 341. Therefore, the merger would not "directly reduce" competition, except for a minor impact on shippers in Portland, Maine (where the two rail systems meet). *Id.* The Commission found that, on the contrary, by strengthening the Boston & Maine, the merger would enhance competition for east-west traffic between the Boston & Maine route and the currently dominant Canadian National and Canadian Pacific routes. *Id.* at 340-41.

The Commission recognized that "an end-to-end consolidation may allow the [combined] system to divert traffic from remaining competitors and thereby foreclose their opportunity to compete in the marketplace." *Id.* at 341 n.35. It concluded, however, that the possible demise of the **[**55]** Lamoille Valley would have "negligible" competitive impact because "a number of other connections to the Canadian routes exist." *Id.* at 354.

Lamoille Valley asserts that the Maine Central does in fact compete with the Boston & Maine for east-west traffic.³² We agree. Traffic from Maine can travel west over four routes: (1) over the Canadian National (which connects with the Maine Central at Danville and Yarmouth Junctions, Maine) to Montreal and points west; (2) over the Maine Central's Mountain Division line to St. Johnsbury, Vt., and from there over the Lamoille Valley to the Canadian National to Montreal and points west; (3) over the Maine Central's Mountain Division line to St. Johnsbury and from there over the Canadian Pacific to Montreal and points west; and (4) over the Boston & Maine to Albany and points west. Thus, the Maine Central's Mountain Division line competes with the Boston & Maine's east-west line.

[56]** At present, the Maine Central has an incentive to route traffic over its own long haul (routes 2 and 3), in preference to the Canadian National route or the Boston & Maine route. After the merger, Guilford will prefer to route traffic to its new long haul -- the Boston & Maine route -- in preference to the other three routes. This traffic shift will lead to the Boston & Maine gaining revenue (\$ 3.2 million annually according to Guilford's traffic study) while the Maine Central loses revenue (\$ 1.9 million annually according to Guilford's study) due to decreased traffic

Commission's policy against "subsidiz[ing] carriers who are no longer able to compete efficiently in the marketplace." [49 C.F.R. § 1180.1\(d\)\(1\) \(1982\)](#) (quoted in full in note 8 *supra*). We cannot say that this policy is unreasonable in light of the congressional directive in the Staggers Rail Act, 49 U.S.C. § 10,101a(5), to "foster sound economic conditions in transportation." *Accord Brotherhood of Maintenance of Way Employees v. ICC*, [698 F.2d 315, 319 \(7th Cir. 1983\)](#) ("establishment of the 'procompetitive' policy disfavoring [protective] conditions falls squarely within the discretion of the Commission in exercising its regulatory expertise").

Nevertheless, it is not our place to decide what the ICC will do. Moreover, the ICC has the authority to impose conditions other than those initially suggested by Lamoille Valley. See notes 54-55 *infra* and accompanying text.

³¹ In light of this disposition, we do not reach Lamoille Valley's claim that even if the ICC may use a "business termination" test to measure the adequacy of alternate service, such a test is a major departure from prior policy for which the Commission failed to give a reasoned explanation. See [Missouri-Kan.-Tex. R.R. v. United States](#), [632 F.2d 392, 403 \(5th Cir. 1980\)](#), cert. denied, [451 U.S. 1017, 101 S. Ct. 3004, 69 L. Ed. 2d 388 \(1981\)](#). We likewise do not reach Lamoille Valley's claim that the Commission did not give Lamoille Valley advance notice of the new test. See [Norfolk & W. Ry. v. United States](#), [639 F.2d 1096, 1099 \(4th Cir. 1981\)](#). Finally, we do not need to reach Lamoille Valley's challenge to the adequacy of Guilford's study of traffic diversion in light of the Commission's conclusion that, even using Guilford's diversion estimates, Lamoille Valley would suffer "devastating" revenue losses.

³² Lamoille Valley Brief at 41-44; Lamoille Valley Reply Brief at 9-13.

over its Mountain Division line. See *Boston & Maine Merger* app. *C, 366 I.C.C. at 370*. We must therefore reject the ICC's statement that the Maine Central and the Boston & Maine do not compete with each other.³³

[**57] Nevertheless, we believe that the record supports the ICC's belief that the "primary competitive impacts of the [merger] are favorable." *Id.* at 340. The east-west route from Maine to the Midwest is over 1000 miles long. Currently, the Canadian National and the Canadian Pacific are the dominant carriers. The Boston & Maine's more circuitous route provides minimal competition, especially given the Boston & Maine's sorry finances and the Maine Central's incentive to route traffic away from the Boston & Maine and onto its own Mountain Division line and thence to the Canadian carriers. The merger, the ICC found, will permit the Boston & Maine to compete effectively over a large portion of this route. For that benefit, decreased competition over the short distance traversed by [*315] the Maine Central's Mountain Division line is a small price to pay.³⁴

[**58] As for reduction in competition due to the demise of the Lamoille Valley, we note that a large number of competing carriers on a particular route is not an end in and of itself. Rather, competition is valuable because it promotes efficient service. We find reasonable the ICC's belief that the remaining competition among the Canadian National, the Canadian Pacific, and the Boston & Maine will provide sufficient stimulus for efficient operation of rail lines.

IV. CANADIAN NATIONAL'S REQUEST FOR PROTECTIVE CONDITIONS

A. *The ICC's Decision*

Canadian National carries freight from Danville and Yarmouth Junctions, Maine (where it connects with the Maine Central) west to Montreal and Chicago. The joint Maine Central/Canadian National line is the fastest route between Maine and Chicago.

The Canadian National's time advantage depends on close coordination of schedules and speedy interchange with the Maine Central at Danville and Yarmouth Junctions. Canadian National expressed concern to the ICC that after the merger, Guilford would refuse to cooperate with Canadian National on scheduling and interchanges, thus increasing transit time over the Maine Central/Canadian National route. [**59] This would lessen the attractiveness of that route and permit Guilford to divert more traffic to the currently slower Boston & Maine route. Canadian National also claimed that reduced traffic would force it to cut expenses by running fewer trains and reducing track maintenance, which would further increase transit time, which would lead to additional diversion of traffic to the Boston & Maine, which would force Canadian National to reduce service further, and so on in a vicious cycle that ultimately would lead Canadian National to abandon its Grand Trunk Eastern line between Maine and Montreal.³⁵

³³ The ICC's assertion that the Maine Central and the Boston & Maine do not operate any "parallel lines" may be true in a narrow geometric sense, since the Maine Central's Mountain Division line (which carries traffic northwest) and the Boston & Maine's east-west line (which carries traffic southwest and then west) diverge at a 90 deg. angle. The significant question, however, is whether the two lines compete for the same traffic, not whether they appear parallel on a map.

³⁴ There is also a problem with Lamoille Valley's requested relief. We do not see, and Lamoille Valley has not explained, how Lamoille Valley's purchase of some Boston & Maine track will cure the loss of competition between the Maine Central and the Boston & Maine. The Commission "will not impose" conditions on a merger because of anticompetitive effects unless the conditions "will ameliorate or eliminate the harmful effects." *Union Pacific -- Control -- Missouri Pacific, supra note 21, 366 I.C.C. at 565*. Thus, whatever the competitive harm from the Maine Central/Boston & Maine merger, Lamoille Valley would not seem to be entitled to the relief it seeks.

³⁵ In addition to its east-west service, Canadian National operates joint north-south service with the Boston & Maine from Montreal to New York. Canadian National was concerned that Guilford would concentrate its efforts on east-west traffic and allow its north-south service to deteriorate. It therefore requested trackage rights over the Boston & Maine's portion of the north-south line. The ICC denied this request as based on "unsubstantiated fears" of reduced service. *Boston & Maine Merger*, 366 I.C.C. at 352.

It is unclear whether Canadian National presses this request on appeal. It mentions the issue, see Canadian National Brief at 14-15, but advances no reasons why the ICC's decision is wrong. Assuming that the issue is before us, we conclude, for the

[**60] Guilford's traffic study, which assumed no increase in interchange time at Danville and Yarmouth Junctions, predicted that diversion of east-west traffic to the Boston & Maine would cost Canadian National \$ 2 million in annual revenues. Canadian National counterestimated diversion losses of \$ 8.1 million per year if Guilford did not downgrade the Danville and Yarmouth interchanges and \$ 12.5 million if Guilford did downgrade the interchanges.

Canadian National asked the ICC to require Guilford to maintain "present operating arrangements, schedules of service, [and] blocking and handling of freight traffic interchanged at [Danville and Yarmouth] [*316] junctions." *Boston & Maine Merger* app. [B, 366 I.C.C. at 365](#). It claimed that fast service to Chicago is "essential" to shippers and that these conditions were needed both to prserve that service and to preserve competition for east-west traffic between it and the Boston & Maine.³⁶

[**61] In response, the ICC gave several reasons for believing that Canadian National's service would not be adversely affected by the merger. It did not reach the question whether that service is essential, nor did it discuss whether loss of the Canadian National's Grand Trunk Eastern line would significantly reduce competition for east-west traffic.

First, the ICC explained that Canadian National would not have to abandon its Grand Trunk Eastern line because even Canadian National's "worst-case scenario" of \$ 12.5 million diversion "represent[s] a mere fraction of 1 percent of CN's 1980 gross freight revenue." *Id.* at 352.³⁷ Second, there was "no indication in the record that [Guilford] has any intention of downgrading this interchange relationship." *Id.* Third, Guilford would not have an incentive to downgrade "since substantial traffic through these interchanges is nondivertible." *Id.* Finally, Canadian National "possesses sufficient competitive leverage to adequately combat any possible diversions of traffic" by virtue of its "single-line system between [Maine and the midwest] and the ratemaking flexibility inherent in such a system." *Id.*

[**62] We have substantial difficulties with each of these arguments. Cumulatively, the weaknesses in the ICC's arguments lead us to remand to the Commission to reconsider whether Canadian National's service will be adversely affected by the merger and, if so, whether the public interest would be advanced by restricting Guilford's ability to downgrade its interchanges with Canadian National.

B. The Limited Relevance of Systemwide Revenues

reasons given in response to a similar claim in [Central Vermont Railway v. ICC, supra note 1, 711 F.2d at 300](#), that any possible deterioration will not affect essential services.

Deterioration of the Boston & Maine's north-south service is also an essential component of Providence & Worcester's explanation of why it needs protective conditions. Since downgrading will not affect essential services, we affirm the Commission's denial of Providence & Worcester's request for conditions.

³⁶ Guilford's subsequent acquisition of the Delaware & Hudson, which extends the Boston & Maine's east-west route further west, increases Guilford's incentive to divert traffic from the Canadian National to the Boston & Maine/Delaware & Hudson line. Canadian National accordingly repeated its request for conditions in the Delaware & Hudson merger decision. See *Delaware & Hudson Merger*, *supra* note 1, 366 I.C.C. at 419. The ICC denied the request, relying on the reasons it gave in its *Boston & Maine* decision. Our analysis of the Commission's reasoning applies equally to both decisions, and is incorporated by reference in the companion case to this one reviewing the Delaware & Hudson merger. See [Central Vermont Railway v. ICC, supra note 1, 229 U.S. App. D.C. 53, 711 F.2d 331, slip op at 6-7](#).

³⁷ The ICC used similar reasoning to reject Canadian Pacific's request for protective conditions. See *Boston & Maine Merger*, 366 I.C.C. at 350 (even under Canadian Pacific's "worst-case scenario concerning diversions . . . , revenue lost . . . would be less than one-half percent of its gross revenues"). See also *Union Pacific -- Control -- Missouri Pacific*, *supra* note 21, 366 I.C.C. at 546 (threshold step in analyzing whether a merger will harm essential services is determining "gross revenue impact on non-included carriers"); *Norfolk Southern -- Control -- Norfolk & Western*, *supra* note 21, 366 I.C.C. at 213 (diversion estimate "represents only about seven-tenths of 1 percent of [the competing carrier's] gross revenue and will not threaten any essential services"); *Burlington N., Inc. -- Control & Merger -- St. Louis-S.F. Ry.*, 360 I.C.C. 784, 952 ("Where a carrier can sustain and absorb losses from traffic diversion, protective conditions are not warranted.") (footnote omitted), aff'd sub nom. *Missouri-Kan.-Tex. R.R. v. United States*, 632 F.2d 392 (5th Cir. 1980), cert. denied, 451 U.S. 1017, 101 S. Ct. 3004, 69 L. Ed. 2d 388 (1981).

We consider first the ICC's belief that essential services would not be affected because the diversions from the Canadian National to the Boston & Maine represent a fraction of 1% of Canadian National's gross revenues and thus, presumably, Canadian National could underwrite any losses on its Grand Trunk Eastern line. We fail to see the relevance of Canadian National's systemwide revenues.

First, if Guilford downgrades interchanges at Danville and Yarmouth Junctions, shippers will lose the benefits of "the best transit time between Maine and the Midwest." *Boston & Maine Merger*, 366 I.C.C. at 352. Canadian National's ability to absorb [*317] the resulting revenue loss will not change that fact.

Second, the ICC's emphasis [**63] on Canadian National's financial strength and neglect of the profitability of the Grand Trunk Eastern line ignores Canadian National's incentive to maximize profits by shedding money-losing operations. Nothing in the record supports the implausible proposition that Canadian National will indefinitely subsidize losses on its Grand Trunk Eastern line. On the contrary, undisputed testimony from Canadian National's President establishes that Canadian National treats its branches and subsidiaries as independent "profit centers" and will not subsidize a losing branch line.³⁸

Third, the ICC itself, as a policy matter, opposes on efficiency grounds the subsidizing of money-losing lines. [HN20](#)[] For example, the Commission will not "under any circumstances" require one carrier to indemnify another carrier for losses due to traffic [**64] diversion, because "this transfer of funds would, in effect, be a massive cross-subsidization . . . of inefficient operations of another railroad." *Burlington Northern -- Control -- St. Louis-S.F.*, *supra* note 37, 360 I.C.C. at 952-53.³⁹ [**65] Similarly, in abandonment proceedings, the Commission analyzes primarily the profitability of the line sought to be abandoned and gives little weight to the profitability of the parent railroad. See, e.g., *Illinois Central Gulf Railroad Abandonment Between Herscher & Barnes*, 363 I.C.C. 690, 703 (1980) ("Unprofitable operations . . . burden [the carrier] and interstate commerce . . . [and the carrier] should not be required to continue [such] operations . . . , regardless of whether it is financially capable of doing so. . . ."), aff'd sub nom. *Bloomer Shippers Association v. ICC*, 679 F.2d 668 (7th Cir. 1982).⁴⁰ The ICC, to be true to this policy, should not expect Canadian National to operate an inefficient, money-losing line.

In sum, the ICC's belief that Canadian National's overall profitability would permit Canadian National to preserve existing service on its Grand Trunk Eastern line ignores Guilford's unilateral ability to downgrade interchange service, is unsupported by evidence in the record, and is contrary to Commission policy.

This is not to say that Canadian National's Grand Trunk Eastern line will be unprofitable once the Maine Central merges with the Boston & Maine. Canadian National asserts that the Grand Trunk Eastern line will sustain heavy losses as a result of diversion of traffic to the Boston & Maine,⁴¹ [**66] but Guilford disputes this.⁴² On remand, the ICC will have an opportunity to decide this factual question.⁴³

³⁸ Verified Statement of Ronald Lawless, President, CN Rail, at 6 (Jan. 6, 1982), J.A. at 2196, 2201.

³⁹ See also [49 C.F.R. § 1180.1\(d\) \(1\) \(1982\)](#) (explaining the ICC's policy against indemnification) (quoted in note 8 *supra*).

⁴⁰ See also *Abandonment of Rail Lines -- Use of Opportunity Costs*, 360 I.C.C. 571, 577 (1979) (requiring a carrier to operate marginally profitable lines "is highly questionable as a matter of national transportation policy"), aff'd sub nom. *Farmland Indus. v. United States*, 642 F.2d 208 (7th Cir. 1981).

⁴¹ See Verified Statement of Ronald Lawless, *supra* note 38, at 10, J.A. at 2205.

⁴² See Guilford Brief at 11 n.10 (Canadian National allocates revenues "so that traffic which originates in the United States and traverses CN in Canada is profitable in Canada but unprofitable in the United States.") (citing Hearing Transcript, Feb. 11, 1982, at 951-52, J.A. at 726-27 (testimony of Ronald Lawless, President, CN Rail)).

⁴³ In deciding this issue, the ICC may also need to resolve the wide discrepancy between Guilford's \$ 2 million traffic diversion estimate and Canadian National's \$ 8 million estimate (\$ 12.5 million if interchange service is downgraded). Canadian National may then wish to renew its claim that Guilford's traffic study is so seriously flawed as not to constitute "substantial evidence" to support the Commission's findings. We do not reach that issue here.

C. *Guilford's Intent to Maintain Present Service*

A second major factor leading the ICC to conclude that the merger would not affect Canadian National's service was that the record gave "no indication" that Guilford [^{*}318] intended to downgrade service at the Danville and Yarmouth interchanges. [^{**67}] 366 I.C.C. at 352. We think this factor is entitled to little if any weight.

First, the record shows only that Guilford has no *present* intent to downgrade interchange service. Guilford made no promises concerning the future. Thus, Guilford's owner, Mr. Mellon, when asked if he would "give Guilford's assurance" that it would preserve service at Danville and Yarmouth Junctions, gave an equivocal answer -- "if the economic circumstances are somewhat what they are today." ⁴⁴ Moreover, Guilford opposed Canadian National's request for conditions, thus reserving for itself the right to decrease service in the future.

HN21[^F] Second, as the Commission itself has recently recognized, self-serving statements by a merging railroad's officers are entitled to little credence. See *Norfolk & Western -- Control -- Detroit, Toledo & Ironton, supra* [^{**68}] note 27, 360 I.C.C. at 512 (promise by two competing railroads to operate independently a third competing line is "self-serving and must be examined closely. . . . It is difficult to expect sacrificial behavior from profit seeking corporations into the indefinite future."). Guilford will, we expect, seek to maximize profits. If it can profitably downgrade interchanges with Canadian National, Guilford will have strong incentives to do so, notwithstanding its current disclaimers. Thus, Guilford's actual financial incentives, not its professed intent, must be the dominant concern. We consider those incentives next.

D. *Guilford's Incentives to Downgrade Interchange Service*

The ICC's third reason for rejecting protective conditions at Danville and Yarmouth Junctions was that "it would not appear to be to [Guilford's] benefit for such deterioration [of interchange service] to take place, since substantial traffic through those interchanges is nondiveritable." *Boston & Maine Merger*, 366 I.C.C. at 352. ⁴⁵ We think that the Commission failed to analyze properly Guilford's incentives to downgrade interchange service.

[^{**69}] 1. *Guilford's Incentives in Antitrust Theory*

The Maine Central is the only railroad providing east-west service to the Maine paper industry. Moreover, Canadian National claims, and the Commission does not dispute, that most of the Maine Central's traffic is captive to rail -- trucks are not a significant source of competition. ⁴⁶ Thus, the Maine Central has market power over rail traffic to and from Maine. As a theoretical matter, then, the Maine Central may be able to increase profits by altering its interchange service.

The merger of the Maine Central with the Boston & Maine is, in antitrust terminology, a "vertical" merger. Ordinarily, a vertically integrated monopolist has no incentive to use its monopoly power over one level of production (rail service in Maine) to increase profits at another level (rail service from Maine to the midwest). As the leading treatise puts it, "there is but one maximum monopoly profit to be gained" from a monopoly of [^{**70}] one level of production, and that profit may be gained directly at the monopolized level (here, rail service in Maine) through appropriate pricing. 3 P. Areeda & D. Turner, *Antitrust Law* § 725b (1978). There is an exception to this rule, however, for a regulated monopolist, which may be able to obtain from a second level of production "the monopoly profits which effective regulation of the franchised monopoly precludes." *Id.* Para. 726e (footnote omitted). ⁴⁷

⁴⁴ Hearing Transcript, Jan. 4, 1982, at 271, J.A. at 282 (testimony of Timothy Mellon).

⁴⁵ Elsewhere in its opinion, the Commission gave a similar explanation: "the volume of traffic through the Danville and Yarmouth interchanges will remain too high and profitable for [Guilford] to risk downgrading service there." *Boston & Maine Merger*, 366 I.C.C. at 342.

⁴⁶ See Canadian National Brief at 13.

⁴⁷ See also *Otter Tail Power Co. v. United States*, 410 U.S. 366, 377, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973) (Otter Tail Power illegally used its dominance over wholesale power transmission to "foreclose potential [competitors in] the retail area from

[**71] [*319] The Maine Central is, of course, a regulated monopolist. It is barred by the ICC from charging a monopoly price for rail service to Maine,⁴⁸ but may be able to use its control over service at Danville and Yarmouth Junctions to shift its potential monopoly profit to the Boston & Maine. Indeed, the ICC itself has recently recognized the risk of such conduct. See *Union Pacific -- Control -- Missouri Pacific*, *supra* note 21, 366 I.C.C. at 529:

[In an end-to-end merger], the consolidated system may profit by limiting the "downstream" competition [from connecting carriers] and routing traffic over its own lines from origin to destination. . . . This vertical foreclosure effect will occur, if at all, at the gateways served commonly by the consolidating carriers.

We do not know whether Guilford will *in fact* profit by downgrading [**72] interchange service, but the risk is substantial. Indeed, Areeda and Turner believe that the probability that a vertically integrated, regulated monopolist will abuse its market power is "peculiarly high." *Id.* Para. 726e, at 218. They would forbid vertical integration by a regulated monopolist except in cases where regulatory authorities "can more or less easily exercise the power to prohibit refusals to sell and to specify the price and other terms of sale." *Id.* Para. 726e, at 219 (footnote omitted). In this case, the ICC permitted vertical integration but declined to exercise its power to control the "terms of sale" between the Maine Central and the Canadian National. The question is whether that decision was reasonable.

2. *Guilford's Actual Incentives*

We do not think that the Commission gave Guilford's possible incentives to downgrade interchange service the scrutiny they deserve. As we understand its terse explanation, the Commission's conclusion that Guilford has no incentive to downgrade rests on two premises, the first explicit, the second implicit. First, Guilford will continue to transfer substantial amounts of traffic to Canadian National at Danville [**73] and Yarmouth Junctions. Second, if Guilford downgrades interchange service, it will earn less profit on nondiverisible traffic.

The first premise is undisputed in the record, though Guilford and Canadian National disagree on how much traffic will be diverted.⁴⁹ [**74] There is no record evidence regarding the second premise. The premise is plausible, if only because reduced service will lead some shippers to switch to trucks or produce fewer goods. But the magnitude of this effect is uncertain and may well be small. Little traffic will be lost to trucks because, for most of the Maine Central's shippers, trucks are not a feasible alternative to rail. And the record is silent on how much business Maine producers will lose to competitors elsewhere in the country if they lose fast service to the midwest.
50

The Commission not only failed to quantify Guilford's costs from downgrading interchange service at Danville and Yarmouth Junctions, it also ignored the benefits to [*320] Guilford from increased diversion. The Commission does not dispute that some additional diversion will occur. We can only speculate as to the amount of diversion and how profitable the diverted traffic will be to Guilford.

Without quantifying the costs or even discussing the benefits to Guilford from downgrading interchange service, the ICC could not rationally conclude that Guilford will not have an incentive to downgrade. On remand, the Commission must ascertain more carefully where Guilford's incentives actually lie.

obtaining electric power"); *United States v. Terminal R.R. Ass'n*, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 (1912) (railway terminal company reorganized to prevent it from abusing its monopoly over rail traffic into St. Louis); *Chesapeake & Ohio Ry. v. United States*, 704 F.2d 373, 377 (7th Cir. 1983) ("regulatory distortions . . . might make the closing of efficient through routes profitable conduct for [a railroad] when in an unregulated market it would be commercial suicide").

⁴⁸ See 49 U.S.C. §§ 10,101a(6), 10,709 (ICC must limit rates charged by "market dominant" carriers).

⁴⁹ Canadian National estimates diversion losses of almost half of the traffic currently carried over the Grand Trunk Eastern line -- 11,600 cars out of a current total of 25,700 cars per year. See Verified Statement of James Metsos, System Manager, CN Rail, Jan. 7, 1982, at 29, 38, J.A. at 2240, 2268, 2277.

⁵⁰ In *Union Pacific -- Control -- Missouri Pacific*, *supra* note 21, 366 I.C.C. at 528-29 & n.71, the Commission discussed the role of such "source competition" in limiting the anticompetitive effects of a railroad merger but placed little weight on this factor.

We do not suggest that the Commission will be able to predict Guilford's future behavior with absolute accuracy. [**75] Rather, Guilford's incentives or disincentives to downgrade will be "primarily a question of probabilities, and thus peculiarly subject to the expert experience, discretion, and judgment of the Commission." [Missouri-Kansas-Texas Railroad v. ICC, 632 F.2d 392, 406 \(5th Cir. 1980\)](#), cert. denied, 451 U.S. 1017, 101 S. Ct. 3004, 69 L. Ed. 2d 388 (1981). But our deference to its ultimate choice does not relieve the Commission of the duty to explain, based on substantial evidence in the record, whether Guilford will or will not have an incentive to downgrade interchange service.

E. Canadian National's Competitive Leverage

The ICC's final reason for believing that Guilford would not downgrade interchange service was Canadian National's power to take effective opposing steps. The Commission explained:

[Canadian National (CN)] possesses sufficient competitive leverage to adequately combat any possible diversions of traffic. The CN-[Maine Central] connection still affords shippers the best transit time between Maine and the Midwest. By virtue of operating a single-line system between these two regions of the country, and the ratemaking [**76] flexibility inherent in such a system, CN is able to assert a great deal of influence in the routing of traffic.

Boston & Maine Merger, 366 I.C.C. at 352. This reasoning is none too clear, but we understand the Commission to suggest two sources of Canadian National's "competitive leverage." First, Canadian National's route is the fastest. Second, Canadian National's long haul over a single system gives it "ratemaking flexibility."

We fail to understand the first claim. That Canadian National can potentially provide the fastest route to the midwest will not do it much good if Guilford unilaterally destroys that advantage. As for "ratemaking flexibility," we are not sure what the Commission means by the term, but we can see two possibilities. First, Canadian National can recoup lost traffic by cutting its prices to shippers. Second, Canadian National can pay Guilford to maintain current interchange service by giving Guilford a larger share of the total Maine-to-midwest freight charge.

Price cuts to shippers, however, will not restore the Canadian National's current fast, efficient service to the midwest. Moreover, price cuts offer scant promise of returning [**77] the Grand Trunk Eastern to profitability. In the long run, if the Grand Trunk Eastern loses money, Canadian National will presumably close it down.

Canadian National may temporarily preserve fast service by giving Guilford a larger share of joint revenues. Such payments, however, can only reduce the Grand Trunk Eastern's profitability, which in the long run is essential to service of any kind, let alone fast service.⁵¹ We conclude, therefore, that the Commission unreasonably relied [*321] on Canadian National's "competitive leverage" to preserve existing service.

[**78] F. Potential Harm from Protective Conditions

Having considered the possible need to preserve interchange service at Danville and Yarmouth Junctions,⁵² [**80] we turn briefly to the possible harm from imposing protective conditions. Canadian National's requested conditions, as described by the ICC, were:

⁵¹ Giving Guilford a larger share of joint revenues may not even preserve fast service in the short run. As the Commission recently recognized in its *Rulemaking Concerning Traffic Protective Conditions*, *supra* note 27, 366 I.C.C. at 125-26, a competing carrier who participates in an efficient joint route (*i.e.*, Canadian National) may be unable to pay enough to persuade the other participating carrier (*i.e.*, Guilford) to prefer a joint route over the other carrier's less efficient single-line route. The record is silent on whether Canadian National can offer enough to persuade Guilford to maintain current interchange service.

⁵² Technically, we have addressed, as did the Commission, only the probability that protective conditions will be needed and not the amount of public benefit from preserving Canadian National's service. There is little doubt, however, that the amount of benefit is substantial. There are now three competing railroads in the Maine-to-midwest corridor: Guilford, Canadian National, and Canadian Pacific. If Canadian National withdraws from the competition because of losses on its Grand Trunk Eastern line, only two competitors will be left. The ICC has recently held in reviewing another merger that loss of one of three existing

[Maine Central] shall preserve and continue at a minimum its practices existing on October 31, 1981 in connection with handling freight traffic over the routes with the Grand Trunk Eastern and at the interchange points at Danville Junction and Yarmouth Junction, ME. Changes in present operating arrangements, schedules of service, blocking and handling of freight traffic interchanged at these junctions shall be made only with the concurrence of Canadian National Railway.

Boston & Maine Merger app. [B, 366 I.C.C. at 365](#). The ICC explained that these conditions were relatively "narrow in scope" and would have little effect on competition, but would reduce Guilford's ability to improve service on its own system:

They do not appear to affect rates or diversions [sic], but rather freeze existing practices with respect to operating arrangements, [\[**79\]](#) schedules, and the blocking and handling of freight moving over Danville and Yarmouth Junctions in Maine. While the competitive effect of these conditions is not clear, imposition of these conditions would at least reduce [Guilford's] flexibility in improving the service capabilities on its own system.

Id. at 352. ⁵³

Canadian National urges that its proposed veto over changes in operating arrangements would not "freeze existing practices." Canadian National points out that if it used its veto, Guilford could appeal to the Commission, which could grant relief from the condition in a proper case. See *Southern Pacific Co. -- Merger -- Pacific Electric Railway*, [354 I.C.C. 100, 109-10 \(1977\)](#). We see little force to this argument. Guilford would still be burdened by the delay involved in an appeal to the ICC. Thus, as a practical matter, Canadian National's veto would substantially reduce Guilford's flexibility.

On the other hand, the ICC is not restricted [\[**81\]](#) to choosing between Canadian National's requested conditions and no conditions at all.⁵⁴ On the contrary, [HN22](#) if the Commission [\[*322\]](#) believes that an unconditioned merger would harm the public interest but finds a proposed condition inappropriate, its duty to advance the public interest requires it to devise appropriate conditions, if such conditions can be developed with reasonable effort. See *Baltimore & Ohio Railroad v. United States*, [386 U.S. 372, 430, 18 L. Ed. 2d 159, 87 S. Ct. 1100 \(1967\)](#) (Brennan, J., concurring) ("the ICC is not the prisoner of the parties' submissions" and must "weigh alternatives and make its choice according to its judgment how best to achieve [Congress' policy] goals") (footnotes omitted); *Atlantic Coast Line R. Co. v. United States*, [48 F.2d 239, 244 \(W.D.S.C. 1931\)](#) (3-judge court) ("It is not only the right but the duty of the commission to impose such conditions as will make the acquisition in the public interest. . . ."), aff'd, [284 U.S.](#)

competitors is "a substantial lessening of competition." *Union Pacific -- Control -- Missouri Pacific*, *supra* note 21, at 531. We do not see why a different result would obtain here.

Moreover, Canadian National's route is more efficient -- in time, energy use, and switching costs -- than the Boston & Maine route. Unless the difference in efficiency is minor, the public interest supports preserving the more efficient route. See *United States v. Lowden*, [308 U.S. 225, 230, 84 L. Ed. 208, 60 S. Ct. 248 \(1939\)](#) ("the term public interest . . . 'has direct relation to adequacy of transportation service [and] to its essential conditions of economy and efficiency'") (quoting *Texas v. United States*, [292 U.S. 522, 531, 78 L. Ed. 1402, 54 S. Ct. 819 \(1934\)](#)); *Chesapeake & Ohio Ry. v. United States*, [704 F.2d 373, 377 \(7th Cir. 1983\)](#) ("If the closed routes . . . are more efficient than the alternative routes that remain open, the [closings] are not in the public interest.").

⁵³ Canadian National objects that it did request rate conditions. Canadian National Brief at 67-68. We do not address the possible need for rate conditions at this time. Our discussion is limited, as was the Commission's, to Canadian National's less anticompetitive request for protection against service changes. On remand, Canadian National may renew its request for rate conditions and appeal from an adverse decision by the Commission.

⁵⁴ See *New York Cent. Sec. Corp. v. United States*, [287 U.S. 12, 28, 53 S. Ct. 45, 77 L. Ed. 138 \(1932\)](#) (the Commission is "not limited to conditions proposed or favored by the carriers"); Illinois Cent. Gulf R.R. -- Acquisition -- Gulf, Mobile & Ohio R.R., [338 I.C.C. 805, 844-45 \(1971\)](#), aff'd sub nom. *Missouri Pac. R.R. v. United States*, [346 F. Supp. 1193 \(E.D. Mo. 1972\)](#) (3-judge court), and also aff'd sub nom. *Kansas City S. Ry. v. United States*, [346 F. Supp. 1211 \(W.D. Mo. 1972\)](#) (3-judge court), both decisions aff'd mem., [409 U.S. 1094, 93 S. Ct. 903, 34 L. Ed. 2d 679 \(1973\)](#).

288, 52 S. Ct. 171, 76 L. Ed. 298 (1932). See also Scenic Hudson Preservation Conference v. FPC, 354 F.2d 608, 620-21 (2d Cir. 1965), **[**82]** cert. denied, 384 U.S. 941, 16 L. Ed. 2d 540, 86 S. Ct. 1462 (1966).⁵⁵

[83]** The ICC can probably design conditions that will prevent significant deterioration in transit time on the Maine Central/Canadian National route without seriously burdening Guilford. At a minimum, the Commission can require Guilford to give Canadian National advance notice of service changes. It could then permit Guilford to make the changes after an expedited showing to the Commission that the changes will not disrupt joint service with the Canadian National. Alternatively, it could permit the changes unless Canadian National shows that the changes will disrupt its service to the midwest. If appropriate, the Commission can limit the duration of any conditions it imposes.⁵⁶ Other possibilities may also occur to the Commission.

G. Conclusion

All four of the **[**84]** ICC's reasons for finding no need to impose protective conditions are seriously flawed. Cumulatively, they show failure by the Commission to "consider all of the relevant factors and demonstrate a reasonable connection between the facts on the record and the resulting policy choice." Sierra Club v. Costle, 211 U.S. App. D.C. 336, 657 F.2d 298, 323 (D.C. Cir. 1981) (footnote omitted). We therefore remand to the Commission to reconsider the public benefit from protective conditions, taking into account the factors identified in this opinion.⁵⁷

[85] [^323]** We recognize the complexity of this endeavor. In all likelihood, the probability that Guilford will downgrade interchange service will be greater than zero and less than 100%. The magnitude of public harm from downgrading will be uncertain as well. From these two uncertainties, the Commission will have to compute a rough, perhaps unquantified estimate of expected public benefit from protective conditions, and weigh that benefit against the equally speculative cost of restricting Guilford's future flexibility.

Once that balancing has been done, we will not lightly disturb the Commission's ultimate conclusion. On the record before us, however, the Commission has both ignored relevant factors and reached conclusions unsupported by

⁵⁵ Congress has at times noted its belief that the ICC should take an active role in structuring transactions to advance the public interest. See S. Rep. No. 499, 94th Cong., 1st Sess. 19 (1975), 1976 U.S. Code Cong. & Ad. News at 32-33 (criticizing the ICC's passive role in merger proceedings); H.R. Doc. No. 678, 78th Cong., 2d Sess. 53 (1944) (ICC "is not intended to be a passive arbiter but the 'guardian of the general public interest', with a duty to see that this interest is at all times effectively protected") (footnote omitted).

⁵⁶ See *Burlington Northern -- Control -- St. Louis-S.F., supra note 37, 360 I.C.C. at 957* (imposing traffic protective conditions for two years to give carriers "time to adjust to the new competitive climate").

⁵⁷ In light of this disposition, we do not reach Lamoille Valley's claim that the ICC imposed an undue burden of proof on railroads seeking protective conditions. It is implicit in our analysis, however, that HN23[↑] if the Commission imposes too heavy a burden on competing railroads to prove the need for protective conditions, a reviewing court may find that the Commission has neither met its affirmative duty to determine whether the unconditioned merger is consistent with the public interest nor developed substantial evidence to support its conclusions. Cf. ICC v. J-T Transp. Co., 368 U.S. 81, 89-90, 82 S. Ct. 204, 7 L. Ed. 2d 147 (1961):

Had the Commission, having drawn out and crystallized the [] competing interests [of railroads and shippers], attempted to judge them with as much delicacy as the prospective nature of the inquiry permits, we should have been cautious about disturbing its conclusion.

But . . . we are under no compulsion to accept its reading where, as here, we are convinced that it has loaded one of the scales. . . . By assigning to the applicants the burden of proving the inadequacy of existing services, the Commission [improperly] favored the interests [of competing carriers] at the expense of the shippers'

substantial evidence in the record. It has not, in short, exercised that modicum of care that would permit us to approve its decision as "reasonable."⁵⁸

[[**86] V. LABOR PROTECTIVE CONDITIONS

[HN24](#) In reviewing a railroad merger, the ICC must consider, as part of its public interest determination, "the interest of carrier employees affected by the proposed transaction." 49 U.S.C. § 11,344(b) (1) (D). Moreover, *id.* § 11,347 requires the ICC to protect displaced employees:

When a rail carrier is involved in a transaction for which approval is sought under [§ 11,344], the Interstate Commerce Commission shall require the carrier to provide a fair arrangement . . . [for] employees who are affected by the transaction. . . . Notwithstanding this [Act], the arrangement may be made by the rail carrier and the authorized representative of its employees.

The Commission provided suitable arrangements for Maine Central and Boston & Maine employees. It did not consider the interests of, nor provide protection for, employees of competing railroads who may lose their jobs as a result of traffic diversions. See *Boston & Maine Merger*, 366 I.C.C. at 344. Lamotte Valley asserts that this was error. [[**87] [HN25](#)] We affirm the Commission's interpretation of §§ 11,344(b) (4) and 11,347 as requiring it to protect only employees of the merging railroads and not employees of other railroads.

First, the ICC's interpretation of the language of § 11,347 is sensible. The second sentence of § 11,347 provides that "the arrangement may be made by *the rail carrier* and the authorized representative of *its* employees." (Emphasis added.) The phrase "the rail carrier" presumably refers back to the preceding sentence and thus includes only "a rail carrier . . . involved in the transaction." But an arrangement between "a rail carrier involved in the transaction" and "its employees" will not protect employees of other carriers. Thus, Congress must not have contemplated protecting employees of nonapplicant railroads. As for § 11,344(b) (4), it was first enacted at the same time as § 11,347, and the two sections should be construed *in pari materia*.

The legislative history of § 11,347 strongly supports this interpretation. See [Missouri-Kansas-Texas Railroad v. United States](#), 632 F.2d 392, 411-12 (5th Cir. 1980) [[**88]] (reviewing the legislative history), aff'd *Burlington Northern -- Control -- St. Louis-S.F.*, *supra* note 37, 360 I.C.C. at 948-50, cert. denied, 451 U.S. 1017, 101 S. Ct. 3004, 69 L. Ed. 2d 388 (1981).⁵⁹

Second, while there may be policy reasons for treating all railroad employees alike regardless of their employer, the Commission's interpretation is supported by considerations of practicality and administrative [*324] economy. As the Commission explained in *Burlington Northern*, 360 I.C.C. at 949-50:

It is difficult enough to determine which employees of a railroad involved in the transaction have been adversely affected by that transaction. To require a determination that employees of another competing carrier have also been affected by a merger [[**89]] . . . would place an impossible burden on the party required to rebut the allegation.

Third, the Commission has consistently interpreted § 11,347, since its original enactment in 1940, to exclude employees of non-applicant railroads.⁶⁰ [[**90]] That consistent interpretation is entitled to deference, especially

⁵⁸ We see no need to provide any protection for Canadian National pending the ICC's reconsideration. Guilford is unlikely to downgrade interchange service while the Commission is still considering the need for protective conditions.

⁵⁹ See generally [New York Dock Ry. v. United States](#), 609 F.2d 83, 86-90 (2d Cir. 1979) (reviewing at length the development of § 11,347 and predecessor provisions).

⁶⁰ See [Missouri-Kansas-Texas Railroad v. United States](#), 632 F.2d at 411 n.44 (citing ICC cases); see also *CSX -- Control -- Chessie System*, *supra* note 21, 363 I.C.C. at 590-91.

since Congress implicitly approved that interpretation in revising and reenacting § 11,347 in 1976.⁶¹ See [NLRB v. Bell Aerospace Co., 416 U.S. 267, 275, 40 L. Ed. 2d 134, 94 S. Ct. 1757 \(1974\)](#) (additional deference to an agency's statutory interpretation is due "where Congress has reenacted the statute without pertinent change") (footnote omitted).

Finally, other courts that have addressed this issue have consistently approved the Commission's interpretation, including the only court to consider the issue since the 1976 amendments to the Interstate Commerce Act. See [Missouri-Kansas-Texas Railroad v. United States, 632 F.2d 392, 411-12 \(5th Cir. 1980\)](#) (a thorough opinion on which our own analysis relies heavily), cert. denied [**91] , 451 U.S. 1017, 101 S. Ct. 3004, 69 L. Ed. 2d 388 (1981); [Florida East Coast Railway v. United States, 259 F. Supp. 993, 1019 \(M.D. Fla. 1966\)](#) (3-judge court), aff'd mem. in part and appeal dismissed in relevant part as moot, 386 U.S. 544, 87 S. Ct. 1299, 18 L. Ed. 2d 285 (1967); [Railway Labor Executives' Association v. United States \(RLEA 2d\), 226 F. Supp. 521, 524-25 \(E.D. Va.\)](#) (3-judge court), vacated and remanded per curiam, [379 U.S. 199, 85 S. Ct. 307, 13 L. Ed. 2d 338 \(1964\)](#).⁶²

[**92] VI. PROCEDURAL ISSUES

A. Must Mr. Mellon Join the Merger Application?

Guilford sought ICC permission to acquire the Boston & Maine under 49 U.S.C. § 11,343(a) (5), which [HN26](#)[↑] requires ICC approval for:

acquisition of control of a carrier by a person that is not a carrier but that controls any number of carriers.

Id. § 11,343(b), in turn, provides:

A person may carry out a transaction referred to in subsection (a) . . . only [*325] with the approval and authorization of the Commission.

Section 11,343(a) (5) certainly covers Guilford, as a "person" who "controls any number of carriers" (Guilford already controlled the Maine Central) and seeks control of another carrier (the Boston & Maine). It also covers Timothy Mellon, the sole owner of Guilford, who also "controls" the Maine Central (through Guilford) and seeks to control the Boston & Maine.⁶³

Pennsylvania R.R. -- Merger -- [New York Cent. R.R., 347 I.C.C. 536, 546 \(1974\)](#), cited by Lamoille Valley, is not to the contrary, despite the ICC's use of certain broad language. The Commission there construed the predecessor to § 11,347 to cover employees of wholly-owned subsidiaries of the merging railroads. It had no occasion to address the status of employees of independent railroads.

⁶¹ The 4R Act, *supra* note 5, § 402(a), 90 [Stat. at 62](#), added the requirement that labor protective conditions be "no less protective of the interests of employees than those heretofore imposed pursuant to this [section]." Section 402(a) was a last-minute addition to the statute, and there is no legislative history dealing with it. See [New York Dock Ry. v. United States, 609 F.2d 83, 93 \(2d Cir. 1979\)](#). This provision was rephrased to its present form without substantive change in the 1978 recodification of the Interstate Commerce Act. See 49 U.S.C. note preceding § 10, [101](#) (no substantive change intended); *id.* § 11,347 revision note (explaining wording changes).

⁶² But see [Soo Line R.R. v. United States, 280 F. Supp. 907, 921-24 \(D. Minn. 1968\)](#) (3-judge court); [United Transp. Union, Local Lodge No. 693-E v. Burlington N., Inc., 319 F. Supp. 451, 453-54 \(D. Minn. 1970\)](#) (following *Soo Line*).

[Railway Labor Executives' Ass'n v. United States \(RLEA 1st\), 216 F. Supp. 101 \(E.D. Va. 1963\)](#) (3-judge court), cited by Lamoille Valley, is distinguishable. It involved a joint facility run by a merging railroad and a non-merging railroad. The court held that employees working at the facility, who were nominally employees of the non-merging railroad but in fact worked for both railroads, were entitled to protection. See *id. at 103*. A year later, the same court, including two of the three judges that decided *RLEA 1st*, upheld the ICC's refusal generally to protect employees of non-merging railroads in *RLEA 2d*.

⁶³ [HN27](#)[↑] The broad definition of control in 49 U.S.C. § 10, [102\(7\)](#) includes indirect control such as that enjoyed by Mr. Mellon:

[**93] The ICC, however, did not require Mr. Mellon to join the control application. The Commission explained that joinder would serve no useful purpose because it already had all the information it needed:

The only issue raised by any of the parties over Mr. Mellon's presence as an applicant concerns an asserted need for disclosure of his personal finances. We agree with the Administrative Law Judge, however, that Mr. Mellon's personal finances have nothing to do with this transaction. Nor has there been any suggestions of past impropriety on Mr. Mellon's part or the hint of any likelihood of future abuses. Thus, requiring Mr. Mellon to join as an applicant would be a meaningless gesture that would not advance the statute's purpose of assuring that the Commission has available to it all information relevant to its determination of the consistency of the proposed transaction with the public interest. . . .

Boston & Maine Merger, 366 I.C.C. at 325. The Commission conceded that "a literal reading of [49 U.S.C. 11343](#) and some precedent" suggested that joinder was mandatory, *id.* at 324, but the Commission believed [**94] the statute gave it discretion not to insist on pointless joinder.⁶⁴

Lamoille Valley and Providence & Worcester assert that the joinder provisions are mandatory, not discretionary, and that unless Mr. Mellon joins the control application, the ICC has no authority to approve the merger.

We are not convinced that the ICC has correctly interpreted § 11,343. The section speaks in mandatory language -- a person may acquire control of two or more carriers "only" with the ICC's approval.⁶⁵ [**96] Moreover, the Commission has for 40 years, until its sudden reversal of position in this case, consistently construed § 11,343 as mandatory. The Commission's interpretation was early upheld in [United States v. Marshall Transport Co., 322 U.S. 31, 88 L. Ed. 1110, 64 S. Ct. 899 \(1944\)](#). [**95] In *Marshall Transport*, a division of the ICC had approved the purchase of one carrier by a second carrier that was controlled, in turn, by a non-carrier. The full Commission reversed for failure of the non-carrier to join the application. The Supreme Court affirmed the ICC's view that the Commission was "without authority" to approve the transaction. *Id. at 42*. Similar reasoning would suggest that Mr. Mellon must join Guilford's application here.⁶⁶

As a policy matter, the Commission's distaste for pointless joinder has obvious appeal. [*326] On the other hand, it is hard to see why joinder would cause much harm.⁶⁷ Also, mandatory joinder would ensure that the parties fully

"control" . . . includes actual control, legal control, and the power to exercise control, through or by (A) common directors, officers, stockholders, a voting trust, or a holding or investment company, or (B) any other means.

⁶⁴ ICC Chairman Taylor, concurring, believed that § 11,343 required joinder, but agreed that "this issue has no effect on the merits" because Mr. Mellon's personal finances were not relevant to the Commission's decision. *Boston & Maine Merger*, 366 I.C.C. at 358 (Taylor, Chmn., concurring).

⁶⁵ The predecessor to § 11,343, 49 U.S.C. § 5(5) (1976) (which § 11,343 "restates without substantive change"; see 49 U.S.C. note preceding § 10, [101](#)) is even more explicit:

It shall be unlawful for any person, except . . . [with the approval and authorization of the Commission], to accomplish or effectuate . . . the control or management in a common interest of any two or more carriers, however such result is attained, whether directly or indirectly, by use of common directors, officers, or stockholders, a holding or investment company or companies, a voting trust or trusts, or in any other manner whatsoever.

⁶⁶ It is possible to distinguish *Marshall Transport* as not involving an explicit ICC finding that joinder would serve no useful purpose. The ICC, however, fails in its broader attempt to distinguish *Marshall Transport* as merely affirming the Commission's discretionary power to require appropriate persons to join a control application. *Marshall Transport* addresses both whether the Commission *may* require Union to join the control application, see [322 U.S. at 36-40](#), and whether the Commission *must* do so, see *id. at 40-42*. The Court's affirmative answer to the second issue was necessary to its decision because the full Commission had overruled its own division on that basis.

⁶⁷ It appears that Mr. Mellon did not join the control application in order not to disclose his personal finances. See *Boston & Maine Merger*, 366 I.C.C. at 325. As noted in text, however, Mr. Mellon could have asked the Commission to exempt him from its jurisdiction under 49 U.S.C. § 10, [505\(a\)](#). Moreover, he may not have had to answer questions about his finances even if he

inform the ICC of the actual chain of control of a carrier. Moreover, the financial status of the ultimate owner will often be relevant [**97] to a control application. A financially weak owner may drain funds from a carrier to pay other bills or lack the capital needed to expand to serve new areas.

A full resolution of this question would require close scrutiny of the legislative history plus consideration of the troublesome question of how much deference, if any, courts should give to an agency's interpretation of [**98] its governing statute when that interpretation overrules a longstanding contrary interpretation. Fortunately, we need not attempt that task here. Had the ICC required Mr. Mellon to join Guilford's control application, he presumably would have applied for waiver under 49 U.S.C. § 10,[505\(a\)](#), which provides:

[HN28](#)[] In a matter related to a rail carrier . . . subject to . . . this [Act], the Commission *shall* exempt a person . . . when the Commission finds that the application of a provision of this [Act] --

- (1) is not necessary to carry out the transportation policy of [49 U.S.C. § 10,101a]; and
- (2) . . . is not needed to protect shippers from the abuse of market power.

(Emphasis added.)

In light of the ICC's findings that it had no questions to ask of Mr. Mellon and that joinder would be a "meaningless gesture," the Commission would have had to grant waiver under § 10,[505\(a\)](#). Thus, the Commission's failure to require joinder, if error, is not "prejudicial error," see [5 U.S.C. § 706](#) (last clause), [**99] and is not grounds for reversing the Commission's decision. *Accord Delaware & Hudson Merger*, *supra* note 1, 366 I.C.C. at 424-25 (Simmons, Comm'r, concurring).⁶⁸

B. *The Expedited Procedural Schedule*

As background for Canadian National's challenge to the ICC's accelerated timetable for considering the merger of the Maine Central and the Boston & Maine, we review the steps leading up to Guilford's filing of its application. Guilford tentatively agreed to buy the Boston & Maine on April 15, 1981 and formally [**100] agreed to the transaction on July 8, 1981. An amended plan of reorganization reflecting the agreement was filed with the ICC on July 15.

Several weeks later, on August 13, 1981, Congress passed [HN29](#)[] the Northeast Rail Service Act of 1981 (NERSA).⁶⁹ NERSA § 1164(a), [45 U.S.C. § 1112\(a\)](#), requires the ICC to decide any merger application involving a bankrupt Northeast railroad within 180 days:

In any [merger] proceeding . . . involving a [Northeast] railroad . . . which was in a bankruptcy proceeding . . . on November 4, 1979, the Commission shall, [*327] with or without a hearing, issue a final decision within a period not to exceed 180 days after receipt of an application. . . .

Congress specifically intended this provision to ensure speedy consideration of Guilford's proposal to acquire the Boston & Maine.⁷⁰

remained as an applicant. See 366 I.C.C. at 325 n.22 ("even if Mr. Mellon were to join as an applicant, he would only be required to file an affidavit stating that he joins in [Guilford's] application").

⁶⁸ The ICC's possible lack of "authority" to approve the merger without joinder of Mr. Mellon does not foreclose a finding of harmless error because that lack is "not strictly jurisdictional in the sense that if the Commission wrongly decides that [Mr. Mellon does not need to join the application], the Commission loses jurisdiction over [Guilford]." [Allegany Corp. v. Breswick & Co.](#), 353 U.S. 151, 171-72, 1 L. Ed. 2d 726, 77 S. Ct. 763 (1957).

⁶⁹ Pub. L. No. 97-35, §§ 1131-1169, 95 Stat. 357, 643-87 (codified in scattered sections of 45 U.S.C.).

⁷⁰ NERSA § 1164(a) was directed at Guilford's proposal to acquire the Boston & Maine and *id.* § 1164(b), [45 U.S.C. § 1112\(b\)](#) (which requires a decision within 180 days on a merger involving a non-bankrupt Northeast carrier that has received certain federal loans), was directed at Guilford's proposal to acquire the Delaware & Hudson. The Conference Committee explained:

[**101] The next day, August 14, 1981, Guilford notified the ICC of its intent to file a control application and requested waiver of the customary 3-month waiting period between notice of intent to file and actual filing. See [49 C.F.R. § 1180.4\(b\) \(1\) \(1982\)](#) (prefiling notice period); *id.* [§ 1180.4\(f\)](#) (waiver provision). The ICC granted the waiver on September 11, 1981. It explained that waiver would further Congress' intent, expressed in NERSA § 1164, that the Commission speedily consider the merger, and that interested parties would not be prejudiced because they should have been aware "for some time" of the proposed merger. The ICC further explained that because it had to issue a decision on the merger within 180 days, it could not follow the usual 31-month procedural schedule in [49 C.F.R. § 1180.4 \(1982\)](#). It promised to issue an "expedited procedural schedule" after receiving the application.⁷¹ [**102] Guilford filed its application on October 28, 1981, and one week later, on November 4, 1981, the ICC issued the promised 180-day schedule. The schedule gave competing railroads 60 days (instead of the usual 90) to file responsive applications.⁷²

Canadian National alleges that the ICC's actions left it without enough time properly to prepare a responsive application. It argues that the ICC abused its discretion in waiving the 3-month prefiling notice period and that the expedited procedural schedule was a "rule" within the meaning of the APA, [5 U.S.C. §§ 551\(4\), 553](#), and was improperly issued without notice and comment.

At a practical level, we think that the ICC did an admirable job in compressing its procedures into a minimum time without undue prejudice to the parties. Canadian National makes only one concrete suggestion on what the Commission should have done differently -- the Commission should have required an extended prefiling notice period to compensate for the accelerated 180-day post-filing schedule mandated by Congress. That suggestion -- though perhaps technically consistent with NERSA § 1164 -- runs directly counter to Congress' intent that the merger be [**103] considered quickly.

Turning to Canadian National's legal argument, we find no abuse of discretion in the Commission's decision to compress the proceedings slightly by waiving the 3-month prefiling notice period. The Commission's explanation for its action is reasonable and consistent with congressional intent. We can ask no more. We also hold that the procedural schedule was exempt from notice and comment requirements as a "rule[] of agency procedure." [5 U.S.C. § 553\(b\) \(A\).](#)⁷³

[*328] It is clear, at the outset, that [HN30](#) [↑] the procedural schedule is a "rule," as defined broadly in [5 U.S.C. § 551](#) [**104] [\(4\)](#) to include not only substantive rules but also:

the whole or a part of an agency statement of general or particular applicability and future effect . . . describing the organization, procedure, or practice requirements of an agency.

[HN31](#) [↑] The APA's notice and comment requirements apply, however, only to substantive rules and not to "interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice." *Id.* [§ 553\(b\) \(A\)](#). It is hard to characterize the agency statement at issue here as anything other than a rule of "procedure."

This [bill] provides an expedited review and decision process for the application to acquire the D & H Railroad. The expedited procedures are necessary given the present cash position of the carrier A similar provision is included . . . for the Boston & Maine Railroad.

127 Cong. Rec. S9056, S9066 (daily ed. July 31, 1981) (explanatory statement of the conferees).

⁷¹ Guilford Transp. Indus. -- Control -- Boston & Maine Corp., Finance Docket No. 29,720 (Sub-No. 1), at 2 (Sept. 11, 1981) (not printed); see *Boston & Maine Merger*, 366 I.C.C. at 329 (explaining the Commission's reasoning in more detail and noting that Guilford's plans had received "considerable media attention" well before it submitted its prefiling notice).

⁷² Guilford Transp. Indus. -- Control -- Boston & Maine Corp., Finance Docket No. 29,720 (Sub-No. 1) (Nov. 4, 1981) (not printed), J.A. at 1.

⁷³ In light of this conclusion, we do not reach the question whether the ICC had "good cause" under the APA, [5 U.S.C. § 553\(b\) \(B\)](#), to dispense with notice and comment.

That is not quite the end of the inquiry, for [HN32](#)[↑] all procedural rules affect substantive rights to greater or lesser degree. Our cases recognize that when an agency rule "jeopardizes the rights and interests of parties . . . , it must be subject to public comment," even if the rule can in some sense be called "procedural." [*Batterton v. Marshall, 208 U.S. App. D.C. 321, 648 F.2d 694, 708 \(D.C. Cir. 1980\)*](#) [\[**105\]](#) (footnote omitted). The issue is one of degree -- whether the substantive effect is sufficiently grave so that notice and comment are needed to safeguard the policies underlying the APA.

In applying this general principle to this case, we begin by noting that the time schedule at issue here is definitely at the procedural end of a spectrum running from "procedural" to "substantive." Thus, we put to one side cases like *Batterton* where a rule has definite substantive consequences but can arguably be called either "procedural" or "substantive," and a court must decide which it is.⁷⁴ When a rule prescribes a timetable for asserting substantive rights, we think the proper question is whether the time allotted is so short as to foreclose effective opportunity to make one's case on the merits. This standard allows an agency ample discretion to structure its proceedings as it sees fit. However, when an agency abuses that discretion by creating extreme procedural hurdles that foreclose fair consideration of the underlying controversy, a court, by remanding for notice and comment, can ensure that the agency explores the substantive consequences of its "procedural" rule.

[\[**106\]](#) We do not think that Canadian National's ability to file a responsive application was substantially abridged by the Commission's procedural schedule. The ICC was constrained by Congress to reach a decision within 180 days. It gave competing railroads 75 days to file a responsive application (60 days plus a two-week extension). This allotment -- almost half of the 180 days that Congress gave the ICC to reach a decision, and only a bit less than the 90 days allowed in a normal 31-month merger proceeding -- was more than sufficient to permit Canadian National to develop its response. *Accord Ranger v. FCC, 111 U.S. App. D.C. 44, 294 F.2d 240, 244 (D.C. Cir. 1961)* (30-day time limit for filing competing license application); *Pennsylvania v. United States, 361 F. Supp. 208, 220-22 (M.D. Pa.)* (3-judge court) (accelerated railroad abandonment procedures), aff'd mem., 414 U.S. 1017, 94 S. Ct. 440, 38 L. Ed. 2d 310 (1973).⁷⁵

[\[**107\] \[*329\]](#) C. ICC Jurisdiction over Holding Company Securities

To buy the Maine Central and later the Boston & Maine, Timothy Mellon created a holding company -- Guilford -- and had Guilford issue stock and bonds to him in return for the cash to make the purchases with. He neither sought nor obtained ICC approval for these transactions.

[HN33](#)[↑] Under 49 U.S.C. § 11,[301\(b\) \(1\)](#), a "carrier" -- defined in *id.* § 11,[301\(a\) \(1\)](#) to include "a corporation organized to provide transportation by rail" -- must obtain ICC approval before issuing securities, and unapproved

⁷⁴ In such cases, courts inquire into how serious the substantive consequences are. See *Batterton, 648 F.2d at 708* (agency's choice of a methodology for calculating unemployment rates affects federal funding levels and thus "trenches on substantial private rights"); *National Ass'n of Home Health Agencies v. Schweiker, 223 U.S. App. D.C. 209, 690 F.2d 932, 949 (D.C. Cir. 1982)* (following *Batterton*), cert. denied, 459 U.S. 1205, 103 S. Ct. 1193, 75 L. Ed. 2d 438 (1983); *Pickus v. United States Bd. of Parole, 165 U.S. App. D.C. 284, 507 F.2d 1107, 1112 (D.C. Cir. 1974)* (parole guidelines have a "substantial effect" on parole decisions), overruled in part on other grounds in *Califano v. Sanders, 430 U.S. 99, 51 L. Ed. 2d 192, 97 S. Ct. 980 (1977)*; *Lewis-Mota v. Secretary of Labor, 469 F.2d 478, 482 (2d Cir. 1972)*; *National Motor Freight Traffic Ass'n v. United States, 268 F. Supp. 90, 96 (D.D.C. 1967)* (3-judge court), aff'd mem., 393 U.S. 18, 89 S. Ct. 49, 21 L. Ed. 2d 19 (1968).

⁷⁵ See also *Hall v. EEOC, 456 F. Supp. 695, 701-02 (N.D. Cal. 1978)*; cf. *Kessler v. FCC, 117 U.S. App. D.C. 130, 326 F.2d 673, 680-81 (D.C. Cir. 1963)* (temporary halt on processing new radio license applications); *Buckeye Cablevision, Inc. v. United States, 438 F.2d 948, 952-53 (6th Cir. 1971)* (freeze on cable TV applications).

For a case where a "procedural" rule did preclude a party from making its case on the merits and thus required notice and comment, see *Brown Express v. United States, 607 F.2d 695, 701-02 (5th Cir. 1979)* (motor carrier seeking temporary 30-day operating authority no longer needs to notify competitors that it is applying for temporary authority) (court relies, however, on a "substantial impact" test, see cases cited in note 74 *supra*).

securities are "void." Providence & Worcester asserts that Guilford, as a holding company created to acquire railroad properties, is a "carrier" subject to § 11,[301](#) and that Guilford's non-approved securities are void. The ICC responds that it lacks jurisdiction to review Guilford's issuance of securities because Guilford is not a "carrier" but merely a holding company that owns carriers.

We uphold the ICC's interpretation of § 11,[301\(b\) \(1\)](#) as not granting it jurisdiction over securities issued [****108**] by a holding company. Although the Commission very early took a view similar to that now espoused by Providence & Worcester, its current interpretation has not changed since 1960.⁷⁶ That long-held interpretation is entitled to substantial deference, and we find it "sufficiently reasonable to be accepted." *Federal Election Commission v. Democratic Senatorial Campaign Committee*, 454 U.S. 27, 39, 70 L. Ed. 2d 23, 102 S. Ct. 38 (1981).

The language of § 11,[301](#) does not inexorably command either result. But other provisions of the Act show that Congress understood the difference between a "carrier" and a holding company that owns a carrier. In particular, 49 U.S.C. § 11,348 provides that when the ICC approves a merger in which "a person not a carrier" acquires control of two or more carriers, [****109**] "the person is subject, as a carrier, to [§ 11,[301](#)]." ⁷⁷ Thus, if Congress had wanted to include holding companies within the ambit of § 11,[301](#), it knew how to say so. Moreover, the ICC's construction preserves independent force for § 11,348. If § 11,[301](#) covers holding companies that own carriers, § 11,348 would be superfluous.

It is true that the ICC's interpretation permits a carrier to exempt itself from the Commission's securities jurisdiction by inserting a holding company between itself and its stockholders. But the Securities and Exchange Commission will continue to regulate the holding company's issuance of securities to the public. Thus, the primary purpose of § 11,[301](#) [****110**] -- to protect investors, see *Association of American Railroads v. United States*, 195 U.S. App. D.C. 371, 603 F.2d 953, 968-70 (D.C. Cir. 1979) (reviewing legislative history) -- will not be lost. Only the secondary purpose -- to ensure that railroads have sound finances -- is weakened. There is no evidence in the record that this limited loophole has caused significant problems for the Commission in the past.⁷⁸ [****111**] Thus, the apparent flaw in the statutory scheme gives us [***330**] no warrant to reject the ICC's construction of its governing statute.⁷⁹

D. Failure to Apply for Control of the Vermont & Massachusetts Co.

The Vermont & Massachusetts line is a 56-mile segment of the Boston & Maine's main east-west line, nominally owned by the Vermont & Massachusetts Co., but leased to the Boston & Maine under a 999-year lease and thus for all practical purposes owned by the Boston & Maine. The Vermont & Massachusetts Co. owns no other significant property. Prior to the merger, it was owned 37% by the Boston & Maine, 37% by Guilford, 24% by Providence & Worcester, and 2% by others. Thus, Guilford, when it acquired the Boston & Maine, would automatically acquire control of the Vermont & Massachusetts Co. as well.

⁷⁶ See Stock of Atl. Coast Line, 131 I.C.C. 345 (1927), overruled in Woods Indus. -- Control -- United Transps., Inc., 85 M.C.C. 672, 678 (1960).

⁷⁷ See also 49 U.S.C. § 10,[102\(7\)](#) (defining "control" to include "the power to exercise control through . . . a holding or investment company"); *id.* § 11,343(a) (5) (ICC must approve "acquisition of control of a carrier by a person that is not a carrier but that controls any number of carriers").

⁷⁸ See *Brotherhood of Ry. Clerks, Consol. Sys. Bd. of Adjustment 46 v. Burlington N., Inc.*, 671 F.2d 1085 (8th Cir. 1982) (affirming the ICC's approval of Burlington Northern's plan to establish a holding company to hold its rail properties; all parties assumed that the holding company would be exempt from ICC supervision under § 11,[301](#)); cf. *United Parcel Serv. v. United States*, 612 F.2d 277 (7th Cir. 1979) (assuming that a holding company that owns a carrier is not itself a carrier), cert. denied, 445 U.S. 971, 100 S. Ct. 1664, 64 L. Ed. 2d 248 (1980).

⁷⁹ We express no view on whether the ICC may in some circumstances assert jurisdiction under § 11,[301](#) over a carrier that seeks to avoid ICC regulation of its securities by setting up a holding company.

Providence & Worcester objects that Guilford failed to file a formal application to control the Vermont & Massachusetts Co. The ICC found that Guilford had made a technical misstep but decided to consider and approve Guilford's [**112] control of the Vermont & Massachusetts Co. on the merits. See *Boston & Maine Merger*, 366 I.C.C. at 347-48, 355. Providence & Worcester was not prejudiced by this course of action. It had actual notice of Guilford's control proposal and indeed submitted its own responsive application to purchase the Vermont & Massachusetts line, which the ICC considered and rejected. Providence & Worcester raises no substantive objections to the ICC's reasoning.

Under these circumstances, we see no harm in the ICC's waiver of a formal application. Taking, as we must, "due account . . . of the rule of prejudicial error," [5 U.S.C. § 706](#) (last clause), we affirm the Commission.

E. Premature Control of the Boston & Maine

Guilford's acquisition agreement with the Boston & Maine gave Guilford limited control over the Boston & Maine's activities -- primarily a veto over major corporate decisions -- pending ICC approval of the transaction. Providence & Worcester asserts that this control was illegal unless and until the Commission approved the acquisition, and that Guilford is therefore unfit to own the Boston & Maine. The ICC responds that Guilford [**113] could not control the Boston & Maine because the Boston & Maine, as a bankrupt, was subject to the ultimate authority of the reorganization court.

We think the parties' dispute over whether Guilford crossed the ill-defined line between control and noncontrol is largely beside the point. [HN34](#)[] Premature control "does not automatically defeat a transaction." *Missouri Pacific Railroad -- Control -- Chicago & Eastern Illinois Railroad*, 327 I.C.C. 279, 322 (1965), aff'd sub nom. [Illinois Central Railroad v. United States](#), 263 F. Supp. 421 (N.D. Ill. 1966) (3-judge court), aff'd mem., [385 U.S. 457](#), 87 S. Ct. 612, 17 L. Ed. 2d 509 (1967). Rather, it is simply a factor in the Commission's overall decision whether a merger is in the public interest. See [Gilbertville Trucking Co. v. United States](#), 371 U.S. 115, 127, 83 S. Ct. 217, 9 L. Ed. 2d 177 (1962).

Here, the Commission found that the agreement was reasonable and entered into in good faith:

The negative covenants of the acquisition agreement are no more than standard [**114] safeguards to ensure that B&M would emerge from reorganization in a position substantially similar to the one it was in at the time of the agreement. It is hardly unreasonable for [Guilford] to obtain contractual assurances that it would get what it bargained for.

Boston & Maine Merger, 366 I.C.C. at 327-28. Whether or not these "standard safeguards" technically violated § 11,343(b)'s requirement that Guilford obtain ICC approval before assuming control of the Boston & Maine -- a question we do not decide -- there is no evidence of the overreaching or bad faith that would justify the [*331] Commission in treating premature control as a major factor in its decision. Thus, the Commission's error, if any, was of no significance.⁸⁰

⁸⁰ We find no merit in Providence & Worcester's remaining procedural quibbles. [HN35](#)[] The ICC has broad discretion in controlling its own calendar. See [Nader v. FCC](#), 172 U.S. App. D.C. 1, 520 F.2d 182, 196 (D.C. Cir. 1975). It did not abuse that discretion in consolidating consideration of the reorganization plan with consideration of the merger proposal. The proceedings were clearly "interdependent." *Boston & Maine Merger*, 366 I.C.C. at 330.

Nor did the Commission abuse its discretion in failing to consolidate Guilford's later-filed application to control the Delaware & Hudson with the instant application. Rather, the Commission simply adhered to its established and reasonable policy that "the proper forum for considering cumulative impacts and crossover effects [due to multiple transactions] is in a later proceeding." [49 C.F.R. § 1180.1\(g\) \(1982\)](#). Moreover, since the Commission was bound to decide the Boston & Maine application within 180 days come hell, high water, or consolidation, consolidation would have left the Commission only 90 days to decide the later-filed Delaware & Hudson application.

[**115] VII. CONCLUSION

The ICC's approval of the Maine Central/Boston & Maine merger as a whole is *affirmed*. We reverse the Commission's decision denying the protective conditions sought by Lamoille Valley and Canadian National, and *remand* to the Commission to reconsider whether protective conditions (not necessarily the ones sought by Lamoille Valley and Canadian National) are needed to preserve competition or adequate transportation. On all remaining issues, the Commission's decision is *affirmed*.

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN7 [down] **Collective Bargaining & Labor Relations, Unfair Labor Practices**

Section 303(a) of the National Labor Relations Act, [29 U.S.C.S. § 187\(a\)](#), makes it unlawful for a labor union to violate § 8(b)(4), [29 U.S.C.S. § 158\(b\)\(4\)](#). When a union strikes, and one purpose of that strike is to obtain or enforce a hot cargo agreement, §§ 8(b)(4) and 303(a) are violated.

711 F.2d 530, *530 U.S. App. LEXIS 26179, **1

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN8 [down] **Collective Bargaining & Labor Relations, Strikes & Work Stoppages**

It is sufficient to find a violation of § 303(a) of the National Labor Relations Act, [29 U.S.C.S. § 187\(a\)](#), that an objective of a union's picketing, although not necessarily the only objective of the picketing, is to force the employer to cease doing business with another employer.

Labor & Employment Law > ... > Unfair Labor Practices > Union Violations > Secondary Activities

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

HN9 [down] **Union Violations, Secondary Activities**

The damage portion of § 303(b) of the National Labor Relations Act, [29 U.S.C.S. § 187\(b\)](#), provides that whoever shall be injured in his business or property by reason of any violation of § 303(a) may sue therefor. As the words "by reason of" make clear, § 303(b), [29 U.S.C.S. § 187\(b\)](#), requires that there be a direct causal nexus between the unlawful secondary activity and the injury suffered by plaintiff. If plaintiff would have been harmed regardless of the § 8(b)(4), [29 U.S.C.S. § 158\(b\)\(4\)](#), violation, then of course there can be no recovery.

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN10 [down] **Collective Bargaining & Labor Relations, Strikes & Work Stoppages**

To receive a damage award under § 303(b) of the National Labor Relations Act, [29 U.S.C.S. § 187\(b\)](#), plaintiffs must demonstrate not that an unlawful hot cargo clause was an object of the concerted activity at issue, but that it was a substantial factor in or materially contributed to the union's decision to call and maintain the concerted activity.

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN11 [down] **Collective Bargaining & Labor Relations, Strikes & Work Stoppages**

To be held liable for the actions of individuals, a union must be shown to have instigated, supported, ratified or encouraged the particular activities in question. Calling a strike is not, by itself, sufficient to make the union responsible for all illegal conduct committed during that strike. In addition, when damages are claimed against an international union, a district, and a local, a plaintiff must make a separate showing of agency for each defendant.

Civil Procedure > Remedies > Judgment Interest > General Overview

HN12 [down] **Judgment Interest, Prejudgment Interest**

In a proceeding involving unliquidated damages, the decision whether to award prejudgment interest is committed to the sound discretion of the district court.

Civil Procedure > Remedies > Judgment Interest > Prejudgment Interest

Torts > ... > Types of Damages > Judgment Interest > General Overview

Civil Procedure > Remedies > Judgment Interest > General Overview

HN13 [] **Judgment Interest, Prejudgment Interest**

A district court is to consider four factors in determining whether an award of prejudgment interest is appropriate: (1) Whether claimant has been less than diligent in prosecuting the action; (2) whether defendant has been unjustly enriched; (3) whether an award would be compensatory; and (4) whether countervailing equitable considerations militate against a surcharge.

Contracts Law > Remedies > Restitution

HN14 [] **Remedies, Restitution**

Unjust enrichment has been defined as follows: To the extent the defendant has had the free use of the income-producing ability of the plaintiffs' money without having to pay for it, he has been unjustly enriched. To divest the defendant of this unjustified benefit is not to penalize him, for it has been determined by the trial that it was never rightfully his.

HN15 [] **Labor, Nonstatutory Exemptions**

The United States Supreme Court has responded to the conflict between antitrust and labor laws by creating two exemptions from the coverage of the antitrust laws for labor organization activities. The first, the so-called "statutory" exemption, protects the union from liability when it acts alone. The second "non-statutory" exemption is

much less clear, but it generally applies when a union, acting with a non-labor party, seeks to attain goals which are mandatory or permissive subjects of bargaining under the National Labor Relations Act, unless the union acts with a predatory anti-competitive purpose. The Supreme Court has held that the non-statutory exemption does not shield a union when an employer seeks injunctive and declaratory relief for injuries caused by the union's violation of § 8(e) of the National Labor Relations Act, [29 U.S.C.S. § 158\(e\)](#), the hot cargo provisions.

Opinion

[*532] OPINION OF THE COURT

ADAMS, Circuit Judge.

During the latter part of 1974, the United Mine Workers of America ("UMWA" or "the Union") and the Bituminous Coal Operators Association ("BCOA"), a multi-employer bargaining association of coal producers, renegotiated the National Bituminous Coal Wage Agreement ("NBCWA"). The agreement contained a provision which prohibited coal haulers who were not signatories to the 1974 NBCWA [\[*2\]](#) from transporting coal from BCOA mines. A group of coal haulers brought this action seeking damages under the federal labor and antitrust laws for injuries allegedly caused by that clause. The district court concluded that the Union was liable under section 303 of the National Labor Relations Act, [29 U.S.C. § 187](#), but that the UMWA's conduct fell within the non-statutory labor exemption from the Clayton Act's treble damage provision. [15 U.S.C. § 15](#).

In this appeal, the Union does not question the determination of liability under section 301, but it does advance a number of contentions regarding the damage calculations under that section. The coal haulers have cross-appealed to contest the district court's holding that the Union is exempt from antitrust liability. We will affirm the district court on the antitrust issues and remand for further findings with respect to the damage calculations under section 301.

I.

* Honorable Dickinson R. Debevoise, United States District Court for the District of New Jersey, sitting by designation.

The master collective bargaining agreement that covers unionized mines in Western Pennsylvania is the National Bituminous Coal Wage Agreement. Prior to 1974, the NBCWA did not contain a provision that explicitly defined **[**3]** the work jurisdiction of the UMWA. When the Union began its preparations in 1974 to renegotiate the 1971 NBCWA, due to expire on November 11, 1974, one of its objectives was to eliminate the use of subcontractors to haul coal from the mines in order to ensure that the Union members would perform this task. The UMWA's initial set of contract proposals for its negotiations with the BCOA included a provision that would have banned all such subcontracting. The Union also sought new provisions regarding mine safety, sick leave, supplemental unemployment benefits and an overhaul of the grievance and arbitration procedures.

Formal negotiations with the BCOA began on September 3, 1974. They proceeded slowly because so much of the contract was being renegotiated. Forty-three separate sessions were held and the 1971 contract was ultimately expanded from 56 pages to 129 pages. On November 4, a strike became inevitable: the UMWA's constitution mandates a policy of "No Contract, No Work," and a minimum of eight days is required to conduct a secret ballot vote of the union membership on any proposed contract. The BCOA first agreed to the idea of including a work jurisdiction clause in **[*533] **[**4]**** the agreement of November 9, but rejected the union's proposal of a ban on all subcontracting. As an alternative, the BCOA proposed what ultimately became Article II(g) of the agreement, limiting the subcontracting of coal hauling to "contractors employing members of the UMWA under the [NBCWA]." The district court concluded that this provision violated Section 8(e) of the NLRA because it was a "hot cargo" clause, an agreement between an employer and a union that the employer will cease doing business with a third party. The court also determined that the union's original proposal would not have violated the Labor Act.

When the parties opened their bargaining session on November 11, 1974, the day before the 1971 agreement was to expire, they had reached agreement on only a few points. Issues still unresolved included mine safety, wages, shift differentials, certain fringe benefits, cost of living adjustments, pension contributions and health benefits. Many portions of Article II, the "Scope and Coverage" provisions, also remained unresolved, including Article II(g), the transportation of coal clause.

The UMWA strike against the BCOA mines began at 12:01 a.m. on November 12, 1974, when **[**5]** the 1971 agreement officially expired. A tentative agreement was reached on all issues by the negotiators on the morning of November 13, but the union leadership sought to renegotiate five issues in that agreement before having its members vote on the proposal. Not reconsidered was the clause dealing with the transportation of coal. The BCOA strike ended on December 6, 1974, when the agreement was ratified by the union membership and a final contract signed.

Many mines did not, however, reopen on that date. The coal mine construction companies and the unionized coal hauling companies who were signatories to the expired 1971 NBCWA, but who were not part of the BCOA, had not yet signed a new agreement with the UMWA. The union construction workers picketed the mines to protest the miners' returning to work before the construction contract was settled. Because many mine workers would not cross those picket lines, several BCOA mines did not reopen until December 23, when the construction agreement was signed.

During the time the UMWA was preparing for its negotiations with the BCOA, it also engaged in sporadic discussions with a group of the coal hauling companies that had signed **[**6]** the 1971 NBCWA. This group, the Western Pennsylvania Coal Haulers' Association ("WPCHA"), was seeking a separate contract in 1974, rather than have its members continue as signatories to the NBCWA. The negotiations with the WPCHA were not pursued with great vigor by either side until the BCOA strike ended.

In September 1974, the Union sent the WPCHA a copy of its initial proposals for the 1974 NBCWA that had been submitted to the BCOA. On October 11, 1974, the WPCHA made a counter-proposal concerning drivers' wages. On October 30, the WPCHA requested a 30-day extension of the 1971 NBCWA, which the union rejected. Accordingly, on November 12, when the NBCWA expired, the union struck the WPCHA as well as the BCOA. Because the agreement reached on December 6 covered only BCOA employees, the employees of WPCHA members continued their strike until the end of December. At that time, the Union agreed to extend the 1971 NBCWA for 30 days while negotiations continued. After 30 days, no agreement had been reached, and the strike

resumed. Although the record is not explicit, it appears that the WPCHA members ultimately signed the 1974 NBCWA.

When the BCOA strike ended on December 6, 1974, the [**7] Union began its attempts to enforce Article II(g) of the 1974 NBCWA, the clause limiting coal hauling to companies that agreed to sign the 1974 NBCWA. Pickets were set up at BCOA mines using non-signatory haulers; union officials visited those haulers and informed them that they would not be permitted to haul unless they signed the 1974 NBCWA. Picketing and the visitations continued sporadically until the beginning of April 1975. The [*534] number of coal haulers who signed the NBCWA increased from 39 in the 1971 agreement to 366 in the 1974 agreement.

On July 23, 1976, eleven western Pennsylvania coal haulers filed this action against the international, the district, and the local unions (collectively "UMWA" or "the Union"), seeking damages resulting from the Union's attempts to force them to sign the 1974 NBCWA and to prevent BCOA members from using non-signatory haulers to transport coal. The first count, brought under section 303 of the NLRA, [29 U.S.C. § 187](#), alleged that the Union had violated sections 8(b)(4) and 8(e) of the Labor Act, [29 U.S.C. §§ 158\(b\)\(4\) & \(e\)](#), because Article II(g) of the 1974 NBCWA constituted an unlawful [**8] "hot cargo" clause. Counts II and III charged the Union with violating the federal antitrust laws. The district court certified the case as a class action on September 3, 1977.

The district court conducted a bench trial on the liability issues and, on June 27, 1980, found the Union liable on Count I, but exempt from liability on Counts II and III. The case was then referred to a magistrate to calculate damages for the plaintiffs. After hearings, the magistrate entered proposed findings as to the three plaintiffs involved in this appeal. In her report, she considered the union liable for damages from the date the BCOA strike began. She recommended that damages be awarded to the three plaintiffs and that pre-judgment interest be given to Beunier and Henderson, but not to H&H. The district court adopted the magistrate's recommendations in an order dated June 23, 1982.¹ Both sides appealed from that order.

[**9] Three hauling companies are parties to this appeal: Paul Henderson Trucking ("Henderson"), Ronald Beunier Trucking Company ("Beunier") and H&H Hauling Company, Inc. (" H&H"). Henderson, a signatory to the 1971 NBCWA, hauled coal almost exclusively for a BCOA member mine which was closed by the BCOA strike. Henderson at first refused to sign the 1974 agreement, but changed his mind, allegedly as a result of pressure, and signed the agreement on December 30, 1974. He did not haul coal from November 12 to December 30, 1974.

Beunier was a member of the UMWA, but his trucking company was not a signatory to the 1971 agreement. He hauled coal exclusive from BCOA mines, all of which were idled by the BCOA strike. During January and February, 1975, union representatives disrupted Beunier's hauling business, and threatened that he would not be permitted to haul coal if he did not sign the agreement. On February 24, 1975, Beunier signed the 1974 agreement.

H&H Hauling, a group of companies operated by William and Douglas Hanna, is the final plaintiff involved in this appeal. None of Hanna's companies, employees, or customers were affiliated with the UMWA at any time during these proceedings. [**10] None of H&H's businesses was ever asked to sign the 1974 NBCWA, and none of H&H's employees was asked to join the UMWA. A few days after the start of the BCOA strike, a number of individuals wearing UMWA logos on their clothing appeared at the Hanna garage and asked the Hannas not to haul during that strike. Apparently because of fear of reprisals, the mining companies for whom the Hannas hauled shut down during the BCOA strike.

The UMWA admits that it violated sections 8(b)(4) & (e) of the NLRA by seeking to enforce Article II(g) after the 1974 NBCWA was signed by the Union and the BCOA, at the conclusion of the strike against the BCOA. In this appeal, the Union's primary contention is that the district court erred in the damage phase of the case when it imposed liability on the Union for losses the plaintiffs incurred *during* the BCOA strike. The Union also argues that H&H is not entitled to recover any damages because it failed to show that its injuries were caused by agents of the UMWA and that the conduct, even if attributed to the Union, was not within the scope of the [*535] liability

¹ Judge Knox, who presided over the liability trial, died before the magistrate issued her recommendations. The matter was then assigned to another judge.

judgment. In addition, the UMWA claims that the district court abused its discretion **[**11]** in awarding prejudgment interest to Beunier and Henderson. The plaintiffs' cross-appeal challenges the district court's conclusion that the UMWA is exempt from liability under the antitrust laws.

II

Before turning to the merits of the parties' claims, we must first address a jurisdictional matter. This case was certified as a class action by the district court, and there may be as many as a thousand members of the plaintiff class. The order of the district court from which the parties have appealed awards damages to only three coal haulers. Damages have not yet been calculated for any of the other plaintiffs. Inasmuch as all the claims of all the parties had not been finally adjudicated by the district court's order of June 23, 1982, that order was interlocutory, and thus, under most circumstances, it could not be appealed under [28 U.S.C. § 1291](#).² See [Tilden Financial Corp. v. Palo Tire Service, Inc., 596 F.2d 604, 606 \(3d Cir. 1979\)](#).

[12]** Because the order disposed of all the claims of three of the plaintiffs, the district court could have certified it as final, and thus appealable, as to those parties under [Fed. R. Civ. P. 54\(b\)](#).³ Neither side requested certification, however, and instead filed notices of appeal on the theory that we had jurisdiction directly under [section 1291](#). After all briefs had been filed, but before the date scheduled for disposition of the appeals, the parties were made aware of the jurisdictional defect. On April 27, 1983, at the request of the parties, the district court amended its order of June 23, 1982 to include the findings required for a [Rule 54\(b\)](#) appeal. The parties then filed new notices of appeal.

[13]** Both sets of notices now properly confer jurisdiction on this Court. The later notices, filed within 10 days of the district court's amendment of its previous order, are clearly appealable under [Fed. R. App. P. 4\(a\)](#). The earlier notices, although defective when filed, have been cured by the district court's subsequent certification under [Fed. R. Civ. P. 54\(b\)](#). See [Cape May Greene, Inc. v. Warren, 698 F.2d 179 \(3d Cir. 1983\); Tilden Financial Corp. v. Palo Tire Service, Inc., supra](#).

Having determined that we have jurisdiction over all the appeals before us in this matter, we now proceed to consider the merits of the claims presented.

The Union's first challenge to the damage order is to the inclusion of the period of the BCOA strike, November 12 to December 6, 1974, in the calculation of compensable losses suffered by the plaintiffs. The UMWA maintains that an award of damages for that period is not authorized by the liability opinion which, the Union claims, held it liable only for seeking to enforce the unlawful Article II(g) after the 1974 NBCWA was adopted by the BCOA and the Union. In addition, the UMWA argues that an award covering **[**14]** the BCOA strike is improper **[*536]** because its unlawful conduct did not cause the damages incurred during that time. The Union contends that the magistrate and the district court erred by equating the court's initial finding of liability under section 8(b)(4) with the finding of

² [28 U.S.C. § 1291](#):

HN1 [↑] The courts of appeals . . . shall have jurisdiction of appeals from all final decisions of the district courts of the United States, the United States District Court for the District of the Canal Zone, the District Court of Guam, and the District Court of the Virgin Islands, except where a direct review may be had in the Supreme Court.

³ [Rule 54\(b\)](#) provides:

HN2 [↑] (b) Judgment Upon Multiple Claims or Involving Multiple Parties. When more than one claim for relief is presented in an action, whether as a claim, counterclaim, cross-claim, or third-party claim, or when multiple parties are involved, the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties only upon an express determination that there is no just reason for delay and upon an express direction for the entry of judgment. In the absence of such determination and direction, any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties, and the order or other form of decision is subject to revision at any time before the entry of judgment adjudicating all the claims and the rights and liabilities of all the parties.

causation required before damages may be assessed. We reject the Union's first argument, that the damage award exceeded the scope of the liability determination, but find merit in its claim that the record does not contain an adequate finding of causation as required by section 303. Accordingly, we will remand the matter to the district court for further consideration of that issue.⁴

[**15] Section 8(b)(4) [HN3↑](#) of the Labor Act prohibits unions from engaging in "secondary" activities -- striking or threatening one employer for the purpose of putting pressure on another employer to accede to union demands.

⁵ [**16] [HN4↑](#) One common type of secondary activity is represented by the "hot cargo" clause. Hot cargo clauses are prohibited by section 8(e) of the Labor Act, and the use of strikes or other forms of coercion to obtain such clauses is outlawed by section 8(b)(4)(A). ⁶ Section 8(b)(4)(B) [HN5↑](#) makes it unlawful to enforce a hot cargo clause already obtained.⁷

In the present case, the Union argues that the district court's first opinion found the UMWA liable only under section 8(b)(4)(B) for *enforcing* Article II(g) once the 1974 NBCWA went into effect between the BCOA and the Union. Since that provision could not have been enforced before the parties agreed to it, and since there was no explicit finding that the Union violated section 8(b)(4)(A) by seeking an agreement with the BCOA to include Article II(g) in the contract, the UMWA contends that the period of damage liability commenced no earlier than December 6, 1974, when the NBCWA was adopted. To support this position, the Union relies on portions of the liability opinion discussing the Union's conduct after December 6 and the district court's specific references to section 8(b)(4)(B).

The Union's argument fails to take into account the district court's ultimate conclusion [**17] of law with regard to the secondary boycott issues. The district court held [[*537](#)] that the Labor Act was violated by the UMWA's "striking to force *coal mine companies* and coal haulers to sign the agreement. . . ." [494 F. Supp. 701 at 720](#)

⁴ The district court initially referred this case to the magistrate only for a determination of damages. Although causation may more properly be considered an aspect of liability rather than damages, the parties stated at oral argument that they had placed this question before the magistrate and indicated their willingness to allow her to resolve that issue on remand. Thus, the district court may, if it so wishes, return the entire case to the magistrate for her initial recommendations.

⁵ Section 8(b)(4) provides in part:

[HN6↑](#) (b) It shall be an unfair labor practice for a labor organization or its agents --

* * *

(4)(i) to engage in, or to induce or encourage any individual employed by any person engaged in commerce or in an industry affecting commerce to engage in, a strike or a refusal in the course of his employment to use, manufacture, process, transport, or otherwise handle or work on any goods, articles, materials, or commodities or to perform any services; or (ii) to threaten, coerce, or restrain any person engaged in commerce or in an industry affecting commerce, where in either case an object thereof is --

(A) forcing or requiring any employer or self-employed person to join any labor or employer organization or to enter into any agreement which is prohibited by subsection (e) of this section [[29 U.S.C. § 158\(e\)](#)];

(B) forcing or requiring any person to cease using, selling, handling, transporting, or otherwise dealing in the products of any other producer, processor, or manufacturer, or to cease doing business with any other person, or forcing or requiring any other employer to recognize or bargain with a labor organization as the representative of his employees unless such labor organization has been certified as the representative of such employees under the provisions of section 159 of this title: Provided, That nothing contained in this clause (B) shall be construed to make unlawful, where not otherwise unlawful, any primary strike or primary picketing ;

* * *

[29 U.S.C. § 158\(b\)\(4\)](#).

⁶ Subsection (A) contains other prohibitions as well. See text of section 8(b)(4)(A), *supra* note 5.

⁷ Subsection (B) contains other prohibitions as well. See text of section 8(b)(4)(B), *supra* note 5.

(emphasis added). Thus, it must have meant to impose liability under section 8(b)(4) for the period of the BCOA strike. We reach this conclusion even though the district court followed this holding with a citation to section 8(b)(4)(B), the enforcement provision, and not to section 8(b)(4)(A), the clause governing attempts to obtain hot cargo agreements. The district court apparently did not distinguish between the two provisions, and understood section 8(b)(4)(B) to cover "[a] strike to force an employer to sign an agreement which contains a hot cargo clause in violation of section 8(e)." [494 F. Supp. at 710](#). Since the import of the decision by the district court is clearly that the Union's conduct both during and after the BCOA strike constituted unlawful secondary activity, we will not invalidate that determination merely because of a failure to cite all the relevant subsections of the Act.

Our affirmation [\[**18\]](#) of the Union's section 8(b)(4) liability for the period of the BCOA strike does not mandate a conclusion that the plaintiffs are entitled to recover damages under section 303 for all losses that might be attributable to that strike, regardless of causation. Section 303(a) [HN7](#)[↑] makes it unlawful for a labor union to violate section 8(b)(4), [29 U.S.C. § 187\(a\)](#). See [Local 20, Teamsters Union v. Morton](#), [377 U.S. 252, 12 L. Ed. 2d 280, 84 S. Ct. 1253 \(1964\)](#). When a union strikes, and one purpose of that strike is to obtain or enforce a hot cargo agreement, sections 8(b)(4) and 303(a) are violated. [National Labor Relations Board v. Denver Building & Construction Trades Council](#), [341 U.S. 675, 71 S. Ct. 943, 95 L. Ed. 1284 \(1951\)](#). In a companion case to [Denver Bldg. Trades, International Brotherhood of Elec. Workers v. National Labor Relations Board](#), [341 U.S. 694, 95 L. Ed. 1299, 71 S. Ct. 954 \(1951\)](#), the Court stressed that [HN8](#)[↑] "it was [\[**19\]](#) sufficient that *an objective* of the picketing, although *not necessarily the only* objective of the picketing, was to force [the employer] to . . . cease doing business with [another employer]." [341 U.S. at 700](#). In the case before us, Article II(g) of the 1974 NBCWA was a hot cargo clause, and one of the objectives of the BCOA strike was to seek agreement on that clause. Therefore, by engaging in that strike, the UMWA violated section 303(a).

[HN9](#)[↑] The damage portion of section 303, subsection (b), provides that "[w]hoever shall be injured in his business or property by reason [of] any violation of subsection (a) of this section may sue therefor. . . ." [29 U.S.C. § 187\(b\)](#). As the words "by reason of" make clear, section 303(b) requires that there be a direct causal nexus between the unlawful secondary activity and the injury suffered by the plaintiff. See [Frito-Lay, Inc. v. Local Union No. 137, Int'l Brotherhood of Teamsters](#), [623 F.2d 1354](#) (9th Cir.), cert. denied, [449 U.S. 1013, 66 L. Ed. 2d 472, 101 S. Ct. 571 \(1980\)](#); [\[**20\] Mead v. Retail Clerks Int'l Assn.](#), [523 F.2d 1371 \(9th Cir. 1975\)](#); [Riverside Coal Co. v. United Mine Workers of America](#), [410 F.2d 267 \(6th Cir. 1969\)](#); cert. denied, [396 U.S. 846, 90 S. Ct. 89, 24 L. Ed. 2d 95 \(1969\)](#). Cf. [Brunswick Corp. v. Pueblo Bowl-O-Mat](#), [429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 \(1977\)](#) (construing antitrust damage provision containing "by reason of" requirement of [15 U.S.C. § 15](#)); [Zenith Radio Corp. v. Hazeltine Research, Inc.](#), [395 U.S. 100, 23 L. Ed. 2d 129, 89 S. Ct. 1562 \(1969\)](#) (antitrust causation); [Albrecht v. Herald Co.](#), [452 F.2d 124 \(8th Cir. 1971\)](#), on remand from [390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998 \(1968\)](#) (antitrust causation). If the plaintiff would have been harmed regardless of the section 8(b)(4) violation, then of course there can be no recovery.

In [Mead v. Retail Clerks, supra](#), the Ninth Circuit reviewed a factual situation very similar to that in the present case and discussed at some length the proper method of applying the causation requirement of section 303(b) to [\[**21\]](#) such a setting. One of the proposals in the collective bargaining agreement being negotiated between the plaintiffs and the defendant union was an illegal hot cargo clause. All the other terms under consideration such as wages, pensions and a [\[*538\]](#) health and welfare plan were lawful. When the parties could not agree on a contract, the union struck. The district court found that one object of the otherwise lawful strike was to obtain the hot cargo agreement and that the strike caused the plaintiffs' injury. From its findings, the court concluded that the plaintiffs were entitled to damages under section 303(b). The trial court made no findings on the relative importance of the union's various bargaining objectives in bringing about the strike.

The Ninth Circuit reversed, holding that section 303 permits recovery only if the unlawful conduct itself "materially contributed" to or was a "substantial factor" in bringing about the injury.⁸ [523 F.2d at 1376](#). To allow recovery under

⁸ The court stated that illegal conduct was not a "substantial factor" or "material contribut[ion]" to a strike where "[the lawful] objectives, standing alone, would have caused the strike, but the unlawful objective, standing alone, would not. [Restatement](#)

the district court's standard, it concluded, would conflict with the Supreme Court's command that section 303 be used to penalize the union only for illegal secondary activities, and [**22] not for lawful primary conduct. See [523 F.2d at 1378](#), citing [United Mine Workers of America v. Gibbs, 383 U.S. 715, 16 L. Ed. 2d 218, 86 S. Ct. 1130 \(1966\)](#) and [Local 20, Teamsters Union v. Morton, 377 U.S. 252, 12 L. Ed. 2d 280, 84 S. Ct. 1253 \(1964\)](#).⁹ By requiring the employer to show that the union's violation of section 303(a) was a substantial factor in causing the injury, the court preserved the employer's right to compensation for losses proximately caused by the union's unfair labor practice, without jeopardizing the union's right to engage in lawful primary picketing.

[**23] We believe that the Ninth Circuit has correctly interpreted the causation requirement in section 303(b). [HN10](#)¹⁰ To receive a damage award under that provision, the plaintiffs in this case must demonstrate not that the unlawful hot cargo cause was *an object* of the BCOA strike, but that it was a *substantial factor* in or *materially contributed* to the Union's decision to call and maintain that strike.¹⁰ The mere fact that the agreement the Union sought to obtain by striking contained a hot cargo clause is not enough, without more, to support a finding that the clause was a substantial factor.

The prior opinions in this case have not resolved this issue. The district [**24] court's liability opinion is confined to a discussion of sections 8(b)(4) and 303(a). It contains no determination of the proximate cause issue presented by the section 303(b) damage claim. Although the recommendation of the magistrate does state that she found the clause to be a substantial cause of the strike, that finding is based on her conclusion that the district court's liability opinion compelled such a result.

Because, as previously explained, the liability opinion did not address the problem, that opinion cannot control the resolution of that issue. Consequently, we believe that the district court, or the magistrate, must be given an opportunity to consider the matter *de novo* and to take whatever additional evidence is necessary to determine whether the hot cargo clause materially contributed to the decisions to call or maintain the BCOA strike. For that reason, the issue will be remanded.

IV

The Union advances three arguments why H&H should not have been awarded damages for the losses it claims to have suffered. First, there was not sufficient evidence to show that the injury to H&H [[*539](#)] was caused by the Union. Second, even if it could be shown that [**25] the UMWA was responsible, the conduct involved was not the type of activity covered by the district court's liability opinion. Third, the Union claims that H&H did not prove its damages with reasonable certainty. We conclude that there is merit in the Union's first contention. Because it appears that the proper test for determining union agency may not have been applied, the matter will be remanded so that a fuller factual determination can be made.

During the BCOA strike, H&H was visited by men wearing UMWA logos and told to cease operations while the strike continued. In addition, there may have been sporadic picketing at the companies to and from which H&H hauled. These companies did close for portions of the strike. The Union argued before the magistrate that H&H had failed to prove that the persons who threatened the Hannas were agents of the UMWA and that the Union could therefore not be held responsible for their conduct. The magistrate determined that agency was established by the fact that the Union had authorized the strike. This determination was apparently adopted by the district court in its damage order.

(*Second*) of Torts § 432; W. Prosser, Law of Torts § 41 at 238-40 (4th ed. 1971); 2 F. Harper & F. James, Torts § 20.3, at 1121-23 (1956)." [523 F.2d at 1379](#).

⁹ In *Gibbs*, the Court interpreted *Morton* as permitting "recovery under § 303 of damages suffered during a strike characterized by proscribed secondary activity only to the extent that the damages claimed were the proximate result of such activity; damages for associated primary strike activity could not be recovered." [383 U.S. at 731 n.17](#).

¹⁰ If the strike is found to have occurred in distinct phases, with separate causes for the different periods of the work stoppage, the hot cargo clause must be determined to be a substantial factor for each period in which damages are awarded.

[**26] [HN11](#) To be held liable for the actions of individuals, a union must be shown to have "instigated, supported, ratified or encouraged" the particular activities in question. [*Kerry Coal Co. v. United Mine Workers of America, 637 F.2d 957, 963*](#) (3d Cir.), cert. denied, 454 U.S. 823, 70 L. Ed. 2d 95, 102 S. Ct. 109 (1981). See [*Carbon Fuel Co. v. United Mine Workers of America, 444 U.S. 212, 62 L. Ed. 2d 394, 100 S. Ct. 410*](#) (1979). Calling a strike is not, by itself, sufficient to make the Union responsible for all illegal conduct committed during that strike. See [*Kerry Coal, supra*](#). In addition, when damages are claimed against an international union, a district, and a local, the plaintiff must make a separate showing of agency for each defendant. In the present case, there was no finding that any level of the UMWA authorized or in any way supported the individuals who threatened the Hannas. Thus, none of the Union entities, on this record, may be held responsible for that conduct. Accordingly, the matter will be remanded so that the issue of agency can be determined under the standards set forth in *Kerry Coal* and [**27] *Carbon Fuel*.

The Union also claims that the magistrate erred in determining that the injury suffered by H&H was of the type covered by the liability opinion. It maintains that any attempt to shut down H&H was unrelated to the Union's efforts to obtain and enforce the hot cargo agreement, because H&H did not haul from BCOA mines. The magistrate found, however, that H&H lost business because the strike prevented it from hauling coal. If, on remand, the magistrate ascertains that the hot cargo clause was a substantial factor causing the strike, H&H is entitled to recover for losses attributable to the strike. Of course, injury caused by the threats made at the H&H garage is compensable only if the magistrate finds both agency and causation.

The magistrate awarded damage to H&H for losses suffered between November 1974 and April 1975, finding that the BCOA and WPCHA strikes and the other efforts to enforce Article II(g) caused the six month decline in H&H's business. The Union argues that the award of damages after December 6, 1974 is clearly erroneous as too speculative because no direct pressure was put on H&H after that date. We disagree. It was not clearly erroneous for [**28] the magistrate to hold the UMWA liable for those damages during the period of its admittedly unlawful activity. The evidence was sufficient to support the determination that the entire downturn was attributable to the strike. See generally [*Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 263-65, 90 L. Ed. 652, 66 S. Ct. 574 \(1946\)*](#); [*Van Dyk Research Corp. v. Xerox Corp., 631 F.2d 251 \(3d Cir. 1980\)*](#), cert. denied, 452 U.S. 905, 69 L. Ed. 2d 405, 101 S. Ct. 3029 (1981). If, on remand, the magistrate were to determine the agency and substantial cause issues in favor of H&H, [*540] damages could be awarded to H&H for this period.

V

[HN12](#) In a proceeding involving unliquidated damages, such as the present case, the decision whether to award prejudgment interest is committed to the sound discretion of the district court. See [*Lodges 743 & 1746, Intl. Assn. of Machinists v. United Aircraft, 534 F.2d 422, 445-47 \(2d Cir. 1975\)*](#), cert. denied, 429 U.S. 825, 97 S. Ct. 79, 50 L. Ed. 2d 87 (1976); [*Thomas v. Duralite Co., 524 F.2d 577, 589 \(3d Cir. 1975\)*](#); [**29] [*Eazor Express, Inc. v. International Brotherhood of Teamsters, 520 F.2d 951, 973 \(3d Cir. 1975\)*](#), cert. denied, 424 U.S. 935, 47 L. Ed. 2d 342, 96 S. Ct. 1149 (1976); [*Nedd v. United Mine Workers of America, 488 F. Supp. 1208 \(M.D. Pa. 1980\)*](#). Prejudgment interest was awarded to Beunier and Henderson, but not to H&H. Both sides challenge aspects of those determinations on the ground that the district court abused its discretion. The Union disputes the award to Beunier and Henderson; the plaintiffs complain of the denial of such an award to H&H.

As the magistrate correctly noted, [HN13](#) a district court is to consider four factors in determining whether an award of prejudgment interest is appropriate:

- (1) whether the claimant has been less than diligent in prosecuting the action;
- (2) whether the defendant has been unjustly enriched;
- (3) whether an award would be compensatory; and
- (4) whether countervailing equitable considerations militate against a surcharge.

[*Nedd v. United Mine Workers of America, supra, 488 F. Supp. at 1219-20*](#). [**30] The magistrate found that the plaintiffs had been diligent, and that there would be some compensatory value in an award of prejudgment interest, but that such value was offset by the equitable consideration that the Union was unable "to foresee the illegality of [its] 1974 negotiations." Recommendation of Special Master on Damage Claim of H&H Hauling Co., C.A. No. 76-

955 at 9 (Feb. 18, 1982), Appx. at 679-80a. See also Recommendation of Special Master on Damage Claim of Paul Henderson Trucking, C.A. No. 76-955 at 12-17 (Feb. 18, 1982), Appx. at 665-70a. The magistrate determined that the Union had been unjustly enriched at the expense of Beunier and Henderson, because their employees paid dues to the Union and the companies themselves contributed to the UMWA Pension Fund. For this reason, Beunier and Henderson were awarded prejudgment interest. Because the UMWA received no monetary enrichment from H&H during the liability period, H&H was found not to be entitled to prejudgment interest.

The Union claims that it was not unjustly enriched at the expense of Beunier and Henderson because it did not have the use of their money during the liability period, since the pension payments [**31] went to the Fund, and the dues came from employees rather than the plaintiffs. See *Nedd, supra*; Restatement (Second) Contracts § 370 comment (a). **HN14**¹¹ Unjust enrichment has been defined as follows:

To the extent defendant has had the free use of the income-producing ability of plaintiffs' money without having to pay for it, he has been unjustly enriched. To divest defendant of this unjustified benefit is not to penalize him, for it has been determined by the trial that it was never rightfully his.

Recent Developments -- Prejudgment Interest as Damages: New Application of an Old Theory, 15 Stan. L. Rev. 107, 109 (1962), cited in *Nedd, supra*. After reviewing the two elements upon which the magistrate based her recommendation, we conclude that they do not meet the requirements of unjust enrichment. Accordingly, that portion of the damage award will be reversed.

The first item identified by the magistrate was the money which the plaintiffs contributed to the Pension Fund as part of their obligations under 1974 NBCWA. This Court has held, however, that the [**32] Union and the Pension Fund are two separate entities. See *Nedd v. United Mine Workers of America*, 556 F.2d 190 (3d Cir. 1977), cert. denied, 434 U.S. 1013, 54 L. Ed. 2d 757, 98 S. Ct. 727 (1978). A union has neither the right nor the authority to control the spending and investment of pension fund contributions. *Nedd, supra*. Since the UMWA did not have the use of that money, it cannot be said to have been unjustly enriched by the plaintiffs' contributions to the Fund.

In addition to the pension contributions, the magistrate found that the UMWA was also unjustly enriched by the dues it collected from the employees of Beunier and Henderson. Most of those employees appear to have been members of the Union before their employers signed the 1974 NBCWA. Inasmuch as there was no showing that these employees would have resigned from the Union in 1974, the Union would have received those dues payments regardless of its illegal conduct. More importantly, the money was not paid by the plaintiffs. Nor was it money the plaintiffs would otherwise have been able or entitled to use. Thus, the union did not receive any benefit at the plaintiffs' [**33] expense.¹¹ In fact, any benefit the UMWA received from the dues was conferred by its members, not by the plaintiffs.¹²

Neither the dues payments nor the Pension Fund contributions unjustly enriched the UMWA at the plaintiffs' expense. In her recommendations, the magistrate determined that, absent unjust enrichment, prejudgment interest would not be appropriate in [**34] this case. Because of that conclusion, it is unnecessary for us to remand the matter for further consideration. Instead, we will reverse the award of prejudgment interest to Beunier and Henderson.

H&H argues that it is entitled to prejudgment interest because "the Union was unjustly enriched . . . by enhancing its successful (albeit illegal) organizing efforts elsewhere in the coal fields." *Appellees' Brief* at 35. This type of speculative, intangible benefit is not within the definition of unjust enrichment that we have adopted. Thus, it could not have been an abuse of discretion for the district court to refuse to award prejudgment interest to H&H.

¹¹ The Restatement (Second) of Contracts addresses this aspect of unjust enrichment in its discussion of restitution. "The benefit must have been conferred by the party claiming restitution. It is not enough that it was simply derived from the breach." *Section 370 comment (a)*.

¹² Ronald Beunier was himself a member of the UMWA and so the Union did receive \$ 12/month directly from that plaintiff. The liability period ran no more than six months, however, and we consider the \$ 72 received by the UMWA during that time to be a *de minimis* amount in the context of this case. It cannot, therefore, justify a finding of unjust enrichment.

VI

Plaintiffs claim that the district court erred in concluding that the Union was exempt from antitrust liability for its illegal conduct. They maintain that they should be entitled to collect treble damages for the injury they suffered as a result of Article II(g). After reviewing the district court's liability opinion, we conclude that the proper legal standard was applied and that the factual findings were not clearly erroneous. Accordingly, the judgment of the district court on this issue will be affirmed.

The intersection [**35] of the labor and antitrust laws is one of the more difficult areas of federal jurisprudence. As one of the leading commentators has explained:

From the outset, the difficulty in applying the antitrust concept to organized labor has been that the two are intrinsically incompatible. The antitrust laws are designed to promote competition, and unions, avowedly and unabashedly, are designed to limit it. According to classical trade union theory, the objective is the elimination of wage competition among all employees doing the same job in the same industry. Logically extended, the policy against restraint of trade must condemn the very existence of labor organizations, since their minimum aim has always been the suppression of any [*542] inclination on the part of working people to offer their services to employers at different prices.

St. Antoine, *Connell: Antitrust Law at the Expense of Labor Law*, 62 Va. L. Rev. 603, 604 (1976) (footnote omitted). [HN15](#)¹⁵ The Supreme Court has responded to this conflict by creating two exemptions from the coverage of the antitrust [**36] laws for labor organization activities. The first, the so-called "statutory" exemption, protects the union from liability when it acts alone. See *Allen Bradley v. Local 3 IBEW*, 325 U.S. 797, [65 S. Ct. 1533, 89 L. Ed. 1939 \(1945\)](#); *United States v. Hutcheson*, [312 U.S. 219, 85 L. Ed. 788, 61 S. Ct. 463 \(1941\)](#). The second "non-statutory," exemption is much less clear, but it generally applies when a union, acting with a non-labor party, seeks to attain goals which are mandatory or permissive subjects of bargaining under the National Labor Relations Act,¹³ unless the Union acts with a predatory anti-competitive purpose. See *Connell Construction Co. v. Plumbers & Steamfitters Local 100*, [421 U.S. 616, 44 L. Ed. 2d 418, 95 S. Ct. 1830 \(1975\)](#); *United Mine Workers of America v. Pennington*, [381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 \(1965\)](#). In *Connell*, the Supreme Court held that the non-statutory exemption did not shield a union when an employer sought injunctive and declaratory relief for injuries caused by the union's violation of section 8(e) of the Labor Act, the hot cargo provisions.

[**37] This Court was presented with the question of the proper application of *Connell* to antitrust damage suits in *Consolidated Express, Inc. v. N.Y. Shipping Assn.*, [602 F.2d 494 \(3d Cir. 1979\)](#), vacated and remanded on other grounds, 448 U.S. 902, 100 S. Ct. 3040, 65 L. Ed. 2d 1131 (1980), modified, [641 F.2d 90 \(3d Cir. 1981\)](#) (*Conex*). The *Conex* court distinguished suits seeking monetary recovery from those asking only injunctive relief on the ground that the former, because of their cost, have a greater tendency to chill lawful union activity. The court concluded that a broader exemption from antitrust liability was justified in damage actions and held that an antitrust plaintiff would establish a *prima facie* case under section 4 of the Clayton Act by showing that he had been injured in his business or property by "a collective bargaining agreement, or conduct taken pursuant to it, [which] has been shown to be illegal under federal labor law." *Conex* at 521. The Union defendant could, however, rebut the *prima facie* case by proving "first, that at the time [it] acted, . . . [it] could not reasonably have foreseen [**38] that the subject matter of the agreement being challenged would be held to be unlawful under § 8(b)(4) or § 8(e)." The union "must also demonstrate that the contract provisions and steps taken to implement them were 'intimately related' to the object of collective bargaining thought at the time to be legitimate, and went no further in imposing restraints in the secondary market than was reasonably necessary to accomplish it." *Conex* at 521. If the Union could persuade the district court of these facts, declared *Conex*, then it would be entitled to the non-statutory exemption from damage liability under section 4 of the Clayton Act.

¹³ Mandatory subjects of bargaining are "wages, hours and other terms and conditions of employment." [29 U.S.C. § 158\(d\)](#), National Labor Relations Act § 8(d). The parties are required to discuss these issues in negotiations. All other lawful areas of negotiation are considered permissive subjects; on these topics, the parties may bargain, but they cannot be compelled to do so. See *National Labor Relations Board v. Borg-Warner Corp.*, [356 U.S. 342, 349, 78 S. Ct. 718, 2 L. Ed. 2d 823 \(1958\)](#).

In the present case, the district court correctly analyzed the antitrust issue by applying the *Conex* test and, after extensive factual analysis, determined that the UMWA had successfully rebutted the plaintiffs' *prima facie* case and was therefore exempt from antitrust liability. The plaintiffs, pointing to facts in the record that would support a contrary result, argue that the court's findings on foreseeability and the "reasonably necessary" scope of Article II(g) are clearly erroneous. That, however, is not the test which we apply when **[**39]** reviewing factual findings . **HN16**¹⁶ It does not matter that this Court, confronting the facts *de novo*, might **[*543]** view them in a different light. See, e.g., *Zenith Radio Corp. v. Hazeltine Research, Inc.*, 395 U.S. 100, 123, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969). We may reverse only if, after reviewing the record, we are "left with the definite and firm conviction that a mistake has been committed." *United States v. United States Gypsum*, 333 U.S. 364, 395, 92 L. Ed. 746, 68 S. Ct. 525 (1948). Our examination of the evidence adduced in this case has not produced any such conviction. At best, the testimony shows that more than one set of factual conclusions could have been drawn by the district court. Consequently, we cannot say that the facts it found were clearly erroneous. The judgment of the district court that the UMWA was exempt from antitrust liability for damages will be affirmed.

VII

The damage awards will be vacated and this case remanded to the district court for further findings consistent with this opinion on the issue **[**40]** of causation during the BCOA strike and a determination of the agency question presented in the magistrate's recommendations relating to H&H. The award of prejudgment interest will be reversed. In all other respects the district court's judgment will be affirmed.

HN1 [down arrow] **US Federal Trade Commission Actions, Investigations**

A Federal Trade Commission investigation is within the scope of its statutory authority unless the subject matter is part of the business of insurance. If it is not, then the McCarron-Ferguson Act does not protect the activity from regulation, and therefore from investigation, by the FTC. The United States Supreme Court has articulated three criteria to be used in determining whether an activity is part of the business of insurance: first, whether the practice has the effect of transferring or spreading a policyholder's risk; second, whether the practice is an integral part of the policy relationship between the insurer and the insured; and third, whether the practice is limited to entities within the insurance industry.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Investigations > General Overview

HN2 [down arrow] **US Federal Trade Commission Actions, Investigations**

Where possible to characterize a practice either broadly so that the activity appears to be part of the relationship between the insurer and the insured, or narrowly so that it appears otherwise, the latter path should be followed.

Counsel: **[**1]** Federal Trade Commission, by: Leslie Rice Melman, Esq., Federal Trade Commission, Washington, District of Columbia.

Opinion

[*993] MEMORANDUM and ORDER

NORMA L. SHAPIRO, J.

This proceeding arises from a nationwide investigation by the Federal Trade Commission ("FTC") into certain credit practices. The investigation and litigation it instigated were described as follows by District Judge Charles Schwartz, Jr., United States District [**2] Court for the Eastern District of Louisiana:

This proceeding was invoked by the Federal Trade Commission (Commission) pursuant to Section 20 of the Federal Trade Commission Act, [15 U.S.C. 57b-1](#) for an order compelling respondents to comply with civil investigative demands (CIDs) issued by the Commission during the course of an investigation to determine whether respondents may be or may have been engaged in unfair or deceptive acts or practices in violation of Section 5(a) of the Federal Trade Commission Act, [15 U.S.C. 45\(a\)\(2\)](#). Specifically, the purpose of the investigation is to determine whether finance companies, automobile dealerships or others may be engaged in unfair or deceptive acts or practices in connection with arranging for or consummating of a consumer credit transaction, including misrepresenting, directly or by implication, that the purchase of credit insurance is a prerequisite to the extension of credit.

Respondents have failed to provide the requested documents on the ground that the Commission's inquiry is an unlawful attempt to investigate and regulate the 'business of insurance' which is protected by the McCarran-Ferguson Act, [15 U.S.C. § 1012\(b\)](#) (McCarran [**3] Act) from review by the Federal Trade Commission.

[FTC v. Dixie Finance Co., 695 F.2d 926](#) (5th Cir. 1983; Appendix A (footnotes omitted)).

An action was filed in this district by the FTC petitioning for enforcement of the CIDs against Manufacturers Hanover Consumer Services, Inc., Credico Financial, Inc., General Finance Corporation, Domestic Finance Corporation, BarclaysAmerican Corporation and Postal Finance Co. ("enforcement action" petition). Hanover and Domestic also brought actions seeking equitable relief from the FTC investigation ("extra-enforcement" action). A prior opinion in these consolidated actions granted the FTC's motion in the extra-enforcement action [*994] and denied motions for summary judgment therein without prejudice to the rights of defendants to resist in this enforcement action. Therefore, at this time defendant Credico's motion for declaratory judgment in the enforcement action and the FTC petition for enforcement remain outstanding. For the reasons that follow, Credico's motion for declaratory judgment in its favor is denied but an order enforcing the FTC petition will be deferred pending a hearing now scheduled.

The investigation [**4] does not transgress the McCarran-Ferguson Act, [15 U.S.C. § 1012\(b\)](#) (the "Act"), as the activity the FTC seeks to investigate is not part of the "business of insurance." While the investigation pursuant to which the subpoena was issued is within the power of the FTC, the court will defer ordering its enforcement as

issued until a hearing on whether the subpoena duces tecum should be enforced as issued or modified as overbroad and burdensome.

HN1[] The FTC investigation is within the scope of its statutory authority unless the subject matter is part of the "business of insurance." If it is not, then the Act does not protect the activity from regulation, and therefore from investigation, by the FTC.¹ The Supreme Court has established criteria for this determination in two recent cases, *Group Life & Health Insurance v. Royal Drug Co.*, 440 U.S. 205, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979) and *Union Life Ins. Co. v. Pireno*, 458 U.S. 119, 102 S. Ct. 3002, 73 L. Ed. 2d 647 (1982).² The *Pireno* majority articulated three criteria to be used in determining whether an activity is part of the "business of insurance":

. . . *first*, whether the practice has the effect of transferring [**5] or spreading a policyholder's risk; *second*, whether the practice is an integral part of the policy relationship between the insurer and the insured; and *third*, whether the practice is limited to entities within the insurance industry.

73 L. Ed. 2d at 656. Applying these three criteria to the facts of the present case leads to a conclusion that the activity in question is not the business of insurance.

[**6] The first criterion is whether the practice is to spread the risk. The answer to this inquiry depends largely upon how one defines the "practice." If one defines the practice as the sale of credit insurance in connection with the sale of financed automobiles, then this practice clearly spreads risk. Many automobile purchasers pay a small premium so that the automobile purchasers unable to make finance payments and subject to loss by repossession and judgment lien are not forced to bear the entire personal risk -- a classic example of underwriting. See generally, *Royal Drug, supra*; *SEC v. Nat. Sec. Ins.*, 393 U.S. 453, 21 L. Ed. 2d 668, 89 S. Ct. 564 (1969). At the same time, the finance company benefits by the elimination of credit risk to it at the expense of the debtor who pays for this [*995] credit insurance as a part of the cost of credit. If one considers this as a credit practice, see, *Dixie Finance, supra*, then there is no risk spreading. Even if this court were to determine that there is a form of risk spreading, that would not require a finding that the activity being investigated is the business of insurance. Risk spreading is an indispensable element, [**7] *Royal Drug, supra*, 440 U.S. at 212, but its presence is not determinative. *Pireno, supra*, 73 L. Ed. 2d at 656. Both the other criteria strongly suggest that this activity is not the business of insurance.

The second criteria is whether the practice is an integral part of the policy relationship between the insurer and the insured. This issue was the focus of the *Dixie Finance* decision, which held that the practice was credit related and not an integral part of the insurer/insured relationship. (Appendix A at 1979). Where a policyholder relationship is intertwined with other activities, the decision is to be made by focusing on "the gravamen of the complaint." *SEC, supra*, 393 U.S. at 462. When the *Dixie Finance* court focused on this aspect it found that:

The specification set out by the Commission in its CIDs do not intrude on the insurer-insured relationship; they seek to determine only whether respondents may be making false or misleading misrepresentations to prospective borrowers that credit insurance is a prerequisite to the extension of consumer credit. The

¹ See, *Union Life Ins. Co. v. Pireno*, 458 U.S. 119, 102 S. Ct. 3002, 73 L. Ed. 2d 647, 659 n.9 (1982); see generally, *Dixie Finance, supra*.

² Both *Royal Drug* and *Pireno* are antitrust cases, as have been most cases discussing the "business of insurance" exemption. It is possible that more leniency should be inferred in applying the "business of insurance" exemption to non-antitrust cases, as the courts have held that antitrust exemptions must be narrowly construed; *Royal Drug, supra*, 440 U.S. at 231; see also, *Schwartz v. Commonwealth Land Title Co.*, 374 F. Supp. 564, 573 (E.D.Pa. 1974), while no like requirement exists for applications of the "business of insurance" to cases such as this one. However, the statutory language of 15 U.S.C. § 1012(b) (the Act) does not distinguish the two situations, and it has been recognized that the law has a wider scope than antitrust. *Cochran v. Paco*, 606 F.2d 460, 463 (5th Cir. 1979). Therefore, the Supreme Court criteria developed in the antitrust cases will be applied here, keeping in mind that the tests were developed in a slightly different context. But see, *Thompson v. NYL Ins. Co.*, 644 F.2d 439 (5th Cir. 1981) (TILA case applying different standards but keeping *Royal Drug* in mind); *Cochran, supra*, 606 F.2d at 463 (TILA case "borrowing" from the antitrust jurisprudence).

Commission is not concerned with the 'reliability, interpretation and enforcement' of the **[**8]** insurance contract.

Appendix A to *Dixie Finance* at 1979 (emphasis added). Cf., [SEC, supra](#) (looking at the aim of a statute to determine its effect on the business of insurance). In this case the petition of the FTC asks for authority "to determine whether certain unnamed finance companies, car dealerships and others may be engaged in unfair or deceptive acts or practices in violation of Section 5 of the Federal Trade Commission Act ([15 U.S.C. § 45](#)) in connection with the arranging for or consummating consumer credit transactions, including but not limited to misrepresenting directly or by implication that the purchase of credit insurance is a prerequisite to the extension of credit." Complaint, para. 11. Although the complaint does mention insurance, the gravamen is on the credit transactions. The fact that insurance is mentioned does not make the complaint, or the transactions to be investigated, primarily concerned with the business of insurance. [HN2↑](#) Where possible to characterize the practice either broadly so that the activity appears to be part of the relationship between the insurer and the insured, or narrowly so that it appears otherwise, the latter path should **[**9]** be followed. See, [St. Bernard Hospital v. Hospital Service Assn. of New Orleans, Inc., 618 F.2d 1140 \(5th Cir. 1980\)](#); cf., *Royal Drug* (the wholly separate nature of the two agreements not changed by a reference to one in the contract of the other).

A final practical consideration mitigates against characterizing the relationship to be investigated as between insurer and insured instead of between creditor and debtor or seller and buyer. If insurance sales in relation to these credit transactions remove them from the purview of FTC investigation and regulation, then any transaction would be removed from FTC investigation and regulatory authority merely by selling insurance as part of the transaction whether or not on credit. For instance, a refrigerator sale could be removed from CPSC review by selling the customer refrigerator insurance at the time of the sale. Congress did not intend such a result.

The third *Pireno* criteria is whether the practice is limited to entities within the insurance industry. The practice to be investigated here is not, regardless of how it is characterized. Although the automobile salesperson may be both the credit representative and insurance **[**10]** salesperson, the sale and credit transaction may be independent **[*996]** of any credit insurance. But there is no way that there can be credit insurance without an extension of credit and no way to extend credit for an automobile purchase without the sale of an automobile. Wherefore, it would seem that the insurance depends on the financing transaction but the credit transaction is or may be independent of the insurance, which is, of course, what the investigation seeks to determine.

The *Pireno* criteria must be applied in terms of their genesis in determining exemption from antitrust laws; their application may be somewhat different in determining exemption from regulation of consumer credit transactions. The *Pireno* majority argued that Section 2(b) of the Act "was intended primarily to protect *intra*-industry cooperation in the underwriting of risks." [Pireno, supra, 73 L. Ed. 2d at 658-59](#), citing, [Royal Drug, supra, 440 U.S. at 221](#) (emphasis added by *Pireno* Court). Congress was concerned that if insurance companies were subject to federal **antitrust law**, it would be impossible to pool actuarial data and set rates for policies. See generally, *Pireno* **[**11]**. Allowing the FTC to investigate whether the purchase of credit insurance has been involuntary rather than voluntary in the credit transactions complained of here will not affect the ability of the industry to set rates for insurance offered or sold.

In addition, if the practice sought to be investigated is characterized as the business of insurance because insurance is somehow involved, the insurance industry would be able to expand its McCarran Act protection to new activities by combining diverse activities with the sale of insurance; e.g., mortgage insurance for commercial buildings, health insurance for corporate executives, etc. The courts should guard against this possibility. [Hahn v. Oregon Physicians Service, 689 F.2d 840, 1982-2 CCH Trade Cases para. 64,970, n.2 \(9th Cir. 1982\)](#).

Two of the *Pireno* criteria clearly suggest this investigation is not of the business of insurance and the third can perhaps be viewed either way. Our application of the *Pireno* criteria results in a determination that the activity to be investigated to determine the need for regulation is not the business of insurance but the terms and conditions of

provision of credit. See, [**12] [*Nurse Midwifery Assoc. v. Hibbett*, 549 F. Supp. 1185, 1982-83](#) CCH Trade Cases para. 65,040 (M.D. Tenn. 1982).³

The court holds that the investigation is within the power of the FTC, that is, that the investigation has a legitimate purpose and the inquiry is relevant to that purpose. There remains the issue of whether the subpoena duces tecum is overbroad and burdensome which may not have been adequately addressed. The court will hear the parties on whether the subpoenas are overbroad or unnecessarily burdensome before enforcing them as issued.

ORDER

AND NOW, this 30th day of June, 1983, upon consideration of the outstanding motions in this matter, and for the reasons set forth in the foregoing Memorandum, [**13] it is ORDERED that:

1. Defendant Credico Financial Inc.'s motion for declaratory judgment in its favor is DENIED; the Federal Trade Commission is not precluded by the McCarran-Ferguson Act, [15 U.S.C. § 1012\(b\)](#), from investigating the activity in connection with which it issued the subject subpoena duces tecum.
2. A hearing will be held on August 5, 1983 at 2:00 p.m., in Courtroom 10-A, United States Courthouse, 601 Market Street, Philadelphia, Pennsylvania, at which time [*997] the parties will be heard on whether the Federal Trade Commission's subpoena duces tecum should be enforced as issued or modified.

End of Document

³ *Nurse Midwifery* is one of the few cases to apply the *Pireno* standards *per se*; the first criterion was found to be a close question, the second and third criteria suggested that the activity was not the business of insurance; it was held that the activity was not the business of insurance.

Indus. Siderurgica v. Thyssen Steel Caribbean

Supreme Court of Puerto Rico

June 30, 1983, Decided

No. O-82-795

Reporter

114 D.P.R. 548; 1983 PR Sup. LEXIS 136

INDUSTRIAL SIDERURGICA, INC., Plaintiff and Respondent, v. THYSSEN STEEL CARIBBEAN, INC., FLORIDA STEEL CORPORATION; B. S. LIVINGSTON & CO., INC., Defendants and Petitioner the second.

Notice: OFFICIAL TRANSLATION

Prior History: PETITION FOR CERTIORARI to review a DECISION of Melvin A. Padilla Feliciano, Judge (San Juan), denying a motion to dismiss for alleged lack of personal jurisdiction over the defendant. The writ is issued and the decision appealed is affirmed. Certiorari.

Disposition: For the foregoing reasons, the resolution appealed from shall be affirmed.

Core Terms

Steel, minimum contact, nonresident, courts, personam, due process of law, business transaction, provisions, sales, transaction of business, due process clause, substantial income, present case, trial court, antitrust, destined, limits

Headnotes/Summary

Headnotes

1. MONOPOLIES - MONOPOLIES AND OTHER COMBINATIONS RESTRICTING COMMERCE - JURISDICTION - IN GENERAL. Article 13B of the Monopoly Act of Puerto Rico contains a particular long arm provision applicable to cases arising under its provisions so that courts may assume jurisdiction in personam over a defendant. Two requirements must be met under said provision: defendant's conduct constituting a violation of the law and the substantial income derived from our market.
2. ID. - ID. - ID. The mere allegation that acts have been committed in violation of the Monopoly Act does not suffice to give a court jurisdiction in personam under art. 13B of the Monopoly Act of Puerto Rico. If this were the case, the purpose outlined in the due process of law clause, of avoiding that a defendant be forced to defend his case in a faraway and inconvenient forum to which he has no ties, relation or contacts, would be defeated.
3. RULES OF CIVIL PROCEDURE - PLEADINGS AND MOTIONS - PLEADINGS ALLOWED - MOTION TO DISMISS - IN GENERAL. When a party files a motion to dismiss alleging lack of jurisdiction over its person; the court should not rest on the sufficiency of plaintiff's allegations and deny the defendant's petition without a hearing. It should at least require plaintiff to show that it has sufficient evidence to establish the necessary elements to confer jurisdiction in personam over the defendant and, thus, guarantee the latter's right to due process of law.

Indus. Siderurgica v. Thyssen Steel Caribbean, 114 D.P.R. 548

4. ID. - COMMENCEMENT OF ACTION - PROCESS - SUBSTITUTE PROCESS - IN GENERAL. Conspiracy to violate the Monopoly Act of Puerto Rico is not just constituted by transacting business pursuant to Rule 4.7(a) (1) of the Rules of Civil Procedure, for purposes of conferring jurisdiction in personam to the court; due process of law requires something more.

5. ID. - ID. - ID. - ID. - ID. The test of Rule 4.7(a) (1), with regard to whether a corporation is doing business within the local jurisdiction, is a practical, nontechnical business test.

6. ID. - ID. - ID. - ID. - ID. The defendant need not carry out the business transactions referred to in Rule 4.7(a) (1) of Civil Procedure directly in person or through an agent; they could be carried out indirectly through third persons, without the need of establishing between these third persons and the foreign defendant a relationship which could create an agency.

7. ID. - ID. - ID. - ID. - ID. The modern trend is to broaden the jurisdiction of State courts over nonresident persons up to the point allowed by the Constitution.

8. CONSTITUTIONAL LAW - DUE PROCESS OF LAW - IN GENERAL. The due process clause of the United States Constitution limits the power of the states and of Puerto Rico to render judgments against nonresidents. When judgment is rendered in violation of said clause the same does not merit full faith and credit in any other state.

9. ID. - ID. - ID. Due process of law requires that the defendant be adequately notified of the claim against his person, that he be afforded the opportunity to be heard before his rights in the action are definitively adjudicated, and that defendant be subject to the jurisdiction in personam of the state or local court.

10. RULES OF CIVIL PROCEDURE - COMMENCEMENT OF ACTION - PROCESS - SUBSTITUTE PROCESS - MINIMUM CONTACTS. In order to subject a defendant to a judgment in personam, due process of law only requires that if he is not present in the jurisdiction, that he have certain minimum contacts with it, so that the suit does not offend traditional notions of fair play and substantial justice.

11. ID. - ID. - ID. - ID. A. H. Thomas Co. v. Superior Court, 98:864 (1970), outlines the three rules used to determine the jurisdiction in personam over a nonresident or nondomiciled person as follows: (1) the nonresident defendant must do some act or consummate some transaction within the forum. It is not necessary that defendant's agent be physically within the forum, for this act or transaction may be by mail only. A single event will suffice if its effects within the state are substantial enough to qualify under Rule Three. (2) The cause of action must be one which arises out of, or results from, the activities of the defendant within the forum. It is conceivable that the actual cause of action might come to fruition in another state, but because of the activities of defendant in the forum state there would still be a "substantial minimum contact." And (3) having established by Rules One and Two a minimum contact between the defendant and the state, the assumption of jurisdiction based upon such contact must be consonant with the due process tenets of "fair play" and "substantial justice." If this test is fulfilled, there exists a "substantial minimum contact" between the forum and the defendant. The reasonableness or subjecting the defendant to jurisdiction under this rule is frequently tested by standards analogous to those of forum non conveniens.

12. ID. - ID. - ID. - ID. - ID. In determining if the exercise of the state court jurisdiction is consistent with due process of law, the inquiry must focus on the relationship existing among the defendant, the forum, and the litigation.

Counsel: For Florida Steel Corporation, petitioner: Carlos Colón Marchand.

Opinion by: IRIZARRY YUNQUE

Opinion

San Juan, Puerto Rico, June 30, 1983

Florida Steel Corporation appeals to this Court from a resolution of the Superior Court which dismissed its petition seeking the dismissal of a claim filed against it for alleged damages based on a violation of the antitrust provisions of the Monopoly Act. It contends that the court lacks jurisdiction over its person because it is a foreign corporation not covered by art. 13B of said Act and by Rule 4.7 of the Rules of Civil Procedure. It is our decision that, regardless of the cited art. 13B, plaintiff has shown that there is evidence tending to establish that Florida Steel carried out business transactions in Puerto Rico, thus, there are grounds to exercise jurisdiction over the same pursuant to Rule 4.7(a)(1) of the Rules of Civil Procedure, without violating the applicable constitutional provisions concerning due process of law.

I

The complaint herein contends that Industrial Siderúrgica, Inc., organized and existing under the laws of Puerto Rico, is engaged in the business of selling reinforcing steel in and outside Puerto Rico; that defendants Florida Steel Corp. and B. S. Livingston & Co., Inc. are the manufacturer and middleman, respectively, of reinforcing steel, that supply this material to the other defendant, Thyssen Steel Caribbean, Inc., a domestic corporation; and that the latter in turn sells [its product] in and outside Puerto Rico; that through special concessions made by Florida Steel and Livingston to Thyssen, and through mutual agreements and combinations among them, they, with malice aforethought, conspired against the plaintiff to destroy their competitor and eliminate it from the local market, in violation of Act No. 77 of June 25, 1964 (*10 L.P.R.A. §§ 257-276*); and that said actions caused plaintiff damages which it assessed in five million dollars.

Florida Steel moved for the dismissal of the complaint claiming lack of jurisdiction in personam. It contended that it is incorporated in the state of Florida, where it has its principal offices; that it has manufacturing centers in Florida, North Carolina, Tennessee, Georgia, Louisiana and South Carolina; but that it has no offices, factories, property, employees, agents or salesmen in Puerto Rico, or has carried out any business transactions in this jurisdiction. It also denied having taken advantage of any privilege in our forum or otherwise having submitted itself to the jurisdiction of our courts. Attached to its petition was a sworn statement given by its vice-president explaining said circumstance.

On its part, Industrial Siderúrgica answered that regardless of the provisions of Rule 4.7 of the Rules of Civil Procedure (concerning the circumstances under which our courts may take jurisdiction over nondomiciled or nonresident defendants in Puerto Rico) the Monopoly Act provides in its art. 13B that Puerto Rican courts may exercise jurisdiction over any person who has violated any of its provisions and who, in addition, draws substantial income from any economic activity in Puerto Rico.

In its motion before the trial court, Industrial Siderúrgica alleged that, from the discovery of evidence regarding Livingston, it appeared that Florida Steel knows that its product is destined for Puerto Rico, since at no time has Livingston taken possession of the steel, rather Florida Steel delivers it directly to Thyssen in Jacksonville, Florida, in order to ship it directly to Puerto Rico. Plaintiff alleged that ten shipments of steel were made in this fashion during the last year and a half. It contended, further, that Florida Steel has at times sold steel bars directly to plaintiff for their elaboration, and that the sales of Florida Steel in Puerto Rico have been substantial. For such reason, it concluded that Florida Steel is engaged in business transactions in Puerto Rico to the point that it is subject to the jurisdiction of our courts.

Indus. Siderurgica v. Thyssen Steel Caribbean, 114 D.P.R. 548

The trial court summarily denied the motion to dismiss filed by Florida Steel, without holding a hearing and without an opportunity to consider the different issues raised in the arguments of the parties. On Florida Steel's request, we issued a writ of certiorari to consider the constitutional question concerning jurisdiction in personam.

Aside from the arguments raised by respondent Industrial Siderúrgica objecting to the petition for dismissal, the latter has produced before us evidence, in support of its positron, obtained during the discovery of evidence that it did not have the opportunity to present before the trial court. Ordinarily we would not consider it. But it is not a matter, at this stage, of passing on its admissibility or probative value; this question will be seen by the trial court on its day. It is a matter of acknowledging the existence of certain evidence that, if true, would constitute sufficient ground to exercise jurisdiction over the person of the defendant, and petitioner herein, Florida Steel. We shall address this point further on.

Said evidence tends to show that in 1977 Florida Steel sent Livingston a letter-contract through which the former told the latter that all its sales of reinforcing steel for Puerto Rico should be made exclusively to Livingston. In exchange, Livingston would buy all the domestic steel (produced in the United States) from Florida Steel. However, Florida Steel reserved the right to sell steel to plaintiff Industrial Siderúrgica. The purpose of this agreement was to "establish and maintain a long-range business relationship . . . that will be beneficial to both parties."¹

The deposition taken from a Livingston official tends to prove that the agreement is still in force and that all the steel sold by Livingston is supplied by Florida Steel. Furthermore, Florida Steel does not deliver the steel directly to Livingston but to Thyssen. On the other hand. Florida Steel marks the steel it sends to Puerto Rico with a metal label indicating that said steel is destined for San Juan.²

¹ The text of the letter is as follows:

"April 6, 1977

B. S. Livingston & Co., Inc.

60 East 42nd Street

New York, N.Y. 10017

Attention: Mr. Alfred Senog

Gentlemen:

This is to confirm that Florida Steel Corporation has agreed that its sales of reinforcing steel bars into Puerto Rico will be exclusively to B. S. Livingston & Co., Inc., except as noted under "EXCEPTION" below". It is understood that in consideration of this exclusive sales agreement B. S. Livingston & Co.. Inc., and/or any of its agents will restrict their purchase of domestically produced reinforcing steel bars for consumption in Puerto Rico to Florida Steel Corporation.

The intent of this agreement is to establish and maintain a long-range business relationship in the Puerto Rican market that will be beneficial to both parties. However, should this intent not be realized, this agreement may be terminated by either party within thirty (30) days upon receipt of written notice.

EXCEPTION: Florida Steel Corporation reserves the right to sell reinforcing steel bars directly to Industrial Siderúrgica, Inc., Bayamón, Puerto Rico, without being in violation of this agreement.

We are looking forward to working with you on your Puerto Rico requirements and sincerely believe that it should prove to be a profitable relationship for both of our firms.

Very truly yours, FLORIDA STEEL CORPORATION

E. L. Wolf ELW: ah"

² The label reads:

"BSL/Order No. 1252 San Juan, Made in U.S.A., No. of Pieces #1/up total gross and net weight."

Moreover, when the price of the steel that Livingston buys to resell to Thyssen is negotiated, officials from the three companies take part in the transaction. The meetings are generally held every three months and are held in Tampa, New York, and San Juan.

In 1980 Florida Steel made five steel shipments to Puerto Rico; four in 1981, and as many in 1982. The yearly shipments represent 23,605 metric tons of reinforcing steel for Puerto Rico in 1980; 24,403 in 1981; and 25,592 in 1982. The value of said annual shipments totalled almost seven million dollars in 1980; almost six and a half million in 1981; and almost six million in 1982. In those three years, Florida Steel received more than nineteen million dollars from its sales of steel in Puerto Rico. Besides, Florida Steel invoices to Livingston state that the merchandise was sent to Thyssen in San Juan, Puerto Rico.

It is in the light of these circumstances that we should pass on the merits of the procedural incident before our consideration.

II

In order to decide the present controversy it is necessary to determine beforehand if there is any statute or rule empowering the Puerto Rican courts to assume jurisdiction in personam over the defendant-petitioner and, if there is, if exercise of said jurisdiction is compatible with the due process clause³

-A-

[1] Our general long arm statute appears in Rule 4.7 of the Rules of Civil Procedure. However, plaintiff has invoked a special law which contains a long arm provision applicable to cases which arise under its provisions. The Monopoly Act of Puerto Rico, which is the law on which plaintiff grounded its claim, establishes the following:

Sec. 13B. Additional jurisdiction

In addition to the provisions on summons prescribed by the Rules on Civil Procedure for the General Court of Justice, jurisdiction on a defendant shall be acquired, whether he is a natural or artificial person, if directly or indirectly he breaks this law and, in addition, draws substantial income from used or consumed goods or services rendered in Puerto Rico and/or receives substantial income within the scope of the economy of Puerto Rico or from any impact or effect in a specific local market.

[2] Under this provision both requirements must be met: a conduct constituting a violation of the law, and the substantial income derived from our market. There is ground in the evidence to establish, *prima facie*, the second requirement, since it tends to demonstrate that Florida Steel obtained more than nineteen million dollars in income, in three years, from its sales to Thyssen in Puerto Rico. This is undoubtedly a substantial income. On the other hand, there is no indication of any evidence concerning the first requirement. The mere allegation that acts have been committed in violation of the Monopoly Act, does not suffice. On this particular, see, *State of West Virginia v. Morton International, Inc., 264 F. Supp. 689, 695 (1967)*. If the here allegation by a person or foreign corporation with regard to a violation of the antitrust provisions of our Monopoly Act were deemed sufficient to give this forum jurisdiction in personam, the purpose outlined in the due process of law clause of avoiding that a defendant be forced to defend his case in a faraway and inconvenient forum to which he has no ties, relation or contacts, would be defeated.

-B-

[3] In part 1 of this opinion we pointed out that the trial court decided the motion to dismiss filed by Florida Steel without a hearing, and without giving the parties an opportunity to show the validity of their arguments. In fact, the court rested on the sufficiency of the allegations to establish jurisdiction over the person of Florida Steel. In so doing, it erred. It should have at least required plaintiff to show that it had sufficient evidence to establish the necessary requirements to confer jurisdiction in personam over the defendant and, thus, guarantee the latter's right to due process of law. The error, however, is inconsequential, because the requirement has been complied with

³ See n. 6, *infra*.

Indus. Siderurgica v. Thyssen Steel Caribbean, 114 D.P.R. 548

before this Court, at least with respect to the application of Rule 4.7 of the Rules of Civil Procedure. Insofar as pertinent to this case, said rule provides:

- (a) Whenever the person to be served is not domiciled in Puerto Rico, the General Court of Justice of Puerto Rico shall take jurisdiction over said person, just as if said person were domiciled in the Commonwealth of Puerto Rico, if the action or claim arises because said person;
- (1) Transacted business in Puerto Rico personally or through an agent. . . .

The term "business transaction" was construed in another context in *Medina v. Tribunal Superior*, 104 D. P. R. 346 (1975).⁴ We had not had the opportunity to interpret it in the context of the present case.

Under the Clayton Act, sec. 12 ([15 U.S.C. § 22](#)), the federal **antitrust law** (which uses the phrase "transact business," similar to the term employed in our Rule 4.7(a)(1)), the theory of conspiracy as constituting the "transaction of business," required for purposes of venue, has been rejected. See, *Occidental Petroleum Corp. v. Buttes Gas & Oil Co.*, 331 F. Supp. 92, 96-97 (1971), aff'd, 461 F.2d 1261 (1972), cert. denied, 409 U.S. 950 (1972). It has been held that mere allegations to the effect that the foreign defendant has conspired with another defendant of the jurisdiction in antitrust practices do not provide, in the absence of minimum contacts, sufficient ground to exercise local jurisdiction. E.g., *Weinstein v. Norman M. Morris Corp.*, 432 F. Supp. 337 (1977); *Bertha Building Corp. v. National Theatres Corp.*, 248 F.2d 833 (1957).

[4] Likewise, we arrive at the same conclusion in the present case: conspiracy to violate the Monopoly Act or Puerto Rico is not just constituted by transacting business pursuant to Rule 4.7(a)(1). Due process of law requires something more.

[5] However, the criterion of Rule 4.7(a)(1), with regard to whether a corporation is doing business within the local jurisdiction is a practical, nontechnical business criterion. Cf. *United States v. Scophony*, 333 U.S. 795, 810 (1948).

[6-7] Although this is not indicated in the text, it is not necessary that the defendant directly transact business in person or through an agent. *World-Wide Volkswagen Corp. v. Woodson*, 444 U.S. 286, 295 (1980). They could be carried out indirectly through third persons without the need of establishing between these third persons and the foreign defendant a relationship which could create an agency. The indirect relationship between the nonresident and the third persons is sufficient to conform to the criterion of Rule 4 when, as in the present case, these are mere links in the chain of a business transaction deliberately designed, or conscientiously used, by the nonresident to obtain an economic benefit in our jurisdiction. This construction is compatible with the modern trend "which in that of broadening the jurisdiction of state courts over nonresident persons . . .," *Medina v. Tribunal Superior*, *supra* at 355, up to the point allowed by the Constitution.⁵

⁴ Therein we stated:

"The term 'transacción', as translated from the English 'transaction' means gestión (negotiation) or trámite (step, measure) Usually said term is used in the English language to indicate that an act has been carried out or a step has been taken on something." (Underscore supplied.) At 354-355. In Spanish, "transacción" has only one "meaning, that given in art. 1709 of the Civil Code. A. Cintrón García, Del Lenguaje entre Abogados," 36 Rev. C. Abo. "P.R. 1033 (1975). But see, *Pueblo v. Braun*, 105 D.P.R. 890, 898, n. 5 (1977) (Irizarry Yunqué, concurring).

⁵ In construing our long arm statute, the First Circuit Court of Appeals of the United States has expressed that Rule 4.7 of the Rules of Civil Procedure attempts to extend the exercise of the *in personam* jurisdiction of the Commonwealth of Puerto Rico to the full extent of its constitutional authority. *Com. of Puerto Rico v. SS Zoe Colocotroni*, 628 F.2d 652, 668 (1980), cert. denied, 450 U.S. 912 (1981).

We should clarify, however, that an affirmative action which, from a constitutional point of view, represents a minimum contact between a nonresident and our jurisdiction is not *per se* sufficient to authorize our courts to exercise their jurisdiction if said action cannot be framed within any of the circumstances described in Rule 4.7 of the Rules of Civil Procedure. For it to be otherwise it would be necessary to adopt a statute like the California statute which reads:

III

[8-9] The due process clause of the United States Constitution limits the power of the states and of Puerto Rico to render judgments against nonresidents. *Kulko v California Superior Court*, 436 U.S. 84 (1978). When a Judgment is rendered in violation of said clause the same does not merit full faith and credit in any other state. *Pennoyer v. Neff*, 95 U.S. 714 (1877). Due process of law requires that the defendant be adequately notified of the claim against his person and, moreover, that he be afforded the opportunity to be heard, *Mullane v. Central Hanover Tr. Co.*, 339 U.S. 306 (1950), before his rights in the action are definitively adjudicated. *Mitchell v. W. T. Grant Co.*, 416 U.S. 600 (1974). Due process of law also requires that the defendant be subject to the jurisdiction in personam of the state or local court. *Internat. Shoe Co. v. Washington*, 326 U.S. 310 (1945). Whether or not the summons served on defendant-petitioner was inadequate is not questioned in the present case, but only the power of Puerto Rican courts to exercise jurisdiction in personam.

[10] The United States Supreme Court has repeatedly held that due process only requires, in order to subject a defendant to a judgment in personam, if he is not present in the jurisdiction, that he have certain minimum contacts with it, so that the suit does not offend "traditional notions of fair play and substantial justice." *Internat. Shoe Co. v. Washington*, *supra* at 316; *World-Wide Volkswagen Corp. v. Woodson*, *supra* at 291.

In its latest reformulation of its case law doctrine, the Court states in *World-Wide Volkswagen Corp., supra*, that the minimum contacts doctrine serves two related but distinguishable purposes: on the one hand, to protect defendant from the burden entailed in litigating in a distant or inconvenient forum, and, on the other hand, to insure that the states, through their courts, do not overstep their limits as sovereign states under one federal system of government.⁶ See, A. Kamp, *Beyond Minimum Contacts: The Supreme Court's New Jurisdictional Theory*, 15 Ga. L. Rev. 19 (1980). These two functions are imbued in the "reasonableness" and "fairness" tests. Hence, defendant's contact with the forum should be such that it does not offend traditional notions of fair play and substantial justice. Furthermore, the relationship between the defendant and the forum must be of such nature that it would be reasonable to require the corporation to defend itself from a particular action filed in said forum.

According to *World-Wide Volkswagen Corp., supra at 292*, "[i]mplicit in this emphasis on reasonableness is the understanding that the burden [of the suit] on the defendant, while always a primary concern, will in an appropriate case be considered in light of other relevant factors, including the forum State's interest in adjudicating the dispute . . . the plaintiff's interest in obtaining convenient and effective relief, . . . at least when that interest is not adequately protected by the plaintiff's power to choose the forum, . . . the interstate judicial system's interest in obtaining the most efficient resolution of controversies; and the shared interest of the several States in furthering fundamental substantive social policies." (Citations omitted.)

Notwithstanding its function of insuring that a person be not forced to litigate in an inconvenient forum, the due process clause has been, since *Pennoyer, supra*, flexibly applied. An analysis of United States Supreme Court decisions since then, shows that the interpretation of its principles have been adjusted to ever-changing

"A court of this state may exercise jurisdiction on any basis not inconsistent with the Constitution of this state or of the United States." *Cal. Code Civ. Proc., sec. 410.10* (West 1973); see, M. Green, *Jurisdictional Reform in California*, 21 Hastings L. J. 1219 (1970).

This norm would, however, be much more difficult to apply, and while Rule 4.7 is left unamended to that effect, the initial query should always be to determine if the conduct attributed to the nonresident defendant is comprised within its provisions. See, *World-Wide Volkswagen Corp. v. Woodson*, 444 U.S. 286, 289-290 (1980).

⁶ It is not necessary at this time to place Puerto Rico within the North American federal scheme. For purposes of the discussion at hand, we shall presume that all the restrictions imposed on the states by the due process clause are likewise applicable to Puerto Rico even when the latter has a different and unique status. *Córdova & Simonpietri Ins. v. Chase Manhattan Bank*, 649 F.2d 36, 39-42 (1st Cir. 1981), specifically, and approvingly cited in *Rodríguez v. Popular Democratic Party*, 457 U.S. 1, 8 (1982).

Indus. Siderurgica v. Thyssen Steel Caribbean, 114 D.P.R. 548

circumstances.⁷ See e.g., Note, "Doing Business": Defining State Control Over Foreign Corporations, 32 Vand. L. Rev. 1106 (1979). All the exceptions woven by the case law on account of Pennoyer's, supra, excessive strictness—where special stress was laid on the factor requiring the defendant's presence within the territorial limits as ground for the exercise of personal jurisdiction—were finally done away with through the years. The theories of "presence," first, and "consent," afterwards, used by the courts to adjust the corporate fiction to a changing economy and, likewise, adjust the new technology to the world of communications and transportation that would soon change the relations of space and time, ended with Internat. Shoe Co., supra.

What survived the reformulation of the doctrine in Internat. Shoe Co., supra, i.e., jurisdiction grounded on the attachment of the nonresident defendant's property found within the Territorial limits of the forum in question, was also extinguished in Shaffer 7. Heitner, 433 U.S. 186 (1977), where it was decided that the exercise of jurisdiction by a state court shall be governed by the minimum contacts doctrine and not by distinctions regarding the nature of the action, he it in personam, in rem, or quasi in rem.⁸

Hence, it is evident that the emphasis, then, is not placed on either the presence or consent in order to be sued and, much less, in owning property in the jurisdiction of the state where the action is filed. See, Kamp, op. cit., and Constitutional Law (The Supreme Court, 1979 Term), 94 Harv. L. Rev. 75, 107-116 (1980). The Court itself recognized that "[t]oday many commercial transactions touch two or more States' and may involve parties separated by the full continent. With this increasing nationalization of commerce has come a great increase in the amount of business conducted by mail across state lines. At the same time modern transportation and communication have made it much less burdensome for a party sued to defend himself in a State where he engages in economic activity." McGee v. International Life Ins. Co., 355 U.S. 220, 222-223 (1957).

However, the Court has also stated that "it is a mistake to assume that this trend heralds the eventual demise of all restrictions on the personal jurisdiction of state courts. [Citation omitted.] Those restrictions are more than a guarantee of immunity from inconvenient or distant litigation. They are a consequence of territorial limitations on the power of the respective States." Hanson v. Denckla, 357 U.S. 235, 251 (1958).

Thus, the laxness with which in recent years the United States Supreme Court has» addressed the different jurisdictional problems cannot serve as ground to sustain that at present the territorial limits of the states are not pertinent and that they can, in the face of a nationally based economy, render personal and binding judgments concerning persons with whom the state has no contact or relation. But if, on the contrary, the nonresident or nondomiciled defendant has the minimum contacts defined by case law since Internat. Shoe Co., supra, then the judgment rendered is binding and the same would constitute a valid exercise of the state's sovereignty, or in this case Puerto Rico's.

[11] The very decisions of this Court have incorporated the previous principles. Thus, we have refused to exercise our jurisdiction in a case where the plaintiff could not adequately establish the minimum contact necessary between the defendant and our forum. A. H. Thomas Co. v. Superior Court, 98 P.R.R. 864 (1970). In this case, in keeping with federal Supreme Court decisions, we established that even under the minimum contacts doctrine, "it is required that the contact within the forum be the result of a purposeful act on "he part of defendant." (Underscore in the original.) At 869. Therein we summarized the three rules formulated to determine the jurisdiction in personam over a nonresident or nondomiciled person. They read as follows at 870):

- (1) The nonresident defendant must do some act or consummate some transaction within the forum. It is not necessary that defendant's agent be physically within the forum, for this act or transaction may be by mail only. A single event will suffice if its effects within the state are substantial enough to qualify under Rule Three.
- (2) The cause of action must be one which arises out of, or results from, the activities of the defendant within the forum. It is conceivable that the actual cause of action might come to fruition in another state, but because of the activities of defendant in the forum state there would still be a "substantial minimum contact."

⁷ See the summary on this extreme in Medina v. Tribunal Superior, 104 D.P.R. 346 (1975), especially at 348-354.

⁸ If there were any doubts they cleared up later on in Rush v. Savchuk, 444 U.S. 320 (1980).

Indus. Siderurgica v. Thyssen Steel Caribbean, 114 D.P.R. 548

(3) Having established by Rules One and Two a minimum contact between the defendant and the state, the assumption of jurisdiction based upon such contact must be consonant with the due process tenets of "fair play" and "substantial justice." If this test is fulfilled, there exists a "substantial minimum contact" between the forum and the defendant. The reasonableness of subjecting the defendant to jurisdiction under this rule is frequently tested by standards analogous to those of forum non conveniens.

Later on, in Medina v. Tribunal Superior, supra, we again had the opportunity to reiterate the previous principles and, based on them, assume jurisdiction over a resident of Miami, Florida, upon determining that he did in fact carry out "business transactions" in Puerto Rico in keeping with the due process clause.⁹

In the light of the foregoing, let us now pass on the merits of the present action.

V

[12] In determining if the exercise of the state court jurisdiction is consistent with due process of law, the inquiry must focus on the relationship existing among the defendant, the forum, and the litigation. Rush v. Savchuk, 444 U.S. 320, 327 (1980); Shaffer v. Heitner, supra at 204.

It is an uncontested fact that defendant Florida Steel has no offices, employees or agents in the Commonwealth of Puerto Rico. The only contact or relationship that it has with our forum is that, according to the evidence presented, it regularly and consequently ships merchandise expressly destined for San Juan. It is not an isolated or fortuitous business transaction.

The contract-letter signed with Livingston in 1977 suggests that its economic activity has been decidedly calculated to engulf the iron and steel market in Puerto Rico. Consequently, defendant had no qualms in labeling the merchandise as destined for the local market. The aforesaid frees us from considering the theory of foreseeability, as discussed in World-Wide Volkswagen Corp., supra, that is, whether Florida Steel foresaw that its products would reach Puerto Rico. Evidence has been brought which indicates that defendant was fully aware of the fact that its product occupied a substantial part of the local market. The sales made by Florida Steel to Livingston and the resale by the latter to Thyssen do not appear to be isolated episodes or the "unilateral activity of those who claim some relationship with a nonresident defendant." Hanson v. Denckla, supra at 253. They are rather affirmative actions with important local repercussions. World-Wide Volkswagen Corp., supra, is clear in its terms: "The forum State does not exceed its powers under the Due Process Clause if it asserts personal jurisdiction over a corporation that delivers its products into the stream of commerce with the expectation that they will be purchased by consumers in the forum State." At 297-298.

The case of O.S.C. Corporation v. Toshiba America, Inc., 491 F.2d 1064 (1974), cited by the defendant-petitioner, is different from the case at bar. There, it was determined that the California courts could not assume jurisdiction over a Japanese corporation in an antitrust suit in which the California corporation bought from a New York corporation the products manufactured by the Japanese corporation. In said case plaintiff could not establish, as it contended, that the Japanese corporation shipped its cargo directly to the plaintiff in California. In the present case there is evidence that shows that Florida Steel directly ships to Thyssen, that is a domestic corporation, it acknowledges said fact, labels the cited products as destined for San Juan, and had agreed to establish stable commercial ties in our market.

We should keep in mind that, in any case, the due process of law does not require that the commercial activity be carried out directly by the nonresident defendant World-Wide Volkswagen Corp., supra at 295. The minimum contact required by the constitutional clause may arise through intermediaries.

⁹ In Marrero Reyes v. García Ramírez, 105 D.P.R. 90 (1976), we upheld the exercise of our court's jurisdiction in a child custody case wherein the minor resided and was domiciled with her grandparents, the defendants, outside Puerto Rico. We exercised our jurisdiction on the ground that the minor's mother, that is, the plaintiff, was a resident of Puerto Rico. Nonetheless, this decision should be reexamined in the light of what was later decided by the United States Supreme Court in Kulko v. California Superior Court, 436 U.S. 84 (1978), and by our own decision in Perron v. Corretjer, 113 D.P.R. 593 (1982).

Indus. Siderurgica v. Thyssen Steel Caribbean, 114 D.P.R. 548

Finally, the relationship existing between the defendant and the action is clear. The business transactions carried out by the defendant-petitioner are intimately related to the action filed by plaintiff. This deals precisely with the effect that the sales and the prices of the products have had on plaintiff's business.

Since the defendant decided to avail itself of the benefit of doing business in Puerto Rico, the exercise of personal jurisdiction by the General Court of Justice of Puerto Rico over the action under our consideration does not violate the due process of law clause.

Mr. Chief Justice Trías Monge took no part in this decision. Mr. Justice Negrón García disqualified himself.

HN1 Class Actions, Certification of Classes

Fed. R. Civ. P. 23 governs class action certification in the federal courts. All class proponents must first establish compliance with the requirements of Fed. R. Civ. P. 23(a). Accordingly, they must show that (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Attorneys > General Overview

HN2 [] Prerequisites for Class Action, Adequacy of Representation

The requirement of "adequate representation" under [Fed. R. Civ. P. 23\(a\)](#) contains two components: (1) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation; and (2) the plaintiff must not have interests antagonistic to those of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN3 [] Prerequisites for Class Action, Predominance

[Fed. R. Civ. P. 23\(b\)\(3\)](#) authorizes class actions when the court finds that questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. The matters pertinent to the findings include (1) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (2) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (3) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (4) the difficulties likely to be encountered in the management of a class action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN4 [] Class Actions, Prerequisites for Class Action

The United States District Court for the Northern District of Illinois adopts the method of analyzing "predomination" questions under [Fed. R. Civ. P. 23\(b\)\(3\)](#) set forth by the United States Court of Appeals for the Seventh Circuit. The court's inquiry into the predominance analysis takes two steps. The first focus is on the substantive elements of the plaintiffs' cause of action, requiring inquiry into the proof necessary for the various elements. Second, after examining the proof necessary, the court inquires into the form that trial on these issues would take. At this point it is also necessary to examine the procedural devices and alternatives available in trying class actions. This discussion interfaces with many aspects of the issue of manageability.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

HN5 [] Clayton Act, Claims

Plaintiffs suing under [§ 4](#) of the Clayton Act, [15 U.S.C.S. § 15](#), must establish three facts in order to recover: (1) that defendants violated the antitrust laws; (2) that the alleged violations caused plaintiffs to suffer some injury to their "business or property;" and (3) that the extent of this injury can be quantified with requisite precision.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Class Members > Named Members

[**HN6**](#) [down] **Class Actions, Prerequisites for Class Action**

In examining the type of proof necessary for the various elements of a plaintiff's cause of action as part of the "predomination" analysis for class actions under [Fed. R. Civ. P. 23\(b\)](#), the court must determine which elements may be tried in "common" fashion. An issue meets this standard when there exists generalized evidence that proves or disproves the element on a simultaneous, class-wide basis. Such proof obviates the need to examine each class member's individual position, and permits the suit to go forward in a truly representative manner.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

[**HN7**](#) [down] **Class Actions, Prerequisites for Class Action**

The class proponent bears the burden of demonstrating compliance with [Fed. R. Civ. P. 23\(b\)\(3\)](#). To the extent such a showing requires a demonstration that certain issues can be handled with generalized proof, the proponent bears the burden with respect to this sub-point as well.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

[**HN8**](#) [down] **Class Actions, Prerequisites for Class Action**

The ultimate determination of whether a proponent has sufficiently discharged its burdens under [Fed. R. Civ. P. 23](#) rests with the court, not the proponent.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

[**HN9**](#) [down] **Prerequisites for Class Action, Typicality**

Evaluation of many of the questions entering into the determination of class action questions is intimately involved with the merits of the claims. The typicality of the representative's claims or defenses, the adequacy of the representative, and the presence of common questions of law or fact are obvious examples. The more complex determinations required in [Fed. R. Civ. P. 23\(b\)\(3\)](#) class actions entail even greater entanglement with the merits.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

[**HN10**](#) [down] **Class Actions, Prerequisites for Class Action**

While the court, in assessing a motion for class certification, must assume that plaintiffs' claim is meritorious in the sense that the defendant's liability ultimately could be established in some fashion, the court need not accept blindly every assertion that a particular common approach has validity. Some inquiry into the latter type of claim is necessary for sound application of [Fed. R. Civ. P. 23\(b\)\(3\)](#), and is not barred by the United States Supreme Court's holdings in this area.

100 F.R.D. 280, *280L^A1983 U.S. Dist. LEXIS 15716, **1

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Trials > Separate Trials

HN11 [blue icon] **Class Actions, Prerequisites for Class Action**

The use of separate trials on individual issues of fact should not be an absolute bar to the use of the class action device. Rather, the court must examine whether any procedural devices can be utilized that would alleviate the burdens of such a trial procedure. A contrary ruling would essentially preclude class treatment whenever separate issues had to be tried. Such an approach has not been accepted since it would deprive [Fed. R. Civ. P. 23\(b\)](#) of its basic policy. Thus, after examining which issues are common, the court must go on to examine exactly how the individualized issues will be tried. The court must assess each proposal that is offered to simplify the process of individualized adjudication. The court need not accept all suggestions that are made, but if it finds at the conclusion of its analysis that various proposals are sufficiently viable, and that the individualized inquiries can thus be handled in a manageable fashion, class certification should be ordered.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN12 [blue icon] **Prerequisites for Class Action, Predominance**

Common questions do not "predominate" in a proposed class action when each plaintiff's specific injury must be calculated in a separate, time-consuming hearing--each conducted before the court, each specific to a given class member, and each replete with discovery, experts, cross-examination, and documents.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN13 [blue icon] **Class Actions, Certification of Classes**

A trial judge cannot, in determining the manageability of a proposed class action, look exclusively to only one aspect of the case; he can and must look at the case as a whole and consider proof of damages as well as other issues in the case.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN14 [blue icon] **Prerequisites for Class Action, Predominance**

Damage questions in a proposed class action can be deemed "irrelevant" only if it is first determined that the remaining issues "predominate" as common issues.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

[**HN15**](#) [blue icon] Prerequisites for Class Action, Numerosity

When a fluid recovery is sought in a proposed class action, no attempt is made to correlate class members with actual injuries. Damages are distributed in an imprecise manner that eliminates the need for individualized determinations. This "solution" is therefore impermissible as a matter of law. Fluid recoveries have been condemned as illegal in numerous decisions.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

[**HN16**](#) [blue icon] Class Actions, Prerequisites for Class Action

Under [Fed. R. Civ. P. 23\(c\)\(4\)\(A\)](#), an action may be brought or maintained as a class action with respect to particular issues.

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Civil Procedure > Trials > Separate Trials

[**HN17**](#) [blue icon] Jury Trials, Right to Jury Trial

By the plain, though unnecessary, terms of [Fed. R. Civ. P. 42\(b\)](#), a bifurcation order must preserve inviolate the right of trial by jury as declared by [U.S. Const. amend. VII](#) or as given by a statute of the United States.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > Trials > Separate Trials

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Antitrust & Trade Law > Clayton Act > General Overview

[**HN18**](#) [blue icon] Clayton Act, Claims

In an antitrust action brought under the Clayton Act (Act), it is most important to be aware of the limitations of [U.S. Const. amend VII](#) on bifurcation under [Fed. R. Civ. P. 42\(b\)](#). This awareness is important because liability under [§ 4](#) of the Act, [15 U.S.C.S. § 15](#), necessarily includes proof of injury to business and property. Therefore, bifurcation to separate juries of liability and damages in a [§ 4](#) case inevitably introduces the possibility that in the liability phase the first jury might find that there was such injury, while the second jury might on the same evidence of injury in the damage phase, find none.

Judges: Getzendanner, D.J.

Opinion by: GETZENDANNER

Opinion

[*283] Memorandum Opinion and Order

GETZENDANNER, D.J.:

Plaintiffs in this antitrust action seek to represent a nationwide class of direct purchasers of industrial gas.¹ Each of the thirteen plaintiffs purchased a significant amount of gas itself. The court, on December 30, 1981, ordered class certification in part, ruling that the case could proceed as a class action with respect to certain issues, but not others. Defendants (who are the country's five leading producers of industrial gas)² responded [**3] to this decision with a motion asking for leave to take an interlocutory appeal. The court reviewed this pleading, and decided, *sua sponte*, to treat it as a request to reconsider. Plaintiffs countered with a cross-motion to reconsider the court's refusal to certify the entire case as a class action.

All told, well over three hundred pages of briefs have been submitted throughout the course of this litigation addressing the applicability of [Rule 23 of the Federal Rules of Civil Procedure](#). The court has carefully reviewed these filings as well as numerous affidavits and other documents of record. It is the court's judgment that its opinion [**4] and order of December 30, 1981 should be vacated,³ that defendants' motion to reconsider should be granted, and that plaintiffs' cross-motion to reconsider should be denied. Plaintiffs have not carried their burden of satisfying the requirements of [Rule 23](#).

I. The Industrial Gas Industry⁴

¹ Plaintiffs' substantive claims arise under [Section 1](#) of the Sherman Act, [15 U.S.C. § 1](#). See section II., *infra*. [Section 4](#) of the Clayton Act, [15 U.S.C. § 15](#), authorizes plaintiffs' private right of action.

² Defendants are Union Carbide Corp.; Air Products & Chemicals, Inc.; Airco, Inc.; Chemetron Corporation; and Liquid Air Corp. of North America.

³ Portions of the court's first opinion will, however, be reincorporated in this decision verbatim.

⁴ The sketch of the industrial gas industry that follows purports to be only that, a broad overview. Some of the court's statements are subject to qualifications that have been omitted in the interest of brevity.

The term "industrial gas" refers for purposes of this litigation to oxygen, nitrogen and argon. Each of these products is fungible in that one seller's merchandise is indistinguishable from that of a competitor. Industrial gases [**5] are sold at commercial levels of purity.

Customers utilize these gases in various industrial and other processes. In certain instances, substitute products and methods are also available. Nitrogen, for example, is often used as a freezing agent, but customers can alternatively satisfy their needs with either carbon dioxide or mechanical refrigeration devices. In these cases, a gas merchant must compete not only with rival gas merchants, but with businesses in the substitute fields.

The production of industrial gas occurs at facilities known as air separation plants, and involves a process called fractional distillation. Air is first liquefied through compression and cooling to temperatures less than -300 degrees F. The liquid mixture thereafter vaporizes, and the three gases separate as their respective boiling points are reached.⁵ Electricity costs constitute a significant portion of the production expenses incurred.

[**6] Some of the oxygen and nitrogen thus produced flows directly through a pipeline to a customer's nearby plant. Such "on-site" or "pipeline" purchasers do not fall within the putative class and will not be mentioned further.

All other product that is sold by defendants to end-users is called "merchant" product. Low volume merchant customers often receive their merchandise in gaseous form stored in high pressure steel cylinders. Defendants package "cylinder gas" in the following manner. First, the gases separated at the air separation plant are compressed [*284] and individually reliquefied. The liquid product is then transported by truck to a "filling station," where the liquid is compressed and vaporized back into a gaseous state. This gas is next pumped into cylinders, and thereafter delivered by truck to the customer's place of business. Most of the actual containers that are used in this distribution process are owned by the gas producer, and are rented by the customer. When a full cylinder is delivered, empty ones are retrieved.

Other low-volume customers purchase "liquid cylinders," which are fifty gallon thermos-like structures that are specially designed to retard [**7] the evaporation of the liquid they contain. Delivery is once again usually made by truck.

High volume bulk purchasers similarly have the option of receiving either gaseous or liquid product. When the former is purchased, the gas arrives in a large tube trailer pulled by a truck tractor. The majority of bulk sales, however, involve liquid product that is transported from an air separation plant in trucks and rail cars that are constructed to hold the product at temperatures low enough to maintain its liquid state. In general, it is much cheaper to transport liquid rather than gaseous product since a given volume of liquid contains many more molecules of product than does a corresponding volume of gas.

Bulk liquid purchasers must have on their premises a cryogenic storage tank that can sustain the product's liquefaction prior to its use. (Evaporation losses nevertheless occur so rapidly that, even with such a tank, it is uneconomical for a customer to purchase bulk liquid product if the customer does not intend to use the merchandise in a relatively short amount of time.) Such customers also require special devices for injecting the stored liquid into their business operations. [**8] If the product is ultimately to be used in a gaseous state, vaporizing equipment is needed. If the product is to be drawn and used as a liquid, vacuum insulated pipe is then required. Often, the company that provides the product also sells or furnishes these necessary devices.

The cost of transporting industrial gas, even in liquid form, is extremely high relative to product value. As a result, neither liquid oxygen nor liquid nitrogen may be economically shipped more than two hundred miles from the air separation plant from which it is produced. Similarly, cylinder product is rarely sold outside of a fifty to seventy-five mile radius centered at the point of distribution. Because of these economies, defendants assert that the industrial gas market in this country consists not of one overall market, but of numerous, localized sub-markets, each largely insulated from the rest. It can hence be misleading, defendants continue, to argue from the admitted fact that

⁵ Argon must be processed further to raise its purity level to commercial standards.

defendants collectively sold more than 80% of the industrial gas marketed in the United States during the period of the alleged conspiracy. In certain sub-markets, regional firms played a significant role.

Defendants [**9] further point out that they face considerable competition from numerous independent distributors, particularly in the cylinder gas field. These 1400-1500 independent businesses typically purchase bulk liquid product (usually from one of the defendants)⁶ for reconversion to gaseous form and ultimate resale.⁷ Defendants maintain that they themselves directly account for at most only 25% of all cylinder gas sales nationwide.⁸

[**10] [*285] In general, bulk-liquid purchasers must pay not only for the actual product they obtain, but also for the monthly rental and upkeep on the cryogenic tank they use. These two prices may be quoted separately or collectively, depending upon the customer's preference. An additional charge may also be added for the cost of transporting the product to the customer's tank. Other times, this cost is simply built into the basic product charge.

Most bulk liquid transactions are made pursuant to requirements contracts that last up to five years. These contracts are individually negotiated and contain varying provisions regulating whether, and how often, the seller may raise the stated price over the life of the contract. Some contracts bar all increases; others limit the number of increases allowed per year, or the percentage increase that may be tacked on. Numerous other formulae have been employed. Many contracts further authorize the customer to solicit competing bids whenever the seller attempts to raise the contractual price; in these circumstances, however, the seller often retains a right to match any lower bid that is received.

Cylinder customers, on the other hand, [**11] often purchase goods pursuant to individual purchase their orders rather than longterm requirements contracts. The amount they pay is also individually negotiated, and usually reflects both product and delivery charges, as well as a rental fee on the cylinders that are used.

It is apparent from the foregoing that numerous factors potentially influence the amount defendants can charge for a particular product distributed in a particular way under non-collusive circumstances. First, the conditions in the various sub-markets differ. The amount of local competition (both from defendants and regional producers) varies from area to area, as does the significant input cost of electricity. Moreover, even within a sub-market, purchasers may not be similarly situated. One may seek product in order to accomplish a goal that can be satisfied using alternative methods or goods. Such a purchaser will have greater bargaining strength than a second customer who does not have ready alternatives. One purchaser's bargaining strength may also be relatively stronger simply due to greater size. Different contracts further provide, as shown above, varying amounts of protection from inflationary [**12] and other upward pressures on price. Finally, different customers require and receive different amounts of technical assistance in integrating the product they purchase into their businesses.

II. Plaintiffs' Substantive Claims

In broad form, plaintiffs allege a conspiracy to raise "price schedules," and a conspiracy to allocate customers. Defendants' desire to obtain higher revenues allegedly motivated both forms of behavior.

An understanding of the former charge requires further background. Plaintiffs contend that defendants perceived and treated the American market for industrial gas as national in scope, notwithstanding the economic reasons why it *should* have been localized. See *supra*. Plaintiffs point out that each defendant maintained production and distribution facilities throughout the country. Moreover, gaps in this system were plugged through defendants' practice of "swapping" gas with one another. For example, if producer A possessed facilities in New York, but not

⁶The price paid by distributors for such liquid product is known as the "recompression" price.

⁷Not all distributors fit this mold. Some purchase for resale cylinders that have already been filled with gas by the defendants. Others purchase liquid product and resell it as such, either in cylinder or bulk form. Defendants' affidavits indicate that distributors consummate a large percentage of the liquid cylinder and small-volume bulk liquid sales that are made. In their briefs, however, defendants stress only the influence of the distributors in the cylinder gas end of the market.

⁸Defendants also run a few distributorships on their own. These distributorships are operated in the same manner as their independent counterparts.

Los Angeles, and producer B was situated in exactly the opposite manner, both merchants could sell in *both* markets by "swapping": A would deliver gas to B in New York in return for shipments [**13] in Los Angeles. Affidavits submitted by defendants' own employees confirm that swaps played an important role in the distribution of industrial gas:

To the best of my knowledge, the Linde Division [of Union Carbide] has exchanged these industrial gases with competitive industrial gas producers since as early as 1956. Product exchanges are common in many industries, for many of the same reasons that they have been such a long standing practice in the industrial gas industry. There are several basic reasons that the Linde Division has engaged in product exchange transactions [*286] including: (1) to supplement the product supply of a local plant that may be sold out; (2) to secure product to meet peak demand needs; (3) to reduce transportation expenses, and thus the price, that a customer would pay for transportation for long distance shipments from a more distant Linde plant; (4) to secure product in case of liquid production plant shutdowns (either for normal maintenance or unexpected plant outages); (5) to secure product for the backup of an on-site customer when an on-site plant suffers a shutdown; and (6) to secure product to build a baseload of business in a market [**14] in which the product recipient has little or no production capacity for the purpose of making the future construction of a plant in such a market economically viable.

Dobbins Supp. Aff. at para. 2. *Accord*, Hallet Aff. at para. 2 (Air Products); Wong Aff. at para. 2 (Liquid Air).

Further, plaintiffs assert, defendants actually attempted--through their national price schedules--to price their products on a national basis. These schedules were internal price lists each defendant maintained to one extent or another during the relevant period of time. The prices listed on them for each form of product were uniform; they did not contemplate regional variation.

Defendants contend that the prices reflected in these documents stated mere goals or targets that were seldom reached; "schedule prices" bore little or no relation to the actual prices that were charged during the time in question. Plaintiffs do not deny that few, if any, purchasers actually bought at schedule price. Plaintiffs claim instead that the schedules served as "benchmarks" from which all pricing negotiations began. By emphasizing these national prices, defendants attempted, in plaintiffs' view, to prevent [**15] the price erosion that might otherwise have occurred in numerous localities.

Most importantly, it is plaintiffs' theory of the case that defendants conspired to raise their price schedules in tandem, thereby raising the "benchmarks" and ultimately the entire market structure. As a subsidiary proposition, plaintiffs further allege that defendants illegally agreed to measures designed to police compliance with the underlying price agreement. Thus, defendants allegedly shared price information and agreed, as part of the conspiracy, to impose in their contracts the clauses requiring that they be notified of any lower bid received by a customer following an attempt to raise contractual prices.

Plaintiffs also assert that defendants conspired to allocate customers, mainly through an agreement not to offer competitive bids to "historical" accounts of rivals. Such quotes were instead to be made at or above the schedule price.⁹ The object of this alleged agreement was obviously to reduce the amount of competition each defendant faced in maintaining its client roster.

[**16] III. *Plaintiffs' Class Action Request*

Plaintiffs request declaratory, injunctive and damage relief on behalf of themselves and the putative class they seek to represent. This class consists of:

⁹ The statement in the text evidences the interrelationship between the alleged conspiracies to raise price schedules and allocate customers. The two alleged wrongs are, however, conceptually distinct. See *infra*.

All persons, firms and corporations in the United States that purchased industrial gas from any defendant (including their respective subsidiaries or affiliates), at any time during the period of July 1, 1974 to and including June 30, 1980 but excluding (a) any defendants, or other industrial gas manufacturers and their respective subsidiaries and affiliates and excluding (b) all on-site and pipeline purchasers.

IV. *The Requirements of Rule 23(a)*

HN1[] [Rule 23 of the Federal Rules of Civil Procedure](#) governs class action certification in the federal courts. All class proponents must first establish compliance with the [*287] requirements of subsection (a) of the rule. Accordingly they must show that:

(1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class, and (4) the representative [**17] parties will fairly and adequately protect the interests of the class.

Defendants for the most part concede that these four tests have been satisfied. The court's discussion will be brief.

At oral argument held on the initial motion to certify, plaintiffs' counsel estimated that the proposed class contains at least 10,000 members. Defendants did not challenge this figure, and the court presumes it to be accurate. The requisite numerosity is clearly present.

The analysis found in section V. of this opinion confirms the undisputed proposition that at least some of the issues to be resolved in this case can be tried in a common fashion. The requirements of subsection (a)(2) do not bar prosecution of this suit as a class action.

Similarly, the requirements of subsection (a)(3) present no obstacle. As one court has noted, "Since the representative parties need prove a conspiracy, its effectuation, and damages therefrom--precisely what the absentees must prove to recover--the representative claims can hardly be considered atypical." [Minnesota v. United States Steel Corp., 44 F.R.D. 559, 567 \(D. Minn. 1968\)](#).

HN2[] The requirement of "adequate representation" contains two [**18] components: "(a) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation, and (b) the plaintiff must not have interests antagonistic to those of the class." [Wetzel v. Liberty Mutual Insurance Co., 508 F.2d 239, 247](#) (3d Cir.), cert. denied, 421 U.S. 1011, 44 L. Ed. 2d 679, 95 S. Ct. 2415 (1975). The previous discussion of "typicality" establishes that the latter half of this test is satisfied. Counsel for plaintiffs, moreover, are both able and experienced in the prosecution of antitrust class actions. Plaintiffs have successfully crossed the threshold of subsection (a).

V. *The Requirements of Rule 23(b)(3)*

Class proponents must further demonstrate that their claims fit within a subpart of subsection (b) of [Rule 23](#). Plaintiffs seek large damage awards on behalf of the class, and accordingly rely on subpart (b)(3). **HN3**[] This section authorizes class actions when:

the court finds that questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication [**19] of the controversy. The matters pertinent to the findings include: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

From the very commencement of this suit, the parties have sharply disputed whether common questions "predominate," whether the proposed class action is "superior," and whether it is "manageable."

HN4[] The Seventh Circuit, in *Simer v. Rios*, 661 F.2d 655 (7th Cir. 1981), cert. denied, 456 U.S. 917, 102 S. Ct. 1773, 72 L. Ed. 2d 177 (1982), recently explained the proper method of analyzing "predomination" questions:

Our inquiry into the predomination analysis must take two steps. Our first focus must be on the substantive elements of plaintiffs' cause of action and inquire into the proof necessary for the various elements. Second, after examining the proof necessary we [**20] must inquire into the form that trial on these issues would take. At this point it also becomes necessary to [*288] examine the procedural devices and alternatives available in trying class actions. This discussion interfaces with many aspects of the issue of manageability

Id. at 672. To carry out this analysis, the court must first determine the substantive issues likely to arise at trial.

HN5[] Well established doctrine holds that all plaintiffs suing under [section 4](#) of the Clayton Act, see note 1, *supra*, must establish three facts in order to recover: (1) that defendants violated the antitrust laws; (2) that the alleged violations caused plaintiffs to suffer some injury to their "business or property"; and (3) that the extent of this injury can be quantified with requisite precision. See, e.g., *Windham v. American Brands, Inc.*, 565 F.2d 59, 65 (4th Cir. 1977) (en banc), cert. denied, 435 U.S. 968, 56 L. Ed. 2d 58, 98 S. Ct. 1605 (1978). Plaintiffs' extensive damage prayer injects several additional issues into the case as well. Specifically, since the initial filing occurred on July 3, 1980, all claims arising prior to July 3, 1976 are "forever" [**21] barred," [15 U.S.C. § 15](#), absent a showing that defendants "fraudulently concealed" their illegal conduct.¹⁰ The trier of fact must thus determine (with respect to the pre-1976 claims) whether defendants affirmatively attempted to conceal their wrongdoing, and whether plaintiffs either knew or reasonably should have known of their claims prior to the filing of the initial complaint. See, e.g., *City of Detroit v. Grinnell Corporation*, 495 F.2d 448, 460 (2d Cir. 1974). Overall, five issues of fact--violation, fact of damage, extent of damage, attempt to conceal, and due diligence--are present.

The analysis next proceeds under *Simer* to **HN6**[] an examination of the type of "proof necessary for the various elements." In particular, the court must determine [**22] which elements may be tried in "common" fashion. An issue meets this standard when there exists generalized evidence that proves or disproves the element on a simultaneous, class-wide basis. Such proof obviates the need to examine each class member's individual position, and permits the suit to go forward in a truly representative manner. As Judge Wyzanski has written, an issue is appropriately deemed "common" when there would not "be a substantial difference in the quantum or character of the requisite proof if the plaintiffs included all 20,000 in a class action or only the 6 named plaintiffs." *Windham v. American Brands, Inc.*, 539 F.2d 1016, 1019 (4th Cir. 1976) (Wyzanski, J., sitting by designation), reversed on different grounds, 565 F.2d 59 (4th Cir. 1977) (en banc), cert. denied, 435 U.S. 968, 98 S. Ct. 1605, 56 L. Ed. 2d 58 (1978).

When so phrased in terms of general principles, the scope of the necessary inquiry seems clear. Difficulties often arise, however, when the court turns to a case at hand. Suppose the class proponent proffers a description of a generalized approach it intends to follow in proving an element of its case. Can the opponent defeat the [**23] proffer on the ground that it is so substantively flawed it should be disregarded? Plaintiffs have consistently argued throughout this litigation that *no* such scrutiny is permissible given the Supreme Court's admonition that [Rule 23](#) deprives the court of "any authority to conduct a preliminary hearing into the merits of a suit in order to determine whether it may be maintained as a class action." *Eisen v. Carlisle & Jacqueline*, 417 U.S. 156, 177, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974). In plaintiffs' view, if defendants think plaintiffs' approach is invalid, they should make their arguments at trial, not in their briefs opposing certification.

Plaintiffs read the delphic statements in *Eisen* too broadly. [Rule 23\(b\)\(3\)](#) specifically enjoins a court ruling upon a certification motion to make certain "findings." To carry out this judicial mandate, a court must of necessity function like one; it must be able to engage, for example, in independent analysis. Yet if plaintiff's position were accepted, a court would be obliged to accept all assertions of the class proponent at face value. The court's function would [*289] not be to "find," but to "ratify." [Rule 23\(b\)\(3\)](#) [**24] contemplates a different scheme.

¹⁰ In general, a claim under [section 4](#) of the Clayton Act "arises before" a specific date when the conduct causing the damage occurs prior thereto. See *Zenith Radio Corp. v. Hazeltine Research, Inc.*, 401 U.S. 321, 338-42, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971).

Stated somewhat differently, [HN7](#)¹¹ the class proponent bears the burden of demonstrating compliance with [Rule 23\(b\)\(3\)](#). See, e.g., *Eggleston v. Chicago Journeymen Plumbers*, 657 F.2d 890, 895 (7th Cir. 1981), cert. denied, 455 U.S. 1017, 102 S. Ct. 1710, 72 L. Ed. 2d 134 (1982). To the extent such a showing requires a demonstration that certain issues can be handled with generalized proof, the proponent bears the burden with respect to this sub-point as well. Acceptance of plaintiffs' interpretation of *Eisen* would, however, virtually eliminate this burden. All proposed common methods would have to be credited so long as the class proponent set forth its belief that the method was probative of the ultimate issue in question; cognizance of any challenge to the latter qualifier would amount, under plaintiff's theory, to an "impermissible scrutiny of the merits." In this court's view, however, [HN8](#)¹¹ the ultimate determination of whether a proponent has sufficiently discharged its burdens under [Rule 23](#) must rest with the court, not the proponent. If a proposed common method of proof is so insubstantial that it realistically amounts to no method at all, [\[**25\]](#) the court must have the power to rule accordingly. Judge Pointer was clearly right when he stated that courts are "not impotent under [Rule 23](#), bound to accept any common methodology . . . which the plaintiffs may submit when seeking class certification." *Moore v. Southeast Toyota Distributors, Inc.*, No. CV 81-P-0491-S, slip op. at 8 (N.D. Ala. Feb. 4, 1982).¹¹

[\[**26\]](#) It cannot be denied that while engaging in the type of review just described, the court may touch upon issues that have relevance for the "merits" of plaintiffs' suit as well. But, for the reasons already stated, such scrutiny is necessary if the court is to fulfill its responsibilities under [Rule 23\(b\)\(3\)](#). These complications were not at issue in *Eisen*, and the decision's seemingly broad language must be interpreted in this light:

Nor is the class issue separable from the merits in all cases (including this one). The common questions, typicality, conflicts and adequacy of representation, [Fed. R. Civ. P. 23\(a\)](#), and predominance tests, [Fed. R. Civ. P. 23\(b\)\(3\)](#), are determinations (unlike, for example, the notice question involved in *Eisen* IV) which may require review of the same facts and the same law presented by review of the merits.

Blackie v. Barrack, 524 F.2d 891, 897 (9th Cir. 1975), cert. denied, 429 U.S. 816, 50 L. Ed. 2d 75, 97 S. Ct. 57 (1976). Indeed, in one post-*Eisen* decision, the Supreme Court has itself quoted similar remarks with approval:

[HN9](#)¹¹ Evaluation of many of the questions entering into the determination of class action questions [\[**27\]](#) is intimately involved with the merits of the claims. The typicality of the representative's claims or defenses, the adequacy of the representative, and the presence of common questions of law or fact are obvious examples. The more complex determinations required in [Rule 23\(b\)\(3\)](#) class actions entail even greater entanglement with the merits.

Coopers & Lybrand v. Livesay, 437 U.S. 463, 469, 57 L. Ed. 2d 351, 98 S. Ct. 2454 n. 12 (1978) (quoting 15 C. Wright, A. Miller, & E. Cooper, *Federal Practice and Procedure* § 3911, p. 485 n. 45 (1976)). The Court of Appeals for this Circuit has similarly instructed that *Eisen* does not "foreclose inquiry into whether plaintiff is asserting a claim which, assuming its merit, will satisfy the requirements of [Rule 23](#)" *Eggleston v. Chicago Journeymen Plumbers*, [supra](#), 657 F.2d at 895. In short, [HN10](#)¹¹ while the court must assume that plaintiffs' claim is meritorious in the sense that defendant's liability ultimately could be established in some fashion, the court need not accept blindly every assertion that a particular common approach has validity. *Nichols v. Mobile Board of Realtors*, [1982-2 TRADE [\[**28\]](#) CASES P64 729], 675 F.2d 671, 678 (5th Cir. 1982). Some inquiry into the latter type of

¹¹ The court has no quarrel with the proposition that "care must be taken not to convert the preliminary consideration of whether the [predomination] requirement of [Rule 23\(b\)\(3\)](#) has been satisfied into a predetermination on the merits. Rather, if plaintiffs' assertion of class status is at least colorable, the court should allow the action to proceed under [Rule 23](#)." 7A C. Wright & A. Miller, *Federal Practice and Procedure*, § 1781, p. 84 (1972) (emphasis added). The court understands that there are reasons to restrict the intensity of its scrutiny. See *infra*. The discussion in the text is intended solely to rebut plaintiff's overbroad contention that no scrutiny whatsoever is permissible.

claim is necessary for sound application of [Rule 23\(b\)\(3\)](#), and is not barred by the Supreme Court's assertions in *Eisen*.¹²

[**29] Yet even if a court finds, as this court ultimately will, that certain issues must be tried with individualized proof, the analysis does not end. The *Simer* Court squarely held that "[HN11](#)"¹³ the use of separate trials on individual issues of fact should not be an absolute bar to the use of the class action device. Rather we must examine whether any procedural devices can be utilized that would alleviate the burdens of such a trial procedure." [Id.](#), [661 F.2d at 674](#). A contrary ruling would "essentially preclud[e] class treatment whenever separate issues had to be tried. Such an approach has not been accepted since it would gut [Rule 23\(b\)](#) of its basic policy." [Id. at 672 n. 29](#).¹³ Thus, after examining which issues are common, the court must go on to examine exactly how the individualized issues will be tried. The court must assess each proposal that is offered to simplify the process of individualized adjudication. As before, the court need not accept all suggestions that are made, but if it finds at the conclusion of its analysis that various proposals are sufficiently viable, and that the individualized inquiries can thus be handled in a manageable fashion, class certification [**30] should be ordered.¹⁴

[**31] The remainder of this opinion constitutes an application of the *Simer* approach. In [*291] subpart V.A., the court examines each of the five issues implicated by the complaint in order to ascertain which are "common" as that term has been defined. After applying the form of analysis it believes is proper under *Eisen*, the court concludes that the issues of conspiracy, fact of damage and concealment are common, but that the remaining issues of damages and due diligence are not.

In subpart V.B., the court next examines the precise manner in which damages (the more significant of the two individualized issues) must be tried. The court starts from the premise that the proposed class action would be unmanageable if calculation of each purchaser's injury necessitated an individualized, full-scale "mini-trial" held before this court. The court thus examines the propriety of various procedural methods of alleviating the strain,

¹²The Court also finds it noteworthy that the *Eisen* "ban" on inquiries into the merits has often been justified on rationales sensitive to the rights of class opponents. Thus, in *Eisen* itself, the Court was worried "that a preliminary determination of the merits may result in substantial prejudice to a defendant, since of necessity it is not accompanied by the traditional rules and procedures applicable to civil trials. The court's tentative findings, made in the absence of established safeguards, may color the subsequent proceedings and place an unfair burden on the defendant." [Id. at 178](#). It has also been suggested that the *Eisen* "rule" is needed to protect class opponents from *de facto* "one-way intervention." See [Peritz v. Liberty Loan Corporation, 523 F.2d 349, 353-54 \(7th Cir. 1975\)](#); see also [Jimenez v. Weinberger, 523 F.2d 689, 698, 700 \(7th Cir. 1975\)](#), cert. denied, [427 U.S. 912, 49 L. Ed. 2d 1204, 96 S. Ct. 3200 \(1976\)](#).

Plaintiffs' subsidiary contention is that the court should abstain from all scrutiny of plaintiffs' proposed methods of proof since class determinations must be made "as soon as practicable after the commencement of an action brought as a class action," [Fed. R. Civ. P. 23\(c\)\(1\)](#), and thus prior to discovery. But the propriety of pre-certification discovery is now firmly established. [Eggleston v. Chicago Journeymen Plumbers, 657 F.2d 890, 895 \(7th Cir. 1981\)](#), cert. denied, [455 U.S. 1017, 102 S. Ct. 1710, 72 L. Ed. 2d 134 \(1982\)](#). If plaintiffs have failed to obtain the information they need to construct methods of proof capable of withstanding the limited form of scrutiny employed here, they have no one to blame but themselves. See also Pointer, "The Judge's Viewpoint on Issues and Problems Arising in Antitrust Class Actions," 49 Antitrust L.J. 1581, 1583 (1980).

¹³Indeed, the *Simer* Court rejected the idea that common questions "predominate" only when "the total time spent trying common issues would be greater than time spent on trial of individual issues." [Id. at 672](#). The Court believed that this approach "would unduly block class actions from going forward because only the most complex of common questions would require more litigation time than a series of individual trials." *Id.* When these statements are read in conjunction with those reprinted in the text, it becomes apparent that a class action may go forward even if individual trials are necessary, and even if these trials will take more time to resolve than the common questions, provided that in an *absolute* sense the individual trials do not render the class action unduly burdensome on the court and parties. Thus, if the class is relatively small, or if the individual trials are particularly easy to resolve, certification of the class would seem appropriate.

¹⁴There are undoubtedly situations in which a "manageable" class action, containing common questions that "predominate," might not be "superior to other available methods for the fair and efficient adjudication of the controversy." In light of the ultimate conclusion reached herein, the court need not explore this possibility.

testing each proposal, as before, for both minimal substance and legality. Finding no method acceptable, the court denies class certification.

A. Which Issues are Common?

1. Violation

Both sides agree that the violation issue is common. Resolution **[**32]** of this question depends solely upon an analysis of defendants' challenged behavior. Since this conduct did not vary from class member to class member, proof relevant to any one purchaser must of necessity apply equally to the case of each and every remaining member of the class as well.

2. Fact of Damage

The court, in its initial class action opinion, ruled that fact of damage was an issue susceptible to common proof. The court noted that plaintiffs had at their disposal common expert testimony supporting their assertion that each class member felt the effects of defendants' allegedly anti-competitive behavior. Particularly relevant were the following statements by Dr. Sam Peltzman, plaintiffs' expert:

7. The materials which I have reviewed indicate that the five defendants account for approximately 80% of the industrial gas market; that defendants consider the merchant market a national market and accordingly market, sell and price their fungible products on a national basis; that defendants, during the conspiracy, utilized national price schedules which served as benchmarks for their pricing in the merchant market; that defendants, during the term of the conspiracy, **[**33]** implemented general nationwide price increases in tandem fashion; and that these general price increases were implemented as to the class as a whole on an ongoing continuing basis.

8. In view of the characteristics of the industrial gas merchant market and defendants' dominant position in that market, I conclude that defendants' nationwide conspiratorial conduct, would over the term of the conspiracy, result in a general increase in the prices charged all class members throughout the United States.

Peltzman 1st Aff. at para. 7-8. In the court's view, plaintiff's ability to proffer such testimony adequately demonstrated the existence of a common method of going forward on the issue of fact of damage. The court specifically ruled that the general topic was suited for expert testimony, that plaintiff's expert was amply qualified to render an opinion, and that Dr. Peltzman's statements could not be rejected at this stage of the lawsuit.

In their motion to reconsider, defendants challenge only the latter finding. Defendants contend that Dr. Peltzman's assertions completely lack merit, and that plaintiffs therefore do not have a viable plan for proving impact in a common **[**34]** manner. For the reasons previously stated, such an attack cannot be rejected out of hand. The court will consider its particulars.

Experts can be challenged on various grounds. Opponents may, for example, concede the factual premises of an expert's testimony, but dispute the inferences he draws. Conceivably, such an attack will justify rejection of the expert's opinion, even at the certification stage of the lawsuit. An expert's bald face assertion that **[*292]** ultimate fact "X" follows from given fact "Y" simply does not prove or disprove the existence of "X" when no discernible reason justifies the suggested relationship. See [Fed. R. Evid. 401](#). An irrational belief remains irrational even when voiced by an expert.

But this form of attack has *not* been mounted by defendants against Dr. Peltzman. Defendants appear to concede (most clearly, in their reply brief in support of their motion to reconsider) that Dr. Peltzman's ultimate conclusion as to class-wide impact is tenable if the "assumptions" listed in paragraph seven of his affidavit are supportable.¹⁵

¹⁵ There is one qualification to this general statement. Defendants do challenge Dr. Peltzman's internal logic to the extent he believes that defendants' behavior inflated the prices charged end-users of cylinder gas. Defendants argue that they controlled such a small share of this sub-market, see *supra*, that their alleged activities could not possibly have affected cylinder prices, notwithstanding their control of over 80% of the overall market. See *In re Electric Weld Steel Tubing Antitrust Litigation*, [1980-

However, defendants continue, at least two of these beliefs cannot be credited in light of the "wealth of [**35] evidence" offered by defendants in opposition. Defendants specifically challenge Dr. Peltzman's "assumptions" that defendants' price schedules "served as benchmarks for their pricing in the merchant market," and that schedule increases "were implemented as to the class as a whole on an ongoing continuing basis."

[**36] Defendants mischaracterize the record. The quoted statements are not mere "assumptions" of Dr. Peltzman, but are summaries of factual claims the plaintiffs intend to prove in common fashion-- i.e., though the testimony of former employees of the defendants as to how defendants utilized their price schedules, both generally and following increases in their rates. To reject Dr. Peltzman's testimony on the ground asserted by defendants, the court would thus have to make factual determinations as to what exactly transpired during the period in question. The court would have to determine the "true" role played by the price schedules in the industrial gas industry.

As a theoretical matter, even factual inquiries may be permissible during the course of a certification ruling. In an oft-cited opinion, Judge Godbold, writing for an en banc court, postulated such an instance:

"On the merits" is an elusive term, not wholly suitable as a guideline in this situation. In a sense much that a plaintiff alleges with respect to his individual claim goes to the "merits" of his claim. A plaintiff who seeks to represent all employees on a claim of discriminatory denial of promotions [**37] might, if the case goes to trial, lose on his individual claim because it turns out that he was never employed by the defendant. Retrospectively, one might say he lost "on the merits." Yet *there is no doubt that the court could lay bare at a preliminary stage this fact concerning the plaintiff*, and, having done so, conclude plaintiff was not a proper representative because he lacked the nexus with the class and its interests and claims which is embraced in the various requirements of 23(a) and (b). [*293] It is inescapable that in some cases there will be overlap between the demands of 23(a) and (b) and the question whether plaintiff can succeed on the merits.

Huff v. N.D. Cass Company of Alabama, 485 F.2d 710, 714 (5th Cir. 1973) (en banc) (emphasis added); see also Nichols v. Mobile Board of Realtors, 675 F.2d 671, 678 (5th Cir. 1982). The type of factual determinations the defendants ask this court to make are, however, far more difficult and complicated than those suggested in *Huff*. The court's error quotient is accordingly high, particularly since it is being asked to rule without the benefit of traditional trial safeguards, and the court must move [**38] with trepidation in resolving these disputes in a way that effectively precludes further litigation, at least insofar as many of the absent class members are concerned. "There is a danger," Judge Marshall has written, "in delving too far into the merits of a case prior to a class action determination." McCray v. Standard Oil Co., 76 F.R.D. 490, 500 (N.D. Ill. 1977). These dangers are particularly acute here.

Simply put, the evidence before the court pertaining to Dr. Peltzman's "assumptions" is not nearly so one-sided as defendants apparently believe. The various "impact studies" submitted by the defendants¹⁶ can be impeached on statistical grounds,¹⁷ and do not in any event establish that the price schedules were completely divorced from

81] TRADE CASES (CCH) P63,783 (E.D. Pa. 1980), at 78,182-83. Plaintiffs counter that "the character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962) (quoting American Tobacco Co. v. United States, 147 F.2d 93, 106 (6th Cir. 1944)). Plaintiffs further argue that "conspirators controlling a seemingly small percentage of the market can through an effective conspiracy cause classwide impact. If the conspirators are the largest producers and the price leaders, their price leadership can cause their conspiracy to have market wide impact." (Plaintiffs' Reply Memorandum in Support of Motion for Class Certification at 75 n. 26) What is missing from this response, however, is an indication of how, or even whether, plaintiffs intend to *prove at trial* that "price leadership" was present, or that the merchant market was so interrelated that the "conspiracy as a whole" must have influenced the gas cylinder sub-portion. In light of the court's ultimate holding, this point need not be pressed further. Plaintiffs should be aware, though, that, in light of the present record, the court might not have included merchant purchasers of cylinder gas in the class had one been certified at all.

¹⁶ These studies detail the percentage of prices in a given universe that, over various periods of time, either decreased, remained unchanged, or increased less than the full amount of the applicable schedule increases.

actual pricing decisions. Even if it is true that many purchasers did not experience price increases during the period the schedules were rising, such evidence does not exclude the possibility that these same individuals would have paid even less in the absence of the alleged conspiratorial behavior. The jury, of course, may ultimately agree with defendants that the factual basis for Dr. Peltzman's conclusion of class-wide impact do not **[**39]** exist. But this possibility is not fatal. Plaintiffs have suggested how they intend to present their evidence in a common manner, and the issue for the court is merely whether these showings are substantial enough to justify further proceedings in this direction. In this court's view, they are.

Furthermore, defendants attack a straw man to the extent they claim that the price schedules lacked market significance since few purchasers actually paid the pertinent schedule price. As set out before, plaintiffs have never argued that transaction prices precisely tracked the schedules; their claim is rather that these schedules influenced the actual prices paid in more subtle ways; the schedules are alleged to have been "benchmarks," nothing more.¹⁸ **[**40]**

It thus appears that plaintiffs have a sufficiently viable, common method of going forward on the question of impact. The only issue that remains on this phase of the case is whether the class format will similarly accommodate defendants' right to present their side of the story. See, e.g., *In re Transit Company Tire Antitrust Litigation*, 67 F.R.D. 59, 72 (W.D. Mo. 1975) (In ruling upon a class certification request, a court must consider both the affirmative evidence likely to be put forth by the plaintiffs and the defensive evidence likely to be offered by the defendants.). Not surprisingly, defendants answer in the negative, arguing that since each merchant price resulted from numerous factors of varying strength, see *supra*, conclusive proof **[**41]** that these prices were not influenced by the alleged conspiracy will necessarily require an individualized examination of each transaction. But defendants do not bear the burden of proof on the question of impact, and they accordingly need not "prove" anything in an affirmative sense. Defendants need only refute plaintiffs' presentation, and the relevant inquiry therefore **[*294]** turns on whether common proof will reasonably suffice for that purpose. The court believes it will.

Plaintiffs, as shown above, will attempt to establish class-wide impact by presenting Dr. Peltzman's testimony, and by proving the predicate facts underlying it, e.g., that defendants colluded to raise or stabilize the prices reflected on the price schedules, and that these schedule prices were in fact "benchmarks" influencing the actual prices charged in the merchant market. Defendants can rebut this case by presenting evidence either that no collusion occurred or that the price schedules were routinely disregarded when actual pricing decisions were made. Defendants also can impeach Dr. Peltzman by presenting *examples* of actual purchasers who, according to defendants' experts, paid no more **[**42]** over the life of the alleged conspiracy than they would have, even if defendants had refrained from the actions now challenged. All of these presentations fall under the "common" heading because they refute the evidence of impact relied upon by each class member, and thus tend to undermine each purchaser's cause of action *simultaneously*.

It follows that defendants' assertion that they will need to examine the situation surrounding *each* sale in the merchant market is flawed. Defendants need only point to *examples* of instances in which impact was not present, for the very existence of each example undermines a case like plaintiffs' which depends upon the testimony of an expert who denies the possibility that any such example might occur. Of course, as the number of examples expands, so does the strain on the court's ability to try the lawsuit. But without now deciding the outer limits of what is permissible, the court is confident that defendants' right to present an effective defense can be preserved within the context of a manageable proceeding.

3. Damages

¹⁷ See Madansky Aff. at para. 9.

¹⁸ Defendants' more powerful argument on the "benchmark" question is that no price schedules existed for various types of sales. Were a class otherwise certifiable, the court might have refined its definition accordingly. See generally note 15, *supra*.

The question of damages is individualized since each class member must step forward and make separate showings [**43] at least as to the amount of product purchased. Whether these are the only individualized showings that are needed is addressed at length *infra*.

4. Attempt to Conceal

All sides agree this issue is common for the same reasons that govern the question of violation.

5. Due Diligence

In the court's initial opinion, it found due diligence to be an individualized issue since resolution required specific knowledge of what each class member knew--or should have known--and when. See [*Simer v. Rios, supra, 661 F.2d at 673*](#) (question of the impact of an invalid regulation "extremely individualized" since it "depends on each individual's state of mind.") Plaintiffs did not challenge this assertion in their written cross-motion to reconsider, but did express disagreement with the court when questioned at oral argument. Plaintiffs' position is that once an attempt to conceal is shown, "due diligence does not become something which has to be proved affirmatively[] it has to be disproved." (Transcript of December 3, 1982 hearing at 54) But this contention, even if correct as a matter of substantive law, is irrelevant for present purposes. Whether due diligence is a matter to be [**44] proved by plaintiffs or disproved by defendants, it remains an issue that potentially must be litigated--and litigated individually--whenever a class member seeks damages on a claim that arises before the statutory period.¹⁹

6. Conclusion

Three of the five issues to be resolved [**45] in this case fall within the "common" category. [*295] Only damages and due diligence require individualized proof, and the inquiry thus shifts, in accordance with *Simer*, to a determination of whether even they may be handled in a manageable fashion.

B. Can the Burden of Trying the Individual Questions be Alleviated?

The court's primary concern is with the issue of damages.²⁰ Underlying this concern is a belief that this lawsuit cannot be deemed manageable if this court must hear an unending series of plenary "mini-trials" devoted to the question of damages. [**HN12**](#) Common questions simply do not "predominate" when each purchaser's specific injury must be calculated in a separate, time-consuming hearing--each conducted before this court, each specific to a given class member, and each replete with discovery, experts, cross-examination and documents. See, e.g., [*State of Alabama v. Blue Bird Body Co., 71 F.R.D. 606, 616 \(M.D. Ala. 1976\)*](#), approved on this point, [*573 F.2d 309, 328 \(5th Cir. 1978\); Ralston v. Volkswagenwerk, 61 F.R.D. 427, 433 \(W.D. Mo. 1973\)*](#).

[**46] In their briefs supporting the original motion to certify, plaintiffs disputed this view, arguing that even if a separate "mini-trial" was needed to determine the extent of each class member's injury, the class could still be certified since the damage question was simply "irrelevant." This claim finds no support in [*Rule 23: HN13*](#) "[A] trial judge cannot, in determining the manageability of a proposed class action, look exclusively to only one aspect of the case . . . ; he can and must look at the case as a whole and, as we have seen, consider proof of damages as

¹⁹ Assuming that the burden of showing the absence of due diligence is in fact properly placed upon defendants, this burden differs significantly from that faced by defendants in attempting to refute plaintiffs' proposed proof of impact. For the reasons already given, defendants could successfully negate plaintiffs' allegation of class-wide impact with a limited number of showings to the contrary. By contrast, an equally limited number of demonstrations of no due diligence would have relevance only for the class members in question. In order to prevail on the question of due diligence against *all* pertinent members of the class, defendants would have to offer separate proof with respect to each relevant purchaser's knowledge.

²⁰ The need to engage in individualized examinations of due diligence will not appreciably extend the litigation if complicated damage assessments must in any event be made. See [*In re Fine Paper Antitrust Litigation, 82 F.R.D. 143, 155 \(E.D. Pa. 1979\); In re Corrugated Container Antitrust Litigation, 80 F.R.D. 244, 248 \(S.D. Tx. 1978\); In re Plywood Antitrust Litigation, 76 F.R.D. 570, 586 \(E.D. La. 1976\).*](#)

well as other issues in the case." *Windham v. American Brands, Inc., supra, 565 F.2d at 71*. Indeed, when read closely, most of the decisions cited by plaintiffs do not take a different position. They merely assert the nearly tautological proposition that "the necessity for calculation of damages on an individual basis should not preclude class determination *when the common issues which determine liability predominate.*" *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 456 (3d Cir. 1977)*, cert. denied, 434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978) (emphasis added); accord, e.g., *In re South Central Bakery Products, I**471 86 F.R.D. 407, 419 (M.D. La. 1980)*; *In re Sugar Industry Antitrust Litigation*, [1977-1] TRADE CASES (CCH) P61,373 (N.D. Ca. 1976), at 71,335. **[HN14]** Damage questions can thus be deemed "irrelevant" only if it is first determined that the remaining issues "predominate." Under *Simer*, this predicate determination itself requires a finding that damages can be handled in a manageable fashion.

In the alternative, plaintiffs offer several proposals designed to simplify the damage phase of the case. Each suggestion is flawed, however, and the court is compelled to conclude that, on the basis of the present record, damage adjudication appears likely to assume the unmanageable character that is feared. Therefore, class certification must be denied.

Plaintiffs' main proposal involves use of a formula. Plaintiffs postulate that each class member's injury can be calculated through a simple process of multiplying the amount of the individual's purchases by the uniform overcharge figure applicable to the time and product under scrutiny. Plaintiffs further explain that the uniform overcharge figure is the difference between the average FOB market price (for the relevant time and product) **[**48]** and the governing "swap price." The "swap price" refers to the price defendants charged one another when settling imbalances in their "swap accounts"--accounts that recorded the net amount of product supplied to competitors through swap transactions of the type described before.²¹

[49] [*296]** Clearly, if this methodology is sufficiently viable, manageability concerns would greatly subside, for individualized proof would be needed only to establish the amount of each class member's purchases; the applicable overcharge figure would be set without reference to considerations that vary from purchaser to purchaser. Recognizing these facts, defendants challenge the economic logic underlying the swap price theory. The issue for the court is whether these attacks undermine plaintiffs' theory to such an extent that the formula may now be rejected.

To have any significance, this formula must be programmed to determine the difference between the prices actually paid and the prices that would have been paid in the absence of defendants' allegedly illegal behavior; such is the

²¹ An example may help clarify the formula plaintiffs have in mind. Assume that during 1978 the average FOB price for all liquid oxygen sold in the merchant market was 10 cents per 100 cubic feet, and that the swap price for the same product and time period was 7 cents per 100 cubic feet. Assume further that during 1979, the relevant figures (again with reference to liquid oxygen) were 12 cents per 100 cubic feet (average FOB merchant) and 8 cents per 100 cubic feet (swap). Under plaintiffs' approach, the uniform overcharge figure governing 1978 would be 3 cents per 100 cubic feet (the difference between 10 and 7); the 1979 figure would be 4 cents per 100 cubic feet (the difference between 12 and 8).

Assume further that customer A purchased 400 cubic feet of liquid oxygen during 1978 at 12 cents per 100 cubic feet, and that customer B purchased 400 cubic feet of liquid oxygen during the same year at 10 cents per 100 cubic feet. Finally, assume that in 1979 customer A again bought 400 cubic feet at 12 cents per 100 cubic feet.

Under plaintiffs' methodology, customer A would thus be entitled to damages equalling 12 cents (400 cubic feet times 3 cents per 100 cubic feet) for his purchases during 1978, and to 16 cents (400 cubic feet times 4 cents per 100 cubic feet) for his purchases in 1979. Customer B would receive 12 cents (400 cubic feet times 3 cents per 100 cubic feet) for his 1978 transactions.

Note that customers A and B receive the exact same award for their 1978 purchases even though they paid varying amounts in the merchant market. This equality results from the fact they both purchased the same amount of product, and from the fact that plaintiffs' formula rests on a belief that each contemporaneous sale in the merchant market was influenced by defendants' illegal activities to the same extent (i.e., 3 cents per 100 cubic feet in 1978). In other words, under plaintiffs' assumptions, customer A would have paid--in the absence of defendants' conspiratorial behavior--9 cents per 100 cubic feet in 1978, and customer B would have paid 7 cents per 100 cubic feet. See *infra*.

conceptual measure of damages applicable in this case. See P. Areeda & D. Turner, Antitrust Law para. 344 (1978). Defendants argue from this definition that since plaintiffs intend to subtract swap prices from actual merchant prices (*i.e.*, prices that were allegedly the product of a conspiracy), the swap price theory "works" only if swap prices approximate the prices that would have [**50] been paid by the class members in the absence of the alleged conspiracy. However, defendants continue, no such equation can be drawn, for while swap prices were uniform throughout the country (for a given time and product), pricing in a hypothetically non-collusive merchant market would most certainly have been otherwise. Defendants base the latter assertion on their belief that the pricing actually observed in the purportedly price-fixed merchant market was "chaotic" itself; it makes no sense, defendants reason, to assume that greater uniformity would have prevailed under uncontrolled, competitive conditions.

Plaintiffs do not deny that the swap prices were nationally uniform. Nor do they dispute the factual assertion that non-collusive pricing would have been variable. (Indeed, one of plaintiffs' substantive contentions appears to be that defendants artificially reduced such diversity by utilizing their national price schedules. See *supra*.) Defendants' attack nevertheless fails, for it is based on a misunderstanding of the manner in which the swap price formula operates. Defendants' argument would have force *if* plaintiffs were claiming that each class member was overcharged [**51] by the difference between *that individual's* actual price and the applicable swap price. Under this approach, the resulting difference could reasonably be said to approximate the purchaser's injury only if the swap price itself approximated the price *that purchaser* would have paid but - for the conspiracy. As this would be true equally in the case of each class member, it would then follow, [*297] given the uniform nature of the swap price, that plaintiffs' theory implicitly assumed a non-collusive world in which price variation was absent.

But plaintiffs proffer an entirely different approach. They propose instead to subtract the swap price from the average price paid for the relevant product during the year of the conspiracy in question. In this way plaintiffs seek to determine a single unit overcharge figure to be applied against each purchaser who bought during that time period. See note 21, *supra*. Furthermore, plaintiffs argue, the use of a uniform overcharge figure is appropriate regardless of whether non-collusive pricing was variable: Even if it was, collusive pricing was presumably disparate to the exact same degree; each price in the latter market [**52] simply was higher than its corresponding measure in the non-collusive market by the uniform amount. Dr. Peltzman explains:

Contrary to Professor Markham's assertion, my proposed use of swap prices as a non-conspiratorial benchmark does not assume that there must be a single "competitive price" for the entire country and for all customers (para. 18). Nor does geographic diversity of prices make it impossible to have a single benchmark (para. 23). In a conspiracy which is national in scope, customers in all areas will pay prices which are higher than they would have been without the conspiracy. Those high conspiratorial prices may differ among customers, just as it might be the case that the lower non-conspiratorial prices differed among customers. My methodology is designed to provide an estimate of the excess of the conspiratorial price. For this purpose, I proposed a comparison of a competitive benchmark to an average conspiratorial price. Nothing in this methodology requires any assumption that all customers pay the same conspiratorial price or that all would have paid the same price absent conspiracy. And, unless it can be convincingly shown that the effects [**53] of the conspiracy *differed* among customers, an attempt at individual calculation of damages is not only not required [but] would be invalid methodologically.

Peltzman 4th Aff. at para. 16 (emphases in original). In short, plaintiffs' theory rests not on an assumption of uniform non-collusive pricing, but on a presumption that defendants' illegal activities presumptively influenced each sale transaction to the exact same extent. According to Dr. Peltzman, the trier-of-fact should find, in the absence of contrary evidence put forth by defendants, that each purchaser (of a given product during a given time) paid a uniform surcharge.

This presumption is an absolutely crucial lynch pin in the analysis justifying the swap price formula as a lawful determinant of damages. Without it, there is little, if any, reason to think that plaintiffs' formula adequately

measures the extent of each class member's *individual* injury, as the antitrust laws demand.²² Clearly, if members of the class paid varying amounts of overcharge, a theory that assumes the contrary is hardly programmed to deal with the complexities of each plaintiff's situation.²³ Such a theory would appear [**54] instead [*298] to be capable of nothing more than mere arbitrary assignments of injury.

[**55] It follows that plaintiffs' theory cannot be accepted at this time, notwithstanding the court's rejection of defendants' prior challenge. See pp. 35-37, *supra*. Plaintiffs have offered neither argument nor citation in support of their claim that they are entitled to invoke the crucial presumption in question. Plaintiffs have simply made the bald face assertion that a presumption of uniform impact embodies "the best approximation of the real world that can be made today after defendants conspired." (Transcript of September 2, 1981 hearing at 57) The court cannot accept this proposition--given the nature of this case--without further elaboration. Plaintiffs are not alleging that defendants' conspiratorial behavior simply generated a higher plateau from which defendants entered into the very same pricing activities they would have commenced even in the absence of the conspiracy; plaintiffs are not claiming, in other words, that "everything that went on would have gone on anyway, except at a lower level." Plaintiffs' theory of the case is much broader. It encompasses the notion that certain forms of behavior occurred (e.g., forbearance from competitive solicitations of [**56] rivals' "historical" customers) that simply would not have been observed under non-collusive circumstances. Under plaintiffs' own theory of the case, defendants' allegedly illegal behavior thus added to the pricing universe several factors, all of which might not have affected each transaction. Under these circumstances, and without meaningful argument from plaintiffs, the court cannot now assume that uniform impact was present.²⁴ The fact of such impact could be *proven* at trial, but plaintiffs have offered absolutely no indication of how, or, for that matter, whether, they will lay a foundation for Dr. Peltzman's conclusory assertions; plaintiffs are silent as to their method, if any, of going forward on this crucial point.²⁵

[**57] The nature of the court's holding should not be misunderstood. The court is *not* making a final, binding determination that the alleged conspiracy must have influenced the merchant market, if at all, in a non-uniform manner. Nor is the court even foreclosing the possibility that plaintiffs might be entitled to a contrary presumption. The court is simply holding that, on the present record, plaintiffs have failed to offer even a minimal explanation of why the court should accept the assumption anchoring their theory.²⁶

²² Although a private claimant under the antitrust laws need only quantify the extent of his injury with reasonable approximation, see, e.g., *Story Parchment Co. v. Paterson Parchment Paper Co.*, 282 U.S. 555, 566, 75 L. Ed. 544, 51 S. Ct. 248 (1931), such approximation must relate to the injury felt by *that* claimant. See, e.g., *Windham v. American Brands, Inc.*, *supra*, 565 F.2d at 66; *Kline v. Coldwell, Banker & Co.*, 508 F.2d 226, 236 n. 8 (9th Cir. 1974); *In re Hotel Telephone Charges*, 500 F.2d 86, 90 (9th Cir. 1974); *Al Barnett & Son, Inc. v. Outboard Marine Corporation*, 64 F.R.D. 43, 54-55 (D. Del. 1974); Landers, *Of Legalized Blackmail and Legalized Theft: Consumer Class Actions and the Substance-Procedure Dilemma*, 47 So. Cal. Rev. 842, 869-70 (1974); Handler, *Twenty-Fourth Annual Antitrust Review*, 72 Colum. L. Rev. 1, 37 (1972).

²³ It is conceivable that the overcharges might differ, but within a range small enough that the common number generated by the swap price method would be a sufficiently reasonable approximation of each. See generally note 22, *supra*. Alternatively, the overcharges might differ greatly, but each might be smaller than the swap price number. In that case, the inaccuracies in plaintiffs' method would redound to defendants' advantage. Neither of these possibilities have been suggested or advocated by plaintiffs.

²⁴ Cf. *In re Master Key Antitrust Litigation*, 70 F.R.D. 23, 26 (D. Conn.), appeal dismissed, 528 F.2d 5 (2d Cir. 1975) ("in few class actions is there a simple per capita measure of recovery.").

²⁵ The present situation thus differs greatly from what was observed on the fact of damage issue, where it was evident that plaintiffs intended to offer common *proof* supporting Dr. Peltzman's "assumptions." See *supra*. The record before the court offers no such assurance with respect to the presumption of uniform impact.

²⁶ Plaintiffs' alternative damage theory is based upon the post-conspiracy decrease in merchant prices. It suffers from an identical infirmity since it is similarly designed to generate a common overcharge figure. See Transcript of December 3, 1982 hearing at 50.

Moreover, even if the concept of uniform impact is accepted, the specific figure generated by the swap price method must additionally bear some reasonable relation to the "true" amount of uniform damage. Under Dr. Peltzman's [**58] assumptions, this relation holds only if the applicable swap price is equal to or greater than the average price that would have been paid in the absence of the conspiracy for the product at issue. See Appendix. (This assertion is obviously a more refined version of defendants' earlier-rejected claim. See pp. 35-37, *supra*.) Since plaintiffs have made sufficient showings that non-collusive prices would have tended in this industry towards marginal cost,²⁷ the necessary relation may be restated as follows: Swap prices must have been equal to or greater than the [*299] average marginal cost of producing the product in question during the relevant period of time.

Defendants vigorously argue that no such relation can be proven since swap prices were mere accounting devices that bore no market significance. See *In re Transit Company Tire Antitrust Litigation*, 67 F.R.D. 59, 77-78 (W.D. Mo. 1975).²⁸ Defendants claim that they intended all swaps [**59] to be pure barter, that swap accounts were carefully monitored to prevent buildups of large imbalances either way. Most importantly, a swap "purchaser" had no assurance that it could compensate the "seller" with money rather than return product; it was the seller's option either to demand a money settlement determined by the swap price (usually at the end of the year) or to carry its receivable into the future in the hope that additional transactions would eliminate the imbalance. Swap prices thus could not have served as market signals guiding the purchaser's decision to enter into the swap arrangement. Cf. *Airweld v. Airco*, 576 F. Supp. 676 (D. Or. 1983) (swap transactions in the industrial gas industry are not "sales" for purposes of the Robinson-Patman Act).

[**60] Whatever the merits of this argument, it cannot be held, on the basis of this record, that swap prices had no relevance for the seller:

The plain and important fact is that swaps are not pure barter. Even if defendants wish it would work out that way, there is no obligation that a recipient of x cubic feet of oxygen supply x cubic feet to the sender. Once this elemental fact is grasped, the consequences of truly arbitrary swap prices are easily grasped [If] the swap price is set arbitrarily low, there would of course be many requests for swapped gas, but few would be accommodated, *since potential senders would understand the recipient's incentives to settle in cash*. Again, there would be a supply-demand imbalance. This time much would be demanded but little offered. As in any market, there will be some price intermediate between those which are so high as to provoke excess supply and those so low as to provoke excess demand at which the swap market will clear. Such a price will convince potential suppliers that when they honor a swap request, their request will be honored in the future or they will be adequately compensated in money.

Peltzman [**61] 4th Aff. at para. 13 (emphases added). Plaintiffs might thus be able to construct a viable explanation as to why swap prices could not possibly have been set at a level under the average marginal cost. The simple truth, however, is that no such explanation has been tendered. During the original round of briefing and argument, plaintiffs did contend that *the* swap price must have exceeded *the* marginal cost. See Transcript of September 2, 1981 hearing at 64. But no consideration was given then, or has been given since, to average measures.

There are additional problems with the swap price methodology. First, plaintiffs intend to estimate average FOB merchant prices from publicly available Census figures. However, these figures do not list average FOB prices since they are based on price submissions that often reflect built-in transportation charges. (Transportation

²⁷ See Peltzman 2d Aff. at paras. 4, 8.

²⁸ Of course, even if defendants' economic logic were correct, swap prices might coincidentally equal or exceed average marginal costs. The determination of such a coincidental relationship would, however, require an initial calculation of each relevant marginal cost, and the manageability problems the swap price method was designed to cure would thus resurface.

assessments do not come into play in swap deals; the purchaser simply fills its truck up at the seller's plant.)
²⁹ [**63] Dr. Peltzman has assured the court that

[*300] the methodology for (making the necessary adjustment) is surely simple to comprehend: estimate the portion of revenues per 100 cubic [**62] feet as reported to the Census which is non-product charge and either deduct this from the gross revenues per 100 cubic feet or add it to the non-collusive benchmark price. Given this, the question becomes whether it is practical to do so with some reasonable degree of accuracy. *While the precise way in which this cannot be specified at this stage of the case, without further data*, it is clear that nothing in my methodology requires an individualized invoice-by-invoice calculation of damages.

Peltzman 4th Aff. at para. 15 (emphasis added). ³⁰ This response is insufficient. For the court to accept Dr. Peltzman's claims, it needs to know at least the rough outlines of how he would approach the problem at hand. No such guidance has been given, however, and the court is left merely with his unexplained assurance that he can proceed in a common fashion. Courts should not certify class actions on this basis. *In re Hotel Telephone Charges*, 500 F.2d 86, 90 (9th Cir. 1974).

Moreover, the rationality of applying the swap formula to cylinder sales is seriously in doubt. The materials before the court ³¹ [**64] indicate that cylinder products were not swapped, and that the various swap prices hence did not pertain to them. The relevant Census figures also do not segregate cylinder sales of argon from liquid sales. Because these two forms of product sold at differing price levels, such joint reporting diminishes the usefulness of the Census data as a determinant of the average FOB price of either form. In short, all of the data needed to operate the swap price theory in a proper manner cannot be obtained easily. Plaintiffs' formula approach does not ease the court's concern that the proposed class action is unmanageable. See *Klein v. Henry S. Miller Residential Services*, 94 F.R.D. 651, 660-61 (N.D. Tx. 1982); *Chmielecki v. City Products Corp.*, 71 F.R.D. 118, 162 (W.D. Mo. 1976); *In re Transit Company Tire Antitrust Litigation*, *supra*, 67 F.R.D. at 77. ³²

Nor is the court aware of any other viable method of handling the damages question. The solution adopted by the court in its initial opinion was to attack the very premise that a problem existed. The court reasoned that the danger of burdensome "mini-trials" was merely speculative, because the case might be settled or otherwise resolved long before damages had to be reached, and because the very complexity of the damage question--the complexity which rendered the "mini-trials" unmanageable in the first place--would, in any event, likely reduce the number of plaintiffs willing to prove up damages. See generally note 13, *supra*. The court now recognizes that *Simer* implicitly forecloses such an approach. Plaintiffs in *Simer* sued the federal Community Services Administration [**65] for improperly denying cash assistance payments to members of the proposed class of low-income individuals. Without ever ruling on the propriety of the class certification request, the district court granted summary judgment for the plaintiffs on the purely legal issue of whether the agency's authorizing statute supported its position. The parties then devised a settlement plan under which the funds not spent on the assistance program were to be funneled into various projects purportedly of interest to the class. Subsequently, the district judge vacated the settlement and dismissed the suit, finding that the settlement had been improperly obtained, that the named

²⁹ Defendants have argued that swap transactions differ from merchant sales in several additional ways, and that for this reason, FOB merchant prices can never be meaningfully compared with swap prices. *In re Transit Company Tire Antitrust Litigation*, 67 F.R.D. 59, 76 (W.D. Mo. 1975). Dr. Peltzman has adequately answered these remaining assertions. See Peltzman 3d Aff. at paras. 5-8.

³⁰ See generally *Martino v. McDonald's System, Inc.*, 81 F.R.D. 81, 91-92 (N.D. Ill. 1979).

³¹ Only defendants placed evidence in the record on this question. Plaintiffs explicitly declined to take discovery on how the swap prices were actually set. See Transcript of September 2, 1981 hearing at 19.

³² Other courts have rejected damage formulae proffered by class proponents. See, e.g., *Moore v. Southeast Toyota*, No. CV 81-P-0491-S, slip op. at 7 (N.D. Ala. Feb. 3, 1982); *Yanai v. Frito Lay, Inc.*, 61 F.R.D. 349, 352 (N.D. Ohio 1973); *Ralston v. Volkswagenwerk*, 61 F.R.D. 427, 432 (W.D. Mo. 1973).

plaintiffs had been fully compensated, and that a [*301] class could not be certified. In affirming the latter ruling, the Seventh Circuit stressed that resolution of the class members' individual damage claims would necessitate an unmanageable series of "mini-trials." The Court "gave no consideration to the possibility of settlement--which was very high, inasmuch as one settlement had already been reached--nor did it consider the likelihood that individual class members would pursue their individual claims--which [**66] was very low, in that the class members were poor people with claims of no more than \$250." (Reply Memorandum in Support of Defendants' Motion to Certify a § 1292(b) Appeal from the Class Certification Order at 3). The considerations which originally motivated this court were present in *Simer*, but ignored.

Sub-classing pursuant to subsection (c)(4)(B) of [Rule 23](#) is, by contrast, a recognized solution to problems of manageability in certain cases. See *Simer v. Rios, supra, 661 F.2d at 674*. Plaintiffs, however, have not suggested this solution, and the court is at a loss as to how sub-classing would be of assistance in this particular lawsuit.

What plaintiffs do suggest is that they be permitted to obtain a "fluid recovery" on behalf of the class. The Court in *Simer* explained this term:

The fluid recovery is used where the individuals injured are not likely to come forward and prove their claims or cannot be given notice of the case. In a fluid recovery the money is either distributed through a market system in the way of reduced charges or is used to fund a project which will likely benefit the members of the class.

Id., 661 F.2d at 675 (citation [**67] and footnotes omitted). [HN15](#) When a fluid recovery is sought, no attempt is made to correlate class members with actual injuries. Damages are distributed in an imprecise manner that eliminates the need for individualized determinations.

The problem with this "solution"--aside from plaintiffs' failure to specify exactly what type of fluid recovery they envision--is that it is simply impermissible as a matter of law. Fluid recoveries have been condemned as illegal in numerous decisions. See, e.g., *Windham v. American Brands, Inc., supra, 565 F.2d at 72*; *In re Hotel Telephone Charges, supra, 500 F.2d at 90*; *Eisen v. Carlisle & Jacquelin*, 479 F.2d 1005, 1018 (2d Cir. 1973), vacated on other grounds, *417 U.S. 156, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974)*; *Al Barnett & Son, Inc. v. Outboard Marine Corporation*, 64 F.R.D. 43, 55 (D. Del. 1974). But see *In re Sugar Industry Antitrust Litigation*, 73 F.R.D. 322, 353-54 (E.D. Pa. 1976). To be sure, *Simer* rejects the breadth of these precedents and authorizes a fluid approach when "the use of such a mechanism is consistent with the policy or policies reflected by the statute violated." *Id. at 676*. The Court explicitly [**68] recognized, however, that this form of reasoning might lead to an absolute ban on fluid recoveries in antitrust cases. *Id. at 676 n. 42*.

Such a *per se* approach is entirely correct. The Clayton Act limits recovery to those actually injured by defendants' conduct,³³ and further limits the extent of the recovery to the amount the claimant has approximately suffered. See note 22, *supra*, and accompanying text. Fluid recoveries disregard these limitations, and hence are not "consistent with the policy or policies reflected by the statute violated."

The final question is whether the case could be made manageable by bifurcating the trial. See [Fed. R. Civ. P. 42\(b\)](#). A positive response might be possible if the court coupled bifurcation with an order [**69] under subsection (c)(4)(A) of [Rule 23](#)³⁴ certifying the case as a class action solely with respect to the common issues raised by the complaint; the court would then have before it all common questions (those arising out of [*302] the actions of the named plaintiffs and the absentees), as well as the individual questions presented solely by the complaints of the named plaintiffs. Trial would be bifurcated between the common and individual issues. If the class prevailed in the initial, common phase of the proceeding, the named plaintiffs would then continue to litigate their individual questions in this court; the remaining class members could also proceed, but since no class action would then exist,

³³ Indeed, the courts have grafted even further limitations on this rule. See, e.g., *In re Industrial Gas Litigation*, 681 F.2d 514 (7th Cir. 1982), cert. denied, *460 U.S. 1016, 103 S. Ct. 1261, 75 L. Ed. 2d 487, 51 U.S.L.W. 3634 (1983)*.

³⁴ [HN16](#) Under subsection (c)(4)(A), "an action may be brought or maintained as a class action with respect to particular issues."

they would not be obligated to pursue their individual claims here. Rather, they would be entitled to sue in any district court in which jurisdiction and venue could be obtained.

[**70] This plan would ease manageability concerns by decentralizing the second phase of the litigation. The individual questions would be tried before many courts, and the burden experienced by any one tribunal would correspondingly diminish.

Defendants argue that *Simer* rejects this "solution" to manageability problems. Relying on one sentence in one footnote, defendants assert that under *Simer*, "a bifurcated trial would not solve the problem of individual issues . . . since it would merely delay the issue to a later date and at that point the complications would arise." *Id.* 661 F.2d at 673-74 n. 33. However, it is not clear from the context of the quoted statement whether it reflects the *Simer* Court's own view, or merely its summary of a prior decision. It is also not clear whether the Court had in mind bifurcation involving several courts, or simply bifurcation in the context of a lengthy trial conducted in phases before one court. Defendants must point to more than an ambiguous sentence in a footnote before this court will conclude that the Seventh Circuit has rejected the procedural set-up proposed here.³⁵

[**71] But while *Simer* does not necessarily bar the bifurcation plan described above, constitutional considerations might. **HN17**[↑] By the plain, though unnecessary, terms of *Rule 42(b)*, a bifurcation order must "preserv[e] inviolate the right of trial by jury as declared by the Seventh Amendment to the Constitution or as given by a statute of the United States." The concern created by the proposed scheme is that it contemplates separate juries trying different aspects of single causes of action, those of the unnamed class members. In *Gasoline Products Co. v. Champlin Co.*, 283 U.S. 494, 75 L. Ed. 1188, 51 S. Ct. 513 (1931), the Supreme Court dealt with an analogous situation. The Court of Appeals had found error in the district court's jury instructions on the damage aspects of a breach of contract counterclaim, and had remanded for a retrial limited to a recalculation of the damages due. The Supreme Court reversed, holding that the proceedings on remand had to encompass not only the question of damages, but also the underlying issue of whether the counter-defendant was liable at all. The Court stated that "where the practice permits a partial new trial, it may not properly be resorted [**72] to unless it clearly appears that the issue to be retried is so distinct and separable from the others that a trial of it alone may be had without injustice." *Id.* at 500. No sharp line could be drawn in the case under review because a proper damage assessment necessitated a prior understanding of what the pertinent contract specifically provided. But the initial jury's verdict definitively revealed only a finding that a contract had existed and had been breached; it offered no guidance as to what that jury had specifically understood the contract to require. Thus, it was impossible for the district court to instruct the jury on remand as to the details originally determined; the members of the second panel could only guess as to what determinations had been originally made and were hence binding. The damage question was "so interwoven with that of liability that the former [could not] be submitted to the jury independently of the latter without confusion and uncertainty, [*303] which would amount to a denial of a fair trial." *Id.*³⁶

[**73] The principles announced in *Gasoline Products* apply outside the context of retrials; they similarly govern instances, like here, where bifurcation is proposed as an initial matter. 9 C. Wright & A. Miller, *Federal Practice & Procedure*, § 2391, p. 303 (1971). The question for the court is thus whether the issues to be separated are distinct enough that they may be considered fairly in isolation. In particular, the court must consider whether damages can be properly assessed apart from inquiries into violation or fact of damage.

The latter separation--between fact of damage and damages--is the most troubling. Though there is precedent upholding this form of bifurcation against *Seventh Amendment* challenge, see *In re Ampicillin Antitrust Litigation*, 88

³⁵ Indeed, at least two members of this Court have relied in part upon concepts of bifurcation while certifying (b)(3) classes in the aftermath of *Simer*. *Ridings v. Canadian Imperial Bank*, 94 F.R.D. 147, 151 (N.D. Ill. 1982) (Aspen, J.); *Board of Education v. Admiral Heating*, Nos. 79 C 3046, 79 C 5253 (N.D. Ill. Aug. 10, 1982) (Shadur, J.).

³⁶ Stated otherwise, to the extent there is uncertainty as to the original panel's findings, the *Gasoline Products* "rule is dictated for the very practical reason that if separate juries are allowed to pass on issues involving overlapping legal and factual questions the verdicts rendered by each jury could be inconsistent." *State of Alabama v. Blue Bird Body Co.*, *supra*, 573 F.2d at 318.

[F.R.D. 174, 179 \(D.D.C. 1980\)](#); [In re Master Key Antitrust Litigation, supra, 70 F.R.D. at 29](#), the weight of authority suggests caution:

HN18 [↑] In an antitrust action brought under the Clayton Act, it is most important to be aware of the [Seventh Amendment](#) limitations on a [Rule 42\(b\)](#) bifurcation. This awareness is important because liability under [§ 4](#) necessarily includes proof of injury to business and property. Therefore, [**74] bifurcation to separate juries of liability and damages in a [§ 4](#) case inevitably introduces the possibility that in the liability phase the first jury might find that there was such injury, while the second jury might on the same evidence of injury in the damage phase, find none.

[State of Alabama v. Blue Bird Body Co., supra, 573 F.2d at 318](#); accord, [Windham v. American Brands, Inc., supra, 565 F.2d at 71](#); [Link v. Mercedes-Benz of N. Am., Inc., 550 F.2d 860, 875](#) (3d Cir.) (Gibbons, J., dissenting),³⁷ cert. denied, 431 U.S. 933, 53 L. Ed. 2d 250, 97 S. Ct. 2641 (1977); [Al Barnett & Son, Inc. v. Outboard Marine Corporation, supra, 64 F.R.D. at 56-57](#); Silberman, *The Defense View--Litigating With Just a "Touch of Class,"* 49 Antitrust L. J. 1529, 1543-44 (1980); Simon, [Class Actions--Useful Tool or Engine of Destruction, 55 F.R.D. 375, 386 \(1973\)](#); cf. [In re Transit Company Tire Antitrust Litigation, supra, 67 F.R.D. at 75](#).

[**75] Having contended from the start of this litigation that damages are susceptible to common proof, plaintiffs have for the most part ignored the possibility of individualized damage "mini-trials." Little attention has been focused in this direction, and the court consequently lacks much, if any, guidance as to the issues and questions that would arise in such proceedings. Accordingly, it is impossible to determine with much certainty the degree to which bifurcated damage and fact of damage inquiries would overlap. But certainly, as the *Blue Bird* Court noted, the potential is very great; both inquiries concern themselves with the presence of an alleged overcharge; one inquiry is simply a more particularized variant of the other. See also [United Air Lines, Inc. v. Wiener, 286 F.2d 302](#) (9th Cir.), cert. denied, 366 U.S. 924, 6 L. Ed. 2d 384, 81 S. Ct. 1352 (1961). Thus, were bifurcation ordered, the court might well learn at the end of the common phase of the trial that the issues to be raised in the individualized proceedings were so "interwoven" with those already tried that the second stage could not go forward as planned. Instead, the damage "mini-trials" would have [**76] to expand to encompass a re-exploration of the overlapping issues necessary for a constitutionally fair [*304] assessment of damages. A major systemic goal underlying the concept of class actions--the realization of final, classwide resolutions of disputed factual questions--would thus be frustrated.

The danger that the foregoing scenario might materialize is simply too great for this court to ignore. Moreover, to the extent the question is merely uncertain in large degree, plaintiffs once again fail. It is they who bear the burden of persuading the court that the proposed bifurcation plan is viable.³⁸

³⁷ "The majority believes that the dissents' discussion of [the Gasoline Products] issues is premature in this case, and on this procedural point we differ. Therefore, even though some opinions are styled as dissents, their reasoning on those issues is not necessarily at variance with the views of a majority of this court." [Link v. Mercedes-Benz of N. Am. Inc., 550 F.2d 860, 865 n. 4](#) (3d Cir.), cert. denied, [431 U.S. 933, 53 L. Ed. 2d 250, 97 S. Ct. 2641 \(1977\)](#).

³⁸ It should be apparent that this analysis is based upon considerations unique to the Clayton Act. This opinion does not address the permissibility of bifurcation in other contexts, such as when violations of the federal securities laws are alleged.

In must be emphasized as well that the court's discussion refers solely to cases in which inquiries into fact of damage and damages are completely bifurcated. If the second jury need only determine the appropriate values to plug into a generalized damage formula established at the first trial, [Seventh Amendment](#) concerns disappear. See, e.g., [In re Plywood Antitrust Litigation, 655 F.2d 627, 636 \(5th Cir. 1981\)](#), cert. granted, [456 U.S. 971, 102 S. Ct. 2232, 72 L. Ed. 2d 844, 50 U.S.L.W. 3907 \(1982\)](#); [Arthur Young & Co. v. United States Dist. Court, 549 F.2d 686, 696](#) (9th Cir.), cert. denied, [434 U.S. 829, 54 L. Ed. 2d 88, 98 S. Ct. 109 \(1977\)](#).

[**77] Nor can these problems be avoided by limiting the common phase of the trial to the question of violation, the issues of fact of damage and damages both being reserved for individualized adjudication. As Professor Areeda has noted, "an antitrust damage assessment cannot be divorced from thoughtful attention to the rationale for liability and the internal logic of the liability holding." Areeda, *Antitrust Violations Without Damage Recoveries*, 89 Harv. L. Rev. 1127, 1139 (1976). Judge Wyzanski, though ultimately finding this point non-dispositive, evidently agrees: "Proof as to what such violations, if they occurred, caused in the way of damage may become relevant to, and even to some degree intertwined with, issues of violation" [*Windham v. American Brands, Inc.*, 539 F.2d 1016, 1022 \(4th Cir. 1976\)](#), approved on this point *en banc*, [*565 F.2d 59, 71 \(4th Cir. 1977\)*](#). [*Seventh Amendment*](#) concerns might thus require a retrial of nearly all issues litigated in the initial phase of a bifurcated version of this lawsuit. Under these circumstances, it is difficult to see how a class suit, with its attendant costs of notice and management, would be "superior" to a series of [**78] individual cases brought by purchasers who desired to proceed. This difficulty is particularly pronounced when the individual actions may be consolidated, as here, for discovery and trial.

There are additional difficulties with a trial procedure that limits the absent class members' formal interest to a determination of liability. First, the only discovered opinion squarely endorsing this form of bifurcation--Judge Wyzanski's panel opinion in *Windham*--was promptly reversed *en banc*. See also *In re Electric Weld Steel Tubing Antitrust Litigation*, [1980-81] TRADE CASES (CCH) P63,783 (E.D. Pa. 1980), at 78,183. But cf. [*Bogosian v. Gulf Oil Corp.*, 561 F.2d 434, 455 \(3d Cir. 1977\)](#), cert. denied, 434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978) (suggesting in dictum--prior to the Fourth Circuit's *en banc* reversal--that Judge Wyzanski's approach might have merit); [*Link v. Mercedes-Benz of N. Am., Inc.*, supra, 550 F.2d at 876-78](#) (Gibbons, J., dissenting) (approving Judge Wyzanski's approach, but with serious reservations).

Further, the doctrine of standing requires that a private antitrust claimant be one who has suffered injury to his business or property [**79] on account of the defendants' illegal acts. It is seriously open to question whether an absent class member may "join" a class suit if allegations of injury are not simultaneously pressed on his behalf. See generally [*Windham v. American Brands, Inc.*, supra, 565 F.2d at 71 n. 38](#); [*Link v. Mercedes-Benz of N. Am., Inc.*, supra, 550 F.2d at 875-76](#) (Gibbons, J., dissenting).

For all the reasons which have been given, the court cannot make the findings necessary for certification under [*Rule 23\(b\)\(3\)*](#). Plaintiffs have failed to propose a sufficiently viable and permissible method of [*305] alleviating the burden of calculating and distributing damages.

VI. Conclusion

Throughout the course of this opinion, the court has examined the manageability of a class action trial as a vehicle for resolving plaintiffs' claims. The court has sought to "survey the factual scene on a kind of sketchy relief map, leaving for later view the myriad of details that cover the terrain." [*Professional Adjustment Systems of America v. General Adjustment Bureau, Inc.*, 64 F.R.D. 35, 38 \(S.D.N.Y. 1974\)](#). This review has been at times searching, but it has not been, in this court's view, improper. [**80] Plaintiffs' proposals cannot survive the level of scrutiny necessary for principled application of [*Rule 23*](#), and cannot anchor a finding in favor of class certification.

The court labors under no illusion that its approach can be reconciled with every decision ever written on the subject of antitrust class actions. Indeed, this opinion differs significantly from the original class action opinion issued in this very case. This opinion reflects nothing more than the court's best understanding of the applicable law and facts. To the extent this understanding diverges from that reflected in prior decisions, such divergence is, with respect, intentional.

Perhaps this divergence is most acute in the treatment of ambiguity in the record. Many courts have simply ignored obvious failures by plaintiffs to specify how they intend to proceed. These courts have nevertheless granted class certification seemingly on the hope that things would eventually work out. This court cannot endorse such an approach. If it is unclear whether plaintiffs' proposed method of proceeding is sufficiently viable to justify further action in that direction, such ambiguity must be construed against the plaintiffs. [**81] It is they who bear the burden on these questions.

The court recognizes, though, that some of the deficiencies highlighted in this opinion were not contested vigorously in the briefs filed in connection with the cross-motions to reconsider. Therefore, the court may permit plaintiffs to supplement the record in order to bring a renewed motion for class certification based upon firmer ground.

Accordingly, this court's opinion and order of December 30, 1981 is vacated, defendants' motion to reconsider is granted, and plaintiffs' cross-motion to reconsider is denied. This case may not proceed as a class action. Liaison counsel are directed to report for status conference at 9:30 A.M. on August 4, 1983 to discuss the future of this litigation.

It is so ordered.

Appendix

Dr. Peltzman assumes that a uniform overcharge figure is appropriate, and that the difference between the average FOB (conspiratorial) price and the governing swap price generates a uniform figure that is no more than the constant overcharge number. (If the actual overcharge figure exceeds the number dictated by the subtraction, plaintiffs' method is, if anything, defendant-biased, and defendants have no grounds [**82] for complaint.)

Assuming the above constraints, the swap price can be related to the other relevant variables. In the equations to follow, S represents the swap price; X represents the "actual" uniform overcharge; Y represents the number of purchasers in the relevant market (it is assumed there are more than one); and P[i] represents the non-collusive price charged customer i.

In light of these definitions, Dr. Peltzman's assumptions can be described algebraically as follows:

Opinion

MEMORANDUM OF DECISION

NORMA L. SHAPIRO, J.

I. PROCEDURAL AND FACTUAL BACKGROUND

Before the court in this labor-antitrust litigation are cross-motions for summary judgment. The issue is whether the union activities to obtain certain agreements in the construction industry are protected from antitrust attack by labor exemptions to the antitrust laws. Plaintiffs' motion was for partial summary judgment; it seeks only an adjudication on the question of liability.¹ Defendants filed an answer and cross-motions for summary judgment, and a second motion to dismiss. After supplemental memoranda were filed, the court held oral arguments on a voluminous record.² Defendants' cross-motions are now granted.³

¹ The individual plaintiff also seeks treble damages.

² This case had been previously assigned to two other district judges before transfer to this judge. A prior opinion by then District Judge Higginbotham dismissed the counterclaims based on the antitrust laws. See *Altemose Const. v. Bldg. & Const. Trades Council*, 443 F.Supp. 492 (E.D. Pa. 1977).

³ Plaintiffs' statement of material facts is accepted as a basis for decision. Any disputed facts are resolved in favor of the plaintiffs, except as noted. See *infra* at n. 79. Moreover, all inferences drawn are viewed in the light most favorable to the plaintiffs. See *infra* at p. 15.

[*2] This is an action for both declaratory and injunctive relief under the Declaratory Judgment Act,⁴ and for damages pursuant to § 4 and 16 of the Clayton Act.⁵ [*3] The plaintiffs are Altemose Construction Co. ("Altemose"), a general contractor in the Philadelphia area; Associated Builders and Constructors, Inc. ("ABC"), an association of open shop contractors, and the Chamber of Commerce ("Chamber"), an association whose members purchase construction services. The defendants are the Building and Construction Trades Council of Philadelphia ("Council"), a labor association of local trade unions, and fifty-six labor organizations who are members of the Council.⁶ There are also other unnamed union contractors, suppliers and financial institutions implicated in a conspiracy to restrain trade and monopolize the construction market in a five county geographic area.

In the construction industry owners and developers solicit bids from general contractors for particular building projects. The general contractor who receives the contract will ordinarily subcontract most of the specialty work to other subcontractors who perform the work at the job site. There is no established pattern as to the amount of work performed by the general contractor's own employees and that which is subcontracted. Some general contractors employ no construction employees other than supervisory personnel. A subcontractor is usually a separate business enterprise specializing in one phase of construction. Labor relations policy for each sub-contractor is decided initially by that business enterprise. Union subcontractors in the greater Philadelphia area have agreed to be bound by the terms of multi-employer collective bargaining agreements with the various trade unions.

The purpose of the Council is "[t]o establish and maintain legal and proper business relations and agreements between [itself] and other responsible parties, either individuals or associations, to the extent that the best [*4] interest of the building industry be served for both employers and employees." By-Laws Art. II, § 3. Its geographic jurisdiction is the five counties of Delaware Valley; Philadelphia, Chester, Bucks, Delaware and Montgomery, and "completely covers the building and construction industry, either in erection, repair, alteration or demolition." Exb. 22 at 1. More importantly for its member unions, the Council is prohibited from entering into any agreement with a contractor or employers' association which requires union members to work with non-union men. Id. at 22.

Most building trade union By-Laws have a prohibition against their members working with non-union employees or non-union firms. These clauses generally require members to report non-union jobs to the union and refuse to handle non-union goods. The General Building Contractors Association ("GBCA") represents active general contractor and subcontractor members who assign to it their rights to bargain collectively with certain defendant unions. Some of the defendant trade unions have established standard collective bargaining agreements with GBCA. The collective bargaining agreements give the union members the right not to work [*5] with non-union laborers. The GBCA member contractors hire only union employees under the terms of these agreements and never contract with subcontractors who are not on the Council's fair contractor list. The administration expense of the collective bargaining agreements is financed through an Industry Advancement Fund to which employers make contributions based on hours worked by their union employees. Contributions are required from all employers of covered workers even though such employers are not GBCA members.

The Council seeks to establish and maintain adequate wages and working conditions by members of its constituent unions by means of a Building Trades Agreement which the Council attempts to have general contractors sign.⁷ The Council has entered into over four hundred (400) of these agreements with general contractors. They require the general contractor to do business only with subcontractors who enter into collective bargaining agreements with the appropriate craft union members of the Council. The only subcontractors with whom the general contractor may

⁴ [28 U.S.C. §§ 2201-02 \(1982\)](#). Only the association plaintiffs desire injunctive relief. Altemose seeks treble damages.

⁵ [15 U.S.C. §§ 15, 26 \(1973\)](#). Section 4 of the Clayton Act provides the jurisdiction of this court, and the treble damage remedy for violations of [§§ 1 & 2](#) of the Sherman Act ([15 U.S.C. §§ 1 & 2](#)). Section 16 of the Clayton Act provides an equitable remedy.

⁶ Several of the defendant unions are no longer members of the Council.

⁷ See Appendix for Text of Forms 1, 2 and 3. The forms include a clause binding the firm and any other operation in which the signatory firm has a substantial interest, whether or not under separate corporate or company name, e.g., App. I "Scope of Obligation."

do business under such an agreement are Council approved union (so-called "fair") subcontractors. These fair subcontractors [*6] all have collective bargaining agreements with the appropriate trade or craft unions. The "fair" list is circulated by the Council throughout the industry. Since 1966, over 90% of the non-residential construction work has been performed by union contractors.

In order to obtain these subcontracting agreements from general contractors, the defendants have picketed jobsites where non-union men are working; there have been threats of violence as well as actual violence at various construction sites in the course of this picketing. The unions have also employed economic pressure on developers, owners and financial institutions to force general contractors to employ union labor exclusively. Some contractors have acceded to union demands and hire only union labor or signed an agreement not to subcontract any work to any subcontractor who has not contracted with the appropriate craft union. Although these tactics have been employed [*7] against Altemose since 1971, Altemose has refused to sign such an agreement.

In April 1971, Altemose obtained a general contract to build Valley Forge Plaza in Montgomery County, Pennsylvania. The project consisted of an office building, a hotel, movie theaters and various stores and shops. Altemose representatives had several meetings with representatives of the Council concerning the exclusive use of union labor on the project. The Altemose policy was that specialty work for the project would be given to the lowest bidding subcontractor whether or not it employed union labor. It was anticipated that this would result in unionized subcontractors for more than half the project work. The Council and its member unions insisted that unless Altemose signed a subcontractor's trade agreement there would be picketing at the jobsite.

On occasion, between August, 1971 and May, 1972, several Altemose construction projects were picketed by union members to protest Altemose's refusal to enter into a subcontractor's trade agreement with the Council. On June 5, 1972 approximately 1,000 persons, including some principals of the Council, came to the Valley Forge Plaza construction site; what was [*8] described by a Pennsylvania trial judge as a "virtual military assault" resulted in the "systematic decimation of the project. Damage was estimated at \$300,000 . . .⁸

Thereafter, negotiations took place at which time the Council repeated its demand that the Valley Forge project be built solely with union labor. Altemose refused. Picketing occurred at another Altemose job-site in November, 1973 and several projects were continuously picketed from January, 1975 through April, 1975 to protest the Altemose refusal to sign a union subcontractor agreement with the Council. After unfair labor practice charges were filed, the NLRB issued an injunction on April 22, 1975,⁹ [*9] but picketing resumed on April 28, 1975. Its stated purpose was to require Altemose to observe area wages and standards (rather than to compel it to sign a union subcontractor agreement). After further litigation before the NLRB, the picketing ceased at those sites and the Board issued its decision.¹⁰

During the period of labor dispute, material suppliers and subcontractors informed Altemose that they would no longer be involved with its construction projects because of the continuing labor problems. The pressure against non-union subcontractors consisted of threats and intimidation to force them to cease doing business with Altemose and other general contractors. Investors in the projects were urged by the unions to withdraw their financial support. The union membership and general public were urged to withdraw their funds from First Pennsylvania Bank, a major financier of the Valley Forge Project. Because of the labor unrest, Altemose also found it more difficult to obtain performance bonds for its projects and did not receive some jobs even though it had been the low bidder. Some business associations cancelled reservations for use of the Sheraton Hotel in the Valley Forge complex because of their union sympathies.

⁸ See *Altemose Const. Co. v. B.T.C.T. Council of Phila.*, 449 Pa. 194, 198, 296 A.2d 504, 508 (1972), cert. denied, 411 U.S. 932 (1973).

⁹ *Hirsch v. Building & Constr. Trades Council of Phila.*, (E.D. Pa. C.A. Nos. 75-646-647), aff'd, 530 F.2d 298. (3rd Cir. 1976).

¹⁰ See infra at n. 75-79 and accompanying text.

The union actions against other general contractors who are members of the ABC were similar in kind to those experienced by Altemose. Union sponsored picketing pressured general contractors to utilize union subcontractors; [*10] the union pressure directed at these general contractors was to replace non-union with union subcontractors on the Council's "fair" list. Union pressure was also directed toward suppliers of material and capital (i.e., investors and financial institutions) to convince them to withdraw support for the projects. It cannot be denied that the Council's actions in a sense protected union employers as well as its union members.

Count I of the complaint alleges that the unions have conspired with non-labor entities - unnamed coconspirators (i.e., union employers, suppliers, developers) - to force non-union general contractors and subcontractors out of the Philadelphia construction market and create a monopoly of union contractors in violation of [Sections 1](#) and [2](#) of the Sherman Act.¹¹ The plaintiffs contend that the unions have combined with employers of union labor in a concerted effort to control the product-market for construction services by using secondary tactics¹² to force general contractors to execute industry-wide subcontracting agreements providing for the exclusive use of union labor. The sub-contracting agreements require the general contractor to sub-contract work only to [*11] subcontractors who are parties to collective bargaining agreements with the union. The unions and union contractors are alleged to have agreed to impose direct restraints on competition in the market for construction services that restrict the construction industry's size, allocate the market and create a geographical enclave for union employers. Such conspiratorial activities without legitimate labor objectives and with predatory intent may be a violation of the antitrust laws. [Allen Bradley Co. v. Local No. 3, 325 U.S. 797 \(1945\)](#). See also, [United Mine Workers v. Pennington, 381 U.S. 657 \(1965\)](#).

Count II alleges that the unions have conspired among themselves to restrain [*13] trade and monopolize the construction market through the use of the subcontracting agreements to force non-union employers out of the market and protect the unions and their members. Antitrust liability is allegedly imposed by the use of illegal methods having substantial anti-competitive effects in the product market to achieve otherwise legitimate objectives (i.e., standardization of wage and working conditions). See [Connell Construction Co. v. Plumbers & Steamfitters Local 100, 421 U.S. 616 \(1975\)](#). Plaintiffs argue that even if this is union conduct ordinarily legal under the labor laws, it is here subject to antitrust attack because the anti-competitive effects outweigh the benefits sought to be achieved by the labor laws. See [Meat Cutters v. Jewel Tea Co., 381 U.S. 678 \(1965\)](#).

Because of these practices engaged in by the defendants and their effect on the construction industry, Altemose alleges that it is prevented from bidding for construction work in Philadelphia County. The association plaintiffs

¹¹ [Section 1](#) of the Sherman Act ([15 U.S.C. § 1](#)) provides:

Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court.

[*12] [Section 2](#) of the Sherman Act ([15 U.S.C. § 2](#)) provides:

Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court.

¹² Pressure exerted upon the employer with whom the union has a labor dispute is "primary," and lawful; pressure exerted on a neutral third party in his relations with the primary employer is "secondary," and unlawful, under [§ 8\(b\)\(4\)](#) of the National Labor Relations Act. See, St. Antoine, Secondary Boycott: From Antitrust to Labor Relations, 40 Antitrust L.J. 242 (1971); Lesnick, Job Security and Secondary Boycotts: The Reach of NLRA [§§ 8\(b\)\(4\)](#) and [8\(e\)](#), 113 U. Pa. L. Rev. 1000 (1965); R. Gorman, Labor Law Text, 240 (1976).

claim that the union tactics are designed to force non-union labor out of the industry, increase construction costs and injure their business in violation of the Sherman Act. [*14] Defendants assert the union objective was to organize and obtain recognition and that this conduct was immune from antitrust liability by statute and case law.¹³

The issues are: (1) whether liability is imposed under the teaching of *Connell Construction Co., supra*, where unions use picketing and secondary pressure to obtain subcontracting agreements but do not succeed; (2) whether *Connell* is applicable when unions seek to organize the employees of a general contractor, and (3) [*15] whether there is sufficient probative evidence of a conspiracy between the unions and non-labor entities to present a jury question.

II. STANDARDS GOVERNING SUMMARY JUDGMENT

Cross-motions for summary judgment do not warrant the grant of summary judgment to either party unless one of them is entitled to judgment as a matter of law upon material facts not in genuine dispute. See *Manetas v. International Carriers, Inc.*, 541 F.2d 408 (3rd Cir. 1976).

In *Sunshine Books, Ltd. v. Temple University*, 697 F.2d 90 (3rd Cir. 1982), the Court of Appeals summarized the law as follows:

Rule 56 of the Federal Rules of Civil Procedure provides that a trial court may enter summary judgment "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." We have characterized summary judgment as "a drastic remedy", and have made clear "that courts are to resolve any doubts as to the existence of genuine issues of fact against the moving parties." *Ness v. Marshall*, 660 F.2d 517 at 519 (3d Cir. 1981) (quoting *Tomalewski v. State Farm Life Insurance Co.*, 494 F.2d 882, 884 (3d Cir. 1974)). Moreover, "[i]nferences to be drawn from the underlying facts contained in the evidential sources submitted to the trial court must be viewed in the light most favorable to the party opposing the motion." *Goodman v. Mead Johnson & Co.*, 534 F.2d 566, 573 (Id Cir. 1976), cert. denied, 429 U.S. 1038, 97 S.Ct. 732, 50 L.Ed. 2d 748 (1977)) . . .

Id. at 95 (quoting *Hollinger v. Wagner Mining Equip. Co.*, 667 F.2d 402, 405 (3rd Cir. 1981)). While the Supreme Court has cautioned that summary judgment should be used sparingly in antitrust cases,¹⁴ summary adjudication may be granted even in these complex cases. See *Zenith Radio Corp. v. Matsushita Electric Industrial Co., Ltd.*, 513 F.Supp. 1100, 1140 n. 53 (E.D. Pa. 1981), appeal docketed, Nos. 81-2331, 81-2332 and 81-2333 (3rd Cir. August 24, 1981). See also, *Mid-South Grizzlies v. National Football League*, 550 F.Supp. 558 (E.D. Pa. 1982); *American Structures v. Fidelity & Deposit Co.*, 545 F.Supp. 1021 (E.D. Pa. 1982).

[*17] But it is the movant's burden to show the absence of a genuine issue of material fact. *Adickes v. S. H. Kress & Co.*, 398 U.S. 144 (1970). This burden of proof can be satisfied by affidavit or otherwise as provided in *Fed. R.*

¹³ Dean St. Antoine describes this conflict between the labor and antitrust laws as an "intractable" problem. St. Antoine, *Connell: Antitrust at the Expense of Labor Law*, 62 Va. L. Rev. 603 (1976). Professor Winter concludes that the conflict between antitrust and labor policies is "so irreconcilable that . . . the regulatory distinctions employed must be largely arbitrary - there are no general principles by which these policies can be harmonized." Winter, *Collective Bargaining and Competition: The Application of Antitrust Standards to Union Activities*, 73 Yale L.J. 14, 16-17 (1963). See also, Cox, *Labor and the Antitrust Laws - A Preliminary Analysis*, 104 U. Pa. L. Rev. 252, 254-55 (1955).

¹⁴ See *Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, 473 (1962). One commentator has suggested that the *Poller* case rests on certain assumptions about the evidence in the case and its application to the substantive antitrust principles involved. Thus, "the often quoted general language of *Poller* is in itself no barrier to summary judgment." P. Areeda & D. Turner, *Antitrust Law* § 316 at 62 (1978). Even so the case has become a "magic wand waved indiscriminately by those opposing summary judgment motions in antitrust actions." *Mutual Fund Investors, Inc. v. Putnam Management Co.*, 553 F.2d 620, 624 (9th Cir. 1977).

Civ. P. 56(e).¹⁵ When a motion for summary judgment is properly supported, Fed. R. Civ. P. 56(e) "makes it clear that 'an adverse party may not rest upon his pleading' .[I]t is incumbent upon the plaintiff to produce significant probative evidence demonstrating that a genuine issue of fact exists'"Sunshine Books Ltd. v. Temple University, supra, 697 F.2d at 96 (quoting Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 554 (5th Cir. 1980), cert. denied, 454 U.S. 927 (1981).¹⁶ [*18] Failure to discharge this burden requires the grant of summary judgment despite a party's right to trial.¹⁷ A party should not be allowed to proceed in the hope of developing evidence at trial to support his claims. Parsons v. Ford Motor Co., 669 F.2d 308, 313 (5th Cir. 1982), cert. denied, 103 S.Ct. 73 (1983).

III. SHERMAN ACT §§ 1 & 2 CLAIMS

A. Jurisdiction and Standing

The defendants challenge both the interstate commerce connection of the activities complained of and standing of the plaintiffs to contest the alleged restraints.

It is clear that the interstate commerce nexus is a prerequisite for federal jurisdiction and an element of the substantive claim under the Sherman Act. See Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 742 n. 1 (1976).¹⁸ [*20] The Sherman Act reaches "to the utmost extent of [Congress'] constitutional power." United States v. South-Eastern Underwriters Assn., 322 U.S. 533, 558 (1944). The test focuses on the impact of the anticompetitive behavior on interstate commerce.¹⁹ See Manderville Island Farms v. American Crystal Sugar Co., 334 U.S. 219 (1948). In McClain v. Real Estate Bd., 444 U.S. 232 (1980), the [*19] Court concluded that to establish the requisite interstate nexus, it is only necessary that the alleged restraint "be shown 'as a matter of practical economics' to have a not insubstantial effect on the interstate commerce involved." Id. at 246 (quoting Hospital Building Co. v. Rex Hospital Trustees, supra, 425 U.S. at 745). Applying this test in the light most favorable to the plaintiffs, we find the requisite effect on interstate commerce present. The foreclosure of the construction market resulting from the alleged restraint would force those construction contractors affected to seek projects in other areas of the interstate market.²⁰ It would also reduce the amount of construction materials and goods supplied to contractors through interstate commerce. Moreover, the record shows that a combination of out-of-state developers and financiers provided consulting and financial support for the projects involve herein. Both the direct

¹⁵ See Zenith Radio Corp. v. Matsushita Electric Industrial Co., supra, 513 F.Supp. at 1118 n. 3.

¹⁶ Pan-Islamic involved sworn denials of any conspiracy. We are faced with the same question here. See also, Parsons v. Ford Motor Co., 669 F.2d 308, 313 (5th Cir. 1982), cert. denied, 103 S.Ct. 73 (1983) (plaintiff's failure to present significant probative evidence of conspiracy in response to defendant's sworn denials warrants summary disposition) and Zenith Radio Corp. v. Matsushita, supra.

¹⁷ Summary disposition avoids an often expensive and needless trial on the merits. See Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d 1163, 1167 (7th Cir. 1978), cert. denied, U.S. 982 (1979); Zweig v. Hearst Corp., 521 F.2d 1129, 1135-36 (9th Cir.), cert. denied, 423 U.S. 1025 (1975).

¹⁸ The jurisdictional reach of the Sherman Act "extends to both activities that are actually *in* interstate commerce and to activities that, though purely intrastate in character, nevertheless, substantially affect interstate commerce. Cardio-Medical Assoc. v. Crozer-Chester Med. Ctr., 536 F.Supp. 1065, 1073 (E.D. Pa. 1982) (emphasis :n original). Because we assume that the plaintiffs' activities are intrastate in nature, our discussion is confined to the interstate ramifications of the restraint. The procedural contours and jurisdictional anomalies of the interstate commerce question are discussed in Zenith Radio Corp. v. Matsushita Elec. Indus. Co., 494 F.Supp. 1161, 1171 n. 21 - 77 E.D. Pa. 1980) and need not be reiterated here.

¹⁹ On the history of the interstate commerce connection, see P. Areeda and D. Turner, *supra* at n. 14, Vol. I at 228-340.

²⁰ Altemose does business in other states and purchases materials from out-of-state suppliers.

ramifications of the alleged restraint and its ancillary consequences involve a not insubstantial amount of interstate commerce. See [Hospital Building Co. v. Trustees of Rex Hospital, supra](#), [425 U.S. at 745-46](#).²¹

The defendants attack the standing of both Altemose and the association plaintiffs. Defendants [*21] argue that the alleged market foreclosure affected only subcontractors rather than Altemose as the general contractor. We view this argument as foreclosed by [Connell Construction Co. v. Plumbers & Steamfitters Local 100, 421 U.S. 616 \(1975\)](#). See [Associated General Contractors of Calif., Inc. v. Calif. State Council of Carpenters, U.S. , 103 S.Ct. 897, 910 n. 44 \(1983\)](#). The loss of business from higher labor costs is a sufficiently direct antitrust injury to establish standing under the factual matrix test adopted in this circuit. See [Midwest Paper Products v. Continental Group, 596 F.2d 574, 582-83 \(3rd Cir. 1979\); Bogus v. American Speech & Hearing Ass'n., 582 F.2d 277, 282 \(3rd Cir. 1978\).](#)

The standing of the Chamber and ABC as associations bringing suit on behalf of their members is determined by applying the factors set forth in [Hunt v. Washington Apple Comm ., 432 U.S. 333 \(1977\)](#). "[W]e have recognized that an association has standing to bring suit on behalf of its members when: (a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim [*22] asserted nor the relief requested requires the participation of the individual members in the lawsuit."²² [Id. at 343.](#)

To the extent that the plaintiff associations challenge the general pattern of union conduct in securing these subcontracting agreements, the standing requirements are satisfied. Any challenge not to the agreements as anticompetitive *per se* but to the *particular* conduct of the unions in securing a specific subcontracting agreement from a particular contractor requires joinder as plaintiff the individual contractor; the organizational intent of the unions as to each individual contractor would be critical.²³ The association plaintiffs cannot fulfill the third requirement of the Court's standing test and do not have standing to assert charges on behalf of specific contractors.

Plaintiffs have alleged two distinct types of conspiracies as violative of both [Sections 1 & 2](#) of the Sherman Act.²⁴ The conspiracy averred in Count I is an illegal combination [*23] of the labor defendants with union contractors, suppliers, and lending institutions to restrain trade in and monopolize the construction market. Although identical in purpose and market effect, the conspiracy alleged in Count II is among the labor defendants only.

The elements of a claim under [Section 1](#) of the Sherman Act have been set forth by the Third Circuit:

In order to sustain a cause of action under [§ 1](#) of the Sherman Act, the plaintiff must prove: (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiff was injured as a proximate result of that conspiracy

²¹ Chief Judge Emeritus Lord's persuasive analysis of [Hospital Building, supra](#) in [Cardio-Medical Assoc. v. Crozer-Chester Med. Ctr., 552 F.Supp. 1170, 1203 \(E.D. Pa. 1982\)](#) supports our conclusion. In *Cardio-Medical*, Judge Lord noted, while distinguishing the facts before him, that *Hospital Building* involved a substantial interstate commerce nexus through the interstate purchase of building supplies and financing. Accord, [Schnabel v. Building Trades Council of Phila., Etc., C.A. No. 82-2256, Slip. Op. at 28 \(E.D. Pa. April 13, 1983\)](#). Because we have analyzed the nexus between the alleged restraint and interstate commerce and found that jurisdiction is established, we need not delve into the academic quandary rooted in a more liberal reading of *McClain*. See e.g., [Pao v. Holy Redeemer Hospital, 547 F.Supp. 484, 488-89 \(E.D. Pa. 1982\)](#).

²² The Court quoted extensively from [Worth v. Seldin, 422 U.S. 490, 511-12 \(1975\)](#). Accord, [Phila. Citizens in Action v. Schweiker, 669 F.2d 877, 880 n. 1 \(3rd Cir. 1982\)](#).

²³ See infra at p.26.

²⁴ See [supra at pp. 8-12.](#)

Unless the particular restraint falls within a category that has been judicially determined to be illegal per se, the legality of a restraint challenged under [§ 1](#) of the Sherman Act must be assessed under the rule of reason. Under the rule of reason standard, only those restraints upon interstate commerce which are [*24] unreasonable are proscribed by [§ 1](#) of the Sherman Act.²⁵

[Martin B. Glauser Dodge Co. v. Chrysler Corp.](#), 570 F.2d 72, 81-82 (3d Cir. 1977), cert. denied, 436 U.S. 913 (1978) (citations omitted).

In addition to the dual conspiracies to restrain trade in violation of [Section 1](#), plaintiffs have alleged two distinct conspiracies to monopolize in violation of [Section 2](#). See *Zenith Radio Corp. v. Matsushita Elec. Indus. Co.*, *supra*, 513 F.Supp. at 1319. A conspiracy to monopolize requires, (1) "proof of concerted action deliberately entered into with the specific intent to accomplish the unlawful result of achieving a monopoly;" and (2) proof of "at least one overt action in furtherance of the conspiracy." L. Sullivan, *Handbook of Antitrust Law* 132-33 (1977). Proof of such a conspiracy [*25] does not require successful accumulation of monopoly power." *Zenith Radio Corp. v. Matsushita Elec. Indus. Co.*, *supra*, 513 F.Supp. at 1319.²⁶ These claims, like those under [Section 1](#), also require proof of illicit concerted action or combination. In practice, the conspiracy claims under [Sections 1 & 2](#) in both counts are supported by similar, if not identical, evidence. Id. at 1320. See [Edward J. Sweeney & Sons v. Texaco](#), 637 F.2d 105, 118 (3rd Cir. 1980). The combinations which plaintiffs allege to support the conspiracies to monopolize violating [Section 2](#) are the same combinations alleged to be a restraint of trade violating [Section 1](#); therefore, a failure of proof regarding the existence of concerted action and unity of purpose on the [Section 2](#) claims condemns the claims under [Section 1](#) as well.

[*26] B. Count II - Exclusivity of Labor Law Remedies for Unilateral Union Activities - Impact of *Connell*

Labor's partial exemption from the antitrust laws represents an attempt of both Congress and the courts to reconcile the conflicting policies expressed in the labor and antitrust laws. In labor-antitrust cases, we must first determine whether the labor exemption is applicable and, if the conduct is not exempt, then determine liability under traditional antitrust principles. See [Larry V. Muko, Inc. v. Southwestern Pa., Etc.](#), 670 F.2d 421, 427 (3rd Cir. 1982) cert. denied, 103 S.Ct. 229 (1982) ("Muko" II). Because the defendants argue that both statutory and non-statutory exemptions apply to the conduct at issue, it is necessary to explore the Court's recent pronouncement in the construction industry context.

In [Connell Construction Co. v. Plumbers and Steamfitters Local 100](#), 421 U.S. 616 (1975),²⁷ the Court, dividing 5 - 4, reversed a judgment for union defendants on the ground that a subcontracting agreement was exempt from

²⁵ Although the plaintiffs argue that the conduct in this case is a species of group boycott which requires application of the *per se* rule under [Klors, Inc. v. Broadway-Hale Stores, Inc.](#), 359 U.S. 207 (1959), the recent decision in *Muko* II suggests otherwise. [Larry V. Muko, Inc. v. Southwestern Pa., Etc.](#), 670 F.2d 421 (3rd Cir.), cert. denied, 103 S.Ct. 229 (1982).

²⁶ Attempted monopolization by combination is discussed in [American Tobacco v. United States](#), 328 U.S. 781 (1946). As stated by Professor Sullivan, "there is a substantial area of potential overlap between the offenses of conspiracy to restrain trade, conspiracy to monopolize . . ." Sullivan, *Antitrust*, *supra* at 133. Professors Areeda and Turner find any attempted distinction between conspiracies under [Sections 1 & 2](#) redundant. P. Areeda and D. Turner, *supra*, n. 14 at 358.

²⁷ Professor Handler has called *Connell* the "principal culprit" in making the treatment of labor unions under the antitrust laws one of the most frustrating areas of antitrust jurisprudence. Handler, *Reforming the Antitrust Laws*, 82 *Colum. L. Rev.* 1287, 1339 (1982). The decision has been severely criticized for its disconcerting impact in the field. See King & Smith, *New Antitrust Developments Affecting Labor Law*, 33 *Syracuse L. Rev.* 945, 985-93 (1982); Handler and Zifchak, *Collective Bargaining and the Antitrust Laws: The Emasculation of the Labor Exemption*, 81 *Colum. L. Rev.* 459 (1981); Casey and Colzillo, *Labor-Antitrust: The Problems of Connell and a Remedy That Follows Naturally*, 1980 *Duke L. J.* 235 (1980); Supreme Court, 1974 Term, 89 *Harv. L. Rev.* 234 (1975). See also, [Muko v. Southwestern Pa., Etc.](#), (*Muko I*) 609 F.2d 1368, 1377 (3rd Cir. 1979) (Aldisert, J., dissenting).

federal antitrust law, it held that a subcontracting agreement, "which is outside the context of a collective bargaining relationship and not [*27] restricted to a particular jobsite, but which nonetheless obligates a [general contractor] to subcontract work only to firms that have a contract with [the trade union]", stated a cause of action under federal antitrust law. *Id. at 635*. The case was remanded for consideration of whether the agreement did in fact violate the Sherman Act.

[*28] In *Connell*, Local 100, a bargaining representative for the plumbing and mechanical trades in Dallas, sought to compel general contractors to agree that in letting subcontracts for mechanical work they would deal only with firms that were parties to the union's current collective bargaining agreement. The union disclaimed any interest in representing the general contractors' employees. When Connell, a general contractor, refused to sign such an agreement, the union positioned a single picket at one major construction site whereupon construction at the site came to a halt. Connell filed suit in state court to enjoin the picketing, and the union removed the case to federal court. Connell signed the union agreement under protest and amended its complaint to claim the agreement violated Sections 1 and 2 of the Sherman Act. The union defended on the ground that its labor activities were exempt from the antitrust laws. edged two

Justice Powell, writing for the majority, acknowledged two types of labor exemption from operation of the antitrust laws. First, the statutory exemption provided by the Clayton and Norris-LaGuardia Acts protects unilateral union activity such as secondary picketing [*29] and boycotts.²⁸ Second, there is a nonstatutory exemption, which "has its source in the strong labor policy favoring the association of employees to eliminate competition over wages and working conditions". *421 U.S. at 622*.

The executed union-subcontractor agreement with Connell was a union combination with the employer, a non-labor entity; the Court held that the statutory exemption accorded labor organizations did not apply. Addressing the non-statutory exemption,²⁹ the Court found that the agreements excluded non-union subcontractors from a portion of the market even if their competitive advantages were not derived from substandard wages and working conditions but rather from more efficient operating methods. [*30] Because the agreements imposed direct restraints on the product market not following naturally from the elimination of competition over wages and working conditions, it contravened antitrust policy to a degree not justified by labor policy and the nonstatutory exemption was not available.

The Court then considered the union's argument that the agreement was specifically allowed by the construction industry proviso to Section 8(e) of the National Labor Relations Act (hereinafter NLRA).³⁰ The Court held that

²⁸ The statutory exemption is grounded in § 6 and § 20 of the Clayton Act ([15 U.S.C. § 17](#); [29 U.S.C. § 52](#)) and §§ 4, 5, 13 of the Norris-LaGuardia Act ([29 U.S.C. §§ 104, 105, 113](#)) which declare that labor unions are not combinations in restraint of trade and exempt specific union activities from the operation of the antitrust laws. See *infra* at n. 37. See also *United Mine Workers v. Pennington*, [381 U.S. 657, 661-62 \(1965\)](#); *Muko I*, *supra* [609 F.2d at 1372](#).

²⁹ Labor policy contemplates some lessening of business competition by the elimination of competition regarding wages and working conditions. See *United Mine Workers v. Pennington*, [381 U.S. 657, 666 \(1965\)](#); *Meat Cutters v. Jewel Tea Co.*, [318 U.S. 676, 692-93 \(1965\)](#). For a history of the non-statutory exemption see *Consol. Exp. Inc. v. N.Y. Shipping Assn.*, [602 F.2d 494, 513-15 \(3rd Cir. 1979\)](#), vacated, [448 U.S. 902](#) on remand [641 F.2d 90 \(3rd Cir. 1980\)](#), mandamus and prohibition denied, sub. nom., *In re Int'l Longshoreman's Assn.*, [451 U.S. 905 \(1981\)](#) (hereinafter Conex).

³⁰ [29 U.S.C. § 158\(e\)\(1976\)](#). Section 8(e) provides that:

[i]t shall be an unfair labor practice for any labor organization and any employer to enter into any contract or agreement, express or implied, whereby such employer ceases or refrains or agrees to cease or refrain from handling, using, selling, transporting or otherwise dealing in any of the products of any other employer, or to cease doing business with any other person, and any contract or agreement entered into heretofore or hereafter containing such an agreement shall be to such extent unenforceable and void. . .

Section 8(e) extends only to agreements in the context of collective bargaining relationships [*31] and "possibly common-situs relationships on particular jobsites." 421 U.S. at 633. Finally, the Court held that the remedies under the NLRA for violation of Section 8(e) were not exclusive. Thus, an antitrust suit based on illegal hot cargo agreements was not inconsistent with the remedial scheme of the NLRA.

[*32] Justice Stewart, joined by Justices Douglas, Brennan, and Marshall, dissented on the ground that the union's conduct was regulated solely by the NLRA and was immune from federal antitrust prosecution because Congress intended the labor laws to provide the exclusive remedies for the unlawful conduct alleged by Connell.³¹ Justice Douglas in a separate dissent emphasized that Connell failed to allege or prove any conspiracy between the union and the other unionized subcontractors. This infirmity in the complaint in his view placed the union's conduct under the exclusive purview of the labor laws.

[*33] The Court majority held the statutory exemption inapplicable because the union agreement was with a non-labor party. It is not clear if the Court was referring to the union-Connell agreement alone or to the union agreements with Connell and other general contractors. It seems more likely that the Court viewed the union-Connell agreement itself an antitrust combination³² and held that the statutory exemption applied only to a union acting alone and not to any union-non-labor agreement.³³

In considering the claim of non-statutory exemption, the Court pointed to three significant factors in finding the direct restraint imposed by the subcontracting agreement had substantial anticompetitive effects [*34] not flowing from legitimate labor concerns. First, the union had no interest in representing Connell's employees so that the congressional policy in favor of collective bargaining was not implicated. 421 U.S. at 626. This takes the agreement outside of the scope of the construction industry proviso of § 8(e) of the NLRA as well. Id. at 633. The Court pointed out that in a collective bargaining context, labor law safeguards contained in Sections 8(b)7 and 8(b)(4)(b) come into play, but "[T]hese careful limits on the economic pressure unions may use in aid of their organizational campaigns would be undermined seriously if the provision to § 8(e) were construed to allow unions to seek subcontracting agreements, at large, from any general contractor vulnerable to picketing." 421 U.S. at 633. See also, Woeilke & Romero Framing, Inc. v. NLRB, U.S. , 102 S.Ct. 2071, 2082 n. 16 (1982). Because the union did not seek to represent the general contractor's employees in collective bargaining, labor law protections were not present and antitrust laws applied.

Second, the multi-employer collective bargaining agreement with subcontractors which the union action against Connell sought [*35] to protect contained a "most favored nation" clause by which the union agreed that if it granted a more favorable contract to any employer it would extend those terms to all other member subcontractors. In this manner, the unionized subcontractors would be protected from competition on all subjects covered by the multi-employer agreements, even if unrelated to wages and working conditions. Third, because the subcontractor agreements prohibited contracting with any firm that did not have a contract with Local 100, the union had the

The construction industry proviso to this subsection, however, exempts from its operation any agreement "between a labor organization and an employer in the construction industry relating to the contracting or subcontracting of work to be done at the site of the construction, alteration, painting, or repair of a building, structure, or other work . . ." Id.

³¹ Both the majority opinion and the dissent in *Connell* apparently agreed that Congress rejected the use of antitrust sanctions to curb secondary union activities when it considered revising the NLRA in 1947. Compare 421 U.S. at 634 & n. 15 (Powell, J.) with id. at 641 (Stewart, J. dissenting). Justice Powell found that this legislative choice had no relevance to the issue whether Congress intended to preclude antitrust attack when hot cargo agreements were forbidden as unfair labor practices by the Landrum-Griffin amendments to the NLRA enacted in 1959. 29 U.S.C. § 158(e) (1976). See 421 U.S. at 634.

³² The complaint alleged that the subcontractor agreement violated §§ 1 & 2 of Sherman. 421 U.S. at 620-21. Moreover, immediately prior to the conclusion of the opinion, the Court stated that "the union's agreement with Connell is subject to the federal antitrust laws." Id. at 635.

³³ This assumes that a union-employer agreement is not necessarily immune from antitrust sanctions because the union's unilateral action to secure it was immune. See St. Antoine, *supra* n. 13, at 614.

power to control access to the market. This the Court said gave the union the ability to create a geographical enclave for local contractors.

Although the broad *dicta* can be read to subject all coercive union action excluding non-union firms from the subcontracting market to the antitrust laws, the aforementioned factors limit the actual holding of *Connell*. In this case, it is undisputed that Altemose did not actually sign any subcontractor agreement as did the plaintiff in *Connell*. Altemose argues that it should not have to sign an agreement with the identical market effects as those in *Connell* to validate its claim under the antitrust [*36] laws and that *Connell* forbids any direct restraints on the product market that benefit a favored employer group even when achieved by unilateral union conduct. Its claim in essence is that *Connell* proscribes action by unions among themselves to secure the type of subcontracting agreements declared unlawful in that case, or alternatively, that the antitrust laws also interdict secondary union pressure to secure a lawful "hot-cargo clause." ³⁴ This overextends the holding in *Connell*³⁵ and ignores the remedial scheme of the Taft-Hartley and Landrums-Griffin Amendments to the labor laws. The conduct alleged in Count II is without antitrust significance.

[*37] 1. Statutory Exemption Viewed in Conjunction with the Labor Laws.

The statutory labor exemption originates in the Clayton Act, [15 U.S.C. § 17](#) and [29 U.S.C. § 52](#), and the Norris-LaGuardia Act [29 U.S.C. §§ 104, 105](#) and [113](#). *Connell, supra, 421 U.S. at 621-22*: Section 6 of the Clayton Act, [15 U.S.C. § 17](#), provides:

The labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor. . . organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws.

Section 20 of the Clayton Act prohibits the courts from enjoining specified acts by employees that occur in the course of disputes "concerning terms or conditions of employment," and states that these acts cannot be "held to be violations of any law of the United States." [29 U.S.C. \[*38\] § 52](#).

The Norris-LaGuardia Act re-emphasizes and further expands the intended scope of the labor exemption. The Act prohibits injunctions against employees engaged in various activities during a labor dispute, even where a claim of an unlawful combination or conspiracy is made.³⁶ [*39] The right to bargain collectively is specifically protected.³⁷

³⁴ The Supreme Court in *Connell* left this question open. [421 U.S. at 684 n. 14](#).

³⁵ Although the Court did refer to the other agreements with general contractors and the multi-employer collective bargaining agreement to assess the effect on the product market, it specifically noted that *Connell* did not argue the case on a conspiracy between the union and unionized subcontractors. The Court focused exclusively on the executed agreement with *Connell* in its statement of the holding. [421 U.S. at 625 n. 2](#) and 635.

³⁶ As under the Clayton Act, the specified activities are protected only in the context of a labor dispute. A *labor dispute* is defined by the Norris-LaGuardia Act as including "any controversy concerning terms or conditions of employment, or concerning the association or representation of persons in negotiating, fixing, maintaining, changing or seeking to arrange terms or conditions of employment regardless of whether or not the disputants stand in the proximate relations of employer and employee." [29 U.S.C. § 113\(c\)](#). Contrary to the arguments advanced by the plaintiffs, we have no difficulty in finding that the parties were engaged in a labor dispute within the meaning of [§ 113\(c\)](#). See [Marine Cooks & Stewards v. Panama Steamship Co., 362 U.S. 365 \(1960\)](#); [NLRB v. Rice Milling Co., 321 U.S. 665 \(1951\)](#); [Utilities Ser. Eng. v. Colo. Bldg. & Const. Trades, 549 F.2d 173, 176-77 \(10th Cir. 1977\)](#).

³⁷ [29 U.S.C. § 102](#) provides:

Although the Act does not by its terms provide a labor exemption from antitrust laws, "it has been interpreted broadly as a statement of congressional policy that the courts must not use the antitrust laws as a vehicle to interfere in labor disputes." *H. A. Artists & Associates v. Actors' Equity Association*, 451 U.S. 704, 714 (1981). See Sullivan, *supra* at 723.

The seminal case regarding the statutory exemption is *United States v. Hutcheson*, 312 U.S. 219 (1941).³⁸ [*41] *Hutcheson* involved a nationwide jurisdictional dispute between the Carpenters' and the Machinists' unions. Pursuing its jurisdictional objective, the Carpenters struck and picketed the Anheuser-Busch Brewing Company, picketed another [*40] company located next to Anheuser-Busch on land leased from Anheuser-Busch, and asked union members and their friends for a national boycott of Anheuser-Busch beer. Officers of the Carpenters were charged with a criminal violation of the Sherman Act.³⁹

The Court found no antitrust violation. It rejected the Government's argument that strikes growing out of jurisdictional disputes are Sherman Act violations:

So long as a union acts in its self-interest and does not combine with non-labor groups, the licit and the illicit under § 20 of the Clayton Act are not to be distinguished by any judgment regarding the wisdom or unwisdom, the rightness or wrongness, the selfishness or unselfishness of the end of which the particular union activities are the means.

Id. at 232 (footnote omitted). The Court then considered whether the picketing of Anheuser-Busch and its tenant and the call for a consumer boycott was within the immunity granted to labor unions by Section 20 of the Clayton Act and reasoned that this conduct was lawful unless the enlistment of employees of other employers made it a violation. The Court held there was antitrust immunity⁴⁰ by reading in the Clayton Act the Norris-LaGuardia Act's definition of a labor dispute which applies "regardless of whether or not the disputants stand in the proximate relation of employer and employee."⁴¹ In the Court's view, the Sherman, Clayton, and [*42] Norris-LaGuardia Acts, read together, provide "a harmonizing text of outlawry of labor conduct."⁴² As recently emphasized by the

Whereas under prevailing economic conditions. . . the individual unorganized worker is commonly helpless to exercise actual liberty or contract and to protect his freedom of labor, and thereby to obtain acceptable terms and conditions of employment, wherefore, though he should be free to decline to associate with his fellows, it is necessary that he have full freedom of association, self-organization, and designation of representatives of his own choosing, to negotiate the terms and conditions of his own employment, and that he shall be free from the interference, restraint, or coercion of employers of labor, or their agents, in the designation of such representatives or in self-organization or in other concerted activities for the purposes of collective bargaining or other mutual aid or protection.

³⁸ The first case to employ a species of the statutory exemption was *Milk Wagon Drivers, Union Local 753 v. Lake Valley Farm Products, Inc.*, 311 U.S. 91 (1940). There the Court noted that federal courts did not have jurisdiction to grant injunctions in cases involving labor disputes under the Norris-LaGuardia Act even though a secondary boycott in violation of the Sherman Act was alleged. *Id. at 103*. In *Apex Hosiery Co. v. Leader*, 310 U.S. 469, 60 S.Ct. 982, 84 L.Ed. 1311 (1940) the Court discussed the Clayton and Norris-LaGuardia Act provisions, but decided that the conduct did not violate the terms of the Sherman Act. Thus, it was not necessary to examine the statutory exemption. See *Mid-American Reg. Bar. v. Will County Carpenter, District Council*, 675 F.2d 881, 885 n. 11 (7th Cir.), cert. denied, 103 S.Ct. 132 (1982). Apex is sometimes considered the origin of the non-statutory exemption because the unions' goal of the elimination of price competition based on the differences in labor standards was not the type of restraint in price competition prohibited by the Sherman Act. See, *Conex, supra*, 602 F.2d at 513-14.

³⁹ *312 U.S. at 220*.

⁴⁰ *Id. at 232-37*.

⁴¹ *29 U.S.C. § 113(c) (1976)*.

Court "under *Hutcheson*, no federal injunction may issue over a 'labor dispute', and § 20 [of the Clayton Act] removes all such allowable conduct from the taint of being a violation of any law of the United States, including the Sherman Act'." [*H. A. Artists, supra, 451 U.S. at 715*](#) (quoting [*Hutcheson, 312 U.S. at 236*](#)).

The teaching of *Hutcheson*, therefore, is that union actions immune from injunction under the Clayton or Norris-LaGuardia Acts are also immune from antitrust treble damages or criminal prosecutions. *Hutcheson* in effect overruled both *Duplex Printing Press Co. v. Deering*⁴³ and *Bedford Cut Stone Co. v. Journeyman Stone Cutters Ass'n.*⁴⁴ which had previously subjected these union tactics to the antitrust laws. See [*National Woodwork Mfg. Ass'n. v. NLRB, 386 U.S. 612, 623 \(1967\)*](#). *Hutcheson* made clear that these and other forms of secondary pressure were protected by the Norris-LaGuardia Act's definition of "labor dispute" [*43] and were free from injunctive restraint;⁴⁵ [*44] since the conduct was not subject to injunctive restraint; injunction, it was also immune from the antitrust laws. See [*Ramsey v. UMW, 401 U.S. 302, 313 \(1970\)*](#). After *Hutcheson*, the secondary pressures such as those brought to bear on Altemose in this case were no longer deemed illegal.⁴⁶

[*45] Congress enacted the Taft-Hartley Act⁴⁷ in 1947 to remedy a perceived imbalance in the labor relations field. In [*Section 8\(b\)\(4\)*](#) Congress outlawed pressure tactics with certain secondary objectives⁴⁸ in order to confine

⁴² [*312 U.S. at 231*](#).

⁴³ [*254 U.S. 443 \(1921\)*](#). *Duplex* was a private Sherman Act suit to enjoin a peaceful, nationwide, secondary boycott in aid of organizational efforts' at the plaintiff's factory, effected, first, by refusal of union members employed by plaintiff's customers to handle non-union manufactured goods, and second, by inducing customers to cease dealing with the plaintiff.

⁴⁴ [*274 U.S. 37 \(1927\)*](#). In *Bedford Stone* the Court condemned a union's unilateral refusal to work on plaintiff's non-union quarry stone brought to the construction worksite and held the union's conduct to be an unlawful secondary boycott.

⁴⁵ See, e.g., [*American Fed'n. of Musicians v. Carroll, 391 U.S. 99 \(1968\)*](#) (union's pricing practices affecting orchestra leaders involved "labor dispute" and thus were exempt from antitrust); [*United States v. American Fed'n of Musicians, 318 U.S. 741 \(1943\)*](#) (per curiam) (primary and secondary boycott to prevent technological innovation in music industry); [*Milk Wagon Driver's Union Local 753 v. Lake Valley Farm Prods., Inc., 311 U.S. 91 \(1940\)*](#) (secondary organizational picketing); [*New Negro Alliance v. Sanitary Grocery Co., 303 U.S. 552 \(1938\)*](#) (consumer picketing). Cf., [*Bakery Sales Drivers Local 33 v. Wagshal, 333 U.S. 437 \(1948\)*](#) (union boycott in aid of commercial dispute between bakery and retailer enjoined on ground that no labor dispute existed). See also, [*American Fed'n of Labor v. Swing, 312 U.S. 321 \(1941\)*](#) (organizational picketing).

⁴⁶ See *Handler & Zifchak*, *supra* n. 28 at 477 (citing inter alia) [*United States v. American Fed'n of Musicians, 318 U.S. 741 \(1943\)*](#) (per curiam) (Sherman Act injunction denied against union efforts to prevent use of recorded music in commercial music industry, including attempts to secure hot cargo agreements from employer's; lower court relied upon *Hutcheson* and *Hod Carriers* cases); [*United States v. Building & Constr. Trades Council, 313 U.S. 539 \(1941\)*](#) (per curiam) (Sherman Act indictment against recognitional picketing and refusal to handle materials delivered by rival union certified by NLRB, dismissed); [*United States v. United Bhd. of Carpenters, 313 U.S. 539 \(1941\)*](#) (per curiam) (indictment for secondary pressure and product boycott directed at company whose employees had elected rival union as bargaining agent, dismissed); [*United States v. International Hod Carriers Dist. Council, 313 U.S. 539 \(1941\)*](#), aff'd per curiam [*United States v. Carozzo, 37 F.Supp. 191 \(N.D. Ill. 1941\)*](#) (indictment for, inter alia, strikes and threats of strikes to prevent manufacturers of labor saving concrete truck-mixers from selling them to employers in Chicago, dismissed); [*Gundersheimers, Inc. v. Bakery Int'l Confectionery Workers Union, 119 F.2d 204 \(D.C. Cir. 1941\)*](#) (secondary strike to compel employer to cease importing non-union goods); [*ILGWU v. Donnelly Garment Co., 119 F.2d 892*](#), modified, [*121 F.2d 561 \(8th Cir. 1941\)*](#) (Sherman Act injunction against secondary boycott denied on basis of *Hutcheson*, *Apex*, and *Milk Wagon Drivers*; [*United States v. Gold, 115 F.2d 236 \(2d Cir. 1940\)*](#); [*United States v. B. Goedde & Co., 40 F.Supp. 523 \(E.D. Ill. 1941\)*](#) (product boycott of non-union-made building materials). The Court has subsequently cited *Hutcheson* as taking all labor disputes as defined by the Norris-LaGuardia Act, outside of the reach of the Sherman Act. [*American Fed'n. of Musicians v. Carroll, 391 U.S. 99, 106 \(1968\)*](#).

⁴⁷ Labor Management Relations Act, ch. 120, 61 Stat. 136 (1947) (current version at [*29 U.S.C. §§ 141-197 \(1976\)*](#)).

⁴⁸ For the changes in the law effected by the Taft-Hartley and Landrum-Griffin Amendments, see gen., *Handler & Zifchak*, *supra*, n. 28, at 471-75.

labor disputes to the situs of the primary employer.⁴⁹ [*46] Secondary tactics banned under [Section 8\(b\)\(4\)](#) may be enjoined upon petition by the NLRB⁵⁰ compensatory damages are also available under Section 303.⁵¹ It remained lawful for unions to induce customers of the primary employer to boycott the primary's goods, or to negotiate with secondary employers voluntary agreements (so-called "hot-cargo" agreements) requiring them to boycott the primary employer.⁵²

In 1959 Congress passed the Landrum-Griffin Amendments⁵³ to close loopholes in the Taft-Hartley prohibitions.⁵⁴ It became an unfair labor practice to "threaten, restrain or coerce" a person including the secondary employer in furtherance of a proscribed objective.⁵⁵ "Hot Cargo" agreements⁵⁶ [*47] and any secondary pressure to secure an unlawful cargo clause were outlawed.⁵⁷ Finally, the amendments limited primary picketing with an organizational or recognitional objective⁵⁸ and clarified the right of unions to engage in various other practices.⁵⁹

⁴⁹ [29 U.S.C. § 158\(b\)](#)4. The section prohibited unions from striking or inducing employees of a neutral, "secondary" employer to strike, to force the secondary employer either to cease dealing with the primary employer target or induce the primary to change his method of business. Thus, [T]he forms of labor boycotts condemned in Duplex and Beford Stone were for the post part outlawed as a matter of labor law." *Handler & Zifchak*, *supra*, n. 28, at 472.

⁵⁰ 10(1) of the Taft-Hartley Act, [29 U.S.C. § 160\(1\)](#).

⁵¹ § 303(b) of Taft-Hartley Act, [29 U.S.C. § 187](#).

⁵² See [Local 1976, United Bhd. of Carpenters v. NLRB \(Sand Door\)](#), *357 U.S. 93* (1958).

⁵³ Labor Management Reporting and Disclosure Act, Pub. L. No. 86257, 73 Stat. 519 (1959) (current version at [29 U.S.C. §§ 158-97](#), 401-531 (1976)).

⁵⁴ [National Woodwork Mfrs. Ass'n v. NLRB](#), *386 U.S. 612*, 633-43 (1967); [NLRB v. Servette, Inc.](#), *377 U.S. 46*, 51-54 (1964).

⁵⁵ Formerly, only inducements directed at the secondary employer's employees were proscribed.

⁵⁶ [Section 8\(e\)](#), of course, contained two provisos which exempted with certain qualifications, agreements negotiated in the construction and garment trades. [29 U.S.C. § 158\(e\)](#). The Court, however, had found those agreements with primary work preservation characteristics to be lawful. See [National Woodwork, supra](#), *386 U.S. at 644-65*; [NLRB v. Pipefitters Local 638](#), *429 U.S. 507* (1977).

⁵⁷ [29 U.S.C. § 158\(b\)\(4\)\(ii\)\(A\)\(1976\)](#).

⁵⁸ [29 U.S.C. § 158\(b\)\(7\). § 8\(b\)\(7\)\(C\)](#) proscribes much picketing for more than thirty days when the union fails to petition for a representation election under § 9(c) of the NLRA, ([29 U.S.C. § 159\(c\)](#)). Only injunctive relief was made available for violations of [§ 8\(b\)\(7\)\(C\)](#).

⁵⁹ See [29 U.S.C. § 158\(b\)\(4\)\(B\)](#) (primary strikes and picketing); [§ 158\(b\)\(4\)](#) (consumer picketing); [§ 158\(b\)\(7\)](#) (informational picketing).

The changes effected by Landrum-Griffin, italicized hereinafter, provide that it shall be an unfair labor practice for a union:

(4)(i) to engage in, or to induce or encourage *and individual employed by any person engaged in commerce or in an industry affecting commerce* to engage in, a strike or a refusal in the course of his employment to use, manufacture, process, transport, or otherwise handle or work on any goods, articles, materials, or commodities or to perform any services; or

(ii) *to threaten, coerce, or restrain any person engaged in commerce or in an industry affecting commerce*, where *in either case* an object thereof is:

(A) forcing or requiring any employer or self-employed person to join any labor or employer organization or to *enter into any agreement which is prohibited by sub-section (e) of this section*;

[*49] Section 303 was amended to include a damage remedy for outlawed secondary pressure. Pressure in the form of strikes, inducements to strike, or coercion to obtain or enforce a hot cargo agreement became unfair labor practices under [Section 8\(b\)\(4\)](#) and remedial by a damage action under Section 303. This is because [Section 8\(b\)\(4\)\(A\)](#) makes it illegal to coerce an employer to enter into an agreement violating [Section 8\(e\)](#), and [Section 8\(b\)\(4\)\(B\)](#) outlaws secondary pressure to enforce a voluntary hot cargo agreement, whether legal or illegal. However, no Section 303 damages remedy exists for the voluntary execution of an illegal hot cargo agreement; only injunctive relief was made available.⁶⁰

The remedial scheme embodied in the Taft-Hartley and Landrum-Griffin Amendments to the labor laws strictly limited labor's use of secondary activities but left intact its statutory exemption to the antitrust laws for the type of conduct considered in *Hutcheson*. The authorities agree that the legislative history of the Taft-Hartley Act was explicit that its remedies were exclusive with respect to conduct prohibited therein. [n61] The legislative history of [*50] the Landrum-Griffin Amendments does not contain direct evidence of exclusivity but neither does it suggest that the legislation was intended to resurrect antitrust liability.⁶² Congress in Landrum-Griffin provided a deterrent to illegal hot cargo agreements by permitting Section 303 damage actions for secondary pressure to obtain or enforce such agreements.⁶³

The legislative scheme, when [*51] viewed in conjunction with *Connell*, makes clear that absent the execution of a "hot cargo" agreement which is prohibited by [§ 8\(e\)](#), mere union pressure or coercion of whatever form is regulated

[*48] (B) forcing or requiring any person to cease using, selling, handling, transporting, or otherwise dealing in the products of any other producer, processor, or manufacturer, or to cease doing business with any other person, or *forcing or requiring any other employer to recognize or bargain with a labor organization as the representative of his employees unless such labor organization has been certified as the representative of such employees under the provisions of section 159 of this title: Provided, That nothing contained in this clause (b) shall be construed to make unlawful, where not otherwise unlawful, any primary strike or primary picketing;*

(C) forcing or requiring any employer to recognize or bargain with a particular labor organization as the representative of his employees if another labor organization has been certified as the representative of such employees under the provisions of [section 159](#) of this title;

(D) forcing or requiring any employer to assign particular work to employees in a particular labor organization or in a particular trade, craft, or class rather than to employees in another labor organization or in another trade, craft or class, unless such employer is failing to conform to an order or certification of the Board determining the bargaining representative for employees performing such work: *Provided, That nothing contained in this subsection shall be construed to make unlawful a refusal by any person to enter upon the premises of any employer (other than his own employer), if the employees of such employer are engaged in a strike ratified or approved by a representative of such employees whom such employer is required to recognize under this Subchapter: Provided further, That for the purposes of this paragraph (4) only, nothing contained in such paragraph shall be construed to prohibit publicity other than picketing, of the purpose of truthfully advising the public, including consumers and members of a labor organization, that a product or products are produced by an employer with whom the labor organization has a primary dispute and are distributed by another employer, as long as such publicity does not have an effect of inducing any individual employed by any person other than the primary employer in the course of his employment to refuse to pick up, deliver, or transport any goods, or not to perform any services, at the establishment of the employer engaged in such distribution.*

⁶⁰ See [29 U.S.C. § 160\(1\)](#).

⁶² This conclusion draws support from the overwhelming number of scholars and commentators who have examined the question See cf. St. Antoine, *supra*, n. 13 at 603; Handler & Zifchack, *supra*, n. 28, at 514-15, Handler, *Changing Trends in Antitrust Doctrines: An Unprecedented Supreme Court Term - 1977*, 77 Colum. L. Rev. 979 (1977); Note the Supreme Court, 1974 Term, 89 Harv. L. Rev. 47 at 237 (1975); Note, 21 Vill. L. Rev. 342, 351-353 (1975-76); Note, 61 Cornell L. Rev. 436, 459 (1976). See [Connell, supra, 421 U.S. at 640-44](#) (Stewart J., dissenting).

⁶³ Justice Stewart persuasively argued that the sequence of events occurring during the debate of the bill reveals "unmistakeably" that Congress chose with great care the labor law remedy over the antitrust remedy. [421 U.S. at 634, 651-54](#).

exclusively under the labor laws by [Section 8\(b\)\(4\)](#) enforcement and damage actions under Section 303.⁶³ Here, even if the subcontracting agreements sought Section 303, from Altemose and members of the ABC violated [Section 8\(e\)](#) because no agreement was voluntarily executed, Count II at most alleges violations of the secondary boycott prohibitions of [Section 8\(b\)\(4\)](#). Union picketing and violence designed to secure an unlawful [Section 8\(e\)](#) agreement would violate [Section 8\(b\)\(4\)\(a\)](#) and possibly [Section 8\(b\)\(1\)\(a\)](#). The numerous other secondary activities which plaintiffs allege as overt acts in a union-Council conspiracy to force Altemose out of business are also regulated exclusively by the labor laws. Secondary pressure applied against the various *subcontractors, suppliers and developers*, to force these third parties to bring pressure on the primary employer target (Altemose) to accede to union demands, would be a secondary boycott in violation of [Section 8\(b\)\(4\)\(b\)](#). And the [*52] unions' attempts to force existing non-union subcontractors off the job under the subcontracting agreements would violate [Section 8\(b\)\(4\)\(b\)](#). As recently stated " . . . the legislative history of [Section 8\(b\)\(4\)](#) manifests a clear Congressional intention to remedy illegal secondary activities exclusively by way of the labor laws. Recovery of treble damages by way of the antitrust laws, for the same illegal activities, is prescribed" at least when the unions act alone. [C & K Coal Co. v. U.M.W., 537 F.Supp. 480, 503 \(W.D. Pa. 1982\)](#), aff'd in part, [704 F.2d 690 \(3rd Cir. 1983\)](#) (citing [Allied Inter. v. Int. Longshoremen's 640 F.2d 1368, 1381 \(1st Cir. 1981\)](#)).

The distinction between the facts of this case, where union pressure was used to try to force Altemose to sign the sub-contracting agreement, and *Connell*, where the contractor actually did sign the agreement, [*53] is decisive. Here the full panoply of remedies under the labor laws, including the damage remedy under Section 303, were available to Altemose and members of the plaintiff associations for union coercion to secure an illegal subcontract agreement or illegal union secondary pressure on third parties. In either case, [Section 8\(b\)\(4\)](#) proscribed these activities, and the labor laws provide the exclusive remedy.

In *Connell*, because the contractor signed the agreement, Section 303 did not provide a damage remedy for the violation of [Section 8\(e\)](#) itself. Thus, the antitrust remedy was not cumulative⁶⁴ and the statutory exemption was inapplicable. But the union conduct in this case which forms the basis for the conspiracy alleged in Count II is regulated exclusively under the labor laws and is statutorily immune from the antitrust laws. See [Allen Bradley v. Electrical Workers 325 U.S. 797, 809 \(1945\)](#); [Hunt v. Crumboch, 325 U.S. 821, 825 \(1945\)](#); [Jou-Jou Designs v. Intern. Ladies. Etc., 643 F.2d 905, 910 \(2nd Cir. 1982 cert. denied, 103 S.Ct. 174 \(1982\); \[Utilities Ser. Eng. v. Colo. Bldg. & Const. Trades, 549 F.2d 173, 178 \\(10th Cir. 1977\\)\]\(#\); \[Iodice v. Calabrese 512 F.2d \\[*54\\] 383 \\(2nd Cir. 1975\\)\]\(#\); \[Levering & Garrigues Co. v. Morrin, 71 F.2d 284 \\(2nd Cir.\\), cert. denied, 293 U.S. 595 \\(1934\\)\]\(#\).](#)

2. Non-Statutory Immunity - Existence of a *Collective Bargaining Relationship*⁶⁵

Even if the statutory immunity were inapplicable, there is a non-statutory exemption from the antitrust laws for certain activities of organized labor. This is a "shorthand description of an interpretation of the Sherman Act, making that statute inapplicable to restraints imposed in the interest of lawful union monopoly [*55] power in the labor market." [Conex, supra, 602 F.2d at 513](#). But secondary product or service market restraints such as those sought here must meet a high standard to warrant exemption. [Id. at 514](#). The unions organizational interest furthered by the subcontracting agreements is the justification here claimed. To determine if this confers non-statutory immunity,

⁶³ See [Connell, 421 U.S. at 634](#) ("But whatever significance this legislative choice has for antitrust suits based on those secondary activities prohibited by [§ 8\(b\)\(4\)](#), it has no relevance to the question whether Congress meant to preclude antitrust suits based on the 'hot cargo' agreements outlawed in 1959.").

⁶⁴ See [Connell, supra, 421 U.S. at 634 n. 16](#).

⁶⁵ Because plaintiffs attack the subcontracting agreements in general as violative of the labor and antitrust laws, the discussion of the collective bargaining relationship created by the agreements under [§ 8\(f\)](#) applies to the association plaintiffs as well. See infra at n. 82 and accompanying text. But since the association plaintiffs do not have standing to contest union conduct taken against individual member contractors, only the history of the labor dispute with Altemose is pertinent in determining whether a sufficient collective bargaining context existed to satisfy the criteria of *Connell*.

we must first examine the validity of the conduct under the labor laws.⁶⁶ [*56] If the conduct is unlawful under the labor laws, antitrust immunity is probably lost⁶⁷ and traditional antitrust analysis follows.⁶⁸

[*57] The history and purpose of the construction industry proviso to [Section 8\(e\)](#) is traced in *Pacific Northwest Chapter v. NLRB*, 654 F.2d 1301 (9th Cir. 1981), aff'd in part sub. nom., *Woeilke Romero Framing, Inc. v. NLRB*, U.S., 102 S.Ct. 2071 (1982). In *Local 1976, United Brotherhood of Carpenters v. NLRB*, (Sand Door),⁶⁹ [*58] the Supreme Court held a union could not engage in strikes or other concerted activity to enforce "hot cargo" agreements. However, *Sand Door* suggested that employers and unions might enter into these agreements that required employees to boycott the goods or services of another party with whom the union had a dispute so long as it was done voluntarily. [357 U.S. at 108](#). Congress enacted [Section 8\(e\)](#)⁷⁰ to eliminate the loopholes for "hot cargo" agreements created by the *Sand Door* decision and to accommodate the special conditions of the construction industry.⁷¹ The intent of [Section 8\(e\)](#) has to preserve the pattern of collective bargaining existing prior to the Landrum-Griffin Amendments as well as reduce labor controversy at the site of the construction project.

⁶⁶ In *Connell* it is arguable from a reading of the Court's opinion that the antitrust exemption did not turn on the validity of the agreement under [§ 8\(e\)](#) because the Court first addressed the exemption question and then proceeded to determine the validity of the agreement under the labor laws. See *Casey*, supra n. 28, at 256 n. 117 (suggesting that the Court would have found no exemption regardless of the outcome of the [§ 8\(e\)](#) issue). Whatever academic significance this may have has been laid to rest in *Kaiser Steel Corp. v. Mullins!* [U.S., 102 S.Ct. 851 \(1982\)](#). The Court explaining the *Connell* mode of analysis stated "[W]e addressed the [§ 8\(e\)](#) issue on the merits and found that [§ 8\(e\)](#) did not allow the agreement at issue . . . [A]s a result, the agreement was subject to the antitrust laws [Id. at 860](#). In summary the Court went on "In *Connell* we decided the [§ 8\(e\)](#) issue in the first instance. It was necessary to do so to determine whether the agreement was immune from the antitrust laws." *Id.*

⁶⁷ In *Cnex*, supra, the court stated that a [§ 8\(e\)](#) violation automatically precludes recognition of non-statutory immunity. [602 F.2d at 518-19](#). But in *Muko I* the court retreated from this view suggesting that a [§ 8\(e\)](#) violation does not necessarily lead to a finding of non-exemption. [Muko I, supra, 609 F.2d at 1375](#). And the court reserved judgment on the effect of a [§ 8\(e\)](#) violation standing alone. See discussion Areeda & Turner, supra n.14, at 82-84.

⁶⁸ See *Sullivan*, supra n.27, at 730. *Casey*, supra n. 28, at 272-75. See also, *Berman Enterprises v. Local 333*, 644 F.2d 930, 935-36 (2d Cir. 1981), cert. denied, [102 S.Ct. 506 \(1982\)](#); *Grandad Bread v. Continental Banking Co.*, 612 F.2d 1105, 1110 (9th Cir. 1979), cert. denied, [101 S.Ct. 854 \(1981\)](#); *Meat Cutters Local 576 v. Wetterau Foods, Inc.*, 597 F.2d 133 (8th Cir. 1979). The Third Circuit, however, has stated in dicta that an NLRB holding that agreements were legal under the labor laws was "not conclusive on the issue of their illegality under the antitrust laws." *Conex, supra, 602 F.2d at 519* (quoting *Heat Insulators v. United Contractors*, 494 F.2d 1353, 1354 (3rd Cir. 1974)). We view this language appropriate in the context of executed collective bargaining agreements which were at issue in *Cnex*. See *Meat Cutters v. Jewel Tea Co., supra, 381 U.S. 676*.

⁶⁹ [United Brotherhood of Carpenters v. NLRB, 357 U.S. 93 \(1958\). *Sand Door* was widely interpreted as permitting voluntary "hot cargo" agreements. See supra n. 53.](#)

⁷⁰ It must be remembered that [§ 8\(e\)](#) with its construction industry proviso was added to the Act by the 1959 Landrum-Griffin Amendments, P.L. 86-257, 23 Stat. 543-544. For the text of [29 U.S.C. § 158\(e\)](#), see supra at n. 31.

⁷¹ The unique nature of the construction industry is summarized in the Senate Report:

The occasional nature of the employment relationship makes this industry markedly different from manufacturing and other types of enterprise. An individual employed typically works for many employers and for none of them continuously. Jobs are frequently of short duration, depending upon various stages of construction.

S.Rep. No. 187, 86th Cong., 1st Sess. 27, (1959) U.S. Code Cong. & Admin. News, pp. 2318, 2344; I *Legislative History of the Labor-Management Reporting and Disclosure Act of 1959* 423. With its enactment, Congress necessarily chose to tolerate a degree of "top down" pressure for unionization. See *Woeilke Romero , supra, 102 S.Ct. at 2081-82*. But the "top down" organizing effect of subcontractor agreements is limited by other provisions of the NLRA when sought in the collective bargaining context. *Id.* See gen., [29 U.S.C. § 158\(B\)\(7\)\(C\); 29 U.S.C. § 158\(f\)](#).

[*59] In defining the scope of permissible agreements under the construction industry proviso to [Section 8\(e\)](#), the *Woelke Romero* Court stated it was deciding "a question left unresolved in *Connell*: the extent the proviso shelters agreements sought or negotiated within the context of a collective bargaining relationship." [102 S.Ct. at 2076-77 n. 8](#). In *Connell*, the unions expressly disavowed any intent to organize or represent employees. [421 U.S. at 619, 631, 639](#).⁷² [*60] Because the legislative history of [Section 8\(e\)](#) revealed that Congress believed broad subcontracting clauses were part of the industry collective bargaining pattern prior to the adoption of the Landrum-Griffin Amendment of 1959,⁷³ the Court held that the construction industry provision to [Section 8\(e\)](#) is not limited to union signatory subcontracting clauses applying to jobsites at which both union and non-union workers are employed, but shelters such clauses so long as they are sought or negotiated in the context of a collective bargaining relationship. *Id. at 2083*. So the question in this case is whether the agreement can be said to be sought in the context of a collective bargaining relationship.

The NLRB has found with regard to those parties that the union picketing on various occasions was for organizational objectives.⁷⁴ On September 9, 1975, an Administrative Law Judge ("ALJ") found that the picketing of Altemose Construction sites which occurred from January 20 through April 23, 1975 and April 23 through May 1, 1975 was for organizational and recognitional objectives;⁷⁵ the ALJ inferred an organizational objective in part from the testimony of Council agent Magrann,⁷⁶ and from the resumption of picketing after April 23. Therefore, the ALJ found the union in violation of [Section 8\(b\)\(7\)](#)⁷⁷ [*61] and the NLRB upheld this decision including the finding of organizational purpose.⁷⁸ Thus, regarding these activities, Altemose is collaterally estopped from denying that the Council's conduct had an organizational purpose.⁷⁹

⁷² As previously noted, the *Connell* decision hinged on the absence of a collective bargaining relationship between the union and the general contractor. A number of courts have limited *Connell* to the proposition that a hot cargo agreement, if an unfair labor practice because secured outside of the collective bargaining practice, may be the basis of an antitrust suit. See [Gorgan v. Swanson Painting Co.](#), [682 F.2d 807 \(9th Cir. 1982\)](#); [Donald Schriver Inc. v. NLRB](#), [635 F.2d 859 \(D.C.Cir. 1980\)](#), cert. denied, [451 U.S. 976 \(1981\)](#). The NLRB general counsel has also taken this position regarding [§ 8\(e\)](#). See NLRB Guidelines for handling [§ 8\(e\)](#) Construction Industry Proviso Cases under the Supreme Court's *Connell* Decision; 9105 CCH Labor Law Reports.

⁷³ [Woelke Romero, supra, 102 S.Ct. at 2080](#).

⁷⁴ See App. Ex. 18 at 476(a).

⁷⁵ App. Ex. 18 at 482(a). NLRB Case No. 4-CP-233.

⁷⁶ App. Exh. 18 at 486(a).

⁷⁷ [222 NLRB No. 198](#) aff'd mem., [93 LRRM 3025](#) (3rd Cir. 1976). Moreover, in related cases which are referred to by the plaintiffs the Board found organizational objectives in the picketing. In [Samnoff v. Building Construction Trades Council](#), [346 F.Supp. 1071 \(E.D. Pa. 1972\)](#), rev. on other grounds, [425 F.2d 203](#) (3rd Cir.), vacated, [414 U.S. 808 \(1973\)](#), the Board on remand found the picketing violative of [§ 8\(b\)\(7\)\(c\)](#) because of its recognitional object. See [201 NLRB No. 42 at 203](#), aff'd mem., [485 F.2d 680 \(3rd Cir. 1973\)](#). See e.g., [Danielson v. I.G.W.](#), [494 F.2d 1230, 1239 \(2nd Cir. 1974\)](#) (explaining the subsequent history of Samnoff); [Samuel Long, Inc.](#), [201 NLRB No. 42 at 203](#) (finding of recognitional objective); [Hirsch v. Building & Const. Trades Council, Etc.](#), [530 F.2d 298, 304 \(3rd Cir. 1976\)](#) (finding of organizational purpose).

⁷⁸ In [Conex, supra, 602 F.2d at 503, 511](#), the court held that a prior judgment of the NLRB was entitled to preclusive effect as to all labor law issues in an antitrust action. Accordingly, the rule of collateral estoppel is applicable to prior administrative proceedings involving these parties, and the adjudicative facts are treated as undisputed for the purpose of this opinion. See [United States v. Utah Const. and Minino Co.](#), [384 U.S. 394, 422 \(1966\)](#). The plaintiffs do not contend that these administrative proceedings were inadequate to fairly present their claims. See [Nasem v. Brown](#), [595 F.2d 801, 806-07 \(D.C. Cir. 1979\)](#); [Jaden Elec. v. Int'l. Broth., Etc.](#), [508 F.Supp. 983, 988 \(D.N.J. 1981\)](#).

⁷⁹ Furthermore, Form 3 which was then in effect does not prohibit subcontracting to non-union firms as did the agreement in *Connell*; it has an ancillary purpose to organize the general contractor's employees. Any antitrust claim based on Form 3 is without merit.

However, in state court proceedings the trial court found no organizational or recognitional purpose in union conduct occurring at the Valley Forge construction site in 1972. This finding was made on application for preliminary injunctive relief. Under Pennsylvania law there must be preliminary findings to support a court's determination to issue a temporary injunction but these findings are not conclusive of the rights of any party to the litigation. Pa. R. Civ. P. § [*62] 1531(c); 18 P.L.E., Injunction § 108 at 395. On appeal from a decree which grants a preliminary injunction, the Supreme Court will "only look to see if there were any apparently reasonable grounds for the action of the court below, and . . . will not further consider the merits of the case or pass upon the reasons for or against such action . . ." *Lindenfelser v. Lindenfelser*, 385 Pa. 342, 343, 123 A.2d 626 (1956); *Drum v. Dinkelacker*, 261 Pa. 392, 105 A. 509 (1918). In affirming the grant of the injunction, the Pennsylvania Supreme Court expressly did not decide whether the activities complained of [i.e.: unlawful violent picketing] were protected or prohibited under the labor laws. See *Altemose Construction Co. v. B. & C. T. Council of Philadelphia*, 449 Pa. 194, 203 n. 8, 296 A.2d 504 (1972). Thus, these findings in the state proceedings are not determinative. Because of the organizational objective, the parties were engaged in a labor dispute within the collective bargaining context in 1975. Thus, *Connell* and *Woelke Romero* compel the conclusion that no § 8(e) violation occurred in that time frame.⁷⁹ Those activities taken to obtain subcontracting [*63] agreements prior to 1975 were also in a collective bargaining context.

[*64] In *Donald Schriver, Inc. v. NLRB*, 635 F.2d 859 (D.C. Cir. 1980), cert. denied, 451 U.S. 976 (1981), the court found that an Section 8(f) prehire agreement covering the full conditions of employment of a contractor's own employees was sufficient to satisfy the collective bargaining requirement of *Connell*. The court reasoned that:

The requirement in *Connell* that there be a collective bargaining relationship only has meaning within its own context. *Connell* required a collective bargaining relationship to guarantee that a union seeking a subcontracting agreement could not sidestep § 8(b)(7) and apply unlimited secondary pressure on nonunion subcontractors. An attempt by a union to establish an § 8(f) relationship is sufficient to satisfy that concern; a union seeking an § 8(f) agreement covering wages and other terms of employment remains subject to the restrictions of § 8(b)(7). *Dallas Building and Construction Trades Council v. NLRB*, 396 F.2d 677 (D.C. Cir. 1968). Whether an ou(r) relationship is otherwise deemed to be a "collective-bargaining relationship" is a question totally academic to this case, missing the entire purpose and thrust of *Connell*.

[*65] *Shriver, supra*, 635 F.2d at 875. The court held that a subcontracting agreement sought in the context of an Section 8(f) prehire agreement does not violate Section 8(e).

Recognizing the concerns expressed in *Shriver* as well as the attendant interests of the employees of the general contractor, the court of appeals has held in related litigation that picketing directed at obtaining a subcontractor agreement is recognitional in nature and, therefore, Section 8(b)(7)(c) limitations are applicable. *Hirsch v. Building & Construction Trades Council, Etc.*, 530 F.2d 298, 303 (3rd Cir. 1976). *Altemose*, in fact, did resort to Section 8(b)(7) remedies and secured a cease and desist order in 1975.⁸⁰ Therefore, the pertinent question is whether

The unions here at the time of the picketing denied any organizational objective. The unions wanted to picket *Altemose* as long as they could and § 8(b)(7) limits this right to thirty days. Antitrust consequences from lack of organizational intent in mass picketing was inconceivable in 1972. Subcontracting agreements in the construction trade had been upheld by the courts on numerous occasions even in the absence of a collective bargaining relationship. See *Suburban Tile Center, Inc. v. Rockford Bldg. Trades Council*, 354 F.2d 1 (7th Cir.) cert. denied, 384 U.S. 960 (1966); *Construction Laborers Local 383 v. NLRB*, 323 F.2d 422 (9th Cir. 1963); *Papazian v. Los Angeles Bldg. Trades Council*, 83 L.R.R.M. 2710 (C.D. Cal. 1973); *Los Angeles Bldg. Trades Council (Fowler-Kenworthy Elec. Co.)*, 151 N.L.R.B. 770 (1965); *Los Angeles Bldg. Trades Council (Couch Elec. Co.)*, 151 N.L.R.B. 413 (1965). Not until the Fifth Circuit's consideration of *Connell* had the issue of whether a collective bargaining relationship was required arisen. *Connell, supra*, 483 F.2d at 1173-74. See also, *Samnoff, supra*, 346 F.Supp. 1071 (E.D. Pa.), rev'd on other grounds, 475 F.2d 203 (3rd Cir. 1973) (Becker, J., picketing to obtain subcontracting agreement legal even absent organizational purpose) (Citing *Essex County Dist. Coun. of Carpenters, Etc. v. NLRB*, 332 F.2d 636 (3rd Cir. 1964)).

⁸⁰ See supra at n. 77. It does not appear in the record why *Altemose* did not resort to a § 8(b)(7) remedy in 1972.

Forms 1 and 2 establish a [Section 8\(f\)](#) pre-hire agreement - (i.e., whether they create a sufficient collective bargaining relationship on their face to take this case beyond the ambit of *Connell*).

An organizational purpose is evinced by the agreements themselves. See [Schrive, supra, 635 F.2d at 868 n. 11](#). Form [*66] 1 has numerous sections. Although the Recognition Section states that the agreement "is not deemed to imply direct recognition . . . under [Section 8\(b\)](#),⁸¹ this does not preclude its being organizational or recognitional in nature. The Council, of course, does not have members as individual workers but is made up of affiliate unions so that there can be no true § 9 relationship. What the agreement does provide is that all employers on the job site will enter into a collective bargaining agreement with the appropriate craft union. This is accomplished by both the subcontracting obligations section, and the direct obligations section applicable to the general contractor. The text reads:

SUBCONTRACTING OBLIGATIONS

1. The Employer agrees to provide in the specifications on doing any business with subcontractors for work on the building or construction job site that such subcontractors as a condition precedent to their commencing [*67] work on the job site will enter into collective bargaining agreements with the appropriate craft union member of the Council which is the recognized collective bargaining agent of the particular trade. In no event, will the Employer subcontract any work to any subcontractor who is not in such contractual relations or who does not achieve such contractual relations prior to commencing work.

2 A list of all subcontractors will be posted on the site of the job.

DIRECT OBLIGATIONS

The following obligations of the Employer will apply when contract has been entered into between the Employer and the Council. If, however, it has been deemed necessary by the Council to picket or take other appropriate economic action against the Employer prior to achieving contractual relations, in which even such picketing or other economic action shall be deemed to be taken for the purposes of achieving this collective bargaining agreement only to obtain accord to the portion of this contract referred to as "Subcontracting Obligation."

1. *The Employer, with reference to work required by him in the industry, agrees to enter into collective bargaining agreements with only member unions of the [*68] Council which are recognized collective bargaining agents for the particular trade or craft required for the job.*

(Emphasis added.)

Under this agreement the employer (general contractor) must enter into a collective bargaining relationship with the respective craft unions. The employer agrees to pay union wages and observe union working conditions, rules and regulations under Para. 3.

3. The Employer agrees to abide by all the rules and regulations of the respective trades affiliated with the Building and Construction Trades Council, and to comply with the rates and the specified hours as recognized by the respective trades. In the event that the employer should engage subcontractors to perform such work, then the employer agrees that such subcontractors will observe hours, wages, fringe benefits and working conditions as recognized by the different trades.

Form 1 also contains a grievance procedure⁸² and a reference to work stoppages and strikes upon termination.⁸³

⁸¹ The reference to [§ 8\(b\)](#) of the Labor Management Relations Act of 1947 is a misnomer (Representation-elections). We believe the intent was to refer to [29 U.S.C. § 159](#). [Section 8\(b\), 29 U.S.C.](#) § ?158(b) merely refers to unfair union labor practices.

All the indicia in Form 1 establish the existence of at least a pre-hire agreement under [Section 8\(f\)](#). Its purpose is to initiate a collective bargaining [*69] relationship with the general contractor and it establishes enforceable terms concerning the conditions of employment when the general contractor is the employer. It is the first step toward a more specific § 9 (a) collective bargaining agreement. The Board has certified this method of convenience bargaining. See Standard Brands, inc., [175 NLRB No. 122, 71 LRRM 1057 \(1969\)](#), and pre-hire agreements achieved through this type of bargaining are enforceable in an action under section 301 of the LMRA, [29 U.S.C. § 185](#). See [McNeff v. Todd, U.S. 51 U.S.L.W. 4497](#) (Apr. 27, 1983). It is a method to secure a multicraft contract from a general contractor which would have the "advantage not only of promoting union organization objectives within a collective bargaining context, but also of meeting the subsidiary Connell test of protecting the union employees of the general contract from being forced to work with non-union employees.⁸⁴ This agreement is far more explicit in organization purpose than that in [Los Angeles Building Construction Trades Council \(B&J Investment Co.\), 214 NLRB No. 86, 87 LRRM 1424 \(1974\)](#)⁸⁵ which the Court in Connell distinguished as a pre-hire contract under [Section I*701 8\(f\)](#). [Connell, supra, 421 U.S. at 631 n.10](#). See also, [Schriver, supra, 635 F.2d at 873 n.22](#). it is distinguished that Altemose employed workers of the respective trade unions constituting the Council.

Form 2 explicitly requires the general contractor to enter into collective bargaining agreements with member unions of the Council which are recognized collective bargaining agents for the particular craft or trade required for the job and with reference to work required by it. These agreements must contain the Union Security Clause permitted by [Section 8\(f\)\(2\)](#) of the LMRA. The plaintiffs argue that this is merely an agreement which requires the signatory contractor to enter into pre-hire agreement in futuro and it cannot be a pre-hire contract because the Council is not a labor organization composed of individual laborers. This is too formalistic a reading of [Section 8\(f\)](#). In fact, the NLRB has suggested that the execution with a Building and Trades Council of an agreement including a subcontractor's clause covering existing [*71] employees of the general contractor fulfills the criteria for a pre-hire agreement under [Section 8\(f\)](#). See Memorandum of General Counsel on Connell, 9105 at 15, 84-85 CCH Labor Reports (1976). These agreements which require an employer to enter into a collective bargaining relationship evidence sufficient organization purpose to satisfy the concerns of Connell. See [McNeff, supra, 51 U.S.L.W. at 4500 n.9](#).

The remaining arguments concerning the legality of the subcontracting agreements can be addressed seriatim. First, the particular union requirements of the agreements⁸⁶ are not illegal. [Pacific Northwest, supra, 654 F.2d at 1323](#). Shriver, supra, 635 [Pacific Northwest, supra, 654 F.2d at 1323](#). Shriver, supra, 635 F.2d at 885. Nor does lack of specification of a particular jobsite in the agreement make them illegal. [Pacific Northwest, supra, 654 F.2d 1320](#), aff'd sub. nom., [Woelke Romero, supra, 102 S.Ct. at 2083](#); [Shriver, supra, 635 F.2d at 882](#). The distribution of a list of subcontractors party to the collective bargaining agreements, the so-called "fair" contractors list, is not an illegal act in regard to Count II; whether some conspiratorial purpose can be inferred in [*72] Count I will be discussed hereafter. Finally, Altemose has no standing to challenge the Industry Advancement Fund provide for by any collective bargaining agreements to which it is not a party.⁸⁷

Because the agreements seek to establish terms and conditions of employment for then existing employees of the general contractor, a collective bargaining relationship sufficient to satisfy the concerns of *Connell* is present; the

⁸³ [Id. at 2.D.](#)

⁸⁴ St. Antoine, supra n.13, at 629-30.

⁸⁵ The Board in B & J Investments referred to the agreement as a "collective bargaining contract". [214 NLRB at 563](#).

⁸⁶ See Form I, Subcontracting Obligations 1; Form 2, Employment # (2).

⁸⁷ The Industry Advancement Fun to which the contributions are made based on employee hours does not have the price fixing implications condemned in [Nat. Elec. Contractors v. Nat. Construction, 675 F.2d 492, 521 \(4th Cir. 1982\)](#). Plaintiffs' general assertions of unlawfulness under [§ 1](#) of the Sherman Act is without merit.

limitations of Section 8(b)(7)(C) are applicable and the agreements do not violate Section 8(e). Such amendments which are legal under the labor law enjoy non-statutory exemption from the antitrust laws. The union conduct alleged in Count II is statutorily immune from challenge under Sections 1 and 2 of the Sherman Act because the alleged conspiracy is in [*73] reality unilateral union activity. Alternatively, the union subcontracting agreements have sufficient organization intent to establish as a matter of law a collective bargaining relationship which provides sufficient justification for application for the non-statutory exemption to the union activities complained of here.

C. Count I - Conspiracy with Non-Labor Entities

In Count I the plaintiffs invoke *Allen Bradley Co v. Local 3, International Brotherhood of Electrical Workers, 325 U.S. 797 (1945)*, in which the Court found that labor's statutory exemption had been forfeited because the union defendant conspired with employers to restrain trade in the produce market. [n88] *Id. at 809*. The Court concluded that, "when the unions participated with a combination of businessmen who had complete power to eliminate all competition among themselves and to prevent all competition from others, a situation was created not included within the exemptions of the Clayton and Norris-LaGuardia Acts." *Id.* See also, *Philadelphia Record Co. v. Manufacturing Photo-Engravers Ass'n, 155 F.2d 799 (3rd Cir. 1946)* The plaintiffs allege that the unions have conspired with union employers, developers, suppliers [*74] and financial institutions to drive non-union contractors out of the market for construction services. Under this type of conspiracy to restrain trade in the product market, the unions can claim neither statutory nor non-statutory exemptions to the antitrust laws. See *Conex, supra, 602 F.2d at 514*. The defendants deny the existence of any conspiracy or agreement of the Council and its union members with an employer or non-labor organizations.⁸⁹

[*75] 1. Inferring Conspiracy from *Circumstantial Evidence*

Because defendants deny any conspiracy, to withstand a motion for summary judgment the plaintiffs must come forward with "significant probative evidence"⁹⁰ that the defendants had a "conscious commitment to a common scheme." See *Edward J. Sweeney & Sons v. Texaco, Inc., 637 F.2d 105, 111 (3rd Cir. 1980)*, cert. denied, 451 U.S. 911 (1981); *Klein v. American Luggage Works, Inc., 323 F.2d 787, 791 (3rd Cir. 1963)*. The existence of a conspiracy by its nature is not conducive to direct proof. Circumstantial evidence must often establish the requisite concert of action. See *United States v. Paramount Pictures, Inc., 334 U.S. 131, 142 (1948)*; *American Tobacco Co. v. United States, 328 U.S. 781, 810 (1946)*. Accordingly, we must assess the probative value of the circumstantial evidence offered by the plaintiffs to determine if there is a genuine issue of material fact regarding the existence of a conspiracy. If the inference from the circumstantial evidence to the ultimate fact of conspiracy is not permissible as a matter of law, it cannot raise an issue of material fact to defeat a properly supported motion for [*76] summary judgment. See *Zenith Radio Corp. v. Matsushita Elec. Indus. Co., supra, 513 F.Supp. at 1171*. As stated in a similar context:

When a trial court grants a directed verdict in a circumstantial evidence case, the court makes a legal determination that the narrative or historical matters in evidence allow no permissible inference of the ultimate fact urged by the opposing party. It decides that no reasonable person could reach the suggested conclusion on the basis of the hard evidence without resorting to guesswork or conjecture. To permit a jury to draw an inference of the ultimate fact

⁸⁹ In *Allen Bradley*, the plaintiffs were non-New York City manufacturers of electrical equipment. The defendant was the local union representing electrical workers in the New York City. The plaintiffs challenged industry wide agreements negotiated by the union which provided that contractors would purchase equipment only from the city electrical manufacturers and the manufacturer would sell only to contractors by using labor union methods, such as strikes and boycotts. The effect of these closed shop and hot cargo agreements was to establish a market closed to competition from out-of-state manufacturers. The Court noted that the evidence of conspiracy extended beyond closed shop and hot cargo restraints imposed in the collective bargaining agreements which "standing alone would not have violated the Sherman Act." *325 U.S. at 809*.

⁹⁰ See, e.g., Affidavit of Ralph Williams, Business Representative of the Council, Exhibit 1 at 12 and 13.

under these circumstances is to substitute the experience of logical probability for what the courts described as "mere speculation." *Galloway v. United States*, 319 U.S. [372] at 395; *Columbia Metal Culvert Co. v. Kaiser Aluminum & Chemical Corp.*, 579 F.2d [20] at 25.

Sweeny, supra, 637 F.2d at 116.⁹¹ [*77] Thus, to withstand the motion for summary judgment, plaintiffs' circumstantial evidence of conspiracy in this case must be such that a "reasonable person could reach the conclusion on the basis of the hard evidence without resorting to guesswork or conjecture." Sweeny, supra. We scrutinize the plaintiffs' circumstantial evidence accordingly.⁹²

1. Evidence of Conspiracy in the Record

Notwithstanding an extensive record, plaintiffs have failed to set forth specifically the circumstantial evidence believed probative of a conspiracy with non-labor entities. They rely essentially on the same evidence proffered in support of Count I as probative of a conspiracy with union employers - both general contractors and subcontractors - and others. We have endeavored to segregate the [*78] evidence apparently relied on by plaintiffs.

Initially, plaintiffs note that the avowed purpose of the Council is to organize the construction industry and obtain adequate wages and working conditions. But this purpose is made lawful by the labor laws⁹² and itself cannot give rise to an inference of conspiracy with non-labor parties. The unions may achieve their goal by organizing non-union firms, pressuring non-union firms to meet area wages, or forcing them out of the market. Plaintiffs argue that the unions here chose to try to force non-union firms from the market⁹³ by picketing general contractors to obtain the subcontracting agreements restricting subcontracting to union firms. But there is no evidence in the record to suggest that the unions in seeking the subcontractor agreements tried to protect a select group of union contractors and deny non-union firms the option of becoming union or paying union scale wages. The evidence suggests the opposite; the unions' sole purpose was to organize as many contractors as possible to standardize wages and working conditions in the industry. The unions pursuit of subcontracting clauses to secure only union employment might benefit [*79] all union employers by stabilizing wage rates, but it is not probative evidence of a conspiracy with them as a matter of law under the prior precedent of the Court. See Bernhardt, The Allen Bradley Doctrine: An Accommodation of Conflicting Policies, 110 Pa. L. Rev. 1094, 1101-02 (1962).

In *United Mine Workers v. Pennington*, 381 U.S. 657 (1965), the Court reaffirming *Allen Bradley* stated that, "[o]ne group of employers may not conspire to eliminate competition in the industry and the union is liable with the employers if it becomes a party [*80] to that conspiracy." *Id. at 665-66*. But a union may pursue a policy unilaterally and implement it even though such a policy affects some employers adversely and benefits others. Such union conduct "is not alone sufficient evidence to maintain a union-employer conspiracy charge under the Sherman Act." *Id. at 665 n. 2*. Cf., *Jou- Jou Designs, supra, 643 F.2d at 910* (the implication that certain subcontractors would benefit from a hot cargo agreement is not an allegation that they conspired to achieve it); *Smitty Baker Coal, supra*.

⁹¹ See *Sunshine Books v. Temple University, supra, 697 F.2d at 96* and discussion of *Fed. R. Civ. P. 56(e)*, *supra*, at n. 16 and accompanying text.

⁹² Although the discussion of the permissible inferences from evidence was made in the context of appeal from a directed verdict, it is equally applicable to a motion for summary judgment. See *Zenith Radio, supra, 513 F.Supp. at 1171* ("Mere speculation", in the form of an inference which is not supported by logic, is not sufficient to withstand a motion for summary judgment.) (Footnote omitted).

⁹² See *Leslie*, Principles of Labor Antitrust, 66 Va. L. Rev. 1183, 1183-88 (1980).

⁹³ The antitrust implications of this type of conduct are obvious. Where the unions seek to limit the number of firms in the product market by creating barriers to entry, a predatory purpose to erect and enforce a cartel of particular firms in the product market may be inferred. In this manner the employer cartel could regulate prices and outputs, while the union policed the arrangement to protect the dominant position of the cartel. See *Leslie*, *supra* n.93, 1190-92. This was the effect of the arrangement condemned in *Allen Bradley*.

620 F.2d at 434 (union seeking to compel all non-member coal operators to conform to union wage scale at behest of employer group does not show concert of action); Iodice v. Calabrese, supra, 512 F.2d at 390 (union secondary boycott which forced firms not to deal with non-union employer is insufficient evidence of conspiracy); Webb v. Bladen, 480 F.2d 306, 308 (4th Cir. 1971) (union secondary boycott which forced firms not to deal with non-union subcontractors was insufficient evidence of conspiracy.) A jury may not infer a union-employer conspiracy from a union's pursuit of a uniform wage and/or employment policy which indirectly benefits [*81] an employer group since the identify of interests is merely coincidental and not necessarily the product of a conspiracy. Meat Cutters v. Jewel Tea Co., supra, 381 U.S. at 720 (Goldberg J., dissenting and concurring). To infer a conspiracy from this evidence would allow juries to become the arbiters of the social and economic desirability of union action in a particular case, which is nothing more than mere speculation. We therefore find this evidence alone lacking in probative value.

The secondary pressure tactics employed by the Council ⁹⁴ against various materialmen, financial institutions, and developers to force those business entities not to do business with Altemose or any other non-union contractor, do not support an inference of conspiracy with those entities. See American Fed. of Musicians v. Carroll, 391 U.S. 99, 105 n. 8 (restraint instituted by union conduct and acquiesced to by so-called employer group was not evidence of a conspiracy); Allen Bradley, supra, 325 U.S. at 809 (union pressure alone resulting in individual refusals of all employers to buy electrical equipment not made by the union-labor is not a Sherman Act violation); Hunt v. Crumboch, supra, [*821] 325 U.S. at 822-23 (union refusal to negotiate with employer causing third party to cancel existing contract did not create a conspiracy). As the Court of Appeals recently stated, this theory "suggests that the victim who hands over his wallet to an armed robber thereby becomes a coconspirator in the armed robbery. Absent extrinsic agreement, there is no concert of action with a non-labor party . . ." C & K Coal Co., supra, 704 F.2d at 699. It would be at best "mere speculation", as well as contradictory to the intent of labor's statutory exemption, if a jury were permitted to draw an inference of conspiracy from the favorable results of union secondary tactics. See Mid-City Regional Bargaining Assn. v. Will County Carpenters District Council, 675 F.2d. 881, 886-87 (7th Cir.), cert. denied, 103 S.Ct. 132 (1982).

[*83] There is evidence of a predominantly unionized construction market. The Council is shown to have executed over eight hundred fifty (850) contracts with general contractors. The unions have collective bargaining agreements with more than four thousand (4,000) subcontractors. This active union organizational effort has resulted in approximately 90% of the construction market being unionized. The Council distributes a list of so-called "fair," i.e., union sub contractors, to general contractors with whom it executes a subcontracting agreement. This list is provided so that the general contractors will know who the union subcontractors are. There is no evidence that union-employers prompted or encouraged the distribution of the "fair" list.
