Opinion

[*181] MEMORANDUM*

Appellant Dr. Jeremy Conklin alleges that Appellee-Defendants conspired to exclude him from a pediatric cardiothoracic surgery fellowship because he is an osteopathic, rather than allopathic, physician. Conklin brought federal and state ***antitrust law*** claims, along with a claim under **[**2]** Revised Code of Washington ("RCW") *§ 70.41.235*, which bars hospitals from discriminating against osteopathic physicians. The district court dismissed Conklin's complaint, holding that he failed to allege antitrust injury and did not have a cause of action under *RCW § 70.41.235*. We review dismissal of Conklin's complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)* de novo. *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1046 (9th Cir. 2008)*. We affirm.

We begin with Conklin's federal and state antitrust claims. We express no opinion whether the district court correctly dismissed for failure to adequately plead antitrust injury. But we affirm the dismissal on the alternative ground that Conklin has not plausibly alleged an overlapping element of his antitrust claims: harm to competition. *See Syed v. M-I, LLC, 853 F.3d 492, 506 (9th Cir. 2017)* (allowing a court to affirm a motion to dismiss "on any basis fairly supported by the record"). Conklin concedes in his complaint that at least one osteopathic physician has obtained certification and may perform pediatric cardiothoracic surgery. Additionally, Conklin acknowledges in his complaint that someone else was chosen to fill the pediatric cardiothoracic surgery fellowship that he lost out on. Thus, there has been no increase in price or decrease in the quality of care for patients seeking pediatric cardiothoracic **[**3]** surgery. Moreover, even if the agreement to grant these fellowships only to persons who satisfy the ACGME certification requirement discriminates against doctors of osteopathy and thus lessens consumer choice between such osteopathic doctors and medical doctors in the market for pediatric thoracic surgery, the complaint does not allege any resulting difference in thoracic surgery services, quality, or availability, so this reduced choice does not give rise to an injury to competition. *See Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1202 (9th Cir. 2012)* ("[A]llegations that an agreement has the effect of reducing consumers' choices or increasing prices to consumers does not sufficiently allege an injury to competition."). Accordingly, Conklin has failed to plausibly allege harm to competition. *See Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 736 (9th Cir. 1987)* (affirming dismissal of *Sherman Act Section 1* claim for failure to plead harm to competition); *cf. Bhan v. NME Hosps., Inc., 929 F.2d 1404, 1414 (9th Cir. 1991)* (affirming grant of summary judgment where a hospital's policy, which favored physician over non-physician anesthetists, did not harm competition).

We also affirm the dismissal of Conklin's *RCW § 70.41.235* claim. Notwithstanding Conklin's correspondence with the Washington **[*182]** Department of Health, enforcement of the statute is expressly vested in the Washington Department of Health. **[**4]** *RCW § 70.41.010*. We will not read a cause of action into the statute where the Washington legislature did not provide one. *State ex rel. Evergreen Freedom Found. v. Wash. Educ. Ass'n, 140 Wn.2d 615, 999 P.2d 602, 611 (Wash. 2000)* (en banc) ("When words in a statute are plain and unambiguous, this Court is required to assume the Legislature meant what it said and apply the statute as written.").

AFFIRMED.

End of Document

* This disposition is not appropriate for publication and is not precedent except as provided by *Ninth Circuit Rule 36-3*.

Opinion

ORDER

Plaintiffs claim **[*2]** Defendants filed sham litigation against them to maintain their monopoly in the casino automatic card shuffler market, in violation of *§ 2* of the Sherman Act. *See* [32]. Defendants moved to dismiss, arguing that Plaintiffs filed their claim too late and lack standing to bring an antitrust claim. *See* [35]. For the reasons explained below, the Court denies Defendants' motion [35].

Subject to further developments regarding the COVID-19 crisis and Amended General Order 20-0012, this case is tentatively set for a status hearing on April 14, 2020 at 9:45 a.m. in Courtroom 1203. The parties may appear by telephone by contacting this Court's Courtroom Deputy 72-hours prior to the hearing and should be prepared at the hearing to set all remaining case management dates, including a trial date.

STATEMENT[1]

Plaintiff Taiwan Fulgent Enterprise Co. Ltd. (TF) has been producing innovative automated products for the gaming industry for over 30 years. [32], ¶ 7. TF holds numerous patents (or pending patent applications) and manufactures the A Plus series automatic card shufflers, which produce reliably random shuffles, thereby ensuring fairness and increasing game speed, profitability, and security. *Id.* at **[*3]** ¶ 9. The A Plus shuffler can handle up to eight decks of cards at once (whether plastic, paper, plastic coated, or embossed) and can be used for virtually every card game on the casino floor, from public domain games such as blackjack and baccarat, to popular proprietary games such as Texas Hold 'Em, Caribbean Stud, Three Card Poker, Three Card Baccarat, and Pai Gow Poker. *Id.* at ¶ 8. TF's A Plus shufflers are distributed exclusively by TCS John Huxley America, Inc., TCS John Huxley Europe Limited, and TCS John Huxley Asia Limited (together, the TCS Plaintiffs). *Id.* at ¶ 9.

Defendants Scientific Games Corporation (SGC), Bally Technologies, Inc., and Bally Gaming, Inc. sell fully automated card shufflers under the Shuffle Master and Bally names and have established a monopoly in the casino market.[2] *Id.* at ¶¶ 9, 16-18. Plaintiffs allege that their A Plus shufflers are less expensive and more reliable than those offered by Defendants, and, as a result, constitute a substantial threat to Defendants' monopoly and business interests. *Id.* at ¶ 9. Defendants responded to this threat by initiating sham litigation against TF and the TCS Plaintiffs. *Id.*

Plaintiffs sued SGC and the Bally entities **[*4]** on March 15, 2019, alleging that these Defendants monopolized the U.S. market for automatic card shufflers in regulated casinos, in violation of *§ 2* of the Sherman Act. *See* [1]. Thereafter, Plaintiffs filed an amended complaint, [9], and then a second amended complaint, [32]. The latter, which is the operative complaint, alleges that Defendants filed sham litigation against Plaintiffs and other competitors, alleging infringement of fraudulently procured patents, to drive out competition and monopolize the U.S. and world markets for automatic card shufflers designed for casino use. *Id.* at ¶ 1. Plaintiffs allege that entry into the casino shuffling machine market is extremely expensive, time consuming, and risky because of regulation, standards, and testing mandates. *Id.* at ¶ 27. According to Plaintiffs, Defendants have achieved a 100% market share in the relevant U.S. market, not because they invented a superior product, but because they purposefully abused the patent system and judicial process: they procured patents by fraud and then asserted those patents in lawsuits designed to drive competitors out of the market. *Id.* at ¶ 28. Among other sham lawsuits, Defendants sued John Huxley **[*5]** Casino Equipment Ltd. and John Huxley USA, Inc. in 2002; TF in 2009; and TCS Africa and TCS America in 2012. *Id.* at ¶ 30.

Plaintiffs allege that, in November 2009, Defendants' predecessor, SHFL, sued TF, alleging infringement of patents SHFL knew were invalid and unenforceable. *Id.* at ¶ 33. Rather than incur millions of dollars in legal fees to defend the case, TF agreed to refrain from selling the A Plus shuffler or any similar shuffler in the U.S. for three years, and the parties settled the matter in 2010. *Id.* at ¶ 34. As a result, TF was unable to negotiate a worldwide distribution agreement, and, when TF negotiated its international distribution agreement with TCS Asia in June 2010, it had to exclude the United States until April 2013. *Id.* at ¶ 35. Because it was afraid of being sued, TF also excluded the United Kingdom, Austria, Southern Africa, and South Korea, though it added Southern Africa in the licensed sales territory on August 1, 2011. *Id.*

---

[1] This Court draws the facts (accepted as true for purposes of the present motion) from Plaintiffs' second amended complaint [32].

[2] Plaintiffs allege that Bally acquired SHFL Entertainment, Inc. on November 25, 2013, and SGC acquired Bally on November 21, 2014. Thereafter, SGC and Bally began using "Shuffle Master" or "SHFL" as trade names and selling or leasing card shufflers based upon the patents at issue in this case under the Shuffle Master or SHFL names. [32] at ¶ 17.

Plaintiffs allege that Defendants also sued TCS America on September 14, 2012 to keep TCS from showing the A Plus shuffler at the 2012 G2E show in Las Vegas. *Id.* at ¶ 37. And, shortly thereafter, on October 12, 2012, Defendants sued another **[*6]** shuffler manufacturer, DigiDeal, alleging that DigiDeal's DigiShuffle infringed Defendants' patents. *Id.* at ¶¶ 41, 43. On April 28, 2015, while the patent infringement remained pending, DigiDeal sued SGC and Bally, alleging that Defendants violated *§ 2* of the Sherman Act, *see Shuffle Tech, et al. v. Scientific Games Corp.*, No. 15 C 3702 (N.D. Ill.). DigiDeal and Defendants ultimately settled that case, but not before a jury found for DigiDeal and ordered Defendants to pay $315 million in damages. *See id.* at [288].

Plaintiffs allege that TF has been attempting to enter the U.S. market with its A Plus shuffler since at least 2009 and has made substantial preparations to do so. [32] at ¶ 46. They further allege that the TCS Plaintiffs have been attempting to enter the U.S. shuffler market with TF's A Plus shuffler since at least 2010. *Id.* Plaintiffs allege that their plans to enter the market were thwarted by Defendants' anticompetitive conduct — specifically, their initiation of sham litigation to drive competitors out of the market. *Id.* Plaintiffs allege that, as a result of Defendants' anticompetitive activities, they have been damaged in their business and property by being excluded from **[*7]** the U.S. market for automatic card shufflers. *Id.* at ¶ 168. Plaintiffs allege that, because of Defendants' conduct, they have lost shuffler sales and profits on the A Plus, as well as lost sales and profits on other products Plaintiffs would have sold had they been allowed to sell their A Plus shuffler in the United States and elsewhere. *Id.* at ¶ 47. Plaintiffs allege that their lost profits exceed $100 million to date. *Id.*

Defendants moved to dismiss Plaintiffs' complaint under *Fed. R. Civ. P. 12(b)(6)*, arguing that Plaintiffs' claim is barred by both the Sherman Act's four-year statute of limitations and the release TF executed as part of a 2010 settlement agreement. Defendants also argue that the TCS Plaintiffs lack standing to bring an antitrust claim. *See* [35]. The Court considers each argument below.

A. Legal Standard

A motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* "challenges the sufficiency of the complaint for failure to state a claim upon which relief may be granted"; such motions do not generally reach questions of fact. *Gen. Elec. Capital Corp. v. Lease Resolution Corp., 128 F.3d 1074, 1080 (7th Cir. 1997)*; *Int'l Mktg., Ltd. v. Archer-Daniels-Midland Co., Inc., 192 F.3d 724, 729-30 (7th Cir. 1999)*. To survive a motion to dismiss, a complaint must provide a "short and plain statement of the claim showing that the pleader is entitled to relief," *Fed. R. Civ. P. 8(a)(2)*, giving the defendant "fair notice" of the claim **[*8]** "and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A complaint must allege "sufficient factual matter" to "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). A claim has facial plausibility "when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556*). In evaluating a complaint, this Court draws all reasonable inferences in the plaintiff's favor and accepts all well-pleaded allegations as true. *Id.* The Court need not, however, accept legal conclusions or conclusory allegations. *McCauley v. City of Chicago, 671 F.3d 611, 616 (7th Cir. 2011)*.

B. Timeliness

Defendants first argue that Plaintiffs' claim must be dismissed as time barred. A defendant may appropriately raise timeliness in a *Rule 12(b)(6)* motion if "the allegations of the complaint itself set forth everything necessary to satisfy the affirmative defense." *United States v. Lewis, 411 F.3d 838, 842 (7th Cir. 2005)*.

Plaintiffs' antitrust claim is subject to a four-year statute of limitations. *15 U.S.C. § 15b*; *see also* *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* (The basic rule is that damages are recoverable under the federal antitrust acts only if suit therefor is "commenced" within four years after the cause of action accrued) (quoting *15 U.S.C. § 15b*). Generally, an antitrust cause of action "accrues" — and the statute of limitations **[*9]** begins to run — "when a defendant commits an act that injures a plaintiff's business." *In re Copper Antitrust Litig., 436 F.3d 782, 789 (7th Cir. 2006)*. As in other areas of the law, however, absent "a contrary directive from Congress this rule is qualified by the discovery rule, which postpones the beginning of the limitations period from the date when the plaintiff is wronged to the date when he discovers he has been injured." *Cada v. Baxter Healthcare Corp., 920 F.2d 446, 450 (7th Cir. 1990)*. Accrual occurs under the discovery rule "when the plaintiff discovers that 'he has been injured and who caused the injury.'" *In re Copper Antitrust Litig., 436 F.3d at 789* (quoting *Barry Aviation, Inc. v. Land O'Lakes Mun. Airport Comm'n, 377 F.3d 682, 688 (7th Cir. 2004))*.

Plaintiffs allege that Defendants filed a series of sham patent infringement lawsuits, even though they knew their patents were invalid and unenforceable, and that they abused the patent and judicial systems to wrongfully maintain their monopoly in the casino automatic card shuffler market. More specifically, Plaintiffs allege that SHFL filed sham patent infringement lawsuits including, but not limited to: a November 17, 2009 lawsuit against TF; a September 14, 2012 lawsuit against TCS America; and an October 10, 2012 lawsuit against DigiDeal Corporation. [32] at ¶¶ 104, 120, 107, 139, 141.

Plaintiffs filed this lawsuit on March 15, 2019. Thus, none of the "sham" cases were filed within **[*10]** the 4-year statute of limitations look back period. *See id.* at ¶ 30. But Plaintiffs allege that they did not discover their injury — i.e., they did not realize the lawsuits were "shams" and their cause of action did not accrue — until at least April of 2015, and possibly as late as March 8, 2019.

Indeed, Plaintiffs allege that, about a year into the SHFL/DigiDeal patent infringement litigation (ostensibly in 2013), DigiDeal and its business partner Shuffle Tech "began to realize that SHFL was improperly withholding critical prior art relating to another shuffler, the Luciano shuffler. *Id.* at ¶ 141. During the DigiDeal litigation, Shuffle Tech's CEO, Richard Schultz, conducted an in-depth investigation into the history of SHFL's patents and the prior art and discovered that the disks SHFL filed in certain patent applications had been mislabeled; Schultz ordered the disks from the PTO and, in late 2014, after reviewing the disks, realized SHFL had been hiding prior art from the PTO, and therefore, had been engaging in sham litigation against its competitors for years. *Id.* at ¶¶ 142-43. Armed with this new information, DigiDeal filed an antitrust complaint against SHFL on April 28, 2015. **[*11]** *Id.* at ¶ 143. Judgment entered in that case on August 7, 2018 and the case thereafter settled on December 24, 2018. *Id.* at ¶ 143.

The Plaintiffs allege that the DigiDeal verdict and subsequent settlement "caught the attention of TCS John Huxley and resulted in TCS reaching out to DigiDeal's counsel to ask whether TCS may have suffered a similar kind of antitrust injury based on the infringement cases SHFL had filed against TF and TCS." *Id.* at ¶ 144. Plaintiffs spoke to DigiDeal's attorneys (Nixon & Vanderhye P.C. in Arlington, Virginia) on January 29, 2019, February 22, 2019, and March 8, 2019; and they allege that they learned for the first time on March 8, 2019 that the 2009 and 2012 lawsuits against TF and TCS were based on patents Defendants knew had been fraudulently procured and were invalid and unenforceable. *Id.* at ¶ 119. Thus, Plaintiffs allege, they "did not discover" their antitrust injury, i.e., the facts establishing that Defendants' 2009 and 2012 lawsuits against TF and TCS were sham litigations intended to unlawfully exclude Plaintiffs from the relevant market or that those litigations were based on patents known by Defendants to have been fraudulently procured, until **[*12]** March 8, 2019, when their representatives first met with counsel at N&V. *Id.* Prior to that meeting, Plaintiffs contend, TF and TCS were unaware that they had suffered any antitrust injury. Plaintiffs filed this lawsuit a week later, on March 15, 2019. *Id.* at ¶ 144.

On the record before it, the Court finds that dismissal under *Rule 12(b)(6)* based upon the applicable statute of limitations is improper. As a factual matter, the Court cannot say Plaintiffs' antitrust claim necessarily falls outside the limitations period.

In support of their motion, Defendants rely on *Pace Industries, Incorporated v. Three Phoenix Company, 813 F.2d 234 (9th Cir. 1987)*. *See* [36] at 4, 6. Though not binding, *Pace* is instructive. There, two companies (Pace and Wabash) entered into a contract that included a restrictive covenant precluding Pace from competing with a third party (Three Phoenix) in the manufacture and sale of a product (single disc testing equipment). *813 F.2d at 235-36*. Despite the restrictive covenant, Pace prepared to market the covered product, and Three Phoenix sued to enforce the contract. *Id. at 236*. When Three Phoenix filed that initial lawsuit, Pace moved to dismiss the complaint, arguing that the asserted contractual provision violated the antitrust laws. *Id.* Pace won its motion in the trial court, lost on **[*13]** appeal, and then won in the Arizona Supreme Court, which ruled that the asserted contractual provision (the restrictive covenant) constituted a per se violation of the Sherman Act. *Id.* Four months after the Arizona

Supreme Court ruled — and 5 years after Three Phoenix filed the original suit to enforce the restrictive covenant — Pace sued for treble damages under *15 U.S.C. § 15*, alleging that the restrictive covenant violated the Sherman Act. *Id.* Three Phoenix moved for summary judgment based upon the expired statute of limitations, and the trial court agreed that the case was time barred. *Id. at 236*. The Ninth Circuit affirmed, holding that "where the alleged antitrust violation is the attempted enforcement of an illegal contract through judicial process, the initiation of judicial proceedings is the last overt act for purposes of the statute of limitations." *Id. at 237*.

Here, Defendants argue that, consistent with *Pace*, the statute of limitations on TF's antitrust claim began to run when Defendants (really their predecessor SHFL) sued TF in 2009; similarly, the statute of limitations began to run on the TCS Plaintiffs' claim when SHFL sued TCS America in 2012. As a result, Defendants argue, the Plaintiffs' claim is **[*14]** barred.

But this case is not *Pace*. That case involved an underlying lawsuit to enforce a contract that necessarily and obviously violated the antitrust laws on its face. Here, Defendants sued Plaintiffs for patent infringement, and asserting patent rights — though anticompetitive — does not by itself constitute an antitrust violation causing antitrust injury. Rather, the assertion of patent rights implicates the antitrust laws only if the patent holder knows the patent is invalid or otherwise unenforceable and nonetheless uses it to gain or maintain a monopoly. *E.g., C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1371 (Fed. Cir. 1998)* ("to violate the ***antitrust law*** there must be an *improper* use of the patent right, 'coupled with violations of *§ 2*.'") (emphasis added) (quoting *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177-78, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965))*. Although *Pace* instructs that the antitrust injury stemming from a *Walker Process* claim occurs when the lawsuit is filed (and that no further antitrust injury occurs after the fact), that can be true only if the alleged infringer knows (or has reason to know) the asserted patents were procured by fraud or otherwise invalid and unenforceable — that is, only if, with due diligence, the alleged infringer knew or should have known that the claim was not just a patent **[*15]** infringement claim, but also a *Walker Process* claim.[3]

Despite Defendants' argument, the law does not mandate the absurd result in which Plaintiffs' injury occurred before they even knew their adversary had violated the antitrust laws; and thus this Court rejects Defendants' assertion that Plaintiffs' claim necessarily accrued when SHFL filed the underlying patent infringement lawsuits in 2009 and 2012. To hold otherwise would gut the discovery rule.

So when did Plaintiffs' claim accrue? On the record before it, the Court cannot make definitive findings on the issue. Although Plaintiffs contend that their cause of action accrued on March 8, 2019, their complaint includes allegations suggesting that they may have known something was amiss long before this date. For example, Plaintiffs allege that, in 2009, after reviewing SHFL's complaint, TF's counsel advised SHFL's counsel (on December 12, 2009), that he believed SHFL had failed to conduct a proper pre-filing investigation to confirm that the infringement allegations were valid. [32] at ¶ 120. Although SHFL responded that, in its view, its pre-filing investigation satisfied *Rule 11*, *id.* at ¶ 121, the fact remains that, as early **[*16]** as December 2009, TF may have had a factual and legal basis to conclude that the asserted patents were invalid and unenforceable, and thus TF knew or should have known that the infringement suit was groundless. The complaint, however, fails to explain the basis for counsel's assertion that SHFL failed to conduct a proper pre-filing investigation. Did counsel have reason to know when he challenged the complaint that the patents were procured by fraud or that the patents were invalid as anticipated by prior art, which SHFL had withheld? If so, Plaintiffs' cause of action may have accrued by that date. If, on the other hand, counsel's

---

[3] *See* *Brunswick Corp. v. Riegel Textile Corp., 752 F.2d 261, 264-66 (7th Cir. 1984)* ("Getting a patent by means of a fraud on the Patent Office can, but does not always, violate *section 2* of the Sherman Act. A patent entitles the patentee to prevent others from making or selling the patented product..., and he may be able to use this legal right to restrict competition. But 'may' is not 'does'; and for a patent fraud actually to create or threaten to create monopoly power, and hence violate *section 2*, three conditions must be satisfied besides proof that the defendant obtained a patent by fraud"— "the patent must dominate a real market"; "the invention sought to be patented must not be patentable"; and "the patent must have some colorable validity, conferred for example by the patentee's efforts to enforce it by bringing patent-infringement suits. Indeed, some formulations of the antitrust offense of patent fraud make it seem that the offense is not the fraudulent procuring of a patent in circumstances that create monopoly power but the bringing of ***groundless*** suits for patent infringement.") (emphasis added).

assertion stemmed from simple adversarial posturing, which would only seem prescient in hindsight, it may not have triggered the running of the statute of limitations.

TF's initiation of reexamination proceedings on the asserted '751 patent may also be significant to the timeliness analysis. For example, if TF initiated reexamination because it knew or had reason to know at that time that the patentee had fraudulently withheld prior art, its discovery rule arguments would fail. But the complaint's allegations do not explain why TF requested reexamination. As such, they **[*17]** allegations do not definitively show that Plaintiffs' claim had expired when they filed this case on March 15, 2019.

Having said that, the current record also undermines Plaintiffs' claim that its cause of action accrued on March 8, 2019. Given DigiDeal's antitrust lawsuit, in the exercise of due diligence, Plaintiffs should have been wondering about their antitrust injury long before they had a post-verdict conversation with DigiDeal's lawyers. Plaintiff's assertion of a March 8, 2019 accrual date appears to be as unreasonable as Defendants' assertion that the cause of action necessarily accrued when SHFL filed the underlying patent infringement lawsuits. For present purposes, the Court finds that it cannot say that Plaintiffs' claim definitively accrued before March 15, 2015. Accordingly, this Court will not to dismiss Plaintiffs' complaint as untimely.

C. The Effect of the 2010 Release

As noted above, Defendants' predecessor, SHFL, sued TF for patent infringement in 2009. The parties quickly settled, executing a settlement agreement in February 2010. *See* [32] at ¶ 105. The settlement agreement included a release, which Defendants say precludes the current claim. The release provides: **[*18]**

> Except for each party's undertakings and obligations under this Agreement, each party hereby generally releases the other for all claims, liabilities and damages of any kind that either has or may have against the other, as of the date of this Agreement, whether known or unknown, asserted or unasserted, or accrued or unaccrued.

[36-1] at 2, 4.[4] Although the release, by its plain language, broadly covers unknown and unaccrued claims, it nonetheless releases only claims TF *had* as of February 22, 2010. And it is not clear on the current record that TF had an antitrust claim as of that date. Additionally, such a broadly worded release is valid only if it is knowing and voluntary, *see* *Wagner v. NutraSweet Co., 95 F.3d 527, 533 (7th Cir. 1996)*, and, taking Plaintiffs' allegations as true, this release was neither. *See* [32] at ¶¶ 105, 150. Thus, dismissal on this basis is not appropriate.

D. Antitrust Standing

Finally, Defendants argue that, because they are neither consumers nor competitors in the relevant market, the TCS Plaintiffs lack standing to assert an antitrust action against Defendants.[5] Defendants made this same argument before Judge Kennelly in *Shuffle Tech Int'l v. Scientific Games Corp., No. 15 C 3702, 2015 WL 5934834, at *8-12 (N.D. Ill Oct. 12, 2015)*. Judge Kennelly rejected the argument, and this Court does as well.

To have standing, an **[*19]** antitrust plaintiff must show "antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487-88, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (cited in *Shuffle Tech, 2015 WL 5934834, at *9)*. *See also* *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395-96 (7th Cir. 1993)* (To sue under the antitrust laws, a plaintiff must show both "antitrust injury and standing"; the

---

[4] This Court may consider the release because it is part of the settlement agreement referenced in Plaintiffs' complaint. *See* *Hecker v. Deere & Co., 556 F.3d 575, 582-83 (7th Cir. 2009)*(A court normally may not consider extrinsic evidence without converting a motion to dismiss into one for summary judgment; but where a document is referenced in the complaint and central to plaintiff's claims, the court may consider it in ruling on the motion to dismiss.).

[5] Antitrust standing, unlike Article III standing, is not a jurisdictional requirement; rather, antitrust standing asks which plaintiffs may bring the cause of action. *See* *McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1063 (7th Cir. 2019)* (noting the distinction—and potential for confusion—between the two).

former involves a causation requirement in order to define the class of potential plaintiffs eligible to bring suit—those 'injured ... by anything forbidden in the antitrust laws"; the latter examines the connection between the asserted wrongdoing and the claimed injury to limit the class of potential plaintiffs to those who are in the best position to vindicate the antitrust infraction."). "Antitrust standing . . . is primarily a matter of legal policy" and ultimately "involves a case-by-case analysis of 'the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them.' " *Greater Rockford Energy & Tech. Corp., 998 F.2d at 396* (quoting *Associated General Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*.

Based upon the allegations of the complaint, assumed true for present purposes, Plaintiffs here, like Plaintiffs in *Shuffle Tech*, allege that Defendants' fraud on the USPTO and subsequent patent enforcement actions constituted acts **[*20]** of monopolization intended to prevent them from participating in the casino shuffler market. That is enough to confer standing, not only on the inventor or the targeted invention, but on the licensed manufacturers as well. *See id.* at *10-11. Plaintiffs here, like Plaintiffs in *Shuffle Tech*, have alleged that they intended to enter the casino automatic shuffler market and were prepared to do so, but were snuffed out by Defendants' anticompetitive behavior. *Id.* at *12.

CONCLUSION

For the reasons explained above, the Court denies Defendants' motion to dismiss [35].

Opinion

MEMORANDUM OPINION AND ORDER

Plaintiffs, consisting of MSP Recovery Claims, Series LLC ("MRCS"), MAO-MSO Recovery, II, LLC, Series PMPI, and MSP Claims 1, LLC, filed an amended class action complaint against Defendants Mallinckrodt plc and Mallinckrodt ARD, Inc. (together, "Mallinckrodt"), as well as Express Scripts Holding Company, Express Scripts, Inc., Curascript, Inc., and United Biosource LLC (together, "the Express Scripts Entities"), alleging that Defendants have violated various federal and state antitrust statutes and consumer-protection laws by artificially inflating the price of the drug Acthar. Defendants have filed two motions to dismiss. For the reasons set forth below, those motions are granted.

Background[1]

The specialty drug Acthar is an adrenocorticoptropic hormone currently approved by the FDA for various uses, including the treatment of certain rare illnesses such as infantile spasms and nephrotic syndrome. First Am. Compl. ("FAC") ¶¶ 106-109, ECF No. 165.

Medicare Advantage plans ("MA Plans") are third-party payers that provide Medicare benefits to **[*5]** their beneficiaries. *Id.* ¶ 1. Plaintiffs allege the Defendants took actions to force these MA Plans to pay supra-competitive prices for Acthar. Certain of these MA Plans have assigned to Plaintiffs their rights to recover for the alleged overpayment. By way of example, MRSC asserts that it has obtained assignments from (1) SummaCare, Inc., (2) EmblemHealth Services Company, (3) ConnectiCare, Inc.,[2] (4) University Health Care MSO, Inc. ("UNHC"), and (5)

---

[1] The following facts are taken from Plaintiffs' amended complaint and are accepted as true at this stage. *See Tamayo v. Blagojevich, 526 F.3d 1074, 1081 (7th Cir. 2008)* (stating that, at the motion-to-dismiss stage, the court "accept[s] as true all well-pleaded facts alleged").

[2] The Defendants, noting that the EmblemHealth and ConnectiCare assignments took effect after Plaintiffs filed their original complaint (but before they filed their amended complaint), contend that those assignments "are insufficient to convey

Alianza Profesional de Cuidado Meidco ("APCM"), *id.* ¶¶ 16-20. MAO-MSO Recovery II claims that it has an assignment from Preferred Medical Plan, Inc. ("PMPI"), *id.* ¶¶ 65-67; and MSPA Claims 1 asserts an assignment from Professional Health Choice ("PHC"), *id.* ¶¶ 69-73. Between 2013 and 2017, the MA Plans that assigned their rights to Plaintiffs paid $125,550,620.09 for Acthar prescriptions on behalf of their beneficiaries. *Id.* ¶ 6.

Plaintiffs claim that the Defendants have engaged in certain monopolistic and anti-competitive behavior to artificially inflate the price of Acthar. *Id.* ¶ 7. Specifically, Plaintiffs assert that Mallinckrodt (formerly, Questcor Pharmaceuticals), which manufactures and sells Acthar, acquired the rights to Acthar's **[*6]** only viable alternative, Synacthen, and then chose to withhold it from the market in order to maintain its monopoly pricing. *Id.* ¶¶ 163-183. Mallinckrodt agreed to pay $100 million to the Federal Trade Commission to settle claims that it violated antitrust laws by purchasing the rights to Synacthen. *Id.* ¶ 179.

According to Plaintiffs, Mallinckrodt also entered into two exclusive agreements relating to Acthar distribution, one that made CuraScript the exclusive distributor of Acthar, and one that made United Biosource the exclusive operator of the "Acthar Support & Access Program," through which all Acthar prescriptions must be obtained, *id.* ¶¶ 131-33. Plaintiffs assert that these agreements effectively eliminated any incentive for Express Scripts Holding Company and Express Scripts, Inc. (collectively, "ESI")—one of the largest pharmacy benefit managers in the United States and an affiliate of CuraScript and United Biosource—to negotiate lower prices for Acthar on behalf of its clients. *Id.* ¶¶ 31, 153. Since 2001, Acthar's end-payer price has grown by 107,400%. *Id.* ¶ 146.

Based on this conduct, Plaintiffs allege that Mallinckrodt and the Express Scripts Entities violated multiple sections **[*7]** of the Sherman Act, *see* *15 U.S.C. §§ 1-3* (Counts I and II), various state antitrust laws (Count III), and various state consumer-protection laws (Count IV). FAC at 42-121. Plaintiffs seek injunctive relief as to their federal claims and damages and injunctive relief as to their state claims. *Id.* ¶¶ 203, 212, 220, 446.

Mallinckrodt and the Express Scripts Entities have each filed motions to dismiss Plaintiffs' amended complaint. *See* Mallinckrodt's Mot. to Dismiss, ECF No. 187; Mem. in Supp. of Mallinckrodt's Mot. to Dismiss, ECF No. 188; Express Scripts Entities' Mot. to Dismiss, ECF No. 190; Mem. in Supp. of Express Scripts Entities' Mot. to Dismiss, ECF No. 191.

Legal Standard

To survive a motion to dismiss pursuant to *Rule 12(b)(6)*, a complaint must "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. In this way, the complaint must put the defendants on "fair notice of what the . . . claim is and the grounds upon which it rests." *Twombly, 550 U.S. at 555* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*.

In addition, when considering motions to dismiss, the Court accepts "all well-pleaded factual allegations **[*8]** as true and view[s] them in the light most favorable to the plaintiff." *Lavalais v. Vill. of Melrose Park, 734 F.3d 629, 632 (7th Cir. 2013)*. At the same time, "allegations in the form of legal conclusions are insufficient to survive a *Rule 12(b)(6)* motion." *McReynolds v. Merrill Lynch & Co., Inc., 694 F.3d 873, 885 (7th Cir. 2012)* (citing *Iqbal, 556 U.S. at 678*).

Analysis

---

constitutional standing to Plaintiffs." Mem. in Supp. of Mallinckrodt's Mot. to Dismiss at 4, ECF No. 188; *see* Mem. in Supp. of Express Scripts Entities' Mot. to Dismiss at 13-14, ECF No. 191. But, for reasons discussed below, the Court is not persuaded that Plaintiffs' constitutional (or prudential) standing depends on the EmblemHealth and ConnectiCare assignments.

I. Prudential Standing

A. MSP Recovery Claims, Series LLC

As Mallinckrodt points out, several of the exemplar assignments were ultimately assigned to designated subseries of MRSC that are not named plaintiffs, as opposed to MRSC itself. *See, e.g.*, FAC ¶ 63 (explaining that all rights from the assignment with SummaCare were later assigned to "Series 16-11-509, a series of MSP Recovery Claims, Series LLC"); *see generally* *MSP Recovery Claims, Series LLC v. Farmers Ins. Exch., No. 2:17-cv-02522-CAS, 2018 U.S. Dist. LEXIS 221653, 2018 WL 5086623, at *13 (C.D. Cal. Aug. 13, 2018)* ("Under Delaware law, an LLC may establish one or more 'series of members, managers or [LLC] interests' which 'may have separate rights, powers or duties with respect to specified property or obligations of the [LLC] or profits and losses associated with specified property or obligations' as well as a 'separate business purpose or investment objective.'" (quoting *Del. Code Ann. tit. 6, § 18-215(a)*)).

But Mallinckrodt's argument that MRCS lacks standing to sue on behalf of its series is unpersuasive.[3] *See* Mem. in Supp. of Mallinckrodt's Mot. **[*9]** to Dismiss at 3-4. Delaware law "permit[s] an LLC to sue on behalf of its series if provided for in the operating agreement." *Farmers Ins. Exch., 2018 U.S. Dist. LEXIS 221653, 2018 WL 5086623, at *13*. And, in response to Mallinckrodt's motion to dismiss, MRSC has attached its operating agreement, which states that "the Company is authorized to pursue or assert any claim or suit capable of being asserted by any designated series arising from, or by virtue of an assignment to a designated series." ECF No. 197-1 at 1. "[T]he Court construes . . . [the] filing of . . . MSP Recovery Claims, Series LLC's operating agreement as a *Rule 15(d)* supplemental pleading and finds it sufficient to demonstrate plaintiff's standing to assert claims on behalf of its series assignees." *Farmers Ins. Exch., 2018 U.S. Dist. LEXIS 221653, 2018 WL 5086623, at *14*.

B. Standing to pursue injunctive relief.

The Court also rejects Defendants' argument that Plaintiffs have not plausibly alleged prudential standing to seek injunctive relief.[4] *Cf.* *Biomed Pharms., Inc. v. Oxford Health Plans (N.Y.), Inc., 775 F. Supp. 2d 730, 736 (S.D.N.Y. 2011)* (where assignment "limit[ed] Biomed's right to sue . . . to actions for money damages[,] . . . the assignment provision d[id] not grant Biomed the right to seek 'declatory and/or injunctive relief'").

It is true that the assignments appear to focus on claims for damages. *See, e.g.*, FAC Ex. D, PMPI Recovery **[*10]** Agreement at 2, ECF No. 165-4 (stating that "MSP Recovery's services *focus* on the analysis, identification and recovery of conditional payments that have already been made by [PMPI]." (emphasis added)); FAC Ex. M, APCM Assignment at 1, ECF No. 165-13 (stating in the preamble that "MSP Recovery desires to provide certain services to prosecute and recover *amounts owed* on the Assigned Claims." (emphasis added)).

But the Court is persuaded that language in the assignments is sufficiently broad to encompasses the injunctive relief Plaintiffs seek. For instance, the SummaCare assignment transfers "*all rights and claims* against . . . third

---

[3] Although Mallinckrodt frames this issue as one of Article III standing, Mem. in Supp. of Mallinckrodt's Mot. to Dismiss at 3-4, the Court deems it more properly a matter of prudential standing. *See* *G&S Holdings LLC v. Continental Cas. Co., 697 F.3d 534, 540 (7th Cir. 2012)* (stating that the "prudential limitations on the exercise of federal jurisdiction" include that, "in general, the plaintiffs must assert their own legal rights and interests, and cannot rest their claims to relief on the legal rights or interests of third parties").

[4] Defendants again present this issue as one of Article III standing, *see* Mem. in Supp. of. Mallinckrodt's Mot. to Dismiss at 5; Mem. in Supp. of Express Scripts Entities' Mot. to Dismiss at 11-13. But the question here is whether claims for injunctive relief were assigned to the Plaintiffs or instead retained by the assigners, a matter of prudential standing. *See* *RK Co. v. See, 622 F.3d 846, 851 (7th Cir. 2010)* ("[P]rudential limitations include concerns about a claim's rightful owner.").

parties . . . including claims under consumer protection statutes and laws." FAC Ex. A, SummaCare Recovery Agreement at 4, ECF No. 165-1 (emphasis added); *see also* PMPI Recovery Agreement at 3 (containing nearly identical language); FAC Ex. G, EmblemHealth Assignment Agreement at 2, ECF No. 165-7 (containing nearly identical language); FAC Ex. K, UNHC Recovery Agreement at 3, ECF No. 165-11 (containing similar language); FAC Ex. M, APCM Recovery Agreement at 2-3, ECF No. 165-13 (containing similar language).

Furthermore, the ConnectiCare assignment contains **[*11]** the same language, while also emphasizing that "[t]his Assignment includes *all of* Assignor's right, title and interest in and to the Assignor's any legal or *equitable* actions, rights, causes of action or lawsuits *of any nature whatsoever*, arising out of or in connection with [the Assignor's right to seek reimbursement and recover payments]." FAC Ex. I, ConnectiCare Assignment at 2, ECF No. 165-9 (emphases added).[5]

Furthermore, while Defendants contend that the scope of Plaintiffs' assignments are limited in time and, therefore, cannot include claims for prospective injunctive relief, Plaintiffs have plausibly alleged that their rights under the assignments are ongoing. *See, e.g.*, SummaCare Recovery Agreement at 6 (explaining that the assignment, which was effective as of May 12, 2017, "shall have an initial term of one . . . year" and "shall automatically renew for successive terms of one . . . year unless terminated as set forth below"); UNHC Recovery Agreement at 6 (containing similar language); APCM Recovery Agreement at 5 (containing similar language). This is enough at the pleading stage.

Accordingly, the Court is satisfied that Plaintiffs have "allege[d] sufficient factual matter, accepted as true, to nudge [their] claim **[*12]** that they are assignees of the rights at issue 'across the line from conceivable to plausible.'" *MSPA Claims 1, LLC v. Allstate Ins. Co., No. 17 C 1340, 2019 WL 4305519, at *2 (N.D. Ill. Sept. 11, 2019)* (quoting *Twombly, 550 U.S. at 570*).[6]

II. Antitrust Standing

Where Plaintiffs' claims flounder are on the shores of antitrust standing. "'Antitrust standing' refers to 'doctrines that have arisen to clarify the circumstances under which a particular [entity] may recover from an antitrust violator.'" *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 810 (N.D. Ill. 2017)* (quoting *Loeb Indust., Inc. v. Sumitomo Corp., 306 F.3d 469, 480 (7th Cir. 2002))*. "The two most prominent doctrines were set forth by the Supreme Court in *Illinois Brick Co. v. Illinois[, 431 U.S. 720, 737, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)]*, which held that indirect purchasers are prohibited from seeking damages under federal ***antitrust law***, and *Associated General Contractors of California, Inc. v. California State Council of Carpenters[, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)]*, which imposed a version of proximate causation on antitrust claims." *In re Broiler Chicken, 290 F. Supp. 3d at 810-11*.

Although states generally interpret their antitrust laws consistent with federal case law, the Supreme Court held in *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*, that state legislatures could "repeal" *Illinois Brick* and thus provide for damages under state ***antitrust law*** for indirect purchasers. *See In*

[5] As Defendants note, the PHC assignment Plaintiffs have attached to the amended complaint does not identify the claims that were assigned. Specifically, the agreement states that PHC "assign[s] and transfer[s] . . . the rights and causes of action set forth" in a specific exhibit, yet Plaintiffs have not provided the Court with that exhibit. FAC Ex. F, PHC Agreement at 1, ECF No. 165-6.

[6] Mallinckrodt's assertion that the exemplar assignments are limited to claims under the Medicare Secondary Payer Provision also is unavailing. *See* Mem. in Supp. of Mallinckrodt's Mot. to Dismiss at 5-8. To support this contention, Mallinckrodt cites a portion of the PMPI Assignment that in fact defeats its argument. *See id.* at 7 ("[A]ll claims that have been or can be identified by MSP Recovery as being recoverable by the Client pursuant to the Medicare Secondary Payer Act *or any other contractual, statutory, equitable or legal basis, whether state or federal*, . . . and/or as a result of payments made for or on behalf of a Medicaid beneficiary or as a result of any payment(s) made through any health plan, shall be deemed Assigned Claims." (emphasis added) (quoting PMPI Recovery Agreement at 2)).

re Broiler Chicken, 290 F. Supp. 3d at 811. Furthermore, in deciding whether to apply *Associated General Contractors* to state-law antitrust claims—as opposed to a different, and potentially more permissive proximate-cause test—courts look to whether the relevant **[*13]** states' highest courts have ruled on the issue. *See City of Rockford v. Mallinckrodt ARD, Inc., 360 F. Supp. 3d 730, 759 (N.D. Ill. 2019)*.

Here, despite its length, Plaintiffs' amended complaint lacks sufficient facts from which the Court can assess whether Plaintiffs meet the standard laid out in *Associated General Contractors* or "even the least stringent state's 'proximate cause' test." *Id. at 760*. As Plaintiffs acknowledge, five of the seven assigners purchased Acthar from entities that have no affiliation with Defendants, including Caremark, LLC; Walgreens Specialty Pharmacy, LLC; Procare Pharmacy, LLC; and OptumRx, Inc. *See* FAC ¶¶ 241, 265, 281, 568, 670; Resp. to Mots. to Dismiss at 12 n.16, ECF No. 197. And this is difficult to square with Plaintiffs' claim that "Defendants control 100% of the [Acthar] market in . . . price," and that they "own and operate the supply chain." Resp. to Mots. to Dismiss at 12 & n.16; *see, e.g.*, *Erie Ins. Co. v. Amazon.com, Inc., 925 F.3d 135, 144 (4th Cir. 2019)* (describing supply chains as including "manufacturers," "distributors," and "retailers."). Because it is not clear what role these intermediary entities are playing or how that role is consistent with Plaintiffs' theory of antitrust standing, the Court cannot determine whether Plaintiffs' have satisfied the proximate causation requirement under *Associated* ***[*14]*** *General Contractors* or some relevant lesser state standard. *See City of Rockford, 360 F. Supp. 3d at 753* ("Until [the Court] knows the contours of [intermediary] CVS' role in supplying Acthar to [plaintiff's] employee's spouse, the Court is not able to engage in a complete application of the *AGC* factors to [plaintiff].").

To be sure, two of Plaintiffs' assigners—EmblemHealth and ConnectiCare—purchased Acthar from Accredo Health Group Inc. ("Accredo"), which Plaintiffs contend is an "ESI-affiliated entity." Resp. to Mots. to Dismiss at 12 n.15. But the amended complaint only makes a few brief references to Accredo, which is not a Defendant in this action. FAC ¶¶ 27, 128, 132. This is not enough to plausibly establish that Accredo was a co-conspirator in the alleged conspiracy, and thus not enough to plausibly argue that EmblemHealth and ConnectiCare were entitled to sue the named Defendants for damages notwithstanding the applicability of *Illinois Brick*. *Cf. City of Rockford, 360 F. Supp. 3d at 748-751* (discussing the "co-conspirator" exception to *Illinois Brick*). And, even setting aside *Illinois Brick*, Plaintiffs must provide more information as to Accredo's role in supplying Acthar to EmblemHealth and ConnectiCare's beneficiaries, as well as Accredo's role vis-à-vis **[*15]** the named Defendants, before the Court can determine whether standing plausibly exists under *AGC* or any other proximate-cause test. As such, Plaintiffs' federal and state antitrust claims (Counts I, II, and III) are dismissed.

Finally, the Court concludes that Plaintiffs' state consumer-protection claims suffer from the same shortcomings. As in *City of Rockford*, "[t]he parties put forth no argument that [*Associated General Contractors*] is irrelevant to state-law consumer protection claims." *360 F. Supp. 3d at 759 n.18*; *see also In re Aluminum Warehousing Antitrust Litig., No. 13-md-2481 (KBF), 2014 WL 4277510, at *38 (S.D.N.Y. Aug. 29, 2014)* (dismissing indirect-purchaser plaintiffs' state consumer-protection claims because plaintiffs "failed to include any specific allegations of proximate cause," and "every state statute requires a direct or indirect allegation supporting proximate cause"). Thus, for purposes of this order, "the Court considers all of the state laws invoked by the [amended complaint] as state laws that implicate Plaintiffs' antitrust standing." *City of Rockford, 360 F. Supp. 3d at 759 n.18*. And because, as noted above, Plaintiffs have not pleaded sufficient facts to meet even the least stringent state's proximate-cause test, the Court dismisses Plaintiffs' consumer-protection claims (Count **[*16]** IV).

Finally, Defendants argue that the Court should not provide Plaintiffs with another opportunity to amend their complaints. But, discovery remains ongoing, and the Court finds that Defendants would suffer no undue prejudice if Plaintiffs are permitted to file a second amended complaint to address the deficiencies outlined here. Therefore, the Court grants Plaintiffs leave to file a second amended complaint. Any such complaint must be filed within 45 days of this order.[7]

---

[7] Because standing is a threshold issue and any amendment likely will impact the nature and scope of Plaintiffs' claims, the Court declines to address Defendants' arguments under *Rule 12(b)(6)* at this time.

Conclusion

For the foregoing reasons, Defendants' motions to dismiss are granted. Plaintiffs' amended complaint is dismissed without prejudice. Plaintiffs may file a second amended complaint within 45 days of this order.

CIVIL MINUTES — GENERAL

Proceedings: (IN CHAMBERS) ORDER RE PLAINTIFFS' MOTION TO DISMISS COUNTERCLAIMS (DKT. 36)

I. <u>Introduction</u>

Unicorn Global, Inc., Hangzhou Chic Intelligent Technology Co., Ltd., and Shenzhen Uni-Sun Electronic Co., Ltd. ("Plaintiffs") brought this action against Hillo America, Inc. ("Defendant") for infringement of two United States utility patents and two United States design patents. Dkt. 1 ¶ 2. The Complaint alleges that: "[t]he Asserted Patents are directed to electric balance vehicles commonly referred to as 'hoverboards.'" *Id.* ¶ 16.

Defendant filed an Answer and Counterclaims. Dkts. 32, 33. Counterclaims Nine through Twelve are for Declaratory Judgment of Unenforceability of the asserted patents. Dkt. 33 at 24-36. Counterclaim Thirteen is for Intentional Interference with Prospective Economic Relations (*id.* at 36-38), Counterclaim Fourteen is for Negligent Interference with Prospective Economic Relations (*id.* at 39-41), and Counterclaim Fifteen is for Antitrust and Unfair Competition (*id.* at 41-44).

Pursuant to *Fed. R. Civ. P. 12(b)(6)*, Plaintiffs moved to dismiss **[*2]** the counterclaims regarding the alleged inequitable conduct, tortious interference, and antitrust violations ("Motion" (Dkt. 36)). Dkt. 36.[1]

For the reasons stated in this Order, the Motion is **GRANTED** without prejudice, with any amended counterclaims to be filed within 14 days of the issuance of this Order, and in conformance with its limitations.

II. Factual Background

Plaintiffs allege that Defendant infringes U.S. Patent Nos. 9,376,155 ("the '155 Patent"), 9,452,802 ("the '802 Patent"), D737,723 ("the '723 Patent"), and D784,196 ("the '196 Patent") (collectively, "asserted patents"). Dkt. 1 ¶ 2. For each of the asserted patents, the Counterclaims allege that Jiawei Ying, who is Plaintiff Hangzhou Chic's Chair and General Manager as well as the named inventor on the asserted patents, engaged in inequitable conduct. *See, se.g.* Dkt. 33 at 8-12.[2] The Introduction section of the Counterclaims alleges three theories of inequitable conduct as to the '155 Patent:

1) "Mr. Ying failed to disclose . . . that another individual, Shane Chen, and Mr. Chen's company Inventist, Inc., had publicly disclosed a prototype of a hoverboard called 'Hovertrax' in the United States more than one year before the effective filing date of the '155 patent." *Id.* at 8. The Counterclaims further state: "the prototype **[*3]** appears to contain all of the claim limitations of claim 1 of the '155 patent." *Id.* at 9 (the "prototype non-disclosure theory").

2) The '155 Patent claims priority to a Chinese patent application that the Counterclaims refer to as "the CN '353 App." *Id.* at 8. The Counterclaims state, "Mr. Ying failed to disclose . . . that Mr. Ying and Hangzhou Chic had withdrawn and abandoned the CN '353 App . . . after the Chinese Patent Office rejected the claims of the CN '353 App as being obvious over prior art Chinese patent application nos. CN 203158157U and CN203381739U . . . . Although Mr. Ying disclosed CN 203158157U and CN203381739U to the USPTO, Mr. Ying intentionally withheld the Chinese Patent Office's claim rejections with the intent to deceive the USPTO." *Id.* at 9-10 (the "Chinese office action non-disclosure theory").

3) In an interview with Sino US Times, Mr. Ying "analogized his team members as pearls and himself as the string that holds the pearls together, essentially noting that his role [is] merely managerial . . . . The inventorship of the '155 Patent is inconsistent with his statement." *Id.* at 10. "Upon information and belief, Mr. Ying is not an inventor of the '155 patent and at least some of the real inventors were not named in the '155 patent. Mr. Ying, however, **[*4]** failed to disclose the improper inventorship to the USPTO during the prosecution of the '155 patent with the intent to deceive the USPTO." *Id.* at 10 (the "improper inventorship theory").

The Introduction of the Counterclaims, state as to the '723 Patent that it claims priority to a Chinese patent referred to as "the CN '556 App." *Id.* at 11. The Counterclaims allege that Mr. Ying and Shaojun Cao filed declarations

[1] The title of the Motion and its introduction imply that it is directed to all of the Counterclaims, *see e.g.* Dkt. 36 at 2 (Notice of Motion, stating "[t]he counterclaims should be dismissed"), but the memorandum in support of the Motion only addresses the counterclaims for inequitable conduct, tortious interference, and antitrust violations. *See id.* The Motion does not address Counterclaims One through Eight for noninfringement and invalidity of the asserted patents. Counterclaims Five through Eight, which allege invalidity, include allegations that the asserted patents are invalid for improper inventorship. *See, e.g.* Dkt. 33 ¶ 69 ("As yet another example, all claims of the '155 patent are invalid for improper inventorship."). However, the memorandum in support of the Motion only addresses Defendant's alleged improper inventorship in the context of the inequitable conduct claims. *See* Dkt. 36 at 15 (addressing "allegations of inequitable conduct based on inventorship"). Nor does the memorandum in support of the Motion address the Answer, including its Fourth Affirmative Defense of inequitable conduct as to each of the four asserted patents. *See* Dkt. 32 at 11-16. Because the Answer and Counterclaims One through Eight are not addressed by the Motion, they are not discussed in this Order.

[2] Citations are to page numbers in the pleadings rather than paragraph numbers because not all paragraphs are numbered.

during prosecution of the '723 Patent stating "that each is 'an original joint inventor of a claimed invention in the application.'" *Id.* The Counterclaims also allege that, "Mr. Ying failed to disclose that he was listed as the sole inventor on the CN '556 App . . . . Mr. Ying's and Mr. Cao's declarations are contradicted by the listed inventorship on the CN '556 App, which describes the same invention." *Id.* The Counterclaims then allege, "[t]he same improper inventorship issues also happened to the '802 and '196 Patents." *Id.*

Counterclaims Nine and Ten allege the unenforceability of the '155 and '802 Patents. Each counterclaim includes the same verbatim statements that are included in the Introduction of the Counterclaims for the '155 Patent. *See id.* at 24-31. Counterclaim Eleven for unenforceability of the '723 Patent includes the same verbatim statements that are in the Introduction of **[*5]** the Counterclaims for the '723 Patent. *Id.* at 32-33. Counterclaim Twelve for unenforceability of the '196 Patent includes some of the same inventorship theory allegations that are in the Introduction of the Counterclaims for the '155 Patent. *Id.* at 34-36.

The Counterclaims also allege antitrust violations. In the Introduction section, it is alleged that Hangzhou Chic previously permitted Defendant "to use the special authorization and/or permission stickers of Hangzhou Chic covering any of its industrial designs and technologies . . . from or about 2015 to present." *Id.* at 5. The Counterclaims then allege:

> From [about 2015 to present] plaintiff/counterdefendant Hangzhou Chic has been the controlling monopoly power of approximately 90% of the total market share in the *Amazon.com* online 6.5" Hoverboard electric self-balancing scooter market . . . . In order to illegally control and keep the monopoly power and further manipulate the predatory pricing scheme in the Relevant Market . . . . , plaintiffs/counterdefendants started by demanding that [Defendant] grant[ ] plaintiffs immediate and continuous access to [Defendant's] computer system and [sales data] with pricing information, and then using the access to collect sales data and manipulate the pricing **[*6]** system in the Relevant Market. Upon defendant's rejection and refusal to collaborate, plaintiffs . . . pressed Amazon.com to *terminate defendant's listings* on hoverboard products . . . , and filed this retaliatory lawsuit . . . , suing defendant for *alleged patent infringement* so as to be able to perpetrate and carry on plaintiffs' illegal scheme . . . to stop and kill the competition in the Relevant Market, which already had an anticompetitive effect violating U.S. ***antitrust law***.
>
> All the "Asserted Patents" have been abused and misused by plaintiff Hangzhou Chic's *illegal exclusive dealing scheme* with anticompetitive effect.

Id. at 5-6 (emphasis in original); *see also id.* at 36-38 (substantially similar factual allegations in Counterclaim Thirteen), *id.* at 39-41 (substantially similar factual allegations in Counterclaim Fourteen), *id.* at 41-44 (substantially similar factual allegations in Counterclaim Fifteen). The Introduction and Counterclaims Thirteen through Fifteen each refers to § 2 of the Sherman Act. *Id.* at 7, 38, 40, 43.

III. Analysis

A. Legal Standards

1. Inequitable Conduct

Inequitable conduct is a defense to patent infringement. *Therasense, Inc. v. Becton, Dickinson & Co., 649 F.3d 1276, 1285 (Fed. Cir. 2011)* (en banc). An alleged infringer can seek to establish such inequitable conduct "by clear and **[*7]** convincing evidence that the patent applicant (1) misrepresented or omitted information material to patentability, and (2) did so with specific intent to mislead or deceive the PTO." *Ohio Willow Wood Co. v. Alps S., LLC, 735 F.3d 1333, 1344 (Fed. Cir. 2013)* (citations omitted). Intent and materiality must be separately established. *Therasense, 649 F.3d at 1290*. The standard for "the materiality required to establish inequitable conduct is but-for materiality." *Id. at 1291*. Thus, the undisclosed prior art is "but-for material if the PTO would not have allowed a claim had it been aware of [it]." *Id.*

Intent to deceive the USPTO can be shown by direct or circumstantial evidence. *Id. at 1290*. Under the clear and convincing evidence standard, the party alleging inequitable conduct must show that the specific intent to deceive is "the single most reasonable inference able to be drawn from the evidence." *Id.* Therefore, "when there are multiple reasonable inferences that may be drawn, intent to deceive cannot be found." *Id. at 1290-91*.

Inequitable conduct is a claim based in fraud that must be stated with particularity. *Fed. R. Civ. P. 9(b)*. "[I]n pleading inequitable conduct in patent cases, *Rule 9(b)* requires identification of the specific who, what, when, where, and how of the material misrepresentation or omission committed before the PTO." *Exergen Corp. v. Wal-Mart Stores, Inc., 575 F.3d 1312, 1327 (Fed. Cir. 2009)*. "A pleading **[*8]** that simply avers the substantive elements of inequitable conduct, without setting forth the particularized factual bases for the allegation, does not satisfy *Rule 9(b)*." *Id. at 1326-27*.

2. *Walker Process* Sherman Act Violations

In *Walker Process*, "the Supreme Court held that a plaintiff could bring an action under § 2 of the Sherman Act based on the alleged maintenance and enforcement of a fraudulently-obtained patent." *TransWeb, LLC v. 3M Innovative Properties Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)* (citing *Walker Process Equip. v. Food Mach. & Chem. Corp., 382 U.S. 172, 173-74, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965))*. To prevail on a *Walker Process* counterclaim, a party must show: "first, that the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced the patent with knowledge of the fraudulent procurement; and second, all the other elements necessary to establish a Sherman Act monopolization claim." *Id.* (citing *Ritz Camera & Image v. SanDisk Corp., 700 F.3d 503, 506 (Fed. Cir. 2012))*. "*Walker Process* liability requires a higher, more specific showing of 'knowing and willful fraud' than the more inclusive inequitable conduct doctrine." *Id. at 1307* (citing *Nobelpharma AB v. Implant Innovations, 141 F.3d 1059, 1069 (Fed. Cir. 1998)*; *Dippin' Dots, Inc. v. Mosey, 476 F.3d 1337, 1346-48 (Fed.Cir.2007))*.

If the first requirement is met, to establish a Sherman Act monopolization claim a plaintiff must then show "(1) that the [other party] has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous **[*9]** probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

B. Application

In support of the Motion, Plaintiffs argue that the inequitable conduct counterclaims fail to meet the heightened pleading standard of *Rule 9(b)*. *See, e.g.* Dkt. 44 at 1. In the alternative, they argue that, with respect to both the economic interference and antitrust counterclaims, they have immunity under federal patent law and the *Noerr-Pennington* doctrine. *Id.*

Defendant responds by presenting several declarations and exhibits. The opposition includes a 22-page section titled "Factual Background and Evidence." *See* Dkt. 42. This section includes 20 pages of verbatim block quotes from Defendant's attached declarations. Proffering evidence in response to a motion to dismiss is usually inappropriate:

> Generally, district courts may not consider material outside the pleadings when assessing the sufficiency of a complaint under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*. When "matters outside the pleading are presented to and not excluded by the court," the 12(b)(6) motion converts into a motion for summary judgment under *Rule 56*. *Fed. R. Civ. P. 12(d)*. Then, both parties must have the opportunity "to present all the material that is pertinent to the motion." *Id.*
>
> There are two exceptions to this rule: the incorporation-by-reference **[*10]** doctrine, and judicial notice under *Federal Rule of Evidence 201*.

Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018). Defendant has not demonstrated that the materials cited in the opposition to the Motion fit within either of the exceptions to the rule that limit the consideration of materials that are outside the pleadings. Therefore, the material that has been quoted in the opposition to the Motion is not considered in this Order.

Pages 24 and 25 of the opposition to the Motion repeats the following assertion six times:

> Defendant's counterclaim of [noninfringement, invalidity, unenforceability, intentional or negligent interference with prospective economic advantage, or ***antitrust law*** and unfair competition] has "give[n] plaintiffs a fair notice of what the claim is." [*See* cited paragraphs of Counterclaims]. The counterclaim pleading already gave "fair notice" of the claim being asserted and the "grounds upon which it rests." [*Bell Atlantic v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *Swierkiewicz v. Sorema N.A., 534 U.S. 506, 513, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002)*; *Oliver v. Ralphs Grocery Co., 654 F.3d 903, 908. (9th Cir. 2011)*.]

Dkt. 42 at 24-25.

As noted, *Rule 9(b)* applies to the inequitable conduct counterclaims. *Exergen, 575 F.3d at 1327*. Defendant does not address this pleading standard or why it is satisfied by the relevant Counterclaims. A review of the allegations in the inequitable conduct counterclaims shows that they lack particularity as required by *Rule 9(b)*.

As to the prototype non-disclosure **[*11]** theory, Plaintiff correctly contends that the Counterclaims do not allege facts sufficient to show, if established, that: the hoverboard prototype was but-for material; Mr. Ying had knowledge of the hoverboard prototype; or that Mr. Ying had intent to deceive the USPTO. Dkt. 44 at 1-3. There are some conclusory legal assertions as to the last issue, but they are insufficient. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice.").

The allegations about the Chinese office action non-disclosure are also insufficient. The allegations concede that Mr. Ying disclosed to the USPTO the underlying prior art that was cited in the Chinese office action. In light of that, the allegations do not have sufficient bases for the required but-for materiality or intent to deceive the USPTO with respect to the Chinese office action. Dkt. 44 at 3-4. Even if the allegations were established, there would be no basis to conclude that the Chinese office action is non-cumulative over the cited prior art itself.

With respect **[*12]** to the alleged, improper inventorship theory, as Plaintiffs observe, "[e]ven if [Defendant] could show a mistake in the identification of inventors . . . [Defendant] has not alleged facts supporting a reasonable inference that such a mistake was intentional or fraudulent." Dkt. 44 at 4.

Plaintiffs argue that the economic interference and antitrust counterclaims are also subject to the heightened pleading standards of *Rule 9(b)*. Thus, they contend that, "these claims are premised on allegations of inequitable conduct." Dkt. 44 at 5. Defendants' economic interference and antitrust counterclaims appear to be premised, at least in part, on the inequitable conduct allegations. Therefore, they include *Walker Process* claims. Consequently, they lack specificity for the same reasons identified as to the inequitable conduct counterclaims *TransWeb*, 812 F.3d at 1306.

The allegations in the Counterclaims could be interpreted as a claim of antitrust violations based on the contractual relationship between Defendant and Hangzhou Chic. However, the allegations are ambiguous as to whether Defendant is asserting such a separate antitrust violation and the legal basis within the recognized doctrines that apply under Section 2 of the Sherman Act. **[*13]** Moreover, the ambiguity in the allegations in the counterclaims as to the economic interference and antitrust violations confirms that they are not adequately stated.[3]

[3] Antitrust allegations that are not premised on *Walker Process* patent misuse are not subject to the heightened pleading requirements of *Rule 9(b)*. However, "the Supreme Court has cautioned against permitting antitrust cases to proceed to discovery without a plaintiff demonstrating 'plausibility' because of the high cost of discovery in antitrust cases in particular." *Pro Search Plus, LLC v. VFM Leonardo, Inc., No. SACV 12-2102 JST (ANx), 2013 U.S. Dist. LEXIS 107895, 2013 WL 3936394, at *1 (C.D. Cal. July 30, 2013)*; *see also* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 558, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*

"Leave to amend should be granted unless the district court 'determines that the pleading could not possibly be cured by the allegation of other facts.'" *Knappenberger v. City of Phoenix, 566 F.3d 936, 942 (9th Cir. 2009)* (quoting *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc)). Defendant's opposition reflects that it is prepared to present allegations as to facts not mentioned in the Counterclaims that could support them. Therefore, it is appropriate to grant the Motion without prejudice to the filing of an amended version of Counterclaims Nine through Fifteen. However, if Defendant elects to do so, it must present allegations that conform to the standards stated in this Order. This would include a clear statement of the allegations of those facts sufficient to support the legal claims that are advanced, e.g., whether the antitrust counterclaims are based on a claimed *Walker Process* violation or another legal doctrine.

IV. Conclusion

For the reasons stated in this Order, the Motion is **GRANTED** without prejudice. Any amended counterclaims shall be filed within **[*14]** 14 days of the issuance of this Order, and shall be stated in a manner that is sufficient to satisfy the pleading standards that have been stated.

IT IS SO ORDERED.

("Thus, it is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive.") (citation omitted).

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] **Appellate Review, Standards of Review**

Appellate courts review summary judgment de novo, asking whether a genuine dispute exists over any material fact.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN2[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington doctrine extends absolute immunity under the antitrust laws to businesses and other associations when they join together to petition legislative bodies, administrative agencies, or courts for action that may have anticompetitive effects. The doctrine flows from *First Amendment* origins: antitrust laws do not supersede the people's right to petition their government in favor of a desired monopoly. Exceptions exist for petitioners who present fraudulent misrepresentations or bring sham lawsuits.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN3[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Fraudulent misrepresentations made in an adjudicative proceeding before an administrative agency are not protected from antitrust liability. Those made in a legislative, political setting, however, enjoy immunity. Mercatus identifies five considerations to weigh when drawing the line between legislative and adjudicative proceedings for Noerr-Pennington purposes: (1) the general nature of the authority exercised by the agency; (2) the formality of the agency's fact-finding process; (3) the extent to which fact gathering is subject to political influence; (4) whether the agency received any testimony made under oath, affirmation, or penalty of perjury; and (5) whether the agency acted ultimately as a matter of discretionary authority or instead acted in accordance with more definite standards subject to judicial re-view. This is a threshold inquiry; the fraud exception does not apply at all outside of adjudicative proceedings. Should an antitrust plaintiff overcome this threshold, it still must demonstrate the alleged misrepresentation (1) was intentionally made, with knowledge of its falsity; and (2) was material, in the sense that it actually altered the outcome of the proceeding.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN4[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The absence of definite standards subject to judicial review is more characteristic of purely political or legislative activity than of adjudication for purposes of applying the Noerr-Pennington protection.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN5[] **Noerr-Pennington Doctrine, Sham Exception**

Noerr-Pennington's sham lawsuits or abuse-of-process exception holds liable objectively baseless lawsuits brought in an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process—as opposed to the outcome of that process—as an anti-competitive weapon.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN6[] **Noerr-Pennington Doctrine, Sham Exception**

The Noerr-Pennington's sham lawsuits or abuse-of-process exception requires a two-step inquiry: (1) only if challenged litigation is objectively meritless may a court (2) examine the litigant's subjective motivation. In other words, an antitrust plaintiff must disprove the challenged lawsuit's legal viability before proceeding to the second, subjective step.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN7[] **Noerr-Pennington Doctrine, Sham Exception**

As to the Noerr-Pennington's sham lawsuits or abuse-of-process exception, an objectively reasonable lawsuit is one reasonably calculated to elicit a favorable outcome. Baseless, frivolous efforts, as distinct from colorable suits brought in bad faith, receive no protection. Notably, a successful action self-proves its reasonableness and certainly cannot be characterized as a sham. A winning lawsuit is by definition a reasonable effort at petitioning for redress and therefore not a sham.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN8[] **Noerr-Pennington Doctrine, Sham Exception**

The Noerr-Pennington sham exception has never hinged on the petitioner's subjective intent alone. This aligns with the teachings of both Noerr and Pennington: Noerr rejected the contention that an attempt to influence the passage and enforcement of laws' might lose immunity merely because the lobbyists' sole pur-pose was to destroy their competitors. Valid efforts to influence government action, for exam-ple, do not qualify as a sham, while insubstantial claims might evidence one.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN9[] **Noerr-Pennington Doctrine, Sham Exception**

The Noerr-Pennington sham exception's objective component is indispensable and California Motor does not suggest otherwise.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN10[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

Regulatory statutes sometimes preclude application of the antitrust laws in explicit terms. If not, courts must determine whether the regulations implicitly preclude those laws' application. Implied immunity arises when a regulatory regime clashes with the antitrust laws to create a clear repugnancy or clear incompatibility between the two. Only a clear showing will do; findings of implied immunity are not favored otherwise. Once the conflict has been demonstrated, the antitrust laws are ousted or repealed in favor of the regulatory scheme.

Opinion by: MANION

Opinion

[*958] MANION, *Circuit Judge*. This antitrust case comes to us from the commodities and futures marketplace. As USFE tells it, Defendants torpedoed its new futures exchange by delay-ing the regulatory approval process and enacting an internal rule that deprived the new exchange of liquidity. The real question is whether Defendants violated the antitrust laws in doing so. We hold they did not.

I. Background

In the early 2000s, U.S. Exchange Holdings, Inc., and its subsidiary **[**2]** U.S. Futures Exchange, L.L.C. (together, "USFE"), set out to offer a then-novel electronic-based futures trading platform. Electronic trading posed a direct competitive threat to entrenched exchanges that utilized the more traditional but less efficient floor-trading model, like the Board of Trade of the City of Chicago, Inc. ("CBOT.")

USFE targeted February 1, 2004, as its launch date. That would have given USFE about a month to establish itself be-fore a number of futures and options contracts were set to ex-pire, at which time traders could transfer their business from CBOT and elsewhere to USFE. Before it could begin opera-tions, however, USFE needed to be approved as a designated contract market ("DCM") by the Commodity Futures Trading Commission. USFE filed its DCM application in July 2003 and hoped for fast-track approval by mid-November.

The Commission solicited public comment as part of the application review. CBOT and another futures exchange, Chi-cago Mercantile Exchange Inc. ("CME"), raised fifty-four ob-jections to USFE's application. Many other members of the public submitted critical letters and raised objections, too. At the close of the comment period, the Commission **[**3]** set a public hearing on USFE's application for December 17, 2003. But be-fore the hearing could convene, Defendants CBOT and CME requested the matter be postponed due to scheduling con-flicts. The Commission obliged.

In the background, USFE approached the Board of Trade Clearing Corporation ("BOTCC") to negotiate an agreement for clearing services.[1] This would have provided **[*959]** USFE with access to essential startup liquidity in the form of open inter-est created by market participants and held at BOTCC.[2] The problem for USFE was that CBOT also used this clearing-house. Once it caught wind that USFE intended to contract with BOTCC, CBOT proposed a new exchange rule—Rule 701.01—to the Commission for approval. The Commission approved the rule after more than a month of deliberation. Rule 701.01 compelled the transfer of CBOT's open interest from BOTCC to its new, exclusive clearing partner: CME.[3] By draining its open contracts from BOTCC, CBOT deprived USFE of access to a significant amount of liquidity.

The Commission finally approved USFE as a DCM on February 4, 2004, and USFE launched on February 8. According to USFE, the delay—attributable to Defendants—caused such uncertainty that market **[**4]** participants were unable and/or un-willing to trade on the new exchange. The exchange flopped.

---

[1] Every futures exchange must either provide its own clearing services or otherwise contract with a clearinghouse like BOTCC. A clearinghouse is an intermediary between buyers and sellers; it acts as the buyer for every seller and the seller for every buyer. The clearinghouse thus as-sumes counterparty risk; if a trade falls through on one end, the clearing-house shields the other side.

[2] "Open interest" refers to trades or contracts that remain outstanding at the clearinghouse and is used as a predictor of liquidity.

[3] CME offers both clearing and trading services. It agreed to provide clearing services exclusively for CBOT in April 2003.

USFE sued Defendants for violating the Sherman Anti-trust Act and related state common law prohibitions against tortious interference. The case spent *fifteen years* in federal district court before reaching us. After multiple amended complaints and motions to dismiss, a venue change, on-and-off discovery, three rounds of summary judgment briefing, and reassignment to a new district judge, the matter culmi-nated in summary judgment for Defendants. USFE appeals.

II. Discussion

HN1[] We review summary judgment *de novo*, asking whether a genuine dispute exists over any material fact. *Kopplin v. Wis. Cent. Ltd., 914 F.3d 1099, 1102 (7th Cir. 2019)*.

USFE's antitrust claims can be divided into two theories. The first is the "delay theory," whereby Defendants flooded the Commission with frivolous objections in order to stall DCM approval and harm USFE. Second, in the "open interest theory," Defendants conspired to deprive USFE of liquidity by transferring CBOT's open interest from BOTCC to CME.[4] We address each theory in turn.

A. Delay Theory: *Noerr-Pennington* and its Exceptions

In connection with USFE's DCM application, Defendants filed fifty-four objections (most, considered **[**5]** but rejected by the Commission) and submitted letters requesting the December 2003 hearing on USFE's application be postponed. Defend-ants engaged in this petitioning despite their apparent belief that USFE's application would be approved eventually.

The district court held this petitioning immune from anti-trust liability under the *Noerr-Pennington* doctrine.[5] ***HN2***[] The **[*960]** doctrine "extends absolute immunity under the antitrust laws to businesses and other associations when they join together to petition legislative bodies, administrative agencies, or courts for action that may have anticompetitive effects." *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 841 (7th Cir. 2011)* (internal quotation and citations omitted). The doctrine flows from *First Amendment* origins: antitrust laws do not su-persede the people's right to petition their government in favor of a desired monopoly. *See id. at 841-42* (citing *Premier Elec. Constr. Co. v. Nat'l Elec. Contractors Ass'n, Inc., 814 F.2d 358, 371 (7th Cir. 1987))*. *Noerr-Pennington* immunity is not ab-solute, however. Exceptions exist for petitioners who present fraudulent misrepresentations or bring sham lawsuits.[6] USFE invokes both.

i. *The "Fraudulent Misrepresentations" Exception*

HN3[] Fraudulent misrepresentations made in an adjudicative proceeding before an administrative agency are not protected from antitrust liability. *Mercatus, 641 F.3d at 842*. Those made in a legislative, political setting, however, enjoy immunity. *Mercatus* identifies five considerations to weigh when draw-ing the line between legislative and adjudicative proceedings for *Noerr-Pennington* purposes: (1) the general nature of the authority exercised by the agency; (2) the formality of the agency's fact-finding process; (3) the extent to which fact gath-ering is subject to political influence; (4) whether the agency received any testimony made under oath, affirmation,

---

[4] The parties also debate whether USFE's open interest claims are actionable at all. The district court did not rule on this issue so neither will we.

[5] The doctrine takes its name from two Supreme Court decisions: *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* (holding railroads' publicity campaign to promote legislation and law en-forcement practices that harmed trucking industry did not violate the *Sherman Act*); and *United Mine Workers of America v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* ("Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition.").

[6] *Mercatus* describes these exceptions as "two specific kinds of con-duct" that trigger a single exception to immunity: the "sham exception," first mentioned in *Noerr* itself. *See Mercatus, 641 F.3d at 842*. We discuss them as separate exceptions to **[**6]** avoid confusing the distinction between "sham lawsuits" and the broader "sham exception" *Noerr* contemplates.

or pen-alty of perjury; and (5) whether the agency acted ultimately as a matter of discretionary authority or instead acted in ac-cordance with more definite standards subject to judicial re-view. *Id. at 845-46*. This is a threshold inquiry; the fraud ex-ception "does not apply at all outside of adjudicative proceed-ings." *Id. at 844*.[7]

Applying *Mercatus*'s factors here, we conclude the district court classified the Commission's DCM application **[**7]** review process properly as legislative instead of adjudicative. *First*, we consider the nature of the Commission's authority when it reviewed USFE's application. The Commission's DCM re-view process mirrors its public rulemaking function, which includes entertaining *ex parte* meetings on proposed rules, providing notice to the public, and seeking comment before promulgating, amending, or repealing a rule.

In certain circumstances not present here, like when re-viewing a decision to deny a DCM application, the Commis-sion adjudicates. Blurring this line, USFE interprets the Commission's review of a denied application and the Commission's *initial* assessment of a DCM application as "different phases of the same proceeding." (Reply Br. at 4.) The regulations reflect the opposite. The procedures governing initial designation are found at subpart 38.3. And as encompassed by part 38, the designation procedures apply only to "every board of trade that *has been* designated or *is applying* to become designated as a contract market . . . ." *17 C.F.R. § 38.1* (emphasis added). They do not apply to boards that *have applied* but were *denied* designation. Instead, when the Commis-sion **[*961]** denies a DCM application, the aggrieved **[**8]** party may initiate review of the denial through a new, distinct proceeding subject to the Commission's Rules of Practice, which govern "adjudicatory proceedings." *17 C.F.R. §§ 10.1*, *10.1(a)*.[8] These Rules contemplate filing a complaint and notice of hearing, *see §§ 10.21*, *10.22*, filing an answer, *§ 10.23*, discovery, *§§ 10.42*, *10.44*, and motions practice, *§ 10.26*. An administrative law judge presides over all proceedings covered by the Rules, *§ 10.8*, evidence must meet admissibility standards, *§ 10.67*, and in stark contrast to the DCM application review process, *ex parte* communications are prohibited and even sanctionable, *§ 10.10*.

The Rules of Practice employ many signature adjudicative features, yet none applied to the Commission's review of USFE's application. The regulations illustrate a clear dichotomy between the process for reviewing DCM applications and that for reviewing denials. We reject USFE's attempt to bring the two under the same roof.

Second, the Commission utilized an informal fact-finding process. Although the Commission compiled a "record," the contents of that record were not bound by any "strict rules of relevance and admissibility" as if before a court or other adjudicative body. *Mercatus, 641 F.3d at 845*. The Commission was "free to base its actions on information and arguments **[**9]** that [came] to it from any source," including information, opinion, and argument submitted by the public. *Metro Cable Co. v. CATV of Rockford, Inc., 516 F.2d 220, 228 (7th Cir. 1975)*.

Third, the weight afforded to *ex parte* communications and public comment subjected the Commission's fact-finding efforts to political influence—a hallmark of the legislative pro-cess. In *Mercatus*, a local hospital successfully petitioned the village board to deny development of plaintiff's interloping physician center. We held this petitioning immune from anti-trust scrutiny based in large part on the parties' and the public's lobbying efforts:

> Both Mercatus and the Hospital engaged in *ex parte* lobbying of individual Board members prior to the hearings. Mercatus executives contacted or met personally with individual Board members, and at least one Board member even took a tour of Mercatus' facilities. A number of Lake Bluff residents also contacted the Board members to voice their views on the Mercatus project. . . . In fact, the lobbying was encouraged by the village president ... .
>
> . . .

---

[7] Should an antitrust plaintiff overcome this threshold, it still must demonstrate the alleged misrepresentation "(1) was intentionally made, with knowledge of its falsity; and (2) was material, in the sense that it ac-tually altered the outcome of the proceeding." *Mercatus, 641 F.3d at 843*. We do not address this second stage given the outcome here.

[8] The regulations define "adjudicatory proceeding" as "a judicial-type proceeding leading to the formulation of a final order." *17 C.F.R. § 10.2(b)*.

> At least one Board member, on his own initiative, contacted independent think tanks for guidance. Members of the general public were allowed to voice their opinions regarding Mercatus' proposed **[**10]** site plan.

641 F.3d at 848. These facts led us to label the board's review "decidedly legislative or political in nature." *Id.*

Much of the same occurred here. USFE's representatives, including outside counsel and at least one lobbyist, met with the Commission, its staff, and its attorneys on several occa-sions to discuss the DCM application. These meetings occurred over the phone and in person, *ex parte*. Commission staff visited USFE's facilities for a demonstration of its pro-posed trading platform. The Commission twice sought public comment on USFE's application and received letters from trading firms, individual traders, newsletter and magazine publishers, academics, and other government **[*962]** agencies. It reviewed and considered every one of these submissions before approving USFE's application. All of this activity was "per-fectly legitimate" in the context of the Commission's DCM application review process, "as would not be the case in an ad-judicative proceeding." *Id.*

Fourth, the Commission received no testimony under oath, affirmation, or penalty of perjury from the petitioning De-fendants as part of the application review. A witness or other source of information in an adjudicative proceeding "is **[**11]** not 'at liberty to exaggerate or color his version of an event,' as might be possible in a more political or legislative setting." *Id. at 845* (quoting *United States ex rel. Haywood v. Wolff, 658 F.2d 455, 463 (7th Cir. 1981))*. Requiring a perjury-backed oath or affirmation drives this home by "impress[ing] upon a witness the solemnity of the occasion and the importance of telling the truth." *Mercatus, 641 F.3d at 845*. But the Commission gave no such impression to Defendants or any other public commentators here. It did not require their written opinions and concerns to be made under penalty of perjury.

USFE points to the warning contained in "Form DCM": "Intentional misstatements or omissions of material fact may constitute federal criminal violations (*7 U.S.C. § 13* and *18 U.S.C. § 1001*) or grounds for disqualification from designa-tion." 17 C.F.R. pt. 38, App'x A.[9] Form DCM—used to compile the usual information and exhibits all applicants must submit—and its warning do not apply to the challenged petition-ing here, however. The Commission no doubt relied on the facts presented in USFE's application materials, submitted with the understanding that intentional misrepresentations could subject USFE to federal prosecution. But the Commis-sion also devoted significant consideration to unsworn public opinions, diluting the importance of truthful and **[**12]** accurate in-formation inherent in adjudicative settings. Each commentator other than USFE was free and welcome to present its views in any color. This factor leans legislative.

HN4[] Consideration of the *fifth* and final factor is less one-sided. "The absence of definite standards" subject to judicial review "is more characteristic of purely political or legislative activity than of adjudication." *Mercatus, 641 F.3d at 846*; *see also* *Kottle v. Nw. Kidney Ctrs., 146 F.3d 1056, 1061 (9th Cir. 1998)* (observing petitions to influence agency decisions that are "virtually unguided by enforceable standards" and appealable only to a legislative body receive *Noerr-Pennington* protection).

Here, USFE had to demonstrate it met and would continue to comply with more than twenty statutory requirements **[**13]** in order to be designated. The parties debate the limits of the Commission's reviewing discretion and whether the require-ments themselves qualify as "definite standards." We need not engage in these side disputes. At the very least, designation requires compliance with far more definite prerequisites than in *Mercatus*, where the local ordinance "provided *no* standards governing the grant or denial" of plaintiff's zoning application. *641 F.3d at 848* (emphasis added); *cf. Boone v. Redevelopment Agency* ***[*963]*** *of City of San Jose, 841 F.2d 886, 896 (9th Cir. 1988)* (immunizing petitioning of city council to approve a zoning plan that harmed

---

[9] The statutes cited by Form DCM—*7 U.S.C. § 13* and *18 U.S.C. § 1001*—criminalize knowingly submitting materially false or misleading information to the Commission in connection with a DCM application. Although they do not touch on "perjury," citation to these statutes similarly impresses upon the submitter that designation review and approval depends on accurate information. *See* *Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, Inc., 690 F.2d 1240, 1261-62 (9th Cir. 1982)* (likening *18 U.S.C. § 1001* to perjury penalty in discussing the prohibitions against submitting false information to adjudicative bodies for anticompetitive purposes).

plaintiffs; council's review held legislative based on broad discretion to approve or deny new projects whenever deemed "'necessary or desirable' to carry out the ends of redevelopment"). In addition, while "matters of discretionary authority" fall into the legislative basket, the Commission has no discretion to deny an application that meets the statutory requirements. And again, the Commission's assessment of USFE's application was subject to judicial review, albeit through a distinct proceeding as discussed above. These details illustrate several adjudicative aspects of the DCM application review process.

We emphasized in *Mercatus*, however, that "it may **[**14]** often not be clear whether, in a given circumstance, an agency is acting legislatively, adjudicatively, or perhaps somehow even in both capacities simultaneously." *641 F.3d at 844* (citation omitted). The agency process in this case involves a combination of legislative and adjudicative features. Nevertheless, the Commission's exercise of rulemaking-like authority, the encouragement of lobbying and *ex parte* influence, a tolerance for petitions made outside perjury's confines, and informal fact gathering render the DCM application review process a legislative one. Thus, USFE cannot rely on alleged fraudulent misrepresentations to circumvent *Noerr-Pennington*.

ii. *The "Sham Lawsuits" Exception*

HN5[] *Noerr-Pennington*'s "sham lawsuits" or "abuse-of-process" exception holds liable objectively baseless lawsuits brought in "an attempt to interfere *directly* with the business relationships of a competitor through the use of the governmental *process*—as opposed to the *outcome* of that process—as an anti-competitive weapon." *Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ("*PRE*") (in-ternal quotation marks and citations omitted). The sham ex-ception is "extraordinarily narrow." *Kottle, 146 F.3d at 1061*; *see also* 1 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST **[**15]** PRINCIPLES AND THEIR APPLICATION 262 (4th ed. 2013) (The exception is "most difficult" to apply in legislative contexts, "where it is virtually impossible to identify the sham."). The Ninth Circuit has even doubted whether the exception applies at all where, as here, plaintiffs allege a "pattern" of petitions in the legislative arena: "[S]ubjecting the same defendant to antitrust liability because it engaged in numerous unsuccessful attempts" to petition a legislative body "would eviscerate the *Petition Clause*." *Kottle, 146 F.3d at 1061*.

HN6[] The exception requires a two-step inquiry: (1) only if chal-lenged litigation is objectively meritless may a court (2) exam-ine the litigant's subjective motivation. *PRE, 508 U.S. at 60*. In other words, an antitrust plaintiff must "disprove the challenged lawsuit's *legal* viability" before proceeding to the second, subjective step. *Id. at 61*. Objectively reasonable suits therefore enjoy *Noerr-Pennington* immunity regardless of the reasons for their filing.

HN7[] An objectively reasonable lawsuit is one "reasonably cal-culated to elicit a favorable outcome." *Id. at 60*. Baseless, frivolous efforts, "as distinct from colorable suits brought in bad faith," receive no protection. *Creek v. Vill. of Westhaven, 80 F.3d 186, 192 (7th Cir. 1996)*. Notably, a *successful* action self-proves its reasonableness **[**16]** and "certainly cannot be characterized as a sham." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 502, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*; *PRE, 508 U.S. at 60 n.5* ***[*964]*** ("A winning lawsuit is by definition a reasonable effort at petitioning for redress and therefore not a sham."); *see also, e.g.*, *New West, L.P. v. City of Joliet, 491 F.3d 717, 722 (7th Cir. 2007)* (rejecting plaintiff's argument that defendant filed sham lawsuits when none had been adjudicated in plaintiff's favor).

USFE insists the district court employed the wrong stand-ard by relying on *PRE*. It argues Defendants' various com-ments, letters, etc., comprise a "pattern" of sham petitioning that triggers a more generous examination than what *PRE* calls for. This approach stems from the Supreme Court's lan-guage in *California Motor Transport Co. v. Trucking Unlimited*: "[A] pattern of baseless, repetitive claims may emerge which leads the factfinder to conclude that the administrative and judicial processes" have been used improperly "to deprive the competitors of meaningful access to the agencies and courts." *404 U.S. 508, 512, 92 S. Ct. 609, 30 L. Ed. 2d 642 and 513 (1972)*. Filing petitions with "such a purpose or intent," the Court stated, would "fall within the exception to *Noerr*." *Id. at 512*.

The district court applied the correct standard. We do not agree *California Motor* provides a separate rubric to use when-ever a "pattern" of sham filings is alleged. The First Circuit **[**17]** rejected this same reading of *California*

Motor recently in *Puerto Rico Telephone Co. v. San Juan Cable LLC, 874 F.3d 767 (2017)*, splitting from the four circuit opinions cited by USFE, all of which adopt some version of the view that *PRE* applies only to single-lawsuit cases while *California Motor* applies to all others.[10] The *Puerto Rico Telephone* panel reasoned persua-sively:

> [There is no] pragmatic reason to presume that [*PRE*'s] protections for nonfrivolous petitioning activity disappear merely because the defend-ant exercises its right to engage in such activity on multiple occasions. One large lawsuit or in-tervention in an agency proceeding can impose much more of a burden on a competitor than might a series of smaller claims.

874 F.3d at 772.

Relying on *California Motor* and the just-mentioned four circuit opinions, USFE invites us to discard the first question of the two-part sham inquiry whenever more than a single pe-tition has been made and to proceed only with the second step's evaluation of subjective motive. This position misconstrues *California Motor* and ignores *PRE*'s thorough ex-planation of that opinion's role in the sham exception land-scape. The Court in *PRE* described *California* ***[**18]*** *Motor* as requir-ing courts to draw the "difficult line" that *separates out* objec-tively reasonable claims from patterns of "*baseless*, repetitive claims" before finding a sham. *508 U.S. at 58* (emphasis added). In that sense, *California Motor*—issued more than twenty years before *PRE*—contains the very origins of the sham exception inquiry's first step: an objective reasonable-ness assessment.

HN8[] *PRE* further confirmed the sham exception has never hinged on the petitioner's subjective intent alone. *508 U.S. at 59* (collecting cases). This aligns with the teachings of both *Noerr* and *Pennington*: "*Noerr* rejected the contention that an attempt 'to influence the passage and enforcement of laws' might lose immunity **[*965]** merely because the lobbyists' 'sole pur-pose . . . was to destroy [their] competitors.'" *Id. at 57* (quoting *Noerr, 365 U.S. at 138*); the right of the people to petition for desired outcomes "cannot properly be made to depend upon their intent in doing so." *Id. at 58* (quoting *Noerr, 365 U.S. at 139*); "'*Noerr* shields from the *Sherman Act* a concerted effort to influence public officials regardless of intent or purpose.'" *Id.* (quoting *Pennington, 381 U.S. at 670*). Accepting USFE's position would subvert these core principles.

Moreover, the Supreme Court has acknowledged the objective reasonableness inquiry with regularity since *California* ***[**19]*** *Motor*. Valid efforts to influence government action, for example, do not qualify as a sham, while insubstantial claims might evidence one. *PRE, 508 U.S. at 58* (citing *Allied Tube, 486 U.S. at 500 n.4*; *Otter Tail Power Co. v. United States, 410 U.S. 366, 380, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973))*. And in *City of Columbia v. Omni Outdoor Advertising, Inc.*, the Court "dispelled the notion that an antitrust plaintiff could prove a sham merely by showing that its competitor's 'purposes were to delay [the plaintiff's] entry into the market and even to deny it a meaningful access to the appropriate . . . administrative and legislative fora.'" *PRE, 508 U.S. at 59-60* (discussing and quoting *499 U.S. 365, 381, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991))*. That same "notion" describes USFE's argument precisely.

We stand with the First Circuit. Faced with only one alleged sham lawsuit, at no point did the *PRE* Court link its ruling to the number of suits or suggest the outcome would be different if it encountered multiple actions. We, too, find "little logic" in concluding a petitioner loses the right to file an objectively reasonable petition merely because it chooses to exercise that right more than once in the course of pursuing its desired outcome. *See Puerto Rico Tel., 874 F.3d at 772*. Trac-ing the Ninth Circuit's lead in *USS—POSCO*, the Second, Third, and Fourth Circuits all reconciled *California Motor* and *PRE* "by reading them as applying to different **[**20]** situations." *USS—POSCO, 31 F.3d at 810*. Nothing in either opinion indicates as much. ***HN9***[] As the Court made clear in *PRE*, the sham exception's objective component is "indispensable" and *California Motor* does not suggest otherwise. *508 U.S. at 58*.

---

[10] *See Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 178-81 (3d Cir. 2015)*; *Waugh Chapel S., LLC v. United Food & Commercial Workers Union Local 27, 728 F.3d 354, 363-64 (4th Cir. 2013)*; *Primetime 24 Joint Venture v. Nat'l Broad. Co., 219 F.3d 92, 101 (2d Cir. 2000)*; and *USS—POSCO Indus. v. Contra Costa Cnty. Bldg. & Constr. Trades Council, AFL—CIO, 31 F.3d 800, 810-11 (9th Cir. 1994)*.

Even if *PRE* and *California Motor* provided two different standards for non-pattern and pattern cases, respectively, the district court still did not err by applying *PRE*. Unlike the four circuit opinions endorsing this divide, Defendants here did not bring multiple lawsuits or petition across various legislative and administrative fronts.[11] This case is not characterized by a wide-ranging "pattern." It involves a *single* legislative proceeding within which Defendants made multiple efforts to influence the Commission's decision regarding one overarch-ing issue: whether to approve USFE's application. Just as motions within a lawsuit support the lawsuit's objective, **[*966]** individual lobbying efforts play a part in obtaining the ultimate desired legislative action. But in neither scenario do multiple filings, submissions, or other efforts transform one lawsuit or proceeding into many. *See, e.g.*, *Hanover 3201, 806 F.3d at 169 and 181* (applying "pattern" standard where defendants initi-ated four distinct legal proceedings, but counting **[**21]** multiple letters submitted to a state agency as *one proceeding*).

With *PRE* in hand, the district court correctly determined Defendants' efforts did not "constitute the pursuit of claims so baseless that no reasonable litigant could realistically expect to secure favorable relief." *PRE, 508 U.S. at 62*. USFE counters by focusing on the fact that the Commission eventually *approved* USFE's application. According to USFE, its success in obtaining approval undermines the reasonableness of Defendants' fifty-four objections submitted in response to the application. This is especially so, USFE argues, because Defendants themselves knew the application would be approved in the end.

We reject USFE's position. Although a successful, winning petition proves its own reasonableness, it does not follow that a petition lacks merit simply because it did not prevail. Be-sides, the petitioning here was colorable. Defendants' December 2003 scheduling letters persuaded the Commission to postpone the public hearing on USFE's application in light of legitimate and well-documented conflicts. The letters were not frivolous. Neither were Defendants' objections to USFE's application. Before granting USFE's application, the Commission **[**22]** held USFE to several remedial efforts it undertook in response to Defendants' objections regarding USFE's proposed one-member board, cross-border clearing link, and incentive programs. Furthermore, while Commission staff elected not to acknowledge many of the objections raised by other commentators, it addressed *each* of Defendants' fifty-four con-cerns. This speaks to the substantiality of Defendants' submis-sions, even those rejected by the Commission. Finally, whether Defendants believed or "knew" USFE's application would succeed does not change our analysis. Even if petitioners believe a regulator may ultimately approve an application, that does not eliminate their right to encourage the governing body to consider shortcomings in the application. Proving sham petitioning in a legislative context like this one is virtu-ally impossible, and the record does not meet that high bar.

As with fraudulent misrepresentations, the "sham law-suits" exception cannot save USFE's delay theory claims. *Noerr*-*Pennington* therefore immunizes Defendants' petitioning, even if that conduct delayed the Commission's approval of USFE's application and created market uncertainty that harmed USFE.

B. Open Interest Theory: **[**23]** Implied Antitrust Immunity

USFE claims CBOT, conspiring with CME, enacted Rule 701.01 to transfer open interest away from USFE's preferred clearinghouse and thus deprive USFE of much-needed liquidity. Defendants advocate for implied antitrust immunity be-cause the Commission itself ordained the rule.

HN10[] Regulatory statutes sometimes preclude application of the antitrust laws in explicit terms. If not, courts must determine whether the regulations *implicitly* preclude those laws' application. *Credit Suisse Securities (USA) LLC v. Billing, 551 U.S. 264, 270-71, 127 S. Ct. 2383, 168 L. Ed. 2d 145 (2007)*. Implied immunity arises when a regula-tory regime clashes with the antitrust laws to create a "clear repugnancy" or "clear incompatibility" between

[11] *See* *Hanover 3201, 806 F.3d at 167-70* (defendants alleged to have pursued one state court lawsuit and three challenges before two state administrative bodies); *Waugh Chapel, 728 F.3d at 357-58* (union defendants orchestrated a "barrage of legal challenges" that included multiple state court lawsuits and challenges to at least eleven separate zoning permits); *Primetime 24, 219 F.3d at 101* (plaintiff alleged defendants abused provisions of the Satellite Home Viewers Act by conducting prelitigation challenges of thousands of individual subscribers); *USS—POSCO, 31 F.3d at 811* (defendants filed twenty-nine separate lawsuits).

the two. *Id. at 275*. **[*967]** Only a clear showing will do; findings of implied immunity are not favored otherwise. *Am. Agric. Movement, Inc. v. Bd. of Trade of the City of Chicago, 977 F.2d 1147, 1158 (7th Cir. 1992)* (citations omitted). Once the conflict has been demonstrated, the antitrust laws are "ousted" or "repealed" in favor of the regulatory scheme. *See* *Credit Suisse, 551 U.S. at 271-72* (discussing *Silver v. N.Y. Stock Exch., 373 U.S. 341, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963)*, and *Gordon v. N.Y. Stock Exch., 422 U.S. 659, 95 S. Ct. 2598, 45 L. Ed. 2d 463 (1975))*.

Implied antitrust immunity has its roots in securities caselaw. In its most recent discussion of the doctrine, the Supreme Court in *Credit Suisse* identified a four-part test for implied immunity: (1) the existence of clear and adequate regulatory authority to supervise the activity in question; **[**24]** (2) evidence that the responsible regulatory entities exercise that au-thority in an active and ongoing manner; (3) a resulting risk that the antitrust laws and those governing the challenged activity, if both applicable, would produce conflicting guidance, requirements, duties, privileges, or standards of conduct; and (4) whether the questioned activity lies squarely within the heartland of the regulated area. *551 U.S. at 275-77*. Assessing these four factors, the district court held Defendants' role in the open interest theory immune from antitrust scrutiny. USFE challenges the district court's findings on all but the final factor.

The facts here satisfy *Credit Suisse*'s criteria easily. *First*, the Commission has clear and adequate regulatory authority to approve exchange rules. *See* *7 U.S.C. § 7a-2(c)*; *17 C.F.R. § 40.5*. It also has clear and adequate authority over clearinghouses and the clearing of futures transactions. *See* *7 U.S.C. § 7a-1(a)*-*(c)*.[12] *Second*, the Commission indeed exercised this regulatory authority by approving CBOT's proposed rule. The Commission's overall regulation in this area, moreover, was both active (Commission staff reviewed the proposal for over a month, soliciting and considering more than a dozen com-ment letters) and ongoing (the **[**25]** same competition concerns raised by Rule 701.01 had been studied during the previous year through a Commission roundtable and report). *Third*, the Commission approved Rule 701.01 *in spite of* potential anti-competitive effects, creating conflict with the antitrust laws. Per statute, the Commission must "take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anticompetitive means" when approving exchange rules. *7 U.S.C. § 19(b)*. Keeping with this mandate, the Commission considered and acknowledged comment letters raising anticompetitive concerns but nonetheless deemed those concerns outweighed by the innovative gains to be had in the futures industry. With this and the other *Credit Suisse* factors met, the district court rightly concluded the Commission's approval of Rule 701.01 was "clearly incompatible" with the antitrust laws and their objectives.

Granted, the Supreme Court has not addressed implied antitrust immunity in the futures and commodities context, but this Circuit did so in *American Agriculture*—a decision pre-dating *Credit Suisse* by twenty-five years. Seizing on this, USFE contends the district court erred **[**26]** by applying the four-part test from *Credit* ***[*968]*** *Suisse*—a securities case—instead of our instruction in *American Agriculture* that immunity may be implied so long as the challenged action receives "active, intrusive, and appropriately deliberative" scrutiny and approval from the relevant agency. *977 F.2d at 1167*.

We disagree. USFE relies on the Court's statement in *Credit Suisse* that implied immunity determinations "may vary from statute to statute," *551 U.S. at 271*, but that language does not make *Credit Suisse*'s factors irrelevant beyond the securities context. While the ultimate *determination* might depend on the regulations in play, the analysis does not. *Credit Suisse*'s test applies across regulatory boundaries and nothing in that opinion points to the contrary. Furthermore, that the Commission regulates exchanges and clearinghouses through a "principles-based approach"—as opposed to the "rules-based approach" of its securities counterpart—does not require us to apply wholly distinct standards to each regulatory scheme. Nowhere does *American Agriculture* indicate these inherent differences warrant separate standards.[13] Indeed, *American Agriculture* derives its own "test" from the same

[12] Even though exchange and clearing rules can be self-certified with-out the Commission's input, that is not what happened here. Defendants voluntarily submitted Rule 701.01 for the Commission's *prior approval*. Because of this, the Commission was required to exercise its authority to review and approve. *7 U.S.C. § 7a-2(c)(4)(C)* ("If prior approval is requested . . . the Commission *shall* take final action on the request . . . .") (emphasis added).

securities cases that provide the foundation **[**27]** for *Credit Suisse*'s four fac-tors—*Silver* and *Gordon*—and relies significantly on decisions from other regulatory contexts as well. *See Am. Agriculture, 977 F.2d at 1164* (discussing *MCI Commc'ns Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081 (7th Cir. 1983)* (holding no implied antitrust immunity for alleged predatory pricing in telecommu-nications markets)). At most, *American Agriculture*'s emphasis on "active, intrusive, and appropriately deliberative" scrutiny is just another way to measure *Credit Suisse*'s second factor: active and ongoing exercise of regulatory authority.

Implied immunity is neither a securities doctrine nor a commodities doctrine. It is an antitrust doctrine. And the question of whether it applies in a given case is answered ably by *Credit Suisse*. The regulatory setting—securities, commodities, or something else—simply provides the backdrop against which the template is applied.

In any event, were we to accept USFE's argument, implied immunity would still attach under the "standard" it pushes. Given the Commission's focus on market competition in the year leading up to Defendants' proposed rule change, the Commission's solicitation and consideration of public comment and anticompetitive concerns, and its express, affirmative approval of Rule **[**28]** 701.01, this is not at all like the situation presented in *American Agriculture*. That case involved a challenge to an emergency resolution passed by CBOT to combat market manipulation. Unlike here, however, the Commission took no official action in response to that resolution; Commission staff conducted an informal, nonpublic investigation only. The Commission's "casual and modest" supervision and its "halfhearted and nonpublic review of the challenged practice" compelled us to reverse the district court's finding of implied immunity. *977 F.2d at 1165 and 1167*. The unavailability of judicial review in *American Agriculture*—a factor considered "extremely important" to the implied immunity calculus—further directed our decision in that case. *Id. at 1167*. But here, USFE could have sought judicial review of the Commission's approval under the *Administrative Procedure Act*—it apparently elected not to. *See 5 U.S.C. §§ 702*, *706*. All told, the Commission's approval of Rule 701.01 **[*969]** creates a "clear repugnancy" between the regulatory scheme and the antitrust laws. Implied immunity precludes USFE's open interest claims.

III. Conclusion

Based on Defendants' petitioning before the Commission and their forced transfer of open interest, USFE brought this antitrust action to hold Defendants accountable **[**29]** for its failed exchange. But the *Noerr-Pennington* doctrine shields Defend-ants' petitioning from antitrust scrutiny. And since neither exception to the doctrine applies, USFE's delay theory fails. Moreover, the Commission's explicit approval of Rule 701.01 impliedly repeals the antitrust laws here, immunizing Defendants against USFE's open interest claims. The district court got it right for both theories, so summary judgment for Defendants is

AFFIRMED.

---

13 Following USFE's argument to its logical conclusion would compel a unique implied immunity test for every regulated industry. We do not glean that intention from either *Credit Suisse* or *American Agriculture*.

Reserve Realty, LLC v. Windemere Reserve, LLC

Supreme Court of Connecticut

September 18, 2018, Argued; March 24, 2020*, Decided

SC 19979, SC 19982, SC 19981

Reporter

Antitrust & Trade Law > Sherman Act > Scope

HN1[] **Antitrust & Trade Law, Sherman Act**

Although *15 U.S.C.S. § 1*, on its face, prohibits any contract in restraint of trade, the United States Supreme Court has added a judicial gloss requiring a contractual restraint to be unreasonable before it will be deemed illegal under the Sherman Act.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN2[] **Regulated Practices, Price Fixing & Restraints of Trade**

Every commercial contract, by definition, constitutes a restraint of trade. If a dog breeder contracts to sell three puppies to a family, commerce in those three puppies is restrained, insofar as no other customer may purchase them. The antitrust laws proscribe only those contracts that unreasonably restrain trade.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Governments > Legislation > Interpretation

HN3[] **Regulated Practices, Price Fixing & Restraints of Trade**

The state antitrust act was patterned after federal ***antitrust law***. Indeed, *Conn. Gen. Stat. § 35-44b* provides that, in construing the antitrust act, the courts of Connecticut shall be guided by interpretations given by the federal courts to federal antitrust statutes. For this reason, the Connecticut Supreme Court follows federal precedent when it interprets the Connecticut Antitrust Act unless the text of Connecticut's antitrust statutes, or other pertinent state law, requires the court to interpret it differently.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN4[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is an agreement by a party to sell one product (the tying product) but only on the condition that the buyer also purchase a different (tied) product, or at least agree that he will not purchase that product from any other supplier.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review

HN5[] **Antitrust & Trade Law, Procedural Matters**

Although the appellate court must defer to the trial court's factual findings, interpretation of federal and state antitrust laws is plenary.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN6[] Price Fixing & Restraints of Trade, Tying Arrangements

Many tying arrangements, the United States Supreme Court has written in Illinois Tool Works, Inc., even those involving patents and requirements ties, are fully consistent with a free, competitive market. Congress, the antitrust enforcement agencies, and most economists have all reached the conclusion that a patent does not necessarily confer market power upon the patentee. The Court reaches the same conclusion, and therefore holds that, in all cases involving a tying arrangement, the plaintiff must prove that the defendant has market power in the tying product.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN7[] Price Fixing & Restraints of Trade, Tying Arrangements

Most of the lower federal courts and the state courts that have considered the question have adopted the broader reading of Illinois Tool Works, Inc., and interpreted the decision to mean that the uniqueness of a tying product no longer gives rise to a presumption of economic power. Market power in a defined product and geographic market must be established to satisfy the first prong of Northern Pacific, even with respect to unique, nonpatented tying products such as land.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN8[] Tying Arrangements, Per Se Rule

In light of what the Connecticut Supreme Court perceives to be the clear trajectory of federal tying law, as informed by modern antitrust scholarship, the court overrules *State v. Hossan-Maxwell, Inc., 181 Conn. 655 (1980)*, to the extent that it held that real estate list-back agreements affecting a not insubstantial volume of commerce are per se illegal.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN9[] Price Fixing & Restraints of Trade, Tying Arrangements

Challenges to list-back agreements, like most other forms of tying agreements, are subject to the five-element test adopted by the United States Court of Appeals for the Second Circuit in applying Northern Pacific and its progeny: To state a valid tying claim a party must allege facts plausibly showing that: (1) the sale of one product (the tying product) is conditioned on the purchase of a separate product (the tied product); (2) the seller uses actual coercion to force buyers to purchase the tied product; (3) the seller has sufficient economic power in the tying product market to coerce purchasers into buying the tied product; (4) the tie-in has anticompetitive effects in the tied market; and (5) a not insubstantial amount of commerce is involved in the tied market. The third element of the test, economic power, typically must be established by proving that the defendant wields market power in a defined product and geographic market. The best way to plead market power is to allege facts that, if proven, establish directly that the price of the tied package is higher than the price of components sold in competitive markets.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Competition policy generally is not offended when only minor foreclosure of competition in the tied market is possible.

Counsel: Daniel E. Casagrande, with whom was Lisa M. Rivas, for the appellants (plaintiffs).

Christopher Rooney, with whom was Brian A. Daley, for the appellees (named defendant et al.).

Judges: Robinson, C. J., and Palmer, McDonald, D'Auria, Mullins, Kahn and Ecker, Js. ROBINSON, C. J. In this opinion the other justices concurred.

Opinion by: ROBINSON

Opinion

[*178] [709]** ROBINSON, C. J. These certified appeals invite us to revisit *State v. Hossan-Maxwell, Inc., 181 Conn. 655, 662-63, 436 A.2d 284 (1980)*, in which this court held that real estate "list-back" agreements—tying arrangements that commit the purchaser of a parcel of real property to use the services of a particular broker when leasing or reselling the property[1]—are per se illegal under state ***antitrust law***. Specifically, we must decide whether, in light of recent antitrust scholarship and developments in federal tying law, *Hossan-Maxwell, Inc.*, should be overruled. We answer that question in the affirmative. Accordingly, we reverse **[**710]** the judgments of the Appellate Court, which, like the trial court, correctly determined that it was required to apply *Hossan-Maxwell, Inc.*, to the present case.

These appeals arise out of a breach of contract action involving the sale and development **[***3]** of 546 acres of the former Union Carbide Corporation (Union Carbide) corporate campus in Danbury (the Reserve). The primary brokers involved in the transactions were Jeanette Haddad (Haddad), a prominent local real estate agent who died in 2013, and Paul P. Scalzo.[2] The plaintiffs are Haddad's husband, Theodore Haddad, Sr., as executor of his wife's estate, and The Reserve Realty, LLC (Reserve Realty), a limited liability company organized by Haddad and Scalzo to market and sell the Reserve **[*179]** as it became subdivided. The defendants, BLT Reserve, LLC (BLT), and Windemere Reserve, LLC (Windemere), are limited liability companies, the principals and owners of which include Carl R. Kuehner, Jr., and Paul J. Kuehner, whose family is longtime friends and business associates of the Haddad family. In this action, the plaintiffs sought to recover real estate brokerage fees in connection with the sale and/or lease of units in an apartment complex constructed on the Reserve and leased by BLT, and of commercial office space to be constructed on the Reserve by Windemere. After a trial to the court, judgments were rendered in favor of the defendants. The Appellate Court affirmed, agreeing with the **[***4]** trial court that the defendants' antitrust special defense barred the plaintiffs' claims. *Reserve Realty, LLC v. Windemere Reserve, LLC, 174 Conn. App. 130, 132, 165 A.3d 162 (2017)*.

I

The relevant facts, as found by the trial court or that are undisputed, and complete procedural history are set forth in detail in the opinion of the Appellate Court. See *id., 132-38*. In brief, following its acquisition by the Dow Chemical

---

[1] Such agreements may apply only to the initial sale/lease of the property, to all subsequent sales/leases that occur within a specified time frame, or in perpetuity.

[2] Haddad operated under the business name "Jeanette Haddad, Broker," and Scalzo operated through his real estate franchise, Century 21 Scalzo Realty, Inc. (Scalzo Realty). For simplicity, we do not distinguish between those individuals and their corporate entities in this opinion, referring to them, respectively, as "Haddad" and "Scalzo." We note that, subsequent to the filing of their action, Scalzo Realty was added as a necessary party but thereafter was defaulted for failure to plead. Subsequently, the plaintiffs withdrew their action as to Scalzo Realty.

Company (Dow Chemical) in 1999, Union Carbide made known that it would entertain offers to sell the Reserve to interested buyers. Garland Warren, then a Union Carbide employee, initially was responsible for overseeing the sale of the parcel.

In early 2002, a group of real estate developers, later known as Woodland Group II, LLC (Woodland), engaged the services of Haddad and Scalzo to represent them in negotiations to purchase the Reserve. Woodland appears to have chosen Haddad and Scalzo in part because Warren had since left Dow Chemical and been employed by Scalzo.

As part of the broker-client relationship, Haddad, Scalzo, and Woodland executed an "Exclusive Right to **[*180]** Sell—Listing Agreement" (Woodland agreement). The Woodland agreement gave Haddad and Scalzo the exclusive right to sell and/or lease property in the Reserve. The agreement also contained the following provision: **[***5]** "[Woodland] shall make aware to the new purchaser of any part, or of individual lots, or of land, that this [a]greement shall apply to that new purchaser and [Haddad and Scalzo]."

[711]** Woodland succeeded in purchasing the Reserve, and the plaintiffs received a commission for facilitating that sale. Woodland subsequently proposed a master plan for the entire 546 acre parcel, which the Danbury Zoning Commission approved in November, 2002. Woodland then continued to use the services of Haddad and Scalzo to market the property to potential buyers.

Efforts to develop the property foundered, however, when Windemere, which was in the process of developing a neighboring parcel of land, appealed Woodland's zoning approval for the Reserve, effectively blocking development of the land. To resolve the zoning dispute, Woodland agreed to sell one portion of the Reserve (parcel 13) to BLT for residential development (a luxury apartment complex, Abbey Woods, had been built at the time of trial), and another portion (parcel 15) to Windemere for commercial development (which had yet to be built at the time of trial).

Consistent with the requirements of the Woodland agreement, and after several rounds of negotiations **[***6]** with Woodland, the defendants reluctantly agreed to include list-back provisions in their purchase and sale agreements for parcels 13 and 15. Specifically, BLT agreed to enter into a listing agreement with Haddad and Scalzo, pursuant to which the brokers would receive a 3 percent commission on the subsequent sale or lease of parcel 13, either as a whole or as individual units. For its part, Windemere agreed to pay Haddad **[*181]** and Scalzo $1 million for their efforts in leasing the office space that Windemere planned to build on parcel 15. That fee was to be paid in ten annual increments of $100,000, beginning when the first certificate of occupancy was issued.[3] After months of additional negotiations, Woodland and the defendants finalized and memorialized those list-back agreements in July, 2003.[4]

Although Haddad and Scalzo made good faith efforts to market parcels 13 and 15, the real estate market softened in the wake of the 2007-2008 financial crisis, and those efforts were unsuccessful. BLT ultimately proceeded to

---

[3] It is not entirely clear that the agreements governing parcel 15 are true list-back agreements. Although they include a reference to exclusive listing of that property, those agreements could plausibly be read to mean that the plaintiffs earned the $1 million commission on the completion of the sale of that parcel by Woodland to Windemere, on the basis of the plaintiffs' role in facilitating that sale, and that payment was simply to be delayed until Windemere was able to develop the property. The trial court, for example, having found the parties' various purchase and listing agreements to be ambiguous, concluded that one possible interpretation of the agreements was that the plaintiffs had earned a commission with respect to parcel 15 prior to having performed any services for Windemere. Should these cases ultimately return to the trial court, it will fall to that court to determine whether those agreements are list-back agreements, the enforcement of which potentially implicates antitrust considerations or, rather, merely consideration for the plaintiffs' prior services. Compare, e.g., *Kaiser Steel Corp. v. Mullins, 455 U.S. 72, 81-82, 102 S. Ct. 851, 70 L. Ed. 2d 833 (1982)* (illegality defense should be entertained in those circumstances in which its rejection would be to enforce conduct forbidden by ***antitrust law***), with *Kelly v. Kosuga, 358 U.S. 516, 521, 79 S. Ct. 429, 3 L. Ed. 2d 475 (1959)* (rejecting illegality defense when judgment would not have enforced allegedly illegal aspect of contract).

[4] The precise terms of the various contract documents vary, and are ambiguous, in ways that are not directly relevant to the legal issues now before us but that likely will need to be addressed on remand.

build a luxury apartment complex on its parcel, units of which it marketed through its own onsite leasing agent instead of through the services of Haddad and Scalzo.

The plaintiffs **[***7]** responded by filing the present action, alleging breach of contract **[**712]** and anticipatory breach, and **[*182]** seeking, inter alia, specific performance of the listing agreements. In response, the defendants raised a number of special defenses, three of which were at issue in the plaintiffs' appeal to the Appellate Court. Specifically, the defendants argued that the list-back provisions in their purchase and sale agreements were not enforceable by the plaintiffs because those provisions (1) were illegal tying arrangements, (2) did not satisfy the requirements of *General Statutes § 20-325a*,[5] and (3) were personal and specific to Haddad, who died prior to the trial. *Reserve Realty, LLC v. Windemere Reserve, LLC, supra, 174 Conn. App. 138*. Following a bench trial, the trial court ruled for the defendants on all three of these special defenses and rendered judgments accordingly. The Appellate Court affirmed the judgments on the basis of the antitrust defense and, therefore, declined to address the plaintiffs' claims that the trial court reached the incorrect conclusion on the remaining special defenses.[6] Id.

II

The dispositive question in these appeals is whether we should reconsider our tying jurisprudence and overrule *Hossan-Maxwell, Inc.* In part II A of this opinion, we set forth certain well established **[***8]** background principles on which we understand the parties to be in agreement. In part II B and C, we address the legal questions that remain the subject of dispute between the parties.

A

The defendants' first special defense alleges that the list-back provisions in the parties' purchase and sale agreements violate the *Sherman Act, 15 U.S.C. § 1 et seq.*, **[*183]** and are, therefore, unenforceable. See *Kaiser Steel Corp. v. Mullins, 455 U.S. 72, 76, 102 S. Ct. 851, 70 L. Ed. 2d 833 (1982)* (claim that agreement "was void and unenforceable as violative of *§§ 1* and *2 of the Sherman Act*"); see also *Hanks v. Powder Ridge Restaurant Corp., 276 Conn. 314, 326, 885 A.2d 734 (2005)* ("contracts that violate public policy are unenforceable" (internal quotation marks omitted)). The section of the *Sherman Act* at issue provides in relevant part: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several [s]tates, or with foreign nations, is declared to be illegal. . . ." *15 U.S.C. § 1 (2018)*. ***HN1***[] Although this provision, on its face, prohibits *any* contract in restraint of trade, the United States Supreme Court has added a judicial gloss requiring a contractual restraint to be unreasonable before it will be deemed illegal under the *Sherman Act*.[7] See, e.g., *Board of Trade v.* ***[**713]*** *United States, 246 U.S. 231, 238-41, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*; **[*184]** *Elida, Inc. v. Harmor Realty Corp., 177 Conn. 218, 225, 413 A.2d 1226 (1979)*; see also *Bridgeport Harbour Place I,*

---

[5] Among other things, ***§ 20-325a*** places certain restrictions on the ability of a real estate broker to bring an action to recover commissions arising out of a real estate transaction.

[6] In order for the plaintiffs to prevail, all three of these defenses must fail on appeal.

[7] More broadly, this provision of the *Sherman Act*, which is only a few sentences long, is understood effectively to delegate to the courts the authority to determine what constitutes an unreasonable restraint of trade and, therefore, an antitrust violation. See *In re Cox Enters., 871 F.3d 1093, 1097 (10th Cir. 2017)*. As a result, although antitrust actions and defenses technically are statutory, judicial decisions interpreting and applying the *Sherman Act* tend to analyze antitrust issues more like common-law questions, with public policy and economic concerns at the forefront, rather than according to traditional methods of statutory construction. See R. Posner, "The Meaning of Judicial Self-Restraint," *59 Ind. L.J. 1, 5-6 (1983)*; see also 2 P. Areeda & H. Hovenkamp, ***Antitrust Law*** (3d Ed. 2007) ¶ 301a, pp. 6-7.

We further note that, to the extent that the trial court read *General Statutes § 35-26* literally to prohibit any "contract, combination, or conspiracy in restraint of any part of trade or commerce"; see footnote 8 of this opinion; that court's reading was incorrect. ***HN2***[] Every commercial contract, by definition, constitutes a restraint of trade. *Procaps S.A. v. Patheon, Inc., 845 F.3d 1072, 1081 (11th Cir. 2016)*. If a dog breeder contracts to sell three puppies to a family, commerce in those three puppies is restrained, insofar as no other customer may purchase them. The antitrust laws proscribe only those contracts that *unreasonably* restrain trade. See, e.g., id.; *Tremont Public Advisors, LLC v. Connecticut Resources Recovery Authority, 333 Conn. 672, 695, 217 A.3d 953 (2019)*.

LLC v. Ganim, 303 Conn. 205, 214, 32 A.3d 296 (2011) ("an act is deemed anticompetitive under the *Sherman Act* only when it harms **[***9]** both allocative efficiency and raises the prices of goods above competitive levels or diminishes their quality" (emphasis omitted; internal quotation marks omitted)).

The United States Supreme Court generally has reviewed alleged *Sherman Act* violations under one of two standards. "If a restraint alleged is among that small class of actions that courts have deemed to have . . . predictable and pernicious anticompetitive effect, and . . . limited potential for procompetitive benefit, it will be unreasonable per se . . . . Most antitrust claims, however . . . are analyzed under a rule of reason analysis [that] seeks to determine if the alleged restraint is unreasonable because its anticompetitive effects outweigh its procompetitive effects." (Internal quotation marks omitted.) *Bridgeport Harbour Place I, LLC v. Ganim, supra, 303 Conn. 214-15*.

Treating some practices as illegal per se allows courts to recognize and efficiently resolve disputes concerning practices that have little or no positive economic value and are highly likely to be anticompetitive, without the need for parties to engage in costly and complex litigation centering around competing expert testimony. See 9 P. Areeda & H. Hovenkamp, ***Antitrust Law*** (3d Ed. 2011) ¶ 1720a, pp. **[***10]** 260-61. On the other hand, presumptively applying a rule of reason to most alleged antitrust violations (1) respects the freedom of competitors and consumers to structure their economic relations as they see fit, (2) recognizes that courts generally are ill-equipped to identify those business practices that deviate from the procompetitive norm and may be too quick to choose economic winners and losers rather than allowing the marketplace to sort things out, and (3) requires proof that a challenged business practice actually **[*185]** imposes an unreasonable restraint on trade before exposing a defendant to potential antitrust liability. See 7 P. Areeda & H. Hovenkamp, ***Antitrust Law*** (3d Ed. 2010) ¶ 1500, pp. 379-82; 9 P. Areeda & H. Hovenkamp, supra, ¶ 1710c, pp. 110-13.

In addition to the *Sherman Act*, the defendants allege that the list-back provisions in their agreements also violate the *Connecticut Antitrust Act, General Statutes § 35-24 et seq.* The primary allegation is that the list-back provisions violate *General Statutes § 35-26*,[8] the state analogue of *15 U.S.C. § 1*.[9] It is well established that ***HN3***[] **[**714]** the state antitrust act was patterned after federal ***antitrust law***. *Bridgeport Harbour Place I, LLC v. Ganim, supra, 303 Conn. 213 n.6*. Indeed, *General Statutes § 35-44b* provides that, in construing the antitrust act, "the courts of this state shall be guided by interpretations given by **[***11]** the federal courts to federal antitrust statutes." For this reason, "we follow federal precedent when we interpret the [*Connecticut Antitrust Act*] unless the text of our antitrust statutes, or other pertinent state law, requires us to interpret it differently . . . ." (Internal quotation marks omitted.) *Bridgeport Harbour Place I, LLC v. Ganim, supra, 213 n.6*; see also *Westport Taxi Service, Inc. v. Westport Transit District, 235 Conn. 1, 15-16, 664 A.2d 719 (1995)*. Insofar **[*186]** as neither party contends that *§ 35-26* should be interpreted differently from its federal counterpart, we limit our analysis herein to the issue of whether the listing agreements violate *15 U.S.C. § 1*.

The defendants allege that the agreements at issue in the present case are illegal tying arrangements. ***HN4***[] "A tying arrangement is an agreement by a party to sell one product [the tying product] but only on the condition that the buyer also purchase a different (tied) product, or at least agree that he will not purchase that product from any other supplier." *State v. Hossan-Maxwell, Inc., supra, 181 Conn. 659*. In its early antitrust cases, the United States Supreme Court took a dim view of tying arrangements because it assumed that (1) tying confers little, if any,

[8] *General Statutes § 35-26* provides: "Every contract, combination, or conspiracy in restraint of any part of trade or commerce is unlawful."

[9] The parties disagree as to whether the defendants' antitrust special defense also can be understood to allege a violation of *General Statutes § 35-29*, the state analogue of *§ 3 of the Clayton Act, 15 U.S.C. § 14*. Because we conclude that tying arrangements are evaluated under the same legal standard under both the *Sherman Act* and the *Clayton Act*, we need not resolve this dispute. See part III C of this opinion. Moreover, although the defendants correctly note that *§ 35-29* is broader in scope than *§ 3 of the Clayton Act*—insofar as the former statute, unlike the latter, (1) applies to anticompetitive conduct in the provision of services as well as commodities, and (2) is not limited to interstate commerce—the defendants do not contend that anything in the text or history of *§ 35-29* warrants the application of a different legal *standard*.

economic benefit or value, and (2) tying allows a monopolist in the tying product to improperly extend or leverage its monopoly position so as to monopolize or obtain an **[***12]** unfair advantage in the market for the complementary, tied product (the dual monopoly profit theory). See *Illinois Tool Works, Inc. v. Independent Ink, Inc., 547 U.S. 28, 35, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. Because tying was viewed as being almost invariably anticompetitive, the Supreme Court initially classified tying among those trade practices deemed per se unlawful. See, e.g., *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 609, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*.

The issue of the legality of broker list-back agreements under federal and state ***antitrust law*** first arose in the late 1970s and early 1980s. Consistent with the United States Supreme Court's then prevailing views on tying arrangements, both this court and our sister courts[10] held such arrangements to be per se illegal **[*187]** and, therefore, generally refused to enforce contracts predicated on such an agreement.

We addressed this issue in *Hossan-Maxwell, Inc.* A brief review of the facts of that case is instructive. In 1966, James F. Hartnett recorded a declaration of covenants and restrictions on certain parcels of residential **[**715]** land in New Milford. *State v. Hossan-Maxwell, Inc., supra, 181 Conn. 657*. That declaration required that a grantee of any of the sixty-four building lots who decided to sell or lease the property through any commissioned broker give exclusive sales and leasing rights to Hartnett for a period of three months. *Id., 658*. These exclusive rights were **[***13]** intended to run with the land and to bind not only the immediate grantee but all subsequent purchasers. Id. Apparently, Hartnett intended to charge a 6 percent commission for his services, which was consistent with the prevailing market rate. *Id., 663, 665 n.7*.

In affirming the trial court's judgment declaring the restrictive covenants unenforceable, this court applied not a true per se rule but, rather, the "quasi-per se" rule that the United States Supreme Court articulated in *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)* (*Northern Pacific*). See *State v. Hossan-Maxwell, Inc., supra, 181 Conn. 660-67*. Under the *Northern Pacific* rule, a tying arrangement violates *15 U.S.C. § 1*, without the need to demonstrate any anticompetitive effects—that is, without the need for a full rule of reason analysis—if the following conditions are met: (1) the seller has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product, and (2) a "not insubstantial amount of interstate commerce is affected," meaning that more than a de minimis volume of business is foreclosed to competitors by the tie. See *id., 661-63*.

[*188] With respect to the first prong of the *Northern Pacific* rule, economic power for antitrust purposes ordinarily must be demonstrated by proving that a seller **[***14]** has a substantial or dominant position (market power) in a defined product and geographic market. See, e.g., *Smugglers Notch Homeowners' Assn., Inc. v. Smugglers' Notch Management Co., Ltd., 414 Fed. Appx. 372, 375 (2d Cir. 2011)*; see also footnote 14 of this opinion. Several United States Supreme Court cases decided prior to *Hossan-Maxwell, Inc.*, however, held that economic power also can be established merely by demonstrating that the tying product at issue is protected as intellectual property or is a unique or especially desirable item, the assumption being that that uniqueness of the tying product can be leveraged to compel an eager buyer to accept the tied product.[11] See, e.g., *International Salt Co. v. United States, 332 U.S. 392, 395-96, 68 S. Ct. 12, 92 L. Ed. 20 (1947)*; *International Business Machines Corp. v. United States, 298 U.S. 131, 135-37, 56 S. Ct. 701, 80 L. Ed. 1085 (1936)*; see also *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 17, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* ("when the seller offers a unique product that competitors are not able to offer . . . [this] [c]ourt has held that the likelihood that market power exists and is being

---

[10] See, e.g., *Miller v. Granados, 529 F.2d 393, 396-97 (5th Cir. 1976)*; *MacManus v. A. E. Realty Partners, 146 Cal. App. 3d 275, 288, 194 Cal. Rptr. 567 (1983)*; *King City Realty, Inc. v. Sunpace Corp., 291 Or. 573, 581, 633 P.2d 784 (1981)*; see also *In re Real Estate Litigation, 95 Wn. 2d 297, 301-304, 622 P.2d 1185 (1980)* (addressing jurisdictional issues).

[11] Although courts sometimes use the terms "economic power" and "market power" interchangeably, in this opinion, for clarity, we use the term "economic power" in the more general sense to encompass all of the various factors that courts have indicated may satisfy the first prong of *Northern Pacific*. **[***15]** These include not only market power (a substantial or dominant share of a defined, distinct market), but also uniqueness, special desirability, a legal monopoly such as a patent, and anything else that might permit a seller to force a buyer to agree to acquire an unwanted tied product.

used to restrain competition in a separate market is sufficient to make per se condemnation appropriate" (citation omitted)). In State v. Hossan-Maxwell, Inc., supra, 181 Conn. 665, this court read Northern **[**716]** Pacific to mean that land—or at least residential land—also is **[*189]** always unique. Accordingly, a landowner who ties the sale of their land to the purchase of another product or service necessarily has market power for purposes of a court's evaluation of an antitrust challenge. See id.

This court also concluded in Hossan-Maxwell, Inc., that the second prong of the Northern Pacific rule was satisfied because, under what the court described as its "very liberal interpretation" of Northern Pacific, the estimated $21,000 in annual real estate commissions implicated by the declaration constituted a not insubstantial volume of business that was foreclosed to other brokers. (Internal quotation marks omitted.) Id., 664.

In the four decades since this court held in Hossan-Maxwell, Inc., that any real estate list-back agreement affecting more than a de minimis volume of commerce is per se illegal, neither this court nor, to our knowledge, any federal appellate court has had the opportunity to consider the ongoing vitality of that rule. **HN5**[] Although, in addressing this question, we must defer to the trial court's factual findings, our interpretation of federal and state antitrust laws is plenary. See, e.g., Miller's Pond Co., LLC v. New London, 273 Conn. 786, 798, 873 A.2d 965 (2005); Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 14-15.

B

We turn now to the primary issue presented by the present appeals, namely, whether the reasoning and result of this court's decision in Hossan-Maxwell, Inc., remain consistent with the current views of the United States Supreme Court and the lower federal courts with respect **[***16]** to tying arrangements. The plaintiffs posit that Hossan-Maxwell, Inc., has been vitiated by modern antitrust case law or, at the very least, that we should adopt a more nuanced approach to tying arrangements such as that espoused by Justice O'Connor in her concurring opinion in Jefferson Parish Hospital District **[*190]** No. 2 v. Hyde, supra, 466 U.S. at 33-42. The defendants respond that Hossan-Maxwell, Inc., remains fully consistent with controlling United States Supreme Court precedent and, therefore, should not be overruled. Because we conclude that the trajectory of federal ***antitrust law***, as informed by recent antitrust scholarship, clearly is diverging from the traditional per se treatment of tying arrangements, we agree with the plaintiffs that the trial court should not have found the list-back agreements at issue in this case unenforceable without first engaging in a full market analysis.

1

Before we review the evolution of the United States Supreme Court's tying jurisprudence, it will be instructive briefly to review some of the developments in antitrust scholarship that precipitated that evolution. Tying was among the first areas in which modern antitrust theory—often associated with the so-called "law and economics" **[***17]** or "Chicago school" of thought—diverged from courts' traditional approach to competition problems. Beginning in the 1970s, antitrust scholars began to challenge the two pillars that had supported courts' per se treatment of tying arrangements, namely, the dual monopoly profit theory and the axiom that tying typically confers no economic benefit or value. Scholars theorized—and purported to demonstrate—that, far from being inherently anticompetitive, most tying agreements **[**717]** are actually procompetitive.[12] See, e.g., D. Carlton & M. Waldman, "Robert Bork's Contributions **[*191]** to Antitrust Perspectives on Tying Behavior," 57 J.L. & Econ. S121, S121-22 (2014); R. Posner, "The Chicago School of Antitrust Analysis," 127 U. Pa. L. Rev. 925, 925-26 (1979). They also established that, in most instances, control over a tying product does not allow a monopolist to garner additional profits by cornering the market for a tied product. See, e.g., Scheiber v. Dolby Laboratories, Inc., 293 F.3d 1014, 1020 (7th Cir. 2002) ("as [modern] cases and a tidal wave of legal and economic scholarship point out, the idea that you can

---

[12] A tying arrangement, such as requiring that consumers purchase laces in tandem with a new pair of shoes or commit to buying a vendor's paper when purchasing its photocopy machines, might, for example, result in increased efficiencies, satisfy consumer preferences for bundled sales, protect a seller's good will, or facilitate economically desirable forms of price discrimination. See, e.g., 9 P. Areeda & H. Hovenkamp, supra, ¶ 1703g, pp. 51-54; 9 P. Areeda & H. Hovenkamp, supra, ¶ 1720, pp. 259-61; D. Carlton & M. Waldman, "Robert Bork's Contributions to Antitrust Perspectives on Tying Behavior," 57 J.L. & Econ. at S121-26 (2014).

use tying to lever your way to a second . . . monopoly is economic nonsense"), cert. denied, *537 U.S. 1109, 123 S. Ct. 853, 154 L. Ed. 2d 781 (2003)*.

At a more fundamental level, recent scholarship has highlighted the difficulty in distinguishing between **[***18]** a packaged sale that is a tie—and, thus, presumptively illegal under traditional antitrust jurisprudence—and a product or service *bundle*, which is presumptively legal and consumer friendly. As one author has explained, "[t]he most robust statement one can make about tying is that it is ubiquitous. Consider the following examples: shoes are sold in pairs; hotels sometimes offer breakfast, lunch or dinner tied with the room; there is no such a thing as an unbundled car; and no self-respecting French restaurant would allow its patrons to drink a bottle of wine not coming from its cellar." C. Ahlborn et al., "The Antitrust Economics of Tying: A Farewell to Per Se Illegality," 49 Antitrust Bull. 287, 287 (2004); see also K. Hylton &M. Salinger, "Tying Law and Policy: A Decision-Theoretic Approach," 69 Antitrust L.J. 469, 526 (2001) ("tying is so pervasive even in competitive markets that there is ample evidence that procompetitive tying is a common occurrence").

Finally, antitrust scholars have cautioned against the use of tying law to resolve "contract dispute[s] in which one side got the benefit of the bargain and then sought to have the contract declared a violation of the *Sherman Act*." **[*192]** K. Hylton &M. Salinger, "Reply to Grimes: Illusory Distinctions **[***19]** and Schisms in Tying Law," 70 Antitrust L.J. 231, 239 (2002); see also *Hemlock Semiconductor Operations, LLC v. SolarWorld Industries Sachsen GmbH, 867 F.3d 692, 701 (6th Cir. 2017)* ("illegality defenses based on ***antitrust law*** are disfavored, especially when allowing the defense would let the buyer escape from its side of a bargain after having received a benefit" (internal quotation marks omitted)). See footnote 3 of this opinion.

2

In the four decades since this court decided *Hossan-Maxwell, Inc.*, the foregoing scholarship has prompted the United States Supreme Court to rethink its approach to tying claims. In *Jefferson Parish Hospital District No. 2 v. Hyde, supra, 466 U.S. at 32-33*, Justice O'Connor authored a concurring opinion, joined by three other members of the court, in which she argued that the tying arrangements at issue—patients obtaining surgery at the defendant hospital were **[**718]** required to use a designated anesthesiology practice—should be evaluated under the rule of reason. More generally, the concurrence, citing to recent antitrust scholarship, argued that "[t]he time has . . . come to abandon the 'per se' label and refocus the inquiry on the adverse economic effects, and the potential economic benefits, that the tie may have."[13] *Id., 35* (O'Connor, J., concurring in the judgment). Although a majority of the court continued to apply the *Northern Pacific* ***[***20]*** quasi-per se rule to tying **[*193]** claims in its next tying case; see *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*; the dissent, penned by Justice Scalia and joined by Justices O'Connor and Thomas, again recognized the "intense criticism of the [court's] tying doctrine in academic circles . . . ." *Id., 487*.

Finally, in *Illinois Tool Works, Inc.*, a majority of the Supreme Court for the first time expressly repudiated the court's traditional disapproval of tying agreements. Justice Stevens, writing for a unanimous court, undertook "a fresh examination of the history of both the judicial and legislative appraisals of tying arrangements . . . informed by extensive scholarly comment and a change in position by the administrative agencies charged with enforcement of the antitrust laws." (Citation omitted.) *Illinois Tool Works Inc. v. Independent Ink, Inc., supra, 547 U.S. 33*. The court observed that, "[o]ver the years . . . [its] strong disapproval of tying arrangements has substantially diminished. Rather than relying on assumptions, in its more recent opinions the [c]ourt has required a showing of market power in the tying product." *Id., 35*. Justice Stevens further explained that, whereas the court traditionally had been of the view that "[t]ying arrangements serve hardly **[***21]** any purpose beyond the suppression of competition," that view

---

[13] Justice O'Connor's concurring opinion went so far as to argue that tying arrangements should be deemed presumptively *legal*, unless (1) the seller has market power in the tying product market, (2) there is "a substantial threat that the tying seller will acquire market power in the [tied product] market," and (3) the tied product is one that some consumers might wish to purchase separately without also purchasing the tying product. *Jefferson Parish Hospital District No. 2 v. Hyde, supra, 466 U.S. at 37-39*. If all three conditions are met, then the antitrust claims would be evaluated under a rule of reason analysis. Id.

had evolved with the recognition that "tying arrangements may well be procompetitive . . . ." (Internal quotation marks omitted.) Id., 35-36.

Having thus framed the issue, the court in Illinois Tool Works, Inc., proceeded to expressly overrule one "vestige of [its] historical distrust of tying arrangements . . . ." Id., 38. As we discussed, in previous decisions, the United States Supreme Court had indicated that the first prong of the Northern Pacific rule—possession of economic power in the tying product—can be established not only by proving that a seller holds a dominant **[*194]** position in a defined market for the tying product, but also by demonstrating that the tying product is presumed to be uniquely desirable. In Northern Pacific itself, the court suggested that the unique configuration and choice location of the defendant's land was sufficient to confer economic power. Northern Pacific Railway Co. v. United States, supra, 356 U.S. 7; see also id., 16-20 (Harlan, J., dissenting). In prior decisions, the court had likewise held that the monopoly conferred by a patent presumptively confers market power for purposes **[**719]** of a tying claim. See, e.g., International Salt Co. v. United States, supra, 332 U.S. 395-96; International Business Machines Corp. v. United States, supra, 298 U.S. 136-37. Indeed, it was in the context of intellectual property that the Supreme **[***22]** Court initially held that tying arrangements are per se illegal. See Illinois Tool Works, Inc. v. Independent Ink, Inc., supra, 547 U.S. 33.

In Illinois Tool Works, Inc., the issue was whether the court should depart from its long established rule that a patent holder presumptively exerts market power over the patented product for purposes of a tying allegation. Id., 31. Overruling several of its prior tying decisions; see id., 38-40; the court held that "the mere fact that a tying product is patented does not support . . . a presumption [of market power]." Id., 31. The court emphasized that its new approach, which requires proof that the seller holds market power in the relevant market, is consistent with "the vast majority of academic literature on the subject." Id., 43-44 and n.4.

3

The parties to the present case disagree as to the scope of the Supreme Court's decision in Illinois Tool Works, Inc. The defendants contend that its holding was limited to patented products, whereas the plaintiffs contend that the court intended to depart more fundamentally from its prior view that the uniqueness of a **[*195]** tying product can presumptively establish economic power for purposes of Northern Pacific. The narrow reading advocated by the defendants is consistent with the fact that only the question **[***23]** of patents was before the court in Illinois Tool Works, Inc., and that the court, in overruling its prior patent tying cases, relied on various factors that are specific to the patent context: recent congressional amendments to the patent misuse statutes, new guidance from the federal agencies charged with the enforcement of the antitrust laws, and the views of antitrust scholars regarding the overlap of intellectual property and ***antitrust law***. Id., 41-45.

The plaintiffs' broader reading of Illinois Tool Works, Inc., however, finds support in the manner in which the Supreme Court framed its holding, which appeared to extend beyond the patent context. ***HN6***[] "Many tying arrangements," the court wrote, "even those involving patents and requirements ties, are fully consistent with a free, competitive market. . . . Congress, the antitrust enforcement agencies, and most economists have all reached the conclusion that a patent does not necessarily confer market power upon the patentee. Today, we reach the same conclusion, and therefore hold that, *in all cases involving a tying arrangement*, the plaintiff must prove that the defendant has market power in the tying product." (Citations omitted; emphasis added.) **[***24]** Id., 45-46. The fact that the Supreme Court's restrictive tying jurisprudence originated in the patent context also suggests that that court's recent change of direction with respect to the tying of patented products evinces a broader rethinking of tying generally. Indeed, it would be odd if the Supreme Court were to conclude that holding a patent—a legal monopoly—over a product is not sufficient to confer economic power but that mere ownership of a parcel of land, without more, is sufficient.

[*196] Our impression that the plaintiffs have the better of this argument is reinforced by the fact that***HN7***[] most of the lower federal courts and our sister state courts that have considered the question have **[**720]** adopted the broader reading of Illinois Tool Works, Inc., and interpreted the decision to mean that the uniqueness of a tying product no longer gives rise to a presumption of economic power. Market power in a defined product and geographic market must be established to satisfy the first prong of *Northern Pacific*, even with respect to unique, nonpatented tying products such as land.[14]

In *Michigan Division-Monument Builders of North America v. Michigan Cemetery Assn., 458 F. Supp. 2d 474, 476-77 (E.D. Mich. 2006)*, aff'd, *524 F.3d 726 (6th Cir. 2008)*, the plaintiffs, a class of independent monument dealers, **[***25]** alleged that the defendant cemeteries violated the *Sherman Act* by requiring that consumers who wished to buy a burial plot also to purchase monuments and related services from the cemetery. They alleged that this tying scheme was per se illegal because the uniqueness of burial land meant that each cemetery constituted a distinct product and geographic market. *Id., 477*. The federal District Court, granting the defendants' **[*197]** motion to dismiss the tying claims, concluded that the alleged relevant geographic market—each individual cemetery—failed as a matter of law. *Id., 480-85*. The court reached that conclusion because, in its view, "the reasoning in [*Illinois Tool Works, Inc.*] makes it clear that presumptions, whether based on the uniqueness of a patent or the uniqueness of land, cannot support a valid antitrust claim." *Id., 484*.

The United States Court of Appeals for the Sixth Circuit affirmed, opining that, under *Illinois Tool Works, Inc.*, "[t]he idea that all land is unique . . . is insufficient to support a finding of market power." *Michigan Division-Monument Builders of North America v. Michigan Cemetery Assn., supra, 524 F.3d at 732*. The Court of Appeals distinguished the holding of *Northern Pacific*, concluding that, in that case, the Supreme Court had affirmed a finding of economic power not because commercial **[***26]** land in general is unique but, rather, because there was other evidence showing that the specific location of the land lent the seller a competitive advantage that others could not achieve. *Id., 733*. Specifically, the land at issue in *Northern Pacific* was strategically located in checkerboard fashion within economic distance of key transportation facilities and, therefore, was essential to the business activities of those who purchased or leased it. *Id., 732-33*; see *Northern Pacific Railway Co. v. United States, supra, 356 U.S. 7*.

In so holding, the Sixth Circuit joined several other appellate courts to have rejected—even prior to *Illinois Tool Works, Inc.*—the theory that the uniqueness of land, standing alone, is sufficient to create economic power for purposes of the first prong of the *Northern Pacific* rule. See, **[**721]** e.g., *Smugglers Notch Homeowners' Assn., Inc. v. Smugglers' Notch Management Co., Ltd., supra, 414 Fed. Appx. 376* (rejecting "unique geographic qualities of ski areas" as basis for finding of market **[*198]** power (internal quotation marks omitted)); *Baxley-DeLamar Monuments, Inc. v. American Cemetery Assn., 938 F.2d 846, 851 (8th Cir. 1991)* ("[A]ll land is unique, but the mere fact that the tying product is real estate does not convey market power. . . . In numerous other tying cases involving real estate as the tying product, courts have held that the real estate must have some particular strategic or competitive importance in order to carry market power." **[***27]** (Citations omitted.)); *McCormick v. Bradley, 870 P.2d 599, 604-605 (Colo. App. 1993)* (criticizing and declining to follow *Hossan-Maxwell, Inc.*), cert. denied, *Colorado Supreme Court, Docket No. 93SC773, 1994 Colo. LEXIS 331 (April 11, 1994)*; *Vande Guchte v. Kort, 13 Neb. App. 875, 887, 703 N.W.2d 611 (2005)* ("we do not accept the notion that the 'uniqueness' of land by itself establishes economic power").

More generally, other federal courts have read *Illinois Tool Works, Inc.*, to broadly hold that market power in a defined product and geographic market *always* must be established to proceed under the quasiper se rule in *Northern Pacific*. See, e.g., *Auraria Student Housing at the Regency, LLC v. Campus Village Apartments, LLC, 843 F.3d 1225, 1246 (10th Cir. 2016)*; *Batson v. Live Nation Entertainment, Inc., 746 F.3d 827, 831-32 (7th Cir. 2014)*;

---

[14] We note that defining a relevant product and geographic market for purposes of the federal antitrust laws is a highly technical process that typically requires expert testimony. See, e.g., *McWane, Inc. v. Federal Trade Commission, 783 F.3d 814, 829 (11th Cir. 2015)*, cert. denied, ___ ***U.S. ___, 136 S. Ct. 1452, 194 L. Ed. 2d 550 (2016)***; *Hynix Semiconductor, Inc. v. Rambus, Inc., Docket No. CV-00-20905 RMW, 2008 U.S. Dist. LEXIS 123822, 2008 WL 73689, *10 n.13 (N.D. Cal. January 5, 2008)*. The most common test of a proposed market definition asks whether there is sufficient cross-elasticity of demand that a small but significant and nontransitory price increase will lead customers to look elsewhere—both productwise and geographically—for substitutes. See, e.g., *DSM Desotech, Inc. v. 3D Systems Corp., 749 F.3d 1332, 1339-40 (2014)*; ***Theme Promotions, Inc. v. News America Marketing FSI, 546 F.3d 991, 1002 (2008)***. Only once the relevant product and geographic markets have been carefully defined can the trier of fact assess the relevant antitrust variables, whether it be market share, economic power, market concentration, barriers to entry, or the like.

Sheridan v. Marathon Petroleum Co., LLC, 530 F.3d 590, 593-94 (7th Cir. 2008); *Compliance Mktg. v. Drugtest, Inc., Docket No. 09-CV-01241-JLK, 2010 U.S. Dist. LEXIS 34315, 2010 WL 1416823, *7 (D. Colo. April 7, 2010)*; *Mediacom Communications Corp. v. Sinclair Broadcast Group, Inc., 460 F. Supp. 2d 1012, 1027 (S.D. Iowa 2006)*. It seems clear, then, that a per se ban on list-back agreements, as applied in *Hossan-Maxwell, Inc.*, is inconsistent with federal ***antitrust law*** as it has evolved over the past several decades.[15]

[*199] C

We next consider three arguments offered by the defendants that have not been fully addressed by the preceding discussion. First, the defendants contend that their antitrust special defense invokes not only the *Sherman Act* and its state analogues but also *General Statutes § 35-29*, the Connecticut analogue of *§ 3 of the Clayton Act, 15 U.S.C. § 14*. The point matters, they contend, because, in *Hossan-Maxwell, Inc.*, this court, following what appeared **[***28]** at that time to be the guidance of the United States Supreme Court in *Times-Picayune Publishing Co. v. United* ***[**722]*** *States, supra, 345 U.S. 594*, concluded that tying claims brought under the *Clayton Act* or its state analogue need to satisfy only one prong of the rule set forth in *Northern Pacific*. See *State v. Hossan-Maxwell, Inc., supra, 181 Conn. 662*. That is, a tie could be deemed illegal per se merely on the basis of the fact that it foreclosed a not insubstantial volume of trade in the tied product, even if the seller lacked economic power in the tying product market. If that were the case, then the analysis in part II B of this opinion, which addresses only the first prong of the *Northern Pacific* rule, would likely be moot, insofar as the plaintiffs do not dispute that a substantial volume of trade is at issue.

[*200] Although that reading of *Times-Picayune Publishing Co.* was still considered plausible at the time that *Hossan-Maxwell, Inc.*, was decided, since then, the federal courts and antitrust scholars almost universally have concluded that the standard for tying claims brought under the *Clayton Act* is no different from the standard for those brought under the *Sherman Act*. See, e.g., *Sheridan v. Marathon Petroleum Co., LLC, supra, 530 F.3d 592* ("[t]hough some old cases say otherwise, the standards for adjudicating tying under the two statutes are now recognized **[***29]** to be the same"); *De Jesus v. Sears, Roebuck & Co., 87 F.3d 65, 70 (2d Cir.)* ("[W]e have required allegations and proof of five specific elements before finding a tie illegal . . . . These elements are common to claims asserted under either the *Sherman or Clayton Act*s." (Citation omitted; internal quotation marks omitted.)), cert. denied, *519 U.S. 1007, 117 S. Ct. 509, 136 L. Ed. 2d 399 (1996)*; *In re Data General Corp. Antitrust Litigation, 490 F. Supp. 1089, 1100 (N.D. Cal. 1980)* ("It was traditionally understood that a tying arrangement would run afoul of [the] *Clayton [Act]* if it satisfied . . . either . . . of the elements required under the *Sherman Act*. . . . Recently, however, the neat distinction between tying arrangements that violate [the] *Sherman [Act]* and those that violate [the] *Clayton [Act]* has faded beyond recognition." (Citation omitted.)); 2 P. Areeda & H. Hovenkamp, ***Antitrust Law***, (3d Ed. 2007) ¶ 301c, pp. 9-11 and n.28 (referring to *Times-Picayune Publishing Co.* as "one obsolete exception" to prevailing view); H. Hovenkamp, "Tying Arrangements in the Real Estate Market: Federal ***Antitrust Law*** and Local Land Development Policy," 33 Hastings L.J. 325, 334 (1981) ("[s]ince *Times-Picayune [Publishing Co.]* was decided, [the] distinction between the [*Sherman Act* and the *Clayton Act*] has increasingly been disregarded"). Accordingly, we need not resolve the parties' dispute as to whether the defendants **[***30]**

---

[15] Indeed, given the recent evolution of the tying doctrine in the federal courts, it is fair to ask whether the *Northern Pacific* rule, in its present form, should continue to be considered a per se prohibition on tying in any sense. See, e.g., 9 P. Areeda & H. Hovenkamp, ***Antitrust Law***, supra, ¶ 1728c, pp. 375-76 (explaining that most lower courts now allow defendants to raise defense that tying arrangement is affirmatively justified by fact that it confers benefits not available by alternative means); E. Elhauge, "Tying, Bundled Discounts, and the Death of the Single Monopoly Profit Theory," *123 Harv. L. Rev. 397, 425-26 (2009)* ("It . . . now seems likely that a tie can be justified by evidence that the tie is the least restrictive way to achieve efficiencies large enough to offset the anticompetitive effects. Accordingly, today it is more accurate to read Supreme Court precedent on tying as embracing a rule of reason, where anticompetitive effects must be shown or inferred and procompetitive justifications are admissible."); see also *United States v. Microsoft Corp., 253 F.3d 34, 84, 346 U.S. App. D.C. 330 (D.C. Cir.)* (rule of reason, rather than per se analysis, governs legality of tying arrangements involving platform software products), cert. denied, ***534 U.S. 952, 122 S. Ct. 350, 151 L. Ed. 2d 264 (2001)***.

adequately **[*201]** pleaded a violation of *§ 35-29*, insofar as the same legal standard applies to tying claims under both federal acts and their state counterparts.

Second, the defendants contend that other courts that have considered the issue have agreed with *Hossan-Maxwell, Inc.*, that any list-back agreement that forecloses a not insubstantial volume of broker commissions is per se illegal. That appears to have been the consensus view in the late 1970s and early 1980s. See footnote 10 of this opinion and accompanying text. Although we have identified some contrary authority even from that time period,[16] the **[**723]** important point is that all of the cases on which the defendants rely were decided more or less contemporaneously with *Hossan-Maxwell, Inc.*, and well before the evolution in federal tying law that we discussed in part II B of this opinion. The fact that those cases were decided consistently with *Hossan-Maxwell, Inc.*, is, therefore, of little moment.

Third, the defendants emphasize that, regardless of whether *federal* ***antitrust law*** treats land as conferring economic power for purposes of the *Northern Pacific* rule, this court concluded in *Hossan-Maxwell, Inc.*, that land is inherently unique as a matter **[***31]** of Connecticut common law. They contend, therefore, that the logic of that decision remains sound regardless of whether federal law has taken a different direction.

[*202] It is true that, in *Hossan-Maxwell, Inc.*, our conclusion that the first prong of the *Northern Pacific* rule was satisfied rested in part on the fact that, "[i]n Connecticut, the uniqueness and special characteristics of a particular plot of land have long been recognized. *Anderson v. Yaworski, 120 Conn. 390, 395, 399, 181 A. 205 [1935]*." *State v. Hossan-Maxwell, Inc., supra, 181 Conn. 665*. We agree with the plaintiffs, however, that this court's reliance on that principle, and on *Anderson*, was misplaced.

In *Anderson*, this court simply reiterated the well established principle that contracts for the sale of real estate usually may be specifically enforced because each parcel of land has its own particular characteristics such that a buyer may not consider an equivalently priced parcel to be an adequate substitute. *Anderson v. Yaworski, supra, 120 Conn. 395*. But the fact that a parcel of land is deemed to be unique for purposes of property and contract law has little, if anything, to do with whether it is unique for purposes of ***antitrust law***. ***Antitrust law*** is concerned with whether a seller has economic power—the ability to sell a product at a supracompetitive price—which usually **[***32]** is possible only when a seller controls a substantial share of a defined market for a product for which there are no adequate substitutes. See, e.g., *Sheridan v. Marathon Petroleum Co., LLC, supra, 530 F.3d 594*; *American Council of Certified Podiatric Physicians & Surgeons v. American Board of Podiatric Surgery, Inc., 185 F.3d 606, 622 (6th Cir. 1999)*; *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436-37 (3d Cir. 1997)*, cert. denied sub nom. *Baughans, Inc. v. Domino's Pizza, Inc., 523 U.S. 1059, 118 S. Ct. 1385, 140 L. Ed. 2d 645 (1998)*.

In theory, a parcel of land could be sufficiently unique to allow the owner to charge a supracompetitive price. This appears to have been the case in *Northern Pacific*, **[*203]** in which the land at issue afforded unique access to essential transportation facilities.[17] *Northern Pacific Railway Co. v. United States, supra, 356 U.S. 7*. But the fact that each house, for example, is unique in various **[**724]** ways does not permit the owner to charge a

---

[16] See, e.g., *Fran Welch Real Estate Sales, Inc. v. Seabrook Island Co., 621 F. Supp. 128, 137-38 (D.S.C. 1985)* (summary judgment on real estate listback claim deemed inappropriate when (1) relevant market had not been defined, and (2) six month exclusive listing agreement was likely too short to unreasonably restrain competition), aff'd, *809 F.2d 1030 (4th Cir. 1987)*; *Outdoor Resorts of America, Inc. v. Outdoor Resorts at Nettles Island, Inc., 379 So. 2d 471, 471-72 (Fla. App.)* (rule of reason governed claim that purchase of recreational vehicle lot was tied to developer's exclusive right to rent lots at 50 percent commission when not in use), cert. denied, ***388 So. 2d 1116 (Fla. 1980)***; see also *Vande Guchte v. Kort, supra, 13 Neb. App. 887* (holding that builder tie-in contract, which conditioned sale of lot on use of specific builder, was not per se illegal).

[17] In some sense, then, *Northern Pacific* can be understood as an application of the essential facilities doctrine, which applies in antitrust cases in which a monopolist controls access to uniquely necessary infrastructure, such as a railroad or a port. See, e.g., *MCI Communications Corp. v. American Telephone & Telegraph Co., 708 F.2d 1081, 1132 (7th Cir.)*, cert. denied, ***464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)***.

supracompetitive price when it comes time to sell. Indeed, *Anderson* itself implicitly recognized this concept by noting that the *market value* of a parcel of land may not reflect its *emotional value* in the mind of the purchaser. *Anderson v. Yaworski, supra, 120 Conn. 395-96*. At no point does *Anderson* suggest that a property's "peculiar and special" emotional value; (internal quotation marks omitted) *id., 396*; somehow translates into an above market economic value.

Indeed, many products and services are unique. Land, used cars, purebred dogs, and private piano lessons are examples. But the fact that these things are not wholly fungible does not mean that every seller wields economic power **[***33]** for antitrust purposes. In a sense, the breeder has a tiny monopoly on Fido. There is no other dog in the world quite like him, and his eventual owner may come to think of him as priceless. Still, if the market price for a purebred German shepherd puppy in Hartford is $1200, and if other breeders have other German shepherd puppies for sale at that price, then there is no reason to expect that Fido's breeder will be able to exercise economic power and charge significantly more for him simply because of his inherent uniqueness. By extension, if Fido's breeder began requiring that each puppy buyer also purchase a leash from him, there would be little concern that the sale of Fido might unreasonably restrain competition in the leash market. **[*204]** For similar reasons, we repudiate *Hossan-Maxwell, Inc.*, to the extent that it stands for the proposition that the uniqueness of a parcel of land, standing alone, confers market power for purposes of *Northern Pacific*.

D

To reiterate, ***HN8***[] in light of what we perceive to be the clear trajectory of federal tying law, as informed by modern antitrust scholarship, we overrule *Hossan-Maxwell, Inc.*, to the extent that it held that real estate list-back agreements **[***34]** affecting a not insubstantial volume of commerce are per se illegal. ***HN9***[] We hold instead that challenges to list-back agreements, like most other forms of tying agreements, are subject to the five element test adopted by the United States Court of Appeals for the Second Circuit in applying *Northern Pacific* and its progeny: "To state a valid tying claim . . . a [party] must allege facts plausibly showing that: [1] the sale of one product (the tying product) is conditioned on the purchase of a separate product (the tied product); [2] the seller uses actual coercion to force buyers to purchase the tied product; [3] the seller has sufficient economic power in the tying product market to coerce purchasers into buying the tied product; [4] the tie-in has anticompetitive effects in the tied market; and [5] a not insubstantial amount of . . . commerce is involved in the tied market." *Kaufman v. Time Warner, 836 F.3d 137, 141 (2d Cir. 2016)*; accord *Yentsch v. Texaco, Inc., 630 F.2d 46, 56-57 (2d Cir. 1980)*. The leading treatise on the subject recognizes this as the prevailing test for tying claims. See 9 P. Areeda & H. Hovenkamp, supra, ¶ 1702, pp. 33-34 and n.1. We further emphasize that the third element of the test, economic power, typically must be established by proving that the defendant wields market power in a defined product and **[***35]** geographic market. *Kaufman v. Time Warner, supra, 143*. "[T]he best way to plead market power is to allege facts that, if proven, establish directly that **[*205]** the price of the tied package is higher than the price of components sold in competitive markets." (Internal quotation marks omitted.) Id.

[725]** III

Finally, having clarified the standards that govern antitrust challenges to real estate list-back agreements, we consider whether the trial court's judgments can be affirmed, under the proper legal standard, on the basis of the trial court's express and implicit factual findings. For the reasons that follow, we conclude that they cannot.

A

First, and most important, the defendants did not plead the existence of any particular product or geographic market with respect to either the tying product (land of some sort) or the tied product (real estate broker services of some sort). Nor was any expert testimony introduced that would allow the trial court (1) to define those markets with any sort of precision for purposes of assessing economic power, (2) to quantify Woodland's power over the relevant property market, or (3) to assess the plaintiffs' share or foreclosure of the relevant broker service market.

The trial court did not make **[***36]** any relevant findings in this respect. It simply stated that, under *Hossan-Maxwell, Inc.*, the uniqueness of residential property is sufficient evidence of economic power to satisfy the first prong of Northern Pacific and, thus, that Woodland, as the sole owner of the Reserve parcels, had sufficient economic power to restrain competition in the market for the tied product, which it identified as real estate listing broker's services in the greater Danbury area. The trial court did not explain how it reached the conclusion that the relevant tied product market was limited to the greater Danbury area rather than **[*206]** some larger geographic area, or explain why the relevant market was taken to be listing broker's services rather than a broader market, such as broker's services writ large, or a narrower one, such as the services of listing brokers specializing in large commercial and multifamily residential projects. The court also did not make any findings to support its apparent determination that the Reserve constituted the entire tying product market, such as that the Reserve was uniquely desirable and economically necessary because of its flexible zoning or other distinct characteristics. **[***37]** [18]

The Appellate Court, in affirming the trial court's judgments, implied that, in its view, the relevant tying product market consisted of "large area[s] of undeveloped land . . . in the densely populated Northeast"; the court opined that the Reserve was a rare example thereof. Reserve Realty, LLC v. Windemere Reserve, LLC, supra, 174 Conn. App. 145. It is unclear on what basis the Appellate Court reached these conclusions. Although there was some evidence in the record suggesting that there were few locations in Fairfield County suitable for building a 450,000 to 1.5 million square foot project, and also that flexible space with the sort of **[**726]** zoning approvals that the Reserve had obtained was very desirable, there is no indication that either (1) the trial court credited that evidence, or (2) the evidence bore **[*207]** out the Appellate Court's apparent belief that large tracts of undeveloped land represent the relevant product market or that the northeastern United States (however that term might be defined) represents the relevant geographic area. Specifically, there is no evidence in the record by which the Appellate Court could have applied the governing test and determined whether a small but significant and nontransitory increase in price with respect to the **[***38]** Reserve, or portions thereof, could be sustained or would lead customers to look elsewhere for substitute property. See footnote 14 of this opinion.

For their part, the defendants have taken the seemingly contradictory positions that either (1) the Reserve constitutes its own unique, singular product and geographic market, or (2) the relevant property market is national in scope. The fact that the defendants and the courts below were able to articulate four different, facially plausible but incommensurate geographic market definitions—the Reserve itself, the greater Danbury area, the Northeast, and the entire United States—highlights why expert economic testimony is necessary to resolve the issue of whether Woodland held sufficient power in a defined geographic market for land of some particular sort that it could foreclose competition and coerce buyers into accepting supracompetitive prices in some particular product market.

B

The second reason that the judgments cannot be sustained is that, to establish the third and fourth elements of a tying claim—economic power and anticompetitive effect—a buyer typically must be able to establish that the combined price for the tying product plus **[***39]** the tied product exceeded the market price. Kaufman v. Time Warner, supra, 836 F.3d 143; 9 P. Areeda & H. Hovenkamp, supra, ¶ 1702, p. 36. The trial court made no findings to that effect, and we doubt that the current **[*208]** record would support such findings. At trial, a representative of Woodland offered undisputed testimony that, as a result of the need to resolve the plaintiffs' administrative appeal, Woodland agreed to a purchase price for parcels 13 and 15 that was significantly lower than what the parties ordinarily would have negotiated at arm's length. He further testified that, following a series of significant price reductions, the land sold for a mere fraction of the appraised value. There is no reason to believe, then, that the list-back agreements, on balance, had an anticompetitive effect on pricing.

---

[18] For these same reasons, the trial court's conclusions that the listing agreements violated General Statutes § 35-27, which prohibits attempted monopolization, and General Statutes § 35-28, which prohibits price fixing arrangements, also cannot be sustained. At the same time, the fact that the necessary market analyses were not performed means that we need not address the plaintiffs' other claims, such as that the Appellate Court incorrectly concluded that the defendants were coerced into agreeing to the list-back provisions and that the Reserve market was foreclosed to other commercial brokers.

We note that there was testimony at trial that three such "floating zone" properties were available in Danbury alone, which would seem to militate against the plaintiffs' theory that the Reserve was uniquely desirable. The trial court neither credited nor declined to credit that testimony.

Wenote in this regard that the fact that the defendants may have felt "forced" to accept the plaintiffs' broker services in order to acquire portions of the Reserve, while relevant to the second (coercion) prong of the Second Circuit test, says little to nothing about whether Woodland and the plaintiffs were able to exert market power or suppress competition. There are at least two reasons for this. First, the fact that a few individual buyers were sufficiently **[***40]** interested in a purchase to be willing to accept unwanted strings attached does not imply that, as a general matter, the sellers held market power. See, e.g., *McCormick v. Bradley, supra, 870 P.2d 604-605*; see also *Grappone, Inc. v. Subaru of New England, Inc., 858 F.2d 792, 796-97 (1st Cir. 1988)* ("'[M]arket power' . . . means significant market power—more than the mere ability to raise price only slightly, or only on occasion, or only to a few of a seller's many customers. . . . Of course, virtually every seller . . . has some **[**727]** customers who especially prefer its product. But to permit that fact alone to show market power is to condemn ties that are bound to be harmless, including some that may serve some useful social purpose." (Citations omitted; emphasis omitted.)); 9 P. Arreeda & H. Hovenkamp, ***Antitrust Law***, supra, ¶ 1718a, p. 244 (fact that tying arrangement interferes with customer **[*209]** choice generally is irrelevant to antitrust analysis).

Second, the record in the present case supports various, possible explanations as to why the defendants were reluctantly willing to accept Woodland's condition that they agree to use the plaintiffs' broker services. It may be, as the defendants contend, that obtaining flexible zoning permits for the Reserve gave Woodland market power because the property became uniquely desirable and, in essence, a market of one. It also **[***41]** may be the case, though, that Woodland offered the defendants a very favorable, below market price for the land, either because Woodland was desperate to terminate the defendants' zoning appeal that was blocking development of the Reserve or because the brokerage requirement itself lowered the value of the property. If the defendants were only "forced" to accept the brokerage provision insofar as that was necessary for them to get a sweetheart deal on the land, and they could have secured comparable land elsewhere at a higher, market price, then competition policy need not be overly concerned that two sophisticated parties, engaged in a unique negotiation, ultimately agreed to include the tie as one of many negotiated provisions.[19] At the very least, expert testimony was necessary to shed light on the **[*210]** fair market value of the property and the availability of any comparable properties. See *Grappone, Inc. v. Subaru of New England, Inc., supra, 858 F.2d 798* (citing *United States Steel Corp. v. Fortner Enterprises, Inc., 429 U.S. 610, 618 n.10, 620 n.13, 97 S. Ct. 861, 51 L. Ed. 2d 80 (1977)*, for proposition that, "to show market power, [the] plaintiff must show that an appreciable number of buyers accepted the tie *in the absence of other explanations for* [*their*] *willingness . . . to purchase the package*" (emphasis altered; internal quotation marks omitted)).

C

Third, **[***42]** ***HN10***[] competition policy generally is not offended when only minor foreclosure of competition in the tied market is possible. See 9 P. Areeda & H. Hovenkamp, supra, ¶ 1704a pp. 54-55; id., Æ 1709a, pp. 88-89. In the present case, even if the tied product market at issue were to be defined narrowly, such as to include only listing broker services for large commercial and multifamily residential properties in Danbury, it seems unlikely on this record either that the listing agreements could have permitted the plaintiffs to monopolize that **[**728]** market or that prevailing brokerage fees would rise as a result.[20]

---

[19] Although the trial court rejected the latter theory in its memorandum of decision, it did so not as the result of any contrary factual findings but, rather, because the court was of the view that, because any leverage that the defendants were able to assert by virtue of their administrative appeal was legal, it was irrelevant to the antitrust analysis. As we have explained, the court was mistaken in that regard.

Notably, the defendants conceded at trial that they proceeded to purchase the land, despite the list-back requirements, because it made good economic sense to do so and they believed that the deal was likely to be profitable. For their part, representatives of Woodland testified that they had procompetitive reasons for agreeing to adopt the list-back provisions in the first place, notably, the enhanced efficiency and quality control stemming from having a single team of brokers coordinate marketing for the Reserve, as well as the ability to negotiate *below market* commission rates.

[20] Of course, should a retrial ultimately be necessary, the parties will have the opportunity to make a record, and the trial court to make findings, about all of these factual issues. In this part of the opinion, we merely explain why, on the present record, we cannot impute to the trial court the findings necessary to sustain the judgment.

The land at issue accounts for a very small share—approximately 2 percent—of the total acreage of Danbury, which the trial court assumed to be the relevant geographic market.[21] Common experience suggests that **[*211]** the broker market features relatively low barriers to entry (new brokers easily can enter the market) and limited economies of scale (smaller brokerage companies and even individuals can effectively compete with larger firms because there is limited overhead, etc.). The listing agreements locked in a relatively low commission rate that may even have been below the market rate. Moreover, the agreements appear to apply only **[***43]** to the initial sale of each portion of the property, which represents a new addition to the town's building stock, so there is no long-term foreclosure (unlike in *Hossan-Maxwell, Inc.*) and no foreclosure of the existing building stock. Finally, the defendants testified that it was their ordinary practice to use their own in-house sales personnel, rather than other independent brokers, to market developments of this sort, and, in any event, prospective buyers were not precluded from using their own buyers' brokers, who could obtain a share of the commissions. In short, it seems highly unlikely that these agreements could permit the plaintiffs to corner the market for commercial broker services in Danbury, to the extent that that is the relevant market, or increase the average cost of broker commissions in that market. For all of these reasons, we conclude that, in light of our clarification of the legal standard governing antitrust challenges to tying arrangements, the trial court incorrectly determined that the defendants prevailed on their antitrust special defense.

The judgments of the Appellate Court are reversed and the cases are remanded to that court with direction to consider **[***44]** the plaintiffs' remaining claims.

In this opinion the other justices concurred.

End of Document

[21] The Reserve, taken as a whole, spans 546 acres. We may take judicial notice of the fact that this represents two percent of the 42 square mile area of the city of Danbury. See Connecticut Economic Resource Center, Danbury, Connecticut: CERC Town Profile 2019, (January 16, 2020), p. 1, available at http://s3-us-west-2.amazonaws.com/cerc-pdfs/2019/danbury-2019.pdf (last visited March 23, 2020).

HN1[] **Motions to Dismiss, Failure to State Claim**

In considering a motion to dismiss for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)*, a district court may consider the facts alleged in the complaint, documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint. A court should consider the motion by accepting all factual allegations as true and drawing all reasonable inferences in favor of the plaintiff. To withstand dismissal, a claimant must set forth enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. To state a plausible claim, the complaint's factual allegations must be enough to raise a right to relief above the speculative level.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Cartels & Horizontal Restraints, Sherman Act**

Liability under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, requires a contract, combination, or conspiracy, in restraint of trade or commerce. Because *§ 1* of the Sherman Act does not prohibit all unreasonable restraints of trade but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express. Stating such a claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. This standard simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Sherman Act > Claims

HN4[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

The ultimate existence of an agreement under ***antitrust law*** is a legal conclusion, not a factual allegation. A plaintiff may assert direct evidence that the defendants entered into an agreement in violation of the antitrust laws. However, plaintiffs are not required to mention a specific time, place or person involved in each conspiracy allegation. A complaint may, alternatively, present circumstantial facts supporting the inference that a conspiracy existed. A horizontal agreement may be inferred on the basis of conscious parallelism, when such interdependent conduct is accompanied by circumstantial evidence and plus factors. These plus factors may include: a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN5[] **Sherman Act, Claims**

Generally, without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality. The allegations must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action. Without that further circumstance pointing toward a meeting of the minds, an account of a defendant's commercial efforts stays in neutral territory. Examples of parallel conduct allegations that might be sufficient under Twombly's standard include parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties, and complex and historically unprecedented changes in pricing structure made at the very same time by multiple competitors, and made for no other discernible reason.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Sherman Act, Claims**

In the context of a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, at the motion-to-dismiss stage appellants must only put forth sufficient factual matter to plausibly suggest an inference of conspiracy, even if the facts are susceptible to an equally likely interpretation. Skepticism of a conspiracy's existence is insufficient to warrant dismissal; a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

HN7[] **Motion Practice, Content & Form**

In the context of motions, courts routinely decline to consider arguments mentioned only in a footnote on the grounds that those arguments are inadequately raised.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] Per Se Rule & Rule of Reason, Practices Governed by Per Se Rule

Generally speaking, the possibility of anticompetitive collusive practices is most realistic in concentrated industries. In an oligopolistic market, however, conscious parallelism or tacit collusion to raise or maintain prices is not per se unlawful because it could be the result of permissible, independent parallel conduct. Even conscious parallelism, a common reaction of firms in a concentrated market that recognize their shared economic interests and their interdependence with respect to price and output decisions is not in itself unlawful. At the motion to dismiss stage, however, plaintiffs need not offer evidence that tends to rule out the possibility that the defendants were acting independently. Instead, plaintiffs need only allege enough factual matter (taken as true) to suggest that an agreement was made.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN9[] Regulated Practices, Price Fixing & Restraints of Trade

In a case alleging price fixing, pretextual explanations for price increases can support an inference that defendants were not acting independently. Evidence of pretext, if believed by a jury, would disprove the likelihood of independent action.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN10[] Regulated Practices, Price Fixing & Restraints of Trade

Price increases which occur in times of surplus or when the natural expectation would be a general market decline, must be viewed with suspicion.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN11[] Sherman Act, Claims

It is adequate at the motion to dismiss stage to plead parallelism through a pattern of frequent price increases in similar intervals and amounts.

Antitrust & Trade Law > Sherman Act > Claims

HN12[] Sherman Act, Claims

In the context of a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, plaintiffs are not required to allege that defendants acted uniformly, only that they acted similarly, and the presence of some divergent conduct does not negate the allegations of other, parallel conduct.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints

HN13[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

When examined on its own, a defendant's membership in a trade association hardly renders plausible the conclusion that entity and certain other members are functioning as an ongoing, organized, structured enterprise in conducting their business. However, courts have also held that participation in a trade association, where defendants had opportunities to exchange information or make agreements, coupled with allegations of parallel conduct (i.e., imposing the same inflated surcharges), are sufficient to tie the defendants to the conspiracies.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] **Sherman Act, Claims**

In the context of a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, plaintiffs must allege a factual connection between each defendant and the alleged conspiracy. Group pleading, by which allegations are made against families of affiliated entities is simply insufficient to withstand review on a motion to dismiss. To provide reasonable notice to defendant of the claims against it, a complaint must plausibly suggest that the individual defendant actually joined and participated in the conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN15[] **Sherman Act, Claims**

In the context of a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, courts have found pretextual statements to be a viable plus factor.

Antitrust & Trade Law > Sherman Act > Scope

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Existence > Distinct & Separate Legal Entity

HN16[] **Antitrust & Trade Law, Sherman Act**

In the antitrust context, courts have held that absent allegations of anticompetitive conduct by the parent, there is no basis for holding a parent liable for the alleged antitrust violation of its subsidiary.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Existence > Distinct & Separate Legal Entity

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Illegal Purposes & Interests of Justice

HN17[] Alter Ego, Corporate Formalities

As a general matter, a corporate relationship alone is not sufficient to bind a parent corporation for the actions of its subsidiary. But there is an equally fundamental principle of corporate law, applicable to the parent-subsidiary relationship as well as generally, that the corporate veil may be pierced and the shareholder held liable for the corporation's conduct when, inter alia, the corporate form would otherwise be misused to accomplish certain wrongful purposes.

Business & Corporate Law > ... > Shareholders > Shareholder Duties & Liabilities > Piercing the Corporate Veil

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

HN18[] Shareholder Duties & Liabilities, Piercing the Corporate Veil

Under New York choice-of-law principles, the issue of whether the corporate veil may be pierced is determined under the law of the state of incorporation.

Business & Corporate Law > ... > Shareholders > Shareholder Duties & Liabilities > Piercing the Corporate Veil

HN19[] Shareholder Duties & Liabilities, Piercing the Corporate Veil

In New York, piercing the corporate veil requires a showing that: (1) the owners exercised complete domination of the corporation in respect to the transaction attacked; and (2) that such domination was used to commit a fraud or wrong against the plaintiff which resulted in plaintiff's injury.

Business & Corporate Law > ... > Shareholders > Shareholder Duties & Liabilities > Piercing the Corporate Veil

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

HN20[] Shareholder Duties & Liabilities, Piercing the Corporate Veil

In the context of piercing the corporate veil, courts have found that New York's choice-of-law rule applies the law of the subsidiary's state of incorporation.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Alter Ego

Evidence > Burdens of Proof > Allocation

HN21[] Piercing the Corporate Veil, Alter Ego

The Second Circuit has identified the following factors as useful for determining whether one company has dominated another under New York law:(1) the absence of the formalities and paraphernalia that are part and parcel of the corporate existence, i.e., issuance of stock, election of directors, keeping of corporate records and the like, (2) inadequate capitalization, (3) whether funds are put in and taken out of the corporation for personal rather than corporate purposes, (4) overlap in ownership, officers, directors, and personnel, (5) common office space, address and telephone numbers of corporate entities, (6) the amount of business discretion displayed by the allegedly dominated corporation, (7) whether the related corporations deal with the dominated corporation at arms length, (8) whether the corporations are treated as independent profit centers, (9) the payment or guarantee of debts of the dominated corporation by other corporations in the group, and (10) whether the corporation in question had property that was used by other of the corporations as if it were its own. The corporation's separate identity is generally respected, and the proponent of disregarding a corporation's separate identity bears a heavy burden.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Evidence > Burdens of Proof > Allocation

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Fraud & Misrepresentation

HN22[] **Alter Ego, Corporate Formalities**

Those seeking to pierce a corporate veil bear a heavy burden of showing that the corporation was dominated as to the transaction attacked and that such domination was the instrument of fraud or otherwise resulted in wrongful or inequitable consequences.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Business & Corporate Law > ... > Shareholders > Shareholder Duties & Liabilities > Piercing the Corporate Veil

HN23[] **Alter Ego, Corporate Formalities**

It is clear that simply owning, even wholly owning, a subsidiary is insufficient to pierce the corporate veil. Courts routinely refuse to pierce the corporate veil based on allegations limited to the existence of shared office space or overlapping management, allegations that one company is the wholly-owned subsidiary of another, or that companies are to be considered as a whole.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

HN24[] **Alter Ego, Corporate Formalities**

Announcements made to the general public regarding increased profits due to present market conditions on their own are insufficient to infer direction of a subsidiary by a parent. In determining whether complete control exists, courts have considered such factors as whether the corporations are treated as independent profit centers. No one factor is decisive.

Business & Corporate Law > Agency Relationships > Authority to Act > Actual Authority

Business & Corporate Law > Agency Relationships > Establishment > Consent

Business & Corporate Law > ... > Establishment > Elements > Right to Control by Principal

Business & Corporate Law > ... > Establishment > Proof of Agency > Burdens of Proof

HN25[] **Authority to Act, Actual Authority**

Agency is the fiduciary relation which results from the manifestation of consent by one person to another that the other shall act on his behalf and subject to his control, and consent by the other so to act. Essential to the agency relationship is the notion that the agent acts subject to the principal's direction and control. The agent is a party who acts on behalf of the principal with the latter's express, implied, or apparent authority. A full showing of agency supported by an accepted theory of agency or contract law is required, and generalized allegations of affiliation are insufficient. Anything short of requiring a full showing of some accepted theory under agency or contract law imperils a vast number of parent corporations.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN26[] **In Rem & Personal Jurisdiction, In Personam Actions**

On a *Fed. R. Civ. P. 12(b)(2)* motion to dismiss for lack of personal jurisdiction, the plaintiff bears the burden of showing that the court has jurisdiction over the defendant. A plaintiff may meet this burden by pleading in good faith legally sufficient allegations of jurisdiction, i.e., by making a prima facie showing of jurisdiction. A plaintiff can make such a prima facie showing through affidavits and supporting material containing sufficient facts which, if credited, would establish personal jurisdiction over the defendant. Where the issue is addressed on affidavits, all allegations are construed in the light most favorable to the plaintiff and doubts are resolved in the plaintiff's favor, notwithstanding a controverting presentation by the moving party.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Constitutional Sources

Governments > Courts > Authority to Adjudicate

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN27[] **Jurisdictional Sources, Constitutional Sources**

The requirement that a court have personal jurisdiction flows not from U.S. Const. art. III, but from the Due Process Clause. It represents a restriction on judicial power not as a matter of sovereignty, but as a matter of individual liberty. Federal courts must satisfy three requirements in order to exercise personal jurisdiction over an entity: (1) the entity must have been properly served, (2) the court must have a statutory basis for exercising personal jurisdiction, and (3) the exercise of personal jurisdiction must comport with constitutional due process.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Jurisdiction

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN28[] In Personam Actions, Due Process

Due process permits a court to exercise personal jurisdiction over a non-resident where the maintenance of the suit would not offend traditional notions of fair play and substantial justice. To determine whether exercising personal jurisdiction comports with due process, the court asks whether the defendant has sufficient minimum contacts with the forum to justify the court's exercise of personal jurisdiction. The constitutional minimum contacts inquiry for personal jurisdiction requires the court to distinguish between two forms of jurisdiction. Specific jurisdiction is available when the cause of action sued upon arises out of the defendant's activities in a state. General jurisdiction, in contrast, permits a court to adjudicate any cause of action against the defendant, wherever arising, and whoever the plaintiff. If the defendant has sufficient minimum contacts, the court proceeds to the second stage of the due process inquiry, and considers whether the assertion of personal jurisdiction is reasonable under the circumstances of the particular case.

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Preliminary Considerations > Venue

HN29[] Clayton Act, Jurisdiction

Section *§ 12* of the Clayton Act, *15 U.S.C.S. § 22*, provides for nationwide service of process of a corporation for any action under the antitrust laws. However, the service of process provision can properly confer personal jurisdiction over a defendant only when the action is brought in the district where the defendant resides, is found, or transacts business, that is, the district where *Section 12* venue lies.

Antitrust & Trade Law > Clayton Act > Jurisdiction

HN30[] Clayton Act, Jurisdiction

Second Circuit precedent clearly establishes that the Clayton Act only confers personal jurisdiction over a defendant when the action is brought in the district where the defendant resides, is found, or transacts business.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Governments > Courts > Authority to Adjudicate

Governments > Courts > Rule Application & Interpretation

Civil Procedure > ... > Pleadings > Service of Process > Service of Summons

HN31[] In Rem & Personal Jurisdiction, In Personam Actions

Fed. R. Civ. P. 4(k)(2) allows the exercise of personal jurisdiction by a federal district court when three requirements are met: (1) the claim must arise under federal law; (2) the defendant must not be subject to jurisdiction in any state's courts of general jurisdiction; and (3) the exercise of jurisdiction must be consistent with the United States Constitution and laws. *Rule 4(k)(2)* was specifically designed to correct a gap in the enforcement of federal law in international cases. The gap arose from the general rule that a federal district court's personal jurisdiction extends only as far as that of a state court in the state where the federal court sits.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Governments > Courts > Rule Application & Interpretation

Civil Procedure > ... > Pleadings > Service of Process > Service of Summons

HN32[] **In Rem & Personal Jurisdiction, In Personam Actions**

In the Second Circuit, plaintiffs need to certify that the foreign defendants are not subject to jurisdiction in any other state to meet the second requirement of *Fed. R. Civ. P. 4(k)(2)*.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Jurisdiction

HN33[] **Jurisdiction Over Actions, General Jurisdiction**

To assert general jurisdiction over a foreign corporation, it must be found that the corporation's affiliations with the State are so continuous and systematic as to render it essentially at home in the forum State.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > Pleadings > Service of Process > Service of Summons

HN34[] **In Personam Actions, Minimum Contacts**

The certification requirement of *Fed. R. Civ. P. 4(k)(2)* is a blanket requirement that is not applied on a case-by-case basis, and not requiring a certification would encourage similarly-situated plaintiffs—those suing foreign corporations under federal law—to omit any allegations tying defendants to a specific state, in hopes of engaging the broader minimum contacts analysis of *Rule 4(k)(2)*, which only requires contacts with the United States as a whole.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Constitutional Sources

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN35[] **In Rem & Personal Jurisdiction, Constitutional Limits**

Due process permits a court to exercise personal jurisdiction over a non-resident where the maintenance of the suit would not offend traditional notions of fair play and substantial justice. Courts in the Second Circuit apply a two-step analysis when determining whether a court's exercise of personal jurisdiction comports with due process: First, the court asks whether the defendant has sufficient minimum contacts with the forum to justify the court's exercise of personal jurisdiction. If the defendant has sufficient minimum contacts, the court proceeds to the second stage of the due process inquiry, and considers whether the assertion of personal jurisdiction is reasonable under the circumstances of the particular case.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > Pleadings > Service of Process > Service of Summons

HN36[] **In Rem & Personal Jurisdiction, Constitutional Limits**

The requirement under *Fed. R. Civ. P. 4(k)(2)* that the exercise of jurisdiction be consistent with the United States Constitution and laws, necessarily overlaps with the requirement that a court may only exercise personal jurisdiction if it comports with constitutional due process.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Purposeful Availment

HN37[] **In Personam Actions, Minimum Contacts**

Minimum contacts necessary to support specific jurisdiction exist where the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN38[] **In Personam Actions, Doing Business**

In the context of jurisdiction, single acts of commercial activity, when forming the basis of a plaintiff's claims, can satisfy the constitutional requirements of Due Process.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN39[] **In Rem & Personal Jurisdiction, In Personam Actions**

While it is proper for a court to rely on affidavits to establish jurisdictional facts, hearsay evidence submitted by a plaintiff is not sufficient to defeat a motion to dismiss for lack of personal jurisdiction.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN40[] **Defenses, Demurrers & Objections, Motions to Dismiss**

In the context of a motion to dismiss, prior to an evidentiary hearing or trial, where the issue is addressed on affidavits, all allegations are construed in the light most favorable to the plaintiff and doubts are resolved in the plaintiff's favor, notwithstanding a controverting presentation by the moving party.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Alter Ego

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Business & Corporate Law > Agency Relationships > Establishment > Elements

HN41[] **Piercing the Corporate Veil, Alter Ego**

For purposes of alleging presence within the judicial district sufficient to satisfy the Due Process Clause, a parent-subsidiary relationship does not itself create jurisdiction over the person unless the subsidiary is the alter ego of the parent or a mere agent acting at the parent's directions. Agency is a legal concept that depends on the existence of three elements: (1) the manifestation by the principal that the agent shall act for him; (2) the agent's acceptance of the undertaking; and (3) the understanding of the parties that the principal is to be in control of the undertaking. Agency relationships may be relevant to the existence of specific jurisdiction. As such, a corporation can purposefully avail itself of a forum by directing its agents or distributors to take action there.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Business & Corporate Law > Agency Relationships > Establishment

HN42[] **Alter Ego, Corporate Formalities**

A parent corporation may be sued in a venue when the relationship between the foreign parent and the local subsidiary validly suggests the existence of an agency relationship or the parent controls the subsidiary so completely that the subsidiary may be said to be simply a department of the parent. There is jurisdiction over a principal based on the acts of an agent where the alleged agent acted in the venue for the benefit of, with the knowledge and consent of, and under some control by, the nonresident principal. A plaintiff attempting to establish personal jurisdiction over a defendant who has never been present in the venue and only acted through subsidiaries or agents need only show that the subsidiary engaged in purposeful activities in this venue, that those activities were for the benefit of and with the knowledge and consent of the defendant, and that the defendant exercised some control over the subsidiary in the matter that is the subject of the lawsuit.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN43[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Specific jurisdiction cases are limited to those involving issues deriving from, or connected with, the very controversy that establishes jurisdiction.

Business & Corporate Law > Agency Relationships > Establishment

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Single Business Enterprise

HN44[] **Agency Relationships, Establishment**

Agency law does provide that where the parent is not involved in the day-to-day operations of its subsidiary, or, where the entities observe corporate formalities, the subsidiary and parent can nonetheless have an agency relationship because they are engaged in a common business enterprise.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN45[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Specific jurisdiction is confined to adjudication of issues deriving from, or connected with, the very controversy that establishes jurisdiction, and when there is no such connection, specific jurisdiction is lacking regardless of the extent of a defendant's unconnected activities in the State.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Fraud & Misrepresentation

HN46[] **Alter Ego, Corporate Formalities**

Under New York law, a court may pierce the corporate veil where 1) the owner exercised complete domination over the corporation with respect to the transaction at issue, and 2) such domination was used to commit a fraud or wrong that injured the party seeking to pierce the veil. This standard is relaxed where the alter ego theory is used not to impose liability, but merely to establish jurisdiction. In the jurisdictional context, a plaintiff need only show that the allegedly controlled entity was a shell for the allegedly controlling party.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Alter Ego

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Illegal Purposes & Interests of Justice

HN47[] **Piercing the Corporate Veil, Alter Ego**

Where the alter ego theory is used not to impose liability, but merely to establish jurisdiction, the factors to be considered in determining whether a corporation is a shell are: the failure to observe corporate formality; inadequate capitalization; intermingling of personal and corporate funds; the sharing of common office space, address and telephone numbers of the alleged dominating entity and the subject corporation; an overlap of ownership, directors, officers or personnel; the use of the corporation as a means to perpetrate the wrongful act against the plaintiff; as well as any other evidence tending to show that the company is being used as a mere shell. These factors are not exhaustive, nor is proof of any one factor or a combination of factors necessarily determinative. Rather, a finding that a corporation is an alter ego of another entity is warranted when doing so will achieve an equitable result.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Alter Ego

HN48[] **Piercing the Corporate Veil, Alter Ego**

It is not sufficient to establish one company is the alter ego of another for jurisdictional purposes by alleging that their corporate leadership overlaps.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Alter Ego

HN49[] **Piercing the Corporate Veil, Alter Ego**

An advertising strategy deciding not to present to its consumers the existence of a parent-subsidiary relationship is not equivalent to a showing that the parent corporation exercises any control over its subsidiary's operational or marketing activities.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Alter Ego

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN50[] **Piercing the Corporate Veil, Alter Ego**

Common business enterprise allegations showing that the reason for the subsidiary's existence is to perform services in furtherance of its parent's business that would otherwise have to be performed by the parent can be sufficient to establish specific jurisdiction.

Civil Procedure > Discovery & Disclosure > Discovery

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN51[] **Discovery & Disclosure, Discovery**

It is well settled under Second Circuit law that, even where plaintiff has not made a prima facie showing of personal jurisdiction, a court may still order discovery, in its discretion, when it concludes that the plaintiff may be able to establish jurisdiction if given the opportunity to develop a full factual record. In the Second Circuit, jurisdictional discovery is permitted where a plaintiff has made a sufficient start toward establishing personal jurisdiction, such that it appears there may be a colorable jurisdictional claim.

Civil Procedure > Pleading & Practice > Pleadings > Complaints

Civil Procedure > Discovery & Disclosure > Discovery

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN52[] **Pleadings, Complaints**

The Second Circuit distinguishes between allegations that are insufficiently developed warranting discovery and those that are sparse and conclusory requiring dismissal.

For Formosa Plastics Corporation U.S.A., Defendant (1:19cv480): Alan M. Unger, John Joseph Lavelle, Tom A. Paskowitz, LEAD ATTORNEYS, Sidley Austin LLP, New York, NY USA.

Judges: ELIZABETH A. WOLFORD, United States District Judge.

Opinion by: ELIZABETH A. WOLFORD

Opinion

[*150] DECISION AND ORDER

INTRODUCTION

Plaintiffs Miami Products & Chemical Co., Amrex Chemical Co., Inc., Finch Paper, LLC, Main Pool and Chemical Co., Inc., Midwest Renewable Energy, LLC, Perry's Ice Cream Company, Inc., and VanDeMark **[**12]** Chemical, Inc. (collectively "Plaintiffs") bring these putative class actions against defendants Olin Corporation ("Olin"), K.A. Steel Chemicals, Inc. ("K.A. Steel"), Occidental Petroleum Corporation ("Oxy"), Occidental Chemical Corporation ("OxyChem"), Westlake Chemical Corporation ("Westlake"), Shin-Etsu Chemical Co. Ltd. ("Shin-Etsu"), Shintech Incorporated ("Shintech"), Formosa Plastics Corporation ("Formosa"), and Formosa Plastics Corporation, U.S.A. ("Formosa USA") (collectively, "Defendants"), alleging violations of *Section 1 of the Sherman Act, 15 U.S.C. § 1*. (Dkt. 51).

Presently before the Court are: (1) a joint motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim by Olin, K.A. Steel, Oxy, OxyChem, Westlake, Shintech, and Formosa USA (Dkt. 79); (2) a motion to dismiss pursuant to *Rule 12(b)(6)* for failure to state a claim by Westlake (Dkt. 81); (3) a motion to dismiss pursuant to *Rule 12(b)(6)* for failure to state a claim by Shintech (Dkt. 82); (4) a motion to dismiss pursuant to *Rule 12(b)(6)* for failure to state a claim by Formosa USA (Dkt. 84); (5) a motion to dismiss pursuant to *Rule 12(b)(6)* for failure to state a claim by Oxy (Dkt. 80); (6) a motion to dismiss for lack of personal jurisdiction pursuant to *Federal Rule of Civil Procedure 12(b)(2)*, or in the alternative pursuant **[**13]** to *Rule 12(b)(6)* for failure to state a claim, by Formosa (Dkt. 86); and (7) a motion to dismiss pursuant to *Rule 12(b)(2)* for lack of personal jurisdiction by Shin-Etsu (Dkt. 103).

While by no means opining as to the likelihood of Plaintiffs' ultimate success in this action, the Court finds that the allegations in the Amended Complaint, at this stage of the proceedings, are sufficient to withstand most of the pending motions to dismiss. For the following reasons, the Court denies the joint motion to dismiss (Dkt. 79), Westlake's motion to dismiss (Dkt. 81), Shintech's motion to dismiss (Dkt. 82), and Formosa USA's motion to dismiss (Dkt. 84); grants in part the motion to dismiss by Oxy (Dkt. 80); denies without prejudice and with leave to renew after the completion of jurisdictional discovery, the motions to dismiss by Formosa (Dkt. 86) and Shin-Etsu (Dkt. 103), although Plaintiffs must provide the necessary certification regarding Formosa as discussed herein on or before April 17, 2020, or their claims against Formosa will be dismissed with prejudice.

BACKGROUND

I. Factual Background

The following facts are taken from the allegations in Plaintiffs' Amended Complaint (Dkt. 51), the operative pleading in this matter. **[**14]** As is required at this stage of the proceedings, the Court treats Plaintiffs' well-pleaded allegations as true.

[*151] Caustic soda, also known as sodium hydroxide or lye, is a commodity chemical sold in solid and liquid forms and is a co-product of chlorine produced from the electrolysis of brine or salt water. (*Id.* at ¶¶ 2, 42). It is used by customers in a variety of industries, including paper, pulp, and cellulose; chemical production; soaps and detergents; aluminum; food processing; water treatment; textiles; mineral oils; recycling; and pharmaceuticals. (*Id.*). Defendants are estimated to collectively control at least 90% of the domestic caustic soda supply (*Id.*), and Plaintiffs are all direct purchasers or assignees of direct purchasers of caustic soda (*id.* at ¶¶ 18-24). K.A. Steel is a wholly owned subsidiary of Olin that was acquired by Olin in August 2012. (*Id.* at ¶ 26). OxyChem is a wholly-owned subsidiary of Oxy (*id.* at ¶ 29), and Formosa USA is wholly owned by the Taiwanese corporation Formosa (*id.* at ¶ 34). The caustic soda industry has become more concentrated in the past few years, with Olin acquiring Dow's gulf coast chloralkali business in 2015 and Westlake acquiring the caustic **[**15]** soda business of Axiall Corporation of Atlanta ("Axiall") in 2016, lowering the number of U.S. producers of caustic soda from seven to five. (*Id.* at ¶¶ 30, 44).

Demand for caustic soda tends to track the demand for industrial production. (*Id.* at ¶ 46). The United States industrial production index saw slow growth from mid-2009 until a peak in November 2014 before declining through March 2016, flattening until November 2016, and then gradually increasing, reaching its November 2014 level in April 2018. (*Id.*). Plaintiffs allege that "[a]lthough Defendants' actual cost data is proprietary and uncertain, it is believed that their costs have been relatively stable since 2015, " referring to the steady power costs from 2015 to 2017 as an example. (*Id.* at ¶ 43).

From 2011 through 2014, Defendants made price increase announcements that were largely unsuccessful, and average caustic soda prices over this time period tended to be flat or declining. (*Id.* at ¶¶ 3, 54). In 2014 and early 2015, before Olin announced it intended to acquire Dow's chloralkali assets, Westlake and OxyChem added new chloralkali production capacity, adding to the overcapacity of the caustic soda industry. (*Id.* at ¶ 47). **[**16]** Even though the domestic caustic soda supply was relatively stable or declining, in August 2015, an industry article stated that several Defendants were trying privately to increase contract customers' prices by $40 per dry standard ton ("dst"). (*Id.* at ¶ 57). At around the same time, Axiall's CEO told analysts that caustic soda markets were oversupplied and that he "openly hoped that Olin would cut production once the proposed acquisition [of Dow's choralkali business] was completed." (*Id.* at ¶ 47 (alteration in original)). Olin acquired Dow's business in October 2015, and on November 2, 2015, Olin announced it would idle or shutdown between 250, 000 and 450, 000 tons of caustic soda production capacity in 2016. (*Id.* at ¶ 48). Sometime in November 2015, the Vinyl Institute, whose only full members are Formosa USA, Shintech, Westlake, and Oxy subsidiary OxyVinyls, held a meeting. (*Id.* at ¶ 93). On November 19, 2015, a chemical industry news service and consultant reported that there was a new industry price increase initiative by Olin, and that U.S. producers had managed to increase prices by $40 per dst across October and November, despite the "ample supply" of caustic soda. (*Id.* **[**17]** at ¶ 57). Within days, OxyChem, Westlake, Formosa USA, and Shintech announced increased prices in the same amount to all customers nationwide. (*Id.* at ¶ 58).

Olin idled or shut down at least 433, 000 tons of annual capacity beginning in the first quarter of 2016, and around the same **[*152]** time, Axiall—which had started acquisition discussions with Westlake—cut production by 78, 000 dst per year. (*Id.* at ¶ 48). In March 2016, American Fuel & Petrochemical Manufacturers ("AFPM"), in which Olin, OxyChem, Westlake, and Formosa USA are members, had an annual meeting that those Defendants' representatives attended. (*Id.* at ¶ 91). Additionally, The Chlorine Institute had a spring meeting in April 2016, which Olin, Oxy, Westlake, and Formosa USA attended. (*Id.* at ¶ 92). In April 2016, Olin, OxyChem, Westlake, Shintech, and Formosa USA each announced $30-$40 per dst price increases, and additional increases during the quarter that totaled approximately $85 per dst. (*Id.* at ¶ 59). A May 20, 2016, article referred to the increase by producers as "the most significant increase of the past three years." (*Id.*).

The annual ICIS and Tecnon OrbiChem World Chlor-alkali Conferences took place on June 16-17, **[**18]** 2016, at which an Olin representative spoke. (*Id.* at ¶ 93). Later in 2016, OxyChem reduced its caustic soda output by 150, 000 dst per year. (*Id.* at ¶ 48). Defendants announced increases of $40-$50 per dst in July and August 2016, and after the September 2016 meeting of the Vinyl Institute with Formosa USA, Shintech, Westlake, and Oxy subsidiary OxyVinyl (*id.* at ¶ 93), Defendants announced price increases of $60-$80 per dst (*id.* at ¶ 59). In the third quarter of 2016, Westlake completed its acquisition of Axiall. (*id.* at ¶ 30). OxyChem, Formosa USA, and Westlake also had temporary shutdowns for plant maintenance and outages throughout 2016, reducing capacity by as much as 10% in the fourth quarter of 2016 alone. (*Id.* at ¶ 48). Also in 2016, the market was informed that a refinery of a large caustic soda purchaser would close due to bankruptcy, and that the 150, 000 dst per year it had purchased was destined for the export market. (*Id.*). Defendants increased prices by $40-$65 in the fourth quarter of 2016. (*Id.* at ¶ 59). Between April 2016 and January 2017, the price of caustic soda had increased by 45% from $430 per dst to

$625. (*Id.*). Additionally, the average North American undiscounted **[**19]** quarterly contract price per short ton increased 22% from $595.80 in the fourth quarter of 2015 to $725 in the fourth quarter of 2016. (*Id.*).

Defendants led their customers to believe that caustic soda supply was "tight" and product "scarce" or otherwise limited. (*Id.* at ¶ 53). Many customers were on "allocation" and not permitted to purchase more volume from their defendant-supplier than they had annually in the past. (*Id.*). However, Olin told investors in its 2016 Form 10-K that supply had increased, even though customers had been told just the opposite throughout 2016. (*Id.* at ¶ 62).

In February 2017, Olin, OxyChem, Westlake, Formosa USA, and Shintech announced caustic soda increases of $60-$85 per dst depending on the grade—$60 for diaphragm or $85 for membrane. (*Id.* at ¶ 63). The grade differential was justified as due to "restrained" membrane-grade production. (*Id.*). In 2017, AFPM's Annual Meeting was again in March, with Olin, OxyChem, Westlake, and Formosa USA representatives in attendance. (*Id.* at ¶ 91). An employee of a distributor of caustic soda stated in a report about the AFPM conference that "Chlor-Alkali producers seemed to all be on the same page and the general consensus **[**20]** was caustic was extremely tight and pricing was moving up across the board, without exception." (*Id.* at ¶ 124). In May 2017, Olin, OxyChem, Westlake, Formosa USA, and Shintech announced increases of up to $75 per dst. (*Id.* at ¶ 63). A $75-$100 increase depending on grade was announced in August and September 2017 by Olin, OxyChem, Westlake, and Shintech. (*Id.* at ¶ 64). In November **[*153]** 2017, the Vinyl Institute again met (*id.* at ¶ 93), and Defendants announced caustic soda price increases ranging from $70 to $115 per dst depending on grade (*id.* at ¶ 65). Defendants made calls to customers and others regarding the price increase, and OxyChem and Westlake mailed letters to customers announcing a price increase of $80-$100 and $85-$115 respectively; just days before Olin, Formosa USA, and Shintech sent similar price increase letters. (*Id.*). The November 2017 announcements increased customers' contract prices an average of $30 per dst by January 2018. (*Id.* at ¶ 67).

After years of annual decline from 2012 to 2015, Olin's income before taxes increased 250% from 2015 to 2017. (*Id.* at ¶ 51). Additionally, export prices increased in 2016 and 2017, disrupting India's market and triggering an investigation **[**21]** by India's Directorate General of Anti-dumping and Allied Duties into the dumping of U.S.-manufactured and exported caustic soda in India. (*Id.*).

Defendants justified their price increases based on "strong" gross domestic product ("GDP") growth; however, the national GDP averaged 2.2% growth annually between 2011 and 2015 when caustic soda prices were flat or declining, whereas from 2016 to 2017, when caustic soda prices skyrocketed, GDP increased an average of 1.9%. (*Id.* at ¶ 52). Despite capacity shutdowns, domestic supply of caustic soda was largely flat between 2016 and 2017, and significant industry excess capacity persists. (*Id.* at ¶ 50). For example, Defendants' operating rates appear to have averaged only 80 to 85% in the 2015-2018 time period. (*Id.*). Additionally, after Hurricane Harvey hit Houston in August 2017, over one-third of domestic capacity of caustic soda was disrupted but customers could still easily buy caustic soda, albeit at higher prices. (*Id.*).

On February 13, 2018, Westlake announced a $40 per dst price increase for all grades of liquid caustic soda, and the next day Olin sent letters to customers announcing an $85 per dst increase. (*Id.* at ¶ 69). By February **[**22]** 26, 2018, OxyChem, Shintech, and Formosa USA also had announced increases of $85 per dst. (*Id.*). AFPM had its annual meeting in March 2018 (*id.* at ¶ 91), and Westlake announced an additional $50 per dst increase on March 16, 2018, matching the price increase of the other companies (*id.* at ¶ 69). Additionally, Olin, OxyChem, and Westlake at the same time stopped announcing different price increase amounts for diaphragm and membrane grades. (*Id.*). In May 2018, Westlake's CEO told an investor conference that Westlake did not see a cap on caustic soda prices because demand was growing while U.S. capacity was not. (*Id.* at ¶ 70). On May 21, 2018, Olin and OxyChem sent letters to customers announcing a $40 per dst caustic soda price increase, with Formosa USA and Shintech announcing a $40 per dst increase within days and Westlake announcing a $45 per dst increase. (*Id.*). Olin announced a $50 per dst increase on August 28, 2018, and the other Defendants non-publicly implemented the same price increase. (*Id.* at ¶ 71). On November 27, 2018, Olin announced a $40 per dst increase by letters to customers. (*Id.* at ¶ 72). OxyChem, Formosa USA, and Shintech announced and implemented identical increases **[**23]** within days through direct, private contacts with customers. (*Id.*). Within a week of Olin's announcement, Westlake announced a $45 per dst increase. (*Id.*).

In late January 2019, the industry analyst IHS Markit, which is in routine contact with Defendants, forecasted non-publicly to clients that 2019 caustic soda prices would increase by the second quarter. (*Id.* at ¶ 75). Olin informed investors on February **[*154]** 5, 2019, and February 12, 2019, that prices would increase in 2019 given strong demand and "industry maintenance turnaround" by Defendants in North America. (*Id.*). On February 19, 2019, Westlake's CEO told investors that prices would increase in 2019. (*Id.*). On February 20, 2019, Olin announced a $50 per dst increase of its caustic soda by letters to customers. (*Id.* at ¶ 74). Almost immediately thereafter, OxyChem announced an $80 per dst increase and Formosa USA announced a $70 per dst increase non-publicly through direct, private contacts with customers. (*Id.*). Shortly thereafter, Westlake announced a $75 per dst increase, and Shintech announced an $80 per dst increase. (*Id.*). Defendants' costs are believed to still be stable, industry excess capacity still exists, and demand continues **[**24]** to be flat. (*Id.* at ¶ 75).

From 2016 to 2019, Defendants have had temporary planned and unplanned outages of production, including shutdowns for maintenance at around the same times, and those production outages were used in part to explain tightening supply and justify frequent price increases. (*Id.* at ¶ 49). For example, Westlake's and Formosa USA's plants experienced both planned and unplanned outages, and Olin and OxyChem stated they reduced their operating rates for various reasons. (*Id.*). In February 2018, Olin informed investors during a presentation that in addition to the capacity reductions in North America, no capacity additions were expected within the next two to three years. (*Id.*). Although this presentation was made three months after Shintech had filed a permit to say it was considering expanding its capacity, and Shintech announced in July 2018 that it was developing a new production facility, any new caustic soda production capacity would not be operational for years, and it is not clear if the new production will be sold in the United States' market. (*Id.*).

Since the beginning of the Class Period, October 2015, Defendants have earned billions of dollars in net income **[**25]** from sales of caustic soda, and their profit margins have increased dramatically. (*Id.* at ¶ 80). Prices of Olin's other products, including chlorine, have not increased nearly as much as caustic soda prices since 2015, and Olin's EBITDA (full year adjusted earnings before interest, tax, depreciation, and amortization) more than doubled between 2015 ($479 million) and 2018 ($1.27 billion), as compared to between 2012 and 2015 when it only increased 28%. (*Id.*). Oxy's chemical segment earnings, which include OxyChem's earnings, increased 44% from 2016 ($571 million) to 2017 ($822 million), and over 40% from 2017 ($822 million) to 2018 ($1.16 billion) in part due to "higher realized pricing for caustic soda." (*Id.* at ¶ 81). Westlake's Vinyls segment, which includes its caustic soda business, increased over 270% from 2016 ($174 million) to 2017 ($647 million). (*Id.* at ¶ 82). Formosa and Formosa USA also experienced significant increases in net income, with Formosa experiencing a consolidated operating profit that was "a record high level for the Company in the past 6 years." (*Id.* at ¶ 83). Shin-Etsu informed shareholders that a main factor in achieving its highest profit ever in fiscal **[**26]** year 2018 was price improvement in its PVC/Chlor-Alkali business. (*Id.* at ¶ 84).

From October 2015 to the present, Defendants entered into sales agreements and swap agreements with each other. (*Id.* at ¶ 94). For example, when Hurricane Harvey temporarily idled facilities owned by OxyChem and Formosa USA, those defendants were assisted with caustic soda supply by other producers. (*Id.*). Additionally, Olin, Oxy, and OxyChem have extensive secret co-producer supply agreements and contact with each other. (*Id.*). These swaps reward exchanges of commercially **[*155]** sensitive information among Defendants, and keep caustic soda market shares stable and increasing. (*Id.*).

Many of Defendants' customers purchase caustic soda under contracts, and the price of the product agreed to in those contracts is at times determined by a pricing index managed by the industry analyst IHS Markit (the "Index"). (*Id.* at ¶ 95). Before 2016, prices in the Index varied up and down, sometimes significantly, but after Olin's purchase of Dow's chloralkali business in 2015, caustic soda prices have tended to consistently increase. (*Id.*). Plaintiffs contend Defendants selectively provide information to IHS Markit or provide **[**27]** false information to ensure that the Index reflects the highest average contract price level practicable. (*Id.* at ¶ 96). Defendants also provide false or misleading information to try to maintain a trend of increasing market pricing. (*Id.*). At least one IHS Markit employee left sometime in 2016-2017 in part because of the Index's lack of integrity. (*Id.* at ¶ 97).

Customers have noticed differences with Defendants since October 2015. (*Id.* at ¶ 99). Customer turnover is lower, Defendants' market shares have been relatively stable, Defendants refrain from bidding competitively for business, and Defendants exercise "market disciple, " *i.e.*, refusing to agree to lower prices, raising prices in accord with each other's price increases, and not taking business from each other at a lower price. (*Id.*). Plaintiffs contend "that Defendants have formed a cartel and reached an understanding or agreement to concertedly fix prices and limit the supply of Caustic Soda." (*Id.* at ¶ 101).

II. Procedural Background

The instant action and related cases were filed in the Western District of New York on March 22, 2019 (Dkt. 1), and reassigned to the undersigned on May 8, 2019 (Dkt. 40). The cases were referred **[**28]** for the handling of non-dispositive pretrial matters to United States Magistrate Judge Michael J. Roemer (Dkt. 42), who entered a scheduling and case management order on May 17, 2019, consolidating the cases for pretrial purposes (Dkt. 49). Plaintiffs filed an Amended Complaint on May 22, 2019. (Dkt. 51).

On July 8, 2019, the joint motion to dismiss for failure to state a claim was filed (Dkt. 79), along with motions to dismiss by Oxy (Dkt. 80), Westlake (Dkt. 81), Shintech (Dkt. 82), and Formosa USA (Dkt. 84). Plaintiffs filed a memorandum in opposition to all of the July 8, 2019, motions to dismiss on August 7, 2019. (Dkt. 91). Replies were filed on August 27, 2019. (Dkt. 94; Dkt. 95; Dkt. 96; Dkt. 97; Dkt. 98).

On July 22, 2019, Formosa filed its motion to dismiss. (Dkt. 86). Plaintiffs responded on August 21, 2019 (Dkt. 93), and Formosa filed its reply on September 10, 2019 (Dkt. 101).

On October 28, 2019, Shin-Etsu filed its motion to dismiss for lack of jurisdiction. (Dkt. 103). Plaintiffs responded on November 1, 2019 (Dkt. 109), and Shin-Etsu replied on November 21, 2019 (Dkt. 110). Oral argument took place before the undersigned on December 6, 2019, and decision was reserved. **[**29]** (Dkt. 116; Dkt. 117).

DISCUSSION

I. Motions to Dismiss for Failure to State a Claim

A. Legal Standard

HN1[] "In considering a motion to dismiss for failure to state a claim pursuant to *Rule 12(b)(6)*, a district court may consider the facts alleged in the complaint, documents attached to the complaint as exhibits, and **[*156]** documents incorporated by reference in the complaint." *DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 111 (2d Cir. 2010)*. A court should consider the motion by "accepting all factual allegations as true and drawing all reasonable inferences in favor of the plaintiff." *Trs. of Upstate N.Y. Eng'rs Pension Fund v. Ivy Asset Mgmt., 843 F.3d 561, 566 (2d Cir. 2016)*, *cert. denied*, *137 S. Ct. 2279, 198 L. Ed. 2d 703 (2017)*. To withstand dismissal, a claimant must set forth "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Turkmen v. Ashcroft, 589 F.3d 542, 546 (2d Cir. 2009)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))*.

HN2[] "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (internal quotations and citations omitted). "To state a plausible **[**30]** claim, the complaint's '[f]actual allegations must be enough to raise a right to relief above the speculative level.'" *Nielsen v. AECOM Tech. Corp., 762 F.3d 214, 218 (2d Cir. 2014)* (quoting *Twombly, 550 U.S. at 555*).

B. Sherman Act § 1

HN3[] Plaintiffs' claims arise out of *§ 1 of the Sherman Act*. "Liability under *§ 1 of the Sherman Act*, *15 U.S.C. § 1*, requires a 'contract, combination . . ., or conspiracy, in restraint of trade or commerce.'" *Twombly, 550 U.S. at 548* (quoting *15 U.S.C. § 1*). "Because *§ 1* of the Sherman Act does not prohibit [all] unreasonable restraints of trade . . . but only restraints effected by a contract, combination, or conspiracy, [t]he crucial question is whether the challenged anticompetitive conduct stem[s] from independent decision or from an agreement, tacit or express." *Id. at 553* (alterations in original) (quotations and citation omitted). "[S]tating such a claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made." *Id. at 556*. This standard "simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id.* (footnote omitted).

HN4[] "The ultimate existence of an 'agreement' under ***antitrust law***, however, is a legal conclusion, not a factual allegation." *Mayor and City Council of Balt., Md. v. Citigroup, Inc., 709 F.3d 129, 135-36 (2d Cir. 2013)*. "[A] plaintiff may . . . assert direct evidence that the defendants **[**31]** entered into an agreement in violation of the antitrust laws." *Id. at 136*. However, "plaintiffs [are] not required to mention a specific time, place or person involved in each conspiracy allegation." *Starr v. Sony BMG Music Entm't, 592 F.3d 314, 325 (2d Cir. 2010)*. "[A] complaint may, alternatively, present circumstantial facts supporting the *inference* that a conspiracy existed." *Citigroup, 709 F.3d at 136* (emphasis in original). "[A] horizontal agreement, such as the one alleged in the case before us, may be inferred on the basis of conscious parallelism, when such interdependent conduct is accompanied by circumstantial evidence and plus factors." *Id.* (quotation omitted). "These 'plus factors' may include: a common motive to conspire, evidence that shows that the parallel acts were **[*157]** against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications." *Id.* (quotation and footnote omitted).

HN5[] Generally, "[w]ithout more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality." *Twombly, 550 U.S. at 556-57*. The allegations "must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could **[**32]** just as well be independent action." *Id. at 557*. "[W]ithout that further circumstance pointing toward a meeting of the minds, an account of a defendant's commercial efforts stays in neutral territory." *Id.* The Second Circuit has stated:

> Examples of parallel conduct allegations that might be sufficient under *Twombly*'s standard include "parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties, " and "complex and historically unprecedented changes in pricing structure made at the very same time by multiple competitors, and made for no other discernible reason."

Citigroup, 709 F.3d at 137 (quoting *Twombly, 550 U.S. at 556 n.4* (quotation omitted)). **HN6**[] "[A]t the motion-to-dismiss stage, appellants must only put forth sufficient factual matter to plausibly suggest an inference of conspiracy, *even if* the facts are susceptible to an equally likely interpretation." *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 782 (2d Cir. 2016)*. "Skepticism of a conspiracy's existence is insufficient to warrant dismissal; 'a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely.'" *Id. at 781* (quoting *Twombly, 550 U.S. at 556* (internal **[**33]** quotation omitted)).

In the Joint Motion to Dismiss, Defendants collectively argue that Plaintiffs have failed to allege parallel conduct, and that even if parallel conduct is sufficiently alleged, Plaintiffs have also failed to include allegations of the plus factors necessary to implicate a conspiracy. Additionally, Defendants Oxy, Westlake, Shintech, and Formosa USA argue that Plaintiffs' Amended Complaint does not adequately implicate them individually in the alleged conspiracy.[1] The Court addresses each argument in turn.

C. Joint Motion

Defendants contend that Plaintiffs allege no direct evidence of a conspiracy and that the circumstantial evidence alleged by Plaintiffs is not sufficient to rise to the level of a conspiracy under *§ 1 of the Sherman Act*. (Dkt. 79-1 at 11-35). Plaintiffs do not contend to be able to allege direct evidence of a conspiracy[2] (*see* **[*158]** Dkt. 51 at ¶¶ 55, 89, 100), and instead argue that the circumstantial evidence they have alleged supports the inference of a conspiracy (Dkt. 91 at 18-40).

Plaintiffs allege that Defendants Olin, OxyChem, Formosa USA, Westlake, and Shintech announced approximately 13 times over a three-year period similar price increases of **[**34]** caustic soda at around the same time. (*See, e.g.*, Dkt. 51 at ¶ 76). The announcements were made within days of each other, sometimes through private means such as letters or phone calls to customers. (Dkt. 51 at ¶ 65). Additionally, defendants Olin, OxyChem, Formosa USA, Westlake, and Shintech allegedly began announcing grade-differentiated price increases instead of a single price increase at approximately the same time, and they stopped differentiating between grades for their price increase announcements on a similar date. (*Id.* at ¶ 63).

Plaintiffs have also alleged that these announced price increases were unprecedented—prior to the end of 2015, caustic soda prices had been stable if not declining, and there was an oversaturated supply of the product. (*Id.* at ¶ 77). Further, Plaintiffs allege that after Axiall's CEO told market analysts that he "openly hoped that Olin would cut production" (*Id.* at ¶ 47), Olin—the largest producer of caustic soda at that time—cut its production amounts, and that OxyChem, another large caustic soda producer, also cut its production amounts (*Id.* at ¶ 48). Plaintiffs allege that although these production cuts were made, the supply of caustic soda remained **[**35]** oversaturated. (*Id.* at ¶ 50). However, the production cuts gave Defendants a ruse under which they could collectively raise prices, and that despite the oversaturated supply, Defendants led their customers to believe that caustic soda was scarce or otherwise limited. (*Id.* at ¶¶ 53, 62). The Amended Complaint alleges that Defendants also justified the price increases based on "strong" GDP growth but the GDP was lower the year that caustic soda prices skyrocketed than the average GDP for the previous five years. (*Id.* at ¶ 52).

Plaintiffs further allege that Defendants were all members of various trade associations and had the opportunity to discuss the alleged scheme at trade association meetings. (*Id.* at ¶¶ 90-93). In particular, the meetings of the Vinyl Institute trade association—in which Formosa USA, Shintech, Westlake, and Oxy subsidiary OxyVinyls are the sole members—coincided with the price increase announcements in November 2015, September 2016, and November 2017. (*Id.* at ¶¶ 57-59, 65 93).

---

[1] The Joint Motion to Dismiss and Joint Reply each include a short footnote contending that Plaintiffs' allegations are "plainly insufficient to state a claim against K.A. Steel." (Dkt. 79-1 at 7 n.2; Dkt. 95 at 7 n.2). ***HN7***[] "[C]ourts 'routinely decline[ ] to consider arguments mentioned only in a footnote on the grounds that those arguments are inadequately raised.'" *Fin. Guar. Ins. Co. v. Putnam Advisory Co., LLC, No. 12 CIV. 7372(AT), 2020 U.S. Dist. LEXIS 9088, 2020 WL 264146, at *2 (S.D.N.Y. Jan. 17, 2020)*(alterations in original) (quoting *Phoenix Light SF Ltd. v. Bank of N.Y. Mellon, No. 14 Civ. 10104, 2017 U.S. Dist. LEXIS 145044, 2017 WL 3973951, at*20 n.36 (S.D.N.Y. Sept. 7, 2017))*.Accordingly, the Court does not separately address the sufficiency of the claims against K.A. Steel.

[2] To the extent that allegations of a direct conspiracy are included in the Amended Complaint, the Court agrees with Defendants that they are insufficiently conclusory. (Dkt.79-1 at 11-12; *see, e.g.*, Dkt. 51 at ¶ 103 ("Defendants intended to restrain trade, and did restrain trade, in Caustic Soda by reaching an agreement or understanding to end genuine price competition among themselves by supporting industry price increases and customer allocations; by manipulating a price index; by assisting each other with supply; by limiting domestic supply and exporting and selling Caustic Soda abroad (to keep it off the domestic market); and by concertedly fixing, raising, maintaining, or stabilizing the prices for Caustic Soda by other secret means and methods.")).

Defendants argue that Plaintiffs' allegations do not show parallel behavior, and even if they do, Defendants' actions are explainable as normal responses to market forces. Defendants also contend **[**36]** that the Court should not consider various aspects of Plaintiffs' allegations when determining whether the conspiracy claim is plausible.

The Court is not persuaded by Defendants' arguments, and instead finds that taken together, Plaintiffs' allegations "plausibly suggest an inference" that Defendants conspired to artificially raise the prices of caustic soda. *Gelboim, 823 F.3d at 782*. **[*159]** The Court addresses each of Defendants' arguments below.

1. Parallel Conduct

Defendants argue that Plaintiffs have not properly alleged parallel conduct through price announcements. (Dkt. 79-1 at 15-24). For the following reasons, the Court finds that Plaintiffs have sufficiently alleged that Defendants engaged in parallel conduct.

Defendants argue that in concentrated commodity industries with a small number of firms like caustic soda (oligopolies), follow-the-leader conduct is expected. (Dkt. 79-1 at 13). ***HN8***[] "Generally speaking, the possibility of anticompetitive collusive practices is most realistic in concentrated industries." *Todd v. Exxon Corp., 275 F.3d 191, 208 (2d Cir. 2001)*. "In an oligopolistic market, however, 'conscious parallelism' or 'tacit collusion' to raise or maintain prices is not *per se* unlawful because it could be the result of permissible, independent parallel **[**37]** conduct." *In re Ethylene Propylene Diene Monomer (EPDM) Antitrust Litig., 681 F. Supp. 2d 141, 166 (D. Conn. 2009)* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*; *see* *Twombly, 550 U.S. at 553-54* ("Even 'conscious parallelism,' a common reaction of firms in a concentrated market [that] recogniz[e] their shared economic interests and their interdependence with respect to price and output decisions is not in itself unlawful." (alterations in original) (quotation omitted)). "At the motion to dismiss stage, however, plaintiffs need not 'offer evidence that tend[s] to rule out the possibility that the defendants were acting independently.' Instead, plaintiffs 'need only allege enough factual matter (taken as true) to suggest that an agreement was made.'" *In re Propranolol Antitrust Litig., 249 F. Supp. 3d 712, 721 (S.D.N.Y. 2017)* (citation omitted) (quoting *Starr, 592 F.3d at 320*).

Plaintiffs have alleged facts that support more than "conscious parallelism" and "follow-the-leader pricing." Defendants argue that the alleged circumstances surrounding the price announcements show that Defendants were reacting to public information, not pursuant to a conspiracy, pointing to the fact that Olin first announced a price increase which was followed by OxyChem, Westlake, Formosa USA, and Shintech. (Dkt. 79-1 at 21-24). However, Plaintiffs allege that on at least three occasions Defendants made their price increase announcements privately through letters and phone **[**38]** calls to customers (Dkt. 51 at ¶¶ 65, 72, 74), meaning that at least in those instances, there was no public announcement of a "leader" price to follow. Moreover, the Amended Complaint alleges Defendants cut production to no effect on the surplus supply of caustic soda, which allowed Defendants to make misrepresentations about the supply of caustic soda as an explanation for the drastic and unprecedented price increases of the product. (*Id.* at ¶¶ 53, 62). In other words, Plaintiffs allege Defendants took concerted action to work against what the market would otherwise dictate.

The Court does not find the cases cited by Defendants to be dispositive. The cases involve situations where the defendants made rational and lawful decisions with a natural explanation. *See* *Citigroup, 709 F.3d at 138* (holding plaintiffs failed to allege a conspiracy because "*en masse* flight from a collapsing market in which [defendants] had significant downside exposure—made perfect business sense"); *see also* *Burtch v. Milberg Factors, Inc., 662 F.3d 212, 226-28 (3d Cir. 2011)* (noting a conspiracy is not properly pleaded when "defendants' parallel conduct 'was not only compatible with, but indeed was more likely **[*160]** explained by, lawful, unchoreographed free-market behavior'" (quoting *Iqbal, 556 U.S. at 680*)); *In re Late Fee & Over-Limit Fee Litig., 528 F. Supp. 2d 953, 965 (N.D. Cal. 2007)* ("Given these 'natural **[**39]** explanations' for the increases in late fees, those increases do not support any inference of conspiracy."), *aff'd*, *741 F.3d 1022 (9th Cir. 2014)*; *Superior Offshore Int'l, Inc. v. Bristow Grp. Inc., 738 F. Supp. 2d 505, 515 (D. Del. 2010)* ("The reported facts are consistent with lawful, interdependent business behavior among oligopolists."), *order amended on reconsideration*, *No. 1:09-CV-00438-LDD, 2010 U.S. Dist. LEXIS 147376, 2010 WL 11470613 (D. Del. Dec. 1, 2010)*; *In re LTL Shipping Servs. Antitrust Litig., No. 1:08-MD-01895-*

WSD, 2009 U.S. Dist. LEXIS 14276, 2009 WL 323219, at *18 (N.D. Ga. Jan. 28, 2009) ("What the allegations show instead is that all LTL service providers had the same incentives to charge the same shipping rates, and that over time they eventually each did so."). Additionally, some of the cases relied on by Defendants involve pressure by one of the alleged conspirators to *lower* prices. *See* Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indem. Co., 917 F.3d 1249, 1263-66 (11th Cir. 2019) (finding no conspiracy where plaintiffs were auto body shops claiming that insurance companies were pressuring them to lower their prices and alleging that non-State Farm insurance companies would not pay rates higher than State Farm's publicly available rates); In re Musical Instruments and Equipment Antitrust Litig., 798 F.3d 1186, 1189-90, 1198 (9th Cir. 2015) (finding no conspiracy where plaintiffs were purchasers from Guitar Center who claimed Guitar Center conspired with guitar manufacturers by pressuring the manufacturers to implement and enforce a minimum price because "[s]uch conduct may be anticompetitive—and perhaps even violate the **[**40]** antitrust laws—but it does not suggest the manufacturers illegally agreed among themselves to restrain competition").

Here, on the other hand, Plaintiffs have not alleged that the increased prices announced and set by Defendants are a result of a "natural explanation" such as outside market forces, entities, or customers; instead, they have alleged that after years of market stability, Defendants increased the price of caustic soda in similar amounts without always publicly communicating what those price hikes would be, and made misrepresentations about why the prices were increasing. *See* In re Propranolol, 249 F. Supp. 3d at 720-21 (distinguishing *In re Musical Instruments*, finding that the "pleadings here allege a pattern of price fixing spanning several years and no clear mechanism through which the defendants could legitimately and consistently monitor each other's pricing activity"). ***HN9***[] Courts have recognized that pretextual explanations for price increases can support an inference that defendants were not acting independently. *See* DeLong Equip. Co. v. Wash. Mills Abrasive Co., 887 F.2d 1499, 1514 (11th Cir. 1989) ("[E]vidence of pretext, if believed by a jury, would disprove the likelihood of independent action[.]" (quotation omitted)); Dimidowich v. Bell & Howell, 803 F.2d 1473, 1480 (9th Cir. 1986) ("A jury reasonably could conclude that [the defendant]'s stated reason **[**41]** for refusing to sell to [the plaintiff] was a mere pretext. Thus, [the plaintiff] has presented evidence that tends to support an inference of concerted action by [the defendants] and tends to exclude the possibility of independent action."), *opinion modified on other grounds on denial of reh'g*, 810 F.2d 1517 (9th Cir. 1987); In re Linerboard Antitrust Litig., 504 F. Supp. 2d 38, 53 (E.D. Pa. 2007) ("The Third Circuit has long recognized that evidence of pretextual explanations for price increases or output restrictions, 'if believed by a jury, would disprove the **[*161]** likelihood of independent action' by an alleged conspirator." (quoting Fragale & Sons Beverage Co. v. Dill, 760 F.2d 469, 474 (3d Cir. 1985))). ***HN10***[] Additionally, courts have recognized that "price increases which occur in times of surplus or when the natural expectation would be a general market decline, must be viewed with suspicion." City of Moundridge v. Exxon Mobil Corp., 429 F. Supp. 2d 117, 133 (D.D.C. 2006) (quoting C-O-Two Fire Equipment Co. v. United States, 197 F.2d 489, 497 (9th Cir. 1952)). While Plaintiffs' allegations may not rule out the possibility that Defendants acted independently, they do at least plausibly suggest that Defendants made an agreement. *See id.* ("Defendants' additional explanations for their price increases, albeit more grounded in the pleadings, do not render plaintiffs' allegations implausible.").

Defendants also contend that Plaintiffs' allegations regarding price increase announcements are collapsed into general allegations **[**42]** that price increases were announced within a given quarter, which is not sufficient to show that the price increase announcements were parallel. (Dkt. 79-1 at 20). However, Plaintiffs make several allegations that Defendants made their announcements within days of each other. (Dkt. 51 at ¶¶ 58, 65, 70-72, 74). ***HN11***[] Moreover, it is adequate at the motion to dismiss stage to plead parallelism through a pattern of frequent price increases in similar intervals and amounts. In re Propranolol, 249 F. Supp. 3d at 721 ("Furthermore, while it is true that defendants' price increases did not always align on a monthly basis, defendants consistently raised prices on a *bi-monthly* and *quarterly* basis, which is consistent with an illegal agreement.").

Defendants further argue that the price announcement allegations are insufficient because the announcement amounts "varied widely from Defendant to Defendant." (Dkt. 79-1 at 20). First, Defendants mischaracterize Plaintiffs' allegations—the price increase announcements were substantially similar, as is demonstrated by the chart of price increase announcements in Plaintiffs' Amended Complaint. (Dkt. 51 at ¶ 76). For the 13 quarters where price increase announcements are listed, the price announcements **[**43]** for Olin, OxyChem, Westlake, Formosa USA, and Shintech were almost always within $5 to $10 per dst of each other for a product that costs hundreds of dollars. (*Id.* at ¶¶ 59, 76). **HN12**[] Additionally, Plaintiffs are not required to allege that Defendants acted uniformly, only that they acted similarly, *see* North Am. Soccer League, LLC v. U.S. Soccer Fed., Inc., 296 F. Supp. 3d 442, 460 n.26 (E.D.N.Y. 2017) ("'Parallel conduct' refers to the same or substantially similar actions taken by actors on the same level."), *aff'd*, 883 F.3d 32 (2d Cir. 2018); *see also* SD3, LLC v. Black & Decker (U.S.) Inc., 801 F.3d 412, 427 (4th Cir. 2015) ("A plaintiff establishes parallel conduct when it pleads facts indicating that the defendants acted 'similarly.'"), *as amended on reh'g in part*, 801 F.3d 412, Dkt. 100 (4th Cir. 2015); In re Baby Food Antitrust Litig., 166 F.3d 112, 132 (3d Cir. 1999) ("[P]arallel pricing does not require 'uniform prices,' and permits prices within an agreed upon range.") (quoting United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 222, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)), and "the presence of some divergent conduct does not negate the allegations of other, parallel conduct," Iowa Pub. Emps.' Ret. Sys. v. Merrill Lynch, Pierce, Fenner & Smith Inc., 340 F. Supp. 3d 285, 320 (S.D.N.Y. 2018).

Defendants cite LaFlamme v. Societe Air France, 702 F. Supp. 2d 136 (E.D.N.Y. 2010), to support their position that Plaintiffs have not sufficiently alleged parallel conduct due to variability in the price and **[*162]** timing of the announcements. However, the *LaFlamme* court did not reach the issue of whether the plaintiffs alleged parallel conduct, *see* id. at 152 ("[T]he court need not decide whether plaintiffs have sufficiently **[**44]** alleged parallel conduct[.]"), and even agreed "that illegal price fixing need not be exactly simultaneous and identical in order to give rise to an inference of agreement," id. at 151. In any event, the facts in *LaFlamme* are distinguishable. The *LaFlamme* court noted that "the surcharges alleged in the Complaint are divergent (in some instances varying by a factor of three), not parallel and were not imposed in tandem, but in some instances weeks apart." *Id.* In the instant matter, no announcement of a price increase among Defendants varied by even close to a factor of three, in most instances the announced prices were the same, and were often announced days apart. At this stage of the proceedings, the allegations sufficiently allege parallel behavior.

Defendants also submit additional data, which purportedly comes from the same publication Plaintiffs used to compose their price announcement table, and represents how the prices of contracts actually changed in response to the price announcements. (Dkt. 79-1 at 22). Defendants argue the data shows the price increases that were announced were not fully realized and that prices even decreased at some times, undercutting Plaintiffs' conspiracy allegations. **[**45]** (*Id.*). However, even if the Court could consider this data at this stage of the proceedings, Defendants' argument does not undercut Plaintiffs' allegations. The data is the average quarterly price per dst in contracts for caustic soda. (Dkt. 79-3). It does not break down what the contract prices were among the different Defendants, and is certainly not a number that the Court could use to determine "whether there is consciously parallel pricing in the final price consumers pay," as Defendants suggest. Lum v. Bank of Am., 361 F.3d 217, 232 (3d Cir. 2004), *abrogated on other grounds,* Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929. Additionally, whether the price announcements consistently resulted in price increases in the same amount as the announcements is not dispositive of parallel conduct, *see* Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980) ("[W]e have held agreements to be unlawful *per se* that had substantially less direct impact on price than the agreement alleged in this case."); In re Flat Glass Antitrust Litig., 385 F.3d 350, 362 (3d Cir. 2004) ("An agreement to fix prices is . . . a per se violation of the Sherman Act even if most or for that matter all transactions occurred at lower prices." (quoting In re High Fructose Corn Syrup Litig., 295 F.3d 651, 656 (7th Cir. 2002)); *see also* In re High Fructose Corn Syrup Litig., 295 F.3d at 655 ("[P]rice-fixing agreements are illegal even if the parties were completely unrealistic in supposing they could influence the market price."), especially in light of Plaintiffs' **[**46]** allegations that the overall price of caustic soda increased dramatically from 2015 to 2019 (Dkt. 51 at ¶ 85).[3]

[3] Defendants also argue that Plaintiffs included misleading information in their Amended Complaint because they excluded the 2018 and 2019 average price information, which reflects decreased prices, from their price announcement graph. (Dkt. 79-1 at 24; *see* Dkt. 79-3). Even if Plaintiffs had included those data points, as discussed above, it does not undercut their allegations that Defendants *attempted* to increase the prices by making announcements of price increases. Additionally, the pricing figures still show an overall increase of 73% between the first quarter of 2016 and the first quarter of 2019. (Dkt. 79-3; *see* Dkt. 91 at 34 n.22).

2. Supply Restrictions

Defendants argue Plaintiffs' allegations regarding supply reductions are **[*163]** not sufficient to demonstrate parallel conduct. (Dkt. 79-1 at 15-18). Plaintiffs allege that two Defendants cut production capacity during the damages period, Olin and OxyChem, as well as Axiall, which was later acquired by defendant Westlake. (Dkt. 51 at ¶¶ 48-49). Additionally, Plaintiffs contend that temporary shutdowns by Olin, OxyChem, Formosa USA, and Westlake reduced their capacity in late 2016 by an additional 10% (*id.* at ¶¶ 50-51), and that in July 2018 Shintech formally announced the development of a new production facility (*id.* at ¶ 49). Defendants contend that because the Amended Complaint alleges "that Defendants engaged in varied, non-uniform, and unilateral action with respect to the capacity and supply of caustic soda," Plaintiffs have failed to allege parallel conduct. (Dkt. 79-1 at 15).

However, the parallel conduct element of Plaintiffs' conspiracy does not rely on all Defendants having cut production at the same time; rather, as discussed above, it **[**47]** relies on Defendants allegedly coordinating price increases. The production cuts alleged in the Amended Complaint are a "plus factor": the cuts allegedly allowed Defendants to fabricate an excuse for their parallel price increases. In other words, the conspiracy alleged by Plaintiffs does not rely on how many Defendants actually cut production—just that production was cut, Defendants knew supply was still oversaturated after the production cuts, Defendants still raised their prices, and Defendants misrepresented to their customers why the prices were increasing. Similarly, it does not matter that the timing of the production cuts was staggered or that some production losses were due to temporary plant shutdowns, only that the supply *appeared* to become increasingly more constrained over time, giving Defendants an excuse to simultaneously raise their prices. (*See, e.g.*, Dkt. 51 at ¶ 100 ("[I]n both 2016 and 2017, Defendants conducted 'plant maintenance' and (in effect) limited supply to customers more or less at the same times . . . and these circumstances were used as a pretext to show market 'tightness' to justify their price increases."); *id.* at ¶ 101 ("Defendants continue to increase **[**48]** prices successfully in concert as an industry, despite sluggish demand, stable or declining costs, and excess capacity (even after accounting for Defendants' limiting of domestic supply and capacity during the Class Period)."). In this context, Shintech's announcement about building a new production facility could contribute to the illusion of constrained supply—*i.e.*, the supply is so constricted that Shintech must build a new facility to keep up with demand, even though Shintech and the other Defendants allegedly knew that supply was actually in excess. Additionally, as Plaintiffs allege, "it is unclear to what extent the new Shintech Caustic Soda production [from the new facility] will be used captively by Shintech or sold to U.S. customers." (*Id.* at ¶ 49).

Defendants also argue that the allegations regarding their facilities' less-than-full-capacity operating rates reflect an average of all their operating rates, not their individual operating rates, and that an average operating rate cannot show parallel behavior.[4] (Dkt. 79-1 at 18). Once again, the parallel behavior the conspiracy is concerned with is price hiking, not the production capacity of each Defendant. The lower average **[**49]** operating rate supports the conspiracy by creating the illusion of decreased caustic soda supply and giving the suppliers an excuse for their price increases. Additionally, because caustic soda operating capacity rate data does not exist **[*164]** publicly, alleging the individual operating rate for each Defendant would be pure speculation. (Dkt. 91 at 40 n.24).

Defendants also contend Plaintiffs' allegations that Defendants, particularly Olin, began exporting caustic soda in an attempt to further reduce the supply are undercut by other allegations in the Amended Complaint, namely that "export prices soared in 2016 and 2017 in particular." (Dkt. 79-1; *see* Dkt. 51 at ¶ 51). However, the export allegations can support Plaintiffs' conspiracy claim because even though Defendants represented to domestic customers that supply was constrained, there were apparently sufficient amounts of caustic soda for Olin to export abroad and to still have a surplus large enough to further cut its production. An increase in export prices may explain why Defendants began exporting caustic soda, but it does not render implausible Plaintiffs' allegations that the supply of caustic soda was restrained.[5] The Court finds **[**50]** Plaintiffs' version of events is plausible, and that

---

[4] Defendants also argue that Plaintiffs point to no authority for the alleged operating rate data; but Plaintiffs are not required to do so at this stage of the proceedings.

is all that is required at this stage of the proceedings. *See* Gelboim, 823 F.3d at 782 ("[A]t the motion-to-dismiss stage, [plaintiffs] must only put forth sufficient factual matter to plausibly suggest an inference of conspiracy, *even if* the facts are susceptible to an equally likely interpretation.").

3. Trade Association Meetings

Defendants contend Plaintiffs' allegations that price increases generally followed trade association meetings are not sufficient to allege conspiracy. (Dkt. 79-1 at 25-26). ***HN13***[] Courts have held that, when examined on its own, a "defendant's membership in a trade association hardly renders plausible the conclusion that entity and certain other members are functioning as an ongoing, organized, structured enterprise in conducting their business." *Moss v. BMO Harris Bank, N.A., 258 F. Supp. 3d 289, 301 n.4 (E.D.N.Y. 2017)*; *see* *In re Musical Instruments, 798 F.3d at 1196* ("[M]ere participation in trade-organization meetings where information is exchanged and strategies are advocated does not suggest an illegal agreement."); *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 349 (3d Cir. 2010)* (same). However, courts have also held that "participation in a trade association, where Defendants had opportunities to exchange information or make agreements, coupled with allegations of parallel conduct (*i.e.*, imposing the same **[**51]** inflated surcharges), are sufficient to tie these defendants to the conspiracies." *Precision Assocs., Inc. v. Panalpina World Transp., (Holding) Ltd., No. CV-08-42 JG VVP, 2013 U.S. Dist. LEXIS 177023, 2013 WL 6481195, at *33 (E.D.N.Y. Sept. 20, 2013)* (quotation and citation omitted), *report and recommendation adopted*, *No. 08-CV-00042 JG VVP, 2014 U.S. Dist. LEXIS 10345, 2014 WL 298594 (E.D.N.Y. Jan. 28, 2014)*.

In the instant matter, Plaintiffs' allegations tie the trade association meetings into the conspiracy as a whole. The Amended Complaint does not merely allege that Defendants were part of a conspiracy because they were members of trade associations, but rather alleges that the timing of the trade association meetings often coincided with the announcement of price increases by Defendants, thus suggesting a plausible inference that the trade association meetings allowed Defendants to coordinate the price increases. (*See, e.g.*, Dkt. 51 at ¶¶ 59, 91-92 (trade association meetings in March and April 2016 followed by price increase announcements in April 2016)). In particular, Plaintiffs' allegations illustrate that the meetings of the Vinyl Institute, in which the **[*165]** only full members are defendants Formosa USA, Shintech, and Westlake, as well as Oxy's subsidiary OxyVinyls, coincided with the **[**52]** price increase announcements in November 2015, September 2016, and November 2017, and additionally that the price increase announcements made by Defendants in November 2017 were done via private contact. (*Id.* at ¶¶ 57-59, 65, 93). In other words, Plaintiffs do not just allege that Defendants' membership in trade associations *could* have been a means for them to make an agreement; they allege facts sufficient to infer that Defendants *did* use trade association meetings to make an agreement. (*See id.* at ¶ 92 ("Defendants have been increasing U.S. prices during most of the months in which each of [The Chlorine Institute's] meetings occurred.")); *see also* *In re Propranolol, 249 F. Supp. 3d at 722-23* (finding trade association meetings contributed to conspiracy claim because plaintiffs "have alleged far more than the 'mere opportunity to conspire,' and so have shown a high level of interfirm communications"). Moreover, Plaintiffs' trade association allegations are just one among several "plus factors" that the Court has considered to evaluate the plausibility of the conspiracy as pleaded in the Amended Complaint as a whole.

4. Producer Supply Agreements

The Amended Complaint alleges that the relationship between Defendants was fostered **[**53]** by confidential swap and sales agreements. (Dkt. 51 at ¶¶ 94, 122). Defendants contend these allegations are conclusory and should not be credited at the motion to dismiss stage, and at most amount to opportunities to conspire not sufficient to give rise to a plausible inference of an anticompetitive agreement. (Dkt. 79-1 at 27-28). The Court recognizes that Plaintiffs' allegations about swap and sale agreements in general would not be sufficient in the absence of other

---

[5] Plaintiffs further contend that it does not make economic sense that export prices soared even though Olin had entered the export market for the first time because economic theory predicts decreased export prices with new market entrants. (Dkt. 91 at 40).

"plus factors." *See* *In re Travel Agent Comm'n Antitrust Litig., 583 F.3d 896, 911 (6th Cir. 2009)* ("[A] mere opportunity to conspire does not, standing alone, plausibly suggest an illegal agreement[.]"); *Hinds Cty., Miss. v. Wachovia Bank N.A., 620 F. Supp. 2d 499, 513 (S.D.N.Y. 2009)* ("An allegation that Joint Defendants had the opportunity to interact and make an agreement does not nudge [Named Plaintiffs' claims across the line from conceivable to plausible[.]" (quotation and alterations omitted)). Accordingly, on their own, the swap and sale agreement allegations do not influence the result here.

5. Public Investor Statements

Defendants argue the public statements that they allegedly made lack the characteristics necessary to support a conspiracy claim. (Dkt. 79-1 at 28-32). Defendants assert that the following types of public statements may be considered: statements that **[**54]** reflect a back and forth dialogue leading to an agreed-upon position or an exchange of assurances preceding the conduct at issue; statements with a level of specificity regarding Defendants' planned conduct as opposed to general statements regarding industry conditions; and statements that lack a public purpose. (*Id.* at 29). The Court finds that Plaintiffs' allegations address specific statements by Defendants about planned conduct, as well as statements that allegedly lack a public purpose.

Plaintiffs allege Olin announced on November 2, 2015, that it would idle between 250,000 and 450,000 tons of caustic soda capacity (Dkt. 51 at ¶ 48), and later in November, an industry consultant publicly reported Olin was leading a new industry price increase (*id.* at ¶ 57). These statements, particularly the first statement, allege with specificity future actions Olin planned on taking, and Plaintiffs use the **[*166]** statements to support the inference that Defendants used the production cuts as a pretext to raise prices. *See* *In re Delta/AirTran Baggage Fee Antitrust Litig., 733 F. Supp. 2d 1348, 1362 (N.D. Ga. 2010)* ("Plaintiffs do not allege mere price announcements; they allege that each Defendant signaled its willingness to cut capacity and increase prices if the other Defendant acted in concert."). **[**55]**

Defendants argue the public statements included in Plaintiffs' allegations reflect limited knowledge of other Defendants' plans, referring specifically to Olin's statement that no capacity additions were expected within the next two to three years, even though Shintech by that time had planned a capacity expansion without announcing it. (Dkt. 79-1 at 30). However, as previously discussed, coordination with respect to supply cuts is not the key parallel conduct for the alleged conspiracy, the price increase announcements are; and Shintech's planned expansion could contribute to Plaintiffs' conspiracy allegations in that it adds to the alleged illusion that there was an oversupply of caustic soda.

Defendants also argue that the statement by Axiall's CEO telling analysts that caustic soda markets were oversupplied and that he "openly hoped that Olin would cut production once the proposed acquisition [of Dow's choralkali business] was completed" (*id.* at ¶ 47 (alteration in original)), does not support the conspiracy allegations in the Amended Complaint. (Dkt. 79-1 at 31-32). They contend Plaintiffs cite to an article written about a phone call with Axiall's CEO, not the transcript of the **[**56]** call itself. (*Id.* at 31). However, the Court cannot consider the transcript at this stage of the litigation—Defendants provide no explanation as to how Plaintiffs would have had a copy of that transcript to rely on when drafting the Amended Compliant in lieu of a publicly available article. Defendants further argue that Plaintiffs do not and could not allege that Olin made supply restriction decisions in response to the statement by Axiall's CEO because Olin was already evaluating the closure of some of its capacity after its acquisition of Dow's business. (*Id.*). However, the statement by the CEO of Axiall was allegedly made in August 2015, and Olin's acquisition of Dow was not completed until October 2015. (Dkt. 51 at ¶¶ 25, 47-48). In other words, even if Olin was considering production cuts right after its Dow acquisition as Defendants contend, that would still have been after the statements by Axiall's CEO.

6. Manipulation of IHS Markit

Defendants argue Plaintiffs' allegations regarding IHS Markit and the Index should not be considered because they are conclusory assertions of an agreement. (Dkt. 79-1 at 32-34). Plaintiffs allege that IHS Markit relies heavily on confidential input from Defendants, **[**57]** and that Defendants "gamed" the index to support their price increases using the loyal and friendly relationships IHS Markit's executives have with Defendants. (Dkt. 51 at ¶¶ 95-98). Plaintiffs further allege that "[o]ne or more IHS Markit employees left IHS Markit in approximately 2016-2017 at least in part because of the index's lack of integrity." (*Id.* at ¶ 97). While on their own these allegations would be insufficient to establish a conspiracy claim, Plaintiffs allege them in combination with other "plus factors," and the Court finds that although this factor in particular may be entitled to little weight, the totality of Plaintiffs' allegations make the conspiracy claim plausible.

7. Chlorine By-Product

Defendants argue that in the Complaint, "Plaintiffs choose to be willfully blind to [a] fundamental aspect of the chlor-alkali process"—how much chlorine can be produced, **[*167]** sold, stored, or otherwise utilized. (Dkt. 79-1 at 34-35). Defendants cite no authority supporting that the Court can consider this argument on a motion to dismiss pursuant to *Rule 12(b)(6)*, and, as stated several times previously in this Decision and Order, the Second Circuit has held that "at the motion-to-dismiss stage, **[**58]** appellants must only put forth sufficient factual matter to plausibly suggest an inference of conspiracy, *even if* the facts are susceptible to an equally likely interpretation." *Gelboim, 823 F.3d at 782*; *see* *In re Foreign Exch. Benchmark Rates Antitrust Litig., 74 F. Supp. 3d 581, 591 (S.D.N.Y. 2015)* ("'[A] well-pleaded complaint may proceed even if . . . actual proof of those facts is improbable, and . . . a recovery is very remote and unlikely' as long as the complaint presents *a* plausible interpretation of wrongdoing." (alterations in original) (quoting *Twombly, 550 U.S. at 556*)).

In any event, the Amended Complaint alleges that at various times throughout the Class Period, Defendants made announcements as to why the prices of caustic soda were increasing and noted, misleadingly, that the supply of caustic soda was restricted, and the allegations do not indicate that Defendants referred to chlorine production in their remarks (*see, e.g.*, Dkt. 51 at ¶¶ 52, 70, 75, 124), nor do Defendants contend that they did so. That *Defendants* did not acknowledge the market relationship between chlorine and caustic soda when discussing the price increases or supply cuts undercuts their characterization of Plaintiffs as "willfully blind to this fundamental aspect of the chlor-alkali process." (Dkt. 79-1 at 35).

D. Westlake's Motion

Westlake **[**59]** separately argues the claims against it should be dismissed because Plaintiffs have failed to allege sufficient specific facts demonstrating that Westlake was involved in the conspiracy. The Court finds the allegations against Westlake are sufficient at this stage of the proceedings.

HN14[] "Plaintiffs must allege a factual connection between each Defendant and the alleged conspiracy[.]" *Iowa Pub. Emps.' Ret. Sys., 340 F. Supp. 3d at 316*; *see* *Hinds County, 620 F. Supp. 2d at 513* ("To state a claim against each Defendant, Named Plaintiffs must make allegations that plausibly suggest that each Defendant participated in the alleged conspiracy." (quotation omitted)). "Group pleading, by which allegations are made against families of affiliated entities is simply insufficient to withstand review on a motion to dismiss." *Concord Assocs., L.P. v. Entm't Prop. Tr., No. 12 Civ. 1667 (ER), 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *24 (S.D.N.Y. Apr. 9, 2014)*, *aff'd*, *817 F.3d 46 (2d Cir. 2016)*. "To provide reasonable notice to defendant of the claims against it, a complaint must plausibly suggest that the individual defendant 'actually joined and participated in the conspiracy.'" *2013 U.S. Dist. LEXIS 186964, [WL] at *23* (quoting *In re Processed Egg Prods. Antitrust Litig., 821 F. Supp. 2d 709, 719 (E.D. Pa. 2011))*.

The Amended Complaint alleges the following as to Westlake: Westlake made a series of price increase announcements in 2017 at or around the same time as the other Defendants and in similar amounts (Dkt. 51 at ¶¶ 63-65, 69-70, 72, 74, 76); Westlake decided **[**60]** at the same time as Olin and OxyChem to stop announcing different price increase amounts for different grades of caustic soda (*id.* at ¶ 69); Westlake mailed letters to customers announcing a price increase when other Defendants also privately announced a price increase to their customers (*id.* at ¶ 65); Westlake's CEO told investors that Westlake did not see any cap on caustic soda prices because demand was growing but **[*168]** no industry capacity additions were planned and U.S. capacity was not growing (*id.* at ¶¶ 70, 100); Westlake was a member of The Chlorine Institute (*id.* at ¶ 92), the Vinyl Institute (*id.* at ¶ 93), and of AFPM, which represented that "caustic was extremely tight and pricing was moving up across the board, without exception" (*id.* at ¶ 124); and Westlake temporarily shut down its plant for maintenance and outages throughout 2016 (*id.* at ¶¶ 48-49). These allegations, taken as true, illustrate that Westlake engaged or participated in most if not all of the conduct that makes the conspiracy plausible—Westlake made price increase announcements in similar amounts, at similar times, and with the same breakdown in grade as the other Defendants; Westlake sometimes made its announcements **[**61]** about price increases privately when other Defendants made announcements privately; Westlake misrepresented that the supply of caustic soda was tight; and Westlake was a member of a trade group in which the only members were other Defendants and a related affiliate, and which allegedly held three meetings during the Class Period that always coincided with price increase announcements.

Westlake argues[6] that Plaintiffs do not allege it reduced its caustic soda capacity during the Class Period, and that Plaintiffs did not include specific allegations about Westlake's operating rates, Westlake's exports, statements made by Westlake containing conflicting representations, Westlake's influence on the IHS Markit Index, or Westlake's communications with the other Defendants. (Dkt. 81-1 at 8-14). The Court is not persuaded by these arguments.

As discussed above, Plaintiffs' conspiracy does not rely on all Defendants having cut production but on Defendants announcing similar price increases and misrepresenting that those price increases were a result of reduced supply in general. The absence of allegations regarding Westlake's caustic soda capacity, operating rates, and exports does not **[**62]** render Westlake's alleged involvement in the conspiracy merely conceivable as opposed to plausible because the Amended Complaint alleges other Defendants, such as Olin and OxyChem, cut their production capacity (Dkt. 51 at ¶ 48), giving Westlake a scapegoat for the "supply restrictions." Additionally, Axiall, which Westlake later acquired, allegedly cut production capacity (*id.*), and Westlake temporarily shut down its plants for maintenance (*id.* at ¶ 49), creating more excuses to increase prices even though the supply of caustic soda was allegedly still in surplus. Moreover, the Amended Complaint contends that Westlake's statements are misrepresentations, not just statements about industry conditions, which undercuts Westlake's argument that "generic statements . . . do not make allegations of a conspiracy more plausible." (Dkt. 81-1 at 13 (quotation omitted)). The cases cited by Westlake finding generic statements to be insufficient to state a claim do not address situations where the statements are pretextual, **[*169]** *see* *Holiday Wholesale Grocery Co. v. Philip Morris Inc., 231 F. Supp. 2d 1253, 1276 (N.D. Ga. 2002)*; *In re Plasma-Derivative Protein Therapies Antitrust Litig., 764 F. Supp. 2d 991, 1001 (N.D. Ill. 2011)*, and as discussed above,***HN15***[] courts have found pretextual statements to be a viable plus factor, *DeLong Equip. Co., 887 F.2d at 1514*; *Dimidowich, 803 F.2d at 1480*; *Dill, 760 F.2d at 474*.

As far as Plaintiffs' allegations regarding IHS Markit and co-producer **[**63]** agreements, *no* Defendant was singled out as having personally influenced the IHS Markit (*id.* at ¶¶ 95-98) or having provided supply assistance to other producers (*id.* at ¶¶ 87-94). As previously discussed, the Court does not accord the IHS Markit or co-producer allegations much weight as plus factors for any Defendant due to their general nature, but instead finds the other alleged plus factors push the conspiracy from the realm of conceivability to plausibility.

Moreover, the allegations regarding Westlake's communications with other Defendants, combined with the other plus factors, are sufficient to plausibly allege that Westlake was involved in a price-fixing conspiracy. Although Plaintiffs do not identify specific communications by Westlake in their allegations, that is not necessary at this stage of the litigation. *See* *FrontPoint Asian Event Driven Fund, L.P. v. Citibank, N.A., No. 16 CIV. 5263 (AKH), 2017 U.S.*

---

[6] As for the arguments made by Westlake, Shintech, and Formosa USA that the Court already addressed in the discussion of the joint motion to dismiss (*see, e.g.*, Dkt. 81-1 at 8-14 (arguing that Plaintiffs do not allege the price increase announcements resulted in the prices actually increasing for Westlake's contracts, that Westlake was engaging in follow-the-leader pricing behavior, that Plaintiffs fail to acknowledge exporting caustic soda made "perfect business sense" during the Class Period, and that the article regarding statements made by Axiall's CEO does not reflect the transcript of the phone call itself)), the Court will not repeat its discussion of those arguments in its discussion of the individual motions.

*Dist. LEXIS 132759, 2017 WL 3600425, at *10 (S.D.N.Y. Aug. 18, 2017)* ("It is true that plaintiffs have failed to identify any specific interbank communications between or among defendants regarding the alleged manipulation. However, plaintiffs need not allege this type of 'smoking gun' evidence to survive a motion to dismiss."). Westlake argues that its membership in industry organizations alone does not plausibly suggest a conspiracy. **[**64]** However, as previously discussed, Plaintiffs' allegations do not merely allege Westlake's membership in trade associations, but tie the timing of the trade association meetings with the announcement of price increases by Defendants, including Westlake. Additionally, Westlake is a member of the Vinyl Institute, in which the only other members are defendants Formosa USA and Shintech, as well as Oxy subsidiary OxyVinyls, and which allegedly held three meetings during the Class Period that always coincided with price increase announcements. In particular, the Amended Complaint alleges that the Vinyl Institute met in November 2017, the same month Westlake and the other Defendants allegedly issued price increase announcements to customers privately. (Dkt. 51 at ¶¶ 65, 93).

The Court does not find Westlake's citation to *Gelboim, 823 F.3d 759*, to be dispositive. In *Gelboim*, the Second Circuit found allegations based on emails from a defendant that it had advance knowledge of the other defendants' confidential individual communications sufficiently demonstrated a high level of interfirm communications sufficient to make a conspiracy plausible, specifically noting that "[c]lose cases abound on this issue, but this **[**65]** is not one of them." *Id. at 781-82*. While the instant matter may present a closer case than that in *Gelboim* due to the absence of a "smoking gun" showing interfirm communications, like an email from Westlake to the other Defendants, the Amended Complaint's allegations that Westlake privately announced unprecedented similar price increases to those of the private announcements of other Defendants after attending trade association meetings with those Defendants are still sufficient to make Plaintiffs' conspiracy allegations plausible, particularly in light of the other "plus factors" presented by the Amended Complaint.

[*170] Accordingly, the Court denies Westlake's motion to dismiss.

E. <u>Motions by Formosa USA and Shintech</u>

Formosa USA and Shintech each separately also contend that Plaintiffs have failed to allege sufficient facts to personally implicate them in the conspiracy. (Dkt. 82-1; Dkt. 84-1). The Amended Complaint contains the following allegations specific to Formosa USA: Formosa USA made a series of price increase announcements at or around the same time as the other Defendants and in similar amounts (Dkt. 51 at ¶¶ 58-59, 63, 65, 69-70, 72, 74); Formosa USA mailed price increase letters to customers **[**66]** at or around the same time as other Defendants were privately contacting their customers about price increase announcements (*id.* at ¶¶ 65, 72); Formosa USA's sales and net income increased significantly from 2015 to 2017 (*id.* at ¶ 83); Formosa USA is a member of AFPM, The Chlorine Institute, and the Vinyl Institute, whose meetings coincided with price increase announcements (*id.* at ¶¶ 91-93, 124); Formosa USA temporarily shut down its plants for maintenance and outages throughout 2016 (*id.* at ¶¶ 48-49); and when Formosa USA's capacity at some facilities was temporarily idled by Hurricane Harvey, Formosa USA's caustic soda supply was assisted by other producers believed to be other Defendants (*id.* at ¶ 94).

The Amended Complaint contains the following allegations specific to Shintech: Shintech made a series of price increase announcements at or around the same time as the other Defendants and in similar amounts (*id.* at ¶¶ 58-59, 63-65, 69-70, 72, 74); Shintech mailed price increase letters to customers at or around the same time as other Defendants were privately contacting their customers about price increase announcements (*id.* at ¶¶ 65, 72); Shintech's profits increased in fiscal year **[**67]** 2017 despite the decline of its sales from 2016 to 2017 (*id.* at ¶ 84); Shintech is a member of the Vinyl Institute, whose meetings coincided with price increase announcements, which sometimes were private price increase announcements (*id.* at ¶¶ 91-93, 124); and Shintech announced in July 2018 that it is developing a new production facility (*id.* at ¶ 49).

The Court finds that Plaintiffs' allegations plausibly implicate Formosa USA and Shintech as part of the conspiracy. Like the allegations against Westlake, Plaintiffs allege that the price increases announced by Formosa USA and Shintech were similar to the price increase announcements made by the other Defendants. The Amended Complaint also alleges that on at least one occasion, Formosa USA and Shintech privately announced similar price increases to those of the private announcements made by other Defendants, and that at least one private announcement was made after a meeting of the Vinyl Institute, in which only Formosa USA, Shintech, Westlake, and Oxy subsidiary OxyVinyls are members. As previously discussed, the timing of the trade association meeting combined with the close timing and private means of communicating the price announcements **[**68]** make Plaintiffs' allegations more than an "averment of [an] agreement made at some unidentified place and time." *In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007)*; *see* *Precision Assocs., Inc., 2013 U.S. Dist. LEXIS 177023, 2013 WL 6481195, at *33* ("[P]articipation in a trade association, where 'Defendants had opportunities to exchange information or make agreements,' coupled with allegations of parallel conduct (*i.e.*, imposing the same inflated surcharges), are sufficient to tie these defendants to the conspiracies." (citation omitted)). Additionally, the plant shutdowns by Formosa USA and the announcement **[*171]** by Shintech that it planned on building another facility to increase production capacity contribute to the alleged illusion that supply of caustic soda was scarce.

That the Amended Complaint does not specifically allege that Formosa USA and Shintech made misrepresentations is not dispositive; the allegations discussed above are sufficient to plausibly allege that Formosa USA and Shintech knew about the conspiracy and participated in it. *See* *Iowa Pub. Emps.' Ret. Sys., 340 F. Supp. 3d at 285* ("Not every member of a conspiracy needs to issue the same threats for the conspiracy to exist. Plaintiffs have adequately pleaded that these Defendants' failures to invest in or support new market entrants was part of a conspiracy to reduce competition in the market."); **[**69]** *In re Elec. Books Antitrust Litig., No. 11 MD 2293 DLC, 2014 U.S. Dist. LEXIS 77431, 2014 WL 2535112, at *9 (S.D.N.Y. June 5, 2014)* ("Through its participation in an illegal conspiracy to fix the prices of ebooks Apple violated . . . the Sherman Act[.]").

F. Oxy's Motion

In a separate motion to dismiss, Oxy, the parent corporation of OxyChem, contends the claims against it should be dismissed with prejudice because Plaintiffs have not sufficiently alleged that Oxy personally participated in the conspiracy, that the corporate veil was pierced, or that OxyChem was acting as the agent of Oxy. (Dkt. 80-1). For the following reasons, the Court dismisses the claims against Oxy, but without prejudice.

The Court finds the Amended Complaint does not adequately allege that Oxy personally participated in the conspiracy. Plaintiffs allege that Oxy was a member of the Chlorine Institute, had increased earnings during the Class Period, and entered into secret co-producer supply agreements with Olin. (*See* Dkt. 91 at 55). However, these allegations do not plausibly allege that Oxy participated in the conspiracy—they do not suggest that Oxy helped execute the conspiracy by manipulating prices or supply because Oxy itself does not manufacture, sell, or distribute caustic soda. (Dkt. **[**70]** 51 at ¶ 29). ***HN16***[] Unlike the allegations of price hikes, misrepresentations, and communications against other Defendants, the only allegations against Oxy are general claims without specific facts as to how Oxy specifically contributed to the conspiracy. *See* *Arnold Chevrolet LLC v. Tribune Co., 418 F. Supp. 2d 172, 178 (E.D.N.Y. 2006)* ("[I]n the antitrust context, courts have held that absent allegations of anticompetitive conduct by the parent, there is no basis for holding a parent liable for the alleged antitrust violation of its subsidiary.").

Additionally, Plaintiffs have failed to adequately allege that the corporate veil should be pierced. ***HN17***[] "As a general matter . . ., a corporate relationship alone is not sufficient to bind a parent corporation for the actions of its subsidiary." *De Jesus v. Sears, Roebuck & Co., 87 F.3d 65, 69 (2d Cir. 1996)* (alteration and quotation omitted); *United States v. Bestfoods, 524 U.S. 51, 61, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998)* ("It is a general principle of corporate law deeply ingrained in our economic and legal systems that a parent corporation . . . is not liable for the acts of its subsidiaries." (quotation omitted)). "But there is an equally fundamental principle of corporate law, applicable to the parent-subsidiary relationship as well as generally, that the corporate veil may be pierced and the shareholder held liable for the corporation's conduct when, *inter* ***[**71]*** *alia*, the corporate form would otherwise be misused to accomplish certain wrongful purposes[.]" *Id. at 62*.

[*172] ***HN18***[] "Under New York choice-of-law principles, the issue of whether the corporate veil may be pierced is determined under the law of the state of incorporation." *In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390,* 418 (S.D.N.Y. 2011). Because Oxy's subsidiary OxyChem is alleged to be a New York corporation, New York law applies.[7] ***HN19***[] In New York, "piercing the corporate veil requires a showing that: (1) the owners exercised complete domination of the corporation in respect to the transaction attacked; and (2) that such domination was used to commit a fraud or wrong against the plaintiff which resulted in plaintiff's injury." *Morris v. N.Y. State Dep't of Taxation & Fin., 82 N.Y.2d 135, 141, 623 N.E.2d 1157, 603 N.Y.S.2d 807 (1993)*.

HN21[] The Second Circuit has identified the following factors as useful for determining whether one company has dominated another under New York law:

> (1) the absence of the formalities and paraphernalia that are part and parcel of the corporate existence, *i.e.*, issuance of stock, election of directors, keeping of corporate records and the like, (2) inadequate capitalization, (3) whether funds are put in and taken out of the corporation for personal rather than corporate purposes, (4) overlap in ownership, officers, directors, and personnel, (5) **[**72]** common office space, address and telephone numbers of corporate entities, (6) the amount of business discretion displayed by the allegedly dominated corporation, (7) whether the related corporations deal with the dominated corporation at arms length, (8) whether the corporations are treated as independent profit centers, (9) the payment or guarantee of debts of the dominated corporation by other corporations in the group, and (10) whether the corporation in question had property that was used by other of the corporations as if it were its own.

Wm. Passalacqua Builders, Inc. v. Resnick Developers S., Inc., 933 F.2d 131, 139 (2d Cir. 1991). "[T]he corporation's separate identity is generally respected, and the proponent of disregarding a corporation's separate identity bears a heavy burden." *In re Digital Music, 812 F. Supp. 2d at 418* (citing *TNS Holdings, Inc. v. MKI Sec. Corp., 92 N.Y.2d 335, 339, 703 N.E.2d 749, 680 N.Y.S.2d 891 (1998)* (***HN22***[] "Those seeking to pierce a corporate veil of course bear a heavy burden of showing that the corporation was dominated as to the transaction attacked and that such domination was the instrument of fraud or otherwise resulted in wrongful or inequitable consequences.")).

[*173] In the instant matter, the only factual allegations Plaintiffs make regarding Oxy's "domination" over OxyChem are that "Oxy manufactures, sells, and distributes Caustic Soda through its wholly-owned and controlled subsidiary **[**73]** and chemicals business, defendant Occidental Chemical Corporation" (Dkt. 51 at ¶ 28), and that "OxyChem is a wholly-owned subsidiary of defendant Oxy" that "manufactures, sells, and distributes Caustic Soda to customers throughout the United States" (*id.* at ¶ 29). ***HN23***[] These allegations are insufficient to allege a basis to pierce the corporate veil. *See In re Digital Music, 812 F. Supp. 2d at 419* ("It is clear that simply owning, even wholly owning, a subsidiary is insufficient to pierce the corporate veil."); *Spagnola v. Chubb Corp., 264 F.R.D. 76, 87 (S.D.N.Y. 2010)* ("[C]ourts routinely refuse to pierce the corporate veil based on allegations limited to the existence of shared office space or overlapping management, allegations that one company is the wholly-owned subsidiary of another, or that companies are to be considered as a whole." (quotation omitted)).

Plaintiffs contend the allegations that Oxy "proudly noted in a February 2017 investor presentation that 'Caustic soda prices [had] reversed their multi-year trend of steady decline in mid-2016,'" and Oxy's increased profits

---

[7] The parties dispute whether New York's choice-of-law rule applies the veil-piercing standard from the state of incorporation of the subsidiary or the parent corporation. (Dkt. 91 at 56; Dkt. 94 at 9). ***HN20***[] Courts have found that New York's choice-of-law rule applies the law of the subsidiary's state of incorporation. *See Fletcher v. Atex, Inc., 68 F.3d 1451, 1456 (2d Cir. 1995)* ("Because [subsidiary] was a Delaware corporation, Delaware law determines whether the corporate veil can be pierced in this instance."); *Nat'l Gear & Piston, Inc. v. Cummins Power Sys., LLC, 975 F. Supp. 2d 392, 401 (S.D.N.Y. 2013)* ("CPS, the subsidiary, is a Delaware-based corporation, and Cummins, the parent, is an Indiana-based corporation. Because Plaintiff seeks to disregard the subsidiary's (CPS's) corporate form and hold the parent (Cummins) liable, Delaware law governs Plaintiff's veil-piercing attack."). The case cited by Plaintiffs is not dispositive—the court did not reach the issue of which state's law governs because it determined that the corporate veil was not pierced under either New York or Delaware law. *See In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 418 (S.D.N.Y. 2011)* ("In determining whether to pierce the corporate veil in either state, courts consider allegations of disregarding corporate formalities, siphoning or intermingling of funds, inadequate capitalization, or that the corporation is a mere sham acting for the shareholder, among others.").

demonstrate domination. (Dkt. 91 at 57-58; *see* Dkt. 51 at ¶ 61). The Court disagrees. ***HN24***[] Announcements made to the general public regarding increased profits due to present market conditions on their own are insufficient **[**74]** to infer direction of a subsidiary by a parent. *See* *Freeman v. Complex Computing Co., 119 F.3d 1044, 1053 (2d Cir. 1997)* ("[I]n determining whether 'complete control' exists, we have considered such factors as . . . whether the corporations are treated as independent profit centers. . . . No one factor is decisive."); *see also* *Anderson News, L.L.C. v. Am. Media, Inc., 899 F.3d 87, 110 (2d Cir. 2018)*, *cert. denied*, *139 S. Ct. 1375, 203 L. Ed. 2d 609 (2019)* ("These statements are as consistent with legitimate assessment of industry conditions . . . as with an illegal antitrust conspiracy[.]").

Plaintiffs also argue they sufficiently allege that OxyChem acted as the agent of Oxy. (Dkt. 91 at 59-63). ***HN25***[] "Agency is the fiduciary relation which results from the manifestation of consent by one person to another that the other shall act on his behalf and subject to his control, and consent by the other so to act." *Merrill Lynch Inv. Managers v. Optibase, Ltd., 337 F.3d 125, 130 (2d Cir. 2003)* (quotations and citation omitted); *Faith Assembly v. Titledge of N.Y. Abstract, LLC, 106 A.D.3d 47, 58, 961 N.Y.S.2d 542 (2d Dep't 2013)*. "Essential to the agency relationship is the notion that the agent acts subject to the principal's direction and control." *Lumbermens Mut. Cas. Co. v. Franey Muha Alliant Ins. Servs., 388 F. Supp. 2d 292, 301 (S.D.N.Y. 2005)*; *see* *Maurillo v. Park Slope U-Haul, 194 A.D.2d 142, 146, 606 N.Y.S.2d 243 (2d Dep't 1993)* ("The agent is a party who acts on behalf of the principal with the latter's express, implied, or apparent authority."). "A *full showing* of agency supported by an accepted theory of agency or contract law is required, and generalized allegations of affiliation are insufficient." *Masefield AG v. Colonial Oil Indus., Inc., No. 05 Civ 2231 (PKL), 2005 U.S. Dist. LEXIS 6737, 2005 WL 911770, at *5 (S.D.N.Y. Apr. 18, 2005)* (emphasis added). **[**75]** "Anything short of requiring a *full* showing of some accepted theory under agency or contract law imperils a vast number of parent corporations." *Thomson-CSF, S.A. v. Am. Arbitration Ass'n, 64 F.3d 773, 780 (2d Cir. 1995)*.

As discussed above, Plaintiffs have failed to adequately allege OxyChem was subject to the direction or control of Oxy. *See, e.g.,* **[*174]** *Cortlandt St. Recovery Corp. v. Deutsche Bank AG, London Branch, No. 14-CV-01568 JPO, 2015 U.S. Dist. LEXIS 114533, 2015 WL 5091170, at *6 (S.D.N.Y. Aug. 28, 2015)* ("Cortlandt's allegation that DBSI is a wholly owned subsidiary is insufficient to show that DBSI does all the business DBAG could do."). In addition to the allegations discussed in the veil-piercing section, Plaintiffs rely on their allegation that "[t]he anticompetitive and unlawful acts alleged against the Defendants in this class action complaint were authorized, ordered, or performed by Defendants' respective officers, agents, employees, or representatives, which actively engaged in the management, direction, or control of Defendants' businesses or affairs." (Dkt. 91 at 61). This generalized and conclusory allegation is not sufficient to plausibly allege an agency relationship so as to withstand a motion to dismiss. *See* *AICO Int'l, E.C. v. Merrill Lynch & Co., 98 Fed. Appx. 44, 46-47 (2d Cir. 2004)* ("[C]onclusory allegations of a general agency relationship between a signatory and non-signatory do not suffice **[**76]** to compel . . . unwilling non-signatories to arbitrate under that theory." (citing *Merrill Lynch, 337 F.3d at 130-31*)).

Accordingly, the Court finds it appropriate to dismiss the claims as to Oxy; however, the Court also finds it is conceivable that Plaintiffs could obtain the facts necessary through discovery to allege a claim against Oxy under a veil-piercing or agency theory. *See* *Parfitt Way Mgmt. Corp. v. GSM by Nomad, LLC, No. 817CV0299GTSCFH, 2018 U.S. Dist. LEXIS 105285, 2018 WL 3118264, at *9 (N.D.N.Y. June 25, 2018)* ("[B]ecause it is conceivable to the Court that Plaintiff already possesses (or can obtain through discovery) the facts necessary to allege grounds to pierce the corporate veil, the Court will dismiss Plaintiff's Third Claim only without prejudice."). One of Oxy's subsidiaries, OxyVinyl, was a member of the Vinyl Institute, in which the only other members are Westlake, Formosa USA, and Shintech, and the meetings of which corresponded to three price increase announcements by Westlake, Formosa USA, Shintech, and OxyChem. Additionally, Oxy allegedly acknowledged that "Caustic soda prices [had] reversed their multi-year trend of steady decline in mid-2016" (Dkt. 51 at ¶ 61) and Oxy's increased profits (Dkt. 91 at 57-58). Although these allegations do not sufficiently establish **[**77]** Oxy's involvement in the alleged conspiracy to withstand a motion to dismiss, the Court is not prepared to conclude that discovery could not reveal information that would allow Plaintiffs to successfully implicate Oxy in a conspiracy. Accordingly, the dismissal of the claims against Oxy is without prejudice.

II. Motions to Dismiss for Lack of Personal Jurisdiction

Formosa and Shin-Etsu, foreign parent corporations to Formosa USA and Shintech, respectively, both move to dismiss the allegations against them pursuant to *Federal Rule of Civil Procedure 12(b)(2)* for lack of personal jurisdiction. (Dkt. 86; Dkt. 103). The Court addresses each motion in turn.

A. Legal Standard

HN26[] "On a *Fed. R. Civ. P. 12(b)(2)* motion to dismiss for lack of personal jurisdiction, [the] plaintiff bears the burden of showing that the court has jurisdiction over the defendant." *In re Magnetic Audiotape Antitrust Litig., 334 F.3d 204, 206 (2d Cir. 2003)*. "A plaintiff may meet this burden 'by pleading in good faith . . . legally sufficient allegations of jurisdiction, *i.e.*, by making a 'prima facie showing' of jurisdiction.'" *Gaymar Indus., Inc. v. FirstMerit Bank, N.A., No. 06-CV-70S, 2007 U.S. Dist. LEXIS 98974, 2007 WL 894217, at *3 (W.D.N.Y. Mar. 21, 2007)* (quoting *Jazini v. Nissan Motor Co.,* ***[*175]*** *Ltd., 148 F.3d 181, 184 (2d Cir. 1998))*. "A plaintiff can make such a prima facie showing through affidavits and supporting material containing sufficient facts which, if credited, would establish personal jurisdiction over the defendant." *Id.* (citing *Metro. Life Ins. Co. v. Robertson-Ceco Corp., 84 F.3d 560, 567 (2d Cir. 1996))*. "[W]here **[**78]** the issue is addressed on affidavits, all allegations are construed in the light most favorable to the plaintiff and doubts are resolved in the plaintiff's favor, notwithstanding a controverting presentation by the moving party." *A.I. Trade Fin., Inc. v. Petra Bank, 989 F.2d 76, 79-80 (2d Cir. 1993)*.

HN27[] "The requirement that a court have personal jurisdiction flows not from Art. III, but from the *Due Process Clause*. . . . It represents a restriction on judicial power not as a matter of sovereignty, but as a matter of individual liberty." *Ins. Corp. of Ir., Ltd. v. Compagnie des Bauxites de Guinee, 456 U.S. 694, 702, 102 S. Ct. 2099, 72 L. Ed. 2d 492 (1982)*. "Federal courts must satisfy three requirements in order to exercise personal jurisdiction over an entity: (1) the entity must have been properly served, (2) the court must have a statutory basis for exercising personal jurisdiction, and (3) the exercise of personal jurisdiction must comport with constitutional due process." *FrontPoint Asian Event Driven Fund, L.P. v. Citibank, N.A., No. 16 CIV. 5263 (AKH), 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *6 (S.D.N.Y. Oct. 4, 2018)*.

HN28[] "Due process permits a court to exercise personal jurisdiction over a non-resident where the maintenance of the suit would not 'offend traditional notions of fair play and substantial justice.'" *Porina v. Marward Shipping Co., 521 F.3d 122, 127 (2d Cir. 2008)* (quoting *Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)* (internal quotation omitted)). To determine whether exercising personal jurisdiction comports with due process, "we ask whether the defendant has sufficient minimum contacts with the forum to justify the court's **[**79]** exercise of personal jurisdiction." *Id.* "The constitutional minimum contacts inquiry for personal jurisdiction requires us to distinguish between two forms of jurisdiction." *Id.* "Specific jurisdiction is available when the cause of action sued upon arises out of the defendant's activities in a state. General jurisdiction, in contrast, permits a court to adjudicate any cause of action against the . . . defendant, wherever arising, and whoever the plaintiff." *Brown v. Lockheed Martin Corp., 814 F.3d 619, 624 (2d Cir. 2016)*. "If the defendant has sufficient minimum contacts, we proceed to the second stage of the due process inquiry, and consider whether the assertion of personal jurisdiction is reasonable under the circumstances of the particular case." *Porina, 521 F.3d at 127* (quotation omitted).

B. Formosa

Formosa is a Taiwanese company that moves to dismiss Plaintiffs' Amended Complaint for lack of personal jurisdiction. (Dkt. 86). The parties do not dispute that service was properly effectuated, and Plaintiffs concede that the Court does not have general jurisdiction over their claims. Thus, the disputes before the Court are whether there is a statutory basis for personal jurisdiction and whether the Court's exercise of personal jurisdiction would comport with due process. **[**80]** Plaintiffs contend there are two statutes that render its service of process effective: (1) *Section 12 of the Clayton Act, 15 U.S.C. § 22*, and (2) *Federal Rule of Civil Procedure 4(k)(2)*.

1. Clayton Act

HN29[] Plaintiffs contend that *§ 12 of the Clayton Act* provides a statutory basis for jurisdiction. (Dkt. 93 at 20). "The *Clayton Act* **[*176]** provides for nationwide service of process of a corporation for any action under the antitrust laws." *FrontPoint, 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *6*; *see* *15 U.S.C. § 22*. However, the "service of process provision can properly confer personal jurisdiction over a defendant only when the action is brought in the district where the defendant resides, is found, or transacts business, that is, the district where *Section 12* venue lies." *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 427 (2d Cir. 2005)* (quotation omitted). In the instant matter, Plaintiffs do not dispute that Formosa does not reside or transact business in the Western District of New York. (Dkt. 93 at 19). Accordingly, *Section 12* does not provide a basis for personal jurisdiction over Formosa.

Plaintiffs argue the relevant geographic area for assessing minimum contacts under *§ 12 of the Clayton Act* is the United States, not New York. (Dkt. 93 at 20); *see* *FrontPoint, 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *6* ("Where a civil action arises under a federal law that provides for nationwide service of process, the relevant geographic area for assessing minimum contacts is the **[**81]** United States as a whole, not just New York."); *In re Magnetic Audiotape, 334 F.3d at 207-08* (overruling dismissal of defendant where district court denied motion for limited discovery regarding whether defendant had "sufficient minimum contacts with the United States to satisfy due process"). *HN30*[] However, the cases Plaintiffs cite speak to the third part of the personal jurisdiction analysis—whether exercising personal jurisdiction under *§ 12* would comport with constitutional due process—not whether there is a statutory basis for jurisdiction, and Second Circuit precedent clearly establishes that the Clayton Act only confers personal jurisdiction over a defendant when the action is brought in the district where the defendant resides, is found, or transacts business. *Daniel, 428 F.3d at 427*.

2. *Federal Rule of Civil Procedure 4(k)(2)*

HN31[] *Rule 4(k)(2)* provides that for claims arising under federal law, "serving a summons or filing a waiver of service establishes personal jurisdiction over a defendant if: (A) the defendant is not subject **[*177]** to jurisdiction in any state's courts of general jurisdiction; and (B) exercising jurisdiction is consistent with the United States Constitution and laws." *Fed. R. Civ. P. 4(k)(2)*. "*Rule 4(k)(2)* . . . allows the exercise of personal jurisdiction by a federal district court when three requirements are met: (1) the **[**82]** claim must arise under federal law; (2) the defendant must not be subject to jurisdiction in any state's courts of general jurisdiction; and (3) the exercise of jurisdiction must be consistent with the United States Constitution and laws." *Porina, 521 F.3d at 127* (quotations omitted). "*Rule 4(k)(2)* was specifically designed to 'correct[] a gap' in the enforcement of federal law in international cases. The gap arose from the general rule that a federal district court's personal jurisdiction extends only as far as that of a state court in the state where the federal court sits." *Porina, 521 F.3d at 126* (citation omitted) (quoting *Fed. R. Civ. P. 4* advisory committee's note, 1993 Amendments).

It is undisputed that Plaintiffs' claims arise under federal law: *Sherman Act § 1*. Accordingly, the Court addresses whether Plaintiffs have shown that Formosa is not subject to jurisdiction in any state's courts of general jurisdiction, and whether the Court's exercise of jurisdiction is consistent with the Constitution.

a. "Subject to Jurisdiction"

There is some question as to whether Plaintiffs have met their burden of establishing that Formosa is not subject to jurisdiction in any state's courts of general jurisdiction. *HN32*[] "In this Circuit, plaintiffs need to certify that the **[**83]** foreign defendants are not subject to jurisdiction in any other state to meet the second requirement of *Fed. R. Civ. P. 4(k)(2)*." *In re SSA Bonds Antitrust Litig., F. Supp. 3d , No. 16 CIV. 3711 (ER), 2019 U.S. Dist. LEXIS 172939, 2019 WL 4917608, at *12 (S.D.N.Y. Oct. 4, 2019)*. At oral argument, counsel for Plaintiffs argued that the Supreme Court's holding in *Daimler AG v. Bauman, 571 U.S. 117, 134 S. Ct. 746, 187 L. Ed. 2d 624 (2014)*, moots the certification's necessity. (Dkt. 117 at 83-85). In *Daimler*, the Supreme Court found it was improper for a California court to assert general personal jurisdiction over a German corporation after determining that the German corporation's "slim contacts" with California did not render it at home in the state. *Id. at 136-37*. In *Daimler*'s wake, Plaintiffs have not alleged here that Formosa is at home in any U.S. state, but instead allege Formosa is at home in Taiwan. (Dkt. 51 at ¶ 34). Plaintiffs argue that no U.S. state can assert general jurisdiction over Formosa because Formosa is not at home in any U.S. state, and as a result requiring Plaintiffs to submit a certification would be superfluous.

The Court is not persuaded by Plaintiffs' argument. Plaintiffs cite no case law to support their contentions, and the Court notes that several courts in this Circuit have required a certification post-*Daimler. See In re SSA Bonds Antitrust Litig., 2019 U.S. Dist. LEXIS 172939, 2019 WL 4917608, at *12*; *7 W. 57th St. Realty Co., LLC v. Citigroup, Inc., No. 13 CIV. 981 PGG, 2015 U.S. Dist. LEXIS 44031, 2015 WL 1514539, at *13 (S.D.N.Y. Mar. 31, 2015)*, **[**84]** *aff'd*, *771 F. App'x 498 (2d Cir. 2019)*. Plaintiffs' position assumes that *Daimler* eviscerated the possibility of a court finding general jurisdiction with regards to foreign parent corporations. This contention misreads *Daimler*'s holding. While *Daimler* significantly limited the factual scenarios where general jurisdiction could be asserted over a foreign parent corporation, it did not eliminate the possibility. *571 U.S. at 138-39* ***HN33***[] (holding that to assert general jurisdiction over a foreign corporation, it must be found that the "corporation's affiliations with the State are so continuous and systematic as to render [it] essentially at home in the forum State." (alteration in original) (quotations omitted)).

Stated differently, if a state court could find that Formosa had affiliations with the forum state that were so continuous and systematic that it was rendered essentially at home in the state, *Rule 4(k)(2)* would not apply. That Plaintiffs allege Formosa is at home in Taiwan does not mean that Formosa is not at home in any state; the certification requires Plaintiffs to go a step further and state that, to the best of their knowledge, Formosa would not be subject to suit in courts of general jurisdiction of any **[**85]** state. ***HN34***[] Moreover, the certification requirement is a blanket requirement that is not applied on a case-by-case basis, and the Court agrees with other courts in this Circuit that not requiring a certification "would encourage similarly-situated plaintiffs—those suing foreign corporations under federal law—to omit any allegations tying defendants to a specific state, in hopes of engaging the broader minimum contacts analysis of *Rule 4(k)(2)*, which only requires contacts with the United States as a whole." *7 W. 57th St. Realty Co., LLC v. Citigroup, Inc., No. 13 CIV. 981 PGG, 2015 U.S. Dist. LEXIS 44031, 2015 WL 1514539, at *13 (S.D.N.Y. Mar. 31, 2015)*, *aff'd*, *771 F. App'x 498 (2d Cir. 2019)*.

However, as discussed below, the Court finds it appropriate to allow for limited jurisdictional discovery to establish whether Formosa had sufficient minimum contacts with the United States. Accordingly, the Court will give Plaintiffs an opportunity to submit a certification before jurisdictional discovery commences.

[*178] b. "Consistent with the United States Constitution and Laws"

At this stage, Plaintiffs have not met their burden of establishing that the Court's exercise of personal jurisdiction would comport with the requirements of the Constitution.[8] ***HN35***[] "Due process permits **[**86]** a court to exercise personal jurisdiction over a non-resident where the maintenance of the suit would not 'offend traditional notions of fair play and substantial justice.'" *Porina, 521 F.3d at 127* (quoting *Int'l Shoe Co., 326 U.S. at 316* (internal quotation omitted)). As previously discussed, courts in this Circuit apply a two-step analysis when determining whether a court's exercise of personal jurisdiction comports with due process:

> First, we ask whether the defendant has sufficient minimum contacts with the forum to justify the court's exercise of personal jurisdiction. . . . If the defendant has sufficient minimum contacts, we proceed to the second stage of the due process inquiry, and consider whether the assertion of personal jurisdiction is reasonable under the circumstances of the particular case.

[8] ***HN36***[] This requirement under *Rule 4(k)(2)* that the exercise of jurisdiction be consistent with the United States Constitution and laws, necessarily overlaps with the requirement that a Court may only exercise personal jurisdiction if it comports with constitutional due process.

Id. (citations and quotation omitted).

HN37[] "[M]inimum contacts necessary to support [specific] jurisdiction exist where the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there." *Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 732 F.3d 161, 170 (2d Cir. 2013)* (quotation and original alteration omitted). The parties do not dispute that Plaintiffs must establish minimum contacts with the United States as whole, not New York in particular. *See* ***[**87]*** *Dardana Ltd. v. Yuganskneftegaz, 317 F.3d 202, 207 (2d Cir. 2003)* ("Under [*Rule 4(k)(2)*], a defendant sued under federal law may be subject to jurisdiction based on its contacts with the United States as a whole[.]"); *S.E.C. v. Softpoint, Inc., No. 95 CIV. 2951 GEL, 2001 U.S. Dist. LEXIS 286, 2001 WL 43611, at *3 (S.D.N.Y. Jan. 18, 2001)* ("[W]here, as here, the United States, and not the State of New York, is the only sovereign whose power to adjudicate is in question, it logically follows that the relevant 'minimum contacts' . . . should be the defendant's contacts with the United States, and not his contacts with the State of New York.").

Plaintiffs argue that their allegations as to Formosa's direct participation in the conspiracy are sufficient to establish specific jurisdiction. However, Plaintiffs' allegations against Formosa are general and conclusory. Plaintiffs do not allege specifics as to how Formosa assisted with either raising prices or contributing to the appearance of a constrained supply, but instead allege that Formosa was a member of various trade organizations and that its profits increased as a result of the pricing increases. (Dkt. 51 at ¶¶ 34, 124). These general allegations do not establish contacts sufficient for specific jurisdiction. *See* *In re S. African Apartheid Litig., 643 F. Supp. 2d 423, 435 (S.D.N.Y. 2009)* ("Periodic appearances **[**88]** at trade shows or investors' conferences do not constitute continuous and systematic business contacts necessary to establish general jurisdiction."); *see also* *In re Musical Instruments, 798 F.3d at 1196* ("[M]ere participation in trade-organization meetings where information is exchanged and strategies are advocated does not suggest an illegal agreement.").

Plaintiffs also submit an affidavit and data from a third-party website **[*179]** suggesting that Formosa exported caustic soda to the United States to three different customers during the class period.[9] (*See* Dkt. 93-7). ***HN38***[] "Single acts of commercial activity, when forming the basis of a plaintiff's claims, can satisfy the constitutional requirements of Due Process." *FrontPoint, 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *7* (citing *Chloe v. Queen Bee of Beverly Hills, LLC, 616 F.3d 158, 171 (2d Cir. 2010)*). Defendants contend that the information is hearsay and should not be considered by the Court for purposes of this motion, and that even if the Court did consider the documents, Formosa's export of caustic soda is "diametrically opposed to one of the central theories of Plaintiffs' case," and as a result such allegations are not "suit-related" and cannot support specific jurisdiction over Formosa. (Dkt. 101 at 8). ***HN39***[] "While it is proper for a court to rely on affidavits to establish jurisdictional facts, hearsay evidence **[**89]** submitted by a plaintiff is not sufficient to defeat a motion to dismiss for lack of personal jurisdiction." *Gosain v. State Bank of India, 689 F. Supp. 2d 571, 582 (S.D.N.Y. 2010)*, *vacated in part on other grounds*, *414 F. App'x 311 (2d Cir. 2011)*; *see also* *J.S. v. Attica Central Schools, 386 F.3d 107, 110 (2d Cir. 2004)* ("We may consider affidavits and other materials beyond the pleadings to resolve the jurisdictional issue, but we may not rely on conclusory or hearsay statements contained in the affidavits."). The Court agrees that the documents from the third-party website submitted by Plaintiffs are inadmissible hearsay, and does not consider them for purposes of the personal jurisdiction analysis. *See* *DeLorenzo v. Ricketts & Assocs., Ltd., No. 15-CV-2506 (VSB), 2017 U.S. Dist. LEXIS 156415, 2017 WL 4277177, at *7 n.13 (S.D.N.Y. Sept. 25, 2017)* ("Plaintiff may not

[9] In its reply, Formosa provided documentation illustrating that those shipments were caustic soda that Formosa USA purchased from Formosa and then subsequently sold to Formosa USA's customers, and that Formosa shipped the caustic soda to those customers at Formosa USA's behest. (Dkt. 101-2 at ¶¶ 4-9; Dkt. 101-3; Dkt. 101-4; Dkt. 101-5). ***HN40***[] However, prior to an evidentiary hearing or trial, "where the issue is addressed on affidavits, all allegations are construed in the light most favorable to the plaintiff and doubts are resolved in the plaintiff's favor, notwithstanding a controverting presentation by the moving party." *A.I. Trade Fin., Inc., 989 F.2d at 79-80*.

rely on a LinkedIn profile to establish jurisdiction, as such an online profile is hearsay and does not qualify as admissible evidence."), *aff'd sub nom.* DeLorenzo v. Viceroy Hotel Grp., LLC, 757 F. App'x 6 (2d Cir. 2018).[10]

Plaintiffs further argue they have established minimum contacts by demonstrating that Formosa USA was an agent of Formosa. **HN41**[] "For purposes of alleging presence within the judicial district sufficient to satisfy the Due Process Clause, a parent-subsidiary relationship does not itself create jurisdiction over the person unless the subsidiary is the alter ego of the parent or a mere agent acting at the parent's directions." Alki Partners, L.P. v. Vatas Holding GmbH, 769 F. Supp. 2d 478, 489 (S.D.N.Y. 2011) (quotation omitted), **[**90]** *aff'd sub nom.* Alki Partners, L.P. v. Windhorst, 472 F. App'x 7 (2d Cir. 2012). "Agency is a legal concept that depends on the existence of three elements: **[*180]** (1) the manifestation by the principal that the agent shall act for him; (2) the agent's acceptance of the undertaking; *and* (3) the understanding of the parties that the principal is to be in control of the undertaking." Cleveland v. Caplaw Enters., 448 F.3d 518, 522 (2d Cir. 2006) (quotations omitted). Although *Daimler* prevents Plaintiffs from asserting an agency relationship as the basis for general jurisdiction over Formosa, the Supreme Court also recognized that "[a]gency relationships . . . may be relevant to the existence of *specific* jurisdiction." 571 U.S. at 135 n.13. "As such, a corporation can purposefully avail itself of a forum by directing its agents or distributors to take action there." *Id.*

The parties do not raise the issue of what body of agency law should apply when the minimum contacts analysis pertains to the United States as a whole and not just New York, but instead base their arguments on New York agency law. "As 'there is no discernable difference between federal common law principles of agency and New York agency law,'" the Court need not address whether the application of New York law is inappropriate here. Young-Wolff v. John Wiley & Sons, Inc., No. 12-CV-5230 (JPO), 2016 U.S. Dist. LEXIS 3614, 2016 WL 154115, at *6 n.5 (S.D.N.Y. Jan. 12, 2016) (quoting Meisel v. Grunberg, 651 F. Supp. 2d 98, 122 (S.D.N.Y. 2009)); *see* Charles Schwab Corp. v. Bank of Am. Corp., 883 F.3d 68, 85 (2d Cir. 2018) ("[W]here we have found **[**91]** personal jurisdiction based on an agent's contacts, we have never suggested that due process requires something more than New York law."); Presbyterian Church of Sudan v. Talisman Energy, Inc., 453 F. Supp. 2d 633, 687 (S.D.N.Y. 2006) ("The plaintiffs seek to apply New York or federal common law principles of agency law, observing that they are identical."), *judgment entered sub nom*. Presbyterian Church of Sudan v. Talisman Energy, Inc., No. 01 CIV.9882(DLC), 2006 U.S. Dist. LEXIS 86609, 2006 WL 3469542 (S.D.N.Y. Dec. 1, 2006), and *aff'd*, 582 F.3d 244 (2d Cir. 2009); *see also*Int'l Bus. Mach. Corp., v. Liberty Mut. Ins. Co., 363 F.3d 137, 143 (2d Cir. 2004) ("Choice of law does not matter, however, unless the laws of the competing jurisdictions are actually in conflict.").

HN42[] "A parent corporation may be sued in [the venue] when the relationship between the foreign parent and the local subsidiary validly suggests the existence of an agency relationship or the parent controls the subsidiary so completely that the subsidiary may be said to be simply a department of the parent." Koehler v. Bank of Bermuda Ltd., 101 F.3d 863, 865 (2d Cir. 1996). "[T]here is jurisdiction over a principal based on the acts of an agent where the alleged agent acted in [the venue] for the benefit of, with the knowledge and consent of, and under some control by, the nonresident principal." Charles Schwab, 883 F.3d at 85 (quotation omitted). "A plaintiff attempting to establish personal jurisdiction over a defendant who has never been present in the [venue] and only acted through subsidiaries or agents need only show that the subsidiary 'engaged in **[**92]** purposeful activities in this [venue],' that those activities were 'for the benefit of and with the knowledge and consent of' the defendant, and that the defendant 'exercised some control over' the subsidiary in the matter that is the subject of the lawsuit." Ingenito v. Riri USA, Inc., 89 F. Supp. 3d 462, 476 (E.D.N.Y. 2015) (quoting Kreutter v. McFadden Oil Corp., 71 N.Y.2d 460, 467, 522 N.E.2d 40, 527 N.Y.S.2d 195 (1988)).

---

[10] Plaintiffs also to refer to "over thirty U.S. patents" held by Formosa and Formosa USA. (Dkt. 93 at 15). However, holding patents is insufficient to establish specific jurisdiction because the allegations in the Amended Complaint bear no relation to patents. *See* Am. Wave Machs., Inc. v. Surf Lagoons, Inc., No. 13-cv-3204-CAB (NLS), 2014 U.S. Dist. LEXIS 184831, 2014 WL 10475281, at *8 (S.D. Cal. Nov. 12, 2014) ("[A]lthough the patent does constitute purposeful direction of activities at the United States, AWM's infringement claims do not arise out of or relate to the Klimaschewski/ATV patent.").

Plaintiffs allege that Formosa USA's ownership is shared among Formosa and members of the Wang family (Dkt. 51 at ¶ 34), and that Formosa treats Formosa USA's Livingston, New Jersey offices as **[*181]** its headquarters[11] (Dkt. 93-2 at 27; Dkt. 93-3 at 3; Dkt. 93-7 at 44-49). Plaintiffs also submitted Formosa's audited financial statements which, translated, characterize Formosa as the "main sale target" for Formosa USA's raw material production. (Dkt. 93-4 at 30). Further, the Amended Complaint alleges that Formosa USA's activities increased Formosa's operating profit by 68.5% from 2016 to 2017. (Dkt. 51 at ¶ 34). Plaintiffs also contend that Formosa produces caustic soda in Asia (Dkt. 93 at 24), which counsel for Formosa confirmed at oral argument (Dkt. 117 at 49).

The allegations and supplemental materials submitted by Plaintiffs are not sufficient to demonstrate an agency relationship for purposes of specific jurisdiction because **[**93]** they do not sufficiently tie Formosa into the caustic soda conspiracy. ***HN43***[] "[S]pecific jurisdiction cases are limited to those involving issues deriving from, or connected with, the very controversy that establishes jurisdiction." *In re Hoosick Falls PFOA Cases, 431 F. Supp. 3d 69, 2020 U.S. Dist. LEXIS 90, 2020 WL 33409, at *5 (N.D.N.Y. 2020))*; *see* *Daimler, 571 U.S. at 138* ("[J]urisdiction can be asserted where a corporation's in-state activities are not only continuous and systematic but also give rise to the liabilities sued on." (quotation omitted)).

HN44[] Agency law does provide that "[w]here the parent is not involved in the day-to-day operations of its subsidiary, or, where the entities observe corporate formalities, the subsidiary and parent can nonetheless have an agency relationship because they are engaged in a 'common business enterprise.'" *Yousef v. Al Jazeera Media Network, No. 16-CV-6416 (CM), 2018 U.S. Dist. LEXIS 49614, 2018 WL 1665239, at *9 (S.D.N.Y. Mar. 22, 2018)* (citing *Dorfman v. Marriott Int'l Hotels, Inc., No. 99 Civ. 10496 (CSH), 2002 U.S. Dist. LEXIS 72, 2002 WL 14363, at *10 (S.D.N.Y. Jan. 3, 2002))*. However, while the documents produced by Plaintiffs may be indicative of an agency relationship, *see* *Palmieri v. Estefan, 793 F. Supp. 1182, 1194 (S.D.N.Y. 1992)* ("[W]hen two corporations have common ownership and their activities are interrelated as here, they may have an agency relationship for jurisdictional purposes, even if the resident corporation is not controlled by the nonresident entity."), they are not indicative of an agency relationship specifically related to caustic soda.

Plaintiffs also point to **[**94]** another "indicator of agency," which "is whether the parent would be obliged to enter the market directly if the subsidiary was absent because the market is too important to the parent's welfare." *Gurvey v. Cowan, Liebowitz & Latman, PC, No. 06CIV.1202, 2009 U.S. Dist. LEXIS 21183, 2009 WL 691056, at *3-4 (S.D.N.Y. Mar. 17, 2009)* (citing *Ginsberg v. Gov't Props Trust, Inc., No. 07 Civ. 365, 2007 U.S. Dist. LEXIS 75771, 2007 WL 2981683, at *7 (S.D.N.Y. Oct. 10, 2007))*; *see* *Dorfman, 2002 U.S. Dist. LEXIS 72, 2002 WL 14363, at *8* ("Where a subsidiary's business is dependent on the parent's business, or vice versa, an inference may often be drawn that the parent controls the subsidiary as it would a department."). Again, while Plaintiffs have provided documents showing that Formosa also produces caustic soda and that Formosa USA contributed to 68.5% of Formosa's overall profits, Plaintiffs have failed to provide support for the proposition that the profits are a result of caustic soda sales and not one of the other industries in which Formosa USA participates. Accordingly, Plaintiffs' allegations and documents do not sufficiently establish **[*182]** specific jurisdiction on the basis of an agency theory.

For the forgoing reasons, the Court finds Plaintiffs have not made a *prima facie* showing of personal jurisdiction as to Formosa.

C. Shin-Etsu

Shin-Etsu also moves for the Court to dismiss the claims against it for lack of personal jurisdiction. (Dkt. 103). Shin-Etsu is a Japanese corporation with a principal place **[**95]** of business in Tokyo, and U.S-based Shintech is one of its wholly-owned subsidiaries. (Dkt. 103 at 6). Plaintiffs argue the Court has jurisdiction over Shin-Etsu pursuant to *Rule 4(k)(2)*,[12] and contend that they have alleged sufficient minimum contacts regarding Shin-Etsu to establish

[11] Formosa contests the characterization of the New Jersey offices as its headquarters. (Dkt. 101 at 11 n.10).

specific jurisdiction through direct contact, an alter ego theory, and an agency theory. (Dkt. 109). Shin-Etsu contends that Plaintiffs have failed to demonstrate Shin-Etsu had sufficient minimum contacts with the United States (Dkt. 110 at 7-10).

The Court finds that Plaintiffs have sufficiently established that their claims arise under federal law. Additionally, Plaintiffs also certify that "they are unaware of any U.S. district court where Shin-Etsu would be subject to general jurisdiction." (Dkt. 109 at 16-17). Accordingly, the Court must address whether Plaintiffs have alleged sufficient minimum contacts with the United States.

1. Direct Contact

Plaintiffs point to the following as evidence of Shin-Etsu's minimum contacts with the United States: Shin-Etsu has imported millions of pounds of products to Shintech and U.S.-based customers; earned billions of dollars from sales to U.S. customers; holds thousands of U.S. **[**96]** patents; benefitted in the hundreds of millions of dollars from recent changes to U.S. tax laws; brought unrelated suits in federal courts; and has its proprietary information protected by a federal court's order. (Dkt. 109 at 20).

HN45[] However, "specific jurisdiction is confined to adjudication of issues deriving from, or connected with, the very controversy that establishes jurisdiction," and "[w]hen there is no such connection, specific jurisdiction is lacking regardless of the extent of a defendant's unconnected activities in the State." *Bristol-Myers Squibb Co. v. Superior Court of Cal., S.F. Cty., 137 S. Ct. 1773, 1780-81, 198 L. Ed. 2d 395 (2017)*. None of these "contacts" connects Shin-Etsu to the alleged price-fixing scheme, nor do Plaintiffs argue that they do; they merely demonstrate that Shin-Etsu generally engages in business in the United States. *See Goodyear Dunlop Tires Operations, S.A. v. Brown, 564 U.S. 915, 931, 131 S. Ct. 2846, 180 L. Ed. 2d 796 (2011)* ("[E]ven regularly occurring sales of a product in a State do not justify the exercise of jurisdiction over a claim unrelated to those sales.").

Similarly, Shin-Etsu's prior federal court litigation does not provide a basis for this Court to find jurisdiction in this case. The cases Plaintiffs cite regarding prior litigation are not dispositive. *Gucci Am., Inc. v. Weixing Li, 135 F. Supp. 3d 87 (S.D.N.Y. 2015)*, was decided two years before the Supreme Court's decision in *Bristol-Myers*. Additionally, the **[**97]** *Gucci* court noted that the contacts had to be at least a "but-for" cause of the plaintiff's injury, *id. at 98*, which Plaintiffs have not established here. Similarly, the Ninth Circuit **[*183]** in *Mattel, Inc. v. Greiner and Hausser GmbH, 354 F.3d 857 (9th Cir. 2003)*, found there was a "clear relationship" between the 1961 lawsuit and the "current" lawsuit because of the similarity in claims between the two lawsuits. Plaintiffs have made no such showing here regarding the prior lawsuits brought by Shin-Etsu.

Plaintiffs also argue that Shin-Etsu participated directly in the price-fixing conspiracy through manipulation of the caustic soda price index. (Dkt. 109 at 21). However, nowhere does the Amended Complaint or the opposition to the motion to dismiss point to a specific instance where Shin-Etsu announced that Shintech would be increasing prices, or any other specific acts committed by Shin-Etsu. Instead, Plaintiffs make generalizations that Shin-Etsu engaged in such behavior. These generalizations, along with the generalized allegations that Shin-Etsu engaged in co-producer transactions and exchanges of competitively sensitive information, are not sufficient to establish personal jurisdiction, and the cases cited by Plaintiffs support that more specific allegations are **[**98]** necessary. *See Iowa Pub. Emps.' Ret. Sys., 340 F. Supp. 3d at 339* ("[T]he Amended Complaint alleges not merely that Defendants used EquiLend meetings as a forum to plot the conspiracy, but also that EquiLend engaged in active conduct in furtherance of the conspiracy, namely purchasing SL-x's intellectual property to shelve its enabling technology and launching DataLend to underprice and block the development of Data Explorers."); *FrontPoint, 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *8* ("FrontPoint has adequately alleged "suit-related conduct" in the United States, namely the trading of SIBOR-based derivatives in the U.S. between FrontPoint and certain Panel

[12] Plaintiffs also argue the Court has jurisdiction under the Clayton Act (Dkt. 109 at 16-19), but for the same reasons that it does not provide a basis for jurisdiction over Formosa, the Clayton Act does not provide a basis to assert personal jurisdiction over Shin-Etsu.

Members."); *Sonterra Capital Master Fund Ltd. v. Credit Suisse Grp. AG, 277 F. Supp. 3d 521, 597 (S.D.N.Y. 2017)* ("[D]ocuments produced by JPMorgan as part of its settlement with plaintiffs now make clear that RBS colluded with a JPMorgan trader in New York to manipulate CHF LIBOR.").

2. Alter Ego

Plaintiffs argue that Shin-Etsu and Shintech are alter egos so that the corporate veil was pierced. For purposes of asserting personal jurisdiction with regards to piercing the corporate veil, the Second Circuit has yet to address whether to apply the law of the subsidiary's state of incorporation, federal common law, or the law of the forum. *See* *In re Lyondell Chem. Co., 543 B.R. 127, 139 n.38 (S.D.N.Y. 2016)* ("Some federal courts have engaged in a choice of law analysis to decide which law to apply **[**99]** to an alter ego theory of *jurisdiction*, usually finding that the law of the corporation's state of incorporation governs. Other courts have disagreed, distinguishing the analysis for 'alter ego' *liability* and for 'alter ego' *jurisdiction*, and finding that because 'alter ego' jurisdiction is either a construction of the statute providing jurisdiction or is part of due process (or both), for a *jurisdictional* veil piercing analysis, courts should apply either the law governing the interpretation of the jurisdictional statute or federal due process jurisprudence, or both." (collecting cases)). In the instant matter, Shin-Etsu's subsidiary Shintech is incorporated under the laws of Delaware (Dkt. 51 at ¶ 32), and the law of the forum is that of New York. Both New York and federal common law apply a substantially similar "relaxed" standard when assessing an alter ego theory for jurisdictional purposes as opposed to liability. *See* *In re Platinum & Palladium Antitrust Litig., No. 1:14-CV-9391-GHW, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *47 (S.D.N.Y. Mar. 28, 2017)* (collecting cases holding that federal common law applies a "relaxed" standard "where the *alter ego* theory **[*184]** is used not to impose liability, but merely to establish jurisdiction"); *In re Lyondell Chem. Co., 543 B.R. at 143* ("Under New York law, **[**100]** '[e]stablishing the exercise of personal jurisdiction over an alleged alter ego requires application of a less stringent standard than that necessary to pierce the corporate veil for purposes of liability.'" (quoting *GEM Advisors, Inc. v. Corporacion Sidenor, S.A., 667 F. Supp. 2d 308, 319 (S.D.N.Y. 2009))*. Because Plaintiffs have failed to establish the corporate veil was pierced even pursuant to this more relaxed standard utilized for jurisdictional purposes under New York and federal common law, at this time the Court need not reach the issue of whether New York, Delaware, or federal common law applies, and instead will analyze the issue using New York law.

HN46[] "[U]nder New York law, a court may pierce the corporate veil where '1) the owner exercised complete domination over the corporation with respect to the transaction at issue, *and* 2) such domination was used to commit a fraud or wrong that injured the party seeking to pierce the veil.'" *Lakah v. UBS AG, 996 F. Supp. 2d 250, 260 (S.D.N.Y. 2014)* (quoting *MAG Portfolio Consult, GMBH v. Merlin Biomed Grp. LLC, 268 F.3d 58, 63 (2d Cir. 2001))*. As previously discussed, "[t]his standard is relaxed where the alter ego theory is used not to impose liability, but merely to establish jurisdiction. In the jurisdictional context, a plaintiff need only show that the allegedly controlled entity was a shell for the allegedly controlling party." *In re Commodity Exch., Inc., 213 F. Supp. 3d 631, 681 (S.D.N.Y. 2016)* (citation and quotations omitted). **[**101]**

HN47[] When applying this less onerous standard, "the factors to be considered in determining whether a corporation is a 'shell' are: the failure to observe corporate formality; inadequate capitalization; intermingling of personal and corporate funds; the sharing of common office space, address and telephone numbers of the alleged dominating entity and the subject corporation; an overlap of ownership, directors, officers or personnel; the use of the corporation as a means to perpetrate the wrongful act against the plaintiff; as well as any other evidence tending to show that the company is being used as a mere shell." *Miramax Film Corp. v. Abraham, No. 01 CV 5202 (GBD), 2003 U.S. Dist. LEXIS 21346, 2003 WL 22832384, at *8 (S.D.N.Y. Nov. 25, 2003)*; *see* *In re Platinum & Palladium Antitrust Litig., 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *48* (using same factors when applying federal common law); *see also* *Jazini, 148 F.3d at 184-85* ("In determining whether the subsidiary is a mere department of the parent . . . the court must consider four factors . . . first, common ownership—which is essential—; second, financial dependency of the subsidiary on the parent corporation; third, the degree to which the parent corporation interferes in the selection and assignment of the subsidiary's executive personnel and fails to observe corporate formalities; and fourth, the degree of control over the marketing and operational policies of the subsidiary **[**102]** exercised by the parent." (quotations omitted)). "These factors are not exhaustive, nor is proof of any one factor or a combination of factors necessarily determinative. Rather, a finding that a corporation is an alter ego of another entity is warranted when doing so will achieve an equitable result." *Miramax Film Corp., 2003 U.S. Dist. LEXIS 21346, 2003 WL 22832384, at *8*.

Plaintiffs have alleged and submitted documents in support of the following: (1) Shintech is a wholly-owned subsidiary of Shin-Etsu; (2) Shin-Etsu's president and board chairman are also the president and board chairmen of Shintech; (3) the president of Shin-Etsu and Shintech has been assigned to work at Shintech since 1983 **[*185]** and owns a home in Houston; (4) Shin-Etsu and Shintech share the same vision and mission; (5) the "Headquarters" portion of Shintech's website only refers by name to Shin-Etsu's President and Chairman; (6) Shin-Etsu's Chairman routinely highlights Shintech in his messages to shareholders in annual reports; (7) Shin-Etsu lists Shintech first among its subsidiary corporations; (8) Shin-Etsu considered whether and by how much Shintech should expand its caustic soda production capacity in the United States, and implemented the plan; (9) Shin-Etsu has exported millions **[**103]** of pounds of products to New York and other U.S. ports, including to Shintech and another Shin-Etsu subsidiary, Shintech Louisiana LLC; and (10) the Shintech website Headquarters page states, "When Shintech became a wholly owned subsidiary of Shin-Etsu, Chairman Kanagawa took full authority for the management of the subsidiary." (Dkt. 109 at 26-27).

Plaintiffs cannot establish that Shintech is the alter ego of Shin-Etsu by showing Shintech is wholly owned by Shin-Etsu. *In re Ski Train Fire in Kaprun, Austria on Nov. 11, 2000, 342 F. Supp. 2d 207, 214-15 (S.D.N.Y. 2004)* ("[E]ven a wholly owned subsidiary is presumed to be a separate entity in the absence of 'clear evidence' that it is controlled by the parent."); *Cali v. E. Coast Aviation Servs., Ltd., 178 F. Supp. 2d 276, 287 (E.D.N.Y. 2001)* ("[C]ourts have found that ownership of a subsidiary's stock is not determinative of an alter-ego relationship[.]"). ***HN48***[] In that same vein, it is not sufficient to establish one company is the alter ego of another for jurisdictional purposes by alleging that their corporate leadership overlaps. *See* *Jazini, 148 F.3d at 185* ("The Jazinis asserted that one of Nissan Japan's four 'managing executive directors' is the chairman of Nissan U.S.A.. That fact does not establish that the American subsidiary is a 'mere department' of the Japanese parent."). **[**104]** Moreover, regarding the submissions from Shintech's website, "the Court is not persuaded that a failure to distinguish between parent and subsidiary on a web page is sufficient to show that the parent controls the subsidiary's marketing and operational policies. ***HN49***[] An advertising strategy deciding not to present to its consumers the existence of a parent-subsidiary relationship is not equivalent to a showing that the parent corporation exercises any control over its subsidiary's operational or marketing activities." *J.L.B. Equities, Inc. v. Ocwen Fin. Corp., 131 F. Supp. 2d 544, 550 (S.D.N.Y. 2001)*.

Additionally, Plaintiffs do not address whether Shintech's funds were intermingled with Shin-Etsu's or if Shintech observed corporate formalities. *See* *In re Platinum, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *48* (holding plaintiffs failed to make a *prima facie* showing that the court could exercise personal jurisdiction under the alter ego theory where the complaint did not address whether the subsidiary observed corporate formalities, if funds were intermingled, or whether office space and addresses were shared). Moreover, Plaintiffs do not plead or present any fact suggesting that Shintech is financially dependent on Shin-Etsu. *See* *In re Commodity Exchange, Inc., 213 F. Supp. 3d at 681* (finding alter ego relationship where plaintiffs plausibly alleged the parent corporation engaged **[**105]** in the conspiracy, subsidiary corporation had no corporate headquarters or separate mailing address, and subsidiary corporation was financially dependent on parent corporation). Quite the opposite—Plaintiffs' allegations indicate Shintech generates significant income on its own. (*See* Dkt. 51 at ¶¶ 32, 49); *see also* *J.L.B. Equities, Inc., 131 F. Supp. 2d at 549* (holding all the factors aside from common ownership "counsel against the exercise of personal jurisdiction" where "the plaintiff cannot, **[*186]** and does not, adequately demonstrate that the [subsidiary] is dependent upon [the parent corporation] for funds. To the contrary, the facts alleged suggest that the [subsidiary] generates the bulk of [the parent corporation]'s income").

3. Agency

The Court also finds that while the law allows for Plaintiffs to establish specific jurisdiction under an agency theory, Plaintiffs have failed to do so here. Shin-Etsu accuses Plaintiffs of "grossly" misstating the agency theory in *Daimler* (Dkt. 110 at 12); however, it is Shin-Etsu that misapplies *Daimler*'s holding. *Daimler* largely rejected the use of an agency theory to establish *general* jurisdiction.[13] The Supreme Court included an extensive discussion of how *International Shoe Co. v. State of Washington, Office of Unemployment Compensation and Placement, 326 U.S. 310, 66 S. Ct. 154, 90 L. Ed. 95 (1945)*, resulted in the "rapid expansion **[**106]** of tribunals' ability to hear claims against out-of-state defendants" through the use of specific jurisdiction, as well as the "reduced role" of general jurisdiction. *Daimler, 571 U.S. at 125-28*. ***HN50***[] *Daimler* specifically stated that *International Shoe* used the words "continuous and systematic" to "describe instances in which the exercise of *specific* jurisdiction would be appropriate," *id. at 128*, and that "[a]gency relationships . . . may be relevant to the existence of *specific* jurisdiction, *id. at 135 n.13*; *see Yousef, 2018 U.S. Dist. LEXIS 49614, 2018 WL 1665239, at *14* ("Specific jurisdiction was not the subject of *Daimler*, so there is no reason to believe that *Daimler* changed pre-existing law on that subject."). Additionally, at least one post-*Daimler* case has recognized "common business enterprise" allegations showing that the "reason for the subsidiary's existence is to perform services in furtherance of its parent's business that would otherwise have to be performed by the parent" can be sufficient to establish specific jurisdiction. *See 2018 U.S. Dist. LEXIS 49614, [WL] at *9-11, *13*.

However, Plaintiffs have failed to make the showing necessary to establish specific jurisdiction pursuant to an agency theory. Although agency for jurisdictional purposes may be demonstrated "[w]here a subsidiary's business is dependent **[**107]** on the parent's business, or vice versa," *Dorfman, 2002 U.S. Dist. LEXIS 72, 2002 WL 14363, at *8*, Plaintiffs have not demonstrated that Shin-Etsu is dependent on Shintech's caustic soda business. Plaintiffs have submitted documents purporting to show that Shintech is a wholly-owned subsidiary of Shin-Etsu, Shintech is the primary U.S. importer and distributor of Shin-Etsu's products, Shin-Etsu's president and board chairman are also the president and board chairmen of Shintech, and the president of Shin-Etsu and Shintech has been assigned to work at Shintech since 1983 and owns a home in Houston where Shintech is located. (Dkt. 109 at 26-27). Additionally, Shin-Etsu is a producer of caustic soda. (Dkt. 117 at 50). However, the documents submitted by Plaintiff, which include Shin-Etsu's annual reports, repeatedly highlight the contributions Shintech has made to Shin-Etsu's profits **[*187]** through PVC production, not from caustic soda. (*See, e.g.*, Dkt. 109-2 ("Shintech . . . forms the core of our PVC operations[.]"); Dkt. 109-3 at 7 (noting PVC as a "core business," not caustic soda); *id.* at 8 ("Shintech has achieved remarkable profitability in the PVC industry and stable profit growth."); Dkt. 109-4 at 13 ("Shintech has grown into the world's largest **[**108]** manufacturer of PVC[.]")). In other words, Plaintiffs may have demonstrated that Shin-Etsu would step into the American PVC market if Shintech stopped producing PVC, but they have not made the same showing with regards to caustic soda. Because it is caustic soda, not PVC, that is at issue in this lawsuit, Plaintiffs' allegations are not sufficient for specific jurisdictional purposes. *See Daimler, 571 U.S. at 138*; *In re Hoosick Falls PFOA Cases, 2020 U.S. Dist. LEXIS 90, 2020 WL 33409, at *5*.

For the reasons stated above, the Court finds Plaintiffs have failed to make a *prima facie* showing of personal jurisdiction as to Shin-Etsu.

D. Jurisdictional Discovery

Plaintiffs request that, in the event the Court finds they did not make a *prima facie* showing of personal jurisdiction as to either Formosa or Shin-Etsu, they be allowed to pursue jurisdictional discovery. (Dkt. 93 at 27-28; Dkt. 109 at 29-31). ***HN51***[] "It is well settled under Second Circuit law that, even where plaintiff has not made a *prima facie* showing of personal jurisdiction, a court may still order discovery, in its discretion, when it concludes that the

[13] The quotation from *Daimler* that Shin-Etsu includes in its reply papers is an excerpt from the Court's discussion of agency as it pertains to general jurisdiction. (Dkt. 110 at 12); *see Daimler, 571 U.S. at 135-36* ("The Ninth Circuit's agency finding rested primarily on its observation that [the subsidiary]'s services were 'important' to Daimler, as gauged by Daimler's hypothetical readiness to perform those services itself if MBUSA did not exist. . . . The Ninth Circuit's agency theory thus appears to subject foreign corporations to general jurisdiction whenever they have an in-state subsidiary or affiliate, an outcome that would sweep beyond even the "sprawling view of general jurisdiction" we rejected in *Goodyear*.").

plaintiff may be able to establish jurisdiction if given the opportunity to develop a full factual record." *Leon v. Shmukler, 992 F. Supp. 2d 179, 194 (E.D.N.Y. 2014)*. In this Circuit, jurisdictional discovery is permitted where a plaintiff **[**109]** has "made a sufficient start toward establishing personal jurisdiction," such that it appears there may be a colorable jurisdictional claim. *Hollins v. U.S. Tennis Ass'n, 469 F. Supp. 2d 67, 70 (E.D.N.Y. 2006)* (quotation omitted). The Court finds jurisdictional discovery is warranted here as to both Formosa and Shin-Etsu.

Plaintiffs have submitted documents that support Formosa's dependence on Formosa USA and that Formosa may have some involvement with the caustic soda sales by Formosa USA. Plaintiffs have shown significant overlap in ownership between Formosa and Formosa USA, that Formosa is the "main sale target" for Formosa USA's raw material production, and that Formosa USA increased Formosa's operating profit by 68.5%. (Dkt. 51 at ¶ 34; Dkt. 93-4 at 30). In addition, Plaintiffs have submitted documents purporting to show that both Formosa and Formosa USA produce significant amounts of caustic soda, and that Formosa USA's caustic soda capacity is a selling point for Formosa to its investors. (Dkt. 93-2 at 21 (listing Formosa's caustic soda capacity); *id.* at 16 ("[Formosa] USA is now a major U.S. supplier of . . . caustic soda."); *id.* at 23 (listing caustic soda as major product of Formosa USA)).

Plaintiffs have also produced some evidence that Shin-Etsu is dependent **[**110]** on Shintech and that Shin-Etsu may be involved with Shintech's caustic soda business. The overlap in corporate leadership between Shintech and Shin-Etsu, Shintech's status as the "core" of Shin-Etsu's Chor-Alkali business, and Shintech's status as the only subsidiary corporation repeatedly touted by Shin-Etsu in its annual reports, all are indicators of Shin-Etsu's dependence on Shintech. Additionally, Shin-Etsu is a caustic soda producer and Shin-Etsu's annual reports from the Class Period submitted by Plaintiffs refer to **[*188]** Shintech's caustic soda business as having undergone significant growth. (*See* Dkt. 109-3 at 13 (Shin-Etsu 2018 Annual Report noting "the supply and demand relationship with respect to caustic soda improved, resulting in significant growth," as well as a 21.8% increase in net sales and 75.3% increase in operating income for the PVC/Chlor-Alkali Business); Dkt. 109-2 at 13 (Shin-Etsu 2019 Annual Report noting "Shintech Inc. in the U.S. continued its shipments of both PVC and caustic soda at a high level, backed by advantageous raw material procurement in the country, which resulted in its business performance growing")). Additionally, taking Plaintiffs' allegations **[**111]** in the Amended Complaint as true, the explanations for the caustic soda price increases could be construed as an attempt to cover up the alleged conspiracy. Moreover, Plaintiffs have submitted evidence that Shin-Etsu was heavily involved in the decision to build a new manufacturing plant for Shintech, which could also be a way of misleading customers into thinking supply of caustic soda is tight.

It is not clear from the submissions how much of Formosa USA's and Shintech's success in increasing the caustic soda prices is attributable to Formosa and Shin-Etsu or how involved Formosa and Shin-Etsu were, if at all, with the decisions surrounding the increased prices. ***HN52***[] However, "the Second Circuit distinguishes between allegations that are 'insufficiently developed' warranting discovery and those that are 'sparse' and 'conclusory' requiring dismissal," *Hollins, 469 F. Supp. 2d at 71-72*; *see* *Texas Int'l Magnetics, Inc. v. BASF Aktiengesellschaft, 31 F. App'x 738, 739 (2d Cir. 2002)* ("[P]laintiffs' jurisdictional allegations are neither sparse nor insufficiently specific; they are simply insufficiently developed at this time to permit judgment as to whether personal jurisdiction is appropriate."), and the allegations and submissions discussed above are neither sparse nor conclusory. "Based upon these and the other **[**112]** allegations in the [Amended C]omplaint, the Court concludes, in its discretion, that [P]laintiffs' contentions of personal jurisdiction are colorable and that they should have the opportunity to engage in limited discovery as to the jurisdictional questions." *Leon, 992 F. Supp. 2d at 195*.

Formosa and Shin-Etsu cite to *Jazini, 148 F.3d 181*, to support their position that the Court should deny jurisdictional discovery. (Dkt. 110 at 14).[14] However, the *Jazini* court emphasized that the plaintiffs had not made

---

[14] Formosa cited two other cases that stand for the same proposition as *Jazini* with regards to conclusory and general allegations. *See* *In re LIBOR-Based Fin. Instruments Antitrust Litig., No. 11 MDL 2262 (NRB), 2019 U.S. Dist. LEXIS 49700, 2019 WL 1331830, at *9 (S.D.N.Y. Mar. 25, 2019)* ("TCEH's conclusory allegations of corporate ownership, combined marketing, [and] shared board membership were insufficient to establish a principal-agent relationship between corporate entities." (alteration in original) (quotations and footnote omitted)); *Gurvey, 2009 U.S. Dist. LEXIS 21183, 2009 WL 691056, at *4* (finding

any showing that the subsidiary company was an agent of the parent corporation because their allegations were conclusory. 148 F.3d at 185 ("The conclusory statements—without any supporting facts—that Nissan U.S.A. is "wholly controlled" by Nissan Japan and "wholly dependent" on Nissan Japan "for its business plan and financing," are but a restatement of two of the factors to be considered[.]"). The *Jazini* court also noted the statements submitted by plaintiffs from the parent corporation's president that he wanted "each part of our global operations . . . to focus on contributing to the company as a **[*189]** whole" were not material for purposes of showing pervasive control. *Id.* Here, as previously discussed, Plaintiffs have submitted multiple pieces of **[**113]** evidence that support their allegations. Even though that evidence is not sufficient for a *prima facie* showing of personal jurisdiction as to Formosa or Shin-Etsu, the Court finds it is a sufficient enough start to make jurisdictional discovery appropriate. *See* World Vision, Inc., No. 2:08-CV-221, 2009 U.S. Dist. LEXIS 133923, 2009 WL 2230919, at *16 (D. Vt. July 24, 2009) ("[T]he Circuit has . . . suggested that district courts may be obligated to order jurisdictional discovery based on a lesser showing [than a *prima facie* case], in particular when the plaintiff fails to allege legally sufficient facts to establish jurisdiction, but nonetheless asserts specific, non-conclusory facts that, if further developed, could demonstrate substantial state contacts." (citing Texas Int'l Magnetics, Inc., 31 F. App'x at 739)); Hollins, 469 F. Supp. 2d at 71 ("[T]he Second Circuit has ordered jurisdictional discovery where plaintiffs allege more than conclusory statements but without supporting facts.").

Accordingly, the Court denies Shin-Etsu's motion to dismiss pursuant to 12(b)(2), and denies Formosa's motion to dismiss pursuant to 12(b)(2) conditional on Plaintiffs submitting a certification as set forth above. If Plaintiffs do not submit the certification on or before April 17, 2020, **[**114]** the claims against Formosa will be dismissed with prejudice without further order of the Court. The motions to dismiss are denied without prejudice and with leave to renew after the completion of jurisdictional discovery. Consistent with the Court's referral of this matter to Judge Roemer for the supervision of all non-dispositive pretrial matters, the Court will not set forth specific parameters regarding the conduct of jurisdictional discovery; instead, Judge Roemer will manage that aspect of the case.

Formosa has also moved in the alternative for the Court to dismiss the claims against it pursuant to Rule 12(b)(6). Because the grounds for moving for Rule 12(b)(6) dismissal overlap with the issues raised by Formosa's Rule 12(b)(2) motion, and because any dismissal of the claims against Formosa under Rule 12(b)(6) would be without prejudice for the same reasons that the claims against Oxy are dismissed without prejudice, the Court also denies Formosa's motion under Rule 12(b)(6) without prejudice and with leave to renew after the completion of jurisdictional discovery. New York v. Mountain Tobacco Co., 55 F. Supp. 3d 301, 315 (E.D.N.Y. 2014) ("[T]he Court is of the view that jurisdictional discovery as to [the defendant] may shed light on the State's substantive allegations against him. In that event, the State may seek **[**115]** leave to amend the amended complaint to cure the admitted deficiencies. Therefore, the Court denies [the defendant]'s motion to dismiss the amended complaint pursuant to Fed. R. Civ. P. 12(b)(6) without prejudice with leave to renew after the conclusion of jurisdictional discovery[.]"); *see also* Seema Gems, Inc. v. Shelgem, Ltd., No. 93 CIV. 4473 (KMW), 1994 U.S. Dist. LEXIS 2983, 1994 WL 86381, at *3 (S.D.N.Y. Mar. 16, 1994) (denying Rule 12(b)(6) motion without prejudice to renewal after close of jurisdictional discovery regarding alter ego theory because "[t]he adequacy of plaintiff's complaint" is "bound up" with "the same issue on which the court grants jurisdictional discovery").

CONCLUSION

For the reasons set forth above, the Court denies the joint motion to dismiss (Dkt. 79), Westlake's motion to dismiss (Dkt. 81), Shintech's motion to dismiss (Dkt. 82), and Formosa USA's motion to dismiss (Dkt. 84); grants in part the motion to dismiss by Oxy dismissing those **[*190]** claims without prejudice (Dkt. 80); denies without prejudice the motion to dismiss by Formosa (Dkt. 86) conditional on Plaintiffs submitting a certification on or before April 17, 2020; denies without prejudice Shin-Etsu's motion to dismiss (Dkt. 103); and finds limited jurisdictional discovery as to Formosa and Shin-Etsu is appropriate, after which Formosa and Shin-Etsu may, if appropriate, **[**116]** renew

---

plaintiff failed to establish personal jurisdiction on an agency theory where plaintiff only cited "statements made in Defendants' Form 10-Ks describing the business activities of various subsidiaries").

their motions to dismiss. If Plaintiffs do not submit the certification on or before April 17, 2020, the claims against Formosa will be dismissed with prejudice without further order of the Court.

SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

The tenet that a court must accept as true all of the allegations contained in a complaint for purposes of a *Fed. R. Civ. P. 12(b)(6)* motion is inapplicable to legal conclusions.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

HN2[] **In Rem & Personal Jurisdiction, In Personam Actions**

Although a court should traditionally treat personal jurisdiction as a threshold question to be addressed prior to consideration of the merits of a claim, that practice is prudential and does not reflect a restriction on the power of the courts to address legal issues. In cases with multiple defendants, over some of whom the court indisputably has personal jurisdiction, in which all defendants collectively challenge the legal sufficiency of the plaintiffs' cause of action, a court may address first the facial challenge to the underlying cause of action.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 8*, a complaint must contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. A defendant may nonetheless move to dismiss a plaintiff's complaint for failure to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. To survive a motion to dismiss pursuant to *Rule 12(b)(6)*, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. To survive dismissal, the plaintiff must provide the grounds upon which his claim rests through factual allegations sufficient to raise a right to relief above the speculative level.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Motions to Dismiss, Failure to State Claim**

Determining whether a complaint states a plausible claim is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. The court must accept all facts alleged in the complaint as true and draw all reasonable inferences in the plaintiff's favor. However, a complaint that offers labels and conclusions or naked assertions without further factual enhancement will not survive a motion to dismiss.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > Public Enforcement > US Department of Justice Actions

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN5[] **Private Actions, Private Attorneys General**

While it is a well-established principle that the United States is authorized to sue anyone violating the federal antitrust laws, a private plaintiff must demonstrate standing. Antitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement, the court must dismiss it as a matter of law.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] **Private Actions, Private Attorneys General**

To satisfy the antitrust standing requirement, a private antitrust plaintiff must plausibly allege that (i) it suffered an antitrust injury and (ii) it is an acceptable plaintiff to pursue the alleged antitrust violations, i.e., that plaintiff is an efficient enforcer of the antitrust laws.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] Private Actions, Private Attorneys General

For purposes of antitrust standing, the efficient enforcer inquiry focuses on four factors: (1) the directness or indirectness of the asserted injury; (2) the existence of more direct victims of the alleged conspiracy; (3) the extent to which plaintiffs' damages claim is highly speculative; and (4) the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] Private Actions, Private Attorneys General

For purposes of antitrust standing, the efficient enforcer inquiry is a general balancing test in which the importance assigned to each factor will necessarily vary with the circumstances of particular cases. The factors are meant to determine whether the putative plaintiff is a proper party to perform the office of a private attorney general and thereby vindicate the public interest in antitrust enforcement.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] Private Actions, Private Attorneys General

In the context of antitrust standing, the first efficient enforcer factor is the directness or indirectness of the asserted injury. This factor requires evaluation of the chain of causation linking plaintiff's asserted injury and the defendants' alleged price-fixing.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] Private Actions, Private Attorneys General

In the context of antitrust standing, where a plaintiff does not purchase directly from defendant, there are significant intervening causative factors, which may attenuate the causal connection between the violation and the injury. When a plaintiff and a third party choose to incorporate a benchmark into a financial transaction without any action by defendants whatsoever, the independent decision to do so may attenuate the chain of causation between defendants' actions and a plaintiff's injury.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN11[] Private Actions, Private Attorneys General

In the context of antitrust standing, the second efficient enforcer factor is the existence of more direct victims of the alleged conspiracy. Generally, whether there is a more direct victim of an alleged antitrust violation turns chiefly on whether the plaintiff is a consumer or a competitor. However, a plaintiff's status is not the end of the inquiry; the efficient enforcer criteria must be established irrespective of whether the plaintiff is a consumer or a competitor. Inferiority to other potential plaintiffs can be relevant, but it is not dispositive. Implicit in the inquiry is recognition that not every victim of an antitrust violation needs to be compensated under the antitrust laws in order for the antitrust laws to be efficiently enforced.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Private Actions, Private Attorneys General**

In the context of antitrust standing, case law holds that the second efficient enforcer factor may have diminished weight in benchmark manipulation cases.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Private Actions, Private Attorneys General**

In the context of antitrust standing, the third efficient enforcer factor is whether the damages would necessarily be highly speculative. Some degree of uncertainty stems from the nature of ***antitrust law*** and the wrongdoer shall bear the risk of the uncertainty which his own wrong has created. At the same time, highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement. Damages claims may be too speculative where: (1) the damages claim is conclusory; (2) the injury is so far down the chain of causation from defendants' actions that it would be impossible to untangle the impact of the fixed price from the impact of intervening market decisions; or (3) due to external market factors, there is no relationship between the fixed price and the price that the plaintiffs ultimately paid.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN14[] **Private Actions, Private Attorneys General**

In the context of antitrust standing, the fourth efficient enforcer factor is either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other. This factor reflects a strong interest in keeping the scope of complex antitrust trials within judicially manageable limits. It is arguably the most important factor in the efficient enforcer analysis.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN15[] **Private Actions, Private Attorneys General**

Benchmark manipulation cases present unique challenges for application of the efficient enforcer factors when determining antitrust standing. Case law notes that one difficult issue arises with respect to so-called umbrella standing. Umbrella standing concerns are most often evident when a cartel controls only part of a market, but a consumer who dealt with a non-cartel member alleges that he sustained injury by virtue of the cartel's raising of prices in the market as a whole.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN16[] **Private Actions, Private Attorneys General**

Benchmark manipulation cases present particularly difficult questions regarding umbrella standing because alleged manipulators can affect prices without dominating the market. In a standard (i.e., non-benchmark) manipulation case, alleged manipulators must have at least a substantial market share, if not outright market dominance, to maintain a non-competitive price. That is because a cartel must have a large enough fraction of the market to exert control over the market price. In other words, if a would-be cartel is only a tiny fraction of the market, it cannot exert market power and thus is no cartel at all. This premise has led to a scholarly consensus that is skeptical about whether it is possible for private actors to manipulate large commodity markets.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN17[] **Private Actions, Private Attorneys General**

A critical mass of judges within the Southern District of New York addressing concerns in benchmark manipulation cases conclude that plaintiffs who are not direct purchasers are not efficient enforcers in a benchmark manipulation case.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] **Private Actions, Private Attorneys General**

For purposes of antitrust standing, where a plaintiff's counter-party is reasonably ascertainable and is not a defendant a plaintiff is not an efficient enforcer.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN19[] **Private Actions, Private Attorneys General**

Recognizing that counter-parties to exchange plaintiffs are not reasonably ascertainable for purposes of antitrust standing, judges in the Southern District of New York have adopted a test that depends primarily on the extent of defendants' control of the market for the product traded on the exchange.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN20[] **Private Actions, Private Attorneys General**

The United States District Court for the Southern District of New York adopts the market domination test as one method by which plaintiffs can allege that an exchange plaintiff is an efficient enforcer. The market domination test helps to resolve identified causation and complex apportionment issues. Indeed, the market domination test may be thought to serve as a proxy for whether a plaintiff transacted directly with a defendant; in a market in which defendants dominate, it is far more likely that a plaintiff who bought on an exchange will have transacted directly with a defendant.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN21[] **Private Actions, Private Attorneys General**

Under the market domination theory of antitrust standing, the court's inquiry into whether a defendant has dominated the exchange market consists of three steps. First, the court must define the relevant market. Second, the court must examine what share of that market the defendant is alleged to have controlled. Finally, the court must determine whether the defendant controlled a sufficiently large percentage of the relevant market that it dominated it.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN22[] **Private Actions, Private Attorneys General**

While the court is bound by the factual allegations in the complaint on a motion to dismiss, the definition of the relevant market is a legal conclusion, not a factual one. Therefore, in determining antitrust standing under the market domination theory, the court must examine the facts alleged in the complaint to determine what market or markets allegedly were restrained based on the plaintiff's theory of the case.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN23[] **Vertical Restraints, Price Fixing**

With respect to derivatives that directly incorporate the fix price, the antitrust injury inquiry is straightforward because courts in the Second Circuit consider manipulation of a price benchmark to constitute restraint of the market which that benchmark guides.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN24[] Private Actions, Private Attorneys General

It is true that courts have generally addressed whether physical and futures transactions represent one market or two on the antitrust injury prong of the antitrust standing analysis. But it is also relevant to the application of the efficient enforcer factors, including whether there are more direct victims of the alleged conspiracy under the second efficient enforcer factor. Furthermore, a definition of the relevant market is a prerequisite to the inquiry into whether defendants dominated a market.

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN25[] Private Actions, Private Attorneys General

For purposes of antitrust standing, the United States District Court for the Southern District of New York does not adopt a bright line rule for the market share that a defendant or group of defendants must control to meet the market domination standard.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN26[] In Rem & Personal Jurisdiction, In Personam Actions

A defendant may move to dismiss a plaintiff's claims against it for lack of personal jurisdiction. *Fed. R. Civ. P. 12(b)(2)*. On a motion to dismiss pursuant to *Rule 12(b)(2)*, the plaintiff bears the burden of demonstrating personal jurisdiction over a person or entity against whom it seeks to bring suit. To defeat a jurisdiction-testing motion, the plaintiff's burden of proof varies depending on the procedural posture of the litigation. At the pleading stage, and prior to discovery, a plaintiff need only make a prima facie showing that jurisdiction exists.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN27[] In Rem & Personal Jurisdiction, In Personam Actions

If the court considers only pleadings and affidavits, the plaintiff's prima facie showing must include an averment of facts that, if credited by the ultimate trier of fact, would suffice to establish jurisdiction over the defendant. Courts may rely on materials outside the pleading in considering a motion to dismiss for lack of personal jurisdiction. The allegations in the complaint must be taken as true to the extent they are uncontroverted by the defendant's affidavits. If the parties present conflicting affidavits, however, all factual disputes are resolved in the plaintiff's favor, and the plaintiff's prima facie showing is sufficient notwithstanding the contrary presentation by the moving party.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN28[] **In Personam Actions, Due Process**

Among other requirements, the exercise of personal jurisdiction must comport with constitutional due process. The due process analysis proceeds in two steps. First, courts evaluate the quality and nature of the defendant's contacts with the forum state under a totality of the circumstances test. Where the claim arises out of, or relates to, the defendant's contacts with the forum, i.e., specific jurisdiction is asserted, minimum contacts necessary to support such jurisdiction exist where the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there. Second, once minimum contacts are established, a court considers those contacts in light of other factors to determine whether the assertion of personal jurisdiction would comport with fair play and substantial justice.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN29[] **In Personam Actions, Minimum Contacts**

There are two independent, if conceptually overlapping, methods of demonstrating minimum contacts. The first is through purposeful availment, in which the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there. The second is through purposeful direction, in which the defendant took intentional, and allegedly tortious, actions expressly aimed at the forum. The purposeful direction test is also referred to as the effects test, which is a theory of personal jurisdiction typically invoked where the conduct that forms the basis for the controversy occurs entirely out-of-forum, and the only relevant jurisdictional contacts with the forum are therefore in-forum effects harmful to the plaintiff. In such circumstances, the exercise of personal jurisdiction may be constitutionally permissible if the defendant expressly aimed its conduct at the forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN30[] **In Personam Actions, Minimum Contacts**

Both the Sherman Act and the Commodities Exchange Act provide for nationwide service of process. *15 U.S.C.S. § 22*; *7 U.S.C.S. § 25(c)*. District courts in the Second Circuit, and courts of appeals other than the United States Court of Appeals for the Second Circuit, have concluded that when a civil case arises under federal law and a federal statute authorizes nationwide service of process, the relevant contacts for determining personal jurisdiction are contacts with the United States as a whole.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN31[] **In Personam Actions, Due Process**

The United States Court of Appeals for the Second Circuit recently observed that it has not clearly delineated the showing necessary before an agent's contacts will be imputed to its principal for purposes of personal jurisdiction under the Due Process Clause. However, the Circuit's case law concerning the New York long-arm statute is instructive because although the long-arm statute and the Due Process Clause are not technically coextensive, the

New York requirements (benefit, knowledge, some control) are consonant with the due process principle that a defendant must have purposefully availed itself of the privilege of doing business in the forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Long Arm Jurisdiction

HN32[] **In Personam Actions, Long Arm Jurisdiction**

To establish that a subsidiary is an agent of the parent under New York's long-arm statute, the plaintiff must show that the subsidiary does all the business which the parent corporation could do were it here by its own officials.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Purposeful Availment

HN33[] **In Personam Actions, Due Process**

United States Court of Appeals for the Second Circuit case law established a four-factor test for evaluating whether a court's exercise of personal jurisdiction over a defendant is proper based on the conduct of a subsidiary: (1) common ownership, (2) financial dependency, (3) the degree to which the parent interferes with the selection and assignment of executive personnel and fails to observe corporate formalities, and (4) the parent's degree of control over the marketing and operational policies of the subsidiary.

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Existence > Distinct & Separate Legal Entity

HN34[] **Existence, Distinct & Separate Legal Entity**

It is a general principle of corporate law deeply ingrained in the economic and legal systems that a parent corporation is not liable for the acts of its subsidiaries.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN35[] **In Personam Actions, Due Process**

Under the effects test, the exercise of personal jurisdiction may be constitutionally permissible if the defendant expressly aimed its conduct at the forum. The fact that harm in the forum is foreseeable is insufficient for the purpose of establishing specific personal jurisdiction over a defendant.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Foreseeability

HN36[] In Personam Actions, Due Process

Mere foreseeability is insufficient under the effects test for personal jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN37[] In Personam Actions, Due Process

The United States Court of Appeals for the Second Circuit has recently clarified that to allege a conspiracy theory of jurisdiction, the plaintiff must allege that: (1) a conspiracy existed; (2) the defendant participated in the conspiracy; and (3) a co-conspirator's overt acts in furtherance of the conspiracy had sufficient contacts with a state to subject that co-conspirator to jurisdiction in that state.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN38[] In Personam Actions, Due Process

The teaching of case law is that the mere sale of financial instruments by a co-conspirator in a forum is insufficient to confer conspiracy jurisdiction in that forum, at least on the facts presented in that case.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN39[] In Personam Actions, Due Process

The Schwab standard for conspiracy jurisdiction is extraordinarily broad. Indeed, under the Schwab standard, a court can exercise personal jurisdiction over a defendant based on the actions of a co-conspirator who is entirely unknown to that defendant. In addition, this standard may be in tension with judicial precedent that the relationship between the defendant and the litigation must arise out of the contacts that the defendant himself creates with the forum State.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN40[] In Personam Actions, Due Process

The exercise of jurisdiction comports with due process only if the defendant's conduct and connection with the forum is such that the defendant should reasonably anticipate being haled into court there.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

HN41[] In Personam Actions, Due Process

When the court concludes that plaintiffs have adequately alleged that defendants have satisfied the first step of the personal jurisdiction analysis, it must determine whether the assertion of personal jurisdiction would comport with fair play and substantial justice. Judicial precedent sets forth five factors in considering the reasonableness of the forum. A court must consider (1) the burden on the defendant, (2) the interests of the forum State, and (3) the plaintiff's interest in obtaining relief. It must also weigh in its determination (4) the interstate judicial system's interest in obtaining the most efficient resolution of controversies, and (5) the shared interest of the several States in furthering fundamental substantive social policies. The primary concern is the burden on the defendant. Where a defendant has purposefully directed its activities at the forum state, it may still defeat jurisdiction on due process grounds. To do so, however, it must present a compelling case that the presence of some other considerations would render jurisdiction unreasonable.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

HN42[] **Relief From Judgments, Altering & Amending Judgments**

Motions for reconsideration are governed by S.D.N.Y. & E.D.N.Y. Civ. R. 6.3, which provides that the moving party shall set forth the matters or controlling decisions which counsel believes the court has overlooked. Motions for reconsideration are committed to the sound discretion of the district court. Reconsideration of a previous order by the court is an extraordinary remedy to be employed sparingly. As such, reconsideration should be granted only when the moving party identifies an intervening change of controlling law, the availability of new evidence, or the need to correct a clear error or prevent manifest injustice.

International Law > Authority to Regulate

HN43[] **International Law, Authority to Regulate**

Under the Morrison framework, first, unless Congress's intention to give a statute extraterritorial effect is clearly expressed, courts must presume it is primarily concerned with domestic conditions. In other words, when a statute gives no clear indication of an extraterritorial application, it has none. Second, if a statute applies only domestically, a court must determine which domestic conduct it regulates.

Securities Law > Commodities Futures Trading

HN44[] **Securities Law, Commodities Futures Trading**

At the first step of the Morrison framework, since *7 U.S.C.S. § 22* of the Commodities Exchange Act is silent as to extraterritorial reach, suits funneled through this private right of action must be based on transactions occurring in the territory of the United States. At Morrison's second step, in order for plaintiffs to state a proper domestic application of *§ 22*, the suit must be based on transactions occurring in the territory of the United States.

Securities Law > Commodities Futures Trading

HN45[] **Securities Law, Commodities Futures Trading**

While a domestic transaction as defined by the Absolute Activist analysis is necessary to invoke the private remedy afforded by *7 U.S.C.S. § 22*, it is not sufficient.

Securities Law > Commodities Futures Trading

HN46[] Securities Law, Commodities Futures Trading

In order to close the gap between necessary and sufficient, plaintiffs' *7 U.S.C.S. § 22* claims must not be so predominately foreign as to be impermissibly extraterritorial. To state a proper claim under *§ 22*, plaintiffs must allege not only a domestic transaction, but also domestic, not extraterritorial, conduct by defendants that is violative of a substantive provision of the Commodities Exchange Act, such as *7 U.S.C.S. §§ 6(c)(1)* or *9(a)(2)*.

Securities Law > Commodities Futures Trading

HN47[] Securities Law, Commodities Futures Trading

Case law teaches that to assess whether plaintiffs have pleaded an appropriately domestic application of the Commodities Exchange Act (CEA), the court must assess whether plaintiffs' CEA claims are predominately foreign.

Securities Law > Commodities Futures Trading

HN48[] Securities Law, Commodities Futures Trading

Plaintiffs' suit must satisfy the threshold requirement of *7 U.S.C.S. § 22*, which gives plaintiffs a private right of action under the Commodities Exchange Act (CEA), *7 U.S.C.S. § 25*, before the court can reach the merits of their substantive CEA claims. Consequently, the court starts by assessing whether plaintiffs have pleaded a proper domestic application of *§ 22*.

Securities Law > Commodities Futures Trading

HN49[] Securities Law, Commodities Futures Trading

Both principal-agent liability and aiding and abetting claims under the Commodities Exchange Act (CEA) are viable only where an underlying primary violation of the CEA can survive a motion to dismiss.

International Law > Authority to Regulate

HN50[] International Law, Authority to Regulate

An allegation that a foreign course of conduct has caused malign effects in the United States is not enough to salvage an otherwise extraterritorial claim.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN51[] Amendment of Pleadings, Leave of Court

In the Second Circuit, it is the usual practice upon granting a motion to dismiss to allow leave to replead. Leave may be denied for good reason, including futility, bad faith, undue delay, or undue prejudice to the opposing party.

Opinion

[*297] MEMORANDUM OPINION AND ORDER

GREGORY H. WOODS, United States District Judge:

Platinum and palladium are precious metals. Plaintiffs in this case allege that Defendants conspired to manipulate the price of these metals by "fixing the Fix." *In re Platinum and Palladium Antitrust Litig. ("Platinum I"), 1:14-CV-9391-GHW, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *5 (S.D.N.Y. Mar. 28, 2017)*. The Fix was supposed to be a process by which Defendants determined the worldwide benchmark price of platinum and palladium according to the laws of supply and demand. But Plaintiffs allege that Defendants colluded to push the benchmark price below the price that would have prevailed in a competitive market, which allegedly caused Plaintiffs **[**5]** to **[*298]** receive lower prices for their platinum and palladium investments than they otherwise would have.

The Court reaffirms the conclusion it reached in *Platinum I* that Plaintiffs are not efficient enforcers of the antitrust laws because Plaintiffs have not adequately alleged that they traded directly with any Defendant or that Defendants dominated the market for platinum and palladium derivatives. However, the Court has personal jurisdiction over the foreign defendants because Plaintiffs have amended their complaint to plausibly allege conduct by their co-conspirators in the United States in furtherance of the conspiracy to manipulate the Fix price. Finally, because Plaintiffs' Commodities Exchange Act ("CEA") claims are predominately foreign, those claims are impermissibly extraterritorial. Accordingly, Defendants' motion to dismiss Plaintiffs' Sherman Act claim is GRANTED, the foreign defendants' motion to dismiss for lack of personal jurisdiction is DENIED, and Defendants' motion for reconsideration is GRANTED.

I. BACKGROUND[1]

A. Facts[2]

Platinum and palladium are "closely related precious metals." TAC ¶ 104. "While platinum and palladium—like gold and silver—have industrial **[**6]** uses, all four have traditionally been traded internationally . . . [and] held primarily for their exchange value rather than industrial use." *Id.* ¶ 54 (citation omitted). The allegations in this case center on the "London Platinum and Palladium Price Fixing (the 'Fixing' or 'Fix')." *Id.* ¶ 3. The Fix was a "private conference call twice each London business day" that "set global benchmark prices for platinum and palladium." *Id.* The Fix set this benchmark by establishing the price for physical platinum and palladium; the physical platinum and palladium was housed in London or Zurich. *Id.* ¶ 59.

The London Platinum and Palladium Fixing Company Ltd. ("LPPFC") operated as the "vehicle" for the Fix from 2004 to 2014. *Id.* ¶ 3. Throughout the period between January 1, 2008 and November 30, 2014 (the "Proposed Class Period"), there were four "members" of LPPFC that participated in the Fix. *Id.* Those members are the

---

[1] The Court has issued a prior opinion in this case that provides further background. *See* *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *2-9*.

[2] These facts are drawn from the Third Consolidated Amended Class Action Complaint ("TAC"), Dkt No. 183, and are accepted as true for the purposes of the *Rule 12(b)(6)* motion. *See, e.g.,* *Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002)*. ***HN1***[] However, "[t]he tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

defendants in this case: BASF Metals Limited ("BASF Metals"), Goldman Sachs International ("Goldman Sachs"), HSBC Bank USA, N.A. ("HSBC"), and ICBC Standard Bank Plc ("ICBC Standard"). *Id.*

In theory, the Fix price was determined through a bona fide Walrasian auction among Defendants. **[**7]** *Id.* ¶ 58. One Fixing member, known as the Chair, would announce an opening price. *Id.* ¶ 59. Then, each Defendant would announce whether they were interested in buying or selling platinum and palladium at that price. *Id.* The Chair would then adjust the Fix price until the market reached an equilibrium at which supply equaled demand for platinum and palladium at the Fix price. *Id.* ¶ 62; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *3*.

Platinum and palladium trade in at least two markets. First, "[t]he market for **[*299]** physical platinum and palladium operates on an over-the-counter ('OTC,' *i.e.*, between private parties) basis." TAC ¶ 74; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *4-5*. Second, platinum and palladium futures and options contracts trade either OTC or on an "exchange." TAC ¶ 79; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *4-5* (defining the terms "futures contract" and "options contract"). The New York Mercantile Exchange ("NYMEX") is the "leading centralized exchange for platinum and palladium futures and options worldwide." TAC ¶ 79. Plaintiffs also allege that "NYMEX Platinum and Palladium prices move virtually in tandem with Fix prices." *Id.* ¶ 82; *see id.* ¶ 94 (alleging a correlation coefficient of 1.00 for physical platinum prices to futures prices and 0.99 for physical palladium prices to futures prices). **[**8]**

Plaintiffs Norman Bailey, Thomas Galligher, and Larry Hollin are individuals who "sold NYMEX platinum and palladium futures contracts at artificial[ly low] prices." *Id.* ¶ 28-30. Plaintiff White Oak Fund is a "private placement fund" also alleged to have transacted in NYMEX platinum futures contracts. *Id.* ¶ 32. Collectively, this opinion refers to these plaintiffs as the "Exchange Plaintiffs." The TAC alleges that Plaintiff KPFF Investment, Inc. "sold physical platinum and palladium" at artificially low prices. *Id.* ¶ 31. This opinion refers to KPFF as the "OTC Plaintiff."

The crux of Plaintiffs' allegations giving rise to this action is that Defendants took advantage of the Fixing Calls to set the Fix Price at lower levels than competitive market forces would otherwise have dictated. *Id.* ¶ 102; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *5*. Plaintiffs allege that Defendants manipulated the Fix Price in two ways. First, Plaintiffs allege that Defendants "conspired to manipulate the Opening Price announced by the Chair at the beginning of the Fixing Calls." TAC ¶ 247; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *5*. Second, Plaintiffs allege that "Defendants misrepresented actual market supply and demand in order to move the AM and PM Fix Price to the level at which it **[**9]** was ultimately fixed." TAC ¶ 247; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *5*.

Plaintiffs allege that Defendants employed different strategies to profit from this manipulation. First, Plaintiffs generally allege that Defendants exploited their foreknowledge of downward swings in the platinum and palladium Fix Price to make advantageous transactions in a variety of Platinum and Palladium Investments. TAC ¶¶ 15-16; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *8*. Relatedly, Defendants also benefited from reducing their risk in digital options and other contracts with market-based triggers, such as "stop loss" orders and "margin calls." TAC ¶ 208; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *8*. Second, the TAC alleges that Defendants were particularly motivated to suppress the Fix Price in order to profit from large net "short" positions that they allegedly held in the platinum and palladium futures market, including NYMEX, throughout the Proposed Class Period. TAC ¶ 174; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *8*. In addition to these methods of profiting directly from manipulating the Fix, Plaintiffs allege that the Fixing calls enabled Defendants to employ other price manipulation tactics, including "front running," "spoofing," "wash sales," "painting the screen," and "jamming." TAC ¶¶ 10, 179 & n.4; *see Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *6* (defining these terms).

Plaintiffs present **[**10]** economic data in support of their claims that there were "artificial downward spikes around the time of the Fixing" for which "there is no innocent explanation." TAC at 49, 91 (capitalization altered). Plaintiffs also highlight government **[*300]** investigations into Defendants, which they claim "corroborate" their allegations. *Id.* at 128 (capitalization altered).

B. Procedural History

Plaintiffs commenced this action on November 25, 2014. Dkt No. 1. The parties filed a joint motion to consolidate five substantively similar complaints and to appoint Labaton Sucharow LLP and Berger & Montague, P.C. as interim co-lead counsel for the proposed class, which the Court granted. Dkt No. 32. Plaintiffs subsequently filed a consolidated amended complaint, and Defendants moved to dismiss. Dkt Nos. 45, 76, 79. Plaintiffs then filed a second consolidated amended class action complaint ("SAC"), and Defendants again moved to dismiss for failure to state a claim and for lack of personal jurisdiction over certain foreign defendants. Dkt Nos. 102, 115, 117, 119-20.

The Court granted those motions in part and denied them in part. *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *53*. The Court held that Plaintiffs had plausibly alleged a conspiracy among Defendants to violate the **[**11]** *Sherman Act* based on Plaintiffs' allegations of Defendants' "parallel conduct" and other circumstantial evidence including that "the Fixing coincided with Defendants' alleged price manipulation[,]" that Defendants allegedly acted against their own economic self-interest, and that Defendants had a "common motive" to "profit from their foreknowledge of the Fix Price[.]" *2017 U.S. Dist. LEXIS 46624, [WL] at *10-16*. The Court also concluded that Plaintiffs had Article III standing. *2017 U.S. Dist. LEXIS 46624, [WL] at *16-17*. The Court then considered whether Plaintiffs had antitrust standing. *See* *2017 U.S. Dist. LEXIS 46624, [WL] at *18-25*. The Court held that Plaintiffs had adequately alleged an antitrust injury. *2017 U.S. Dist. LEXIS 46624, [WL] at *19-20*.

However, the Court concluded that Plaintiffs were not "efficient enforcers" of the antitrust laws. *2017 U.S. Dist. LEXIS 46624, [WL] at *20-25*. Examining all four efficient enforcer factors, the Court determined that "it is appropriate to draw a line between persons who transacted directly with Defendants and those who did not." *2017 U.S. Dist. LEXIS 46624, [WL] at *22*. Because Plaintiffs did not allege that they transacted directly with Defendants, the Court held that Plaintiffs were not efficient enforcers of the antitrust laws.

The Court also concluded that Plaintiffs had plausibly alleged Commodities Exchange Act ("CEA") violations. *2017 U.S. Dist. LEXIS 46624, [WL] at *25-37*.[3] The Court held that Plaintiffs' CEA claims were not **[**12]** impermissibly extraterritorial. *2017 U.S. Dist. LEXIS 46624, [WL] at *26-28*. Those claims are the subject of Defendants' motion for reconsideration. In addition, the Court held that it did not have personal jurisdiction over Foreign Defendants BASF Metals, ICBC Standard, and LPPFC and denied Plaintiffs' request for jurisdictional discovery.[4] *2017 U.S. Dist. LEXIS 46624, [WL] at *39-49*. Finally, the Court granted Plaintiffs leave to amend. *2017 U.S. Dist. LEXIS 46624, [WL] at *53*.

C. New Allegations in the TAC

In response to the Court's decision in *Platinum I*, Plaintiffs have added new allegations to the TAC. With respect to Plaintiffs' claim that they are "efficient enforcers" of the antitrust laws, Plaintiffs' new allegations can be grouped into four buckets. *See* TAC at 2-3. First, Plaintiffs present new allegations related to exchange trading on NYMEX. Plaintiffs allege **[*301]** that NYMEX is "owned and operated by CME [Chicago Mercantile Exchange] Group." *Id.* ¶ 4 n.3. The TAC alleges that "NYMEX—through its clearinghouse, CME Clearing—is the counterparty to all transactions on the exchange (*i.e.*, the buyer or seller to a NYMEX contract does not have any identified counterparty other than NYMEX)." *Id.* ¶ 80 (emphasis omitted); *see also id.* ¶ 81. Second, Plaintiffs allege that there is a close relationship between the **[**13]** Fix and NYMEX futures prices. *See id.* ¶¶ 5, 14, 79-103, 134, 143. Third, Plaintiffs allege that Defendants have substantial market share in both the OTC and NYMEX platinum and

---

[3] The Court also dismissed Plaintiffs' unjust enrichment claim. *2017 U.S. Dist. LEXIS 46624, [WL] at *38*. Plaintiffs have chosen not to replead this claim. *See* TAC ¶ 1.

[4] Plaintiffs have chosen not to replead their claim against LPPFC. *See* TAC ¶ 1. The Court also granted motions to dismiss filed by UBS and BASF Corporation ("BASF Corp.") for failure to state a claim. *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *50-52*. Plaintiffs have chosen not to replead these claims. *See* TAC ¶ 1.

palladium markets. *See id.* ¶¶ 6, 38, 40, 42, 44, 64, 71, 73, 77, 191, 194, 199. Fourth, Plaintiffs allege that NYMEX is the leading centralized exchange for trading platinum and palladium derivatives. *See id.* ¶¶ 4, 79, 89.

Plaintiffs have also substantially narrowed the scope of the Class and the scope of the transactions covered by the Class definition. Plaintiffs "bring this action on behalf of themselves and as a class action under *Rule 23(a)*, *(b)(2)* and *(b)(3) of the Federal Rules of Civil Procedure*, seeking relief on behalf of" a class including "[a]ll persons or entities who during the period from January 1, 2008 through November 30, 2014 . . . : (i) sold physical platinum or palladium (99.95% or greater purity, or otherwise good delivery); (ii) sold platinum or palladium futures contracts traded on NYMEX; (iii) sold platinum or palladium call options traded on NYMEX; or (iv) bought platinum or palladium put options traded on NYMEX." TAC ¶ 265; *cf.* SAC ¶ 271 (including in the proposed class those who "sold shares in platinum or palladium [exchange traded funds,]" those **[**14]** who "sold over-the-counter platinum or palladium spot or forward contracts or platinum or palladium call options[,]" and those who "bought over-the-counter platinum or palladium put options.").

Additionally, Plaintiffs have added new allegations to the TAC with respect to BASF Metals and ICBC Standard's alleged continuous presence in the United States and their allegedly suit-related conduct in this country. *See* TAC ¶¶ 14, 34-38, 43-46, 64, 68, 72, 190-191, 194, 202. Plaintiffs allege that both BASF Metals and ICBC Standard engaged in conduct directed at the NYMEX and that information from the Fixing was disseminated to and traded on by traders in New York and New Jersey, including on the NYMEX. *See id.* Specifically, Plaintiffs allege that United States-based "precious metals traders" employed by a BASF Metals' affiliate "would update order information during the Fixing and provide this updated order information to BASF [Metals'] participant in the Fixing as the Fixing was conducted." *Id.* ¶ 38. Similarly, the TAC alleges that "New York-based precious metals traders [employed by a United States affiliate of ICBC Standard] would update order information during the Fixing and provide this **[**15]** updated order information to [ICBC Standard]'s participant in the Fixing as the Fixing was conducted." *Id.* ¶ 44. Furthermore, the TAC alleges that the participants in the Fixing on behalf of Defendants BASF Metals and ICBC Standard were in "constant communication" with traders employed by United States-based affiliates. *Id.* ¶ 38 (BASF Metals); *id.* ¶ 44 (ICBC Standard).

The TAC asserts five claims for relief. First, the TAC alleges that Defendants made an agreement to restrain trade in violation of *section 1 of the Sherman Act*, *15 U.S.C. §§ 1 et seq.* TAC ¶¶ 273-79. Second, the TAC alleges a claim for manipulation in violation of the *CEA*, *7 U.S.C. §§ 1 et seq.*, including Commodity Futures Trading Commission ("CFTC") Rule 180.2. TAC ¶¶ 280-84. Third, the TAC asserts that Defendants employed a manipulative **[*302]** device in violation of the CEA including CFTC Rule 180.1. *Id.* ¶¶ 285-89. Fourth, the TAC asserts a claim for principal agent liability in violation of the CEA. *Id.* ¶¶ 290-92. Finally, the TAC asserts a claim for aiding and abetting liability in violation of the CEA. *Id.* ¶¶ 293-95.

Defendants have again moved to dismiss for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)* as to all Defendants and for lack of personal jurisdiction as to the foreign defendants BASF Metals and **[**16]** ICBC Standard under *Federal Rule of Civil Procedure 12(b)(2)*. Dkt Nos. 207-11.[5] Plaintiffs filed an opposition to both motions, Dkt Nos. 214-16, and Defendants filed their replies. Dkt Nos. 218-21. After those motions were fully briefed, Defendants also filed a motion for reconsideration of the Court's prior holding that Plaintiffs' CEA claims were not impermissibly extraterritorial. Dkt Nos. 235-36. Plaintiffs filed an additional opposition to that motion, Dkt No. 237, and Defendants filed an additional reply. Dkt No. 238.

II. DISCUSSION

[5] Defendants also ask the Court to take a "fresh look at the lack of particularity" in Plaintiffs' allegations. Joint Memorandum of Law in Support of Defendants' Motion To Dismiss Plaintiffs' Third Amended Complaint ("Mem."), Dkt No. 208, at 20. Having considered this argument, the Court declines to disturb its prior rulings holding that Plaintiffs have sufficiently alleged a conspiracy among Defendants.

A. *Rule 12(b)(6)* Motion[6]

1. Legal Standard

HN3[] Under *Federal Rule of Civil Procedure 8*, a complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. A defendant may nonetheless move to dismiss a plaintiff's complaint for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. To survive a motion to dismiss pursuant to *Rule 12(b)(6)*, a complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (citing **[**17]** *Twombly, 550 U.S. at 556*). "To survive dismissal, the plaintiff must provide the grounds upon which his claim rests through factual allegations sufficient 'to raise a right to relief above the speculative level.'" *ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 (2d Cir. 2007)* (quoting *Twombly, 550 U.S. at 544*).

HN4[] Determining whether a complaint states a plausible claim is a "context-specific task that requires the reviewing court to draw on its judicial experience and common **[*303]** sense." *Iqbal, 556 U.S. at 679*. The court must accept all facts alleged in the complaint as true and draw all reasonable inferences in the plaintiff's favor. *Burch v. Pioneer Credit Recovery, Inc., 551 F.3d 122, 124 (2d Cir. 2008)* (per curiam). However, a complaint that offers "labels and conclusions" or "naked assertion[s]" without "further factual enhancement" will not survive a motion to dismiss. *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 555, 557)*.

2. Application

Plaintiffs have not adequately alleged that they are efficient enforcers of the antitrust laws. *HN5*[] As discussed in *Platinum I*, "[w]hile 'it is a well-established principle that the United States is authorized to sue anyone violating the federal antitrust laws, a private plaintiff must demonstrate standing.'" *2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *18* (quoting *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 436 (2d Cir. 2005))* (alterations and some quotation marks omitted). "Antitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement, the **[**18]** court must dismiss it as a matter of law." *Id.* (quoting *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75-76 (2d Cir. 2013))* (brackets omitted).

HN6[] "To satisfy the antitrust standing requirement, 'a private antitrust plaintiff must plausibly allege that (i) it suffered an antitrust injury and (ii) it is an acceptable plaintiff to pursue the alleged antitrust violations,' *i.e.*, that plaintiff is 'an "efficient enforcer" of the antitrust laws." *Id.* (quoting *In re Aluminum Warehousing Antitrust Litig. ("Aluminum II"), 833 F.3d 151, 157-58 (2d Cir. 2016))*. The Court concluded in *Platinum I* that Plaintiffs have adequately alleged an antitrust injury, *2017 U.S. Dist. LEXIS 46624, [WL] at *19-20*, and it does not disturb that conclusion here.

---

[6] *HN2*[] "Although a court should 'traditionally treat personal jurisdiction as a threshold question to be addressed prior to consideration of the merits of a claim, that practice is prudential and does not reflect a restriction on the power of the courts to address legal issues.'" *Sullivan v. Barclays PLC, 13-CV-2811 (PKC), 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *11 (S.D.N.Y. Feb. 21, 2017)* (quoting *ONY, Inc. v. Cornerstone Therapeutics, Inc., 720 F.3d 490, 498 n.6 (2d Cir. 2013))*. "[I]n cases such as this one with multiple defendants—over some of whom the court indisputably has personal jurisdiction—in which all defendants collectively challenge the legal sufficiency of the plaintiffs['] cause of action, [a court] may address first the facial challenge to the underlying cause of action[.]" *Id.* (quoting *Chevron Corp. v. Naranjo, 667 F.3d 232, 247 n.17 (2d Cir. 2012))*. Accordingly, the Court considers Defendants' *Rule 12(b)(6)* motion first.

Thus, the question before the Court is whether Plaintiffs are "efficient enforcers of the antitrust laws." Gelboim v. Bank of Am. Corp., 823 F.3d 759, 777-78 (2d Cir. 2016) (citation omitted). **HN7**[] The efficient enforcer inquiry focuses on four factors: "(1) the 'directness or indirectness of the asserted injury' . . . ; (2) the 'existence of more direct victims of the alleged conspiracy'; (3) the extent to which [plaintiffs'] damages claim is 'highly speculative;' and (4) the importance of avoiding 'either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other.'" *Id. at 778* (quoting **[**19]** *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters ("AGC"), 459 U.S. 519, 540-44, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*.

HN8[] "The efficient enforcer inquiry is a general balancing test in which the importance assigned to each factor 'will necessarily vary with the circumstances of particular cases.'" *Iowa Pub. Employees' Ret. Sys. v. Merrill Lynch, Pierce, Fenner & Smith Inc., 340 F. Supp. 3d 285, 332 (S.D.N.Y. 2018)* (quoting *Gatt, 711 F.3d at 78*). The factors are meant to determine "whether the putative plaintiff is a proper party to 'perform the office of a private attorney general' and thereby 'vindicate the public interest in antitrust enforcement[.]'" *Gatt, 711 F.3d at 80* (quoting *AGC, 459 U.S. at 542*). Because the efficient enforcer inquiry presents somewhat different considerations for the OTC Plaintiff and the Exchange Plaintiff, the Court conducts the inquiry for each in turn.

a. OTC Plaintiff

The OTC Plaintiff is not an efficient enforcer of the antitrust laws because **[*304]** Plaintiffs have not alleged that it transacted directly with any Defendant. The TAC alleges that the OTC Plaintiff "sold physical platinum and palladium[.]" TAC ¶ 31. Plaintiffs also allege that "[d]uring the [Proposed] Class Period," each Defendant "entered directly into platinum and palladium transactions with members of the Class." *Id.* ¶ 38 (BASF Metals); *id.* ¶ 40 (Goldman Sachs); *id.* ¶ 42 (HSBC); *id.* ¶ 44 (ICBC Standard). In addition, the TAC alleges a number **[**20]** of "dates on which one or more of Plaintiffs['] sales coincided with Defendants['] manipulation of the PM Platinum fixing" and makes similar allegations for the PM Palladium Fixing. *Id.*, apps. C & D (capitalization altered).[7] However, Plaintiffs do not allege that the OTC Plaintiff transacted directly with any Defendant.

Accordingly, the analysis of the four efficient enforcer factors as applied to the OTC Plaintiff focuses on whether it qualifies as an efficient enforcer, even though it did not transact directly with Defendants. Plaintiffs allege that the Fix "set global benchmark prices for platinum and palladium," *id.* ¶ 3, and that Defendants conspired to rig the Fix. *See, e.g., id.* ¶ 102. Thus, Plaintiffs allege that Defendants manipulated the global benchmark price of platinum and palladium. As discussed below, the application of the efficient enforcer factors where plaintiffs allege manipulation of a benchmark is not straightforward. Ultimately, with respect to the OTC Plaintiff, the Court adheres to its decision in *Platinum I* to "dr[a]w a line between plaintiffs who transacted directly with defendants and those who did not." *2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *22* (quoting **[**21]** *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR VI"), 11 MDL 2262 (NRB), 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16 (S.D.N.Y. Dec. 20, 2016))* (brackets omitted). Because the TAC does not allege that the OTC Plaintiff transacted directly with any defendant, it is not an efficient enforcer.

i. Directness of Injury

HN9[] The first efficient enforcer factor is "the 'directness or indirectness of the asserted injury.'" *Gelboim, 823 F.3d at 778* (quoting *AGC, 459 U.S. at 540*). This factor "requires evaluation of the 'chain of causation' linking [plaintiff's] asserted injury and the [defendants'] alleged price-fixing." *Id.* (quoting *AGC, 459 U.S. at 540*); *see also In re Commodity Exch., Inc. ("Gold"), 213 F. Supp. 3d 631, 653 (S.D.N.Y. 2016)* (holding that this factor "requir[es] proximate causation" between the antitrust injury alleged by plaintiff and defendants' allegedly anticompetitive

---

[7] Plaintiffs made similar allegations in the SAC, *see, e.g.*, SAC ¶ 34; apps. C & D, which the Court found to be insufficient to plausibly alleged that OTC plaintiffs were efficient enforcers. *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *21-25*.

conduct) (citing *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 135, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*; *DNAML PTY, Ltd. v. Apple Inc., 25 F.Supp.3d 422, 430 (S.D.N.Y. 2014)*; *In re London Silver Fixing, Ltd., Antitrust Litig. ("Silver I"), 213 F. Supp. 3d 530, 552 (S.D.N.Y. 2016))* (capitalization altered).

The first factor is problematic for Plaintiffs' argument that the OTC Plaintiff is an efficient enforcer in this case. Plaintiffs allege that the Fixing set the "globally accepted benchmark prices" for platinum and palladium. TAC ¶ 4. In similar circumstances, some courts have held that plaintiffs alleging injury via manipulation of a benchmark price satisfy the proximate causation requirement **[**22]** because their allegation is that they are directly injured by defendants' manipulation of the benchmark, regardless of whether they **[*305]** have transacted directly with defendants. *See* *Dennis v. JPMorgan Chase & Co., 345 F. Supp. 3d 122, 165 (S.D.N.Y. 2018)* (describing the first efficient enforcer factor as requiring plaintiffs to "demonstrate[] a sufficiently direct injury" and concluding that the plaintiffs had met that standard because they "allege[d] that they engaged in transactions for" derivatives linked to a financial benchmark "and that their returns were lower because of defendants' anticompetitive conduct"); *Gold, 213 F. Supp. 3d at 653-54* (concluding that the plaintiffs "ha[d] demonstrated a sufficiently direct injury" in similar factual circumstances).[8] On this view, Plaintiffs have sufficiently alleged that Defendants proximately caused the OTC Plaintiff to receive lower prices than it otherwise would have when it sold its platinum and palladium.

HN10[] On the other hand, where a plaintiff does not purchase directly from defendant, there are "significant intervening causative factors," which may "attenuate the causal connection between the violation and **[**23]** the injury." *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980 at *15*. When "[a] plaintiff and a third party" choose to "incorporate [a benchmark] into a financial transaction without any action by defendants whatsoever," the "independent decision to do so" may attenuate "the chain of causation between defendants' actions and a plaintiff's injury." *2016 U.S. Dist. LEXIS 175929, [WL] at *16*.[9] Thus, although the causation analysis does not itself preclude Plaintiffs' argument that the OTC Plaintiff is an efficient enforcer, the problems of proving causation in this case is a significant factor in the efficient enforcer analysis.

ii. Existence of More Direct Victims

HN11[] The second efficient enforcer factor is "the 'existence of more direct victims of the alleged conspiracy[.]" *Gelboim, 823 F.3d at 779* (quoting *AGC, 459 U.S. at 542*). Generally, "[w]hether there is a more direct victim of Defendants' alleged antitrust violation turns 'chiefly on whether the plaintiff is a consumer or a competitor.'" *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *23* (quoting *Gelboim, 823 F.3d at 779*). However, a plaintiff's status "is not the end of the inquiry; the efficient enforcer criteria must be established irrespective of whether the plaintiff is a consumer or a competitor." *Id.* (quoting *Gelboim, 823 F.3d at 779*). "'Inferiority' **[*306]** to other potential plaintiffs **[**24]** can be relevant, but it is not dispositive." *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d*

---

[8] *See also* Sharon E. Foster, *Antitrust Efficient Enforcer and the Financial Products Benchmark Manipulation Litigation* ("*Benchmark Manipulation Litigation*"), *13 Ohio St. Bus. L.J. 99, 137 (2019)* (opining "that there is no intervening cause or persons between plaintiffs' damages and defendants' conduct" in benchmark manipulation cases); *cf.* *Gelboim, 823 F.3d at 779* ("At first glance, here there appears to be no difference in the injury alleged by those who dealt in LIBOR-denominated instruments, whether their transactions were conducted directly or indirectly with [the defendants].").

[9] *See also* *Sullivan, 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *17* ("A defendant may have had no knowledge of the existence of a particular transaction, and the plaintiff may have had no dealings with the defendant, but, provided the derivative product incorporated [the benchmark] as a price term, it would fall within the scope of plaintiffs' claims."); *Sonterra Capital Master Fund Ltd. v. Credit Suisse Group AG ("CHF LIBOR"), 277 F. Supp. 3d 521, 560-61 (S.D.N.Y. 2017))*. *But see* Foster, *Benchmark Manipulation Litigation at 138-39* (challenging this analysis because "it assumes, incorrectly, that plaintiffs had a choice, and the bargaining power to affect that choice, regarding what benchmark to select as part of the price equation. . . . The economic reality was that LIBOR benchmarks controlled approximately 75% of the global market for interest rate financial products during the relevant time period. Further, as a practical matter, some benchmark had to be used to estimate price. . . . Leading benchmarks, such as LIBOR, were used as a matter of course[,] not as a matter of choice.") (footnote and citations omitted).

677, 689 (2d Cir. 2009). "Implicit in the inquiry is recognition that not every victim of an antitrust violation needs to be compensated under the antitrust laws in order for the antitrust laws to be efficiently enforced." *Gelboim, 823 F.3d at 779*.

The existence of more direct victims of Defendants' alleged conspiracy does not weigh clearly in favor of or against the conclusion that Plaintiffs have sufficiently pleaded that the OTC Plaintiff is an efficient enforcer. On the one hand, those who transacted directly with Defendants may be conceived of as more direct victims of Defendants' alleged conspiracy than those who did not.

On the other hand, ***HN12***[] *Gelboim* held that this factor may have "diminished weight" in benchmark manipulation cases. *823 F.3d at 779*. "In *Gelboim*, the Second Circuit recognized that 'one peculiar feature of that case was that remote victims (who acquired LIBOR-based instruments from any of thousands of non-defendant banks) would be injured to the same extent and in the same way as direct customers of the Banks.'" *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *23* (quoting *Gelboim, 823 F.3d at 779*) (other citations and brackets omitted). What *Gelboim* labeled a "peculiar feature" is present in any benchmark manipulation case, and *Platinum I* concluded that it **[**25]** is "also present here. Those who transacted in [p]latinum and [p]alladium [i]nvestments with other market participants would be injured to the same extent and in the same way as Defendants' direct customers." *Id.* (quoting *Gelboim, 823 F.3d at 779*) (other citations omitted); *see also* Foster, *Benchmark Manipulation Litigation at 140-41* (arguing that so long as the price a purchaser paid was tied to the relevant benchmark, it does not matter whether a plaintiff transacted directly with a defendant). It was for this reason that *Gelboim* held that whether there were more direct victims of the alleged conspiracy should receive "diminished weight" in cases like this one. *823 F.3d at 779*. Consequently, both because *Gelboim* indicated that this factor carries diminished weight in benchmark manipulation cases and because it does not clearly cut for or against the OTC Plaintiff's efficient enforcer status, the second factor does not carry much weight in the Court's analysis.

iii. Speculative Damages

HN13[] The third efficient enforcer factor is "whether the damages would necessarily be 'highly speculative[.]'" *Gelboim, 823 F.3d at 780* (quoting *AGC, 459 U.S. at 542*). "'Some degree of uncertainty stems from the nature of* ***antitrust law***' and 'the wrongdoer shall bear the risk of the uncertainty which his own wrong has created.' At **[**26]** the same time, 'highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement.'" *CHF LIBOR, 277 F. Supp. 3d at 563* (first quoting *Gelboim, 823 F.3d at 780*; then quoting *DDAVP, 585 F.3d at 689*; and then quoting *Gelboim, 823 F.3d at 779*). "Damages claims may . . . be too speculative where: (1) 'the damages claim is conclusory'; (2) 'the injury is so far down the chain of causation from defendants' actions that it would be impossible to untangle the impact of the fixed price from the impact of intervening market decisions'; or (3) 'due to external market factors, there is no relationship between the fixed price and the price that the plaintiffs ultimately paid.'" *Id.* (quoting *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *17-18)*.

This factor also does not cut clearly in favor of or against Plaintiffs' argument that the OTC Plaintiff is an efficient enforcer. On the one hand, the OTC Plaintiff's damages claim is not conclusory; if, as **[*307]** Plaintiffs allege, Defendants suppressed the price of platinum and palladium, the OTC Plaintiff's theory of damages flows directly from that suppression. Moreover, Plaintiffs have alleged that the OTC Plaintiff suffered a direct injury as a result of Defendants' manipulation of the benchmark price for platinum and palladium, so the OTC Plaintiff's injury is arguably not causally **[**27]** attenuated from Defendants' alleged manipulation. And, although the price of platinum and palladium is undoubtedly influenced by market forces independent of Defendants' alleged manipulation, the same is true to some extent in any Sherman Act case. *Cf.* *Gelboim, 823 F.3d at 780* ("Some degree of uncertainty stems from the nature of ***antitrust law***.").

On the other hand, as in *Gelboim*, damages calculations in this case "present[] some unusual challenges." *Id. at 781*. In *Platinum I*, the Court expressed concern about Plaintiffs' ability to "untangle the impact" of Defendants' alleged conspiracy "from the impact of intervening market decisions." *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *17*; *see* *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *23-25* (discussing the difficulties calculating damages would present in this case). Those concerns have not entirely abated. Accordingly, this factor also does not carry much weight in the Court's analysis of whether the OTC Plaintiff is an efficient enforcer of the antitrust laws.[10]

iv. Duplicative Recovery & Complex Damages Apportionment

HN14[] The fourth efficient enforcer factor is "either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other." *Gelboim, 823 F.3d at 778* (quoting *AGC, 459 U.S. at 544*). This factor "reflects a 'strong interest in keeping the scope of complex **[**28]** antitrust trials within judicially manageable limits.'" *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980* (quoting *AGC, 459 U.S. at 543*) (ellipsis omitted). It is arguably the most important factor in the efficient enforcer analysis. *See* Foster, *Benchmark Rate Manipulation at 140* ("Efficient enforcer factors focus on duplicative recovery and complex apportionment.") (citations omitted).

Like the first efficient enforcer factor, this factor does not preclude Plaintiffs' argument that the OTC Plaintiff is an efficient enforcer, but it does present significant challenges. On the one hand, if every seller of platinum and palladium collects damages from Defendants, it would not present a risk of duplicative recoveries. That is because every seller can only recover from Defendants once. *See* *ISDAFix, 175 F. Supp. 3d at 61* ("[T]he damages at issue are tied to particular transactions and contracts, obviating the danger of duplicative recovery."). And, at first blush, the apportionment of damages may not seem complex. If Plaintiffs prove that Defendants manipulated the price of platinum and palladium by $X, then each seller should be able to recover $X. On this view, there is nothing more complex about damages apportionment in this case than in any price-fixing case.

Damages apportionment may not be so simple in this case, **[**29]** however. As noted above with respect to factor one, decisions by non-defendant buyers to incorporate the Fix into transactions over which Defendants have no control may create difficult questions of causation that bear on the **[*308]** damages analysis. In other words, where non-defendant parties decided to incorporate the Fix price into transactions without Defendants' knowledge, those decisions may make apportioning damages particularly complex. The complexity of damages apportionment is a significant factor in the Court's analysis of whether plaintiffs who are not alleged to have transacted directly with Defendants are efficient enforcers in this case.[11]

v. Conclusion

---

[10] The Court observes that the third efficient enforcer factor may be in tension with traditional principles of notice pleading. In most areas of law, concerns about damage calculations are deferred until after the pleading stage. *See* Foster, *Benchmark Manipulation Litigation at 142* (opining that the concern about speculative damages "is not an efficient enforcer issue; rather, it is a problem of proof").

[11] The allegation that there are government investigations into Defendants' manipulation of the Fix price does not carry significant weight in the Court's analysis. *Gelboim* noted that there were government investigations related to the transactions at issue in that case "ongoing in at least several countries." *823 F.3d at 780*. The Second Circuit observed that "[s]ome of those government initiatives may seek damages on behalf of victims, and for apportionment among them" but did not elaborate on how this should factor into its analysis beyond stating that it was "wholly unclear on this record how issues of duplicate recovery and damage apportionment can be assessed." *Id.* Plaintiffs have made similar allegations of government investigations into Defendants' conduct in this case. TAC ¶¶ 229-40. The importance of related government investigations in similar cases is unsettled in this district. *Compare* *Sullivan, 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *20* ("[A]ctions of government regulators lessen the need for plaintiffs to function as private attorneys general and vindicators of the public interest.") *with* *In re For. Exch. Benchmark Rates Antitrust Litig. ("FOREX"), 13 CIV. 7789 (LGS), 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *8 (S.D.N.Y. Sept. 20, 2016)* ("Because public enforcement does not provide redress to victims of the conspiracy, the OTC Class is an efficient and necessary enforcer."). In this case, the allegations that there are government investigations into the alleged manipulation of the Fix is not a significant factor in the Court's analysis.

The Court concludes that plaintiffs who sold physical platinum and palladium and did not transact directly with Defendants are not efficient enforcers of the antitrust laws. As discussed above, the first and fourth factors raise serious concerns about the OTC Plaintiff's efficient enforcer status. Thus, after balancing the efficient enforcer factors with a focus on determining whether the OTC Plaintiff "is a proper party to 'perform the office of a private **[**30]** attorney general' and thereby 'vindicate the public interest in antitrust enforcement'" *Gatt, 711 F.3d at 80* (quoting *AGC, 459 U.S. at 542*), the Court has concluded that plaintiffs who did not transact directly with defendants are not efficient enforcers.

This conclusion is reinforced by the possibility of disproportionate damages in benchmark manipulation cases. ***HN15***[] As noted above, benchmark manipulation cases present unique challenges for application of the efficient enforcer factors. *Gelboim* noted that one difficult issue arises with respect to so-called "umbrella" standing. "Umbrella standing concerns are most often evident when a cartel controls only part of a market, but a consumer who dealt with a non-cartel member alleges that he sustained injury by virtue of the cartel's raising of prices in the market as a whole." *Gelboim, 823 F.3d at 778*; *see also* *Loeb Indus., Inc. v. Sumitomo Corp., 306 F.3d 469, 484 n.4 (7th Cir. 2002)* ("If . . . cartel members A and B sell to customers X and Y, and then non-cartel member firm C makes sales at or near the enhanced cartel price to customer Z, the question arises whether A and B are liable to Z for the overcharges it paid."). Here, plaintiffs who did not transact directly with defendants are "umbrella" purchasers.

HN16[] Benchmark manipulation cases present particularly difficult questions **[**31]** regarding umbrella standing because alleged manipulators can affect prices without dominating the market. In a standard (*i.e.*, non-benchmark) manipulation case, alleged manipulators **[*309]** must have at least a substantial market share—if not outright market dominance—to maintain a non-competitive price. That is because a cartel must have a large enough fraction of the market to exert control over the market price. In other words, if a would-be cartel is only a tiny fraction of the market, it cannot exert market power and thus is no cartel at all. This premise has led to a "scholarly consensus" that is "skeptical" about whether it is possible for private actors to manipulate large commodity markets. *See* Andrew Verstein, *Benchmark Manipulation*, *56 B.C. L. Rev. 215, 216 (2015)*.[12]

Benchmark manipulation cases are different. All that a would-be cartel must do is manipulate a benchmark. Where, as here, the benchmark is calculated based on a tiny fraction of market activity, a manipulator need only manipulate that tiny fraction of market activity.[13] And "[o]nce the benchmark is hardwired into legal relationships, manipulating the proxy pays off just as much as manipulating the underlying reality." *Id. at 217*; *see also id.* ("If the **[**32]** manipulator has agreed to sell oil at the benchmark price, tampering with the benchmark has the same effect as moving the worldwide supply of oil.") (citation omitted). As noted above, because the benchmark is then widely disseminated, any party that transacted based on the benchmark can reasonably complain that their damages were caused by defendants' manipulation. But allowing parties who did not transact directly with defendants to recover also leads to the causal attenuation and complex damages apportionment noted in the Court's discussion of the first and fourth efficient enforcer factors.

Thus, benchmark manipulation cases generate the *Gelboim* court's concern that "if the [defendants] control only a small percentage of the ultimate identified market," the defendants may be liable for "damages disproportionate to wrongdoing[.]" *823 F.3d at 779* (citation omitted); *see also id.* ("Requiring the Banks to pay treble damages to every plaintiff who ended up on the wrong side of an independent LIBOR-denominated derivative swap would, if

[12] *See also* *id. at 216-17* ("To drive up the global price of an asset—such as silver—you have to buy a truly enormous amount. But you haven't gotten rich unless you can sell at the inflated price, and whatever forces raised the price while you bought will reverse when you try to sell. In theory, the plummeting price should precisely evaporate your profits. And in the meantime, you had to pay to transport and store a quarter of the world's silver.").

[13] *See also* *id. at 218* ("By their nature, benchmarks describe a market based on some small slice of it. Careful manipulators can bias that slice. It is daunting to corner the world currency market, but it is less daunting to comer the two percent of the market whose price is considered by the leading benchmark. By shrinking the domain over which the manipulator must exercise influence, benchmarks directly circumvent the principal challenges to manipulation identified by scholars.") (footnote omitted).

appellants' allegations were proved at trial, not only bankrupt 16 of the world's most important financial institutions, but also vastly extend the potential **[**33]** scope of antitrust liability in myriad markets where derivative instruments have proliferated."). As noted above, absent a benchmark, it would be difficult—if not impossible—for defendants who "control[led] only a small percentage of the ultimate identified market" to exert meaningful control over the market price. *Id.* Thus, although the concern about disproportionate damages may arise where a plaintiff alleges market manipulation by means other than the manipulation of a benchmark, it generally will not do so as forcefully as in a benchmark manipulation case—at least where, as here, the benchmark **[*310]** is calculated based on a small slice of market activity or information submitted by a small number of market participants. Either the would-be cartel is too small (and fails in its attempt to manipulate the market) or the cartel has substantial market share (and market-wide damages are more proportional to the harm caused by defendants). Hence, *Gelboim*'s concern about disproportionate damages is particularly relevant in benchmark manipulation cases.

There is another distinct, though conceptually overlapping, issue that results from the problems identified in the Court's discussion of the first **[**34]** and fourth efficient enforcer factors. This concern is that, taking the facts as alleged in the TAC as true, every non-defendant buyer received a benefit from the lower prices that prevailed in the market as a result of Defendants' illegal conduct. That is, assuming that Defendants successfully downwardly manipulated the prices of platinum and palladium, non-defendant buyers received a windfall as a result of Defendants' manipulation. But there is no mechanism for non-defendant buyers to compensate Plaintiffs for this windfall.

This is another way of characterizing *Gelboim*'s concern about disproportionate damages. Plaintiffs' damages may be disproportionate to defendants' wrongdoing because Plaintiffs' damages are not proportional to defendants' ill-gotten gains. Some (even most) of plaintiffs' damages—the difference between the lower price that allegedly prevailed because of Defendants' manipulation and the price that allegedly would have prevailed absent Defendants' manipulation—flowed to non-defendants. Although this concern applies to "umbrella" plaintiffs generally and not only in benchmark manipulation cases, it is particularly vexing where defendants control only a small percentage **[**35]** of the identified market, as is more likely to be the case in benchmark manipulation cases.[14]

These concerns, which flow from the problems inherent in the application of the first and fourth efficient enforcer factors in benchmark manipulation cases, reinforce the Court's conclusion that it should adhere to its decision in *Platinum I* to "dr[a]w a line between platinum and palladium purchasers who transacted directly with Defendants and those who did not." *2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *22* (quoting *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16)*. In addition to addressing the problems associated with the first and fourth efficient enforcer factors identified above, this approach has the further advantage of rendering Plaintiffs' recovery essentially proportional to Defendants' allegedly ill-gotten gains. ***HN17***[] For similar reasons, "a critical mass of judges within this district" addressing similar concerns in benchmark manipulation cases "have concluded that plaintiffs who are not direct purchasers are not efficient enforcers in a benchmark manipulation case." *In re London Silver Fixing, Ltd., Antitrust Litig. ("Silver II"), 332 F. Supp. 3d 885, 905* ***[*311]*** *(S.D.N.Y. 2018)* (citing *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16*; *Sullivan, 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *15*; *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *22*; *CHF LIBOR, 277 F. Supp. 3d at 558*). Hence, the Court reaffirms its conclusion in *Platinum I* that the OTC Plaintiff is not an efficient enforcer because **[**36]** Plaintiffs have not alleged that the OTC Plaintiff transacted directly with Defendants.

---

[14] The question is not, as one commentator has argued, whether defendants are subject to "ruinous liability" or whether particular defendants are systemically important financial institutions. Foster, *Benchmark Manipulation Litigation at 139-40*. The Court agrees that there would be a "serious rule of law problem" if the efficient enforcer inquiry turned on whether a particular defendant was "too big to fail." *Id. at 140*; *cf.* Sharon E. Foster, *Too Big to Prosecute: Collateral Consequences, Systemic Institutions and the Rule of Law, 34 Rev. Banking & Fin. L. 655, 674-85 (2015)*. Rather, the problem is whether defendants—no matter their size—are subject to liability that is *disproportionate* to their allegedly ill-gotten gains. This problem arises because of the structure of benchmark manipulation litigation and, more specifically, the problems of causal attenuation and complex damages apportionment noted above.

b. Exchange Plaintiffs

The Exchange Plaintiffs are not efficient enforcers of the antitrust laws because Plaintiffs have not adequately alleged that Defendants dominated the market for platinum and palladium derivatives. As an initial matter, the same concerns noted above with respect to causation and complex damages apportionment also apply to the Exchange Plaintiffs. Exchange Plaintiffs' choice to incorporate the Fix price into their platinum and palladium derivative transactions arguably attenuates the causal connection between Defendants' actions and their injury. And damage apportionment may be complex given Plaintiffs' choice to incorporate the Fix price independently of any action by Defendants. Hence, the same problems that flow from the application of the efficient enforcer factors to the OTC Plaintiff's claim also arise in the exchange context.

The solution to those problems that the Court has adopted with respect to the OTC Plaintiff is not readily transferable to the exchange market, however. As explained above, parties transact directly in the OTC market. Therefore, an OTC plaintiff's **[**37]** counterparty is reasonably ascertainable. But "[t]he framework of dividing plaintiffs between those who transacted with defendants and those who did not in OTC transactions 'is not readily transferable to the futures market,' because a clearinghouse such as the CME, rather than any identifiable third party, serves essentially as the counterparty." *CHF LIBOR, 277 F. Supp 3d at 561* (quoting *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16)*; *see also* *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16* (***HN18***[] "[W]here a plaintiff's counterparty is *reasonably ascertainable* and is not a defendant . . . a plaintiff is not an efficient enforcer.") (emphasis added). For plaintiffs who sold on an exchange, "there is simply no way to tailor the standing analysis to those who dealt directly with defendants." *CHF LIBOR, 277 F. Supp. 3d at 561*. In this case, the Plaintiffs have amended their complaint to allege that CME Clearing "is the counterparty to *all* transactions on the exchange (*i.e.*, the buyer or seller to a NYMEX contract does not have any identified counterparty other than NYMEX)." TAC ¶ 80. In light of the Plaintiffs' amendments, the Court is persuaded that it cannot draw a line between those who transacted directly with defendants and those who did not in the exchange context.

Because the Exchange Plaintiffs' counterparties are not reasonably ascertainable, **[**38]** the Court is caught on the horns of a dilemma. Defendants argue that a necessary corollary of the Exchange Plaintiffs' argument that all NYMEX sellers should be able to collect damages is that "all sellers of NYMEX futures are equally positioned to enforce the antitrust laws" and that accepting their arguments would "effectively eliminate[] the efficient enforcer requirement altogether" in this case. Mem. at 17. On the other hand, Plaintiffs argue that "to allow only those who directly contracted with Defendants to state a claim would leave wide swaths of their victims—including the *entirety* of the futures and options traders—without a remedy." Plaintiffs' Letter to Court, Dkt No. 195, at 2 n.3. Both Plaintiffs and Defendants are correct. Because the Court cannot enforce the line between those who transacted directly with Defendants and those who did **[*312]** not on an exchange, either *no* seller or *every* seller will be an efficient enforcer. As Judge Stein observed with respect to exchange plaintiffs, "there is simply no way to tailor the standing analysis to those who dealt directly with defendants." *CHF LIBOR, 277 F. Supp. 3d at 561*. Therefore, it is difficult to "render[] plaintiffs' recovery essentially proportional to **[**39]** defendants' ill-gotten gains" and "the choice is between under-enforcement and over-enforcement[.]" *Id.*

One way to resolve this dilemma is for plaintiffs to allege that defendants dominated the relevant exchange market. ***HN19***[] Recognizing that counterparties to exchange plaintiffs are not reasonably ascertainable, judges in this district have adopted a test that "depends primarily on the extent of defendants' control of the market for the product traded on the exchange." *CHF LIBOR, 277 F. Supp. 3d at 561* (citations omitted).

FOREX was the first case to adopt this standard. *2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *10*. In that case, Judge Schofield noted the *Gelboim* court's observation that "'at first glance there appears to be no difference in the injury alleged by those who dealt in LIBOR-denominated instruments, whether their transactions were conducted directly or indirectly with the Banks'" but also observed that *Gelboim* "expressed concern . . . with the possibility of damages disproportionate to wrongdoing 'if the Banks control only a small percentage of the ultimate identified market.'" *Id.* (quoting *Gelboim, 823 F.3d at 779*) (ellipsis omitted). She then concluded that this concern was inapplicable because the plaintiffs alleged that the defendants in that case "dominated the FX market **[**40]** with a combined market share of over 90% as significant participants in both OTC and exchange transactions." *Id.* In other words, *Gelboim*'s concern about damages disproportionate to wrongdoing applied much less forcefully on the facts of *FOREX* because where defendants had over 90% market share, they would also be responsible for over 90% of the damages. Three other judges in this district have followed Judge Schofield's lead, reasoning that "control of an exchange-based market 'may be viewed as a . . . way of ensuring that damages would not be greatly disproportionate to wrongdoing." *CHF LIBOR, 277 F.Supp.3d at 561* (quoting *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16)*; *see also* *Silver II, 332 F. Supp. 3d at 909*.

HN20[] The Court likewise adopts this test as one method by which plaintiffs can allege that an exchange plaintiff is an efficient enforcer.[15] The market domination test helps to resolve the causation and complex apportionment issues described above. Indeed, the market domination test may be thought to serve as a proxy for whether a plaintiff transacted directly with a defendant; in a market in which defendants dominate, it is far more likely that a plaintiff who bought on an exchange will have transacted directly with a defendant.

The question presented by the Exchange Plaintiffs on **[**41]** this motion is thus whether the Plaintiffs have adequately alleged that Defendants have dominated the platinum and palladium exchange market. ***HN21***[] The Court's inquiry consists of three steps. First, the Court must define the relevant market. Second, the Court must examine **[*313]** what share of that market Defendants are alleged to have controlled. Finally, the Court must determine whether Defendants controlled a sufficiently large percentage of the relevant market that they "dominated" it.

i. Market Definition

The first step of the Court's inquiry is to define the relevant market. The "guiding precedent leaves room for debate as to how the 'market' should be defined" in cases like this one. *Gold, 213 F. Supp. 3d at 653*. Plaintiffs argue that they have alleged "a single market for platinum and palladium physical, futures and options transactions[.]" Opposition to Joint Motion to Dismiss for Failure to State a Claim ("Opp."), Dkt No. 216, at 15 n.4; *see, e.g.*, TAC ¶ 254 ("Plaintiffs were sellers in the market for Physical and NYMEX Platinum and Palladium[.]"). ***HN22***[] However, "[w]hile the Court is bound by the factual allegations in the Complaint[]," the "definition of the relevant market is a legal conclusion, not a factual one." **[**42]** *In re N. Sea Brent Crude Oil Futures Litig. ("Oil"), 256 F. Supp. 3d 298, 312 (S.D.N.Y. 2017)*, *aff'd sub nom.*, *Prime Int'l Trading, Ltd. v. BP P.L.C., 784 F. App'x 4 (2d Cir. 2019)*. Therefore, "[t]he Court must examine the facts alleged in the [TAC] to determine what market or markets allegedly were restrained based on Plaintiffs' theory of the case." *Id.*

The TAC alleges harm in two different markets: The physical platinum and palladium market and the NYMEX platinum and palladium market. The markets for physical commodities and derivatives based on the price of those commodities are distinct.[16] *See* *Prime Int'l Trading, 784 F. App'x at 7* (holding that the "physical market for Brent

[15] The Court does not hold that an allegation of market domination is the only method by which an exchange plaintiff can adequately plead antitrust standing in this context. For example, Defendants correctly note that the Exchange Plaintiffs have not "allege[d] that they traded *through* a clearing member affiliated with any Defendant." Mem. at 12. The Court does not take a position on whether allegations of this type plausibly plead that a plaintiff is an efficient enforcer.

[16] The TAC is inconsistent with respect to whether platinum and palladium derivatives traded on NYMEX are directly pegged to, or merely strongly correlated with, the price of physical platinum and palladium. *Compare* TAC ¶ 207 ("The Defendants were also large participants in NYMEX futures and options. These contracts, like those for physical sales of platinum and palladium, *directly incorporate or reference* the Fix price in order to determine the cash flows between the parties.") *with id.* ¶ 91 ("The Fixing also directly impacts the price of NYMEX Platinum and Palladium. This is because exchange prices *closely track* the price of spot platinum or palladium.") (emphases added). Therefore, the Court interprets the TAC as alleging that some NYMEX derivatives directly reference the Fix price while others do not. ***HN23***[] With respect to derivatives that directly incorporate the Fix price, the antitrust injury inquiry is straightforward because "[c]ourts in this Circuit consider manipulation of a price benchmark to constitute restraint of the market which that benchmark guides." *Oil, 256 F. Supp. 3d at 313* (citing *Gelboim, 823*

crude oil" and the market for "derivatives that were linked to, or otherwise tracked" a benchmark oil price were two separate markets); Oil, 256 F. Supp. 3d at 313.[17] **[*314]** This conclusion is consistent with other decisions in this district that have concluded that OTC and exchange plaintiffs are "victims in . . . different markets." Nypl v. JPMorgan Chase & Co., 15 CIV. 9300 (LGS), 2017 U.S. Dist. LEXIS 122468, 2017 WL 3309759, at *6 (S.D.N.Y. Aug. 3, 2017) (citations omitted); *see also* FOREX, 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *11 (holding that OTC plaintiffs and exchange plaintiffs suffered injury in two different markets); *cf.* CHF LIBOR, 277 F. Supp. 3d at 562 (observing that both OTC and exchange plaintiffs could be efficient enforcers if the OTC plaintiffs pleaded that they transacted directly with the defendants and the exchange plaintiffs **[**43]** pleaded that the defendants dominated the market, implying that the OTC and exchange markets are distinct).[18]

F.3d at 776-77; FOREX, 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *6; Alaska Elec. Pension Fund v. Bank of Am. Corp. ("ISDAFix"), 175 F. Supp. 3d 44, 59 (S.D.N.Y. 2016)). With respect to derivatives that do not directly incorporate—but closely track—the Fix price, Plaintiffs have adequately alleged that Defendants' manipulation of the NYMEX market is "inextricably intertwined" with their manipulation of the price for physical platinum and palladium. Aluminum II, 833 F.3d at 161. Plaintiffs have adequately alleged that Defendants profited by trading in the NYMEX market and that the manipulation of the physical prices of platinum and palladium—*i.e.*, the prevailing price in the OTC market—was "the very means" by which Defendants profited in the NYMEX market. Id. at 162. Hence, the Exchange Plaintiffs have pleaded antitrust injury regardless of whether the derivatives they traded were directly linked to the Fix price. *Gold* reached a similar conclusion. 213 F. Supp. 3d at 653 (holding that allegations that exchange plaintiffs suffered antitrust injury were "inextricably intertwined" with the Defendants' alleged manipulation of the Fix Price for antitrust standing purposes).

[17] The Prime International Trading and Oil courts conducted their analyses of the markets in which the plaintiffs had alleged injury in the context of the antitrust injury prong of the antitrust standing analysis, rather than (as here) in the context of the efficient enforcer factors. But because the analysis of which market or markets in which the plaintiffs have alleged injury must be consistent across both prongs of the antitrust standing inquiry, both are persuasive for the Court's analysis.

[18] This analysis shows why Defendants' argument that the OTC Plaintiffs are "more direct victim[s] of any alleged conspiracy to manipulate the" Fixing than are the Exchange Plaintiffs is unconvincing. Mem. at 15. Plaintiffs have sufficiently pleaded antitrust injury in two different markets, so the OTC Plaintiffs are not more direct victims than the Exchange Plaintiffs; they are victims in a different market. Other judges in this district have also rejected the argument that participants in an OTC market are more direct victims of an alleged conspiracy than participants in an exchange market. *See* Nypl, 2017 U.S. Dist. LEXIS 122468, 2017 WL 3309759, at *6 ("Contrary to Defendants' argument, FX spot market participants who transacted directly at spot trading prices are not more direct victims, but rather victims in a different market.") (citations omitted); FOREX, 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *11; *cf.* CHF LIBOR, 277 F. Supp. 3d at 561-62 (noting that "[o]ne could . . . conceive of the Direct Transaction Plaintiffs as a 'more direct' victim than" an exchange plaintiff but also observing that exchange plaintiffs' claim could proceed if they plausibly alleged market domination by defendants). Consequently, this argument is unconvincing.

The Court observes a tension in both parties' arguments with respect to this issue. Plaintiffs assert that they have alleged "a single market for platinum and palladium physical, futures and options transactions[.]" Opp. at 15. This seems surprising because it supports Defendants' argument that the OTC plaintiff is a victim in the same market as the Exchange Plaintiffs. For their part, Defendants argue that Plaintiffs are "asking the Court to hold Defendants trebly liable for transactions in '*two* extraordinarily large' markets (futures and physical)[.]" Mem. at 6 (quoting Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *21) (emphasis added). This also seems surprising because it supports Plaintiffs' arguments that OTC plaintiffs are not efficient enforcers with respect to the NYMEX market. Hence, Plaintiffs and Defendants both appear to be arguing on the wrong side of the one-vs.-two markets question.

This odd configuration likely arises because both Plaintiffs and Defendants had incentives to argue the opposite side of this question on the antitrust injury prong of the antitrust standing analysis. It is easier for Plaintiffs to show antitrust injury if they need only show such injury in one market; thus, Plaintiffs argued that physical and NYMEX platinum and palladium were traded in one market and Defendants argued that each set of Plaintiffs must demonstrate a distinct antitrust injury. Plaintiffs now argue that "[w]hether physical and futures transactions represent one market or two markets is of no moment at this stage because the Court already ruled that Plaintiffs suffered antitrust injury." Opp. at 15 (citing Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *19-20). ***HN24***[] It is true that courts have generally addressed this issue on the antitrust injury prong of the antitrust standing analysis. *See, e.g.,* Prime Int'l Trading, 784 F. App'x at 7. But as the above demonstrates, it is also relevant to the application of the efficient enforcer factors, including whether there are more direct victims of the alleged conspiracy under

[*315] Moreover, Plaintiffs allege different theories of competitive harm in the OTC and exchange markets. For example, the TAC alleges that BASF Metals was "motivated by its desire to keep prices of platinum and palladium low because both metals are used as raw materials in products manufactured by BASF (and its related corporate entities) . . . in addition to its motive as a proprietary trader in platinum and palladium[.]" TAC ¶ 202. This is distinct from the TAC's allegations that all Defendants profited from manipulating the Fix downward by virtue of their short positions in NYMEX platinum and palladium. *See, e.g., id.* ¶ 207.

These are distinct theories of anticompetitive harm, which reinforces the conclusion that Plaintiffs have alleged antitrust injury in two separate markets *See* *Oil, 256 F. Supp. 3d at 312-13* (concluding that where "Plaintiffs posit that Defendants engaged in . . . anticompetitive behavior for two, potentially conflicting, **[**44]** reasons[,]" one of which was to drive the price of Brent crude oil "downward where related entities are both producers and refiners, so as to increase the margin, making the refining business more profitable" and the second of which was to make increased profits on "futures and derivatives products traded on NYMEX" linked to a Brent oil benchmark, the plaintiffs had alleged harm in two markets). Thus, Plaintiffs have alleged harms in both the OTC and NYMEX markets. Accordingly, the relevant market for purposes of the Court's inquiry into whether the Exchange Plaintiffs have plausibly alleged efficient enforcer status is the NYMEX market.

ii. Defendants' Market Share

The second step of the Court's inquiry is to ascertain what share of the market Defendants allegedly controlled. Plaintiffs allege that Defendants each "h[eld] substantial market share in Physical and NYMEX Platinum and Palladium." TAC ¶ 38 (BASF Metals); *id.* ¶ 40 (Goldman Sachs); *id.* ¶ 42 (HSBC); *id.* ¶ 44 (ICBC Standard); *see also id.* ¶ 191 ("BASF[Metals] engages in a large amount of Physical and NYMEX Platinum and Palladium trading."); *id.* ¶ 192 ("Defendant Goldman Sachs has a precious metals trading desk and engages in **[**45]** millions of dollars of platinum and palladium physical and derivatives trades each year."); *id.* ¶ 193 ("HSBC engages in millions of dollars of platinum and palladium physical and derivatives trades each year."); *id.* ¶ 207 ("The Defendants were also large participants in NYMEX futures and options."). Standing alone, these allegations might have been sufficient to allege that Defendants dominated the exchange market, requiring further factual development to resolve that question. *Cf.* *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *17* (denying motion to dismiss because further factual development was necessary to determine if defendants dominated the market); *CHF LIBOR, 277 F. Supp. 3d at 562*. However, as explained below, the Court does not decide whether the above allegations would have been sufficient to plausibly allege that Defendants dominated the market.

The TAC contains additional allegations that are relevant to the market-domination inquiry. The TAC alleges that all banks held between 20 and 50 percent of the "overall open interest" in platinum and palladium over the class period. TAC at 113, Charts 81 & 82. The TAC does not allege that the three Defendant Banks[19] were the only banks trading in the platinum and palladium futures market. In fact, the TAC also alleges that **[**46]** UBS, which is no **[*316]** longer a defendant and was not a member of the Fixing, "engages in millions of dollars of platinum and palladium trades each year." *Id.* ¶ 195. Therefore, the Defendant Banks' market share must represent some fraction of this overall open interest. The TAC also notes that "BASF is not included in" the 20 to 50 percent figure "because it is not a bank." *Id.* ¶ 197 n.60. However, the TAC alleges that BASF Metals had very small holdings in the platinum and palladium derivatives market. *Id.* at 112, Chart 79. Therefore, it is implausible that adding BASF Metals' market share to the other Defendants would have a meaningful impact on the inquiry into whether Defendants dominated the exchange market.

---

the second efficient enforcer factor. Furthermore, a definition of the relevant market is a prerequisite to the inquiry into whether defendants dominated a market.

[19] This opinion refers to Goldman Sachs, HSBC, and ICBC Standard collectively as the "Defendant Banks" because BASF Metals "is not a bank." TAC ¶ 197 n.60.

The TAC further alleges that "data obtained from the CFTC . . . shows that NYMEX short positions were heavily concentrated among the top 4 and top 8 traders. Despite the presence of other traders in the market, the top 4 and top 8 traders accounted for approximately 30 to 45% and 45 to 65%, respectively, of platinum and palladium short positions during the Class Period." *Id.* ¶ 199; *see also id.* ¶ 114-15, charts 83 & 85.[20] Plaintiffs' theory is that Defendants "were holders of massive short positions **[**47]** in NYMEX platinum and palladium futures and options" during the Proposed Class Period. *Id.* ¶ 14. Consequently, on Plaintiffs' theory, the four Defendants would have been among the largest NYMEX short traders. As the Court must draw all inferences in favor of the plaintiffs on a motion to dismiss, the Court assumes that the four Defendants were the largest NYMEX short traders in the market. But even granting that assumption, Defendants' combined market share would have been "approximately 30[%]" of the platinum NYMEX market and "approximately 45[%]" of the palladium NYMEX market. *Id.* ¶ 199.[21]

iii. Market Domination

The final step in the Court's inquiry is whether Defendants controlled a sufficiently large share of the market to "dominate" it. As noted above, *Gelboim* expressed concern that "if the [defendants] control only a small percentage of the ultimate identified market," they may be held liable for "damages disproportionate to wrongdoing." *823 F.3d at 779*. Here, Plaintiffs have alleged that Defendants control more than a small percentage of the relevant market. On the other hand, *FOREX* concluded that an allegation that defendants had "a combined market share of over 90%" was sufficient to allege **[**48]** market domination. *2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *9*. Plaintiffs have not alleged that Defendants controlled 90% of the NYMEX platinum or palladium markets.

LIBOR VI presented a closer question. There, the plaintiffs alleged that the sixteen defendant banks or their affiliates were "large traders" and that "large traders comprised 70 to 90 percent of [the exchange] market." *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *17*. However, the *LIBOR VI* court noted that the sixteen defendants were "dwarfed by the total population of over 2,900 large traders in that market during the same time period." *Id.* Pronouncing **[*317]** itself "skeptical that the Exchange-Based plaintiffs can ultimately show that the defendants controlled the market," the court nonetheless allowed the plaintiffs to proceed because "it remains possible that the panel banks, which included some of the world's largest financial institutions, together controlled a large percentage of the market, measured by number of trades or by dollar amount." *Id.* There was "simply not a sufficient record on the issue of market control" for Judge Buchwald to conclude as a matter of law that the plaintiffs had failed to state a claim. *Id.*

Likewise, the *CHF LIBOR* court concluded that "[i]f plaintiffs had adequately alleged an antitrust **[**49]** conspiracy involving all or nearly all of defendants" in that case, "the extent of defendants' control of the exchange markets for Swiss franc currency futures would require factual development and would not be a basis for dismissal." *277 F. Supp. 3d at 562*. But because the plaintiffs had failed to plausibly allege a conspiracy, Judge Stein dismissed the claims brought by exchange plaintiffs. *Id.*; *see also* *Silver II, 332 F. Supp. 3d at 908-09* (concluding that plaintiffs lacked antitrust standing because they had not plausibly alleged domination of the relevant exchange market by certain defendants).

The Court concludes that on the facts alleged in the TAC, Plaintiffs have not adequately pleaded that Defendants dominated the NYMEX market for platinum and palladium derivatives. Plaintiffs have alleged that Defendants' market share was at most 45% of the relevant market, and Plaintiffs' allegations suggest that Defendants' market share was likely far less than that. ***HN25***[] The Court need not and does not adopt a bright line rule for the market

[20] The TAC alleges that there were approximately 40 to 100 traders with short positions on the exchange market that reported data to the CFTC during the Proposed Class Period. *See id.* at 114-15, Charts 82 & 84.

[21] Defendants point to the TAC's allegation that "'the autocatalyst and jewelry segments of the platinum market' are 'the two largest sources of demand'" as further undercutting any suggestion that Defendants dominated the platinum and palladium market. Mem. at 13-14 (quoting TAC ¶ 78). However, as noted above, the Court has concluded that the OTC market and the exchange market are distinct, and this allegation pertains to the OTC market.

share that a defendant or group of defendants must control to meet the "market domination" standard. Rather, the Court holds only that Plaintiffs have not adequately pleaded market domination in the TAC.

c. Conclusion [**50]

As in *Platinum I*, the Court concludes that Plaintiffs are not efficient enforcers of the antitrust laws and, therefore, are not the "proper party 'to perform the office of a private attorney general' and . . . 'vindicate the public interest in antitrust enforcement.'" *Gelboim, 823 F.3d at 780* (quoting *Gatt, 711 F.3d at 80*). Accordingly, Plaintiffs' Sherman Act claim is dismissed without prejudice.

B. *Rule 12(b)(2)* Motion

1. Legal Standard

HN26[] A defendant may move to dismiss a plaintiff's claims against it for "lack of personal jurisdiction." *Fed. R. Civ. P. 12(b)(2)*. On a motion to dismiss pursuant to *Rule 12(b)(2)*, the "plaintiff bears the burden of demonstrating personal jurisdiction over a person or entity against whom it seeks to bring suit." *Penguin Grp. (USA) Inc. v. Am. Buddha, 609 F.3d 30, 34 (2d Cir. 2010)* (citing *In re Magnetic Audiotape Antitrust Litig., 334 F.3d 204, 206 (2d Cir. 2003)* (per curiam)); *see also* *Bank Brussels Lambert v. Fiddler Gonzalez & Rodriguez, 171 F.3d 779, 784 (2d Cir. 1999)* ("When responding to a *Rule 12(b)(2)* motion to dismiss for lack of personal jurisdiction, the plaintiff bears the burden of establishing that the court has jurisdiction over the defendant." (citations omitted)). To defeat a jurisdiction-testing motion, the plaintiff's burden of proof "varies depending on the procedural posture of the litigation." *Dorchester Fin. Sec., Inc. v. Banco BRJ, S.A., 722 F.3d 81, 84 (2d Cir. 2013)* (quoting *Ball v. Metallurgie Hoboken-Overpelt, S.A., 902 F.2d 194, 197 (2d Cir. 1990))*. At the pleading stage—and prior to discovery—a plaintiff need only make a prima facie showing that jurisdiction **[*318]** exists. *Id. at 84-85*; *see also* *Eades v. Kennedy, PC Law Offices, 799 F.3d 161, 167-68 (2d Cir. 2015)* ("In order to survive a motion **[**51]** to dismiss for lack of personal jurisdiction, a plaintiff must make a prima facie showing that jurisdiction exists.") (quoting *Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 732 F.3d 161, 167 (2d Cir. 2013))*.

HN27[] If the court considers only pleadings and affidavits, the plaintiff's prima facie showing "must include an averment of facts that, if credited by the ultimate trier of fact, would suffice to establish jurisdiction over the defendant." *In re Terrorist Attacks on September 11, 2001, 714 F.3d 659, 673 (2d Cir. 2013)* (quoting *Chloe v. Queen Bee of Beverly Hills, LLC, 616 F.3d 158, 163 (2d Cir. 2010)* (quotation marks omitted)). Courts may rely on materials outside the pleading in considering a motion to dismiss for lack of personal jurisdiction. *See* *DiStefano v. Carozzi N. Am., Inc., 286 F.3d 81, 84 (2d Cir. 2001)*. "The allegations in the complaint must be taken as true to the extent they are uncontroverted by the defendant's affidavits." *MacDermid, Inc. v. Deiter, 702 F.3d 725, 727 (2d Cir. 2012)* (quoting *Seetransport Wiking Trader Schiffarhtsgesellschaft MBH & Co., Kommanditgesellschaft v. Navimpex Centrala Navala, 989 F.2d 572, 580 (2d Cir. 1993))*. If the parties present conflicting affidavits, however, "all factual disputes are resolved in the plaintiff's favor, and the plaintiff's prima facie showing is sufficient notwithstanding the contrary presentation by the moving party." *Seetransport Wiking, 989 F.2d at 580* (citations omitted).

2. Application

Plaintiffs have adequately pleaded that BASF Metals and ICBC Standard are subject to personal jurisdiction in the United States under a conspiracy theory. In its prior opinion, the Court explained at length the requirements **[**52]** for a federal court to exercise personal jurisdiction. *See* *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *39-44*. The Court does not rehash that analysis here and provides only a summary of the law necessary for the disposition of the motions currently before the Court.

As in *Platinum I*, Plaintiffs have "disclaimed that the Foreign Defendants are subject to general personal jurisdiction." *2017 U.S. Dist. LEXIS 46624, [WL] at *43*; *see* Plaintiffs' Letter to the Court, Dkt No. 196, at 1 ("Plaintiffs do not assert that Defendants are subject to general jurisdiction[.]"). Therefore, the Court will confine its analysis to specific jurisdiction. ***HN28***[] Among other requirements, "the exercise of personal jurisdiction must comport with constitutional due process." *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *39* (citing *Licci ex rel Licci v. Lebanese Canadian Bank, SAL, 673 F.3d 50, 59-60 (2d Cir. 2012))*. The

> due process analysis proceeds in two steps. First, courts evaluate the quality and nature of the defendant's contacts with the forum state under a totality of the circumstances test. Where the claim arises out of, or relates to, the defendant's contacts with the forum—*i.e.*, specific jurisdiction is asserted—minimum contacts necessary to support such jurisdiction exist where the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there. Second, **[**53]** once minimum contacts are established, a court considers those contacts in light of other factors to determine whether the assertion of personal jurisdiction would comport with fair play and substantial justice.

Charles Schwab Corp. v. Bank of Am. Corp., 883 F.3d 68, 82 (2d Cir. 2018) (quotations omitted).

[*319] ***HN29***[] There are two "independent, if conceptually overlapping, methods of demonstrating minimum contacts." *Best Van Lines, Inc. v. Walker, 490 F.3d 239, 243 (2d Cir. 2007)*. "The first is through purposeful availment,' in which 'the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there.'" *CHF LIBOR, 277 F. Supp. 3d at 589* (quoting *Licci ex rel Licci v. Lebanese Canadian Bank, SAL, 732 F.3d 161, 170 (2d Cir. 2013))*. "The second is through 'purposeful direction,' in which 'the defendant took intentional, and allegedly tortious, actions expressly aimed at the forum.'" *Id.* (quoting *In re Terrorist Attacks, 714 F.3d at 674*). "The 'purposeful direction' test is also referred to as the 'effects test,' which is a 'theory of personal jurisdiction typically invoked where . . . the conduct that forms the basis for the controversy occurs entirely out-of-forum, and the only relevant jurisdictional contacts with the forum are therefore in-forum effects harmful to the plaintiff.'" *Id.* (quoting *Licci, 732 F.3d at 173*). "In such circumstances, the exercise of personal jurisdiction may be constitutionally permissible if the defendant expressly **[**54]** aimed its conduct at the forum." *Id.* (quoting *Licci, 732 F.3d at 173*).

Plaintiffs have alleged Sherman Act and CEA claims against all Defendants in this case, including the Foreign Defendants. *See* TAC ¶¶ 273-95; *see also* *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *43*. ***HN30***[] Both of these statutes provide for nationwide service of process. *See* *CHF LIBOR, 277 F. Supp. 3d at 589* (citing *15 U.S.C. § 22* (Sherman Act); *7 U.S.C. § 25(c)* (*CEA*)). District courts in this circuit, and courts of appeals other than the Second Circuit, have concluded that "when a civil case arises under federal law and a federal statute authorizes nationwide service of process, the relevant contacts for determining personal jurisdiction are contacts with the United States as a whole." *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *40* (quoting *Gucci Am., Inc. v. Weixing Li, 768 F.3d 122, 142 n.21 (2d Cir. 2014)* (collecting cases)); *see, e.g.*, *CHF LIBOR, 277 F. Supp. 3d at 589-90* (concluding the relevant forum is the United States as a whole).[22] Therefore, the Court analyzes whether Plaintiffs have made a prima facie showing of minimum contacts with the United States with respect to BASF Metals and ICBC Standard.[23]

a. BASF Metals

---

[22] "[T]he Second Circuit 'has not yet decided' whether to adopt this approach[.]" *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *40* (quoting *Gucci, 768 F.3d at 142 n.21*).

[23] Because the Court concludes that Plaintiffs have made such a showing, it does not reach the question of whether personal jurisdiction is proper under New York law or *Federal Rule of Civil Procedure 4(k)(2)*. *See* *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *40-41*.

i. Purposeful Availment

Plaintiffs have not made a prima facie showing that BASF Metals purposefully availed itself of the privilege of doing business in the United States. The TAC alleges that BASF Metals "is a company organized and existing under the laws of the United Kingdom with **[**55]** its principal place of business in London, England." TAC ¶ 34. The TAC alleges that

> [i]n 2006, BASF [Metals]'s ultimate parent company, BASF Societas Europaea ('BASF SE') . . . acquired Engelhard Corporation of New Jersey. . . . As part of the acquisition of Engelhard Corporation, BASF SE also acquired Engelhard Metals Limited, which was a Fixing member[.] . . . Through its acquisition of **[*320]** Engelhard Metals Limited, BASF became a Fixing member[.] . . . In 2012, BASF SE changed the name of Engelhard Metals Limited to BASF Metals Limited.

Id. Plaintiffs also allege that BASF Corporation ("BASF Corp.") is a subsidiary of BASF SE and "is based in New Jersey (and a Delaware-registered company)." *Id.* ¶ 36. Thus, the TAC alleges that BASF SE is the parent corporation of both BASF Metals and BASF Corp. *See id.* ¶¶ 34-36. BASF Metals "does not have offices, operations, or employees in New York, New Jersey, or anywhere else in the United States." Declaration of Dr. Vasileios Vergopouls in Support of BASF Metals Limited's Motion to Dismiss Pursuant to *Fed R. Civ. P. 12(b)(2)* and *12(b)(6)* ("Vergopouls Decl."), Dkt No. 209-1, ¶ 2.

Plaintiffs' fundamental difficulty can be summarized as follows. They have alleged that employees of **[**56]** BASF *Metals* manipulated the Fix as part of a conspiracy. And they have alleged that United States-based traders employed by BASF *Corp.* executed platinum and palladium trades, allegedly to profit from the conspiracy. However, for the Court to exercise personal jurisdiction over Defendant BASF Metals, Plaintiffs' allegations must somehow connect BASF Metals to the United States, such that BASF Metals can be said to have "purposefully availed itself of the privilege of doing business in the [United States] and could foresee being haled into court there." *Licci, 732 F.3d at 173*

Plaintiffs attempt to bridge this gap by arguing that employees of BASF Metals were agents of BASF Corp. or, perhaps, of BASF SE. *See, e.g.*, Plaintiffs' Consolidated Opposition to Motions To Dismiss Pursuant To *Fed. R. Civ. P. 12(b)(2)* ("*Rule 12(b)(2)* Opp."), Dkt No. 215, at 10 ("Regardless of whether or not these individuals were employees of BASF Metals . . . a timehonored principle of agency law is *qui facit per alium facit per se*—he who acts through another acts himself."). In support of this argument, Plaintiffs argue that yet a fourth BASF entity, BASF Precious Metals Services, holds BASF out as "global and vertically integrated" and as providing "24/7 access to world **[**57]** metals exchanges & key bullion centres via trading offices in among other places Iselin, New Jersey." *Rule 12(b)(2)* Opp. at 12 (quoting TAC ¶ 36). In addition, the TAC alleges "BASF Corporation has shared employees and directors with BASF Metals Limited." TAC ¶ 37.

HN31[] The Second Circuit recently observed that it "ha[s] not clearly delineated the showing necessary before an agent's contacts will be imputed to its principal for purposes of personal jurisdiction under the *Due Process Clause*[.]" *Schwab, 883 F.3d at 84*. However, the Circuit's "caselaw concerning the New York long-arm statute is . . . instructive" because "[a]lthough the longarm statute and the *Due Process Clause* are not technically coextensive, the New York requirements (benefit, knowledge, some control) are consonant with the due process principle that a defendant must have purposefully availed itself of the privilege of doing business in the forum." *Id.*

Thus, the Court takes guidance from *Jazini v. Nissan Motor Co., Ltd., 148 F.3d 181 (2d Cir. 1998)*, which applied the New York long-arm statute. ***HN32***[] The *Jazini* court held that "[t]o establish that a subsidiary is an agent of the parent, the plaintiff must show that the subsidiary 'does all the business which the parent corporation could do were it here by its own officials.'" *Id. at 184* (quoting *Frummer v. Hilton Hotels Int'l, Inc., 19 N.Y.2d 533, 537, 227 N.E.2d 851, 281 N.Y.S.2d 41 (N.Y. 1967))*. Prior to *Jazini*, "the key Second **[**58]** Circuit case regarding the propriety **[*321]** of a court's exercise of personal jurisdiction over a foreign parent company based on the conduct of its subsidiary was" *Volkswagenwerk Aktiengesellschaft v. Beech Aircraft Corp., 751 F.2d 117 (2d Cir. 1984)*. *In re Aluminum Warehousing Antitrust Litigation ("Aluminum I"), 90 F. Supp. 3d 219, 228 (S.D.N.Y. 2015)*. "***HN33***[]

Beech Aircraft established a four-factor test for evaluating whether [a court's exercise of] personal jurisdiction [over a defendant is proper] in such a scenario: (1) common ownership, (2) financial dependency, (3) the degree to which the parent interferes with the selection and assignment of executive personnel and fails to observe corporate formalities, and (4) the parent's degree of control over the marketing and operational policies of the subsidiary." *Id.* (citing *Jazini, 148 F.3d at 184*).

Plaintiffs have failed to make a prima facie showing as to any of these factors. ***HN34***[] In addition, the Supreme Court has observed that "[i]t is a general principle of corporate law deeply ingrained in our economic and legal systems that a parent corporation . . . is not liable for the acts of its subsidiaries." *United States v. Bestfoods, 524 U.S. 51, 61, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998)* (quotation omitted). Plaintiffs' attempt to circumvent this well-entrenched principle via an appeal to agency law is unconvincing. *See* *Schwab, 883 F.3d at 84* (finding that the requirements for personal jurisdiction **[**59]** were not met where a complaint impermissibly "collapses . . . two distinct Defendants—a parent and a wholly owned subsidiary—. . . into one"); *Aluminum I, 90 F. Supp. 3d at 238* ("It is commonplace for executives to hold several roles at several affiliated companies. But so long as separate corporate formalities are maintained, the mere fact that some employees of a parent are also officers of a subsidiary does not imply that the subsidiary is an agent of the parent."); *id. at 232* (website touting "global reach of a family of companies" insufficient where corporate formalities observed).

Plaintiffs also argue in support of their agency theory that "BASF Metals . . . advertised for precious metals trading positions in New Jersey." *Rule 12(b)(2)* Opp. at 9 (citing Ex. 1 to Declaration of Jay L. Himes in Support of Plaintiffs' Consolidated Opposition to Motions to Dismiss Pursuant to *Fed. R. Civ. P. 12(b)(2)* ("Himes Decl."), Dkt No. 214). This allegation is also insufficient to establish purposeful availment. Even assuming that BASF Metals' employment of a United-States-based trader would be sufficient to make a prima facie showing of purposeful availment with the United States (which the Court does not decide), the reference to BASF Metals in the job posting was "inadvertent" **[**60]** and the posting "was not filled." Declaration of Rachel Crowley, Dkt No. 221; *see also id.* ("If an individual had been hired to fill the position described in the Job Posting, the individual would have been an employee of BASF Corporation, not BASF Metals Ltd."). Similarly, Plaintiffs' attempt to point to LinkedIn profiles for "individuals who traded precious metals for BASF's U.S.-based affiliates during the class period" is unavailing. *Rule 12(b)(2)* Opp. at 9 (citing Exs. 2-3 to Himes Decl.). These traders did not work for BASF Metals because BASF Metals "does not have . . . employees in . . . the United States." Vergopouls Decl. ¶ 2. Hence, neither the job advertisement nor the LinkedIn profiles provide support for Plaintiffs' agency theory.

Accordingly, Plaintiffs have failed to make a prima facie showing that employees of Defendant BASF Metals were agents of BASF Corp. or BASF SE, and they have therefore failed to show that Defendant BASF Metals "purposefully availed itself of the privilege of doing business **[*322]** in the [United States] and could foresee being haled into court there." *Licci, 732 F.3d at 173*.

ii. Effects Test

Plaintiffs arguments that BASF Metals should be subject to personal jurisdiction under the effects test is **[**61]** similarly flawed. ***HN35***[] Under the effects test, "the exercise of personal jurisdiction may be constitutionally permissible if the defendant expressly aimed its conduct at the forum." *Id. at 173* (citing *Calder v. Jones, 465 U.S. 783, 789, 104 S. Ct. 1482, 79 L. Ed. 2d 804 (1983))*. "The fact that harm in the forum is foreseeable is insufficient for the purpose of establishing specific personal jurisdiction over a defendant." *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *42* (quoting *Waldman v. Palestine Liberation Org., 835 F.3d 317, 339 (2d Cir. 2016))* (alterations and quotation marks omitted).

Plaintiffs are unable to show any conduct by BASF Metals that was expressly aimed at the United States. Again, Plaintiffs have pleaded that BASF Metals conspired to manipulate the Fix and that BASF Corp. engaged in trading to profit from that illegal conduct in the United States. But Plaintiffs have not alleged that BASF Metals took any action that was expressly aimed at the United States. Plaintiffs argue that BASF Metals' "conduct was aimed directly *at* the U.S." because the conspiracy allegedly targeted NYMEX. *Rule 12(b)(2)* Opp. at 15. But that characterization is inaccurate: BASF Metals' conduct allegedly targeted the Fix, which occurred in London. ***HN36***[] Although it may have been foreseeable that this conduct would cause harm in the United States, "[m]ere foreseeability" is insufficient under the effects test. *Schwab, 883 F.3d at 87*. Hence, Plaintiffs **[**62]** have failed to make a prima facie showing of personal jurisdiction as to BASF Metals under the effects test.

b. ICBC Standard

The TAC fails to make a prima facie showing of personal jurisdiction as to ICBC Standard under the purposeful availment or effects test for much the same reasons as it failed to do so with respect to BASF Metals. The TAC alleges that ICBC Standard "is a banking and financial services company organized and existing under the laws of the United Kingdom." TAC ¶ 43. Plaintiffs allege that a different corporate entity, Standard Bank Group Limited, is "licensed by the New York Department of Financial Services with" headquarters located in New York City. *Id.* The TAC further alleges that a third entity, "ICBC"—which is the "corporate majority owner" of ICBC Standard, Declaration of Karen Florencio in Support of ICBC Standard Bank Plc's Motion to Dismiss the Third Consolidated Amended Class Action Complaint ("Florencio Decl."), Dkt No. 211, ¶ 11—"is also licensed by the New York Department of Financial Services" with headquarters located in New York City. TAC ¶ 43. However, much like BASF Metals, ICBC Standard has no employees in the United States. Florencio Decl. ¶ 9. **[**63]** The Court construes the TAC to allege that there were New-York-based platinum and palladium traders in both the physical and derivatives markets for affiliates or subsidiaries of ICBC Standard, although the TAC is not clear on this point.

Plaintiffs raise the same agency argument with respect to employees of ICBC Standard's affiliates and subsidiaries as they do with BASF Metals, and the result is the same. Plaintiffs have not alleged sufficient reason for the Court to disregard distinctions between distinct corporate entities. The Court need not repeat its analysis here. One allegation Plaintiffs raise that is specific to ICBC Standard is that Ludmila Fabianova, a "Senior Vice President" **[*323]** of "Precious Metals Sales" at ICBC Standard was listed as a "'USA'-based delegate" for a conference in Rome. *Rule 12(b)(2)* Opp. at 10 (citing Exs. 4 & 5 to Himes Decl.). But this listing is insufficient to support the inference that Ms. Fabianova did anything to contribute to the alleged conspiracy to manipulate the Fix price while in the United States. Accordingly, Plaintiffs have failed to make a prima facie showing of personal jurisdiction with respect to ICBC under the minimum contacts or effects test.

c. Conspiracy Jurisdiction [64]**

Plaintiffs have plausibly alleged that BASF Metals and ICBC Standard are subject to conspiracy jurisdiction. ***HN37***[] The Second Circuit has recently clarified that to "alleg[e] a conspiracy theory of jurisdiction: the plaintiff must allege that (1) a conspiracy existed; (2) the defendant participated in the conspiracy; and (3) a co-conspirator's overt acts in furtherance of the conspiracy had sufficient contacts with a state to subject that co-conspirator to jurisdiction in that state." *Schwab, 883 F.3d at 87* (citing *Unspam Techs., Inc. v. Chernuk, 716 F.3d 322, 329 (4th Cir. 2013))*.[24]

---

[24] Because Plaintiffs argued that conspiracy jurisdiction was proper under the New York long-arm statute, the Court offers an observation about the relationship between the requirements for conspiracy jurisdiction under that statute and the standard announced in *Schwab*. In its prior opinion, the Court held that "[t]he elements of conspiracy jurisdiction [under the New York long-arm statute] are that '(a) the defendant had an awareness of the effects in New York of its activity; (b) the activity of the co-conspirators in New York was to the benefit of the out-of-state conspirators; and (c) the co-conspirators acting in New York acted at the direction or under the control or at the request of or on behalf of the out-of-state defendant.'" *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *48* (quoting *Tarsavage v. Citic Trust Co., 3 F. Supp. 3d 137, 147 (S.D.N.Y. 2014))*. Although a defendant need not demonstrate a "formal agency relationship . . . between coconspirators," the third prong of this test is designed to capture "the traditional indicia of an agency relationship." ***Contant v. Bank of Am. Corp., 385 F. Supp. 3d 284, 292 n.2, 293 (S.D.N.Y. 2019)***. However, the Court recognizes that the requirements of conspiracy jurisdiction under New York law are unsettled. *See* ***id. at 292 n.2*** (noting that "an out-of-state defendant can be subject to personal jurisdiction in New York even without the traditional indicia of an agency relationship when that defendant 'has knowledge of the New York acts of

The Court concluded in its earlier opinion that Plaintiffs had plausibly alleged a conspiracy among Defendants. *See* Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *10-16. There is also no question that BASF Metals and ICBC Standard participated in the conspiracy as alleged. Thus, the contested issue is whether any United-States-based **[*324]** co-conspirators acted "in furtherance of the conspiracy[.]" Schwab, 883 F.3d at 87.

Schwab guides the Court's analysis of conspiracy jurisdiction. The *Schwab* court considered whether the court had personal jurisdiction over three categories of defendants. Most relevant here, *Schwab* considered claims of "non-seller defendants." Id. at 86 (capitalization altered). **[**65]** The only forum-related contact in which these defendants had engaged was the sale of securities in California. Id. at 86-87.[25] The *Schwab* court concluded that it could not exercise personal jurisdiction because the plaintiff's "pleading does not permit an inference that certain Defendants' sales in California were in furtherance of the conspiracy." Id. at 87. Although the plaintiff argued that "Defendants conspired not only to manipulate LIBOR, but also to earn profits from that manipulation," the Second Circuit held that "financial self-interest is not the same as furthering a conspiracy through California-directed sales, and nowhere in Schwab's complaint are there allegations that Defendants undertook such sales as part of the alleged conspiracy." *Id.* (quotation omitted). ***HN38***[] Thus, the teaching of *Schwab* is that the mere sale of financial instruments by a co-conspirator in a forum is insufficient to confer conspiracy jurisdiction in that forum, at least on the facts presented in that case.[26]

---

his co-conspirators.'" (quoting CPLR § 302 Practice Commentary C302:4 (2013) and citing Lawati v. Montague Morgan Slade Ltd., 102 A.D.3d 427, 961 N.Y.S.2d 5, 8 (1st Dep't 2013)). Still, the requirements for conspiracy jurisdiction announced in *Schwab* appear to be less demanding than those established under the New York long-arm statute. See In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR VIII"), 11 MDL 2262 (NRB), 2019 U.S. Dist. LEXIS 49700, 2019 WL 1331830 (S.D.N.Y. Mar. 25, 2019), at *11 (observing that "any discussion of conspiracy jurisdiction must be approached with caution" because "the state[] in which . . . the FDIC bring[s its] state law claim[] [*i.e.*, New York] . . . impose[s] more stringent requirements than the ones adopted by *Schwab*"). Conspiracy jurisdiction may thus be the rare issue where "the jurisdictional analysis under the New York long-arm statute" does not "closely resemble the analysis under the Due Process Clause of the Fourteenth Amendment." Licci, 673 F.3d at 61 n.11 (citation omitted). As noted above, because the Court concludes that Plaintiffs have adequately alleged the prerequisites for conspiracy jurisdiction with respect to the United States as a whole, it need not decide the relationship between the due process requirements for conspiracy jurisdiction and the requirements for conspiracy jurisdiction under the New York long-arm statute.

[25] California was "the relevant forum for jurisdictional purposes" in *Schwab*. 883 F.3d at 82 n.4.

[26] There is disagreement among district courts in this circuit over the precise holding of *Schwab*. The root of the disagreement centers on the motive of the conspiracy alleged in *Schwab*. In *Gelboim*—which involved the same conspiracy—the Second Circuit held that the allegations in that case "evince[d] a common motive to conspire" consisting of "increased profits and the projection of financial soundness[.]" 823 F.3d at 781-82 (quotation omitted). On remand, Judge Buchwald concluded that "[i]t is far from clear that *Gelboim* should be read to mean that plaintiffs have sufficiently alleged 'increased profits' as a goal independent of a conspiracy to 'project[] . . . financial soundness." LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *2 (citation omitted). Therefore, the *LIBOR VI* court concluded that United States-based trading was not within the scope of the "reputation-motivated," as opposed to a "profit-motivated," conspiracy. 2016 U.S. Dist. LEXIS 175929, [WL] at *8-9. This conclusion rested on the court's reasoning that a profit-motivated conspiracy was implausible because the *LIBOR VI* plaintiffs had alleged that the panel banks had colluded to suppress the LIBOR rate, but banks act as both borrowers and lenders. *See* 2016 U.S. Dist. LEXIS 175929, [WL] at *2-6. *Gelboim* itself noted that "common sense dictates that the Banks operated not just as borrowers but also as lenders in transactions that referenced LIBOR . . . It seems strange that this or that bank (or any bank) would conspire to gain, as a borrower, profits that would be offset by a parity of losses it would suffer as a lender" before concluding that it could not come to a firm conclusion on the question because "the record is undeveloped." 823 F.3d at 783. Judge Buchwald found the record sufficiently developed to dismiss the claims of a profit-motivated conspiracy as implausible. LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *3. Thus, Judge Buchwald concluded in *LIBOR VIII* that the allegation that Defendants had sold LIBOR-influenced securities in a forum was not an act "in furtherance of the conspiracy" because the sale of securities in the forum did not advance a reputation-motivated conspiracy. *See* 2019 U.S. Dist. LEXIS 49700, 2019 WL 1331830, at *4 ("[T]he conspiracy to manipulate LIBOR had nothing to do with' defendants' transactions with plaintiffs, because the sale of LIBOR-based instruments motivated by defendants' 'financial self-interest' could not have furthered their conspiracy to manipulate LIBOR." (quotation omitted)). The upshot of this reasoning is that *if* plaintiffs plausibly allege a profit-motivated conspiracy, then the mere sale of securities in a forum *can* constitute an act in furtherance of the conspiracy sufficient to confer jurisdiction. *See* FrontPoint Asian Event Driven Fund, L.P. v. Citibank, N.A., No. 16 Civ. 5263, 2018 U.S. Dist.

[*325] Here, however, Plaintiffs have alleged more than that co-conspirators **[**66]** sold platinum and palladium or platinum and palladium derivatives on an exchange. Plaintiffs allege that BASF Corp.'s "precious metals traders would update order information during the Fixing and provide this updated order information to BASF [Metals'] participant in the Fixing as the Fixing was conducted." TAC ¶ 38. Similarly, the TAC alleges that "New York-based precious metals traders [employed by a United States affiliate of ICBC Standard] would update order information during the Fixing and provide this updated order information to [ICBC Standard]'s participant in the Fixing as the Fixing was conducted." *Id.* ¶ 44.[27] Furthermore, the TAC alleges that the participants in the Fixing on behalf of Defendants BASF Metals and ICBC Standard were in "constant communication" with traders employed by United-States-based affiliates. *Id.* ¶ 38 (BASF Metals); *id.* ¶ 44 (ICBC Standard).

Hence, Plaintiffs plausibly plead actions by co-conspirators in the United States in furtherance of the conspiracy to manipulate the Fix price. The TAC alleges United-States based traders for affiliates of BASF Metals and ICBC Standard provided non-public client order information directly to Fixing participants. ***[**67]*** *Id.* ¶ 38. While the TAC does not precisely allege what BASF Metals' and ICBC Standard's participants in the Fixing did with this information, it is plausible to infer that they used the information provided by United-States-based traders to decide on the price at which they ultimately wanted the Fixing to settle. Thus, the TAC plausibly alleges that United-States-based co- **[*326]** conspirators acted in furtherance of the conspiracy to manipulate the Fix, and the Court has personal jurisdiction over both BASF Metals and ICBC Standard.

HN39[] The Court observes that the *Schwab* standard for conspiracy jurisdiction is extraordinarily broad. Indeed, under the *Schwab* standard, a court can exercise personal jurisdiction over a defendant based on the actions of a co-conspirator who is entirely unknown to that defendant.[28] *Cf. Contant, 385 F. Supp. 3d at 292 n.2* (observing that

---

*LEXIS 171999, 2018 WL 4830087, at *8 (S.D.N.Y. Oct. 4, 2018)* (concluding that "where the complaint plausibly alleges a profit-motive, as here, the U.S.-based trading is properly alleged to have been a part of the conspiracy and to be related to the overseas . . . jurisdiction").

At least one court disagrees with this interpretation of *Schwab*, however. In *Dennis*, the plaintiffs argued that certain "defendants marketed and sold BBSW-Based Derivatives in the United States." *343 F. Supp. 3d at 203* (cleaned up). The plaintiffs contended that "[t]hese transactions are sufficiently related to [their] claims . . . because they are the machinery through which Defendants committed a domestic per se antitrust violation by reaching into the forum to contract for price-fixed BBSW-Based Derivatives with U.S. investors." *Id.* (cleaned up). The plaintiffs argued that "the 'reputation-based' conspiracy alleged in *Charles Schwab* should be distinguished from the 'profit-motivated' conspiracy alleged here." *Id. at 205*. However, Judge Kaplan noted that in *Schwab* "the alleged conspiracy was undertaken both because 'by understating their true borrowing costs, Defendants were able to project an image of financial stability to investors who were sensitive to risks associated with major banks following the financial crisis that began in 2007' *and* because 'suppressing LIBOR . . . had the immediate effect of lowering Defendants' interest payment obligations on financial instruments tied to LIBOR." *Id.* (quoting *Schwab, 883 F.3d at 78*) (emphasis in *Dennis*) (alterations omitted). "Accordingly," the *Dennis* Court held, "the conspiracy to manipulate LIBOR alleged in *Charles Schwab* was indeed motivated in part by financial incentives." *Id.* And thus, Judge Kaplan held that *Schwab* "controls here and precludes a finding of personal jurisdiction—whether through the Foreign Defendants' direct transactions in BBSW-Based Derivatives with plaintiffs or through a conspiracy theory of jurisdiction—over plaintiffs' federal claims on the basis of the Foreign Defendants' transactions in BBSW-Based Derivatives in the United States." *Id. at 205-06*. Ultimately, as described at greater length below, the Court need not reach the issue of the precise holding of *Schwab* because the Court concludes that even if it defines Plaintiffs' alleged conspiracy narrowly—*i.e.*, as a conspiracy to manipulate the Fix price—Plaintiffs have sufficiently alleged in-forum conduct in furtherance of the conspiracy.

[27] The TAC names BASF Corporation as a co-conspirator but not as a defendant. It does not name ICBC's U.S. based affiliate as a co-conspirator. However, because the complaint alleges that Defendant ICBC has "New York-based precious metals traders," TAC ¶ 44, but ICBC has "[n]o employees . . . permanently located in the United States," Florencio Decl. ¶ 9, the Court construes the TAC to allege that employees of a United-States-based affiliate of ICBC Standard employed precious metals traders.

[28] Consider the following hypothetical. Imagine that, hoping to earn profits by trading abroad, Bank A conspired to manipulate the Fix price in London with Bank B. Imagine also that, entirely unbeknownst to Bank A, Bank B received information about platinum trading from a United States branch of Bank C. Under the *Schwab* standard, a United States court may have personal jurisdiction over Bank A based on the transmission of information from Bank C to Bank B— even though Bank A is not alleged to

under the New York long-arm statute, "an out-of-state defendant can be subject to conspiracy jurisdiction in New York" only if there are "traditional indicia of an agency relationship" or if the defendant "has knowledge of the New York acts of his co-conspirators") (quotation omitted). In addition, this standard may be in tension with the Supreme Court's holding in *Walden* ***[**68]*** *v. Fiore* that "the relationship [between the defendant and the litigation] must arise out of the contacts that the 'defendant *himself*' creates with the forum State." *571 U.S. 277, 284, 134 S. Ct. 1115, 188 L. Ed. 2d 12 (2014)* (quoting *Burger King Corp. v. Rudzewicz, 471 U.S. 462, 475, 105 S. Ct. 2174, 85 L. Ed. 2d 528 (1985))*; *see also id.* (noting that the Supreme Court has "consistently rejected attempts to satisfy the defendant-focused 'minimum contacts' inquiry by demonstrating contacts between . . . third parties . . . and the forum State") (citing *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 417, 104 S. Ct. 1868, 80 L. Ed. 2d 404 (1984))*. *But see Contant, 385 F. Supp. 3d at 293* (rejecting foreign defendants' argument that "an agency relationship between co-conspirators is necessary because personal jurisdiction cannot be based on the unilateral activity of a third party" because "a co-conspirator is no mere third party" and "conspiracy jurisdiction is best conceived of as an example of the well-established principle that 'a defendant's contacts with the forum State may be intertwined with his transactions or interactions with other parties'") (quoting *Walden, 571 U.S. at 286* (ellipsis omitted)).

It was in part because of the concerns outlined above that the Court observed in *Platinum I* that "[c]ourts have been increasingly reluctant to extend this theory of [conspiracy] jurisdiction beyond the context of New York's long-arm statute." *2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *49* (quoting **[**69]** *Laydon v. Mizuho Bank, Ltd., 12 CIV. 3419 GBD, 2015 U.S. Dist. LEXIS 44007, 2015 WL 1515358, at *3 (S.D.N.Y. Mar. 31,* ***[*327]*** *2015)* and citing *Aluminum I, 90 F. Supp. 3d at 227* ("The rules and doctrines applicable to personal jurisdiction are sufficient without the extension of the law to a separate and certainly nebulous 'conspiracy jurisdiction' doctrine."); *Tymoshenko v. Firtash, 11-CV-2794 (KMW), 2013 U.S. Dist. LEXIS 43543, 013 WL 1234943, at *3-4 (S.D.N.Y. Mar. 27, 2013)* (recognizing that conspiracy jurisdiction "has been widely criticized by courts and scholars" and declining to consider co-conspirators' contacts for the purpose of establishing personal jurisdiction over a foreign defendant). However, any doubts about the continued viability of conspiracy jurisdiction in the Second Circuit were resolved by *Schwab*. Therefore, the TAC has plausibly alleged that BASF Metals and ICBC Standard purposefully availed themselves of doing business in the United States as required by the minimum contacts prong of the due process analysis.

HN41[] Because the Court has concluded that Plaintiffs have adequately alleged that the Foreign Defendants have satisfied the first step of the personal jurisdiction analysis, it must "determine whether the assertion of personal jurisdiction would comport with fair play and substantial justice." *Schwab, 883 F.3d at 82* (citation and quotation marks omitted). "The Supreme Court has set forth five factors in considering **[**70]** the reasonableness of the forum[:] 'A court must consider [1] the burden on the defendant, [2] the interests of the forum State, and [3] the plaintiff's interest in obtaining relief. It must also weigh in its determination [4] the interstate judicial system's interest in obtaining the most efficient resolution of controversies; and [5] the shared interest of the several States in furthering fundamental substantive social policies.'" *FrontPoint, 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *7* (quoting *Asahi Metal Indus. Co. v. Super. Ct. of Cal., Solano Cty., 480 U.S. 102, 113, 107 S. Ct. 1026, 94 L. Ed. 2d 92 (1987))*. "[T]he 'primary concern' is 'the burden on the defendant.'" *U.S. Bank Nat'l Ass'n v. Bank of Am. N.A., 916 F.3d 143, 151 n.5 (2d Cir. 2019)* (quoting *Bristol-Myers Squibb Co. v. Super. Ct. of Cal., San Francisco Cty., 137 S. Ct. 1773, 1780, 198 L. Ed. 2d 395 (2017))*. "Where a defendant has purposefully directed its activities

---

have had any control over, or even to have known about, Bank C's communication. ***HN40***[] This hypothetical must be reconciled with the Supreme Court's admonition that the "exercise of jurisdiction comports with due process only if the defendant's conduct and connection with the forum is 'such that the defendant should reasonably anticipate being haled into court there.'" ***Contant, 385 F. Supp. 3d at 292*** (quoting *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 297, 100 S. Ct. 559, 62 L. Ed. 2d 490 (1980))*. Judge Schofield has reasoned that the *Schwab* standard can be reconciled with the Supreme Court's case law on specific jurisdiction by noting that "in any conspiracy, two or more entities that previously pursued their own interests separately are combining to act as one for their common benefit." *Id. at 293* (quoting *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))* (brackets omitted). In other words, two co-conspirators—even co-conspirators who were unaware of the existence of the other—may be viewed as a single entity for purposes of conspiracy jurisdiction.

at the forum state, it may still defeat jurisdiction on due process grounds. To do so, however, it 'must present a compelling case that the presence of some other considerations would render jurisdiction unreasonable.'" *Licci, 732 F.3d at 173* (quoting *Burger King, 471 U.S. at 477*).

Plaintiffs' allegations satisfy the reasonableness requirement in this case. The Foreign Defendants "are some of the world's largest financial institutions" and their affiliates "are alleged to have substantial presence in the U.S." *FrontPoint, 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *9*. "There is little burden in requiring them to answer the allegations that they entered into collusive transactions in the U.S." *Id.* Accordingly, the Court's **[**71]** exercise of personal jurisdiction over the Foreign Defendants would not be unreasonable. Thus, Plaintiffs have made a prima facie showing that the Court has personal jurisdiction over the Foreign Defendants, and the Foreign Defendants' motion to dismiss for lack of personal jurisdiction is denied.

C. Motion for Reconsideration

Plaintiffs' CEA claims are predominately foreign and are thus impermissibly extraterritorial. In *Platinum I*, the Court held that Plaintiffs' CEA claims were not extraterritorial. *See* *2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *26-28*. Defendants move for reconsideration of that holding based on the Second Circuit's decision in *Prime Int'l Trading, Ltd. v. BP P.L.C., 937 F.3d 94 (2d Cir.* ***[*328]*** *2019)*. For the reasons that follow, the Court agrees that *Prime International Trading* compels the conclusion that Plaintiffs' CEA claims are impermissibly extraterritorial.

1. Legal Standard

HN42[] Motions for reconsideration are governed by *Local Rule 6.3*, which provides that the moving party shall set forth "the matters or controlling decisions which counsel believes the Court has overlooked." "Motions for reconsideration are . . . committed to the sound discretion of the district court." *Immigrant Def. Project v. U.S. Immigration and Customs Enf't, No. 14-cv-6117 (JPO), 2017 U.S. Dist. LEXIS 74745, 2017 WL 2126839, at *1 (S.D.N.Y. May 16, 2017)* (citing cases). "Reconsideration of a previous order **[**72]** by the Court is an extraordinary remedy to be employed sparingly." *Ortega v. Mutt, No. 14-cv-9703 (JGK), 2017 U.S. Dist. LEXIS 72158, 2017 WL 1968296, at *1 (S.D.N.Y. May 11, 2017)* (quoting *Anwar v. Fairfield Greenwich Ltd., 800 F. Supp. 2d 571, 572 (S.D.N.Y. 2011))*. As such, reconsideration should be granted only when the moving party "identifies an intervening change of controlling law, the availability of new evidence, or the need to correct a clear error or prevent manifest injustice." *Robinson v. Disney Online, 152 F. Supp. 3d 176, 185 (S.D.N.Y. 2016)* (quoting *Kolel Beth Yechiel Mechil of Tartikov, Inc. v. YLL Irrevocable Tr., 729 F.3d 99, 104 (2d Cir. 2013))* (quotation marks omitted). Here, Defendants argue that the Second Circuit's decision in *Prime International Trading* is an intervening change of controlling law.

2. Application

Prime International Trading requires the Court reconsider its holding in *Platinum I* that Plaintiffs' CEA claims, as alleged, are not impermissibly extraterritorial. In *Platinum I*, the Court applied the two-step framework established by the Supreme Court in *Morrison v. National Australia Bank, Ltd., 561 U.S. 247, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010)*, to the question of whether Plaintiffs' CEA claims are extraterritorial. ***HN43***[] Under this framework, "[f]irst, unless Congress's intention to give a statute extraterritorial effect is 'clearly expressed,' courts 'must presume it is primarily concerned with domestic conditions.' In other words, 'when a statute gives no clear indication of an extraterritorial application, it has none.' Second, if a statute applies only domestically, **[**73]** a court must determine which domestic conduct it regulates." *Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *26* (quoting *Morrison, 561 U.S. at 265-67*) (brackets omitted).

In *Morrison*, the Supreme Court applied that two-step framework and "held that *§ 10(b) [of the Exchange Act*] only applies to 'transactions in securities listed on domestic exchanges and domestic transactions in other securities.

With regard to securities *not* registered on domestic exchanges, the exclusive focus is on *domestic* purchases and sales.'" *Id.* (quoting Morrison, 561 U.S. at 268) (other citation and alterations omitted). "Although *Morrison* did not further define a domestic transaction, the Second Circuit addressed that issue in Absolute Activist [Value Master Fund Ltd. v. Ficeto, 677 F.3d 60 (2d Cir. 2012)]. There, the Second Circuit held that 'transactions involving securities that are not traded on a domestic exchange are domestic if irrevocable liability is incurred or title passes within the United States.'" Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *26 (quoting Absolute Activist, 677 F.3d at 67).

The Second Circuit extended the *Absolute Activist* framework to the CEA in Loginovskaya v. Batratchenko, 764 F.3d 266 (2d Cir. 2014), such that "plaintiffs asserting CEA claims must 'demonstrate that the transfer of title or the point of **[*329]** irrevocable liability for such an interest occurred in the United States.'" Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *26 (quoting Loginovskaya, 764 F.3d at 274). Hence, in *Platinum I*, the Court concluded that the issue before it was whether "the transactions **[**74]** at issue here are 'domestic' within the meaning of *Morrison* and *Absolute Activist*." *Id.*

The Court also held that the Second Circuit's decision in Parkcentral Global Hub, Ltd. v. Porsche Automobile Holdings SE, 763 F.3d 198 (2d Cir. 2014) (per curiam), was not relevant to Plaintiffs' CEA claims. In *Parkcentral*, the Circuit held that "while a domestic transaction or listing is *necessary* to state a claim under § 10(b), a finding that these transactions were domestic would not *suffice* to compel the conclusion that the plaintiffs' invocation of § 10(b) was appropriately domestic." Id. at 216. Rather, the *Parkcentral* court held that even if the plaintiffs in that case had alleged a domestic transaction within the meaning of *Absolute Activist*, their claims were "so predominantly foreign as to be impermissibly extraterritorial." *Id.*

In considering whether *Parkcentral*'s requirement that a plaintiff's claims not be "predominately foreign" applied to CEA claims in *Platinum I*, the Court held that

> Defendants' reliance on *Parkcentral Global Hub, Ltd. v. Porsche Automobile Holdings SE* is unavailing. In *Parkcentral*, the Second Circuit applied the *Morrison* and *Absolute Activist* tests to claims under § 10(b) against foreign defendants for securities transactions relating to securities-based swap agreements pegged to the foreign **[**75]** defendants' stock value. The court held that allowing the claims to proceed "would constitute an impermissibly extraterritorial application of the statute." In so holding, the court expressly stated that its "ultimate conclusion that this suit seeks impermissibly to extend § 10(b) extraterritorially *depends in some part on the particular character of the unusual security at issue*." The court "expressed no view whether it would have reached the same result if the suit were based on different transactions." Courts in this district have declined to extend the *Parkcentral* analysis on that basis. For those reasons, the Court similarly declines to extend the *Parkcentral* holding to the transactions at issue in this action.

Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *27 n.13 (quoting Parkcentral, 763 F.3d at 201-02 and citing In re Poseidon Concepts Sec. Litig., No. 13-CV-1213 (DLC), 2016 U.S. Dist. LEXIS 68127, 2016 WL 3017395, at *12-13 (S.D.N.Y. May 24, 2016); Atlantica Holdings, Inc. v. BTA Bank JSC, No. 13-CV-5790 JMF, 2015 U.S. Dist. LEXIS 3209, 2015 WL 144165, at *8 (S.D.N.Y. Jan. 12, 2015)). Because it concluded that *Parkcentral*'s holding did not apply and that the transactions at issue were domestic, the Court held that "Plaintiffs' CEA claims d[id] not implicate an impermissible extraterritorial application of the statute." 2017 U.S. Dist. LEXIS 46624, [WL] at *28 (citation omitted).

The Court's holding in *Platinum I* that *Parkcentral* does not apply to Plaintiffs' CEA claims in this case is untenable after Prime International Trading ***[**76]*** . In *Prime International Trading*, the Second Circuit evaluated whether the plaintiffs' CEA claims were extraterritorial by applying *Morrison*'s two-step framework to section 22 of the CEA and two other CEA provisions. *See* Prime Int'l Trading, 937 F.3d at 104 ("Importantly, we must discern the 'focus' of each provision individually, for even if Plaintiffs satisfactorily pleaded a domestic application for one of the conduct-regulating provisions—i.e., Sections 6(c)(1) and 9(a)(2)—they must also do the same for the CEA's private right of action provision, Section 22." (citation omitted)). ***HN44***[] At the first step of the *Morrison* framework, **[*330]** the Second Circuit held that "since Section 22 of the CEA 'is silent as to extraterritorial reach,' suits funneled through this private right of action 'must be based on transactions occurring in the territory of the United States.'" Prime Int'l

Trading, 937 F.3d at 102-03 (quoting Loginovskaya, 764 F.3d at 272). At *Morrison*'s second step, the Circuit held that "in order for Plaintiffs to state a proper domestic application of Section 22, the suit 'must be based on transactions occurring in the territory of the United States.'" Id. at 104 (quoting Loginovskaya, 764 F.3d at 272). The *Prime International Trading* court noted that "[t]o assess whether Plaintiffs pleaded permissibly domestic transactions under Section 22[,] . . . typically we would apply a test first announced in *Absolute Activist*," **[**77]** as the Court did with the transactions at issue in this case in *Platinum I*. Id. at 104-05.

Rather than apply the *Absolute Activist* test, however, the Circuit applied *Parkcentral*'s holding to the CEA—effectively overruling the Court's decision not to do so in *Platinum I*. The Circuit held that it "need not decide definitively whether Plaintiffs' transactions satisfy *Absolute Activist*, for (as discussed below) their claims are impermissibly extraterritorial even if the transactions are domestic." Id. at 105 (citing Parkcentral, 763 F.3d at 216). It then noted that the *Parkcentral* court "assumed without deciding that the equity swaps at issue there were 'domestic transactions' under Section 10(b), but nonetheless dismissed the claims because the facts in that case rendered the suit 'predominately foreign.'" *Id.* (quoting Parkcentral, 763 F.3d at 216). The *Prime International Trading* court observed that "[t]he predicate to our conclusion in *Parkcentral* was the maxim that 'a domestic transaction or listing is *necessary*' but 'not alone sufficient' to state a claim under Section 10(b)." *Id.* (quoting Parkcentral, 763 F.3d at 215-16). The Second Circuit then held that this "rule carrie[d] over to the CEA." *Id.* **HN45**[] In other words, "while a domestic transaction as defined by *Absolute Activist* is 'necessary' to invoke the private remedy afforded **[**78]** by Section 22, it is not 'sufficient.'" Id. at 106.

HN46[] The *Prime International Trading* court explained that "[i]n order to close the gap between 'necessary' and 'sufficient,' Plaintiffs' claims must not be 'so predominately foreign as to be impermissibly extraterritorial.'" Id. at 106 (quoting Parkcentral, 763 F.3d at 216); *see also* id. at 105 ("To state a proper claim under Section 22, Plaintiffs must allege not only a domestic transaction, but also domestic—not extraterritorial—*conduct* by Defendants that is violative of a substantive provision of the CEA, such as Section 6(c)(1) or Section 9(a)(2).") (citation omitted).

On the facts presented in *Prime International Trading*, the Second Circuit concluded that the plaintiffs' CEA claims were "predominately foreign," and thus impermissibly extraterritorial, because the plaintiffs relied on an "attenuated 'ripple effects' theory whereby (1) the alleged manipulative trading activity taking place in the North Sea (2) affected Brent crude prices—a foreign commodity—which (3) affected a foreign benchmark, the Dated Brent Assessment, which (4) was then disseminated by a foreign price-reporting agency, which (5) was then allegedly used (in part) to price futures contracts traded on exchanges around the world." Id. at 106-07. The Circuit noted that "[n]early every **[**79]** link in Plaintiffs' chain of wrongdoing is entirely foreign." Id. at 107. Furthermore, the plaintiffs in *Prime International Trading* "ma[de] no claim that any manipulative oil trading occurred in the United States." Id. at 106.

[*331] **HN47**[] *Prime International Trading* teaches that to assess whether Plaintiffs have pleaded an appropriately domestic application of the CEA, the Court must assess whether Plaintiffs' CEA claims are predominately foreign. Plaintiffs assert multiple substantive CEA violations. *See* TAC ¶¶ 281, 286, 291, 294. **HN48**[] However, "Plaintiffs' suit must satisfy the threshold requirement of CEA § 22" ("Section 22"), which "gives Plaintiffs a private right of action" under the CEA,[29] before the Court can "reach[] the merits of their" substantive CEA claims. Prime Int'l Trading, 937 F.3d at 101 n.4, 104 (quotation and brackets omitted). Consequently, the Court "start[s] by assessing whether Plaintiffs have pleaded a proper domestic application of Section 22." Id. at 104.[30]

[29] *See* 7 U.S.C. § 25.

[30] **HN49**[] Although Plaintiffs' claim for principal-agent liability under the CEA does not expressly cite Section 22, both "principal-agent liability and aiding and abetting claims under the CEA . . . are viable only where an underlying primary violation of the CEA can survive a motion to dismiss." Sonterra Capital Master Fund, Ltd. v. Barclays Bank PLC, 366 F. Supp. 3d 516, 554 (S.D.N.Y. 2018) (citations omitted). Accordingly, the viability principal-agent liability claim also depends on whether Plaintiffs have pleaded an appropriately domestic application of Section 22.

Plaintiffs' Section 22 claims are predominately foreign.[31] Plaintiffs allege that Defendants manipulated the Fix, which occurred in London and set the price of physical platinum located in London or Zurich. TAC ¶¶ 51-53, 59. Moreover, as the Court noted in *Platinum I*, "[t]he alleged unlawful conduct in this case is the manipulation **[**80]** of the Fix Price that took place during the Fixing Calls" in London, "not manipulations of particular transactions on NYMEX." Platinum I, 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *45. Because *Prime International Trading* directs that the Court should direct its focus to where the allegedly unlawful manipulation occurred, *see* Prime Int'l Trading, 937 F.3d at 106, this weighs heavily in favor of the conclusion that Plaintiffs' claims are predominately foreign. **HN50**[] Furthermore, although Plaintiffs allege that they have suffered losses in the United States as a result of Defendants' manipulation, it has been clear since *Morrison* that an allegation that a foreign course of conduct has caused malign effects in the United States is not enough to salvage an otherwise extraterritorial claim. *See* Morrison, 561 U.S. at 259 (rejecting an "effects" test for extraterritoriality); *see also* Prime Int'l Trading, 937 F.3d at 106-07. Consequently, Plaintiffs' CEA claims are so predominately foreign as to be impermissibly extraterritorial.

This conclusion is bolstered by the attenuated causal linkage between Defendants' alleged conduct and Plaintiffs' alleged injury. The crux of Plaintiffs' theory is that Defendants caused them to suffer losses by manipulating the Fix because the Fix price is a global benchmark. *See* TAC ¶ 5 ("Because of the Fixing's importance **[**81]** as a benchmark, as the Fix prices move, so too do the prices for physical platinum and palladium and NYMEX platinum and palladium futures and options[.]"); *id.* ¶ 91 ("Defendants seized upon the Fixing as a means to manipulate . . . NYMEX Platinum and Palladium prices because Fix prices are used as benchmarks."). The plaintiffs in *Prime International Trading* made virtually the same argument. *See* Prime Int'l Trading, 937 F.3d at 100 (noting that the plaintiffs in that case argued **[*332]** that there was a "'direct link' between Brent Futures settlement prices and the Dated Brent Assessment. Specifically, they contend that the 'ICE Brent Futures Contracts prices rarely deviate from the Dated Brent Assessment by more than 1% at expiration,' and that 'changes in the Dated Brent Assessment directly impact Brent Futures prices'") (brackets omitted). Yet the *Prime International Trading* court rejected those plaintiffs' claims as an "attenuated 'ripple effects' theory[.]" Id. at 106. There is no meaningful distinction between the theory of harm rejected in *Prime International Trading* and Plaintiffs' theory of harm in this case. Thus, this is an independent reason that the Circuit's decision in *Prime International Trading* case compels the conclusion **[**82]** that Plaintiffs' CEA claims are impermissibly extraterritorial.

Plaintiffs' arguments to the contrary are unavailing. Plaintiffs first argue that the TAC alleges that "Defendants' precious metals traders in" the United States "were in 'constant communication' with Defendants' precious metals desk employees in London," who were directly involved in the twice-a-day Fixings. Opposition to Motion for Reconsideration ("MR Opp."), Dkt No. 237, at 4 (citing TAC ¶¶ 10, 13, 26 38, 49). This is, to be sure, an allegation of domestic activity, but "the presumption against extraterritorial application would be a craven watchdog indeed if it retreated to its kennel whenever *some* domestic activity is involved in the case." Morrison, 561 U.S. at 266. The allegation that United-States-based traders communicated with the Fixing participants to further the scheme to manipulate the Fix price only serves to highlight that the locus of the manipulative scheme was the Fixing itself, which was located in London. Moreover, the Fixing directly set prices in the spot markets for physical platinum and palladium, which are located in London and Zurich. *See, e.g.*, TAC ¶ 59. At bottom, the inquiry called for in *Parkcentral* and applied to **[**83]** the CEA in *Prime International Trading* is whether a plaintiff's claims are "predominately"—not exclusively—"foreign," and Plaintiffs' allegations regarding communications from United-States-based traders do not predominate over their allegations of foreign misconduct. Prime Int'l Trading, 937 F.3d at 106. Therefore, these allegations are insufficient to render Plaintiffs' claims not predominately foreign.

Plaintiffs also seek to recharacterize the allegations in the TAC to argue that United States-based trading in the physical platinum and palladium market and on the NYMEX was part of Defendants' manipulative scheme itself, not simply a means by which Defendants profited from the manipulation. *See* MR Opp. at 9 n.5. This argument is implausible. Plaintiffs' theory is that Defendants manipulated the price of platinum and palladium to profit from their

[31] Because the Court concludes that Plaintiffs' Section 22 claims are predominately foreign, it does not decide whether Plaintiffs have pleaded an appropriately domestic application of other CEA provisions.

short positions. *See, e.g.*, TAC ¶ 14 ("The Defendants profited because they were holders of massive short positions in NYMEX platinum and palladium futures and options."). The suggestion that Defendants (and, perhaps, their non-defendant co-conspirators) traded to further depress the price of platinum and palladium when they had—according to Plaintiffs' allegations—a tailor-made opportunity **[**84]** to manipulate that price via the Fixing does not make sense and is inconsistent with the allegations in the TAC. Hence, to the extent that the TAC can be read to support Plaintiffs' novel theory, the Court rejects it as implausible. Accordingly, Defendants' motion for reconsideration is granted as to Plaintiffs' CEA claims; those claims are dismissed without prejudice.

D. Leave to Amend

Because the Court has dismissed Plaintiffs' Sherman Act and CEA claims, there **[*333]** are no remaining claims in this case. ***HN51***[] However, although Plaintiffs have twice amended their complaint in response to Defendants' motions to dismiss, in this circuit, "[i]t is the usual practice upon granting a motion to dismiss to allow leave to replead." *Cortec Indus., Inc. v. Sum Holding L.P., 949 F.2d 42, 48 (2d Cir. 1991)* (citation omitted); *see also* *Fed. R. Civ. P. 15(a)(2)* ("The court should freely give leave [to amend] when justice so requires."). Leave may be denied "for good reason, including futility, bad faith, undue delay, or undue prejudice to the opposing party." *TechnoMarine SA v. Giftports, Inc., 758 F.3d 493, 505 (2d Cir. 2014)* (citation omitted). Thus, the Court will grant Plaintiffs leave to amend once again. However, Plaintiffs should not expect any additional opportunities to amend their complaint. *See In re Initial Pub. Offering Sec. Litig., 241 F. Supp. 2d 281, 397 (S.D.N.Y. 2003)* ("[W]here pleading deficiencies have been identified a number **[**85]** of times and not cured, there comes a point where enough is enough."(citations omitted)). Any amended complaint must be filed no later than **May 1, 2020**.

Discovery in this action is stayed pursuant to the Court's April 21, 2015, order. Dkt. No. 48. Discovery in this action will remain stayed until the deadline for Defendants to answer or otherwise respond to an amended complaint. If Plaintiffs amend the TAC, and Defendants move to dismiss Plaintiffs' amended complaint, the parties may file a new motion for a stay of discovery no later than **June 1, 2020**. If Plaintiffs do not amend the TAC, or if Defendants do not file a motion to stay by the deadlines specified above, the Court will schedule a *Rule 16* conference promptly thereafter.

III. CONCLUSION

For the foregoing reasons, Defendants' motion to dismiss for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)* is GRANTED, the Foreign Defendants' motion to dismiss for lack of personal jurisdiction under *Federal Rule of Civil Procedure 12(b)(2)* is DENIED, and Defendants' motion for reconsideration is GRANTED. Plaintiffs are granted leave to replead their Sherman Act and CEA claims.

The Clerk of Court is directed to terminate the motions pending at Dkt Nos. 207 and 235.

SO ORDERED.

Opinion

[*709] **MEMORANDUM OPINION & ORDER**

Like several other Texas cities, the City of Dallas has enacted an ordinance requiring employers to provide paid sick leave to most employees working within the Dallas **[*710]** city limits. Plaintiffs, the State of Texas and two Collin County headquartered employers with employees who work in Dallas, ESI/Employee Solutions, L.P. ("ESI") and Hagan Law Group, L.L.C. ("Hagan"), assert that the Dallas paid sick leave ordinance runs afoul of both the federal and state constitutions and is therefore unenforceable.[1]

Before the Court is a Motion to Dismiss filed by Defendants City of Dallas, T.C. Broadnax, and Beverly Davis (collectively, "the City"), (Dkt. #36), and Employer-Plaintiffs' Motion for Preliminary Injunction, (Dkt. #3), joined by the State of Texas, (Dkt. #21). The City has moved to dismiss Plaintiffs' claims under *Federal Rule of Civil Procedure 12(b)(1)* and *Rule 12(b)(6)*. (Dkt. #36). The State of Texas and the Employer-Plaintiffs' motion for preliminary injunction requests that the Court issue an injunction to halt the enforcement of the City's Paid **[**3]** Sick Leave Ordinance until an ultimate ruling on the merits is made.

The Court, having considered the motion to dismiss, response, reply, and applicable law, **GRANTS in part** and **DENIES in part** the motion. (Dkt. #36).[2] The Court further **GRANTS** the Plaintiffs' motion for preliminary injunction. (Dkt. #3, #21).[3]

I. BACKGROUND

A. The City's Paid Sick Leave Ordinance

On April 24, 2019, the City enacted the Paid Sick Leave Ordinance (the "Ordinance"). Dallas, Texas, Ordinance No. 31181; Municipal Code § 20-1-20-12. The Ordinance, which became effective for "medium or large employers" on August 1, 2019, and will become effective for "small employers" on August 1, 2021, requires employers to grant one hour of paid sick leave for every thirty hours worked by an employee within Dallas, regardless of the employer's location.[4] Dall. City Code § 20-4(a)-(b).

The Ordinance allows employees working in Dallas to earn up to sixty-four hours of sick leave time per year for medium or **[*711]** large employers and forty-eight hours of sick leave time per year for small employers. *Id.* § 20-4(c)(1)-(2). Employees under a collective bargaining agreement, however, may bargain to modify the yearly cap. *Id.* § 20-4(e). When an employee uses accrued paid sick leave **[**4]** time, employers are directed to pay employees

---

[1] ESI and Hagan will sometimes be collectively referenced herein as the "Employer-Plaintiffs."

[2] The Employer-Plaintiffs have made hearsay and relevance objections to Defendants' Exhibit 2 under *Federal Rules of Evidence 802*, *401*, and *403*. (Dkt. #48 at 27). Defendants' Exhibit 2 consists of the Dallas City Council agenda and minutes from the meeting at which the Ordinance was passed. As this evidence does not support the *Rule 12(b)(1)* portion of the City's motion to dismiss, and the Court does not consider matters beyond the complaint in reviewing a 12(b)(6) motion to dismiss, the Court did not consider Exhibit 2. *See* *Baker v. Putnal, 75 F.3d 190, 196 (5th Cir. 1996)* ("[T]he court may not look beyond the pleadings in ruling on [a *Rule 12(b)(6)*] motion."). The Employer-Plaintiffs' objections to Exhibit 2 are, therefore, overruled as moot.

[3] The Employer-Plaintiffs make several objections in their reply to evidence Defendants offer in support of their response, including that such evidence is hearsay, unauthenticated, and irrelevant. (Dkt. #24). These objections are overruled. *See* *Sierra Club, Lone Star Chapter v. F.D.I.C., 992 F.2d 545, 551 (5th Cir. 1993)* ("[A]t the preliminary injunction stage, . . . the district court may rely on otherwise inadmissible evidence, including hearsay evidence."); *Fed. Sav. & Loan Ins. Corp. v. Dixon, 835 F.2d 554, 558 (5th Cir. 1987)* (citing *Univ. of Tex. v. Camenisch, 451 U.S. 390, 395, 101 S.Ct. 1830, 68 L.Ed.2d 175 (1981))* ("[A] preliminary injunction proceeding is not subject to jury trial procedures."). In any event, the Court did not rely on the objected-to materials in reaching its decision.

[4] The Ordinance defines a "medium or large employer" as "an employer with more than 15 employees at any time in the preceding 12 months, excluding the employer's family members." Dall. City Code § 20-2(8). A "small employer" is "any employer that is not a medium or large employer." *Id.* § 20-2(11).

their normal rate, exclusive of overtime premiums, tips, and commissions, for each hour the employee is absent from work for reasons that are authorized under the Ordinance. *Id.* § 20-5(a). Authorized reasons include absence arising from mental or physical illness and preventative care for the employee or their family members. *Id.* § 20-5(c).

In addition to granting sick leave time, the Ordinance also contains reporting and notice requirements for employers. *Id.* § 20-7. Among those requirements are physical notices of rights and remedies under the Ordinance on signage and in an employee handbook, where one exists. *Id.* § 20-7(b), (e). The employer must also track and report the number of sick leave hours available to each employee in writing on no less than a monthly basis, *id.* § 20-7(a), as well as maintain logs of the hours accrued, used, and available for each employee, *id.* § 20-7(d).

The Ordinance authorizes the City to conduct investigations, triggered by employee complaints, to assess employer compliance. Such investigations may include the use of administrative subpoenas to compel witness attendance or material and document production. *Id.* § 20-10(a)-(b). Violations of any portion of the Ordinance will **[**5]** result in a fine. *Id.* § 20-11(a). However, aside from claims of retaliation under section 20-8, the City will not begin to assess penalties for Ordinance violations against medium or large employers until April 1, 2020, and will not assess any penalties, including retaliation claims, against small employers until April 1, 2021. *Id.* § 20-11(c).

B. The Employer-Plaintiffs and the State of Texas Challenge the Enforceability of the Ordinance

Shortly before the Ordinance became effective, Employer-Plaintiffs ESI and Hagan filed this lawsuit, arguing that the Ordinance violates both the United States Constitution and the Texas Constitution and is, therefore, unenforceable. ESI is a Texas corporation, headquartered in Plano, Texas, that provides temporary staffing in various industries. ESI employs over 300 temporary employees within the City of Dallas at any given time. Hagan is a Texas corporation, based in Allen, Texas, that provides legal counseling and representation to employers and executives in various industries located in Texas. Hagan currently employs one attorney who works full time from home within the City of Dallas.

The Employer-Plaintiffs claim that the Ordinance violates their *Fourth Amendment* right to be free from unreasonable **[**6]** searches and seizures, their *Fourteenth Amendment* right to equal protection under the laws, and both their own and their employees' *First Amendment* right to freedom of association. The Employer-Plaintiffs further allege that the Ordinance is preempted by the *Texas Minimum Wage Act ("TMWA")* and, therefore, violates the Texas Constitution. The Employer-Plaintiffs have requested declaratory and injunctive relief, including a preliminary injunction barring the enforcement of the Ordinance pending a final ruling on the merits. The State of Texas has joined the suit, but it seeks declaratory and injunctive relief only on the claim that the Ordinance is preempted by the TMWA and therefore contravenes the Texas Constitution. The Employer-Plaintiffs filed a preliminary **[*712]** injunction motion, which was later joined by the State.

The City has filed a motion to dismiss all claims made by Plaintiffs under *Federal Rule of Civil Procedure 12(b)(1)* (lack of subject matter jurisdiction) and *Rule 12(b)(6)* (failure to state a claim). The City contends that the Employer-Plaintiffs do not have standing to challenge the Ordinance on *First Amendment* grounds either on their own behalf or on behalf of their employees. Further, the City claims that Plaintiff Hagan does not have standing to bring any claim because **[**7]** enforcement of the Ordinance as to Hagan is too remote in time. The City also claims that all Plaintiffs have failed to state a claim as to each of the federal and state constitutional challenges, and that they have likewise failed to adequately plead municipal liability under *Monell v. Department of Social Services of the City of New York, 436 U.S. 658, 98 S.Ct. 2018, 56 L.Ed.2d 611 (1978)*. Lastly, the City asks the Court, in the alternative, to decline supplemental jurisdiction over Plaintiffs' claim that the Ordinance is preempted by the TMWA under state law.

II. MOTION TO DISMISS UNDER *RULE 12(b)(1)*

The City's *Rule 12(b)(1)* motion challenges (1) the Employer-Plaintiffs' standing to bring a claim under the *First Amendment* on their own behalf and on behalf of their employees, and (2) Hagan's standing to bring any claim with respect to the Ordinance. Because courts must generally address jurisdiction before reaching the merits, the Court will address these questions of standing first. *See* Steel Co. v. Citizens for a Better Env't, 523 U.S. 83, 94, 118 S.Ct. 1003, 140 L.Ed.2d 210 (1998) (quoting Ex parte McCardle, 74 U.S. 506, 7 Wall. 506, 514, 19 L.Ed. 264 (1868)) ("Without jurisdiction, the court cannot proceed at all in any cause." (internal quotation marks omitted)).

A. Rule 12(b)(1) Legal Standards

"'Federal courts are courts of limited jurisdiction,' possessing 'only that power authorized by Constitution and statute.'" Gunn v. Minton, 568 U.S. 251, 256, 133 S.Ct. 1059, 185 L.Ed.2d 72 (2013) (quoting Kokkonen v. Guardian Life Ins. Co. of Am., 511 U.S. 375, 377, 114 S.Ct. 1673, 128 L.Ed.2d 391 (1994)). A federal court has original jurisdiction to hear a suit when it is asked to adjudicate **[**8]** a case or controversy that arises under federal question or diversity jurisdiction. U.S. CONST., art. III, § 2, cl.1; 28 U.S.C. §§ 1331-32. Courts have "an independent obligation to determine whether subject-matter jurisdiction exists . . . ." Arbaugh v. Y&H Corp., 546 U.S. 500, 514, 126 S.Ct. 1235, 163 L.Ed.2d 1097 (2006). However, a defendant may also challenge the court's subject matter jurisdiction by filing a motion to dismiss under Federal Rule of Civil Procedure 12(b)(1).

A Rule 12(b)(1) challenge to the court's subject matter jurisdiction to hear a claim may address the sufficiency of the facts pleaded in the complaint (a "facial" attack) or may challenge the accuracy of the facts underpinning the claimed federal jurisdiction (a "factual" attack). *See* King v. U.S. Dep't of Veteran's Affairs, 728 F.3d 410, 413 (5th Cir. 2013) (quoting Ramming v. United States, 281 F.3d 158, 161 (5th Cir. 2001)) (noting that subject matter jurisdiction is amenable to a facial or factual attack). "An attack is 'factual' rather than 'facial' if the defendant 'submits affidavits, testimony, or other evidentiary materials'" to controvert subject matter jurisdiction. Superior MRI Servs., Inc. v. Alliance Healthcare Servs., Inc., 778 F.3d 502, 504 (5th Cir. 2015) (quoting Paterson v. Weinberger, 644 F.2d 521, 523 (5th Cir. 1981)).

[*713] When, as here, a defendant contests the facial sufficiency of the facts pleaded in the complaint to confer jurisdiction, those facts are entitled to a presumption of truth. *See* Ass'n of Am. Physicians & Surgeons, Inc. v. Tex. Med. Bd., 627 F.3d 547, 553 (5th Cir. 2010) (accepting material allegations in the complaint as true when subject matter jurisdiction was challenged on the basis of the pleadings); Williamson v. Tucker, 645 F.2d 404, 412 (5th Cir. 1981) (noting that the court **[**9]** "must consider the allegations in the plaintiff's complaint as true" if a Rule 12(b)(1) motion is based on the face of the complaint). However, a legal conclusion "couched as a factual allegation" is not entitled to the same presumption of truth. Alfred v. Harris Cty. Hosp. Dist., 666 F. App'x 349, 352 (5th Cir. 2016) (quoting Machete Prods., L.L.C. v. Page, 809 F.3d 281, 287 (5th Cir. 2015)) (per curiam) (unpublished). If the facts as pleaded are sufficient to confer jurisdiction, then a Rule 12(b)(1) motion will not succeed. Paterson, 644 F.2d at 523.

B. Discussion

1. Hagan's standing to bring a claim

The City has moved to dismiss Employer-Plaintiff Hagan's claims for lack of subject matter jurisdiction. Because the Ordinance does not go into effect as to Hagan until August 2021, the City asserts that any injury Hagan alleges based on the Ordinance's enactment is too remote and speculative to appropriately adjudicate at this time. The City, therefore, asks the Court to find that Hagan does not have standing to bring a claim under the Ordinance and to dismiss Hagan's claims for lack of subject matter jurisdiction. The Employer-Plaintiffs argue in response that Hagan's injuries are not remote or speculative because Hagan is indisputably an object of the Ordinance's regulation and will have to take action and expend money to comply with the Ordinance's mandates before it **[**10]** goes into effect.

To allege facts sufficient to establish standing, a plaintiff must show "(1) an injury in fact, (2) a sufficient causal connection between the injury and the conduct complained of, and (3) a likel[ihood] that the injury will be redressed by a favorable decision." *Susan B. Anthony List v. Driehaus, 573 U.S. 149, 157-58, 134 S.Ct. 2334, 189 L.Ed.2d 246 (2014)* (quoting *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61, 112 S.Ct. 2130, 119 L.Ed.2d 351 (1992))* (internal quotation marks omitted) (alteration in original). An injury satisfies Article III requirements when it is concrete, particularized, and actual or imminent. *Clapper v. Amnesty Int'l USA, 568 U.S. 398, 408, 133 S.Ct 1138, 185 L.Ed.2d 264 (2013)*.

In an action brought under the *Declaratory Judgment Act*, as here, the standing requirement can be met by establishing "actual present harm or a significant possibility of future harm," *Bauer v. Texas, 341 F.3d 352, 357-58 (5th Cir. 2003)* (quoting *Peoples Rights Org. v. City of Columbus, 152 F.3d 522, 527 (6th Cir. 1998))*, "even though the injury-in-fact has not yet been completed," *id.* (quoting *Nat'l Rifle Ass'n of Am. v. Magaw, 132 F.3d 272, 280 (6th Cir. 1997))*. The Supreme Court has stated that "[a]n allegation of future injury may suffice if the threatened injury is 'certainly impending,' or there is a 'substantial risk' that the harm will occur." *Susan B. Anthony List, 573 U.S. at 157-58* (quoting *Clapper, 568 U.S. at 414 n.5*). Further, a plaintiff can "bring a preenforcement suit when he 'has alleged an intention to engage in a course of conduct arguably affected with a constitutional interest, but proscribed by a statute, and there exists a credible threat of prosecution thereunder.'" **[**11]** *Id. at 160* **[*714]** (quoting *Babbitt v. United Farm Workers Nat'l Union, 442 U.S. 289, 298, 99 S.Ct. 2301, 60 L.Ed.2d 895 (1979))*.

Here, Hagan asserts that it will imminently suffer harm by being forced to act in a financially detrimental way to become compliant with the Ordinance. While the Ordinance states that employees of small employers like Hagan will not begin accruing sick leave time and the City will not begin assessing penalties until August 1, 2021, Hagan must act prior to that time to become compliant. For example, Hagan must procure new software to accommodate tracking requirements, among other things, in preparation for the day the Ordinance becomes enforceable against it.

The City argues that, prior to the Ordinance becoming enforceable, circumstances may change so that Hagan may no longer be subject to the Ordinance. Such speculation fails to address the substance of Hagan's contention: under current circumstances the Ordinance requires Hagan to take action in order to become compliant. Thus, Hagan's injury is "certainly impending" and it has standing to challenge the Ordinance.[5]

For these reasons, the City's *Rule 12(b)(1)* motion to dismiss Hagan's claims for lack of subject matter jurisdiction is DENIED.

2. The Employer-Plaintiffs' standing to bring a claim under the *First Amendment* on their own behalf

---

[5] For the same reasons, Hagan's claims are also ripe for review. Unlike standing, the doctrine of ripeness does not speak to who may sue, but instead *when* a claim may be brought. *Thomas v. Union Carbide Agr. Prods. Co., 473 U.S. 568, 580, 105 S.Ct. 3325, 87 L.Ed.2d 409 (1985)* (quoting *Blanchette v. Conn. Gen. Ins. Corps., 419 U.S. 102, 140, 95 S.Ct. 335, 42 L.Ed.2d 320 (1974))*. "Ripeness 'requir[es] us to evaluate both the fitness of the issues for judicial decision and the hardship to the parties of withholding court consideration.'" *Texas v. United States, 523 U.S. 296, 300-01, 118 S.Ct. 1257, 140 L.Ed.2d 406 (1998)* (quoting *Abbott Labs. v. Gardner, 387 U.S. 136, 149, 87 S.Ct. 1507, 18 L.Ed.2d 681 (1967))* (alteration in original).

The City argues that Hagan will not suffer hardship if the issues are not adjudicated at this time because the Ordinance is not yet enforceable as to small employers. *See* Dall. City Code § 20-4(b). But "[t]he Supreme Court has found hardship to inhere in legal harms," specifically, in the "harm of being 'force[d] . . . to modify [one's] behavior in order to avoid future adverse consequences.'" *Texas v. United States, 497 F.3d 491, 499 (5th Cir. 2007)* (quoting *Ohio Forestry Ass'n v. Sierra Club, 523 U.S. 726, 734, 118 S.Ct. 1665, 140 L.Ed.2d 921 (1998))* (alteration in original). Because Hagan has shown that it will imminently suffer harm by being forced to act in a financially detrimental way to become compliant with the Ordinance now, its claims are ripe for adjudication.

The City **[**12]** claims that the Employer-Plaintiffs do not have standing to bring a *First Amendment* claim on their own behalf. The Employer-Plaintiffs allege that section 20-4(e) of the Ordinance infringes on their *First Amendment* right to freedom of association. Section 20-4(e) allows employers operating under a collective bargaining agreement to modify the yearly cap on sick leave time. It is undisputed that section 20-4(e) effectively exempts "unionized" employers from the Ordinance because the cap can be bargained down to zero. The Employer-Plaintiffs contend that affording this potential exemption only to unionized employers impermissibly coerces non-unionized employers to give up their constitutionally protected right to refrain from associating with a union. In response, the City argues that the Employer-Plaintiffs have no right or ability to be unionized and, therefore, do not have standing to bring a *First Amendment* claim on that ground. Accordingly, the City asks the Court to dismiss the Employer-Plaintiffs' **[*715]** *First Amendment* claim for lack of standing under *Rule 12(b)(1)*. Because this question properly goes to the merits of the Employer-Plaintiffs' claim rather than to their standing to bring it, the Court DENIES the City's *Rule 12(b)(1)* motion as to the Employer-Plaintiffs' *First Amendment* claim brought on their own behalf.

It is well **[**13]** established that an attack on the validity of a claim does not call into question the court's authority to decide it. *See* *Steel Co., 523 U.S. at 89* ("[T]he absence of a valid (as opposed to arguable) cause of action does not implicate subject-matter jurisdiction, *i.e.*, the courts' statutory or constitutional *power* to adjudicate the case."(emphasis in original)). Instead, a court has jurisdiction where "the right of the petitioners to recover under their complaint will be sustained if [the laws] are given one construction and will be defeated if they are given another[.]" *Bell v. Hood, 327 U.S. 678, 685, 66 S.Ct. 773, 90 L.Ed. 939 (1946)*. Only when a claim is "immaterial and made solely for the purpose of obtaining jurisdiction or where such a claim is wholly insubstantial and frivolous" is it appropriate to dismiss for lack of subject matter jurisdiction. *Steel Co., 523 U.S. at 89* (quoting *Bell, 327 U.S. at 682-83*).

The City claims that the Employer-Plaintiffs have no right to unionize and, therefore, lack standing to bring a *First Amendment* claim against the City for infringing upon that right. Not so. Such an argument makes the precise error *Steel Co.* cautions against. Although a business's right to unionize or refrain from unionizing has not been explicitly recognized, the contention that it exists is by no means a frivolous claim **[**14]** nor is it patently foreclosed. *See* *Janus v. Am. Fed'n of State, Cty., & Mun. Emps., Council 31, ___ U.S. ___, 138 S.Ct. 2448, 2463, 201 L.Ed.2d 924 (2018)* ("The right to eschew association for expressive purposes is likewise protected."); *Citizens United v. Fed. Election Comm'n, 558 U.S. 310, 342, 130 S.Ct. 876, 175 L.Ed.2d 753 (2010)* (recognizing that "*First Amendment* protection extends to corporations"); *Mote v. Walthall, 902 F.3d 500, 507 (5th Cir. 2018)* (quoting *Prof'l Ass'n of Coll. Educators, 730 F.2d 258, 262 (5th Cir. 1984))* ("[P]rotected *First Amendment* rights flow to unions as well as to their members and organizers." (internal quotation marks omitted)). Accordingly, an argument centered on whether a business holds a right to unionize in the context of this challenge is properly made on the merits and is not so "insubstantial and frivolous" that it implicates standing.

The Employer-Plaintiffs have sufficiently alleged Article III standing. Their pleadings allege an injury in fact by asserting that the Employer-Plaintiffs' right to freedom of association has been infringed by the enactment of the Ordinance. Specifically, the Employer-Plaintiffs claim that section 20-4(e) impermissibly coerces them to give up their right to refrain from associating with a union. This alleged harm will be redressed if the Ordinance is enjoined. As the Employer-Plaintiffs have made sufficient allegations to justify Article III standing to bring a *First Amendment* claim on their own behalf, the City's *Rule 12(b)(1)* motion to dismiss this claim is DENIED.

3. The Employer-Plaintiffs' third-party standing [**15] to bring a *First Amendment* claim on behalf of their employees

The Employer-Plaintiffs also seek to vindicate their employees' *First Amendment* right to freedom of association, again challenging section 20-4(e) of the Ordinance. **[*716]** The Employer-Plaintiffs maintain that their employees are harmed by the inability of the Employer-Plaintiffs to have the same flexibility as a unionized workplace to modify the yearly cap on sick leave time imposed by the Ordinance. According to the Employer-Plaintiffs, this lack of flexibility will result in the reduction of other benefits currently enjoyed by their employees.

The City contends that the Employer-Plaintiffs have failed to plead any basis for third-party standing to raise First Amendment claims on behalf of their employees. The City further asserts that, even if the Employer-Plaintiffs had pleaded third-party standing, there is no basis for allowing the Employer-Plaintiffs to bring claims on behalf of their employees in this case. Specifically, the City argues that the Employer-Plaintiffs and their employees do not have the type of relationship that would allow for third-party standing because, in the context of unionization issues, the nature of the employer-employee relationship is necessarily adverse. **[**16]** The City further argues that non-unionized employees are not injured by the Ordinance. Although the Court disagrees with the City's reasoning, it concludes that the Employer-Plaintiffs lack third-party standing to assert their employees' First Amendment rights. The City's Rule 12(b)(1) motion to dismiss the Employer-Plaintiffs' First Amendment claim purportedly brought on behalf of their employees is therefore GRANTED.

In addition to constitutional standing requirements under Article III, the Supreme Court has established prudential constraints that are "judicially self-imposed limits on the exercise of federal jurisdiction." *Elk Grove Unified Sch. Dist. v. Newdow, 542 U.S. 1, 11, 124 S.Ct. 2301, 159 L.Ed.2d 98 (2004)*. These prudential constraints require the court to refrain from adjudicating claims that allege generalized grievances or assert the rights of third parties, even if Article III requirements are otherwise met. *Warth v. Seldin, 422 U.S. 490, 498-99, 95 S.Ct. 2197, 45 L.Ed.2d 343 (1975)* (noting that prudential restrictions on standing are in place to avoid courts being "called upon to decide abstract questions of wide public significance even though other governmental institutions may be more competent to address the questions and even though judicial intervention may be unnecessary to protect individual rights"). However, the prohibition against bringing claims on behalf of third **[**17]** parties is not categorical. The Supreme Court has recognized a limited number of situations in which it is appropriate to allow a party to bring claims on behalf of another. *See* *Powers v. Ohio, 499 U.S. 400, 410-11, 111 S.Ct. 1364, 113 L.Ed.2d 411 (1991)* (third-party standing); *Texans United for a Safe Econ. Educ. Fund v. Crown Cent. Petroleum Corp., 207 F.3d 789, 792 (5th Cir. 2000)* (associational standing).

As here, one of the situations in which a litigant may assert the rights of a third party is when, in addition to his or her own Article III standing to bring the claim, the litigant also has a close relationship to the third party such that the parties' interests are aligned and some "hindrance to the third party's ability to protect his or her own interests" exists. *Powers, 499 U.S. at 411*. When any of the three components are missing, courts should dismiss the claim for lack of standing. *Id.*

As discussed above, a motion to dismiss for lack of standing may be either "facial" or "factual." *Superior MRI Servs., Inc., 778 F.3d at 504*. Here, because the City has offered no evidence to contest the Employer-Plaintiffs' third-party standing, the City has made a "facial" attack on **[*717]** standing. "A facial attack on the complaint requires the court merely to look and see if plaintiff has sufficiently alleged a basis of subject matter jurisdiction, and the allegations in his complaint are taken as true for the purposes of the motion." **[**18]** *Cell Sci. Sys. Corp. v. La. Health Serv. Eyeglasses, No. 18-31034, 804 Fed. Appx. 260, 2020 U.S. App. LEXIS 8349, 2020 WL 1285033, at *3 (5th Cir. Mar. 17, 2020)* (per curiam) (unpublished). Liberally construing the Employer-Plaintiffs' Amended Complaint, there are allegations that both ESI and Hagan's employees have chosen not to be unionized, thus suggesting that they do not wish to associate with a union. (Dkt. #9 PP 7-8, 41). The Court notes that the fact that the Employer-Plaintiffs' employees have not unionized does not, standing alone, mean that all, some, or none of those employees affirmatively do not wish to unionize. However, the Court recognizes that it is possible that the interests of the Employer-Plaintiffs and their employees could plausibly align in rejecting a unionized workplace. And because the City has made a facial attack on the Employer-Plaintiffs' standing, at this stage of the proceedings the Court assumes the truth of the Employer-Plaintiffs' assertion that their interests align with their employees on this issue. The relationship prong of the third-party standing requirement is therefore sufficiently pleaded.[6]

---

[6] The City additionally argues that "non-unionized employees suffer no loss of benefits and potentially have access to greater benefits under the Ordinance than employees subject to a collective bargaining agreement" to demonstrate a lack of alignment with the Employer-Plaintiffs. (Dkt. #36 at 13). This argument misses the mark at the outset because the Employer-Plaintiffs' allegation—that their employees are harmed because the benefit of bargaining below the cap is denied to them unless they unionize—is entitled to a presumption of truth in the context of the City's facial attack on standing. The City's assertion may also be inaccurate. Although many employees will likely receive a benefit under the Ordinance that they would not have received

In addition to a close relationship and alignment of interests, to establish third-party standing the Employer-Plaintiffs must also plead that their employees are hindered in bringing a *First Amendment* claim themselves. In their **[**19]** Amended Complaint, the Employer-Plaintiffs suggest that, because the Ordinance only regulates employers, employees would not have standing to bring a claim on their own. Because this is a legal conclusion rather than a factual allegation, it is not entitled to a presumption of truth. *See* *Williamson, 645 F.2d at 412* (noting that "the plaintiff is left with safeguards similar to those retained when a *Rule 12(b)(6)* motion to dismiss for failure to state a claim is raised" when a *Rule 12(b)(1)* motion is based on the face of the complaint). Therefore, the Court must determine whether the employees would be hindered in bringing their own *First Amendment* claim under the Ordinance.

When a plaintiff is the object of the regulation he challenges, establishing standing is generally not difficult. *Lujan, 504 U.S. at 561*. However, when a challenge is brought by a litigant who is not the object of the regulation at issue, standing to challenge the law "is ordinarily 'substantially more difficult' to establish." *Id. at 562* (quoting *Allen v. Wright, 468 U.S. 737, 758, 104 S.Ct. 3315, 82 L.Ed.2d 556 (1984))*. This is because the causation and redressability aspects of standing may become functions of "the unfettered choices made by independent actors not before the court." *Id.* (quoting *ASARCO, Inc. v. Kadish, 490 U.S. 605, 615, 109 S.Ct. 2037, 104 L.Ed.2d 696* ***[*718]*** *(1989))* (internal quotation marks omitted).

Here, however, Employer-Plaintiffs' employees would **[**20]** not have difficulty establishing their standing to assert a *First Amendment* claim challenging the Ordinance. The injury in fact and redressability elements of standing clearly would be met. First, non-unionized employees subject to the Ordinance could claim that the Ordinance coerces them to give up their *First Amendment* right to refrain from associating with a union in order to enable them to bargain to modify the Ordinance's yearly sick leave cap. In so doing, the employees would state a plausible injury in fact. Second, the plausible injury to the employees' *First Amendment* rights could be redressed through declaratory and injunctive relief like that requested by the Employer-Plaintiffs in this case.

Third, although they are not expressly regulated by the Ordinance, employees are directly impacted as the other half of a regulated dyad. By design, the Ordinance alters the terms of the employer-employee relationship, imposing sick leave requirements that immediately affect both employers and employees, including the Ordinance's provision allowing only unionized workplaces to modify the Ordinance's yearly sick leave cap. For purposes of standing analysis, there is a critical distinction between would-be litigants who are directly **[**21]** impacted by the regulation of a third party, and those who are not. *Compare* *id. at 558* (finding no standing when environmental advocates brought a declaratory action challenging the geographic scope of a statute that regulated federal agencies in funding projects that impacted endangered species), *with* *Craig v. Boren, 429 U.S. 190, 192-96, 97 S.Ct. 451, 50 L.Ed.2d 397 (1976)* (finding standing for a 20-year-old man to challenge a statute that forbade vendors from selling 3.2% beer to men between the ages of 18 and 21). Courts have repeatedly concluded that unregulated parties have standing when their rights are necessarily impacted by the regulation of a third party. *See, e.g.,* *MD II Entm't v. City of Dallas, 28 F.3d 492, 497 (5th Cir. 1994)* (declining to allow third-party standing where there "was no practical obstacle" to dancers raising their own equal protection claim against a zoning statute regulating their employer); *cf.* *Mainstreet Org. of Realtors v. Calumet City, 505 F.3d 742 (7th Cir. 2007)* (refusing to allow realtors to challenge a point-of-sale inspection ordinance because homeowners would be better advocates for their property rights despite homeowners not being directly regulated by the ordinance). Here, the Ordinance applies differently to employers when their employees have chosen to unionize, allowing the sick leave cap to be altered only for unionized workplaces. Thus, although employees **[**22]** are not expressly regulated by the Ordinance, their ability to bargain to reduce the yearly cap is directly conditioned on their own decision to unionize. Because the Ordinance directly impacts employees as well as their employers, the Court concludes that there is no reason to believe that the Employer-Plaintiffs' employees would lack standing to challenge the Ordinance.

For these reasons, the Employer-Plaintiffs have not sufficiently pleaded a hindrance to their employees bringing a claim challenging the Ordinance, leaving no basis on which the Employer-Plaintiffs can properly assert third-party

---

otherwise, other employees may be losing a better or less restrictive benefit because their employer must provide sick leave time.

standing. The City's motion to dismiss the Employer-Plaintiffs' *First Amendment* claim brought on behalf of their employees is therefore GRANTED.

III. MOTION TO DISMISS UNDER *RULE 12(b)(6)*

The City also moves for dismissal of all of the Plaintiffs' claims for failure to state **[*719]** a claim under *Rule 12(b)(6)*, as well as all of the Employer-Plaintiffs' constitutional claims for failure to plead municipal liability under *Monell v. Department of Social Services of the City of New York, 436 U.S. 658, 98 S.Ct. 2018, 56 L.Ed.2d 611 (1978)*.

A. *Rule 12(b)(6)* Legal Standards

Under the relaxed pleading standards of *Federal Rule of Civil Procedure 8(a)(2)*, a complaint need only contain "a short and plain statement of the claim showing that the pleader is entitled to relief." When a defendant contends that a plaintiff **[**23]** has failed to meet this standard, *Rule 12(b)(6)* provides a mechanism to challenge the legal sufficiency of a claim early in litigation. Such motions are, however, "viewed with disfavor and rarely granted." *Test Masters Educ. Servs., Inc. v. Singh, 428 F.3d 559, 570 (5th Cir. 2005)*.

To survive a motion to dismiss brought under *Rule 12(b)(6)*, a plaintiff must plead in its complaint only "enough facts to state a claim for relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S.Ct. 1955, 167 L.Ed.2d 929 (2007)*. "The court's review is limited to the complaint, any documents attached to the complaint, and any documents attached to the motion to dismiss that are central to the claim and referenced by the complaint." *Lone Star Fund V (U.S.), L.P. v. Barclays Bank PLC, 594 F.3d 383, 387 (5th Cir. 2010)* (citing *Collins v. Morgan Stanley Dean Witter, 224 F.3d 496, 498-99 (5th Cir. 2000))*.

Although a probability that the defendant is liable is not required, the plausibility standard demands "more than a sheer possibility." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S.Ct. 1937, 173 L.Ed.2d 868 (2009)*. In assessing a motion to dismiss under *Rule 12(b)(6)*, the facts pleaded are entitled to a presumption of truth, but legal conclusions that lack factual support are not entitled to the same presumption. *Id.* To determine whether the plaintiff has pleaded enough to "nudge[] their claims across the line from conceivable to plausible," a court draws on its own "judicial experience and common sense." *Id. at 679-80* (first quoting *Twombly, 550 U.S. at 570*, then citing *Iqbal v. Hasty, 490 F.3d 143, 157-58 (2nd Cir. 2007))* (internal quotation marks omitted). This threshold is surpassed when **[**24]** "a plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 678* (citing *Twombly, 550 U.S. at 556*).

B. Municipal Liability under *Monell*

The City moves for dismissal of the Employer-Plaintiffs' constitutional claims based on the assertion that the Employer-Plaintiffs have not sufficiently pleaded the *Monell* requirements necessary to impose liability for deprivation of constitutional rights under *42 U.S.C. § 1983*. *436 U.S. at 694*. Under *Monell*, a municipality cannot be sued under *section 1983* unless it can be established that the constitutional violation was the result of an official policy. *Id.* An official policy is:

> 1. A policy statement, ordinance, regulation, or decision that is officially adopted and promulgated by the municipality's lawmaking officers or by an official to whom the lawmakers have delegated policy-making authority; or
> 2. A persistent, widespread practice of city officials or employees, which, although not authorized by officially adopted and promulgated policy, is so common and well settled as to constitute a custom that fairly represents municipal policy.

[*720] *Bennett v. City of Slidell, 735 F.2d 861, 861 (5th Cir. 1984)* (en banc) (per curiam).

The alleged pleading deficiency complained of by the City is that the Employer-Plaintiffs **[**25]** did not specifically identify the *Monell* elements of municipal liability in their complaint. This argument fails. Because the Dallas City Council is the "final policy maker of the [C]ity of Dallas," the Employer-Plaintiffs must only plead that the city council officially adopted and promulgated an unconstitutional ordinance. *See* Groden v. City of Dall., 826 F.3d 280, 284 (5th Cir. 2016) (finding that because "the policymaker is a legal question that need not be pled," a complaint "need only allege facts that show an official policy, promulgated or ratified by the policymaker, under which the municipality is said to be liable" to survive a motion to dismiss). The Employer-Plaintiffs have clearly stated in their amended complaint that "the City enacted the Paid Sick Leave Ordinance," (Dkt. #9 ¶ 13), and that the Ordinance is unconstitutional under various legal theories, (Dkt. #9 ¶¶ 58, 62, 66). The City, in its motion to dismiss, acknowledges that the city council adopted the Ordinance. (Dkt. #36 at 2). The Employer-Plaintiffs have met the pleading requirements necessary to confer municipal liability under section 1983. The City's motion to dismiss on this theory is therefore DENIED.

C. *Rule 12(b)(6)* Challenge to the Employer-Plaintiffs' *First Amendment* Claim

The Employer-Plaintiffs **[**26]** assert that the Ordinance violates their right to associate under the First Amendment, pointing to section 20-4(e) of the Ordinance, which permits unionized employers operating with a collective bargaining agreement to "modify the yearly cap" of paid sick leave. The Employer-Plaintiffs contend that, through section 20-4(e), the Ordinance impermissibly conditions the benefit of bargaining to modify the Ordinance's yearly sick leave cap on employers giving up their right to refrain from unionizing, without the justification of being narrowly tailored to a compelling governmental interest. The Employer-Plaintiffs further allege that, because their employees have not unionized of their own accord, and because as employers they have not voluntarily recognized a union to represent the employees, they are not and do not wish to be "unionized employers." The City argues that the Employer-Plaintiffs have failed to state a claim because they have no unilateral right to unionize.

The First Amendment's freedom of association "provides both public and private employees the right to organize . . . and belong[s] to labor unions." Vicksburg Firefighters Ass'n, Local 1686 Int'l Ass'n of Firefighters v. City of Vicksburg, 761 F.2d 1036, 1039 (5th Cir. 1985) (citing Smith v. Ark. State Highway Emples., Local 1315, 441 U.S. 463, 464-66, 99 S.Ct. 1826, 60 L.Ed.2d 360 (1979)). The government infringes on that right when it "tak[es] steps to discourage or prohibit **[**27]** union membership or association." Smith, 441 U.S. at 466. Similarly, the existence of the right to associate "plainly presupposes a freedom not to associate." Boy Scouts of Am. v. Dale, 530 U.S. 640, 648, 120 S.Ct. 2446, 147 L.Ed.2d 554 (2000) (quoting Roberts v. U.S. Jaycees, 468 U.S. 609, 623, 104 S.Ct. 3244, 82 L.Ed.2d 462 (1984)) (internal quotation marks omitted).

The unconstitutional conditions doctrine prevents the government from making some benefit contingent on relinquishing a constitutional right. *See* Koontz v. St. Johns River Water Mgmt. Dist., 570 U.S. 595, 604, 133 S.Ct. 2586, 186 L.Ed.2d 697 (2013) (quoting Regan v. Taxation **[*721]** With Representation of Wash., 461 U.S. 540, 545, 103 S.Ct. 1997, 76 L.Ed.2d 129 (1983)) ("We have said in a variety of contexts that 'the government may not deny a benefit to a person because he exercises a constitutional right.'"). In other words, where government action compelling or prohibiting some sort of association would be unconstitutional, so too is government action coercing the same. *See* Sherbert v. Verner, 374 U.S. 398, 406, 83 S.Ct. 1790, 10 L.Ed.2d 965 (1963) (holding that it is unconstitutional "to condition the availability of benefits" on a person's "willingness to violate a cardinal principle of her religious faith" because doing so "effectively penalizes the free exercise of her constitutional liberties").

At the outset, the Court must determine whether the Employer-Plaintiffs possess the right to unionize. It is undisputed, as the Employer-Plaintiffs correctly state, that individuals, corporations, and other associations generally possess rights under the First Amendment that are of the same nature and quality. **[**28]** *See* Citizens United, 558 U.S. at 342-43 (noting that First Amendment rights extend to corporations and other associations and are not treated differently than rights afforded to natural persons). However, First Amendment rights can be infringed only when those claiming the right have the ability to engage in the activity they contend is improperly coerced. That is to say, there can be no infringement under the First Amendment where it is impossible for the regulated entity to associate in the manner it claims the regulation is coercing.

The Employer-Plaintiffs claim that the Ordinance conditions the benefit of being able to bargain to modify the yearly cap on giving up their right not to associate—that is, their right to refrain from associating with a union.[7] But a union is a special type of association whose creation begins with the actions of *employees*. There is no mechanism for an employer to unilaterally unionize on the employees' behalf without the employees' impetus. Employees alone have the right to seek unionization under the *National Labor Relations Act ("NLRA")* by either asking the National Labor Relations Board ("NLRB") to conduct an election ("election provision") or by requesting that their employer voluntarily recognize the union ("voluntary recognition **[**29]** provision"). *29 U.S.C. § 159(a)*; *id.* *§ 159(c)(1)*; *see also* *Pac. Molasses Co. v. N.L.R.B., 577 F.2d 1172, 1177 (5th Cir. 1978)* (noting the method by which a union establishes the authority to bargain on behalf of employees).

The Employer-Plaintiffs maintain that their ability to "unionize" or, more accurately, to associate with a union, is derived from the voluntary recognition provision of the NLRA. They argue that they "have not elected to invite a union to represent their employees" and, therefore, are exercising their right to refrain from associating with a union. This assertion misunderstands the nature of unions and the authority granted to employers by the voluntary recognition provision. An employer cannot simply elect to recognize a **[*722]** union—they may do so *only* upon a sufficient showing of support from employees. *See* *29 U.S.C. § 159(c)(1)* ("Whenever a petition shall have been filed . . . by an employer, alleging that one or more individuals or labor organization have presented to him a claim to be recognized. . . ."). Similarly, employers cannot choose to refrain from becoming a "unionized" employer when faced with sufficient support from employees. *See id.* ("Whenever a petition shall have been filed . . . by an employee or group of employees. . . alleging that a substantial number of employees **[**30]** wish to be represented. . . ."). Thus, the Employer-Plaintiffs cannot of their own accord decide whether their employees will unionize. Because the Employer-Plaintiffs themselves have no ability to decide whether their employees will unionize, they certainly cannot be coerced into doing so. Therefore, the Employer-Plaintiffs have not stated a legally cognizable claim under the *First Amendment*. Accordingly, the City's *Rule 12(b)(6)* motion to dismiss the Employer-Plaintiffs' *First Amendment* claim brought on their own behalf is GRANTED.

D. *Rule 12(b)(6)* Challenge to the Employer-Plaintiffs' Equal Protection Claim

The City also seeks dismissal under *Rule 12(b)(6)* of the Employer-Plaintiffs' *Fourteenth Amendment* claim that the Ordinance violates their right to equal protection under the laws. Like the Employer-Plaintiffs' *First Amendment* claim, this claim also concerns the provisions of section 20-4(e) of the Ordinance permitting only unionized employers to modify the yearly cap of paid sick leave. The Employer-Plaintiffs allege that, by including section 20-4(e), the Ordinance intentionally and impermissibly distinguishes between employers operating under a collective bargaining agreement and those that are not.

"The *Fourteenth Amendment*[] promise[s] that no person shall be denied equal protection of the laws." *Romer v. Evans, 517 U.S. 620, 631, 116 S.Ct. 1620, 134 L.Ed.2d 855 (1996)* (citations omitted). However, **[**31]** laws often classify and disadvantage some group. *Id.* Whether a particular type of classification is lawful depends both on the group being classified and the activity being regulated. Laws that draw lines distinguishing a suspect class—like those based on immutable characteristics such as race, alienage, and national origin—or those that affect a fundamental right will be analyzed under strict scrutiny. *Frontiero v. Richardson, 411 U.S. 677, 682, 93 S.Ct. 1764,*

---

[7] Although the Employer-Plaintiffs cite to *Citizens United* and *Southwire Co. v. N.L.R.B., 383 F.2d 235, 240 (5th Cir. 1967)*, for the proposition that they possess a *First Amendment* right to refrain from operating as a unionized business, neither case specifically addresses an employer's right to unionize. *See* *Citizens United, 558 U.S. at 342* (recognizing that "*First Amendment* protections extend to corporations" in a discussion of corporate political speech); *Southwire Co., 383 F.2d at 240 (5th Cir. 1967)* (discussing an employer's right to express an opinion regarding unionization rather than its right to unionize).

36 L.Ed.2d 583 (1973). With some exceptions,[8] all others will be reviewed under rational basis scrutiny. Heller v. Doe, 509 U.S. 312, 319, 113 S.Ct. 2637, 125 L.Ed.2d 257 (1993).

Because the Employer-Plaintiffs do not have a fundamental right to unionize, as discussed *supra* Section III(C), and are not a protected class, their equal protection claim is subject to rational basis scrutiny. *See* Lyng v. Int'l Union, UAW, 485 U.S. 360, 370, 108 S.Ct. 1184, 99 L.Ed.2d 380 (1988) (determining that a statute refusing food stamps to striking union members did not implicate a protected class or fundamental right). Under rational basis review, the question before the Court is whether the Ordinance's classification of employers operating under a collective bargaining agreement and those who are not is rationally related to some legitimate **[*723]** governmental interest. The Court finds that it is.

Legislation will survive rational basis scrutiny "if there is any reasonably conceivable **[**32]** state of facts that could provide a rational basis for the classification"—even if the legislature does not provide one. Heller, 509 U.S. at 320 (quoting F.C.C. v. Beach Commc'ns, Inc., 508 U.S. 307, 313, 113 S.Ct. 2096, 124 L.Ed.2d 211 (1993)) (internal quotation marks omitted). Accordingly, a law is presumed constitutional unless the challenger can "negative every conceivable basis which might support it." *Id.* (quoting Lehnhausen v. Lake Shore Auto Parts Co., 410 U.S. 356, 364, 93 S.Ct. 1001, 35 L.Ed.2d 351 (1973)).

Although the rational basis standard is quite deferential, it is not "toothless." Schweiker v. Wilson, 450 U.S. 221, 234, 101 S.Ct. 1074, 67 L.Ed.2d 186 (1981) (quoting Mathews v. Lucas, 427 U.S. 495, 510, 96 S.Ct. 2755, 49 L.Ed.2d 651 (1976)) (internal quotation marks omitted). "The State may not rely on a classification whose relationship to an asserted goal is so attenuated as to render the distinction arbitrary or irrational." City of Cleburne v. Cleburne Living Ctr., 473 U.S. 432, 446, 105 S.Ct. 3249, 87 L.Ed.2d 313 (1985) (citations omitted). Where the plaintiff pleads facts that sufficiently negate any rational basis for the legislation, the equal protection claim will survive a motion to dismiss. But where it does not, the claim will fail. *See* Crook v. El Paso Indep. Sch. Dist., 277 F. App'x 477, 481 (5th Cir. 2008) (per curiam) (unpublished) (upholding the district court's dismissal of plaintiff's equal protection claim where the defendant identified a rational purpose for a classifying policy that the plaintiff did not negate).

In support of its motion to dismiss, the City points to "compliance" with federal labor laws as its legitimate governmental interest. According to the City, **[**33]** because the federal labor laws preempt claims brought under state and local laws that are "substantially dependent upon analysis of the terms of a collective bargaining agreement," the Ordinance carved out employers operating under a collective bargaining agreement to avoid preemption—thereby, as the argument goes, avoiding conflict with federal law and its interests. (Dkt. #36 at 14) (citing Allis-Chalmers Corp. v. Lueck, 471 U.S. 202, 220, 105 S.Ct. 1904, 85 L.Ed.2d 206 (1985)). Put differently, the City argues that it had to include the collective bargaining agreement classification or risk preemption. The City further defends the distinction by pointing to other state laws which distinguish employers with a collective bargaining agreement from those without one. *Id.* (citing TEX. LAB. CODE ANN. § 413.022(a)) ("Nothing in this section supersedes the provisions of a collective bargaining agreement. . . .").

The Employer-Plaintiffs seize on the City's use of the phrase "complying with federal labor laws" in their attempt to rebut the City's justification. They argue that the City cannot have a legitimate interest in complying with federal labor laws through the collective bargaining agreement distinction because the laws themselves prohibit discrimination based on union status.

While the Employer-Plaintiffs' **[**34]** understanding of the general policy thrust of federal labor law is correct, these arguments are unhelpful to their cause because they do not confront the reason the City claims it created the distinction—to avoid preemption. This rationale has been found to sufficiently justify a regulation subject to rational basis review. *See* Boston Taxi Owners Ass'n, Inc. v. City of Boston, 180 F. Supp. 3d 108, 118-19 (D. Mass. 2016)

---

[8] Sex or illegitimacy classifications are analyzed under intermediate scrutiny. *See* Clark v. Jeter, 486 U.S. 456, 461, 108 S.Ct. 1910, 100 L.Ed.2d 465 (1988) (discrimination based on illegitimacy); Craig, 429 U.S. at 197 (discrimination based on sex).

(acknowledging that drafting a regulation **[*724]** that will not be preempted is a legitimate government objective for a city). Further, courts have dismissed similar equal protection claims despite the NLRA's interest in the equitable treatment of union and non-union workers. *See* Babler Bros., Inc. v. Roberts, 761 F. Supp. 97, 101 (D. Or. 1991), *aff'd*, 995 F.2d 911 (9th Cir. 1993) (finding that an overtime pay statute that exempted contractors that were a party to a collective bargaining agreement did not violate equal protection).

Because treating employers without a collective bargaining agreement differently than those with one is rationally related to the City's interest in crafting legislation that avoids federal preemption, the Employer-Plaintiffs have not rebutted "every conceivable basis" that supports the Ordinance's classification. Accordingly, the City's motion to dismiss the Employer-Plaintiffs' equal protection claim is GRANTED.

E. *Rule 12(b)(6)* Challenge to [35] the Employer-Plaintiffs' *Fourth Amendment* Claim**

The Employer-Plaintiffs claim that the Ordinance is unconstitutional on its face under the Fourth Amendment. Specifically, the Employer-Plaintiffs contend that, because the Ordinance authorizes city officials to issue administrative subpoenas to employers compelling attendance of witnesses or production of documents without precompliance review, it runs afoul of the Fourth Amendment. The City moves to dismiss this claim, arguing that the Dallas City Code does, in fact, provide a sufficient opportunity for subpoenaed employers to obtain precompliance review.

Facial challenges to a statute or ordinance are "the most difficult . . . to mount successfully." United States v. Salerno, 481 U.S. 739, 745, 107 S.Ct. 2095, 95 L.Ed.2d 697 (1987). But as the Supreme Court has recently explained, it "has never held that these claims cannot be brought under any otherwise enforceable provision of the Constitution." City of Los Angeles v. Patel, 576 U.S. 409, 135 S.Ct. 2443, 2449, 192 L.Ed.2d 435 (2015). To the contrary, and in the specific context of a Fourth Amendment facial challenge to a municipal ordinance, the Supreme Court has made clear that "facial challenges under the Fourth Amendment are not categorically barred or especially disfavored." Patel, 135 S.Ct. at 2449; *see also id.* (observing that the Supreme Court has "allowed [facial] challenges to proceed under a diverse array of constitutional provisions" and that **[**36]** "Fourth Amendment challenges to statutes authorizing warrantless searches are no exception").

The Fourth Amendment protects "[t]he right of the people to be secure in their persons, houses, papers, and effects," to be free from "unreasonable searches and seizures," and requires that warrants must be based on probable cause. U.S. CONST. amend. IV. The rights secured by the Fourth Amendment extend not only to physical searches, but also include compulsory inspection of documents in a commercial establishment. See v. City of Seattle, 387 U.S. 541, 543-44, 87 S.Ct. 1737, 18 L.Ed.2d 943 (1967). Generally, warrantless searches conducted without judicial review are "*per se* unreasonable." Patel, 135 S.Ct. at 2452; *see also* Arizona v. Gant, 556 U.S. 332, 338, 129 S.Ct. 1710, 173 L.Ed.2d 485 (2009) (explaining that "searches conducted outside the judicial process, without prior approval by judge or magistrate, are *per se* unreasonable under the Fourth Amendment—subject only to a few specifically established and well-delineated exceptions") (quoting Katz v. United States, 389 U.S. 347, 357, 88 S.Ct. 507, 19 L.Ed.2d 576 (1967)).

[*725] One of the exceptions to the warrant requirement is the administrative search, which is at issue here. *See* Cotropia v. Chapman, 721 F. App'x 354, 357 (5th Cir. 2018) (per curiam) (unpublished). Administrative subpoenas ordering the production of a business's records do not offend the Constitution if they are "sufficiently limited in scope, relevant in purpose, and specific in directive." *See*, 387 U.S. at 544. Although an administrative subpoena may issue without a warrant, **[**37]** "[a]bsent consent, exigent circumstances, or the like, in order for an administrative search to be constitutional, the subject of the search must be afforded an opportunity to obtain precompliance review before a neutral decisionmaker." Patel, 135 S.Ct. at 2452; *see also* Donovan v. Lone Steer, Inc., 464 U.S. 408, 414-15, 104 S.Ct. 769, 78 L.Ed.2d 567 (1984) (citing Okla. Press Publ'g Co. v. Walling, 327 U.S. 186, 195, 66 S.Ct. 494, 90 L.Ed 614 (1946)) (rejecting a Fourth Amendment claim where the government sought only to enforce a court order for the production of documents "made after adequate opportunity to present objections"). Without this opportunity, a search conducted by means of an administrative subpoena violates the

Fourth Amendment. Patel, 135 S.Ct. at 2452 (noting that searches of hotel records would have been constitutional had they been performed under an administrative subpoena because the parties in that case stipulated that the searched party could have moved to quash it, thus meeting any Fourth Amendment concerns).[9]

The Employer-Plaintiffs allege that the Ordinance ignores these constitutional limitations on administrative searches, pointing to a portion of Article III of the Ordinance, entitled "Enforcement." Article III consists of three provisions, sections 20-9 through 20-11. Section 20-9, entitled "Procedures for Filing Complaints," provides that any employee may file a complaint with the City that the Ordinance is being violated by an employer. *See* ***[**38]*** Dall. City Code § 20-9. Section 20-10, entitled "Investigation," provides procedures for the investigation of such employee complaints, directing that, upon the filing of a complaint, the City "shall commence a prompt and full investigation" to determine "whether there is sufficient cause to believe that a violation of [the Ordinance]" has occurred. *Id.* § 20-10(a). Section 20-10(b) empowers the City, in conducting its investigation of employee complaints, to "issue subpoenas to compel the attendance of a witness or the production of materials or documents in order to obtain relevant information and testimony."[10] Section 20-10(b) goes on to state that, "[r]efusal to appear or to produce any document or other evidence after receiving a subpoena pursuant to this section is a violation of this chapter and subject to sanctions as described in section 2-9 of the Dallas City Code."[11] Finally, section 20-11, entitled **[*726]** "Voluntary Compliance; Violations; Penalties; Appeals," provides that, after seeking voluntary compliance from the employer to remedy a violation of the Ordinance, a civil fine not to exceed $ 500 may be imposed. Section 20-11 also allows employers to appeal any civil penalty imposed for a violation of the Ordinance.

The Employer-Plaintiffs allege that, because the Ordinance **[**39]** fails to include a procedure for obtaining precompliance review of subpoenas issued in conjunction with investigations of employee complaints under section 20-10(b), it violates the Fourth Amendment on its face. The City counters by referencing another portion of the Dallas City Code, section 2-8. Section 2-8 states that, "[i]n all hearings and investigations" conducted by the city council, the city manager, or any person or committee authorized to conduct investigations as to city affairs, the City may "subpoena witnesses and compel the production of books, papers and other evidence material to such inquiry in the same manner as is now prescribed by the laws of this state for compelling the attendance of witnesses and production of evidence in the corporation court."[12] According to the City, section 2-8's subpoena provision "addresses the procedures applicable to *any* subpoena issued by the City." (Dkt. #36 at 17). Based on its contention that section 2-8 provides for precompliance review of *any* subpoena the City issues, including subpoenas specifically authorized by section 20-10(b) of the Ordinance, the City maintains that the Employer-Plaintiffs' Fourth Amendment claim is not viable.

The City's interpretation of section 20-10(b) cannot be reconciled with the text and structure of the Ordinance. Section 20-10(b)'s text **[**40]** makes no reference to section 2-8. Instead, section 20-10(b) describes, in language differing from that of section 2-8, a subpoena process unique to the investigation of employee complaints concerning alleged employer violations of the Ordinance. The omission of any reference to section 2-8 is particularly telling because section 20-10(b) expressly incorporates section 2-9 of the City Code concerning

---

[9] As the Fifth Circuit has explained, consistent with Supreme Court precedent, "Texas law contemplates the opportunity for precompliance review of an administrative subpoena before a neutral decisionmaker." Cotropia, 721 F. App'x at 358 n.2. "For example, Texas Occupations Code § 153.007(e) states that if 'a person fails to comply with a [Texas Medical Board] subpoena,' then [the Medical Board] 'may file suit to enforce the subpoena.'" *Id.* (quoting TEX. OCC. CODE ANN. § 153.007(e)). As the *Cotropia* court observed, "[i]n this scenario, a court can, prior to compliance, determine whether the subpoena is valid." *Id.*

[10] Before issuing a subpoena, the City must "seek the voluntary cooperation of any employer to timely obtain relevant information and testimony in connection with any investigation of a complaint filed under [the Ordinance]." Dall. City Code § 20-10(b).

[11] Section 2-9 provides little guidance on the nature of sanctions that may be imposed for, among other things, "refus[ing] to be sworn," "refus[ing] to appear to testify," or "fail[ing] or refus[ing] to produce any book, paper, document or instrument touching any matter under examination" by the City. Dall. City Code § 2-9. According to section 2-9, a person who runs afoul of its provisions is simply "guilty of an offense." *Id.*

[12] Corporation court is the municipal court. TEX. GOV'T CODE ANN. § 29.002.

sanctions. *See id.* § 20-10(b). In drafting and enacting the Ordinance, the City therefore demonstrated that it knew how to incorporate other parts of the City Code into the provisions of the Ordinance. Courts "presume the words in a statute are selected with care" and should "interpret them in a manner that gives meaning to all of them without disregarding some as surplusage." *Plains Capital Bank v. Martin, 459 S.W.3d 550, 556 (Tex. 2015)*. Section 20-10(b)'s explicit incorporation of section 2-9, taken together with the absence of any reference to section 2-8, confirms that section 2-8 is not incorporated into the Ordinance.

To the extent the City contends that, regardless of incorporation into section 20-10(b), the general provisions of section 2-8 concerning administrative subpoenas control over the specific provisions of section 20-10(b), this argument also fails. As the Supreme Court has explained, "[i]t is a commonplace of statutory construction that the specific governs the general." *RadLAX Gateway Hotel, LLC v. Amalgamated Bank, 566 U.S. 639, 645, 132 S.Ct. 2065, 182 L.Ed.2d 967 (2012)* (quoting *Morales v. Trans World Airlines, Inc., 504 U.S. 374, 384, 112 S.Ct. 2031, 119 L.Ed.2d 157* ***[*727]*** *(1992))* (internal quotation marks **[**41]** omitted); *see also* ANTONIN SCALIA & BRYAN A. GARNER, READING LAW: INTERPRETATION OF LEGAL TEXTS 183-87 (2012) (explaining that a later enacted, more specific statute generally governs over an earlier, more general one).[13]

Moreover, even if section 2-8 applied to the Ordinance, the City overreads its provisions, which fail to direct the subject of an administrative subpoena to a neutral forum in which it could obtain review. *See Airbnb, Inc. v. City of New York, 373 F. Supp. 3d 467, 493 (S.D.N.Y. 2019)* (noting that an ordinance that failed to provide procedures or a forum to challenge a demand for production was unconstitutional on its face). Nothing in section 2-8 makes clear that the City will provide constitutionally adequate procedures for precompliance review of its administrative subpoenas. Section 2-8 merely states that any person authorized by the city council or city manager may subpoena witnesses or compel the production of evidentiary materials "in the same manner as now prescribed by the laws of this state for compelling the attendance of witness and production of evidence in the corporation court." Dall. City Code § 2-8. On its face, section 2-8 describes how a subpoena may issue, not a procedure for precompliance review.

The City's reading of section 2-8 effectively concedes that this city code provision **[**42]** does not operate to provide constitutionally adequate precompliance review of administrative subpoenas. As explained by the City, sections 2-8 and 2-9 work in conjunction to allow an employer to "question the reasonableness of the subpoena" only *after* being subject to citation for failing to comply with an administrative subpoena. (Dkt. #36 at 17) ("[A]n employer who refused to comply with a subpoena could be subject to citation and *then* would have an opportunity to appear before the Dallas Municipal Court at which time it would have the 'opportunity to question the reasonableness of the subpoena . . . .'" (quoting *Donovan, 464 U.S. at 415*) (emphasis added)). This is not the order of events contemplated by the *Fourth Amendment*. *See Patel, 135 S.Ct. at 2452* (explaining that the government cannot reasonably force business owners to risk a criminal penalty to invoke statutory safeguards against suspicionless searches). Providing for review only after a citation for noncompliance has issued creates an unconstitutional Hobson's choice for the recipient of an administrative subpoena under section 2-8: comply with a potentially overbroad subpoena in contravention of *Fourth Amendment* protections or risk a citation that may or may not withstand review for reasonableness.

In sum, the Employer-Plaintiffs' **[**43]** claim that the Ordinance does not provide for precompliance review sufficiently states a claim under the *Fourth Amendment* to survive scrutiny under *Rule 12(b)(6)*. Section 20-10(b) of the Ordinance, the operative provision for the issuance of administrative subpoenas to employers during the investigation of employee complaints regarding paid sick leave, provides no mechanism whatsoever for precompliance review, does not incorporate section 2-8 of the city code, and controls over section 2-8's general provisions concerning administrative subpoenas. And, even if section 2-8 applied to administrative subpoenas issued under the Ordinance, section 2-8 does not appear to provide constitutionally adequate precompliance review. The City's motion to **[*728]** dismiss the Employer-Plaintiffs' claim under the *Fourth Amendment* is therefore DENIED.

---

[13] Section 2-8 was made part of the Dallas City Code in 1941, while the Ordinance was passed in 2019.

F. Preemption under the Texas Constitution

The City also seeks dismissal under *Rule 12(b)(6)* of the preemption claim asserted by all Plaintiffs under the Texas Constitution. For reasons that are fully explained below, *see infra* Part V(B), the Court holds that Plaintiffs have sufficiently stated a preemption claim. The City's motion to dismiss the preemption claim is therefore DENIED.

IV. SUPPLEMENTAL JURISDICTION

The parties do not dispute that the Court has supplemental jurisdiction **[**44]** over Plaintiffs' preemption claim. *See* *28 U.S.C. § 1367(a)*. The Court agrees. Generally, a district court has original jurisdiction over claims that arise under federal law, *id.* *§ 1331*, as well as cases that arise under state law and meet certain diversity of citizenship and amount in controversy requirements, *id.* *§ 1332*. A court may also exercise supplemental jurisdiction over state law claims that it would not have original jurisdiction over if those claims are "part of the same case or controversy" as the federal claims. *Id.* *§ 1367(a)*.

The Court has original jurisdiction over the constitutional claims made in this case under the *First Amendment*, *Fourth Amendment*, and the *Fourteenth Amendment*, all challenging the enforceability of the Ordinance. The Court has determined that the Employer-Plaintiffs' *First Amendment* and *Fourteenth Amendment* claims should be dismissed. However, the City's motion to dismiss the Employer-Plaintiffs' *Fourth Amendment* claim has been denied, and this claim will be permitted to proceed. Plaintiffs' state law preemption claim, alleging that the Ordinance is also unenforceable because it is preempted by the TMWA, is part of the same case or controversy as the *Fourth Amendment* claim. The Court therefore has supplemental jurisdiction over the preemption claim under *28 U.S.C. § 1367(a)*.

In its motion to dismiss, the City does not raise **[**45]** a question of subject matter jurisdiction as to the preemption claim. Instead, the City asks the Court to exercise its discretion to decline supplemental jurisdiction over the preemption claim. *See id.* *§ 1367(c)*. Under *section 1367(c)*, the Court may decline to exercise supplemental jurisdiction over the state law preemption claim if:

(1) the claim raises a novel or complex issue of state law,

(2) the claim substantially predominates over the claim or claims over which the district court has original jurisdiction,

(3) the district court has dismissed all claims over which it has original jurisdiction, or

(4) in exceptional circumstances, there are other compelling reasons for declining jurisdiction.

Id. Courts should also consider the common law factors of "judicial economy, convenience, fairness, and comity" when determining whether to retain supplemental jurisdiction over a state law claim. *Enochs v. Lampasas Cty., 641 F.3d. 155, 159 (5th Cir. 2011)* (citing *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350, 108 S.Ct. 614, 98 L.Ed.2d 720 (1988))*. Weighing all factors together, with no single factor dispositive, courts should determine whether the overall balance favors declining jurisdiction while "guard[ing] against improper forum manipulation." *Id.* "[I]n the usual case in which all federal law claims are eliminated before trial" the common law factors **[**46]** "will point toward declining to exercise [supplemental] jurisdiction." *Carnegie-Mellon, 484 U.S. at 350 n.7*.

[*729] The City argues that both the predominance of the state law claim and its novelty require the Court to decline supplemental jurisdiction and dismiss the claim. (Dkt. #36 at 18). The State urges that the City has waived the other factors by failing to raise them, but that misstates the law. A defendant waives a challenge to supplemental jurisdiction if it is not raised in the district court, but once the issue is raised, the defendant's failure to discuss all of the factors bearing on supplemental jurisdiction does not preclude their consideration by the Court. *See* *Powers v. United States, 783 F.3d 570, 576-77 (5th Cir. 2015)* (noting that the failure to challenge supplemental jurisdiction in the district court rendered the issue waived on appeal). Accordingly, because the City has appropriately raised the issue, the Court must assess each of the statutory and common law factors to determine whether it should decline supplemental jurisdiction.

As to the first factor described in *section 1367(c)(1)*, this case does not present a novel or complex issue of state law. To the contrary, Texas preemption law is well delineated. *See, e.g., Tex. Manufactured Hous. Ass'n, Inc. v. City of Nederland, 101 F.3d 1095, 1101 (5th Cir. 1996)* (analyzing whether a state statute preempted a local ordinance); **[**47]** *BCCA Appeal Grp., Inc. v. City of Houston, 496 S.W.3d 1, 7-8 (Tex. 2016)* (outlining municipal ordinance preemption and statutory construction). Not only is the applicable Texas preemption law clear, as will be explained further herein, *see infra* Part V(B), Texas's Third Court of Appeals has already held that the TMWA preempts a city ordinance requiring private employers to provide paid sick leave. *See Tex. Ass'n of Bus. v. City of Austin, 565 S.W.3d 425, 440 (Tex. App.—Austin 2018, pet. filed)*. Thus, the Court has the benefit of state court precedent specifically addressing TMWA preemption of a materially similar municipal paid sick leave ordinance. *See Mem'l Hermann Healthcare Sys., Inc. v. Eurocopter Deutschland, GMBH, 524 F.3d 676, 678 (5th Cir. 2008)* ("In making an *Erie* guess, [federal courts] defer to intermediate state appellate court decisions, 'unless convinced by other persuasive data that the highest court of the state would decide otherwise.'") (quoting *Herrmann Holdings Ltd. v. Lucent Techs. Inc., 302 F.3d 552, 558 (5th Cir. 2002))*.[14]

By contrast, cases that have identified novel issues of state law include those that ask the Court to apply the law for the first time. *See, e.g., In re Abbott Labs., 51 F.3d 524, 529 (5th Cir. 1995)* (noting that whether indirect purchasers could state a claim under Louisiana ***antitrust law*** was a novel and complex issue); *Brim v. ExxonMobil Pipeline Co., 213 F. App'x 303, 305 (5th Cir. 2007)* (per curiam) (unpublished) (finding that **[**48]** the question of whether a state statute provided a private cause of action was a novel issue when no state court had decided the issue).

[*730] The City claims that, because there is a petition for review of the *Austin* court's order pending before the Texas Supreme Court, this case presents a novel issue of law. But as the State has correctly noted, such a reading of "novel" under *28 U.S.C. § 1367(c)* would mean that, even where a state's highest court had established a legal standard, any new set of facts involving the application of that standard in federal court would present a "novel" issue. The Court is unaware of any precedent supporting the City's unusual interpretation and rejects such a strained and unworkable construction of the statute.

As to the second factor described in *section 1367(c)(2)*, the City argues that the Court should decline supplemental jurisdiction because the state law claim substantially predominates over the federal claim. When considering whether a claim substantially predominates over others, courts consider the proof required, scope of issues, and "comprehensiveness of the remedy sought." *United Mine Workers of Am. v. Gibbs, 383 U.S. 715, 726, 86 S.Ct. 1130, 16 L.Ed.2d 218 (1966)*. The questions before the Court in this case are predominantly legal in nature. It is, therefore, unlikely that **[**49]** any one claim will require substantially more evidentiary proof than another. As the Court has previously observed in the context of venue, the parties have already agreed that "the subject matter [of this case] lends itself to having little evidence to present" and the parties have likewise "point[ed] to no physical evidence that may be required to resolve the case." (Dkt. #49). Nor does the state law claim's scope predominate. Whether the Ordinance is preempted by the Texas Constitution is not a claim that is dependent on the resolution of multiple questions of Texas law. It requires the Court to decide only whether the Texas legislature intended to preempt municipalities from regulating the minimum wage and, if so, whether the paid sick leave mandated by the Ordinance falls within the meaning of the word "wage." Lastly, the remedy sought for the federal *Fourth Amendment* claim and the state law claim is the same—an order enjoining the entire Ordinance. Although the remedy for the federal claim may be narrowed later, this factor asks about the remedy *sought*. Because the remedy sought for the remaining federal claim and the state law claim is the same, the state law claim does not substantially predominate **[**50]** over the federal claim. This factor is therefore neutral.

---

[14] A Texas state district court has also issued an order granting a motion temporarily enjoining the enforcement of a similar paid sick leave ordinance enacted in the City of San Antonio. (Dkt. #61-1) (Order on Temporary Injunction of the 408th Judicial District of Bexar County, Texas, in *Associated Builders & Contractors of S. Tex., et al. v. City of San Antonio, et al.*, No. 2019CI13921). Texas's Fourth Court Appeals has abated the appeal of that order pending the resolution of a petition for review before the Texas Supreme Court in the *City of Austin* case, suggesting that the Fourth Court of Appeals considers San Antonio's paid sick leave ordinance to be materially similar to the Austin paid sick leave ordinance enjoined in the *City of Austin* case. *City of San Antonio v. Associated Builders & Contractors of S. Tex., No. 04-20-00004-CV, slip op., 2020 Tex. App. LEXIS 1972 (Tex. App.—San Antonio Mar. 4, 2020 no pet. h.)* (mem op., not designated for publication).

The final two statutory factors, described in *section 1367(c)(3)-(4)*, both weigh in favor of retaining jurisdiction, as a viable federal claim remains and there is no other compelling reason to decline jurisdiction.

Turning to the common law factors, both the convenience and fairness factors are neutral. This Court and a court in Dallas County are roughly equivalent in their convenience to the parties. *See* (Dkt. #49 at 8) (determining that neither the Northern District of Texas nor the Eastern District of Texas was inconvenient for any party associated with the case). And any discovery, research, or briefing that has already been completed by the parties concerning the state law issue will be largely, if not completely, applicable in state court. Thus, neither party would be prejudiced by dismissing the case.

The judicial economy factor, on the other hand, weighs slightly in favor of retaining the case. Although the Court has not yet invested a substantial amount of judicial resources into the case, declining supplemental jurisdiction on the state law claim would require the involvement and attention of an additional court, thereby doubling the effort **[**51]** required to resolve it. *See* *PPG Indus., Inc. v. Cont'l Oil Co., 478 F.2d 674, 680 (5th Cir. 1973)* (noting a " **[*731]** disinclination to encourage duplication of effort"). It is not economical to require a case that could be resolved in one court to proceed in two courts. Because a federal claim remains in this case and will proceed, it is a more efficient use of judicial resources to have all challenges to the Ordinance resolved in one court.

As to the comity factor, the State argues that comity weighs in favor of retaining the state law claim because the State of Texas itself has indicated its desire to proceed in a federal forum. In support, the State analogizes decisions in which federal courts have declined to dismiss cases on the basis of international comity when the United States has brought a claim. The international comity doctrine instructs courts to refuse jurisdiction when adjudicating the case may upset foreign relations. *See* *Derr v. Swarek, 766 F.3d 430, 442 (5th Cir. 2014)* (noting that the purpose of international comity is to defer to foreign judgments that are the result of a "fully and fairly" litigated case). In the cases cited by the State, courts have retained jurisdiction because "declining jurisdiction out of deference to the interest of a foreign nation would be inappropriate" as the **[**52]** executive branch has already weighed international policy interests. *See* *United States v. All Assets Held in Account Number XXXXXXXX, 83 F. Supp. 3d. 360, 372, 314 F.R.D. 12 (D.D.C. 2015)* (refusing to decline jurisdiction over a case brought by the United States which had been previously settled in Nigeria). The State argues that, consistent with the international comity doctrine, Texas's executive branch has already weighed the state and local interests at stake in this case, and has affirmatively decided to proceed in federal court.

Notwithstanding the State executive branch's decision to proceed in federal court, its reliance on the international comity doctrine is unpersuasive. Comity is a factor in determining whether a federal court should retain supplemental jurisdiction over state law claims because of a desire to avoid "needless decisions of state law" and to "promote justice between the parties by procuring for them a surer-footed reading of applicable law." *Gibbs, 383 U.S. at 726*. The Supreme Court has explained that comity, in the federalism context, supports the idea that "the National Government will fare best if the States *and their institutions* are left free perform their separate functions in their separate ways." *Pennzoil Co. v. Texaco, Inc., 481 U.S. 1, 10, 107 S.Ct 1519, 95 L.Ed.2d 1 (1987)* (quoting *Younger v. Harris, 401 U.S. 37, 44, 91 S.Ct 746, 27 L.Ed.2d 669 (1971))* (emphasis added). Comity as a common law factor in determining supplemental **[**53]** jurisdiction must, as both *Pennzoil* and *Gibbs* suggest, refer to a more global deference that includes the interests of the parties, courts, and citizens of the state in having state issues decided by state courts. The Court, therefore, concludes that comity, as it normally does in this context, weighs in favor of declining supplemental jurisdiction in this case.

Taken together, the statutory and common law factors weigh in favor of retaining supplemental jurisdiction over the state law claim. That a federal claim remains viable, and that the state law issue is neither novel, complex, nor predominant, weigh in favor of retaining supplemental jurisdiction over the state law claim. And there are no other compelling reasons to decline jurisdiction. Even if one of the statutory factors was invoked, the common law factors do not counsel strongly in favor of declining jurisdiction, with only comity concerns weighing in favor of dismissing the state law claim. Thus, having weighed the statutory and common law factors, the Court will exercise supplemental jurisdiction over the state law claim. The City's **[*732]** motion to dismiss the claim is therefore DENIED.

V. Preliminary Injunction

Having determined **[**54]** that the Plaintiffs have sufficiently stated a claim under the *Fourth Amendment* and under state law to survive the City's dismissal motion, and that the Court should retain supplemental jurisdiction over the state law preemption claim, the Court now turns to the Plaintiffs' motions for preliminary injunction. Because the Court concludes that the Plaintiffs' request for a preliminary injunction on the state law preemption claim is substantially likely to succeed on the merits and otherwise meets the requirements for a preliminary injunction, it will not reach the *Fourth Amendment* claim seeking the same relief.

A. Preliminary Injunction Legal Standard

"A preliminary injunction is an extraordinary remedy never awarded as of right." *Winter v. Nat. Res. Def. Council, 555 U.S. 7, 24, 129 S.Ct. 365, 172 L.Ed.2d 249 (2008)*. To issue such relief, a court "must balance the competing claims of injury and must consider the effect on each party of the granting or withholding of the requested relief." *Id.* It does so by requiring the plaintiff to establish:

> (1) a substantial likelihood of success on the merits, (2) a substantial threat of irreparable injury if the injunction is not issued, (3) that the threatened injury if the injunction is denied outweighs any harm that will result if the injunction is granted, and **[**55]** (4) that the grant of an injunction will not disserve the public interest.

Janvey v. Alguire, 647 F.3d 585, 595 (5th Cir. 2011). While a plaintiff "is not required to prove his case in full," *Univ. of Tex. v. Camenisch, 451 U.S. 390, 395, 101 S.Ct. 1830, 68 L.Ed.2d 175 (1981)*, he must "clearly carr[y] the burden of persuasion on all four requirements[,]" *Lake Charles Diesel, Inc. v. Gen. Motors Corp., 328 F.3d 192, 196 (5th Cir. 2003)*.

B. Substantial Likelihood of Success on the Merits

At the outset, a plaintiff requesting a preliminary injunction must first demonstrate that he is likely to succeed on the merits of his claim. *Canal Auth. v. Callaway, 489 F.2d 567, 576 (5th Cir. 1974)* ("[I]t is important to consider this requirement, since, regardless of the balance of relative hardships threatened to the parties, the granting of a preliminary injunction would be inequitable if the plaintiff has no chance of success on the merits.").

The Employer-Plaintiffs and the State allege that the Ordinance is preempted by the TMWA and therefore violates the Texas Constitution. This issue is a matter of state law. "A federal court exercising [supplemental] jurisdiction over state law claims, must apply the substantive law of the state in which it sits." *Sommers Drug Stores Co. Emp. Profit Sharing Tr. v. Corrigan, 883 F.2d 345, 353 (5th Cir. 1989)* (citing *Gibbs, 383 U.S. at 726*). That law is enunciated by the state's highest court. *Troice v. Greenberg Traurig, L.L.P., 921 F.3d 501, 505 (5th Cir. 2019)*. When a state's highest court has yet to speak on an issue, a federal court "must follow the decisions of intermediate state courts in the absence of convincing **[**56]** evidence that the highest court of the state would decide differently." *Stoner v. N.Y. Life Ins. Co., 311 U.S. 464, 467, 61 S.Ct. 336, 85 L.Ed. 284 (1940)* (citations omitted).

The Texas Supreme Court has explained the standard for evaluating the type of preemption claim asserted by Plaintiffs: the preemption of a municipal **[*733]** ordinance by state legislation. Home-rule cities,[15] like the City of Dallas, "have broad discretionary powers, provided that no ordinance 'shall contain any provision inconsistent with the Constitution of the State, or of the general laws enacted by the Legislature of this State.'" *Dall. Merch.'s & Concessionaire's Ass'n v. City of Dallas, 852 S.W.2d 489, 490 (Tex. 1993)* (quoting *TEX. CONST. art. XI, § 5*). Accordingly, home-rule cities have full power of self-governance, limited only by what the Texas legislature

---

[15] Home-rule cities are those operating under a municipal charter as provided for in the Texas Constitution. *Barnett v. City of Plainview, 848 S.W.2d 334, 337 (Tex. App.—Amarillo 1993, no pet.)*; *TEX. CONST. art. XI, § 5*.

withholds. *Id.* Regardless of whether a statutory limit on local laws is implicit or explicit, it "must appear with unmistakable clarity" to foreclose coregulation of a matter. *City of Laredo v. Laredo Merchs. Ass'n, 550 S.W.3d 586, 593 (Tex. 2018)* (quoting *Lower Colo. River Auth. v. City of San Marcos, 523 S.W.2d 641, 645 (Tex. 1975))* (internal quotation marks omitted).

Although home-rule cities can regulate broadly, when a municipal ordinance purports to regulate subject matter that is already regulated by a state statute, it is unenforceable "to the extent it conflicts with the state statute." *Dall. Merch's & Concessionaire's Ass'n, 852 S.W.2d at 491* (citing *City of Brookside Vill. v. Comeau, 633 S.W.2d 790, 796 (Tex. 1982))*. Mere coexistence in the same statutory ambit as state legislation does not preempt a municipal **[**57]** ordinance *per se* where it can operate "in harmony with the general scope and purpose of the state enactment." *City of Laredo, 550 S.W.3d at 593* (quoting *Comeau, 633 S.W.2d at 796*) (internal quotation marks omitted). But where the purpose of the state legislation is frustrated by concurrent operation of a municipal ordinance, the ordinance will be unenforceable—even if the laws do not regulate the same subject. *See S. Crushed Concrete, L.L.C. v. City of Houston, 398 S.W.3d 676, 679 (Tex. 2013)* (finding a municipal ordinance that ostensibly regulated land use was preempted by a state statute regulating air quality in part because the ordinance rendered the state statute ineffective); *BCCA Appeal Grp., 496 S.W.3d at 7* (explaining that, "a home-rule city's ordinance is unenforceable to the extent that it is inconsistent with [a] state statute preempting that particular subject matter").

The Texas Supreme Court has not yet addressed the specific preemption issue in this case: whether a city ordinance requiring private employers to provide paid sick leave to their employees is preempted by the TMWA. However, the issue has been decided by Texas's Third Court of Appeals. *See Tex. Ass'n of Bus. v. City of Austin, 565 S.W.3d 425 (Tex. App.—Austin 2018, pet. filed)*. The *Austin* court considered a paid sick leave ordinance enacted by the City of Austin that included substantive provisions virtually identical to the Dallas Ordinance at issue here. ***[**58]*** *Id.*[16] In both ordinances, employees are granted one hour of paid sick leave for every thirty hours worked, and in both, employers must pay employees what they would have made if they had been working during hours taken as sick leave. *Compare City of* ***[*734]*** *Austin, 565 S.W.3d at 440* (quoting Austin, Tex. Code of Ordinances §§ 4-19-2(A), (J)) ("[E]mployers must 'grant an employee one hour of earned sick time for every 30 hours worked' . . . [and] must pay the 'earned sick leave in an amount equal to what the employee would have earned if the employee had worked.'"), *with* Dall. City Code §§ 20-4(a), 20-5(a) (same). The plaintiffs in *City of Austin* brought a preemption claim that required the Texas intermediate appellate court to determine whether the Austin ordinance established a "wage" in contravention of the TMWA and the Texas Constitution. Absent "convincing evidence" that the Texas Supreme Court would rule differently on this issue, the Court must follow the *Austin* court's interpretation of Texas law. *Stoner, 311 U.S. at 467*.[17]

The *Austin* court concluded that the "legislative intent in the TMWA to preempt local law is clear." *565 S.W.3d at 439*. The court explained that the TMWA "expressly prohibits municipalities **[**59]** from regulating the wages of employers that are subject to the federal minimum-wage requirements of the *Fair Labor Standards Act (FLSA)*." *Id.*[18] In support of this conclusion, the court cited and quoted *section 62.151 of the TMWA*, which states that any

---

[16] The *Austin* court ruled on the matter as part of an appeal of a temporary injunction, which ordinarily would not include a ruling on the merits. *See City of Austin, 565 S.W.3d at 438*. However, the court stated that it "must address the merits of the statutory-preemption claim to determine whether the district court abused its discretion in denying the temporary injunction," as "[t]hat is a legal question that the district court has no discretion to get wrong." *Id.*

[17] As noted herein, *see supra* note 14, a state district court in San Antonio has also temporarily enjoined a substantially similar San Antonio city ordinance on the same preemption grounds. *See Associated Builders & Contractors of S. Tex. v. City of San Antonio*, No. 2019CI13921 (Bexar Cty. Dist. Ct.). However, that opinion does not provide reasoned grounds for the decision and is of limited usefulness in the analysis here.

[18] Generally, the FLSA applies to employers whose "annual gross volume of sales made or business done" is greater than $ 500,000. *See 29 U.S.C. § 206(a)* (setting minimum wage for enterprises "engage[d] in commerce"); *id. § 203(s)(1)(A)(ii)* (stating that an enterprise is "engaged in commerce" if its "annual gross volume of sales made or business done" is greater than $ 500,000).

municipal ordinance "governing wages in private employment . . . [does] not apply to a person covered by the [FLSA]." *Id.* (quoting *TEX. LAB. CODE ANN. § 62.151*) (internal quotation marks omitted). The *Austin* court further explained that, "the TMWA explicitly provides that 'the minimum wage provided by [the TMWA] *supersedes* a wage established in an ordinance . . . governing wages in private employment.'" *Id.* (quoting *TEX. LAB. CODE ANN. § 62.0515(a)*) (emphasis in original).

The Court has no reason to believe that the Texas Supreme Court would reach different conclusions than Texas's Third Court of Appeals concerning the operation and preemptive effect of the TMWA. The Texas legislature's intent to limit local government regulation of wages is perspicuous. The TMWA's plain text states that municipal ordinances governing wages in private employment are inapplicable to employers subject to the FLSA and *section 62.151 of the Texas Labor Code*, and that the minimum wage provided by the TMWA "supersedes" a wage established in, among other things, a municipal ordinance. **[**60]** *TEX. LAB. CODE ANN. § 62.0515(a)*. Working in concert, these TMWA provisions unequivocally yoke the minimum wage in Texas to the TMWA itself and the federal minimum wage, explicitly preempting upward departures imposed by municipalities. Therefore, as the *Austin* court concluded, if the paid sick leave required by the Ordinance establishes a wage, it is preempted by the TMWA and unenforceable.

Because the TMWA does not define the term "wage," the *Austin* court gave that word its ordinary meaning. *City of Austin, 565 S.W.3d at 439*; *see also* *City of Laredo,* ***[*735]*** *550 S.W.3d at 594* ("To decide [the preemption issue], we look, as usual, to the statutory text and the ordinary meaning of words."). The court noted that the word "wage" "refers to a 'payment to a person for service rendered. . . . The amount paid periodically, esp. by the day or week or month, for the labour or service of an employee, worker, or servant.'" *City of Austin, 565 S.W.3d at 439* (quoting COMPACT OXFORD ENGLISH DICTIONARY 693 (2d. ed. 1989), and then citing WEBSTER'S THIRD NEW INT'L DICTIONARY 2568 (2002) (defining "wage" as "a pledge or payment of usu. monetary remuneration by an employer esp. for labor or services")).

In light of the ordinary meaning of "wage," and under the TMWA's plain language, the *Austin* court concluded that the Austin ordinance was **[**61]** preempted because it "establishes the payment that a person receives for services rendered to an employer." *Id.* In this regard, like the Dallas Ordinance, the Austin ordinance mandates that employers provide one hour of sick leave for "every 30 hours worked." *Id.* (quoting Austin, Tex. Code of Ordinances § 4-19-2(A) (internal quotation marks omitted). Under this paid sick leave mandate, "an employer . . . must pay employees who use sick leave for hours that they did not actually work." *Id.* The *Austin* court held that the "effective result" of such provisions "is that employees who take sick leave are paid the same wage for fewer hours worked, or, stated differently, that employees who take sick leave are paid more per hour for the hours actually worked." *Id. at 439-40*.

In short, the *Austin* court concluded that the paid sick leave provisions of the Austin ordinance "increase[] the pay of those employees who use paid sick leave." *Id. at 440*. Based on these conclusions, the *Austin* court determined that (1) the TMWA preempts local regulations that establish a wage, (2) the Austin paid sick leave ordinance establishes a wage, and that, accordingly, (3) the TMWA preempts the Austin ordinance as a matter of law, thus making **[**62]** the ordinance unconstitutional. *Id. at 440-41* (citing *TEX. CONST. art. XI, § 5*) (mandating that no city ordinance "shall contain any provision inconsistent with the Constitution of the State, or of the general laws enacted by the Legislature of this State").

Again, there is no reason to believe the Texas Supreme Court would reach a different conclusion than the *Austin* court on the question of whether the Austin paid sick leave ordinance establishes a wage and is therefore preempted by the TMWA and unenforceable. To the contrary, in construing the relevant provisions of the TMWA and the Austin ordinance, the *Austin* court employed statutory construction tools consistently endorsed and applied by the Texas Supreme Court. The *Austin* court focused on the statutory text to determine legislative intent, adhering to the oft-repeated admonitions of the Texas Supreme Court. *See, e.g.,* *In re Office of Attorney Gen., 422 S.W.3d 623, 629 (Tex. 2013)* ("Legislative intent is best revealed in legislative language."). Likewise, the *Austin* court followed the Texas Supreme Court's guidance that, "[w]here statutory text is clear, that text is determinative of legislative intent unless the plain meaning of the statute's words would produce an absurd result." *Tex. Mut. Ins. Co.*

v. Ruttiger, 381 S.W.3d 430, 452 (Tex. 2012); *see also, e.g.,* State v. Shumake, 199 S.W.3d 279, 284 (Tex. 2006) ("[W]hen possible, we discern **[**63]** [legislative intent] from the plain meaning of the words chosen.").

Applying these tools to interpret the TMWA and the Austin ordinance, the *Austin* court reached the unremarkable conclusion that, when the text of a municipal ordinance mandates that employees be **[*736]** paid their regular wage for hours *not* actually worked based on taking sick leave, the result is an increased wage for hours that *are* worked. Because such an ordinance has the inevitable effect of increasing the pay of employees who use paid sick leave, it is preempted by the plain language of the TMWA and unenforceable under the Texas Constitution. Finally, the *Austin* court's preemption ruling also comports with the Texas Supreme Court's guidance that "a home-rule city's ordinance is unenforceable to the extent that it is inconsistent with [a] state statute preempting that particular subject matter." BCCA Appeal Grp., 496 S.W.3d at 7.

The Court concludes that it is bound to follow the *Austin* court's well-reasoned preemption ruling, which applies equally to the Dallas paid sick leave ordinance because its substantive provisions mirror those of the Austin ordinance held to be unenforceable. *Compare* Austin, Tex. Ordinance No. 20180215-049, § 4-19-2(A) (stating that Austin **[**64]** employers must "grant an employee one hour of earned sick time for every 30 hours worked"), *with* Dall. City Code § 20-4(a) (stating that Dallas employers "shall grant [employees] one hour of earned, paid sick time for every 30 hours worked"). For these reasons, the Court holds that the Employer-Plaintiffs and the State of Texas have established a substantial likelihood of success on the merits of their preemption claim.

C. Substantial Threat of Irreparable Injury

The Court must next consider whether there is a substantial threat of irreparable injury if a preliminary injunction is not granted. Janvey, 647 F.3d at 595. The Court concludes that there is. "Federal courts have long recognized that, when the 'threatened harm is more than de minimis, it is not so much the magnitude but the irreparability that counts for purposes of a preliminary injunction.'" Enter. Int'l, Inc. v. Corporacion Estatal Petrolera Ecuatoriana, 762 F.2d 464, 472 (5th Cir. 1985) (quoting *Canal Auth., 489 F.2d at 574*). Irreparability, in this context, refers to the plaintiff's ability to recover monetary remedies. Dennis Melancon, Inc. v. City of New Orleans, 703 F.3d 262, 279 (5th Cir. 2012). Where the plaintiff can be compensated for their harm later through normal litigation mechanisms, a court will not issue a preliminary injunction, even when the threatened harm is substantial. *Id.* (citing Morgan v. Fletcher, 518 F.2d 236, 240 (5th Cir. 1975)).

Here, neither the State of Texas nor the Employer-Plaintiffs **[**65]** will be able to recover for the harm they will suffer if they are subjected to an unconstitutional municipal ordinance. The state invariably suffers irreparable harm when it cannot enforce its laws. Abbott v. Perez, ___ U.S. ___, 138 S.Ct. 2305, 2324 n.17, 201 L.Ed.2d 714 (2018) (citing Maryland v. King, 567 U.S. 1301, 133 S.Ct. 1, 183 L.Ed.2d 667 (2012) (Roberts, C.J., in chambers)) ("[T]he inability to enforce its duly enacted plans clearly inflicts irreparable harm on the State."); *see also* New Motor Vehicle Bd. of Cal. v. Orrin W. Fox Co., 434 U.S.1345, 1352, 98 S.Ct. 359, 54 L.Ed.2d 439 (1977) (Rehnquist, J., in chambers) (holding that a state was irreparably harmed when a court enjoined the enforcement of its laws). The State of Texas has enacted the TMWA, which governs the minimum wage in Texas. TEX. LAB. CODE ANN. §§ 62.151, 62.155. The Texas Constitution states that no municipal law shall conflict with laws enacted by the legislature. Tex. Const. art. XI, § 5. Because the enactment of the Ordinance creates a different minimum wage for employers of people who work in Dallas by superimposing additional requirements on **[*737]** top of the TMWA, the State's law has been effectively nullified as to those workers, despite the State's clear intent to normalize the minimum wage statewide. This type of harm supports a preliminary injunction.

Likewise, the Employer-Plaintiffs will suffer irreparable harm resulting from compliance costs and increased regulatory burden. Specifically, the Employer-Plaintiffs **[**66]** have shown that, in addition to paying employees when they take accrued sick leave time, they will also need to hire additional personnel to oversee compliance, update training materials, rearrange the mix of pay and benefits offered to employees, raise client rates, and change acquisition and benefit priorities. Although these injuries are economic in nature, which normally counsels against irreparable harm, Janvey, 647 F.3d at 600, they are not compensable because the City of Dallas enjoys governmental immunity as a home-rule city under Texas law. *See, e.g., City of Galveston v. Texas, 217 S.W.3d 466, 469 (Tex. 2007)* (stating that home-rule cities are immune from suit for government functions unless a state statute limits immunity). Thus, even if the Employer-Plaintiffs are eventually successful on the merits of their claim, they will not be able to recover their damages and, as such, are irreparably harmed by the Ordinance. *See Harris v. Cantu, 81 F. Supp. 3d 566, 580 (S.D. Tex. 2015)*, *rev'd on other grounds sub nom., Harris v. Hahn, 827 F.3d 359 (5th Cir. 2016)* (finding that economic loss unrecoverable due to immunity constitutes irreparable harm); *Teladoc, Inc. v. Tex. Med. Bd., 112 F. Supp. 3d 529, 543 (W.D. Tex. 2015)* (same); *see also Chamber of Commerce v. Edmondson, 594 F.3d 742, 770-71 (10th Cir. 2010)* (same).

The City's arguments against irreparable harm to the Employer-Plaintiffs are two-fold: it questions the accuracy of ESI's alleged compliance costs and whether Hagan's alleged harm is sufficiently **[**67]** imminent to justify a preliminary injunction. ESI has provided proof that it will incur damages that are "approximately $ 269,000.00 annually if each of its Dallas employees take the full amount of paid leave," and that it will have to hire another employee to "track where employees are placed, track their hours, calculate leave earned and send monthly reports." (Dkt. #3-1, Ex. 1 PP 10-11). The City takes issue with these estimates and suggests that ESI already tracks employees. The City also argues that as a staffing agency, ESI will not bear the sole responsibility for complying with the Ordinance. Neither of these arguments detract from ESI's demonstration of irreparable harm.

The City is correct that the Plaintiffs carry a heavy burden to establish irreparable injury. *See White v. Carlucci, 862 F.2d 1209, 1211 (5th Cir. 1989)* (citing *Enter. Int'l, 762 F.2d at 472*) ("Without question, the irreparable harm element must be satisfied by independent proof, or no injunction may issue."). But after that harm has been established, the element is satisfied; the degree of harm is irrelevant. It is beyond dispute that there are greater than de minimis compliance costs associated with the Ordinance—ESI must spend money on employees that do not work because they are taking **[**68]** sick leave, must track sick leave accrual, and must amend its handbook and training materials. *See Dennis Melancon, 703 F.3d at 279* (finding that $ 2,000 in damages is more than de minimis). Because governmental immunity will preclude recovery against the City regardless of the amount of damage, the irreparable harm element is met.

As to Hagan, the City rests on its standing argument to rebut a claim of irreparable harm, arguing that enforcement for small employers is too remote to justify a **[*738]** preliminary injunction. But Hagan has shown that it will suffer harm for which it cannot recover as it becomes compliant with portions of the Ordinance whose enforcement is delayed. The additional time afforded to small employers before the Ordinance is enforced against them suggests that the City anticipates it will require more time for such employers to become compliant. Thus, these threatened injuries are likely to occur sooner than the date Hagan's employees begin accruing sick leave and are sufficiently imminent to justify considering them in the preliminary injunction context. Because Hagan has or will suffer damages that are more than de minimis and are not recoverable against the City, Hagan has also established that **[**69]** it will suffer irreparable harm if the Ordinance remains in force.

D. Balance of Equities and Public Interest

The balance of equities and public interest also favor granting the requested preliminary injunction. Because the Court has already determined that the Plaintiffs are likely to succeed on their preemption claim, the balance of equities and public interest factors weigh in favor of granting the preliminary injunction. *See Tex. Midstream Gas Servs., L.L.C. v. City of Grand Prairie, No. 3:08-CV-1724, 2008 U.S. Dist. LEXIS 95991, 2008 WL 5000038, at *20 (N.D. Tex. Nov. 25, 2008)* ("Because [the plaintiff] has demonstrated a substantial likelihood of success on the merits of part of its express preemption claim, this suggests that the balance of hardship and public interest factors weigh in favor of granting the preliminary injunction."), *aff'd*, *608 F.3d 200 (5th Cir. 2010)*.

The City argues that the harm it will suffer if it is unable to effectuate its laws, and the potential loss or suspension of benefits to the public, counsel against granting a preliminary injunction. Neither concern alters the balance of equities or ultimate weight of the public interest in preliminarily enjoining the Ordinance. The City's interest in the continued operation of an Ordinance that is most likely preempted by the **[**70]** TMWA, and therefore unenforceable under the Texas Constitution, cannot outweigh the State's interest in enforcing its constitution and laws. The State of Texas is "inviolably sovereign," *Wasson Interests, Ltd. v. City of Jacksonville, 489 S.W.3d 427, 429 (Tex. 2016)*, and its legislature stands above local governments, *see* *TEX. CONST. art XI, § 5(a)*. As the State has correctly noted, each day the Ordinance operates against the express mandate of the Texas legislature to preempt local laws governing wages, the State's sovereignty is violated and the relationship between the legislature and local governments, guaranteed by the Texas Constitution, is turned on its head. Further, allowing the continued accrual of benefits under an Ordinance that is most likely unenforceable, as well as the continued imposition of unrecoverable expenses on regulated businesses, also is not consistent with the public interest.

For all of the foregoing reasons, the Plaintiffs' request for a preliminary injunction is GRANTED. Under *Federal Rule of Civil Procedure 65(c)*, a court granting a preliminary injunction has discretion to require a bond "in an amount that the court considers proper." Because the City is unlikely to accrue any damages if it is wrongly enjoined, nor has it argued for an appropriate bond amount, no security bond will be required. **[**71]** *See* *A.T.N. Indus., Inc. v. Gross, 632 F. App'x 185, 192 (5th Cir. 2015)* (per curiam) (unpublished) (quoting *Kaepa, Inc. v. Achilles Corp., 76 F.3d 624, 628 (5th Cir.1996)* ("[U]nder *Rule 65(c)*, 'a court may elect to require no security at all.'").

* * *

[*739] The Court notes that this decision issues at a time when the American public and federal, state, and local authorities are confronted with the unprecedented public health crisis and economic upheaval caused by the Coronavirus Disease 2019 ("COVID-19"). The President has declared a national emergency under the *National Emergencies Act, 50 U.S.C. § 1601, et seq.*, with respect to COVID-19. Businesses large and small, and workers across the country, face tremendous challenges during this national emergency. Likewise, policymakers at all levels of government are developing and implementing strategies to meet and balance the public health and economic concerns of their constituents.[19] Federal courts, on the other hand, although vested with the authority to interpret the law, "possess neither the expertise nor the prerogative to make policy judgments." *Nat'l Fed. of Indep. Bus. v. Sebelius, 567 U.S. 519, 538, 132 S.Ct. 2566, 183 L.Ed.2d 450 (2012)*. As the Supreme Court has explained, "[t]hose decisions are entrusted to our Nation's elected leaders." *Id.*

Courts' deference in matters of policy, however, "cannot become abdication in matters of law." *Id.* "The peculiar circumstances of the moment may render **[**72]** a measure more or less wise, but cannot render it more or less constitutional." Chief Justice John Marshall, *A Friend of the Constitution No. V*, Alexandria Gazette, July 5, 1819, *reprinted in*JOHN MARSHALL'S DEFENSE OF *MCCULLOCH V. MARYLAND* 190-191 (G. Gunther ed. 1969). Whether or not paid sick leave requirements should be imposed by government on private employers is an important public policy issue, made even more significant under the challenging circumstances faced by our Nation at this moment. The State of Texas, through its constitutional structure and statutory law, has committed that public policy decision to the Texas legislature. The Court's decision to grant a preliminary injunction upholds the state constitution and statutory provisions preempting and rendering unenforceable the City's paid sick leave ordinance.

VI. CONCLUSION

For the reasons stated above, the Court **GRANTS in part** and **DENIES in part** Defendants' Motion to Dismiss. (Dkt. #36). Defendants' *Rule 12(b)(1)* motion is **GRANTED** as to the Employer-Plaintiffs' purported third-party *First Amendment* claim on behalf of their employees and **DENIED** as to Plaintiff Hagan's claims and the Employer-Plaintiffs' *First Amendment* claim brought on their own behalf. Defendants' **[**73]** *Rule 12(b)(6)* motion is

---

[19] For example, in response to the rapid proliferation of COVID-19 in the United States, on March 18, 2020, Congress enacted, and the President signed into law, the ***Families First Coronavirus Response Act ("FFCRA")***. Families First Coronavirus Response Act, ***Pub. L. No. 116-127, 134 Stat. 178 (2020)***. The FFCRA, which applies to private sector employers that employ fewer than 500 employees and some public sector employers, provides up to 80 hours of paid sick leave to workers who are ill, quarantined, or seeking treatment as a result of COVID-19, or caring for those who are sick or quarantined as a result of COVID-19. These provisions will be in effect until December 31, 2020. *Id.* §§ 5102(a)-(b), 5108-09, 5110(2)(B).

GRANTED as to the Employer-Plaintiffs' *First Amendment* claim brought on their own behalf, as well as the Employer-Plaintiffs' *Fourteenth Amendment* claim. Defendants' Rule1 2(b)(6) motion is **DENIED** as to the Employer-Plaintiffs' *Fourth Amendment* claim, Plaintiffs' state law preemption claim, and Defendants' request that the Court decline to exercise supplemental jurisdiction.

It is therefore **ORDERED, ADJUDGED, AND DECREED** that the Employer-Plaintiffs' **[*740]** claims brought under the *First Amendment* and *Fourteenth Amendment* are hereby **DISMISSED**.

It is further **ORDERED** that the Plaintiffs' Motion for Preliminary Injunction (Dkt. #3, #21) is hereby **GRANTED**. The City of Dallas's Paid Sick Leave Ordinance, Dallas, Texas, Ordinance No. 31181; Municipal Code § 20-1-20-12, is **ENJOINED** and unenforceable. No officer, agent, servant, employee, attorney, or other person in active concert with the City of Dallas may enforce the Paid Sick Leave Ordinance against any business or entity pending the resolution of this case.

So ORDERED and SIGNED this 30th day of March, 2020.

/s/ Sean D. Jordan

SEAN D. JORDAN

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Supporting Materials

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories, and admissions on file, together with any affidavits, show that there is no genuine issue as to any material fact such that the movant is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. A fact is material only if it might affect the outcome of the case under the governing law.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN2[] **Summary Judgment, Evidentiary Considerations**

On a motion for summary judgment, the Court must view the evidence, and any reasonable inferences drawn from the evidence, in the light most favorable to the non-moving party.

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN3[] **Summary Judgment, Entitlement as Matter of Law**

On a motion for summary judgment, the moving party has the initial burden of demonstrating an absence of a genuine issue of material fact. If the moving party carries this burden, the party opposing the motion must come forward with specific facts showing that there is a genuine issue for trial. The trial court is not required to search the entire record to establish that it is bereft of a genuine issue of material fact. Rather, the nonmoving party has an affirmative duty to direct the court's attention to those specific portions of the record upon which it seeks to rely to create a genuine issue of material fact. The Court must then determine whether the evidence presents a sufficient factual disagreement to require submission of the challenged claims to the trier of fact or whether the moving party must prevail as a matter of law.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN4[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

Reasonableness of a noncompete agreement is inherently fact-specific, but the reasonableness of a noncompetition provision is a question of law when the relevant facts are undisputed. The courts thus must scrutinize such agreements and enforce them only to the extent they are reasonable. Where the parties dispute material facts regarding what the covenants convey, the district court is permitted to allow the jury to decide the reasonableness of the contract's competition-limiting effect.

Civil Procedure > Trials > Consolidation of Actions

HN5[] **Trials, Consolidation of Actions**

Consolidation is governed by *Fed. R. Civ. P. 42(a)*:If actions before the court involve a common question of law or fact, the court may:(1) join for hearing or trial any or all matters at issue in the actions;(2) consolidate the actions; or(3) issue any other orders to avoid unnecessary cost or delay. Whether cases involving the same factual and legal questions should be consolidated for trial is a matter within the discretion of the trial court. A court may issue an order of consolidation on its own motion, and despite the protestations of the parties.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN6[] **Preclusion of Judgments, Law of the Case**

Under the mandate rule, the trial court must proceed in accordance with the mandate of the law of the case as established on appeal and implement both the letter and the spirit of the mandate.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Every agreement concerning trade, every regulation of trade, restrains. To bind, to restrain, is of their very essence. The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN8[] Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements

When analyzing business-to-business noncompete agreements, *Mich. Comp. Laws § 445.784(2)* requires that courts look to federal interpretation of comparable statutes.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

There is a five-part rule of reason test that plaintiffs must meet in order to pass muster. Consequently, to make out a valid claim under § 1 of Sherman Act, the rule of reason analysis requires the plaintiff to prove (1) that the defendant(s) contracted, combined, or conspired; (2) that such contract produced adverse anticompetitive effects; (3) within relevant product and geographic markets; (4) that the objects of and conduct resulting from the contract were illegal; and (5) that the contract was a proximate cause of the plaintiff's injury. This five-factor test aids the Court in discerning whether a plaintiff as overcome the first of a three-part burden-shifting framework: First, the plaintiff must establish that the restraint produces significant anticompetitive effects within the relevant product and geographic markets. Then, if the plaintiff meets this burden, the defendant must come forward with evidence of the restraint's procompetitive effects to establish that the alleged conduct justifies the otherwise anticompetitve injuries. Finally, if the defendant is able to demonstrate procompetitive effects, the plaintiff then must show that the legitimate objectives can be achieved in a substantially less restrictive manner.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN10[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A common theme among each of the formulations of the rule of reason is that the party challenging a restrictive covenant must demonstrate that it causes some harm to competition in the greater product market. This effect on the greater market appears to be the most substantial difference between the showing that must be made under *Mich. Comp. Laws § 445.774a(1)* and that which would be required under the rule of reason framework.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN11[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

It is not enough for a court to examine a covenant's duration, geographic scope, type of conduct prohibited, and business interests justifying the restriction. The following factors should be considered when applying the rule of reason test to evaluate challenges to noncompete agreements in the business-to-business context under Michigan law: (1) whether the restraint is ancillary to the main business purpose of an otherwise lawful contract; (2) whether the restraint protects legitimate property interests, for example, goodwill; (3) whether the restraint's duration, geographic reach, and scope are reasonable considering the nature of the property interest being protected; and (4) whether the restraint suppresses or destroys competition in the relevant market. The Court must take into account each of these factors to determine whether the restraint is reasonable or void.

Civil Procedure > Trials > Consolidation of Actions

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN12[] **Trials, Consolidation of Actions**

Just because the Court at one time denied a plaintiff's motion to amend its complaint does not preclude a party from later moving to consolidate by invoking the Court's discretionary power to do so under *Fed. R. Civ. P. 42(a)(2)*. This is not barred by the mandate rule because the district court is free on remand to consider issues remanded, issues arising for the first time after remand, and issues that were timely raised before the district and/or appellate courts but which remain undecided.

Civil Procedure > Trials > Consolidation of Actions

HN13[] **Trials, Consolidation of Actions**

Pursuant to *Fed. R. Civ. P. 42(a)(2)*, if actions before the court involve a common question of law or fact, the court may consolidate the actions. The party seeking consolidation, here Plaintiff, bears the burden of proving that consolidation should be granted. And the essential test is whether there are common questions of law or fact. Consolidation is in the sound discretion of the court.

Civil Procedure > Trials > Consolidation of Actions

HN14[] **Trials, Consolidation of Actions**

A trial court making a decision to consolidate must consider: Whether the specific risks of prejudice and possible confusion are overborne by the risk of inconsistent adjudications of common factual and legal issues, the burden on parties, witnesses and available judicial resources posed by multiple lawsuits, the length of time required to conclude multiple suits as against a single one, and the relative expense to all concerned of the single-trial, multiple-trial alternatives. Thus, the decision to consolidate is one that must be made thoughtfully, with specific reference to the factors identified above. Care must be taken that consolidation does not result in unavoidable prejudice or unfair advantage. Conservation of judicial resources is a laudable goal. However, if the savings to the judicial system are slight, the risk of prejudice to a party must be viewed with even greater scrutiny. When cases involve some common issues but individual issues predominate, consolidation should be denied. Consolidation is not justified or required simply because actions include a common question of fact or law. Consolidation is improper when the introduction of voluminous' evidence, relevant to one of the consolidated actions but irrelevant to another, impairs the conduct of trial.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

HN15[] **Federal Venue Transfers, Convenience Transfers**

28 U.S.C.S. § 1404(a) provides that for the convenience of the parties and witnesses, in the interests of justice, a district court may transfer any civil action to any other district or division where it might have been brought or to any district or division to which all parties have consented. District courts have wide discretion to transfer an action pursuant to *§ 1404(a)*. The Court must weigh several factors: (1) the convenience of the parties; (2) the convenience of the witnesses; (3) the relative ease of access to sources of proof; (4) the availability of processes to compel attendance of unwilling witnesses; (5) the cost of obtaining willing witnesses; (6) the practical problems associated with trying the case most expeditiously and inexpensively; and (7) the interest of justice. The party who brings a motion to transfer venue bears the burden of proving by a preponderance of the evidence that fairness and practicality strongly favor the forum to which transfer is sought. The defendant must show that the plaintiff's chosen forum is unnecessarily burdensome. Merely shifting the inconvenience from one party to another does not meet the defendant's burden. If the court determines that the balance between the plaintiff's choice of forum and the defendant's desired forum is even, the plaintiff's choice should prevail.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

HN16[] **Federal Venue Transfers, Convenience Transfers**

Judicial economy is served by having the same district court try cases involving the same contracts.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

HN17[] **Federal Venue Transfers, Convenience Transfers**

Judicial economy is served by having the same district court try the cases involving the same Settlement Agreement.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN18[] **Preclusion of Judgments, Law of the Case**

Generally, the law of the case doctrine is applied differently to appellees because forcing an appellee to raise all possible defenses on a first appeal might increase the complexity and scope of appeals more than it would streamline the progress of the litigation. Full application of the waiver rule to an appellee puts it in a dilemma between procedural disadvantage and improper use of the cross-appeal, justifying a degree of leniency in applying the waiver rule to issues that could have been raised by appellees on previous appeals.

Opinion

[*773] ORDER

DENYING PLAINTIFF'S MOTION FOR SUMMARY JUDGMENT (ECF NO. 406); DENYING DEFENDANTS' MOTION FOR SUMMARY JUDGMENT (ECF NO. 400); GRANTING IN PART PLAINTIFF'S MOTION TO CONSOLIDATE CASES (ECF NO. 403); AND DISMISSING ALAN JONES AS A DEFENDANT WITH PREJUDICE

This matter is before the Court on the parties' third round of cross-motions for **[*774]** summary judgment. ECF Nos. 400, 406. Also before the Court is Plaintiff's motion to consolidate cases and for clarification of Alan Jones' status as a defendant. ECF No. 403. For the reasons stated herein, the Court will **DENY** Plaintiff's motion for summary judgment, **DENY** Defendants' motion for summary judgment, **GRANT IN PART [**3]** Plaintiff's motion to consolidate, and find that Alan Jones is not personally liable under the Settlement Agreement, as held by the Sixth Circuit.

I. Facts and Procedural History

The facts of this case are set out in detail in this court's prior opinions (ECF Nos. 219, 343) and in the Sixth Circuit's opinion (ECF No. 392), but a brief overview follows.

Some sixteen years ago, Plaintiff Innovation Ventures, L.L.C., f/d/b/a Living Essentials ("Living Essentials"), the manufacturer of the two-ounce energy shot 5-Hour Energy, contracted with now-defunct Custom Nutrition Laboratories ("Custom Nutrition") to manufacture and package 5-Hour Energy. *Innovation Ventures, LLC v. Custom Nutrition Labs., 912 F.3d 316, 324 (6th Cir. 2018)*. The relationship soured and litigation ensued. In August 2009, the parties reached a settlement agreement ("Settlement Agreement" or "noncompete agreement") when, according to Alan Jones, a Custom Nutrition's officer, Custom Nutrition was on the verge of bankruptcy. Under the Settlement Agreement, in exchange for a $1.85 million payment to Custom Nutrition, the "CNL Parties"—defined to include Custom Nutrition and its CEO Alan Jones—agreed to a number of restrictive covenants. As relevant here, the noncompete agreement prohibited the CNL Parties **[**4]** from using any ingredients in the "Choline Family." Living Essentials had recently introduced a new choline-based ingredient, citicoline, into 5-Hour Energy, which according to Living Essentials was a "critical innovation" that it wanted to keep the CNL Parties from using. *Id.*

In October 2009, Custom Nutrition was failing financially, and Jones spoke with Don Lovelace, owner of a company called Lily of the Desert, about acquiring Custom Nutrition. Instead of acquiring Custom Nutrition, Lovelace agreed to purchase its assets and formed a new corporation, Defendant Nutrition Science Laboratories ("NSL") to do so. NSL and Custom Nutrition entered into an Asset Purchase Agreement to complete the sale. After the Asset Purchase Agreement was executed, NSL began selling energy shots. Jones became an employee of Lily of the Desert and represented himself as President of NSL. Over the next few years, NSL sold energy shots containing Choline Family ingredients and substances that Living Essentials contended were chemical equivalents to choline prohibited under the restrictive covenant's catch-all clause. Living Essentials sued, naming Custom Nutrition, NSL, and Alan Jones as Defendants. *Id. at 324-25*.

On an **[**5]** initial round of summary judgment motions in 2015, this Court granted partial summary judgment in favor of Living Essentials, concluding that NSL violated the Choline Family restrictions because the Defendants admitted to producing energy shots containing two ingredients listed in the Choline Family definition in the Settlement Agreement. A jury later concluded in the first phase of a bifurcated jury trial that two other ingredients admittedly used by Defendants were also included in the catch-all clause in the Choline Family definition of the Settlement Agreement (Betaine and Alpha-glycerolphosphorylcholine or "Alpha-GPC"). Regarding liability, this Court concluded first that NSL was bound by the Choline Family restrictions in the Settlement Agreement by virtue **[*775]** of its incorporation into the Asset Purchase Agreement. Second, it concluded that Jones was bound by the Settlement Agreement because he signed it. And third, the Court concluded that the twenty-year duration of the Settlement Agreement was unreasonable under Michigan Law (*M.C.L. § 445.774a(1)*). The Court reformed the duration of the noncompete agreement to three years, as authorized by *§ 445.774a(1)*. *See* *Innovation Ventures, LLC v. Custom Nutrition Labs., LLC, 2015 U.S. Dist. LEXIS 129946, 2015 WL 5679879, at *16-25 (E.D. Mich. Sept. 28, 2015)*; *see also* ECF No. 219.

On a second round of summary **[**6]** judgment motions in 2017, this Court concluded that Plaintiff was not entitled to summary judgment as to liability on its primary breach of contract claim because NSL's affirmative defense of latches raised factual disputes. Second, it concluded that Plaintiff's three proposed methodologies for calculating damages were impermissible but Living Essentials could "still recover lost profits under a non-patent infringement specific method of calculation." *Innovation Ventures, LLC v. Custom Nutrition Labs., LLC, 256 F. Supp. 3d 696, 704, 710-12 & n.8 (E.D. Mich. 2017)*.

Living Essentials disagreed with the Court's ruling on damages and wanted to find a way to appeal. Living Essentials believed the order left it "without any theory of actual damages to present to the jury, leaving only the theory of nominal damages" to recover on its primary breach of contract claim. *912 F.3d at 326*. To expedite appeal of the prior orders and judgment, the parties submitted a proposed judgment awarding nominal damages to Living Essentials, which this court entered.

While the case against Custom Nutrition, Jones, and NSL ("Lead Case") was proceeding, Living Essentials had sought to add Lily of the Desert as another defendant, but the Court did not permit the complaint to be amended. In order to get around the **[**7]** Court's ruling, Living Essentials brought a new lawsuit against NSL ("Secondary Case"), adding Lily of the Desert and including many of the same claims that the Court had dismissed in the Lead Case. The new complaint alleged that discovery in the Lead Case revealed that Lily of the Desert was also liable under the Settlement Agreement because of its relationship to NSL. Because the parties agreed that judgment in the Lead Case rendered the claims in the Secondary Case "effectively moot," this Court also entered Judgment in favor of Defendants. *Innovation Ventures, LLC v. Nutrition Science Labs., LLC, No. 16-11179, 2017 U.S. Dist.*

LEXIS 211640, 2017 WL 4553429, at *1-2 (E.D. Mich. July 17, 2017); *see also* ECF No. 343. The cases were consolidated on appeal.

A. Sixth Circuit Opinion

On appeal, the Sixth Circuit Court of Appeals affirmed in part and reversed in part. First, the court concluded it had appellate jurisdiction over the claims because the parties sought formal dismissal only to expedite appeal of an order which in effect dismissed Living Essentials' claims. *912 F.3d at 327-32*. NSL also sought conditional review of this Court's personal jurisdiction; the Sixth Circuit determined that this objection was waived in both the Lead and Secondary Cases. *Id. at 332-33*. Second, the court concluded that this Court appropriately dismissed Defendants' antitrust counterclaim **[**8]** because it did not relate back to the original complaint. *Id. at 333-34*. Third, it concluded that Jones was not bound by the Settlement Agreement in his individual capacity because he did not sign the document twice as a corporate officer and as an individual, but agreed with this Court that NSL was bound by the Choline **[*776]** Family restrictions of the Settlement Agreement (§5.c.1) by virtue of its incorporation into the Asset Purchase Agreement. *Id. at 335-39*. The Sixth Circuit also agreed with this Court that that whether Betaine and Alpha-GPC are covered by the catch-all clause in the Choline Family definition was ambiguous as a matter of law. *Id. at 339*.

Citing a Michigan Supreme Court decision that had not yet been decided at the time of this Court's prior order, *Innovation Ventures v. Liquid Manufacturing, 499 Mich. 491, 885 N.W.2d 861 (Mich. 2016))*, the Sixth Circuit determined that when this Court found the 20-year duration of the Settlement Agreement to be unreasonable and reformed the contract, it applied the incorrect standard. It should have evaluated the noncompete agreement under the "rule-of-reason test," *912 F.3d at 340*, rather than analogizing the parties' business-to-business noncompete agreement to employer-employee noncompete agreements under *M.C.L. § 445.774a(1)*. The court of appeals also held that the burden of showing the existence **[**9]** of an unreasonable restraint on trade lies with the Defendants (i.e., the party alleging the restraint on trade)." *912 F.3d at 341-42*. Because the Sixth Circuit determined that neither party had fully briefed the application of the rule-of-reason test, and that this "fact intensive determination" fell within this Court's area of expertise, it remanded the Lead Case "so that the parties may provide the detailed record information necessary for the court to apply the rule-of-reason framework." *Id. at 342*. With respect to the Secondary Case, the Sixth Circuit determined that because it was reversing and remanding the Lead Case, it would likewise remand the Secondary Case. *Id.*

Additionally, the Sixth Circuit affirmed this Court's conclusion that disputes of material fact existed relating to the issue of latches. *Id. at 343*. And finally, with respect to Living Essentials' proposed damages calculation methodologies, the Sixth Circuit concluded (1) that the "market-share based calculation of lost profits" is a theory of relief available for Living Essentials to pursue, *id. at 345, (2)* "[a]n estimated reasonable royalty is not an appropriate theory of proof for damages" in a breach of contract case such as this, *id. at 347*, and (3) disgorgement of Defendants' **[**10]** proceeds from selling energy shots that violated the Choline Family restrictions is not appropriate here, *id. at 348*.

On remand, the Court permitted the parties to file motions for summary judgment on the application of the rule of reason test. Before the Court are the parties' cross motions for summary judgment (ECF Nos. 400, 406), as well as Plaintiff's motion to consolidate the Lead and Secondary cases and to seek clarification of Alan Jones' status as a defendant (ECF No. 403). The motions are fully briefed, and the Court heard oral argument on December 16, 2019.

II. Standards of Review

A. Motions for Summary Judgment

HN1[] "Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories, and admissions on file, together with any affidavits, show that there is no genuine issue as to any material fact such that the movant is entitled to a judgment as a matter of law." Villegas v. Metro. Gov't of Nashville, 709 F.3d 563, 568 (6th Cir. 2013); *see also* Fed. R. Civ. P. 56(a). A fact is material only if it might affect the outcome of the case under the governing law. *See* Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986).

HN2[] On a motion for summary judgment, the Court must view the evidence, and any **[*777]** reasonable inferences drawn from the evidence, in the light most favorable to the non-moving party. *See* Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986) (citations omitted); **[**11]** Redding v. St. Eward, 241 F.3d 530, 531 (6th Cir. 2001).

HN3[] The moving party has the initial burden of demonstrating an absence of a genuine issue of material fact. Celotex Corp. v. Catrett, 477 U.S. 317, 325, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986). If the moving party carries this burden, the party opposing the motion "must come forward with specific facts showing that there is a genuine issue for trial." Matsushita, 475 U.S. at 587. The trial court is not required to "search the entire record to establish that it is bereft of a genuine issue of material fact." Street v. J.C. Bradford & Co., 886 F.2d 1472, 1479-80 (6th Cir. 1989). Rather, the "nonmoving party has an affirmative duty to direct the court's attention to those specific portions of the record upon which it seeks to rely to create a genuine issue of material fact." In re Morris, 260 F.3d 654, 655 (6th Cir. 2001). The Court must then determine whether the evidence presents a sufficient factual disagreement to require submission of the challenged claims to the trier of fact or whether the moving party must prevail as a matter of law. *See* Anderson, 477 U.S. at 252.

B. Covenants Not to Compete

HN4[] "Reasonableness of a noncompete agreement is inherently fact-specific, *see, e.g.,* Woodward v. Cadillac Overall Supply Co., 396 Mich. 379, 391, 240 N.W.2d 710 (1976), but '[t]he reasonableness of a noncompetition provision is a question of law when the relevant facts are undisputed.'" Innovation Ventures v. Liquid Mfg., 499 Mich. 491, 885 N.W.2d 861, 870-71 (Mich. 2016) (quoting Coates v. Bastian Bros., Inc., 276 Mich. App. 498, 741 N.W.2d 539, 544 (Mich. Ct. App. 2007)); *see also* Follmer, Rudzewicz & Co., P.C. v. Kosco, 420 Mich. 394, 362 N.W.2d 676, 683 (Mich. Ct. App. 1984) ("The courts thus must scrutinize such agreements and enforce them only to the extent they are reasonable."). Where the **[**12]** parties dispute material facts regarding what the covenants convey, the district court is permitted to allow the jury to decide the reasonableness of the contract's competition-limiting effect. Bar's Prods. Inc. v. Bars Prods. Int'l Inc., 662 Fed.Appx. 400, 410 (6th Cir. 2016) (citing Certified Restoration Dry Cleaning Network, LLC v. Tenke Corp., 511 F.3d 535, 547 (6th Cir. 2007)).

C. Motions to Consolidate

HN5[] Consolidation is governed by Federal Rule of Civil Procedure 42(a):

> If actions before the court involve a common question of law or fact, the court may:
>
> (1) join for hearing or trial any or all matters at issue in the actions;
>
> (2) consolidate the actions; or
>
> (3) issue any other orders to avoid unnecessary cost or delay.

"Whether cases involving the same factual and legal questions should be consolidated for trial is a matter within the discretion of the trial court." Cantrell v. GAF Corp., 999 F.2d 1007, 1011 (6th Cir. 1993) (citing Stemler v. Burke, 344 F.2d 393, 396 (6th Cir. 1965)). "A court may issue an order of consolidation on its own motion, and despite the protestations of the parties." *Id.* (citing In re Air Crash Disaster at Detroit Metro. Airport, 737 F. Supp. 391, 394 (E.D. Mich. 1989)).

III. Analysis

A. Texas Law Does Not Apply to the Noncompete Clause (5.c.i)

Defendants argue for the first time in response to Plaintiff's motion for summary **[*778]** judgment that Texas law, rather than Michigan law, now applies to interpretation of the Choline Family restrictions (§ 5.c.i of the Settlement Agreement) because this Court's prior application of Michigan law to the restrictions was based the Settlement Agreement's choice of law provision (§ 22). Because this **[**13]** Court determined—and the Sixth Circuit affirmed—that NSL is only bound to § 5.c.i, NSL argues that it stands to reason that it is not bound by § 22. As NSL is only bound to § 5.c.i because it was incorporated by reference into the Asset Purchase Agreement, the Court should apply the *Asset Purchase Agreement*'s choice of law provision, rather than the *Settlement Agreement*'s choice of law provision. And because this Court has already determined that Texas law governs the Asset Purchase Agreement, NSL avers that Texas law ought to govern § 5.c.i and this Court's application of it. ECF No. 415, PageID.26015-18. NSL argues this distinction is important, asserting that Texas applies the same three-part analysis as *MCL § 445.774a(1)* rather than a more general rule of reason analysis, or the more stringent Sherman Act formulation proposed by Plaintiff. ECF No. 415, PageID.26017 n.3 (citing *Tex. Bus. & Com. Code Ann. § 15.50(a)*).

Living Essentials argues that application of Texas law here would violate the Sixth Circuit's express mandate to apply Michigan law, which requires courts to apply the federal common law rule of reason to business to business noncompete agreements. Because the Sixth Circuit rejected the application of *MCL § 445.774a(1)* to the Settlement Agreement, and clearly directed **[**14]** this Court to apply the federal common law rule of reason, its decision necessarily excluded the application of some other state law regime which is arguably "the same" as *§445.774a(1)*, such as *§ 15.50(a) of the Texas Code*. ECF No. 417, PageID.26045.

Having considered both sides of the argument, the Court concludes that it should apply Michigan law to §5.c.i. ***HN6***[] First, to do otherwise would violate the mandate rule. Under the mandate rule, "the trial court must proceed in accordance with the mandate of the law of the case as established on appeal" and "implement both the letter and the spirit of the mandate." *Mason v. Mitchell, 729 F.3d 545, 550 (6th Cir. 2013)*. The Sixth Circuit was already implicitly faced with the question of whether to apply Texas law to § 5.c.i and *expressly* stated this Court should apply the rule of reason test as mandated by the Michigan Supreme Court. In its opinion, the Sixth Circuit affirmed this Court's decision that only § 5.c.i of the Settlement Agreement applied to NSL through the doctrine of incorporation by reference; that § 4.2(r) of the Asset Purchase Agreement incorporated the Choline Family restrictions in § 5.c.i "specifically." *912 F.3d at 338*. Indeed, when analyzing § 4.2(r) of the Asset Purchase Agreement to determine whether it "plainly referred to" or "merely mentioned" the Settlement Agreement, the **[**15]** Sixth Circuit stated that § 4.2(r) was an "acknowledgement in the Asset Purchase Agreement that "NSL's rights to the formula were limited by the settlement agreement." *Id.*

In so holding, the Sixth Circuit applied *Michigan* law when interpreting § 5.c.i. It did not divorce § 5.c.i from the Settlement Agreement's choice of law provision in § 22 and apply Texas law to determine what standard should govern the noncompete agreement in § 5.c.i. *See 912 F.3d at 340*. In other words, the Sixth Circuit considered which law to apply to interpret § 5.c.i, and it expressly mandated this Court to apply Michigan law, it did not adopt the **[*779]** analysis suggested by Defendant here—to apply Texas law.

Second, Defendants have not provided the Court with any authority that it should—or could—divorce the noncompete clause of the Settlement Agreement from that agreement's choice of law clause requiring that the Settlement Agreement be interpreted by Michigan law. Defendants cite to no comparable cases where a court has ruled in the manner they ask this court to rule, that is, where a court has held that a provision from Contract A has been incorporated by reference into Contract B, but that when interpreting the meaning of that provision from Contract A, the court **[**16]** must apply the choice of law provision from Contract B. Ultimately, Defendants are challenging a provision of the Settlement Agreement, not a provision of the Asset Purchase Agreement.

In sum, the Court will apply Michigan law to § 5.c.i of the Settlement Agreement because not doing so would violate the letter and the spirit of the Sixth Circuit's mandate and because Defendants have offered no persuasive authority in support of their position that Texas law should apply.

B. Breach of Covenant Not to Compete under the Rule of Reason

The Sixth Circuit instructed this Court to apply the "rule of reason" test to evaluate the reasonableness of the Settlement Agreement's business-to-business noncompete clause. *912 F.3d at 341-42*. Unfortunately, however, the court of appeals did not define the specific contours of what is meant by the rule of reason test, and the parties are at odds over the question. Plaintiff asserts that an effective challenge under the rule of reason test would require Defendants to show that the noncompete clause would violate *§ 1 of the Sherman Act*—which has its own five-factor burden-shifting rule of reason test. Defendants meanwhile contend that the common law rule of reason test requires no more **[**17]** than showing a violation of *M.C.L. § 445.774a(1)*, so that the Court may simply reaffirm its prior holding. Given the lack of clarity in this area, the Court will do its best to discern the meaning of the "rule of reason" test by analyzing its historical roots and development in the relevant Michigan cases.

i. Historical Framework

In 1873, the Michigan Supreme Court considered when a business-to-business noncompete clause would be held valid:

> [I]f, considered with reference to the situation, business and objects of the parties, and in the light of all the surrounding circumstances with reference to which the contract was made, the restraint contracted for appears to have been for a just and honest purpose, for the protection of the legitimate interests of the party in whose favor it is imposed, reasonable as between them and not specially injurious to the public.

Hubbard v. Miller, 27 Mich. 15, 19, 15 Am.Rep. 153 (1873). The court went on to state:

> whether [a contract with a noncompete clause] can be supported or not, depends upon matters outside of and beyond the abstract fact of the contract or the pecuniary consideration; it will depend upon the situation of the parties, the nature of their business, the interests to be protected by the restriction, its effect **[**18]** upon the public; in short upon all the surrounding circumstances; and the weight or effect to be given to these circumstances is not to be affected by any presumption for or against the validity of the restriction; if reasonable and just, the restriction will be sustained, if not, it will be held void.

[*780] *Id. at 19-20*. Over time, the *Hubbard* standard evolved into a four-factor test in Michigan courts and was recognized as the "common law rule of reason." *See Cardiology Assocs. of Southwestern Michigan, P.C. v. Zencka, 155 Mich. App. 632, 400 N.W.2d 606, 607-08 (Mich. Ct. App. 1985)*. "First, the covenant must be for a just and honest purpose. Second, it must be established for the protection of the legitimate interest of the party in whose favor it is imposed. Third, it must be reasonable as between the parties to the contract. Finally, it must not be specially injurious to the public." *Id.; see also Woodward v. Cadillac Overall Supply Co., 396 Mich. 379, 240 N.W.2d 710, 714 (Mich. 1976)* ("It has long been established in English and Michigan common law that a balancing test is used to test the reasonableness or unreasonableness of a contractual restraint of trade," citing *Hubbard*).

Just as Michigan courts adopted the rule of reason in the context of covenants not to compete, the United States Supreme Court followed a similar course in interpreting the federal *Sherman Act*. ***HN7***[] In *Standard Oil Co. of New Jersey v.* ***[**19]*** *United States*, the Court interpreted the Sherman Act's prohibition against restraints of trade to outlaw only *unreasonable* restraints. *221 U.S. 1, 66-67, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. One of the best-known explanations of the rule of reason in the Sherman Act context is found in *Board of Trade of Chicago v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*:

> Every agreement concerning trade, every regulation of trade, restrains. To bind, to restrain, is of their very essence. The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine

> that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.[1]

The Michigan Supreme Court's **[**20]** application of a common-law rule of reason in *Hubbard* thus predated the federal courts' adoption of it in Sherman Act jurisprudence. *See* *Bristol Window & Door, Inc. v. Hoogenstyn, 250 Mich. App. 478, 650 N.W.2d 670, 676 (Mich. Ct. App. 2002)*. Michigan's judicially developed approach to restraints on trade was soon accompanied by state statutory law. In 1905, the Michigan Legislature enacted *MCL § 445.761*, which provided that:

> All agreements and contracts by which any person, copartnership or corporation promises or agrees not to engage in any avocation, employment, pursuit, trade, profession or business, whether reasonable or unreasonable, partial or general, limited or unlimited are hereby declared to be against public policy and illegal and void.

[*781] This broad proscription against any kind of noncompete agreements was limited by exceptions found in *M.C.L. § 445.766*.[2] Interestingly, even though these statutes did not expressly refer to a reasonableness standard, the Michigan Supreme Court continued to apply the rule of reason in addressing the validity of noncompete agreements. *Bristol Window, 650 N.W.2d at 677* (citing *Staebler-Kempf Oil Co. v. Mac's Auto Mart, Inc., 329 Mich. 351, 45 N.W.2d 316 (Mich. 1951))*. As *Bristol Window* points out, in the Michigan Supreme Court's 1951 *Staebler-Kempf* decision, the court quoted and applied the *Hubbard* rule of reason test to an agreement between a gasoline retailer and an oil company where the retailer **[**21]** agreed to exclusively sell the oil company's gasoline and at the same price as that charged by other gasoline retailers that the oil company supplied. *650 N.W.2d at 677*; *45 N.W.2d at 318-19*; *see also* *ARA Chuckwagon of Detroit, Inc. v. Lobert, 69 Mich. App. 151, 244 N.W.2d 393, 398 (Mich. Ct. App. 1976)* ("Covenants not to compete have always been governed by the rule of reason.").

However, Michigan law took another turn in 1984, when the state legislature enacted **[**22]** the *Michigan Antitrust Reform Act ("MARA")*, repealing former *§ 445.761*. Under MARA, "[a] contract, combination, or conspiracy between two or more persons in restraint of, or to monopolize, trade or commerce in a relevant market is unlawful." *M.C.L. § 445.772* (also known as *§ 2 of MARA*). This provision tracks its sister provision in the Uniform State Antitrust Act ("USAA") and was patterned after the Sherman Antitrust Act. *See* USAA Comment to *§ 2* ("This section gathers together and proscribes all concerted or collusive conduct in unreasonable restraint of trade, as under the common law and *section 1* of the Sherman Act, and to monopolize trade, as under *section 2* of the Sherman Act. . . . The adoption of Sherman Act language establishes its general standards of legality, provides needed flexibility, *and makes available to state courts the relevant body of federal precedent*.") (emphasis added).

---

[1] As discussed in greater detail below, this test continued to evolve in the Sherman Act context to the point where in the Sixth Circuit, plaintiffs bringing *§ 1* Sherman Act claims must prove that a defendant's conduct unreasonably restrains trade under a rigid "rule of reason" burden-shifting framework that includes a five-part test. *See* *Care Heating & Cooling, Inc. v. American Standard, Inc., 427 F.3d 1008, 1012 (6th Cir. 2005)*.

[2] *MCL § 445.766* provided:

> This act shall not apply to any contract mentioned in this act, nor in restraint of trade where the only object of restraint imposed by the contract is to protect the vendee, or transferee, of a trade pursuit, avocation, profession or business, or the good will thereof, sold and transferred for a valuable consideration in good faith, and without any intent to create, build up, establish or maintain a monopoly; nor to any contract of employment under which the employer furnishes or discloses to the employe[e] a list of customers or patrons, commonly called a route list, within certain territory in which such employe[e] is to work, in which contract the employe[e] agrees not to perform similar services in such territory for himself or another engaged in a like or competing line of business for a period of 90 days after the termination of such contract or services.

When initially enacted, MARA "contained no sections specifically addressing competition agreements," so the Michigan Supreme Court, as explained in *Compton v. Joseph Lepak DDS, PC, 154 Mich. App. 360, 397 N.W.2d 311 (Mich. Ct. App. 1986)*, stated that MARA's general provision—*§ 2*—and the common law rule of reason would govern the enforceability of all covenants restraining trade. *See* *Bristol Window, 650 N.W.2d at 678*. As the Court explained in *Bristol Window*:

> Although the noncompetition agreement **[**23]** at issue in *Compton* contained no limitation of its duration, [the Michigan Court of Appeals], citing the weight of authority from other jurisdictions, federal precedent, and Michigan law, *concluded that the agreement should be enforced to the extent reasonable according to 'the developed common law.'* [The court] reiterate[d] **[*782]** that [it] reached its conclusion despite that *§ 2 of the MARA* makes no explicit reference to a standard of reasonableness.

Id. (internal citations omitted) (emphasis added). *Compton* also explained that MARA was broader than its predecessor, because unlike *§ 445.761* "which declared void any agreement not to compete, whether reasonable or unreasonable, *§ 2 of MARA* only makes unlawful any contract which is an unreasonable restraint of trade, as under the common law or *§ 1* of the Sherman Act or monopolized trade under *§ 2* of the Sherman Act." *Compton, 397 N.W.2d at 314*. As Michigan courts have stated, the legislature's repeal of *§ 445.761*, and codification of *§ 2 of MARA* "clearly demonstrates the Legislature's intent to revive the common-law rule set forth in *Hubbard*, that the enforceability of noncompetition agreements depends on their reasonableness." *Bristol Window, 650 N.W.2d at 679* (internal citations omitted).

In 1987, the Michigan Legislature enacted *§ 4a of MARA*, which codified a test to **[**24]** determine the enforceability of a noncompetition agreement in the employer-employee context. *M.C.L. § 445.774a(1)* states:

> An employer may obtain from an employee an agreement or covenant which protects an employer's reasonable competitive business interests and expressly prohibits an employee from engaging in employment or a line of business after termination of employment if the agreement or covenant is reasonable as to its duration, geographical area, and the type of employment or line of business. To the extent any such agreement or covenant is found to be unreasonable in any respect, a court may limit the agreement to render it reasonable in light of the circumstances in which it was made and specifically enforce the agreement as limited.

Therefore, in the employer-employee context, *§ 445.774a(1)*, rather than the common law rule of reason, governs. Under *§ 445.774a(1)*, an employer-employee covenant not to compete must protect a party's reasonable competitive business interests, and its protection must be reasonable with respect to: (1) duration; (2) geographical scope; and (3) the line of business restricted. *St. Clair Med., P.C. v. Borgiel, 270 Mich. App. 260, 715 N.W.2d 914, 919 (Mich. Ct. App. 2006)*. In support of the consideration of these factors, the court in *St. Clair* looked to *Hubbard* and *Bristol Window* and stated **[**25]** that "*§4a(1)* represents a codification of the common-law rule 'that the enforceability of noncompetition agreements depends on their reasonableness.'" *St. Clair, 715 N.W.2d at 918*.

In considering the challenge to the 20-year noncompete agreement between Living Essentials and CNL in the absence of any conflicting authority from the Michigan Supreme Court, this Court applied *§ 445.774a(1)* to the parties' covenant not to compete, noting that it did not need to apply a different common law the rule of reason test because "a non-compete agreement's enforceability rests on its reasonableness, regardless of whether it involves an employment contract or not." ECF No. 219, PageID.9230 & n.41. This Court then concluded that Settlement Agreement's 20-year noncompete agreement was reasonable in scope and geographic area but was unreasonable as to duration. Consequently, the Court reformed the duration of the covenant to three years. *Id.* at PageID.9232-37. In applying that remedy, the Court relied upon *§ 445.774a(1)*, which empowers a Court to "limit the agreement to render it reasonable in light of the circumstances."

[*783] ii. The *Liquid Manufacturing* Decision

After this Court's decision, however, the Michigan Supreme Court decided *Innovation Ventures, LLC v. Liquid* ***[**26]*** *Manufacturing, LLC*, in which it expressly held that the common law rule of reason, rather than the statutory authority of § 445.774a(1), should be applied to business-to-business noncompete agreements, recognizing that § 2 of MARA was actually a codification of the rule of reason. 885 N.W.2d at 874 & n.18 (citing Bristol Window, 250 Mich. App. 478, 650 N.W.2d 670). In light of *Liquid Manufacturing*, the Sixth Circuit reversed this Court's decision to apply § 445.774a(1) to § 5.c.1 of the Settlement Agreement, explaining that *Liquid Manufacturing* "makes clear that business-to-business noncompete agreements like the one at issue here must be 'evaluated by the rule of reason,' not by analogy to employment noncompete agreements that do not 'address the proper framework.'" 912 F.3d 316, 340 (6th Cir. 2018).

Nonetheless, Defendants assert that § 445.774a(1), which this Court previously applied, is merely a codification of the rule of reason and consequently the Court should again conclude that § 5.c.(1) of the Settlement Agreement is an unreasonable restraint on trade because its duration is unreasonably long.[3] Conversely, Plaintiff suggests that because MARA was patterned after §§ 1-2 of the Sherman Antitrust Act, and Sherman Act jurisprudence has developed to include a rigid "rule of reason" burden-shifting framework, Defendants should be required to establish **[**27]** all the elements of a § 1 Sherman Act claim to demonstrate that the covenant not to compete is an unreasonable restraint on trade.

Unfortunately, neither the Michigan Supreme Court in Liquid Manufacturing nor the Sixth Circuit in its opinion in this case delineated clear standards under the rule of reason test for this Court to apply. And the parties here have capitalized on that ambiguity to advocate for a formulation of the rule of reason that most favors their interests. But in holding that the common law rule of reason—and not § 445.774a(1)—was the proper standard by which to judge business to business noncompete agreements, *Liquid Manufacturing* strongly suggested that the requirements of the two standards are not identical.

So what did the Michigan Supreme Court mean when it said that the rule of reason applies? ***HN8***[] In *Liquid Manufacturing*, it stated that when analyzing business-to-business noncompete agreements, MCL 445.784(2) requires that courts look to *federal* interpretation of *comparable statutes*. The *Liquid Manufacturing* court then cited to a decision from the Sixth Circuit, *Perceptron, Inc. v. Sensor Adaptive Machines, Inc., 221 F.3d 913 (6th Cir. 2000)*, and a decision from the Seventh Circuit, *County Materials Corp. v. Allan Block Corp., 502 F.3d 730, 735 (7th Cir. 2007)*, for the proposition that "federal **[**28]** courts have assessed noncompete agreements between two commercial entities under the rule of reason." *Liquid Mfg., 885 N.W.2d at 874*.

Perceptron involved a plaintiff bringing a breach of contract action alleging the defendant violated a covenant not to compete and a defendant asserting a counterclaim **[*784]** that the noncompete agreement violated ***antitrust law***. *221 F.3d at 917*. The jury found for the plaintiff, concluding that the covenant "was reasonable, enforceable (including permitted under the antitrust laws[])," that the defendant had breached the covenant, and that the defendant had failed to prove that the noncompete agreement constituted an unreasonable restraint of trade in violation of federal antitrust laws. *Id. at 917-18*. Post-trial, the defendant moved for judgment as a matter of law, or in the alternative, for a new trial on both the plaintiff's breach of contract claim and its counterclaims. *Id. at 918*. The trial court denied the defendant's motion. *Id.* On appeal, the defendant contested the jury's finding that the noncompete agreement was a valid and reasonable restraint on competition under federal and state antitrust laws. *Id.* The Sixth Circuit analyzed the legality of the noncompete agreement "under the rule of reason test," citing a Seventh **[**29]** Circuit case, *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 265 (7th Cir. 1981)*. *Perceptron*'s formulation of the rule reason states:

> [C]ovenants not to compete are valid if (1) ancillary to the main business purpose of a lawful contract, and (2) necessary to protect the covenantee's legitimate property interests, which require that the covenants be as limited as is reasonable to protect the covenantee's interests. *United States v. Addyston Pipe & Steel Co., 85 F. 271, 281-82 (6th Cir. 1898)*; *aff'd as modified*, *175 U.S. 211, 20 S. Ct. 96, 44 L.Ed. 136[ ] (1899)*.

---

[3] Defendants cite *Bristol Window* for the proposition that *§ 445.774a(1)* is a codification of the rule of reason, ECF No. 400, PageID.24279, but that is not what *Bristol Window* nor *Liquid Manufacturing* stated. Rather, as the Michigan Court of Appeals made clear in *St. Clair*: "*§4a(1)* represents a codification of the common-law rule 'that the enforceability of noncompetition agreements depends on their reasonableness.'" *St. Clair, 715 N.W.2d at 918*.

221 F.3d at 919 (quoting Lektro-Vend, 660 F.2d at 265).

Interestingly, the Sixth Circuit's formulation is not the traditional five-factor burden shifting framework commonly applied in pure § 1 Sherman Act claims and proposed by Plaintiff to be applied here. *See* Care Heating, 427 F.3d at 1014 (citing Int'l Logistics Grp. Ltd. v. Chrysler Corp., 884 F.2d 904, 907 (6th Cir. 1989)). Rather, when analyzing whether there was any basis for the jury to conclude that the noncompete agreement was a valid and reasonable restraint on competition, the Sixth Circuit considered the evidence the jury heard regarding several factors: (1) whether the aggrieved party continued to develop products that did not compete, (2) the need for the noncompete agreement, (3) the value of the goodwill acquired to determine whether the noncompete agreement was ancillary to the purpose of contract, (4) the reasonableness of the duration, geographic reach, and product scope of the noncompete **[**30]** agreement, and (5) that motivation to escape competition, alone, does not make a noncompete agreement an unreasonable restraint on competition. *Id. at 919-20*. In weighing all of these factors, the Sixth Circuit concluded that "reasonable minds could differ about whether the non-compete agreement was ancillary to the transaction and a *reasonable restraint on competition*" affirming the district court's denial of the defendant's motion for judgment as a matter of law. *Id. at 919* (emphasis added). Of note, the Sixth Circuit concluded that the jury heard evidence that the plaintiff purchased goodwill and a customer base—not just an escape from competition, and that reasonable minds could differ about whether five years was a reasonable duration for the plaintiff to protect its ability to realize the benefit of the transaction. *Id. at 919-20*.

The other federal appellate decision cited by the Michigan Supreme Court as an example of a "rule of reason" case, *County Materials*, did not concern an antitrust claim. 502 F.3d 730, 735 (7th Cir. 2007). Rather, a manufacturer brought an action seeking a declaration that a covenant not to compete in a patent licensing agreement was unenforceable. *Id.* In the patent misuse context, "[u]nder the rule of reason, **[*785]** the finder **[**31]** of fact must decide whether the questioned practices imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." County Materials, 502 F.3d at 735 (quoting Virginia Panel Corp. v. MAC Panel Co., 133 F.3d 860, 869 (Fed. Cir. 1997)). *County Materials* also clarified that "[a]nticompetitive effects . . . are a critical element of any patent misuse case that is evaluated under a rule of reason approach." *Id. at 736*. And, of particular relevance to this case, the court stated that it would assume that it was "not necessary for a plaintiff to plead a case that would suffice to show that the antitrust laws have been violated. *But, at the summary judgment stage, some evidence tending to show an adverse effect in an economically sound relevant market is essential for any claim governed by the rule of reason*." *Id.* (emphasis added).

Specifically, the Seventh Circuit considered whether the noncompete agreement: (1) showed signs of one-sidedness or abuse of power, (2) permitted the aggrieved party to continue selling or producing similar competing products in the market, had temporal and geographic limits, and (3) **[**32]** whether the aggrieved party had shown that the noncompete had a broader effect on the market, as opposed to an effect only on the aggrieved party. *Id. at 736-37*. The court concluded that the covenant not to compete was not "particularly onerous" because it allowed County Materials to continue to manufacture and sell two competing products, was temporally limited because it lasted for only 18 months, and was geographically limited because it applied only to County Materials' exclusive production territory (a section of Wisconsin). Further, because there was no evidence in the record that the restrictive covenant had any effect on the broader market (as opposed to an effect only on County Materials) the defense that the covenant was unreasonable under the rule of reason could not succeed. *Id. at 737*

Liquid Manufacturing also cited the Supreme Court's decisions in State Oil Co. v. Khan, 522 U.S. 3, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997) and Bd. of Trade of City of Chicago v. United States, 246 U.S. 231, 38 S. Ct. 242, 62 L. Ed. 683 (1918), two seminal cases applying the rule of reason test in the context of Sherman Act claims.[4] ***HN9***[] More recent jurisprudence under the Sherman Act has evolved to a specific five-part rule of reason test that plaintiffs must meet in order to pass muster. Consequently, to make out a valid claim under § 1 of Sherman Act, the

[4] The *Board of Trade of Chicago* excerpt quoted by *Liquid Manufacturing* is quoted above at page 16.

> [r]ule of reason analysis requires **[**33]** the plaintiff to prove (1) that the defendant(s) contracted, combined, or conspired; (2) that such contract produced adverse anticompetitive effects; (3) within relevant product and geographic markets; (4) that the objects of and conduct resulting from the contract were illegal; and (5) that the contract was a proximate cause of the plaintiff's injury.

Care Heating & Cooling, Inc. v. American Standard, Inc., 427 F.3d 1008, 1014 (6th Cir. 2005). This five-factor test aids the Court in discerning whether a plaintiff as overcome the first of a three-part burden-shifting framework:

> First, the plaintiff must establish that the restraint produces significant anticompetitive effects within the relevant **[*786]** product and geographic markets. [Then,] [i]f the plaintiff meets this burden, the defendant must come forward with evidence of the restraint's procompetitive effects to establish that the alleged conduct justifies the otherwise anticompetitve injuries. [Finally,] [i]f the defendant is able to demonstrate procompetitive effects, the plaintiff then must show that the legitimate objectives can be achieved in a substantially less restrictive manner.

Id. at 1012 (quoting *Nat'l Hockey League Players' Ass'n v. Plymouth Whalers Hockey Club, 325 F.3d 712, 718 (6th Cir. 2003))* (alterations in original).

Plaintiff argues that because the Michigan Supreme Court cited **[**34]** these early Sherman Act cases, it intended to require that any successful challenges to business noncompete clauses must likewise make out a prima facie case of a *§ 1* Sherman Act claim. Put differently, because the Sherman Act rule of reason test developed from the formulation in *Board of Trade of Chicago* to this five-factor test, and because *Liquid Manufacturing* and *Innovation Ventures* make reference to the Sherman Act, Plaintiff argues NSL should be required to meet all five elements of the test set out in *Care Heating* to prove that the covenant not to compete in the Settlement Agreement is an unreasonable restraint on trade.

There is some appeal to Plaintiff's argument. Indeed, why else would the courts in *Liquid Manufacturing* and *Innovation Ventures* cite to Sherman Act cases—where the modern case law has developed its own carefully articulated "rule of reason" test—if they intended to apply some less exacting standard? And both Sixth Circuit and Michigan courts agree that *§ 2 of MARA* "adopted language from and is interpreted consistent with the Sherman Act." *Perceptron, 221 F.3d at 919 n.6* (citing *Compton v. Joseph Lepak, DDS, PC, 154 Mich. App. 360, 397 N.W.2d 311 (Mich. Ct. App. 1986))*.

But it is also the case that the Michigan Supreme Court did not quote *Care Heating* or any number of other governing Sherman Act **[**35]** cases applying this five-factor test. Rather, it quoted a rule of reason test developed in a 1918 Supreme Court Sherman Act case which requires courts to weigh a number of factors, under the framework that "[t]he true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Bd. of Trade of City of Chicago, 246 U.S. at 238*. Those factors are: "the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable." *Id.* Additionally, "[t]he history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, [and] the purpose or end sought to be attained." *Id.* Also telling, when the Michigan Supreme Court declared that the rule of reason should be applied, it cited *Perceptron* (which involved antitrust claims, but did *not* apply the five-factor test), and *County Materials* and *Bristol Window* (both of which did not involve antitrust claims).

In reviewing the various factors articulated in *Board of Trade, Perceptron*, and *County Materials*, the cases cited in *Liquid **[**36]** Manufacturing*, the Court finds they are more in line with the venerable old *Hubbard* factors from 1873 than they are with the 21st Century five-factor test set out in *Care Heating*.[5] And while "MARA **[*787]** was enacted

---

[5] Plaintiffs rely on *Little Caesar Enters., Inc. v. Creative Rest. Inc., No. 16-14263, 2017 U.S. Dist. LEXIS 174623, 2017 WL 4778721 (E.D. Mich. Oct. 23, 2017)*, to argue that a full Sherman Act analysis should be applied when analyzing the breach of a business-to-business restrictive covenant. But that case involved trademark infringement, unfair competition, and trade dress

in order to create uniform state laws and to draw upon federal antitrust decisions," Compton v. Joseph Lepak, D.D.S., P.C., 154 Mich. App. 360, 397 N.W.2d 311, 316 (Mich. Ct. App. 1986), this Court can discern no reason why a defendant seeking to defend against the breach of a covenant not to compete should have to prove all the strict elements of a § 1 Sherman Act claim to meet its burden. The Court may "draw upon federal antitrust decisions" and take guidance from decisions such as *Board of Trade* without necessarily imposing all the requirements of a § 1 Sherman Act claim.[6]

HN10[] This Court also finds that a common theme among each of these formulations of the rule of reason is that the party challenging the restrictive covenant must demonstrate that it causes some harm to competition in the greater product market. This effect on the greater market appears to be the most substantial difference between the showing that must be made under § 445.774a(1) and that which would be required under the rule of reason framework. Indeed, as outlined above, Perceptron, County Materials, and **[**37]** Board of Trade consider duration, geographical scope, and reasonableness between the parties under the rule of reason, but they also consider the restrictive covenant's impact on competition in the wider market. Even *Hubbard* required consideration of the covenant's "effect upon the public." 27 Mich. at 19-20. **HN11**[] In other words, it is not enough—as Defendants contend—for the Court to examine the covenant's duration, geographic scope, type of conduct prohibited, and business interests justifying the restriction—as it did in its prior order. Based on this Court's understanding of the Michigan Supreme Court's reasoning in *Liquid Manufacturing*, the Court concludes that the following factors should be considered when applying the rule of reason test to evaluate challenges to noncompete agreements in the business-to-business context under Michigan law: (1) whether the restraint is ancillary to the main business purpose of an otherwise lawful contract; (2) whether the restraint protects legitimate property interests, for example, goodwill; (3) whether the restraint's duration, geographic reach, and scope are reasonable considering the nature of the property interest being protected; and (4) whether the restraint **[**38]** suppresses or destroys competition in the relevant market. The Court must take into account each of these factors to determine whether the restraint is reasonable or void. Hubbard, 27 Mich. at 20 ("[I]f reasonable and just, the restriction will be sustained, if not, it will be held void.").

iii. Application of the "rule of reason" test

In attempting to apply the rule of reason, the Court first acknowledges the relevance of many of the Court's prior findings. This Court has already found that Plaintiff has a legitimate business interest **[*788]** in the Choline Family restrictions and that the scope and geographic locations of the restrictions are reasonable. ECF No. 219, PageID.9232. Further, as in *Perceptron*, here the Court has already concluded that the noncompete agreement was ancillary to the main purpose of the Settlement Agreement. 221 F.3d at 919. Defendants previously conceded that Living Essentials' desire to protect its goodwill was a legitimate business purpose. ECF No. 219, PageID.9232. And this Court held that the restrictive covenant "had perhaps a greater than normal concern to protect its goodwill from these parties because they had previously admitted to wrongfully manufacturing [5-Hour Energy] in the past." ECF No. 219, PageID.9232.

But **[**39]** this Court also originally held that § 5.c.i's 20-year duration was unreasonable. ECF No. 219, PageID.9234 (stating that "courts have upheld time periods of six months to three years") (quoting Lowry Computer Prods. Inc. v. Head, 984 F. Supp. 1111, 1116 (E.D. Mich. 1997)). However, Lowry involved an employer-employee noncompete agreement, as did Radio One, Inc. v. Wooten, 452 F. Supp. 2d 754, 759 (E.D. Mich. 2006), and Rooyakker & Sitz, P.L.L.C. v. Plante & Moran, P.L.L.C., 276 Mich. App. 146, 742 N.W.2d 409, 418 (Mich. Ct. App.

---

infringement claims, not just a breach of contract action. And it neither applied all five Sherman Act factors nor did it clearly hold that all the Sherman Act factors must be met in a breach of contract action.

[6] The Court appreciates that both the Sixth Circuit and the Michigan Supreme Court in *Liquid Manufacturing* considered the Sherman Act concepts of per se violations and horizontal restraints on trade. *See* 912 F.3d at 340-41; 885 N.W.2d at 874. But while the Sixth Circuit and Michigan Supreme Court discussed these Sherman Act concepts, they did not expressly require that defendants challenging a noncompete agreement would necessarily need to prove all the elements of a § 1 Sherman Act claim.

2007). The only cases cited by the Court outside of the employer-employee context were Bristol Window, 650 N.W.2d at 679, and In re Spradlin, 284 B.R. 830, 836 (E.D. Mich. 2002). *In re Spradlin* held that five years was reasonable, 284 B.R. at 836, while *Bristol Window* considered a three-year limitation and remanded for the trial court to determine whether the length was reasonable, 650 N.W.2d 670, 250 Mich. App. at 498.

The Court's additional review of Michigan cases involving business-to-business noncompete agreements has discovered several other cases, one finding a 5-year noncompete clause reasonable, another allowing a duration of 20 years, and a third holding that a never-ending noncompete agreement would be categorically unreasonable. For example, in *Brillhart v. Danneffel*, the Michigan Court of Appeals analyzed a covenant not to compete between the buyer and seller of a restaurant under a reasonableness standard. 36 Mich. App. 359, 194 N.W.2d 63, 65 (Mich. Ct. App. 1971). It held that the business-to-business noncompete agreement was reasonable because the defendant understood they were signing a 5-year, 10-mile **[**40]** restriction, the defendant's agent wrote the agreement, and they voluntarily signed the contract. 36 Mich. App. 359, 194 N.W.2d 63, 65 (Mich. Ct. App. 1971). *Brillhart* distinguished a case in which the court found a covenant to be unreasonable because it required the seller to "never" re-engage in the relevant business. Id. at 65-66 (citing Wolverine Sign Works v. Powers, 248 Mich. 371, 227 N.W. 669, 670 (Mich. 1929) ("Never is a long time. It is a longer time than necessary to enable the purchaser of a business to convert the good will into a good will personal to himself.")).

And more recently, in the unreported decision of *Lieghio v. Loveland Invs.*, the Michigan Court of Appeals held that a 12-mile, 20-year covenant not to compete in a hotel business was not unreasonable because "the parties' agreement is similar to those upheld in a long line of cases, like *Brillhart*, that have sanctioned covenants not to compete where they are merely a reasonable restraint on a seller's competitive efforts in order to promote the buyer's realization of goodwill in the purchased business." Nos. 285393-94, 2009 Mich. App. LEXIS 2284, 2009 WL 3491620, at *1, 5 (Mich. Ct. App. Oct. 29, 2009) (citing Hubbard, 27 Mich. at 19, 21). These decisions do not provide the Court with much comfort that a business-to-business noncompete agreement lasting 20 years would necessarily be found reasonable under the rule of reason test, but nor **[*789]** do they clearly indicate that a 20-year noncompete **[**41]** agreement with otherwise reasonable terms would automatically be voided under the rule of reason. Particularly where, as here, the record indicates that Jones testified he knew the covenant's duration was 20 years when he signed the document, and that NSL was free during this time to manufacture energy shots—though not using Choline Family ingredients. That said, the Court has also already found that Living Essentials "has failed to provide a reasonable justification for a [20-year] restriction" and that its interest in protecting its goodwill does not justify this decades-long restriction. ECF No. 219, PageID.9235. And it has articulated its skepticism that Living Essential's "attempt to achieve the protections of a patent vis-à-vis Custom Nutrition [and NSL] without having demonstrated that it was legally entitled to a patent is not a reasonable use of a non-compete agreement." *Id.* at PageID.9263.

But as explained above, the key feature that makes the rule of reason different from the test the Court already applied in its prior Order is the requirement that a defendant show—in addition to these other factors—a reasonable likelihood that enforcing the restrictive covenant will cause **[**42]** anticompetitive effects. In order to make this showing, the Court concludes a defendant may present the kind of evidence that would tend to support a § 1 Sherman Act claim under the five-factor burden-shifting rule of reason framework because such evidence is probative of the anticompetitive nature of the alleged restraint.[7] But at the same time, it is not necessary that the defendant present evidence sufficient to prove all of the elements required to make out a Sherman Act antitrust violation.

---

[7] As detailed above, the Seventh Circuit took a similar approach in *County Materials* for patent misuse cases. 502 F.3d at 736 (stating that it is "not necessary for a plaintiff to plead a case that would suffice to show that the antitrust laws have been violated. *But, at the summary judgment stage, some evidence tending to show an adverse effect in an economically sound relevant market is essential for any claim governed by the rule of reason*") (emphasis added).

Defendants rely on the report provided by Living Essentials' damages expert to show that Plaintiff's product holds a significant percentage of the energy shot market and therefore has market power.[8] Given this market power, Defendants assert there is a potential for anticompetitive effects under the rule of reason. ECF No. 415, PageID.26022-24. But NSL has not argued how *the restrictive covenant* causes anticompetitive effects. The case Defendants rely on, *Realcomp II, Ltd. v. F.T.C., 635 F.3d 815 (6th Cir. 2011)*, requires such a showing.[9] *Realcomp II* holds that: **[**43]** "[m]arket power and *the anticompetitive nature of the restraint* are sufficient to show the potential for anticompetitive effects under a rule-of-reason analysis, and once this showing has been made, [the proponent of the restraint] must offer procompetitive **[*790]** justifications. *Id. at 827*. Here, NSL emphasizes the market power element but entirely ignores the "anticompetitive nature of the restraint" element.

In other words, at this stage, Defendants have not created a genuine issue of material fact that the restrictive covenant has anticompetitive effects on the energy shot market. Regardless of whether Plaintiff has market dominance, Defendants must be able to show a jury that the 20-year restrictive covenant between Plaintiff and Defendants had anticompetitive effects on the market. NSL's reliance on Plaintiff's alleged market dominance alone does not show, or raise a genuine issue of fact, that the restrictions between NSL and Living Essentials "narrows consumer choice" or "hinder[s] the competitive process." *Id. at 829*. *See also* *Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)* (requiring an analysis of "the competitive significance of the restraint"). Put differently, NSL must create a genuine issue of material fact that **[**44]** the restrictive covenant not only harmed NSL, but that it also harmed competition in the greater energy shot market (whether because an NSL free of the restrictive covenant would have been such a significant market competitor that their elimination for 20 years harmed the market as a whole, or for some other reason). That Plaintiff may have captured a large percentage of *NSL's sales* because NSL was unable to produce a competing product containing Choline Family ingredients would be relevant if NSL could show that its lost sales would have been large enough to impact the energy shot market. A subsidiary issue may also be, for example, whether the Choline Family ingredients are influential in determining a product's success in the energy shot market. At this point, Defendants have not made anything like this kind of showing, and the report of Plaintiff's damage expert does not do it for them.[10]

Moreover, this Court has already found that the covenant does not prevent Defendants from competing in the energy shot market. Rather, it prevents Defendants from using one family of ingredients. ECF No. 219, PageID.9233. NSL "can continue to develop, market, and distribute energy liquids using **[**45]** all other types of ingredients." *Id.* Defendants' assertion that Plaintiff's alleged market power is a sufficient showing under *Realcomp* ignores this Court's finding that the noncompete agreement does not prevent Defendants from competing in the energy shot market. It also fails to explain how this market share is *caused* by the restrictive covenant—or indeed how the covenant impacts energy shot manufacturers other than Defendants.

Further, at trial, Jones testified that of the 17 energy shots Custom Nutrition produced at the time it entered into the Settlement Agreement, only 2 were affected by the restrictive covenant, or so he could recall. ECF No. 305,

---

[8] The details of this report are under seal. Further, this expert testified he was defining the relevant product markets strictly for purposes of damages calculations, which was a different consideration than defining product markets for purposes of an antitrust analysis.

[9] Notably, *Realcomp II* is a Sherman Act case, and it applies that rigid five-factor burden-shifting test developed in the Sixth Circuit under the Sherman Act. As explained above, in *Liquid Manufacturing*, the Michigan Supreme Court did not hold that the application of the rule of reason test would necessarily require proof of all the elements of a *§1* Sherman Act claim, but it did cite to antitrust cases that have applied the rule of reason, indicating that the kinds of proof offered in such cases would be useful to parties attempting to show anticompetitive effects.

[10] For the same reasons, the Court will not conduct a "quick look rule of reason" analysis under the Sherman Act as NSL suggests. *See* ECF No. 415, PageID.26024. Not only is that a Sherman Act concept not applicable here, it is reserved for the situation where "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." *Cal. Dental Ass'n. v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. NSL has not shown this degree of anticompetitive effect to warrant any "abbreviated" rule of reason analysis.

PageID.13854. While NSL denies that it produced any of the other 17 energy shots, ECF No. 415, PageID.26014, the question is not whether NSL is harmed by the restriction, but whether the greater energy shot market is. That these other energy shots compete **[*791]** successfully in the marketplace without Choline Family ingredients may be telling. *See* Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 265 (7th Cir. 1981) ("Legitimate reasons exist to uphold noncompetition covenants even though by nature they necessarily restrain trade to some degree. The recognized benefits of reasonably enforced noncompetition **[**46]** covenants are by now beyond question."). In sum, while market power may be inferred from evidence of significant market share, Defendants still must show "the anticompetitive nature *of the restraint*," which Defendants have not shown, or raised a genuine issue of material fact from which a jury could conclude as such. Realcomp II, 635 F.3d at 827.

iv. NSL is entitled to discovery on anticompetitive effects

The Sixth Circuit's remand order on the rule of reason issue acknowledged that this "fact-intensive determination" falls appropriately with the district court and it tasked the parties with providing "the detailed record information necessary" to enable this Court to apply the rule of reason test. 912 F.3d at 342. On its own, the Sixth Circuit did not apply the rule of reason or find as a matter of law that NSL had or had not met the test.

In light of the new test articulated by the Michigan Supreme Court and identified by the Sixth Circuit—and as it must now be applied by this Court—NSL could not have known that it would be required to develop evidence regarding the potential anticompetitive effects of the restrictive covenant to defeat Plaintiff's breach of contract claim when it was initially engaged in discovery with Plaintiff. **[**47]** Neither the parties nor the Court were operating with the understanding that the rule of reason test as outlined by *Liquid Manufacturing*, required by the Sixth Circuit's decision in this case, and now fleshed out by this Court would govern the interpretation of the restrictive covenant and consequently determine the boundaries of relevant evidence affecting the question of its reasonableness. The Court believes this weighs in favor of permitting NSL additional limited discovery on the question of whether § 5.c.i of the Settlement Agreement has anticompetitive effects. *C.f.* Grant v. Metro. Gov't. of Nashville & Davidson Cty., 646 Fed.Appx. 465, 467-68 (6th Cir. 2016) (where additional discovery on remand of disparate impact claim was not allowed because Sixth Circuit found *as a matter of law* that plaintiffs failed to establish a *prima facie* case of disparate-impact discrimination).

This course of action also makes sense because, as explained in greater detail below, the Lead Case is no longer operating on a static record. Living Essentials has moved to consolidate the Lead and Secondary Cases and has requested the Court to allow additional, narrowly tailored discovery on a number of subjects related to the claims of the Secondary Case against Lily of the Desert. Because the Court will **[**48]** grant Plaintiff's motion later in this Order, it will be necessary for discovery to be re-opened in any event. In the interests of justice, both NSL and Lily of the Desert should also be given the opportunity to develop evidence on the issue of anticompetitive effects under the rule of reason.[11]

[*792] Accordingly, the Court **DENIES** Plaintiff's motion for summary judgment (ECF No. 420) and **DENIES** Defendants motion for summary judgment (ECF No. 200), as Defendants should have the opportunity to conduct additional, targeted and limited discovery on whether there is a reasonable likelihood that enforcing the restrictive covenant will cause anticompetitive effects. The Court makes no finding at this time as to whether the restrictive covenant violates the rule of reason. As such, the Court also need not resolve the question at this time as to whether reformation is an appropriate remedy if a business-to-business noncompete agreement is found to violate the rule of reason. Liquid Mfg., 885 N.W.2d at 870-71 & n.21.

---

[11] Plaintiff contends that additional discovery is not appropriate because NSL initially brought an antitrust counterclaim and therefore had the opportunity to conduct such discovery. *See* Second Amended Counterclaim, ECF No. 188. First, that claim was dismissed because it was time barred. ECF No. 337. And more importantly, in light of this Court's decision to consolidate the Lead and Secondary Cases on *Plaintiff*'s motion, and to reopen discovery once consolidation is complete, NSL and Lily should have the opportunity to conduct discovery on anticompetitive effects under the rule of reason.

C. Consolidation of the Lead and Secondary Cases

i. Consolidation is warranted

In addition to the parties' cross motions for summary judgment on the application of the rule of reason, Plaintiff also moves to consolidate **[**49]** the Lead Case with the Secondary Case involving Lily of the Desert. *See* ECF No. 403. Plaintiff alleges that while litigating the Lead Case, it learned that NSL was actually the nutrition division of L.D.O.C. Group, Ltd. ("LD Operating"), which in turn was owned by L.D.O.C., Inc. ("LD Inc."). Secondary Case, 16-11179, ECF No. 1, PageID.7. Plaintiff brought suit against LD Operating and LD Inc. (together "Lily"), asserting that they are alter egos of NSL. In the complaint, Plaintiff alleges Lily should be liable for NSL's breaches of § 5.c.i of the Settlement Agreement as uncovered in the Lead Case (if it is found that NSL is insolvent and unable to pay any judgment against it), as well as for additional breaches occurring after discovery concluded in the Lead Case. *Id.* at PageID.36-37.[12] Further, the complaint alleges that Lily, as an alter ego of NSL, produced energy liquids containing Alpha-GPC and Betaine, which a jury has already concluded are prohibited ingredients under the Choline Family restrictions. Jury Verdict Form, ECF No. 296. However, the complaint also alleges that Lily and NSL may have produced energy liquids containing other, unspecified Choline Family ingredients (that presumably **[**50]** could be discovered during the discovery process). No. 16-11179, ECF No. 1, PageID.19, 34.

Alternatively, if LD Operating and LD Inc. are not alter egos of NSL, Plaintiff alleges in the complaint that LD Operating and LD Inc. (as separate and distinct entities) induced Jones, CNL and/or NSL to breach § 5.c.i[13] by assisting them in producing energy liquids containing Choline Family ingredients, resulting in tortious interference with contract and business expectancy. *Id.* at PageID.44-48. Additionally, **[*793]** Plaintiff contends they are liable under the Texas or Michigan Uniform Fraudulent Transfer Act for receiving substantially all of NSL's assets without adequate consideration and Plaintiff seeks an order avoiding those transfers and awarding Plaintiff monetary recovery "in whatever amount Plaintiff is found to be entitled."[14] *Id.* at PageID.48-50. Plaintiff also alleges a civil conspiracy claim against NSL and Lily. *Id.* at 50-51.

With this summary of the Secondary Case in mind, Plaintiff argues that the Lead and Secondary Cases involve multiple common issues of law and fact which should persuade this Court to exercise its discretion and consolidate the cases for trial. ECF No. 403. Living Essentials contends **[**51]** that because a jury trial has already concluded that Alpha-GPC and Betaine are Choline Family ingredients, consolidation will ensure swifter recovery against NSL and Lily for their alleged violations. NSL argues that consolidation is not appropriate because (1) transfer of the Secondary Case to the Eastern District of Texas pursuant to *28 U.S.C. § 1404(a)* is appropriate, (2) Plaintiff did not appeal the Court's order denying Plaintiff's motion to amend its complaint to add the Lily defendants and associated

---

[12] Paragraphs 141 and 142 of the Complaint allege that "[i]n April 2014, the NSL division ceased operations and all assets, including at least four of the accounts or agreements to produce the Secret Products, were transferred to LD Operating or LD Inc. and LD Operating began to produce and sell at least four of the Secret Products. . . . Such transfer occurred without any agreement or consideration." No. 16-11179, ECF No. 1, PageID.31.

[13] The Complaint also alleges violations of other provisions of the Settlement Agreement. However, because this Court has already held—and the Sixth Circuit affirmed—that NSL is only bound by § 5.c of the Settlement Agreement by virtue of its incorporation into the Asset Purchase Agreement, the Court will only discuss those counts in the 16-11179 Complaint that assert violations relating to § 5.c. *See 912 F.3d at 338-39*; ECF No. 343 (Order on Motions for Summary Judgment disposing of counts II, IV, V, VII and VII in Lead Case).

[14] It is unclear from Plaintiff's Complaint in Case No. 16-11179 whether Plaintiff is arguing that under the Michigan/Texas Fraudulent Transfer Act, it is able to recover for "new" breaches by Lily of the Desert (i.e., breaches that were not specifically made by NSL during the time frame that the parties' damages experts analyzed).

claims and therefore this holding is the law of the case,[15] and (3) the cases do not involve multiple issues of law and fact justifying consolidation. ECF No. 409.

HN13[] Pursuant to *Federal Rule of Civil Procedure 42(a)(2)*, "[i]f actions before the court involve a common question of law or fact, the court may . . . consolidate the actions." The party seeking consolidation, here Plaintiff, bears the burden of proving that consolidation should be granted. *Invest-Import v. Seaboard Surety Co., 18 F.R.D. 499, 500 (S.D.N.Y 1955)*. And the essential test "is whether there are common questions of law or fact." *Hasman v. G.D. Searle & Co., 106 F.R.D. 459, 460 (E.D. Mich. 1985)* (citing *Brewer v. Republic Steel Corp., 513 F.2d 1222 (6th Cir. 1975))*. "Consolidation is in the sound discretion of the court." *Id.* (citing *Stemler v. Burke, 344 F.2d 393 (6th Cir. 1965))*.

HN14[] A trial court making a decision to consolidate must consider:

> [W]hether the specific risks of prejudice and possible confusion [are] overborne **[**52]** by the risk of inconsistent adjudications of common factual and legal issues, the burden on parties, witnesses and available judicial resources posed by multiple lawsuits, the length of time required to conclude multiple suits as against a single one, and the relative expense to all concerned of the single-trial, multiple-trial alternatives.

Cantrell v. GAF Corp., 999 F.2d 1007, 1011 (6th Cir. 1993) (quoting *Hendrix v. Raybestos-Manhattan, Inc., 776 F.2d 1492, 1495 (11th Cir. 1985))*. "Thus, the decision to consolidate is one that must be made **[*794]** thoughtfully, with specific reference to the factors identified above." *Id.* "Care must be taken that consolidation does not result in unavoidable prejudice or unfair advantage. Conservation of judicial resources is a laudable goal. However, if the savings to the judicial system are slight, the risk of prejudice to a party must be viewed with even greater scrutiny." *Id.* "When cases involve some common issues but *individual issues* predominate, consolidation should be denied. Consolidation is not justified or required simply because actions *include* a common question of fact or law." *Hasman, 106 F.R.D. at 461* (internal citations omitted) (emphasis in original). "Consolidation is improper when the introduction of 'voluminous' evidence, relevant to one of the consolidated actions but irrelevant to another, **[**53]** impairs the conduct of trial." *Id.* (citing *Flintkote Co. v. Allis-Chalmers Corp., 73 F.R.D. 463, 465 (S.D.N.Y. 1977)*.

Applying the *Cantrell* factors here, the Court finds that consolidation is appropriate. First, any risks of prejudice and confusion are overborne by the risk of inconsistent adjudications of common factual and legal issues. In order for Plaintiff to win a judgment from Lily for any of its alleged violations of the Settlement Agreement (pre and post April 2014) in the Secondary Case, Plaintiff would have to prove both that Lily was an alter ego and that Alpha-GPC and Betaine are Choline Family ingredients. Although a jury has already established this in the Lead Case, ECF No. 296, if the Secondary Case is not consolidated, it is at least possible that a second jury might disagree and conclude that Lily's production of energy liquids containing these ingredients does not violate the Choline Family restrictions. In such circumstances, Plaintiff would be unable to recover a judgment from Lily even if it proved that Lily and NSL were alter egos.

Further, special jury verdict forms could be created to avoid juror confusion. In a consolidated trial, the jury could be instructed to first consider whether Lily is NSL's alter ego. If yes, the jury could **[**54]** determine what damages Plaintiff is entitled to for Lily and NSL's usage of the Choline Family ingredients, as litigated in the first trial. If the jury does not conclude that Lily is NSL's alter ego, the jury would be instructed to consider whether, as a discrete and separate entity, Lily violated the Michigan Uniform Fraudulent Transfer Act and engaged in tortious interference with business expectancy and contract. To be sure, Plaintiff's claims against Lily as an alter ego rely, in part, on the speculation that NSL is insolvent and would be unable to pay any judgment against it in the Lead Case. But even if

---

[15] ***HN12***[] However, just because the Court at one time denied a plaintiff's motion to amend its complaint does not preclude a party from later moving to consolidate by invoking the Court's discretionary power to do so under *Federal Rule of Civil Procedure 42(a)(2)*. This is not barred by the mandate rule because the district court is free on remand to consider issues remanded, issues arising for the first time after remand, and "issues that were timely raised before the district and/or appellate courts but which remain undecided." Wright & Miller Fed. Prac. & Proc. § 4478.3 (quoting *United States v. Morris, 259 F.3d 894, 898-99 (7th Cir. 2001))*.

Lily is not found to be NSL's alter ego, Plaintiff's tortious interference and fraudulent transfer claims would still be closely related to the Lead Case. This is because Plaintiff argues they arise from Lily's interference with Plaintiff's rights under § 5.c.1 "and its improper efforts—*during the course of the* [*Lead Case*]—to assist NSL in avoiding ultimate judgment collection." Secondary Case, No. 16-11179, ECF No. 16, PageID.643. Indeed, as the Sixth Circuit acknowledged when it consolidated the Lead and Secondary Cases on appeal, "[a]ll claims in the Secondary Case relate to the **[**55]** same nucleus of fact as in the Lead Case, and [Living Essentials] concedes that the claims in the Secondary Case 'rise or fall with the rulings in the lead case.'" *912 F.3d at 326*.

Second, any risk of prejudice or confusion is overcome by the burden on the parties, witnesses and available judicial resources posed by multiple lawsuits, including the time and expense of trying multiple suits rather than a single one. While limited discovery would be required to determine whether an alter ego relationship **[*795]** exists, whether Lily tortiously interfered with NSL's obligations under the Settlement Agreement, and to investigate and calculate additional damages for any alleged violations by Lily after April 2014, such limited discovery would be a comparatively minor inconvenience compared to the amount of judicial resources saved by not duplicating discovery in the Lead Case for the Secondary Case. Indeed, Plaintiff has cited to discovery from the Lead Case that it intends to use to prove an alter ego relationship and underlying facts for the remaining Lily claims. This weighs in favor of consolidation. *See* *White v. Baxter Healthcare Corp., No. 05-71201, 2008 U.S. Dist. LEXIS 107241, 2008 WL 5273661, at *3 (E.D. Mich. Dec. 17, 2008)* (concluding that the burden to the parties, witnesses, and the Court would be significant if separate **[**56]** trials were conducted where the trials would be conducted in close proximity and one case required only limited discovery, which could be conducted in an expedited manner). Plaintiff has stated it needs only an additional 120 days of discovery on the limited issues of alter ego relationship, Lily's tortious interference, existence of a fraudulent transfer and additional production and sales of energy liquids by Lily that violate § 5.c.i. Unlike when Plaintiff filed its motion to amend the complaint, the case is not on the eve of trial, so there is less concern for prejudice to NSL.

ii. Transfer to the Eastern District of Texas is not appropriate

In arguing that consolidation is not appropriate, NSL incorporates by reference the arguments it made in its motion to transfer venue, filed in the Secondary Case. Likewise, Plaintiff incorporates the arguments it made in its response to NSL's motion. The parties dispute whether, under *28 U.S.C. § 1404(a)*, it would be in the interests of justice to transfer the Secondary Case to the United States District Court for the Eastern District of Texas.

HN15[] *Section 1404(a) of Title 28 of the United States Code* provides that "[f]or the convenience of the parties and witnesses, in the interests of justice, a district court may transfer **[**57]** any civil action to any other district or division where it might have been brought or to any district or division to which all parties have consented." District courts have wide discretion to transfer an action pursuant to *§ 1404(a)*. *Audi AG v. D'Amato, 341 F. Supp. 2d 734, 749 (E.D. Mich. 2004)*. The Court must weigh several factors: "(1) the convenience of the parties; (2) the convenience of the witnesses; (3) the relative ease of access to sources of proof; (4) the availability of processes to compel attendance of unwilling witnesses; (5) the cost of obtaining willing witnesses; (6) the practical problems associated with trying the case most expeditiously and inexpensively; and (7) the interest of justice." *Id.* (quoting *MCNIC Oil & Gas Co. v. IBEX Resources Co., 23 F. Supp. 2d 729, 738-39 (E.D. Mich. 1998))*. "The party who brings a motion to transfer venue bears the burden of proving by a preponderance of the evidence that 'fairness and practicality *strongly favor* the forum to which transfer is sought.'" *Weather Underground, Inc. v. Navigation Catalyst Syst., Inc., 688 F. Supp. 2d 693, 696 (E.D. Mich. 2009)* (emphasis added) (quoting *Amphion, Inc. v. Buckeye Elec. Co., 285 F. Supp. 2d 943, 946 (E.D. Mich. 2003)*. The defendant must show that the plaintiff's chosen forum is "unnecessarily burdensome." *Boling v. Prospect Funding Holdings, LLC. 771 Fed.Appx. 562, 568 (6th Cir. 2019)*. "Merely shifting the inconvenience from one party to another does not meet [the] [d]efendant's burden. If the court determines that the balance between the plaintiff's choice of forum and the defendant's desired forum **[**58]** is even, the plaintiff's **[*796]** choice . . . should prevail." *Choon's Design, LLC v. Larose Industries, LLC, No. 13-13569, 2013 U.S. Dist. LEXIS 156695, 2013 WL 5913691, at *2 (E.D. Mich. Nov. 1, 2013)* (internal citations and quotations omitted).

In considering all of these factors, the Court finds that "fairness and practicality" do not "strongly favor" Texas as the forum. *Weather Underground, 688 F. Supp. 2d at 696*. As discussed above, any purported inconvenience to NSL is overcome by the significant common issues of law and fact between the Lead and Secondary Cases. ***HN16***[] Judicial economy is served by having the same district court try cases involving the same contracts. *In re Volkswagen of Am., Inc., 566 F.3d 1349, 1351 (Fed. Cir. 2009)* (transfer on inconvenience grounds where district court could try two cases involving the same patents).

While the Secondary Case will involve the additional issues of alter ego and fraudulent transfer, the court adjudicating the Secondary Case will be tasked with determining several issues that are already before this Court—just for a new timeline with respect to damages. Namely, whether post-April 2014 conduct by Lily (as an alter ego for NSL) was a violation of the Settlement Agreement. While the Court appreciates that the fraudulent transfer claim would involve an alleged transfer of assets between two Texas corporations, an ultimate question for the Court to consider in the Secondary Case is whether **[**59]** Lily, as a potential alter ego of NSL, violated §5.c.i of the Settlement Agreement through conduct that was not at issue in the Lead Case (post-April 2014 sales). Whether Lily manufactured products that contained Choline Family ingredients and therefore violated the Settlement Agreement, and how damages should be calculated for any determined violation are precisely the same issues the Court has been considering and will further determine in the Lead case for violations by Custom Nutrition and NSL up through April 2014. Additionally, in the Secondary Case Plaintiff alleges that NSL concealed documents that would have shown an alter ego relationship *during the litigation of the Lead Case*, further linking the two cases. This Court is already all-too-familiar with the parties, witnesses, and legal issues at play, the relevant provisions of the Settlement Agreement, and the Choline Family ingredients. And many of the witnesses and parties have already testified before this Court.

Therefore, while "these cases may not involve precisely the same issues, there will be significant overlap and a familiarity with the [Settlement Agreement that] could preserve time and resources. . . . ***HN17***[] [J]udicial economy **[**60]** is served by having the same district court try the cases involving the same [Settlement Agreement]." *In re Volkswagen of America, Inc., 566 F.3d 1349, 1351 (Fed. Cir. 2009)*. Accordingly, in determining that consolidation is appropriate here, the Court also concludes that transfer of the Secondary Case to the United States District Court for the Eastern District of Michigan under *28 U.S.C. § 1404(a)* is not appropriate.

D. Clarification of Jones as a Defendant

Finally, Plaintiff has moved for clarification of whether Alan Jones may still be considered a defendant in this matter. *See* ECF No. 403. This issue was explicitly addressed by the Sixth Circuit in ruling on whether Jones was bound by the Settlement Agreement in his personal capacity and therefore whether he would remain a defendant in the case. The Sixth Circuit explicitly held: "the Settlement Agreement does not bind Jones in his personal capacity." *912 F.3d at 337*. While this holding would seem to resolve the issue by **[*797]** indicating that Jones is no longer a defendant, the Sixth Circuit also affirmed this Court's holding that NSL is bound by § 5.c.i because it was incorporated by reference into the Asset Purchase Agreement, which NSL signed—and so did Jones. *Id. at 338-39*.

Living Essentials asserts that as a result of these holdings, Jones should still **[**61]** be a defendant in the case because he signed the Custom Nutrition-NSL Asset Purchase Agreement in his personal capacity as a "member of CNL," binding himself to that agreement and (like NSL) incorporating by reference the obligations of § 5.c.i of the Settlement Agreement. This argument is exactly the one made by the Court in dicta in its 2015 Order on the parties' motions for summary judgment. ECF No. 219. In a footnote, this Court stated:

> The Court notes that the same incorporation by reference rationale that binds Nutrition Science to the Choline Family restriction applies regarding Alan Jones. Jones signed the Asset Purchase Agreement twice, once in his representative capacity for Custom Nutrition and a second time in his individual capacity. Thus, there is no question that Jones's signature complies with the Statute of Frauds. As explained above, § 4.2(r) incorporates the Settlement Agreement's Choline Family restrictions by reference. According to the Asset Purchase Agreement, Section 4.2(r) was a representation made not only by CNL (the Seller) but also by its "Members."

> Jones signed the agreement as a Member of CNL and consequently also made the representation in § 4.2(r). As a result, Jones also incorporated the **[**62]** Choline Family restrictions by reference. However, because the Court finds below that Jones is personally bound under Settlement Agreement, the Court need not hold Jones liable under incorporation by reference.

ECF No. 219, PageID.9222.

The question is whether the Sixth Circuit's holding that "the Settlement Agreement does not bind Jones in his personal capacity," precludes Plaintiff from arguing on remand that under the logic of the Court's dicta, Jones is still bound to the Settlement Agreement because he also signed the Asset Purchase Agreement as a member of CNL, and that agreement incorporated by reference part of the Settlement Agreement. This presents an interesting question under the "law of the case" doctrine because it concerns an appellee seeking to revisit an issue on remand that was previously decided by the district court and explicitly reversed (but on other grounds) by the court of appeals. Living Essentials was both appellee and cross-appellant before the court of appeals. Jones and NSL appealed this Court's ruling that Jones was bound personally to the Settlement Agreement. On appeal, Living Essentials had every incentive to defend the district court's ruling—and was **[**63]** fully aware that the district court had expressed in dicta an alternative legal basis for finding that Jones was bound to the Settlement Agreement. Living Essentials chose not to raise this alternative ground in defending the district court's ruling on appeal, but has swiftly resurrected it on remand knowing that the court of appeals was not given the chance to consider it.

HN18[] Generally, the "law of the case" doctrine is applied differently to appellees because "[f]orcing an appellee to raise all possible defenses on a first appeal 'might increase the complexity and scope of appeals more than it would streamline the progress of the litigation.' '[F]ull application of the waiver rule to an appellee puts it in a dilemma between procedural disadvantage and improper use of the cross-appeal,' justifying **[*798]** 'a degree of leniency in applying the waiver rule to issues that could have been raised by appellees on previous appeals.' Wright & Miller Fed. Prac. & Proc., § 4478.6 Law of the Case—Related Doctrines (quoting *Crocker v. Piedmont Aviation, Inc., 49 F.3d 735, 738-741, 311 U.S. App. D.C. 1 (D.C. Cir. 1995))*. Applying such a degree of leniency may not be appropriate here, however, because raising the district court's alternative basis for binding Jones would not have unduly complicated the appeal **[**64]** and would have added clarity to the Sixth Circuit's decision. While that general rule may not preclude Living Essentials from arguing on remand that Jones is personally liable under the Settlement Agreement through incorporation by reference, even though it failed to raise the issue with the Sixth Circuit when it had the chance, there is an element of "lying in wait" about Plaintiff's tactics that gives the Court pause in considering whether justice would be served by allowing Jones to be brought back into the case after the Sixth Circuit has ruled he is out.

Regardless, however, in looking closely at the Sixth Circuit's holding, it is clear that the issue of Jones' status as a defendant has been conclusively decided by the Sixth Circuit and was not remanded to permit further consideration by this Court. The Sixth Circuit determined that Jones was not individually liable because under Michigan law "he signed the Agreement in his capacity as a corporate officer." *912 F.3d at 337* (quoting *Liquid Mfg., LLC, 499 Mich. 491, 885 N.W.2d 861, 867 n.6 (Mich. 2016))*. To permit Plaintiff to now resurrect the logic in this Court's prior footnote would go against "both the letter and the spirit of the mandate." *Mason v. Mitchell, 729 F.3d 545, 550 (6th Cir. 2013)*.

Accordingly, the Court holds that because the Sixth Circuit concluded **[**65]** "the Settlement Agreement does not bind Jones in his personal capacity," he is no longer a party to the Lead Case. Jones is **DISMISSED WITH PREJUDICE** in his personal capacity.

IV. Conclusion

For the reasons stated above the Court **DENIES** Plaintiff's Motion for Summary Judgment (ECF No. 420), **DENIES** Defendants' Motion for Summary Judgment (ECF No. 400), **GRANTS IN PART** Plaintiff's Motion to Consolidate the Lead Case and the Secondary Case (ECF No. 403), and **DISMISSES WITH PREJUDICE** Alan Jones as a defendant from the Lead Case.

IT IS FURTHER ORDERED that the parties shall meet and confer to develop and propose a stipulated scheduling order within 21 days of the date of this Order, and shall file the same with Court.

IT IS SO ORDERED.

DATED: March 31, 2020.

BY THE COURT:

/s/ Terrence G. Berg

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Pursuant to *Fed. R. Civ. P. 12(b)(6)*, a complaint may be dismissed for failure to state a claim upon which relief may be granted. Dismissal may be based on either the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory. A complaint must plead enough facts to state a claim to relief that is plausible on its face. A claim is plausible when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

When evaluating a motion to dismiss, the court must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party. Courts must consider the complaint in its entirety, as well as other sources courts ordinarily examine when ruling on *Fed. R. Civ. P. 12(b)(6)* motions to dismiss, in particular, documents incorporated into the complaint by reference, and matters of which a court may take judicial notice.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Judges, Discretionary Powers**

If a court does dismiss a complaint for failure to state a claim, it should freely give leave to amend when justice so requires. *Fed. R. Civ. P. 15(a)(2)*. A court nevertheless has discretion to deny leave to amend due to undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, and futility of amendment.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] **Sherman Act, Claims**

The Sherman Act, 15 U.S.C.S. § 1, forbids competitors from entering agreements that unreasonably restrain trade.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Two forms of analysis may be applied to determine whether a restraint on trade is unreasonable. The rule of reason is the presumptive or default standard, and it requires the antitrust plaintiff to demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive. Some types of restraints, however, have such predictable and pernicious anticompetitive effect, and such limited potential for pro-competitive benefit, that they are deemed unlawful per se. Per se treatment is reserved for conduct that is manifestly anticompetitive and without any redeeming virtue. The U.S. Supreme Court has expressed reluctance to adopt per se rules where the economic impact of certain practices is not immediately obvious.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] Relevant Market, Geographic Market Definition

The rule of reason requires Plaintiffs to plead a relevant market impacted by Defendants' anticompetitive conduct. A relevant market includes both a geographic market and a product market. The product market must encompass the product at issue as well as all economic substitutes for the product. Economic substitutes are the goods and services that have reasonable interchangeability of use or cross-elasticity of demand with the product in question. This standard ensures that the relevant market includes all sellers or producers who have actual or potential ability to deprive each other of significant levels of business. Failure to plead a relevant market is grounds to dismiss.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN7[] Relevant Market, Product Market Definition

Submarkets may constitute product markets for antitrust purposes if they are economically distinct from the general product market. Industry or public recognition of the sub-market as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors may all indicate an economically distinct submarket.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] Attempts to Monopolize, Elements

An antitrust plaintiff who successfully pleads a relevant market must also allege that the defendant has power within that market. Once a relevant market has been pled, market power can be demonstrated by evidence that the defendant owns a dominant share of the relevant market and that there are significant barriers to entry and existing competitors lack the capacity to increase their output in the short run. Alternatively, direct evidence of the injurious exercise of market power, such as supra-competitive prices and restricted output, may be an adequate substitute for elaborate market analysis.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] Scope, Monopolization Offenses

A price differential alone is insufficient to establish an economically distinct sub-market for antitrust purposes.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] Standing, Requirements

But parallel pricing alone does not demonstrate collusion for an antitrust claim, even, or especially, when market participants stand to benefit from reacting to each other's decisions or similar market pressures.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN11[] **Cartels & Horizontal Restraints, Price Fixing**

Interdependence, however, does not entail collusion for purposes of an antitrust claim, as interdependent firms may engage in consciously parallel conduct through observation of their competitors' decisions, even absent agreement.

Counsel: [1]** For Steven Lewis, on behalf of themselves and other similarly situated, Travis Burton, on behalf of themselves and other similarly situated, Plaintiffs: Emily Catherine Aldridge, Lesley Elizabeth Weaver, Bleichmar Fonti & Auld LLP, Oakland, CA; Matthew Sinclair Weiler, Schneider Wallace Cottrell Konecky et al, Emeryville, CA; Roxanne Barton Conlin, PRO HAC VICE, Roxanne Conlin and Associates, Des Moines, IA.

Judges: CHARLES R. BREYER, United States District Judge.

Opinion by: CHARLES R. BREYER

Opinion

[*973] ORDER RE: DEFENDANTS' MOTIONS TO DISMISS

Consumers and auto dealers ("IPPs" and "DPPs," respectively) have filed two related consolidated class actions against the five leading German car manufacturers—Audi AG, BMW AG, Daimler AG, Porsche AG, and Volkswagen ("VW") AG—and their American subsidiaries. Plaintiffs allege that Defendants colluded to restrain competition in violation of the Sherman Act and various state laws. Last June, this Court granted Defendants' joint motion to dismiss without prejudice, concluding that Plaintiffs' allegations were insufficient to state **[**21]** a claim. IPPs and DPPs both filed amended complaints. IPPs have narrowed their focus, zeroing in on an alleged agreement to standardize the dosage rate and tank sizes for the substance AdBlue. DPPs continue to allege a broad conspiracy, now styled as a "no arms race" agreement to divide market share by limiting brand differentiation and technical innovation. Neither effort is sufficient to plead Sherman Act violations or Plaintiffs' related state law claims. Both complaints are dismissed without prejudice.

I. BACKGROUND

On June 17, 2019, this Court granted without prejudice Defendants' initial joint motion to dismiss. See generally Order re MTD (dkt. 387). The initial consolidated complaints alleged that Defendants agreed to "slow[] down the pace of innovation," reducing the quality of their cars. Id. at 1-2. But Plaintiffs provided only two specific examples. The first was an alleged agreement that soft-top convertibles should only open or close at speeds under thirty-one miles per hour. Id. at 2. The second example was a series of alleged agreements on the size of AdBlue tanks (AdBlue is a substance that breaks emissions from diesel engines down into less harmful compounds). Id. at 2-3. These allegations (like **[**22]** many in the initial complaints) were based on reports of investigations by the European Commission's competition department ("ECC") and Germany's Federal Cartel Office into a possible antitrust cartel among Defendants. Id. at 3. Plaintiffs also relied on VW and Daimler's proffers to the ECC as part of that agency's leniency program. Id. VW's proffer admitted agreements amongst the defendants about vehicle development, costs, suppliers and markets, discussions about vehicle development, "exchange of . . . sensitive technical data," jointly established "technical standards" and agreements to use "only certain technical solutions," and the possibility that Defendants' actions may have violated cartel law. Id.

This Court rejected Plaintiffs' allegations of a "'de facto whole car conspiracy' to reduce innovation." Id. at 13. It concluded that the two actual examples of agreement "relate[d] to niche vehicle features" and could not support Plaintiffs' theory of a conspiracy to reduce innovation across the board. Id. It also rejected the significance of VW and Daimler's proffers to European antitrust authorities, finding the admissions "too general and too vague to plausibly support the broad agreement to reduce **[**23]** innovation that Plaintiffs allege." Id. at 13-15. The investigations by European antitrust authorities were also unhelpful, because it was "unknown whether the investigation[s] w[ould] result in indictments or nothing at all." Id. at 15 (citing *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1024 (N.D. Cal. 2007)*). Similarly, "[a]llegations about how Defendants used working groups and trade associations to further their 'whole car conspiracy'" lacked crucial details such **[*974]** as "what was agreed to in these meetings." Id.

This Court rejected several other alleged agreements as inadequately pled. Relevant here, it concluded that Plaintiffs had not adequately alleged injury from a purported agreement to "coordinate . . . purchases of car parts and steel," because such an agreement was most likely to have lowered the cost of steel and therefore the prices paid by Plaintiffs. Id. at 17-18 (citing Thomas A. Piraino, Jr., A Proposed Antitrust Approach to Collaborations Among Competitors, *86 Iowa L. Rev. 1137, 1178 (2001)*). Although DPPs alleged they were harmed because "Defendants pocketed the cost savings and did not pass along a single cent to the Dealer Plaintiffs," they failed to allege that Defendants either agreed to "pocket[] the cost savings" or that it was otherwise wrongful for them to do so. Id. at 18.

Finally, this Court dismissed **[**24]** IPPs' various state law claims, because "[t]he factual bases and theories of injury for these claims [were] the same as those for the Sherman Act claims." Id. at 19.

Both IPPs and DPPs filed amended complaints. See IPP Compl. (dkt. 391); DPP Compl. (dkt. 392). The IPP Complaint focuses on an alleged decade-long conspiracy to limit the development and implementation of certain features of diesel emissions control systems. IPP Compl. ¶¶ 3-4. It alleges Defendants agreed to standardize the rate at which AdBlue would be used in their diesel vehicles and the size of those vehicle's AdBlue tanks. Id. ¶ 119. These agreements allegedly occurred during various meetings and in follow-up communications between Defendants' managers, beginning in 2006. See, e.g. id. ¶¶ 129-31, 133, 135, 142, 156-57.

As before, IPPs' allegations rely heavily on the ECC's investigation. In particular, IPPs point to an ECC press release, issued after briefing on the previous motions to dismiss, "announcing that it had sent a Statement of Objections to the Defendant parent companies . . . that reflected the ECC's current view that the Defendants had in fact violated ***antitrust law*** by participating in a collusive scheme 'to restrict **[**25]** competition on the development of technology to clean the emissions of petrol and diesel vehicles.'" Id. ¶ 150. The Statement of Objections asserts that Defendants "coordinated their strategies" on the size of AdBlue tanks and the rate at which AdBlue would be used in diesel vehicles. Id. The IPP Complaint also relies on Daimler and VW's leniency proffers. See id. ¶¶ 112-13.

The DPP Complaint builds on the alleged AdBlue agreements to plead a "no arms race" conspiracy, whose object was ostensibly to ensure "that Defendants would not compete against each other on certain technological innovations to gain market share against each other." DPP Compl. ¶ 109.

DPPs offer various allegations besides the AdBlue agreements to support the purported "no arms race" conspiracy. They allege additional agreements on parking brakes, convertible tops, and particle filters, id. ¶ 157, and that Defendants' failure to meaningfully invest in electric vehicles is another example of the "no arms race" principle at work, id. ¶ 254. They point to examples of Defendants updating or refreshing similar vehicle lines around the same time as additional evidence of collusion. Id. ¶¶ 199-200.

The DPP Complaint also **[**26]** expands on the previously alleged steel-purchasing agreement. DPPs describe a scheme in which Defendants negotiated a baseline price with steel producers and then agreed to a standardized purchase price index on top of the baseline, which accounted for fluctuations **[*975]** in the cost of raw materials. Id. ¶ 161.

DPPs also allege that Defendants prevented dealerships from differentiating their vehicles based on price by setting the highest possible retail price (the MSRP) unusually close to the lowest possible retail price (the inventory price). Id. ¶¶ 204-11. The DPP Complaint alleges that additional economic evidence, including pricing information and Defendants' relative market shares over time, demonstrates the existence of a successful market allocation conspiracy. Id. ¶¶ 192-98. Finally, DPPs point to various "plus factors" that ostensibly establish that Defendants had the motive or opportunity to collude. Id. ¶¶ 181-89.

In the alternative, DPPs allege that the AdBlue agreement, id. ¶ 250, agreement not to develop electric vehicles, id. ¶ 254, and steel-purchasing agreements, DPP Opp'n (dkt. 419) at 5 n.6, each constitute Sherman Act violations regardless of whether the "no arms race" **[**27]** conspiracy is adequately pled.

Defendants jointly moved to dismiss the IPP and DPP Complaint. See Joint MTD (dkt. 409). VW and BMW also filed individual motions to dismiss. See VW MTD (dkt. 411); BMW MTD (dkt. 410).

II. LEGAL STANDARD

HN1[] Pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a complaint may be dismissed for failure to state a claim upon which relief may be granted. Dismissal may be based on either "the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory." *Godecke v. Kinetic Concepts, Inc., 937 F.3d 1201, 1208 (9th Cir. 2019)*. A complaint must plead "enough facts to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 697, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 678*.

HN2[] When evaluating a motion to dismiss, the Court "must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party." *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. "[C]ourts must consider the complaint in its entirety, as well as other sources courts ordinarily examine when ruling on *Rule 12(b)(6)* motions to dismiss, in particular, documents incorporated into the complaint by reference, and matters of which a court **[**28]** may take judicial notice." *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*.

HN3[] If a court does dismiss a complaint for failure to state a claim, it should "freely give leave [to amend] when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. A court nevertheless has discretion to deny leave to amend due to "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, [and] futility of amendment." *Leadsinger, Inc. v. BMG Music Pub., 512 F.3d 522, 532 (9th Cir. 2008)* (citing *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962))*.

III. DISCUSSION

As explained below, the Amended Complaints fail to plausibly allege any Sherman Act violation that can be traced to a cognizable injury suffered by Plaintiffs. This **[*976]** conclusion is equally fatal for IPPs' state law claims, which depend on the same factual allegations and theories of injury. See Order re MTD at 19. It is therefore unnecessary to consider Defendants' other arguments against the Sherman Act claims, including that those claims are time-barred, Joint MTD at 41-47, and that they are barred by the *Foreign Trade Antitrust Improvements Act*, id. at 35-41. It is also unnecessary to address various arguments specific to certain defendants, see generally Volkswagen MTD; BMW MTD, or state law claims, see Joint MTD at 47-54.

A. AdBlue [29] Conspiracy**

Both IPPs and DPPs allege a conspiracy to standardize certain features related to AdBlue, which ostensibly reduced the quality of Defendants' diesel vehicles. See IPP Compl. ¶¶ 3-4; DPP Compl. ¶ 250. This section first addresses whether Plaintiffs adequately allege the existence of agreements related to AdBlue, and then, concluding that they do, analyzes whether those allegations are sufficient to plead claims under the Sherman Act.

1. Whether an agreement is adequately alleged.

HN4[] *Section 1 of the Sherman Act* forbids competitors from entering agreements that unreasonably restrain trade. *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. The Amended Complaints plausibly allege that Defendants agreed on "the rate at which AdBlue pollution treatment solution would be used in their diesel-powered vehicles, as well as the size of the vehicles' AdBlue tanks which determined the range that those vehicles could travel before needing to be refilled with AdBlue." IPP Compl. ¶ 119. Both Amended Complaints contain detailed factual allegations describing Defendants' "coordination" of AdBlue dosage rate and tank size, including the content of Defendants' agreements (including direct quotes from allegedly criminal negotiations), see, e.g. id. ¶ 133, **[**30]** the positions of the conspirators within Defendants' corporate hierarchies, see, e.g. id. ¶ 135, and where and when the agreements were made, see, e.g. id. ¶¶ 130-31; see also DPP Compl. ¶¶ 111-39. "[W]ho, did what, to whom (or with whom), where, and when" is adequately alleged.[1] *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1194 n.6 (9th Cir. 2015)* (quoting *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008))*.

Plaintiffs argue that these allegations are supported by the ECC's Statement of Objections, which concluded that "Defendants coordinated their strategies on the amount of pollution treatment solution (such as AdBlue) that would be used in diesel-powered German Diesel Vehicles, as well as the size of the vehicles' AdBlue tanks and the range the vehicles could travel before needing to be refilled with AdBlue." IPP Compl. ¶ 150. Defendants contest the relevance of the Statement of Objections, pointing out that this Court has previously recognized government investigations **[*977]** typically "carry 'no weight in pleading an antitrust conspiracy,' for it is 'unknown whether the investigation[s] will result in indictments or nothing at all.'" See Order re MTD at 15 (quoting *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1024 (N.D. Cal. 2007))*. Plaintiffs respond that they are now relying on the ECC's Statement of Objections, which is comparable **[**31]** to an indictment. IPP Opp'n at 13-14.

---

[1] The Amended Complaints also allege various "plus factors" ostensibly supporting their allegations of unlawful anticompetitive conduct. See IPP Compl. ¶ 176; DPP Compl. ¶ 181. Because Plaintiffs plead direct evidence of agreements on AdBlue-related features, it is unnecessary to evaluate whether the plus factors, when combined with parallel conduct, would adequately allege the existence of such collusion. See *B & R Supermarket, Inc. v. Visa, Inc., No. 16-01150 WHA, 2016 U.S. Dist. LEXIS 136204, 2016 WL 5725010, at *6 (N.D. Cal. Sept. 30, 2016)* ("An impermissible conspiracy can be alleged through either direct or circumstantial evidence."). The plus factors' relevance vis a vis other alleged anticompetitive agreements is discussed below.

It is unnecessary to determine the significance of the Statement of Objections in this proceeding. Even assuming, without deciding, that the analogy to an indictment is sound, and that an indictment is more significant than a mere investigation, the Statement of Objections adds little to Plaintiffs' case. It establishes agreements on AdBlue tank size and dosing rates. But as explained above, those agreements are already established by Plaintiffs' other well-pled factual allegations. And while the Statement of Objections may support the conclusion that those agreements violated European cartel law, what matters here is whether Plaintiffs' have met the requirements for pleading a violation of the Sherman Act.[2] That requires more than pointing to the findings of European authorities regarding European law. Similarly, it remains the case that Daimler and Volkswagen's leniency applications "are too general and too vague" to plausibly allege that those defendants violated American law. See id. at 13-15.

While the AdBlue agreements are plausibly alleged, Plaintiffs do not adequately plead the existence of a broader conspiracy "to restrict the development of **[**32]** [Defendants'] vehicles' diesel emissions control systems and not to compete on quality." IPP Opp'n at 16. Although this purported conspiracy is narrower than a "'de facto whole car conspiracy' to reduce innovation," Order re MTD at 12, it remains broader than the Amended Complaints' well-pled allegations can support. Every agreement alleged with any amount of detail dealt with AdBlue tank size and dosing rate. See IPP Compl. ¶¶ 119-42; DPP Compl. ¶¶ 102-09, 116-36, 139. Just as agreements on convertible roofs and AdBlue tanks could not plausibly support a "whole car" conspiracy, see Order re MTD at 12-13, agreements on AdBlue tank size and dosing rate alone do not plausibly support the existence of a broader conspiracy covering Defendants' entire diesel emissions control system.

It is therefore necessary to determine whether the allegations of an AdBlue conspiracy adequately state a Sherman Act claim. They do not, because Plaintiffs have failed to plead facts showing that the AdBlue agreements were an unreasonable restraint on competition.

2. Whether Plaintiffs adequately allege that the AdBlue agreements constituted an unreasonable restrain on trade in violation of the Sherman Act.

[33]** ***HN5***[] Two forms of analysis may be applied to determine whether a restraint on trade is unreasonable. "The rule of reason is the presumptive or default standard, and it requires the antitrust plaintiff to 'demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive.'" *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1132-33 (9th Cir. 2011)* (quoting *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006))*. "Some types of restraints, however, have such predictable **[*978]** and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Per se treatment is reserved for conduct that is "manifestly anticompetitive" and without "any redeeming virtue." *Leegin, 551 U.S. at 886*. "The Supreme Court has 'expressed reluctance to adopt per se rules where the economic impact of certain practices is not immediately obvious.'" *Safeway, 651 F.3d at 1133* (quoting *Dagher, 547 U.S. at 5*).

IPPs argue the AdBlue agreements constitute a per se Sherman Act violation, because an agreement to reduce quality is tantamount to output reduction. IPP Opp'n at 28-29. This Court's previous order endorsed the logic of this theory, though not its underlying assumption that the AdBlue agreements necessarily constituted agreements to reduce quality. Order re MTD at 12. In the alternative, IPPs suggest that even if "Defendants' misconduct does not fit into established per se categories," it is of a type which "always or almost always tend[s] to restrict competition and decrease output."[3] IPP Opp'n at 29.

These arguments fail, because it is not "immediately obvious" that the AdBlue agreements had an exclusively anticompetitive impact. *Safeway, 651 F.3d at 1133*. As this Court recognized in its previous order, an agreement to

---

[2] These requirements include showing either a per se Sherman Act violation or satisfying the rule of reason. See infra Section III.A.2.

[3] DPPs do not offer an independent argument for treating the AdBlue agreement as per se unlawful. See DPP Opp'n at 17-18.

use only certain technical solutions may have procompetitive benefits, even **[**34]** if it reduces a product's quality in other respects. Order re MTD at 14. For example, standard setting may "serve[] . . . useful ends, such as protecting consumers from inferior goods, increasing compatibility among products that must be interchangeable with the products of other manufacturers, or focusing customer comparison on essential rather than nonessential differences." Id. (internal quotations and citations omitted). Similarly, "[c]ollaboration for the purpose of developing and commercializing new technology can result in economies of scale and integrations of complementary capacities that reduce costs, facilitate innovation, eliminate duplication of effort and assets, and share risks that no individual member would be willing to undertake alone." *Princo Corp. v. Int'l Trade Comm'n, 616 F.3d 1318, 1335 (Fed. Cir. 2010)*. Because procompetitive effects are possible, per se treatment is inappropriate for joint ventures and standard setting. See *Leegin, 551 U.S. at 886*.

This logic applies to the alleged AdBlue agreements. The well-pled allegations in the Amended Complaints describe agreements to abide by certain technical standards and adopt the same or similar technical solutions. Plaintiffs' effort to transmogrify those agreements into output restrictions or pricing agreements **[**35]** is strained. See, e.g. IPP Compl. ¶ 5. And their argument that the standard setting and joint venture cases are inapplicable because the alleged conspiracy does not resemble other standard setting organizations, see IPP Opp'n at 27-28; DPP Opp'n at 10-11, misses the point. Defendants do not need to demonstrate that the alleged misconduct fell into a narrow category of behavior governed by the rule of reason. The opposite is true—per se treatment is reserved for narrowly defined categories of collusion that clearly have no redeeming virtues. *Leegin, 551 U.S. at 886*. The question is not whether the alleged AdBlue conspiracy resembles other standard **[*979]** setting groups. It is whether its anticompetitive economic impact is so obvious that this type of coordination should be per se illegal. *Dagher, 547 U.S. at 5*.

The Amended Complaints' own allegations demonstrate that the answer to that question is no, because the AdBlue agreements may have had procompetitive effects. Plaintiffs acknowledge that the standards Defendants agreed to were beneficial in some respects. Having fewer AdBlue injections reduced engine clogging and the risk of damage to the vehicle. IPP Compl. ¶ 155. Smaller AdBlue tanks took up less space, leaving more room for **[**36]** other features. DPP Compl. ¶ 115. True, Plaintiffs also plead that these benefits came at a cost—increased NOx emissions. See id. ¶ 115. But Plaintiffs' own allegations demonstrate that the trade-off did not necessarily result in vehicles of inferior quality. Defendants may have agreed to a standard that they believed would ultimately benefit all consumers. This is not to say that the agreements necessarily improved the quality of Defendants' diesel vehicles or were clearly not unreasonable. It simply demonstrates that whether the agreements were reasonable or not should be assessed under the rule of reason.

And, contrary to Plaintiffs' position, which framework to apply can be determined at the pleading stage. It is true that in some cases courts have concluded that which framework applied was a fact-bound determination that could not be determined on the pleadings. See *Kamakahi v. Am. Soc'y for Reprod. Med., No. C 11-cv-01781, 2013 U.S. Dist. LEXIS 61250, 2013 WL 1768706, at *8 (N.D. Cal. Mar. 29, 2013)*. But as with any other claim, a Court can determine that a complaint fails to adequately allege a per se violation of the Sherman Act. See, e.g. *Analogix Semiconductor, Inc. v. Silicon Image, Inc., No. C 08-2917 JF (PVT), 2008 U.S. Dist. LEXIS 118508, 2008 WL 8096149, at *1, *4 (N.D. Cal. Oct. 28, 2008)* (determining, on a motion to dismiss, that rule of **[**37]** reason analysis applied). That is the case here, because Plaintiffs' own allegations contradict their assertion that the AdBlue agreements necessarily lacked any procompetitive effect. It is therefore appropriate to consider whether Plaintiffs have adequately asserted Sherman Act claims under the rule of reason.

HN6[] They have not. The rule of reason requires Plaintiffs to "plead a relevant market" impacted by Defendants' anticompetitive conduct. *Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120 (9th Cir. 2018)*. A relevant market "include[s] both a geographic market and a product market." Id. The product market "must encompass the product at issue as well as all economic substitutes for the product." Id. (quoting *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1045 (9th Cir. 2008))*. Economic substitutes are the goods and services that have "reasonable interchangeability of use" or "cross-elasticity of demand" with the product in question. Id. (quoting *Newcal, 513 F.3d at 1045*). This standard ensures that the relevant market includes all "sellers or producers who have actual or potential ability to deprive each other of significant levels of business." Id. (quoting *Newcal, 513 F.3d at 1045*). Failure to plead a relevant market is grounds to dismiss. Id.

HN7[] Submarkets may "constitute product markets for antitrust purposes" if they are "economically distinct from the general **[**38]** product market." *Id. at 1121* (internal citations omitted). "[I]ndustry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors" may all indicate **[*980]** an economically distinct submarket. Id. (internal citations omitted).

HN8[] A plaintiff who successfully pleads a relevant market must also allege "that the defendant has power within that market." *Newcal, 513 F.3d at 1044-45*. Once a relevant market has been pled, market power can be demonstrated by evidence "that the defendant owns a dominant share of [the relevant] market" and "that there are significant barriers to entry and . . . existing competitors lack the capacity to increase their output in the short run." Id. Alternatively, "direct evidence of the injurious exercise of market power," such as "supracompetitive prices" and "restricted output," may be an adequate substitute for "elaborate market analysis." *FTC v. Indiana Fed. of Dentists, 476 U.S. 447, 461, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*.

Plaintiffs efforts to plead a relevant market are facially deficient. IPPs do not argue that they have pled a relevant product market, see IPP Opp'n at 29, nor could they. To the extent the IPP **[**39]** Complaint suggests that "German Diesel Vehicles" are a cognizable submarket, that suggestion is belied by IPPs' own allegations that Defendants were driven to collude on "clean diesel" technology by competition from Japanese hybrids. IPP Compl. ¶ 84; see also *Apple Inc. v. Psystar Corp., 586 F. Supp. 2d 1190, 1199 (N.D. Cal. 2008)* (complaint that acknowledged that Apple computers running Mac OS faced competition, but which did not include those competitors in its market definition or explain why they should be excluded, failed to plead a relevant market).

DPPs' efforts suffer similar flaws. Their complaint alleges a submarket of "German Luxury Vehicles." DPP Compl. ¶¶ 69-80. But again, that claim is belied by DPPs' own allegations, which acknowledge that Defendants competed with Italian, American, and Japanese brands. See DPP Compl. ¶¶ 80, 95, 130-32, 164. And even if DPPs' own allegations did not undermine their theory, "judicial experience and common sense" would. See *Hicks, 897 F.3d at 1121*. Non-German luxury cars exist (Tesla, Lexus, and Maserati all come to mind). It is implausible that national origin alone puts German automakers in a separate market from their high-end foreign rivals, or that a buyer looking at a Mercedes would not consider a Tesla if it were cheaper or **[**40]** of higher quality. DPPs rely on a supposed price premium for German cars, see DPP Compl. ¶ 72, ***HN9***[] but a price differential alone is insufficient to establish an economically distinct submarket. *Psystar Corp., 586 F. Supp. 2d at 1199*. And if anything, German automakers attempts to set themselves apart with advertising demonstrate that they were competing with non-German luxury brands. See id. ("[V]igorous advertising is a sign of competition, not a lack thereof."); see also DPP Compl. ¶ 75.

In the alternative, DPPs allege a more plausible submarket of luxury vehicles. DPP Compl. ¶ 80 n.15. But these allegations fail for a different reason: DPPs have not alleged facts to support a finding that Defendants have market power in the luxury car market writ large. The only evidence they offer in support of this claim is their estimate that Defendants enjoy approximately a 50% share "of the broader luxury car market." DPP Opp'n at 23 n.17. But "[c]ourts generally require a 65% market share to establish a prima facie case of market power." *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1206 (9th Cir. 1997)*.

Nor have DPPs "alleged actual adverse effects," see DPP Opp'n at 23 n.17, that would excuse their failure to show a relevant market and market power. DPPs do **[*981]** not support this claim with any citation **[**41]** to the allegations in their complaint, so it is unclear what actual adverse effects they believe they have alleged. See id. To the extent DPPs argue that the AdBlue agreements were tantamount to price fixing or output restrictions, those claims are inadequately alleged for the same reasons that Plaintiffs have failed to plead a per se Sherman Act violation.

The failure to plead a relevant market is fatal to Plaintiffs' contention that the AdBlue agreements state a cognizable Sherman Act claim. It is equally fatal to DPPs' alternative theories of liability, which fail to plausibly allege per se

Sherman Act violations for the reasons explained below. Indeed, DPPs' other allegations of anticompetitive agreements fail for an additional reason besides the failure to plead a relevant market. DPPs fail to plausibly allege either the existence of or injury from those agreements.

B. "No Arms Race" Conspiracy

DPPs allege that "[t]he operating principle of [Defendants'] conspiracy was 'no arms race,' which was a euphemism for avoiding competition for market share on the basis of technological developments and brand differentiation." DPP Compl. ¶ 10. This theory fails for the same reason as its very **[**42]** similar predecessor, the "whole car conspiracy" rejected by this Court in its previous order. See Order re MTD at 12-17. Once again, DPPs attempt to plead a broad conspiracy with untenably narrow allegations. This Order proceeds by explaining why each of DPPs' several categories of allegations fails to plausibly demonstrate a "no arms race" conspiracy, even when considered as a whole.

1. Agreements to limit technological innovation.

DPPs' chief evidence of the "no arms race" conspiracy is the AdBlue agreement discussed above. The Court previously rejected agreements on AdBlue tank size as insufficient to plead a similarly broad "de facto whole car conspiracy," even in combination with a second example of collusion on technical standards. Id. at 13. DPPs offer no real argument for a different result here. Their position is that they do not need to "argue that all, or even most, of the class vehicles' components and features were subject to the conspiracy," because they "contend that Defendants refrained from innovating or improving features on the class vehicles in such a way that their respective market shares would remain the same." DPP Opp'n at 10. But DPPs' Complaint and briefing offer no **[**43]** explanation for why an agreement to standardize what the Court has previously described as a "niche vehicle feature[]" would be adequate to maintain each Defendants' market share. Order re MTD at 13.

DPPs suggest Defendants reached agreements on several other vehicle features, such as "particulate filters, convertible roofs, and parking brakes." DPP Compl. ¶ 157. Most of these allegations lack any detail at all. The DPP complaint does not allege what was agreed to regarding parking brakes, who agreed to it, or when and where such an agreement took place. And it alleges only that Defendants agreed they would not allow convertible roofs to open and close at speeds above thirty-one miles per hour, an allegation the Court has previously rejected as insufficient to plead a broad "whole car" conspiracy, even combined with allegations of the AdBlue agreements. Order re MTD at 13.

Only the agreement on particle filters is supported by any factual allegations regarding "who, did what, to whom (or with whom), where, and when." See *In re Musical Instruments, 798 F.3d at 1194 n.6*. DPPs allege that "[b]eginning in 2009, Defendants also entered into agreements to **[*982]** avoid, or at least to delay, the introduction of particle filters in their new (direct **[**44]** injection) gasoline passenger car models between 2009 and 2014." DPP Compl. ¶ 137. But DPPs admit these "filters were used predominantly in passenger vehicles sold in Europe." Id. ¶ 137 n.68. The alleged agreement on an additional niche feature predominantly used in cars irrelevant here does not plausibly support the existence of a conspiracy meant to divide the American market into static shares.

2. Steel-buying conspiracy.

DPPs allege that Defendants unlawfully agreed not to compete for the lowest price on steel. DPP Compl. ¶¶ 158-65. Even assuming the existence of an unlawful conspiracy regarding steel prices, this allegation does little to support the "no arms race" theory.[4] DPPs insist that by avoiding competition on the cost of steel, Defendants helped ensure their respective shares of the market would remain static. Id. ¶ 165. Just as it is implausible to infer

---

[4] Whether the steel-buying conspiracy can stand as its own Sherman Act violation is discussed below.

that standardizing a few niche technical features would enable Defendants to keep their respective market shares stable, it is unlikely that adopting similar formulas for the price of a single raw material (albeit an important one) would be enough to keep shares of the American market in an agreeable equilibrium. The leap **[**45]** from steel prices to overall market allocation is not "plausible on its face," even considered alongside DPPs' other allegations. See *Twombly, 550 U.S. at 570*.

3. Electric cars.

As explained in greater detail below, the alleged conspiracy to avoid developing electric vehicles has an obvious innocent explanation posited by the DPP Complaint itself. And DPPs do not even allege that all Defendants' conduct was parallel with respect to this alleged conspiracy. See infra Section III.C. These allegations add little or nothing to the "no arms race" conspiracy.

4. Parallel conduct.

Other allegations amount to little more than parallel conduct with obvious innocuous explanations. DPPs' allege that Defendants "coordinated major product updates and refreshes," and provide three examples of similar product lines being updated or refreshed within a year or two of each other. DPP Compl. ¶ 199-200. But as Defendants point out, the fact that they all released new products at similar times tends to suggest that they were competing with each other, rather than the opposite. Joint Reply (dkt. 425) at 10; see also *In re Musical Instruments, 798 F.3d at 1193* ("In an interdependent market, companies base their actions in part on the anticipated reactions of their competitors."). **[**46]** Allegations that Defendants' prices remained mostly constant relative to each other is equally uninformative, DPP Compl. ¶ 194-98, because firms may lawfully set prices in reaction to their competitors, *In re Musical Instruments, 798 F.3d at 1193*.

Relatedly, DPPs claim that "Defendants prevented dealers from using sales price to upset the status quo." DPP Opp'n at 11. Their complaint explains that Defendants set their vehicles' maximum price (the MSRP) and minimum price (the inventory price) unusually close together, reducing variation in the final sales price. DPP Compl. ¶¶ 204-11. DPPs do not claim that such "manipulation," standing alone, would be unlawful, and in fact acknowledge **[*983]** that "[u]nder the automotive franchise system, Defendants have absolute and sole control over [wholesale] prices" and the MSRP. Id. ¶¶ 205, 210. But the DPP Complaint also does not allege any unlawful collusion in setting wholesale prices and MSRPs, other than a half-hearted claim that it is "highly likely that the manufacturers coordinated the setting of dealer wholesale prices and MSRP." Id. at 204. Apparently, this is because all Defendants set wholesale prices and MSRPs unusually close together and stood to benefit from the thin margins. See id. ¶¶ 207-09, **[**47]** 211. ***HN10***[] But parallel pricing alone does not demonstrate collusion, even (or especially) when market participants stand to benefit from reacting to each other's decisions or "similar market pressures." *In re Musical Instruments, 798 F.3d at 1193*.

Because the parallel conduct alleged in the DPP Complaint could just as easily (or even more plausibly) reflect legitimate conscious parallelism as opposed to collusion, it does not support their "no arms race" theory. *Id. at 1194* ("Allegations of facts that could just as easily suggest rational, legal business behavior by the defendants as they could suggest an illegal conspiracy are insufficient to plead a *§ 1* violation." (internal quotation marks and citations omitted)).

5. Plus factors.

Nor is this a case where "plus factors . . . inconsistent with unilateral conduct" can push DPPs' otherwise inadequate allegations over the line. See id. ("This court has distinguished permissible parallel conduct from impermissible conspiracy by looking for certain 'plus factors.'"). Most of DPPs' plus factors go either to Defendants' alleged "strong motive to conspire" or the susceptibility of the relevant market to collusion. See DPP Compl. ¶¶ 182, 185-89. The Ninth Circuit has rejected comparable arguments, noting **[**48]** that "alleging 'common motive to conspire' simply restates that a market is interdependent (i.e., that the profitability of a firm's decisions regarding pricing depends on competitors' reactions)." *Musical Instruments, 798 F.3d at 1194-95*. ***HN11***[] "Interdependence, however, does not entail collusion, as interdependent firms may engage in consciously parallel conduct through observation of their competitors' decisions, even absent agreement." *Id. at 1195*. DPPs' allegations that the market was susceptible to collusion or gave Defendants a motive to conspire reduce to allegations that the market is interdependent,[5] and are therefore of little help in pleading an antitrust conspiracy. See DPP Compl. ¶¶ 182, 185-89.

DPPs allege that "Defendants had and took advantage of literally thousands of opportunities to conspire through secret meetings" and during trade meetings. DPP Compl. ¶ 183. This Court has previously rejected the significance of similar allegations because Plaintiffs failed to "identify what was agreed to in the[] **[*984]** meetings." Order re MTD at 16. Once again DPPs do not allege what was agreed to during the alleged meetings, see DPP Compl. ¶ 183, aside from the purported collusion on certain niche features discussed above.

Defendants' **[**49]** ostensible actions against self-interest are similarly redundant of the insufficient allegations of agreement. DPPs allege "Defendants engaged in conduct inconsistent with their independent self-interests by, among other things, revealing to each other proprietary technological information and trade secrets." Id. ¶ 184. But the only such revelations alleged in any kind of detail would have to be related to the agreements on AdBlue and particle filters. Those agreements do not plausibly establish a "no arms race" conspiracy for the reasons discussed above.

Finally, DPPs allege "economic . . . outcomes" supposedly inconsistent with independent action. See *In re Musical Instruments, 798 F.3d at 1194* (defining "plus factors" as "economic actions and outcomes that are largely inconsistent with unilateral action but largely consistent with explicitly coordinated action"). They allege that Defendants' overall market share grew even as each Defendant's market share remained stable relative to the other alleged conspirators, demonstrating the success of the conspiracy. DPP Compl. ¶¶ 192-93. But although DPPs conclusorily state that "[t]he stability of Defendants' market shares is economically consistent with the existence of a market **[**50]** allocation agreement," id. ¶ 193, they make no effort to allege that it is inconsistent with conscious parallelism or some other innocent explanation. And they undermine their own argument by acknowledging that the inter-Defendant market was not, in fact, completely static. Id. At best these allegations provide only mild support for DPPs' alleged conspiracy.

In sum, DPPs' narrow allegations of agreements to standardize niche features or prices for steel cannot support the wide-ranging conspiracy they attempt to plead. Additional allegations of parallel conduct and plus factors are too speculative and conclusory to cover the gap.

C. Electric Car Conspiracy

In the alternative, DPPs plead a narrower conspiracy not to engage in an arms race to develop electric vehicles. Once again, this parallel conduct is insufficient to support an antitrust claim, because it has a perfectly innocuous explanation. Indeed, that explanation is provided by the DPP Complaint itself. Defendants did not invest in electric vehicles because they "had already invested heavily in diesel engines." DPP Compl. ¶ 112. That suggests it is just

---

[5] One arguable exception is DPPs' allegation that "commonality of suppliers increased transparency into cost functions of each of the firms within the German Luxury Car Market, providing mechanisms to police the cartel." DPP Compl. ¶ 185. Since this allegation goes to the ease of enforcing collusive agreements, rather than the extent to which a firm's pricing decisions will be driven by competitors' behavior, it may be distinguishable from allegations that the market is interdependent. However, by facilitating "observation of their competitors' decisions," the alleged "transparency" would facilitate "conscious parallelism" by Defendants just as much as unlawful agreement. See *In re Musical Instruments, 798 F.3d at 1195*. This allegation, like others about Defendants' motive or ability to successfully collude, is equally consistent with lawful behavior as an anticompetitive conspiracy.

as if not more plausible that Defendants "arrive[d] at identical decisions independently, **[**51]** [because] they [were] cognizant of—and reacting to—similar market pressures." *In re Musical Instruments, 798 F.3d at 1193*.

The plausibility of a conspiracy not to invest in electric vehicles is further undercut by the DPP Complaint's admission that Audi, BMW, and Porsche did produce electric and hybrid vehicles in 2013 and 2014. DPP Compl. ¶ 144. The DPP Complaint tries to reconcile this fact with the claimed conspiracy by alleging that the electric and hybrid vehicles produced were not advanced enough. Id. This simply underscores the weakness of their theory. DPPs are reduced to arguing that Defendants must have unlawfully agreed to underinvest in electric vehicles, because absent such an agreement they would have made a better electric vehicle. Absent direct evidence of agreement, or more robust allegations of plus factors than the ones discussed above, this (barely) parallel conduct cannot support an antitrust claim.

[*985] D. Steel-Buying Conspiracy

This Court has previously considered DPPs' allegations that "the five leading German car makers agreed to coordinate their purchases of . . . steel." Order re MTD at 17; see also DPP Compl. ¶¶ 158-65. In its prior order, the Court concluded that even if Defendants had agreed on the price **[**52]** of steel, "the prices they paid for those inputs would presumably have dropped," which "would likely have benefited car purchasers, not harmed them." Order re MTD at 17. DPPs seek to avoid a similar result this time around by alleging that Defendants colluded to pay higher prices, because their goal was to pay the same price for steel as their competitors, even if that meant everyone paid more. According to the DPP Complaint, this allowed Defendants to avoid competing for market share based on steel prices and assured they could pass any price increase on to their customers. DPP Compl. ¶¶ 161-65.

This theory is not supported by DPPs' factual allegations. Those allegations describe a scheme in which each Defendant agreed with the steel manufacturers on a baseline price for steel. DPP Compl. ¶ 161. Additionally, and apparently unlawfully, Defendants agreed to a standardized "purchase price 'index' on top of the baseline price to account for fluctuations in the market for raw materials—this element of the cost was calculated at shorter intervals and, if the index rose or fell, the automobile manufacturers paid more or less, respectively." Id. This arrangement accommodated the steel manufacturers' **[**53]** need to account for short term fluctuations in the cost of raw materials, but also Defendants' desire for a "fixed, predictable [steel] cost[]" that would allow them "to set car model prices for the year." Id. ¶ 160.

Other than conclusory claims to the contrary, DPPs never adequately explain why this agreement would raise the prices they paid to Defendants. Although the index price was additional to the baseline price, that does not mean it increased the price Defendants paid for steel. Absent the baseline/index formula, Defendants presumably would have paid a single, higher price that accounted for the cost of raw materials. See id. The July 12, 2018, Bundeskartellamt press release DPPs seek to rely on is unhelpful, because it discusses only the steel manufacturers—it does not even mention Defendants, let alone support the allegation that they agreed to pay higher prices for steel than they would have absent the collusion. See DPP Opp'n at 14 n.10 (citing Bundeskartellamt, Press Release, Bundeskartellamt imposes first fines totaling approx. 205 million euros on special steel companies, (July 12, 2018) http://tinyurl.com/seeloqn).[6]

Finally, DPPs' allegations that Defendants offset rising **[**54]** steel costs by increasing prices do nothing to support their theory of injury from the alleged agreement on steel purchases. DPP Compl. ¶ 162-65. Notably, DPPs do not allege that the increased prices were caused by Defendants' agreement. To the contrary, they acknowledge that Japanese automobile manufacturers were also impacted by the alleged price increase. Id. ¶ 164.

DPPs allege that Daimler was able to offset higher steel costs by raising prices and that as a group Defendants maintained higher margins than their Japanese competitors. The DPP Complaint concludes these outcomes are

---

[6] Because the Court has reviewed the press release's contents and finds it unhelpful, DPPs'request for judicial notice of this document is denied as moot.

inconsistent with any explanation other than collusion. Id. ¶¶ 162-65. But this bare allegation of **[*986]** collusion is belied by the DPP Complaint's factual allegations, which are more consistent with lawful conscious parallelism. DPPs allege that Daimler, discussing its willingness to raise prices, stated that it preferred to "not be the last to move forward on the pricing front, but rather on the other end." Id. ¶ 162. This suggests not an agreement to raise prices, but various firms watching their competitors' pricing decisions and adjusting their own prices in response. This type of "follow the leader" pricing **[**55]** (in which Daimler aspired to be the leader, rather than a follower) is a well-recognized form of lawful conscious parallelism. *In re Musical Instruments, 798 F.3d at 1195* ("[S]o long as prices can be easily readjusted without persistent negative consequences, one firm can risk being the first to raise prices, confident that if its price is followed, all firms will benefit.").

In sum, neither more recent press releases nor DPPs' amended pleadings change the Court's earlier conclusion (and DPPs' original contention) that the steel-purchasing agreements, even if unlawful, most plausibly led to lower prices. Order re MTD at 17; see also Original DPP Compl. (dkt. 244) ¶ 87 (alleging that the steel-purchasing agreements created "cost savings"). They have therefore failed to plead an injury resulting from this alleged agreement. See Order re MTD at 17-18 (failure to plead injury resulting from steel-buying agreements meant those allegations could not support an antitrust claim).

E. State Law Claims

This Court has previously concluded that "[t]he factual bases and theories of injury for [IPPs' various state law] claims are the same as those for the Sherman Act claims." Id. at 19. Because the Sherman Act claims were not well pled, the state law **[**56]** claims were dismissed as well. Id. IPPs do not contend that this was error, or that their state law claims should not live and die with their Sherman Act claim. See IPP Opp'n at 41, 43, 46. IPPs' state law claims are therefore dismissed without prejudice.

IV. CONCLUSION

For the foregoing reasons, the motions to dismiss are granted.[7] It is not a certainty, however, that Plaintiffs cannot allege facts sufficient to plead a relevant market or injury from the alleged steel-buying agreements. The Court thus grants them leave to amend their complaints to attempt to salvage these claims. To the extent that they choose to do so, they must file their amended complaints within **45 days** of this Order.

IT IS SO ORDERED.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

HN1[] **Deceptive & Unfair Trade Practices, State Regulation**

A federal court sitting in diversity applies the choice-of-law rules of the forum state where it sits. In determining if the Minnesota Consumer Fraud Act can apply extraterritorially, Minnesota courts apply a multistep analysis. The court first determines whether an outcome-determinative conflict exists. If a conflict exists, the court determines whether the law of both states can be constitutionally applied. If it is constitutionally permissible for the forum state to apply its laws, the court then considers five factors to determine whether to apply the forum state law.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN2[] **Deceptive & Unfair Trade Practices, State Regulation**

The Minnesota Consumer Fraud Act (MCFA) prohibits the act, use, or employment by any person of any fraud, false pretense, false promise, misrepresentation, misleading statement or deceptive practice, with the intent that others rely thereon in connection with the sale of any merchandise. *Minn. Stat. § 325F.69, subd. 1*. For an MCFA claim based on an omission, a plaintiff must prove an omission of material fact, as well as special circumstances that trigger a duty to disclose.

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN3[] **Nondisclosure, Elements**

Special circumstances triggering a duty to disclose include: (a) one who speaks must say enough to prevent his words from misleading the other party; (b) one who has special knowledge of material facts to which the other party does not have access may have a duty to disclose these facts to the other party; and (c) one who stands in a confidential or fiduciary relation to the other party to a transaction must disclose material facts.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Evidence > Types of Evidence > Circumstantial Evidence

HN4[] **Deceptive & Unfair Trade Practices, State Regulation**

Under the Minnesota Consumer Fraud Act (MCFA), a plaintiff need not prove traditional common law reliance. Rather, he or she must establish a causal nexus between the conduct alleged to violate the MCFA and the damages claimed, which can be proved by circumstantial evidence. An element of individual reliance is embedded in the causal nexus requirement because a fraudulent or misleading statement cannot by its nature cause harm unless the statement had some impact on inducing the individual plaintiff's actions.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN5[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Competition Law (UCL) prohibits any unlawful, unfair or fraudulent business act or practice. Bus. & Prof. Code, § 17200. Because the UCL is written in the disjunctive, it establishes three varieties of unfair competition—acts or practices which are unlawful, or unfair, or fraudulent. To prevail on a UCL claim, a plaintiff must prove that the defendant engaged in a business practice proscribed under one of these three varieties of unfair competition, and that the plaintiff was injured as a result of the business practice.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN6[] **State Regulation, Claims**

The three varieties of unfair competition—also known as the prongs of the Unfair Competition Law (UCL)—have different thresholds. Under the unlawful prong, a violation of another law is a predicate for stating a cause of action.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN7[] **Trade Practices & Unfair Competition, State Regulation**

Under one line of cases, an unfair business practice occurs when that practice offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Consumer Protection > False Advertising > US Federal Trade Commission

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > Federal Trade Commission Act > US Federal Trade Commission

HN8[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

A second line of cases considers the factors for unfairness set forth in section 5 of the Federal Trade Commission Act: (1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN9[] **Conspiracy to Monopolize, State Regulation**

A third line of cases holds that a plaintiff alleging an unfair business practice must show the defendant's conduct is tethered to an underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN10[] **State Regulation, Claims**

Finally, a business practice is fraudulent under the Unfair Competition Law (UCL) if members of the public are likely to be deceived.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN11[] **Trade Practices & Unfair Competition, State Regulation**

The Consumer Legal Remedies Act (CLRA) prohibits unfair methods of competition and unfair or deceptive acts or practices undertaken by any person in a transaction intended to result or that results in the sale or lease of goods or services to any consumer. Civ. Code, § 1770(a). The CLRA defines consumer as an individual who seeks or acquires, by purchase or lease, any goods or services for personal, family, or household purposes. Civ. Code, § 1761(d).

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN12[] **Deceptive & Unfair Trade Practices, State Regulation**

To prevail under a Consumer Legal Remedies Act (CLRA) claim, a plaintiff must show that the defendant's conduct was deceptive and that the deception caused them harm. Civ. Code, § 1780(a).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN13[] **State Regulation, Claims**

Reliance is a necessary element of a Unfair Competition Law (UCL) claim. The Consumer Legal Remedies Act (CLRA) also requires proof of reliance. To prove reliance on an omission under both the UCL and CLRA, a plaintiff must show that the defendant's nondisclosure was an immediate cause of the plaintiff's injury-producing conduct. A plaintiff need not prove that the omission was the only cause or even the predominant cause, only that it was a substantial factor in his decision. A plaintiff may do so by simply proving that, had the omitted information been disclosed, one would have been aware of it and behaved differently. That one would have behaved differently can be presumed, or at least inferred, when the omission is material. An omission is material if a reasonable consumer would attach importance to its existence or nonexistence in determining his choice of action in the transaction in question.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN14[] **Deceptive & Unfair Trade Practices, State Regulation**

In the context of a class action, California requires named class plaintiffs to demonstrate reliance. Under the Consumer Legal Remedies Act (CLRA), named and unnamed plaintiffs must prove the alleged deceptive conduct caused that damage. Causation, and an inference of reliance, for the class in a CLRA claim can be shown as to an entire class by proving materiality. A presumption of reliance does not arise when class members were exposed to quite disparate information from various representatives of the defendant.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN15[] Deceptive & Unfair Trade Practices, State Regulation

Courts applying the Consumer Legal Remedies Act CLRA and UCL have also found that the fact that a defendant may be able to defeat the showing of causation as to a few individual class members does not transform the common question into a multitude of individual ones. Establishing lack of causation as to a handful of class members does not necessarily render the issue of causation an individual, rather than a common, one. Plaintiffs may satisfy their burden of showing causation as to each by showing materiality as to all. If the issue of materiality or reliance is a matter that would vary from consumer to consumer, the issue is not subject to common proof, and the action is properly not certified as a class action.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN16[] Trade Practices & Unfair Competition, State Regulation

Florida's Deceptive and Unfair Trades Practices Act (FDUTPA) provides for a civil cause of action for unfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce. § *Fla. Stat. 501.204(1)*. A consumer claim for damages under FDUTPA has three elements: (1) a deceptive act or unfair practice; (2) causation; and (3) actual damages. § *Fla. Stat. 501.211(2)*. In any actions brought by a person who has suffered a loss as a result of a violation of this part, such person may recover actual damages.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN17[] Deceptive & Unfair Trade Practices, State Regulation

To satisfy the first element of a Florida's Deceptive and Unfair Trades Practices Act's claim, a plaintiff must show that the alleged practice was likely to deceive a consumer acting reasonably in the same circumstances. Deception occurs if there is a representation, omission, or practice that is likely to mislead the consumer acting reasonably in the circumstances, to the consumer's detriment. This element is only satisfied by evaluating a reasonable consumer in the same circumstances as plaintiff. The modification of acting reasonably by in the same circumstances' indicates a hybrid standard that may be objectively established as to mindset but subjectively established as to context.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN18[] Deceptive & Unfair Trade Practices, State Regulation

A Florida's Deceptive and Unfair Trades Practices Act (FDUTPA) plaintiff need not show actual reliance on the representation or omission at issue. Proof of actual reliance is unnecessary under the FDUPTA. A demonstration of reliance by an individual consumer is not necessary in the context of FDUTPA.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN19[] Deceptive & Unfair Trade Practices, State Regulation

The Missouri's Merchandising Practices Act (MMPA) prohibits any person from engaging in any deception, fraud, false pretense, false promise, misrepresentation, unfair practice or the concealment, suppression, or omission of any material fact in connection with the sale or advertisement of any merchandise in trade or commerce in or from the state of Missouri. *Mo. Rev. Stat. § 407.020*. To prevail on an MMPA claim, a plaintiff must prove he or she: (1) purchased merchandise from the defendant; (2) for personal, family or household purposes; and (3) suffered an ascertainable loss of money or property; (4) as a result of an act declared unlawful under the MMPA. *Mo. Rev. Stat. § 407.025*. The plain language of the MMPA demands a causal connection between the ascertainable loss and the unfair or deceptive merchandising practice. *Mo. Rev. Stat. § 407.025.1*. Under the MMPA, a material fact is any fact which a reasonable consumer would likely consider to be important in making a purchasing decision. 15 C.S.R. 60-9.010(1)(C).

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN20[] Deceptive & Unfair Trade Practices, State Regulation

A claim for omission of a material fact under the Missouri's Merchandising Practices Act (MMPA) does have a scienter requirement: it is a failure to disclose material facts that are known to him/her, or upon reasonable inquiry would be known to him/her. 15 C.S.R. 60-9.110. Under the MMPA, the plaintiff must show (1) the defendant was aware of the alleged defect, (2) when defendant became aware, and (3) that defendant purposefully omitted this fact in representations to each individual class member.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN21[] Deceptive & Unfair Trade Practices, State Regulation

New York General Business Law § 349 prohibits deceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in New York GBL *§ 349(a)*. To prove a claim under GBL *§ 349(a)*, a plaintiff must show that (1) the challenged act or practice was consumer-oriented,(2) it was misleading in a material way, and (3) the plaintiff suffered injury as a result of the deceptive act. Whether a representation or an omission, the deceptive practice must be likely to mislead a reasonable consumer acting reasonably under the circumstances. To satisfy the GBL's causation requirement, nothing more is required than that a plaintiff suffer a loss because of defendant's deceptive act. A plaintiff seeking compensatory damages must show that the material deceptive practice caused actual, although not necessarily pecuniary, harm.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN22[] Actual Fraud, Elements

Intent to defraud and justifiable reliance by the plaintiff are not elements of the statutory claim.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN23[] State Regulation, Claims

N.C. Gen. Stat. § 75-1.1 provides in part that unfair or deceptive acts or practices in or affecting commerce are unlawful. N.C. Gen. Stat. § 75-1.1(a). In order to establish a prima facie claim for unfair trade practices, a plaintiff must show: (1) the defendant committed an unfair or deceptive act or practice, (2) the action in question was in or affecting commerce, and (3) the act proximately caused injury to the plaintiff. The determination of whether an act or practice is an unfair or deceptive practice that violates North Carolina Unfair and Deceptive Trade Practices Act is a question of law for the court.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN24[] Trade Practices & Unfair Competition, State Regulation

The Minnesota Consumer Fraud Act does not require proof of individual reliance, but it does require a causal nexus between the violative conduct and damages, such that a defendant's conduct had some impact on inducing the individual plaintiff's actions. In contrast, the Unfair Competition Law and Consumer Legal Remedies Act require reliance on an omission, which may be proved by showing that had the omitted information been disclosed, one would have been aware of it and behaved differently.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN25[] Trade Practices & Unfair Competition, State Regulation

Unlike the Minnesota Consumer Fraud Act, the Consumer Legal Remedies Act and Missouri's Merchandising Practices Actare limited to goods or services purchased for personal, family, or household purposes. Civ. Code, § 1761(d).

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

HN26[] Choice of Law, Significant Relationships

For a State's substantive law to be selected in a constitutionally permissible manner, that State must have a significant contact or significant aggregation of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair. When considering fairness in this context, an important element is the expectation of the parties.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

HN27[] Choice of Law, Governmental Interests

The choice-influencing factors are: (1) predictability of result; (2) maintenance of interstate and international order; (3) simplification of the judicial task; (4) advancement of the forum's governmental interest; and (5) application of the better rule of law. These factors were intended to prompt courts to carefully and critically consider each new fact situation and explain in a straight-forward manner their choice of law.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN28[] **Deceptive & Unfair Trade Practices, State Regulation**

The predictability-of result-factor represents the ideal that litigation on the same facts, regardless of where the litigation occurs, should be decided the same to avoid forum shopping. It addresses whether the choice of law was predictable before the time of the transaction or event giving rise to the claim. This factor applies primarily to consensual transactions where parties desire advance notice of which state law will govern in future disputes. In most tort cases, predictability of result is of little relevance. Consumer protection claims are not based entirely in either tort or contract law.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

HN29[] **Choice of Law, Governmental Interests**

The maintenance-of-interstate-order factor is concerned with whether applying Minnesota law would manifest disrespect for other state sovereignty or impede the interstate movement of people and goods. An aspect of this concern is to maintain a coherent legal system in which the courts of different states strive to sustain, rather than subvert, each other's interests in areas where their own interests are less strong. By considering whether application of Minnesota law would negatively affect the maintenance of interstate order, the opportunities for forum shopping may be kept within reasonable bounds.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN30[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is proper if the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine dispute as to any material fact and that the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. In assessing whether such a dispute exists, a court must make all reasonable inferences in favor of the non-moving party, but will not resort to speculation. The burden of demonstrating an absence of a genuine dispute of material fact is on the moving party. If the movant does so, the nonmovant must respond by submitting evidentiary materials that set out specific facts showing that there is a genuine issue for trial.

Torts > Remedies > Damages > Proof

HN31[] **Damages, Proof**

The fact of injury must not be speculative, remote, or conjectural, but proved with certainty.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Burdens of Proof > Preponderance of Evidence

HN32[ ] **Expert Witnesses, Daubert Standard**

When considering expert testimony, a district court must ensure that all scientific testimony is both reliable and relevant. To satisfy the reliability requirement, the proponent of the expert testimony must show by a preponderance of the evidence both that the expert is qualified to render the opinion and that the methodology underlying his conclusions is scientifically valid. District courts act as gatekeepers, making preliminary assessment of whether the reasoning or methodology underlying the testimony is scientifically valid and of whether that reasoning or methodology properly can be applied to the facts in issue.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN33[ ] **Expert Witnesses, Daubert Standard**

It is the responsibility of the Court to determine whether a particular expert has sufficient specialized knowledge to assist jurors in deciding the specific issues in the case.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN34[ ] **Expert Witnesses, Daubert Standard**

To be admissible, expert testimony must be based on reliable principles and methods. *Fed. R. Evid. 702(c)*. Among the many factors courts consider to determine whether expert opinions are reliable are: (1) whether the theory or technique can be (and has been) tested; (2) whether the theory or technique has been subjected to peer review and publication; (3) the known or potential rate of error; and (4) whether the theory has been generally accepted. (cleaned up). As a general rule, the factual basis of an expert opinion goes to the credibility of the testimony, not the admissibility.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN35[ ] **Expert Witnesses, Daubert Standard**

Under Daubert, the known or potential rate of error is indeed important to assessing the scientific validity of an expert's methods.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN36[ ] **Expert Witnesses, Daubert Standard**

To show that the expert testimony is relevant, the proponent of the expert testimony must show that the reasoning or methodology in question is applied properly to the facts in issue. Courts should resolve doubts regarding the usefulness of an expert's testimony in favor of admissibility.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN37[] **Standing, Elements**

The jurisdiction of federal courts extends only to actual cases or controversies. *U.S. Const. art. III, § 2, cl.1*; The Eighth Circuit has held that under the case-or-controversy requirement, a class must be defined in such a way that anyone within it would have standing. In other words, a named plaintiff cannot represent a class of persons who lack the ability to bring a suit themselves.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN38[] **Prerequisites for Class Action, Commonality**

Under *Fed. R. Civ. P. 23(b)(3)*, a district court must find that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*. The predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation. It is satisfied if the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues. The superiority requirement asks whether the class action is the best available method for resolving the controversy.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN39[] **Class Actions, Certification of Classes**

Each of proposed statewide classes must also satisfy the requirements of *Fed. R. Civ. P. 23(b)(3)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN40[] **Class Actions, Certification of Classes**

To determine whether a class action is the best available method to resolve a dispute, courts examine whether a class action would be manageable.

Opinion

[*948] ORDER

Plaintiffs bring this action under the laws of six states on behalf of a putative class of all-terrain vehicle ("ATV") buyers. They claim that Defendant Polaris Industries, Inc. omitted material facts about an alleged defect at the time they purchased their Sportsman ATVs. Fact and expert discovery have now closed. Plaintiffs move for class certification, and Polaris moves to strike certain of Plaintiffs' expert opinions and for summary judgment on the named Plaintiffs' claims.[1]

BACKGROUND

[1] Polaris requested permission to file a *Daubert* motion in connection with its class certification motion (ECF No. 321) and Plaintiffs did not object, except with respect to word limits in the briefing. (ECF No. 322.) The Court granted the request. (ECF No. 323.) Polaris then filed a motion for summary judgment. (ECF No. 356.) The Court heard oral argument on all motions together.

The Court draws the following background facts from the summary judgment record, viewing the evidence in the light most favorable to the Plaintiffs. [Torgerson v. City of Rochester, 643 F.3d 1031, 1042 (8th Cir. 2011)](#) (*en banc*).

Polaris, headquartered in Medina, Minnesota, manufactures recreational vehicles, such as ATVs and motorcycles. (ECF **[**4]** No. 340-2 at 23:17-19.) Polaris's ATVs include the Sportsman 450, 570, 850, and 1000. (ECF No. 370 ("Dahl Decl.") ¶¶ 3-4.) The Sportsman 450 and 570 ATVs have smaller single cylinder engines; the Sportsman 850 and 1000 ATVs have larger dual cylinder engines. (*Id.* ¶ 6.)

As early as 2007, Polaris faced consumer complaints about excessive heat in some of its ATVs. In 2014, the U.S. Consumer Production Safety Commission ("CPSC") opened an investigation in response to reports of several ATV fires. Over the course of that investigation, the CPSC made the preliminary determination that Polaris MY2015-16 Sportsman 850 ATVs present "a substantial product hazard" under [15 U.S.C. § 2064(a)](#), noting that "the right **[*949]** hand side heat shield is in close proximity to, and in some cases makes contact with [the] exhaust manifold, posing a burn and fire hazard." (ECF No. 336-23 at 2.) The CPSC requested that Polaris voluntarily recall or correct the potentially hazardous Sportsman 850 ATVs. (*Id.* at 3.) In March 2017, Polaris issued a recall for MY2015-16 Sportsman 850s and 1000 ATVs. (ECF No. 336-24.) Polaris informed consumers that it had developed a new exhaust manifold side panel that "significantly increases the air gap between **[**5]** the exhaust manifold and exhaust manifold side panel and utilizes a metal heat shield." (ECF No. 336-25.)

The CPSC's investigation also sought information about Polaris's Sportsman 570s. (ECF No. 336-22.) Following the investigation, Polaris issued a service advisory in July 2017 offering an "optional Right Hand Side Panel Close Off Kit that will redirect a portion of the heat produced by the engine and exhaust away from the right hand foot well area" for MY2016-17 Sportsman 450s and MY2014-17 Sportsman 570s. (ECF No. 336-26.)

Plaintiffs in this case are Sportsman ATV owners Riley Johannessohn, Daniel C. Badilla, James Kelley, Kevin R. Wonders, William Bates, and James Pinion (collectively, "Plaintiffs").[2] Their Corrected Second Amended Complaint ("Complaint") pleads that Polaris violated the consumer protection laws of Minnesota, California, Florida, Missouri, New York, and North Carolina by failing to disclose the Sportsman line's exhaust heat problems, causing Plaintiffs to suffer injury. (ECF No. 66 ("SAC") ¶¶ 85-175.) The Complaint alleges that "Polaris'[s] omissions artificially inflated the market price for the ATVs" when Polaris "could have and should have warned customers" about **[**6]** what the Complaint refers to as an "exhaust heat defect." (*Id.* ¶ 4.) Plaintiffs now seek to certify a nationwide class of consumers who purchased new MY2011-16 Polaris Sportsman 850s, MY2015-16 Sportsman 1000s, MY2014-17 Sportsman 570s, and MY2016-17 Sportsman 450s (the "Class Vehicles") from October 4, 2010 to the present. (ECF No. 335 at 1 n.1.) In the alternative, they seek to certify six statewide classes for Class Vehicle owners in the states of Minnesota, Florida, California, Missouri, New York, and North Carolina. (*Id.* at 18-19.) Polaris moves for summary judgment on all claims asserted against it in the Complaint. (ECF No. 356.) Polaris also seeks to exclude the expert testimony of Richard Eichmann and Sara Butler. (ECF No. 371.) For the reasons discussed below, all three motions—for summary judgment, for exclusion of expert testimony, and for class certification—are denied.

SUMMARY JUDGMENT

I. Choice of Law

To assess Plaintiffs' claims, the Court must first decide what law applies to them. This task requires a choice-of-law analysis, complex here because Plaintiffs are from six states, each with its own consumer protection statute or statutes. Plaintiffs contend that the [Minnesota Consumer Fraud Act](#) **[**7]** should apply to the consumer fraud claims of all plaintiffs, regardless of their state of residence. *See* [Minn. Stat. § 325F.68 et seq.](#) ("MCFA"). ***HN1***[] A federal court sitting in diversity applies the choice-of-law rules of the forum state where it sits—here, Minnesota's

---

[2] The Second Amended Complaint also includes Plaintiff Ronald Krans, a resident of Illinois. His claims have been dismissed from the case. (ECF No. 143.)

choice-of-law rules. *Highwoods Props., Inc. v. Exec. Risk Indem., Inc., 407 F.3d 917, 920 (8th Cir. 2005)*. In determining if the MCFA can apply extraterritorially, Minnesota courts apply a multistep analysis. The **[*950]** court first determines whether an outcome-determinative conflict exists. *Jepson v. Gen. Cas. Co. of Wisc., 513 N.W.2d 467, 469-70 (Minn. 1994)*; *In re St. Jude Med., Inc., 425 F.3d 1116, 1120 (8th Cir. 2005)* ("St. Jude I"). If a conflict exists, the court determines whether the law of both states can be constitutionally applied. *Jepson, 513 N.W.2d at 469*. If it is constitutionally permissible for the forum state to apply its laws, the court then considers five factors to determine whether to apply the forum state law. *Id. at 470*. For the reasons that follow, the Court concludes that each Plaintiff's claims are governed by the state in which he resides.

A. Application of the MCFA: Outcome-Determinative Conflicts

The Complaint alleges that Polaris violated the consumer protection laws of Minnesota, California, Florida, Missouri, New York, and North Carolina, thereby injuring Plaintiffs and other consumers who reside in those states. Plaintiffs maintain that because the consumer protection **[**8]** laws of these states do not conflict with the MCFA, the Court can apply the MCFA to all claims.[3]

The parties focus their briefs on the requirements of reliance or causation and scienter under each state's consumer protection statute or statutes. In doing so, both Plaintiffs and Polaris refer to tables appended to their briefs.[4] Plaintiffs bear the burden of fully analyzing the law of the jurisdictions whose laws may apply to the putative class's claims; it is not Polaris's burden to prove an outcome-determinative conflict exists. *See Thompson v. Allianz Life Ins. Co. of N. Am., 330 F.R.D. 219, 223 (D. Minn. 2019)*. Below, the Court addresses the six state consumer-protection laws and their requirements as to reliance or causation and scienter. Such an analysis is necessary before the Court can compare each state's laws against the MCFA to reach the conflicts issue.

1. Minnesota

The Complaint alleges that Polaris violated the MCFA by omitting material information regarding the Sportsman ATVs' exhaust heat defect, thereby injuring Plaintiff Riley Johannessohn and other purchasers.[5] (SAC Count I.) ***HN2***[] The MCFA prohibits "[t]he act, use, or employment by **[*951]** any person of any fraud, false pretense, **[**9]** false promise, misrepresentation, misleading statement or deceptive practice, with the intent that others rely thereon in connection with the sale of any merchandise." *Minn. Stat. § 325F.69, subd. 1*. A private plaintiff suing for an MCFA violation must prove that "the defendant engaged in conduct prohibited by the statutes and that the plaintiff was damaged thereby." *Grp. Health Plan, Inc. v. Philip Morris Inc., 621 N.W.2d 2, 12 (Minn. 2001)*; *see also* *Wexler v. Bros. Entm't Grp., Inc., 457 N.W.2d 218, 221 (Minn. Ct. App. 1990)* (to prevail on an

---

[3] In *In re St. Jude*, the district court concluded that the consumer protection laws of 32 jurisdictions did not have outcome-determinative conflicts with Minnesota. *No. 01-CV-1396 (JRT/FLN), 2006 U.S. Dist. LEXIS 74797, 2006 WL 2943154, at *5 & n.3 (D. Minn. Oct. 13, 2006)*, *rev'd and remanded on other grounds*, *In re St. Jude Med., Inc. ("St. Jude II"), 522 F.3d 836 (8th Cir. 2008)*. That court relied on the plaintiffs' analysis to find no conflicts among certain state consumer protection laws, including the six states forming the basis of Plaintiffs' claims here. *2006 U.S. Dist. LEXIS 74797, [WL] at *5*. This Court has conducted its own analysis of the consumer statutes at issue and comes to a different conclusion based on the facts of this case.

[4] Polaris submitted a detailed table analyzing state consumer protection statutes in support of the argument that the laws conflict. (ECF No. 367-1 ("Polaris App. A").) Plaintiffs respond with a much simpler table indicating "yes" or "no" to four questions about each state's consumer protection statute: whether a private cause of action exists, whether scienter is required, whether individual reliance is required, and whether material omissions are prohibited. (ECF No. 336-2 ("Pls' Tab C").) These four issues were identified as outcome-determinative conflicts for the consumer protection statutes. *In re St. Jude, 2006 U.S. Dist. LEXIS 74797, 2006 WL 2943154, at *5 n.4*. Polaris argues that the states' consumer protection statutes also differ on the requirements of the duty to disclose omissions, materiality, and causation. Plaintiffs address these requirements in summary fashion, asserting that they are not outcome-determinative in the context of this case.

[5] The injury claimed by Plaintiffs is economic, not physical.

MCFA claim, a plaintiff must prove that the defendant violated *Minn. Stat. § 325F.69* and that the plaintiff "was injured in some way by the violation"). For an MCFA claim based on an omission, a plaintiff must prove an omission of material fact, as well as special circumstances that trigger a duty to disclose. *Graphic Communs. Local 1B Health & Welfare Fund "A" v. CVS Caremark Corp., 850 N.W.2d 682, 696 (Minn. 2014)*.[6]

a. Causation under the MCFA

HN4[] Under the MCFA, a plaintiff need not prove traditional common law reliance. *Grp. Health, 621 N.W.2d at 13*. Rather, he or she must establish a causal nexus between the conduct alleged to violate the MCFA and the damages claimed, which can be proved by circumstantial evidence. *Id. at 4, 14*. In *Group Health*, the Minnesota Supreme Court noted that an element of individual reliance is embedded in the causal nexus requirement because a fraudulent or misleading statement cannot by its nature cause **[**10]** harm unless the statement "had some impact on" inducing the individual plaintiff's actions. *State v. Minn. Sch. of Bus., Inc., 935 N.W.2d 124, 141 (Minn. 2019)* (quoting *Grp. Health, 621 N.W.2d at 14*).

Polaris claims that a causal nexus under Minnesota law cannot be presumed, but instead must be proved through evidence for each purchaser. It cites *Buetow v. A.L.S. Enterprises, Inc.*, for the proposition that "[w]hen the plaintiffs are consumers who have proved no future harm . . . it is an error of law to *assume* that a false statement materially deceived and injured the plaintiffs." *650 F.3d 1178, 1183 (8th Cir. 2011)* (emphasis in original). The Court finds *Buetow* distinguishable because there, the plaintiffs sought only injunctive relief without presenting any evidence of a risk of future harm. *See id. at 1182, 1185* (explaining that *Group Health* "requir[es] a private plaintiff seeking injunctive relief for violations of [MCFA] to prove harm or injury-in-fact"). Polaris also relies on the Minnesota Court of Appeals' decision in *State v. Minnesota* ***[*952]*** *School of Business, Inc.*, which held that particular students' testimony that the defendant school's conduct harmed them could be not used to presume a causal nexus for non-testifying students. *915 N.W.2d 903, 911-13 (Minn. Ct. App. 2018)*. But this holding was recently reversed in *State v. Minnesota School of Business, Inc., 935 N.W.2d 124 (Minn. 2019)*. In its opinion, the Minnesota Supreme Court discussed **[**11]** *Group Health*, and reiterated that "direct proof of reliance is not required to establish a causal nexus" under the MCFA. *Id. at 137*. "[W]here a defendant's misrepresentations were directed at and affected a broad group of consumers, proof of direct individual reliance is not required to establish a causal nexus between MCFA violations, and the harm suffered by consumers." *Id. at 135* (citing *Grp. Health, 621 N.W.2d at 14-15*). The court noted that while "individualized direct proof of reliance is not necessary in an MCFA damages case," "there are times when the materiality and pervasiveness of consumer fraud is relevant to support a court's finding that a causal nexus exists between the fraud and the consumer's decision to purchase the product." *Id.*

In Minnesota, a defendant has a chance to rebut evidence of causation presented by the plaintiffs. In *St. Jude II*, the Eighth Circuit explained that "[w]hatever *Group Health* means about the need for these plaintiffs to present direct evidence of individual reliance, it does not eliminate the right of a defendant to present evidence negating a plaintiff's direct or circumstantial showing of causation and reliance." *522 F.3d at 840*. The *St. Jude II* court found that the defendant had presented evidence concerning **[**12]** the reliance or nonreliance of individual physicians and patients on representations made by the defendant, and held that where the defendant was able to present such evidence, the resolution of the defendant's potential liability to each plaintiff under the consumer fraud statutes would be dominated by individual issues of causation and reliance. *Id. at 839-40* (reversing certification of an MCFA

[6] ***HN3***[] Special circumstances triggering a duty to disclose include: (a) one who speaks must say enough to prevent his words from misleading the other party; (b) one who has special knowledge of material facts to which the other party does not have access may have a duty to disclose these facts to the other party; and (c) one who stands in a confidential or fiduciary relation to the other party to a transaction must disclose material facts. *Klein v. First Edina Nat'l Bank, 293 Minn. 418, 421, 196 N.W.2d 619 (1972)*; *see also* ***Graphic Communs., 850 N.W.2d at 695-98*** (citing *Klein, 293 Minn. at 421*). The parties do not dispute that Polaris had a duty to disclose the exhaust heat defect. *See Johannessohn v. Polaris Indus., Inc., No. 16-CV-3348 (PJS/LIB), 2017 U.S. Dist. LEXIS 99843, 2017 WL 2787609, at *4 (D. Minn. June 27, 2017)* ("Polaris does not argue that it lacks a duty to disclose, and *Graphic Communications* is therefore not relevant.").

class).[7] Here, Polaris argues that it will introduce rebuttal evidence to disprove any connection between an individual plaintiff's decision to purchase and the alleged omission.

b. Scienter under the MCFA

Polaris argues that the MCFA requires proof of scienter, noting that the defendant must have acted "with the intent that others rely thereon." Minn. Stat. § 325F.69 subd. 1. Plaintiffs maintain, without elaboration, that scienter is not required. (Pls' Tab C at 2 & n.2.) To the extent the parties read "scienter" to mean intentional misrepresentations, courts have held that the MCFA "does not require the making of an intentional misrepresentation." Freeman v. A & J Auto MN, Inc., No. A03-153, 2003 Minn. App. LEXIS 1143, 2003 WL 22136807, at *4 (Minn. Ct. App. Sept. 16, 2003); *see also* Meyer v. Dygert, 156 F. Supp. 2d 1081, 1086 (D. Minn. 2001) (same).[8]

[*953] *2. California*

On behalf of Plaintiff Daniel Badilla, **[**13]** the Complaint alleges violations of two California statutes: the Unfair Competition Law ("UCL"), Cal. Bus. & Prof. Code § 17200, and the Consumer Legal Remedies Act ("CLRA"), *Cal. Civ. Code § 1770(a)(5)*, *(7)*. A plaintiff may base claims under the UCL and CLRA on an alleged omission, "[but] to be actionable the omission must be contrary to a representation actually made by the defendant, or an omission of a fact that the defendant was obliged to disclose." Daugherty v. Am. Honda Motor Co., 144 Cal. App. 4th 824, 51 Cal. Rptr. 3d 118, 126 (Cal. Ct. App. 2006) (UCL and CLRA); *see also* Daniel v. Ford Motor Co., 806 F.3d 1217, 1225 (9th Cir. 2015). The Court will review the elements of the UCL and CLRA, then address the issues of reliance and scienter under both statutes.

a. The UCL

HN5[] The UCL prohibits "any unlawful, unfair or fraudulent business act or practice." Cal. Bus. & Prof. Code § 17200. Because the UCL is "written in the disjunctive, it establishes three varieties of unfair competition—acts or practices which are unlawful, or unfair, or fraudulent." Lippitt v. Raymond James Fin. Servs., Inc., 340 F.3d 1033, 1043 (9th Cir. 2003), *as amended* (Sept. 22, 2003) (quoting Cel-Tech Commc'ns., Inc. v. L.A. Cellular Tel Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)). To prevail on a UCL claim, a plaintiff must prove that the defendant engaged in a business practice proscribed under one of these three varieties of unfair competition, and that the plaintiff was injured "as a result of" the business practice. In re Gen. Motors LLC Ignition Switch Litig., No. 14-MC-2543 (JMF), 2016 U.S. Dist. LEXIS 92499, 2016 WL 3920353, at *19 (S.D.N.Y. July 15, 2016). The Complaint alleges that Polaris engaged in all **[**14]** three varieties of unfair competition, resulting in injury to

---

[7] The recent decision in *State v. Minnesota School of Business* does not address a defendant's ability to negate a plaintiff's direct or circumstantial showing of causation and reliance under the MCFA.

[8] In *Curtis Lumber Co. v. Louisiana Pacific Corp.*, the Eighth Circuit considered several state consumer protection laws, including Minnesota's, in concluding that Arkansas's consumer protection statutes do not require proof of intent to deceive. 618 F.3d 762, 778-79 (8th Cir. 2010). Like the MCFA, the terms of other state statutes "require[] only that a violator intend for a purchaser to *rely* on his acts or omissions." Id. at 778 (emphasis in original) (citing Warren v. LeMay, 142 Ill. App. 3d 550, 491 N.E.2d 464, 474, 96 Ill. Dec. 418 (Ill. App. Ct. 1986)). Despite this statutory language, the court found that the consumer protection laws of other states, including Minnesota, do not require intent to deceive. *See* id. at 778 & n.12 (citing MCFA and ***McNamara v. Nomeco Bldg. Specialties, Inc., 26 F. Supp. 2d 1168, 1171 (D. Minn. 1998)*** ("Simply stated, one making representations in the sale of consumer goods can be held liable, even though he had no specific intent to falsely mislead the consumer.")).

California purchasers. (*See* SAC ¶ 107 (Badilla and class members "suffered injury" as a "direct result" of Polaris's "unlawful, unfair, or fraudulent business acts and/or practices").)[9]

HN6[] The three varieties of unfair competition—also known as the prongs of the UCL—have different thresholds. Under the "unlawful" prong, a "violation of another law is a predicate for stating a cause of action." *Graham v. Bank of Am., N.A., 226 Cal. App. 4th 594, 172 Cal. Rptr. 3d 218, 231 (Cal. Ct. App. 2014)* (citation omitted); *see also* *Lazar v. Hertz Corp., 69 Cal. App. 4th 1494, 82 Cal. Rptr. 2d 368, 375 (Cal. Ct. App. 1999)* (find that under its "unlawful" prong, "the UCL borrows violations of other laws . . . and makes those unlawful practices actionable under the UCL."). The Court presumes that the CLRA forms the basis of the "unlawful" prong of Plaintiffs' UCL claim. *See* *Falco v. Nissan N. Am. Inc., No. CV1300686DDPMANX, 2016 U.S. Dist. LEXIS 46115, 2016 WL 1327474, at *9 (C.D. Cal. Apr. 5, 2016)* ("Plaintiffs can rely on an underlying CLRA violation for their UCL claim.").

In determining whether a business practice is "unfair" under the UCL, California appellate courts have been split regarding the proper test to employ. *See* *Linde, LLC v. Valley Protein, LLC, No. 116CV00527DADEPG, 2019 U.S. Dist. LEXIS 115730, 2019 WL 3035551, at *21 (E.D. Cal. July 11, 2019)* (summarizing split among appellate courts); *Zhang v. Superior Court, 57 Cal. 4th 364, 159 Cal. Rptr. 3d 672, 304 P.3d 163, 174 n.9* ***[*954]*** *(Cal. 2013)* (noting that the standard for determining what business acts or practices **[**15]** are "unfair" in consumer actions under the UCL is unsettled). ***HN7***[] Under one line of cases, an unfair business practice occurs "when that practice offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *Graham, 172 Cal. Rptr. 3d at 233* (citation and quotation marks omitted).

HN8[] A second line of cases considers the factors for unfairness set forth in *section 5* of the *Federal Trade Commission Act*: "(1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided." *Id.* (citation and quotation marks omitted). ***HN9***[] A third line of cases holds that "a plaintiff alleging an unfair business practice must show the defendant's conduct is tethered to an underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***." *Id. at 233-234* (cleaned up). The Complaint alleges Polaris engaged in "unfair" business practices by "seeking to profit from selling ATVs that possess a latent defect."[10] (SAC ¶ 104.) **[**16]** Because the Complaint alleges these practices are "immoral, unscrupulous, and offends public policy," Plaintiffs appear to be proceeding under the first standard for unfairness (and possibly the third).

HN10[] Finally, a business practice is "fraudulent" under the UCL if "members of the public are 'likely to be deceived.'" *Graham, 172 Cal. Rptr. 3d at 234* (quoting *Buller v. Sutter Health, 160 Cal. App. 4th 981, 74 Cal. Rptr. 3d 47, 51 (Cal. Ct. App. 2008))*.

b. The CLRA

HN11[] The CLRA prohibits "unfair methods of competition and unfair or deceptive acts or practices undertaken by any person in a transaction intended to result or that results in the sale or lease of goods or services to any consumer." *Cal. Civ. Code § 1770(a)*. The CLRA defines "consumer" as "an individual who seeks or acquires, by purchase or lease, any goods or services for personal, family, or household purposes." *Cal. Civ. Code § 1761(d)*. The Complaint alleges that through fraudulent omissions about the Sportsman ATVs' exhaust heat defect, Polaris violated *CLRA §§ 1770(a)(5)* and *1770(a)(7)*, which prohibit representing that goods "have . . . characteristics . . .

---

[9] More specifically, the Complaint alleges Polaris engaged in "unlawful business acts and/or practices by not informing consumers that [its] Sportsman ATV could cause risks of product deformation and burns," (SAC ¶ 102), "unfair business acts and practices" by "seeking to profit from selling ATVs that possess a latent defect," and "fraudulent conduct" based on "fail[ing] to inform customers of exhaust heat defect." (*Id.* ¶¶ 104, 105).

[10] Plaintiffs have since abandoned their latent defect theory. Because the parties did not address the three prongs of the UCL in their briefing, it is not clear whether Plaintiffs have likewise abandoned their UCL unfairness claim.

uses, benefits, or quantities that they do not have," *id. § 1770(a)(5)*, and "are of a particular standard, quality, or grade," *id. § 1770(a)(7)*. (SAC ¶¶ 115-16.) ***HN12***[] To prevail under a CLRA claim, a plaintiff must show that the defendant's conduct was deceptive and that the deception caused **[**17]** them harm. *Mass. Mut. Life Ins. Co. v. Superior Court, 97 Cal. App. 4th 1282, 119 Cal. Rptr. 2d 190, 197 (Cal. Ct. App. 2002)* (citing *Cal. Civ. Code § 1780(a)*).

c. Reliance under the UCL and CLRA

HN13[] Reliance is a necessary element of a UCL claim. *Backhaut v. Apple, Inc., 74 F. Supp. 3d 1033, 1047-48 (N.D. Cal. 2014)* (requiring "actual reliance" for claims under all three prongs of the UCL) (citing *In re Tobacco II Cases, 46 Cal. 4th 298, 93 Cal. Rptr. 3d 559, 207 P.3d 20, 39 (Cal. 2009)* (fraud prong); *Durell v. Sharp **[*955]** Healthcare, 183 Cal. App. 4th 1350, 108 Cal. Rptr. 3d 682, 687-88 (Cal. Ct. App. 2010)* (unlawful prong); *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877, 888 (Cal. 2011))*. The CLRA also requires proof of reliance. *See Mullins v. Premier Nutrition Corp., No. 13-CV-01271-RS, 2016 U.S. Dist. LEXIS 79983, 2016 WL 3440600, at *3, *5 (N.D. Cal. June 20, 2016)*. To prove "reliance on an omission" under both the UCL and CLRA,

> a plaintiff must show that the defendant's nondisclosure was an immediate cause of the plaintiff's injury-producing conduct. A plaintiff need not prove that the omission was the only cause or even the predominant cause, only that it was a substantial factor in his decision. A plaintiff may do so by simply proving "that, had the omitted information been disclosed, one would have been aware of it and behaved differently."

Daniel, 806 F.3d at 1225 (citation omitted) (quoting *Mirkin v. Wasserman, 5 Cal. 4th 1082, 23 Cal. Rptr. 2d 101, 858 P.2d 568, 574 (Cal. 1993))*. "That one would have behaved differently can be presumed, or at least inferred, when the omission is material . . . . An omission is material if a reasonable consumer 'would attach importance to its existence or nonexistence in determining his choice of action in the transaction in question.'" *Id.* (quoting *Tobacco II, 207 P.3d at 39*).

HN14[] In the context of a class action, "California . . . requires *named* class plaintiffs to demonstrate reliance." **[**18]** *Mazza v. Am. Honda Motor Co., 666 F.3d 581, 591 (9th Cir. 2012)* (emphasis added) (considering UCL and CLRA claims). Under the CLRA, "named and unnamed plaintiffs must prove the alleged deceptive conduct caused that damage." *Mullins, 2016 U.S. Dist. LEXIS 79983, 2016 WL 3440600, at *3* (citing *In re Steroid Hormone Prod. Cases, 181 Cal. App. 4th 145, 104 Cal. Rptr. 3d 329, 337-38 (Cal. Ct. App. 2010))*. "Causation, and an inference of reliance, for the class in a CLRA claim can be shown as to an entire class by proving materiality." *Falco, 2016 U.S. Dist. LEXIS 46115, 2016 WL 1327474, at *7* (citation and quotation marks omitted); *see Edwards v. Ford Motor Co., 603 F. App'x 538, 541 (9th Cir. 2015)* (finding that defendant's failure to disclose information that would have been material to a reasonable person purchasing defendant's product gave rise to a rebuttable inference of reliance as to the class). Courts applying these statutes have noted that in some cases, "it is fair to assume that all of the purchasers . . . read some marketing materials regarding the product, [so it is] sufficient to conclude that [d]efendants' conduct in omitting information was likely to deceive members of the public." *McVicar v. Goodman Glob., Inc., No. SACV131223DOCRNBX, 2015 U.S. Dist. LEXIS 110432, 2015 WL 4945730, at *11 (C.D. Cal. Aug. 20, 2015)* (cleaned up). But class certification of UCL and CLRA claims is inappropriate where the plaintiff "cannot show that members of the class were exposed to the same misrepresentations or any omissions, for example, . . . where the misrepresentations or nondisclosures were included (or would **[**19]** have been included) on the product itself." *Id.; see also Mazza, 666 F.3d at 596* ("A presumption of reliance does not arise when class members were exposed to quite disparate information from various representatives of the defendant.") (citation and quotation marks omitted).

HN15[] Courts applying the CLRA and UCL have also found that the fact that "a defendant may be able to defeat the showing of causation as to a few individual class members does not transform the common question into a multitude of individual ones." *Mass. Mut. Life Ins. Co., 119 Cal. Rptr. 2d at 197*. Establishing lack of causation as to a handful of class members "does not necessarily render the issue of **[*956]** causation an individual, rather than a common, one." *In re Vioxx Class Cases, 180 Cal. App. 4th 116, 103 Cal. Rptr. 3d 83, 95 (Cal. Ct. App. 2009)*.

"Plaintiffs may satisfy their burden of showing causation as to each by showing materiality as to all . . . . [I]f the issue of materiality or reliance is a matter that would vary from consumer to consumer, the issue is not subject to common proof, and the action is properly not certified as a class action." *Id.* (cleaned up).

d. Scienter under the UCL and CLRA

California courts applying the UCL and the CLRA have found that neither statute imposes a scienter requirement. *See, e.g., Mazza, 666 F.3d at 591* (stating the UCL and CLRA "have no scienter requirement"); **[**20]** *Cortez v. Purolator Air Filtration Prods. Co., 23 Cal. 4th 163, 96 Cal. Rptr. 2d 518, 999 P.2d 706, 717 (Cal. 2000)* ("[A] plaintiff need not show that a UCL defendant intended to injure anyone through its unfair or unlawful conduct.").[11] But Plaintiffs must establish a defendant's knowledge of an undisclosed defect at the time of sale under the UCL and CLRA. *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1145-46 (9th Cir. 2012)*; *id. at 1145 n.5* (under the UCL, the "failure to disclose a . . . defect of which [a defendant] is not aware, does not constitute an unfair or fraudulent practice"); *Williams v. Yamaha Motor Co. Ltd., 851 F.3d 1015, 1025 (9th Cir. 2017)* (under UCL and CLRA, "a party must allege . . . that the manufacturer knew of the defect at the time a sale was made.") (citation omitted).

3. Florida

The Complaint alleges that Polaris violated *Florida's Deceptive and Unfair Trade Practices Act ("FDUTPA"), Fla. Stat. § 501.201 et seq.*, by omitting material information about the Sportsman ATVs, thus injuring Plaintiff James Kelley and other Florida purchasers. (SAC ¶¶ 130-32.) ***HN16***[] FDUTPA provides for a civil cause of action for "[u]nfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce." *Fla. Stat. § 501.204(1)*. "A consumer claim for damages under FDUTPA has three elements: (1) a deceptive act or unfair practice; (2) causation; and (3) actual damages." *City First Mortg. Corp. v. Barton, 988 So. 2d 82, 86 (Fla. Dist. Ct. App. 2008)* (citation omitted); *see Fla. Stat. § 501.211(2)* ("In any actions brought by a person **[**21]** who has suffered a loss as a result of a violation of this part, such person may recover actual damages").

HN17[] To satisfy the first element of a FDUTPA claim, a plaintiff "must show that the alleged practice was likely to deceive a consumer acting reasonably in the same circumstances." *Carriuolo v. Gen. Motors Co., 823 F.3d 977, 983-84 (11th Cir. 2016)* (citation and quotation marks omitted); *see Millenium Communs. & Fulfillment Inc. v. Office of the Attorney Gen, 761 So. 2d 1256, 1263 (Fla. Dist. Ct. App. 2000)* (quoting *Sw. Sunsites, Inc. v. Fed. Trade. Comm'n, 785 F.2d 1431, 1434-35)* ("[D]eception [occurs] if there is a representation, omission, or practice that is likely to mislead the consumer acting reasonably in the circumstances, to the consumer's detriment."). This element "is only satisfied by evaluating a reasonable consumer in the same circumstances as plaintiff." *Maor v. Dollar Thrifty Auto. Grp., Inc., No. 15-22959-CIV,* ***[*957]*** *2018 U.S. Dist. LEXIS 168664, 2018 WL 4698512, at *6 (S.D. Fla. Sept. 30, 2018)* (citation omitted). "The modification of 'acting reasonably' by 'in the same circumstances' indicates a hybrid standard that may be objectively established as to mindset but subjectively established as to context." *Id.* (quoting *Deere Constr. v. Cemex Constr. Materials Fla., LLC, No. 15-24375-CIV, 2016 U.S. Dist. LEXIS 193561, 2016 WL 8542540, *3 (S.D. Fla. Dec. 1, 2016))*; *Goldemberg v. Johnson & Johnson Consumer Cos., Inc., 317 F.R.D. 374, 390 (S.D.N.Y. 2016))* (describing FDUTPA's "hybrid standard" as being "objectively established as to mindset but subjectively established as to context.").

a. Reliance under the FDUTPA

---

[11] At least one court has found that one of the unfair business practice claims under the CLRA has a scienter requirement. *Mullins, 2016 U.S. Dist. LEXIS 79983, 2016 WL 3440600, at *6* (citing ***Cal. Civ. Code § 1770(a)(9)*** (prohibiting "[a]dvertising goods or services with intent not to sell them as advertised.")).

HN18[] A FDUTPA plaintiff "need not show actual reliance on the **[**22]** representation or omission at issue." *Davis v. Powertel, Inc., 776 So. 2d 971, 973 (Fla. Dist. Ct. App. 2000)*; *see also* *Maor, 2018 U.S. Dist. LEXIS 168664, 2018 WL 4698512, at *6* (noting "proof of actual reliance is unnecessary" under the FDUPTA). A "demonstration of reliance by an individual consumer is not necessary in the context of FDUTPA." *Turner Greenberg Assocs., Inc. v. Pathman, 885 So. 2d 1004, 1009 (Fla. Dist. Ct. App. 2004)*; *see, e.g., Davis, 776 So. 2d at 974* (holding class members proceeding under FDUTPA "need not prove individual reliance on the alleged representation"). Rather, "a plaintiff must simply prove that an objectively reasonable person [in the same circumstances as the plaintiff] would have been deceived." *Lombardo v. Johnson & Johnson Consumer Cos., 124 F. Supp. 3d 1283, 1290 (S.D. Fla. 2015)* (quoting *Fitzpatrick v. Gen. Mills, Inc., 635 F.3d 1279, 1283 (11th Cir. 2011))*.

b. Scienter under the FDUTPA

While neither the parties nor the Court were able to locate case law addressing FDUTPA and scienter *per se*, courts have found that a plaintiff does not need to prove "the seller's intent to deceive" under FDUTPA. *See, e.g., In re Schurtenberger, No. 12-17246-BKC-AJC, 2014 Bankr. LEXIS 76, 2014 WL 92828, at *5 (Bankr. S.D. Fla. Jan. 9, 2014)* (citing *Davis, 776 So. 2d at 974*). Some courts have held that FDUTPA does not require a defendant "to have subjective knowledge of the alleged defects." *Gavron v. Weather Shield Mfg., Inc., 819 F. Supp. 2d 1297, 1302 (S.D. Fla. 2011)*; *see also* *Motorola Mobility, Inc. v. CT Miami, LLC, No. 11-23753-CV, 2012 U.S. Dist. LEXIS 202815, 2012 WL 13014338, at *3 (S.D. Fla. May 11, 2012)*, *report and recommendation adopted*, *No. 11-23753-CIV, 2012 U.S. Dist. LEXIS 202816, 2012 WL 13014339 (S.D. Fla. June 13, 2012)* ("FDUTPA focuses on whether an act is deceptive, not whether a defendant knew that the allegedly violative conduct was occurring.").

4. Missouri

The Complaint alleges that Polaris failed to inform consumers of the Sportsman **[**23]** ATVs' exhaust heat defect, thereby violating *Missouri's Merchandising Practices Act ("MMPA"), Mo. Rev. Stat. § 407.010, et seq.*, and injuring Plaintiff Kevin Wonders and other Missouri purchasers. (SAC Count VI.) The Complaint alleges that Wonders brings this claim individually and on behalf of consumers who purchased a Sportsman ATV "primarily for personal, family or household purposes."[12] (SAC ¶ 145.) ***HN19***[] The MMPA prohibits any person from engaging in "any deception, fraud, false pretense, false promise, misrepresentation, unfair practice or the concealment, suppression, or omission of any material fact in connection with the sale or advertisement of any merchandise in trade or commerce . . . in or from **[*958]** the state of Missouri." *Mo. Rev. Stat. § 407.020*. To prevail on an MMPA claim, a plaintiff must prove he or she: (1) purchased merchandise from the defendant; (2) for personal, family or household purposes; and (3) suffered an ascertainable loss of money or property; (4) as a result of an act declared unlawful under the MMPA. *Murphy v. Stonewall Kitchen, LLC, 503 S.W.3d 308, 311 (Mo. Ct. App. 2016)*; *see* *Mo. Rev. Stat. § 407.025*. "[T]he plain language of the MMPA demands a causal connection between the ascertainable loss and the unfair or deceptive merchandising practice." *Owen v. Gen. Motors Corp., 533 F.3d 913, 922 (8th Cir. 2008)* (citing *Mo. Rev. Stat. § 407.025.1*). Under the MMPA, a "material fact" is "any fact which a **[**24]** reasonable consumer would likely consider to be important in making a purchasing decision." *Hess v. Chase Manhattan Bank, USA, N.A., 220 S.W.3d 758, 773 (Mo. 2007)* (citing *15 C.S.R. 60-9.010(1)(C)*).

[*959] a. Reliance under the MMPA

The parties agree that a consumer's reliance on an unlawful practice is not required under the MMPA. *Hess, 220 S.W.3d at 774*; *Plubell v. Merck & Co., 289 S.W.3d 707, 713 (Mo. Ct. App. 2009)* (The MMPA "eliminat[ed] the need to prove an intent to defraud or reliance.").

---

[12] Plaintiffs do not so limit any of their other state consumer protection claims.

b. Scienter under the MMPA

HN20[] A claim for "omission of a material fact under the MMPA does have a scienter requirement: it is a failure to disclose material facts that are 'known to him/her, or upon reasonable inquiry would be known to him/her.'" *Plubell, 289 S.W.3d at 714 n.4* (quoting *15 C.S.R. 60-9.110*); Under the MMPA, the plaintiff must show (1) the defendant "was aware of the alleged defect," (2) "when [defendant] became aware," and (3) "that [defendant] purposefully omitted this fact in representations to each individual class member." *Hope v. Nissan N. Am., Inc., 353 S.W.3d 68, 84 (Mo. Ct. App. 2011)*.

5. New York

The Complaint alleges that Polaris violated *New York's General Business Law* ("GBL"), *N.Y. Gen. Bus. § 349*, by failing to disclose the Sportsman ATVs' exhaust heat defect, thereby injuring Plaintiff William Bates and other New York purchasers. (SAC Count VII.) **HN21**[] *GBL § 349* prohibits "[d]eceptive acts or practices in the conduct of any business, trade or commerce **[**25]** or in the furnishing of any service in [New York]." *GBL § 349(a)*. To prove a claim under *GBL § 349(a)*, a plaintiff must show that (1) "the challenged act or practice was consumer-oriented,"(2) "it was misleading in a material way," and (3) "the plaintiff suffered injury as a result of the deceptive act." *Stutman v. Chem. Bank, 95 N.Y.2d 24, 731 N.E.2d 608, 611, 709 N.Y.S.2d 892 (N.Y. 2000)*. Whether a representation or an omission, the deceptive practice must be "likely to mislead a reasonable consumer acting reasonably under the circumstances." *Id.* (citing *Oswego Laborers' Local 214 Pension Fund v. Marine Midland Bank, N.A., 85 N.Y.2d 20, 647 N.E.2d 741, 745, 623 N.Y.S.2d 529 (N.Y. 1995))*. To satisfy the GBL's causation requirement, "nothing more is required than that a plaintiff suffer a loss because of defendant's deceptive act." *Goldemberg, 317 F.R.D. at 392* (cleaned up) (citing, among others, *Stutman, 95 N.Y.2d at 30*). A plaintiff seeking compensatory damages must show that the material deceptive practice caused "actual, although not necessarily pecuniary, harm." *Catalano v. BMW of N. Am., LLC, 167 F. Supp. 3d 540, 562 (S.D.N.Y. 2016)* (citing *Oswego Laborers' Local 214 Pension Fund, 647 N.E.2d at 745*).

a. Reliance under the GBL

HN22[] The parties agree that individual reliance is not required under *GBL § 349*. *Oswego Laborers' Local 214 Pension Fund, 647 N.E.2d at 745*; *Koch v. Acker, Merrall & Condit Co., 18 N.Y.3d 940, 967 N.E.2d 675, 676, 944 N.Y.S.2d 452 (N.Y. 2012)* ("Justifiable reliance by the plaintiff is not an element" of *GBL § 349*); *Small v. Lorillard Tobacco Co., 94 N.Y.2d 43, 720 N.E.2d 892, 897, 698 N.Y.S.2d 615 (N.Y. 1999)* ("Intent to defraud and justifiable reliance by the plaintiff are not elements of the statutory claim.").

b. Scienter under the **[**26]** GBL

The parties also agree that scienter is not required under *GBL § 349*. *Oswego Laborers' Local 214 Pension Fund, 647 N.E.2d at 745* ("Although it is not necessary under the statute that a plaintiff establish the defendant's intent to defraud or mislead, proof of scienter permits the court to treble the damages up to $1,000.").

6. North Carolina

The Complaint alleges that Polaris violated *North Carolina's Unfair and Deceptive Trade Practices Act* ("NCUDTPA"), *N.C. Gen. Stat. § 75-1.1(a)*, by not disclosing the defect in the Sportsman ATVs to customers, thereby injuring Plaintiff James Pinion and other North Carolina purchasers. (SAC ¶¶ 171-74.) **HN23**[] *Section 75-1.1* provides in part that "unfair or deceptive acts or practices in or affecting commerce" are unlawful. *N.C. Gen. Stat. § 75-1.1(a)*. "In order to establish a *prima facie* claim for unfair trade practices, a plaintiff must show: (1) [the]

defendant committed an unfair or deceptive act or practice, (2) the action in question was in or affecting commerce, and (3) the act proximately caused injury to the plaintiff." *Bumpers v. Cmty. Bank of N. Va., 367 N.C. 81, 747 S.E.2d 220, 226 (N.C. 2013)* (brackets omitted) (quoting *Dalton v. Camp, 353 N.C. 647, 548 S.E.2d 704, 711 (N.C. 2001))*. "The determination of whether an act or practice is an unfair or deceptive practice that violates [NCUDTPA] is a question of law for the court." *Gray v. N.C. Ins. Underwriting Ass'n, 352 N.C. 61, 529 S.E.2d 676, 681 (N.C. 2000)*.

Courts applying the NCUDTPA **[**27]** have held that "[in] order for silence or an omission by the defendants to be an actionable fraud, it must relate to a material matter known by the defendants which they had a legal duty to communicate to plaintiff." *Resnick v. Hyundai Motor Am., Inc., No. CV1600593BROPJWX, 2017 U.S. Dist. LEXIS 139179, 2017 WL 6549931, at *18 (C.D. Cal. Aug. 21, 2017)* (emphasis omitted) (citing *Breeden v. Richmond Cmty. Coll., 171 F.R.D. 189, 196 (M.D.N.C. 1997)* (finding plaintiff failed to state NCUDTPA claim based on defendants' lack of knowledge)).

a. Reliance under the NCUDTPA

North Carolina courts have held that a plaintiff must prove actual and justifiable reliance for a NCUDPTA claim based on a misrepresentation. *See, e.g., Bumpers, 747 S.E.2d at 226*. Courts have applied this rule to omissions as well. *See, e.g., Arnesen v. Rivers Edge Golf Club & Plantation, Inc., 368 N.C. 440, 781 S.E.2d 1, 7 (N.C. 2015)* (affirming dismissal of *NC § 75-1.1* claim because "plaintiffs have failed to sufficiently allege justifiable reliance on any omission" and that any action "was the proximate cause of their harm"); *W. Franklin Pres. Ltd. P'ship v. Nurtur N.C., LLC, No. 14-CV-00266, 2016 U.S. Dist. LEXIS 69714, 2016 WL 3039832, at *4 (M.D.N.C. May 27, 2016)* (explaining that a NCUDTPA claim would fail for lack of proximate cause if the jury concluded that either (1) the consumer "did not rely on" the concealment of material fact or a material false statement, or (2) "that its **[*960]** reliance was unreasonable"). This Court agrees that "reliance on an omission is required to state [a NC] UDTPA claim." *Baranco v. Ford Motor Co., 294 F. Supp. 3d 950, 970 (N.D. Cal. 2018)* (citing *Sain v. Adams Auto Grp., Inc., 244 N.C. App. 657, 781 S.E.2d 655, 659 (N.C. Ct. App. 2016))*.

Plaintiffs note that **[**28]** even if reliance is required under the NCUDTPA, reliance can be proved by circumstantial evidence that consumers found a misrepresentation material and relied upon it. (ECF No. 335 ("Pls' Class Cert. Br.") at 27 n.109 (citing *Rikos v. Procter & Gamble Co., 799 F.3d 497, 517-18 (6th Cir. 2015)* (affirming class certification of NCDUTPA claim where "classwide proof—that the alleged misrepresentation is material and was made in a generally uniform manner to all class members—would also suffice in North Carolina to show actual reliance"))); *see, e.g., In re TD Bank, N.A. Debit Card Overdraft Fee Litig., 325 F.R.D. 136, 162 (D.S.C. 2018)* (finding "sufficient evidence of the uniformity and materiality of the putative misrepresentations and omissions has been presented to presume class-wide reliance" under NCUDTPA).

b. Scienter under the NCUDTPA

The parties agree that scienter is not required under the NCDUTPA. *See Marshall v. Miller, 302 N.C. 539, 276 S.E.2d 397 (N.C. 1981)* ("If unfairness and deception are gauged by consideration of the effect of the practice on the marketplace, it follows that the intent of the actor is irrelevant."). While "it is not necessary for the plaintiff to show fraud, bad faith, deliberate or knowing acts of deception, or actual deception, plaintiff must, nevertheless, show that the acts complained of possessed the tendency or capacity to mislead, or created the likelihood **[**29]** of deception." *Chastain v. Wall, 78 N.C. App. 350, 337 S.E.2d 150, 153 (N.C. Ct. App. 1985)* (citation omitted).

7. Outcome-determinative conflicts exist

Based on the assessment of consumer protection statutes above, the Court agrees that consumer protection laws "vary considerably," and that "different states have material variances between their consumer protection laws and

Minnesota's." St. Jude I, 425 F.3d at 1120. For example, outcome-determinative conflicts exist between the MCFA and the three prongs of California's UCL, which have different thresholds from the MCFA. **HN24**[] The MCFA does not require proof of individual reliance, but it does require a causal nexus between the violative conduct and damages, such that a defendant's conduct had some impact on inducing the individual plaintiff's actions. In contrast, the UCL and CLRA require reliance on an omission, which may be proved by showing that "had the omitted information been disclosed, one would have been aware of it and behaved differently." Daniel, 806 F.3d at 1225.

Courts applying the MCFA and the California statutes also differ in their consideration of proof of non-reliance in class actions. Courts applying the MCFA have concluded that where a defendant can present evidence concerning the non-reliance of individual plaintiffs, the resolution of the defendant's **[**30]** potential liability to each plaintiff will be dominated by individual issues of causation and reliance. *See, e.g.,* St. Jude II, 522 F.3d at 839-40. In contrast, courts applying the UCL and CLRA have held that such evidence would not preclude class certification. Mass. Mut. Life Ins., 119 Cal. Rptr. 2d at 197. This difference is outcome-determinative here because Polaris has offered evidence raising individual issues of causation and reliance. (*See, e.g.*, ECF No. 336-39 ("Pinion Dep.") at 85:17-19 (Pinion purchased a **[*961]** second Sportsman ATV for his wife after his first melted); ECF No. 359-2 ("Johannessohn Dep.") at 207:19-22, 209:1-9 (Johannessohn requested and received a new Sportsman ATV after filing this lawsuit)).

Another conflict exists as to the scope of the laws. **HN25**[] Unlike the MCFA, the CLRA and Missouri's MMPA are limited to goods or services purchased for "personal, family, or household purposes." *See* Cal Civ. Code § 1761(d), Murphy, 503 S.W.3d at 311. Polaris offers evidence that a portion of Sportsman ATV purchasers use them for farming, ranching, and other business purposes. (*See e.g.*, ECF No. 367 (Pixton Decl.) Ex. 8, ("Flambures Decl.") ¶ 11 (dealership general manager stating that approximately 30 percent of his buyers purchase for commercial use).) Ignoring this element would allow some claims under **[**31]** the MCFA which would fail under the CLRA and MMPA.

As to the remaining states, outcome-determinative differences emerge as well. The MCFA and Florida's FDUPTA have outcome-determinative differences because of FDUPTA's "hybrid standard" for determining deceptive acts or unfair practices. *See* Maor, 2018 U.S. Dist. LEXIS 168664, 2018 WL 4698512, at *6 (explaining the hybrid standard "may be objectively established as to mindset but subjectively established as to context" (citation omitted)). The MCFA and New York's GBL have outcome-determinative differences because unlike the MCFA's causal nexus standard, the GBL requires nothing more than that a plaintiff suffer a loss because of defendants' deceptive conduct. Finally, an outcome-determinative difference exists between the MCFA and North Carolina's NCDUPTA because the NCDUPTA requires actual and justifiable reliance.

Plaintiffs argue that the consumer protection statutes of Minnesota, California, Florida, Missouri, and New York (1) do not conflict because none of them require proof of individual reliance, and (2) permit consumers to prove injury and measure of damages by showing consumers paid a price premium artificially inflated by the seller's deceptive conduct. (ECF No. 391 ("Pls' Class Cert. **[**32]** Reply Br.") at 25-26.) On this point, the cases cited by Plaintiffs are unhelpful in determining the choice of law issue, as they do not consider whether conflicts exist among state laws.[13]

---

[13] *See, e.g.,* Gold v. Lumber Liquidators, Inc., 323 F.R.D. 280, 290-91 (N.D. Cal. 2017) (not addressing conflicts of law; granting certification of multiple classes based on various consumer protection statutes, including a California class based on the UCL and CLRA, a class for violations of FDUTPA, and a class for violations of MCFA); In re Kind LLC "Healthy & All Natural" Litig., 209 F. Supp. 3d 689, 697 & n.4 (S.D.N.Y. 2016) (providing little analysis of states' statutes, and not determining which, if any, state's consumer protection law would apply to a nationwide class.); Goldemberg, 317 F.R.D. at 386 (not addressing conflicts of law where plaintiffs moved to certify three classes based on products purchased in California, Florida, and New York); Khoday v. Symantec Corp., No. CIV. 11-180 JRT/TNL, 2014 U.S. Dist. LEXIS 43315, 2014 WL 1281600, *20 n.9 (D. Minn. Mar. 13, 2014) (explaining that the court did not undertake a choice of law analysis because it found that choice-of-law clauses governed the defendants' contracts with the plaintiffs).

B. Constitutionality of Extraterritorial Application

Having determined that outcome-determinative conflicts exist between the state consumer protection statutes, the Court considers the constitutionality of applying the MCFA extraterritorially. The inquiry is into the contacts with Minnesota arising out of the nonresident-parties' claims. *St. Jude I, 425 F.3d at 1120*. And the analysis begins with a presumption: "In general, there is a presumption against the extra-territorial application of a state's **[*962]** statutes." *Arnold v. Cargill, Inc., No. CIV. 012086 (DWF/AJB), 2002 U.S. Dist. LEXIS 13045, 2002 WL 1576141, at *2 (D. Minn. July 15, 2002)* (citing *In re Pratt, 219 Minn. 414, 18 N.W.2d 147, 153 (Minn. 1945))*. Polaris argues that the MCFA cannot be applied extraterritorially because the Minnesota legislature did not specify that it is intended to apply outside Minnesota. *See In re Syngenta AG MIR 162 Corn Litig., 131 F. Supp. 3d 1177, 1232-33 (D. Kan. 2015)* (concluding MCFA "may be applied in this case only to conduct taking place in Minnesota" where plaintiffs did not point to any statutory language allowing for its extraterritorial application).

Plaintiffs do not provide any statutory language indicating **[**33]** that the MCFA applies extraterritorially. Rather, they argue simply that it has been done before; that is, that courts have applied the MCFA to the claims of parties from other forum states. *See, e.g., In re St. Jude, 2006 U.S. Dist. LEXIS 74797, 2006 WL 2943154*, *rev'd on other grounds, St. Jude II, 522 F.3d 836*; *Mooney v. Allianz Life Ins. Co. of N. Am., 244 F.R.D. 531, 534-35 (D. Minn. 2007)*. None of the cases cited by Plaintiffs holds that the Minnesota legislature intended the MCFA to apply extraterritorially. Given the presumption against the extraterritorial application of Minnesota statutes and the lack of any statutory language allowing such an application, the Court concludes that the MCFA may be applied only to conduct that occurred in Minnesota. *See Syngenta, 131 F. Supp. 3d at 1233*.

Even if the Minnesota legislature generally intended the MCFA to apply extraterritorially, it does not follow that doing so would be constitutionally permissible in this particular case. *See, e.g., Arnold, 2002 U.S. Dist. LEXIS 13045, 2002 WL 1576141, at *4* (noting that even if the court found the MHRA provided for extraterritorial application, "the Court does not find, under a due process analysis, sufficient contacts with the state of Minnesota" with respect to nonresident plaintiffs). ***HN26***[] "[F]or a State's substantive law to be selected in a constitutionally permissible manner, that State must have a significant contact or significant aggregation **[**34]** of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair." *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 818, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985)*; *Jepson, 513 N.W.2d at 469*; *see also Shutts, 472 U.S. at 821-22* (holding a state must have a significant contact or significant aggregation of contacts to the claims asserted by each member of the plaintiff class to apply that state's law). When considering fairness in this context, "an important element is the expectation of the parties." *Shutts, 472 U.S. at 822*.

Plaintiffs argue that Minnesota has significant contacts with Polaris and with the facts giving rise to their claims because: (1) Polaris designed, manufactured, and tested the defective vehicles at issue in Minnesota; (2) Polaris received consumer complaints and warranty claims in Minnesota; and (3) Polaris is headquartered in Minnesota. *See Mooney, 244 F.R.D. at 535* ("As a Minnesota corporation, Allianz can not claim surprise by the application of Minnesota law to conduct emanating from Minnesota.").

The location of a defendant's headquarters, by itself, is not enough to apply the law of that state. In *St. Jude I*, the Eighth Circuit reversed the district court's decision to apply Minnesota law to claims of nonresident plaintiffs. There, even though the defendant had significant contacts with Minnesota, including **[**35]** being headquartered there, and even though much of the conduct relevant to the claims occurred or emanated from Minnesota, the Eighth Circuit remanded because the district **[*963]** court failed to conduct a thorough conflicts-of-law analysis with respect to each plaintiff. *425 F.3d at 1119-21*. So even combined with the fact that Polaris's headquarters are in Minnesota, the fact that some relevant conduct occurred or emanated from Minnesota may not be sufficient to apply Minnesota law. *See id.; accord Arnold, 2002 U.S. Dist. LEXIS 13045, 2002 WL 1576141, at *4* (holding that the fact that defendant's headquarters were located in and its contested policies emanated from Minnesota was "insufficient to justify extraterritorial application, particularly when there is no evidence . . . [defendant] could not otherwise be held accountable in the courts of other states where the named plaintiffs reside and/or work.").

That Polaris designed, manufactured, tested, and received complaints about Sportsman ATVs in Minnesota certainly supports Polaris's expectation that the MFCA would apply. But this evidence does not support the assertion that nonresident Plaintiffs expected Minnesota law to apply. Plaintiffs claim that consumers expected Minnesota law to apply based on Polaris's Minnesota **[**36]** address and phone number in the owner's manual. The Court finds this argument unpersuasive, particularly given that the sales contracts of some Plaintiffs reference the laws of the states in which they purchased their ATVs. (*See, e.g.*, ECF No. 359-7 (Bates's contract referencing "the law of the State of New York"); ECF No. 359-9 (Kelley's contract referencing Florida law); ECF No. 359-12 (Pinion's contract "[North Carolina] law does not provide for a 'cooling off' or other cancellation period for this sale"); ECF No. 359-5 (Badilla's contract with similar disclosure under California law)). Indeed, Plaintiff Badilla admitted that he did not know the location of Polaris's headquarters when he bought his ATV. *See* *St. Jude I, 425 F.3d at 1120* (reversing choice of law decision where there was "no indication out-of-state parties 'had any idea that Minnesota law could control' potential claims when they received their" products). Plaintiffs purchased their ATVs from dealers in their state of residence, not from Polaris in Minnesota. *See* *Rapp v. Green Tree Servicing, LLC, 302 F.R.D. 505, 517 (D. Minn. 2014)* (distinguishing *Mooney* because there, plaintiffs "purchased a financial product directly from the defendant" located in Minnesota).

Given the dearth of evidence that the parties expected **[**37]** Minnesota law would apply to the nonresident Plaintiffs' claims against Polaris, Minnesota does not have contacts sufficient to create a state interest, and it would be arbitrary and fundamentally unfair to apply the MCFA to such claims. The Court therefore concludes that extraterritorial application of the MCFA is not constitutionally permissible in this case.

C. Five-Factor Test

Even if applying the MCFA extraterritorially were constitutionally permissible, the choice-of-law factors buttress the Court's determination not to apply the MCFA to the nonresident Plaintiffs' claims. ***HN27***[] Those choice-influencing factors are: "(1) predictability of result; (2) maintenance of interstate and international order; (3) simplification of the judicial task; (4) advancement of the forum's governmental interest; and (5) application of the better rule of law." *Jepson, 513 N.W.2d at 470*. These factors were intended to "prompt courts to carefully and critically consider each new fact situation and explain in a straight-forward manner their choice of law." *Id.*

1. Predictability of Result

HN28[] The predictability-of result-factor "represents the ideal that litigation on **[*964]** the same facts, regardless of where the litigation occurs, should be decided **[**38]** the same to avoid forum shopping." *Nodak Mut. Ins. Co. v. Am. Family Mut. Ins. Co., 604 N.W.2d 91, 94 (Minn. 2000)*. It addresses whether the choice of law was predictable before the time of the transaction or event giving rise to the claim. *Rapp, 302 F.R.D. at 517*. This factor applies primarily to consensual transactions where parties "desire advance notice of which state law will govern in future disputes." *Nodak Mut. Ins. Co., 604 N.W.2d at 94*. In most tort cases, predictability of result is of little relevance. *Nesladek v. Ford Motor Co., 46 F.3d 734, 738 (8th Cir. 1995)*. Consumer protection claims are not based entirely in either tort or contract law. *In re St. Jude, 2006 U.S. Dist. LEXIS 74797, 2006 WL 2943154, at *5*.

Plaintiffs argue that this factor favors them because Polaris is headquartered in Minnesota, where it designed, engineered, manufactured and tested the ATVs, received consumer complaints, and allegedly decided to conceal the heat exhaust defect from consumers. But as noted above, Plaintiffs purchased their ATVs from dealers in their states of residence (not directly from Polaris), and most of the sales contracts with Plaintiffs provide that the laws of their states of residence apply. These facts indicate that, before the time of the transaction, the parties would predict that the law of the state of each plaintiff's residence would apply.

2. Maintenance of Interstate Order

HN29[] The maintenance-of-interstate-order factor is concerned **[**39]** with whether applying Minnesota law would manifest disrespect for other state sovereignty or impede the interstate movement of people and goods. In re Baycol Prods. Litig., 218 F.R.D. 197, 207 (D. Minn. 2003). "An aspect of this concern is to maintain a coherent legal system in which the courts of different states strive to sustain, rather than subvert, each other's interests in areas where their own interests are less strong." Nodak Mut. Ins. Co., 604 N.W.2d at 95. By considering whether application of Minnesota law would negatively affect the maintenance of interstate order, "the opportunities for forum shopping may be kept within reasonable bounds." Jepson, 513 N.W.2d at 471.

In *Hughes v. Wal-Mart Stores, Inc.*, the Eighth Circuit explained that where a state "has little or no contact with a case and nearly all of the significant contacts are with a sister state," the factor suggests that a state should not apply its own law to the dispute. 250 F.3d 618, 620-21 (8th Cir. 2001) (citation and quotation marks omitted). In that case, a Louisiana resident had purchased the product at issue at a Wal-Mart in Louisiana, the injury occurred in Louisiana, and the injured party was a Louisiana resident. Id. at 621. The only contact Arkansas had to the litigation was that the defendant had its principal place of business in the state. *Id.* The court found that **[**40]** this contact was insufficient to apply Arkansas law. *Id.; cf.* Sportsman for Sportsman v. Cal. Overland, Ltd., No. CV 17-1064 (DWF/KMM), 2018 U.S. Dist. LEXIS 65265, 2018 WL 1865930, at *5 (D. Minn. Apr. 18, 2018) (concluding that defendant's "substantial business operations in Minnesota are the more relevant contacts" where "relevant conduct by [defendant] that most likely occurred within this state is central to Plaintiff's case").

Plaintiffs maintain that Minnesota has a stronger interest in a case that involves a remedial statute like the MCFA than one involving common law claims. In support, they cite Land O' Lakes, Inc. v. Employers Mutual Liability Insurance Company of Wisconsin. 846 F. Supp. 2d 1007, 1040 (D. Minn. 2012). That case involved insurance claim issues, finding that Minnesota **[*965]** had a strong interest in applying its law to contribution claims against insurers who write policies in Minnesota. Id. at 1040. The court applied the law of where the insured was located, *i.e.*, Minnesota, to the contribution claims, rather than the state law that generally governed the insurer's policies. *Id.* No party had argued for the law of the insurer's headquarters.

Here, Plaintiffs' claims are based on Polaris's failure to disclose the alleged heat exhaust defect in the Sportsman ATVs. The parties agree that Plaintiffs' alleged injuries occurred where each plaintiff resides or purchased a Sportsman ATV. *See* ***[**41]*** In re Bridgestone/Firestone, Inc., 288 F.3d 1012, 1017 (7th Cir. 2002) ("If recovery for . . . consumer fraud is possible, the injury is decidedly where the consumer is located, rather than where the seller maintains its headquarters."); *cf*. Restatement (Second) of Conflict of Laws § 145, subd. 2, cmts. (e), (f) (1971) (noting the location of the injury is "less significant" in the case of fraudulent misrepresentations). As revealed in the Court's analysis above, states have adopted different regulatory regimes to protect consumers within their borders. Applying the MCFA to the claims of nonresident plaintiffs would demonstrate disrespect for these regulatory regimes. St. Jude I, 425 F.3d at 1120 ("[S]tate consumer-protection laws vary considerably, and courts must respect these differences rather than apply one state's law to sales in other states with different rules."). Given Minnesota's limited contact with these claims, particularly as compared with the significant contacts with Plaintiffs' states of residence, the Court finds that applying the MCFA to the nonresident Plaintiffs' claims would subvert the interests of those states.

3. Simplification of the Judicial Task

In considering the simplification of the judicial task, "the relevant question is not whether applying the law of one state would be simpler than applying the laws **[**42]** of 50 states. Instead, the question is whether, with respect to any particular claimant, applying the law of Minnesota would be simpler than applying the law that would otherwise apply." Rapp, 302 F.R.D. at 518 (citing St. Jude I, 425 F.3d at 1120). The parties did not address this factor in any detail, likely because Minnesota courts do not give this factor much weight. *See, e.g.,* Nodak Mut. Ins. Co., 604 N.W.2d at 95. With respect to any particular plaintiff, the Court is capable of applying the MCFA or the state law of that plaintiff's residence. Thus, this factor is neutral.

4. Advancement of the Forum's Governmental Interest

In considering the advancement of the forum's governmental interest, the Court must weigh the policy interests of Minnesota with those of a nonresident plaintiff's home state. *Nesladek, 46 F.3d at 739-40*. This factor "generally weighs in favor of application of the state law in which the plaintiff lives and in which the injury occurred." *In re Baycol Prods. Litig., 218 F.R.D. at 207* (collecting cases). Plaintiffs claim that Minnesota has a compelling interest in redressing wrongs committed within its borders because the reputations of other Minnesota businesses are tarnished. While they cite *Boatwright v. Budak* for this proposition, the case does not support it. *625 N.W.2d 483, 489 (Minn. Ct. App. 2001)*. *Boatwright* addressed choice of law in the context of **[**43]** vicarious liability for a car accident that occurred in Iowa and found that Iowa law should apply because it "best serves Minnesota's interest in compensating tort victims." *Id.* The Eighth Circuit has held that "[a]bsent some relevant connection between a state and the facts underlying the litigation," it **[*966]** "fail[ed] to see how any important [state] governmental interest is significantly furthered by ensuring that nonresidents are compensated for injuries that occur in another state." *Hughes, 250 F.3d at 621*.

Plaintiffs also rely on *Mooney*, which found that this factor favored application of the MCFA to a nonresident's claim because "[b]y allowing 'any person' to sue under the [MCFA], the Minnesota legislature has evinced a strong policy of providing redress for fraudulent business practices that occur within Minnesota's borders, regardless of where a consumer's injury occurs." *244 F.R.D. at 537*. But there is no reason to believe that consumer protection laws of the nonresident Plaintiffs' states could not equally or more effectively hold Polaris accountable for its alleged wrongdoing. *See* *Rapp, 302 F.R.D. at 518* (rejecting *Mooney*). This factor therefore favors applying the laws of the nonresident Plaintiffs' states.

*5. Application of the Better Rule **[**44]** of Law*

The better-rule-of-law factor is not considered unless the other factors do not resolve the choice-of-law issue. *Medtronic, Inc. v. Advanced Bionics Corp., 630 N.W.2d 438, 455-56 (Minn. Ct. App. 2001)*; *Nodak Mut. Ins. Co., 604 N.W.2d at 96* (noting that the court "has not placed any emphasis on this factor in nearly 20 years"). Courts have refrained from resolving a conflict of law question based on the better-rule-of-law factor, recognizing that "states often have competing policy considerations for governing similar transactions or events in different manners such that the laws do not necessarily lend themselves to being labeled either 'better' or 'worse.'" *Hughes, 250 F.3d at 621*. The Court will refrain from determining which state has the "better" rule of law, as the states at issue have competing policy considerations for crafting their consumer protection laws.

Because most of the five factors do not favor applying the MCFA to the claims of the nonresident plaintiffs, the Court declines to do so. The law of each Plaintiff's state will apply to him.

II. Summary Judgment

With the choice of law question settled, the Court turns to the summary judgment motion, beginning with the familiar standard under *Rule 56*. ***HN30***[] "Summary judgment is proper if the pleadings, the discovery and disclosure materials on file, and any affidavits show that **[**45]** there is no genuine [dispute] as to any material fact and that the movant is entitled to judgment as a matter of law." *Gannon Int'l, Ltd. v. Blocker, 684 F.3d 785, 792 (8th Cir. 2012)* (citing *Fed. R. Civ. P. 56(c)*). In assessing whether such a dispute exists, "[a] court must 'make all reasonable inferences in favor of the non-moving party,' but will 'not resort to speculation.'" *Hill v. Sw. Energy Co., 858 F.3d 481, 487 (8th Cir. 2017)* (quoting *Solomon v. Petray, 795 F.3d 777, 788 (8th Cir. 2015))*. "The burden of demonstrating an absence of a genuine dispute of material fact is on the moving party." *Farver v. McCarthy, 931 F.3d 808, 811 (8th Cir. 2019)*. "If the movant does so, the nonmovant must respond by submitting evidentiary materials that set out 'specific facts showing that there is a genuine issue for trial.'" *Torgerson, 643 F.3d at 1042* (quoting *Celotex Corp. v. Catrett, 477 U.S. 317, 324, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986))*.

Polaris contends that summary judgment is proper and that it is entitled to judgment as a matter of law because there is no evidence that any of the named Plaintiffs were injured and because four of the named Plaintiffs cannot establish required elements of their consumer protection **[*967]** claims. (ECF No. 358 ("Polaris Summ. J. Br.") at 18-29.) For the reasons discussed below, Polaris's arguments are unsuccessful.

A. Price Premium Theory

Polaris argues that each of the named Plaintiffs "must prove . . . the fact and extent of their claimed injury" to survive summary judgment. (Polaris Summ. J. Br. at 18.) ***HN31***[] The **[**46]** fact of injury must not be "speculative, remote, or conjectural," but proved "with certainty." *Storage Tech. Corp. v. Cisco Sys., Inc., 395 F.3d 921, 928-29 (8th Cir. 2005)*. The "injury" claimed by Plaintiffs appears to be twofold. First, Plaintiffs argue that they did not receive the benefit of their bargain because the Sportsman ATVs present a risk of injury from overheating. Second, Plaintiffs argue that they overpaid for their Sportsman ATVs because the market would have valued the ATVs for less if consumers had known that the ATVs presented this risk. Polaris focuses on this second prong of the injury in its summary judgment motion, arguing that the "overcharge" or "price premium" theory presented by Plaintiffs cannot survive summary judgment.

Polaris's argument against the price premium theory is that (1) Plaintiffs cannot use their own testimony, because an individual is not competent to testify about what the ATV price would have been but for the non-disclosure; (2) Plaintiffs cannot use their expert testimony, because the experts have no opinion as to any individual Plaintiff; and (3) Plaintiffs cannot use their expert testimony for the additional reason that the experts testify only to aggregate damages for the market.

The first problem with Polaris's **[**47]** arguments is that Polaris does not tie them to the state laws governing Plaintiffs' claims. (*Compare* Polaris Summ. J. Br. at 18-25 (arguing simply "no evidence establishes that any plaintiff was injured" without reference to the state laws at issue) *with id.* at 26-29 (arguing Johannessohn, Pinion, Kelley, and Bates cannot survive summary judgment under the MCFA, NCUDPTA, FDUTPA, and GBL, respectively).) Whether a failure to "prove . . . the fact and extent of [a] claimed injury" entitles Polaris to judgment as a matter of law depends on the requirements of the state laws that apply to Plaintiffs' claims.[14] As the Supreme Court explained in *Anderson v. Liberty Lobby, Inc.*, "the substantive law will identify which facts are material" because "[o]nly disputes over facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment." *477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. The Court must then analyze the theory under each state's law.

1. The price premium theory is a legally cognizable injury under each state's law.

Each state statute at issue recognizes, as a general proposition, that a consumer who pays a premium for a product based on a defendant's actionable misrepresentations **[**48]** or omissions has suffered a legally cognizable injury. That is, the MMPA, UCL, CLRA, FDUTPA, GBL, NCUDTPA, and MCFA each recognize that a consumer who overpays for an item because the actual value of the item he purchased was less than the value of the item as represented can establish that he has been injured. *See, e.g., Marty v. Anheuser-Busch* ***[*968]*** *Companies, LLC, 43 F. Supp. 3d 1333, 1347 (S.D. Fla. 2014)* (denying motion to dismiss UCL, CLRA, FDUTPA, and GBL claims, among others, because plaintiffs claimed that they had paid a premium price for beer based on the mistaken belief that it was imported from Germany). Courts applying the MMPA have reasoned that "under the benefit of the bargain rule as applied to MMPA claims, [p]laintiff[s] need only allege that the actual value of the product as purchased was less than the value of the product as represented to state a claim for an ascertainable loss." *Kelly v.*

[14] Polaris appears to recognize as much when distinguishing Plaintiffs' cited authorities. *See* Polaris Summ. J. Reply at 16 (arguing Plaintiffs cannot rely on *Carriuolo, 823 F.3d 977* in support of their Minnesota law arguments because it applies Florida law).

Cape Cod Potato Chip Co., 81 F. Supp. 3d 754, 758-59 (W.D. Mo. 2015). Similarly, courts applying California's UCL and CLRA have determined that paying a price premium attributable to a defendant's actionable conduct is a cognizable injury under both of those statutes. *See, e.g.,* In re Gen. Motors LLC Ignition Switch Litig., 2016 U.S. Dist. LEXIS 92499, 2016 WL 3920353, at *21-*22 (denying motion to dismiss UCL and CLRA claims because plaintiffs alleged "they purchased products that they otherwise would not have, or paid more than they otherwise **[**49]** would have paid, due to New GM's failure to disclose the ignition defects in their cars").

Courts have also determined that a plaintiff can establish a legally cognizable injury under the GBL by showing that she "overpaid for the product, or, stated differently, [that she] paid a premium for a product based on the defendants' inaccurate representations." Greene v. Gerber Prods. Co., 262 F. Supp. 3d 38, 68 (E.D.N.Y. 2017) (cleaned up).[15] Similarly, a consumer who has paid a premium attributable to a defendant's actionable omissions or misrepresentations has suffered a cognizable injury under the FDUTPA. *See, e.g.,* Dzielak v. Whirlpool Corp., 26 F. Supp. 3d 304, 341 (D.N.J. 2014) (denying motion to dismiss where complaint alleged that "plaintiffs paid a price premium for an Energy Star certified washer, and paid higher energy bills because the machine did not in fact comply with efficiency standards").

Although this Court has found few cases addressing the price premium theory of damages under the NCUDTPA, it finds the reasoning of Suchanek v. Sturm Foods, Inc., No. 11-CV-565-NJR-RJD, 2018 U.S. Dist. LEXIS 213658, 2018 WL 6617106 (S.D. Ill. July 3, 2018) instructive. In *Suchanek*, plaintiffs brought claims under various state consumer fraud statutes, including the NCUDTPA, asserting that they and their class members were misled into paying the price of ground coffee **[**50]** for a product that was predominantly instant coffee. 2018 U.S. Dist. LEXIS 213658, [WL] at *2. The *Suchanek* court directed the parties to submit filings addressing, among other things, the elements of each statute that could be established using common proof. *Id.* The court first noted that under North Carolina law, "[a]ctual injury may include the loss of the use of specific and unique property, the loss of any appreciated value of the property, and such other elements of damages as may be shown by the evidence." 2018 U.S. Dist. LEXIS 213658, [WL] at *15 (quoting Coley v. Champion Home Builders Co., 162 N.C. App. 163, 590 S.E.2d 20, 22 (N.C. Ct. App. 2004)). The court then determined that the price premium model set forth by the plaintiffs could suffice to show injury under the NCUDTPA. *See* 2018 U.S. Dist. LEXIS 213658, [WL] at *15-16. Based on the reasoning of Suchanek, the Court concludes that paying a premium attributable to a defendant's actionable omissions or misrepresentations **[*969]** is a cognizable injury under the NCUDTPA.

This Court has also found few cases addressing the price premium theory of damages under the MCFA in similar circumstances. But based on its review of the relevant authority, it appears that paying a premium attributable to a defendant's actionable omissions or misrepresentations is a cognizable injury under the MCFA. *See, e.g.,* Laughlin v. Target Corp., No. 12-CV-489 (JNE/JSM), 2012 U.S. Dist. LEXIS 104526, 2012 WL 3065551, at *5 (D. Minn. July 27, 2012) (denying motion to dismiss where plaintiff claimed **[**51]** "she would not have purchased . . . footwear had she known that the shoes did not provide the advertised benefits, that she paid an increased price for the shoes, and that she therefore suffered injury").

In addition to the fact of injury, proof of the extent of injury depends on the substantive laws at issue. Under the applicable state statutes, once the fact of injury is established, the extent of the injury need not be proved with precision, particularly at the summary judgment stage. *See, e.g.,* Ebin, 2014 U.S. Dist. LEXIS 26439, 2014 WL 737878, at *2 ("New York . . . law squarely place[s] the burden of ascertaining the amount of damages, when the existence of damage is known but its extent is opaque, upon the alleged wrongdoer."); In re Gen. Motors LLC Ignition Switch Litig., 407 F. Supp. 3d 212, 231-32 (S.D.N.Y. 2019) ("Although [p]laintiffs may not need to prove the amount of damages to an absolute certainty to survive summary judgment, they do — under the law[s] of [California, Missouri, and Texas] — need some evidence of the fact of damages . . . to create a triable issue on that element of their claim."(emphasis omitted)). Polaris's cited authority is not to the contrary. *See* Polaris Summ. J. Br. at 18 (citing Storage Tech. Corp., 395 F.3d at 928-29 ("Under Minnesota law, damages may not be speculative,

[15] *See also* Koenig v. Boulder Brands, Inc., 995 F. Supp. 2d 274, 288 (S.D.N.Y. 2014) (collecting cases); Ebin v. Kangadis Food Inc., No. 13 CIV. 2311 JSR, 2014 U.S. Dist. LEXIS 26439, 2014 WL 737878, at *2 (S.D.N.Y. Feb. 25, 2014) (denying summary judgment where plaintiffs had adduced evidence that they had overpaid because they paid the price of olive oil for pomace).

remote, or conjectural. However, once the fact of damages **[**52]** is proved with certainty, the extent of damages need only be shown to have a reasonable basis in the evidence." (citation omitted))).

2. Daubert motion.

Having concluded that the price premium theory can establish an injury under the relevant state consumer protection laws, the Court turns to whether the record contains evidence that would allow a reasonable factfinder to find such injury. Plaintiffs offer the expert testimony of Richard Eichmann and Sara Butler, who have assessed an 8.8 percent price premium attributable to Polaris's failure to disclose the exhaust heat defect. (ECF No. 385 ("Pls' Summ. J. Opp.") at 25-29 ("Plaintiffs' experts Sara Butler and Richard Eichmann can provide the injury evidence called for under the applicable state law.").)

HN32[] Polaris contends that the opinions and related work of Butler and Eichmann are inadmissible under *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, and *Rule 702 of the Federal Rules of Evidence.* "When considering expert testimony, a district court must ensure that all scientific testimony is both reliable and relevant." *In re Wholesale Grocery Prods. Antitrust Litig., 946 F.3d 995, 1000 (8th Cir. 2019)* (citation and quotation marks omitted). "To satisfy the reliability requirement, the proponent of the expert testimony must show by a preponderance of the evidence both that the expert is qualified to render **[**53]** the opinion and that the methodology underlying his conclusions is scientifically valid." *Id.* (quoting *Marmo v. Tyson Fresh Meats, Inc., 457 F.3d 748, 757-58 (8th Cir. 2006))*. District courts act as gatekeepers, making "preliminary assessment of whether the reasoning or **[*970]** methodology underlying the testimony is scientifically valid and of whether that reasoning or methodology properly can be applied to the facts in issue." *Daubert, 509 U.S. at 592-93*. The Eighth Circuit has cautioned that the "rejection of expert testimony is the exception rather than the rule." *In re Wholesale Grocery Prods. Antitrust Litig., 946 F.3d at 1001*; *see also Johnson v. Mead Johnson & Co., LLC, 754 F.3d 557, 562 (8th Cir. 2014)* (collecting cases).

a. Methodology

Butler and Eichmann submitted reports and deposition testimony that Plaintiffs claim establish evidence of (1) an 8.8 percent price premium attributable to Polaris's purported undisclosed exhaust heat defect and (2) cost-of-repair damages.

To calculate the price premium attributable to Polaris's alleged undisclosed exhaust heat defect, Butler and Eichmann were tasked with determining what the price of Polaris's affected ATVs would have been if Polaris had disclosed its existence. Butler did the first part: she created a conjoint survey to test whether exposure to a warning about an exhaust heat defect would decrease consumers' willingness to pay for Sportsman ATVs. (ECF No. 407-6 **[**54]** ("Butler 1st Rpt.") ¶¶ 17, 20.) Survey respondents completed a questionnaire that showed them various attributes associated with ATVs— *e.g.*, brand, engine size, front rack/rear rack capacity, suspension travel, ground clearance, and price. (*Id.* ¶ 42.) A key feature of Butler's survey is that those of her respondents who were sorted into a "Test" group were shown the following statement:

> Please note: the design of the Polaris Sportsman ATVs causes heat from the exhaust that can reach temperatures that exceed Polaris's specifications and can cause discomfort to riders and melt plastic parts.

(*Id.* ¶ 21.) Survey respondents who were sorted into a "Control" group were not shown that statement but were otherwise provided with the same information as members of the "Test" group about ATV brands, attributes, and prices. (*Id.* ¶ 22.) All survey respondents were then asked to choose the ATV they preferred after being shown various brand, attribute, and price combinations. (*Id.* ¶¶ 48-49.) Using the information from this survey, Butler calculated an average decline of $1,614 in willingness to pay for a Polaris Sportsman ATV with the exhaust heat defect. (ECF No. 407-5 "(Butler 2d Rpt.") ¶ 92.)

Eichmann **[**55]** used the $1,614 figure calculated by Butler to conduct a market simulation with the aim of determining the shifts in supply and demand in the market that would affect pricing had the defect been disclosed.

(ECF No. 407-13 ("Eichmann 2d Rpt.") ¶ 22.) He relied on Butler's calculations to calculate shifts in the demand side of the market. (*Id.*). For the supply side, he used historical data of units sold in the "1-Up Big Bore" market segment in 2016 (*id.* ¶ 24), and Manufacturer Suggested Retail Price ("MSRP") data. (*See, e.g., id.* ¶ 43.) Eichmann's market simulation focused on four types of ATVs: Polaris, Yamaha, CanAm, and Other (a composite of minor offerings in the marketplace). (*Id.* ¶¶ 25-26.) He treated each of these as separate firms in his analysis, assuming that each firm is profit maximizing. (*Id.* ¶ 27.) Although there are two Sportsman ATVs in the "1-Up Big Bore" market—the Sportsman 850 and the Sportsman 1000—Eichmann created an "average" Sportsman to represent both of these by "taking the unit sales weighted average of MSRP and physical characteristics across Sportsman 850 and 1000, while using the sum of the unit sales across these models as total sales." (*Id.*) **[*971]** With these **[**56]** inputs on the supply side and Butler's input on the demand side, Eichmann's market simulation determined that the price for a Polaris Sportsman after disclosure of the defect would have been 8.8 percent lower than consumers actually paid. (*Id.* ¶ 30.)

b. Qualifications

HN33[] "[I]t is the responsibility of the [Court] to determine whether a particular expert has sufficient specialized knowledge to assist jurors in deciding the specific issues in the case." *Medalen v. Tiger Drylac U.S.A., Inc., 269 F. Supp. 2d 1118, 1127 (D. Minn. 2003)* (citation and quotation marks omitted). Butler is the Managing Director at NERA Economic Consulting ("NERA"), where she is Chair of the Survey and Sampling Practice. (Butler 1st Rpt. ¶ 1.) She has a Master's degree in sociology from Temple University. (*Id.* Ex. A.) To this Court's knowledge, she has never been deemed unqualified to testify as an expert. And after the Court's review of her resume and work as a litigation expert, it concludes that she has considerable experience designing and implementing conjoint surveys. (*See, e.g., id.*) That is what she did here.

Polaris does not appear to dispute Butler's considerable experience with conjoint surveys. (*See, e.g.*, ECF No. 406 ("Polaris Daubert Reply") at 2.) At bottom, it contests whether **[**57]** Butler has the training and experience to calculate a demand curve. (*Id.*) But Butler does not hold herself out to be an economist. Nor is it this Court's understanding that, if a trial were held, Butler would be the one to explain to the jury what, if anything, her survey results have to do with shifts in the demand curve. The Court understands that to be Eichmann's role. The Court is satisfied that Butler is qualified to testify as to the design and implementation of her conjoint survey.

Eichmann is a Director for NERA. (ECF No. 407-9 ("Eichmann 1st Rpt.") ¶ 1.) He has a Master's degree in Applied Economics from the University of Michigan. (Eichmann First Rpt., App. A.) He has over 20 years of experience as an economics consultant. (Eichmann 1st Rpt. ¶ 1.) The National Association for Certified Valuators and Analysts has certified him as a Master Analyst in Financial Forensics and a Certified Valuation Analysis. (Eichmann 1st Rpt., App. A.) Federal and state courts have deemed him qualified as an expert to testify to statistical methods, sampling, survey design, business valuations, and econometrics. (Eichmann 1st Rpt. ¶ 1.) To this Court's knowledge, he has never been deemed unqualified **[**58]** to testify as an expert.

Polaris contends that while Eichmann may be qualified to "estimate some types of alleged damages," he lacks the training and experience to conduct a market simulation. (Polaris Daubert Reply at 3.) But Eichmann has testified that while he has never "done [a] grab-a-willingness-to-pay figure market analysis the way [he did] here as a testifying expert on another case before," he has worked on "at least 20 or so" cases in which he received the results of a conjoint study and then used a market simulation to compute market equilibrium prices. (ECF No. 378-2 ("Eichmann Dep.") at 16:21-17:5; 18:23-19:2.) The Court is satisfied that Eichmann has sufficient training and experience to testify as to the design and results of his market simulation.

c. Scientific Validity

HN34[] To be admissible, expert testimony must be based on "reliable principles and methods." *Fed. R. Evid. 702(c)*. Among the many factors courts consider to **[*972]** determine whether expert opinions are reliable are: "(1) whether the theory or technique can be (and has been) tested; (2) whether the theory or technique has been subjected to peer review and publication; (3) the known or potential rate of error; and (4) whether the theory **[**59]** has been generally accepted." *Lauzon v. Senco Prods., Inc., 270 F.3d 681, 687 (8th Cir. 2001)* (cleaned up). "As a general rule, the factual basis of an expert opinion goes to the credibility of the testimony, not the admissibility." *Bonner v. ISP Techs., Inc., 259 F.3d 924, 929 (8th Cir. 2001)*.

Although it is a close question, the Court determines that Butler's methodology is admissible, and that Polaris's complaints about it go to its weight, not its admissibility. It is undisputed that conjoint questionnaires are not ordinarily designed to be given to separate "test" and "control" groups. (*See, e.g.*, Butler 2d Rpt. ¶ 46.) But the Court is persuaded that sufficiently similar approaches have been tested and subject to peer review, and thus the Court will allow it to be presented at trial. (*See, e.g.*, ECF No. 407-6 ("Mizik Supp. Rep."), App. 3 (listing published articles discussing atypical conjoint survey designs).)

The Court is also of the view that Butler's survey is sufficiently representative of the relevant population. Butler's sample contained prospective purchasers as well as those who had bought a new ATV within five years of taking Butler's questionnaire. (Butler 1st Rpt. ¶ 31.) And it appears that Butler randomly assigned sample members to the "test" and "control" groups. (Butler 1st Rpt., Exhibit **[**60]** D at 5.) The Court finds the sample to be sufficiently representative of the relevant population—consumers whose views would have affected the market price of the Sportsman ATVs had Polaris disclosed the alleged exhaust heat defect—to be admissible.

Polaris's myriad arguments to the contrary do not persuade the Court. Among other things, Polaris contends that Butler's test and control groups were not properly randomized because both had too many women (Polaris's customers are primarily men) and the control group had too many Polaris owners. The Court is not convinced by Polaris's argument that randomization failed because the demographics of Butler's survey sample differ from those of actual Polaris buyers. The population of Polaris buyers is surely smaller than the population of prospective ATV buyers, and thus would be less reflective of the market. Nor is the Court convinced that the presence of additional Polaris owners in the control group means that randomization failed.

Polaris also contends that Butler made various mistakes in designing her survey. Among other things, it argues that the purchasing environment simulated by Butler's survey was "divorced from the undisputed facts," **[**61]** that it made members of the "control" group pay undue attention to the exhaust-heat warning, that her survey omitted certain key attributes that actual ATV purchasers find most important, and that Butler misinterpreted the results from the software she used to generate her findings. (ECF No. 374 ("Polaris Daubert Br.") at 21.) These are matters for cross-examination and do not mandate the exclusion of her opinions and testimony. *See, e.g., Murphy v. Wheelock, No. 16-CV-2623 (DWF/BRT), 2019 U.S. Dist. LEXIS 132477, 2019 WL 3719035, at *5 (D. Minn. Aug. 7, 2019)* (concluding that defendant's criticisms of expert's methodology were matters to be addressed on cross examination).

The Court also concludes that Eichmann's methodology is admissible. There is no question that a market simulation is a scientifically valid method to determine the market equilibrium price in **[*973]** a counterfactual world. Polaris's dispute is over many of the assumptions Eichmann made before running his market simulation. Among other things, it argues that Butler's survey results could not give Eichmann the proper inputs for a demand curve, that Eichmann should have not assumed that the "1-Up Big Bore" market segment was representative of the markets where the Sportsman ATVs are sold, that Eichmann should not have combined Polaris Sportsman **[**62]** 850 and Polaris Sportsman 1000 data to create an "average" Sportsman, that Eichmann should not have combined the smaller actors in the "1-Up Big Bore" market segment into one firm, and that Eichmann should not have used MSRP for price data. Although it is again a close question, the Court concludes Polaris's challenges to Eichmann's methodology go to the weight, not the admissibility, of his opinion and testimony.

Eichmann's model is not so disconnected from the facts of the case that his opinion must be excluded. For example, although Polaris criticizes Eichmann heavily for using MSRP data when vehicles are ordinarily sold at individually negotiated prices (Polaris Daubert Reply at 13), Eichmann does not need actual prices to conduct his market simulation. Eichmann seeks to find the difference between Polaris's prices in the actual world (the world in which, according to the Plaintiffs' theory of damages, Polaris commanded a price premium) and in the Plaintiffs' counterfactual world (the world in which Polaris promptly disclosed the exhaust heat defect). It is not unreasonable to assume that MSRP data may be used to capture this difference—*i.e.*, the overcharge percentage—because there **[**63]** is some correlation between MSRP and actual price. That is, if Eichmann captured an 8.8 percent change in MSRP, then it is reasonable to assume that mirrors an 8.8 percent change in actual price. Whether changes in MSRP do or do not track changes in actual price is fodder for cross-examination.[16]

Polaris also points out that Eichmann did not report the margins of error for his calculations. ***HN35***[] Under *Daubert*, the "known or potential rate of error" is indeed important to assessing the scientific validity of an expert's methods. *Lauzon, 270 F.3d at 687*. The Court is satisfied that Eichmann's and Butler's work papers contained sufficient information to allow for computation of the potential rate of error, and their testimony will not be excluded on this basis.

d. Relevance

HN36[] "To show that the expert testimony is relevant, the proponent [of the expert testimony] must show that the reasoning or methodology in question is applied properly to the facts in issue." *Marmo, 457 F.3d at 758*. "Courts should resolve doubts regarding the usefulness of an expert's testimony in favor of admissibility." *Id.* Here, Butler opines that she has calculated an average decline of **[*974]** $1,614 in willingness to pay for Polaris Sportsman ATV with the exhaust heat **[**64]** defect. And Eichmann opines that, based on the $1,614 decline in willingness to pay and data he gathered from the "1-Up Big Bore" market segment, his market simulation calculates an 8.8 percent price premium that is attributable to the exhaust heat defect. The Court concludes that this evidence would be helpful to the jury's consideration of whether Polaris charged a price premium that can be attributed to an undisclosed exhaust heat defect.

Polaris disputes the relevance of Butler's testimony, and thus, the relevance of Eichmann's testimony as well. In particular, Polaris argues that Butler tested the wrong proposition because her survey design does not take into consideration disclosures all ATV manufacturers make in their brochures and owner's manuals. This is, at bottom, a factual dispute between the parties as to the purchasing environment that would inform consumers' decisions in the counterfactual world. The Court concludes that the purchasing environment envisioned by Butler's survey "is sufficiently grounded in the facts of the case to be helpful to the jury." *Scoular Co. v. Ceres Glob. AG Corp., No. CV 14-1881 (JRT/HB), 2017 U.S. Dist. LEXIS 130826, 2017 WL 3535210, at *17 (D. Minn. Aug. 16, 2017)*.

e. Eichmann's Cost-of-Repair Damages

Polaris also seeks to exclude **[**65]** Eichmann's calculation of cost-of-repair damages. Because Eichmann's cost-of-repair damages model is not relevant to Polaris's summary judgment motion, the Court need not opine on its admissibility.

3. Application of expert testimony to individual claims.

According to Polaris, Plaintiffs' expert evidence is "irrelevant" because, contrary to the Plaintiffs' assertions, it does not prove "that each individual plaintiff was in fact damaged or that each plaintiff's damages were the same or

---

[16] In its summary judgment briefing, Polaris argues that because Eichmann's model relies on averages, the Plaintiffs offer no evidence that can be used to prove the named Plaintiffs' individual damages. (*See, e.g.*, Polaris Summ. J. Reply at 12 (arguing "average or 'normalized' data like Eichmann's cannot as a matter of law be used to prove individual (or, for that matter, class-wide) damages").) This is another attack on the assumptions underlying Eichmann's model and his subsequent calculation of an overcharge percentage attributable to the alleged defect—more ammunition for cross-examination. Polaris's cited authority stands for the uncontested proposition that "[w]hether a representative sample may be used to establish class-wide liability will depend on the purpose for which the sample is being introduced and on the underlying cause of action." *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1049, 194 L. Ed. 2d 124 (2016)*.

similar." (ECF No. 399 ("Polaris Summ. J. Reply") at 12.) Polaris contends that the named Plaintiffs cannot rely on Butler and Eichmann, because the experts did not analyze each Plaintiff's claims individually. Rather, Butler and Eichmann opine as to "class-wide" damages, examining the supply and demand side of the market.[17] Thus, Polaris argues, the experts are not legally competent to testify as to the hypothetical price of any single ATV, because the experts did not interview any Plaintiff or opine as to any individual's purported economic losses. (*Id.* at 19-20.)

To the extent Polaris argues that market-based expert evidence can never prove an individual plaintiff's overpayment, this contention finds no support in **[**66]** the law. *See, e.g., Ebin, 2014 U.S. Dist. LEXIS 26439, 2014 WL 737878, at *2* (denying summary judgment on GBL claim after concluding that plaintiffs' market-based expert evidence was sufficient evidence of injury); *cf. In re Gen. Motors LLC Ignition* ***[*975]*** *Switch Litig., 407 F. Supp. 3d at 234-40* (concluding that "[a]lthough the issue [was] a close one," market-based expert evidence was insufficient to establish plaintiffs suffered damages under California, Missouri, and Texas law because the expert did not account for the interaction of supply and demand in the relevant hypothetical market conditions). None of the statutes at issue here precludes individual plaintiffs from relying on expert evidence of the shifts in supply and demand affecting pricing if Polaris had disclosed that the Sportsman ATVs are at risk of overheating. And Polaris cites no case law interpreting any of the statutes in such a manner. Rather, courts applying these statutes have allowed market-based evidence to be used to establish the fact of injury and damages.

Like the *Suchanek* court, this Court concludes that market-based evidence may be used to establish the fact of injury under the CLRA, UCL, GBL, and NCUDTPA. *2018 U.S. Dist. LEXIS 213658, 2018 WL 6617106, at *15-16* (determining that the price premium model set forth by plaintiffs could suffice to show injury). As to Florida, the Eleventh Circuit found that damages under **[**67]** the FDUTPA are measured by the difference between the market value of the product as promised and the market value of the product delivered, explaining that "the FDUTPA's 'benefit of the bargain' model provides a standardized class-wide damages figure because the plaintiff's out-of-pocket payment is immaterial." *Carriuolo, 823 F.3d at 986* (noting that "the proper question is not how much the erroneous sticker may have reduced the vehicle's perceived value for any individual purchaser or lessee"). Based on the reasoning in *Carriuolo*, this Court concludes that Florida courts would allow an individual plaintiff's claim for damages under the FDUTPA to be proved using marketbased expert evidence. As to Missouri, at least one court has concluded that the plaintiffs' alleged injury was subject to common proof under the MMPA. *See In re McCormick & Co., Inc., Pepper Prods. Mtk'g & Sales Practices Litig., 422 F. Supp. 3d 194, 2019 U.S. Dist. LEXIS 114583, 2019 WL 3021245, at *47 (D.D.C. 2019)*. In *In re McCormick*, the court reasoned that under the plaintiffs' theory of causation and loss—that the plaintiffs had received less pepper than they thought they were purchasing—"every purchaser would have suffered the same loss." *Id.* It rejected the argument that individualized inquiries would be necessary **[**68]** to establish injury, emphasizing "the alleged injury is the difference in value of the pepper as represented and the value of the pepper as received." *Id.* Based on this reasoning, the Court concludes that market-based evidence may be used to establish the fact of injury under the MMPA.

Finally, as to Minnesota, based on the limited authority addressing this issue under the MCFA, the Court believes that market-based evidence may also be used to establish the fact of injury under the MCFA. *See, e.g., Khoday, 2014 U.S. Dist. LEXIS 43315, 2014 WL 1281600, at *33* (finding *Rule 23(b)(3)* predominance satisfied for MCFA claims because plaintiffs "presented a method that allow[ed] for a determination of the actual value to consumers of" the product and damages were amenable to common proof).

While the cases above address evidence of injury and damages on a class-wide basis, rather than for an individual plaintiff, the Court does not find a compelling reason to preclude the named Plaintiffs from relying on market-based

[17] The Court's acceptance or rejection of expert testimony to support individual damages does not inform the Court's decision on class certification. Though Butler and Eichmann are referred to as "class-wide" experts, this term was coined by Plaintiffs, who are moving for class certification. Butler and Eichmann simply analyze a large base of consumers and provide a model of damages that Plaintiffs wish to apply to their individual claims. In general, Butler and Eichmann attempt to capture shifts in the market that would affect the market equilibrium price at which Sportsman ATVs would have sold had Polaris disclosed their heat issues, and from there extrapolate the price premium attributable to the alleged exhaust heat defect. The Court thus uses the term "market-based" evidence, rather than "class-wide" evidence, particularly in view of its decision to deny class certification.

evidence of injury and damages where courts allow such evidence to support class-wide claims. Polaris's argument that the experts did not interview any Plaintiff or opine as to any individual's purported economic losses are best left to cross-examination. **[**69]** It is for a **[*976]** factfinder to decide whether such evidence proves the named Plaintiffs' injury and damages.

B. Fact Issues

Having determined the applicable legal standards, the Court turns to whether summary judgment is proper against any of the named Plaintiffs. It is Polaris's burden to show that no genuine dispute of material fact exists, under the law of the state of residence of each Plaintiff. For the reasons set forth below, it fails to meet that burden.[18]

1. Badilla and Wonders

Badilla's claims are governed by California law and Wonders's claim is governed by Missouri law. Polaris contends that Badilla cannot establish that he suffered an injury. Polaris does not dispute that Badilla can establish the other elements of his UCL and CLRA claims on the summary judgment record. For example, Polaris does not contest whether Badilla can establish that Polaris knew of the exhaust heat defect at the time of sale, as required under both the UCL and CLRA. Nor does Polaris contest whether Badilla can establish that Polaris's nondisclosure was an immediate cause of his injury-producing conduct, as required by the CLRA. Polaris only disputes whether Badilla has adduced evidence that he suffered an **[**70]** injury. Badilla has testified that, had he known that the Sportsman ATV he bought had the heat issues he experienced and learned about after his purchase, then he would not have bought it at all. (*See* ECF No 383-6 ("Badilla Dep.") at 204-05.) And the Court has concluded that Plaintiffs have adduced admissible evidence under California law of an 8.8 percent price premium attributable to the exhaust heat defect. Drawing all reasonable inferences in Badilla's favor, the summary judgment record suffices to at least create a genuine dispute of material fact as to whether Badilla suffered injury under the UCL and the CLRA. Thus, summary judgment as to Badilla will be denied.

Similar to Badilla, other than the fact and extent of injury, Polaris does not argue that any disputes exist that can affect the outcome of Wonders's claim under the MMPA. For example, Polaris does not dispute that Wonder can establish, on the summary judgment record, that Polaris failed to disclose to Wonders facts that Polaris knew or should have known. Again, Polaris only disputes whether Wonders has adduced evidence that he suffered an injury. Wonders, too, testified that had he known about the heat problems that **[**71]** he experienced later, he would not have purchased his Sportsman ATV. (*See* ECF No. 383-5 ("Wonders Dep.") at 235.) And following Missouri law, the Court will allow evidence of the price premium calculated by Butler and Eichmann to prove injury. Thus, because genuine disputes of material fact exist as to whether Wonders suffered an injury, awarding Polaris summary judgment against Wonders is not proper.

2. Johannessohn

As to Johannessohn, Polaris contests both the causal nexus required by the MCFA and the evidence of injury. Polaris does not dispute that Johannessohn can establish the other elements of his MCFA claim on the summary judgment record. For example, Polaris does not dispute that Johannessohn can establish that Polaris omitted a material fact or that special circumstances triggering a duty to disclose exist.

[*977] Polaris claims that Johannessohn cannot show that Polaris's omission had some effect on his decision to purchase a Sportsman ATV, because Johannessohn asked for and received a new ATV after his original Sportsman ATV caught fire. Johannessohn has an explanation: he testified that he thought his first Sportsman ATV

---

[18] While repetitive, the Court discusses each named Plaintiff individually to emphasize that each Plaintiff's claims must be examined under the laws of his state of residence.

was a lemon, that is, that the issues that caused that ATV **[**72]** to catch fire were unique to that first ATV. (*See* ECF No. 383-1 ("Johannessohn Dep.") at 393-400.) And he testified that he is unhappy with his second Sportsman ATV, too, and purchased a Can-Am Maverick "[s]o [he] had something to ride, because [he] couldn't ride [his] Polaris." (*Id.* at 222.) This testimony is sufficient to generate a genuine dispute as to whether there is a causal nexus between Polaris's actions and an injury.

Polaris also disputes whether Johannessohn has adduced evidence that he suffered an injury. Like the others, Johannessohn testified that, had he known that Polaris's Sportsman 1000 ATV had been suffering from heat-related issues and Polaris had no plans to fix it until model year 2017, he would not have purchased his Sportsman 1000 in August of 2015. (*Id.* at 393.) In light of this testimony and the expert evidence of an 8.8 percent price premium attributable to the exhaust heat defect, the summary judgment record suffices to create a genuine dispute as to whether Johannessohn suffered an injury under the MCFA. Because genuine disputes of material fact exist, awarding Polaris summary judgment against Johannessohn is not warranted.[19]

3. Kelley

Kelley's claim is governed by the FDUTPA. **[**73]** As with Johannessohn, Polaris contends that Kelley cannot establish causation or actual damages. Polaris does not dispute that Kelley can establish the other elements of his FDUTPA claim on the summary judgment record. For example, Polaris does not dispute that Kelley can establish that Polaris committed a deceptive act or unfair practice.

As with Johannessohn, Polaris contests Kelley's evidence of causation and injury. Polaris argues that Kelley "already knew about allegedly excessive heat—including melting parts—from owning prior Sportsman ATVs." (Polaris Summ. J. Br. at 28.) Kelley explained that although he had experienced problems with the heat emitted by his prior Sportsman ATVs, he thought that Polaris had done "some research" and "improved the design" and that therefore the Sportsman ATVs he purchased later would "stay cooler." (ECF No. 383-3 ("Kelley Dep.") at 96-98.) Kelley also testified that, had he known that Polaris's ATVs exceeded its own 115 degree "comfort threshold," he would not have purchased his Sportsman 1000 and 850 in 2016. (*Id.* at 189-90.) The Court finds this testimony sufficient to generate a genuine dispute as to causation.

Polaris also claims that, because Kelley had **[**74]** heat issues with his prior Sportsman ATVs, he purchased his Sportsman 1000 and 850 ATVs "with knowledge of their supposed defects." (Polaris Summ. J. Br. at 29.) Assuming without deciding that knowledge of the defects would bar recovery under the price premium theory of damages, the Court finds that Kelley's testimony above is sufficient to generate a genuine dispute as to this issue as well.

Finally, Polaris disputes whether Kelley has offered evidence that he suffered an **[*978]** injury. But, as noted above, Kelley testified that he would not have purchased his Sportsman ATVs in 2016 if he had known they suffered from heat issues. And the Plaintiffs have adduced evidence of an 8.8 percent price premium attributable to the exhaust heat defect. Thus, under the FDUTPA, drawing all reasonable inferences in Kelley's favor, the summary judgment record suffices to prove injury under the FDUTPA. Because genuine disputes of material fact exist, awarding Polaris summary judgment against Kelley is not proper.

4. Bates

As a New York resident, Bates's claim is governed by the GBL. Polaris contends that Bates cannot recover because "New York consumers who know of the alleged omission cannot recover under" **[**75]** the GBL and Bates has adduced no evidence of injury. Polaris does not dispute that Bates can establish the other elements of his GBL

[19] Polaris also argues that Johannessohn continued to drive his ATV after learning of the alleged exhaust heat defect, a fact which precludes him from demonstrating causation. *See* Polaris Summ. J. Reply at 18. This, too, raises an issue for a factfinder to decide.

claim on the summary judgment record. For example, Polaris does not dispute that Bates can establish that the challenged act or practice was consumer-oriented or that it was misleading in a material way.

In support of its argument that Bates's knowledge of the exhaust heat defect prior to purchase bars his recovery, Polaris points to Bates's testimony that he had "heard about this [excessive heat] happening back as far as like 2012" from other consumers. (Polaris Summ. J. Br. at 29.) Polaris interprets Bates's statement to mean that Bates knew about the exhaust heat defect in its Sportsman vehicles as far back as 2012. (*See id.*) Plaintiffs disagree and, in light of Bates's subsequent testimony, interpret this statement to mean that Bates believes that Polaris should have known about the exhaust heat defect because many consumers were complaining about excessive heat "back as far as . . . 2012." (Pls' Summ. J. Opp. at 36-37.) Assuming without deciding that under the GBL, consumers' knowledge of the defect would bar recovery even under a price premium theory **[**76]** of damages, the Court finds that there is a genuine dispute as to whether Bates knew of the exhaust heat defect before purchasing his Sportsman ATV. That is, the Court finds that "the evidence is such that a reasonable jury could return a verdict for the nonmoving party," and thus Bates's GBL claim is not barred as a matter of law. *Anderson, 477 U.S. at 248*.

As with the other Plaintiffs, Polaris disputes whether Bates has presented evidence that he suffered an injury. But Bates, like the others, has testified that, had he known that Sportsman ATVs suffer from heat issues, he "probably would have bought another brand." (*See* ECF No. 383-4 ("Bates Dep.") at 128.) And the Plaintiffs offer expert evidence of a price premium attributable to the exhaust heat defect. Drawing all reasonable inferences in Bates's favor, genuine disputes of material fact exist as to whether Bates suffered an injury under the GBL, thus precluding summary judgment against Bates.[20]

5. Pinion

Pinion is a North Carolina resident, and thus the NCUDTPA governs his claim. Polaris contends that Pinion cannot prove reliance and has adduced no evidence of injury. Polaris does not dispute that Pinion can establish the other elements of his NCUDTPA claim **[**77]** on the summary judgment record. For example, Polaris does not contest that Pinion can establish that Polaris committed an unfair or deceptive act or practice and that the **[*979]** action in question was in or affecting commerce. Nor does Polaris contest that Pinion can establish an omission relating to a material matter known by Polaris that it had a legal duty to communicate to Pinion.

Polaris argues instead that Pinion cannot prove actual reliance, which is required under the NCUDTPA. *See* *Bumpers, 747 S.E.2d at 226, 367 N.C at 87*; *Arnesen, 781 S.E.2d at 7*. Polaris maintains that Pinion cannot prove actual reliance because he purchased a used Sportsman ATV for his wife after experiencing difficulties with his own Sportsman ATV. But Pinion also testified that he bought the ATV for his wife used for $6,600—less than the $14,200 Pinion paid for his own Sportsman ATV—"not long after" purchasing his own Sportsman ATV. (ECF No. 383-2 ("Pinion Dep.") at 44, 61-62.) After he testified to his experience with side pieces melting on his Sportsman ATV, Pinion stated "I don't know who would want to buy an ATV that's having those problems." (*Id.* at 162.) The Court finds Pinion's testimony sufficient to generate a genuine dispute as to whether Pinion would have purchased his Sportsman **[**78]** ATV for $14,200 if he had known about the exhaust heat defect because the evidence is such that a reasonable jury could return a verdict for the nonmoving party. *See* *Anderson, 477 U.S. at 248*.

Polaris also argues that Pinion cannot prove justifiable reliance as required under the NCUDTPA. *See* *Bumpers, 747 S.E.2d at 226*; *Arnesen, 781 S.E.2d at 7*. Polaris contends that Pinion must prove that he "inquired, or was prevented from inquiring, about the allegedly omitted information," and that he has not done so. (Polaris Summ. J. Br. at 27.) Assuming without deciding that under applicable North Carolina law Pinion must make such a showing to prove justifiable reliance, the Court finds that Pinion's testimony is sufficient to generate a genuine dispute as to the issue. Pinion testified that, before he purchased his ATV, he saw a television advertisement released by Polaris, and read the product brochure published by Polaris. (Pinion Dep. at 50-51, 67-68.) Considering all reasonable inferences in Pinion's favor, there is a genuine dispute as to whether he inquired about the heat issues.

---

[20] The Court disregards any arguments raised by Polaris for the first time on reply.

Finally, Polaris disputes whether Pinion has adduced evidence that he suffered an injury. But, as noted above, Pinion's testimony is sufficient to generate a genuine dispute as to whether **[**79]** he would have purchased his Sportsman ATV for $14,200 if he had known about the exhaust heat defect. Moreover, Plaintiffs have adduced admissible evidence of an 8.8 percent price premium attributable to the exhaust heat defect. Thus, drawing all reasonable inferences in Pinion's favor, the record suffices to create a reasonable inference that Pinion suffered an injury under the NCUDPTA. Because genuine disputes of material fact exist, awarding Polaris summary judgment against Pinion is not proper.

In sum, Polaris has not met its burden and there is a genuine dispute as to some material facts, so summary judgment against Plaintiffs is denied.

CLASS CERTIFICATION

Plaintiffs move for class certification under *Rule 23 of the Federal Rules of Civil Procedure*. "To certify a class, a district court must find that the plaintiffs satisfy all the requirements of *Rule 23(a)* and one of the subsections of *Rule 23(b)*." *Hale v. Emerson Elec. Co., 942 F.3d 401, 403 (8th Cir. 2019)*. The party seeking class certification "must affirmatively demonstrate his compliance with the Rule." *Stuart v. State Farm Fire & Cas. Co., 910 F.3d 371, 374 (8th Cir. 2018)* (quoting *Wal-Mart Stores, Inc. v. **[*980]** Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011))*.

Plaintiffs seek to certify a nationwide class of consumers who purchased Class Vehicles from October 4, 2010 to the present. In the alternative, they seek to certify six classes for residents of the states of California, Florida, Minnesota, **[**80]** Missouri, New York, and North Carolina who purchased Class Vehicles during differing windows of time. (*See generally* ECF No. 332.) For the reasons below, the Court finds that Plaintiffs do not meet their burden under *Rule 23*.

I. Standing

The Court first addresses Polaris's argument as to standing, because it is jurisdictional and therefore foundational. ***HN37***[] The jurisdiction of federal courts extends only to actual cases or controversies. *U.S. Const. art. III, § 2, cl.1*; *Neighborhood Transp. Network, Inc. v. Pena, 42 F.3d 1169, 1172 (8th Cir. 1994)*. The Eighth Circuit has held that under the case-or-controversy requirement, a "class must be defined 'in such a way that anyone within it would have standing.'" *Stuart, 910 F.3d at 377 (8th Cir. 2018)* (quoting *Avritt v. Reliastar Life Ins. Co, 615 F.3d 1023, 1034 (8th Cir. 2010))*. In other words, a "named plaintiff cannot represent a class of persons who lack the ability to bring a suit themselves." *Avritt, 615 F.3d at 1034*.

To understand the standing argument in this case, one must review the Eighth Circuit's rules applicable to cases involving "latent" defects. In cases where a physical defect is alleged, the Eighth Circuit has affirmed dismissal of class action warranty and consumer protection cases for failure to state a claim under the "manifest defect" doctrine. Under this doctrine, a plaintiff must establish that the product "exhibited the alleged defect"—that is, that the defect is **[**81]** not latent, but has manifested itself in the product. *O'Neil v. Simplicity, Inc., 574 F.3d 501, 503 (8th Cir. 2009)*. "It is well established that purchasers of an allegedly defective product have no legal recognizable claim where the alleged defect has not manifested itself in the product they own." *Briehl v. Gen. Motors Corp., 172 F.3d 623, 628 (8th Cir. 1999)*.

In *O'Neil*, the Eighth Circuit affirmed dismissal of a class action seeking overpayment damages because the defect (a malfunctioning drop-side crib) had not manifested. *574 F.3d at 503-04*. The Eighth Circuit called such suits "no-injury suits" and the classes that bring them "no-injury classes," citing, among other cases, its opinion in *Briehl*: "An overwhelming majority of courts have dismissed these unmanifested defect claims and rejected the idea that the Plaintiffs can sue manufacturers for speculative damage." *Briehl, 172 F.3d at 630*, *quoted in O'Neil, 574 F.3d at 505*.

Two years after *O'Neil*, the Eighth Circuit examined the manifest defect rule in the context of the *Avritt* standing analysis. In *In re Zurn Pex Plumbing Products Litigation*, the Eighth Circuit observed that "[i]n most cases the question whether a plaintiff has a cognizable injury sufficient to confer standing is closely bound up with the question of whether and how the law will grant him relief." *644 F.3d 604, 616 (8th Cir. 2011)* (cleaned up). The *Zurn* plaintiffs complained **[**82]** about leaky plumbing systems, and the defendant argued that the plaintiffs whose plumbing systems have not leaked (the "dry plaintiffs") had no standing and could not be represented by class members whose plumbing had leaked. The Eighth Circuit applied the *O'Neil* manifest defect rule to its standing analysis: "it 'is not enough' for [the] plaintiff 'to allege that a product line *contains a defect* or that a product is *at* ***[*981]*** *risk for manifesting this defect*; rather, the plaintiffs must allege that their product *actually exhibited* the alleged defect.'" *Id.* (quoting *O'Neil, 574 F.3d at 503* (emphasis added)); *see also* *Thunander v. Uponor Inc., 887 F. Supp. 2d 850, 864 (D. Minn. 2012)*. The court determined that the requirements for Article III standing were satisfied because the plaintiffs had adduced evidence that the defect in the pipes was "already manifest in all systems" because it would "afflict[] all of the fittings upon use, regardless of water conditions or installation practices." *Zurn, 644 F.3d at 616-17*.

Plaintiffs do not dispute that the manifest defect rule applies to Article III standing under *Zurn*; indeed, they argue that *Zurn* is the proper analogue to this case because they, too, have presented evidence that the design defect was manifest in all Class Vehicles. In contrast, Polaris likens **[**83]** this case to *O'Neil* and *Briehl*, among others, arguing that Plaintiffs have not brought forward proof that the alleged exhaust heat defect has manifested itself in all Class Vehicles.[21]

Against the landscape of this case law, Plaintiffs' evidence is insufficient to establish injury-in-fact for the class. This case is unlike *Zurn*, where the allegations and evidence did not merely establish pipe fittings that presented a "risk" of developing harm, which in that case was stress corrosion cracking in the pipes. *644 F.3d at 617*. Rather, the *Zurn* plaintiffs alleged that stress corrosion cracking was "already manifest in all systems," and brough forward expert testimony opining that the stress corrosion cracking would occur in the pipes "as soon as they [were] exposed to domestic water." *Id.*[22]

The Class Vehicles are far more like the cribs in *O'Neil* and the brakes in *Briehl*. Plaintiffs' experts have opined that many of the Class Vehicles generated temperatures that caused discomfort, burned riders, and melted parts of afflicted ATVs. But Plaintiffs have adduced no evidence of a common design that necessarily manifests itself in discomfort, burns, or melting. **[**84]**

Plaintiffs claim that their expert, Colin Jordan, has identified that the Class Vehicles have "a common design for thermal management." (*See* ECF No. 335 at 15.) They claim they have "amassed a wealth of evidence that the Class Vehicles have a common design defect of excessive heat that extends across all versions of all those models," in particular, evidence that a "hot exhaust manifold sits obscured beneath a thin plastic side cover, and the

---

[21] Following the *Zurn* rule, a court in this District recently rejected two claims against Polaris for allegedly defective ATVs, concluding that the plaintiffs lacked standing to assert their claims because they did "not allege, directly or by reasonable inference, that *all* of the vehicles that contain the defective engine *necessarily* overheat, catch fire, or otherwise malfunction." *In re Polaris Mktg., Sales Practices, & Prods. Liab. Litig., 364 F. Supp. 3d 976, 984 (D. Minn. 2019)* ("Polaris Mktg. I") (emphasis in original); *see generally* *In re Polaris Mktg., Sales Practices, & Prods. Liab. Litig., No. 18-CV-0939 (WMW/DTS), 2020 U.S. Dist. LEXIS 32822, 2020 WL 919259, at *1 (D. Minn. Feb. 26, 2020)* ("Polaris Mktg. II").

[22] Because, as *Zurn* notes, the standing issue is intertwined with an analysis on the merits, the manifest defect rule has also been analyzed under state law, as was the case in *Briehl* and *O'Neil*. Since the Eighth Circuit addresses this issue as one of constitutional standing, the Court does so as well. *See, e.g.,* *Penrod v. K&N Eng'g, Inc., No. 18-CV-02907 (ECT/LIB), 2020 U.S. Dist. LEXIS 8559, 2020 WL 264115, at *3 (D. Minn. Jan. 17, 2020)* ("The law is clear in the Eighth Circuit that a federal court lacks subject-matter jurisdiction over absent class members' defective-product claims if there is no allegation that the product manifested the defect.").

high [exhaust gas temperatures] and low clearance **[*982]** create melt risks to the ATV and burn risks to the rider." (*See id.* at 30.)[23]

A review of the record indicates that Plaintiffs paint with too broad a brush in their attempt to identify a design defect universal to all Class Vehicles. The Class Vehicles encompass ATVs with different body architectures and different heat management systems that pose different melting and burning risks. (*See generally* ECF No. 368 (filed under seal).) They include Sportsman 450s, 570s, 850s, and 1000s. These have four different engine sizes: 499 cubic centimeters, 567 cubic centimeters, 850 cubic centimeters, and 952 cubic centimeters, respectively. The Sportsman 450s and 570s have single cylinder engines and the Sportsman 850s **[**85]** and 1000s have dual cylinder engines. They also differ in engine orientation. The engines in the Sportsman 450s and 570s have an east-west orientation while the engines in the Sportsman 850s and 1000s have a north-south orientation. These differences result in differences in the ways the Class Vehicles route exhaust gases. The exhaust pipe in the Sportsman 450s and 570s routes exhaust gases from the engine toward the front and wraps around the front and side of the engine. The exhaust pipe in the Sportsman 850s and 1000s routes exhaust gases from the engine toward the side and back.

These differences appear to result in variations in how riders experienced problems with the heat emitted by Class Vehicles. For example, Polaris's riders complained most heavily that the Sportsman 570 blew hot on air on them, specifically, their right legs. (*See, e.g.*, ECF No. 340-26 ¶ 21(a).) In comparison, complaints about the Sportsman 850s and 1000s center around melting side panels. (*See* ECF No. 240-26 ¶ 21(b).) Indeed, Polaris has offered different fixes for heat problems associated with the Sportsman 450s and 570s than those associated with the Sportsman 850s and 1000s. For the Sportsman 450s and **[**86]** 570s, Polaris offered a right-hand side panel close-off kit to block heat from hitting riders' right ankles and calves. (*See* ECF No. 340-26 ¶ 9(b).) For the Sportsman 850s and 1000s, Polaris issued a recall and provided dealers with a recall kit. (*See* ECF No. 340-26 ¶ 9(c).) Polaris's polling data indicates that proportionally fewer customers accepted the close-off kit on the Sportsman 450s and 570s than the recall kit on the Sportsman 850s and 100s.

Plaintiffs' expert nonetheless contends that the Class Vehicles "had a [common] design problem, namely[,] the lack of a sufficient air gap and insufficient heat protection for machine, rider, and other critical components." (*See* ECF No. 340-26 ¶ 21.)[24] But the record does not indicate that, as a matter of design, low clearances across the Class Vehicles rendered them defective. For example, Polaris employee Robin Stroot, himself a Sportsman ATV owner, testified that while some Polaris **[*983]** employees reported that the side panels of their Sportsman 850s were melting, he had no such problems. (*See* ECF No. 340-10 at 95.) One of those employees, an engineer, determined that his exhaust pipe was touching the nylon side panel. (*See id.* at 97.) Stroot determined **[**87]** that his own Sportsman 850 had a gap between the pipe and the nylon. (*See id.*) And he testified that the model used at the time had a six and-a-half millimeter gap between the exhaust pipe and side panel. (*See id.*) Stroot testified that with the clearance between the exhaust pipe and the side panel on his vehicle, he never had an issue. (*See id.* at 240-41.) But he testified that Polaris is aiming to increase the gap to "make sure" that it is "covered for any kind of manufacturing tolerances" because six and-a-half- millimeters "doesn't suffice for manufacturing tolerance." (*See id.* at 241.) As evidence of consumer complaints bore out, this means that, as in *O'Neil*, some Sportsman ATVs will exhibit heat-related issues (discomfort, burns, melting), while others will not.

Thus, the allegations and the evidence establish that the vehicles are *at risk of* overheating and causing discomfort or injury. Eighth Circuit law is clear that this distinction is critical. *Briehl, 172 F.3d at 627*. Plaintiffs' inability to bring

---

[23] Plaintiffs presented a similar argument before Judge Schiltz in opposition to Polaris's motion to dismiss their amended complaint. Judge Schiltz rejected Polaris's argument that Plaintiffs lacked standing to represent class members who had purchased other Sportsman models or model years because Plaintiffs had "adequately pleaded standing by alleging that the entire Sportsman line shares the same design defect—the routing of high-temperature exhaust next to the rider's leg and under the rider's seat." (ECF No. 42 at 13.) This Court agrees that the Complaint on its face alleges a common design defect. But in response to Plaintiffs' motion for class certification, Polaris has presented evidence that the Class Vehicles differ significantly in their exhaust heat management—the issue at the very heart of Plaintiffs' case. As discussed further below, on this record the standing analysis therefore yields a different outcome.

[24] As noted above, the record indicates that mechanisms for heat management differ across the Class Vehicles.

forward evidence of a defect that manifested in the Class Vehicles dooms the class on standing grounds. *See, e.g., Penrod, 2020 U.S. Dist. LEXIS 8559, 2020 WL 264115, at *4* (dismissing plaintiffs' class action complaint on standing grounds because on its face the proposed class **[**88]** included purchasers of oil filters that never exhibited a defect); *Polaris Mktg. I, 364 F. Supp. 3d at 984*.

Plaintiffs argue that their case is different, because their case involves the theory of economic loss from customer dissatisfaction due to risk of overheating. According to Plaintiffs, the economic loss allegation is sufficient to confer standing. Eighth Circuit case law suggests that it is not. Economic loss was also alleged in *Briehl* and *O'Neil*, and under those cases and *Zurn*, there must be *some* defect manifested for the class to be dissatisfied. As noted above, Plaintiffs do not present evidence that all Class Vehicles contained a defect that actually manifested. In short, the theory Plaintiffs assert—that *all* Class Vehicles had a design defect causing "excessive heat" such that customers were overcharged for their Sportsman ATVs because the ATVs did not perform as expected— is not borne out by the record before the Court. Because class membership depends on Class Vehicle ownership, there are members of Plaintiffs' proposed class who fall outside of the group of those who experienced excessive heat issues. Those class members do not have standing, and the class cannot be certified. *See, e.g., Phelps v. Powers, 295 F.R.D. 349, 353 (S.D. Iowa 2013)* (concluding proposed **[**89]** class could not be certified because it was not defined to include only class members with Article III standing).

II. *Rule 23(b)(3)*:[25] Predominance

Even if the standing issue did not require the Court to deny class **[*984]** certification, Plaintiffs' proposed class cannot meet the requirements of *Rule 23(b)(3)*, which is the alleged vehicle by which they seek certification.[26] ***HN38***[] Under *Rule 23(b)(3)*, "a district court must find 'that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Stuart, 910 F.3d at 374* (quoting *Fed. R. Civ. P. 23(b)(3)*). "The 'predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation.'" *Id. at 374-75* (quoting *Amchem, 521 U.S. at 623*). It is satisfied "if 'the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues.'" *Id. at 375* (quoting *Tyson Foods, Inc., 136 S. Ct. at 1045*). "The superiority requirement asks whether the class action is the best available method for resolving the controversy." *Cullan & Cullan LLC v. M-Qube, Inc., No. 8:13CV172, 2016 U.S. Dist. LEXIS 132325, 2016 WL 5394684, at *6 (D. Neb. Sept. 27, 2016)*.

A. Proposed Nationwide Class

---

[25] Because the predominance requirement of *Rule 23(b)(3)* is more demanding than the commonality and typicality requirements of *Rule 23(a)*, and all four requirements of *Rule 23(a)* must be satisfied for a proposed class to be certified, the Court need not address *Rule 23(a)* to rule on the Plaintiffs' motion for class certification. *See Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* ("Even if *Rule 23(a)*'s commonality requirement may be satisfied by that shared experience, the predominance criterion is far more demanding."); *see, e.g., Avritt, 615 F.3d at 1029* ("Like the district court, we will assume that the Avritts could satisfy the prerequisites of *Rule 23(a)* and will focus our attention on their arguments that the class should be certified under *Rule 23(b)(2)* or *23(b)(3)*.")

[26] In the Order on Defendant's Motion to Dismiss, Judge Schiltz noted, "The Court tends to agree with those courts that have found that, in the context of a putative class action, the question whether a named plaintiff may represent class members who purchased products that differed in some respect from the product purchased by the named plaintiff is not an issue of standing, but rather an issue to be resolved at the class-certification stage." (ECF No. 42 at 12.) This Court, too, agrees that the challenge presented here—that of whether a named plaintiff may represent class members who purchased products different from the product purchased by the named plaintiff—is better suited for a predominance inquiry than a standing inquiry. The Court will therefore address both.

The Eighth Circuit has explained **[**90]** that "an individualized choice-of-law analysis must be applied to each plaintiff's claim in a class action." *St. Jude I, 425 F.3d at 1120*. The same three-part test applies to the choice-of-law analysis in the context of class certification. As set forth above, this Court has analyzed the consumer protection laws of each of the named Plaintiffs' states of residence and found outcome-determinative conflicts. And Plaintiffs acknowledge that the consumer protection laws of 19 other states conflict with the MCFA. (Pls' Class Cert. Br. at 33.) This Court has considered the constitutionality of applying the MCFA extraterritorially, as well as the five-factor test, and found that the MCFA should not be applied to the claims of nonresident Plaintiffs. And as the Eighth Circuit has noted, "'[s]tate consumer-protection laws vary considerably, and courts must respect these differences rather than apply one state's law to sales in other states with different rules." *St. Jude I, 425 F.3d at 1120* (quoting *In re Bridgestone/Firestone, Inc., 288 F.3d at 1018*). Thus, the Court cannot apply the MCFA to Plaintiffs' proposed nationwide class. And, as discussed in detail above, the Court has identified various outcome-determinative differences among Plaintiffs' states' consumer protection statutes. The Court **[**91]** concludes that due to these differences in state law, "individualized legal issues will substantially predominate over common legal issues in this litigation." *In re Nat'l Hockey League Players' Concussion Injury Litig., 327 F.R.D. 245, 266 (D. Minn. 2018)* (collecting cases). The Court would be required to apply a wide range of legal standards to adjudicate class members' claims. Because these individualized legal analyses would **[*985]** overshadow the common issues, the Court cannot certify a nationwide class under *Rule 23(b)(3)*. *See id.*

Even if the Court could apply the MCFA to Plaintiffs' proposed nationwide class, individualized evidence supporting elements of Plaintiffs' claims would predominate over common issues. As the Eighth Circuit held in *St. Jude II*, although individual plaintiffs may not be required to present direct proof of individual reliance under MCFA, defendants may "present evidence negating a plaintiff's direct or circumstantial showing of causation and reliance." *522 F.3d at 836*. It concluded that given the showing by St. Jude that it would "present evidence concerning the reliance or non-reliance of individual physicians and patients on representations made by St. Jude," it was clear that there would be plaintiff-by-plaintiff determinations and "common issues [would] not predominate the inquiry **[**92]** into St. Jude's liability." *Id. at 840*. On remand, the district court concluded that although the *St. Jude II* court primarily focused on the plaintiffs' MCFA misrepresentation claims, under its reasoning the plaintiffs also could not satisfy the *Rule 23* requirements with respect to their MCFA material omissions claims. *In re St. Jude Med. Inc. Silzone Hearts Prods. Liab. Litig., No. 01-CV-1396 (JRT/FLN), 2009 U.S. Dist. LEXIS 54286, 2009 WL 1789376, at *3-*5 (D. Minn. June 23, 2009)*. Like the defendant in *St. Jude II*, Polaris is prepared to present evidence to dispute the causal nexus between Polaris's actions and the alleged injury the class members suffered. Polaris's rebuttal opportunity requires plaintiff-by-plaintiff determinations of causation.

The Court is not persuaded by Plaintiffs' arguments to the contrary. Among other things, Plaintiffs claim that its evidence of an 8.8 percent price premium can establish the causal nexus required by the MCFA because "[t]he overcharge theory shows that everyone who bought overpaid, no matter what they saw or what they knew." (Pls' Class Cert Reply Br. at 13.) In other words, "the overcharge theory makes individual knowledge (like individual reliance) moot." (*Id.* at 14.) As the Court has noted above, the MCFA still requires a plaintiff to establish that the defendant's conduct had some impact on inducing the individual plaintiff's **[**93]** actions. What Plaintiffs request is for the expertdriven overcharge theory to supplant required showings of causation, injury *and* damages. No court considering the MCFA has allowed such an expansive use of this theory, and it is not appropriate in this case either.

For these reasons, Plaintiffs cannot satisfy the *Rule 23(b)(3)* predominance requirements with respect to their proposed nationwide class, and class certification will be denied.

B. Proposed Statewide Classes

HN39[] Each of proposed statewide classes must also satisfy the requirements of *Rule 23(b)(3)*.[27] *Stuart, 910 F.3d at 374*. Here, too, individualized issues as to injury and causation or reliance would predominate in the proposed California and North Carolina classes, in addition to their proposed Minnesota class. As explained above, individualized issues predominate for claims governed by Minnesota law. Because the UCL, CLRA, and NCDUTPA all require actual reliance, individualized issues would also predominate as to claims governed by these laws.

III. Superiority

HN40[] To determine whether a class action is the best available method to **[*986]** resolve a dispute, courts examine whether a class action would be manageable. *In re Baycol Prods. Litig., 218 F.R.D. at 209*. One of the Court's considerations is whether variations in state law render **[**94]** class action unmanageable. *See, e.g., id. at 209-10*; *Bridgestone/Firestone, 288 F.3d at 1018* ("Because these claims must be adjudicated under the law of so many jurisdictions, a single nationwide class is not manageable.").

Nationwide class treatment would not be a superior method of adjudication here. As explained above, the Court cannot apply the MCFA extraterritorially to Plaintiffs' proposed nationwide class, and class treatment is not appropriate under the laws of so many different states. *Bridgestone/Firestone, 288 F.3d at 1018*.

That leaves the only logical alternative to be six statewide classes. Proceeding in such a manner would present a significant risk of jury confusion and would create enormous challenges to trial management. Individual issues would dominate the trial, including the different Sportsman ATV models and mechanisms for routing heat exhaust, the issue of causation, and individualized inquiries into each Plaintiff's knowledge and experience with the Sportsman ATV, where necessary under applicable state law. The management of such a trial is not superior to more individualized methods of adjudication. Thus, the Court declines to certify subclasses as well. *See Bridgestone/Firestone, 288 F.3d at 1018-19* (noting the variability in proof for each claim and concluding that "this litigation is not **[**95]** manageable as a class action even on a statewide basis"); *In re Tetracycline Cases, 107 F.R.D. 719, 733 (W.D. Mo. 1985)* (declining to certify subclasses where keeping track of each subclass would likely confuse the jury and complicate structuring and managing trial).

CONCLUSION

Based on the foregoing and on all the files, records, and proceedings herein, IT IS HEREBY ORDERED THAT:

1. Polaris's Motion to Exclude Expert Testimony (ECF No. 371) is DENIED;
2. Polaris's Motion for Summary Judgment (ECF No. 356) is DENIED; and
3. Plaintiffs' Motion to Certify Class (ECF No. 332) is DENIED.

Dated: March 31, 2020

BY THE COURT:

/s/ Nancy E. Brasel

Nancy E. Brasel

United States District Judge

End of Document

---

[27] As to statewide classes, because of the Court's determination on predominance, the Court again does not reach the *Rule 23(a)* factors.

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judicial Officers > Masters

HN1[] **Entitlement as Matter of Law, Appropriateness**

A de novo review requires the district court to give fresh consideration to those issues to which specific objections have been made and make a decision based on an independent review of the evidence and arguments without giving any presumptive weight to the special master's conclusion. On a motion for summary judgment, all material facts and all inferences are construed in the light most favorable to the non-moving party. When a Special Master is appointed in a case and prepares a report on summary judgment, the court reviews the Special Master's legal conclusions de novo and accepts his findings of fact unless they are clearly incorrect. *Fed. R. Civ. P. 53(f)(3)*. The court may accept, reject or modify the Special Master's recommended decision.

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

HN2[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment is standardized across cases of various topics, even in antitrust cases that require a nuanced, fact-specific analysis. Summary judgment is proper where there is no dispute as to a material fact that entitles the movant to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*.

Antitrust & Trade Law > Procedural Matters

HN3[] **Antitrust & Trade Law, Procedural Matters**

Antitrust analysis must sensitively recognize and reflect the distinctive economic and legal setting of the regulated industry to which it applies.

Antitrust & Trade Law > Procedural Matters

HN4[] **Antitrust & Trade Law, Procedural Matters**

Ambiguous evidence is defined as evidence of conduct as consistent with permissible competition as with illegal conspiracy. Ambiguous evidence alone does not support an inference of an antitrust conspiracy because courts should not infer illegal conduct when such inferences are implausible, because the effect of such practices is often to deter procompetitive conduct.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN5[] **Antitrust & Trade Law, Procedural Matters**

An antitrust claim which makes no economic sense can on that ground be dismissed on summary judgment. To put it bluntly, you cannot obtain damages without proving injury.

Antitrust & Trade Law > Procedural Matters

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] **Antitrust & Trade Law, Procedural Matters**

An antitrust injury is of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. Courts have, at times, analyzed antitrust injury as an element of antitrust standing, however, antitrust injury can and should be analyzed outside of standing as it is a necessary element to prove an antitrust claim.

Antitrust & Trade Law > Procedural Matters

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] **Antitrust & Trade Law, Procedural Matters**

To establish causation, a plaintiff must show that the anticompetitive conduct claimed was the cause in fact of the injury, or that but for the violation, the injury would not have occurred. Antitrust injury must reflect the anticompetitive effect of either the violation or of anticompetitive acts made possible by the violation. Antitrust injury requires not only that the injury is of the type intended to be protected by the antitrust laws, but that the violation was the cause-in-fact of the injury: that but for the violation, the injury would not have occurred. To prevail on an antitrust claim, a plaintiff must establish that the injuries alleged would not have occurred but for the defendant's antitrust violation adding necessity to the materiality requirement of our antitrust causation analysis.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Absence of Essential Element

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN8[] **Antitrust & Trade Law, Procedural Matters**

A plaintiff must be able to distinguish between financial loss from the lawful activities of a competitor from loss caused by the unlawful acts of the defendant. If the alleged antitrust violation is too removed from an injury with other intervening factors that could have led to the claimed injury, courts have granted motions for summary judgment for the moving party. At the summary judgment stage, if there is no causation, then that is the end of the case as there can be no genuine issue as to any material fact, since a complete failure of proof concerning an essential element of the nonmoving party's case necessarily renders all other facts immaterial.

Antitrust & Trade Law > Procedural Matters

HN9[] **Antitrust & Trade Law, Procedural Matters**

If lawful competition fully accounts for a plaintiff's claimed injury, the law will deny any injury because the plaintiff's situation would be the same with or without the challenged restraint.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN10[] **Antitrust & Trade Law, Procedural Matters**

To create a triable issue in terms of injury for summary judgment, there must be some evidence to show that defendant's conduct had the effect on the market of raising prices or decreasing output.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN11[] **Antitrust & Trade Law, Procedural Matters**

For causation, a plaintiff must establish that but for the antitrust violation, their injury would not have occurred. Causation, like injury, is integral to a party surviving summary judgment.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN12[] **Antitrust & Trade Law, Procedural Matters**

In determining whether a party can survive summary judgment on the issue of causation, the plaintiff must establish the but for test, meaning but for the alleged antitrust violation, the plaintiff's injury would not have occurred.

Opinion

MEMORANDUM AND ORDER

BEATTY, Magistrate Judge:

This matter is currently before the Court on the Report and Recommendation (Docs. 402 (sealed); 421 (public redacted))[1] of Special Master Stephen C. Williams (*see* Doc. 391 appointing the Special Master). The Report and

---

[1] The Court found that the Report and Recommendation contained certain information that qualified as confidential proprietary information or trade secrets under Seventh Circuit precedent (*See* Doc. 418); *see also* *Learning Curve Toys, Inc. v. PlayWood Toys, Inc., 342 F.3d 714, 722 (7th Cir. 2003)*; *Ball Mem'l Hosp., Inc. v. Mut. Hosp. Ins., Inc., 784 F.2d 1325 (7th Cir. 1986)*. The

Recommendation[2] recommends the Court grant Defendant Southern Illinois Healthcare's Motion for Summary Judgment on all of Plaintiff Marion Healthcare, LLC's claims and dismiss this case with prejudice (Doc. 421 at 39). Plaintiff Marion Healthcare, LLC ("MHC") filed timely objections (Docs. 424 (sealed); 446 (public redacted))[3] on December 5, 2019 to which Defendant Southern Illinois Healthcare ("SIH") filed a timely response on December 23, 2019 (Doc. 432). SIH also filed an objection to the Special Master's Report and Recommendation (Doc. 426) to which MHC responded (Docs. 427 (sealed); 448 (public redacted)).[4] The parties fully briefed **[*3]** motions and responses to SIH's Motion for Summary Judgment (Docs. 334 (sealed), 333 (public redacted); 337 (public redacted); 353 (sealed), 352 (public redacted))[5], the Special Master's Report (Doc. 421), and the parties' objections and responses to the Special Master's Reports (Docs. 446; 426 (public redacted); 427 (sealed), 448 (public redacted); and 432 (public redacted))[6] are presently before the Court and sufficiently apprise the Court of the facts and arguments of the case.

Because timely objections have been lodged to the Special Master's Recommendations, the Court must undertake a *de novo* review of the Report and Recommendation. *See* *Fed. R. Civ. P. 53(f)*. Having carefully considered both the evidence and the parties' arguments and for the reasons stated below, the Court **ADOPTS** in part and **DECLINES TO ADOPT** in part the Report and Recommendation. Specifically, the Court adopts the Special Master's recommendation that: (1) summary judgment in favor of SIH is warranted because MHC cannot demonstrate that SIH's exclusionary contracts caused an antitrust injury; (2) MHC cannot prove causation or a link between any of SIH's conduct and its own injuries; and (3) **[*4]** MHC's claims are not tied to the damages theory pled in the Third Amended Complaint. The undersigned **DECLINES TO ADOPT** the Special Master's Report and Recommendation that the anti-trust theories advanced by MHC are sound as they are not dispositive of the decision here. Accordingly, SIH's Motion for Summary Judgment (Docs. 313 (public redacted), 314 (sealed), and 439 (final public redacted))[7] will be granted consistent with this Order.

The Court need not make a determination as to the other findings related to SIH's alleged *Sherman Act* 1 and 2 violations outlined in Special Master Williams' Report and Recommendation because without injury and causation, an antitrust claim cannot survive the summary judgment stage of litigation; therefore, the Court is declining to adopt the portions of the Report and Recommendation on the definition of the market, including its analysis on exclusive dealing, substantial foreclosure, tying, and coercion (Doc. 421 at 12-29). Accordingly, the outstanding issues in SIH's Motion for Summary Judgment related to the market and whether MHC was foreclosed or excluded from it; whether SIH engaged in tying or exclusive contracts with payers illegally; and **[*5]** whether SIH had a negative impact on the market as a whole are **MOOT** as they are unnecessary for the Court's decision.

---

record contains both a sealed version (Doc. 402) and a public redacted version (Doc. 421). Throughout the ensuing Order, in the interest of brevity, the Court will simply cite to the public redacted version of this document rather than both, each time.

[2] Prior to docketing his formal Report and Recommendation, pursuant to the terms of appointment, the Special Master served a draft Report and Recommendation on the parties and allowed informal objections and proposed changes (See Doc. 391). The Special Master Williams refers to this informal objection process in his Report and Recommendation in footnotes 9, 11, 12, 13, 15, and 17. *See* Doc. 421 at 20, 28, 30, 31, 34, and 35.

[3] On February 4, 2020, the Court provided a detailed analysis on the record regarding what information in the parties motions and exhibits qualified as confidential or proprietary information or trade secrets and could be appropriately redacted under Seventh Circuit precedent (Doc. 435); (*see also* Doc. 437 (transcript of Feb. 4, 2020 hearing)); *see also* *Learning Curve Toys, Inc., 342 F.3d 714*; *Ball Mem'l Hosp., Inc., 784 F.2d 1325*. The Court directed the parties to file final public redacted versions of its pleadings and exhibits in accord with the Court's rulings (Docs. 435, 437 (transcript), and 442). Throughout the ensuing Order, the Court will cite to the public redacted version of the pleadings and briefs.

[7] *Supra* note 3.

PROCEDURAL BACKGROUND

MHC filed its original Complaint on August 13, 2012 (Doc. 2). MHC is an ambulatory surgery center ("ASC") that performs outpatient surgical services (Doc. 421 at 2). The operative Amended Complaint was filed on February 17, 2016 (Doc. 127), in which MHC contends that SIH, a not-for-profit health care system in Southern Illinois that owns three hospitals, violated *Sections 1* and *2 of the Sherman Act* (and corresponding Illinois State Statutes) by engaging in exclusive contracts with health insurance providers, or "payers,"[8] like Blue Cross Blue Shield ("BCBS") and HealthLink. MHC claims that these exclusive contracts are illegal and violate *Section 1* of the Sherman Act. In addition, MHC claims these contracts enabled SIH to maintain and extend its monopoly power in the Southern Illinois market unlawfully in violation of *Section 2* of the Sherman Act (Doc. 127 at 4). SIH filed its Answer to the Third Amended Complaint on March 7, 2016 (Doc. 136), denying MHC's claims related to exclusive contracts and other alleged antitrust violations. The parties engaged in an extensive discovery **[*6]** process, with both parties (and interested parties) advocating for various protective orders to file certain documents related to competitively-sensitive information, including rate and reimbursement information, under seal (*See, e.g.*, Docs. 37, 48 (granting protective orders). Additionally, the Court conducted two hearings with the parties and non-parties, where the Court considered, analyzed and ruled on what information could be redacted as confidential, proprietary information and/or trade secrets (*See* Docs. 418, 435, and 437 (transcript of Feb. 4, 2020 hearing)). In addition, the Court held status conferences to ensure the case was moving forward.

On October 13, 2017, SIH filed a Motion for Summary Judgment (Doc. 439), arguing it had not engaged in illegal, anticompetitive conduct and that MHC cannot establish SIH's actions caused an injury to the market or damages to MHC. In its Motion for Summary Judgment, SIH relied heavily on a Seventh Circuit case, *Methodist Health Services Corp. v. OSF Healthcare System, 859 F.3d 408 (7th Cir. 2017)* ("*Methodist II")*, to support its argument that MHC cannot survive summary judgment. MHC filed its response on December 15, 2017 (Doc. 337) arguing that *Methodist II* is distinguishable from the present case and that SIH's **[*7]** exclusive contracts not only hurt MHC, but also the Southern Illinois healthcare market (Doc. 337 at 23, 26-28).

At that same time, SIH filed three Motions *in Limine* to Exclude John R. Bowblis's Testimony (Doc. 311), Dennis Knobloch's Testimony (Doc. 309), and John Meindl's Testimony (Doc. 307), all three of which will be addressed in separate Orders.[9] MHC filed its Response to these Motions *in Limine* on November 30, 2017 (Docs. 325 and 326; 328 (sealed) and 327 (public redacted)).[10] SIH filed its Reply to MHC's Response to the Motions in Limine on December 22, 2017 (Docs. 338 (public redacted) and 339 (sealed); 340 (public redacted) and 341 (sealed); and 342 (public redacted) and 343 (sealed)).[11] The Court responded by setting these matters for hearing on April 10, 2018 with discovery disputes lasting throughout the end of that year.

In January 2019, this case was assigned to the undersigned following the departure of Judge Williams from the bench. A status conference was held on February 13, 2019, at which time the parties discussed the appointment of a Special Master to review the record and issue a Report and Recommendation on Motions to Exclude the Testimony of John Bowblis **[*8]** (Docs. 400 (sealed); 420 (public redacted))[12] and John Meindl and Dennis

---

[8] *See* Doc. 421 at 3; For a full accounting of the uncontested facts, *see* Doc 421 at 2-11.

[9] Today, the Court is entering three Orders (including this one) on three separate Reports and Recommendations prepared by the Special Master on certain motions filed by SIH. Each of SIH's motions and the accompanying Report and Recommendation warrants its own separate Order (*See* Docs. 451 (Memorandum and Order on Motion in Limine as to John Bowblis); 452 (Memorandum and Order on the Motion in Limine as to John Meindl and Dennis Knobloch)). Nevertheless, the analysis of the issues contained in both this Order and the other two entered by the Court today is intertwined and all of the Orders must be viewed in tandem.

[10] *Supra* note 3.

[11] *Id.*

Knobloch (Doc. 401), and the Motion for Summary Judgment (Doc. 421). Both Plaintiff and Defendant were in favor of appointing former Judge Williams (now Mr. Williams) as Special Master because of his unique familiarity with the case, which was made official on February 19, 2019 (Doc. 391). As Special Master Williams reviewed the record, both MHC and SIH were afforded the opportunity to submit informal objections and comments to him before he finalized his Report and Recommendation on each motion referred to him as Special Master.

CONCLUSIONS OF THE REPORT AND RECOMMENDATION

In his Report and Recommendation on the Motion for Summary Judgment, Special Master Williams found that MHC was missing a crucial element of proof in its case. MHC could not show that SIH's conduct caused an antitrust injury to the general market or MHC itself; therefore, he recommended that the Court grant the Defendant's Motion for Summary Judgment (Doc. 421 at 2).

After outlining the uncontested facts in this case, Special Master Williams analyzed each of MHC's Sherman Act *§§ 1* and *2* antitrust claims as to whether the parties presented evidence **[*9]** to support triable issues for the necessary elements, including exclusive dealing, monopolization, causation, and injury. To survive summary judgment on any of its claims, MHC must show that SIH's conduct caused an antitrust injury, defined as an injury "on the market" of raising prices or decreasing output, generally (Doc. 421 at 29). *See also* *Stamatakis Indus. v. King, 965 F.2d 469, 471 (7th Cir. 1992)*; *Serfecz v. JewelFood Stores, 67 F.3d 591, 597 (7th Cir. 1995)*; *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 394 (7th Cir. 1984)*.

Special Master Williams found MHC's theories of liability related to tying, substantial foreclosure, and coercion to be sound;[13] however, whether MHC could survive summary judgment would be based on whether it could link SIH's actions to these theories of liability. Special Master Williams found that MHC "offered insubstantial proof to create a triable issue on whether SIH's exclusionary contracts caused an antitrust injury" (Doc. 421 at 29, 33). MHC fell short in demonstrating that SIH's conduct and use of exclusive contracts with payers led to an actual injury to MHC or an injury on the market in the form of "raising prices or decreasing output." (*Id.* at 29).[14]

Special Master Williams could not find any evidence in the record that patients were actually denied access to care. In other words, there is no evidence that patients in the market **[*10]** were injured by SIH's alleged illegal actions. MHC argued that "decreased outpatient surgery services mean[s] decreased choice for patients in the types of providers." (*Id.* at 30; Doc. 337 at 48). This suppressed patient choice, MHC argued, is enough to show an antitrust injury; however, Special Master Williams emphasized that "***antitrust law*** does not require the preservation of maximum choice in providers. The law protects access to care." (Doc. 421 at 31). *See also* *Nelson v. Monroe Reg. Med. Ctr., 925 F.2d 1555, 1564 (7th Cir. 1991)*. With no evidence in the record showing a disruption in access to care, MHC's arguments for causation lacked proof.

Even so, MHC continued, arguing injury to MHC itself in the form of an overall decrease in the volume of patients as the result of SIH's alleged illegal contracts and monopoly power in the Southern Illinois healthcare market. MHC argued that SIH created a monopoly in the area by engaging in exclusive contracts with payers that, essentially,

---

[12] *Supra* note 1.

[13] Special Master Williams noted there is "enough evidence in the record to create a triable issue of whether MHC was substantially foreclosed from the commercially insured outpatient surgical market." (Doc. 421 at 24; *see also* Doc. 421 at 26, 28-29).

[14] More specifically, Special Master Williams highlights that MHC's main argument is that the exclusive contracts SIH entered into with payers created higher rates for payers in the Southern Illinois market than in other markets throughout the state (Doc 421 at 29). But the Special Master found that the record does not clearly show the time period these numbers come from, so the link between the higher rates and SIH's exclusive contracts is not clear enough to create a triable issue to survive summary judgment. MHC cannot effectively argue that one can infer that SIH's actions caused market price increases (Doc. 421 at 29-30). Similarly, the Special Master notes there is no evidence in the record to show an actual injury to MHC itself.

locked MHC out of the patient market since MHC was not "in-network" with these payers. MHC argued that patients were corralled into seeking care at in-network hospitals and surgery centers simply because of the in-network status, even though they are more expensive than MHC. This **[*11]** led to a decrease in MHC patient volume and an increase in the amount patients paid for surgeries throughout the Southern Illinois market (Doc. 421 at 31).[15] Special Master Williams agreed MHC put forth substantial proof that insured "out-of-network" MHC patients chose to have surgery at regional hospitals at an increasing rate over time; however, he did not find evidence in the record to link this phenomenon to SIH's alleged illegal activity (*Id.* at 29).

In examining whether MHC was forced to be an out-of-network provider because of SIH's exclusive contracts with payers and alleged monopoly power, Special Master Williams sifted through extensive records of evidence, but still could not find a clear connection that SIH's relationship with payers in the region caused MHC's status as an out-of-network surgical facility. In fact, Special Master Williams found the opposite—that MHC had not become an in-network provider because of its own business strategy. MHC feared it would not have the capacity to treat the influx of patients that would result from going in-network with payers, detailed in its board minutes (*Id.* at 35; Doc. 439 at 17-22, 26). Without evidence of a clear link, Special Master Williams could **[*12]** not draw a reasonable inference that MHC's claims and alleged harm were caused by SIH's alleged illegal activity (Doc. 421 at 12). *Omnicare, Inc., v. UnitedHealth Grp., 629 F.3d 697, 704 (7th Cir. 2011)*. Put more simply, MHC failed to properly demonstrate causation or injury, two central antitrust elements.

Special Master Williams recommended that this Court grant Defendant's Motion for Summary Judgment and dismiss this case with prejudice on the basis of causation and injury, two crucial antitrust elements, because "while the theory is sound, the proof is not in the record." (Doc. 421 at 33-34, 37-38).

DISCUSSION

Because timely objections were filed, the Court must undertake a *de novo* review of the Report and Recommendation. *28 U.S.C. § 636(b)(1)(B)*,*(C)*; *Fed. R. Civ. P. 72(b)*; *SDILLR 73.1(b)*; *Harper v. City of Chicago Heights, 824 F. Supp. 786, 788 (N.D. Ill. 1993)*; *see also, Govas v. Chalmers, 965 F.2d 298, 301 (7th Cir. 1992)*. ***HN1***[] A *de novo* review requires the district court to "give fresh consideration to those issues to which specific objections have been made" and make a decision "based on an independent review of the evidence and arguments without giving any presumptive weight to the [special master's] conclusion." *Harper, 824 F. Supp. at 788* (citation omitted); *Mendez v. Republic Bank, 725 F.3d 651, 661 (7th Cir. 2013)*. On a motion for summary judgment, all material facts and all inferences are construed in the light most favorable to the non-moving party. *See Serfecz, 67 F.3d at 596*. When a Special Master is appointed in a case **[*13]** and prepares a report on summary judgment, the Court reviews the Special Master's legal conclusions *de novo* and accepts his findings of fact unless they are clearly incorrect. *Fed. R. Civ. P. 53(f)(3)*; *Cook v. Niedert, 142 F.3d 1004, 1010 (7th Cir.1998)*. The Court "may accept, reject or modify the [Special Master's] recommended decision." *Harper, 824 F. Supp. at 788*.

The Court has reviewed all materials, evidence, and pleadings before the Court in this matter, including both parties' objections to the Special Master's Report and Recommendation as well as the Report and Recommendation itself. Special Master Williams meticulously combed through voluminous records to determine the uncontested facts. Special Master Williams also lived with this case for many years, acting as the presiding judge starting in 2016 (*see* Doc. 123) until his departure from the bench and then as the appointed Special Master. Ultimately, both parties had the opportunity to object to the Special Master's factual findings and neither did so. The Court **ADOPTS** the Special Master's findings of fact as they are not "clearly incorrect." Indeed, the Special Master's findings of fact are a thorough and detailed recitation of the relevant facts necessary for resolving the instant

---

[15] MHC argues SIH's exclusive contracts "forced [patients to] obtain outpatient surgeries at hospitals instead of less expensive ASCs (such as MHC in particular)." (Doc 421 at 33).

summary judgment motion and this Order will **[*14]** be in accordance with those findings of fact.[16] *Fed. R. Civ. P. 53(f)(3)*; *Cook, 142 F.3d at 1010*.

Additionally, the Court **ADOPTS** the Report and Recommendation's analysis on the dispositive issues of antitrust injury, causation, and damages, and the Special Master's recommendation that summary judgment in favor of SIH is warranted. MHC's objections are therefore **OVERRULED** in part and **MOOT** in part insofar as they relate to the issues the Court declines to adopt. The Court **DECLINES TO ADOPT** the Report and Recommendation with respect to the recommendation that there are triable issues on substantial foreclosure and tying.[17] Whether these theories are sound or not does not change or have any ultimate impact on the Court's analysis on the dispositive issues of injury, causation, and damages and, therefore, the Court need not address them. Although SIH has lodged objections to the Special Master's recommendation that MHC's theories are sound, SIH's objections are deemed **MOOT** since the Court is declining to adopt this section of the Report and Recommendation. SIH's Motion for Summary Judgment will therefore be **GRANTED**, consistent with this Memorandum and Order.

A. Plaintiff's Objections

MHC objects to several portions of the Special Master's **[*15]** Report and Recommendation on the Motion for Summary Judgment. First, MHC argues that Special Master Williams did not utilize the correct legal standard to determine summary judgment in an antitrust case and that there is "a more sophisticated standard for antitrust claims" he should have employed (Doc. 446 at 1-2). Second, MHC argues the Report and Recommendation "improperly conflates [a]ntitrust injury with [c]ausation." (*Id.* at 1). Third, MHC argues that Special Master Williams found that MHC failed to present enough evidence for causation *sua sponte* as SIH did not address causation in its Motion for Summary Judgment or subsequent briefs. Fourth, MHC argues the Report and Recommendation relies on incorrect evidence to conclude that MHC cannot show an antitrust injury, causation, and damages. Fifth, MHC argues that the Report and Recommendation incorrectly held that Dr. Bowblis's calculations for damages were not reliable. And sixth, MHC argues that the Report and Recommendation incorrectly finds that the monopolization claims fail because there was not a separate analysis of damages apart from the analysis related to tying and exclusive dealing.

As the Court is granting Defendant's Motion **[*16]** for Summary Judgment and adopting the Report and Recommendation as to the dispositive issues of causation, injury and damages (and declining to adopt the portions describing the relevant market), the Court will address objections below relevant to its analysis and related to the antitrust elements of causation, injury, and damages (as far as damages are relevant to and support this Court's analysis of causation and injury).[18]

1. Plaintiff MHC's Objection to the Summary Judgment Standard

---

[16] As noted, neither party lodged a specific objection to the findings of fact made by Special Master Williams and the Court accordingly adopts the facts as stated herein. Even if a party had objected to the Special Master's factual findings, the Report and Recommendation contains a careful and meticulous factual background supported by the record and is not "clearly incorrect." In fact, the Special Master did a commendable job in his Report and Recommendation, distilling down and synthesizing the relevant facts in this highly complex and long running case.

[17] The relevant portions of the Report and Recommendation this Court is analyzing for purposes of its decision are the sections on antitrust injury, causation, and damages (Doc. 421 at 29-40).

[18] Special Master Williams finds in the Report and Recommendation that MHC's damages theory is not tied to its claims, and MHC's expert does not make a reliable damages estimate (Doc. 421 at 37-38). MHC objects to this portion of the Report and Recommendation, arguing that an estimation is the only way to assess damages in the current case and its expert, Dr. Bowblis, made reasonable and reliable damages calculations (Doc. 446 at 17-20). The Court addresses these arguments in its separate Order on the Motion *In Limine* on the Testimony of Dr. Bowblis (Doc. 451).

MHC asserts that Special Master Williams uses an incorrect summary judgment standard in the Report and Recommendation thereby holding MHC "to a higher standard," and acting "as a trier of fact." (Doc. 446 at 4). MHC argues that the Report and Recommendation should not have included the "normal" standard for summary judgment. According to MHC, it should have employed the "more sophisticated standard for antitrust claims" as outlined by the Supreme Court and Seventh Circuit case law, specifically two cases, *Eastman Kodak v. Image Technical Services, Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("*Kodak")* and *JTC Petroleum Co., v. Piasa Motor Fuels, Inc., 190 F.3d 775 (7th Cir. 1999)* ("*JTC*"). But MHC is incorrect that these two cases elucidate a separate summary judgment standard and that this "more sophisticated standard should" be applied to the case at **[*17]** hand.

HN2[] Summary judgment is standardized across cases of various topics, even in antitrust cases that require a nuanced, fact-specific analysis.[19] Special Master Williams highlights in the Report and Recommendation that "summary judgment is proper where there is no dispute as to a material fact that entitles the movant to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

The *Matshushita* standard, as SIH correctly notes, is regularly cited and employed by the Seventh Circuit as the standard for summary judgment in antitrust cases (Doc. 432 at 4) (citing *Kleen Prods. LLC v. Georgia-Pac. LLC, 910 F.3d 927, 941-42 (7th Cir. 2018)*; *In re Dairy Farmers of Am., Inc., 801 F.3d 758, 763 (7th Cir. 2015)*; *Omnicare, 629 F.3d at 720*; *United Rentals Highway Techs., Inc. v. Ind. Constructors, Inc., 518 F.3d 526, 532 (7th Cir. 2008)*; *Miles Distribs., Inc. v. Specialty Const. Brands, Inc., 476 F.3d 442, 450 (7th Cir. 2007))*. Indeed, the *Matshushita* standard that MHC seeks to avoid parrots the language of *Rule 56(a)*. The *Matsushita* Court specifically highlights the importance of causation and injury in the summary judgment phase in antitrust cases, even when there is ambiguous evidence. ***HN4***[] Ambiguous evidence is defined as evidence of "conduct as consistent with permissible competition as with illegal conspiracy." *Matsushita, 475 U.S. at 586, 588*, *citing Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Ambiguous evidence alone does not support an inference of an antitrust conspiracy because the *Matsushita* Court stresses courts should not infer illegal conduct "when such inferences are implausible, because the effect **[*18]** of such practices is often to deter procompetitive conduct." *Matsushita, 475 U.S. at 593*. *See also, Monsanto Comp., 465 U.S. at 762-764*.

In its objection, MHC argues that a more appropriate standard is outlined by two cases, *JTC* and *Kodak*. MHC argues that *Kodak* states the defendant "bears a substantial burden" and must demonstrate that an inference of unlawful conduct is "unreasonable." MHC further contends that at the summary judgment stage, the balance should only tip in favor of granting summary judgment when the challenged conduct appears always or almost always to enhance competition (Doc. 337 at 1).

As Special Master Williams correctly highlights, MHC is mistaken that *Kodak* outlines a separate, special standard for summary judgment in antitrust cases. A careful examination of *Kodak* reveals that it simply employs the normal summary judgment in the context of the facts of that case—*i.e.* all reasonable inferences are drawn in favor of the non-moving party (Doc. 421 at 12). *See generally Kodak, 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265*.

Similarly, MHC argues that *JTC* outlines a separate summary judgment standard where the Special Master should have asked whether a rational jury, "construing the evidence before it as favorably as the record permits," could find in favor of the plaintiff (Doc. **[*19]** 337 at 2). MHC argues *JTC* provides guidance as to how a court should weigh evidence at the summary judgment stage and that when there is conflicting evidence, the court should not draw

---

[19] ***HN3***[] "[A]ntitrust analysis must sensitively recognize and reflect the distinctive economic and legal setting of the regulated industry to which it applies." *Concord v. Boston Edison Co., 915 F.2d 17, 22 (C.A.1 1990)* (internal quotation marks omitted). SIH argued in its Motion for Summary Judgment that one Seventh Circuit Case, *Methodist II*, is analogous here. As Special Master Williams recommended, SIH's arguments supported by *Methodist II* are compelling because the facts of *Methodist II* and our present case are so similar. This Court's analysis demonstrates that *Methodist II* is highly instructive.

conclusions; rather, the court should examine the evidence to determine if it is "sufficiently plausible." If it is, then the party has survived summary judgment.

Even within the parameters of *JTC*, MHC's arguments fail because *JTC* uses the *Matsushita* standard. In fact, the *Matsushita* standard in the context of the *JTC* facts provides the Court with helpful language for the present matter. *JTC* emphasizes the importance of demonstrating an injury at the summary judgment stage in order to survive summary judgment because ***HN5***[] "an antitrust claim which makes no economic sense can on that ground be dismissed on summary judgment." *JTC, 190 F.3d at 778* ("To put it bluntly, you cannot obtain damages without proving injury."); *see also* *Matsushita, 475 U.S. at 586*. MHC is mistaken—*Kodak* and *JTC* do not hold that there are varying standards for summary judgment; rather, these cases show the parameters of the summary judgment standard applied to cases with varying facts.

At the heart of MHC's case is the inquiry of whether SIH's exclusive contracts with payers caused **[*20]** damages to MHC and the market. MHC argues that SIH's exclusive contracts with payers are evidence of illegal antitrust activity intrinsically; however, the Special Master correctly highlights that exclusive contracts are not, alone, *per se* illegal (Doc. 421 at 12).[20] Exclusive contracts, as pled in this case, are an example of ambiguous evidence (*i.e.*, evidence that could be "consistent with permissible competition as with illegal conspiracy."). *Matsushita, 475 U.S. at 586, 588*. MHC fails at this summary judgment stage because there is insufficient evidence in the record (viewing all reasonable inferences in favor of MHC) to demonstrate the key elements of its case. This Court would have to engage in "'pure speculation'—to find sufficient evidence of antitrust injury, causation, or damages in this case." (*See* Docs. 432 at 3; 421 at 37). These issues of proof will be addressed in the forthcoming sections of this Order;[21] however, it is clear, from the breadth of antitrust case law, the summary judgment standard utilized by Special Master Williams in his Report and Recommendation, and outlined in *Matsushita* as well as numerous other antitrust cases, is correct and applicable here.

2. The Antitrust Elements of Causation [*21] and Injury and Plaintiff's Objections

Plaintiff MHC objects to the Report and Recommendation in three areas related to injury and causation. MHC's first main objection is that Special Master Williams conflated antitrust injury and causation in his Report and Recommendation. In the next two objections related to causation and injury, MHC argues that Special Master Williams relied on incorrect evidence to come to his conclusions on antitrust injury and then addressed issues of causation *sua sponte*, not relying on arguments or evidence introduced in the record by the parties. MHC is mistaken—Special Master Williams clearly outlines the evidence he relies on to reach his conclusions and uses correct legal standards to come to those conclusions.

a. MHC Argues Special Master Williams Conflated Antitrust Injury and Causation

MHC's first objection is that Special Master Williams improperly conflated injury and causation in his reasoning. MHC argues there is a "substantial record of evidence—from which a jury could reasonably conclude—that the injury it alleges resulted directly from the exclusive contracts; but injury-in-fact—whether the exclusive caused the alleged injury—is a question of causation." **[*22]** (Doc. 446 at 4-5). MHC further argues the Report and Recommendation engages in a "hypothetical, assuming away the violation or ignoring a causal link between the violation and the harm and positing other sources" (*Id.* at 6).

MHC's overall argument is that antitrust injury is an essential component of standing, and that Special Master Williams analyzes causation incorrectly under the antitrust injury standard for standing (*Id.* at 4-5). MHC is

---

[20] The Court is not addressing this issue at length in the body of this Order because it is unnecessary for the analysis, given that it is clear MHC cannot demonstrate key elements of antitrust injury, causation, and damages, which warrants summary judgment.

[21] *See Infra* p.17-28

imprecise with the case law and standards for each element of an antitrust case to its own failings, and this objection is no different. Special Master Williams analyzed both injury and causation correctly, in accordance with case law and the record.

Antitrust injury is a central element MHC must demonstrate in order to survive on any of its claims. ***HN6***[] An antitrust injury is "of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 881 F. Supp. 1309 (W.D. Wisc. 1994)*(quoting *Local Beauty Supply, Inc. v. Lamaur, Inc., 787 F.2d 1197, 1201 (7th Cir. 1984)* (*quoting* *Brunswick Co. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1978))*. Courts within the Seventh Circuit have, at times, analyzed antitrust injury as an element of antitrust standing as MHC argues; however, antitrust injury can and should be analyzed outside of standing as it is a *necessary element* to prove an antitrust claim. **[*23]** *Blue Cross & Blue Shield, 881 F. Supp. at 1315*.

HN7[] To establish causation, a plaintiff must show that the anticompetitive conduct claimed was "the cause in fact of the injury," or that "'but for' the violation, the injury would not have occurred." *Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 718 (7th Cir. 2006)* (antitrust injury must "reflect the anticompetitive effect of either the violation or of anticompetitive acts made possible by the violation"). *See also* *O.K. Sand & Gravel, Inc., v. Martin Marietta Tech., Inc., 36 F.3d 565, 573 (7th Cir. 1994)* (holding that antitrust injury requires "not only that the injury is of the type intended to be protected by the antitrust laws, but that the violation was 'the cause-in-fact of the injury: that but for the violation, the injury would not have occurred'") (citing *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993)*; *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 66 (2d Cir. 2012)* ("to prevail on an antitrust claim, a plaintiff must establish that 'the injuries alleged would not have occurred *but for* [the defendant's] antitrust violation' ... adding necessity to the materiality requirement of our antitrust causation analysis.")

HN8[] In addition, a plaintiff must be able to distinguish between "financial loss from the *lawful* activities of a competitor" from loss "caused by the *unlawful* acts of the defendant." *MCI Commc'ns Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1161 (7th Cir. 1983)* (citing *Brunswick Corp., 429 U.S. at 489*). If the alleged antitrust violation is too removed from an injury with other intervening factors that could have led to the claimed injury, **[*24]** Seventh Circuit courts have granted motions for summary judgment for the moving party. *See* *Greater Rockford Energy, 998 F.2d 391 (7th Cir. 1993)*. *See also* *Eli Lilly and Co. v. Zenith Goldline Pharmaceuticals, Inc., 172 F. Supp. 2d 1060 (S.D. Ind. 2001)*.[22] At the summary judgment stage, if there is no causation, then that is the end of the case as "there can be 'no genuine issue as to any material fact,' since a complete failure of proof concerning an essential element of the nonmoving party's case necessarily renders all other facts immaterial." *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*.

Ultimately, "[i]n order to sustain any of its claims, MHC must prove that SIH's conduct caused an antitrust injury." (Doc. 421 at 29). The parties submitted evidence throughout its briefing to argue issues related to both causation and injury. MHC has been on notice of the arguments surrounding causation and has, in fact, submitted evidence to attempt to link SIH's alleged action to its injury to prove causation.

Although MHC argues that Special Master Williams conflates causation and injury, it is MHC who misstates the record and evidence as related to injury and causation. ***HN10***[] To create a triable issue in terms of injury for summary judgment, there must be *some evidence* to show that "SIH's conduct had the effect on the market of raising **[*25]** prices or decreasing output." (*Id.* at 29).

To show injury, MHC argues that SIH's exclusive contracts with payers created higher rates in the Southern Illinois market, more so than in other markets throughout the state (*Id.*). MHC argues that the prices continued to rise over time from the exclusive contracts; however, this alleged violation is without support in the record. The Special

[22] ***HN9***[] If lawful competition "fully accounts for" a plaintiff's "claimed injury," the law will "deny any injury" because "the plaintiff's situation would be the same with or without the challenged restraint." Areeda & Hovenkamp, ***Antitrust Law*** ¶ 338b-c.

Master correctly noted that the deposition excerpts MHC relied on to support its position (e.g., Lee Biederman's deposition) do not refer to *actual rate increases* and do not refer to a specific timeframe (*Id.* at 30).

MHC then argued that there was an injury to the market from these exclusive contracts because they had the effect of decreasing choice for patients "in the types of providers" they could choose, as these contracts allegedly caused a decrease in outpatient surgery services overall (*Id.* at 30). Ultimately, though, the Court can find nothing in the record to support the fact patients were denied access to care and "preservation of maximum choice in providers" is not required by the law (*Id.* at 31). Special Master Williams found that MHC "overstates the testimony in the record that it relied upon, and—implies a connection between **[*26]** those prices and SIH's conduct for which there is no proof." (*Id.* at 29). After a careful review of the record, this Court agrees with the Special Master.

Both parties submitted evidence in the record as to causation as well through their briefing and expert testimony (*See* Doc. 432 at 5; Doc. 337 at 49-50). ***HN11***[] For causation, a plaintiff must establish that "but for" the antitrust violation, their injury would not have occurred. *Greater Rockford Energy, 998 F.2d at 395*. Causation, like injury, is integral to a party surviving summary judgment.

MHC argues that it lost volume of patients and business because MHC was foreclosed from being in-network with the same payers who had exclusive contracts with SIH because of those exclusive contracts. ***HN12***[] In determining whether a party can survive summary judgment on the issue of causation, Special Master Williams rightfully outlined that the plaintiff must establish the "but for" test, meaning "but for" the alleged antitrust violation, the plaintiff's injury would not have occurred (Doc. 421 at 34). Here, there are too many intervening factors that make the link between MHC's claimed injury and SIH's alleged illegal activity faint. This is not a case of "hypothetical, assuming away the violation or **[*27]** ignoring a causal link between the violation and the harm and positing other sources," as MHC argues. There are real evidence issues in the record that make it impossible for the Court to infer that but for SIH's exclusive contracts with payers, MHC's injury would not have occurred.

MHC alleges that SIH's exclusive contracts caused MHC to lose patient volume because being out-of-network deterred patients from seeking care at an out-of-network facility like MHC. MHC argues this is because patients would have to pay more for the services (*Id.* at 34). If this were the only reason as to why MHC lost patient volume alleged in the record, then perhaps MHC would have created a triable issue of fact to survive summary judgment on causation. However, this is *not* the only reason why MHC remained out-of-network with certain payers, like BCBS. MHC remained out-of-network as a business strategy, at times complaining that the rates being offered by payers were not competitive and at other times, remaining out-of-network because MHC did not believe it could handle the increased patient volume that would flow from an in-network agreement with certain payers (*See* Doc. 439 at 25-26)("In 2010, MHC's board minutes **[*28]** report that MHC understood that attempting to negotiate a contract with BCBSIL would require more patients than MHC physicians currently treated to be worthwhile—However, going in-network with any of them would require a much larger volume of patients."). In addition, MHC did enter into a contract with HealthLink twice and is still in-network with HealthLink (Docs. 421 at 5, 33, 35; 313-25; 313-10; 313-26).

From the record, it appears that SIH's exclusive contracts with payers had little effect on MHC. MHC was able to contract with some payers, like HealthLink, successfully to go in-network and declined to contract with others as a business strategy, all during a time when SIH had exclusive contracts with these payers in the region (Doc. 421 at 35-36).

MHC is mistaken that Special Master Williams incorrectly conflated injury and causation. He nimbly maneuvered through both tests and extensive facts to correctly determine that MHC did not provide facts to support finding triable issues as to causation and injury necessary for MHC to move past this summary judgment phase.

b. MHC Argues Special Master Williams Made Recommendations about Causation *Sua Sponte*

Second, MHC argues that Special **[*29]** Master Williams made his recommendations on causation *sua sponte* because he relied on facts not pled by the parties. As opposed to its first objection, where MHC argued that Special

Master Williams used incorrect standards for injury and causation, relying on incorrect facts from the record, here, MHC argues that Special Master Williams addressed an issue not introduced by the parties at all.

MHC argues that SIH's Motion for Summary Judgment advanced five theories.[23] MHC argues that SIH addressed issues related to causation only once, when SIH argued that MHC cannot prove causation because MHC's expert, Dr. Bowblis, "ignored intervening causes that are indisputable" and that his damages calculations are flawed (Doc 446 at 8; Doc. 439 at 41-44). MHC argues that instead of just examining this one element of proof for causation (*e.g.*, Dr. Bowblis ignoring intervening factors in his statistical conclusions), Special Master Williams examined causation elsewhere throughout the record, "improperly draw[ing] inference[s] (and erroneous ones at that) as to whether Plaintiff would have contracted with BCBS and HA had it been given the opportunity" (Doc 446 at 10).

MHC is incorrect. SIH **[*30]** argues causation throughout its briefs and Special Master Williams addressed causation arguments brought up by the parties directly. SIH correctly notes in its Response to Plaintiff's Objections that both SIH and Special Master Williams outlined the areas of the record in which SIH makes the argument that MHC has not supported its arguments for causation.[24] Special Master Williams addresses this issue directly in his Report and Recommendation:

> In the informal objection process, MHC argued that SIH had not actually raised this issue of causation in its briefing. It argues that the undersigned impermissibly relies on an issue for which it had no opportunity to address. In support of this proposition, MHC cites *Edwards v. Honeywell, 960 F.2d 673, 675 (7th Cir. 1992)* & *Malhotra v. Cotter & Co., 885 F.2d 1305, 1310 (7th Cir. 1989)*. While the undersigned takes no issue with the legal proposition, it cannot be said this argument was not raised—raised vigorously in fact—by SIH. The fact that the undersigned has analyzed it under the rubric of causation, and that SIH argued it extensively under a different heading, does not give MHC license to ignore it. It does not take a clairvoyant to know that an argument raised over six pages of SIH's brief should be responded to. MHC ignored it at its peril.

(Doc. 421 **[*31]** at 35).

The Court agrees. MHC has been on notice repeatedly - in fact from the moment it filed this case in 2012 until this point - that it must have evidence related to causation and must respond to arguments made by SIH, otherwise forfeiting those arguments at this stage. As Special Master Williams found, "MHC ignored [this issue] at its peril." (*Id.*).

c. MHC Argues Special Master William Relied on Incorrect Evidence for Antitrust Injury

Finally, MHC objects to Special Master Williams' Report and Recommendation on the grounds that Special Master Williams relied on incorrect evidence in his reasoning. Specifically, MHC contends the Report and Recommendation "incorrectly concludes that Plaintiff cannot show antitrust injury or causation of damages because

---

[23] MHC outlines the five issues as follows: "a) Under *Methodist II*, Defendant's contracts with BCBS and HA are legal because they were not "exclusive," because (1) their members always could seek treatment at other providers, whether contracted or not, including MHC, and (2) MHC could compete for its own contracts due to the short duration of SIH's; b) MHC was not 'foreclosed' or excluded from competing for outpatient surgery patients; c) MHC's tying claim fails because (1) there was not 'tie' as payers never ask to contract for a hospital's inpatient and outpatient services separately, and (2) payers testified they agreed willingly to the provisions; d) MHC's monopolization claim fails because (1) MHC has not been excluded from referral sources, (2) MHC makes no attempt to define the proper universe of 'market' to know what allegedly was monopolized, (3) MHC offers no damages at all for it monopolization claim; and e) MHC's claims in whole fail because (1) it cannot show higher prices (and thus competition was not harmed), and (2) it cannot establish the essential elements of causation or (3) damages for any of its claims (Doc. 439 at 2-3; Doc 446 at 8).

[24] Both SIH and the Special Master correctly specify the parts of the record in which SIH repeatedly made this argument (*See* Doc. 432 at 4) (citing Resp. to Mot. To Supp. (Doc. 410) at 8-10 (listing 15 bullet points where this argument appeared)); see also Doc. 421 at 35 n.17 (stating that SIH raised this argument in 'over six pages' of its Motion for Summary Judgment alone).

it never would have contracted with Blue Cross (BC) or Health Alliance (HA) even in the absence of exclusivity." (Doc. 446 at 2, 10-15). MHC further argues that Special Master Williams applied the incorrect reasoning in this section, requiring a "causal link between the exclusivity and MHC's injury to a black-and-white certainty." (*Id.* at 11). MHC contends Special Master Williams should have evaluated injury under a separate standard and asked **[*32]** if the injury was "a material element or, and substantial factor in producing, the injury" because it "need not be the sole cause of the alleged injuries" (*Id.*) *See also* *Greater Rockford Energy & Tech Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993)*. MHC claims it had the required "intention and preparedness" to contract as evident by the record (Doc. 446 at 11-13) and that it "repeatedly sought contracts from the restricted carriers and it actually contracted, on two different occasions, through HealthLink with dozens of unrestricted carriers." (*Id.* at 12).

Again, MHC misstates the evidence in the record. Although MHC cites to *Grip-Pak, Inc. v. Ill Tool Works, 694 F.2d 466, 475 (7th Cir. 1982)* ("*Grip-Pak")* to argue that a plaintiff is required to demonstrate only "intention and preparedness to enter the market," in order to show causation, Special Master Williams rightfully found that MHC misstated this test. Intention and preparedness to enter a market is the threshold showing to bring suit for damages (Doc. 421 at 34, n.15). In fact, Special Master Williams correctly highlights that *Grip-Pak* is explicit that this test is a way to *limit* who can bring claims instead of a "how to" guide to establish the element of causation for a claim (*Id.*).

Ultimately, even if MHC had not misstated this test, the evidence does not support that it ever **[*33]** had the intention to enter into contracts with payers like BCBS absent SIH's exclusive contracts. MHC had opportunities to negotiate contracts with BCBS and chose not to enter into contracts with them because of "the low rates being offered." (Docs. 421 at 35; 313-25). Throughout the evidence related to contract negotiations between MHC and payers like BCBS, there is *nothing* in the record that shows MHC would have contracted with payers *absent exclusive contracts with SIH* (Doc. 421 at 36). Special Master Williams rightfully found that it would be "pure speculation for a trier of fact to conclude that MHC would be in-network with BCBS without the exclusivity provisions." (*Id.* at 37). There is simply no evidence in the record to support that connection. MHC's "intention and preparedness" evidence can only push it so far down the causation path. That evidence alone is simply not enough to create a triable issue in terms of causation.[25]

B. Plaintiff's Monopolization Claims under Act 2 of the Sherman Act

In addition to its Sherman Act *§ 1* arguments, MHC also argued that because of SIH's use of exclusive contracts with payers in the Southern Illinois region, SIH created an illegal monopoly, violating *§ 2* **[*34]** of the Sherman Act. Special Master Williams quickly disposes of MHC's Sherman Act *§ 2* monopolization claims in the Report and Recommendation because MHC does not provide proof, in the form of an expert opinion or damages calculation, for this claim (Doc. 421 at 39). Special Master Williams recommends the Court grant summary judgment as to all of MHC's claims, including monopolization, because MHC has not proven an antitrust injury and causation, and MHC's success rests on those two key claims. MHC objects to his findings, arguing that its proof for its exclusive dealing and tying arguments prove its monopolization claim as well. MHC argues that the Court should hold that these three claims survive summary judgment as the proof overlaps and MHC has included enough in the record to prove all three arguments (Doc. 446 at 20).

The Court has given fresh consideration to MHC's arguments and agrees with the Special Master that the proof is simply not in the record as to MHC's monopolization claims. While the Court is not assessing the validity of MHC's exclusive dealing and tying arguments (as they are not dispositive of this matter), it is clear there is not enough evidence in the record to **[*35]** support MHC's monopolization claims.[26] Even so, the Special Master correctly

[25] The Court has carefully considered all of the arguments raised by the parties and all of the objections to the Report and Recommendation. But this was no easy task. MHC frequently conflated arguments made by SIH and findings made by the Special Master, making it difficult to parse the issues out in an organized fashion. The Court has spent an extensive amount of time analyzing and giving fresh consideration to all of the issues in this case. Nevertheless, if there is any argument or objection raised by MHC that is not specifically addressed by this Memorandum and Order, the Court can confidently say that it considered it and has rejected it.

highlights that without proof of an antitrust injury or causation, MHC cannot prove its Sherman Act *§ 2* monopolization claims either (Doc. 421 at 39). Because the Court has concluded that MHC cannot survive summary judgment because it lacks sufficient evidence of an antitrust injury and causation, MHC's monopolization claims must also fail.

Conclusion

For the reasons set forth above, the Court **ADOPTS IN PART and DECLINES TO ADOPT IN PART** the Special Master's Report and Recommendation. MHC's objections are **OVERRULED**; SIH's objections are **MOOT**. SIH's motion for summary judgment is **GRANTED** consistent with this Memorandum and Order. MHC's claims will therefore be **DISMISSED with prejudice** and the Clerk of Court will be directed to enter judgment accordingly and close this case on the Court's docket.

IT IS SO ORDERED.

DATED: March 31, 2020

Attachments: Letter to Judge Zwart re Clarification - 2020-03-31.pdf

Dear Judge Zwart:

On behalf of defendant Fareportal Inc., we respectfully submit the attached letter requesting clarification of certain points in the Court's summary judgment order. We have informed counsel **[*2]** for plaintiff Jacobs regarding our intention to submit this letter, along with the general substance, and we have learned that Jacobs intends to oppose. Accordingly, unless the Court prefers to dispense with one, we request a conference when convenient for all parties.

Respectfully submitted,

Eleanor M. Lackman

Re: *Jacobs v. Fareportal Inc.*, No. 8:17 Civ. 00362 (CRZ) (D. Neb.)

Dear Judge Zwart:

We represent defendant Fareportal Inc. ("Fareportal") in the above-referenced action. As the Court is aware, the parties have been diligently exploring settlement negotiations by various means over the course of the past few months. However, as the Court is also aware, the parties have not reached a resolution and have elected to move ahead with the proceedings while continuing to work on their efforts to resolve the case.

It is in this context that Fareportal has also turned back to preparing for a possible trial, and it wishes to do so in as streamlined of a fashion as possible. With this in mind, Fareportal respectfully asks the Court to clarify **[*3]** particular points in its September 19, 2019 Memorandum and Order (Doc. #232) (the "Order") that leave certain claims or points either unaddressed or otherwise ambiguous — an understandable outcome in light of the volume of claims and submissions from the parties, but one that has an impact on the nature and scope of any trial that may happen if the case does not settle. Fareportal does not seek reconsideration on any point briefed and decided, even if it disagrees with the interpretation of the facts or the law; rather, it raises only specific issues that remain unclear or which were newly raised by the Court in its Order. This submission reflects Fareportal's hope, with a goal that is in the interest of both parties, to ensure that if a particular claim or issue is no longer before the Court, the resources of the Court and the parties are not expended on those points. Fareportal respectfully requests a telephone conference, if the Court prefers to hold one.

False Advertising and Designation of Origin. As the Court recognized, Plaintiff Ian Jacobs ("Jacobs") asserted a cause of action for "false advertising and designation of origin," (*see* Order at 13), which Fareportal had observed **[*4]** appeared to be a mash-up of two separate causes of action under the Lanham Act: (1) false designation of origin (*15 U.S.C. § 1125(a)(1)(A)*), and (2) false advertising (*15 U.S.C. § 1125(a)(1)(B)*). *See* Doc. # 183 at 33 & n.15. Fareportal identified the very different standards that apply to the former claim (essentially, a variation of a trademark infringement claim) and the latter claim (which, generally stated, targets express or implied statements about the nature or quality of a good or service). Fareportal noted that Jacobs never identified any false statement as the law requires, *id.*at n.15, and Jacobs did not dispute the point. Accordingly, there should be no false advertising claim remaining in the case, but the Court's overview at the start of its analysis (Order at 17) does not mention the claim, and therefore by default, the claim remains in the case. However, if Jacobs has not sought to support his claim, it should not be an issue for trial on which the parties would need to prepare jury instructions or engage in other preparation. Fareportal therefore respectfully requests that the Court clarify its Order to confirm that no false advertising claim remains in the action for trial.

The Parties' Respective Unjust Enrichment* [*5] *Claims. In their motions, Fareportal asked for judgment dismissing Jacobs' claims against it and affirmatively asking for judgment on its claims against Jacobs. In contrast, Jacobs asked for dismissal only of Fareportal's claims against it — not for judgment affirmatively on his claims. However, the Order (at 39) denies Jacobs' request for judgment on his unjust enrichment claim, which for the reason just stated is not a request Jacobs made. It was Fareportal that asked for Jacobs' unjust enrichment claim to be dismissed — in particular, on the ground that unjust enrichment claims that are duplicative of Lanham Act claims cannot survive with a separate act that would open the door to such an additional claim, and that an equitable remedy is not available where one at law exists. *See* Doc. # 183 at 53-54; *see also* *Select Comfort Corp. v. Baxter, 156 F. Supp. 3d 971, 994 (D. Minn. 2016)*. Fareportal therefore respectfully requests that the Court clarify its views on whether Jacobs' unjust enrichment counterclaim raises an issue of fact for trial.[1]

The Viability of Jacobs' Keyword Bidding Claim. Jacobs' claims arise from two acts: (1) the radio/television ads, which contained the "We Go CheapO" slogan and which ran for 16 **[*6]** months in 2016-17, and (2) the bidding on the term "cheapo" (among other misspells of its "CheapOair" name), which Fareportal had been doing consistently for over a decade as part of its keyword advertising search-engine marketing strategy. At page 27 of the Order, the Court notes that bidding on keywords is not actionable as unfair competition without some other use (such as displaying the trademark in the resulting advertisement in a confusing manner, which Fareportal is not alleged to have done). *See* cases cited *id.*; *see also* *Stephen T. Greenberg, M.D., P.C. v. Perfect Body Image, LLC, 2019 U.S. Dist. LEXIS 111721, 2019 WL 3485700, at *9 (E.D.N.Y. July 2, 2019)*, *report and recommendation adopted*, *2019 U.S. Dist. LEXIS 141201, 2019 WL 3927367 (E.D.N.Y. Aug. 20, 2019)*; *Multi Time Machine, Inc. v. Amazon.com, Inc., 804 F.3d 930, 935-36 (9th Cir. 2015)*; Doc. # 183 at 47-49. However, while the implication is that Jacobs' claim against Fareportal relating to its longstanding keyword advertising fails as a matter of law, the Order does not appear to expressly reach that conclusion, referring instead to the television/radio ad that was never alleged (much less shown with any evidence, admissible or not) to be tied to Fareportal's decade-long bidding on misspells of its name. Understanding which activities remain in the case is a significant matter, as Fareportal's "offline" and "online" advertising involves very different documents and witnesses and will have a material **[*7]** impact on the length of the trial. Therefore, Fareportal respectfully requests that the Court clarify whether Jacobs may maintain his claims pertaining to keyword advertising as a matter of law.[2]

---

[1] Similar confusion seems to have arisen regarding Fareportal's various affirmative defenses, which Fareportal briefly referenced collectively to underscore the overall theme that Jacobs has spent more efforts to offer a website that looks like Fareportal's CheapOair brand than he has in trying to develop his later-created travel referral site under his claimed "Cheapo" brand independently. *See* Doc. 183 at 55. Jacobs did not move to strike Fareportal's affirmative defenses, but the Court appears to have done so as to the mitigation defense, adopting Jacobs' misconstruction of the defense. Order at 36; Doc. No. 197 (Jacobs Opp.) at 127; *compare* Doc. No. 54 (Answer) at 14 ("Plaintiff has suffered no damages, and even if he did, he failed to mitigate them."). However, as the pleading makes clear, the defense is directed at damages. *See id.*; *see also* *Bauer Bros., LLC v. Nike, Inc., 159 F. Supp. 3d 1202, 1215 (S.D. Cal. 2016)*; *accord* *Hokto Kinoko Co. v. Concord Farms, Inc., 810 F. Supp. 2d 1013, 1039 (C.D. Cal. 2011)* (declining to address the defendant's failure to mitigate defense on summary judgment because it is "pertinent only to the issue of damages and [is] not [a] defense[] to Plaintiff's claims for trademark infringement and unfair competition"). The Court's Order remains unclear about whether its dismissal of the defense is as to liability only (as to which the defense was not asserted), or for all purposes (*i.e.*, including with respect to damages). Particularly as the parties are in the damages phase of the case, Fareportal submits that clarification on this ground may prevent confusion and objections among the parties regarding the taking of discovery on this point.

[2] The Federal Trade Commission has recently weighed in on keyword bidding, taking the issue that even bidding on a competitor's name (to say nothing of a variation of one's own name) is necessary for consumer choice, and thus restrictions on

Validity of CHEAPOAIR as a Trademark. The Order opines that CHEAPOAIR is a descriptive term and that the trier of fact could find that Fareportal's mark is merely descriptive and has not acquired a secondary meaning. *See* Order at 23, 29. However, Jacobs has not raised the argument that CHEAPOAIR is invalid; it is Fareportal who has argued that it can use the term "cheapo" as a play on its own brand name, not that the term is descriptive. Moreover, Fareportal's challenge to Jacobs' mark is not on descriptiveness grounds, but on the grounds that the registration is not supported by continued use, and that Jacobs' use in the travel space infringes on Fareportal's prior rights in its CHEAPO-family of marks. Accordingly, the commentary in the Order raises a new issue that neither parties have asserted and therefore potentially expands the scope of trial. Moreover, had it been raised, Fareportal would have argued that a trier of fact cannot make such **[*8]** a finding because, among other reasons, the law prohibits a finding of descriptiveness as to trademarks that, as here, have achieved incontestable status. *See* *15 U.S.C. §§ 1065*; 1115(b); *Park 'N Fly, Inc. v. Dollar Park & Fly, Inc., 469 U.S. 189, 105 S. Ct. 658, 83 L. Ed. 2d 582 (1985)* (incontestable trademarks cannot be attacked on descriptiveness grounds).[3] Therefore, to avoid future confusion about whether the trier of fact can hear evidence pertaining to a legal impossibility, Fareportal respectfully requests that the Court strike the portions of the Order pertaining to the validity of Fareportal's trademark registrations.

We thank the Court for its attention to this matter, and we and our client wish good health and safety to Your Honor, the clerks and staff, and all other colleagues at the courthouse and their families.

Respectfully,

/s/ Eleanor M. Lackman EML

Subject: Re: Jacobs v. Fareportal Inc., 8:17-cv-00362 (CRZ) - Letter requesting clarification

Date: Tuesday, March 31, 2020 9:06:40 AM

Dear Judge Zwart,

The letter from Ms. Lackman constitutes a Motion for Reconsideration ("Motion") of the Court's Memorandum **[*9]** Opinion and Order (the "Opinion") that was entered over six months ago. Fareportal claims that the Opinion was "ambiguous." (Motion at 1). Yet, Fareportal's Motion does not consider the conclusion of the Opinion where the Court clearly stated:

> "1) Fareportal's motion for summary judgment, (Filing No. 182), is granted as to Jacobs' counterfeiting, tortious interference, and Nebraska Consumer Protection Act claims, but ***in all other respects, it is denied***.
> 2) Jacobs' motion for partial summary judgment, (Filing No. 178), is denied."

[Dkt. No. 232, at 42] (emphasis added). Six months after this Opinion (and after two hearings with the Court discussing case status where Fareportal never raised these issues), Fareportal now raises disagreements concerning parts of this Opinion for the very first time. After working together with Fareportal to arrive at new

keyword bidding violate ***antitrust law***. *See 1-800 Contacts Inc. v. Federal Trade Commission*, No. 18-3848 (2d Cir.). Therefore, the keyword bidding question has implications well beyond the scope of this proceeding, which may also affect the parties' trial preparation. To the extent this issue is no longer in the case, efficiency would be greatly increased for this reason as well.

[3] Under the cited provision, a mark may become generic (as have once-registered brand names like "aspirin," "trampoline," "cellophane," "zipper," and "escalator"), but it can never be challenged as descriptive of the goods or services associated therewith. *See id.*

discovery and case deadline in light of COVID-19, it was disappointing to receive this Motion that seeks to re-open a closed chapter of this case.

Although Fareportal argues this will streamline the case or make the case more efficient, this statement is incorrect. Specifically, Fareportal's Motion seeks to re-open the thousands of pages of **[*10]** summary judgment briefing submitted by the parties and thoroughly considered by the Court. The Motion raises substantive arguments that will require substantive briefing in response. The length of each party's summary judgment briefing was nowhere near the model of efficiency, so there is nothing about re-opening that summary judgment briefing that will lead to increased efficiency here. After the Court's Opinion, Plaintiff believed this matter had proceeded past the liability phase; unfortunately, Fareportal wants to re-litigate the past.

Therefore, Plaintiff respectfully requests that the Court deny this request outright without any telephonic hearing or further briefing. This saves all parties and the Court the time, expense, and fees associated with re-litigating prior issues. If the Court intends to consider the substantive arguments asserted in the letter, Jacobs respectfully requests that he be given the full 14-days to respond as provided by Local Rule 7.1(b).

COURT'S RULING AND ORDER RE: DEFENDANTS' DEMURRER TO PLAINTIFF'S SECOND AMENDED COMPLAINT

I.

BACKGROUND

Plaintiff, a medical corporation, has brought this putative class action against Defendants Blue Cross of California dba Anthem Blue Cross and Anthem Blue Cross Life and Health Insurance Company (collectively, "Anthem"), which operate a health care service plan. Plaintiff alleges that Anthem has violated California's emergency services reimbursement laws. Plaintiff alleges that health care service plans such as Blue Cross of California are subject to the Health and Safety Code ("H&S Code").[1] *H&S Code § 1371.4(b)* states that a health care service plan "shall reimburse providers for emergency services and care provided to its enrollees, until the care results in stabilization of the enrollee, except as provided in subsection (c)."[2] Subsection (c) provides, in part, that "[p]ayment for

[1] Second Amended Complaint ("SAC"), ¶8.

[2] *Id.*

emergency services and care may be denied only if the health care service plan...reasonably determines that the emergency services and care were never performed."[3]

According to the SAC, "'[r]egulations of the Department of Managed Health Care provide that a health **[*2]** care service plan must pay 'the reasonable and customary value for the health care services rendered based upon statistically credible information that is updated at least annually and takes into consideration: (i) the provider's training, qualifications, and length of time in practice; (ii) the nature of the services provided; (iii) the fees usually charged by the provider; (iv) prevailing provider rates charged in the general geographic area in which the services were rendered; (v) other aspects of the economics of the medical provider's practice that are relevant; and (vi) any unusual circumstances in the case....'"[4]

Plaintiff alleges that "Blue Cross of California has engaged in a practice of failing to pay the reasonable rates of non-contracting providers when they have performed emergency services for its enrollees as hospital-admitted patients."[5] Further, Blue Cross allegedly "has failed to implement claims procedures to adequately identify and reimburse non-contracted providers for emergency services provided to its enrollees, as required by California law, including failing and refusing to recognize services performed by non-contracting specialists as emergency services when **[*3]** those services are performed on an emergent basis in a hospital instead of in an emergency room."[6] Per the SAC, "[v]arious types of specialists, such as surgeons, infectious disease experts, and others, frequently provide services to a patient on an emergent basis, after the patient has been admitted to the hospital, but prior to the time when care has resulted in the stabilization of the patient."[7] Blue Cross allegedly "does not identify and recognize these emergency, pre-stabilization services, and unlawfully and improperly calculates payment for services based on its non-contracted rates that are well below the reasonable value of the specialists' emergency services."[8]

Further, Plaintiff alleges that insurance companies such as Anthem Blue Cross Life and Health Insurance Company are subject to the Insurance Code.[9] *Section 10112.7*, the SAC alleges, provides that "A group or individual health insurance policy issued, amended, or renewed on or after January 1, 2014 that provides or covers any benefits with respect to services in an emergency department of a hospital shall cover emergency services for non-contracted providers in a manner that is not more restrictive than for contracted providers." **[*4]** [10]

However, Defendant Anthem has allegedly "engaged in a practice of failing to pay the appropriate rates of non-contracting providers when they have performed emergency services for its enrollees as hospital-admitted patients."[11] The Defendants have allegedly "failed to implement claims procedures to adequately identify and reimburse non-contracted providers for emergency services provided to its enrollees, as required by California law, including failing and refusing to recognize services performed by non-contracting specialists as emergency services when those services are performed on an emergent basis in a hospital instead of in an emergency room."[12]

---

[3] *Id.*

[4] SAC, ¶9 (citing *28 CCR § 1300.71 (a)(3)(B)*.

[5] SAC, ¶10.

[6] *Id.*

[7] *Id.*

[8] *Id.*

[9] SAC, ¶11.

[10] *Id.*

[11] SAC, ¶12.

[12] *Id.*

The second broad area of allegedly unlawful conduct under the SAC is Defendant Anthem's violation of prompt payment laws in violation of *Health and Safety Code §§ 1371* and *1371.35*, and *Insurance Code § 10123.13*. Despite its obligations, Defendant Anthem has allegedly failed to make timely payment of claims that involve emergency services, or has underpaid those claims, and has not paid the interest and penalties due for late payments.[13]

The third broad area of allegedly unlawful conduct is Anthem's alleged failure to remit payment to non-contracting providers. Anthem's obligation to pay non-contracting **[*5]** providers for emergency services requires that Anthem directly remit reimbursement payments to the non-contracting providers for those services.[14] Further, California law allegedly does not permit Anthem to reduce the reimbursement paid to the provider for any patient share of cost (i.e., co-payment, co-insurance, and/or deductible amounts), but must remit full reimbursement to the provider and address such patient share issues with the patient.[15] The complaint alleges that despite these obligations, Anthem has improperly and unlawfully made payment to the patients for the emergency services rendered by the non-contracting providers, including reduction of reimbursement for emergency services by patient share of cost.[16]

Based on these allegations and the other allegations set forth in the SAC, Plaintiff alleges claims for violation of *Business and Professions Code §§ 17200, et seq.*, declaratory relief, and quantum meruit. Plaintiff brings these claims on behalf of the following putative class:

> All licensed medical providers (including provider groups) who have submitted claims for reimbursement to Anthem for services provided to a patient with Anthem health coverage, where the provider was a non-contracted provider with Anthem and Anthem **[*6]** (a) did not pay a claim for emergency services, (b) did not meet the prompt payment deadlines and did not pay the appropriate interest or penalty, and/or (c) paid the patient instead of the non-contracted provider. Excluded from this definition are claims arising under federal plans, such as ERISA, FEHBA, Medicare Advantage, and Medi-Cal plans.[17]

Defendants demur to the SAC. For the reasons discussed *infra*, the demurrer is overruled. The Court strikes the request for late payment penalties and the references to a "fraudulent" UCL claim.

II.

DEMURRER TO SAC

A. Standards governing demurrers

CCP § 430.10(e) is grounds for a demurrer when the complaint fails to state facts sufficient to constitute a cause of action. For purposes of ruling on a demurrer, material facts properly pleaded in the complaint must be taken as true. *Serrano v. Priest (1971) 5 Cal.3d 584, 491*. A demurrer may challenge only defects that appear on the face of the pleading or from matters which are judicially noticeable. *Blank v. Kirwan (1985) 39 Cal.3d 311, 31*; *Donabedian v. Mercury Ins. Co. (2004) 116 Cal.App.4th 968, 994, 11 Cal. Rptr. 3d 45*; California Practice Guide, Civil Procedure Before Trial, ¶7:8 (The Rutter Group 2019).

---

[13] SAC, ¶16.

[14] SAC, ¶17.

[15] *Id.*

[16] SAC, ¶18.

[17] SAC, ¶22.

The function of a demurrer is to test the legal sufficiency of a complaint, but not the truthfulness of the allegations. *Donabedian v. Mercury Ins. Co., supra, 116 Cal.App.4th at 994*; *Lewis v. Safeway, Inc. (2015) 235 Cal.App.4th 385, 388, 185 Cal. Rptr. 3d 228*; *SJJC Aviation Services, LLC v. City of San Jose (2017) 12 Cal.App.5th 1043, 1051-1052, 219 Cal. Rptr. 3d 637*; California Practice Guide, Civil Procedure Before **[*7]** Trial, ¶7:5 (The Rutter Group 2019). Demurrers are to be sustained where a pleading fails to plead adequately any essential element of the cause of action. *Cantu v. Resolution Trust Corp. (1992) 4 Cal.App.4th 857, 879-80, 6 Cal. Rptr. 2d 151*.

"'A demurrer tests the pleadings alone and not the evidence or other extrinsic matters. Therefore, it lies only where the defects appear on the face of the pleading or are judicially noticed (*Code Civ. Proc, §§ 430.30*, *430.70*). The only issue involved in a demurrer hearing is whether the complaint, as it stands, unconnected with extraneous matters, states a cause of action.'" *Hahn v. Mirda (2007) 147 Cal.App.4th 740, 747, 54 Cal. Rptr. 3d 527*. *Accord* *McKenney v. Purepac Pharmaceutical Co. (2008) 162 Cal.App.4th 72, 79*.

When considering demurrers, courts read the allegations liberally and in context. *McKenney, supra*, 167 Cal.App.4th at 77; *Taylor v. City of Los Angeles Dept. of Water and Power (2006) 144 Cal.App.4th 1216, 1228, 51 Cal. Rptr. 3d 206*. "If the complaint states a cause of action under any theory, regardless of the title under which the factual basis for relief is stated, that aspect of the complaint is good against a demurrer." *Quelimane Co. v. Stewart Title Guaranty Co. (1998) 19 Cal.4th 26, 38, 77 Cal. Rptr. 2d 709, 960 P.2d 513* (emphasis added).

B. Discussion

Defendant Anthem Blue Cross demurs to the UCL claim and to the declaratory relief claim in the SAC. Defendant Anthem Blue Cross Life and Health Insurance Company demurs to the complaint in its entirety. The Defendants raise several arguments in the demurrer, which are taken in turn.

1. Violation of the UCL

a. The UCL Generally

Business and Professions Code ("B&P Code") *§ 17200, et seq.* forms **[*8]** part of California's Unfair Competition Law ("UCL"). Under *B&P Code § 17200*, "unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *B&P Code § 17203* provides:

> Any person who engages, has engaged, or proposes to engage in unfair competition may be enjoined in any court of competent jurisdiction. The court may make such orders or judgments, including the appointment of a receiver, as may be necessary to prevent the use or employment by any person of any practice which constitutes unfair competition, as defined in this chapter, or as may be necessary to restore to any person in interest any money or property, real or personal, which may have been acquired by means of such unfair competition. Any person may pursue representative claims or relief on behalf of others only if the claimant meets the standing requirements of *Section 17204* and complies with *Section 382 of the Code of Civil Procedure*, but these limitations do not apply to claims brought under this chapter by the Attorney General, or any district attorney, county counsel, city attorney, or city prosecutor in this state.

The UCL's scope is broad, and the UCL's "coverage is sweeping, embracing anything that can **[*9]** properly be called a business practice and that at the same time is forbidden by law." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527* (internal citations and quotation marks omitted). "The statutory language referring to 'any unlawful, unfair *or* fraudulent practice...makes clear that a practice may be deemed unfair even if not specifically proscribed by some other law. Because *Business and Professions Code section 17200* is written in the disjunctive, it establishes three varieties of unfair competition—acts or practices which are unlawful, or unfair, or fraudulent. In other words, a practice is prohibited as 'unfair' or 'deceptive' even if not 'unlawful' and vice versa." *Id.* (Internal citations and quotation marks omitted).

"The unfair competition statute is not confined to anticompetitive business practices, but is also directed toward the public's right to protection from fraud, deceit, and unlawful conduct." *Hewlett v. Squaw Valley Ski Corp. (1997) 54 Cal.App.4th 499, 519-520, 63 Cal. Rptr. 2d 118*; California Practice Guide, *B&P Code § 17200* Practice, ¶3:17 (The Rutter Group 2019).

(1) Fraudulent business practices under the UCL

"The fraudulent business practice prong of the UCL has been understood to be distinct from common law fraud. 'A [common law] fraudulent deception must be actually false, known to be false by the perpetrator and reasonably relied upon by a victim who **[*10]** incurs damages. None of these elements are required to state a claim for injunctive relief under the UCL. [Citations.] This distinction reflects the UCL's focus on the defendant's conduct, rather than the plaintiff's damages, in service of the statute's larger purpose of protecting the general public against unscrupulous business practices." *In re Tobacco II (2009) 46 Cal.4th 298, 312, 93 Cal. Rptr. 3d 559, 207 P.3d 20*. "No proof of direct harm from a defendant's unfair business practice need be shown, such that '[a]negations of actual deception, reasonable reliance, and damage are unnecessary.'" *Day v. AT&T(1998) 63 Cal.App.4th 325, 332, 74 Cal. Rptr. 2d 55* (citing *Committee on Children's Television, Inc. v. General Foods Corp. (1983) 35 Cal.3d 197, 211, 197 Cal. Rptr. 783, 673 P.2d 660)*. A business practice is "fraudulent" within the meaning of *§ 17200* if "members of the public are likely to be deceived." *Committee on Children's Television v. General Foods Corp. (1983) 35 Cal.3d 197, 211, 197 Cal. Rptr. 783, 673 P.2d 660*; *Kasky v. Nike, Inc. (2002) 27 Cal.4th 939, 119 Cal. Rptr. 2d 296, 45 P.3d 243*; *Prata v. Sup.Ct. (2001) 91 Cal.App.4th 1128, 1144, 111 Cal. Rptr. 2d 296*.

(2) "Unlawful" UCL Claim

Section 17200's prohibition of "unlawful" business practices proscribes "anything that can properly be called a business practice and that at the same time is forbidden by law." *People v. McKale (1975) 25 Cal.3d 626, 634, 159 Cal. Rptr. 811, 602 P.2d 731*; *Barquis v. Merchants Collection Ass 'n. (1972) 7 Cal.3d 94, 113*. Virtually any law or regulation - federal or state, statutory or common law - can serve as a predicate for a *§ 17200* "unlawful" violation. Stern, William: *Business & Professions Code § 17200* Practice, 13:56 (2019). Thus, if a "business practice" violates any law - literally - it also violates *§ 17200* and may be redressed under that section. *Id.*

Where the UCL claim is based on allegations the defendants **[*11]** violated another statute, the plaintiff must allege facts showing that her purchase was caused by the underlying violation. *Medina v. Safe-Guard Products, Inc. (2008) 164 Cal.App.4th 105, 115, 78 Cal. Rptr. 3d 672* (dismissing UCL claim of buyer of vehicle service contract against an unlicensed seller because buyer did not allege that he "relied on [defendant's] having a license required by the vehicle service contract statutes, or that [defendant's] unlicensed status *caused* him to part with the money he paid for the tire and wheel contract").

Where a plaintiff is barred from proving the statutory violation alleged as a basis for the plaintiff's UCL claim, the UCL claim is also barred. *Ingels v. Westwood One Broad. Servs. (2005) 129 Cal.App.4th 1050, 1060, 28 Cal. Rptr. 3d 933*.

(3) "Unfair" Conduct under the UCL - Consumer Claims

In *Camacho v. Automobile Club of Southern California (2006) 142 Cal.App.4th 1394, 1403, 48 Cal. Rptr. 3d 770*, the Court applied the following test for an "unfair" UCL claim by a consumer: (1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and

(3) it must be an injury that consumers themselves could not reasonably have avoided. *See also* Klein v. Chevron U.S.A., Inc. (2012) 202 Cal.App.4th 1342, 1376, 137 Cal. Rptr. 3d 293 (citing *Camacho*).

Other courts have determined that the definition of "unfair" under the UCL is uncertain. Durell v. Sharp Healthcare (2010) 183 Cal.App.4th 1350, 1364, 108 Cal. Rptr. 3d 682. However, the *Durell* court adopted the following definition of "unfair" in the context of UCL, non-competitor **[*12]** actions: "'[t]o show a business practice is unfair, the plaintiff must show the conduct 'threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.''" Durell, 183 Cal.App.4th at 1366 (citing Byars v. SCME Mortgage Bankers, Inc. (2003) 109 Cal.App.4th 1134, 1147, 135 Cal. Rptr. 2d 796). *See also* Scripps Clinic v. Superior Court (2003) 108 Cal.App.4th 917, 940, 134 Cal. Rptr. 2d 101 ("'where a claim an unfair act or practice is predicated on public policy, we read *Cel-Tech* to require that the public policy which is a predicate to the action must be 'tethered' to specific constitutional, statutory or regulatory provisions'") (citing Gregory v. Albertson's, Inc. (2002) 104 Cal.App.4th 845, 854, 128 Cal. Rptr. 2d 389).

However, the Second District has consistently followed the *Camacho* definition for consumer claims. *See* Rubenstein v. The Gap, Inc. (2017) 14 Cal.App.5th 870, 880, 222 Cal. Rptr. 3d 397; Klein, supra; Davis v. Ford Motor Credit Co. (2009) 179 Cal.App.4th 581, 584, 594-597, 101 Cal. Rptr. 3d 697; Dougherty v. American Honda Motor Co., Inc. (2006) 144 Cal.App.4th 824, 838-839. This Court, therefore, adopts the *Camacho* definition for consumer claims based on the UCL's "unfair" prong.

b. Analysis

As alleged in the SAC, there are three (3) overarching bases for the UCL claim: 1) Anthem's violation of emergency services reimbursement laws; 2) Anthem's violation of prompt payment laws; and 3) Anthem's failure to remit payment to non-contracting providers.[18]

(1) UCL Unlawful Violation and the Knox-Keene Act

H&S Code §§ 1340, et seq. is known as the Knox-Keene Health Care Service Plan **[*13]** Act of 1975 (the "Knox-Keene Act" or "the Act"). The Knox-Keene Act applies to health care service plans and specialized health care service plan contracts as defined by statutes. Cal. Jur. 3d Insurance Contracts § 281 (2019). One treatise describes the purpose of the Act as follows:

> The purpose of the Act is to promote the delivery of health and medical care to the people of this state who enroll in, or subscribe for the services rendered by, a health care service plan or specialized health care service plan by, among other things, assuring the continued role of the professional as the determiner of the patient's health needs, assuring that subscribers and enrollees are educated and informed of the benefits and services available, helping to assure the best possible health care for the public at the lowest possible cost by transferring the financial risk of health care from patients to providers, and assuring that subscribers and enrollees receive available and accessible health and medical services rendered in a manner providing continuity of care. 39A Cal. Jur. 3d Insurance Contracts § 281 (referencing H&S Code § 1342(a), (b), (d), and (g)).

A key component of the Knox-Keene Act addresses the obligation of **[*14]** insurers to reimburse emergency room services to health care providers that are out of the insurers' network ("out-of-network providers"). H&S Code § 1371.4 addresses that obligation:

> (a) A health care service plan that covers hospital, medical, or surgical expenses, or its contracting medical providers, shall provide 24-hour access for enrollees and providers, including, but not limited to, noncontracting

[18] See generally SAC, ¶¶8-18.

> hospitals, to obtain timely authorization for medically necessary care, for circumstances where the enrollee has received emergency services and care is stabilized, but the treating provider believes that the enrollee may not be discharged safely. A physician and surgeon shall be available for consultation and for resolving disputed requests for authorizations. A health care service plan that does not require prior authorization as a prerequisite for payment for necessary medical care following stabilization of an emergency medical condition or active labor need not satisfy the requirements of this subdivision.
>
> (b) A health care service plan, or its contracting medical providers, shall reimburse providers for emergency services and care provided to its enrollees, until the care results in stabilization **[*15]** of the enrollee, except as provided in subdivision (c). As long as federal or state law requires that emergency services and care be provided without first questioning the patient's ability to pay, a health care service plan shall not require a provider to obtain authorization prior to the provision of emergency services and care necessary to stabilize the enrollee's emergency medical condition.
>
> (c) Payment for emergency services and care may be denied only if the health care service plan, or its contracting medical providers, reasonably determines that the emergency services and care were never performed; provided that a health care service plan, or its contracting medical providers, may deny reimbursement to a provider for a medical screening examination in cases when the plan enrollee did not require emergency services and care and the enrollee reasonably should have known that an emergency did not exist. A health care service plan may require prior authorization as a prerequisite for payment for necessary medical care following stabilization of an emergency medical condition. *H&S Code § 1371.4(a)*, *(b)*, and *(c)*.

The Department of Managed Health Care ("DMHC") is charged with the administration and enforcement **[*16]** of the laws relating to health care service plans. *Children's Hospital Central California v. Blue Cross of California (2014) 226 Cal.App.4th 1260, 1271, 172 Cal. Rptr. 3d 861* (referencing *H&S Code § 1341*). "To carry out its duties, the DMHC is authorized to promulgate regulations." *Id.* (Citing *H&S Code § 1344*).

One such regulation promulgated by the DMHC appears at *28 CCR § 1300.71*. *Section 1300.71(a)(3)(B)* "defines 'Reimbursement of a Claim' for noncontracted providers." *Children's Hospital, supra, 226 Cal.App.4th at 1271*. As explained by the *Children's Hospital* court:

> Such reimbursement means "the payment of the reasonable and customary value for the health care services rendered." The reasonable and customary value is to be "based upon statistically credible information that is updated at least annually" and takes six factors into consideration. These factors are: "(i) the provider's training, qualifications, and length of time in practice; (ii) the nature of the services provided; (iii) the fees usually charged by the provider; (iv) prevailing provider rates charged in the general geographic area in which the services were rendered; (v) other aspects of the economics of the medical provider's practice that are relevant; and (vi) any unusual circumstances in the case." *Children's Hospital Central California v. Blue Cross of California (2014) 226 Cal.App.4th 1260, 1271, 172 Cal. Rptr. 3d 861* (citing *28 CCR § 1300.71(a)(3)(B)*).

These factors are known as the "*Gould* factors" (stemming from *Gould v. Workers' Comp. Appeals Bd. (1992) 4 Cal.App.4th 1059, 6 Cal. Rptr. 2d 228*). "If a provider disputes the payor's calculation of the fair and reasonable value **[*17]** of the health care services he has rendered, the provider is free to seek resolution of that dispute in a court of law or through any other available civil remedy." *Children's Hospital, supra, 226 Cal.App.4th at 1273*.

The *Children's Hospital* court also observed:

> [I]n adopting *section 1300.71(a)(3)(B)*, the DMHC established the minimum criteria for reimbursement of a claim, not the exclusive criteria. The DMHC refused to set specific amounts noting that neither billed charges nor government rates are determinative of the reasonable value of the medical services. Rather, the DMHC intended that reasonable value be based on the concept of quantum meruit and that value disputes be resolved by the courts. In fact, the DMHC has acknowledged that, unlike the courts, it "'lacks the authority to set specific reimbursement rates under theories of *Quantum meruit* and the jurisdiction to enforce a

> reimbursement determination on both the provider and the health plan.'" *Children's Hospital, 226 Cal.App.4th at 1273* (citing *Bell v. Blue Cross of California (2005) 131 Cal.App.4th 211, 218, 31 Cal. Rptr. 3d 688)*.

With this background in mind, Defendant Anthem argues that the Plaintiff UCL claim (and, for that matter, the declaratory relief claim) essentially seeks to regulate and supervise health plans (and the prompt pay laws), in contravention of the DMHC's authority. Paragraph 26, for instance, alleges in **[*18]** pertinent part that "Anthem has violated the UCL by systematically and repeatedly violating California's emergency services reimbursement laws, prompt payment laws, failing to timely remit reimbursement, interest, and penalties, and to otherwise comply with California's prompt payment laws, remitting payments to Anthem's enrollees instead of to providers, and performing other unfair acts of which plaintiff is presently unaware."[19] There are two theories of alleged unlawful conduct: 1) Anthem's failure "to implement claims procedures to adequately identify and reimburse non-contracted providers for emergency services provided to its enrollees, as required by California law"[20] ; and 2) Anthem's failure to "unlawfully and improperly calculate[] payment for services based on its non-contracted rates that are well below the reasonable value of the specialists' emergency services."[21]

According to Defendant Anthem, one court has rejected the notion that the failure to implement a reimbursement methodology that complies with the *Gould* factors violates California's prompt pay laws. *See NorthBay Healthcare Grp. - Hosp. Div. v. Blue Shield of Cal. Life & Health Ins. (N.D. Cal. 2018) 342 F.Supp.3d 980, 988*. In *NorthBay Healthcare Group*, the federal district court granted the motion of Blue **[*19]** Shield (a health care service plan) for summary judgment against a nonprofit healthcare organization (NorthBay Healthcare Group). Among other claims, NorthBay alleged that Blue Shield engaged in unfair business practices under the UCL for failing to compensate NorthBay hospitals for non-contracted services, and manipulating data inputted to a flawed methodology to underpay non-contracted claims. *NorthBay Healthcare Group*, 342 F.Supp.3d at 985. The *NorthBay Healthcare* court determined that there was "no unlawful conduct that can be deduced from NorthBay's claim that BlueShield 'improperly' applied the [*Gould*] considerations....[T]he regulation and the *Gould* factors it is based on...are considered minimum criteria.... The re is no mandatory methodology to apply beyond taking consideration of the factors. Even if Blue Shield improperly applied the considerations as NorthBay alleges, implicit in that claim is that Blue Shield did consider them consistent with the minimum requirements of *Section 1300.71*."

With that said, though, the *NorthBay* court also recognizes that "[a]mple case law *supports a right to predicate UCL claims for inadequate or unpaid reimbursements on violations of Section 1371.4." NorthBay HealthCare Group*, 342 F.Supp.3d at 987 (referencing *Children's Hospital Cent. Cal. supra, 226 Cal.App.4th at 1275* (emphasis added); *Cal. Pac. Reg'l. Med. Ctr., No. 13-CV-00540-NC, 2013 WL 2436602, at *5 (N.D. Cal. June 4, 2013)*; *Prospect Med. Grp., Inc. v. Northridge Emergency Med. Grp. (2009) 45 Cal.4th 497, 505, 87 Cal. Rptr. 3d 299, 198 P.3d 86))*.

Bell v. Blue Cross of California, supra, 131 Cal.App.4th at 216 states that the DMHC's "jurisdiction **[*20]** is not exclusive and there is nothing in *section 1371.4* or in the Act generally to preclude a private action under the UCL or at common law on a quantum meruit theory." *Bell, 131 Cal.App.4th at 216*. The *Bell* court further referenced the DMHC's support of private enforcement, and the DMHC's position "that a 'provider's private action or reimbursement under the ...UCL does not infringe upon the Department's jurisdiction over the Knox-Keene Act." *Bell at 218*. The *NorthBay* court ultimately rejected the UCL claim in that case, since it sought "to enjoin the *methodology* Blue Shield uses under *Section 1300.71(a)(3)(B)* and the *Gould* factors, not challenge the actual reasonable and customary value *derived* from that methodology." *NorthBay*, 342 F.Supp.3d at 987 (emphasis added).

Thus, the question presented is whether Plaintiff is challenging Anthem's *methodology* to reimburse out-of-network providers for emergency services, or the actual and reasonably customary value of the services provided *derived from* that methodology. Taking a liberal reading of the complaint at the pleading stage, the failure "to implement

---

[19] SAC, ¶26.

[20] SAC, ¶10.

[21] *Id.*

claims procedures to adequately identify and reimburse non-contracted providers for emergency services provided to its enrollees, as required by California law" alleged at ¶10 could be read **[*21]** to fall into the latter category. For Plaintiffs part, it is not challenging Anthem's methodology by which Defendant Anthem calculates the "reasonable and customary value" of medical services, or that Anthem improperly applies any of the *Gould* factors.[22]

Plaintiff, in other words, argues that it is alleging Defendant Anthem's *total failure* to apply the *Gould* factors - not *how* those factors are applied - and is seeking "to recover the value allegedly owed for a reasonable and customary reimbursement" under *Gould* and *section 1300.71(a)(3)(B)*.[23] The allegation of a failure to identify and reimburse non-contract providers for emergency services does not appear to challenge the methodology employed by Anthem. Therefore, the Court does not find that permitting the "unlawful" UCL claim to go forward at the pleading stage would allow Plaintiff to "assume general regulatory powers over health maintenance organizations through the guise of enforcing *Business and Professions Code section 17200*[.]" *Samura v. Kaiser Foundation Health Plan, Inc. (1993) 13 Cal.App.4th 1284, 1301-1302*.

The necessary implication under *§ 1371.4* is that the *Gould* factors must be followed. To the extent those factors are not being followed at all (Plaintiff argues there has been a "total failure" to follow the *Gould* factors), this provides the necessary predicate for a UCL "unlawful" **[*22]** violation. In that sense, *NorthBay* is not persuasive at the pleading stage.

If, following discovery, it becomes apparent that it is really Anthem's *methodology* Plaintiff is contesting, and that Plaintiff is in fact challenging *how* the *Gould* factors are applied (as opposed to *whether* the factors are applied) then this could be the appropriate subject of a motion for summary adjudication. Under these circumstances, at the pleading stage, a UCL unlawful claim has been stated, premised on a violation of the Knox-Keene Act.

(2) "Fraudulent" UCL claim

While the SAC invokes the definition of unfair competition under *§ 17200* as including any unlawful, unfair, or fraudulent business practice, the SAC itself does not allege a basis for a UCL claim based on fraudulent acts. As such, the references to the UCL "fraudulent" allegation are stricken.

(3) "Unfair" UCL claim

Defendant Anthem argues the UCL "unfair" claim fails because Plaintiff is neither a competitor of Defendant Anthem nor a consumer of Anthem's services. As observed by the *NorthBay* court, "[t]he 'unfair' prong of the UCL prohibits a business practice if it 'violates established public policy or if it is immoral, unethical, oppressive or unscrupulous **[*23]** and causes injury to consumers which outweighs its benefits.'" *NorthBay Healthcare Group, supra*, 342 F.Supp.3d at 988. *B&P Code § 17204* provides that actions for UCL relief may be brought, among others, "by a person who has suffered injury in fact and has lost money or property as a result of the unfair competition."

There is no carve-out under the UCL requiring "unfair" claims to be brought by either a competitor or a consumer. *Herr v. Nestle U.S.A., Inc. (2003) 109 Cal.App.4th 779, 135 Cal. Rptr. 2d 477* establishes that a plaintiff need not be a consumer or a competitor in order to bring a UCL "unfair" claim. The *Herr* court rejected as meritless the defendant's argument that the UCL was intended to protect consumers and competitors, and not employees (and that the plaintiff's remedy for age discrimination was therefore limited to FEHA). *Herr, 109 Cal.App.4th at 789*. In doing so, the *Herr* court referenced *B&P Code § 17205* which provides that "[u]nless otherwise expressly provided, the remedies or penalties provided by this chapter are *cumulative to each other and to the remedies or penalties available under all other laws of this state*." While two federal district court cases *[Centre for Neuro Skills v. Blue*

---

[22] See Opposition at 7:8-10.

[23] Opposition at 7:13-15.

*Cross of California, 2013 WL 5670889, at *9 (E.D. Cal. Oct. 15, 2013)* and *Almost v. Equilon Enters., 2012 WL 3945528, at *9 (N.D. Cal. Sept. 12, 2012))* dismissed UCL claims where the plaintiffs were not consumers or competitors, *Herr* is a Court of Appeal decision out of our own Second District, and is binding. Thus, the Defendant's argument **[*24]** that the UCL "unfair" claim cannot go forward on grounds that Plaintiff is neither a consumer nor a competitor with Anthem is not persuasive.

(4) Monetary and Injunctive Relief

Defendant Anthem next argues that there is no basis for the monetary or injunctive relief sought.

(a) Restitution

Under the UCL, "to establish the right to restitution under *§ 17203*, a plaintiff must do more than merely prove he or she has suffered economic injury as the result of unfair competition. 'Restitution under *section 17203* is confined to restoration of any interest in 'money or property, real or personal, which may have been *acquired* by means of such unfair competition.' ... A restitution order against a defendant thus requires both that money or property have been lost by a plaintiff, on the one hand, and that it have been acquired by a defendant, on the other.'" *Beraze v. Wilshire Landmark, LLC 2014 WL 729216 (Feb. 24, 2014) at *10* (citing *Kwikset Corp. v. Superior Court (2011) 51 Cal.4th 310, 336, 120 Cal. Rptr. 3d 741, 246 P.3d 877)*.

The Court in *Korea Supply Co. v. Lockheed Martin Corp. (2003) 29 Cal.4th 1134, 131 Cal. Rptr. 2d 29, 63 P.3d 937* referenced the definition of "restitution" set forth in *Kraus v. Trinity Management Services, Inc. (2000) 23 Cal.4th 116, 96 Cal. Rptr. 2d 485, 999 P.2d 718* - an order "'compelling a UCL defendant to return money obtained through an unfair business practice *to those persons in interest from whom the property was taken*, that is, to persons who had an ownership interest in the property or those claiming through that person.'" *Korea Supply at 1144-145* (citing *Kraus, 23 Cal.4th at pp. 126-127*) (emphasis **[*25]** added.) See also *B&P Code § 17203*. The Court further noted that "[u]nder the UCL, an individual may recover profits unfairly obtained to the extent that these profits represent monies given to the defendant or benefits *in which the plaintiff has an ownership interest." Korea Supply at 1148* (emphasis added). In other words, "[t]he object of restitution is to restore the status quo by returning to the plaintiff funds in which he or she has an ownership interest." *Id.*

"[T]he notion of restoring something to a victim of unfair competition includes two separate components. The offending party must have obtained something to which it was not entitled *and* the victim must have given up something which he or she was entitled to keep." *Day v. AT&T Corp. (1998) 63 Cal.App.4th 325, 340, 74 Cal. Rptr. 2d 55*.

Damages are unavailable under *§§ 17200, et seq.* *See* *Bank of the West v. Superior Court (1992) 2 Cal.4th 1254, 1266, 10 Cal. Rptr. 2d 538, 833 P.2d 545*; *Heller v. Norcal Mut. Ins. Co. (1994) 8 Cal.4th 30, 45, 32 Cal. Rptr. 2d 200, 876 P.2d 999*; *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co. (1999) 20 Cal.4th 163, 179, 83 Cal. Rptr. 2d 548, 973 P.2d 527*.

According to Defendant Anthem, the measure of the monetary relief Plaintiff seeks cannot be characterized as restitution, because it has no vested interest in any money or property in Anthem's possession. To the contrary, Anthem argues the monetary relief is, in essence, damages, which Plaintiff cannot recover under its UCL claim.

The question here is whether the money Plaintiff seeks was once in its possession, or represents a sum in which Plaintiff has a **[*26]** vested/ownership interest. Plaintiff's position is that the unpaid amounts for emergency services are akin to earned wages. These allegations are sufficient to survive the demurrer.

Defendant Anthem relies on *Korea Supply, supra*, for the notion that the monetary relief sought is damages and not restitution. In *Korea Supply*, the plaintiff (KSC) was a business representing manufacturers of military equipment. KSC was representing a company called MacDonald Dettwiler and Associates, Ltd. in a bid for a contract from the government of the Republic of Korea. MacDonald ultimately lost the bid to Lockheed Martin Tactical Systems, Inc. KSC sued Lockheed Martin under the UCL, alleging that it would have received a $30 million commission had MacDonald won the bid, and that Lockheed Martin had engaged in various unfair business practices in procuring the bid. The California Supreme Court concluded that the sum KSC sought was nonrestitutionary disgorgement of profits, and that KSC's characterization of the relief sought as "restitution" was inaccurate because KSC had neither an ownership interest or a vested interest in the money it sought to recover.

Defendant argues that "[j]ust as KSC's interest in the commission **[*27]** in *Korea Supply Company* was not 'vested' because it was contingent on an uncertain event (i.e., MacDonald winning the bid) so too here Plaintiff's *restitutionary* interest in the reasonable and customary value of her services is contingent on an uncertain event (*i.e.*, the identification of claims for reimbursement as emergent)."[24]

However, *Korea Supply* is distinguishable on that point. In *Korea Supply*, "KSC merely alleged that it had an economic expectancy in that it was acting as MacDonald Dettwiler's broker and it expected a commission if the contract was awarded to MacDonald Dettwiler." *Korea Supply, 29 Cal.4th at 1157*. In contrast, Plaintiff here alleges that it, as well as the class, have *performed* the alleged emergent services for which they have not been compensated due to Defendant's failure to characterize those services as emergent. At the pleading stage, the measure of Plaintiff's monetary loss may be viewed as restitution.

John Muir Health v. Global Excel Management, 2015 WL 1359154 (N.D. Cal. March 25, 2015) aids in the analysis. In that case, plaintiff (a non-profit corporation that provides medical care to patients) sued defendant (a Canadian for-profit corporation that arranges for the provision of health care services to its enrollees and/or pays for or reimburses part or all of the cost **[*28]** for those services). Plaintiff alleged that it provided medical treatment to certain individuals enrolled in in defendant's health plan, and billed defendant certain sums for the treatment of the enrollees. Defendant paid only a portion of the sums allegedly owed to the plaintiff, despite plaintiff's demands for an additional $459,985.90. Following various amendments, the plaintiff alleged claims for quantum meruit and violation of the UCL. Defendant moved to strike various portions of the complaint, including the request for $459,985.90 sought in the UCL claim. Defendant argued in part that this amount did not represent restitution (and was unavailable under the UCL); instead, the defendant opined that the amount was "really a damages claim in disguise, because it has requested the same amount in its quantum meruit claim." *John Muir Health v. Global Excel Management, 2015 WL 1359154 at *4*.

The federal district court denied the motion to strike. The court first observed that a plaintiff can state valid claims for the same amount as both damages and restitution. *John Muir Health v. Global Excel Management* at *5. The court reasoned that "Plaintiff can state a valid claim that it conferred a benefit directly on Defendant-namely, the stabilizing emergency **[*29]** care of Defendant's enrolled beneficiary.... Plaintiff can also allege that Defendant had a legal duty to reimburse it for this benefit under *section 1371.4(b)*, that Defendant failed to do so, and that Plaintiff is entitled to restitution as a result." *John Muir Health v. Global Excel Management* at *5.

The situation in *John Muir Health* is analogous to the case at bar. Like in *John Muir Health*, plaintiff's UCL claim seeks a reimbursement of funds which it claims are due and owing for services rendered (and which conferred a benefit on Defendant). Due to Defendant Anthem's alleged UCL violation and failure to characterize services as emergent, Plaintiff can allege that Defendant had a legal duty to reimburse it for the alleged emergent services performed and that it is entitled to restitution.

For these reasons, Plaintiff has adequately stated a basis, at the pleading stage, to seek restitution.

(b) Injunctive relief

---

[24] Defendant's Reply at 6:9-13.

Defendant Anthem also challenges the prayer for injunctive relief under the UCL. *In re Tobacco Cases II, supra*, discussed the scope of a Court's authority to order injunctive relief:

> "A trial court has broad authority to enjoin conduct that violates *section 17200*. [Citation.] That authority is expansive but not unlimited. Although the **[*30]** [UCL] imposes liability for past acts, in order to grant injunctive relief under *section 17204* or *section 17535*, there must be a threat that the wrongful conduct will continue. 'Injunctive relief will be denied if, at the time of the order of judgment, there is no reasonable probability that the past acts complained of will recur, i.e., where the defendant voluntarily discontinues the wrongful conduct.' " (*Colgan, supra, 135 Cal.App.4th at p. 702, 38 Cal.Rptr.3d 36*.) " 'The grant or denial of a permanent injunction rests within the trial court's sound discretion and will not be disturbed on appeal absent a showing of a clear abuse of discretion.' " [Citation.] *In re Tobacco II Cases, supra, 240 Cal.App.4th 779, 802-803*.

The Legislature "intended ... to permit courts to enjoin ongoing wrongful business conduct in whatever context such activity might occur." *See* *Barquis v. Merchants Collection Ass'n (1972) 7 Cal.3d 94, 111*; see also *Committee on Children's Television, Inc. v. General Foods Corp. (1983) 35 Cal.3d 197, 210, 197 Cal. Rptr. 783, 673 P.2d 660*. However, "[t]he general rule is that 'injunctive relief will be denied if at the time of the order or judgment, there is no reasonable probability that the past acts complained of will recur, i.e., where the defendant voluntarily discontinues the wrongful conduct.'" California Practice Guide, *B&P Code § 17200* Practice, ¶8:35 (The Rutter Group 2019) (citing *California Service Station & Auto. Repair Ass'n. v. Union Oil of Calif. (1991) 232 Cal.App.3d 44, 57, 283 Cal. Rptr. 279)*. "Injunctive relief has no application to wrongs which have been completed [citation], absent a showing **[*31]** that past violations will probably recur." *People v. Toomey (1984) 157 Cal.App.3d 1, 20, 203 Cal. Rptr. 642*. *B&P Code § 17205* states that the remedies provided under the UCL "are cumulative to each other and to the remedies or penalties available under all other laws of this state."

Further, injunctions may be granted, among other instances, "[w]here pecuniary compensation would not afford adequate relief and "[w]here it would be extremely difficult to ascertain the amount of compensation which would afford adequate relief." *Civil Code § 3422*.

Defendant argues that injunctions are not proper where there is a plain, complete, speedy and adequate remedy at law. Here, though, as set forth above, the remedies under the UCL are cumulative to other potential remedies. Thus, despite the alternative allegation of quantum meruit relief, Plaintiff also is entitled to plead its UCL violation.

Moreover, there is no legal remedy sought in the instant complaint in the form of damages. The terms of any injunction would have to be based on further events in the case, as they develop, and Plaintiff is not tasked with defining the precise scope of that injunction at the pleading stage. For now, Plaintiff seeks injunctive relief (in addition to restitution and interest) "to correct Anthem's failure **[*32]** to comply with California's emergency services reimbursement laws, the prompt payment laws, and the practice of paying Anthem enrollees instead of the non-contracting providers."[25] This is sufficient at the pleading stage.

(c) Prejudgment interest and statutory penalties

Defendant argues that Plaintiff cannot recover statutory penalties and interest under the UCL, because those penalties have not been adjudicated, and because the statutory remedy does not vest until final judgment.

Defendant's pleading challenge is a demurrer, and not a motion to strike. A demurrer does not lie to a portion of a cause of action. See *Kong v. City of Hawaiian Gardens Redevelop. Agency (2003) 108 Cal.App.4th 1028, 1046, 134 Cal. Rptr. 2d 260)*. In any event, though, the Court of Appeal in *Espejo v. The Copley Press, Inc. (2017) 13 Cal.App.5th 329, 221 Cal. Rptr. 3d 1* stated as follows with respect to a court's authority to award prejudgment interest in a UCL action:

---

[25] SAC, ¶28.

> Although a court may not award prejudgment interest under Civil Code section 3287, subdivision (a), to a restitutionary award under the UCL, the court nevertheless has discretion in *equity* to award prejudgment interest on a UCL award as a component of restitution. The policy underlying an award of prejudgment interest is to make the injured party whole for the accrual of wealth that could have been produced during the period of loss. *Espejo v. The Copley Press, Inc. (2017) 13 Cal.App.5th 329, 375, 221 Cal. Rptr. 3d 1* (citations omitted; emphasis added). **[*33]**

Thus, it is apparent that the Court, in its equitable discretion, could award prejudgment interest on a UCL award. It is premature to strike the prayer for prejudgment interest at this time.

With respect to statutory penalties, "[i]n a suit under the UCL, a public prosecutor may collect civil penalties, but a private plaintiff's remedies are 'generally limited to injunctive relief and restitution.'" *Demetriades v. Yelp, Inc. (2014) 228 Cal.App.4th 294, 300, fn.3, 175 Cal. Rptr. 3d 131* (citing *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527* and *B&P Code §§ 17203*, *17206*). Plaintiff's prayer seeks, among other relief, "late payment penalties[.]"[26] The Court was unable to find authority that provides that late payment penalties are an available remedy under a private plaintiff's UCL claim.[27] Accordingly, the Court strikes the request for late payment penalties.

(5) Declaratory relief claim

Defendant demurs to the declaratory relief claim, on grounds that the Plaintiff's claims exclusively concern past events (emergency services rendered by Plaintiff) "and should not be a substitute for the procedure contemplated by the Legislature (*i.e., quantum meruit* claims)."[28] Defendant further submits that declaratory relief "is particularly inappropriate where the Court can readily make the requested determination when evaluating Plaintiffs **[*34]** other causes of action."[29]

To state a claim for declaratory relief, a plaintiff must allege:

> 1. Person interested under a written instrument or a contract; or
> 2. a declaration of his or her rights or duties;
> a. with respect to another; or
> b. in respect to, in, over or upon property; and,
> 3. an actual controversy.

CCP § 1060; *Ludgate Ins. Co. v. Lockheed Martin Corp. (2000) 82 Cal. App. 4th 592, 605-06, 98 Cal. Rptr. 2d 277*; *Bennett v. Hibernia Bank (1956) 47 Cal. 2d 540, 549, 305 P.2d 20*. *See also* *City of Cotati v. Cashman (2002) 29 Cal. 4th 69, 80, 124 Cal. Rptr. 2d 519, 52 P.3d 695* ("'an actual, present controversy must be pleaded specifically" and "the facts of the respective claims concerning the [underlying] subject must be given.'"); *Osseous Technologies of Amer., Inc. v. DiscoveryOrtho Partners LLC (2010) 191 Cal.App.4th 357, 364, 119 Cal. Rptr. 3d 346*. Procedurally, with exceptions, a demurrer must be overruled, if an actual controversy is alleged, even if plaintiffs are not entitled to a judgment in their favor. *Osseous Technologies of Amer., Inc. v. DiscoveryOrtho Partners LLC (2010) 191 Cal.App.4th 357, 364, 119 Cal. Rptr. 3d 346* (judges lack discretion to dismiss claims for declaratory relief where complaints are sufficiently alleged and reveal that the relief is entirely appropriate); *Lockheed Martin Corp. v. Continental Ins. Co., (2005) 134 Cal. App. 4th 187, 221, 35 Cal. Rptr. 3d 799*, *disapproved on other grounds by* *State v. Allstate Ins. Co. (2009) 45 Cal.4th 1008, 1036 n.11, 90 Cal. Rptr. 3d 1, 201 P.3d 1147*; *Ludgate Ins. Co. v. Lockheed Martin Corp.* (2000) 82 Cal.App.4lh 592, 606; *Farmers Ins. Exchange v. Zerin (1997) 53 Cal.*

---

[26] SAC, Prayer, ¶1.

[27] The *Cortez* decision does not hold that such penalties are available to a private plaintiff. In light of the *Demetriades* court's recognition that a private plaintiff's penalties are generally limited only to injunctive relief and restitution, *Cortez* is not persuasive.

[28] Demurrer at 14:1-4.

[29] Demurrer at 14:10-11.

App. 4th 445, 460, 61 Cal. Rptr. 2d 707 ("[s]trictly speaking, a demurrer is not an appropriate weapon to attack a claim for declaratory relief inasmuch as the plaintiff is entitled to a declaration of its rights, even if adverse.") Also, "[t]he mere circumstance that another remedy is available is an insufficient ground **[*35]** for refusing declaratory relief, and doubts regarding the propriety of an action for declaratory relief pursuant to [CCP §] 1060 generally are resolved in favor of granting relief." *Filarsky v. Sup. Ct. (2002) 28 Cal.4th 419, 433, 121 Cal. Rptr. 2d 844, 49 P.3d 194*.

The SAC alleges as follows, with respect to the declaratory relief claim:

> [A]n actual controversy now exists between Plaintiff and Anthem regarding their rights and liabilities under the emergency services reimbursement laws, the prompt payment laws, and Anthem's obligation to pay non-contracting providers instead of Anthem enrollees. These claims do not include any claims arising under federal plans, such as ERISA, FEHBA, Medicare Advantage, and Medi-Cal plans.[30]

Taking a liberal reading of the SAC, Anthem's alleged practice is ongoing. Thus, Defendant's argument that declaratory relief "should not be used to adjudicate past events" is not persuasive.[31] Further, while there may be other remedies available to address Defendant Anthem's allegedly wrongful conduct, this would not be grounds for refusing declaratory relief, if proven true. In any event, while Plaintiff may ultimately be required to make an election of remedies at an appropriate stage of the case, the demurrer to the declaratory relief claim is premature, **[*36]** and is overruled.

(6) Demurrer as to ABCLH

Separately, Defendant ABCLH demurs to the complaint in its entirety (as opposed to just the UCL and declaratory relief claims, to which Defendant Anthem Blue Cross demurs), on grounds that ABCLH is not a health plan and is not subject to the Knox-Keene Act. Instead, *Blue Cross of California, Inc., supra*, 180 Cal.App.4th at 1242 recognized that "ABCLH is not a health care service plan, but a life and disability insurer subject to the Insurance Code and regulated by the California Department of Insurance."

With respect to Defendant ABCLH, the SAC alleges:

> Anthem Blue Cross Life and Health Insurance Company has engaged in a practice of failing to pay the appropriate rates of non-contracting providers when they have performed emergency services for its enrollees as hospital-admitted patients. Anthem Blue Cross Life and Health Insurance Company has failed to implement claims procedures to adequately identify and reimburse non-contracted providers for emergency services provided to its enrollees, as required by California law, including failing and refusing to recognize services performed by non-contracting specialists as emergency services when those services are performed on an emergent basis in a hospital instead **[*37]** of in an emergency room. Anthem Blue Cross Life and Health Insurance Company does not identify and recognize these emergency services, provided after the patient has been admitted to the hospital, but prior to the time when care has resulted in the stabilization of the patient, and unlawfully and improperly makes payments that are below the rates Anthem Blue Cross Life and Health Insurance Company applies to contracted providers, and well below the reasonable value of the specialists' emergency services.[32]

According to Defendants, the SAC's allegations against ABCLH fail because it is not subject to the DMHC. While it is true that ABCLH, as a life and disability insurer, is not subject to the DMHC (but is instead regulated by the Department of Insurance), the SAC also invokes Insurance Code §§ 10112.7 and 10123.13 as bases for the claims. Paragraphs 11 and 15 allege:

---

[30] SAC, ¶31.

[31] Demurrer at 13:24.

[32] SAC, ¶12.

> 11. Insurance companies such as Anthem Blue Cross Life and Health Insurance Company are subject to the Insurance Code. *Insurance Code section 10112.7* provides that "A group or individual health insurance policy issued, amended, or renewed on or after January 1, 2014, that provides or covers any benefits with respect to services in an emergency department of a hospital shall cover emergency **[*38]** services for non-contracted providers in a manner that is not more restrictive than for contracted providers.
>
> ...
>
> 15. Similarly, pursuant to *Insurance Code section 10123.13*, health insurers must reimburse any claim, or if contested, any uncontested portion of a claim, as soon as practicable, but no later than 30 working days after receipt of the claim, or provide written notice that the claim is contested or denied and the specific reasons therefor within the same time limits. For any claim contested or denied on the basis that the plan has not received sufficient information, reimbursement must be paid with 30 working days after receipt of any necessary information. For any claim not timely reimbursed, interest accrues at a rate of 10% per annum.[33]

As Defendants note, Plaintiffs cannot premise a UCL claim on violation of *Insurance Code § 790.03* (and particularly *§ 790.03(h)(3)*). *Bates v. Hartford Life and Ace. Ins. Co.* (CD. Cal. 2011) 765 .Supp.2s 1218, 1221. *Section 790.03(h)(3)* defines as an "unfair method[] of competition and unfair and deceptive act[] or practice[] in the business of insurance" an insurer's knowing "fail[ure] to adopt and implement reasonable standards for the prompt investigation and processing of claims arising under insurance policies."

The allegations **[*39]** above, however, while seemingly overlapping in part with the conduct prohibited by *§ 790.03(h)(3)*, also are broader. In *Zhang v. Superior Court (2013) 57 Cal.4th 364, 159 Cal. Rptr. 3d 672, 304 P.3d 163*, the California Supreme Court the California Supreme Court determined that "when insurers engage in conduct that violates both the UIPA and obligations imposed by other statues or the common law, a UCL action may lie. The Legislature did not intend the UIPA to operate as a shield against any civil liability." *Zhang, 57 Cal.4th at 384*. While *Zhang* was admittedly a first party case (*Zhang, supra, at 369, fn.2*), there is no specific prohibition on third party actions based on grounds independent from *§ 790.03*, where that insurer's conduct also violates *§ 790.03*. Thus, it it is premature at the pleading stage to eliminate entirely the allegations against Defendant ABCLH.

III.

RULING AND ORDER

For the foregoing reasons, the demurrer is overruled in its entirety. In overruling the demurrer, however, the Court also strikes the request for late payment penalties and the references to a "fraudulent" UCL claim.

The Court sets a further status conference in this matter for Tuesday, August 18, 2020 at 2 p.m. The parties shall submit a joint statement to the Court by August 11, 2020 addressing proposals for how to proceed in subsequent phases of the litigation. **[*40]**

Opinion

MEMORANDUM RE: DAUBERT MOTIONS

Baylson, J.

Table of Contents

I. Introduction[1]

Plaintiffs in this action are twelve large homebuilders ("Homebuilder Plaintiffs")[2] that operate in various parts of the United States. They have brought suit against several drywall manufacturers in the Northern District of California alleging a conspiracy to fix prices. The case was consolidated for pretrial proceedings in this Court by a Judicial Panel on Multidistrict Litigation (the "MDL").

The Court separated the plaintiffs in the MDL into three groups: the Direct Purchaser Plaintiffs ("DPPs"); the Indirect Purchaser Plaintiffs ("IPPs"); and the Homebuilder Plaintiffs. The Court certified a class of DPPs, and that case settled several years ago. Although certification of a proposed class of IPPs was **[*4]** denied, a settlement was subsequently reached in the IPP action as well. In addition to this case, there is one opt-out action, Home Depot v. LaFarge, Docket No. 18 5305, that is currently pending.

In the Homebuilder Plaintiffs action, there have been a number of pretrial proceedings, which have been extensively summarized in other memoranda. Much of the discovery that took place centered on the class actions, and pursuant to an agreement, Homebuilder Plaintiffs secured a great deal of evidence from the extensive class actions discovery.

Pending before the Court are three motions that challenge the admissibility of various expert testimony under *Federal Rule of Evidence ("Rule") 702* and Daubert:

- **[ECF 321] Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, David Hall**. Hall is a certified public accountant who gave expert opinions on the concept of downstream pass through.[3]

All ECF references are to the Ashton Woods docket, 15-1712, unless the citation states otherwise. The Class Actions docket is available at 13 2437. Reporter and Westlaw citations for opinions issued in this litigation are provided in footnotes.

[2] Plaintiffs are Ashton Woods Holdings LLC ("Ashton Woods"); Beazer Homes Holdings Corp. ("Beazer Homes"); CalAtlantic Group, Inc. ("CalAtlantic"); D.R. Horton Los Angeles Holding Company, Inc. ("D.R. Horton"); Hovnanian Enterprises, Inc. ("Hovnanian"); KB Home; Meritage Homes Corporation ("Meritage Homes"); M/I Homes, Inc. ("M/I Homes"); Pulte Home Corporation ("Pulte Home"); The Drees Company ("Drees"); Toll Brothers, Inc. ("Toll Brothers"); and TRI Pointe Homes, Inc. ("TRI Pointe").

[3] There are two types of pass through that are discussed in the Daubert motions: (1) *upstream pass through*, which refers to whether Homebuilder Plaintiffs paid higher prices for drywall because of overcharges resulting from the alleged price-fixing conspiracy that were passed on to each plaintiff; and (2) *downstream pass through*, which refers to whether increases in prices of drywall could have caused increases in prices of homes sold by Homebuilder Plaintiffs to homebuyers. In other words, *upstream pass through* refers to the price increase that is passed from the manufacturer to the Homebuilder Plaintiff, and *downstream pass through* refers to the price increase that is passed from the Homebuilder Plaintiff to the ultimate homebuyer.

• **[ECF 320] Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, Dr. Robert Willig**. Dr. Willig is an economist who gave expert opinions on various issues including upstream and downstream pass through; the likelihood of conspiracy; and market dynamics.

• **[ECF 319] Defendants' Motion to Preclude the [*5] Testimony of Homebuilder Plaintiffs' Expert, Dr. Daniel Ingberman**. Dr. Ingberman is an economist who gave expert opinions on the fact of Homebuilder Plaintiffs' injury and the calculation of damages.

Following extensive briefing on the Daubert motions, oral argument was delayed because the parties advised the Court that they were attempting to settle the case. Several original Defendants have since settled with Homebuilder Plaintiffs (the "Settling Defendants"), but the case continues against L&W (a subsidiary of USG Corporation) and PABCO (together, "Defendants").

The Court held oral argument on the pending Daubert motions on January 9, 2020. The parties submitted supplemental briefing after the hearing. (Docket No. 13-2437, ECF 899 (Pls.' Supp. Mem.); ECF 437 (Defs.' Supp. Mem.).) The Court requested that the parties provide an additional round of supplemental briefing answering specific questions related to the motions regarding Hall and Dr. Ingberman. (ECF 439.) The parties submitted the requested briefing thereafter. (ECF 440, Pls.' Supp. Mem. re Ingberman; ECF 441, Pls.' Supp. Mem. re **[*6]** Hall; ECF 442, Defs.' Supp. Mem. re Hall; ECF 443, Defs.' Supp. Mem. re Ingberman.)

Stated briefly, governing Third Circuit law[4] liberally permits experts to testify as long as the expert has established basic qualifications; offers reliable testimony, and gives testimony that fits the facts of the case. Applying this standard, and after considering the arguments of the parties articulated in the briefing, at oral argument, and in the supplemental materials, the Court will **GRANT** Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, David Hall, (ECF 321); **DENY** Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, Dr. Robert Willig, (ECF 320); and **DENY** Defendants' Motion to Preclude the Testimony of Homebuilder Plaintiffs' Expert, Dr. Daniel Ingberman, (ECF 319).

II. Background

The factual background and chronology of this case have been summarized comprehensively in previous memoranda. (ECF 390;[5] ECF 397.[6]) The Court therefore limits its background discussion to the facts and principles that relate to the pending Daubert motions.

The Court notes that because the briefing related to Defendants' Motion to Preclude Dr. Ingberman uses a different reference point for pass through, the upstream and downstream pass through terms take on different meaning in those papers. For purposes of this Memorandum, upstream pass through refers to the price increase passed from manufacturer to Homebuilder Plaintiff, and downstream pass through refers to the price increase passed from Homebuilder Plaintiff to homebuyer.

[4] The Court's decision on Defendants' Motion to Dismiss Homebuilder Plaintiffs' State-Law and *§ 1 Sherman Act* Claims held that "Third Circuit law is binding in this case on federal issues," but that "special consideration" would be given to Ninth Circuit law given that the action may be transferred back to the Northern District of California. (ECF 101 at 4, 5.) Both of the remaining Defendants, L&W and PABCO, and Homebuilder Plaintiffs have advised the Court that they consider the law of the Third Circuit, not the law of the Ninth Circuit, to be binding. (ECF 430 (L&W); ECF 431 (PABCO); ECF 432 (Homebuilder Plaintiffs).)

[5] Reporter Citation: *In re Domestic Drywall Antitrust Litig., 399 F. Supp. 3d 280 (E.D. Pa. 2019)* (Memorandum re Motion for Summary Judgment (Choice-of-Law)) (Baylson, J.).

[6] Westlaw Citation: *Ashton Woods Holdings LLC v. USG Corp. (In re Domestic Drywall Antitrust Litig.), MDL No. 13-2437, Civil Action No. 15-cv-1712, 2019 U.S. Dist. LEXIS 120522, 2019 WL 3254090 (E.D. Pa. July 19, 2019)* (Memorandum re USG Defendants' Motion for Summary Judgment) (Baylson, J.).

A. Elements of Price-Fixing Case

In this antitrust price-fixing case, Homebuilder **[*7]** Plaintiffs have the burden to show three elements of proof.

First, Homebuilder Plaintiffs must show that Defendants conspired to fix prices. Defendants contest the existence of a conspiracy but the Court previously determined Homebuilder Plaintiffs produced sufficient evidence that, if credited by the trier of fact, would establish these Defendants engaged in an agreement to increase prices and eliminate job quotes. Therefore, the Court properly denied the Motion for Summary Judgment as to Defendants. (ECF 397.)

Although the price of drywall increased each year from 2012 to 2015, the Court limited the conspiracy period to the 2011 and 2012 conduct that led to "the price increases for 2012 and 2013." (ECF 93 at 6.) The Court found that the facts alleged were "insufficient to set out any plausible claims based on the 2014 and 2015 price increases."[7] (Id.) Despite this ruling, Homebuilder Plaintiffs (with expert support) asserted that the effects of the illegal price-fixing agreement continued in calendar years 2014 and 2015. The Court has determined that Homebuilder Plaintiffs may include proof of damages for those years. See id. at 8 n.5 ("The parties should not confuse [the conspiracy] window with **[*8]** the possibly different time period for the calculation of damages. It is possible that Homebuilder Plaintiffs . . . may be able to prove damages for a broader time period than the scope of discovery and liability.").

Second, Homebuilder Plaintiffs have the burden of proving the fact of injury. The Court determined that California law will apply to Homebuilder Plaintiffs' state antitrust claims arising from (a) purchases made in states that repealed the rule of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, barring indirect purchasers from recovering against antitrust violators ("repealer states"), and (b) purchases made in states that did not repeal Illinois Brick ("nonrepealer states"). (ECF 400 ¶ 10.)[8]

Third, Homebuilder Plaintiffs must prove compensable injuries. For the reasons discussed in the Court's October 3, 2019 Memorandum, Homebuilder Plaintiffs are permitted to proceed on an "umbrella" theory of damages. That is, they may seek damages for prices that were charged by drywall sellers that were not involved in the price-fixing conspiracy, but whose prices were artificially high due to the alleged conspiratorial behavior of Defendants and Settling **[*9]** Defendants. (ECF 414, Umbrella Damages Opinion at 22.)[9]

B. Summary of Likely Presentation of Facts at Trial

Before examining the challenged expert opinions that are the subject of the pending Daubert motions, it is important to summarize how the facts are likely to be presented at trial. This will provide context for the following analysis of the admissibility of the expert testimony proffered by the parties.

---

[7] The Court summarized the 2012 and 2013 price increases in the Memorandum re Defendants' Motions for Summary Judgment in the Class Actions. (Docket No. 13-2437, ECF 351 at 84-88 (¶¶ 100, 111, 112, 115, 116, 120, 121); 100-105.) Reporter Citation: *In re Domestic Drywall Antitrust Litig., 163 F. Supp. 3d 175, 223-26, 232-35 (E.D. Pa. 2016)* (Baylson, J.). The Court summarized the 2014 and 2015 price increases in the Memorandum re Defendants' Motion to Dismiss Homebuilder Plaintiffs' Claims Based on 2014 and 2015 Price Increases. (ECF 93 at 3-4.) Westlaw Citation: *Ashton Woods Holdings LLC v. USG Corp. (In re Domestic Drywall Antitrust Litig.), MDL No. 13-2437, Civil Action No. 15-cv-1712, 2016 U.S. Dist. LEXIS 81673, 2016 WL 3453147, at *2 (E.D. Pa. June 22, 2016)* (Baylson, J.).

[8] Westlaw Citation: *Ashton Woods Holdings LLC v. USG Corp. (In re Domestic Drywall Antitrust Litig.), MDL No. 13-2437, Civil Action No. 15-cv-1712, 2019 U.S. Dist. LEXIS 123107, 2019 WL 3326030, at *2 (E.D. Pa. July 24, 2019)* (Baylson, J.).

[9] Westlaw Citation: *In re Domestic Drywall Antitrust Litig., MDL No. 13-2437, Civil Action No. 15-cv-1712, 2019 U.S. Dist. LEXIS 172396, 2019 WL 4918675, at *12 (E.D. Pa. Oct. 3, 2019)* (Baylson, J.).

Each Homebuilder Plaintiff has presented evidence, including deposition testimony, of how they purchased drywall. The exhibits attached to Homebuilder Plaintiffs' separate statement of material facts in support of their opposition to Defendants' Motion for Partial Summary Judgment on Umbrella Damages provide some of this evidence.[10]

At trial, the owners or managers of Homebuilder Plaintiffs will testify from first-hand personal experience and business records about the volume of drywall purchased by them from different sources. The evidence in the record shows that Homebuilder Plaintiffs mainly purchased drywall from intermediaries, either distributor intermediaries (i.e., direct purchasers of drywall that eventually sold to Homebuilder Plaintiffs) **[*10]** or installer intermediaries (i.e., direct purchasers that provided drywall to Homebuilder Plaintiffs as part of an installation service, also known as turnkey installers). The Court's Umbrella Damages Opinion overviews the declarations of these intermediate purchasers regarding the extent to which they passed on the cost increases implemented by Defendants. (Umbrella Damages Opinion at 8-9, Appendix.) As Homebuilder Plaintiffs operate all over the United States, it is likely that the testimony will vary somewhat as to the individual methodology of purchase. This variation may include testimony about participation in a special regional purchase program. The volume of drywall purchased will not be difficult to prove.

From the evidence gathered in the merits discovery stage of this MDL, in which Homebuilder Plaintiffs thoroughly participated, Homebuilder Plaintiffs will be able to present evidence that would permit a jury to find there was an agreement to fix prices for certain periods of time. Homebuilder Plaintiffs will also be able to present evidence based on their business records and opinions of experts that would allow the trier of fact to determine the amount of the illegal overcharge. **[*11]**

C. The Court's Umbrella Damages Opinion

It will also be helpful to review the Court's most recent substantive memorandum in this case, which analyzed one of the theories of damages that is likely to be asserted by Homebuilder Plaintiffs at trial. The memorandum addressed Defendants' Motion for Partial Summary Judgment on Umbrella Damages, which sought a determination that Homebuilder Plaintiffs cannot seek damages for price increases that were charged by nonconspiring manufacturers ("umbrella damages") on the theory that the prices of those nonconspiring manufacturers were artificially inflated as a result of Defendants' anticompetitive conduct. The Court previously determined that California law applied to the state law claims and, interpreting California's Cartwright Act, rejected Defendants' contention that umbrella damages are categorically unavailable. (Umbrella Damages Opinion at 22.)

There are a number of distinctions that the parties and the Court have drawn over the course of this litigation. Before deciding whether and how Homebuilder Plaintiffs could seek umbrella damages, the Court had to assess the implications of two of those distinctions: the distinction between indirect **[*12]** and direct purchasers, and the distinction between damages claims brought under federal law and damages claims brought under state law.

The first distinction involved the difference between indirect and direct purchasers. Under Supreme Court precedent, *indirect* purchasers such as Homebuilder Plaintiffs are barred from seeking damages for antitrust violations under federal law.[11] (Umbrella Damages Opinion at 12-13.) More specifically, in Illinois Brick, the Supreme Court held that an indirect purchaser cannot use the direct purchaser's pass on of an overcharge as the basis for damages. *431 U.S. at 730*.

However, Illinois Brick only governs federal antitrust claims. Following Illinois Brick, a number of states passed laws that limited the Supreme Court's holding by allowing indirect purchasers to recover for antitrust claims brought

---

[10] These exhibits are filed under seal at ECF 308, ECF 308-1, ECF 308-2, ECF 308-3, ECF 308 4, ECF 308-5, and ECF 308-6.

[11] There is one limited exception to the Court's characterization of Homebuilder Plaintiffs as indirect purchasers. Two of the Homebuilder Plaintiffs, Ashton Woods and D.R. Horton, seek damages from L&W *directly*. These direct purchaser claims for damages are asserted under federal law. Pursuant to the Court's September 27, 2019 Order, (ECF 413), Homebuilder Plaintiffs submitted documentary evidence indicating that these Plaintiffs purchased directly from L&W, (ECF 417 at 4.)

under *state* law. These statutes, known as "Illinois Brick repealer" statutes, authorize indirect purchasers to recover for antitrust claims brought under state law. California passed one such statute, the Cartwright Act. The Cartwright Act is important in the context of this case because, before passing on umbrella damages, the Court had analyzed choice of law and determined **[*13]** that California law would apply to *all* of Homebuilder Plaintiffs' state law claims. (ECF 400 ¶ 10.)

The second distinction, therefore, involves the difference between damages claims brought under federal law and damages claims brought under state law. Because Homebuilder Plaintiffs did not seek umbrella damages under the Sherman Act, the Court did not reach Defendants' arguments regarding the unavailability of umbrella damages under federal law. (Umbrella Damages Opinion at 12 n.7.) And the fact that Homebuilder Plaintiffs could proceed with their antitrust claims under California law sharpened, but did not answer, the question of whether umbrella damages are available under the Cartwright Act. To resolve *that* question, the Court looked to California case law and determined that the Cartwright Act does not bar umbrella damages as a matter of law. This meant that Homebuilder Plaintiffs can proceed on a theory of umbrella damages, but need to adduce sufficient evidence to get the theory to the jury.

In summary, although Illinois Brick forbids claims for indirect purchases that are brought under federal law, Homebuilder Plaintiffs have made clear that they intend to pursue damages for indirect **[*14]** purchases under *California's Cartwright Act*. Since the Court found that the Cartwright Act does not categorically bar umbrella damages, Homebuilder Plaintiffs may pursue and present evidence on this theory at trial, along with evidence of more typical theories of antitrust damages.

III. Summary of Challenged Experts' Reports

The Daubert motions reference the reports and conclusions of four experts: Defendants' experts David Hall and Dr. Robert Willig; and Homebuilder Plaintiffs' experts Dr. Daniel Ingberman and Dr. Louis Wilde. Only three of the experts are subject to Daubert challenges: (A) Defendants' expert David Hall; (B) Defendants' expert Dr. Robert Willig; and (C) Homebuilder Plaintiffs' expert Dr. Daniel Ingberman. A summary of the conclusions and findings of these experts' reports follows.

A. David Hall's Report

Hall's Report analyzes the extent to which Homebuilder Plaintiffs passed on the increased costs of drywall resulting from the price-fixing conspiracy and responds to the report of Homebuilder Plaintiffs' expert Dr. Wilde.[12] The dispute between Dr. Wilde and Hall concerns the downstream pass through question: were Homebuilder Plaintiffs able to pass on the increased drywall **[*15]** costs to homebuyers? Dr. Wilde answers the question in the negative, while Hall answers affirmatively.

According to Dr. Wilde's analysis of economic theory, Homebuilder Plaintiffs "could not" have passed on the increase in the cost of drywall, because Homebuilder Plaintiffs do not set prices based on construction costs but rather use "the demand side of the market" to inform pricing strategies. (Wilde Report ¶¶ 7, 27.)[13] Wilde concludes that "once the decision is made to proceed with a project, there is no longer any relationship between costs and sales prices" and notes that this pricing strategy is consistent with neoclassical economic theory. (Id. ¶ 20.)

---

[12] Defendants do not make a Daubert challenge to the admissibility of the opinion of Homebuilder Plaintiffs' expert Dr. Wilde. Homebuilder Plaintiffs explained that they "only provided an expert report addressing downstream pass-through out of an abundance of caution so as to avoid being precluded from doing so in the unlikely event the Court at a later date determines that a pass through defense is available." (ECF 315 at 5 n.3.)

[13] Dr. Wilde's report, dated December 22, 2017, is available at Exhibit B to Defendants' Motion to Preclude Hall. The Wilde Report, which is filed under seal, is available at pp.5-51 of ECF 315 12.

In contrast to Dr. Wilde's theoretical approach, Hall's forensic accounting analysis involves a review of publicly available data of average annual construction costs, average annual costs of drywall, and total sales prices, as well as a survey of statements in Defendants' public filings, deposition testimony, and internal documents regarding pricing.[14] Hall declines to opine on Wilde's economic theory and instead summarizes the record evidence contradicting the conclusions of Wilde's economic analysis. In support of his conclusion **[*16]** that empirical evidence indicates Homebuilder Plaintiffs successfully passed on the increased drywall costs to homebuyers, Hall makes five conclusions:

> 1. The pass-through of increasing construction costs—including drywall costs—to home purchasers is more likely to occur in a growing and favorable homebuilding environment. Such an environment existed in the U.S. homebuilding industry from at least 2012 through 2015 when the industry experienced a resurgence that included significant increases in new home starts, average selling prices, and profitability.
> 2. The drywall cost increases at issue in this litigation—which occurred during 2012 through 2015—occurred during a period when the homebuilding industry generally experienced increasing construction materials and labor costs.
> 3. [Homebuilder] Plaintiff[s]' financial statements reflect significant growth in new home sales, average home prices, revenues, gross profits, and gross margins during 2012 through 2015.
>
> 4. Contrary to Dr. Wilde's opinion, there is substantial evidence that during 2012-2015, [Homebuilder] Plaintiff[s] considered construction costs when setting new home prices. This evidence indicates that [Homebuilder] Plaintiff[s] **[*17]** successfully passed through the increased construction costs—including drywall—to home buyers.
> 5. [Hall] disagree[s] with Dr. Wilde's opinions that estimating the impact of pass through is exceptionally difficult if not impossible and that there is not a causal connection between increased construction costs—including drywall costs—and increased new home prices.

(Hall Report at 11.)

B. Dr. Robert Willig's Report

Dr. Willig submitted two reports in this litigation. Each responds to one of Dr. Ingberman's reports. Homebuilder Plaintiffs' Daubert challenge targets testimony based on one portion of Dr. Willig's second report.

The first report, submitted January 26, 2018, largely responds to Dr. Ingberman's evidence on whether collusion would have affected the price of drywall. Dr. Willig concludes, based on economic theory and empirical evidence, that the price increases seen in the market were more likely the result of oligopoly and external market forces than collusion. Homebuilder Plaintiffs do not seek to preclude Dr. Willig from testifying regarding the contents of this first report.

Dr. Willig's second report ("Willig Report II"),[15] submitted February 26, 2018, responds to Dr. Ingberman's **[*18]** evidence on damages. The report concludes that multiple flaws in Dr. Ingberman's model undermine his damages estimates.

Relevant here, after arguing that Dr. Ingberman's forecasting model is flawed, (Willig Report II ¶¶ 19-62), Dr. Willig develops his own forecasting model which he claims is superior, (id. ¶¶ 63-74). Specifically, Dr. Willig's model does not use the "first differences" methodology that Dr. Ingberman uses, meaning, Dr. Willig asserts, that his model is more efficient than Dr. Ingberman's. (Id. ¶¶ 60-63.) Applying his non-first-differences model, he finds that actual drywall prices are consistent with demand and inconsistent with the alleged conspiracy. (Id. ¶¶ 72-73.) Dr. Willig

---

[14] The Hall Report, dated January 26, 2018, is available at Exhibit A to Homebuilders Plaintiffs' Memorandum in Support of their Motion to Preclude David Hall. The Hall Report, which is filed under seal, is available at pp.42-65 of ECF 315; pp.1-24 of ECF 315-1 at 1-24; and pp.1-18 of ECF 315-2.

[15] Willig Report II, dated February 26, 2018, is available at Exhibit A to Homebuilder Plaintiffs' Memorandum in Support of their Motion to Preclude Dr. Robert Willig. The Willig II Report, which is filed under seal, is available at pp.22-130 of ECF 413.

then conducts robustness tests and concludes that his model is robust. (Id. ¶ 74.) Dr. Willig's model is a partial basis for some of his conclusions that Dr. Ingberman's model is unreliable and that the alleged conspiracy did not affect drywall prices. (Id. ¶¶ 8, 15.)

C. Dr. Daniel Ingberman's Report

Dr. Daniel Ingberman drafted two damages report on behalf of Homebuilder Plaintiffs. In his first report, Dr. Ingberman assumed that Defendants colluded to raise the price of drywall, and evaluated **[*19]** whether Homebuilder Plaintiffs paid an artificially higher price for drywall as a result.[16] (Ingberman FoI ¶ 11.) In his second report, Dr. Ingberman estimated the amount of damages each Homebuilder Plaintiff sustained as a result of the price increases.[17] (Ingberman AoD ¶ 4.)

1. Dr. Ingberman's Fact of Injury Report

Dr. Ingberman applies economic theory about price-fixing schemes and predicts that collusive price increases in the drywall market would cause Homebuilder Plaintiffs to pay an artificially high price for drywall. (Ingberman FoI ¶ 14.) Based on several market characteristics, such as Defendants' control over the market, (id. ¶¶ 158, 168-69), and Defendants' elimination of job quotes, (id. ¶¶ 198-99), Dr. Ingberman concludes that a conspiracy to raise prices would have been effective here, (id. ¶ 141.)

Dr. Ingberman then considers whether Homebuilder Plaintiffs purchased their drywall from distribution channels that should be expected to have passed through Defendants' price increases to Homebuilder Plaintiffs. (Id. ¶ 215.) General characteristics of the distributor and turnkey channels in the drywall market suggest intermediate distributors would pass on price increases to homebuilders. **[*20]** (Id. ¶¶ 221-22, 242-43.) In fact, some of the distributors in these channels confirmed that they had done so. (Id. ¶¶ 250-65, 267-69.) Dr. Ingberman ultimately concludes that, assuming Defendants colluded, any price increases should be expected to have fully passed through to Homebuilder Plaintiffs. (Id. ¶ 271.)

2. Dr. Ingberman's Amount of Damages Report

After concluding that Defendants' price increases should be expected to have been passed through to Homebuilder Plaintiffs, Dr. Ingberman estimates the total overcharges Homebuilder Plaintiffs paid as a result of Defendants' price increases. Part of Dr. Ingberman's report is highly technical.

From the Court's review, Dr. Ingberman appears to have calculated Homebuilder Plaintiffs' damages using a regression that compared drywall prices from 2012-2015, with drywall prices during a period in which prices were untainted by collusion. (Ingberman AoD ¶¶ 9, 16-17.) Controlling for many factors, Dr. Ingberman's regression ultimately deduces that, on average, estimated overcharges on drywall sold to direct purchasers ranged from a low of fifteen percent in 2012 to a high of thirty-five percent in 2015. (Id. ¶¶ 12, 32-42.)

Dr. Ingberman then ran **[*21]** another regression to estimate how much of Defendants' overcharges passed through from intermediate distributors to Homebuilder Plaintiffs. (Id. ¶ 75.) Under a "top-and-bottom" approach, Dr. Ingberman's model was unable to reject a dollar-for-dollar pass through rate, or a percent-for-percent pass through rate. (Id. ¶¶ 93-94.) Ultimately, Dr. Ingberman's regression estimates Homebuilder Plaintiffs' damages at between $233 million and $277 million. (Id. ¶ 111.)

---

[16] The Fact of Injury ("FoI") Report, dated December 22, 2017, is available at Exhibit 4 to Defendants' Memorandum in Support of their Motion to Preclude Dr. Daniel Ingberman. The FoI Report, which is filed under seal, is available at ECF 323-4.

[17] The Amount of Damages ("AoD") Report, dated January 26, 2018, is available at Exhibit 5 to Defendants' Memorandum in Support of their Motion to Preclude Dr. Daniel Ingberman. The AoD Report, which is filed under seal, is available at ECF 323-5.

Relevant to Defendants' Motion to Preclude Dr. Ingberman, the Amount of Damages report also calculates each Defendant's share of these damages. (Id. ¶¶ 110, Ex. 9A-9E.) In Exhibit 9C, Dr. Ingberman appears to estimate how much drywall each Homebuilder Plaintiff bought from each manufacturer based on that Defendant's market share. Homebuilder Plaintiffs state that this one-page exhibit shows each manufacturer's actual sales for the twelve Homebuilder Plaintiffs in the years 2012-2015, broken down by drywall manufacturer (including Defendants). The Exhibit includes data for CertainTeed and Georgia Pacific, which, as discussed in the Umbrella Damages Opinion, were situated differently than other manufacturers. Although CertainTeed **[*22]** had been sued, the Court granted summary judgment in its favor in the class actions, (Docket 13-2437, ECF 352 ¶ 2), and Homebuilder Plaintiffs voluntarily dismissed it in this action, (ECF 178.) Homebuilder Plaintiffs never sued Georgia Pacific.

Dr. Ingberman's report states his work as to Exhibit 9C as follows:

> In Exhibit 9C, purchases are allocated among wallboard manufacturers based on state-level quantity sales shares for the period January 2012 through July 2013, the longest period during 2012-2015 for which *transaction data are available for all wallboard manufacturers*. Temple-Inland's sales share is added to Georgia-Pacific's sales share beginning in August 2013, subsequent to its acquisition by Georgia-Pacific. For Drees' Nashville and Cincinnati/Northern Kentucky divisions, CertainTeed is assumed to have 100% market share.

(Id. Notes to Exhibit 9A-9E (emphasis added).) According to Homebuilder Plaintiffs, to calculate the figures in Exhibit 9C, Dr. Ingberman:

> (i) [T]ook the undisputed manufacturer data for the longest time period available (covering sales from January 2012 through July 2013, a significant portion of the alleged conspiracy and prior to Temple-Inland selling its **[*23]** drywall business to Georgia-Pacific);
> (ii) [S]orted the manufacturer sales data by state to determine the market share of each manufacturer on a state-by-state basis; and
> (iii) [H]aving already separately calculated the amount of drywall purchased by each Plaintiff in each state (calculations which have not been challenged in any motion by Defendants), Dr. Ingberman used the state-by-state market share of each manufacturer to estimate the amount of drywall purchased by each Plaintiff in each of the states in which they purchase drywall.

(Pls.' Supp. Mem. re Ingberman at 2 (footnote omitted).) In other words, to estimate the figures in Exhibit 9C, Dr. Ingberman appears to have calculated each Defendant's share of the direct purchasing distributor market, and used that same number to estimate how much of each Defendant's drywall Homebuilder Plaintiffs bought when they purchased drywall from intermediate distributors. (Ingberman AoD Notes to Ex. 6, 8, 9A-9E.)

IV. Parties' Arguments on Daubert Motions

A. Homebuilder Plaintiffs' Motion to Preclude Testimony of David Hall[18]

Homebuilder Plaintiffs' Motion makes arguments for exclusion under all three of the Third Circuit's trilogy of *Rule 702* requirements—qualification, **[*24]** reliability, and fit. Homebuilder Plaintiffs argue that the testimony of Hall should be precluded because (1) he is not qualified; (2) his failure to use economic test makes his testimony unreliable; and (3) he does not offer scientific, technical, or specialized knowledge. (Mot. re Hall at 3.) Defendants respond in opposition to all three of Plaintiffs' reasons. (ECF 335, Opp'n re Hall at 1.) Homebuilder Plaintiffs reply in support of their Motion and respond to Defendants' arguments. (ECF 345, Reply re Hall at 1.)

[18] Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, David Hall is filed at ECF 321. The sealed Memorandum in Support of the Motion is filed at ECF 315. The Court will hereafter refer to Homebuilder Plaintiffs' Memorandum as "Mot. re Hall."

1. Hall is Unqualified

First, Homebuilder Plaintiffs argue that Hall is not qualified in this matter because he is an accountant not an economist. (Mot. re Hall at 7-8.) Since Hall lacks training in fundamental principles of antitrust, according to Homebuilder Plaintiffs, he lacks the knowledge and qualifications necessary to provide economic analysis, and therefore does not have the specialized expertise required of a witness qualified as an expert under *Rule 702*. (Id. at 10.) Defendants respond that Hall has expressed his opinion as a forensic accountant and does not purport to opine on any of Dr. Wilde's economic theories. (Opp'n re Hall at 14-15.)

2. Hall Fails to Use Economic Tests

Second, **[*25]** Homebuilder Plaintiffs argue that Hall's testimony should be precluded because his methods lack reliability. (Mot. re Hall at 16.) All three of Homebuilder Plaintiffs' reasons for why Hall's analysis is not reliable seem to revolve around the first reliability factor set forth by the Third Circuit: the testability of the expert's method and hypothesis.

Homebuilder Plaintiffs initially argue that Hall "did not attempt to perform any sort of econometric analysis . . . to demonstrate that home prices increased as a result of increased drywall costs and not some other cost or other supply and demand factor." (Id. at 18.) In other words, according to Homebuilder Plaintiffs, Hall assumed causation without attempting to determine what home sale prices would have been but for the drywall cost increases, (id. at 19), and he failed to account for other factors that may have led to the increase in home sale prices, (id. at 20.) Defendants respond that Hall did not assume causation; but rather, analyzed direct evidence that included public investor statements, deposition testimony, and internal documents that led him to the conclusion that "a relationship between [Homebuilder] Plaintiffs' construction costs and the prices **[*26]** they charge[d] to their customers" existed. (Opp'n re Hall at 24.) Defendants argue that Hall's Opinion 4, which is discussed at pp.33-61 of his Report, demonstrates that Hall conducted an extensive analysis on causation. (Id.)

Homebuilder Plaintiffs also critique Hall for failing to conduct any analyses to test the validity of his opinions. (Mot. re Hall at 24.) Homebuilder Plaintiffs take issue with Hall's use of statements he sourced from public filings, earnings calls, and depositions, arguing that Hall "frequently ignores [the] context in which these statements were made" and that this demonstrates a "fundamental misunderstanding" of pass through. (Id. at 25, 26.) Defendants respond that Homebuilder Plaintiffs' expert Dr. Wilde "relied on . . . record evidence [similar to the evidence relied on by Hall] in support of his economic theories." (Opp'n re Hall at 30.)

Finally, Homebuilder Plaintiffs argue that Hall ignored real-world evidence showing that his assumption "that drywall price increases must have been passed through because Plaintiffs continued to profit during [the conspiracy] period is not only purely speculative, it is farfetched." (Mot. re Hall at 30.) Homebuilder Plaintiffs highlight **[*27]** two pieces of evidence that, in their view, Hall erroneously ignored: the fact that new home sales constitute a small fraction—approximately ten percent—of the market for single family homes (sales of existing single-family homes comprise the remaining ninety percent of the market for single family homes); and the fact that Homebuilder Plaintiffs "price to market" (i.e., price their homes as high as the market will allow). (Id. at 31.) Homebuilder Plaintiffs argue that Hall's disregard of these facts demonstrates the unreliability of his opinion, because these facts establish that "more than 90% of the single-family home market does not consider construction costs in determining the market price of a home, [so] it is simply implausible that Homebuilder Plaintiffs would be able to raise the market price of each and every home they sold in 2012 through 2015 by the amount of the drywall cost increase." (Id.) Defendants respond that Homebuilder Plaintiffs' argument "is simply another cross-examination argument dressed up as a Daubert challenge." (Opp'n re Hall at 30.)

3. Hall's Report Does Not Fit

Third, Homebuilder Plaintiffs argue that Hall's report does not offer any scientific, technical, or **[*28]** specialized analysis, but rather is a third-party recitation of publicly available financial documents. (Mot. re Hall at 32-33.) According to Homebuilder Plaintiffs, "[t]he only expertise . . . Hall . . . employs . . . is expertise in compiling and presenting data, not in rigorously and scientifically analyzing that data as Daubert requires." (Id. at 34.) Defendants respond that Homebuilder Plaintiffs' claim "is false," because Hall's forensic accounting analysis of "hundreds of annual and quarterly public filings, earnings press releases, conference call transcripts, and internal financial records" required him to "make numerous professional accounting judgments." (Opp'n re Hall at 31.)

More fundamentally, the parties debate whether Hall's testimony aids the trier of fact since the purpose of his opinion is to support a defense that, according to Homebuilder Plaintiffs, is not available. Homebuilder Plaintiffs contend that Hall's testimony, which focuses on the extent of downstream pass through, is not relevant because "a purported pass-through defense is not available to Defendants in this action, where there is absolutely no risk of duplicative recovery to indirect purchasers." (Mot. re Hall **[*29]** at 5 n.3). Defendants respond that the legal availability of the pass-through defense should have been raised at summary judgment, and that the Court should not consider the issue in the context of the pending Daubert motion. (Opp'n re Hall at 24 n.4.) Homebuilder Plaintiffs reply that Defendants should have sought to "limit their liability based on a purported pass-through defense in a summary judgment motion."[19] (Reply re Hall at 2 n.1.)

B. Homebuilder Plaintiffs' Motion to Preclude Testimony of Dr. Robert Willig[20]

Homebuilder Plaintiffs attack the reliability of Dr. Willig's forecasting model.[21] They contend that for the forecasting model to be reliable, either Dr. Willig's data must be "cointegrated," or he must use "first differences" analysis as a robustness check or corrective technique. (Mot. re Willig at 5-8.) They argue that because Dr. Willig did not demonstrate cointegration to their satisfaction, and he did not use the first differences method, his forecasting model is unreliable and should be discarded. (Id. at 7-9.)

1. Cointegration

Homebuilder Plaintiffs' first line of attack concerns the *cointegration*[22] of Dr. Willig's data. The parties agree that if Dr. Willig's data are not cointegrated, **[*30]** his forecasting model is unreliable. (ECF 338, Opp'n re Willig at 1.) Dr.

---

[19] The Court permitted the parties to submit separate supplemental briefing on the availability of the pass-through defense following oral argument on the Daubert motions, which resolved these timeliness objections. As discussed in subsection VI.A., the legal availability of a defense based on pass through is dispositive to Homebuilder Plaintiffs' Motion challenging the admissibility of Hall's testimony.

[20] Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, Dr. Robert Willig is filed at ECF 320. The sealed Memorandum in Support of the Motion is filed at ECF 314. The Court will hereafter refer to Homebuilder Plaintiffs' Memorandum as "Mot. re Willig."

[21] Aside from their dispute as to the admissibility of the forecasting model, the parties dispute what the purported inadmissibility of the forecasting model would mean for the rest of Dr. Willig's testimony. Homebuilder Plaintiffs insist that the forecasting model is intertwined with the entire February 26 report such that the forecasting model cannot be excluded without excluding the entire report. Defendants respond that the forecasting model is a limited portion of the report, and the effect of its inclusion could be cabined. Because the forecasting model is admissible, it is not necessary to reach this issue.

[22] Cointegration is a characteristic some nonstationary datasets have that allows analysts to use ordinary least squares regressions without using other corrective techniques to address the nonstationarity.

Nonstationary data is data whose underlying properties change over time. (Id. at 5.) For example, many facts about the drywall market might change with overall national economic conditions; the drywall market is therefore nonstationary with respect to national economic conditions. Typically, an analyst working with nonstationary data must use one of several analytical techniques to control for nonstationarity. (Id.) There is no dispute that Dr. Willig's data are nonstationary. (Id.)

Willig concluded that his data were cointegrated based on two standard tests for cointegration—the "Kao" and "Pedroni" tests. (Willig Report II ¶¶ 61.) Homebuilder Plaintiffs agree that the Kao and Pedroni tests are sometimes valid tests for cointegration. (Mot. re Willig at 9-10.) However, they argue that in certain circumstances, the tests will spuriously report cointegration. (Id. at 10-12.) Specifically, based on Dr. Willig's own testimony, they argue that the Kao and Pedroni tests may be "skewed towards finding" cointegration because his data shows "signs" of a characteristic called "codependency."[23] (Id. (quoting Willig Dep.).)

Following Dr. Ingberman's deposition, Dr. Willig found that his data passed a third cointegration test (the "Westerlund" test) which is not reflected in his reports. (Mot. re Willig at 11 n.2.) Dr. Willig ran the Westerlund test to address Dr. Ingberman's critique of his (Dr. Willig's) use of the Kao and Pedroni tests. (Id.) Homebuilder Plaintiffs argue that Dr. Willig cannot use this post-hoc research to supplement or shore up his reports. (Id.) "In any event, Willig **[*31]** admitted that . . . the Westerlund test '*doesn't give perfect results* . . . .'" (Id. (quoting Willig Dep.).)

Defendants have three responses.

First, they argue that economic theory and "common sense" provide that supply, demand, and price should be cointegrated. (Opp'n re Willig at 5-7.) The econometrics literature recognizes that theory can provide evidence of cointegration. (Id. at 6 n.3.) Moreover, empirically, price and demand are "highly correlated" in this industry, which provides support for cointegration. (Id. at 6 (quoting Willig Dep.).)

Second, notwithstanding Homebuilder Plaintiffs' contrary excerpts of his testimony, Dr. Willig largely stood behind the effectiveness of the Kao and Pedroni tests. (Opp'n re Willig at 8-9.) Moreover, Homebuilder Plaintiffs provide no evidence of codependency in Dr. Willig's data, so any codependency-based critique is "purely hypothetical." (Id. at 8.) Boiled down, "the differences between Dr. Willig and Dr. Ingberman over the Kao and Pedroni tests represent a disagreement over mainstream econometric tools." (Id. at 9.) And "[t]his is a dispute that must go to the jury, not a subject for a Daubert motion." (Id. at 10 (citing *In re TMI Litig., 193 F.3d 613, 665 (3d Cir. 1999)*, amended, *199 F.3d 158 (3d Cir. 2000))*.)

Finally, Defendants argue that Dr. Willig's supplemental **[*32]** use of the Westerlund test to support his finding of cointegration was appropriate. In response to Homebuilder Plaintiffs' argument that the Westerlund test is inadmissible because Dr. Willig admitted it is not "perfect," they argue that "[t]he grounds for the expert's opinion merely have to be good, they do not have to be perfect," (Opp'n re Willig at 11-12 (quoting *In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 744 (3d Cir. 1994))*.) And they respond to Homebuilder Plaintiffs' argument that the Westerlund test comes too late for admissibility by arguing that it is expert rebuttal evidence under *Federal Rule of Civil Procedure 26(a)(2)(D)(ii)*.[24] (Opp'n re Willig at 12.)

However, certain nonstationary datasets are *cointegrated*. Cointegration means that the data respond similarly enough to the source of nonstationarity that the nonstationarity does not ultimately undermine the regression. (Id. at 5-6.) Homebuilder Plaintiffs borrow the example of "a drunkard and her leashed dog walking on the street. The drunkard's path may resemble a random walk (and therefore appear to be nonstationary) and so does the path of her dog. But, because they are walking forward together and in more or less the same direction, they will not 'deviate' too far from one another and their paths can therefore be considered cointegrated." (Id. at 6.)

[23] Homebuilder Plaintiffs do not define codependency. Per Defendants' opposition brief, "In the context of the regressions in this case, which use data at the state-month level to regress price on supply and demand factors, cross-sectional dependence [codependency] could, but does not necessarily, arise if the unexplained portion of prices are correlated across states." (Opp'n re Willig at 8 n.4.)

[24] "Absent a stipulation or court order, the disclosures must be made: . . . (ii) if the evidence is intended solely to contradict or rebut evidence on the same subject matter identified by another party under ***Rule 26(a)(2)(B)*** or ***(C)***, within 30 days after the other party's disclosure." Although this material was disclosed more than thirty days after Dr. Ingberman's critique was revealed, "both parties' experts disclosed additional work they had done in response to the opposing expert's opinions on the date of their depositions." (Opp'n re Willig at 12.)

Homebuilder Plaintiffs reply that this first response, from theory, proves too much. (ECF 347, Reply re Willig at 3-6.) The second response, they argue, mistakenly puts the burden on Homebuilder Plaintiffs to rebut Dr. Willig's testimony when the burden actually falls on Dr. Willig to demonstrate the reliability of his testimony. (Id. at 10.) And finally, they argue that the Westerlund test is immaterial, unreliable, and does not actually support Dr. Willig's position that his data are cointegrated, particularly when run with intermediate-term rather than long-term lags. (Id. at 9-11.)

2. First Differences

Homebuilder Plaintiffs argue that Dr. Willig **[*33]** should have used a "first differences" regression model either to correct for the data's nonstationarity, or at the least as a robustness check on his non-first-differences regression. (Mot. re Willig at 7, 13-16.) They argue that because he failed to do so, his report is unreliable. (Id. at 15-16.)

Defendants argue in response that Dr. Willig was entitled to conclude that his data were cointegrated based on his use of the Kao, Pedroni, and Westerlund tests, and there was no need to use the first differences method as a robustness check. (Opp'n re Willig at 13-15.)

C. Defendants' Motion to Preclude Testimony of Dr. Daniel Ingberman[25]

1. Defendants' Arguments

Defendants challenge the reliability of Dr. Ingberman's method of estimating market share to apportion damages. Defendants argue that Dr. Ingberman's share of sales estimates for the homebuilder market extrapolates from Defendants' share of the direct purchasing distributor market without any basis for doing so. (Mot. re Ingberman at 9-10.) Specifically, Defendants contend that Dr. Ingberman's assumption that Homebuilder Plaintiffs' indirect purchases from direct purchasing distributors "mirror exactly" the manufacturers' direct sales to those distributors **[*34]** is not supported by any explanation as to why those two markets "would be the same, or even predictive of," each other. (ECF 346, Reply re Ingberman at 4-5.) According to Defendants, Dr. Ingberman should not have estimated Homebuilder Plaintiffs' damages using estimates of Defendants' direct purchaser market share because "[t]he makeup of wallboard distributors is distinct from the makeup of the resellers and installers that eventually supply wallboard to the Homebuilders." (Mot. re Ingberman at 13.)

Essentially, Defendants argue that calculating their shares of Homebuilder Plaintiffs' purchases was based on speculation and unsupportable inference, and that there was actual data available to Homebuilder Plaintiffs from their suppliers that could have provided this information but was either not requested or not received and/or not made available to Dr. Ingberman. (Defs.' Supp. Mem. re Ingberman at 3.) Homebuilder Plaintiffs did not, for example, "pull the transactions from the distributors to determine what manufacturer" shipped what purchase to what homebuilder. (Mot. re Ingberman at 10-11; Reply re Ingberman at 7-8.)

Defendants further assert that Dr. Ingberman's method of estimating **[*35]** the total quantity of wallboard purchased by each Homebuilder Plaintiff, and his attribution of portions of that estimated quantity to specific manufacturers, is without any factual basis in the record. (Defs.' Supp. Mem. re Ingberman at 1-3.) In addition, Defendants contend that the results from Dr. Ingberman's decision to extrapolate market share data contradicts existing evidence. (Mot. re Ingberman at 14.)

[25] Defendants' Motion to Preclude the Testimony of Homebuilder Plaintiffs' Expert, Dr. Daniel Ingberman is filed at ECF 319. The sealed Memorandum in Support of the Motion is filed at ECF 323. The Court will hereafter refer to Homebuilder Plaintiffs' Memorandum as "Mot. re Ingberman."

2. Homebuilder Plaintiffs' Arguments

Homebuilder Plaintiffs counter that, although they have not demonstrated that Dr. Ingberman's market share theory is commonly accepted, it is the only theory they can use if their theory of umbrella damages is not supported by sufficient evidence at trial or is not accepted by the trier of fact. Thus, Homebuilder Plaintiffs contend they can present it as an alternate theory of damages. Homebuilder Plaintiffs further contend that because Dr. Ingberman's calculations are based on the "best available data" and "accepted economic principles" of estimating unknown properties from incomplete data, his damages calculations are admissible. (ECF 334, Opp'n re Ingberman at 14, 16.)

Homebuilder Plaintiffs argue that there is a rational connection between **[*36]** Defendants' share of the direct purchasing distributor market and Defendants' share of Homebuilder Plaintiffs' drywall purchases because drywall is a commodity, its demand is inelastic, the market is an oligopoly, and Defendants have relatively high market shares. (Id. at 14 (quoting Ingberman Dep.).) Homebuilder Plaintiffs do not assert that Dr. Ingberman relied on any scientific or actual data, but contend that given his overall familiarity with the case, Homebuilder Plaintiffs' purchases, and Defendants' sales, of drywall, his estimates were reasonable. (Pls.' Supp. Mem. re Ingberman at 2-3.)

As to Defendants' argument that Dr. Ingberman's results contradict existing evidence, Homebuilder Plaintiffs respond that the resolution of this type of conflicting evidence is for the jury to decide. (Opp'n re Ingberman at 17.)

Homebuilder Plaintiffs conclude their argument by asserting that:

> The practicality of Dr. Ingberman's approach—namely, that manufacturer direct sales in each state mirror indirect sales to Plaintiffs in each state—is further supported by Dr. Ingberman's evaluation of the drywall industry in general. Dr. Ingberman testified extensively about the nature of the drywall market, including **[*37]** that: (i) drywall is a commodity product; (ii) due to its size and weight; "[m]anufacturers rarely ship wallboard" long distances; and (iii) as a result of these shipping limitations and because it is a commodity product, Plaintiffs purchase drywall based on availability in their geographic region with no other preferences, other than that the drywall be produced domestically.

(Pls.' Supp. Mem. re Ingberman at 3 (alteration in original) (footnotes omitted).)

V. Legal Standard: Admissibility of Expert Testimony

The admissibility of expert testimony is governed by *Rule 702*, which provides that:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case.

Under *Rule 702*, a district court judge functions as a gatekeeper to "ensure that any and all **[*38]** scientific testimony or evidence admitted is not only relevant, but reliable." *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 589, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. The Third Circuit has clarified that "in doubtful cases," *Rule 702* "favor[s] admissibility." *Linkstrom v. Golden T. Farms, 883 F.2d 269, 270 (3d Cir. 1989)*; see also *Kannankeril v. Terminix Int'l, Inc., 128 F.3d 802, 806 (3d Cir. 1997)* ("*Rule 702* . . . has a liberal policy of admissibility."). The "touchstone" for *Rule 702* analysis is the broad helpfulness of the expert's testimony to the trier of fact. *Linkstrom, 883 F.2d at 270* (quoting *Breidor v. Sears, Roebuck & Co., 722 F.2d 1134, 1139 (3d Cir. 1983))*; see also *Pineda v. Ford Motor Co., 520 F.3d 237, 243 (3d Cir. 2008)* ("The Rules of Evidence embody a strong preference for admitting *any evidence* that may assist the trier of fact." (emphasis added)).

On appeal, a district court judge's conclusion on a Daubert challenge is reviewed for abuse of discretion and will be overturned only if the decision "rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact." *TMI Litig., 193 F.3d at 666* (quoting *Hanover Potato Prods., Inc. v. Shalala, 989 F.2d 123, 127 (3d Cir. 1993))*. The Third Circuit will not interfere "unless there is a definite and firm conviction that the court below committed a clear error of judgment in the conclusion it reached upon a weighing of the relevant factors." *TMI Litig., 193 F.3d at 666* (quoting *Hanover, 989 F.2d at 127*).

Rule 702 imposes three requirements for admissibility of expert testimony: "(A) the proffered witness must be an expert, i.e., must be qualified; (B) the expert must testify about matters requiring scientific, technical **[*39]** or specialized knowledge; and (C) the expert's testimony must assist the trier of fact." *Pineda, 520 F.3d at 244*; see also *Schneider ex rel. Estate of Schneider v. Fried, 320 F.3d 396, 404 n.3 (3d Cir. 2003)* (noting that *Rule 702* "was amended to include the trilogy of restrictions (qualifications, reliability, fit) in its text after the Supreme Court decided Daubert").

A. Qualification

First, a witness must offer specialized expertise or experience to qualify as an "expert" under *Rule 702*. *Id. at 404*. The Third Circuit defines the qualification requirement "liberally," allowing "a broad range of knowledge, skills, and training [to] qualify an expert." Id. The liberal policy in favor of admissibility "extends to the substantive as well as the formal qualifications of experts." *Pineda, 520 F.3d at 244*. A district court abuses its discretion if it "exclude[s] testimony simply because [it] does not deem the proposed expert to be the best qualified or because the proposed expert does not have the specialization that the court considers most appropriate." *Holbrook v. Lykes Bros. S.S. Co., Inc., 80 F.3d 777, 782 (3d Cir. 1996)*; see, e.g., *Paoli, 35 F.3d at 753* (reversing district court's conclusion that doctor offered as an expert was not qualified because the doctor, "while arguably a relatively poor clinician and less than fully credible witness, qualifie[d] as an expert" under the liberal standard for qualification). The result of **[*40]** the Third Circuit's liberal approach to admitting expert testimony under *Rule 702* is that arguments regarding an expert's qualifications generally relate to the weight to be given to the testimony—not to its admissibility. *Holbrook, 80 F.3d at 782*.

B. Reliability

Second, for the testimony of a qualified witness to be admissible under *Rule 702*, the witness must use a methodology or technique that is reliable. *Paoli, 35 F.3d at 742*. The reliability inquiry requires evaluating if "the expert's testimony is supported by 'good grounds.'" *Karlo v. Pittsburgh Glass Works, LLC, 849 F.3d 61, 81 (3d Cir. 2017)*. The Third Circuit has identified eight factors for district courts to consider in assessing whether "good grounds" support potential expert testimony:

> (1) whether a method consists of a testable hypothesis; (2) whether the method has been subject to peer review; (3) the known or potential rate of error; (4) the existence and maintenance of standards controlling the technique's operation; (5) whether the method is generally accepted; (6) the relationship of the technique to methods which have been established to be reliable; (7) the qualifications of the expert witness testifying based on the methodology; and (8) the non-judicial uses to which the method has been put.

Paoli, 35 F.3d at 742 n.8.

These reliability factors are not exhaustive and **[*41]** may not apply in every case. See *Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 141, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)* ("Daubert's list of specific factors neither necessarily nor exclusively applies to all experts or in every case."). Indeed, the factors should not be applied rigidly because "[t]he inquiry envisioned by *Rule 702* is . . . a flexible one." *Daubert, 509 U.S. at 594*. However, "some analysis of these factors is necessary." *UGI Sunbury LLC v. A Permanent Easement for 1.7575 Acres, 949 F.3d 825, 834 (3d Cir. 2020)*.

The standard for determining reliability "is not that high . . . even given the evidentiary gauntlet facing the proponent of expert testimony under Rule 702." TMI Litig., 193 F.3d at 665. The court's focus in assessing reliability "must be solely on principles and methodology, not on the conclusions that they generate." Daubert, 509 U.S. at 595; see also Karlo, 849 F.3d at 81 ("The test of admissibility is not whether a particular scientific opinion has the best foundation, or even whether the opinion is supported by the best methodology or unassailable research."); Paoli, 35 F.3d at 744 ("A judge will often think that an expert has good grounds to hold the opinion that he or she does even though the judge thinks that the opinion is incorrect."). At the reliability phase of the Daubert analysis, "[c]ourts look for rigor, not mere 'haphazard, intuitive inquiry.'" UGI Sunbury, 949 F.3d at 834 (quoting Oddi v. Ford Motor Co., 234 F.3d 136, 156 (3d Cir. 2000)).

C. Fit

Third, for reliable testimony to be admissible, **[*42]** Rule 702 requires that the testimony "fit" the facts and the context of the case in which it is offered. Daubert, 509 U.S. at 591. An expert's testimony fits the case if the testimony will "assist the trier of fact." Paoli, 35 F.3d at 743. Thus, the fit requirement "goes primarily to relevance." Daubert, 509 U.S. at 591; see also Dominguez v. Yahoo!, Inc., No. 13-1887, 2017 U.S. Dist. LEXIS 11346, 2017 WL 390267, at *14 (E.D. Pa. Jan. 27, 2017) (Baylson, J.) ("[T]o be admissible, the expert testimony must help the trier of fact understand the evidence or determine a fact issue."). Said differently, the fit requirement simply extends "the requirement of reliability, or 'good grounds,' . . . to each step in an expert's analysis all the way through the step that connects the work of the expert to the particular case." Paoli, 35 F.3d at 743. As an illustration of Rule 702's fit requirement, the Third Circuit described how "animal studies [would] be admissible to prove causation in humans" only if "there [were] good grounds to extrapolate from animals to humans." Id.

VI. Discussion

A. Hall's Testimony Will Be Precluded

Homebuilder Plaintiffs' Motion challenges Hall's testimony on all three prongs of the Daubert analysis: qualification, reliability, and fit. However, other conclusions the Court reached between the filing of Homebuilder Plaintiffs' Motion (July 2, 2018) and oral argument (January 9, 2020) altered **[*43]** the landscape of pertinent legal arguments. Following those conclusions, the key issue regarding Hall's testimony is the third prong of Daubert—the "fit" of his testimony to the facts of the case.

At the hearing and in their supplemental briefing, Homebuilder Plaintiffs argue that one of the Court's interim rulings, namely the Court's decision to apply California's Cartwright Act to the state law claims, obviates the relevance of Hall's testimony entirely. (See Pls.' Supp. Mem. at 2 ("[I]n light of the Court's July 24, 2019 order on choice-of-law, ruling that California's Cartwright Act applies to all of [Homebuilder] Plaintiffs' state law claims . . . Mr. Hall's testimony offered for the sole purpose of calculating downstream pass-through is no longer relevant to any issue in this case as a matter of law.").) The importance of this line of argument only became clear *after* the Court decided the choice of law question in July 2019.

The Court agrees with Homebuilder Plaintiffs and will preclude Hall's testimony on grounds that it is not relevant as required by Daubert.

1. The Pass-Through Defense

Hall's Report and purported testimony concern downstream pass through; that is, the extent to **[*44]** which Homebuilder Plaintiffs passed on the conspiracy-induced drywall prices to homebuyers. The term "downstream pass through" is used because at this step in the distribution chain (the step from Homebuilder Plaintiff to homebuyer), the product is moving downstream towards the consumer and ultimate purchaser. Whether

Homebuilder Plaintiffs passed the price increases through to their buyers is germane because it may provide an affirmative defense—the "pass-through" defense. Defendants' theory is that, although Homebuilder Plaintiffs may have initially paid an increased price for drywall as a result of the price-fixing conspiracy, they successfully "passed through" the price increases to their customers (the homebuyers), and therefore suffered no injury.

The availability of this defense is somewhat unsettled and may depend on whether the claim is brought under federal or state ***antitrust law***. Because of these complexities, Defendants argue that Homebuilder Plaintiffs waived the issue by failing to raise it in a motion for partial summary judgment. (Defs.' Supp. Mem. at 4.) However, after the parties submitted their post-hearing supplemental briefing, the Court allowed each party to submit **[*45]** an additional, separate memorandum devoted exclusively to explaining the party's position on the legal availability of the pass-through defense under the law of California, which is the law that the Court determined governs Homebuilder Plaintiffs' state law claims. The supplemental briefing on the legal availability of the pass-through defense (to which Hall's testimony relates) enabled the parties to focus their arguments and the submissions fully apprised the Court of the relevant issues.[26]

2. Hanover Shoe and Clayworth

The availability of the pass-through defense under California's Cartwright Act is governed by the Supreme Court of California's decision in *Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066 (Cal. 2010)*. To appreciate the holding of Clayworth, it is important to first understand the Supreme Court's rejection of the pass-through defense for claims brought under federal law in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*.

Hanover Shoe concluded that "the buyer is equally entitled to damages if he raises the price for his own product" because "[a]s long as the seller continues to charge the illegal price, he takes from the buyer more than the law allows." *Id. at 489*. In other words, a buyer that suffers an antitrust injury in the first instance but passes on the illegal price increase **[*46]** is nonetheless entitled to recover. See id. ("At whatever price the buyer sells, the price he pays the seller remains illegally high, and his profits would be greater were his costs lower."). Stated simply, Hanover Shoe largely foreclosed the availability of a pass-through defense to antitrust claims brought under federal law. The Court carved out narrow exceptions to this general principle of unavailability; for example, where, "an overcharged buyer has a pre-existing 'cost-plus' contract." *Id. at 494*.

Over forty years later, the Supreme Court of California examined whether the pass-through defense, which had been rejected by the Supreme Court for price-fixing claims brought under federal law in Hanover Shoe, is available for price-fixing claims brought under California state law. See *Clayworth, 233 P.3d at 1072* (noting that the issue was "whether under the Cartwright Act an antitrust defendant can defeat liability by asserting a pass-on defense"). To answer this question, the Supreme Court of California reviewed Hanover Shoe, considered the text and legislative history of the Cartwright Act, and explored broader policy considerations. *Id. at 1072-86*. Clayworth ultimately held that:

> For state antitrust purposes, the Hanover Shoe rule **[*47]** should apply even as indirect purchasers are allowed to sue. We therefore conclude, under the Cartwright Act as under federal law, that a pass-on defense generally may not be asserted. Instead, in an antitrust price-fixing case, the presumptive measure of damages is the amount of the overcharge paid by the plaintiff.

---

[26] Because "[i]t is well established that a trial judge possesses the discretion to prohibit parties from raising matters they have failed to advance during the pretrial proceedings," the trial court also has the discretion to consider arguments that were preserved but not actively litigated. *Sample v. Diecks, 885 F.2d 1099, 1106 (3d Cir. 1989)*. This Court exercises that discretion here because both parties had the opportunity to set forth their substantive arguments regarding the availability of the pass-through defense.

Id. at 1086. Two exceptions apply to the general rule that the pass-through defense is unavailable under the Cartwright Act: (a) cases involving "'cost-plus' contracts" and (b) cases where application of the defense is necessary "to avoid duplication in the recovery of damages." Id.

3. Analysis

The legal availability of the pass-through defense under California's Cartwright Act is a foundational question. If the defense is not available, then Hall's purported testimony, which focuses exclusively on downstream pass through, is completely irrelevant. As the Supreme Court noted in Daubert, "[e]xpert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful." *509 U.S. at 591*.

The parties agree on this essential principle. (Pls.' Supp. Mem. re Pass Through at 1; Defs.' Supp. Mem. re Pass Through at 2.) However, they diverge in their conclusions on whether California **[*48]** permits a pass-through defense to antitrust claims brought under state law, and this divergence leads to differing conclusions on whether Hall's testimony is relevant. The Court concludes that because Clayworth bars the pass-through defense, Hall's testimony is not responsive to any legal issue, and therefore his testimony must be precluded under Daubert.

Clayworth unambiguously forecloses use of the pass-through defense except in the two narrow situations noted by Supreme Court of California (i.e., cost-plus contracts and duplicative recovery). The Clayworth opinion leaves no room for doubt that the pass-through defense is generally unavailable under the Cartwright Act. See *233 P.3d at 1086* ("[U]nder the Cartwright Act as under federal law, . . . a pass-on defense generally may not be asserted."). Moreover, as Homebuilder Plaintiffs point out, courts applying Clayworth have overwhelmingly recognized that, unless one of the two exceptions applies, Clayworth is a bar to a defense based on the purported pass through of a price increase. See, e.g., *Tawfilis v. Allergan, Inc., No. 15-307, 2017 U.S. Dist. LEXIS 122974, 2017 WL 3084275, at *10 (C.D. Cal. June 26, 2017)* (citing Clayworth for the proposition that "[a pass through defense] is unavailable under either the Sherman Act, Hanover Shoe . . . , or the Cartwright Act"); **[*49]** *Cty. of San Mateo v. CSL Ltd., No. 10-5686, 2014 U.S. Dist. LEXIS 116342, 2014 WL 4100602, at *5 (N.D. Cal. Aug. 20, 2014)* ("Clayworth adopted the Hanover Shoe rule, which bars antitrust defendants from asserting the affirmative defense that direct purchasers who pass on an overcharge cannot sue for damages."); *In re Refrigerant Compressors Antitrust Litig., No. 09-2042, 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10 (E.D. Mich. Apr. 9, 2013)* (noting that the question in Clayworth was whether "the Cartwright Act permits a pass-on defense or whether, like federal law, it precludes it" and that the Clayworth court concluded pass through is generally unavailable as a defense); *In re TFT-LCD (Flat Panel) Antitrust Litig., No. 07-1827, 2012 U.S. Dist. LEXIS 182373, 2012 WL 6709621, at *2 (N.D. Cal. Dec. 26, 2012)* (permitting the defendant to proceed with the pass-through defense because "there [wa]s a very real prospect of duplicative recovery," and therefore the case fit Clayworth's second exception).

As recognized by subsequent courts, the plain language of Clayworth bars pass-through defenses. The Supreme Court of California's unequivocal statement that an alleged antitrust violator cannot defend on the basis of the plaintiff's pass through compels this Court to reject Hall's testimony as not relevant to any live legal issue in the case. Defendants articulate two reasons why Hall's testimony is relevant under Daubert, but neither argument persuades the Court.

First, Defendants attempt to distinguish downstream pass through as a defense to liability from downstream pass **[*50]** through as an offset of damages. (Defs.' Supp. Mem. re Pass Through at 3.) Defendants assert that because they seek to use downstream pass through to reduce damages—*not* to bar liability—Clayworth is not an impediment. (Id.) However, this distinction is unsupported by either Clayworth or Hanover Shoe. To the contrary, Clayworth suggests its rejection of the pass-through defense applies to damages. See *233 P.3d at 1086* ("[I]n an antitrust price-fixing case, the presumptive measure of *damages* is the amount of the overcharge paid by the plaintiff." (emphasis added)).

Second, Defendants argue that even if the pass-through defense is not available for Homebuilder Plaintiffs' Cartwright Act claims, it is relevant to Homebuilder Plaintiffs' claims under California's Unfair Competition Law ("UCL"). (Defs.' Supp. Mem. re Pass Through at 5.) Specifically, Defendants point to a portion of Clayworth discussing standing under the UCL stating "[t]hat a party may ultimately be unable to prove a right to damages . . . does not demonstrate that it lacks standing to argue for its entitlement to them." *233 P.3d at 1087*. Shortly after Clayworth was decided, the Supreme Court of California issued its decision in *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (Cal. 2011)*, a case brought under **[*51]** the UCL. The Kwikset court rejected an argument raised by the defendant-manufacturer that the court characterized as a "pass-on defense in disguise." *Id. at 893*. Kwikset explained that "in the eyes of the law, a buyer forced to pay more than he or she would have is harmed at the moment of purchase, and further inquiry into such subsequent transactions, actual or hypothesized, ordinarily is unnecessary." Id. (footnotes omitted). Although Defendants correctly note that the factual context is very different here, the Court cannot ignore the unmistakable language of *Kwikset*.[27]

In summary, the unavailability of the pass-through defense is inescapable given the clear language of Clayworth. The distinction Defendants attempt to draw between liability and damages is unsupported by Clayworth, and Defendants' invocation of Homebuilder Plaintiffs' UCL claim does not require a different conclusion because Kwikset makes clear that the ban on pass-through defenses also applies to UCL claims. Because the pass-through defense is generally unavailable under California law,[28] Hall's testimony—which focuses entirely on downstream pass through—does not have "the 'potential for assisting the trier **[*52]** of fact.'" *United States v. Schiff, 602 F.3d 152, 173 (3d Cir. 2010)* (quoting *Kannankeril, 128 F.3d at 806*). Hall's testimony therefore fails to satisfy the "fit" prong of the Daubert analysis and must be precluded under *Rule 702*.

B. Dr. Willig's Testimony Will Not Be Precluded

Homebuilder Plaintiffs' attacks based on cointegration, and their attacks on Dr. Willig's choice not to use the first differences method, converge, and so they can be analyzed together. Overall, Homebuilder Plaintiffs seek to preclude Dr. Willig's testimony by transmuting a few qualified statements into "damning" admissions of a "*fundamental flaw* in his methodology," and as "Dr. Willig kn[o]w[ing] there was a test available to confirm the accuracy of his results [that] he failed to run." (Pls.' Supp. Mem. at 6-7 (emphasis in original).) Their theory, however, overstates the issues with Dr. Willig's testimony, and in some respects is mistaken as to the basic issue.

The question is whether Dr. Willig's analysis of cointegration, and therefore his forecasting model, is reliable. This is not the same inquiry as whether Dr. Willig has run every conceivable test for cointegration. Of course, even once Daubert reliability is established, Homebuilder Plaintiffs can argue that there were more, or better, **[*53]** tests that Dr. Willig should have run. But Homebuilder Plaintiffs will have to make those arguments to the trier of fact, not this Court.

The Court concludes that Dr. Willig's analysis of cointegration is reliable. To begin with, it is helpful to review one more time what tests Dr. Willig ran, and what his supposedly damning admissions about each were.

First, Dr. Willig ran the Kao and Pedroni tests. The parties agree that these would ordinarily be adequate cointegration tests. However, "in the presence of cross-sectional codependency," these tests may be "skewed towards finding the cointegrating relationship." (Mot. re Willig at 12 (quoting Willig Dep.).) Dr. Willig was not sure how severe that skew was. (Mot. re Willig at 12 (quoting Willig Dep.).) Asked whether the panel data Dr. Willig used

---

[27] Defendants reference *Elite Logistics Corp. v. MOL America, Inc., No. 11-2952, 2016 U.S. Dist. LEXIS 13019, 2016 WL 409650 (C.D. Cal. Feb. 2, 2016)*. In that case, the court was "not persuaded by [the] suggestion that the Kwikset court imposed a general bar on pass-on defenses, or even a bar in all UCL cases." *2016 U.S. Dist. LEXIS 13019, [WL] at *3*. But in a previous opinion in that case, the Elite court cited Kwikset for the proposition that "the California Supreme Court has rejected such ... 'pass-on' defenses, even outside the antitrust context." *Elite Logistics Corp. v. MOL Am., Inc., No. 11-2952, 2013 U.S. Dist. LEXIS 124109, 2013 WL 4601237, at *4 (C.D. Cal. Aug. 29, 2013)*. The Court agrees with the first conclusion reached by Judge Pregerson in Elite.

[28] As noted, Clayworth recognized two exceptions to the general rule of unavailability. Homebuilder Plaintiffs argue that it is undisputed neither exception is implicated here. (Pls.' Supp. Mem. at 4; Pls.' Supp. Mem. re Pass Through at 8.) Defendants do not agree or disagree, nor do they offer arguments under either exception.

displayed "ha[d] cross-sectional [co]dependency," Dr. Willig acknowledged that there were "signs of it." (Mot. re Willig at 11 (quoting Willig Dep.).) At one point, asked to confirm whether there was "an issue about whether [the Kao and Pedroni tests] accurately" assess cointegration, Dr. Willig responded, "I think that's fair." (Mot. re Willig at 11 (quoting Willig Dep.).)

Second, Dr. Willig ran **[*54]** the Westerlund test.[29] During his deposition, he admitted that the Westerlund test only showed a cointegrating relationship when run with longer time lags. When run with intermediate-term time lags, the test "couldn't affirmatively say yes, there is a cointegrating relationship that covers those intermediate lags." (Reply re Willig at 11 (quoting Willig Dep.).) Using both long-term and intermediate-term time lags "is the standard practice." (Reply re Willig at 11 (quoting Willig Dep.).) He found the results from the Westerlund test to be "not perfect, but it's encouraging." (Reply re Willig at 10 (quoting Willig Dep.).)

Third, Dr. Willig believes that since empirical evidence shows that demand and price are highly correlated and move together, and since economic theory generally expects supply, demand, and price to move together, his data should be cointegrated.

Together, these three analyses are sufficient to show that Dr. Willig's methods are reliable enough for admission. For an expert's opinion to be reliable, "[t]he grounds for the expert's opinion merely have to be good[;] they do not have to be perfect." *Paoli, 35 F.3d at 744*. Here, Dr. Willig has used three different methods to assess the cointegration **[*55]** of his data. Collectively, the three analyses demonstrate reliability, even if each may have individual flaws.

Homebuilder Plaintiffs have not shown otherwise. As to the Kao and Pedroni tests, all Homebuilder Plaintiffs have demonstrated is that there is an "issue" about whether the Kao and Pedroni tests may be "skewed" in Defendants' favor to an unknown extent based on codependency, which the data shows "signs" of. As to the Westerlund test, Homebuilder Plaintiffs have demonstrated that it did not affirmatively demonstrate cointegration when run using intermediate time-lags. And Homebuilder Plaintiffs have possibly shown that Dr. Willig's results could be considered more reliable had he also used the first-differences method as an additional check for cointegration. The facts, however, that there are "signs" that one method may yield "skewed" results, or that another method does not yield "perfect" results, or that there was an additional means of assessing reliability that Dr. Willig did not apply, are not enough to make Dr. Willig's testimony unreliable.

Homebuilder Plaintiffs also complain that Dr. Willig's early deposition testimony, asserting that his methods were reliable, was **[*56]** premised on his mistaken assumption that he had used the first differences methodology. (Pls.' Supp. Mem. at 7-8.) However, Dr. Willig stood behind the reliability of his methods even after being reminded that he did not use the first differences methodology. To the extent that Homebuilder Plaintiffs wish to explore the purported tension between the "testimony given after he corrected the record, seeking to now downplay the significance of the first difference test" and "his earlier admissions," (Pls'. Supp. Mem. at 8), that exploration must occur at trial.

Finally, contrary to Homebuilder Plaintiffs' position, admitting Dr. Willig's testimony is consistent with this Court's decision in Dominguez. Dominguez barred expert testimony on the grounds that the experts' hypotheses were literally untestable: the software at issue was "no longer operable, and could not be resuscitated, [which] basically prevented any expert, no matter how qualified" from testing it. *Dominguez, 2017 U.S. Dist. LEXIS 11346, 2017 WL 390267, at *19-20*. By contrast, Dr. Willig's testimony was testable and tested. Homebuilder Plaintiffs' quarrel is with the choice of tests. For the reasons already discussed, that is a matter for a trier of fact, not for Daubert.

C. Dr. Ingberman's [*57] Testimony Will Not Be Precluded

---

[29] Although Homebuilder Plaintiffs briefly complained of the timing of the Westerlund analysis at oral argument, Hr'g Tr. 76:21-77:1, neither Homebuilder Plaintiffs' reply brief nor their post-hearing supplemental briefing addresses the timeliness of the Westerlund analysis. The Court concludes that it is timely rebuttal testimony under ***Rule 26(a)(2)(D)(ii)***, as is Dr. Ingberman's attack on the Kao and Pedroni tests at his deposition.

1. Proving Damages at Trial

Defendants challenge one aspect of the report of Dr. Ingberman, who Plaintiffs intend to call as a damages expert. As a preamble to the discussion of Defendants' Daubert objection to Dr. Ingberman's proposed testimony, the Court will describe how Homebuilder Plaintiffs will likely present the factual and expert bases for their damages claim.

As the Third Circuit has held, Homebuilder Plaintiffs have a less rigorous burden to prove damages in an antitrust price-fixing case than they do to prove the existence of a price-fixing agreement, or that Homebuilder Plaintiffs suffered economic injury because of artificially increased price levels. *LePage's Inc. v. 3M, 324 F.3d 141, 166 (3d Cir. 2003)* (en banc) (citing *Bonjorno v. Kaiser Aluminum & Chem. Corp., 752 F.2d 802, 812-13 (3d Cir. 1984))*. Accordingly, this Court is under an obligation to be more "liberal" in the admissibility of evidence as to the amount of damages, and in considering the legal sufficiency of damages evidence. This lower standard applies to expert testimony as well as fact evidence.

In a general sense, the measure of damages in a price-fixing case is the increased cost that a purchaser paid because of the agreement to raise prices. In the drywall industry, because Homebuilder **[*58]** Plaintiffs have testified that they frequently do not know the manufacturer of the drywall that they have purchased,[30] and because they were indirect purchasers, proving damages is likely to be a two-step process.[31]

The first step of proof will come from Homebuilder Plaintiffs themselves, who can testify, from personal knowledge and their own business records (or from Defendants' data produced during discovery), of the quantity and cost of drywall each of them purchased. This data is already in the record, and is not in dispute. The second step will likely come from an expert, in this case Dr. Ingberman. Homebuilder Plaintiffs have presented Dr. Ingberman's expert opinion that uses a regression to estimate damages and tabulates those estimates in various ways.

To account for the possibility that there may not be umbrella damages in this case, Dr. Ingberman's report estimates damages for each Defendant based on what market share a particular Defendant had of the overall drywall sales during a specific year. Thus, if a specific Homebuilder Plaintiff shows that it purchased 100,000 square feet of drywall during a specific year, but is unable to prove the identity of the manufacturer of that **[*59]** drywall, then that Homebuilder Plaintiff intends to have Dr. Ingberman testify, as an expert, as to his estimate of the market share that the Defendant (either L&W or PABCO) possessed, and calculate damages based on that market share.

For example, if L&W had 25% of the overall U.S. sales of drywall in a particular year, then the Homebuilder Plaintiff could use that 25% share to estimate the quantity of drywall that they purchased from L&W (by applying it to the 100,000 square feet of drywall they purchased), and compute its compensable damages. That volume estimate would then be multiplied by the overcharge amount, to reach the amount of damages recoverable by that Homebuilder Plaintiff from L&W.[32] The same method could be replicated to estimate damages against PABCO.

2. Dr. Ingberman's Market Share Testimony

---

[30] Defendants have asserted that the drywall purchased always shows the identity of the manufacturer. This is a disputed factual issue for trial. For purposes of this Motion, the Court assumes Homebuilder Plaintiffs were unaware of the manufacturer of their drywall purchases.

[31] The Umbrella Damages Opinion may allow Homebuilder Plaintiffs to proceed without identifying the specific manufacturer from whom they purchased. Under an umbrella damages theory, as applied to proof of damages, each Homebuilder Plaintiff can prove damages based on its overall purchases of drywall, without regard to the identity of the manufacturer, if the evidence shows that the nonconspiring manufacturers raised their prices because of the price-fixing conspiracy. *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573, 584 n.45 (3d Cir. 1979)*.

[32] Those Defendants who have already settled, of course, cannot be held liable at the upcoming Homebuilder Plaintiffs' trial. However, the prices they charge for drywall may be admissible at trial.

As an initial matter, the Court rejects Homebuilder Plaintiffs' arguments that Defendants' contentions are mooted by this Court's ruling on umbrella damages. (Pls.' Supp. Mem. 9-10.) The Court's ruling on umbrella damages was without prejudice. Defendants, therefore, can raise the issue again at trial if the evidence adduced fails to prove Homebuilder Plaintiffs' theory. (Umbrella **[*60]** Damages Opinion at 22.) The Court's ruling was also without prejudice as to Homebuilder Plaintiffs, so if their theory of umbrella damages does not prevail, they may present an alternate theory of damages. Because Homebuilder Plaintiffs still need to prove their umbrella damages theory at trial, Defendants' Motion to Preclude Dr. Ingberman's market share estimates is not moot.

As for the substance of Defendants' Daubert motion, although Defendants have some support for their argument that mismatched market share estimates are inherently suspect, the Court will not accept Defendants' arguments to preclude Dr. Ingberman's reliance on market share estimates if Homebuilder Plaintiffs' theory of umbrella damages is not accepted by the trier of fact. Defendants agree that estimates are not per se prohibited from use by appropriately qualified expert witnesses, (Reply re Ingberman 2), and Dr. Ingberman has used some market data to make his conclusions about market shares.

When deciding questions of reliability, "the trial judge [has] considerable leeway in deciding in a particular case how to go about determining whether particular expert testimony is reliable." *Kumho, 526 U.S. at 152*. This is especially true when **[*61]** ruling on issues related to damages. Cf. *Halo Elecs., Inc. v. Pulse Elecs., Inc., 136 S. Ct. 1923, 1934-35, 195 L. Ed. 2d 278 (2016)* (upholding the district court's discretion to award enhanced damages in Patent Act cases).

The Supreme Court's interpretation of the Patent Act in Pulse is of some resonance in an antitrust case where damages are also often complex to calculate. This is particularly true in antitrust cases where there are, as in this case, multiple and complex channels of distribution. Damages in these cases are not easy to compute, and, as noted above, the Court must be "liberal" in ruling on admissibility.

In *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254 (3d Cir. 2012)*, the Third Circuit reaffirmed this liberal view of the admissibility of damages evidence, especially in circumstances in which the plaintiff will be unable to prove damages without it. ZF Meritor was an antitrust case in which the defendant's anticompetitive conduct foreclosed a substantial share of the market to competitors. *Id. at 263*. The district court excluded the plaintiffs' expert's testimony estimating damages because the expert impermissibly relied on the plaintiffs' internal market share and profit margin projections. *Id. at 267*. The district court also denied the plaintiffs' request for permission to amend the expert's report to estimate damages with an econometric **[*62]** model that did not rely on the plaintiffs' projections, but instead relied on external sources to estimate market share. *Id. at 267-68, 295*. Without the expert's testimony, the plaintiffs were unable to prove damages, resulting in a damages award of *$0. Id. at 268*.

The Third Circuit reversed the district court's decision not to permit the expert to use his econometric model to estimate market share mainly because of "the critical nature of the evidence, and the consequences if permission to amend [wa]s denied." *Id. at 299*. The same would be true here if the Court were to preclude Dr. Ingberman's market share testimony. "[I]n the antitrust context, a damages award not only benefits the plaintiff, it also fosters competition and furthers the interests of the public by imposing a severe penalty (treble damages) for violation of the antitrust laws." *Id. at 300* (citing *Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 262, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972))*. As Defendants admit, "Dr. Ingberman's estimate of market share is Homebuilders' only avenue for presenting purported evidence of how much wallboard they bought from any particular defendant or from the allegedly conspiring defendants as a group." (Defs.' Supp. Mem. re Ingberman at 4.) In other words, if Homebuilder Plaintiffs' theory of umbrella damages does not prevail at **[*63]** trial, then without Dr. Ingberman's estimates, "not only will [Homebuilder] Plaintiffs be unable to recover for the antitrust injury [Defendants] caused, the policy of deterring antitrust violations through the treble damages remedy will also be frustrated." *ZF Meritor, 696 F.3d at 300* (citing *Paoli, 35 F.3d at 750*). This weighs strongly in favor of admitting Dr. Ingberman's market share estimates.

Defendants do not cite any Third Circuit precedent rejecting estimates made by an expert with the type of experience that Dr. Ingberman developed from working on this case. Nor have Defendants shown any Third Circuit precedential holding that forbids experts from relying on estimates that they have arrived at based on their study of a particular industry or a particular market. Instead, there is precedent in the Third Circuit that approves of courts admitting reasonable estimates made by an expert who has familiarity with the overall topic and the facts of the case. See *Schneider, 320 F.3d at 406* (permitting an invasive cardiologist to testify as an expert about drug prescriptions during surgical procedures because his "experience render[ed] his testimony reliable").

The Court finds that Dr. Ingberman's opinion is reliable and will be helpful to the ultimate trier **[*64]** of fact, subject to arguments at trial about his credibility, and the jury's determination of what weight to give to his testimony and to that of Homebuilder Plaintiffs themselves. Hearing Dr. Ingberman's testimony and assessing any potential flaws will be "an important part of assessing what conclusions [are] correct," and may provide, at a minimum, a useful starting point for determining the damages attributable to each Defendant. *Paoli, 35 F.3d at 744-45*. At bottom, Defendants' arguments go to the weight of Dr. Ingberman's opinion, and are not grounds to preclude his testimony.

Here, Dr. Ingberman has developed an extensive familiarity with the topics of this case, and the drywall industry generally, from drafting his two highly detailed expert reports. Based on the long list of materials Dr. Ingberman relied upon to draft his reports, (Ingberman FoI, Attach. C), and complemented by his experience as an expert in other antitrust cases, (Ingberman FoI, Attach. A), the Court is satisfied that Dr. Ingberman has become well-informed on the drywall industry, and has based his estimates on his experience in the field. Considering Dr. Ingberman's familiarity with the drywall industry and his background in antitrust **[*65]** cases, the Court finds that his method of estimating Defendants' market share is reliable. See *CB Aviation, LLC v. Hawker Beechcraft Corp., No. 10-1411, 2011 U.S. Dist. LEXIS 128918, 2011 WL 5386359, at *6 (E.D. Pa. Nov. 8, 2011)* (DuBois, J.) (permitting an expert in aircraft appraisals to make market value estimates because his estimates were "based on extensive experience and [were] thus reliable"); *Floorgraphics, Inc. v. News Am. Mktg. In-Store Servs., Inc., 546 F. Supp. 2d 155, 172-73 (D.N.J. 2008)* (Hughes, M.J.) (admitting an expert's damages estimates even though the expert did not adjust his estimates to account for factors that may have changed the results).

This Court is satisfied that Dr. Ingberman has diligently attempted to use the best available data, and his reliance on his own subjective estimates is not necessarily, in these circumstances and under settled law on calculating damages in antitrust cases, inadmissible. Defendants' Motion to Preclude Dr. Ingberman's market share estimates will be denied.

VII. Conclusion

For the foregoing reasons, Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, David Hall, (ECF 321), is granted and Hall will be precluded from testifying at trial. Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, Dr. Robert Willig, (ECF 320), and Defendants' Motion to Preclude the Testimony of Homebuilder Plaintiffs' Expert, Dr. **[*66]** Daniel Ingberman, (ECF 319), will both be denied, and Dr. Willig and Dr. Ingberman may testify at trial.

An appropriate Order follows.

ORDER RE: DAUBERT MOTIONS

AND NOW, this 6th day of April, 2020, upon consideration of Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, David Hall, (ECF 321), Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, Dr. Robert Willig, (ECF 320), and Defendants' Motion to Preclude the Testimony of Homebuilder Plaintiffs' Expert, Dr. Daniel Ingberman, (ECF 319), the responses and replies thereto, oral argument, and the supplemental materials submitted by the parties, for the reasons stated in the foregoing memorandum it is hereby **ORDERED** that:

1. Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, David Hall, (ECF 321), is **GRANTED**.

2. Homebuilder Plaintiffs' Motion to Preclude the Testimony of Defendants' Expert, Dr. Robert Willig, (ECF 320), is **DENIED**.

3. Defendants' Motion to Preclude the Testimony of Homebuilder Plaintiffs' Expert, Dr. Daniel Ingberman, (ECF 319), is **DENIED**.

Opinion

ORDER GRANTING DEFENDANT MICROSOFT CORPORATION'S MOTION TO DISMISS

I. INTRODUCTION

This matter comes before the Court on Defendant Microsoft Corporation ("Microsoft")'s Motion to Dismiss Plaintiff ATM Shafiqul Khalid's Second Amended Complaint. Dkt. #32. The Court finds oral argument unnecessary to resolve the underlying issues. Having reviewed Defendant's Motion, Plaintiff's Response, Defendant's Reply, and the remainder of the record, the Court GRANTS Defendant's Motion to Dismiss and dismisses Plaintiff's claims with prejudice and without leave to amend.

II. BACKGROUND

On September 4, 2019, this Court dismissed Plaintiff's First Amended Complaint. Dkt. #20. The Court granted Plaintiff leave to amend three of his claims: Counts 1 and 2 under the Sherman Act, and Count 3 under the *federal Racketeer Influenced and Corrupt Organizations Act ("RICO")*. *Id.* at 22. The Court **[*2]** also granted Plaintiff leave to amend two of his requests for declaratory relief, Counts 9 and 10. The remainder of Plaintiff's claims were dismissed with prejudice and without leave to amend. *Id.* On November 29, 2019, Plaintiff filed the Second Amended Complaint. Dkt. #29. Microsoft's Motion to Dismiss seeks dismissal of Plaintiff's remaining claims with prejudice. Dkt. #32 at 17.

Plaintiff's Second Amended Complaint ("SAC") provides many of the same facts asserted in his First Amended Complaint. After accepting a position with Microsoft as a Senior Program Manager in its Bing division, Plaintiff signed Microsoft's Employee Agreement (the "Employee Agreement"). Dkt. #29 at ¶¶ 14-16. This agreement included a provision under Section 5 that assigned to Microsoft all rights, title and interest in all inventions that the employee "may conceive, develop, reduce to practice or otherwise produce" during his employment with Microsoft. Dkt. #29-1 at 2-3. Section 6 of the Employee Agreement asked Plaintiff to attach a list "describing all Inventions belonging to me and made by me prior to my employment with MICROSOFT that I wish to have excluded from this Agreement. If no such list is attached, I represent that **[*3]** there are no such Inventions." Dkt. #29 at ¶ 16. The Employment Agreement further noted on its first page: "If you wish to attach a list of inventions, per paragraph 6, below, please contact your recruiter." *Id.* at ¶ 14.

Plaintiff signed the Employee Agreement on December 19, 2011 and sent a separate email to his recruiter, Shannon Carlsen, attaching an invention exclusion list (the "Exclusion List") that listed nine patentable items. *Id.* at ¶¶ 17-19. This Exclusion List included inventions for a minicloud subscription service ("the '637 patent") and a framework to protect computer systems from viruses and spyware ("the '219 patent") that he had filed prior to starting work at Microsoft. *Id.* at ¶¶ 19-20; Dkt. #29-5. At his Microsoft employee orientation program in January 2012, Plaintiff signed a hard copy of the Employee Agreement, submitted his Exclusion List for the second time and noted by hand in the hard copy Employee Agreement that he submitted additional pages. *Id.* at ¶ 18. Plaintiff worked at Microsoft from January 9, 2012 until his termination in early February 2015. *Id.* at ¶ 22.

On February 19, 2015, Microsoft's in-house counsel notified Plaintiff that he had not listed any inventions under Section 6 of **[*4]** the Employment Agreement. *Id.* at ¶¶ 44-45. For that reason, in-house counsel stated, Microsoft retained an assignment right in the patents for the '637 and '219 patents. Plaintiff claims that Microsoft continued to deny receipt of his Exclusion List, despite Plaintiff's requests to various employees for hard copies of his signed Employee Agreement. *Id.* at ¶¶ 46-51. On July 9, 2015, Microsoft offered to put together an agreement if Plaintiff "agreed to give Microsoft royalty free access to all present and future patents related to the Mini-cloud systems in exchange for resolving all disputes." *Id.* at ¶ 50. Plaintiff declined this offer on the basis that it was unfair and anti-competitive.

On May 27, 2016, Plaintiff received a letter from Microsoft's outside counsel, Merchant & Gold. This 2016 letter ("the M&G letter") re-stated Microsoft's position that Plaintiff had granted Microsoft a "royalty-free license, irrevocable, worldwide license" to those inventions. *Id.* at ¶ 53 (quoting Dkt. #29-7 at 4). Outside counsel offered to transfer to Plaintiff all of Microsoft's ownership interest in the '219 and '637 patent families in exchange for his granting Microsoft a non-exclusive, royalty-free license to the disputed **[*5]** patent families and fully releasing Microsoft from all claims and liability. *Id.*

Plaintiff claims that Citrix Systems, Inc. ("Citrix"), a Microsoft vendor that employed Plaintiff before he began working at Microsoft, took part in issuing the May 2016 M&G letter. Dkt. #29 at ¶ 178. Plaintiff had sued Citrix in state court in October 2015 in an effort to clear title to the '219 and '637 patents, which Citrix had also attempted to claim. *Id.* at ¶ 56. On August 1, 2018, the state court entered a $5.8 million judgement in favor of Plaintiff against Citrix. *Id.* at ¶ 62. Plaintiff maintains that during the state court trial, a chief architect of Citrix "testified and suggested that Citrix wanted to protect its partner and suggested that Khalid's patent could have been hostile to those partners. [The chief architect] also testified that Citrix never sold anti-virus kind of products, an area 219 patent targeted to solve." *Id.* at ¶ 60.

Plaintiff's Second Amended Complaint alleges that Microsoft, acting in concert with its vendor, Citrix, engaged and continues to engage in a patent-grabbing scheme through its patent rights assignment provision in the Employee Agreement. *Id.* at ¶¶ 69-79. He maintains that Microsoft **[*6]** fraudulently denied the existence of his exclusion list, *id.*, and that Citrix acted in concert with Microsoft to cloud Plaintiff's patent title and threaten him with baseless litigation. *Id.* at ¶¶ 111-112, 131, 178. Plaintiff claims that Microsoft's scheme violates antitrust laws under *Sections 1* and *2* of the Sherman Act and the federal Racketeer Influenced and Corrupt Organizations Act ("RICO"). *Id.* at ¶¶ 96-114. He also seeks declaratory relief that the Employee Agreement violated *RCW 49.44.140* and that Microsoft engaged in inequitable conduct. *Id.* at ¶¶ 151-157.

III. DISCUSSION

A. Legal Standard

In making a 12(b)(6) assessment, the court accepts all facts alleged in the complaint as true and makes all inferences in the light most favorable to the non-moving party. *Baker v. Riverside County Office of Educ., 584 F.3d 821, 824 (9th Cir. 2009)* (internal citations omitted). However, the court is not required to accept as true a "legal conclusion couched as a factual allegation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. The complaint "must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Id. at 678*. This requirement is met when the plaintiff "pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct **[*7]** alleged." *Id.* The complaint need not include detailed allegations, but it must have "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555*. Absent facial plausibility, a plaintiff's claims must be dismissed. *Id. at 570*. Because Plaintiff is proceeding pro se, his pleadings must be liberally construed. *Eldridge v. Block, 832 F.2d 1132, 1137 (9th Cir. 1987)*.

B. Claims Previously Dismissed with Prejudice and Surreply

As an initial matter, Plaintiff has improperly used his Second Amended Complaint to replead claims dismissed with prejudice and without leave to amend. *See* Dkt. #29 at ¶¶ 120-124 (RICO claim predicated on forced labor); ¶¶ 125-132 (civil rights claims); ¶¶ 141-150 (fraud); and ¶¶ 158-179 (declaratory relief for *Fourteenth Amendment* violations). The Court instructed Plaintiff in its initial order of dismissal, Dkt. #20, and again in its order denying Plaintiff's motion for reconsideration, Dkt. #28, that he was not granted leave to amend these claims. The Court will not reconsider them here. Similarly, Plaintiff has renewed his request that he represent a class of all Microsoft employees who signed an employment contract with Microsoft similar to the Employee Agreement that he signed. Dkt. #29 at ¶¶ **[*8]** 133-140. The Court has already addressed this issue and will not reconsider it here. *See* Dkt. #20 at 6-7.

Plaintiff also filed a surreply, Dkt. #36, but provided no notice to the Court as required by this district's Local Rules. *See* *Local Rules W.D. Wash. LCR 7(g)(1)*. While pro se parties are generally held to less stringent standards, a pro se litigant must follow the same rules of procedure that govern other litigants. *Ghazali v. Moran, 46 F.3d 52, 54 (9th Cir. 1995)*. Moreover, Plaintiff has improperly used the surreply to pose the same or additional arguments in opposition to the Motion to Dismiss. Microsoft's reply brief does not raise new arguments, but merely reiterates the grounds for dismissal asserted in its opening brief. Therefore, the court will not consider the surreply in resolving the motion and hereby strikes it.

C. Sherman Act *Section 1* Claims

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations . . . ." *15 U.S.C. § 1*. To state a claim under *Section 1*, a plaintiff must allege (1) a contract, combination, or conspiracy between two or more entities; (2) in unreasonable restraint of trade; that (3) affects interstate **[*9]** commerce. *See id.*; *Am. Ad. Mgmt., Inc. v. GTE Corp., 92 F.3d 781, 788 (9th Cir. 1996)*. Here, Plaintiff identifies three "agreements" entered into by Microsoft that allegedly violated *Section 1*: (a) the Employee Agreement; (b) the vendor agreement with Citrix; and (c) the 2016 M&G letter from Microsoft's outside counsel, either on its own or in combination with the Citrix vendor agreement. Dkt. #29 at ¶¶ 98-102.

1. Actionable Conspiracy

Microsoft contends that Plaintiff has failed to state an actionable conspiracy with respect to the Employee Agreement because there can be no conspiracy between the parties to the agreement—here, Plaintiff and Microsoft. Dkt. #32 at 10-11. The Court agrees. The Court has previously considered and dismissed Plaintiff's theory that the Employee Agreement may violate *Section 1*. Dkt. #20 at 7 ("It is well-established that *Section 1 of the Sherman Act* does not reach "wholly unilateral" conduct by a single entity) (citing *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (internal quotations omitted)). Plaintiff responds that the Employee Agreement is not subject to the single entity rule because, as a potential competitor of Microsoft, he "didn't have economic unity" with his employer. Dkt. #34 at 10 (citing *Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1147 (9th Cir. 2003)*, *as amended on denial of reh'g* (Apr. 24, 2003)).

Plaintiff's argument to preserve his *Section 1* claim **[*10]** as to the Employee Agreement is difficult to follow and appears to contradict the gravamen of his complaint. Although courts recognize exceptions to the "single entity" principle generally applied to intra-company agreements, such an exception applies to situations where an individual is acting as a coconspirator with the corporation because of his "independent personal stake" in the conspiracy's success. *American Needle, Inc. v. National Football League, 560 U.S. 183, 200, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* ("Agreements within a firm can constitute concerted action covered by *§ 1* when the parties to the agreement act on interests separate from those of the firm itself, and the intrafirm agreements may simply be a formalistic shell for ongoing concerted action."). Setting aside the logical fallacy of Plaintiff's argument, the SAC makes clear that he does not intend to claim that he was in conspiracy with Microsoft nor that he derived any benefit from the Employee Agreement—indeed, he alleges the very opposite. *See, e.g.*, Dkt. #29 at ¶¶ 99-100. Accordingly, Plaintiff's *Section 1* claim as to the Employee Agreement again fails to state an actionable conspiracy.

2. Unreasonable Restraint of Trade

Turning to the remaining two "agreements," the Citrix vendor agreement and the May 2016 M&G letter, Microsoft **[*11]** argues that Plaintiff has failed to allege an unreasonable restraint of trade as to any agreements between Microsoft and Citrix. Dkt. #32 at 12. A *Section 1* plaintiff must sufficiently plead a restraint of trade that falls under one of three rules of analysis: rule of reason, per se, or quick look. While courts typically need not decide which standard to apply at the pleading stage, they must still determine whether the complaint has alleged sufficient facts to state a claim under at least one of these three rules. *See* *In re High-Tech Employee Antitrust Litig., 856 F. Supp. 2d 1103, 1122 (N.D. Cal. 2012)* ("Indeed, that decision is more appropriate on a motion for summary judgment.").

The rule of reason is the presumptive, default standard and "requires the antitrust plaintiff to demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive." *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1133 (9th Cir. 2011)*. This rule requires a court to examine a variety of factors such as information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history and effect. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Next, a small category of restraints are considered illegal per se because "they always or almost always tend to restrict competition and decrease output." *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2283, 201 L. Ed. 2d 678 (2018)*.

Because per se agreements are so "manifestly **[*12]** anticompetitive" and lacking in "any redeeming virtue," the detailed industry analysis required under the rule of reason is not required for per se restraints. Finally, the "quick look" analysis applies to a certain class of restraints that is "not unambiguously in the per se category" but "may require no more than cursory examination to establish that their principle or only effect is anticompetitive." *Safeway, Inc., 651 F.3d at 1133*. Under the quick look analysis, courts conduct a "truncated rule of reason" analysis if the anticompetitive effects on customers and markets are clear in the absence of a detailed market analysis. *Id.*

Microsoft argues that the rule of reason applies and that Plaintiff has failed to allege restraint of trade under this standard. Dkt. #32 at 12. Plaintiff responds that both agreements are either per se *Section 1* violations or restraints of trade under the quick look approach, and he is therefore relieved from having to plead injury to competition. Dkt. #34 at 16. It is well-established that a plaintiff is not required to plead under all three possible rules. *United States v. eBay, Inc., 968 F.Supp.2d at 1030, 1037-38 (2013)* ("A plaintiff is the master of its complaint and may choose which claims to allege. The strategy of alleging only **[*13]** per se and quick look violations is not an unprecedented one."). However, a plaintiff must be prepared to "abide by the consequences of its pleading decisions," which includes risk of dismissal. *Id. at 1038*.

To the extent Plaintiff attempts to assert "per se" violations of the Sherman Act, he fails to allege sufficient facts to support this theory. It is not apparent that either the vendor agreement or the M&G letter have "manifestly anticompetitive effects," or that they "lack any redeeming virtue." *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1133 (9th Cir. 2011)*. The M&G letter applies to Plaintiff alone without any application to other competitors in the market. The vendor agreement's "anticompetitive effect" is likewise unclear. This agreement claims all intellectual property produced by Citrix's employees during their employment with Citrix and transfers it to Microsoft. Dkt. #29 at ¶ 54. Plaintiff has failed to direct the Court to any cognizable per se restraint of trade contained therein. *Cf. United States v. Joyce, 895 F.3d 673, 677 (9th Cir. 2018)* (per se violations include horizontal agreements among competitors to fix prices or divide markets, group boycotts, tying arrangements, and output limitations).

Plaintiff responds that Citrix and Microsoft's intellectual property agreements equate to "naked price-fixing" **[*14]** because their claims clouded title to his patents and reduced their value to zero. Dkt. #29 at ¶ 99; Dkt #34 at 8. Accepting these claims as true, the Court still finds no support for Plaintiff's theory that clouding his patent title—even in bad faith—equates to one of the four price-fixing arrangements recognized under ***antitrust law***. *Cf. Knevelbaard Dairies v. Kraft Foods, Inc. 232 F.3d 979. 988 (9th Cir. 2000)* (Describing the four types of price-fixing arrangements: horizontal minimum price-fixing, horizontal maximum price-fixing, vertical minimum price-fixing, and vertical maximum price-fixing).

Similarly, Plaintiff has alleged insufficient facts to support a "quick look" analysis of his claims. Under quick look, a court must be able to determine that an agreement has anticompetitive effects from the perspective of an observer "with even a rudimentary understanding of economics." *Harris, 651 F.3d at 1138*. Without any attempt by Plaintiff to provide market analysis, the Court cannot find that an intellectual property transfer agreement between Citrix and Microsoft has obvious anticompetitive effects. *Safeway, Inc., 651 F.3d at 1133*. In addition to Plaintiff's "naked price-fixing" argument considered and rejected above, he contends that these agreements are subject to quick look because they violate the "constitutional **[*15]** policy" under *Article 1, Section 8, Clause 8* "to provide an incentive to inventors to promote the Progress of Science and useful Arts." Dkt. #34 at 16. This constitutional argument offers no explanation for why the vendor agreement or the M&G letter should be subject to quick look rather than rule of reason.

In sum, Plaintiff has failed to sufficiently plead the existence of restraints that are subject to either per se or quick look analysis. More fatally, because he attempted to avoid pleading anticompetitive effects, he failed to plead these restraints under the rule of reason. *See* Dkt. #34 at 16-17. To state a *Section 1* claim under the rule of reason, plaintiffs must plead facts which, if true, will prove "(1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)*. Additionally, plaintiffs must plead that they were harmed by the defendant's anti-competitive contract, combination, or conspiracy, and that this harm flowed from an "anticompetitive aspect of the practice under scrutiny." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. This **[*16]** fourth element is generally referred to as "antitrust injury" or "antitrust standing." *See, e.g., id.*

Plaintiff has failed to plead actual injury to competition and antitrust standing. To allege actual injury to competition, a plaintiff must plead facts that, if true, would show that the agreement adversely affects competition in the relevant market as a whole—not just the plaintiff. *Twombly, 550 U.S. at 556*. To sufficiently allege antitrust injury, the plaintiff must not only allege that the defendant's behavior is anticompetitive, but that his injury is *because of* the anti-competitive aspect of the practice. *Brantley, 675 F.3d at 1200* (citing *Atl. Richfield Co., 495 U.S. at 334*). Plaintiff's complaint only describes injuries to himself with no mention of actual harm to competition. *See* Dkt. #29 at ¶ 102 ("The restraint restricted Khalid from developing his patents furthers causing damage to his IP licensing and incubation business in 2015/2016 and negatively impacted Khalid's recovery from Microsoft partner Citrix along with added litigation cost."). Because Plaintiff has failed to sufficiently plead injury to competition, he cannot show that his injury is because of any anticompetitive conduct. For that reason, he has likewise failed to plead antitrust standing.

[*17] Accordingly, Plaintiff has failed to state a claim under *Section 1* as to the Employee Agreement, the vendor agreement with Citrix, or the M&G letter.

3. *Walker Process* Claim

Plaintiff also claims that Microsoft threatened baseless litigation in violation of *Section 1*. *Id.* at ¶ 101. It is "well-established" in ***antitrust law*** that using baseless litigation to drive out competition may amount to an antitrust violation. *Int'l Techs. Consultants, Inc. v. Pilkington PLC, 137 F.3d 1382, 1390 (9th Cir. 1998)* (citing *CVD, Inc. v. Raytheon Co., 769 F.2d 842 (1st Cir. 1985))*. Microsoft acknowledges that this type of claim, known as a *Walker Process* claim, is cognizable, but counters that Plaintiff "makes no plausible allegation that Microsoft sent its letter in bad faith, or that it knew its claim was baseless." Dkt. #35 at 7.

The Court agrees. Plaintiff has undermined his bad faith claim by acknowledging that Microsoft may have misplaced his Disclosure List due to negligent bookkeeping rather than as part of an intentional, fraudulent scheme. *See* Dkt. #29 at ¶ 83 ("The M&G letter and Miki's case show either irreparable and costly neglect in Microsoft's applicant/new employee document bookkeeping, or show a blatant cover-up"). Moreover, nothing in the M&G letter suggests a threat of litigation—it notifies Plaintiff that Microsoft disputes his patent claims, **[*18]** it asserts Microsoft's patent rights, and it offers settlement. *See* Dkt. #29-7 at 2-5. On this basis, Plaintiff has failed to state a *Walker Process* claim. *See* *K-Lath, Div. of Tree Island Wire (USA), Inc. v. Davis Wire Corp., 15 F. Supp. 2d 952, 956-57, 964 (C.D. Cal. 1998)* (dismissing *Walker Process* claim where defendants reserved their rights but did not actually threaten suit).

D. *Section 2* Sherman Act Claims

Section 2 of the Sherman Act provides that "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations . . . [commits a felony]." *15 U.S.C. § 2*. To state a claim for monopolization under this provision, a plaintiff must allege that the defendant (1) possessed monopoly power in the relevant markets; (2) willfully acquired or maintained its monopoly power through exclusionary conduct; and (3) caused antitrust injury. *Am. Prof'l Testing Serv., Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Publications, Inc., 108 F.3d 1147, 1151 (9th Cir. 1997)*. To state a claim for attempted monopolization, a plaintiff must allege (1) specific intent to control process or destroy competition; (2) predatory or anticompetitive conduct directed at accomplishing that purpose; (3) a dangerous probability of achieving "monopoly power" and (4) causal antitrust injury. *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1432-1433 (9th Cir. 1995)*.

Here, Plaintiff claims that through Microsoft's **[*19]** Employee Agreement, its vendor agreement with Citrix, and its ability to pay no development cost of the '637 patent to Plaintiff, Microsoft attempted to gain or maintain its monopoly in the patent submarket attached to the '637 patent. He specifies that Microsoft sought to retain "100% market power within the $4 billion sub-market attached to the '637 patent." Dkt. #29 at ¶ 105. Microsoft argues that dismissal of Plaintiff's Section 2 claim is warranted because he has again failed to adequately allege maintenance of or a dangerous probability of Microsoft achieving monopoly power. Dkt. #32 at 12-13. Microsoft also argues that obtaining Plaintiff's patent does not equate to Microsoft obtaining power *in the relevant market. Id.* at 13.

The Court agrees that the SAC's added references to a $4 billion market for the '637 patent within a broader $400 billion cloud/gaming market fail to remedy the defects the Court identified in his previous complaint. *See* Dkt. #29 at ¶¶ 104-105. Plaintiff has again only alleged market share without providing market analysis (e.g., barriers to entry or hyper-competitive pricing) or allegations that Microsoft willfully acquired or maintained monopoly power within the submarket rather than as a consequence of superior **[*20]** product, business acumen, or historical accident. *See* Dkt. #20 at 8. Plaintiff responds that ownership of the '637 patent equates to a monopoly within the patent's submarket. Dkt. #34 at 12 (citing *FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2011))*. However, nothing in *Actavis* contradicts the well-recognized principle that economic market power cannot be inferred from the mere fact that one holds a patent. *See Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 43, n.4, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. For this reason, even though Plaintiff alleged Microsoft's intent to acquire his patent rights, an intent to acquire patent rights does not automatically equate to an intent to monopolize or attempt to monopolize a particular market. *See id. at 45-46* ("[A] patent does not necessarily confer market power upon the patentee.")

Lastly, Plaintiff has failed to allege injuries within the scope of antitrust injury contemplated by Section 2. *See* Dkt. #20 at 9 (citing *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of California, 190 F.3d 1051, 1055 (9th Cir. 1999)* ("[T]he antitrust laws are only intended to preserve competition *for the benefit of consumers*.") (emphasis added)). Similar to his First Amended Complaint, Plaintiff describes how Microsoft's conduct has reduced the value of *his* patents and prevented *him* from entering the market, *see* Dkt. #29 at ¶ 105, but he has failed to plausibly link Microsoft's conduct or his own injury to an injury to competition **[*21]** within the identified markets or to consumer welfare. For these reasons, dismissal is warranted.

E. Racketeering Claims under *18 U.S.C. § 1962*

Plaintiff also alleges civil RICO violations through extortion. *See* Dkt. #29 at ¶¶ 106-114. To plead a RICO claim under *18 U.S.C. § 1962(c)*, a plaintiff must allege: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity. *Howard v. America Online, Inc., 208 F.3d 741 (9th Cir. 2000)*. A "pattern of racketeering activity" requires at least two predicate acts to constitute racketeering activity. *See 18 U.S.C. §1961(5)*. Microsoft challenges Plaintiff's RICO claim for failure to sufficiently allege an enterprise and predicate acts as well as a failure to meet the heightened pleading requirements for wire fraud. Dkt. #32 at 13-15. The Court will first address enterprise.

1. Enterprise

Section 1962(c) targets conduct by "any person employed by or associated with any enterprise . . . ." "This expansive definition is 'not very demanding.'" *United States v. Christensen, 828 F.3d 763, 780 (9th Cir. 2015)* (quoting *Odom v. Microsoft, 486 F.3d 541, 548 (9th Cir. 2007))*. An enterprise that is not a legal entity is commonly known as an "associationin-fact" enterprise and does not require "any particular organizational structure, separate or otherwise." *Odom, 486 F.3d at 551*. To plead the existence of an association-in-fact enterprise, a plaintiff must allege (1) a purpose; (2) relationships among **[*22]** those associated with the enterprise; and (3) longevity sufficient to permit these associates to pursue the enterprise's purpose. *Boyle, 556 U.S. at 946*. Microsoft argues that the Second Amended Complaint fails to allege the first and third factors. Dkt. #32 at 13-15.

Here, Plaintiff claims that Citrix and Microsoft associated together for the common purpose of "taking ownership" of Plaintiff's '219 and '637 patents through a racketeering scheme. Dkt. #29 at ¶ 108. Microsoft counters that such allegations are "paper-thin" and insufficient to plausibly allege an association for the purpose of appropriating the Mini-Cloud and Safe and Secure patents. Dkt. #32 at 14. While the Court acknowledges the thin allegations in

Plaintiff's Complaint, the Court disagrees that Plaintiff has failed to allege a common purpose. Construed liberally, the Complaint sets forth Plaintiff's theory that Citrix and Microsoft associated to obtain employees' patents through fraudulent means, which is sufficient to state a common purpose. Odom, 486 F.3d at 552 (finding associated-in-fact enterprise where "Microsoft and Best Buy had a common purpose of increasing the number of people using Microsoft's Internet service through fraudulent means.").

However, the Court **[*23]** agrees that Plaintiff has failed to sufficiently plead the ongoing relationship between Citrix and Microsoft that is necessary to establish an "association-in-fact." The Complaint provides no facts on when Microsoft and Citrix formed the vendor relationship, how long they have maintained this relationship, nor how this timeline corresponds to the alleged predicate acts. Because the alleged predicate acts span a nine-year period from 2009 to 2018, *see* Dkt. #29 at ¶ 109, the dearth of information as to the alleged Citrix-Microsoft enterprise relationship make it impossible for the Court to determine whether the relationship was in place at the time any or all of the alleged predicate acts occurred. Plaintiff has likewise failed to provide specific facts as to its organization, such as how one company may control, direct, or manage the other, thus leaving the Court to guess the structure of the alleged enterprise. *See* Ellis v. J.P. Morgan Chase & Co., 950 F. Supp. 2d 1062, 1089 (N.D. Cal. 2013) ("No specific factual allegations explain how [the scheme] occurs, and without this information, the Court cannot ascertain the structure of the alleged enterprise."). For these reasons, Plaintiff has failed to sufficiently allege an enterprise.

2. Predicate Acts

Plaintiff **[*24]** has also failed to allege the predicate acts necessary to sustain a RICO claim. Plaintiff claims that several of Microsoft's actions constitute extortion under either the Hobbs Act or extortion in the second degree under the Washington Racketeering Act, RCW 9A.56.130. Dkt. #29 at ¶¶ 3-4. The Hobbs Act defines extortion as "obtaining of property from another, with his consent, induced by wrongful use of actual or threatened force, violence, or fear, or under color of official right." 18 U.S.C. § 1951(b). The "obtaining" element "requires a showing that a defendant received something of value from the victim of the alleged extortion and that the "thing of value can be exercised, transferred, or sold." United States v. McFall, 558 F.3d 951, 956 (9th Cir. 2009). Washington law defines "extortion" as "knowingly to obtain or attempt to obtain by threat [the] property or services of the owner . . . ." RCW 9A.56.110. Extortion in the second degree means "extortion by means of a wrongful threat . . . ." RCW 9A.56.130.

None of the six predicate acts listed in the complaint state a claim for extortion under either the Hobbs Act or Washington law. These acts include (1) Microsoft initiating a lawsuit against Miki Mullor, which ended in settlement; (2) the May 27, 2016 M&G letter asserting Microsoft's patent **[*25]** rights; (3) Citrix withholding severance money; (4) Citrix threatening litigation; (5) objections to discovery requests; and (6) Citrix refusing Plaintiff's $50,000 patent licensing offer. Dkt. #29 at ¶ 109. Plaintiff argues that the "property" the enterprise sought to obtain was his (and Mullor's) patent rights. Yet none of these alleged actions entail Microsoft or Citrix obtaining Plaintiff's patent rights with his consent through force, fear, or threats as required under 18 U.S.C. § 1951(b); *see also* McFall, 558 F.3d at 956.

Plaintiff argues that these actions constitute "wrongful threats" under the Washington Racketeering Act because Microsoft and/or Citrix sought to use these threats to substantially harm his business or financial condition in order to procure his patent rights. Dkt. #34 at 18-19. However, regardless of what Washington law labels "extortion," an act "cannot qualify as a predicate offense for a RICO suit unless it is capable of being generically classified as extortionate." Wilkie v. Robbins, 551 U.S. 537, 567, 127 S. Ct. 2588, 168 L. Ed. 2d 389 (2007) (internal quotation marks and citation omitted). Under both the Hobbs Act and the generic definition, actual or threatened fear of financial loss must be "wrongful" to be extortionate. United Bhd. of Carpenters & Joiners of Am. v. Bldg. & Constr. Trades Dep't, AFL-CIO, 770 F.3d 834, 843 (9th Cir. 2014).

Here, the SAC makes clear that Microsoft's asserted **[*26]** rights over the '219 and '637 patents, including those stated in the M&G letter, were based on its understanding of the Employee Agreement. Dkt. #29 at ¶ 53. The SAC likewise makes clear that Plaintiff signed this agreement when he began working at Microsoft. *See id.* at ¶¶ 14-18.

The gravamen of Plaintiff's lawsuit is that he submitted an Exclusion List under this legal agreement and that Microsoft now falsely denies its existence. This issue, which concerns the interpretation and application of the Employee Agreement to Plaintiff's patent rights, amounts to a contract dispute—particularly given Plaintiff's acknowledgement that Microsoft may have lost his Disclosure List due to negligent bookkeeping, not because of intentional fraud. *See, e.g., Union Nat'l Bank of Little Rock v. Federal Nat'l Mortgage Association, 860 F.2d 847, 857 (8th Cir.1988)* (holding that regardless of whether the defendant actually had a right to monies claimed, defendant's demands "were motivated by [the defendant's] interpretation of the agreement" and therefore not extortion). Regardless of whether Microsoft actually had a right to the patents, its demands were based on its understanding of its rights under the Employee Agreement and therefore cannot amount to a "wrongful threat" for purposes of a RICO claim.

This leaves **[*27]** wire fraud as the only remaining predicate act. Plaintiff contends that Microsoft committed wire fraud by falsely representing that he could submit the Exclusion List and by sending the M&G letter, which falsely claimed that he never submitted an Exclusion List. Dkt. #29 at ¶ 112. Wire fraud under *18 U.S.C. § 1343* requires (1) the formation of a scheme to defraud; (2) the use of the mails or wires in furtherance of that scheme; and (3) the specific intent to defraud. *Eclectic Props. E. v. Marcus & Millichap Co., 751 F.3d 990, 997 (9th Cir. 2014)*. Plaintiff must also satisfy the heightened pleading standards for fraud under *Rule 9(b)*. *Schreiber Distrib. Co. v. Serv-Well Furniture Co., Inc., 806 F.2d 1393, 1401 (9th Cir. 1986))*.

Because Plaintiff has conceded that the missing Disclosure List may be the product of negligent bookkeeping, *id.* at ¶ 83, he cannot plausibly allege that Microsoft had a specific intent to defraud him—let alone every employee who signs the agreement. Moreover, Plaintiff has failed to allege formation of a scheme to defraud its employees. While he states with particularity the events leading to Microsoft's denial of his own Exclusion List, *see id.* at ¶¶ 17-18, 53-54, the only facts he provides beyond his own dispute with Microsoft are vague allegations related to another former Microsoft employee, Miki Mullor. *See id.* at ¶¶ 82-84. The Court finds these claims **[*28]** insufficient to reasonably infer that Plaintiff's and (possibly) Mullor's disputes with Microsoft comprise part of a larger scheme by Microsoft to defraud any employee who submits a Disclosure List with their Employee Agreement.

Plaintiff also brings claims under *Section 1962(d)* for conspiring to violate RICO. Dkt. #29 at ¶ 114. *Section 1962(d)* provides that "[i]t shall be unlawful for any person to conspire to violate any of the provisions of *subsection (a)*, *(b)*, or *(c)* of this section." "To establish a violation of *section 1962(d)*, a plaintiff must allege either an agreement that is a substantive violation of RICO or that the defendants agreed to commit, or participated in, a violation of two predicate offenses." *Howard v. America Online Inc., 208 F.3d 741, 751 (9th Cir. 2000)*. Because Plaintiff has failed to allege the requisite substantive elements of RICO under *Section 1962(c)*, his claim for conspiracy under *Section 1962(d)* also fails. *See id.* (A plaintiff's failure to adequately plead substantive violation of RICO precludes a claim for conspiracy).

F. Declaratory Relief

Finally, Plaintiff seeks two declaratory judgments: (1) that the "right of first refusal" clause in Section 5 of the Employee Agreement violates *RCW 49.44.140(1)*; and (2) that Microsoft engaged in "inequitable conduct" through its ambiguous and indefinite patent assignment provision.

The *Declaratory Judgment Act ("DJA")* **[*29]** authorizes a district court to "declare the rights and other legal relations of any interested party seeking such declaration" when there is an "actual controversy." *28 U.S.C. § 2201(a)*. To have subject matter jurisdiction over a claim brought under the DJA, there must be an "actual controversy." *See Teva Pharms. USA, Inc. v. Novartis Pharms. Corp., 482 F.3d 1330, 1338*. An "actual controversy" under the DJA is the same as an Article III case or controversy. *See id.* A party bringing a declaratory judgment claim must therefore show "that under 'all the circumstances,' there is an actual or imminent injury that was caused by the opposing party, is redressable by judicial action, and is of 'sufficient immediacy and reality to warrant the issuance of a declaratory judgment.'" *Multimedia Patent Tr. v. Microsoft Corp., 525 F. Supp. 2d 1200, 1218 (S.D. Cal. 2007)* (internal citation omitted). Even if an actual controversy exists, the Court may decline to issue a declaratory judgment. *Weyerhaeuser Co. v. Novae Syndicate 2007, No. C18-0585-JLR, 2019 U.S. Dist. LEXIS 121631, 2019 WL 3287893, at *1 (W.D. Wash. July 22, 2019)*.

The Court previously found that Plaintiff failed to allege an actual case or controversy arising from Microsoft attempting to enforce the "right of first refusal" clause. *See* Dkt. #20 at 21. Nothing in Plaintiff's Second Amended complaint remedies this deficiency. Plaintiff argues that Microsoft invoked the **[*30]** right of first refusal when he approached them first before he tendered his patents to Google. Dkt. #34 at 22. However, his complaint makes clear that Microsoft never invoked the right of first refusal—instead, it claimed ownership of his patents because of the missing Exclusion List under Section 6. Dkt. #29 at ¶ 154 ("Microsoft countered that offer by claiming free exclusive license leading to this litigation."). Accordingly, Plaintiff's facial challenge to the legality of the "right of first refusal" clause under Section 5 is not tied to any actual dispute, does not rest on any concrete injury, and is not ripe for adjudication. *See* *Lee v. Capital One Bank, No. C07-4599-MHP, 2008 U.S. Dist. LEXIS 17113, 2008 U.S. Dist. LEXIS 17113, 2008 WL 648177, at *4 (N.D. Cal. Mar. 5, 2008)* (Claim does not present a "case or controversy" because "the allegedly unconscionable provisions in the Agreement have not been implicated in an actual dispute."). Plaintiff invokes previously rejected constitutional arguments and the fact that Microsoft's demand letter is public record, Dkt. #34 at 22-26, but neither of these arguments address the issue that Microsoft never invoked the right of first refusal.

Finally, Plaintiff's request for a declaratory judgment that Microsoft engaged in "inequitable conduct" remains too broad and **[*31]** vague to warrant declaratory relief. The Court previously cautioned Plaintiff that "broad and vague declaratory relief" that "does not 'admit of specific relief through a decree of a conclusive character, as distinguished from an opinion advising what the law would be upon a hypothetical set of facts' is unripe. Dkt. #20 at 21 (citing *Aetna Life Ins. Co. v. Haworth, 300 U.S. 227, 240-41, 57 S. Ct. 461, 81 L. Ed. 617 (1937)* (internal quotations omitted)). The Court likewise cautioned Plaintiff that his amended complaint "must request specific relief from the Court based on his own dispute with Microsoft—not broad relief based on hypothetical injuries to other Microsoft employees." *Id.* at 22.

Plaintiff's Second Amended Complaint fails to remedy these defects. Plaintiff again requests broad-based relief, claiming "Microsoft action is inequitable in nature" and that the "[p]ublic has tremendous interest in patent rights including how patent rights propagate[] among parties." Dkt. #29 at ¶¶ 170, 172. The Court remains unclear what, within Plaintiff's broad request, he seeks to declare inequitable—Microsoft's use and enforcement of its Employment Agreement in general, its denial of Plaintiff's disclosure list, its transmission of the M&G letter, and/or other allegations referenced throughout **[*32]** the complaint. *See* Dkt. #29 at ¶¶ 167-172. Accordingly, the Court again finds dismissal appropriate.

G. Leave to Amend

Where claims are dismissed for failure to state a claim on which relief can be granted, permission to file an amended complaint is typically granted. *See* *Fed. R. Civ. P. 15(a)* ("[L]eave to amend shall be freely given when justice so requires"). However, where amendment would be futile, a claim is properly dismissed with prejudice. *Dumas v. Kipp, 90 F.3d 386, 393 (9th Cir. 1996)*; *see also* *DeSoto v. Yellow Freight Sys., Inc., 957 F.2d 655, 658 (9th Cir. 1992)* ("A district court does not err in denying leave to amend where the amendment would be futile") (internal citation omitted).

The court recognizes that "a *pro se* complaint, however inartfully pleaded, must be held to less stringent standards than formal pleadings drafted by lawyers." *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (quoting *Estelle v. Gamble, 429 U.S. 97, 106, 97 S. Ct. 285, 50 L. Ed. 2d 251 (1976))* (internal quotation marks omitted). However, "federal courts are far less charitable when one or more amended pleadings already have been filed with no measurable increase in clarity." 5 Charles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1217 (3d ed. 2004); *see also Schmidt v. Herrmann, 614 F.2d 1221, 1224 (9th Cir. 1980)*.

Here, Plaintiff's Second Amended Complaint is largely identical to his First Amended Complaint and suffers from similar pitfalls. For the second time, Plaintiff has alleged what appears **[*33]** to be, in essence, a contract dispute with Microsoft over the missing Disclosure List. To fit his claims into the framework of the Sherman Act and RICO, Plaintiff has attempted to extrapolate from his own dispute various large-scale antitrust and racketeering schemes against Microsoft employees. However, without offering specific facts beyond his singular case, he has twice failed to plausibly establish a broader scheme or conspiracy. Furthermore, with respect to his missing Disclosure List, he has now twice contradicted his own claims of intentional fraud or conspiracy by acknowledging the possibility of negligent—rather than fraudulent—bookkeeping. Finally, regarding his requests for declaratory relief, he has failed to remedy the deficiencies the Court identified in its order dismissing Plaintiff's First Amended Complaint. Considering all the above, the Court concludes that permitting further amendment here would be futile.

IV. CONCLUSION

Having reviewed Defendant's Motion, Plaintiff's Response, Defendant's Reply, and the remainder of the record, it is hereby ORDERED that Defendant's Motion to Dismiss, Dkt. #32, is GRANTED. Plaintiff's claims are hereby DISMISSED with prejudice and **[*34]** without leave to amend.

DATED this 6th day of April, 2020.

/s/ Ricardo S. Martinez

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN1[] **Antitrust Statutes, Clayton Act**

Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, prohibits any merger in any line of commerce or in any, activity affecting commerce in any section of the country whose effects may be substantially to lessen competition, or to tend to create a monopoly. *15 U.S.C.S. § 18*. To prevail on a claim under Section 7, the government must show a reasonable probability that the merger will substantially lessen competition. While the government need not prove anticompetitive effects with certainty, it is not enough to show the mere possibility of the prohibited restraint.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Market Definition

HN2[] **Market Definition, Relevant Market**

Courts considering a Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, merger challenge follow a burden-shifting framework. First, the court determines whether the government has established a prima facie case that the proposed merger is anticompetitive by (1) identifying the proper relevant market and (2) showing that the effects of the merger are likely to be anticompetitive. If the government succeeds at this first step, the court next determines whether the defendants have rebutted the government's prima facie case. Finally, if defendants do successfully rebut the government's prima facie case, the burden of production shifts back to the government and merges with the ultimate burden of persuasion, which is incumbent on the government at all times. Ultimately, the government's burden is to prove, by a preponderance of the evidence, a reasonable probability that the merger it seeks to enjoin will substantially lessen competition. The relevant market is defined as the area of effective competition. It consists of two components: a product market and a geographic market. A properly-identified relevant market must correspond to the commercial realities of the industry.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Market Definition

HN3[ ] **Market Definition, Relevant Market**

Determination of the relevant market is a necessary predicate to a finding of a violation of the Clayton Act. Because plaintiffs have the burden of defining the relevant market, the failure to properly define either a product or geographic market is fatal to plaintiffs' case.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Market Definition

HN4[ ] **Market Definition, Relevant Market**

In the context of Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, and identifying the proper relevant market, it is not always necessary to consider both sides of a two-sided platform (entities that offer different products or services to two different groups who both depend on the platform to intermediate between them), such as when the impacts of indirect network effects and relative pricing in that market are minor. However, it is always necessary to consider both sides of two-sided transaction platforms that facilitate a single, simultaneous transaction between participants and cannot make a sale unless both sides of the platform simultaneously agree to use their services. These platforms, supply only one product - transactions. Because these transactions necessarily involve both sides of the market, only other two-sided platforms can compete with a two-sided platform for transactions. In other words, for two-sided transaction platforms, competition cannot be accurately assessed by looking at only one side in isolation.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Market Definition

HN5[ ] **Market Definition, Relevant Market**

In the context of Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, according to the Second Circuit, the relevant market for a two-sided transaction platform must as a matter of law include both sides.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN6[] **Antitrust Statutes, Clayton Act**

In the context of Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, only other two-sided platforms can compete with a two-sided platform for transactions. Even if it is not always necessary to consider both sides of a two-sided transaction platform, it is necessary to do so where both sides of the platform facilitate a single, simultaneous transaction between participants.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN7[] **Antitrust Statutes, Clayton Act**

In the context of Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, if the government seeks to stop a global distribution system from buying a one-sided competitor, it must show that this purchase will harm competition on both sides of the two-sided market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] **Relevant Market, Product Market Definition**

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Thus, products comprising a relevant market need not be identical, only reasonable substitutes. To determine the reasonable interchangeability of products, courts consider price, use, and qualities.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] **Relevant Market, Product Market Definition**

Courts can determine the boundaries of a product market by examining practical indicia such as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. Hence, courts evaluating whether different products are in the same product market often examine real-world market conditions, like whether customers switch back and forth between the products, or if firms compete against each other to offer these products.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN10[] **Relevant Market, Geographic Market Definition**

The relevant geographic market is comprised of the area where customers look to buy a seller's products or services. The geographic market is not comprised of the region in which the seller attempts to sell its product, but rather is comprised of the area where his customers would look to buy such a product.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN11[] **Market Definition, Relevant Market**

Herfindahl-Hirschman Index (HHI) is a commonly-used measurement of market concentration. The HHI is calculated by summing the squares of the individual firms' market shares. In determining whether the HHI demonstrates a high market concentration, courts consider both the post-merger HHI number and the increase in the HHI resulting from the merger. A post-merger market with a HHI above 2,500 is classified as highly concentrated, and a merger that increases the HHI by more than 200 points is presumed to be likely to enhance market power. The Government can establish a prima facie case simply by showing a high market concentration based on HHI numbers.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN12[] **Regulated Practices, Monopolies & Monopolization**

Barriers to entry are factors, such as regulatory requirements, high capital costs, or technological obstacles, that prevent new competition from entering a market in response to a monopolist's supracompetitive prices. While not a required element of a Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, claim, evidence of barriers to entry in the relevant market can bolster the government's case. In addition, defendants can rebut the government's prima facie case by showing that the relevant market exhibits low barriers to entry.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN13[] **Antitrust Statutes, Clayton Act**

In the context of Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, a merger can substantially lessen competition by diminishing innovation if it would encourage the merged firm to curtail its innovative efforts below the level that would prevail in the absence of the merger.

Governments > Courts > Court Records

Governments > Courts

HN14[] **Courts, Court Records**

While the public enjoys a common law right of access to judicial proceedings and records, this right is not absolute. To overcome the presumption of access, parties must show that the information they seek to protect is the kind of information that courts will protect and that disclosure will work a clearly defined and serious injury to the party seeking closure. Such information includes sources of business information that might harm a litigant's competitive standing. Moreover, in granting a party's request to protect information, courts must (1) articulate the compelling, countervailing interests to be protected, (2) make specific findings on the record concerning the effects of disclosure, and (3) provide an opportunity for interested third parties to be heard. Further, they must conduct a document-by-document review of the contents of the challenged documents.

Judges: HONORABLE LEONARD P. STARK, UNITED STATES DISTRICT JUDGE.

Opinion by: LEONARD P. STARK

Opinion

AMENDED ON APRIL 13, 2020 TO CORRECT ATTORNEY LISTING

/s/ Leonard P. Stark

STARK, U.S. District Judge:

[*103] INTRODUCTION

The United States Department of Justice ("DOJ" or "government") filed this expedited antitrust action seeking to permanently enjoin the proposed acquisition by Defendants Sabre Corporation and Sabre GLBL Inc. (collectively, "Sabre") of Defendants Farelogix Inc. ("Farelogix") and Sandler Capital Partners V, L.P. ("Sandler") (collectively with Sabre, "Defendants"). Sabre and Farelogix both play roles, which are described in great detail below, in the airline travel industry. The government contends that allowing Sabre to acquire Farelogix, and eliminate Farelogix as an independent entity, would harm competition, and thereby violate *Section 7 of the Clayton Act, 15 U.S.C. § 18*. DOJ contends Farelogix is an innovative disruptor in the market for "booking services," a market historically dominated by just three global distribution systems ("GDSs"), including Sabre, who have tried to stifle innovation in a market in which they earn billions of dollars annually.

The Court held an eight-day bench trial in January and February 2020. **[**3]** (*See* D.I. 251, 253, 254, 255, 256, 257, 258, 260, 261, 263, 264, 265, 266, 267) ("Tr.")[1] After the trial, both sides submitted detailed proposed findings of fact (DJ. 234, 236) as well as opening and answering briefs (D.I. 233, 235, 241, 242).

Pursuant to *Federal Rule of Civil Procedure 52(a)*, and having carefully considered the entire record in this case, the arguments of the parties, and the applicable law, the Court concludes that DOJ has failed to meet its burden of

---

[1] "Citations to the trial transcript are in the form: "([Witness last name] Tr. [page])."

proof. Therefore, the Court will enter judgment for Defendants and against the government. The Court will not enjoin Sabre's proposed acquisition of Farelogix.

PROCEDURAL BACKGROUND

DOJ filed its complaint on August 20, 2019. (D.I. 1) On September 26, 2019, the Court scheduled a bench trial to begin on January 27, 2020. (D.I. 31) After consideration of various requests relating to the length of the trial (*see, e.g.*, D.1. 147 at 8, 15 (parties initially asking for two-week trial within three months of case being filed); D.I. 175 at 2 (parties requesting 30 hours per side)), the Court ultimately allocated each side up to 25 hours for its trial presentation (*see* D.I. 197 at 11).

The parties prepared expeditiously and efficiently for trial, raising only two discovery **[**4]** disputes. (*See* D.I. 127 at 2-3) Trial began, as scheduled, on January 27 and was completed, with a full day of closing arguments and questions to counsel, on February 6, 2020.[2]

[*104] The Court commends all of the many attorneys on both sides for consistently outstanding performances throughout this litigation and especially at trial.

At trial, the government called the following witnesses,[3] including many who were adverse to DOJ's case:

- Cory Garner, Vice President ("VP") for Distribution and Sales for American Airlines ("AA" or "American") (Garner Tr. 89)
- Michael Radcliffe, Director of Distribution for United Airlines ("United") (Radcliffe Tr. 169)
- Susan Carter, Senior VP of Marketing for Farelogix (Carter Tr. 235)
- Jim Davidson, President and Chief Executive Officer ("CEO") of Farelogix (Davidson Tr. 364)
- Chris Boyle, VP of Corporate Development and Mergers and Acquisitions for Sabre (Boyle Tr. 484)
- Theo Kruijssen, Chief Financial Officer ("CFO") of Farelogix (Kruijssen Tr. 585) Sean Menke, President and CEO of Sabre (Menke Tr. 664)

- Gregory **[**5]** Gilchrist, Senior VP Travel Solutions Group for Sabre (Gilchrist Tr. 748)
- Jorge Vilches, former Senior VP of Airline Business for Sabre (Vilches Tr. 785) (by deposition)
- Chris Wilding, Senior VP Airline Line of Business for Sabre (Wilding Tr. 824)
- Dr. Aviv Nevo, economics expert (Nevo Tr. 878)
- Torn Klein, former CEO of Sabre (Klein Tr. 1072) (deposition)
- Christina Larson, Managing Director of Sales Analytics, Distribution, and Planning for Hawaiian Airlines (Larson Tr. 1108) (deposition)
- Jeffrey Lobl, Managing Director of Distribution Strategy, Delta Airlines ("Delta") (Lobl Tr. 1148)

---

[2] It should be understood that the Court is issuing this Opinion in the midst of the global coronavirus (COVID-19) pandemic. As readers today (i.e., April 2020) well understand, we are living through a national emergency, in which courtrooms (although not Courts) are largely closed, and most people (including judges, law clerks, lawyers, and assistants) are working remotely from home.

As of this writing, it is generally known and can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned, that the travel industry, and particularly air travel, has been hit particularly hard by the virus. *See, e.g.*, U.S. Department of the Treasury, *Procedures and Minimum Requirements for Loans to Air Carriers. . . under. the Coronavirus Aid, Relief and Economic Security Act* (March 30, 2020), https://home.treasury.gov/system/files/136/Procedures%20and%20Minimum%20Requirements%20for%20Loans.pdf (last accessed April 7, 2020); Tr. Mar. 30, 2020 teleconference at 4-5; *see generally* Fed. R. Civ. P. 201. Understandably, however, no evidence was presented at trial about the impact of the coronavirus, or how its devastation might itself transform the air travel industry. Therefore, and necessarily, the Court has not considered the potential consequences of the virus in making its findings of fact or conclusions of law. To be clear, the Court's forward-looking analysis does not (and cannot) take into account the current crisis caused by the pandemic.

[3] All witnesses testified live at trial, unless otherwise noted.

Defendants, in addition to essentially conducting direct examinations of many of the above-listed witnesses during the government's case-in-chief, called the following witnesses at trial:

- Kurt Ekert, President and CEO of CWT (Ekert Tr. 1178)
- Rose Stratford, Executive VP Global Supply Relations and Strategic Sourcing, BCD Travel (Stratford Tr. 1211) (deposition)
- Werner Kunz-Cho, CEO Fareportal (Kunz-Cho Tr. 1280) (deposition)

- Tim Reiz, Chief Technology Officer for Farelogix (Reiz Tr. 1320) Dr. Kevin Murphy, economics expert (Murphy Tr. 1419) David Shirk, President of Travel Solutions for Sabre **[**6]** (Shirk Tr. 1580) Rocky Wiggins, Senior VP and Chief Information Officer for Spirit Airlines ("Spirit") (Wiggins Tr. 1638) (deposition) Torn Gregorson, Chief Strategy Officer for the Airline Tariff Publishing **[*105]** Company,[4] better known as "ATPCO" (Gregorson Tr. 1667) (deposition) Shane Tackett, Executive VP of Planning and Strategy for Alaska Airlines (Tackett Tr. 1698)
- Derek Adair, Managing Director of Revenue Management Development for Delta Airlines (Adair Tr. 1717)

One of the notable features of the trial was the juxtaposition of invariably excellent legal skill demonstrated by the attorneys combined with numerous witnesses who were not credible and/or not persuasive on multiple key points, as further explained below in the Court's findings of fact.

FINDINGS OF FACT

This section contains the Court's findings of fact ("FF"). Certain findings of fact may also be provided in connection with the Court's legal analysis later in this Opinion.

A. The Parties And Proposed Transaction

1. The United States Department of Justice Antitrust Division ("Dar) enforces the nation's antitrust laws, including by challenging proposed mergers of private companies that may be anticompetitive. *See* 15 U.S.C. § 25; D.I. 1 **[**7]** ¶ 17.

2. Sabre Corporation is a Delaware corporation headquartered in Southlake, Texas. (DJ. 184 (Pretrial Order ("PTO")) Ex. 1 ¶ 2) Sabre Corporation is the ultimate parent entity of Sabre GLBL Inc., Sabre's principal operating subsidiary and a signatory to the merger agreement with Farelogix. (*Id.* ¶ 3)

3. Sabre's Travel Solutions division contains its Travel Network and Airline Solutions business units. (Menke Tr. 679) Travel Network operates Sabre's global distribution system ("GDS"). (PTO Ex. 1 ¶ 5) Sabre's GDS is the largest in the United States. (PX389 at -437) Airline Solutions sells other information technology ("IT") products for airlines, including a passenger service system ("PSS"). (PTO Ex. 1 ¶ 7)

4. In 2018, Sabre's revenues were approximately $3.9 billion. (PTO Ex. 1 ¶ 9) Most of Sabre's revenues and profits come from GDS booking fees paid by Sabre's airline customers. (Menke Tr. 665)

5. Farelogix, Inc. is a Delaware corporation headquartered in Miami, Florida. (PTO Ex. 1 ¶ 11) Farelogix's majority owner is Sandler Capital Partners V, L.P., a private equity fund, which is also a signatory to Sabre's merger agreement with Farelogix. (*Id.* ¶ 12)

6. Farelogix is an IT provider **[**8]** to airlines and offers a range of products related to distributing and merchandising airline content. (Carter Tr. 261-63)

---

[4] *See* Carter Tr. 289.

7. In 2018, Farelogix's revenues were approximately [TEXT REDACTED BY THE COURT] million. (DX145 at -006) Farelogix Open Connect, also commonly referred to as "FLX OC," generates more than half of Farelogix's revenues. (PTO Ex. 1 ¶ 19)

8. On November 14, 2018, Sabre agreed to purchase Farelogix in a transaction valued at approximately $360 million (the "acquisition," "merger," or "transaction"). (PTO Ex. 1 ¶ 1)

B. Airlines, Content, And Distribution Generally

9. Airlines sell "content" — tickets and ancillary products and services, such as early boarding and seat upgrades — directly to travelers through their websites, call **[*106]** centers, and airport kiosk ticket counters, and also indirectly through travel agencies. (PTO Ex. 1 ¶¶ 4, 22; Stratford Tr. 1215, 1218) "Ancillaries" are "anything beyond the fare." (Wiggins Tr. 1641)

10. Distribution through airlines' proprietary channels is referred to as direct distribution, the direct channel, or colloquially, "airline.com." (Carter Tr. 240; PX025 at -943)

11. Distribution through travel agencies is referred to as the indirect **[**9]** channel or indirect distribution. (Gamer Tr. 91-92; Radcliffe Tr. 171)

12. The indirect channel accounts for about 40% of airline bookings today. (Murphy Tr. 1430-31)[5] The vast majority of indirect channel sales — 95% by passenger volume — are made through a global distribution system ("GDS"). (*Id.*) The remaining 5% are sales directly between an airline and a travel agency or corporation ("direct connections"). (*Id.*)[6]

13. Travel agencies can be divided into online travel agencies ("OTAs") and traditional travel agencies ("TTAs"), including travel management companies ("TMCs"). OTAs such as Expedia and Priceline primarily operate through consumer-facing websites and target leisure customers. (Kunz-Cho Tr. 1281-83) TMCs such as Carlson Wagonlit Travel ("CWT") and BCD Travel ("BCD") manage business travel for corporations. (Ekert Tr. 1178)

14. For many airlines, travel agencies are a critical sales channel, accounting for a significant portion of their revenue. (*See* Gamer Tr. 92 (stating American earns half its revenue through indirect channel); Tackett Tr. 1703-04)

15. Airlines that sell tickets through travel agencies need to communicate with travel agencies in a format compatible **[**10]** with the agencies' internal systems. (Gamer Tr. 146-47)

16. When a travel agent creates a booking, the agent typically receives a record of the booking that is compatible with the agency's IT system, which allows the agent to easily manage the booking and provide post-booking services like invoicing and duty of care. (Stratford Tr. 1220-21) (explaining automated processes applied to records and limitations of "passive segments," that is, records of bookings created outside of the GDS)

17. Travel agencies serve their customers by using proprietary systems to shop for and book flights. (Ekert Tr. 1180-83) For example, a travel agency that serves corporate customers may use comparison shopping engines that allow the agency to pull up only those options that adhere to a corporation's travel policies. (*Id.*) Generally,

---

[5] The specific numbers in this paragraph do not appear in the trial transcript; they were shown on Dr. Murphy's Demonstrative slide number 7, which was marked confidential at trial, and therefore alluded to but not discussed specifically in open Court. Instead, counsel, the witness, and the Court looked at their own copies of the demonstrative while the witness testified. Although the demonstrative was not admitted into evidence, the Court does not understand there to be a dispute about the specific percentages recited in this paragraph. If there is a dispute, it is not material to any issue in this case.

[6] An important but confusing fact in this case is that a "direct connect" is part of the ***indirect*** channel of distribution, as it refers to a direct connection between an airline and a travel agency.

travel agencies cannot meet the needs of their traveler customers by searching for and booking flights on airlines' websites. (Stratford Tr. 1215-16 (explaining that booking through airline website does not allow BCD to provide benefits that their customers value); Ekert Tr. 1184-85 (explaining that CWT allows corporate **[*107]** travelers to access full array of airline content))

18. **[**11]** Airline ticket sales may also be characterized based on whether the passenger is traveling for business or leisure. (Kunz-Cho Tr. 1282-83)

19. Airlines typically sell to leisure travelers through the direct channel. (Garner Tr. 101, 123-25) Leisure travelers tend to have less-complicated itineraries and are more price conscious. (Ekert Tr. 1184) Thus, leisure travelers typically purchase tickets through an airline's website, an OTA, or a metasearch engine (e.g., Kayak or Google Flights). (*Id.*; Murphy Tr. 1439)

20. Business travelers tend to purchase more expensive tickets with more complicated itineraries (often booking at the last minute and making changes, all of which usually results in higher fares and fees and, thus, more revenue for the airlines), and maybe subject to employer-specific travel policies. (Radcliffe Tr. 173; Ekert Tr. 1181-82) For these reasons, business travelers often rely on TMCs to purchase tickets on their behalf. (Ekert Tr. 1183-85)

C. Direct Distribution Channel

21. Airlines prefer that customers search and pay for fares and ancillaries on their websites because — unlike when a traveler uses an aggregated search tool — an airline's website displays only that **[**12]** airline's content, airlines can better control the retail experience on their own websites, and airlines' costs are typically lower when using their own websites. [TEXT REDACTED BY THE COURT] Searching for airfares on the airline's website can, therefore, diminish price transparency and airlines' incentive to compete on price. (Ekert Tr. 1 192-93)

22. In 2005, direct distribution accounted for approximately 50% of bookings by U.S. passenger volume. (Murphy Demonstrative at 26) In 2018, direct distribution accounted for 58.8% of bookings by U.S. passenger volume. (Murphy Demonstrative at 7)[7] In recent years sales volume has shifted from GDSs to airline.com. (Adair Tr. 1726; Wilding Tr. 864) As a result, direct channel sales now account for about 50-70% of airline bookings. (Garner Tr. 91; Wiggins Tr. 1640; [TEXT REDACTED BY THE COURT].

23. Airlines have several tools to encourage travelers to search for and book tickets through the direct channel. Airlines can make lower price fares available only on their websites. [TEXT REDACTED BY THE COURT] Airlines can also provide an "advantageous retail experience" on their own websites. [TEXT REDACTED BY THE COURT]

24. Airlines may also drive bookings to their websites through metasearch engines **[**13]** such as Kayak and Google Flights. (Tackett Tr. 1701, 1711-12) Metasearch engines attract price-sensitive leisure travelers who are typically searching for the lowest fare regardless of airline, and airlines can require the metasearch engine to send the traveler to the airline's website rather than an OTA to book the ticket. (Tackett Tr. 1701-02, 1712-13)

25. In the early 2000s, the launch of airline websites led to a large volume of indirect bookings shifting to the direct channel, but over the last decade, the "[c]hannel shift to direct distribution has stabilized." (PX245 at -286)

D. Indirect Distribution Channel

26. In the indirect channel, unlike in the direct channel, airline content is sold through intermediaries such as travel agencies. [TEXT REDACTED BY THE COURT] Travel agencies offer **[*108]** customers many valuable services, including access to and the ability to book content from thousands of travel suppliers, including hundreds of airlines.

---

[7] The two Murphy Demonstrative slides relied on in this paragraph were not admitted into evidence, but the Court understands the data reported here are not in dispute. Any dispute on these points is not material to any issue in this case.

(Ekert Tr. 1179, 1189) This access to content from many travel suppliers allows travel agencies to provide their customers with comparison shopping and fare transparency, which travel agencies consider one of their most significant value propositions. **[**14]** (Stratford Tr. 1243) Accordingly, airlines that use travel agencies can reach customers who seek to do comparison shopping that they cannot do through airline.com. (Lobl Tr. 1171-72; [TEXT REDACTED BY THE COURT]

27. The travel industry distinguishes between two types of travel agencies: online travel agencies ("OTAs") and traditional travel agencies ("TTAs"). (Garner Tr. 100-03; Klein Tr. 1078)

28. OTAs are travel agencies that sell travel primarily via the internet. (PTO Ex. 1 ¶ 23) OTAs cater primarily to cost-conscious leisure travelers who value comparison shopping. (PTO Ex. ¶ 25) Examples of OTAs are Booking.com, Priceline, Expedia, and Fareportal. (PTO Ex. ¶ 24)

29. OTAs are an important and lucrative distribution channel for airlines. (PX237 at -764; Radcliffe Tr. [TEXT REDACTED BY THE COURT] OTAs enable airlines to reach customers they might not otherwise reach through airline.com by allowing travelers to comparison shop across airlines, hotels, cars, and other travel options, a service airline.com does not offer. (Gamer Tr. 124; Radcliffe Tr. 172) OTAs also enable airlines to sell tickets to customers in areas where they "don't have a large presence," and to customers they might **[**15]** not reach through the direct channel based on brand loyalty alone. (Tackett Tr. 1703-04)

30. TTAs are comprised of travel management companies ("TMCs") and other brick- and-mortar travel agencies. (Gamer Tr. 100-03) BCD Travel, CWT, and American Express Global Business Travel ("Amex GBT") are examples of TMCs. (PTO Ex. ¶ 28)

31. TMCs primarily serve business travelers, which is the most profitable traveler segment for many airlines because they tend to book more expensive airline tickets than leisure travelers. (PTO Ex. ¶¶ 27, 29-30) Indeed, business travelers are often required by their employer to book through a given TMC. (Radcliffe Tr. 172-73) TMCs ensure that business travelers comply with their employers' travel policies, help with duty of care, provide expense reporting and other back-office support, and manage changes to travel itineraries. (Stratford Tr. 1211-12, 1243-47)

32. A GDS is a transaction platform that connects a large number of travel suppliers, such as airlines, hotels, and car rental companies, to a large number of travel agencies. (Carter Tr. 266) For instance, Sabre's GDS connects more than 400,000 travel agencies (Radcliffe Tr. 206) to more than 400 airlines (PX253 **[**16]** at -166) and "thousands of car companies or hotel companies" (Davidson Tr. 442). These connections allow travel suppliers to distribute their content to travel agencies and create and manage bookings. (D.I. 22 ¶ 22) Airlines rely on GDSs to sell tickets through both OTAs and TTAs. (Gamer Tr. 92, 100-03)

33. The GDSs rely on a "traditional" payment model, under which airlines pay GDSs like Sabre a "booking fee" for each flight a passenger takes. (Gamer Tr. 107-08) The GDS then keeps part of the fee and gives the rest to the travel agency as an "incentive payment." (Gamer Tr. 108; Stratford Tr. 1209-10; *see also* Murphy Tr. 1435-36 (defining GDS "net fee" as what GDS retains after paying incentives to travel agencies)) Sabre's contracts with the hundreds of thousands of travel agencies **[*109]** within its network typically require Sabre to pay travel agencies an incentive per segment. (Stratford Tr. 1210) While the majority of Sabre's revenue is generated by GDS booking fees (Menke Tr. 663), Sabre also pays out millions of dollars in incentive payments (Shirk Tr. 1603).

34. GDSs provide various services, including "offer creation;" by using airlines' fare, scheduling, and availability information, **[**17]** GDSs assemble the flight options that an airline can provide in response to a travel agent's search. (PX096 at -098; Radcliffe Tr. 190) Offer creation is also called "constructing an offer" or "shopping." (Gamer Tr. 97)

35. GDSs such as Sabre also provide "normalization" and "aggregation" services by combining flight options from various airlines, thereby allowing travel agencies to request and receive offers from multiple airlines. (PX237 at -752; Gamer Tr. 92; Menke Tr. 718-19) As BCD's Stratford explained, the aggregation capabilities of GDSs are their "number one value proposition" because "customers want us to shop and compare." (Stratford Tr. 1243)

36. Although airlines cannot distribute their full range of products and services through Sabre's legacy GDS technology (Gamer Tr. 93; Radcliffe Tr. 177-78; Adair Tr. 1719), GDSs allow airlines to send offers to travel agencies, create bookings when agencies select an offer, and manage any changes to those bookings (Lobl Tr. 1150; Adair Tr. 1721-22). GDSs also provide travel agencies additional services and technology, notably mid- and back-office software. (Radcliffe Tr. 203; Ekert Tr. 1193-94)

37. The reach and distribution capability **[**18]** of GDSs allows airlines to distribute their products and services globally in seconds, without spending millions of dollars on marketing. (Stratford Tr. 1241) It is critical for all travel agencies that GDSs can provide this aggregation function in sub-second response times. (Kunz-Cho Tr. 1299)

38. In addition to providing real value to airlines and end-user travelers, the intermediary players in the indirect distribution channel - especially GDSs and travel agencies - have strong financial incentives to preserve the travel distribution ecosystem and maintain it in its current form. GDSs earn billions of dollars each year by charging airlines for each passenger segment booked through their GDS. (Gamer Tr. 107; Menke Tr. 665; PTO Ex. ¶¶ 9-10) Travel agencies earn a sizable income each year from incentive payments from GDSs for booking airline tickets through the GDSs. (Stratford Tr. 1209-10; Ekert Tr. 1203-04; PX092 at -622)

E. Sabre's Competitors, Including Other GDSs

39. Sabre's GDS is a two-sided transaction platform. (Nevo Tr. 964; Murphy Tr. 1422-23)[8]

40. As Dr. Murphy explained, "the value of the Sabre [GDS] ... occurs on two sides, where on the one side" travel agents value **[**19]** Sabre's GDS "because it gives them access to a wide range of travel suppliers in a single spot... Because it's attractive to travel agencies and travel agencies want to use Sabre to do their side of the business, it's therefore attractive to airlines, because airlines after all want to sell their product and they want the customers." (Murphy Tr. 1423; *see also* Murphy Tr. 1425 (GDS "platform provides value to two sets of customers — the travel agencies and travelers on one side and the travel suppliers, including airlines, on the other"))

[*110] 41. Sabre has controlled around 50 percent of the airline bookings made through travel agents in the United States. (Nevo Tr. 931, 947; PX389 at -437)

42. Because of the two-sided nature of Sabre's GDS, the primary competitors for Sabre's GDS "in the long run" are "the rival GDSs," Amadeus and Travelport. (Murphy Tr. 1433; *see also* Stratford Tr. 1250; PTO Ex. ¶ 31)

43. Chris Wilding of Sabre testified that "travel agencies, when they're looking to a GDS, they want to make sure that the GDS can provide them with all the relevant content." (Wilding Tr. 860) Ekert of CWT similarly stated that if "Sabre was to lose content or enable content but on a noncompetitive **[**20]** basis ... then we have the ability to shift business away from them to another GDS." (Ekert Tr. 1186)

44. As Dr. Murphy explained, "[i]f [Sabre] do[es]n't provide [the airline content that] customers want, they'll lose travel agencies to Amadeus and Travelport, and if they don't provide what the airlines want and they don't get the airline content, that will cause them to lose on the travel agency side as well." (Murphy Tr. 1433)

45. Sabre's 2018 10-K filed with the U.S. Securities and Exchange Commission ("SEC") identifies "other GDSs" as competitors, but also lists "local distribution systems and travel marketplace providers primarily owned by airlines or government entities and direct distribution by travel suppliers." (PX251 at-160)

46. In addition to competitive pressures arising from other GDSs, airlines' direct distribution channels, including airline.com, constitute the "most important short-term constraint" on Sabre's GDS fees. (Murphy Tr. 1433) While airline.com is "relevant to both TTA and OTA bookings ... it's especially important for OTA bookings" because "direct channel is a mouse click away" (Murphy Tr. 1434; *see also id.* 1438-39; Adair Tr. at 1726 (testifying that

---

[8] *See also* US Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 58 (2d Cir. 2019).

Delta.com is responsible **[**21]** for roughly 50 percent of Delta's distribution and "volume has gone away directly from GDSs").

47. Chris Wilding, the Sabre employee responsible for GDS contract negotiations with airlines, testified: "Airline.com is one of the primary competitors that we face as a GDS." (Wilding Tr. 860)

48. Because airline.com, including the use of airline.com fostered by metasearch engines, competes for bookings with travel agencies, it poses a significant constraint on Sabre's GDS fees, as airlines can undermine the Sabre GDS by withholding content that the airline will only provide through its own direct distribution channel. (Murphy Tr. 1437-38)

49. The competition Sabre faces from both airlines' direct channels and the other GDSs is apparent from the decline in Sabre's "net fee" — i.e., the difference between the GDS fee charged to airlines and incentives paid to travel agencies. (Murphy Tr. 1435-36) GDS fees have declined since 2000. (Murphy Tr. 1435-36; *see also* Stratford Tr. 1250 (testifying that GDSs compete for BCD's bookings through incentives))

50. A sizable portion of travel agencies' revenue, sometimes around 10%, comes from GDS payments. (Ekert Tr. 1203; DX306 at 5; *see also* DX306 at 1) **[**22]**

51. Among the GDSs, Amadeus offers a New Distribution Capability ("NDC") application programming interface ("APT') solution (Carter Tr. 270; Shirk Tr. 1629-30), but Travelport does not (Davidson Tr. 475).

52. To switch GDSs, travel agencies may have to retrain their agents on how to use the new GDS platform. (Stratford Tr. 1216-17) Travel agencies also often rely on **[*111]** mid- and back-office systems provided by their GDS, so moving away from their GDS would require a significant adjustment to their workflows. (Ekert Tr. 1193-94)

53. Travel agencies also face significant switching costs in transitioning customers from one GDS to another. (Ekert Tr. 1185-86, 1205-06, 1381 (explaining it took CWT[TEXT REDACTED BY THE COURT] months and cost[TEXT REDACTED BY THE COURT] to migrate business between GDSs); Stratford Tr. 1216-18)

54. Sabre's GDS contracts with airlines may limit how well airline direct connects can compete with it.' For example, Sabre has had contracts with[TEXT REDACTED BY THE COURT] Likewise, Sabre's agency contracts also have other financial elements, like bonuses or technology grants, that incentivize agencies to book through Sabre. (Ekert Tr. 1381-83)

55. Due to these incentive **[**23]** structures and switching costs, most travel agencies use a single GDS in a given geography or for a particular corporate client. (Garner Tr. 119; Ekert Tr. 1185; Stratford Tr. 1216)

56. As a result of these market dynamics, airlines must distribute through all three GDSs to reach the entire universe of travelers booking through travel agencies. (PTO Ex. 1 ¶ 32)

57. Thus, while GDSs compete with one another, and their competition places some constraints on Sabre's ability to raise prices, that competition is also constrained.

F. New Distribution Capability ("NDC")

58. The New Distribution Capability ("NDC") application programming interface ("API") was initially developed at Farelogix by its Chief Technology Officer, Tim Reiz. (Reiz Tr. 1324-25)

59. An NDC API is an API that communicates using the NDC schema to enable other technology systems or third parties — such as GDSs, travel agents, or an airline's own public-facing website — to access an airline's passenger services system ("PSS"). (Carter Tr. 264-65; Reiz Tr. 1325-27) A PSS houses IT infrastructure critical to an airline's operations, including its reservations and inventory systems. (PTO Ex. 1 ¶ 8) Hence, an NDC API is one type **[**24]** of API that enables airlines to communicate offers and orders between the airline's PSS and third parties. (Stratford Tr. 1253-54)

60. In or around 2012, Farelogix donated the schema it had developed to the International Air Transport Association ("IATA"). (Carter Tr. 277-78; Reiz Tr. 1325; PX096 at - 097; PTO Ex. ¶ 58) Later in 2012, IATA approved the new standard and labeled it NDC. (Carter Tr. 277)

61. Since 2012, IATA alone has controlled the development of NDC as a public and open standard, releasing two new versions on its website every year since it was first published in 2015. (Garner Tr. 150; Carter Tr. 278-79) As a result, NDC today "looks nothing like" the original schema donated by Farelogix in 2012, and Farelogix must now expend additional resources to "keep up" with NDC. (Carter Tr. 278)

62. NDC is not patent-protected; instead, the NDC schemas are open source and are available on IATA's website to any third-party company to implement and use. (Carter Tr. 271; Reiz Tr. 1327) According to IATA's website, more than 160 companies are NDC certified, and it is realistic for any programmer to become certified. (Reiz Tr. 1327-28)

63. In late 2017, IATA released version 17.2 of the **[**25]** NDC schema, which was the first "commercially viable" version of NDC. (Garner Tr. 150; *see also* Radcliffe **[*112]** Tr. 208-09; Davidson Tr. 433) This led in 2018 to a significant increase in the number of airlines looking to adopt an NDC API. (Radcliffe Tr. 209; Carter Tr. 287-88)

64. In mid-2018, American Airlines announced it would offer an NDC-enabled corporate bundle — essentially, a package of fares and ancillaries customized to a particular company's needs with pricing consideration. (Carter Tr. 286-87; Davidson Tr. 424) United Airlines announced a similar bundle shortly thereafter. (Carter Tr. 286-87)

65. NDC is an XML-based messaging schema designed to facilitate electronic communication between airlines and third parties for the purpose of distributing airline content. (PTO Ex. 1115; Reiz Tr. 1324-26) As an XML-based schema, NDC differs from EDIFACT — the schema principally used to distribute airline content in the indirect channel today — because it can accommodate varied and complex airline content. (PX237 at 80-81; Davidson Tr. 444-45; Reiz Tr. 1324-25; PX246 at - 981 (NDC "allows for enhanced communications between airlines and travel agents"))

66. NDC allows airlines to present more **[**26]** ancillary products in a more attractive way, including the potential to enable more personalized offers that bundle fare price with other products, which can increase airline revenue and consumer choice. (Wiggins Tr. 1648-49; Carter Tr. 261-62, 276) NDC gives travelers greater choice and enables airlines to increase their sale of ancillary products. (PX104 at -707 to -708; Radcliffe Tr. 178; Wiggins Tr. 1648) Hence, NDC allows "increased airline product innovation and consumer choice." (Davidson Tr. 395; *see also* PX104 at -707; PX197 at -917, -919 to -920 (outlining new types of offers available through next-generation technology)) In this way, greater use of NDC promises to increase revenues for airlines and travel agents.

67. NDC also shifts two key functions away from the GDS. First, unlike legacy GDS technology, NDC allows an airline to create its own offer instead of relying on the GDS for offer creation. (Radcliffe Tr. 190; Carter Tr. 249 ("The whole point of NDC is for the airline to have more control over its offer."); Davidson Tr. 385; Lobl Tr. 1151; Adair Tr. 1719) By shifting offer creation from the GDS to the airline, NDC gives an airline greater control over the distribution **[**27]** of its products. (Davidson Tr. 385; Adair Tr. 1719; PX300 at -260; PX025 at -953 (Farelogix marketing materials stating NDC API gives airline "[f]ull control over distribution and channel management, with less dependence on GDS/PSS")) Second, NDC enables airlines to decouple order management from the GDS bundle, allowing airlines to reduce their distribution costs. (Garner Tr. 107; Radcliffe Tr. 175; PX300 at-253 ([TEXT REDACTED BY THE COURT]) In these ways, greater use of NDC promises to decrease airlines' costs.

68. Although some airlines still tout the costs savings generated by use of NDC, more airlines view NDC technology as being beneficial primarily because of its ability to increase revenues, not cut costs. (*See* Carter Tr. 265-66; [TEXT REDACTED BY THE COURT] Wiggins Tr. 1648) [TEXT REDACTED BY THE COURT]

69. By enabling airlines to totally or partially disintermediate the GDS, NDC poses a threat to Sabre's traditional business model. (Adair Tr. 1719, 1736-37; PX002 at -885 ("NGD [Next Generation Distribution] shifts control to airlines and weakens the GDS value proposition;" "as an airline gains control of offers, the value of the intermediated channel will decrease"))

G. Farelogix's [28] FLX OC And Its Uses**

70. Farelogix sells a suite of IT solutions for airlines. (PTO Ex. ¶ 13)

[*113] 71. Farelogix has no travel agency customers and no commercial relationship with travel agencies. (Carter Tr. 266-67; PTO Ex. 1 ¶¶ 48-49; PX096 at -097 ("Airlines are our only customers; No travel agency subscribers"))

72. Farelogix sells an NDC API product to airlines that it calls "Open Connect," which is also referred to as FLX OC. (Carter Tr. 236, 264, 266)

73. Farelogix refers to FLX OC, which is at the "core" of its business (Davidson Tr. 366, 382), and its NDC API as its "order management" or "order delivery" product (Carter Tr. 238; Davidson Tr. 405; *see also* PX072 at -232; PX025 at -949).

74. FLX OC consists of two main components: an NDC API, which provides the "pipe" that carries messages between the airline and the travel agency or other third party; and an orchestration layer, which standardizes and normalizes the content transmitted between the airline's and third party's internal systems. (PTO Ex. 1 ¶ 17; PX025 at -948, -949, -951; Carter Tr. 238-39, 243, 246-47; Reiz Tr. 1348-49) Farelogix always sells Open Connect and its NDC API together. (Carter Tr. 264)

75. Since donating the **[**29]** NDC API schema to IATA, Farelogix must now retrofit legacy technology to match the latest NDC versions. (Carter Tr. 279; Davidson Tr. 420) Moreover, Farelogix must maintain several different aging NDC API connections for legacy customers, going back to versions of NDC from 2015, which is costly. (Davidson Tr. 421; Reiz Tr. 1331- 32) Because support for these connections is "much more labor intensive," Farelogix must devote more employees to FLX OC. (Reiz Tr. 1339)

76. Farelogix holds no patents and has no trade secret protection covering FLX OC. (Carter Tr. 271; Davidson Tr. 417)

77. In the direct channel, airlines can use FLX OC to distribute directly to travel consumers, including through the airline's own website or a mobile app. (PX081 at FLX-000704047; Carter Tr. 283) Two of Farelogix's current customers use FLX OC for their own websites. (Carter Tr. 283)

78. Airlines can also use FLX OC in the indirect channel, to reach travel agencies in three ways. (PX081 at - 046; PX025 at -943; Radcliffe Tr. 178-79) Through each of the three booking paths, Farelogix allows an airline to send offers, receive bookings, and make changes to those bookings. (Nevo Tr. 886-87; Radcliffe Tr. 179-80) **[**30]**

79. First, FLX OC enables airlines to establish "direct connects" with travel agencies. (PX081 at -047; Carter Tr. 283) A direct connect is a link directly between an airline and a travel agency without an intermediary such as a GDS (and, hence, without paying GDS fees). (Radcliffe Tr. 175; Tackett Tr. 1705-06; Adair Tr. 1724; PX025 at -953) Thus, a direct connect is part of the "indirect channel" of distribution and is a form of "GDS bypass." (Garner Tr. 106-07; Carter Tr. 240; PX084 at -887)[9]

80. Second, FLX OC enables airlines to connect to travel agencies via a non-GDS aggregator, such as Travelfusion. (Murphy Tr. 1494; *see also, e.g.*, Stratford Tr. 1221 (explaining that BCD uses Travelfusion to access Lufthansa content)) Distribution through a non-GDS aggregator is another form of GDS bypass. (Carter Tr. 241-42, 284; Murphy Tr. 1494)

[*114] 81. Third, FLX OC enables airlines to connect to travel agencies who continue to use a GDS as an aggregator. This delivery path, referred to as "GDS passthrough," enables an airline to use its Farelogix NDC API to push NDC content to travel agencies using GDS aggregation. (Carter Tr. 284; Davidson Tr. 367-68; PX084 at -887)

---

[9] A travel agency can access content from an airline's direct connect via a Farelogix proprietary user interface, known as SPRK, or the agency's own aggregation platform. (PX025 at -952; Reiz Tr. 1349-50; *see also* Gamer Tr. 99-100)

82. Farelogix is agnostic **[**31]** as to whether an airline chooses the GDS bypass or GDS passthrough delivery path; either pathway increases the number of bookings made through Farelogix's NDC API and, therefore, increases Farelogix's revenue. (Radcliffe Tr. 202; Carter Tr. 265; Davidson Tr. 367-68) Farelogix does not distinguish between GDS bypass and GDS passthrough in how much it charges its Open Connect customers per ticket. (Davidson Tr. 368)

83. When an airline books through FLX OC, whether in GDS bypass or GDS passthrough, Farelogix provides the order management services. (Gamer Tr. 118; Neva Tr. 886-88; *see also* Carter Tr. 238, 244-45)

84. FLX OC is not a GDS. (Radcliffe Tr. 202; Carter Tr. 266) FLX OC "do[es]n't aggregate content," and offers only "one airline per connection." (Carter Tr. 266-67) FLX OC is "an input to the airline that the airline can then use to connect to customers or connect to travel agents . . . . Farelogix is not a platform. It doesn't bring the set of customers to any airline or other travel supplier." (Murphy Tr. 1425)

85. FLX OC enables airlines, like AA and United, to distribute differentiated content to Priceline, Orbitz, and other global OTAs (PX025 at -954), and enables these airlines **[**32]** to distribute corporate bundles through TMCs like AmTrav and TripActions (Radcliffe Tr. 195-96; PX033 at -340, -342). As United's director of distribution explained, Farelogix direct connects enable airlines to put "interesting content" into the market faster than is possible with the GDSs. (Radcliffe Tr. 174-76)

86. AA estimated that it is 80-90 percent cheaper to book through a Farelogix direct connect than through the Sabre GDS. (Gamer Tr. 107; PX453 at -969)

87. Even in GDS passthrough, FLX OC enables airlines to push for lower booking fees because the airline creates the offers and Farelogix handles order management instead of the GDS. (Radcliffe Tr. 190-91; *see also* Wilding Tr. 848-49; PX496 (noting that airlines want to use NDC to "drive down cost and use as leverage with GDSs")) [TEXT REDACTED BY THE COURT] *see also* PX085 at -595 (over time, airlines' NDC APIs will "fully replace their existing legacy GDS connectivity," which may lead to lower GDS booking fees); PX300 at -260; Radcliffe Tr. 190-91)

88. Airlines using FLX OC can also gain leverage vis-a-vis Sabre by threatening to withhold content from Sabre by distributing it only through direct connect. (D.I. 228 ("Judicial Notice **[**33]** Order") ¶¶ 13, 24; *see also* Murphy Tr. 1570-71 (explaining that airlines can threaten to withhold content to negotiate better deal with GDSs)) Sabre's CEO acknowledged that the value of Sabre's GDS decreases when an airline withdraws content from the GDS. (Menke Tr. 672; *see also* PX156 at -953 ("Loss of content devalues GDS and causes uncertainty"))

89. In its SEC filings, Sabre acknowledged that airlines with "direct connect initiatives" can use the threat of direct connects to "apply pricing pressure" and negotiate GDS contracts that are "less favorable" to Sabre. (PX251 at -162; *see also* Menke Tr. 667-68 (discussing this risk and admitting that "pricing pressure is competition"); PX173 at -232; PX251 at -162)

90. U.S. airlines first used Farelogix and other GDS alternatives as leverage during **[*115]** the 2005-06 round of GDS negotiations. (Nevo Tr. 939-40, 1062) Dr. Nevo determined that airlines were able to obtain better prices from GDSs in 2006 than in 2003, which he attributed (at least in part) to leverage gained from GDS new entrants ("GNEs"), including Farelogix. (Nevo Tr. 938-40) Defendants' economic expert, Dr. Murphy, wrote in a 2012 white paper submitted to the Department of Justice **[**34]** on behalf of Sabre that [TEXT REDACTED BY THE COURT] had "leveraged the introduction of non-Sabre distribution channels in 2006 to reduce its booking fees." (Judicial Notice Order ¶ 4) By the next round of negotiations, in 2011-12, Farelogix was the only new entrant remaining in the market, but airlines maintained their gains from the 2005-06 negotiations. (Nevo Tr. 942-43; *see also* Radcliffe Tr. 170-71 (noting that G2 Switchworks was "purchased by Travelport and shut down")) Sabre's former CEO testified that airlines put Farelogix and direct connects on the table in their 2013 negotiations with Sabre as "something that they would trade" for things that "would benefit them." (Klein Tr. 1080-82)

H. Other Airline Travel Industry IT: PSS And FLX-M

91. A PSS is an airline's system for managing its operations, including inventory, departure control, check-in, and other functions. (Davidson Tr. 450)

92. An airline's PSS ordinarily includes three interrelated systems: an airline reservation system, which controls the sale of seats, scheduling, passenger name records ("PNR"), and the issuance of tickets; an airline inventory system, which provides information on available seats; and a departure **[**35]** control system, which is used to check-in passengers at the airport. (Davidson Tr. 450)

93. Sabre's main competitor for PSS modules is Amadeus. (Menke Tr. 717; Gilchrist Tr, 770)

94. Sabre provides non-core PSS modules that are PSS dependent and can, therefore, only be used with the core Sabre PSS. (Gilcrhist Tr. 780; Shirk Tr. 1632)

95. Farelogix provides only non-core PSS modules. Unlike Sabre's PSS modules, "the Farelogix solution is PSS agnostic, meaning it can attach to pretty much anybody's PSS system." (Gilcrhist Tr. 780-81)

96. Farelogix also sells four non-core PSS "offer management" modules (also referred to as "offer engines") that help airlines create combinations of itineraries, fares, and ancillary products to offer travelers. (PTO Ex. 1 ¶ 20; PX025 at -945, -956, -974, -979, -985; PX086; PX100 at -054 (offer engines help drive greater adoption of Open Connect); Carter Tr. 239; Davidson Tr. 479-80) Farelogix's offer management products are distinct from FLX OC. (Carter Tr. 239; Davidson Tr. 383)

97. Farelogix's primary offer management product, FLX Merchandise (also known as FLX M), is a tool that helps airlines create offers for ancillary products. (PTO Ex. 1 ¶¶ 14, 21; Carter **[**36]** Tr. 277; Reiz Tr, 1337-38) Farelogix's other non-core PSS modules are FLX Shop & Price, FLX Schedule Builder, and FLX Availability Calculator. (PX025 at 5; Carter Tr. 239)

98. FLX M is currently market leading and can drive hundreds of millions of dollars in additional revenue to airlines that use the product. (Tackett Tr. 1710., [TEXT REDACTED BY THE COURT] An airline can choose to use FLX M in the direct channel (*see, e.g.*, Tackett Tr. 1705) — that is, airline.com — and also in the indirect channel, if the airline has a content distribution API (*see, e.g.*, [TEXT REDACTED BY THE COURT].

[*116] 99. FLX M is sold separately from FLX OC, although airlines can buy multiple Farelogix products together. (Carter Tr. 281-82)

100. Sabre's merchandising solution is not competitive. (Kruijssen Tr. at 629 (Farelogix's CFO stating that FLX M is "better than Sabre's merchandising engine"); Boyle Tr. at 552-53 (explaining that Sabre "didn't have a compelling product" that could "create an offer with a flexible rules engine"); Gilchrist Tr. at 771 ("[TEXT REDACTED BY THE COURT])

I. Farelogix Has Historically Been An Innovator While Sabre Has Resisted Change

101. AA's VP of sales and distribution strategy has **[**37]** described Farelogix as "the GDSs' leading competitor/agitator for years." (PX452; *see also* Garner **Tr**. 130 (describing Farelogix as "lone disruptor" and "lone alternative to GDS distribution")) Similarly, a Delta executive described Farelogix as "a disruptor in the industry" that is "forcing the GDSs to innovate and be more responsive to airline and agency commercial needs." (Adair Tr. 1720-21, 1735-36; *see also* [TEXT REDACTED BY THE COURT] United's director of distribution testified that Farelogix is '[TEXT REDACTED BY THE COURT], which "keeps GDSs on their toes relative to innovating to keep up" (PX299 at -770).

102. In 2005, Farelogix introduced an aggregation platform for travel agencies that managed content from both GDSs and direct connects. (Reiz Tr. 1356-57) As this platform began to gain traction, Sabre launched an initiative to "shut down" Farelogix. (PX096 at -108, -119; *see also* Davidson Tr. 400)

103. In 2009, Sabre and Amadeus canceled their developer agreements with Farelogix, cutting off Farelogix's feed to GDS content. (Reiz Tr. 1357-58) This forced Farelogix to shut 'down its travel agency-facing business. (Reiz Tr. 1359)

104. In and around 2011, Sabre and the other GDSs **[**38]** tried to stop travel agencies from establishing direct connects with airlines using Farelogix's technology. (Davidson Tr. 388-89)

105. In the early 2010s, Farelogix pioneered the development of NDC. (Carter Tr. 255)

106. The GDSs tried to undermine the development of the NDC standard. (Davidson Tr. 401; PX096 at -109) Between 2011 and 2013, Sabre and the other GDSs lobbied against IATA' s petition to approve the NDC standard. (Davidson Tr. 401; PX096 at -109; PX104 at -718 (Sabre's critiques of NDC were "consistent with a desire to ensure that the status quo stays in place"))

107. As recently as January 2018, Farelogix complained to the European Commission that the "GDSs consistently seek to block new non-GDS technology solutions that deliver what consumers need." (PX096 at -107; *see also* Davidson Tr. 397-98) Farelogix further told the Commission that the GDSs had engaged in "A Decade of Resistance and Changing Tactics" designed to "[u]ndermine and delay" the industry's effort to move toward NDC. (PX096 at -109; *see also* Davidson Tr. 401-02)

108. Also in 2018, Farelogix told a prospective buyer "the slow adoption" of Farelogix's order delivery products, like FLX OC, "was solely and unarguably **[**39]** due to the blocking and pressure GDSs put on Farelogix, airlines and travel agencies to not adopt NDC." (PX072 at -243; *see also* Davidson Tr. 412)

J. Travel Agencies Prefer GDSs To Direct Connects And Non-GDS Aggregators

109. Building individual direct connections to numerous airlines requires travel **[*117]** agencies to spend millions of dollars in upfront capital. (Ekert Tr. 1196-98; Kunz-Cho Tr. 1311-12) Ms. Stratford testified that the cost to BCD Travel of building a new agent point of sale system would be greater than [TEXT REDACTED BY THE COURT] (Stratford Tr. 1257)

110. Maintaining direct connects raises operating costs "exponentially" for travel agencies, because servicing bookings made with a direct connect is much costlier than servicing bookings made using the GDSs. (Ekert Tr. 1196)

111. Two of the largest TMCs in the world, CWT and BCD Travel, have estimated that if they were to move transactions away from GDSs and to direct connect, costs per booking would rise approximately $ 15. (Ekert Tr. 1196-97; Stratford Tr. 1256) Even when a booking is made outside of the GDS, the travel agency must then bring it back into the GDS to store the booking information. (Stratford Tr. 1255) This **[**40]** type of booking is "static" (Ekert Tr. 1191; Stratford Tr. 1255-56); so if, after a booking is completed, the customer needs to make a change, the travel agency is unable to make that change itself but must instead reach out directly to the airline (Ekert Tr. 1191; Stratford Tr. 1256). The increased costs of static bookings are ultimately passed on to the customer in the form of additional fees. (Stratford Tr. 1264-65)

112. Direct connects negatively impact travel agency operations by slowing response times, in part due to lengthier search processes. (Stratford Tr. 1255 ("[W]e prefer to use the GDS. Just from an efficiency standpoint, we don't want to go to multiple places to assess content."); Kunz-Cho Tr. 1298-99 ("[A] request to a large number of providers naturally has a tendency to cause delays and latencies.")) Removing content, and therefore bookings, from the GDS channel requires agents to search multiple platforms for travel content, thereby reducing efficiency and resulting in a "degraded user experience" compared to the GDS. (Ekert Tr. 1191-92; *see also* Stratford Tr.

1263; Kunz-Cho Tr. 1300) "[H]aving access to a wider array of airfare content and ancillaries through a single **[**41]** pipe is far more efficient." (Kunz-Cho Tr. 1288)

113. [TEXT REDACTED BY THE COURT]

114. Use of a non-GDS aggregator presents the same added costs and inefficiencies that make direct connects unattractive to travel agencies. As Mr. Ekert of CWT testified, aggregators are "highly inefficient for us, and the user experience and quality of what we do is degraded when we. . . access inventory through Travelfusion as compared to the GDSs." (Ekert Tr. 1190) Rather than the sub-second response times of the GDS, aggregators typically have response times of 15 to 20 seconds. (*Id.)* This time delay for every transaction, when multiplied by tens of thousands of searches for travel content, would result in an "unreal" increase in the labor costs of travel agencies. (Ekert Tr. 1191-92)

115. In addition, non-GDS aggregators do not provide the services — e.g., mid- and back-office support and facilitating duty of care — that the GDSs provide, and present similar added expenses as direct connect transactions. (Ekert Tr. 1198-99 ("Whether that is through Travelfusion or a, quote, 'non-GDS' direct connect, it is basically indifferent to us."); Stratford Tr. 1223-24 ("1 think the challenge of even using a **[**42]** third-party aggregator today. . . is that, again, you're still searching in multiple places. So I still have to go to the GDS to search."))

K. Sabre And Farelogix View Each Other As Competitors

116. Notwithstanding Defendants' repeated denials at trial (*see, e.g.*, Kruijssen **[*118]** Tr. 624-25; Menke Tr. 737), a preponderance of the evidence shows that Sabre and Farelogix do view each other as competitors, although only in a limited fashion.

117. Sabre considers Farelogix a competitor in developing NDC technology for direct connects. (PX011 at 6 (Sabre document stating, "NDC Connect is similar in concept to our AS Direct Connect, though priced lower"); PX246 at -989 (listing Farelogix as among "the competition" for NDC); PX197 at -938 (describing Farelogix as "non-GDS competitor[]" in next-generation offer and order management))

118. The record reflects competition between Sabre's and Farelogix's direct connect solutions for major airlines.

119. For example, between 2017 and 2019, [TEXT REDACTED BY THE COURT]

120. Sabre and Farelogix also competed to provide an NDC direct connect platform to [TEXT REDACTED BY THE COURT] (PX316 at -534) Sabre viewed Farelogix as its "main competitor" for the [TEXT **[**43]** REDACTED BY THE COURT] opportunity. (PX316 at -534; Gilchrist Tr. 761)

121. Some of the services Sabre and Farelogix offer airlines overlap with each other. (Garner Tr. 94, 118; Murphy 1495-96) Sabre and Farelogix each allow airlines to send their offers to travel agencies, process orders or bookings, and service those orders. (LobI Tr. 1150; Adair Tr. 1721-22)

122. Farelogix identified Sabre as a "key competitor" in order delivery and offer management. (PX072 at -219)

123. Some airlines view Sabre's GDS and Farelogix's Open Connect as partial substitutes.

124. AA has described Farelogix's direct connect technology as "providing a low cost substitute for GDSs." (PX453 at -968, -972; *see also* Judicial Notice Order ¶ 5 (AA describing GDSs and Farelogix as "Competitive Booking Sources"); PX452 (describing Farelogix as "the GDSs' leading competitor")

125. Similarly, a United executive testified that Farelogix offers United its only alternative way to reach U.S. travel agencies, other than going through a GDS. (Radcliffe Tr. 174-76)

126. A Delta executive testified that Farelogix provides airlines with an alternative to the GDS for distributing content to travel agencies. (Lobl Tr. 1150-53)

127. **[**44]** However, there are also great differences between Sabre's GDS — which provides services to travel agencies as well as airlines — and FLX OC, which is only an input for airlines. (Radcliffe Tr. 202-03; Carter Tr. 267, 273)

128. Unlike the Sabre GDS, FLX OC does not create offers, it only delivers them. (Davidson Tr. 385-86; Vilches Tr. 802-03)

129. In part because Farelogix provides fewer services to airlines, Farelogix's prices are significantly lower than Sabre's. (Radcliffe Tr. 175; Gamer Tr. 107) The cost to airlines for FLX OC is "roughly a tenth" of Sabre's GDS fee. (Murphy Tr. 1453-54) Dr. Murphy explained that this disparity is attributable to "comparing the price of an input to the price of the final product." (Murphy Tr. 1453)

130. FLX OC is sold on a per-ticket basis and requires airlines to pay a subscription fee. (Kruijssen Tr. 603; Nevo Tr. 993) By contrast, Sabre's GDS is sold on a per-segment basis. (Gamer Tr. 107-08; Nevo Tr. 990)

L. Farelogix Has Transformed Its Business Model Several Times

131. Farelogix's business strategy has changed dramatically multiple times over the last 15 years. (Carter Tr. 272-73; Davidson Tr. 435-36)

132. Prior to 2009, Farelogix tried — and failed **[**45]** — to be a GDS (Davidson Tr. 442-43), **[*119]** and tried — and failed — to sell a product to travel agencies that aggregated content from multiple GDSs (Carter Tr. 272-73). Farelogix abandoned this business model by 2009. (Carter Tr. 272-73)

133. In 2009, Farelogix repositioned itself as a provider of technology solely to airlines. (Carter Tr. 273) The company focused on a product called Direct Connect, which was an XML API that airlines could use to create direct connections with travel agencies. (Carter Tr. 273) This period is referred to by Farelogix's head of marketing as "ancient history" when she trains new Farelogix employees. (Carter Tr. 274)

134. Farelogix's Direct Connect failed because it did not attract a sufficient volume of transactions for Farelogix's airline customers, as travel agencies rejected its use. (Carter Tr. 274)

135. By approximately 2011, responding to the airlines' "ancillary awake[ning]," Farelogix began aggressively marketing FLX M, a software product that had been under development since 2008. (Carter Tr. 276-77; Reiz 1337-38)

136. Farelogix also developed three other offer engines to assist airlines in creating richer offers: FLX Shop & Price, FLX Schedule Builder, **[**46]** and FLX Availability Calculator. (PX025 at 5; Carter Tr. 239)

137. Farelogix's marketing message in 2020 "very, very rarely" addresses the use of NDC as a basis for costs savings because now "the message that resonates more with our airlines . . . is all about revenue and bow much money they can make selling ancillaries through their NDC pipe." (Carter Tr. 265)

M. Farelogix Is A Successful Competitor, Despite Facing Challenges, And Is Likely To Create Great Value For Sabre

138. Sabre's and Farelogix's portrayal of Farelogix at trial as a non-unique company floundering in the NDC API marketplace was unpersuasive.

139. Defendants emphasize there are many other providers of NDC API's, and this is true.

140. But no other provider of NDC API enjoys Farelogix's unique combination of a history of innovation, experience servicing the largest global carriers, strong reputation, presence in the United States, and seeming financial stability. [TEXT REDACTED BY THE COURT] Wiggins Tr. 1645) For over 15 years, Farelogix has built expertise working with large airline customers. (Davidson Tr. 409, 478; PX072 at -223; PX033 at -336-41 (outlining NDC case studies from Farelogix's work with American, United, **[**47]** Qantas, and Lufthansa))

141. Farelogix told a prospective buyer in a June 2018 presentation that it is the "NDC market leader," the "only company" that does NDC order delivery "at scale," and overall "Holds a Unique and Deeply Rooted Position in a Market with High Entry Barriers." (PX072 at -223, -226; *see also* PX025 at -953 (in 2016, Farelogix was "the only provider in the marketplace delivering NDC offer and order management with production-proven, PSS-agnostic connectivity, comprehensive functionality, orchestration and support — all fully under the airline's control"); Davidson Tr. 408-11)

142. Farelogix has augmented its NDC APIs with proprietary schemas that fill the gaps in the basic NDC schema. (Davidson Tr. 411) Farelogix also offers dedicated teams for most airline customers and has a group that assists airlines in connecting to travel agencies or third-party aggregators. (Carter Tr. 247, 253; Davidson Tr. 370; PX025 at -951; PX037 at -938)

143. No other third-party NDC API provider offers the additional capabilities offered **[*120]** by Open Connect. (Adair Tr. 1721; PX072 at -226 (no other NDC provider supports travel agency interface like SPRK); *see also* Garner Tr. 152-53)

144. Large **[**48]** U.S. airlines would not rely on IATA certifications to assess a potential NDC API provider's suitability (*see* Garner Tr. 121-22) and do not view IATA certifications as a reliable measure of IT providers' capabilities (*see* Radcliffe Tr. 230).

145. Datalex, an Irish travel software company, is the only non-GDS order management provider other than Farelogix that currently serves a U.S. airline on the NDC leaderboard (Jetblue). (Nevo Tr. 1022; D.I. 182 (PTO) Ex. 1 ¶¶ 64-65) [TEXT REDACTED BY THE COURT] Davidson Tr. 476; Menke Tr. 681; *see also* Murphy Tr. 1556)

146. OpenJaw, which is owned by a Chinese governmental entity, is unlikely to expand in the U.S. market, as its relationship with China presents airlines with data security concerns. [TEXT REDACTED BY THE COURT] Davidson Tr. 656)

147. Other NDC providers, like JR Technologies and TP Connects, are unattractive because they lack experience supporting an airline with global operations. [TEXT REDACTED BY THE COURT]

148. Hewlett Packard Enterprise ("HPE"), also known as DXC, is not a viable option even for United Airlines, which uses HPE as its PSS provider. [TEXT REDACTED BY THE COURT] (PX300 at -257; *see also* Radcliffe Tr. 213 (citing DXC's **[**49]** lack of support services and "lack of experience with travel agencies and airlines"))

149. The ATPCO NDC Exchange ("NDC Exchange") is an airline-owned entity that converts non-NDC APIs into standardized NDC APIs. (DX210 at -101520; Davidson Tr. 448-49; Reiz Tr. 1344-45; Gregorson Tr. 1667, 1671) Recently Southwest — a large, complex U.S. airline, which accounts for a significant portion of the volume of direct connect transactions in the United States — chose to use the NDC Exchange, despite initially engaging in discussions with Farelogix. (Davidson Tr. 448-49; Reiz Tr. 1345; Nevo. Tr. 1008) ATPCO was able to develop NDC connections to Southwest's API connection in two weeks. (Gregorson Tr. 1686)

150. But ATPCO's NDC Exchange does not provide an NDC API for airlines and lacks other key functionality. (Garner Tr. 122; Gregorson Tr. 1691 (explaining that NDC Exchange lacks ticketing capabilities and does not facilitate offer or order management)) ATPCO's chief strategy officer confirmed that NDC Exchange does not compete with any products offered by Sabre or Farelogix; nor do any of ATPCO's other services. (Gregorson Tr. 1689-1690, 1693-1694; PX141 at 1-2)

151. Airlines themselves are **[**50]** also self-supplying their own NDC APIs, which has been made easier by the updates to the IATA NDC schema. (Davidson Tr. 433) British Airways and Delta Air Lines (both of which are considered top 20 airlines worldwide) have self-supplied NDC APIs instead of purchasing a third-party's product such as FLX OC. (Radcliffe Tr. 217-18; Carter Tr. 271; Davidson Tr. 419-20, 446-47) Air France has also built its own NDC API. (Radcliffe Tr. 217; Carter Tr. 271)

152. Both American and [TEXT REDACTED BY THE COURT] have told Farelogix during negotiations that they could replace Farelogix by self-supplying their own NDC API or choosing an alternate vendor. (Garner Tr. 128-29; [TEXT REDACTED BY THE COURT]

153. Farelogix consider's airline self-builds to be a significant competitive threat. (Carter 270-71; Davidson Tr. 446-47, 635-36)

[*121] 154. Farelogix has had to lower its price for FLX OC in each of its negotiations with [TEXT REDACTED BY THE COURT]

155. But airline own-build solutions do not appear to be a feasible, cost-effective alternative for distribution, even for large U.S. full-service carriers. AA estimated that building its own NDC API would cost about $ 40 million and require annual ongoing maintenance **[**51]** and troubleshooting costs of $ 20-25 million. (Garner Tr. 127; *see also* Wiggins Tr. 1645-46 (building systems for airlines requires "a lot of money")) Smaller U.S. airlines also do not have plans or the resources to build NDC APIs in-house; they would prefer to license third-party IT solutions. ([TEXT REDACTED BY THE COURT] Wiggins Tr. 1644-45; DX306 at 20-21 [TEXT REDACTED BY THE COURT])

156. Moreover, it would take four to five years for AA or [TEXT REDACTED BY THE COURT] just to replace Farelogix's existing capabilities. (Garner Tr. 127-28, 159-60; [TEXT REDACTED BY THE COURT] *see also* Wiggins Tr. 1645-46 (building systems for airlines "takes many years"))

157. NDC is an open standard (Carter Tr. 271; Reiz Tr. 1326-27) and, as a result, NDC has enabled many other IT companies — including many new entrants — to compete for and win NDC API bids in the past five years (Carter Tr. 269, 270-71; Reiz Tr. 1327; Gregorson Tr. 1687)). Mr. Reiz, the only technologist who testified at trial and the individual who created the NDC standard, testified that any company who can build an NDC API could do so for a full service airline. (*See* Reiz Tr. 1329)

158. Defendants emphasize that in 2018 and 2019, **[**52]** after the introduction of schema version 17.2, Farelogix has submitted [TEXT REDACTED BY THE COURT] bids for FLX OC in response to RFPs, and won only [TEXT REDACTED BY THE COURT] of those bids. (Carter Tr. 269; Davison Tr. 639-40; Murphy Tr. 1471-72)

159. Since 2015, Farelogix has submitted a total of [TEXT REDACTED BY THE COURT] bids for its NDC API product, FLX OC. Of those [TEXT REDACTED BY THE COURT] bids, Farelogix won [TEXT REDACTED BY THE COURT]-a [TEXT REDACTED BY THE COURT] success rate. (Carter Tr. 271; Davidson Tr. 639-40) In that same period, Farelogix has lost NDC API bids to competitors such as Amadeus, Datalex, OpenJaw, and TPConnects. (Davidson Tr. 270)

160. Since 2015, Amadeus has won at least [TEXT REDACTED BY THE COURT] NDC API RFPs. (Davidson Tr. 648) Amadeus also provides NDC API services to Spirit Airlines. (Wiggins Tr. 1646)

161. Since 2018, Datalex has won [TEXT REDACTED BY THE COURT] NDC API RFP, the same as Farelogix. (Davidson Demonstrative 1; *see also* Davidson Tr. 467 (admitting Davidson Demonstrative 1) Datalex currently provides NDC API to Scandinavian Airlines and JetBlue. (Nevo Tr. 1022)

162. Likewise, since 2018, OpenJaw and TPConnects have both won [TEXT **[**53]** REDACTED BY THE COURT] NDC API RFP, the same number as Farelogix. (*See* Davidson Demonstrative 1; *see also* Davidson Tr. 467 (admitting Davidson Demonstrative 1))

163. DXC — formerly Hewlett-Packard — won [TEXT REDACTED BY THE COURT] to provide NDC API services in 2017. (Radcliffe Tr. 213) Although DXC provides an NDC API to a smaller airline (Flybe), IATA's schema standardization makes connections built for smaller airlines no different than those built for larger airlines. (Reiz Tr. 1329) SAP, one of the largest technology providers in Europe, currently provides the NDC API for Easyjet, which is a top 20 airline worldwide. (Davidson Tr. 641)

164. But these facts, and Defendants' characterization of them, merely mask the reality that Farelogix has won more RFPs than any other NDC API provider (Davidson Tr. 648) and has actually been quite successful in recent years.

165. In April 2018, IATA announced a leaderboard of airlines committed to making **[*122]** at least 20 percent of their indirect channel bookings via an NDC API by December 2020. (PTO Ex. ¶ 1163) Farelogix provides the NDC API for nearly half of these airlines, including two of the three U.S. airlines on the list. (PTO Ex. ¶¶ 64-65; **[**54]** PX094 at -566, -569; Davidson Tr. 373-74, 651)

166. Defendants count as Farelogix "losses" RFPs that remain open or may have been withdrawn. (Davidson Tr. 653-55) Defendants exclude [TEXT REDACTED BY THE COURT] whose contract Farelogix just renewed, and its active opportunity with [TEXT REDACTED BY THE COURT] (Davidson Tr. 649, 655-56) Defendants also wrongly equate every RFP with every other, without accounting for the size and importance of any particular airline's business — despite the uncontestable fact that Farelogix is working for two of the largest U.S. carriers: AA and United. (Davidson Tr. 649; Davidson Demonstrative 1) Nor does Defendants' argument attribute any weight to the fact that Farelogix's ability to win recent RFPs may have been impacted by the prospect that, in the near future, it may be owned by a GDS. (*See generally* Davidson Tr. 652-53) (Farelogix CEO acknowledging that some airlines are taking "wait-and-see" approach while merger is pending)

167. Today, Farelogix processes more NDC bookings than any other order management services provider. (Davidson Tr. 374; PX094 at -569) Farelogix has established a larger base of airline customers for NDC services than any **[**55]** other provider in the U.S. market. (Menke Tr. 731-32; PX072 at -223)

168. Farelogix is doing GDS bypass implementations for AA, United, and Lufthansa, as well as other airlines. (Davidson Tr. 375) AA and United already use Farelogix direct connects to distribute through OTAs, like Priceline and Orbitz, and TMCs, including AmTrav and TripActions. (Carter Tr. 249-50, 259, 261; Radcliffe Tr. 191-92; PX025 at -954; PX033 at -340, -342)

169. AA and Lufthansa also use Farelogix's NDC API to connect to third-party aggregators. (Garner Tr. 95, 112, 139; Carter Tr. 259-60) For example, CWT and BCD use Travelfusion to access the Lufthansa Group content distributed through Farelogix's NDC API. (Reiz Tr. 1352-54)

170. Farelogix is now handling 26 NDC GDS integration projects, as compared to just six at the start of 2018. (Carter Tr. 287-88; Davidson Tr. 375-76, 381-82, 439, 441)

N. NDC Will Likely Be Used More For GDS Passthrough Than GDS Bypass

171. To some extent, this case requires the Court to predict whether widespread adoption of NDC technology is going to lead to greater use of GDS bypass, essentially eliminating the role of Sabre's GDS, or whether it is more likely to foster the expansion of **[**56]** GDS passthrough, by which NDC allows for the creation, delivery, and servicing of richer airline content through GDSs, including Sabre. The Court finds that NDC will likely be used more for GDS passthrough than GDS bypass. (*See generally* Murphy Tr. 1461) ("I think we're going to end up with the GDS integration. It just makes too much economic sense.")

172. Farelogix has enabled airlines to establish direct connects with some of the largest OTAs, thereby bypassing the GDSs. (Gamer Tr. 103-04 (about 10-11% of AA's OTA bookings are made using American's Farelogix NDC API); Radcliffe Tr. 175-76 (describing United direct connect with Priceline); PX453 at -970)

173. American estimates it has achieved annual cost savings of $35 million from shifting OTAs to direct connects. (PX453 at -970)

[*123] 174. One large OTA, Fareportal, established Farelogix-enabled direct connects with [TEXT REDACTED BY THE COURT] to access certain fare and ancillary content not available on a GDS; it is also in talks with [TEXT REDACTED BY THE COURT] for a direct connect. (DX306 at 5-7)

175. However, since 2016, FLX OC ticket volumes resulting from direct connects for American have declined and for United have stagnated. (Rein **[**57]** Tr. 1335-36)

176. Industry participants predict that the volume of NDC use for GDS bypass — that is, direct connects and transactions through non-GDS aggregators — is unlikely to grow significantly in the future. (*See, e.g.*, Ekert Tr. 1186-87; Stratford Tr. 1245-47)

177. Today, and for the foreseeable future, airlines expect a major portion of NDC bookings eventually to come from GDS passthrough. ([TEXT REDACTED BY THE COURT])

178. [TEXT REDACTED BY THE COURT]

179. Farelogix expects most of its growth to come from GDS passthrough. (Davidson Tr. 375-76; PX072 at -241)

180. Farelogix CEO Davidson expects "pretty much all" future growth in FLX OC volumes to "come from GDS passthrough." (Davidson Tr. 442) Farelogix's Carter agreed that "the number one thing that [Farelogix] hear[s] from airlines now is about plugging into a GDS." (Carter Tr. 285)

181. Chris Wilding of Sabre reinforced this view, testifying that "every airline I talk with very much wants [Sabre] to implement NDC . . . . [E]veryone that is working with an NDC solution wants to have it integrated into the Sabre GDS because they believe that is the best way to distribute their content." (Wilding Tr. 857)

182. Rose Stratford of BCD **[**58]** Travel believes "broad delivery of systemwide NDC solutions will be best delivered by the GDS" because "it really is about the infrastructure that TMCs have and . . . servicing the workflows. The GDSs . . . know what those are and understand the complexities." (Stratford Tr. 1265-66)

183. Travel agencies have informed United that they prefer using the GDSs to direct connections. (DX246 at -084) ("Big 3 TMCs will wait for the GDSs to deploy NDC capabilities.")

184. GDS passthrough, not direct connects or transactions through non-GDS aggregators, has led to the recent increased interest in NDC. (Carter Tr. 287-88) Farelogix is currently working on 26 GDS passthrough implementations. (Davidson Tr. 381-82)

185. If a particular transaction is processed via GDS bypass, the GDS is cut out and does not collect any fee. Even when a transaction is conducted via GDS passthrough, GDS fees are likely to be reduced, since the GDS performs fewer functions than it does when airlines use non-NDC legacy technology through the GDS.

186. United's director of distribution expects to pay lower booking fees for GDS passthrough bookings because United will "take the heavy lifting" of creating and pushing out **[**59]** offers. (Radcliffe Tr. 190-91; *see also* [TEXT REDACTED BY THE COURT]; Nevo Tr. 1066-67; PX300 at -260 (United noting that using Farelogix NDC for "GDS pass through replaces existing legacy technology" and may result in lower GDS segment fees))

187. As AA's Garner put it, with GDS passthrough, Sabre's role is reduced to being just "an aggregator for travel agents." (Garner Tr. 118)

188. When Sabre established its GDS passthrough connection with American, Sabre's then-president of Airline Solutions, Shirk, observed that Sabre "need[ed] to be careful to not have this over enable **[*124]** Farelogix only to hurt us in all our accounts." (PX308 at -982; *see also* Shirk Tr. 1599)

189. Using NDC technology like FLX OC in a GDS passthrough implementation has also helped airlines persuade GDSs to switch to a "wholesale model" in the OTA market. (Garner Tr. 108; PX453 at -970 (indicating AA will not pay GDS fees for OTA bookings where it offers direct connect option)) Under the wholesale model, the, payment flow shifts: the airline, not the GDS, pays the travel agency an incentive, and the travel agency pays the GDS a technology fee for each booking made through the GDS. (Garner Tr. 108-09)

190. Under the **[**60]** wholesale model, airlines pay less for distribution. (Garner Tr. 109; Nevo Tr. 943-44) For example, American estimates that it has achieved cost savings of $66 million per year from shifting OTAs to the wholesale model. (PX453 at -970)

191. Also under the wholesale model, GDSs will likely earn lower fees. (*See* Davidson Tr. 108-09; Nevo Tr. 944)

O. Dr. Nevo's Analysis Is Unpersuasive

192. DOJ relies on the economic expert analysis of Professor Aviv Nevo of the University of Pennsylvania and its Wharton School of Business. (*See* Nevo. Tr. 876) Dr. Nevo is well-credentialed, including having served as the Deputy Assistant Attorney General for Economic Analysis at the Antitrust Division of the Department of Justice, and has testified on behalf of DOJ and the Federal Trade Commission in other merger review cases. (*See* Nevo. Tr. 875-78) In this case, however, his analysis was flawed and, ultimately, unpersuasive.

193. Dr. Nevo testified that he followed "a standard multistep approach," which he described as starting by "learning about the industry and the market realities because they were really kind of the key input into what I do later." (Nevo Tr. 880) Dr. Nevo emphasized the importance of **[**61]** learning about the particular market he was analyzing, stating "it is important to ground the analysis in the facts of the industry, to really understand what is going on. . . . This ultimately is a practical analysis that is aimed to answer a question, and for that I really have to understand the market and the reality." (Nevo. Tr. 881)

194. After he felt he understood the market realities, Dr. Nevo followed a "three-step approach:"

> First, you define the relevant antitrust market . . . [T]hen I go and evaluate the competitive effect. And then, finally, I look to see if there's any mitigating factors that could offset these competitive effects.

(*Id.*)

195. Unfortunately, Dr. Nevo did not instill confidence at even the first step of this process: gaining knowledge and familiarity with the airline industry.

196. Dr. Nevo opined that there are relevant product markets for "booking services." (Nevo Tr. 885)

197. According to Dr. Nevo, "booking services" include: (1) transmitting an airline offer to a travel agency or aggregator; (2) receiving or processing an order or booking; and (3) receiving or processing changes to the order. (Nevo Tr. 899-900)

198. Witnesses, including those with lengthy **[**62]** service in the airline industry ecosystem, consistently testified that "booking services" is not a term they use or have heard and, more importantly, that there is no standalone "booking services" product that either Sabre or Farelogix has ever offered for sale. (*See, e.g.*, Carter Tr. 268; Davidson Tr. 443; Wilding Tr. 848; Reiz Tr. 1348)

[*125] 199. Dr. Nevo had to acknowledge that Sabre has not provided "booking services" in a commercial transaction in the United States; therefore, he is "separat[ing]" out "booking services" functionality from the services that Sabre actually sells through its GDS platform. (Nevo Tr. 985-87)

200. At trial, Dr. Nevo was unable to provide a clear answer as to which of Farelogix's products other than FLX OC (if any) comprise what he considers the "booking services" product. (*See* Nevo Tr. 959-61)

201. Dr. Nevo was unable to determine a value or price for either Sabre's or Farelogix's "booking services." (Nevo Tr. 987) When Dr. Nevo was asked the price attributable to the booking services functionality within Sabre's GDS platform, he explained that "Sabre has not offered it in the U.S. I believe there is no price." (*Id.*) When asked the value of the "booking services" **[**63]** functionality within the Sabre GDS, Dr. Nevo testified that he "did not quantify what [the] value is" and that it "was not part of [his] analysis." (*Id.*) When Dr. Nevo was asked whether he compared the value of the "booking services" functionality in the Sabre GDS to the value of the "booking services" in FLX OC, he testified: "That is not something that I've offered, no." (*Id.*)

202. In attempting to identify and confirm the relevant product market, Dr. Nevo applied the hypothetical monopolist test, which assumes that the hypothetical monopolist controls all the relevant products in the market for the given geography, then asks whether the hypothetical monopolist would profitably impose a small price increase (i.e., a small but significant and non-transitory increase in price, or "SSNIP") on those products. (Horizontal Merger Guidelines § 4.1.1 ("Guidelines"); Nevo Tr. 910) If so, the market is a relevant market.

203. Dr. Nevo calculated that a five percent SSNIP on OTA booking services would be $0.10. (Nevo Tr. 910) He then considered whether an airline would accept the SSNIP and adjust its fares to reflect the higher costs, or reject the SSNIP and stop using OTA booking services. (Nevo Tr. **[**64]** 910-12) Dr. Nevo concluded that an airline would accept a SSNIP because it would be more expensive for an airline to forgo distribution through OTAs than accept the SSNIP. (Nevo Tr. 910-14) To reject a SSNIP, the airline would need to be able to persuade travelers booking through OTAs to switch to other distribution channels, or sell additional tickets to different travelers through other channels. (Nevo Tr. 904, 906-12)

204. Dr. Nevo calculated that a SSNIP on TTA services would be $0.11. (Nevo Tr. 912-13) A SSNIP on TTA services is smaller relative to the average price of airline tickets booked through TTAs, and business travelers are relatively less price sensitive, so they are unlikely to shift in response to a small price increase. (Nevo Tr. 912-13) TTAs are a critical sales channel for airlines, who would rather pay a SSNIP than pull out of all TTAs. (Gamer Tr. 101-02, 109-10; Radcliffe Tr. 172-74, 348-49)

205. The Court does not find Dr. Nevo's SSNIP analysis persuasive, for reasons explained elsewhere in this Opinion. (*See, e.g., infra* FF 215-16)

P. The Relevant Product Market For OTAs Has To Include Airline.com

206. Dr. Nevo excluded from his relevant product market all the airline **[**65]** tickets that are sold directly by airlines to end-user travelers. (*See* Nevo Tr. 914-15) That is, Dr. Nevo excluded airline.com from the relevant market. The Court finds, however, that airline.com has to be included in **[*126]** the relevant market, at least with respect to the OTA market.

207. Airline.com accounts for approximately half of all airline tickets sold to leisure travelers in the United States. (Garner Tr. 91; Wiggins Tr. 1640; [TEXT REDACTED BY THE COURT]

208. Airlines believe they can succeed in shifting bookings from the indirect channel (which involves OTAs and TTAs) to the direct sales channel (i.e., airline.com). (Lobl Tr. 1165- 66; DX287 at 1 (Delta distribution strategy documents state that "[d]riving customers to direct channels is core to our strategy"); *see also* Tackett Tr. 1702-03 (testifying Alaska Airlines is seeking to grow volumes in direct channel))

209. [TEXT REDACTED BY THE COURT]

210. Chris Wilding, who has negotiated as many as 100 GDS agreements with airlines on behalf of Sabre, testified that airline websites are "one of the primary competitors that we face as a GDS" and explained that Sabre continues to see "a point of [market] share shift from the GDS channel **[**66]** to the dot corn," on average, every year. (Wilding Tr. 860, 864)

211. The competition between OTAs and airline websites has increased with the rise of metasearch sites that provide direct channel results alongside OTA results. [TEXT REDACTED BY THE COURT] Metasearch sites may direct the consumer to the OTA website or the airline's website — in the latter instance, the sale is a direct channel sale. (Tackett Tr. 1701-02) The metasearch site may even permit a consumer to complete a booking through the airline's website without leaving the metasearch site. (Tackett Tr. 1701-02)

212. Fareportal co-CEO Werner Kunz-Cho testified that there is competition between OTAs and the direct channel via metasearch sites like Google Flights. (Kunz-Cho Tr. 1300)

213. Defendants' economics expert, Dr. Kevin Murphy of the University of Chicago,[10] opined persuasively, and consistent with the record, that airlines have recognized that much of their revenues derived through sales via OTAs can be replaced by sales through airline websites. (Murphy Tr. 1438-39, 1485) For an airline, the "closest alternative" to distribution through an OTA is distribution through its own website. (Murphy Tr. 1552)

214. Dr. Murphy **[**67]** opined that airline direct sales have exerted significant competitive pressure on GDS fees. (Murphy Tr. 1426) Aside from the Amadeus and Travelport GDSs, airline.com is the biggest constraint on Sabre's GDS fees. (Murphy Tr. 1433)

215. Even Dr. Nevo agreed that airline.com serves as a competitive constraint on Sabre's GDS. (Nevo Tr. 1009-10) But in conducting his SSNIP analysis, Dr. Nevo could not (and did not even attempt to) determine whether airline.com was a bigger competitive constraint on Sabre's GDS than is FLX OC. (Nevo Tr. 1006, 1026-27)

216. Dr. Nevo's SSNIP tests assume that an airline confronted with a hypothetical price increase has only two choices: pay the increase or walk away. (Murphy Tr. 1481-82) As Dr. Murphy explained, however, Dr. Nevo's assumption "ignores" that airlines also have the "ability to withhold content or not reach a deal" with a GDS and instead try to steer traffic from OTAs to airline.com. (Murphy Tr. 1481)

[*127] Q. U.S. Point Of Sale Is Not The Relevant Geographic Market

217. Bookings made through travel agents located in the United States are referred to by Dr. Nevo as "U.S. point of sale." (Nevo Tr. 897, 1017; *see also* Wilding Tr. 836, 853) To Dr. Nevo, **[**68]** an OTA has a U.S. point of sale if its IP address has a U.S. address. (Nevo Tr. 897) A TTA has a U.S. point of sale if it is physically located in the U.S. (*Id.*)

218. Dr. Nevo opined that there is a relevant market for "booking services" with a U.S. point of sale because "[i]t's not practical for an airline to substitute away from a U.S. point of sale." (Nevo Tr. 897-98) Airlines cannot easily induce travelers to switch from booking through U.S. travel agencies to booking through travel agencies in other parts of the world, and they cannot easily replace sales to travelers in the United States with sales to travelers in other countries. (*Id.*)

219. Sabre's GDS business has a strategy for the U.S. market and appears to separately track its market share for U.S. point of sale and rest-of-world point of sale. (PX389 at -437) For certain airlines, Sabre's GDS charges a lower price for U.S. point-of-sale bookings as compared to rest-of-world point-of-sale bookings. (Wilding Tr. 852-53; PX389 at -437)

220. However, DOJ failed to persuade the Court that U.S. point of sale — that is, travel agencies located in the U.S. — is the relevant geographic market. The reasons Dr. Nevo gave for his opinion **[**69]** are unsupported by the record.

---

[10] Dr. Murphy, like Dr. Nevo, has impressive and pertinent qualifications. Dr. Murphy received his Ph.D. in economics from the University of Chicago, has published articles in around 70 journals, and has received both the John Bates Clerk medal and the MacArthur fellowship. (Murphy Tr. 1415-18)

221. Dr. Nevo said that his geographic market is based on "who the customer for the product is." (Nevo Tr. 1016) But, as Dr. Nevo recognized, Farelogix's customers for FLX OC are airlines. (*Id.*) Thirteen of 15 FLX OC customers are airlines based outside of the United States. (Nevo Tr. 1018) Yet the point of sale Dr. Nevo used for his relevant market is not where the airline using FLX OC is based, as one would assume if the market is based on "who the customer" is. Instead, Dr. Nevo's point of sale is where the travel agent — with whom Farelogix has no relationship, and who does not use FLX OC — is based.

222. Dr. Neva further explained that the geographic market for technology products "depends on how they're priced," i.e., whether it is a product "that you can buy in the U.S. that has a different price than if you buy it, for example, in Israel." (Nevo Tr. 1017-18) But Dr. Nevo provided no evidence that the transaction fee for FLX OC varies by the location of the travel agency that purchases a ticket. (Nevo. Tr. 1070)

R. DOJ Did Not Prove It Is Entitled To A Presumption Of Competitive Harm

223. DOJ contends that Dr. Nevo's market analysis gives rise to a **[**70]** presumption that the proposed merger will lead to competitive harm. The Court disagrees.

224. Dr. Nevo measured market concentration using the Herfindahl-Hirschman Index ("HHI"). (Nevo Tr. 919-20) The HHI is a standard measure used in economic literature and is calculated by computing the share of each firm in the market, squaring the shares, and summing them. (Nevo Tr. 919-20; Guidelines § 5.3) An industry with an HHI over 2,500 is considered highly concentrated, and a merger that causes an increase in HHI of more than 200 points raises significant competitive concerns. (Nevo Tr. 915-16, 920-21; Guidelines § 5.3)

225. In calculating shares for his alleged market for booking services sold through OTAs, Dr. Nevo calculated that Farelogix had 3.9% market share in 2018, while Sabre had 48.0% market share. (Nevo Tr. **[*128]** 917) Using Sabre's projections for 2020, Dr. Nevo calculated that Farelogix would have 12.5% market share in 2020, while Sabre would have 43.7% market share. (Nevo Tr. 917) Using 2018 data, Dr. Nevo calculated a post-merger HI-H level of 4,268, with a post-merger change in HHI of 371. (Nevo Tr. 920-21) Using Sabre's projections for 2020, he calculated a post-merger HHI of 4,465, with a **[**71]** change in HHI of 1,093. (*Id.*) These calculations would support a presumption of competitive harm, as they all exceed the standards set out in the Guidelines.

226. In calculating shares for his alleged market for booking services sold through TTAs, Dr. Nevo calculated that Farelogix had 0.1% market share in 2018, while Sabre had 54.8% market share. (Nevo Tr. 922)[11] Using Sabre's projections for 2020, Dr. Nevo calculated that Farelogix will increase to 6.4% market share in 2020, while Sabre would drop to 51.1% market share. (*Id.*) Using 2018 data, Dr. Nevo calculated a post-merger HHI level of 3,895, with a post-merger change in HHI of 6. (*Id.*) Using Sabre's projections for 2020, he calculated a post-merger HHI of 4,085, with a change in HHI of 657. (Nevo Tr. 922-23) These calculations would support a presumption of competitive harm, as all but the post-merger change based on 2018 data exceed the standards set out in the Guidelines.

227. Dr. Murphy identified flaws in Dr. Nevo's HHI analyses.

---

[11] Dr. Nevo's market share calculations in the TTA market included bookings made through Southwest's "self-build" API. (Nevo Tr. 921). Because Southwest does not compete to provide "booking services" for other airlines, its inclusion in these calculations is conservative, as it makes the reported market shares lower than they would otherwise be. (Nevo Tr. 921-22)

Some of specific data cited in this paragraph do not actually appear in the trial record, as neither Dr. Nevo nor Dr. Murphy expressly stated all the numbers during their testimony and their demonstratives were not admitted into evidence. The relevant numbers and calculations appear in the expert reports (which were also not admitted). The Court understands there to be no dispute between the parties as to how Dr. Nevo calculated his HIE numbers or the resulting numbers if the adjustments suggested by Dr. Murphy are made. While the parties disagree about the import of the HHI analyses, and whether Dr. Nevo's or Dr. Murphy's analysis is more pertinent, they do not disagree as to what figures result from each expert's inputs.

228. With respect to the OTA market, Dr. Nevo excluded all sales made through airline.com. (Murphy Tr. 1480-81) If Dr. Nevo's calculations using 2018 data are corrected so that airline direct channel **[**72]** sales are included in his alleged market for booking services sold through OTAs, the result is a post-merger HHI level of 1115 and a change in HHI of 19. (Murphy Tr. 1485) If Dr. Nevo's calculations using Sabre's 2020 projections are corrected so that airline direct channel sales are included in his alleged market for booking services sold through OTAs, the result is a post-merger HHI level of 1127 and a change in HHI of 53. (Murphy Tr. 1485) All four of these numbers fall below the Guidelines criteria (i.e., 2500 and 200) for presumptive competitive harm.

229. With respect to the TTA market, Dr. Nevo attributed all sales from GDS passthrough to Farelogix, not to any GDS. (Nevo Tr. 919; Murphy Tr. 1483-86) However, when an NDC-enabled sale is made through a GDS in a passthrough, it is the GDS that maintains the connection as well as the commercial relationships with travel agencies and airlines; the NDC provider (such as Farelogix) does not replace the GDS but, instead, acts as an upstream, vertical complement to the GDS. (Carter Tr. 269; Murphy Tr. 1446-48, 1456-58) It is the GDS, not Farelogix, that gets paid for **[*129]** this passthrough transaction, as even Dr. Nevo recognizes. (Neva Tr. **[**73]** 1068-69) Consequently, the sale through GDS passthrough is more properly understood as a sale by the GDS, not by Farelogix. (Murphy Tr. 1486)

230. If Dr. Nevo's calculations using 2018 data are corrected so that GDS passthrough sales are credited to the GDS, not the NDC API supplier, the result is an HHI level of 3,895 and the HHI change is just 6. If Dr. Nevo's calculations using Sabre's 2020 projections are corrected in the same manner, the result is an HHI level of 3,898 and an HHI change of 19.[12] This is ambiguous support for a presumption of harm in the TTA market, as 3,895 and 3,898 exceed the Guidelines criteria, but 6 and 19 do not.

S. Sabre's Story Is Not Credible

231. Sabre contends that it does not view NDC, even when used for GDS bypass, as a threat. Sabre further contends that the principal reason it wants to acquire Farelogix is for its FLX M product, not for FLX OC or to address the risk of GDS bypass and passthrough. The Court does not believe Sabre.

232. Sean Menke, Sabre's CEO, testified that GDS bypass is not a threat to Sabre. (Menke Tr. 736-41) This testimony is not credible as it does not comport with the record.

233. Sabre's 2018 10-K identified "direct connect initiatives **[**74]** . . . bypassing the GDSs" as a risk factor for Sabre's business. (PX251 at -162; *see also id.* at -162-63 (also identifying direct distribution through airline.com as another risk factor))

234. The 10-K contains another section on competition, which notes that the "travel distribution market is highly competitive, and [Sabre is] subject to competition from other GDS providers, direct distribution by travel suppliers and ***new entrants or technologies that may challenge the GDS model***" — a concept which includes at least GDS bypass — and that "[a]ny inability or failure [by Sabre] to adapt to technological developments or the evolving competitive landscape could harm [Sabre's] business operations and competitiveness." (PX251 at -166) (emphasis added)

235. PX343 at -188, which is a slide from Sabre's planning forecast for 2020, also shows that Sabre views direct connect as a forward-looking risk: it states that "risks center around . . . [n]ew airline models and ability for the major carriers to shift share to direct connect." (*See also* Shirk Tr. at 1621-22 [TEXT REDACTED BY THE COURT]; PX 156 at -953; PX497)

236. Defendants' expert, Dr. Murphy, also concluded that direct connects can be a **[**75]** competitive constraint on GDSs and that "GDS bypass is somewhat of a threat" to Sabre. (Murphy Tr. 1520, 1558-59)

---

[12] These specific figures are not in the trial record, but they are in Murphy's expert report. As with other data described above, the Court understands the parties to be in agreement as to these numbers but not as to their relevance and import.

237. Even Menke admitted (eventually) that Sabre would be impacted if even a portion of the market shifts to GDS bypass. (Menke Tr. 739, 746)

238. The Court does not find credible the Sabre witnesses' testimony that none of the uses of Farelogix technology is viewed as a threat to Sabre. It would be irresponsible for Sabre's leadership not to understand that GDS bypass, and even GDS integration and the wholesale model, are threats to Sabre's traditional revenue flow.

239. Because GDS bypass is a threat to Sabre, and because Farelogix is a major player in enabling GDS bypass, it is logical to conclude that part of Sabre's interest in **[*130]** acquiring Farelogix is to mitigate the risk from GDS bypass. Notwithstanding CEO Menke's unequivocal denial that there is "any connection" between GDS bypass and Sabre's "reason for buying Farelogix" (Menke Tr. 744), other evidence — including internal Sabre documents — prove that this is part of Sabre's motivation.

240. Chris Boyle, who led Sabre's evaluation of the proposed Farelogix acquisition, sent a presentation to Menke identifying as part **[**76]** of the "value" of acquiring Farelogix that it would "[m]itigate risk from potential GDS bypass." (PX011 at 3; PX012 at 7; *see also* Boyle Tr. 506-07) Menke then forwarded a version of this presentation containing the "mitigate risk" language to the chairman of Sabre's board of directors. (Menke Tr. 741)

241. Boyle testified the "mitigate the risk of GDS bypass" bullet point was inserted at the last minute into a July 2018 draft internal powerpoint deck, that it was done by two subordinates during a hectic period, that the bullet is inconsistent with the rest of the document as well as an earlier deal rationale document from February 2018, and that he deleted the bullet after he noticed it because it did not reflect his views. (Boyle Tr. 506, 516-17, 544-46, 553-57; *see also* DX086) The final presentation prepared for Sabre's board of directors to approve the Farelogix transaction did not include "mitigating the risk of GDS bypass" as a rationale for the deal. (DX145)

242. However, ordinary course documents indicate that, in fact, Boyle did participate in the meeting where the slide was created and suggest he likely deleted the bullet in September 2018 after speaking with Sabre's antitrust **[**77]** counsel. (Boyle Tr. 513-16, 519-35; PX024; PX014; PX492; PX493; PX494; PX495; PX439)

243. Menke testified that the principal reason Sabre is interested in acquiring Farelogix is to own the FLX M merchandising product. (Menke Tr. 744-45 (explaining that Sabre's primary focus was on Farelogix's "merchandising capabilities to help our online customers sell the products and services that they want"); *see also* Boyle Tr. 552-53 (Farelogix deal leader testifying that interest in acquiring Farelogix, an idea Sabre had abandoned in 2017, was "instigat[ed]" by interest in "their merchandising engine"))

244. FLX OC generates the majority of Farelogix's revenue. (Davidson Tr. 379) Approximately two-thirds of Farelogix's employees work on Open Connect and NDC API, while far fewer Farelogix employees (around 15) work on FLX M. (Davidson Tr. 379, 382-83)

245. Internal Sabre documents do show that Sabre is according substantial value to Farelogix's FLX M and the further value that could be created by integrating it into Sabre's technology. (DX145 at -005 (November 10, 2018 presentation made to Sabre's board of directors for approval of the Farelogix acquisition, indicating that transaction would enable **[**78]** airlines to "integrate[] PSS-agnostic merchandising engine with PSS"); *see also* Boyle Tr. 552-53 (explaining that Sabre viewed FLX M "as a key building block, an ability to create an offer with a flexible rules engine [that] we hadn't done ourselves"); Gilchrist Tr. 781-82 (acquiring FLX M "will give [Sabre] inroads in [to] new customers that we can't currently do business [with] today as far as merchandising is concerned" and "[for [Sabre's] existing PSS customers who have struggled without merchandising capabilities [offering Farelogix's merchandising solution] will give [Sabre] a much, much stronger level of capability"))

246. While the Court finds that integration of FLX-M into Sabre's offerings will promote innovation and enable Sabre **[*131]** to better compete against its GDS counterparts, this is only one motivation for Sabre's desire to acquire Farelogix. Other motivations are dealing with an entity Sabre views as a competitor and threat and transforming NDC technology from a risk to an opportunity for innovation and integration, including by obtaining control over FLX OC, the employees who work on it, and the revenues generated from it.

247. As the Court has already found (*see supra* **[**79]** FF Part K), Sabre and Farelogix view each other as competitors, both to supply NDC APIs and for a component of the traditional full-service GDS.

248. In a presentation created for a potential acquirer, Farelogix described Sabre and Amadeus as its primary "Order Delivery" competitors, both in their development of NDC APIs and in "traditional GDS distribution until NDC is fully adopted." (PX072 at -219)

249. Similarly, Sabre strategy documents identify Farelogix as one of Sabre's "most relevant threats" and as a competitor in next-generation distribution. (PX048 at -802; *see also* PX005 at -927; PX197 at -938 (describing Farelogix as a "non-GDS competitor[]" in next-generation order management))

250. In a February 2, 2018 deal discussion presentation, Sabre's Boyle noted that Farelogix's technology solutions would help Sabre "bring[] NDC-enabled distribution to scale in the marketplace." (Boyle Tr. 555) (referencing DX086 at 4) Sabre's November 10, 2018 presentation seeking approval from its board of directors detailed how combining with Farelogix would accelerate Sabre's "NDC-enabled strategy." (DX145 at 5) (describing several value propositions of possible merger with Farelogix, including **[**80]** that Farelogix "has key building blocks that complement our organic plans enabling at-scale NDC+," "NDC Offers integrated in the GDS," "Immediate access to NDC API," "Ability to scale NDC volume quickly," "Adds NDC platform to leading Sabre product offering") These benefits are not limited to acquisition of Farelogix's FLX M product but also will be derived from Sabre's acquisition of FLX OC.

T. Sabre's Promises About Post-Merger Pricing And Availability

251. On August 9, 2019, Sabre CEO Menke sent letters to current Sabre and Farelogix airline customers, making commitments concerning what Sabre would do following its acquisition of Farelogix. (Menke Tr. 720-22; DX225)

252. Specifically, Mr. Menke wrote that after the acquisition, Sabre will:

(a) Continue to offer and support Farelogix's NDC APIs and Open Connect capabilities to any third parties and all outlets that wish to use them to connect to Sabre, other GDSs, other distribution partners, or directly to travel agents;

(b) Continue to offer Farelogix's NDC APIs and Open Connect capabilities to airlines and other third parties for both GDS bypass and GDS pass-through;

(c) Continue to make Open Connect agnostic to any form of distribution **[**81]** of provider;

(d) Commit to make Farelogix's NDC APIs and Open Connect available at industry competitive rates that are no greater than they are today;

(e) Provide at least the current level of support (or more) for the capabilities;

(f) Continue to invest in the development of Farelogix's capabilities at **[*132]** levels no less than current levels; and

(g) Offer to extend any existing Sabre GDS contract or Farelogix contract on the same terms for a period of at least three years past the current termination date.

(DX225)

253. A three-year extension of FLX OC contracts would provide airlines that currently use FLX OC time to find an alternative supplier before their next negotiation with Sabre or with other GDS providers. [TEXT REDACTED BY THE COURT]

254. Notwithstanding that the Court does not believe Sabre's story about why it seeks to acquire Farelogix (*see supra* FF Part S), the Court does believe that Menke intends to abide by the commitments he has expressed to customers and the market. However, as the government correctly notes, Sabre has not memorialized its offer in any legally binding agreement, and no airline has accepted Sabre's offer. (Menke Tr. 730) Furthermore, CEOs — and even firm cultures **[**82]** — can change.

U. Most, But Not All, Players In The Airline Travel Ecosystem Support The Proposed Transaction

255. Most of the players in the airline travel ecosystem — including especially travel agencies and airlines — support the proposed transaction. Several of those who do not, American Airlines and United Airlines, have obvious interests in seeing the deal die.

256. Kurt Ekert, CEO of CWT, testified that the proposed acquisition "will enable Sabre to . . . offer much better value to the airlines than they can today." (Ekert Tr. 1199) He added that "if Sabre at scale . . . is able to make NDC a reality, well, that means we don't have to go and make fundamental changes to how we operate our business." (Ekert Tr. 1201)

257. Werner Kunz-Cho, CEO of Fareportal, stated, "Sabre with a Farelogix merger will be able to embrace a wider array of content, particularly in the low cost carrier domain which is very important to us." (Kunz-Cho Tr. 1316; *see also id.* 1290-91 (noting one benefit of merger will be enhanced ability to meet growing traveler demand for ancillaries))

258. BCD Travel noted in a letter to Dal that the Sabre-Farelogix combination "will benefit the travel industry as a whole — by accelerating **[**83]** the adoption of the [NDC] protocol — as well as the travel agencies that use global distribution systems (GDSs) such as Sabre, and companies and travelers we serve." (DX284 at 1)

259. Rocky Wiggins, Chief Information Officer at Spirit Airlines, testified that the deal "is a great step" because "it would accelerate Sabre's capability in the NDC area." (Wiggins Tr. 1658; *see also id.* 1661-62 (agreeing with proposition that combining with Farelogix "is another example of Sabre['s] commitment to deliver the end to end NDC-enabled retailing, distribution and fulfillment technology required to accelerate . . . profitability and growth"))

260. [TEXT REDACTED BY THE COURT]

261. As far as the record shows, the entities opposing the proposed acquisition are two of the largest airlines in the United States, American and United Airlines.[13]

262. Both American and United have previously attempted to acquire Farelogix. Specifically, in 2015, United considered a **[*133]** joint venture with AA to acquire Farelogix and gain "strategic influence over product direction" at Farelogix. (PX299; *see also* Radcliffe Tr. at 223) Starting in 2017, United began considering another offer to acquire Farelogix. (Radcliffe Tr. 224-25) **[**84]** That effort ended in 2018. (Radcliffe Tr. 225-26)

263. [TEXT REDACTED BY THE COURT]

264. AA's opposition to the transaction is in tension with its offer to Sabre to publicly support the proposed merger if Sabre were to agree to grant significant concessions on commercial terms fo[TEXT REDACTED BY THE COURT] (DX202; *see also* Garner Tr. 155-56, 158)

V. The Merger's Likely Impact On Pricing, Innovation, And Leverage

265. Based on the evidence, the Court predicts that the merger of Sabre and Farelogix will not increase prices nor deter innovation, even though it may reduce one source of airlines' leverage in negotiating with GDSs.

266. During negotiations leading to the Sabre-Farelogix transaction, some consideration was given to whether acquiring Farelogix would enable Sabre to raise prices. Sabre's and Farelogix's CEOs discussed whether the transaction could lead to a "possible uplift on GDS transaction fees." (Boyle Tr. 496-97; *see also* PX227 at -130 ("[T]his is something we discussed on the phone and you had a strong level of confidence surrounding the

---

[13] Shortly after the acquisition was announced, a senior Delta executive told his CEO that [TEXT REDACTED BY THE COURT] *see also* Adair Tr. 1720-21 (Farelogix is "an airline-centric entity" that "think[s] about how airlines want to solve the problems"))

opportunity.")) Farelogix and its private equity owner, Sandler, believed Sabre would be able to increase Sabre's booking fees post-merger. **[**85]** (Boyle Tr. 486-87, 492-93, 495; PX006 at -279; PX009 at -037) In August 2018, Farelogix's CFO noted that, for Sabre, buying Farelogix could reduce the "price pressure in [the] market." (PX187 at -960; *see also* Kruijssen Tr. 615-16) On the day the acquisition was announced, a Sabre senior vice president wrote: AA's "FLX bill is going up big time." (PX140 at -639; *see also* Gilchrist Tr. 751)

267. Even though the Court rejects Sabre's story about not perceiving GDS bypass as a threat and about acquiring Farelogix principally for FLX M, the Court does find credible Sabre's representations to the market that it intends to hold or even lower prices for FLX OC if it succeeds in acquiring Farelogix. Doing so would be consistent with the internal financial modeling Sabre used in deciding to pursue the transaction.

268. As part of Sabre's due diligence, Chris Boyle created three sets of projections to model the value of a potential acquisition: the Farelogix "Management Case," "Sabre Base Case," and "Sabre Synergy Case" models. (PX015 at 59; *see also* Boyle Tr. 538-40) Sabre's Board relied on Boyle's projections to approve the deal. (Menke Tr. 717-18) The FLX OC projections in the "Sabre Synergy **[**86]** Case" mirror those in the "Sabre Base Case" and both models project FLX OC prices decrease over time. (Boyle Tr. 567-70) In all three cases, the projected revenue per ticket was lower than current FLX OC prices. (Boyle Tr. 569)

269. [TEXT REDACTED BY THE COURT]

270. [TEXT REDACTED BY THE COURT]

271. The record is not devoid of contrary evidence. In January 2019, after a particular airline asked for no change to its current Open Connect terms with Farelogix, Sabre quoted that airline a price nearly [TEXT REDACTED BY THE COURT] times higher than Farelogix's pricing. (*Compare* PX393 at -079; PX392 at -026-27; Wilding Tr. 828-30 [TEXT REDACTED BY THE COURT] (segment) *with* Davidson Tr. 413-14; PX087 at -734; PX011 at 6 [TEXT REDACTED BY THE COURT]

272. Still, on the whole, the Court is persuaded that the most likely impact on **[*134]** pricing is that prices will remain the same or be reduced following the transaction.

273. Bringing Farelogix's technology in-house will foster Sabre's integration of NDC into its GDS, allowing it to respond more effectively to market demand.

274. Since at least 2017, Sabre's GDS business has been "under urgent pressure from key airline carriers" — including [TEXT REDACTED **[**87]** BY THE COURT] — "to deliver NDC capabilities in the near-term." (PX241 at -318; *see also* Menke Tr. 685)

275. In 2017, AA began paying a S2 per booking incentive to travel agencies for any bookings made using NDC technology. (PX072 at -300) Farelogix's CEO, Davidson, told his board that AA's NDC incentive program would put pressure on GDSs to speed up their GDS passthrough implementation efforts. (Davidson Tr. 374-75; PX097 at -235) Likewise, Sabre viewed [TEXT REDACTED BY THE COURT] as a "commercial action to force GDSs to incorporate NDC connectivity." (PX241 at -318)

276. Faced with this pressure, in August 2017, Sabre laid out a strategy to catch up to and surpass Farelogix's next-generation offer and order management capabilities by 2020. (Menke Tr. 682-83; PX197 at -937 to -938; PX002 at -914 (Sabre recognizing an "opportunity . . . to leapfrog" Farelogix's NDC API)) Sabre recognized that if it did not invest in next-generation distribution technology, there would be a "tipping point" at which large airlines' efforts to bypass the GDSs could lead to a steep fall in Sabre's GDS booking volume. (Boyle Tr. 504-06; PX005 at -046, -048-49 (listing FLX OC customers Lufthansa, AA, Qantas, **[**88]** and United as carriers with "GDS bypass motivation"))

277. Acquiring Farelogix, and integrating its FLX OC NDC API into its GDS, will allow Sabre to use new technology to deliver services airlines and agencies are demanding in a more efficient manner. (*See, e.g.*, Kunz-Cho Tr. 1307)

(Fareportal CEO testifying that "this merger will likely help innovation and allow Sabre to provide better content in ways that airlines wish to see that content displayed")

278. Additionally, Farelogix's Tim Reiz, the inventor of the NDC API and the only technologist to testify at trial, has considered developing a new type of PSS, but could not do so due to Farelogix's limited resources. (Reiz Tr. 1371-73) Reiz is excited by the prospect of joining Sabre and the opportunity, potentially, to develop a next generation PSS and artificial intelligence technologies. (Reiz Tr. 1346)

279. At least some individuals within Sabre believe that acquiring Farelogix will help Sabre gain leverage over airlines in the next round of negotiations. One Sabre senior vice president predicted that AA's Garner would "hate" the Farelogix deal because "it entrenches us more," vividly describing an independent Farelogix as American's **[**89]** "Trojan horse to f— us." (Gilchrist Tr. 750-51; PX140 at -639)

280. In 2017, United's director of distribution advised United's leadership that partnering with Farelogix for NDC distribution would "improve[] United's position" in upcoming contract negotiations with Sabre, Amadeus, and Travelport. (PX300 at -253; *see also* Radcliffe Tr. 187) He added that, even in the most recent GDS negotiations, "[t]he existence of the direct connect alternative powered by Farelogix gave me the ability to command a lower price from the GDSs" and otherwise obtain "better terms." (Radcliffe Tr. 189; *see also id.* at 181-82 (United has "certain freedoms in the [GDS] agreement that are made possible because of the existence of a bypass opportunity"))

281. United's director of distribution wrote to colleagues that "[i]f a GDS owns Farelogix, they may . . . remove a major **[*135]** threat that is out there in the industry that helps apply pressure to GDSs when we negotiate. Without that alternative in the market, we lose leverage." (PX299 at -770; *see also* Radcliffe Tr. 184-86) He described the acquisition as the "stuff of nightmares" and "the worst case scenario coming true." (PX301 at -261; *see also* Radcliffe Tr. 231-34)

282. Similarly, **[**90]** Delta's managing director of distribution strategy testified that having Farelogix as a GDS alternative improved Delta's bargaining position with the GDSs. (Lobl Tr. 1152-54)

283. It follows that the loss of an independent Farelogix will somewhat reduce airlines' leverage in the next round of negotiations with GDSs.

LEGAL STANDARDS

HN1[] *Section 7* of the Clayton Act prohibits any merger "in any line of commerce or in any, activity affecting commerce in any section of the country" whose "effect[s] . . . may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*. To prevail on a claim under *Section 7*, the government must show a "reasonable probability that the merger will substantially lessen competition." *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. While the government need not prove anticompetitive effects "with 'certainty,'" *FTC v. H.J. Heinz Co., 246 F.3d 708, 719, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)*, it is "not enough" to show "[t]he mere possibility of the prohibited restraint," *FTC v. Consol. Foods Corp., 380 U.S. 592, 598, 85 S. Ct. 1220, 14 L. Ed. 2d 95 (1965)* (internal quotation marks omitted).

HN2[] Courts considering a *Section 7* merger challenge follow a burden-shifting framework. First, the Court determines whether the government has established a prima facie case that the proposed merger is anticompetitive by (1) identifying the proper relevant market and (2) showing that the effects of the merger **[**91]** are likely to be anticompetitive. *See* *FTC v. Penn State Hershey Med. Ctr., 838 F.3d 327, 337-38 (3d Cir. 2016)*. If the government succeeds at this first step, the Court next determines whether the defendants have rebutted the government's prima facie case. *See* *id. at 337*. Finally, if defendants do successfully rebut the government's prima facie case, "the burden of production shifts back to the [g]overnment and merges with the ultimate burden of persuasion, which is incumbent on the [g]overnment at all times." *Id.* Ultimately, the government's burden is to prove, by a preponderance of the evidence, a reasonable probability that the merger it seeks to enjoin will substantially lessen competition. *See* *United States v. Anthem, Inc., 236 F. Supp. 3d 171, 192 (D.D.C. 2017)*, *aff'd*, *855 F.3d 345, 428 U.S. App. D.C. 403 (D.C. Cir. 2017)*.

"The relevant market is defined as the area of effective competition." *Ohio v. American Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)* (internal quotation marks omitted) ("*Amex*"). It consists of two components: a "product market" and a "geographic market." *Brown Shoe, 370 U.S. at 324*. A properly-identified relevant market "must correspond to the commercial realities of the industry." *Amex, 138 S. Ct. at 2285* (internal quotation marks omitted).

HN3[] "[D]etermination of the relevant market is a necessary predicate to a finding of a violation of the *Clayton Act*" *Brown Shoe, 370 U.S. at 324*. Because "[p]laintiffs have the burden of defining the relevant market," the failure to properly define either a product **[**92]** or geographic market is fatal to plaintiffs' case. *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436-42 (3d Cir.* ***[*136]*** *1997)*; *see also* *FTC v. Tenet Health Care Corp., 186 F.3d 1045, 1053 (8th Cir. 1999)*.

DISCUSSION

I. DOJ Failed To Establish A Prima Facie Case

Based on the Court's findings of fact, set out above, and as further explained below, the Court concludes that DOJ failed to establish a prima facie case that the merger of Sabre and Farelogix will violate *Section 7* of the Clayton Act. Specifically, DOJ has not identified a proper relevant market. As a matter of ***antitrust law***, Sabre, a two-sided transaction platform, only competes with other two-sided platforms, but Farelogix only operates on the airline side of Sabre's platform. Even if that were not the law, DOJ's market analysis fails because it does not relate to the relevant product market or the relevant geographic market. In the alternative, even if the Court were to assume that DOJ has identified a relevant product market, and were to assume that the record at least supports a prima facie case that the effects of the merger are likely to be anticompetitive, the Court further concludes that Defendants have rebutted the government's prima facie case. After making credibility determinations, drawing the reasonable inferences the Court deems most warranted, and weighing **[**93]** the evidence, the Court concludes that the government has failed to prove by a preponderance of the evidence that the Sabre-Farelogix transaction is reasonably probable to substantially lessen competition.

A. As A Matter of *Antitrust Law*, Sabre And Farelogix Do Not Compete In A Relevant Market

The first dispositive flaw in the government's case is that, as a matter of ***antitrust law***, Sabre, which is a two-sided platform facilitating transactions between airlines and travel agencies, does not compete with Farelogix, which indisputably only interacts with airlines and is not a two-sided platform. Due to the combination of the Supreme Court's 2018 *Amex* decision, holding that "[o]nly other two-sided platforms can compete with a two-sided platform for transactions," *138 S. Ct. at 2287*, and the Second Circuit's 2019 finding that the Sabre GDS is a two-sided transaction platform, Sabre and Farelogix do not compete in a relevant market.

In *Amex*, the United States and several states alleged that American Express violated *Section 1 of the Sherman Act* by requiring merchants to agree to "antisteering" contract provisions that prohibited merchants from discouraging the use of American Express cards. *Id. at 2283*. The Court first evaluated **[**94]** the relevant market and concluded that "the credit-card market is one market, not two." *Id. at 2283, 2285-87*. It noted that credit-card networks like American Express were what economists call "two-sided platforms:" entities that "offer[] different products or services to two different groups who both depend on the platform to intermediate between them." *Id. at 2280, 2286*. According to the Court, these platforms "cannot raise prices on one side without risking a feedback loop of declining demand;" thus, the Court held, "courts must include both sides of the platform" when defining a relevant market for purposes of antitrust analysis. *Id. at 2285*.

HN4[] The Court emphasized that "it is not always necessary to consider both sides of a two-sided platform," such as when "the impacts of indirect network effects and relative pricing in that market are minor." *Id. at 2286*. However, the Court continued, it is always necessary to consider both sides of "two-sided transaction platforms" that "facilitate a single, simultaneous transaction between participants" and "cannot make a sale unless both sides of **[*137]** the platform simultaneously agree to use their services." *Id. at 2286-87*. These platforms, according to the Court, "suppl[y] only one product - transactions." *Id. at 2286*. Because **[**95]** these transactions necessarily involve both sides of the market, "[o]nly other two-sided platforms can compete with a two-sided platform for transactions." *Id. at 2287*. In other words, for two-sided transaction platforms, "competition cannot be accurately assessed by looking at only one side . . . in isolation." *Id.*

DOJ argues that *Amex* does not govern here, but its arguments are unavailing. At trial DOJ suggested that *Amex* may be limited just to the credit card industry, but DOJ points to nothing in *Amex* to support such a conclusion. (*See* Tr. 1834-35) DOJ also observes that the record in this case, including from Defendants' expert Dr. Murphy, shows that "GDSs can face competition from one-sided competitors." (D.L 233 at 13) (citing Murphy Tr. 1521-22) While the government has accurately characterized the record, the facts presented in the instant case cannot change the binding precedential law issued by the Supreme Court.

DOJ maintains that Sabre and Farelogix are competitors because "a firm can compete in more than one market [a]nd the booking services portion of the Sabre GDS competes in a one-sided booking service market." (Tr. 1831) However, *Amex* establishes that two-sided transaction platforms **[**96]** such as the Sabre GDS supply "only one product:" the transactions that link both sides of the market. *Amex, 138 S. Ct. at 2286*. Because Farelogix indisputably does not supply this product - it offers services to airlines, not to travel agencies - it does not compete with Sabre.

While relatively few courts have had an opportunity to apply *Amex*, the Second Circuit has, in a different case that happened to be all about Sabre's GDS. In *US Airways v. Sabre Holdings Corp., 938 F.3d 43, 48-49 (2d Cir. 2019)* ("*US Airways*"), US Airways alleged that Sabre's restrictive contract provisions and "monopoliz[ation of] the distribution of system services to Sabre subscribers" violated *Sections 1* and *2* of the Sherman Act, respectively. A jury found that the relevant market was one-sided - and also that, even if the market were two-sided, US Airways had proven competitive harm - and returned a verdict for US Airways. *See id. at 53*.

On appeal, the Second Circuit vacated the jury verdict, determining it was based on the jury's "erroneous" conclusion that "the relevant market was one-sided." *Id. at 57-58*. Applying *Amex*, the Second Circuit held that the Sabre GDS is a two-sided transaction platform because it "offer[s] different services to different groups of customers - to airlines, access to travel agents; to travel agents, **[**97]** flight and pricing information - and [it] connect[s] travel agents to airlines in simultaneous transactions." *Id. at 58*. HN5[] Thus, according to the Second Circuit in *US Airways*, "the relevant market for such a platform must as a matter of law include both sides." *Id.*

DOJ is correct that the Second Circuit's *US Airways* decision was directed to a different legal question, was based on review of a different factual record than the one created here, and is, of course, not binding precedent in the Third Circuit.[14] However, the Court agrees with Defendants that, for purposes of understanding *Amex*, there is no meaningful distinction between *Section 1* Sherman Act claims and **[*138]** a *Section 7* Clayton Act merger challenge. (*See* D.I. 235 at 11-12)[15] This Court finds the Second Circuit's application of *Amex* to the very same Sabre GDS platform this Court is required to consider highly persuasive authority and chooses to follow it. Moreover, DOJ agrees that the Sabre GDS operates in a two-sided market. (Tr. 1831, 1836; *see also* D.I. 233 at 15 (acknowledging that at least Sabre's aggregation function "is properly classified as a two-sided service"))

---

[14] As best as the Court can tell, the Third Circuit has not yet had occasion to consider *Amex*.

[15] *See also United States v. Grinnell Corp., 384 U.S. 563, 86 S. Ct. 1698, 1705, 16 L. Ed. 2d 778 (1966)* ("We see no reason to differentiate between 'line' of commerce in the context of the Clayton Act and 'part' of commerce for purposes of the Sherman Act."); *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d 1384, 1393 n.9 (5th Cir. 1983)*; *Kellam Energy, Inc. v. Duncan, 616 F. Supp. 215, 218 n.3 (D.Del. 1985)*.

From these conclusions it necessarily follows that DOJ cannot prevail on its **[**98]** claim as a matter of law. ***HN6***[] "Only other two-sided platforms can compete with a two-sided platform for transactions," *Amex, 138 S. Ct. at 2287*, and Farelogix is not a two-sided platform, as even DOJ concedes (*see* Tr. 1836). Even if "it is not always necessary to consider both sides of a two-sided transaction platform," it is necessary to do so where, as here, both sides of Sabre's GDS platform "facilitate a single, simultaneous transaction between participants." *Id. at 2286-87*. Airlines on one side of Sabre's GDS cannot make a sale to travel agencies on the other side of the GDS "unless both sides of the platform simultaneously agree to use" Sabre's GDS services. *Id. at 2286*. This is a requirement in order for Sabre's GDS to provide its product: "transactions." *Id.* Even if all of this were not the case, and if it were possible as a matter of law for Farelogix on one side of the two-sided GDS platform to be found to compete in a relevant market, the evidence presented by DOJ does not adequately account for the fact that Farelogix is a one-sided player and Sabre is a two-sided transaction platform. That is, DOJ has failed to produce evidence that the anticompetitive impact of the merger on the airline side of the GDS platform would be **[**99]** so substantial that it would sufficiently reverberate throughout the Sabre GDS to such an extent as to make the two-sided GDS platform market, overall, less competitive. DOJ did not even try to meet this burden. Instead, DOJ (and its expert, Dr. Nevo) "look[ed] at only one side" of the Sabre GDS "in isolation," which "cannot" result in an "accurate[] assess[ment]" of competitive effects. *Amex, 138 S. Ct. at 2287*. Thus, again, given *Amex* and *US Airways*, DOJ cannot, as a matter of law, make out a prime facie case of a *Section 7* Clayton Act violation.

Finally, the government warns that a conclusion that, as a matter of law, Sabre and Farelogix do not compete for purposes of ***antitrust law*** would give "any GDS ... carte blanche to buy any one-sided competitor, free from scrutiny under *Section 7*." (D.I. 233 at 13) The Court is not persuaded (although, even if it were, the Court would still be compelled to follow the Supreme Court's decision in *Amex*). ***HN7***[] Rather, *Amex* provides that if the government seeks to stop a GDS from buying a "one-sided competitor," it must show that this purchase will harm competition on both sides of the two-sided market - i.e., the market for travel services to airlines and the market for travel services to travel **[**100]** agencies. Here, however, the government only attempted to demonstrate harm to the airlines side of the two-sided market. It has, thus, failed to meet its burden.

[*139] Notwithstanding this dispositive ruling, the Court will proceed and, in the remainder of this Opinion, assess the government's attempt to meet its burden on the assumption, in the alternative, that Farelogix and Sabre could be found to compete in a relevant market, even though they are not both two-sided platforms.[16] As explained below, the Court finds that DOJ has failed even when given the benefit of that assumption.

B. As A Factual Matter, DOJ Failed To Identify A Relevant Product Market

HN8[] "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe, 370 U.S. at 325*. Thus, products comprising a relevant market "need not be identical, only reasonable substitutes." *United States v. Energy Sols., Inc., 265 F. Supp. 3d 415, 436 (D. Del. 2017)*. To determine the reasonable interchangeability of products, courts consider "price, use, and qualities." *Queen City Pizza, 124 F.3d at 437*.

DOJ argues that the relevant product market consists of "booking services" sold through online travel agencies ("OTA") and brick-and-mortar **[**101]** traditional travel agencies ("TTA"). (D.I. 233 at 9) In the government's view, "[t]hese markets encompass the nexus of competition that exists between Sabre and Farelogix and are the

[16] The Court does so for multiple reasons, including the present lack of guidance from the Third Circuit on applying *Amex*, the possibility of appellate review in this case, the expedited nature of this litigation, and the enormous resources the parties and the Court have devoted to this case. Additionally, as is clear from the findings of fact, the Court has found as a matter of real-world economic reality that Sabre and Farelogix do compete to a certain extent, so resting a decision in this case entirely on a determination of law that Sabre and Farelogix cannot compete in a relevant market is not a comfortable result. Further, the *US Airways* decision was issued after the government filed this case, so it also does not seem right to summarily terminate DOJ's case based on a non-binding subsequent decision from an appellate court in a case in which the government was not even involved.

appropriate focus for analyzing the competitive effects of this merger." (*Id.*) According to DOJ's economics expert, Dr. Nevo, "booking services" are a "component of what we saw in the GDS bundle ... of getting the offer from, after it was created using the airline data and getting it either through the travel agency or through the aggregator that then gets it to the travel agency." (Nevo Tr. 899) The Court concludes that DOJ failed to identify a relevant product market.

DOJ's product market is flawed for several reasons. Foremost among them is that DOJ selectively (without persuasive explanation) dissects Sabre's overall GDS services into what DOJ refers to as "booking services." In doing so, DOJ improperly excludes the services Sabre's GDS provides to travel agencies, inconsistent with *Amex*, as already discussed above. But even as a factual matter, DOJ's proposed "booking services" product market does not accurately correspond to what actually is transacted in a market relevant to the proposed transaction. **[**102]**

As Defendants aptly put it: "DOJ contends that a single technical functionality of Sabre's unitary GDS transaction platform, which is sold in a two-sided market, can be extracted from the GDS and placed in competition against a slice of FLX OC, which is sold in a different, one-sided market." (D.I. 235 at 12) "No party can expect to gerrymander its way to an antitrust **[*140]** victory without due regard for market realities." *It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676, 683 (4th Cir. 2016)*.

DOJ urges the Court not to "[f]ocus[] on the breadth of Sabre's entire bundle of GDS products" but instead to evaluate the one "submarket" of "booking services," which DOJ says is a "one-sided product." (D.I. 233 at 13-15) However, DOJ has not proven that the Sabre GDS's "booking services" is a "well-defined submarket [that] constitute[s] a relevant product market." *Tunis Bros. Co. v. Ford Motor Co., Inc., 952 F.2d 715, 723 (3d Cir. 1991)*. DOJ failed to show that the Sabre GDS "booking services" is a distinct product that generates separate demand. Thus, DOJ's proposed product market is at odds with the "commercial realities of the industry." *Amex, 138 S. Ct. at 2285* (internal quotation marks omitted).

Both sides introduced evidence that the Sabre GDS platform performs several different functions, including aggregating and normalizing content, automating rules set **[**103]** by corporate travel policies, and creating offers for travel agencies. (*See, e.g.*, FF 34-36) The Court agrees with Defendants that the correct interpretation of the record is that the subset of Sabre services DOJ labels "booking services" are not a separate product but, instead, have "no independent economic significance." (D.I. 235 at 13)

Dr. Nevo's testimony failed to persuade the Court that there is separate demand for Sabre's "booking services." Dr. Nevo acknowledged that Sabre's "booking services" are not sold as a separate product in the market, but are only "sold as part of a bundle," so he himself "separate[d] them" for his analysis. (Nevo Tr. 985-86) Besides seeming to be an arbitrary exercise, Dr. Nevo's approach is unpersuasive also because he was unable to identify basic features of his purported product. For instance, Dr. Nevo could not identify a price of the Sabre GDS's "booking services" functionality because, as he testified, "Sabre has not offered it in the U.S. I believe there is no price." (Nevo Tr. 987) Dr. Nevo further testified that he "did not quantify what [the] value is" of the Sabre GDS "booking services," as this "was not part of my analysis." (*Id.*) Fundamentally, **[**104]** Dr. Nevo gave the Court no solid basis to conclude that "booking services" is a product customers are demanding from Sabre.[17]

---

[17] An analogy can be made to tying cases, in which a plaintiff must prove "an agreement by a party to sell one product [or service] but only on the condition that the buyer also purchases a different (or tied) product [or service]." *Avaya, Inc., RP v. Telecom Labs, Inc., 838 F. 3d 354, 394 (3d Cir. 2016)*. In these cases, "the answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 19, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *partially abrogated on other grounds by* *Illinois Tool Works, Inc. v. Independent Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. Thus, "to identify a distinct product market" for a service that is included in a larger "package" of services, a plaintiff must show "sufficient demand for the purchase of [that] service[] *separate* from [the package]." *Id* (emphasis added); *see also* *Avaya, 838 F.3d at 397*; *Collins v. Associated Pathologists, Ltd., 844 F.2d 473, 477-78 (7th Cir. 1988)* (holding that because "no separate demand exists for pathological services that is sufficient to create a separate market [from hospital services]," pathological and hospital services "combine in the form of one product, not two tied products").

As part of its effort to show that Sabre offers "booking services," DOJ points to Sabre's "new NDC API" that it has tried to sell to two airlines (D.I. 233 at 15), as **[*141]** well as Dr. Nevo's testimony that "[i]n kind of the early 2000s, there was a case where the Brazilian Airline asked Sabre to help it in creating a kind of a direct connect product" (Nevo Tr. 937; *see also* D.I. 233 at 15). Even this evidence, however, fails to show that the Sabre ***GDS platform*** includes a distinct "booking services" component that generates separate demand; at best, it shows that Sabre has tried to market an ***entirely different product*** that provides booking services.[18]

Accordingly, DOJ's proposed product market — which assumes a Sabre "booking services" product exists (or at minimum can be meaningfully and non-arbitrarily separated out from Sabre's actual GDS functionality) and competes with Farelogix's FLX OC — fails to "correspond to the commercial realities of the industry." *Amex, 138 S. Ct. at 2285* (internal quotation marks omitted). DOJ failed **[**105]** to show that a portion of Sabre's GDS and Farelogix's FLX OC are reasonable substitutes for one another.

There are other flaws in DOJ's efforts to identify a relevant product market. One is that the OTA booking services market improperly excludes sales made by airlines in the direct channel on their websites, at kiosks, and through call centers. That is, DOJ wrongly excludes airline.com from the OTA market.

HN9[] Courts can determine the "boundaries" of a product market by "examining ... practical indicia" such as "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Brown Shoe, 370 U.S. at 325*. Hence, courts evaluating whether different products are in the same product market often examine real-world market conditions, like whether customers "switch back and forth between [the] products," or if firms "compete against each other" to offer these products. *Energy Sols., 265 F. Supp. 3d at 437-38*.

Substantial evidence supports the Court's conclusion that airline.com is reasonably interchangeable with the travel services the Sabre GDS offers through OTAs. Airline.com **[**106]** and OTA both target leisure travelers. (*See, e.g.*, Garner Tr. 101, 123-25; Radcliffe Tr. 172; Kunz-Cho Tr. 1282-83) End-user travelers switch back and forth between OTAs — like Expedia and Priceline — and airlines' own websites. (*See, e.g.*, FF 46, 211) Defendants' expert, Dr. Murphy, persuasively explained how airline.com is the "closest alternative consumers can see" to OTAs. (Murphy Tr. 1553) He added that airline.com is the "most important short-term constraint" on GDS fees, because airline.com is only "a mouse click away" from OTAs. (Murphy Tr. 1433-34) Even Dr. Nevo testified that he "believe[s] that there is some competitive pressure [to GDSs] from airline.com" (although he could not say whether airline.com exerts more or less competitive pressure on Sabre's GDS than FLX OC does). (Nevo Tr. 1009-10)

Further, airlines view OTAs as competitors with airline.com and believe they can steer at least a substantial portion of OTA sales to their own direct sales channels. (*See* Murphy Tr. 1438-49; Lobl Tr. 1165 (Delta Director of Distribution testifying Delta is "hoping that customers will **[*142]** choose" Delta's direct channels); DX287) Airlines can switch from offering at least some of their **[**107]** leisure traveler tickets from OTAs to airline.com.

DOJ insists that Defendants are wrong, and that airline.com is properly excluded from the OTA market, because Dr. Murphy did not use the small but significant and non-transitory increase in price ("SSNIP") test to evaluate whether airline.com should be included in the relevant product market. (D.I. 233 at 17-18) As an initial matter, the burden is on the government to show that airline.com is not part of the relevant OTA market, and it has failed to meet that burden. In any case, while the SSNIP test is a "common method" that courts can use to define the relevant market, *see Penn State Hershey, 838 F.3d at 338*, it is not the only one. Here, the Court is evaluating economic "practical indicia" to assess whether products are "reasonably interchangeable," which is another permissible analysis. *Brown*

---

[18] Likewise, while DOJ attempts to show "distinct demand for booking services and aggregation services" by suggesting that Farelogix and Travelfusion offer these services on a standalone basis (*see* D.I. 241 at 3), this evidence does not demonstrate that *Sabre* offers these products on a standalone basis; nor does it establish that Sabre participates in these product "submarkets."

Shoe, 370 U.S. at 325; *see also* Energy Sols., 265 F. Supp. 3d at 437-38. Doing so, the Court concludes that airline.com and OTAs are reasonably interchangeable.

DOJ also tries to justify excluding airline.com from the OTA booking services market on the grounds that airlines cannot "replace enough of their OTA bookings with airline.com to make forgoing OTA distribution economically feasible." (D.I. 233 at 18) But the test for a relevant product **[**108]** market is whether the "commodities [are] reasonably interchangeable by consumers for the same purposes" — not whether it is feasible to convert all users to only one of those commodities. United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956); *see also* Tunis Bros., 952 F.2d at 722; FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 122 (D.D.C. 2004) ("In determining interchangeability, therefore, the Court must consider the degree to which buyers treat the products as interchangeable, but need not find that *all* buyers will substitute one commodity for another.").[19]

For at least these reasons, DOJ has failed to identify a relevant product market.[20]

C. DOJ Failed To Identify A Relevant Geographic Market

HN10[] The relevant geographic market is comprised of the area where customers look to buy a seller's products or services. *See* Tunis Bros., 952 F.2d at 726 ("[T]he geographic market is not comprised of the region in which the seller attempts to sell its product, but rather is comprised of the area where his customers would look to buy such a product."). Here, **[*143]** the evidence shows the customers of the purported "booking services" are airlines. (*See, e.g.*, FF 70-71, 221) Therefore, the relevant geographic market must be based on where airlines look to purchase these services. (*See* Nevo Tr. 906, 1016)

DOJ relies on Dr. Nevo's analysis that the relevant geographic **[**109]** market is "U.S. point of sale," that is, for TTAs those travel agencies located in the U.S. and for OTAs those travel agencies having an IP address in the U.S. (*See Nevo* Tr. 836, 853, 897; FF 217-18) DOJ reasons that airlines looking to sell tickets in the U.S. will only use travel agencies operating in the U.S. because U.S. travelers will not use foreign travel agencies. (D.I. 233 at 19-21; D.I. 241 at 6-7)

The Court disagrees with the government. Instead, the Court agrees with Defendants that DOJ's geographic market is a "contortion," wrongly "focus[ing] not on FLX OC's actual customers in the upstream market (i.e., the airlines), but rather those customers' customers in the downstream market (i.e., the travel agencies or travelers)." (D.I. 242 at 3) The airlines' demand for travel agency services is not a useful starting point for the geographic market analysis because airlines that use "booking services" (assuming, for the sake of argument, this is an accurate and meaningful description of a relevant product) need not — and frequently do not — sell their tickets through travel agencies. Indeed, airlines that use "booking services" such as FLX OC can (and do) distribute their tickets **[**110]** through several means other than travel agencies, such as their own websites or mobile apps, or through non-GDS aggregators. (*See, e.g.*, PX081 at -047; Carter Tr. 283-84)

---

[19] It is not as clear whether airline.com must be included in the "TTA booking services" market. TTAs primarily serve business travelers and offer specific support services that these travelers request, which are not available from airline.com. (Radcliffe Tr. 172-73, 335; Ekert Tr. 1184) There is also a lack of evidence that airlines view TTAs as an alternative to airline.com or that airline.com exerts competitive pressure on TTAs. It may be, then, that DOJ's TTA market analysis is somewhat less flawed than its OTA market analysis.

[20] The Court agrees with Defendants that, to the extent DOJ is now inviting the Court to "unilaterally change the defective market allegations if necessary to save its case," it would be wrong for the Court to do so under the circumstances here, which include that both parties (and the Court) have already devoted enormous resources to the case the government chose to bring. (D.I. 235 at 2; *see also id.* at 18-20; D.I. 242 at 2 n.3; *see generally* D.I. 233 at 30 n.6 (DOJ: "The Court is not limited to considering the markets that the Government alleged; if the Court finds harm in any relevant market based on the evidence presented, the Court may find a Section 7 violation."))

Moreover, the evidence shows that airlines do not look only within the United States to purchase "booking services." As Dr. Nevo testified, the vast majority of Farelogix's customers, 13 out of 15, are airlines located outside the United States. (Nevo Tr. 1018) Farelogix also competes with foreign competitors for bids. (*See, e.g.*, FF 145-46, 159-63) Likewise, when Sabre marketed a standalone direct connect product — what DOJ labels a Sabre "booking services" product — Sabre tried selling it to airlines located outside the United States. (Gilchrist Tr. 761; PX316 at -534; Nevo Tr. 937; *see also* D.I. 233 at 15) Thus, DOI's proposed U.S.-based geographic market is at odds with commercial realities. Additionally, there is no evidence that the transaction fee for FLX OC varies by the location of the agency that purchase a ticket. (*See* FF 222)

For at least these reasons, DOJ has failed to identify a relevant geographic market. *See* *Dicar, Inc. v. Stafford Corrugated Prods., 2010 U.S. Dist. LEXIS 23667, 2010 WL 988548, at *12 (D.N.J. Mar 12, 2010)* ("Where, as here, there is no indication that a consumer would be unable to purchase a product **[**111]** abroad, the Court will not arbitrarily limit the geographical market to the U.S."); *E&E Co. v. Kam Hing Enters., 2008 U.S. Dist. LEXIS 65323, 2008 WL 3916256 at *8 (N.D.. Cal. August 25, 2008)* (finding plaintiff did not adequately allege relevant market when it "fail[ed] to indicate why similar bed coverings originating from other countries would not be reasonably interchangeable by consumers for the same purposes") (internal quotation marks omitted). This failing (like others already described by the Court) is dispositive.

II. Even Assuming DOJ Made Out A Prima Facie Case, The Record Does Not Demonstrate A Reasonable Probability That The Merger Will Substantially Lessen Competition

A. DOJ Is Not Entitled To A Presumption Of Anticompetitive Harm

Because DOJ has not identified the relevant market where competition occurs — **[*144]** and has offered evidence of likely harm only with respect to its flawed markets — it cannot prove the second step of its prima facie case: that "the effect of the merger in [the relevant] market is likely to be anticompetitive." *Penn State Hershey, 838 F.3d at 337-38*. However, even if DOJ were correct that the relevant market is "booking services" at the "U.S. point of sale," DOJ has still failed to prove likely harm to competition in this market.

At trial, DOJ presented Herfindahl-Hirschman Index ("HHI") measurements **[**112]** to show that Sabre's acquisition of Farelogix would harm competition in the relevant market. (D.I. 233 at 21-23) Even assuming that DOJ identified the correct market, this evidence was not persuasive.

HN11[] HHI is a commonly-used measurement of market concentration. *See* *Penn State Hershey, 838 F.3d at 346*. As the Third Circuit has explained:

> The HHI is calculated by summing the squares of the individual firms' market shares. In determining whether the HHI demonstrates a high market concentration, we consider both the post-merger HHI number and the increase in the HHI resulting from the merger. A post-merger market with a HHI above 2,500 is classified as "highly concentrated," and a merger that increases the HHI by more than 200 points is "presumed to be likely to enhance market power." The Government can establish a prima facie case simply by showing a high market concentration based on HHI numbers.

Id. at 346-47 (internal citations omitted).

DOJ offered HHI evidence for both of its proposed markets. To calculate HHI in the "OTA booking services" and "TTA booking services" markets, Dr. Nevo relied on 2018 market share data, Sabre's projections for Farelogix's growth, and Farelogix's own projections. (Nevo Tr. 916-21) Dr. Nevo testified that **[**113]** in both the "OTA bookings services" and "TTA booking services" markets, the post-merger HHI greatly exceeds the threshold for a highly concentrated market (2,500) and the increase in HHI exceeds the level at which enhanced market power is presumed (200). (Nevo Tr. 920-23)

But Dr. Nevo's HHI cannot be relied on because it ignores industry realities. In calculating market shares in the "OTA booking services" market, Dr. Nevo excluded airline.com — but Dr. Nevo's own testimony, and much other evidence besides, showed that airline.com exerts competitive pressure on the Sabre GDS. (*See, e.g.*, Nevo Tr. 1009-10; FF 206-16) Likewise, when calculating market shares in the "TTA booking services" market, Dr. Nevo attributed sales generated by GDS passthrough to Farelogix rather than to the GDS — even though the GDS controls the sale and the commercial relationship. (*See* Nevo Tr. 917-18; Murphy Tr. 1486; FF 229) When these errors are corrected, the HHI results look much different. As Dr. Murphy showed at trial, adding airline.com market shares to the "OTA booking services" market and attributing GDS passthrough sales to the GDS in the "TTA booking services" market yields post-merger HHI levels **[**114]** and increases that do not give rise to a presumption of harm to competition. (*See* Murphy Tr. 1485-86; FF 228, 230) DOJ's HHI analysis, therefore, does not satisfy DOJ's prima facie burden and does not entitle DOJ to a presumption of harm to competition.

B. DOJ Did Not Prove A Reasonable Probability Of Anticompetitive Harm

Because DOJ does not enjoy a presumption of anticompetitive harm, had DOJ proven a relevant product and geographic market, it would still be the government's **[*145]** burden to prove, considering all of the evidence — including that produced by Defendants to rebut DOJ's prima facie case — that the merger of Sabre and Farelogix is reasonably probable to substantially lessen competition. Even if the Court were to reach this part of the analysis (which it does solely as an alternative to the other deficiencies already identified in the government's case), the Court would conclude that DOJ has failed to meet its burden. Some of the reasons for this conclusion are discussed below.

1. DOJ Failed To Prove That Barriers To Entry Prevent Adequate Competition To FLX OC

HN12[] "Barriers to entry are factors, such as regulatory requirements, high capital costs, or technological obstacles, that prevent **[**115]** new competition from entering a market in response to a monopolist's supracompetitive prices." *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307 (3d Cir. 2007)*. While not a required element of a *Section 7* claim, evidence of barriers to entry in the relevant market can "bolster[]" the government's case. *FTC v. Univ. Health, Inc., 938 F.2d 1206, 1220 (11th Cir. 1991)*; *see also FTC v. H.J Heinz Co., 246 F.3d 708, 717, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)*. In addition, defendants can rebut the government's prima facie case by showing that the relevant market exhibits low barriers to entry. *See Energy Sols., 265 F. Supp. 3d at 443*.

DOJ identifies three barriers to entry in the relevant market: (1) the technological challenge of building an "NDC booking services solution;" (2) the "need for a good reputation and track record serving major airlines;" and (3) GDS contract provisions that discourage airlines and travel agencies from switching to "new entrants." (D.I. 233 at 32) DOJ has failed to persuade the Court that any one or a combination of these barriers significantly affects the analysis here.

The record does not establish that building an adequate "NDC booking services solution" is particularly difficult. As several witnesses testified, the schema for developing a marketable NDC API product is publicly available, which has allowed numerous companies to begin offering NDC API services. (Davidson Tr. 433, 439; Nevo Tr. 1038-39) For **[**116]** example, Farelogix Chief Technology Officer Tim Reiz testified that programmers can easily compete with Farelogix for NDC API services "[b]ecause they have web services that they can connect to the airline systems." (Reiz Tr. 1342-43) Marketplace evidence supports these witnesses. Datalex and Amadeus have successfully built and marketed NDC API services for several airlines. (FF 160-61) Likewise, Delta, British Airways, and Air France have built and supplied NDC APIs for themselves. (Carter Tr. 271; Davidson Tr. 446-47; Adair Tr. 1732; FF 151) While executives from American Airlines and United Airways believe only Farelogix can provide adequate NDC API services (Garner Tr. 121; Radcliffe Tr. 229-30), the totality of the evidence persuades the Court that these are personal (or company) preferences, not market realities.

Farelogix's vigorous competition with rival NDC API providers further undermines DOJ's remaining arguments. Farelogix has competed for bids to supply NDC API services with at least eight other companies, losing bids to [TEXT REDACTED BY THE COURT] (Carter Tr. 270-71) While, in the overall context, Farelogix has competed well against other NDC API suppliers (*see* FF 164-70), **[**117]** and has some unique advantages (*see* FF 140-50), these other suppliers have also enjoyed success, demonstrating that new entrants can develop a "good reputation and track record" despite Farelogix's established position in the market. The large **[*146]** number of suppliers who have won bids further suggests that GDS contract provisions have not shut out new NDC API providers.

At trial, and again in the post-trial briefing, the parties devoted a great deal of attention to what was marked as Davidson Demonstrative 1, which listed NDC API projects Farelogix bid on in recent years, purporting to depict the results of its efforts. In the Court's view, DOJ has the more persuasive interpretation of this demonstrative. It shows — consistent with the facts supported by the record — that Farelogix has fared just fine in recent years. [TEXT REDACTED BY THE COURT] Furthermore, Farelogix currently provides its services to two of the largest U.S. airlines as well as the largest airlines in Australia and Mexico. (*See* Davidson Demonstrative I; Davidson Tr. 469; FE 166) Farelogix is currently working on 26 GDS integration installations, far more than any other NDC API provider (as far as the record reveals). **[**118]** The Court is not persuaded by Defendants' puzzling attempts at trial to portray Farelogix as a failure.

Notwithstanding all this, however, the reality that Farelogix is competing successfully against other NDC API suppliers does nothing to alter the fact that there are not significant barriers to entry into, and success in, the NDC API market.

2. DOJ Failed To Prove That A Post-Merger Sabre Will Harm Competition By Eliminating FLX OC Or Raising FLX OC Or GDS Prices

The Court is persuaded that at various points Sabre has viewed FLX OC as a competitive threat. Among other things, Sabre believed that FLX OC was "a real alternative to the GDS" (PX367 at -277-78), and that Farelogix's NDC technology has [TEXT REDACTED BY THE COURT] (PX247 at -766). Further, the Court is persuaded that some at Sabre viewed the acquisition of Farelogix as way to neutralize this perceived threat, including employees who wrote that the deal would "[m]itigate risk from potential GDS bypass" (PX011 at 3; PX012 at 7), in a document that was at one point sent to Sabre's board (*see, e.g.*, FF 240-41). The record also demonstrates that, historically, Sabre has resisted change while Farelogix has been a pioneering innovator **[**119]** and disruptor of the airline travel services ecosystem. (*See* FF 101-08) Moreover, this evidence suggests that Sabre will have the incentive to raise prices, reduce availability of FLX OC, and stifle innovation.

Nevertheless, DOJ has not persuaded the Court that Sabre will likely act consistent with its history or these incentives and actually harm competition if it is permitted to complete the acquisition of Farelogix. This is yet another problem for the government's case because the claim the government has brought necessarily requires the Court to undertake a forward-looking analysis. *See generally* *United States v. Baker Hughes, 908 F.2d 981, 988, 991, 285 U.S. App. D.C. 222 (D.C. Cir. 1990)* (explaining that merger analysis "focus[es] on the future" and requires Court to "[p]redict[] future competitive conditions").

The evidence does not suggest that Sabre is acquiring Farelogix to eliminate FLX OC from the marketplace. Rather, it supports the opposite conclusion: that Sabre intends to continue offering FLX OC by integrating it into the Sabre GDS platform, allowing Sabre to better meet the demands of airlines and travel agencies. In a 2018 presentation to Sabre's board of directors, Sabre's management sought approval for the merger by arguing it would allow Sabre to integrate **[**120]** FLX DC's NDC capabilities. (*See* DX145 at -005; *see also* Boyle Tr. 555 (Sabre VP of Corporate Development testifying that deal is intended, in part, to "bring[] NDC-enabled distribution to scale in the marketplace"); **[*147]** DX086 at -037) Several industry participants have applauded the deal for this very reason. (*See, e.g.*, FF 256-60) All of this is consistent with the strong evidence that the future of airline ticket distribution is more likely to be characterized by GDS passthrough — i.e., integrating NDC capabilities into the GDS platform — rather than GDS bypass. (*See, e.g.*, PX081 at -045-47; *supra* FF Part N)

Further supporting these conclusions are the public commitments Sabre CEO Menke has made, including to continue offering FLX OC to airlines (at their current or better prices) after the merger closes. (*See supra* FF Part T) DOJ did not persuade the Court that Sabre is likely to raise prices for its GDS platform after the merger, even though the Court has found that the merger will likely reduce some of the leverage airlines currently have in negotiations with Sabre. (*See* FF 265, 279-83) While a Farelogix board member recommended that Sabre increase its post-merger GDS booking fees **[**121]** (*see* Boyle Tr. 494-95; PX007 at -734), no evidence has been presented that anyone at Sabre or Farelogix has taken steps to act on this recommendation. (*See also* FF 265-77) Also, because Sabre competes with rival GDS providers Amadeus and Travelport for travel agency customers, it faces constraints on the prices it can charge. Indeed, CWT CEO Kurt Ekert testified that "if. . . Sabre was to lose content or enable content but on a noncompetitive basis to how another GDS provides that, then we have the ability to shift business away from them to another GDS." (Ekert Tr. 1186; *see also* Murphy Tr. 1433)

DOJ also failed to persuade the Court that the merger is likely to lead to higher prices for FLX OC. DOJ points to Sabre's January 2019 proposal to raise an airline's post-merger price for FLX OC services. (D.I. 233 at 25; *see also* Gilchrist Tr. 751-60; Wilding Tr. 828-30; PX392 at -026-27; FF 271) However, that airline rejected Sabre's proposal, with one Sabre employee reporting that the proposal "caused a kerfuffle." (PX393 at -079; *see also* Gilchrist Tr. 758) If anything, this evidence suggests that Sabre will face serious resistance if it tries to raise FLX OC prices after the merger.

[122]** Farelogix's rivals will likely further constrain Sabre's ability to raise prices for FLX OC. As discussed above, Farelogix now vigorously competes with — and often loses business to — other NDC API providers. Farelogix also faces some threat that airlines will self-supply NDC API services (although many airlines do not view this as an attractive option). Thus, it is unlikely that Sabre will be able to raise prices on FLX OC services without driving customers to competitively priced alternatives.

For at least these reasons, DOJ failed to prove that Sabre, after the merger, will likely harm competition by raising prices or eliminating FLX OC.[21]

3. DOJ Did Not Prove That The Merger Will Harm Innovation

HN13[] "A merger can substantially lessen competition by diminishing innovation if it would 'encourag[e] the merged firm to curtail its innovative efforts below the level that would prevail in the absence of the merger." *United States v. Anthem, 236 F. Supp. 3d at 229-30* (quoting 2010 DOJ and FTC Horizontal Merger Guidelines §§ 1, 6.4 (2010)) While DOJ argues that Sabre's purchase of Farelogix will "reduce competition to innovate" (D.I. 233 at 28), the Court is not persuaded.

[*148] DOJ offers nothing more in support of its contention than vague theories from Dr. Nevo, who testified that the merger involves **[**123]** "taking an innovative firm that has been driving, driving ahead, creating the industry shakeup, and putting that under a firm that does not have the same incentive." (Nevo Tr. 950-51) These generalities do not help the Court conclude that the merger would harm innovation.

Moreover, the record evidence, overall, suggests the opposite. While it is undisputed that Farelogix developed the original NDC schema and has been an innovator (*see* FF 58; *see also supra* FF Part I), no party offered evidence that Farelogix has more recently created or introduced innovative products or services. Further, as has been repeatedly noted, the public availability of the NDC schema has allowed (and will continue to allow) new firms to enter the market and compete successfully with FLX OC.

DOJ also failed to persuade the Court that Sabre is purchasing Farelogix to delay innovation. (*See D.I.* 233 at 28) As discussed above, the evidence suggests that Sabre seeks to integrate FLX OC into its platform, not eliminate it,

---

[21] Because DOJ failed to prove a relevant market, the Court need not and will not address Dr. Nevo's SSNIP analysis in any greater detail than it already has elsewhere in this Opinion.

and that in doing so Sabre is following the industry trend towards GDS passthrough. (*See, e.g., supra* FF Parts N, S)

Finally, the Court is persuaded that the merger may well promote innovation, as **[**124]** numerous witnesses have forecast. (*See, e.g.*, Ekert Tr. 1199-1201 (CWT CEO stating that merged Sabre-Farelogix could offer additional technology services to airlines and allow travel agencies to "drive more high yield traffic to the airlines"); Kunz-Cho Tr. 1316 (Fareportal CEO stating that merged entity "will be able to embrace a wider array of content, particularly in the low cost carrier domain which is very important to us")) Moreover, Farelogix Chief Technology Officer Tim Reiz credibly predicted that the merger will allow him to develop new projects (such as a next-generation PSS) using artificial intelligence, because he would have access to Sabre's resources, including data, the lack of which was previously a "roadblock." (Reiz Tr. 1346-47)

On balance, then, DOJ has not proven that the Sabre-Farelogix merger will harm innovation.

CONCLUSION

The Court recognizes that the outcome here may strike some, including the litigants, as somewhat odd. On several points that received a great deal of attention at trial — whether Farelogix is a valuable company enjoying relative success in the market, whether Sabre and Farelogix compete, whether Sabre understands GDS bypass is a threat, whether **[**125]** Sabre stands to lose revenue even from the expansion of GDS passthrough, and Sabre's motivation for its proposed acquisition of Farelogix -- the Court is more persuaded by DOJ than by Defendants. This is largely due to the surprising lack of credibility on these points of certain defense witnesses, including Sabre CEO Menke, Sabre deal leader Boyle, and Farelogix CEO Davidson.

Despite these findings and conclusions, however, Defendants have won this case. This is because the burden of proof was on DOJ, not Defendants. Defendants opted to tell the Court a story that is not adequately supported by the facts, but it was their ***choice*** whether to do so, and their failing does not determine the outcome of this case. Instead, it is DOJ which, under the law, has the ***obligation*** to prove its contention that the Sabre-Farelogix transaction will harm competition in a relevant product and geographic market. DOJ failed. It based its case on the expert analysis of Dr. Nevo, but that analysis — including Dr. Nevo's explanation and defense of it — was **[*149]** simply unpersuasive. Unlike Defendants' evidentiary failings, DOJ's are dispositive.

Under our laws, and in our (regulated) market economy, private entities **[**126]** like Sabre and Farelogix are generally free to enter into agreements and relationships with one another, whether or not the government prefers that they do so. If DOJ is to get the Court to enjoin such a transaction, it must meet its burden of proof. Here, the government has not done so. Accordingly, the Court must enter judgment for Defendants.

APPENDIX

CLOSING THE COURTROOM AND SEALED PORTIONS OF THE RECORD

HN14[] While the public enjoys a "common law right of access [] to judicial proceedings and records," this right is "not absolute." *In re Avandia Marketing, Sales Practices and Prods. Liability Litig., 924 F.3d 662, 672 (3d Cir. 2019)*. To overcome the presumption of access, parties must show that the information they seek to protect is "the kind of information that courts will protect and that disclosure will work a clearly defined and serious injury to the party seeking closure." *Id. at 672*; *see also* *Genentech, Inc. v. Amgen Inc., C.A. No. 17-1407-CFC D.I. 659 at 6, 2020 U.S. Dist. LEXIS 54775 (D. Del. Mar. 30, 2020)*. Such information includes "sources of business information that might harm a litigant's competitive standing." *Avandia, 924 F.3d at 679*. Moreover, in granting a party's request to protect information, courts "must [1] articulate the compelling, countervailing interests to be protected, [2] make specific findings on the record concerning **[**127]** the effects of disclosure, and [3] provide[] an opportunity for interested third parties to be heard." *Id. at 672-73* (internal quotations omitted and numerals added). Further, they must "conduct a document-by-document review of the contents of the challenged documents." *Id. at 673* (internal formatting and quotations omitted).

This issue often emerges in trials of government challenges to a proposed merger based on antitrust concerns, during which witnesses almost inevitably discuss sensitive business information such as prices, forward-looking strategy, and analyses of competitive conditions. To balance the public's right of access with the parties' interest in avoiding competitive injury, courts routinely close the courtroom when witnesses discuss "competitively sensitive information," while otherwise allowing full public access. *See, e.g., FTC v. Tronox Ltd.*, 18-cv-01622 D.I. 80 at 8-9 (D.D.C. July 26, 2018) (agreeing to seal courtroom for witness testimony about "competitively sensitive information"); *FTC v. Wilhelmsen et al.*, 18-cv-00414 D.I. 62 at 85 (D.D.C. May 29, 2018) ("[W]e will have portions of the trial in which there's confidential commercial information that will be elicited. And so I'm going **[**128]** to have to close the courtroom briefly."); *FTC v. Sysco* Corp.,15-cv-00256 D.I. 183 at 465-66 (D.D.C. June 26, 2015) (sealing courtroom to "accommodate confidential business information").

The Court followed this approach during trial. At various points, the litigants and several third parties asked the Court to close the courtroom to protect competitively sensitive information, such as forward-looking business analyses, commercial agreements, and strategic plans. (*See, e.g.*, D.I. 212 at 3-5; D.I. 219 Ex. 1 at 1-2) There were no objections to these requests. The Court evaluated each request separately, and granted requests to close the courtroom after describing the requesting party's interest in protecting commercially sensitive information or specifically referring to prior rulings where it had articulated this interest. (*See, e.g.*, Tr. 20 ("[T]here **[*150]** is some forward-looking financial competitively sensitive information that ... is not something that ... the public necessarily has a right to know because of the clearly defined and serious injury that it would cause to those defendants and to the third parties, particularly as they contemplate further transactions, negotiations, [and] **[**129]** agreements, in the future."); Tr. 87 ("So I am persuaded for the reasons discussed earlier, the reasons in the letters I received over the weekend, the declaration that I received over the weekend as well as further discussion today that, particularly what I have been told about the NDA, that this witness is bound by ... that it is appropriate to close the courtroom for limited portions of the testimony that will discuss those commercially sensitive negotiations."); *see also* Tr. 196-97, 229, 360-61, 662-63, 1088) The Court also allowed limited redactions of documents for the same reasons it occasionally limited access to the courtroom and ensured that the parties made the complete redacted record of the trial available to the public in a timely manner. (*See* D.I. 252, 254, 256, 259, 262, 264, 266, 268; *see also* Tr. 1742-43)

The parties also provided the Court with a helpful summary of the limited information they believed would need to be redacted if it were included in this Opinion. (*See* D.I. 271) With the parties' cooperation, the Court will be able to issue a public version of this Opinion quickly, notwithstanding its length.

The Court commends counsel for working cooperatively with **[**130]** one another to ensure the efficient presentation of the evidence at the expedited trial while assisting the Court in ensuring the public's access to the courtroom, the trial record, and this Opinion.

ORDER

At Wilmington this **7th** day of **April, 2020**:

For the reasons stated in the Opinion issued this same date, **IT IS HEREBY ORDERED** that judgment is entered **FOR** Defendants and **AGAINST** Plaintiff.

IT IS FURTHER ORDERED that, because the Opinion was issued under seal, the parties shall meet and confer and provide the Court a proposed redacted version, consistent with their submission earlier today (*see* D.I. 271), no later than **April 8, 2020 at 10:00 a.m**. Thereafter, the Court will release a public version of its Opinion.

IT IS FURTHER ORDERED that the parties shall meet and confer and, no later than **April 14, 2020**, submit a joint status report, advising the Court as to what, if anything, remains to be done in this case before it is closed.

/s/ Leonard P. Stark

HONORABLE LEONARD P. STARK

UNITED STATES DISTRICT JUDGE

Optronic Techs., Inc. v. Ningbo Sunny Elec. Co.

United States District Court for the Northern District of California, San Jose Division

April 9, 2020, Decided; April 9, 2020, Filed

Case No. 5:16-cv-06370-EJD

Reporter
2020 U.S. Dist. LEXIS 62795 *; 2020-1 Trade Cas. (CCH) P81,160; 2020 WL 1812257

Opinion

ORDER GRANTING PLAINTIFF'S MOTION FOR EQUITABLE RELIEF AND JUDGMENT ON UCL CLAIM

Re: Dkt. No. 582

Pursuant to *15 U.S.C. § 26*, *Cal Bus. and Prof. Code § 17200*, and *Federal Rules of Civil Procedure 54(b)* and *58(b)(2)(B)*, Plaintiff Optronic Technologies, Inc. ("Plaintiff" or "Orion") moves this Court for equitable relief and judgment on its claim arising under *California's Unfair Competition Law* ("UCL"). The Court took the matter under submission for decision without oral argument pursuant to Civil *Local Rule 7-1(b)*. For the reasons below, Plaintiff's motion is **GRANTED**.

I. Background

The basic facts and procedural history underlying this case are well known to the Court and the parties. The Court recounts only the pertinent background here.

On November 26, 2019, and after a six-week jury trial, the jury returned a verdict for Plaintiff and against defendants Ningbo Sunny Electronic Co., LTD ("Ningbo Sunny" or, for the purposes of this motion, "Defendant"), Sunny Optics, Inc. ("Sunny Optics"), and Meade Instruments, Corp. ("Meade") on all claims. Dkt. No. 501. The jury found that the defendants had conspired to fix prices or credit terms in violation of the *Sherman Act Section 1* (Claim 1), **[*3]** had conspired to allocate the market for telescopes in violation of the Sherman Act *Section 1* (Claim 2), had attempted to monopolize the market in violation of the Sherman Act *Section 2* (Claim 3), had conspired to monopolize the market in violation of the Sherman Act *Section 2* (Claim 4), and that the acquisition of Meade by Ningbo Sunny and Sunny Optics harmed competition in violation of the Clayton Act *Section 7* (Claim 5). *Ibid.* The jury found that Orion suffered $14 million in damages for each of the Sherman Act claims and $16.8 million for the *Clayton Act* Claim. *Ibid.*

After the verdict, Sunny Optics and Meade entered bankruptcy and the litigation was stayed as to them. Dkt. Nos. 511, 512. On December 5, 2019, the Court entered a partial judgment against Ningbo Sunny on Plaintiff's damages claims awarding Plaintiff $50,400,000 in accordance with the verdict's award of $16,800,000 as trebled pursuant to *15 U.S.C. §15(a)*. Dkt. No. 518. On February 21, 2020, Plaintiff filed a motion for equitable relief and judgment on its UCL claim. Dkt. No. 583 ("Motion"). Defendant opposes the motion. Dkt. No. 596 ("Opposition").

On April 3, 2020, the Court partially granted Defendant's Motion to Alter or Amend Judgment (Dkt. No. 534) and simultaneously **[*4]** granted Plaintiff's Motion for Attorneys' Fees and Costs (Dkt. No. 558). On the same day, the Court issued an Amended Partial Judgment (Dkt. No. 630), which amended the damages to $52,030,371.73 plus post-judgment interest, in accordance with the post-trial motions. The Court denied Ningbo Sunny's Renewed Motion for Judgment as a Matter of Law (Dkt. No. 556) and Motion for a New Trial (Dkt. No. 557). The Court now considers Plaintiff's motion for a permanent injunction and its request for judgment on the remaining UCL claim.

II. Discussion

A. Plaintiff's Request For a Permanent Injunction Under *Section 16*

Under *Section 16* of the Clayton Act, courts have the power to grant injunctive relief for violations of the antitrust laws. *15 U.S.C. § 26* (authorizing "[a]ny person . . . [to] have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity"). Where a violation of law has already been established, injunctive relief should be granted if "there exists some cognizable danger of recurrent violation." *Fed. Trade Comm'n v. Qualcomm Inc., 411 F. Supp. 3d 658, 812 (N.D. Cal. 2019)* (granting injunctive **[*5]** relief under the FTC Act after the court found violations of the FTC and Sherman Acts) (citing *United States v. W.T. Grant Co., 345 U.S. 629, 633, 73 S. Ct. 894, 97 L. Ed. 1303 (1953)*.

In general, "[t]o obtain permanent injunctive relief, a plaintiff must show (1) that it has suffered an irreparable injury; (2) that remedies available at law, such as monetary damages, are inadequate to compensate for that injury; (3) that, considering the balance of hardships between the plaintiff and defendant, a remedy in equity is warranted; and (4) that the public interest would not be disserved by a permanent injunction." *California ex rel. Lockyer v. U.S. Dep't of Agric., 575 F.3d 999, 1019-20 (9th Cir. 2009)* (internal quotations and citations omitted).

These four elements apply when considering relief under *Section 16* of the Clayton Act. The Supreme Court has stated that *Section 16*, "which was enacted by the Congress to make available equitable remedies previously denied private parties, invokes traditional principles of equity." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 131, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*; *15 U.S.C. § 26* (injunctive relief is authorized "when and under the same conditions and principles as injunctive relief . . . is granted by courts of equity"). The traditional principles of equity call for the four-step analysis above. *eBay Inc., v. MercExchange, L.L.C., 547 U.S. 388, 391, 126 S. Ct. 1837, 164 L. Ed. 2d 641 (2006)* ("According to well-established principles of equity, a plaintiff seeking a permanent injunction must satisfy a four-factor test before **[*6]** a court may grant such relief.").

"The party seeking an injunction 'has the general burden of establishing the elements necessary' to obtain relief." *BladeRoom Grp. Ltd. v. Emerson Elec. Co., No. 5:15-CV-01370-EJD, 2019 U.S. Dist. LEXIS 38826, 2019 WL 1117537, at *2 (N.D. Cal. Mar. 11, 2019)* (citing *Klein v. City of San Clemente, 584 F.3d 1196, 1201 (9th Cir. 2009))*. Ultimately, "[t]he decision to grant or deny permanent injunctive relief is an act of equitable discretion by the district court." *eBay, Inc., 547 U.S. at 391*.

i. Irreparable Injury and Inadequacy of Monetary Damages

The first two elements are significantly interrelated. "Irreparable harm may be established where there is the fact of an injury, such as that arising from a breach of contract, but where there is an inability to ascertain the amount of damage." *DVD Copy Control Ass'n, Inc., 176 Cal. App. 4th at 722*. "In other words, to say that the harm is irreparable is simply another way of saying that pecuniary compensation would not afford adequate relief or that it would be extremely difficult to ascertain the amount that would afford appropriate relief." *Ibid.* Therefore, the Court considers the first two elements together.

Plaintiff raises three arguments regarding irreparable harm. First, Plaintiff argues that it "is suffering from irreparable and non-compensable harm because Defendant is engaged in a judgment avoidance scheme." Mot. at 12. **[*7]** Defendant argues that Plaintiff's allegations regarding Defendant's post-judgment conduct are irrelevant to the injunctive relief Plaintiff seeks under *Section 16*. Opp. at 6-8. The Court agrees that the equitable relief to which Plaintiff is entitled under *Section 16* is not meant to provide a remedy for Defendant's post-judgment misconduct. A permanent injunction cannot be ordered merely because the requesting party did not receive the full extent of the legal relief it sought. *See* *BladeRoom Grp. Ltd., No. 15-cv-01370, 2019 U.S. Dist. LEXIS 38826, 2019 WL 1117537, at *3*. To the extent that Defendant's post-judgment misconduct demonstrates an unwillingness to cease its anti-competitive behavior, however, such misconduct offers evidence that the legal violations established at trial are ongoing or likely to recur. These allegations thus weigh in favor of finding a threat of irreparable injury.

Plaintiff next argues that Defendant's violations of antitrust laws have caused structural harm to the U.S telescope market and that such injury will become irreparable if Defendant intentionally puts Meade out of business. Defendant does not directly address this argument. The Court agrees with Plaintiff that Defendant's decision to forego profit by refusing to supply products **[*8]** to its own wholly-owned subsidiary evidences Defendant's intent to unlawfully restrain competition. *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 409, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* ("The unilateral termination of a voluntary *(and thus presumably profitable)* course of dealing suggest[s] a willingness to forsake short-term profits to achieve an anticompetitive end.") (quoting *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 610-11, 105 S. Ct. 2847, 86 L. Ed. 2d 467*

(1985) (emphasis in original). The jury found that Defendant's acquisition of Meade created a reasonable likelihood of substantially lessening competition or creating a monopoly, and the Court finds that eliminating Meade as a competitor entirely would achieve a similar result by over-concentrating the telescope market. Such an injury to the market would be irreparable.

Defendant argues that this potential injury to Plaintiff and to the market is merely speculative. To support a permanent injunction under Section 16, however, it is enough to show "threatened loss or damage by a violation of the antitrust laws" if injunctive relief is not granted. 15 U.S.C. § 26; Zenith Radio Corp., 395 U.S. at 130 ("section 16 . . . authorizes injunctive relief upon the demonstration of 'threatened' injury. That remedy is characteristically available even though the plaintiff has not yet suffered actual injury."). In any event, the jury expressly found that Plaintiff did suffer actual **[*9]** injury here. *See, e.g.*, Verdict Form, Dkt. No. 501 at 5. The jury's verdict and the evidence on which it was based are sufficient to demonstrate that the threat of irreparable injury to the market is more than speculative.

Finally, Plaintiff argues that "[i]f the structural problems caused by Defendant go uncorrected, Orion faces the danger of losing its business." Mot. at 12. Defendant contends that Plaintiff has not shown that it actually risks losing its business, and that the loss of Plaintiff's business would be a "purely monetary injury." Opp. at 8 (citing Colorado River Indian Tribes v. Town of Parker, 776 F.2d 846, 850-51 (9th Cir. 1985).

The Court finds that Plaintiff has shown sufficient evidence that its business would be threatened with extinction in the absence of injunctive relief. At trial, Orion presented evidence, without objection from Defendant, that if Defendant continues its anticompetitive conduct, Orion would go out of business. *See, e.g.*, Trial Tr. at 1771:21-23 (Q. And do you have any concerns about what will happen to Orion in the event that you don't receive that relief? A. They're going to kill us.); *id.* at 2499:24-2500:2 (discussing Defendant's lack of objection to evidence of Plaintiff's financial distress). This evidence is sufficient to show that **[*10]** Plaintiff faces the threat of going out of business. *See* hiQ Labs, Inc. v. LinkedIn Corp., 938 F.3d 985, 993 (9th Cir. 2019) (finding "ample support" for the asserting that the survival of the plaintiff's business was threatened absent an injunction, where the plaintiff's CEO made statements that without injunctive relief, the business would have to "lay off most if not all its employees, and shutter its operations.").

The threat to Plaintiff's business is sufficient to establish irreparable harm. Am. Passage Media Corp. v. Cass Commc'ns, Inc., 750 F.2d 1470, 1474 (9th Cir. 1985) ("The threat of being driven out of business is sufficient to establish irreparable harm."). "[T]he loss of . . . an ongoing business representing many years of effort and the livelihood of its . . . owners, constitutes irreparable harm. What plaintiff stands to lose cannot be fully compensated by subsequent monetary damages." hiQ Labs, Inc., 938 F.3d at 993 (quoting Roso-Lino Beverage Distributors, Inc. v. Coca-Cola Bottling Co. of New York, Inc., 749 F.2d 124, 125-26 (2d Cir. 1984) (per curiam)). Defendant cites Colorado River Indian Tribes to support its argument that the loss of business would be a purely monetary injury. That case is inapposite. In that case, the plaintiff did not face the threat of being driven out of business, but rather the threat of loss of income due to a tax increase. Colorado River Indian Tribes, 776 F.2d at 851.

ii. Balance of Hardships

In determining whether to grant Plaintiff's motion for a permanent injunction, **[*11]** the Court also considers the balance of the hardships to the parties. Taleff v. Sw. Airlines Co., 828 F. Supp. 2d 1118, 1123 (N.D. Cal. 2011), *aff'd*, 554 F. App'x 598 (9th Cir. 2014). When considering injunctive relief, "courts 'must balance the competing claims of injury and must consider the effect on each party of the granting or withholding of the requested relief.'" Winter v. Nat. Res. Def. Council, Inc., 555 U.S. 7, 24, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008) (quoting Amoco Prod. Co. v. Gambell, 480 U.S. 531, 542, 107 S. Ct. 1396, 94 L. Ed. 2d 542 (1987)).

Plaintiff argues that it "will continue to suffer from the effects of Defendant's continuing unlawful behavior, as well as the structural damage Defendant inflicted on the U.S. telescope market, absent the requested relief." Mot. at 13-14. Plaintiff argues that in contrast, the proposed injunction would impose no hardship on Defendant. *Ibid.* In fact, the relief requested—specifically, selling products to Meade and to Plaintiff on non-discriminatory terms—would be profitable for Defendant. *Ibid.* Defendant does not address this factor directly. In arguing that the proposed injunction is overbroad, however, Defendant argues that the injunction would significantly burden the "everyday functions of its business." Opp. at 6.

As discussed above, Plaintiff stands to lose its business if Defendant's misconduct continues. The primary potential burden that Defendant raises is that it would be unable to communicate with one of **[*12]** its customers, Celestron. The Court addresses this concern in Part C below. In comparison to the potential harm to Plaintiff, the potential burden on Defendant's business operations as a result of the injunction ordered herein is slight. Thus, the Court finds that the balance of hardships tilts in favor of Plaintiff.

iii. Public Interest

"Whereas the balance of equities focuses on the parties, '[t]he public interest inquiry primarily addresses impact on non-parties rather than parties,' and takes into consideration 'the public consequences in employing the extraordinary remedy of injunction.'" *hiQ Labs, Inc., 938 F.3d at 1004* (citing *Bernhardt v. Los Angeles Cty., 339 F.3d 920, 931-32 (9th Cir. 2003))*. "By its very nature, the determination that [a defendant] has violated the Sherman Act and that 'the wrongs are ongoing or likely to recur' is a finding that an injunction is in the public interest because it will restrain the defendant from further anticompetitive conduct." *Qualcomm Inc., 411 F. Supp. 3d at 813* (citing *F.T.C. v. Evans Prod. Co., 775 F.2d 1084, 1087 (9th Cir. 1985))*.

In this case, the jury found that Defendant violated *Sections 1* and *2* of the Sherman Act and *Section 5* of the Clayton Act. As discussed in Part (i) above, Defendant's refusal to supply Meade is likely to cause over-concentration of the telescope market. Injunctive relief is necessary to protect the market from over-concentration **[*13]** by preventing Defendant from further violating antitrust laws. The Court, therefore, finds that it is in the public interest to issue an injunction prohibiting Defendant from engaging in conduct previously found to violate the law. *See* *California v. American Stores Co., 495 U.S. 271, 284, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)* ("We have recognized when construing *§ 16* that it was enacted not merely to provide private relief, but . . . to serve as well the high purpose of enforcing the antitrust laws.").

Because the Court finds that Plaintiff has established the prerequisites for injunctive relief, the Court concludes that a permanent injunction is warranted under *Section 16* of the Clayton Act.

B. Plaintiff's Request for Entry of Judgment On UCL Claim

Plaintiff's third cause of action in its amended complaint alleges that Defendant violated California's Unfair Competition Law ("UCL"). First Am. Compl. ¶¶ 139-141. Before trial, the parties agreed that the claim would not be tried before the jury and that the Court should rule on the claim following the jury verdict. Joint Pretrial Conference Statement, Dkt. No. 331, at 20-21 ("The parties agree that Orion's claim under [the UCL] is an equitable claim that should be tried to the bench and not the jury. The parties also agree that the Court should **[*14]** rule on Orion's UCL claim after the jury has returned its verdict."). Plaintiff now seeks judgment and relief on this claim. Defendant did not raise any arguments in opposition.

"The UCL broadly prohibits 'any unlawful, unfair or fraudulent business act or practice.'" *Alvarez v. Chevron Corp., 656 F.3d 925, 933 (9th Cir. 2011)*; quoting *Cal. Bus. & Prof. Code § 17200*). "By proscribing any unlawful business practice, [the UCL] borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (citation and internal quotation marks omitted). Thus, the "unlawful" prong of the statute prohibits "anything that can properly be called a business practice and that at the same time is forbidden by law." *Ibid.*

"[I]n a case where legal claims are tried by a jury and equitable claims are tried by a judge, and the claims are 'based on the same facts,' in deciding the equitable claims 'the *Seventh Amendment* requires the trial judge to follow the jury's implicit or explicit factual determinations.'" *Los Angeles Police Protective League v. Gates, 995 F.2d 1469, 1473 (9th Cir. 1993)* (quoting *Miller v. Fairchild Indus., 885 F.2d 498, 507 (9th Cir. 1989)*, *cert. denied*, *494 U.S. 1056, 110 S. Ct. 1524, 108 L. Ed. 2d 764 (1990))*. The jury in this case concluded that Defendant violated the Sherman Act *Sections 1* and *2* as well as the Clayton Act *Section 7*. The jury's findings as to Defendant's violations of law are sufficient to demonstrate that Defendant's conduct **[*15]** was "unlawful" under the UCL. *Planned Parenthood Fed'n of Am., Inc. v. Ctr. for Med. Progress, 214 F. Supp. 3d 808, 836 (N.D. Cal. 2016)* ("[B]ecause I conclude that plaintiffs have adequately alleged violations of other federal and state laws, plaintiffs have adequately pleaded the basis for an unlawful UCL claim.") *aff'd*, *890 F.3d 828 (9th Cir. 2018)*, *amended*, *897 F.3d 1224 (9th Cir. 2018)*, and *aff'd*, *735 F. App'x 241 (9th Cir. 2018)*.

Plaintiff has adequately proven its UCL claim and the Court will enter judgment in favor of Plaintiff. The UCL empowers a court to issue injunctions for violations of the UCL. *Cal. Bus. & Prof. Code § 17203*. The standard for injunctive relief under the UCL is less demanding than the standard under *Section 16*. *See* *Haas Automation, Inc. v. Denny, No. 12-cv-4779 (CBM), 2014 U.S. Dist. LEXIS 89860, 2014 WL 2966989, at *9 (C.D. Cal. Jul. 1, 2014)* (stating that under the UCL, plaintiff need only show "the elements of a cause of action involving the wrongful act sought to be enjoined and . . . the grounds for equitable relief, such as, inadequacy of the remedy at law.") (quoting *City of S. Pasadena v. Dep't of Transp., 29 Cal. App. 4th 1280, 1293, 35 Cal. Rptr. 2d 113 (1994))*. The Court finds that injunctive relief is warranted under the UCL for the reasons discussed in Part A above.

C. The Scope of the Injunction

The Supreme Court instructs "that a remedies decree in an antitrust case must seek to 'unfetter a market from anticompetitive conduct,' to 'terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain **[*16]** no practices likely to result in monopolization in the future.'" *United States v. Microsoft Corp., 253 F.3d 34, 103, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (quoting *Ford Motor Co. v. United States, 405 U.S. 562, 577, 92 S. Ct. 1142, 31 L. Ed. 2d 492 (1972)*, and *United States v. United Shoe Mach. Corp., 391 U.S. 244, 250, 88 S. Ct. 1496, 20 L. Ed. 2d 562 (1968))*; *see also* *United States v. U.S. Gypsum Co., 340 U.S. 76, 88, 71 S. Ct. 160, 95 L. Ed. 89, 1951 Dec. Comm'r Pat. 580 (1950)* (an antitrust remedy must, "so far as practicable, cure the ill effects of the illegal conduct, and assure the public freedom from its continuance"). Thus, it is "entirely appropriate" for a court to order an injunction "beyond a simple proscription against the precise conduct previously pursued." *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 698, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. The relevant question is "whether the relief represents a reasonable method of eliminating the consequences of the illegal conduct." *Ibid.*; *accord* *Fed. Trade Comm'n v. Grant Connect, LLC, 763 F.3d 1094, 1105 (9th Cir. 2014)*.

District courts are "clothed with large discretion to fit the decree to the special needs of the individual case." *Ford, 405 U.S. at 573* (internal quotations omitted); *see also* *Zenith Radio Corp., 395 U.S. at 131 (1969)* ("*Section 16* should be construed and applied . . . with the knowledge that the remedy it affords, like other equitable remedies, is flexible and capable of nice 'adjustment and reconciliation between the public interest and private needs as well as between competing private claims.'") (quoting *Hecht Co. v. Bowles, 321 U.S. 321, 329-330, 64 S. Ct. 587, 88 L. Ed. 754 (1944))*; *California ex rel. Lockyer, 575 F.3d at 1020* ("In determining the scope of an injunction, a district court has broad latitude, and it must balance the equities between the parties and give due regard to the public interest.") (quoting *Geertson Seed Farms v. Johanns, 570 F.3d 1130, 1136 (9th Cir.2009))*.

Plaintiff requests an **[*17]** order requiring Defendant to:

1. Supply Meade at non-discriminatory (*i.e.*, most-favored-customer) terms for five years;
2. Supply Orion at non-discriminatory terms for five years;
3. Refrain from communicating with Synta about the prices of telescopes and accessories;

4. Refrain from sharing customer information with Synta, including but not limited to statistics about which products Defendant's customers are buying, how much Defendant is charging for those products, and the volume of purchases from Defendant;
5. Refrain from communicating with Synta about which products Defendant and Synta will manufacture; and
6. Refrain from participating in any internal meetings or strategy sessions in which any representative from a competitor, including David Shen or any employee of Synta, is in attendance.

Mot. at 10. The Court considers each request in turn.

Plaintiff requests that Defendant be ordered to supply both Meade and Orion at non-discriminatory terms for a period of five years. Defendant argues that the Court may not impose an injunction forcing it to do business with any entity or dictate the terms of any business transaction. Opp. at 4. Defendant cites *Verizon Communications Inc. v. Law Offices* ***[*18]*** *of Curtis V. Trinko, LLP ("Trinko")* in support of this argument. *540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. In *Trinko*, the Supreme Court considered whether the plaintiff had stated a claim under *Section 2* of the Sherman Act for refusing to deal with competitors. *Trinko* did not address whether and to what extent a mandatory injunction may be appropriate to remedy an actual violation of law.

In cases that did involve injunctive relief, the Supreme Court has repeatedly "upheld injunctions issued pursuant to *§ 16* regardless of whether they were mandatory or prohibitory in character." *American Stores Co., 495 U.S. at 283-84 (1990)* (affirming district court's power to grant divestiture by requiring defendant to sell certain assets); *see also* *Zenith Radio Corp., 395 U.S. at 129-33* (reinstating injunction that required defendants to withdraw from patent pools); *Silver v. New York Stock Exchange, 373 U.S. 341, 345, 365, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963)* (reinstating judgment for defendants in suit to compel installation of wire services); *Pacific Coast Agricultural Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196, 1200-01, 1208-09 (9th Cir.1975)* (affirming an injunction enjoining defendant from "refusing to sell [products] to any qualified exporters" and providing a formula for determining the price of those products), *cert. denied*, *425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)*.

Defendant also argues that the word "non-discriminatory" renders the relief impermissibly vague and that enforcement of such a term would require extensive oversight by the Court. Opp. at 2. As Plaintiff points **[*19]** out, the Ninth Circuit expressly approved an injunction using the term "non-discriminatory" in *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195 (9th Cir. 1997)* (explaining that "requiring nondiscriminatory pricing" was necessary to end the defendant's monopoly). Plaintiff specifies that the term "non-discriminatory" means that "Defendant should only be able to charge Meade and Orion the same price it charges to Celestron and its other customers." Reply, Dkt. No. 608, at 7. The Court finds that this explanation gives Defendant adequate notice of what the Court intends to require. *Fed. R. Civ. Proc. 65(d)(1)*; *E. & J. Gallo Winery v. Gallo Cattle Co., 967 F.2d 1280, 1297 (9th Cir. 1992)* ("Injunctions are not set aside under *Rule 65(d)* unless they are so vague that they have no reasonably specific meaning.").

The Court concludes that requiring Defendant to supply Plaintiff and Meade at non-discriminatory terms for a period of five years is a reasonable method of remedying the harm to Plaintiff caused by Defendant's attempted monopolization and of ensuring that Defendant's violations of ***antitrust law*** do not recur. *See* *Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 698* (District Courts are "empowered to fashion appropriate restraints on [a defendant's] future activities both to avoid a recurrence of the violation and to eliminate its consequences."); *see also* *Bresgal v. Brock, 843 F.2d 1163, 1170-71 (9th Cir. 1987)* ("[A]n injunction is not necessarily made over-broad **[*20]** by extending benefit or protection to persons other than prevailing parties in the lawsuit—even if it is not a class action—if such breadth is necessary to give prevailing parties the relief to which they are entitled.").

Plaintiff next requests that Defendant be ordered to refrain from communicating with "Synta" about the prices of telescopes and accessories and about which products Defendant and Synta will manufacture. Similarly, Plaintiff requests that Defendant be ordered to refrain from sharing customer information with Synta, including information about which products customers are buying at what price and in what volume. Defendant argues that each of these proposed orders would impermissibly limit lawful conversations with its customer, Celestron, and force Defendant to "completely re-alter its business operations." Opp. at 5. For example, Defendant argues that prohibiting it from communicating with Synta about the prices of telescopes and accessories "would effectively mean Defendant can never again conduct business with Celestron." Opp. at 6.

Defendant's argument hinges on the fact that Plaintiff's proposed order would prevent Defendant from communicating with Celestron. The Court agrees with **[*21]** Defendant that prohibiting communications between Defendant and its primary customer, Celestron, would burden lawful conduct unrelated to the underlying offense. *See* *E. & J. Gallo Winery, 967 F.2d at 1297* (courts "must insure that [an injunction] is tailored to eliminate only the specific harm alleged."). Neither party clearly defines which of the many entities involved in this case are included when they reference "Synta." The Court will order Defendant to refrain from communicating about the topics outlined below with Suzhou Synta Optical Technology Co. Ltd ("Suzhou Synta") and Synta Technology Corp. ("Synta Tech") only, so as to not unduly restrain Defendant's communications with Celestron.

The Court also shares Defendant's concern that the topics about which it would be prevented from communicating are overbroad. Plaintiff presented evidence at trial that Defendant engaged in improper communications with certain Synta entities regarding the price of telescopes and accessories, customer information, and planned production, among other topics. Nevertheless, the Court can also imagine communications between Defendant and its competitors about the price or sale of products that would be entirely lawful. For the sake of **[*22]** clarity, the Court will enjoin this activity only to the extent it violates, or contributes to a violation of, antitrust laws.

Finally, the Court finds Plaintiff's final request—that Defendant refrain from "internal meetings or strategy sessions in which any representative from a competitor . . . is in attendance"—to be overbroad. Mot. at 10. While the jury found evidence of a conspiracy between Defendant and Synta, there was no evidence to suggest that Defendant participated in any conspiracy or unlawful activity with other competitors. The Court finds that Defendant should only be restrained from communicating with the competitors for which Plaintiff presented evidence of conspiracy. Moreover, as Defendant points out, the relief requested is unclear as to what constitutes an "internal meeting or strategy session." Opp. at 6. While Defendant should be prohibited from discussing internal business strategy with certain competitors, the Court finds that this result can be achieved by limiting communications instead of meetings.

III. Conclusion and Order

Based on the foregoing reasons, Plaintiff's motion for a permanent injunction and judgment on its UCL claim is **GRANTED**. Pursuant to *Federal Rule of Civil Procedure 65(d)*, **IT IS HEREBY [*23] ORDERED** as follows:

1. Defendant shall supply Meade at non-discriminatory terms for five years;
2. Defendant shall supply Orion at non-discriminatory terms for five years;
3. Defendant shall refrain from communicating with Suzhou Synta and Synta Tech, about the following, to the extent such communication violates, or contributes to the violation of, antitrust laws:
    a. the prices of telescopes and accessories;
    b. customer information, including but not limited to statistics about which products Defendant's customers are buying, how much Defendant is charging for those products, and the volume of purchases from Defendant;
    c. which products Defendant or Synta will manufacture; and
    d. Defendant's or Synta's internal business strategy.

This Court shall retain jurisdiction over any and all issues arising from or related to the enforcement of this permanent injunction, the implementation of this Order or the interpretation of this Order.

Because this Order represents a final resolution of all the claims against Defendant Ningbo Sunny, the Court will enter Final Judgment. The parties are ordered to submit joint status reports every six months regarding the progress of the related bankruptcy proceedings **[*24]** against defendants Sunny Optics and Meade.

IT IS SO ORDERED.

Opinion

REPORT AND RECOMMENDATION

I. INTRODUCTION

Presently before the court in this Hatch-Waxman patent infringement action is the motion of defendants and counterclaim plaintiffs Mylan Pharmaceuticals Inc. and Mylan Inc. (collectively, "Mylan") to enforce the Settlement and License Agreement dated July 17, 2012 (the "Agreement"), **[*2]** which was entered into between Mylan and plaintiffs and counterclaim defendants Somaxon Pharmaceuticals, Inc. ("Somaxon") and ProCom One, Inc. ("ProCom").[1] (D.I. 290) For the following reasons, I recommend that the court GRANT Mylan's motion to enforce the Agreement.

II. BACKGROUND

Somaxon was the holder of approved New Drug Application ("NDA") No. 22-036 for Silenor00AE; doxepin hydrochloride tablets in 3 mg and 6 mg doses. (D.I. 20 at ¶ 28) Silenor00AE; is used to treat insomnia characterized by difficulties with sleep maintenance. (D.I. 1 at ¶ 23) Silenor00AE; is covered by a number of patents listed in the Orange Book, including United States Patent No. 6,211,229 ("the '229 patent"), entitled "Treatment of Transient and Short Term Insomnia," and United States Patent No. 7,915,307 ("the '307 patent"), entitled "Methods of Improving the Pharmacokinetics of Doxepin." (D.I. 1 at ¶ 25) Somaxon had an exclusive license to the '229 and '307 patents. (D.I. 20 at ¶ 40)

On November 2, 2010, Mylan notified Somaxon and ProCom that it had submitted an Abbreviated New Drug Application ("ANDA") with a paragraph IV certification for the '229 patent, among others. (D.I. 20 at ¶¶ 45-48; D.I. 1 at ¶ 28) By filing the ANDA, Mylan indicated its intent to market, manufacture, and sell a generic version of Silenor00AE; before the expiration **[*3]** of the '229 patent. (D.I. 1 at ¶ 28) In response, Somaxon and ProCom sued Mylan for infringement of the '229 patent on December 15, 2010. (D.I. 1) Somaxon separately sued Mylan for infringement of the '307 patent on June 28, 2011. (C.A. No. 11-571-RGA, D.I. 1)

On July 17, 2012, the parties executed the Agreement, which awarded Mylan the semiexclusive right to sell an authorized generic version of Silenor00AE; 3 mg and 6 mg doxepin hydrochloride for a period of 180 days beginning on January 1, 2020 (the "AG License Initial Period"). (D.I. 292, Ex. 1 at § 5.1(a)) Mylan's rights under Section 5.1(a) of the Agreement are "semi-exclusive" because Somaxon and ProCom "may grant one (1) additional License for the AG License Initial Period to a product that is AB rated to Silenor 3 mg and 6 mg doxepin hydrochloride tablets, but such product shall not be an Authorized Generic Product." (*Id.*) Actavis was granted the right to launch the AB-rated generic version of Silenor00AE; beginning on January 1, 2020, and the record reflects that Actavis' generic product is currently on the market.[2] (D.I. 303 at ¶ 18; 3/3/2020 Tr. at 6:4-14)

---

[1] The briefing and other filings related to the pending motion can be found at D.I. 291, D.I. 292, D.I. 302, D.I. 303, D.I. 304, and D.I. 306.

[2] An AB-rated drug is a generic drug certified by the FDA to be bioequivalent to the branded drug, and it must have the same form, dosage, and strength as the branded drug. *See* *Abbott Labs. v. Teva Pharms. USA, Inc., 432 F. Supp. 2d 408, 415 (D. Del. 2006)*. In contrast, an authorized generic drug is a branded drug that is marketed, sold, and distributed "under a different labeling, packaging, . . . product code, labeler code, trade name, or trade mark than the listed drug." *21 U.S.C. § 355(t)(3)(B)*; *see also* *In re Zetia (Ezetimibe) Antitrust Litig., 2019 U.S. Dist. LEXIS 59469, 2019 WL 1397228, at *14 (E.D. Va. Feb. 6, 2019)*, *report and recommendation adopted*, *400 F. Supp. 3d 418 (E.D. Va. 2019)* (explaining that authorized generic drugs are approved under the brand's NDA, whereas AB-rated generic drugs are approved under a competitor's separate ANDA). The 180-day generic exclusivity period awarded to the first ANDA filer under the Hatch-Waxman Act does not prevent a brand manufacturer from launching an authorized generic product or licensing its product to another company to sell an authorized generic to compete with the ANDA product during the exclusivity period. *See* *21 U.S.C. § 355(j)(5)(B)(iv)*; *In re Loestrin 24 Fe Antitrust Litig., 814 F.3d 538, 543 (1st Cir. 2016)* ("[T]he generic manufacturer may still face competition from a generic version of the drug produced by the brand manufacturer, also known as an authorized generic ('AG'), at any time, including during the exclusivity period.").

Following the execution of the Agreement, the Supreme Court **[*4]** issued its decision in *FTC v. Actavis, Inc.*, which changed the legal landscape regarding the enforceability of reverse payments in Hatch-Waxman-related settlement agreements. *570 U.S. 136, 141, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. The Supreme Court explained that a reverse payment settlement arises when "A, the plaintiff, pays money to defendant B purely so B will give up the patent fight." *Id. at 152*. The Supreme Court observed that, in such a scenario, "a party with no claim for damages (something that is usually true of a paragraph IV litigation defendant) walks away with money simply so it will stay away from the patentee's market." *Id.* The Supreme Court held that reverse payments violate principles of ***antitrust law*** when they seek to prevent competition: "If the basic reason is a desire to maintain and to share patent-generated monopoly profits, then, in the absence of some other justification, the antitrust laws are likely to forbid the arrangement." *Id. at 158*.

The Third Circuit subsequently extended the Supreme Court's ruling in *FTC v. Actavis* to non-monetary reverse payments. *See, e.g.,* *In re Lipitor Antitrust Litig., 868 F.3d 231, 252 (3d Cir. 2017)*; *King Drug Co. of Florence, Inc. v. Smithkline Beecham Corp., 791 F.3d 388, 403 (3d Cir. 2015)*, *cert. denied*, *137 S. Ct. 446, 196 L. Ed. 2d 328 (2016)*. Specifically, the Third Circuit held that a brand-name manufacturer's promise not to produce an authorized generic to compete with the generic **[*5]** manufacturer amounted to a non-monetary reverse payment equivalent to the anticompetitive reverse payment at issue in *FTC v. Actavis* because the arrangement had the effect of maintaining supracompetitive prices in the market. *King Drug Co., 791 F.3d at 409-10* ("[A] no-AG agreement, when it represents an unexplained large transfer of value from the patent holder to the alleged infringer, may be subject to antitrust scrutiny under the rule of reason."). The Third Circuit characterized such agreements not as an exercise of the right to grant licenses, but rather as "a right to use valuable licensing in such a way as to induce a patent challenger's delay." *Id. at 406*.

In December 2012, Pernix Therapeutics Holdings, Inc. ("Pernix") entered into an agreement to acquire Somaxon. The acquisition was consummated in March 2013. (D.I. 292, Ex. 2) Pernix filed for Chapter 11 bankruptcy in February 2019. In April 2019, Pernix entered into an amended asset purchase agreement ("APA") with Currax Holdings, LLC. (D.I. 292, Ex. 3 at 6) Pursuant to the APA, Currax Pharmaceuticals LLC, Currax Holdings LLC, and Currax Holdings USA LLC (collectively, "Currax") became Somaxon's successors-in-interest to the Silenor00AE; NDA, the '229 and '307 patents', other patents **[*6]** listed in the Orange Book for Silenor00AE;, and the Agreement. (D.I. 292, Ex. 4 at ¶¶ 15-23; Ex. 5)

In October 2019, Currax informed Mylan of its plan to launch its own AG product on or before January 1, 2020. (D.I. 303 at ¶¶ 4, 14) Currax, questioned the enforceability of the Agreement regarding Silenor00AE;, arguing that the Agreement raised antitrust issues. (*Id.* at ¶¶ 12-14) On December 16, 2019, Currax and/or its subsidiary, Macoven Pharmaceuticals, L.L.C. ("Macoven"), began marketing doxepin hydrochloride 3 mg and 6 mg oral tablets at a wholesale acquisition cost ("WAC") of $349.20 per package of 30 tablets. (D.I. 292, Ex. 6) Mylan learned of Macoven's marketing activity on December 20, 2019 and filed the pending motion to enforce the Agreement three days later. (D.I. 290)

III. LEGAL STANDARD

A district court has jurisdiction to enforce a settlement agreement in a case pending before it. *See* *Hobbs & Co. v. Am. Inv'rs Mgmt., Inc., 576 F.2d 29, 33 & n.7 (3d Cir. 1978)*; *Leonard v. Univ. of Del., 204 F. Supp. 2d 784, 786 (D. Del. 2002)*. A motion to enforce a settlement agreement closely resembles a motion for summary judgment and employs a similar standard of review. *See* *Tiernan v. Devoe, 923 F.2d 1024, 1031-32 (3d Cir. 1991)*; *Parker-Hannifin Corp. v. Schlegel Elec. Materials, Inc., 589 F. Supp. 2d 457, 461 (D. Del. 2008)*. Therefore, the court will "view the underlying facts and all reasonable inferences therefrom in the light most favorable to the party opposing the **[*7]** motion." *Pennsylvania Coal Ass'n v. Babbitt, 63 F.3d 231, 236 (3d Cir. 1995)*. When material facts are in dispute, the court should hold an evidentiary hearing before enforcing the settlement agreement. *See* *Tiernan, 923 F.2d at 1031*. Principles of contract law govern the enforcement of settlement agreements. *See* *Jacob's Limousine Transportation, Inc. v. City of Newark, 688 F. App'x 150, 151 (3d Cir. 2017)*; *Parker-Hannifin Corp. v. Schlegel Elec. Materials, Inc., 589 F. Supp. 2d 457, 461 (D. Del. 2008)*. If the court determines that the nonmovant breached a duty created by a binding agreement and the breach caused the movant to suffer damages, the court must grant the motion to enforce. *See Sheet Metal Workers Int'l Ass'n Local Union No. 27, AFL-CIO v. E.P. Donnelly, Inc., 737 F.3d 879, 900 (3d Cir. 2013)*. The moving party bears the burden of proving by a preponderance of the evidence that the nonmoving party breached a duty under the terms of the Agreement. *Jacob's Limousine, 688 F. App'x at 153 n.2*.

IV. ANALYSIS

As a preliminary matter, the parties do not dispute that this court has jurisdiction to resolve the pending motion to enforce the Agreement in accordance with the Consent Judgment and Dismissal Order, which provides that "[t]his Court retains jurisdiction over the parties for purposes of enforcing this Order." (D.I. 234 at 2)

A. Enforceability of the Agreement

1. Existence and enforceability of a no-AG provision

Currax alleges that Section 5.1(a) of the Agreement is not enforceable because it contains a "no-authorized generic" ("no-AG") term that is anticompetitive and unlawful under the antitrust laws. (D.I. 302 at 9-14) Mylan **[*8]** challenges Currax's characterization of Section 5.1(a) as a no-AG provision because the provision explicitly allows Mylan to launch an authorized generic in addition to the permitted third-party launch of an AB-rated licensed generic of Silenor00AE; to compete with Mylan's authorized generic and the brand drug. (D.I. 306 at 1-2, 4-5)

Section 5.1(a) of the Agreement does not contain a no-AG provision because it expressly permits Mylan to market an authorized generic with the brand company's permission: "Plaintiff hereby grants to Mylan . . . a semi-exclusive . . . license under the Licensed Patents, to offer for sale and sell the Mylan Authorized Generic Product." (D.I. 292, Ex. 1 at § 5.1(a)) The Third Circuit has defined a no-AG agreement as "a brand-name manufacturer's promise not to produce an authorized generic to compete with the generic manufacturer" during the 180-day exclusivity period guaranteed to the first-filing generic manufacturer under the Hatch-Waxman Act. *In re Lipitor Antitrust Litig., 868 F.3d 231, 252 (3d Cir. 2017)*; *see King Drug Co. of Florence, Inc. v. Smithkline Beecham Corp., 791 F.3d 388, 393 (3d Cir. 2015)*, *cert. denied*, *137 S. Ct. 446, 196 L. Ed. 2d 328 (2016)*. But in this case, Currax licensed Mylan to produce an authorized generic to compete with Actavis' AB-rated generic product during the 180-day generic exclusivity period:

> [B]y semi-exclusive, it is meant that Plaintiffs may grant **[*9]** one (1) additional License for the AG License Initial Period to a product that is AB rated to Silenor 3 mg and 6 mg doxepin hydrochloride tablets, but such product shall not be an Authorized Generic Product. For the further avoidance of doubt, Plaintiffs and their Affiliates shall not, and shall not license, encourage, or otherwise authorize any Third Party to, offer for sale, market, or sell an Authorized Generic Product before or during the AG License Period."

(D.I. 292, Ex. 1 at § 5.1(a); D.I. 303 at ¶ 18) According to the Federal Trade Commission, Currax's license to Mylan to produce the authorized generic does not change the resulting product to something other than an authorized generic: "An authorized generic may be marketed by the brand name drug company, or another company with the brand company's permission." *In re Impax Labs., Inc.*, 2019 WL 1552939, at *3 n.5 (F.T.C. Mar. 28, 2019). Because Section 5.1(a) authorizes Mylan to manufacture and sell an authorized generic to compete with Actavis' AB-rated generic product during the 180-day exclusivity period, the provision lacks the key features of a no-AG clause.

Regardless, the relevant case authorities do not support Currax's position that Section 5.1(a) contains an illegal non-monetary reverse payment on its face. (D.I. 302 at 11) **[*10]** Courts have recognized that a no-AG term may constitute a non-monetary reverse payment subject to scrutiny under the antitrust laws. *See King Drug Co. of Florence, Inc. v. Smithkline Beecham Corp., 791 F.3d 388, 411 (3d Cir. 2015)* (observing that a no-AG promise may amount to a non-monetary reverse payment if restrictions on authorized generic competition are exchanged for settlement of litigation to eliminate the risk of invalidation or noninfringement).[3] But these courts have declined to reach a final determination of the illegality of a no-AG clause prior to conducting the fact-intensive "rule of reason" analysis to assess whether the reverse payment will result in anticompetitive harm.[4] *See* id. at 412 ("The Court does not foreclose other justifications, and we need not decide today what those other justifications might be."); In re Zetia Ezetimibe Antitrust Litig., 2019 U.S. Dist. LEXIS 59469, 2019 WL 1397228, at *13, 20 (E.D. Va. Feb. 6, 2019) ("[A]pplication of a per se rule would appear to preclude a mechanism for even examining the Defendants' proffered justifications for [reverse payment] settlement;" therefore, rule of reason analysis should apply); In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 245 (D. Conn. 2015) (observing that a reverse payment settlement, "under *Actavis*, is not *ipso facto* unlawful" and may have procompetitive justifications). The Supreme Court made clear that "the likelihood of a reverse payment bringing about anticompetitive effects depends **[*11]** on its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." Actavis, 570 U.S. at 159.

The Third Circuit has held that, "to prove anticompetitive effects, the plaintiff must prove payment for delay, or, in other words, payment to prevent the risk of competition." *See* King Drug Co. of Florence, Inc. v. Smithkline Beecham Corp., 791 F.3d 388, 412 (3d Cir. 2015), *cert. denied*, *137 S. Ct. 446, 196 L. Ed. 2d 328 (2016)*. But Currax offers no support for its position that enforcement of Section 5.1(a) would lead to anticompetitive harm. In its briefing on the issue, Currax identifies the anticompetitive harm as "Mylan's attempt to remove a competitor from the market."[5] (D.I. 302 at 9) Currax further explains that "Currax would be agreeing with its horizontal competitor, Mylan, not to launch a product Currax has a right to sell." (*Id.* at 11) But Section 5.1(a) of the Agreement does not remove a competitor from the market. In fact, Section 5.1(a) permits competition among Currax's branded product, Mylan's authorized generic product, and Actavis' AB-rated generic product during the 180-day exclusivity period. Section 5.1(a)'s reallocation of Currax's right to market an authorized generic product to Mylan does not amount to a suppression **[*12]** of the right to market an authorized generic product, and it has no demonstrated negative impact on competition during the exclusivity period.

Currax does not dispute the fact that most of the no-AG cases it cites involved only one generic drug competing in the market against the brand-name drug during the 180-day exclusivity period. *See* In re Loestrin 24 Fe Antitrust

---

[3] Currax addressed the Third Circuit's decision in *King Drug Co.* in its briefing as follows: "The Third Circuit found that a settlement agreement in which a generic manufacturer is awarded an exclusive license to launch an authorized generic product functions as an illegal reverse payment—withholding valid competition to delay generic entry." (D.I. 302 at 11) This statement is inaccurate. First, the Third Circuit did not find the no-AG term to be an illegal reverse payment under the antitrust laws. Instead, the Third Circuit held that the pleading adequately alleged facts to support the survival of the allegation at the pleading stage. King Drug Co., 791 F.3d at 409 ("We believe plaintiffs' allegations, and the plausible inferences that can be drawn from them, are sufficient to state a rule-of-reason claim under *Twombly* and *Iqbal* on the ground that GSK sought to induce Teva to delay its entry into the lamotrigine tablet market by way of an unjustified no-AG agreement."). Second, the no-AG provision in the settlement agreement authorized Teva to launch a generic, as opposed to an authorized generic as suggested by Currax—the purpose of the no-AG clause was to prohibit the launch of an authorized generic during Teva's 180 days of generic exclusivity. Id. at 393-94 ("They agreed Teva would end its challenge to GSK's patent in exchange for early entry into the $50 million annual lamotrigine chewables market and GSK's commitment not to produce its own, 'authorized generic' version of Lamictal tablets for the market alleged to be worth $2 billion annually."). Third, although the brand manufacturer characterized the no-AG agreement as an "exclusive license," the Third Circuit declined to adopt this characterization: "We do not believe the no-AG agreement was in fact an 'exclusive' license. However, since the issue of whether such agreement is an exclusive license is not necessary for our decision here, we will leave its determination for another day." Id. at 406 n.27.

[4] In the context of reverse payments, courts performing the rule of reason analysis must consider "antitrust factors such as likely anticompetitive effects, redeeming virtues, market power, and potentially offsetting legal considerations present in the circumstances, such as here those related to patents." FTC v. Actavis, 133 S. Ct. at 2231.

[5] Currax does not address the other forms of competitive harm that may arise from a no-AG provision in a settlement agreement, such as avoidance of the risk of patent invalidation or a finding of noninfringement, or an extended monopoly for the brand company if the generic company's entry date is later than the entry date the generic company would have otherwise accepted. King Drug Co., 791 F.3d at 405 (quoting Actavis, 133 S. Ct. at 2236).

Litig., 814 F.3d at 546 (Warner agreed not to market, supply, or license an authorized generic version of Loestrin 24 during Watson's generic exclusivity period); In re Zetia Ezetimibe Antitrust Litig., 2019 U.S. Dist. LEXIS 59469, 2019 WL 1397228, at *8 (Merck agreed to delay launching an authorized generic version of Zetia during Glenmark's exclusivity period); FWK Holdings, 2017 U.S. Dist. LEXIS 224737, 2017 WL 11449668, at *3 (Actavis agreed to delay the entry of its generic in exchange for Shire's functional agreement not to launch an authorized generic version of Intuniv during the exclusivity period); In re Opana ER Antitrust Litig., 162 F. Supp. 3d at 713 (Endo agreed not to launch an authorized generic version of Opana ER during Impax's generic exclusivity period); In re Niaspan Antitrust Litig., 42 F. Supp. 3d at 744 (Kos agreed not to launch an authorized generic version of Niaspan during Barr's generic exclusivity period); Teikoku Pharma, 74 F. Supp. 3d at 1070 (Endo/Teikoku agreed not to release an authorized generic to compete with Watson's generic during the exclusivity period). In these cases, "[t]he **[*13]** no-AG agreement transfers the profits the patentee would have made from its authorized generic to the settling generic—plus potentially more, in the form of higher prices, because there will now be a generic monopoly instead of a generic duopoly." King Drug Co., 791 F.3d at 405. In contrast, Section 5.1(a) expressly permits Mylan to launch an authorized generic to compete with Actavis' AB-rated generic and Currax's brand-name version of Silenor00AE;. (D.I. 292, Ex. 1 at § 5.1(a)) The "generic duopoly" is preserved, and there can be no concern that "the patentee seeks to induce the generic challenger to abandon its claim with a share of its monopoly profits that would otherwise be lost in the competitive market." Actavis, 133 S. Ct. at 2235. This reallocation of the right to market an authorized generic product, as opposed to a suppression of the right to market an authorized generic product, does not reduce competition during the exclusivity period.

Relying on the District of Connecticut's decision in *In re Aggrenox Antitrust Litigation*, counsel for Currax suggests that an agreement not to license a third generic product may constitute an anticompetitive no-AG agreement even if the brand maintains its right to sell an authorized generic and the settlement agreement **[*14]** licenses a generic product. (3/3/2020 Tr. at 25:3-23) Currax represents that *In re Aggrenox* involved a situation in which the generic company was awarded a license to launch a generic, but the settlement agreement also gave brand manufacturer Boehringer the right to launch an authorized generic through its generic subsidiary, Roxane.[6] (*Id.*) In fact, the defendants disputed the issue of whether Boehringer had the right to launch an authorized generic during the 180-day generic exclusivity period: "First, and quite notably, the defendants do not agree among themselves whether the challenged settlement agreement actually does prevent Boehringer from introducing an authorized generic: by Boehringer's interpretation, it does not; but by Barr's reckoning it does." In re Aggrenox Antitrust Litig., 94 F. Supp. 3d at 244.

Ultimately, the court held, "I need not determine how who is correct by ruling on the construction of the agreement, but the plaintiffs allege that there is such a provision and that it is very valuable, and at least on the latter point the defendants clearly agree." *Id.* The focus of the court's decision in *In re Aggrenox* was on whether the reverse payment was made to avoid the risk of patent invalidation. Id. at 243, 245 (analyzing a reverse payment of $4

[6] Currax represents that Roxane did, in fact, launch an authorized generic product during the 180-day exclusivity period: "And in fact, it did that. It actually did launch an authorized generic through the relevant time period. And the parties briefed that." (3/3/2020 Tr. at 25:14-17) The briefing in the case is heavily redacted, and the court was unable to substantiate the launch of an authorized generic by Roxane during the exclusivity period. The operative complaint suggests that Boehringer declined to launch an authorized generic because of the settlement agreement:

> On information and belief, BI has launched at least four authorized generics between 1999 and 2012. On information and belief, in at least two of those instances, BI launched an authorized generic through its subsidiary Roxane Laboratories, Inc. On information and belief, these two launches were not the result of the settlement of patent litigation involving the presumed FTF. On information and belief, BI would have launched an **[*15]** authorized generic version of Aggrenox upon market entry by Barr/Teva in the absence of the anticompetitive agreement here.

(D. Conn. C.A. No. 3:14-md-2516, D.I. 97 at ¶ 71; *see also* D.I. 194 at 15 ("Had Barr not accepted the payments and delayed entry, it would have faced stiff competition from Boehringer's authorized generic version of Aggrenox and six months later from other generic entrants."); D.I. 149 at 47 (arguing that "BI retained the freedom to introduce an AG through its generic affiliate Roxane," without suggesting that Roxane in fact launched an authorized generic during the exclusivity period)). Regardless, the court did not acknowledge the existence of two competing generics in its decision.

million cash plus over $120 million in royalties in addition to non-cash consideration). The court explained that, if the brand manufacturer avoids the invalidation of weak patents by entering into a settlement agreement, it can extend its monopoly by paying the generic manufacturer to delay the generic's market entry. *Id. at 234*. Thus, the inquiry focuses on the avoidance of patent invalidation by the brand manufacturer:

> The plaintiffs do not appear to allege that "no-authorized generic" agreements are *per se* unlawful, nor that any individual feature of the settlement agreement would have constituted an antitrust violation as **[*16]** part of some other agreement. Rather, they allege that Boehringer gave much more than it got in the settlement agreement; and under *Actavis*, that can constitute an antitrust violation if it did so in order to avoid the risk of patent invalidation.

Id. at 245. In contrast, the only anticompetitive harm alleged by Currax on the present motion is the alleged reduction in the number of generic competitors during the exclusivity period. (3/3/2020 Tr. at 21:4-6; 26:19-23) For the reasons previously discussed, there is no such restriction on competition in the present case.

Having recommended that Section 5.1(a) is enforceable because it does not fit the definition of a no-AG clause and it has not been shown to reduce competition, the court need not reach the question of severability under Section 12.4 of the Agreement, which provides that the remainder of the Agreement "will be valid and enforceable to the fullest extent permitted by applicable law" even if one provision is "held to be invalid or unenforceable." (D.I. 292, Ex. 1 at § 12.4)

2. California reverse payment legislation

Currax also contends that Section 5.1(a) of the Agreement is invalid and unenforceable because California law now prohibits no-AG restraints in reverse payment settlements. **[*17]** (D.I. 302 at 14) California's new legislation regarding reverse payment settlements, which went into effect on January 1, 2020, provides that

> an agreement resolving or settling, on a final or interim basis, a patent infringement claim, in connection with the sale of a pharmaceutical product, shall be presumed to have anticompetitive effects and shall be in violation of this section if both of the following apply:
> (A) A nonreference drug filer receives anything of value from another company asserting patent infringement, including, but not limited to, an exclusive license or a promise that the brand company will not launch an authorized generic version of its brand drug.
> (B) The nonreference drug filer agrees to limit or forego research, development, manufacturing, marketing, or sales of the nonreference drug filer's product for any period of time.

Cal. Health & Safety Code § 134002(a)(1) (West 2020). *Section 134002* does not render Section 5.1(a) of the Agreement invalid or unenforceable for at least three reasons.

First, Currax has not shown that the statute applies retroactively. "In California, [i]t is an established canon of interpretation that statutes are not to be given a retrospective operation unless it is clearly made to appear that such was the **[*18]** legislative intent." *Gadda v. State Bar of Calif., 511 F.3d 933, 937 (9th Cir. 2007)* (quoting *Aetna Cas. & Sur. Co. v. Indus. Accident Comm'n, 30 Cal.2d 388, 182 P.2d 159 (Cal. 1947)* (internal quotation marks omitted)); *see also* *Evangelatos v. Superior Court, 44 Cal. 3d 1188, 246 Cal. Rptr. 629, 642, 753 P.2d 585 (Cal. 1988)* ("[I]n the absence of an express retroactivity provision, a statute will not be applied retroactively unless it is very clear from extrinsic sources that the Legislature or the voters must have intended a retroactive application."). Neither the text of the statute nor the legislative history suggests that *Section 134002* was intended to apply retroactively. To date, no California state or federal case authorities have issued applying the statute retroactively. Because the parties executed the Agreement on July 17, 2012, and the statute did not go into effect until January 1, 2020, *Section 134002* does not invalidate Section 5.1(a) of the Agreement.

Second, *Section 134002(e)(4)* provides that "[a]n action to enforce a cause of action for a violation of this section shall be commenced within four years after the cause of action accrued." The parties executed the Agreement on

July 17, 2012, and the statute did not go into effect until January 1, 2020. There can be no dispute that the four-year statute of limitations under the statute has expired in this case.

Third, *Section 134002(e)(1)(B)* provides that "[a]ny penalty . . .shall accrue only to the State of California and shall be recovered in a **[*19]** civil action brought by the Attorney General in its own name . . . against any party to an agreement that violates this section." Consequently, Currax may not invoke the statute in this litigation because there is no private right of action under the California statute.

B. Material Breach

The parties do not dispute that Currax marketed and offered for sale another authorized generic product during the AG License Initial Period: "Currax has made its authorized generic ('AG') version of its Silenor00AE; product, consisting of doxepin tablets in 3 and 6 mg dosage amounts, available to customers." (D.I. 303 at ¶¶ 1-3) Moreover, the parties do not dispute that Currax's conduct violates Section 5.1(a) of the Agreement, which grants Mylan a "semiexclusive" license to market and sell its authorized generic product without competition from another authorized generic. (D.I. 292, Ex. 1 at § 5.1(a)) Section 5.1(a) of the Agreement expressly prohibits the award of a license for another authorized generic product before or during the AG License Initial Period. (*Id.*)

Mylan contends that Currax's marketing and sale of its authorized generic of Silenor00AE; amounts to a material breach of Section 5.1(a) of the Agreement because Mylan negotiated to obtain **[*20]** 180 days of semi-exclusivity to market and sell its authorized generic, as evidenced by contemporaneous press releases. (D.I. 291 at 10-11; D.I. 306 at 3) In response, Currax challenges Mylan's assertion that the 180-day term of generic semi-exclusivity is similar to the statutory exclusivity period for generics in the absence of the Agreement, noting that ANDA filers are not entitled to 180 days of generic exclusivity when they settle their patent cases and launch under a license from the patent holder. (D.I. 302 at 15) Even if Mylan could establish that Section 5.1(a) is material to the Agreement, Currax contends that this would confirm the term was a reverse transfer of considerable value from the patentee to the alleged infringer, rendering it void and unenforceable under the antitrust laws. (*Id.*)

The record before the court supports a finding that the semi-exclusivity provision of Section 5.1(a) is material to the Agreement. Mylan negotiated for the right to market and sell an authorized generic during Actavis' generic exclusivity period without competition from Currax's authorized generic. (3/3/2020 Tr. at 15:16-24) The press releases accompanying the Agreement confirm that Mylan's rights under Section 5.1(a) were material **[*21]** to its execution of the Agreement. (D.I. 292, Ex. 1 at Ex. B)

C. Harm Resulting from Breach

In its briefing, Mylan contends that it is entitled to monetary damages in the form of lost revenues, loss of market share, price erosion, and loss of customer goodwill as a result of Currax's breach of the Agreement. (D.I. 291 at 11) Mylan represents that it is also entitled to specific performance of the Agreement and, accordingly, Currax should be required to pull its Silenor00AE; AG product off the market. (D.I. 306 at 10) At oral argument, Mylan limited its present request to specific performance of the Agreement to stop Currax's unauthorized sales of its authorized generic product and reserved its right to seek monetary compensation at a later time. (3/3/2020 Tr. at 13:5-15; 18:1-11)

I recommend that the court grant Mylan's request for specific performance of the Agreement and order Currax to cease sales of its authorized generic product for the duration of the AG License Initial Period. For the reasons previously stated, Currax breached Section 5.1(a) in a manner that deprived Mylan of a material benefit of the Agreement.

V. CONCLUSION

For the foregoing reasons, I recommend that the court GRANT Mylan's **[*22]** motion to enforce the Agreement and order Currax to cease sales of its authorized generic product for the duration of the AG License Initial Period. (D.I. 290)

Given that the court has relied upon material that technically remains under seal, the court is releasing this Report and Recommendation under seal, pending review by the parties. In the unlikely event that the parties believe that certain material in this Report and Recommendation should be redacted, the parties shall jointly submit a proposed redacted version by no later than **April 16, 2020**, for review by the court, along with a motion supported by a declaration that includes a clear, factually detailed explanation as to why disclosure of any proposed redacted material would "work a clearly defined and serious injury to the party seeking closure." *See In re Avandia Mktg., Sales Practices & Prods. Liab. Litig., 924 F.3d 662, 672 (3d Cir. 2019)* (quoting *Miller v. Ind. Hosp., 16 F.3d 549, 551 (3d Cir. 1994)* (internal quotation marks omitted)). If the parties do not file a proposed redacted version and corresponding motion, or if the court determines the motion lacks a meritorious basis, the documents will be unsealed within thirty (30) days of the date the Report and Recommendation issued.

This Report and Recommendation is filed pursuant to *28 U.S.C. § 636(b)(1)(B)*, *Fed. R. Civ. P. 72(b)(1)*, and *D. Del. LR 72.1*. The parties may serve **[*23]** and file specific written objections within fourteen (14) days after being served with a copy of this Report and Recommendation. *Fed. R. Civ. P. 72(b)(2)*. The objection and responses to the objections are limited to ten (10) pages each. The failure of a party to object to legal conclusions may result in the loss of the right to de novo review in the District Court. *See Sincavage v. Barnhart, 171 F. App'x 924, 925 n.1 (3d Cir. 2006)*; *Henderson v. Carlson, 812 F.2d 874, 878-79 (3d Cir. 1987)*.

The parties are directed to the court's Standing Order For Objections Filed Under *Fed. R. Civ. P. 72*, dated October 9, 2013, a copy of which is available on the court's website, http://www.ded.uscourts.gov.

Opinion

ORDER ON PLAINTIFF'S MOTION (DOC. 30) TO STRIKE SEVERAL AFFIRMATIVE DEFENSES OF DEFENDANT VIRGINIC LLC

Pursuant to *Federal Rule of Civil Procedure 12(f)*, Plaintiff Virgin Enterprises Limited ("Plaintiff") moves to strike the majority of what Defendant Virginic LLC ("Virginic") pleads as affirmative defenses in its answer and counterclaims (doc. 27): nos. 1-4, 6-12, 15, 16, 18, 20, and 23-26. In response, Virginic withdrew its affirmative defenses nos. 6, 8, 20 and 23. It otherwise opposes the motion. Doc. 32. Plaintiff did not reply. As follows, the Court grants the motion in part and denies **[*2]** in part.

I. Pleading Standards for Defenses and Standards for Rule 12(f) Motions.

"The court may strike from a pleading an insufficient defense or any redundant, immaterial, impertinent or scandalous matter." Fed. R. Civ. P. 12(f). Plaintiff argues the challenged affirmative defenses are insufficient defenses.

> Rule 8 prescribes the rules of pleading. Defenses are subject to three provisions with[in] Rule 8: 1) the defense must be stated "in short and plain terms" (Rule 8(b)(1)(A)); 2) "any avoidance or affirmative defense" must be affirmatively stated (Rule 8(c)(1)); and 3) the defense "must be simple, concise, and direct" (Rule 8(d)(1)).

Michaud v. Greenberg & Sada, P.C., No. 11-CV-01015-RPM-MEH, 2011 U.S. Dist. LEXIS 77521, 2011 WL 2885952, at *2 (D. Colo. July 18, 2011). Thus, "[a]n affirmative defense is insufficient if, as a matter of law, the defense cannot succeed under any circumstance." *Id.* (citing Unger v. U.S. West, Inc., 889 F. Supp. 419 (D. Colo. 1995)). *See also* Sinclair Wyo. Refinery Co. v. A&B Builders, Ltd, No. 15-CV-91-ABJ, 2018 U.S. Dist. LEXIS 226760, 2018 WL 4677793, at *5 (D. Wyo. Jan. 23, 2018), *recon. denied*, 2018 U.S. Dist. LEXIS 231392 , 2018 WL 4697067 (D. Wyo. Apr. 3, 2018).

The Tenth Circuit has not ruled whether to change course and instead apply the plausibility standards of Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) and Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) to affirmative defenses. Many courts within the Tenth Circuit have declined to do so. *See, e.g.,* Dorato v. Smith, 163 F. Supp. 3d 837, 882 (D.N.M. 2015) Cooper v. City of Alva, No. CIV-19-148-G, 2019 U.S. Dist. LEXIS 189027, 2019 WL 5653217, at *1, n.1 (W.D. Okla. Oct. 31, 2019); Michaud, 2011 U.S. Dist. LEXIS 77521, 2011 WL 2885952.

Given the relatively lenient standards for pleading defenses, motions to strike "are generally disfavored, but **[*3]** within [the] sound discretion of the court. A motion to strike seeks a drastic remedy. ... They are rarely granted. ... If there is any doubt whether the pleading should be stricken, it should be resolved in favor of the non-moving party." Sinclair Wyoming, 2018 U.S. Dist. LEXIS 226760, 2018 WL 4677793, at *5 (citations and internal quotation marks omitted). *See also* Michaud, 2011 U.S. Dist. LEXIS 77521, 2011 WL 2885952, at *2 (applying same standard).

> The purpose of Rule 12(f) is to save time and expenses that would be spent litigating issues that will not affect the outcome of the case. United States v. Shell Oil Co., 605 F. Supp. 1064, 1085 (D. Colo. 1985). ... Wright and Miller have recognized that motions to strike pleadings under Rule 12(f) should generally be denied[,] * * * often being considered purely cosmetic or "time wasters."

Hockaday v. Aries Logistics, Inc, No. 14-CV-260-J, 2015 WL 13752620, at *2 (D. Wyo. Aug. 20, 2015) (citing 5C C. Wright & A. Miller, *Federal Practice & Procedure Civil* § 1382 (3d. ed. 2004)).

II. Analysis

A. Affirmative Defense No. 1: Failure to State a Claim

Virginic's first affirmative defense asserts that the amended complaint fails to state a claim for relief. Plaintiff takes issue with this defense because it is not actually an affirmative defense but rather a defense that should be presented in a motion to dismiss, not an answer. Although this is an ordinary, general denial and not one of the defenses that Rule 8(c) requires to **[*4]** be pled affirmatively, pleadings in this district frequently state it as a defense or affirmative defense. "Although some courts will strike denials or other theories that have been mislabeled as affirmative defenses, the Court concludes the better practice is not [to] do so unless the moving party demonstrates prejudice." *Fed. Trade Comm'n v. Affiliate Strategies, Inc.*, No. 09-4104-JAR, 2010 WL 11470103, at *7 (D. Kan. June 8, 2010) (footnote omitted). Plaintiff does not identify how having this general denial pled as an affirmative defense would add breadth to discovery or otherwise prejudice Plaintiff. The Court declines to strike the first affirmative defense.

B. Affirmative Defense No. 2: Fair, Nominative or Descriptive Use

Virginic's second affirmative defense asserts the "doctrines of fair use, nominative fair use, and/or descriptive use." Plaintiff argues:

> The fair use defense "permits the use of a name or term, other than as a trademark, that is descriptive and is used fairly and in good faith only to describe the goods." *Beer Nuts, Inc. v. Clover Club Foods Co., 711 F.2d 934, 937 (10th Cir. 1983)* (emphasis in original). However, this defense is "not available if the alleged descriptive use is in fact a trademark use." *Id.* A "trademark use" is use of a term "to identify the source of [a producer's] goods **[*5]** to the public and to distinguish those goods from others." *Id. at 938*; *see also Sara Lee Corp. v. Sycamore Family Bakery Inc., 2:09CV523DAK, 2009 U.S. Dist. LEXIS 100554, 2009 WL 3617564, at *4 (D. Utah Oct. 27, 2009)*. Here, there is no genuine dispute that Virginic uses the VIRGINIC Mark as a trademark, and not "fairly and in good faith only to describe the goods."

Doc. 30. In response, Virginic argues "Plaintiff's contentions with regard to this defense get into the merits of the case" and "[t]here have been allegations raised in the pleadings that the Virginic mark was used in ways beyond the trademark." Doc. 32.

The federal rules permit pleading inconsistently in the alternative. This applies not only to claims but also to defenses. *Fed. R. Civ. P. 8(d)(3)*. Giving reasonable inferences to Virginic, it appears to plead in the alternative that "Virginic" is lawful as a trademark and if it is not, then its use of the word is lawful because it is merely descriptive. Plaintiff does not cite any examples of a court determining the substantive issues raised by its argument on a *Rule 12(f)* motion. *Beer Nuts* was on appeal after a bench trial; *Sara Lee* ruled on a motion for preliminary injunction. The issues raised by these doctrines are not appropriate for resolving on a motion to strike in this case. The **[*6]** Court declines to strike this defense.

C. Affirmative Defense No. 3: Innocent Infringement

The third affirmative defense asserts innocent infringement. Plaintiff argues:

> It is well-settled that trademark infringement is a strict liability offense, and the "innocent infringer" defense is unrelated to liability and instead goes to reducing an award of statutory damages (if at all). *See, e.g., Taubman Co. v. Webfeats, 319 F.3d 770, 775 (6th Cir. 2003)* ("[T]he *Lanham Act* is a strict liability statute."); *Spin Master Ltd. v. Alan Yuan's Store, 325 F. Supp. 3d 413, 421 (S.D.N.Y. 2018)* ("Because the Lanham Act is a strict liability statute, a registrant need not prove knowledge or intent in order to establish liability."); *Live Face on Web, LLC v. Natchez Bd. of Realtors, Inc., 5:17-CV-122-DCB-MTP, 2018 U.S. Dist. LEXIS 38711, 2018 WL 1247880, at *3 (S.D. Miss. Mar. 9, 2018)* ("The affirmative defense of innocent infringement cannot succeed under any set of facts because it is not, in fact, an affirmative defense to infringement liability."). Thus, Virginic's "innocent infringer" defense is not an affirmative defense and there is no set of circumstances in which Virginic's Third Affirmative Defense would bar Virgin's claims.

Doc. 30. In response, Virginic argues in relevant part

> The question of innocent infringement goes to the relief that Plaintiff is seeking. Plaintiff requests relief under *15 U.S.C. § 1117* including all of Virginic's **[*7]** profits, Plaintiff's damages, costs of the action, and attorney's fees. See First Amended Complaint, [Doc. No. 19] prayer for relief, ¶¶ 7 & 9. Plaintiff also asserts a claim under *Wyo. Stat. Ann. § 40-1-115*. First Amended Complaint, Count V.

Doc. 32. Of the cases that Plaintiff cites, only *Live Face* struck an innocent infringer affirmative defense on a *Rule 12(f)* motion. It did so because it deemed this was not an affirmative defense to copyright infringement liability, as it only went to statutory damages. *Live Face* also found that as an ordinary defense, innocent infringement was irrelevant because the plaintiff sought only actual damages.

There is little consensus among the circuits on whether innocent infringement is an affirmative defense. *See, e.g., K. Hansotia & Co. Inc. v. Einalem LLC, No. 0:19-CV-60191-UU, 2019 U.S. Dist. LEXIS 226108, 2019 WL 7708241, at *3 (S.D. Fla. May 13, 2019)*. A sister court within this circuit assumes innocent infringement is an affirmative defense to copyright infringement. *See, e.g., Home Design Servs., Inc. v. Starwood Const., Inc., 801 F. Supp. 2d 1111, 1120 (D. Colo. 2011)*; *Home Design Servs., Inc. v. Trumble, No. 09-CV-00964-WYD-CBS, 2011 U.S. Dist. LEXIS 23031, 2011 WL 843900, at *2 (D. Colo. Mar. 8, 2011)* ("Given that a cautious pleader will often label an argument as an affirmative defense, there is no reason to strike such a denial where the other side is not prejudiced by any redundancy.").

Here, Plaintiff recognizes in its motion **[*8]** that the "innocent infringer" defense applies to statutory damages for trademark infringement. *See also Spin Master Ltd. v. Alan Yuan's Store, 325 F. Supp. 3d 413, 425, n.4 (S.D.N.Y. 2018)* (noting trademark law has adopted a multi-factor analysis from copyright law for determining statutory damages). That a defense only goes to damages does not appear to disqualify it from being an affirmative defense. The Tenth Circuit, for instance, recognizes failure to mitigate damages as an affirmative defense, despite it being a defense only as to damages. *See, e.g., F.D.I.C. v. Oldenburg, 38 F.3d 1119, 1121-22 (10th Cir. 1994)*. In addition, unlike *Live Face*, Plaintiff does not specify whether it seeks only actual damages and not statutory damages. The Court declines to strike this defense.[1]

D. Affirmative Defense No. 4: Trademark Misuse and Unclean Hands, Including Antitrust Violations

Virginic's fourth affirmative defense asserts "doctrines of trademark misuse and unclean hands, including Plaintiff's use of its purported trademarks as instruments of, or in aid of, violations of the antitrust laws." Plaintiff does not seek to strike the trademark misuse and unclean hands defense generally, but only the antitrust portion of this defense.

At the outset, the Court notes the antitrust defense to trademark infringement is largely recognized as **[*9]** more theoretical than actual. It is a defense to the exclusive right to use an "incontestable mark," if "the mark has been or is being used to violate the antitrust laws of the United States." *15 U.S.C. § 1115(b)(7)*. But according to *McCarthy on Trademarks and Unfair Competition*,

> in no final reported decision involving trademark infringement has a court actually refused to enforce a trademark because it was used in violation of ***antitrust law***. Similarly, in private litigation, the courts have refused to invoke the sanction of forfeiture of a trademark as a remedy for an antitrust violation.

6 *McCarthy on Trademarks and Unfair Competition* § 31:91 (5th ed.) (notes omitted). *See also* 1 *Antitrust Adviser* § 6:12, Trademark Misuse (5th ed.) ("in almost every reported instance where the antitrust misuse of a trademark has been raised as a defense, it has been rejected"); *Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 56-57 (2d Cir. 1997)* (citing *Carl Zeiss Stiftung v. V.E.B. Carl Zeiss, Jena, 298 F. Supp. 1309, 1314 (S.D.N.Y. 1969)*, *aff'd in relevant part*, *433 F.2d 686 (2d Cir. 1970))*.

Here, Plaintiff argues two theories for striking the antitrust defense. First, Plaintiff asserts that Virginic lacks standing for such a defense, citing the above section of *McCarthy on Trademarks and Unfair Competition*. The treatise notes that "where the party allegedly infringing a mark is not a licensee and has not been **[*10]** injured by trademark license restrictions allegedly in violation of the antitrust laws, then that party has no standing to assert an antitrust misuse defense," citing *Central Ben. Mut. Ins. Co. v. Blue Cross & Blue Shield Ass'n, 711 F. Supp. 1423, 1434 (S.D. Ohio 1989)*, *aff'd*, *1992 U.S. App. LEXIS 34838 (6th Cir. Dec. 29, 1992)*.

---

[1] Virginic also argues that the innocent infringer defense is allowed pursuant to *15 U.S.C. § 1114(2)*, where "an infringer or violator is engaged solely in the business of printing the mark or violating matter for others and establishes that he or she was an innocent infringer or innocent violator." In that circumstance, the owner of the mark is only entitled to an injunction. But Virginic does not appear to assert in its pleading or brief that it was solely printing the Virginic mark or violating matter for others. This argument is not persuasive.

However, in *Central Benefits* the alleged antitrust violation was in the trademark holder's requirements for licensees. The party asserting the defense in that case was not a licensee, so it lacked standing to raise this as a defense. Here, Virginic states its antitrust defense generically. Its response brief argues that Plaintiff's conduct in violation of ***antitrust law*** "includes" civil litigation and trademark proceedings (U.S. and U.K.). Virginic concludes "[t]he Plaintiff's actions are much larger than simply a single lawsuit and, in the aggregate, show a pattern of commercial abuse against Virginic that rises to the level of antitrust activity." Doc. 32. Thus, the issue here is not a lack of standing — Virginic alleges it has suffered harm from at least Plaintiff's resort to legal protections for its trademarks.

The primary issue with Virginic's antitrust defense is that although Virginic argues it encompasses a "larger pattern" of commercial abuse, the only conduct Virginic actually identifies is Plaintiff's **[*11]** civil litigation and trademark proceedings. Under the *Noerr-Pennington* doctrine, resort to legal protections is immune from antitrust liability unless it is a sham, *i.e.*, "objectively baseless." *Cardtoons, L.C. v. Major League Baseball Players Ass'n, 208 F.3d 885, 889-90 (10th Cir. 2000)*; *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. Plaintiff argues the Court can and should determine now that its claims are not objectively baseless. Plaintiff cites *1-800Contacts, Inc. v. Mem'l Eye, P.A., 2:08-CV-983 TS, 2010 U.S. Dist. LEXIS 23972, 2010 WL 988524, at *1 (D. Utah Mar. 15, 2010)* as striking antitrust-based affirmative defenses because the trademark infringement claim was not objectively baseless.

As *1-800Contacts* concisely states,

> The *Noerr—Pennington* Doctrine is based on both the *Sherman Act* and the right to petition the government. "In recognition of this right, the United States Supreme Court has held that ... organizations are immune from liability under antitrust laws for actions constituting petitions to the government." The Doctrine, therefore, "immunizes from antitrust liability bona fide lobbying and litigation efforts." However, if the litigation is a "sham" there is no immunity. "[L]itigation cannot be deprived of immunity as a sham unless the litigation is objectively baseless." If the litigation is not objectively baseless, it can not **[*12]** be a "sham" regardless of the subjective intent. "To ascertain baselessness, a court must consider whether the litigant had 'probable cause to initiate the legal action.'"

*2010 U.S. Dist. LEXIS 23972, 2010 WL 988524, at *2* (notes omitted).

Plaintiff argues that it brought this action to protect its trademark rights in its VIRGIN Marks. Although Virginic's counterclaims seek to preclude Plaintiff from retaining and enforcing Plaintiff's trademark rights on personal products in the United States, Virginic does not dispute that when Plaintiff filed the complaint (and to the present day), Plaintiff owned the U.S. trademark rights in the VIRGIN marks alleged. Virginic disputes that it is liable on any of Plaintiff's claims, but it does not dispute that it is involved in the conduct that Plaintiff alleges is infringing and otherwise unlawful. The Court also recently denied the motion to dismiss Plaintiff's claims brought by two of the other Defendants. Plaintiff's action against Virginic is not objectively baseless.

In its response, Virginic argues it needs unspecified discovery to show Plaintiff's action is objectively baseless. Virginic does not attempt to explain why discovery would be necessary on this issue. Based on Plaintiff's undisputed **[*13]** allegations noted above, there is no discovery that could show Plaintiff's litigation and trademark proceedings were objectively baseless. In short, the antitrust defense fails as to Plaintiff's action in this Court.

Plaintiff did not specifically address why its *United Kingdom* litigation or the trademark proceedings in both countries were not shams. However, Plaintiff alleges (in both its original and amended complaints) that it won in opposing Virginic's U.K. trademark application and in the U.K. litigation that followed the administrative decision. Plaintiff further alleges that it has filed an opposition to Virginic's U.S. trademark application, which remains pending. The only other trademark proceedings alleged by either Plaintiff or Virginic are the proceedings in which it registered the VIRGIN trademarks at issue on cosmetics and other personal products. In its counterclaims, Virginic asserts Plaintiff abandoned these marks and committed fraud on the U.S. Patent & Trademark Office ("PTO"). But Virginic does not attempt to explain in either its answer or its response brief how Plaintiff's conduct before either the U.K.

trademark office or the PTO with respect to the trademarks **[*14]** at issue was objectively baseless, such that any of those proceedings also violated ***antitrust law***. For this reason, the antitrust defense fails regarding the U.K. litigation and the U.K. and U.S. trademark proceedings as well.[2]

As for allegedly anticompetitive conduct outside of Plaintiff's petitioning activity, Virginic argues that it needs discovery on this issue before the Court should rule on the antitrust defense. If Virginic had brought an antitrust counterclaim, this would not be a sufficient explanation to survive a motion to dismiss under *Twombly*. However, this being an affirmative defense, Virginic was not required to plead facts in support. As the Court notes above, the Tenth Circuit has not yet ruled whether affirmative defenses should be subject to the same plausibility standard as *Twombly* and *Iqbal* require for claims. All that is generally required for a defense to survive a motion to strike is that it could succeed in some circumstance.

Here, the antitrust defense could succeed in *some* theoretical circumstance of direct, competitive harm to Virginic involving the marks at issue but outside of petitioning activity — of which it is purportedly unaware without **[*15]** discovery from Plaintiff. The defense is supported by existing law, albeit slim.

> Since denial of a plaintiff's exclusive right to the use of his trademark is not essential to the restoration of competition, it is not enough merely to prove that merchandise bearing a trademark, however valuable the trademark, has been used in furtherance of antitrust violations. If this is all that were required, any antitrust violation in the distribution of such merchandise would result in a forfeiture of the trademark with a consequent unnecessary frustration of the policy underlying trademark enforcement. An essential element of the antitrust misuse defense in a trademark case is proof that the mark itself has been the basic and fundamental vehicle required and used to accomplish the violation.
>
> *Although the burden of establishing such a direct misuse is a heavy one, it is not insuperable*. For instance, in *Phi Delta Theta Fraternity v. J. A. Buchroeder & Co., 251 F. Supp. 968 (W.D. Mo. 1966)*, it was claimed that after a conspiracy between fraternities and others to monopolize the market in fraternity jewelry had failed, and the conspiracy could not be enforced against independent jewelry manufacturers and dealers, the fraternities began to register their insignia as trademarks for the **[*16]** very purpose of eliminating independent competition, and the court quite properly and understandably concluded that, if these allegations were proven, the trademarks were used as a causal instrumentality to violate the antitrust laws.

Carl Zeiss Stiftung v. V. E. B. Carl Zeiss, Jena, 298 F. Supp. 1309, 1315 (S.D.N.Y. 1969), *modified on other grounds sub nom. Carl Zeiss Stiftung v. VEB Carl Zeiss Jena, 433 F.2d 686 (2d Cir. 1970)* (emphasis added). It bears noting that *Zeiss* found on summary judgment that the antitrust defense failed on the evidence. *Id.*

Courts that have struck the antitrust defense in trademark cases have generally done so because the alleged anticompetitive conduct did not directly use the mark as the vehicle for competitive harm. *See, e.g.*, 6 *McCarthy on Trademarks and Unfair Competition* § 31:91, n.6; *Microsoft Corp. v. Sales Int'l LLC*, No. 1:06-CV-1672-ODE, 2007 WL 9702354, at *8 (N.D. Ga. Jan. 23, 2007). In cases that decline to strike the defense, it appears the defendant generally either pled facts in support (at least to identify what sort of antitrust violation it was alleging) or presented evidence in opposing the motion to strike. For instance, in *Estee Lauder, Inc. v. Fragrance Counter, Inc., 189 F.R.D. 269 (S.D.N.Y. 1999)*, the court declined to strike an antitrust defense because the defendant "provided evidence to support allegations that Plaintiffs have attempted—independently of this lawsuit—to block TFC's participation in the sale of Plaintiffs' **[*17]** products. While the evidence provided is, at best, inconclusive, it suggests the possibility that Plaintiffs are directly attempting to misuse their trademarks for anticompetitive purposes." *Id. at 273*. The court found these were questions to decide only after discovery and on the merits.

Here, Virginic's argument in support of its antitrust defense is just as generic as its pleading. Despite the defense being limited to only direct use of the marks at issue to competitively and directly harm Virginic (*see, e.g., Zeiss*;), Virginic did not present any evidence of anticompetitive conduct. It did not even suggest what kind of

[2] Neither side cites any authority that the *Noerr-Pennington* doctrine would not apply to Plaintiff's petitioning activity outside of the United States.

anticompetitive conduct Plaintiff has allegedly engaged in with the marks at issue. Virginic just says Plaintiff has engaged in a larger pattern of commercial abuse against Virginic, and it needs discovery to determine whether any of it violates the antitrust laws. This is the merest of threads on which to hang an assertion of antitrust violations, even if pled as a defense.

> [I]t is one thing to be cautious before dismissing an antitrust complaint in advance of discovery ... but quite another to forget that proceeding to antitrust discovery can be expensive. As we indicated **[*18]** over 20 years ago in *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528, n. 17, 103 S.Ct. 897, 74 L.Ed.2d 723 (1983)*, *"a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed."*
> * * *
>
> It is no answer to say that a claim just shy of a plausible entitlement to relief can, if groundless, be weeded out early in the discovery process through "careful case management," *post*, at 1975, given the common lament that the success of judicial supervision in checking discovery abuse has been on the modest side.

Twombly, 550 U.S. at 558-59 (emphasis added).

Particularly in the context of a trademark infringement case, there is little or no reason to require an antitrust *counterclaim* to be factually plausible, but allow an antitrust *defense* to proceed without identifying any facts — or even what kind of antitrust violation is alleged. The distinction between counterclaims and affirmative defenses is not always clear. *See, e.g., Adidas Am., Inc. v. Payless Shoesource, Inc., 529 F. Supp. 2d 1215, 1260 (D. Or. 2007)*, *recon. denied*, *540 F. Supp. 2d 1176 (D. Or. 2008)* (antitrust raised as both affirmative defense and counterclaim in trademark infringement case; because the defenses and counterclaims were based on the same factual and legal arguments, the court found both failed for lack of pleading the elements of the antitrust statute asserted). As **[*19]** *Rule 8(c)* recognizes, if a party "mistakenly designates" a counterclaim as a defense, "the court must, if justice requires, treat the pleading as though it were correctly designated." *Fed. R. Civ. P. 8(c)(2)*.[3]

There appears to be a paucity of analysis regarding the appropriate pleading standard for the antitrust defense to trademark infringement. Courts within the Tenth Circuit that decline to extend *Twombly* to affirmative defenses do not appear to address that question with respect to an antitrust defense. The Court has also found no reported cases directly on point outside this circuit. Two cases lend some support for requiring the antitrust defense to trademark infringement to be plausible. In *Rayette-Faberge, Inc v. Riverton Labs., Inc., No. 66 CIV. 2133, 1968 U.S. Dist. LEXIS 12226, 1968 WL 8434, 160 U.S.P.Q. 221 (S.D.N.Y. Dec. 4, 1968)*, the court noted:

> On August 8, 1968, in what may well have been an excessive concern to avoid substantial determinations rested upon mere pleading errors, I denied plaintiff's motion to dismiss a counterclaim and to strike a defense assertedly grounded in the antitrust laws. * * *
>
> *While the answer itself could have been thought to expose this [factual] deficiency on its face, it is now convincingly demonstrated that the antitrust "defense" lacks any suggestion ... that the trademark on which plaintiff sues "has been or is being* ***[*20]*** *used to violate the antitrust laws * * *."* *15 U.S.C. § 1115(b)(7)*. ... [D]efendants attempt in this defense to assert vague, conclusory charges of antitrust misbehavior by the plaintiff. Pressed to make these charges more concrete, defendants have been forced to reveal that they have no basis for charging [it].

*1968 U.S. Dist. LEXIS 12226, [WL] at *1* (emphasis added).

In *Critter Control, Inc. v. Young, No. 3:13-0695, 2014 U.S. Dist. LEXIS 126960, 2014 WL 4411666, at *12 (M.D. Tenn. Sept. 8, 2014)*, *rec. adopted in relevant part*, *2014 U.S. Dist. LEXIS 138346, 2014 WL 4960948 (M.D. Tenn.*

---

[3] Neither party asserts that Virginic mistakenly pled antitrust as a defense instead of a counterclaim. The Court relies on *Rule 8(c)(2)* only as analogous support here.

Sept. 30, 2014), the court reasoned that a trademark owner was entitled to summary judgment on its trademark claim, despite the defendant "rais[ing] the specter of an antitrust defense."

> *The Defendant has not set out a viable antitrust defense*, let alone supported such a defense with evidence that the Plaintiff has used its protected mark for improper antitrust purposes. In essence, all the Defendant has asserted is that the Plaintiff has vigorously sought to protect its rights in its protected mark. However, the good faith enforcement by the plaintiff of its trademark rights does not constitute an antitrust violation or a trademark misuse. See *Alberto—Culver Co. v. Andrea Dumon, Inc., 466 F.2d 705, 711 (7th Cir. 1972)*.

*Critter Control, 2014 U.S. Dist. LEXIS 126960, 2014 WL 4411666 at *12* (emphasis added).

In light of (a) the narrowness of the antitrust defense to trademark infringement, (b) its high potential to embroil the parties in greatly broadened **[*21]** discovery, and (c) there being no logical reason to allow a party to avoid all plausibility requirements simply by denominating this as a defense instead of a counterclaim — the Court concludes the antitrust defense to trademark infringement must be plausible before it can proceed to discovery.[4] In both its answer and its response brief, Virginic's antitrust defense is devoid of fact allegations regarding how Plaintiff has allegedly used its marks at issue outside of petitioning activities in violation of antitrust laws. It does not even suggest what type of anticompetitive conduct is allegedly involved. The antitrust defense is insufficient and is stricken from Virginic's fourth affirmative defense. The remainder of the fourth affirmative defense is not stricken. This ruling does not preclude Virginic from timely moving to amend its answer if it later has factual grounds to assert a plausible antitrust defense or counterclaim.

E. Affirmative Defense No. 7: Failure to Join Necessary Parties

The seventh affirmative defense asserts failure to join necessary parties. Plaintiff argues this is not a defense to trademark infringement, citing *Malibu Media, LLC v. Batz, 12—CV—01953, 2013 U.S. Dist. LEXIS 69052, 2013 WL 2120412, at *4 (D. Colo. Apr. 5, 2013)* **[*22]** , *rec. adopted*, *2013 U.S. Dist. LEXIS 69049, 2013 WL 2115236 (D. Colo. May 15, 2013)* (striking defense in copyright infringement case). Plaintiff further argues that *Rule 19* does not require naming all joint tortfeasors in the same action, citing *Temple v. Synthes Corp., Ltd., 498 U.S. 5, 7, 111 S. Ct. 315, 112 L. Ed. 2d 263 (1990)*.

In its response brief, Virginic cites no authorities in support but argues this "defense would include third parties that are necessary to resolve these claims, depending upon what is shown through discovery and development of the evidence in this case. This amounts to contributory negligence, which is a listed affirmative defense under *Rule 8*." Doc. 32. But Virginic did not plead contributory negligence in this affirmative defense; it pled a failure to join a necessary party. Virginic also points to Plaintiff's other claims and argues failure to join a necessary party is a defense to unfair competition, etc., but this ignores Plaintiff's point that in any kind of tort or tort-like claim, joint tortfeasors are not necessary parties.

Rule 12 recognizes the failure to join a necessary party under *Rule 19* ("Required Joinder of Parties) as a defense. *Fed. R. Civ. P. 12(b)(7)*. However, if the defense cannot succeed in any circumstance based on the type of claims, it should be stricken. Here,

> [t]he question of who must be joined as defendants in patent, copyright, **[*23]** and trademark suits for infringement ... is fairly easy to answer. A suit for infringement may be analogized to other tort actions; all infringers are jointly and severally liable. Thus, plaintiff may choose whom to sue and is not required to join all infringers in a single action.

Ohio State Univ. v. Teespring, Inc., No. 2:14-CV-397, 2015 WL 13016358, at *2 (S.D. Ohio Apr. 13, 2015) (quoting 7 Charles Alan Wright, Arthur R. Miller, Mary Kay Kane, *Federal Practice and Procedure* § 1614 (3d ed. 2001),

---

[4] The Court does not imply that *Twombly* and *Iqbal's* plausibility standards should otherwise apply to affirmative defenses.

footnotes omitted). In *Teespring*, a trademark owner sued only the company operating the website that encouraged third-parties to create and sell t-shirts, some of which the plaintiff alleged were infringing its trademarks. The actual sellers of the infringing goods were not named, and in denying the defendant's motion to dismiss, the court found they were not necessary parties. Several cases find a trademark owner a necessary party in infringement actions, but the Court has seen no reported cases finding another alleged infringer is a necessary party. All of Plaintiff's claims against Virginic are either trademark infringement or tort-like. The seventh affirmative defense would not succeed in any circumstance, and it is therefore stricken. This **[*24]** does not preclude Virginic from filing a motion, after conferral, if it later identifies a non-party whom it believes is a necessary party under *Rule 19* consistent with the analysis above.

F. Affirmative Defenses Nos. 9, 11, 12, 15, 16 and 18: Denials or Affirmative Defenses?

Plaintiff argues these affirmative defenses "are mere denials of Virgin's claims and do not constitute defenses," let alone affirmative defenses. Doc. 30. These defenses assert Virginic "is not jointly or severally liable" (Ninth); Virgin "does not have valid enforceable rights in its purported trademarks" (Eleventh); Virgin "lacks standing required to assert some or all of its claims" (Twelfth); Virginic "is not liable for the conduct of any of its current or former employees or agents ... [who] acted outside the scope of their authority" (Fifteenth); Virginic is not liable for the acts of any other third party (Sixteenth); and Virgin's injuries were caused by "intervening causes ... unrelated to the alleged conduct" of Virginic (Eighteenth). Plaintiff characterizes these as arguments on the merits of the amended complaint against Virginic that should not be stated as affirmative defenses. In response, Virginic disagrees **[*25]** and argues these are affirmative defenses because "they raise legal bases for Virginic to avoid liability even if Plaintiff can prove its claims."

The parties' dispute regarding whether these defenses should be pled affirmatively returns to a long-running question that the drafters of *Rule 8(c)* had hoped to short-circuit.

> *Rule 8(c)*, which according to the Note prepared by the Advisory Committee on Civil Rules was modelled after the then existing English and New York provisions, differs from both the common law and code practice in that it makes no attempt to define the concept of affirmative defense. Rather, it obligates a defendant to plead affirmatively any of the nineteen listed defenses he or she wishes to assert; this is necessary even though some of them were not considered to be pleas by way of confession and avoidance at common law. By this technique, *Rule 8(c) represents a conscious effort by the draftsmen of the federal rules to avoid controversy over the question of what technically constitutes an "affirmative defense"* and at the same time make it clear that certain regularly occurring matters must be set forth affirmatively before they will be considered by the district court to be part of the case. **[*26]**

5 Wright & Miller, *Federal Practice & Procedure Civil* § 1270 (3d ed.) (notes omitted; emphasis added).

Since the adoption of *Rule 8(c)*, courts have at times found its approach unsatisfactory and sought to define what an affirmative defense is, once and for all. Plaintiff cites for instance *United States v. Portillo-Madrid, 292 F. App'x 746 (10th Cir. 2008)*. In that case,

> In *Dixon v. United States, 548 U.S. 1, 8, 126 S. Ct. 2437, 165 L. Ed. 2d 299 ... (2006)*, the Supreme Court refers to duress as an affirmative defense and states the common law rule that "the burden of proving affirmative defenses—indeed, all circumstances of justification, excuse or alleviation—rest[s] on the defendant." (internal quotation and alteration omitted). Duress is an affirmative defense, see Black's Law Dictionary (8th ed. 2004) (defining affirmative defense as: "A defendant's assertion of facts and arguments that, if true, will defeat the plaintiff's or prosecution's claim, even if all the allegations in the complaint are true."), although the cases tend to refer to it alternately as an affirmative defense or simply a defense.

Id. at 747 n.1. But as *Rule 8(c)*'s approach suggests, the concept remains fluid.

> Some courts have defined an affirmative defense as a defendant's assertion raising new facts and arguments that, if true, will defeat the plaintiff's claim, even if all allegations in the complaint **[*27]** are true. Other courts have defined an affirmative defense as one that will defeat the plaintiff's claim if it is accepted by the district court or the jury.

Affiliate Strategies, 2010 WL 11470103, at *7 (notes omitted).

However, the distinction between ordinary and affirmative defenses is only important in determining whether a defendant waived a defense by not pleading it affirmatively. The distinction is otherwise unimportant, unless a plaintiff can show prejudice in having other matters pled as though they were affirmative defenses. Plaintiff cites no authority, and the Court is also not aware of any, that precludes a defendant from affirmatively pleading other matters beyond those that *Rule 8(c)* requires, so long as it does not run afoul of *Rule 8*'s requirement of simplicity and concision.

Turning to the specific "affirmative defenses" Plaintiff challenges in this group, Virginic does plead denials as affirmative defenses. This is perhaps inartful and lengthens the answer without adding real substance. However, Plaintiff does not point to any prejudice it will suffer from these denials being pled as though they were affirmative defenses. Because the Court does not wish to encourage motions to strike of this type, the Court declines to strike **[*28]** the ninth, eleventh, twelfth, fifteenth, sixteenth and eighteenth affirmative defenses.

G. Affirmative Defenses Nos. 10, 25 and 26: Fair Notice?

Plaintiff addresses these defenses together as failing to give fair notice. Virginic's tenth affirmative defense asserts that "Plaintiff seeks relief that is not legally cognizable or otherwise equitable as against Defendant." The twenty-fifth affirmative defense "incorporates by reference any defenses applicable to [Virginic] that are asserted or to be asserted by any other Defendant to the First Amended Complaint as if fully set forth herein to the extent Defendant may share in such defense." The twenty-sixth affirmative defense

> reserves and asserts all affirmative and other defenses available under any applicable federal or state law. Defendant presently has insufficient knowledge or information upon which to form a belief as to whether it may have other, as yet unstated, affirmative defenses available. Therefore, Defendant reserve[s] their right to assert additional defenses, counterclaims, crossclaims, and third-party claims in the event that discovery indicates that such additional defenses or claims would be appropriate.

In support of striking **[*29]** these reservation-of-rights as defenses, Plaintiff cites *Lane v. Page, 272 F.R.D. 581, 601 (D.N.M. 2011)* and *Nootbaar v. Alderwoods, Inc., CIV-19-110-D, 2019 U.S. Dist. LEXIS 130766, 2019 WL 3558182, at *4 (W.D. Okla. Aug. 5, 2019)* ("*Rule 15*, rather than a reservation of rights, governs Defendant's ability to add defenses through amendment of a pleading."). In response, Virginic argues that it "understands that the Court will set deadlines for amendment of the pleadings. Virginic's intention with these defenses is to indicate its lack of waiver of adding additional affirmative defenses, including ones asserted by other parties. Striking this largely boilerplate language is unnecessary as it causes no prejudice to Plaintiff."

The tenth affirmative defense appears duplicative, and the twenty-fifth and twenty-sixth are not defenses but reservations of rights. However, the Court declines to strike them for the same reasons Judge Browning stated in later backing away from his decision in *Lane* to strike such:

> The Court affirms its conclusion in *Lane v. Page* that "'[a] reservation of unpled defenses is not a defense of any kind, much less an affirmative one.'" *272 F.R.D. at 601* (quoting *Mission Bay Ski & Bike, 2009 Bankr. LEXIS 2495, at *5, 2009 WL 2913438*). It is not. Where a defendant reserves unpled defences yet also agrees to comply with *rule 15*, however, a motion to strike may be inappropriate. In such a case, **[*30]** the Court cannot conclude that "'under no set of circumstances'" would the reservation of unpled defenses prevail. *Friends of Santa Fe Cty. v. LAC Minerals, Inc., 892 F. Supp. at 1343* (citations omitted). At least in the circumstances of this case, where Corizon Health and Dr. Sisneros have agreed to comply with *rule 15* and

> where there are no other alleged defects with the Corizon Answer, the Court will deny a motion to strike a reservation of unpled affirmative defenses.

*Tavasci v. Cambron, No. CIV 16-0461 JB/LF, 2016 U.S. Dist. LEXIS 147398, 2016 WL 6405896, at *18 (D.N.M. Oct. 25, 2016)*. Given Virginic's agreement to comply with *Rule 15* regarding any new defenses it wishes to argue, these defenses do not appear to prejudice Plaintiff. The Court does not wish to encourage motions of this type because "[a] motion to strike a reservation of defenses does not advance the ball of litigation." *Tanner v. McMurray, 429 F. Supp. 3d 1047, 2019 WL 4740940, at *50-51 (D.N.M. Sept. 27, 2019)*.

H. Affirmative Defense No. 24: Improper, Unfair or Inequitable Venue

Virginic's twenty-fourth affirmative defense asserts improper venue "or there are circumstances that make the prosecution and defense of this action in this forum unfair, inequitable, and inappropriate." Plaintiff argues "venue in this District is proper because the exercise of general personal jurisdiction is appropriate, among other reasons." See *28 U.S.C. § 1391*. Virginic responds **[*31]** that "[t]he defense of improper venue must be asserted in the initial responsive pleading or in a motion to dismiss. Otherwise, it is waived." Doc. 32 (citing *Linde Boc Process Plants LLC v. Boldt Co.*, No. 05-CV-0191-CVE-PJC, 2005 U.S. Dist. LEXIS 54009, at *2-3 (N.D. Okla. July 22, 2005)).

Improper venue is a defense that must be pled in the answer or a motion to dismiss. *Fed. R. Civ. P. 12(h)(1)*. Virginic did not admit Plaintiff's assertion of venue. Doc. 27 Answer ¶ 19. Normally, improper venue is more efficiently raised by a defendant asserting it in a motion to dismiss or motion for judgment on the pleadings. The defense can be waived by conduct. *Thompson v. United States, 312 F.2d 516, 519 (10th Cir. 1962)*. It is of such a character that a defendant should not delay in seeking its resolution. *Cf.*, *Fed. R. Civ. P. 12(h)* 1966 Advisory Committee Note.

The Court is a proper venue under *28 U.S.C. § 1391(b)(3)*. Plaintiff alleges it has personal jurisdiction over Virginic, Virginic Labs, LLC and Paramount 77 Labs, LLC, and none of those Defendants have moved to dismiss to dispute personal jurisdiction. The alleged conduct is nationwide. Plaintiff alleges the other two defendants (Berenika Maciejewicz and Virginic PL Sp z o.o.) are not residents or citizens of this district, and it is unclear at this point whether Virginic, Virginic Labs and Paramount would all be subject to personal **[*32]** jurisdiction in the district where Ms. Maciejewicz is alleged to maintain at least part-time residency (California), "there is no district in which an action may otherwise be brought as provided in this section" *28 U.S.C. § 1391(b)(3)*. The improper venue defense therefore cannot succeed in any circumstance, and it is stricken from the twenty-fourth affirmative defense.

Plaintiff does not appear to challenge the remainder of the twenty-fourth affirmative defense, which asserts "circumstances that make the prosecution and defense of this action in this forum unfair, inequitable, and inappropriate." While it is unnecessary to plead a more convenient forum (*28 U.S.C. § 1404*) or the other doctrines regarding the forum when foreign defendants are involved as affirmative defenses, Plaintiff shows no prejudice in these being pled as such. This part of the twenty-fourth affirmative defense is not stricken.

III. Conclusion

Plaintiff's motion (doc. 30) to strike affirmative defenses is GRANTED IN PART and DENIED IN PART consistent with the foregoing.

IT IS SO ORDERED this 10th day of April, 2020.

2020 U.S. Dist. LEXIS 63779 *; 2020-1 Trade Cas. (CCH) P81,180; 2020 U.S.P.Q.2D (BNA) 10342; 2020 WL 1848047

RONALD CHANDLER, et al., Plaintiffs, v. PHOENIX SERVICES, et al., Defendants.

Subsequent History: Transferred by *Chandler v. Phoenix Servs. LLC, 1 F.4th 1013, 2021 U.S. App. LEXIS 17239 (Fed. Cir., June 10, 2021)*

Affirmed by *Chandler v. Phoenix Servs., L.L.C., 2022 U.S. App. LEXIS 22638 (5th Cir. Tex., Aug. 15, 2022)*

Prior History: *Chandler v. Phoenix Servs. LLC, 2019 U.S. Dist. LEXIS 226909, 2019 WL 7859567 (N.D. Tex., July 22, 2019)*

Core Terms

patent, damages, monopolization, Heating, antitrust, Defendants', inequitable conduct, cease-and-desist, limitations period, enterprise, sham, patent-infringement, subsidiary, concealed, toll, statute of limitations, injurious act, infringement, non-licensed, customers, summary judgment, Sherman Act, licensee, anticompetitive conduct, fracking, fraudulent concealment, ascertainable, website, substantial evidence, allegations

Counsel: **[*1]** For Ronald Chandler, Chandler Mfg., LLC, Newco Enterprises LLC, SuperTherm Heating Services, LLC, Plaintiffs: Theodore G Baroody, LEAD ATTORNEY, Carstens & Cahoon, LLP, Dallas, TX; Don Ross Malone, Malone Law Firm, Vernon, TX.

For Phoenix Services LLC, Mark H Fisher, Defendants: Devan V Padmanabhan, LEAD ATTORNEY, PRO HAC VICE, Padmanabhan & Dawson P.L.L.C., Minneapolis, MN United Sta.

Jeffrey Kaplan, Mediator, Pro se, Dallas, TX.

Judges: Reed C. O'Connor, UNITED STATES DISTRICT JUDGE.

Opinion by: Reed C. O'Connor

Opinion

MEMORANDUM OPINION AND ORDER

Before the Court are Plaintiffs Ronald Chandler's, Chandler Manufacturing, LLC's, Newco Enterprises, LLC's, and Supertherm Heating Services, LLC's (collectively, the "Chandler Plaintiffs") Motion for Partial Summary Judgment, Brief in Support, and Appendix in Support (ECF Nos. 61-63), filed February 13, 2020; Defendants Phoenix Services, LLC's and Mark H. Fisher's (collectively, the "Phoenix Defendants") Response, Brief in Support, and Appendix in Support (ECF Nos. 67-69), filed March 5, 2020; and the Chandler Plaintiffs' Reply (ECF No. 73), filed

March 14, 2020. Also before the Court are the Phoenix Defendants' Motion for Summary Judgment, Brief in Support, and Appendix **[*2]** in Support (ECF Nos. 64-66), filed February 14, 2020; the Chandler Plaintiffs' Response, Brief in Support, and Appendix in Support (ECF Nos. 70-72), filed March 6, 2020; and the Phoenix Defendants' Reply and Appendix in Support (ECF Nos. 74-75), filed March 20, 2020. Having considered the motions, briefing, and applicable law, the Court **DENIES** the Chandler Plaintiffs' Motion for Partial Summary Judgment and **GRANTS** the Phoenix Defendants' Motion for Summary Judgment.[1]

The Chandler Plaintiffs do not have standing to bring their claims against the Phoenix Defendants. Moreover, the Chandler Plaintiffs' claims are barred by the Clayton Act's four-year statute of limitations, and no exception applies to toll the limitations period. Finally, the Chandler Plaintiffs cannot establish Phoenix's or Fisher's liability for HOTF's allegedly anticompetitive conduct. Accordingly, the Chandler Plaintiffs' claims for *Walker Process* fraud and sham patent litigation are **DISMISSED with prejudice**.

I. FACTUAL BACKGROUND

After years of litigation regarding the validity and enforcement of United States Patent No. 8,171,993 (the "'993 Patent"), the Federal Circuit affirmed the District of North Dakota's finding that the '993 Patent is unenforceable due to **[*3]** patent owner Heat On-The-Fly's ("HOTF") inequitable conduct. *See* *Energy Heating, LLC v. Heat On-The-Fly, LLC, 889 F.3d 1291 (Fed. Cir. 2018)*. Relying on the Federal Circuit's ruling, the Chandler Plaintiffs then brought *Walker Process* fraud and sham patent litigation claims against the Phoenix Defendants. *See* First Am. Compl., ECF No. 23. The Chandler Plaintiffs allege that Phoenix and Fisher—HOTF's parent company and CEO, respectively—are liable for HOTF's and their own unlawful attempts to exploit the '993 Patent and unlawfully gain monopoly power. *See id.* To adjudicate the parties' cross motions for summary judgment, the Court must first return to "'the heart' of both this antitrust litigation . . . and several related patent-infringement suits"—the acquisition and enforcement of the '993 Patent. *Chandler v. Phoenix Servs., LLC, 419 F. Supp. 3d 972, 977 (N.D. Tex. 2019)* (quoting First. Am. Compl. ¶ 11, ECF No. 23).

A. HOTF Acquisition and Enforcement of the '993 Patent

In 2006, HOTF founder Ransom Mark Hefley created a fracking[2] process to heat water "on demand or inline" or, as HOTF puts it, to heat water "on-the-fly." First Am. Compl. ¶ 11, ECF No. 23. HOTF began using the process on

---

[1] Were the Court to reach the third and most contested *Sherman Act* element—dangerous probability of achieving monopoly power—it would deny both the Chandler Plaintiffs' and Phoenix Defendants' motions for summary judgment. Based on the differing market analyses of former HOTF employee James Cole ("Cole") and economic expert Allan Jacobs, a jury would need to determine whether the market was susceptible to monopolization and, if so, whether there was a dangerous probability that HOTF would unlawfully achieve market power. *Compare* Pls.' App. Supp. Mot. Partial Summ. J. 22-29, ECF No. 63, *with* Defs.' App. Supp. Mot. Summ. J. 162-88, ECF No. 66. However, due to the Chandler Plaintiffs' lack of standing, failure to file their claims within the Clayton Act's statute of limitations, and inability to establish Phoenix's corporate liability and Fisher's individual liability, the Court need not reach the merits of the Chandler Plaintiffs' antitrust claims.

[2] In previous orders, the Court has adopted the parties' use of "frac" and "fracking" as the abbreviated forms of "fracture" and "fracturing." *See, e.g.*, Mem. Op. & Order, ECF No. 44; Mem. Op. & Order, ECF No. 52. Upon further research, the Court adopts the alternative spelling of "frack." Though "frac" is more common among industry experts, most scientists and academics now use "frack." Jason Lavis, *Fracking Vs Fracing — The End of the Debate*?, DRILLERS.COM (Aug. 22, 2017), https://drillers.com/fracking-vs-fracing-end-debate/. And most persuasively, dictionaries uniformly recognize "frack" but not "frac." *See, e.g.*, MERRIAM-WEBSTER, https://www.merriam-webster.com/dictionary/frac (stating that "the word ['frac'] isn't in the dictionary," and suggesting "frack" as an alternative); MERRIAM-WEBSTER, https://www.merriam-webster.com/dictionary/frack ("The word *fracking* (sometimes spelled *fraccing* or *fracing*, particularly by those in the gas and oil industries) was created by shortening 'fracturing.' The addition of the 'k' brings the word into conformity with the inflected forms of similar English words ending in a vowel plus 'c,' such as *shellacking, panicking*, and *frolicking*."). Adopting the dictionary definition, the Court now uses "frack" except when quoting the parties.

fracking jobs Hefley claimed were "experimental." Pls.' App. Supp. Resp. 17, ECF No. 72. When, on September 18, 2009, Hefley filed an application to patent his "Water Heating Apparatus **[*4]** for Continuous Heated Water Flow and Method for Use in Hydraulic Fracturing," Defs.' App. Supp. Resp. 155, ECF No. 69, Hefley knew he was required to "file within one year" of inventing the process, Pls.' App. Supp. Resp. 14, ECF No. 72. *See also* 35 U.S.C. § 102. Yet, when Hefley filed the first application for the '993 Patent, he failed to disclose the sixty-one frack jobs completed more than a year earlier. *See* Defs.' Br. Supp. Mot. Summ. J. 2, ECF No 65 (citing First Am. Compl. P 11, ECF No. 23); Pls.' App. Supp. Resp. 9, 14, ECF No. 72. On May 8, 2012, the United States Patent and Trademark Office ("USPTO") approved and issued the '993 Patent. Defs.' App. Supp. Resp. 155, ECF No. 69.

During September and October of 2013, HOTF determined that at least seventeen companies were using the patented process without obtaining licenses. Pls.' App. Supp. Mot. Partial Summ. J. 80-113, ECF No. 63. HOTF sent these non-licensed companies cease-and-desist letters stating that HOTF "received information that certain water heating contractors providing water heating services **[*5]** and equipment to [the companies] may be infringing the '993 Patent" and "ask[ing] that [the companies] undertake the necessary steps to ensure that any possible infringement by [their] water heating contractors or subcontractors ceases." Defs.' App. Supp. Mot. Summ. J. 43, ECF No. 66.

Hess Corporation ("Hess"), Supertherm's largest customer, received one such letter. *Id.* Hess informed Supertherm of the letter and continued to hire Supertherm to perform in-line frack water-heating jobs. *Id.* at 55, 117, 208. But Hess also hired two to three additional non-licensed vendors and gradually decreased its work with Supertherm. Pls.' App. Supp. Resp. 329, ECF No. 72. Supertherm was eager to make up the lost business, but it declined to perform jobs for new clients due to fear of potential patent-infringement litigation. *Id.* at 331. Supertherm went out of business in May of 2016, stating "[a] general business decline in that area ma[de] it impossible to justify keeping the office open." Defs.' App. Supp. Mot. Summ. J. 233, ECF No. 66.

B. Phoenix's Purchase of HOTF and Continued Enforcement of the '993 Patent

On January 31, 2014, nearly two years after the '993 Patent issued, Phoenix acquired HOTF. *Id.* at 6. HOTF became a subsidiary of Phoenix Consolidated Oilfield **[*6]** Services, LLC ("Phoenix Consolidated"), which is fully owned by Phoenix. *Id.* at 2. As a Phoenix subsidiary, HOTF is a member-managed limited liability company, meaning "the Board of Directors can direct the business and affairs of, and make decisions for" HOTF. Pls.' Br. Supp. Resp. 138, ECF No. 72. Fisher has remained the head of all three companies, and he and Danny Shurden ("Shurden"), the vice president of Phoenix, are the only two remaining officers of HOTF. Defs.' App. Supp. Mot. Summ. J. 4, ECF No. 66. Thus, though "Heat On-The-Fly legally still exists, . . . it's controlled by Phoenix Services." Pls.' Br. Supp. Mot. Partial Summ. J. 11, ECF No. 62 (emphasis omitted) (quoting Pls.' App. Supp. Mot. Partial Summ. J. 132, ECF No. 63). Phoenix's, Phoenix Consolidated's, and HOTF's finances are all encompassed by a single financial statement. Pls.' App. Supp. Mot. Partial Summ. J. 177, ECF No. 72. Phoenix Consolidated funds HOTF—including by paying its attorneys' fees—because HOTF "has always been [in] a negative cash position" since the acquisition. *Id.* at 88.

Under HOTF's new structure and leadership, HOTF and Phoenix employees continued discussions about the enforcement and validity of the '993 Patent. On **[*7]** February 8, 2014, Fisher emailed one of HOTF's licensees to suggest "having a meeting to discuss the near future of HOTF" and assuring the licensee, "we think very highly of the value of the Patent, and plan to enforce it vigorously." Pls.' Br. Supp. Mot. Partial Summ. J. 8, ECF No. 62 (citing Pls.' App. Supp. Mot. Partial Summ. J. 58-60, ECF No. 63). He signed the email, "Mark Fisher CEO Phoenix Services, LLC." *Id.* During his deposition, Fisher stated that he would "certainly" try to capture the highest market share possible. *Id.* at 9 (quoting Pls.' App. Supp. Mot. Partial Summ. J. 61, ECF No. 63).

On March 10, 2014, a licensee complained to Fisher, Shurden, Cole, and the HOTF attorneys about several non-licensed companies infringing the '993 Patent. Pls.' App. Supp. Resp. 78, ECF No. 72. "Other heating providers . . . have no regard for the patent," the licensee wrote. *Id.* The licensee claimed its non-licensed competitors were "ruining the frac water heating business and . . . making [licensees] look like [they we]re gouging [their] customers when [they] charge[d] standard market rates." *Id.* Given the licensee was "losing work from customers who use[d non-licensed competitors]," the licensee worried **[*8]** that "the longer this [went] on the harder it w[ould] be to get that work back." *Id.*

The patent litigation also continued under Phoenix's ownership. On July 14, 2014, HOTF filed a counterclaim in *Newco Enterprises, LLC v. Super Heaters North Dakota, LLC*, 7:14-CVCase 87-O [hereinafter *Newco*], alleging that Chandler and Newco had "been actively and knowingly inducing infringement of the 993 Patent" by their customers. Defs.' App. Supp. Mot. Summ. J. 46, ECF No. 66. On October 24, 2014, the *Energy Heating* plaintiffs sought to amend their complaint—adding, for the first time, a claim that the '993 Patent was unenforceable due to Hefley's and HOTF's inequitable conduct. *Id.* at 118-29. HOTF also added claims for patent infringement against Energy Heating and against Supertherm in December 2014. *Newco*, 7:14-CV-87-O; *Energy Heating*, 4:13-CV-10-RRE-ARS.

Even after the Federal Circuit affirmed the '993 Patent's invalidity, HOTF and Phoenix continued to assert the '993 Patent. "The website of Phoenix Services, LLC, incorporated a logo for 'Heat On The Fly®' that referred to [the '993 Patent] . . . from in or around February 2018 through approximately January 29, 2019." Pls.' App. Supp. Mot. Partial Summ. J. 27, ECF No. 72; *see also* Defs.' App. Supp. Mot. Summ. **[*9]** J. 149-52, ECF No. 66 (website screenshots). And the *Newco* patent-infringement claims remain stayed but pending in this Court.

II. LEGAL STANDARD

A. Summary Judgment

The Court may grant summary judgment where the pleadings and evidence show "that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. Summary judgment is not "a disfavored procedural shortcut," but rather an "integral part of the Federal Rules as a whole, which are designed to secure the just, speedy and inexpensive determination of every action." *Celotex Corp. v. Catrett, 477 U.S. 317, 327, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*.

"[T]he substantive law will identify which facts are material." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A genuine dispute as to any material fact exists "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id.* The movant must inform the court of the basis of its motion and demonstrate from the record that no genuine dispute as to any material fact exists. *See Celotex, 477 U.S. at 323*. "The party opposing summary judgment is required to identify specific evidence in the record and to articulate the precise manner in which that evidence supports his or her claim." *Ragas v. Tenn. Gas Pipeline Co., 136 F.3d 455, 458 (5th Cir. 1998)*.

When reviewing the evidence on a motion for summary judgment, courts must **[*10]** resolve all reasonable doubts and draw all reasonable inferences in the light most favorable to the non-movant. *See Walker v. Sears, Roebuck & Co., 853 F.2d 355, 358 (5th Cir. 1988)*. The court cannot make a credibility determination in light of conflicting evidence or competing inferences. *Anderson, 477 U.S. at 255*. If there appears to be some support for disputed allegations, such that "reasonable minds could differ as to the import of the evidence," the court must deny the motion. *Id. at 250*.

B. The Sherman Antitrust Act

1. Standing

"Standing to pursue an antitrust suit exists only if a plaintiff shows: 1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit." *Sanger Ins. Agency v. HUB Int'l, Ltd., 802 F.3d 732, 737 (5th Cir. 2015)* (internal citation omitted). "Although the question of causation is generally a factual question for the jury, a court should direct a verdict where the plaintiff has failed to present substantial evidence that defendant's illegal practices were a material cause of plaintiff's injuries." *Taylor Publ'g Co. v. Jostens, Inc., 216 F.3d 465, 485 (5th Cir. 2000)* [hereinafter *Taylor*] (internal citation omitted). "Though jury inferences of causation are in some cases permissible, 'the required causal link must be proved as a matter of fact with **[*11]** a fair degree of certainty.'" *El Aguila Food Prods., Inc. v. Gruma Corp., 131 F. App'x 450, 454 (5th Cir. 2005)* [hereinafter *El Aguila*] (quoting *Alabama v. Blue Bird Body Co., 573 F.2d 309, 317 (5th Cir. 1978))*. This is "especially so" when plaintiffs are damaged by other "salient factors distinct from the challenged conduct." *Id.*

2. Statute of Limitations

Under the *Clayton Act*'s statute of limitations, an antitrust plaintiff must file its complaint within four years of the date the cause of action accrued. *See* *15 U.S.C. § 15(b)*; *Bell v. Dow Chem. Co., 847 F.2d 1179, 1186 (5th Cir. 1988)*. The date of accrual is factual; therefore, to prevail on summary judgment, a defendant must establish there is no genuine issue regarding when the statute of limitations accrued. *In re Beef Indus. Antitrust Litig., 600 F.2d 1148, 1170 (5th Cir. 1979)*.

The Fifth Circuit recognizes three exceptions to toll the Sherman Act's statute of limitations: (1) fraudulent concealment; (2) damages not initially ascertainable; and (3) continuing violation. *See id.*; *Kaiser Alum. & Chem. Sales, Inc. v. Avondale Shipyards, Inc., 677 F.2d 1045, 1051 (5th Cir. 1982)* [hereinafter *Kaiser*]. To demonstrate a defendant's fraudulent concealment, "an antitrust plaintiff must show that the defendants concealed the conduct complained of, and that [it] failed, despite the exercise of due diligence on [its] part, to discover the facts that form the basis of [its] claim." *In re Beef Indus. Antitrust Litig., 600 F.2d at 1169*. To prove that damages are not ascertainable, plaintiffs must prove that both the *existence* and the *amount* of damages are uncertain. *See* *Delta Produce, L.P. v. H.E. Butt Grocery Co., No. SA-12-CA-353, 2013 WL 12121118, at *4 (W.D. Tex. Jan. 17, 2013)* **[*12]** . And to invoke a continuing violation, a new injurious act must occur and its damages must be recoverable. *See* *Zenith Radio Corp. v. Hazeltine Res., Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* [hereinafter *Zenith*].

3. *Walker Process* Patent Fraud

To establish antitrust liability based on the unlawful enforcement of a patent, a claimant must either (1) "prove that the asserted patent was obtained through knowing and willful fraud within the meaning of *Walker Process*," or (2) "demonstrate that the infringement suit was a mere sham." *In re Indep. Serv. Orgs. Antitrust Litig., 203 F.3d 1322, 1326 (Fed. Cir. 2000)* (internal citation omitted). The Supreme Court in *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corporation, 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)* established that "the enforcement of a patent procured by fraud on the Patent Office may be violative of *[§] 2* of the Sherman Act." *Id. at 174*. To succeed on a *Walker Process* claim, a plaintiff must prove two elements: (1) "the antitrust-defendant obtained the patent by knowing and willful fraud on the patent office and maintained and enforced that patent with knowledge of the fraudulent procurement" and (2) the plaintiff can satisfy "all other elements necessary to establish a Sherman Act monopolization claim." *TransWeb, LLC v. 3M Innovative Props. Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)*. As to the first element, the Supreme Court "made clear that the invalidity of the patent [i]s not sufficient; a **[*13]** showing of intentional fraud in its procurement [i]s required." *Ritz Camera & Image, LLC v. SanDisk Corp., 700 F.3d 503, 506 (Fed. Cir. 2012)*. As to the second, "the Court incorporated the rules of ***antitrust law*** generally. As Justice Harlan stated in his concurring opinion, 'as to this class of improper patent monopolies, antitrust remedies should be allowed room for full play.'" *Id.* (citing *Walker Process, 382 U.S. at 180* (Harlan, J., concurring)).

Under *§ 2* of the Sherman Act, a defendant may be liable for monopolization, attempt to monopolize, or conspiracy to monopolize. *15 U.S.C. § 2*. When the plaintiff alleges monopolization, a court must "focus on the harm done, in the form of a monopolization which the defendant willfully creates or maintains," but when a plaintiff alleges attempted monopolization, the court must instead "focus on the harm that potentially *might* have been caused by the conduct in light of the state of the market." *Taylor, 216 F.3d at 474* (emphasis added). "[T]o demonstrate attempted monopolization a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. "The first element considers the conduct, the second looks to the motivation behind the conduct, and the third **[*14]** looks to the defendant's market power and commensurate ability to lessen or destroy competition in that market." *Taylor, 216 F.3d at 474* (internal citation omitted). When the third, "dangerous probability" element is at issue, "courts have found it necessary to consider the relevant market and the defendant's ability to lessen or destroy competition in that market." *Spectrum Sports, 506 U.S. at 456*.

4. Sham Patent Litigation

A plaintiff may also base its claim for antitrust liability on an allegation that defendant engaged in sham patent litigation. *Cf.* *Tyco Healthcare Grp. LP v. Mut. Pharm. Co., Inc., 762 F.3d 1338, 1343 (Fed. Cir. 2014)* (noting that while, "[a] party is ordinarily exempt from antitrust liability for bringing a lawsuit against a competitor . . . [t]here is a recognized exception . . . for 'sham litigation'" (internal citation omitted)). Indeed, ***antitrust law*** precludes a purported patent owner from "bringing suit to enforce a patent with knowledge that the patent is invalid or not infringed" when "the litigation is conducted for anti-competitive purposes." *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1368 (Fed Cir. 1998)*. In *Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc. (PRE), 508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*, the Supreme Court established the two-part test for "sham" litigation: "(1) the lawsuit must be objectively meritless such that 'no reasonable litigant could expect success on the merits' and (2) it must be found that 'the baseless **[*15]** lawsuit conceals "an attempt to interfere directly with the business relationships of a competitor."'" *C.R. Bard, 157 F.3d at 1368* (quoting *PRE, 508 U.S. at 60*). Because "[f]raud in the procurement of a patent is governed by *Walker Process* . . . the complainant 'must still prove a substantive antitrust violation.'" *Id.* (quoting *PRE, 508 U.S. at 61*).

III. ANALYSIS

A. Standing

The Chandler Plaintiffs have failed to present substantial evidence that HOTF's or the Phoenix Defendants' own alleged antitrust violations were a material cause of Supertherm's business losses. Accordingly, they do not have standing to pursue their *Walker Process* and sham litigation claims for lost-profit damages.

"Standing to pursue an antitrust suit exists only if a plaintiff shows: 1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit." *Sanger Ins. Agency, 802 F.3d at 737* (internal citation omitted). The Phoenix Defendants raise only the first issue, claiming the Chandler Plaintiffs cannot prove that HOTF's unlawful conduct caused Supertherm to gradually lose business from its largest customer and eventually go out of business.

"Although the question **[*16]** of causation is generally a factual question for the jury, a court should direct a verdict where the plaintiff has failed to present substantial evidence that the defendant's illegal practices were a material cause of plaintiff's injuries." *Taylor, 216 F.3d at 485* (internal citation omitted); *see also* *H & B Equipment Co. v. International Harvester Co., 577 F.2d 239, 246 (5th Cir. 1978)* ("To succeed, an antitrust plaintiff must show the defendants' wrongful actions materially contributed to an injury to the plaintiff's business, and must provide some indication of the amount of damage done."). In some instances, the jury can infer facts to establish causation, but "the required causal link must be proved as a matter of fact with a fair degree of certainty." *Blue Bird Body Co., 573 F.2d at 317*. This is "especially so" when plaintiffs are damaged by other "salient factors distinct from the challenged conduct." *El Aguila, 131 F. App'x at 454* (requiring more when there was "increased competition" and the plaintiffs refused to mitigate damages); *see also* *Taylor, 216 F.3d at 485* (holding that the plaintiff "had to establish a tighter connection between the behavior and the damages" because the plaintiff "concededly also lost customers (i.e., suffered damage)" for reasons unrelated to the antitrust violation). And "[w]hen the fact of injury is in issue, the isolated self-serving statements **[*17]** of a plaintiff's corporate officers may not provide substantial evidence upon which a jury can rely." *H&B, 577 F.2d at 247* (internal citation omitted).

In September 2013, HOTF sent a cease-and-desist letter to Hess, implying that Supertherm, its only in-line frack water-heating provider, was violating the '993 Patent. Defs.' App. Supp. Mot. Summ. J. 43, ECF No. 66. Hess immediately told Supertherm about the cease-and-desist letter; but following a brief conversation, Hess and the Chandler Plaintiffs never again discussed the letter or the '993 Patent. *Id.* at 55-69, 207-08. Over the next three years, Hess gradually reduced its work with Supertherm and hired other non-licensed vendors to complete some of its frack jobs. Pls.' App. Supp. Resp. 326-31, ECF No. 72. But Hess never hired HOTF or any of its licensees. Defs.' App. Supp. Mot. Summ. J. 147, ECF No. 66. Supertherm "tr[ied] to replace the business from Amerada Hess with other customers," but due to the cease-and-desist letter to Hess and pending lawsuits against other non-licensed companies, Supertherm was "'scared' and 'hiding in the shadows.'" Pls.' Br. Supp. Resp. 21, ECF No. 71 (citing Pls.' App. Supp. Resp. 326-27, 330-31, ECF No. 72). This fear allegedly led Supertherm to decline business **[*18]** from other prospective in-line fracking customers. *Id.*

After the District of North Dakota concluded that the '993 Patent was unenforceable due to inequitable conduct, neither Supertherm nor the other Chandler Plaintiffs reached out to Hess to ask for more work. Defs.' App. Supp. Mot. Summ. J. 66-67, ECF No. 66. And by the end of 2015 and beginning of 2016, the market for oil bottomed out. *See id.* at 58, 217-18, 224-25, 231-32. In 2016, Supertherm ceased operations and sent out a memorandum stating that it was shutting down due to lack of business in the field. *Id.* at 57, 233.

The Chandler Plaintiffs provide evidence that HOTF sent Hess a cease-and-desist letter in 2013 and that Supertherm went out of business in 2016, but they do not provide evidence of any "causal link." *Blue Bird Body Co., 573 F.2d at 317*. If Hess was in fact influenced by the cease-and-desist letter, it would have stopped working with Supertherm and instead hired HOTF or a licensee authorized to use the patented process. It did neither. Instead, it defied HOTF's instructions—continuing to work with Supertherm and hiring other non-licensed vendors. Moreover, though Supertherm's manager testified he was scared to complete fracking projects for new customers, a plaintiff's deposition testimony cannot be the **[*19]** sole piece of "substantial evidence." *See H&B, 577 F.2d at 247* (internal citation omitted) ("When the fact of injury is at issue, the isolated self-serving statements of a plaintiff's corporate officers may not provide substantial evidence upon which a jury can rely."). Because Supertherm was also damaged by "salient factors distinct from the challenged conduct," *El Aguila, 131 F. App'x at 454*—namely, the fluctuating oil market and increase in competition among non-licensed fracking providers—the Chandler Plaintiffs must "establish a tighter connection between the behavior and the damages," *Taylor, 216 F.3d at 485*. Viewing the evidence in the light most favorable to the Chandler Plaintiffs, they are unable to establish the necessary causal connection.

Without proving HOTF's cease-and-desist letter caused Supertherm's monetary damages, the Chandler Plaintiffs cannot satisfy the standing elements with regard to their claims for lost profits. Accordingly, the Court holds that the Chandler Plaintiffs lack standing to pursue these claims. Nevertheless, the Chandler Plaintiffs do have standing to pursue their *Walker Process* and sham patent litigation claims for fees expended in defending against HOTF's patent-infringement claims.

B. Statute of Limitations

Pursuant **[*20]** to the Clayton Act's four-year statute of limitations, the Chandler Plaintiffs must present evidence sufficient to prove either (1) a specific injurious act occurred within four years of the suit's inception or (2) an exception applies to toll the limitations period. *See 15 U.S.C. § 15(b)*; *Bell, 847 F.2d at 1186*. At the summary-judgment stage, the Phoenix Defendants must prove there is no genuine issue of material fact regarding the date of accrual. *In re Beef Indus. Antitrust Litig., 600 F.2d at 1170*. If the Phoenix Defendants meet this initial burden, the burden shifts to the Chandler Plaintiffs to establish the applicability of a tolling doctrine. *See id.* Because the Chandler Plaintiffs' filed this suit on January 29, 2019, they must present evidence of a specific injurious act that the Phoenix Defendants or HOTF took on or after January 29, 2015. The Phoenix Defendants have established that the only two allegedly injurious acts occurred outside the limitations period, and the Chandler Plaintiffs have not established that an exception tolls the limitations period. Thus, the Chandler Plaintiffs' *Walker Process* fraud and sham patent litigation claims are barred as untimely.

1. Acts Within the Limitations Period

In their First Amended Complaint, the Chandler Plaintiffs pleaded **[*21]** three allegedly injurious acts: (1) HOTF's sending a cease-and-desist letter to Supertherm's largest customer, (2) HOTF's assertion of patent-infringement claims against the Chandler Plaintiffs, and (3) Phoenix's advertisement of the '993 Patent on its website. The first two actions occurred outside the limitations period, and the third is not actionable.

On September 13, 2013, HOTF sent Hess a cease-and-desist letter, ordering the company to "undertake the necessary steps to ensure that any possible infringement by [its] water heating contractors or subcontractors ceases." Defs.' App. Supp. Mot. Summ. J. 43, ECF No. 66. HOTF sent this letter—as well as the cease-and-desist letters to the other sixteen non-licensed vendors—more than four years before the Chandler Plaintiffs filed this suit. *Id.* at 80-113. "[A] newly accruing claim for damages must be based on some injurious act actually occurring during the limitations period, not merely the abatable but unabated inertial consequences of some pre-limitations action." *TCA Bldg. Co. Nw. Res. Co., 861 F. Supp. 1366, 1377 (S.D. Tex. 1994)* (quoting *Poster Exch. v. Nat'l Screen Serv. Corp., 517 F.2d 117, 128 (5th Cir. 1975))*. In this case, though the Chandler Plaintiffs allege the letter continued to harm Supertherm, the gradual decline in work is merely an "inertial consequence." *Id.* The injurious action **[*22]** itself occurred on September 13, 2013, when Hess received the letter and began decreasing its business to Supertherm.

Then, on July 18, 2014, HOTF filed patent-infringement claims against Newco and Chandler. Defs.' App. Supp. Mot. Summ. J. 46-47, ECF No. 66. HOTF added a claim against Supertherm on December 22, 2014. *Newco*, 7:14-CV-87-O. "Any injury . . . resulting from the continued prosecution [of the lawsuit] relates back to the initial decision to file." *Al George, Inc. v. Envirotech Corp., 939 F.2d 1271, 1274 (5th Cir. 1991)* (internal citation omitted); *see also Internet Corporativo S.A. de C.V. v. Bus. Software All., Inc., No. Civ.A.H-04-2322, 2004 U.S. Dist. LEXIS 29024, 2004 WL 3331843, at *5* ("The Fifth Circuit has specifically addressed the accrual of a cause of action based on allegations that the filing and prosecution of litigation violated the antitrust laws, rejecting the application of the continuing violation exception." (citing *Al George, 939 F.2d 1271*)). Thus, any injuries stemming from the litigation occurred on July 18, 2014 and December 22, 2014, when HOTF filed the patent-infringement claims against the Chandler Plaintiffs.

Finally, from January 2018 to January 2019, the Phoenix Defendants posted the HOTF logo in association with the '993 Patent on the Phoenix website. Pls.' App. Supp. Resp. 27, ECF No. 72. Unlike the first two actions, this action did occur within the limitations period. However, **[*23]** the Chandler Plaintiffs present no claim nor other evidence showing they were injured by the website. Rather, Supertherm CFO and the Chandler Plaintiffs' *Rule 30(b)(6)* designee Reanna Chandler Jones admitted that the Chandler Plaintiffs were *not* injured by the Phoenix Defendants' website. Defs.' App. Supp. Mot. Summ. J. 49-51, ECF No. 66. Because the action did not injure any plaintiff, it too may not be used as a specific act for purposes of the statute of limitations. *See Rx.com v. Medco Health Sol., Inc., 322 F. App'x 394, 396 (5th Cir. 2009)*.

2. Tolling the Limitations Period

Both alleged injuries occurred outside the limitations period, so the Chandler Plaintiffs must show that one of three exceptions applies to toll the statute of limitations. The Chandler Plaintiffs argue that each of the Fifth Circuit's three exceptions applies: (1) fraudulent concealment; (2) damages not initially ascertainable; and (3) continuing violation. Pls.' Br. Supp. Resp. 1-26, ECF No. 71 (citing *In re Beef Indus. Antitrust Litig., 600 F.2d at 1169*; *Kaiser, 677 F.2d at 1051*). Each argument fails.

a. *Fraudulent Concealment*

"Fraudulent concealment tolls the Clayton Act's statute of limitations." *In re Beef Indus. Antitrust Litig., 600 F.2d at 1169*. To avail itself of the fraudulent-concealment exception, "an antitrust plaintiff must show that the defendants concealed the conduct complained of, and that [it] failed, **[*24]** despite the exercise of due diligence on [its] part, to discover the facts that form the basis of [its] claim." *Id.* The Chandler Plaintiffs may be able to prove that the Phoenix Defendants actively concealed HOTF's conduct, but the Chandler Plaintiffs cannot prove that they did not discover the facts that form the basis of their claims.

The Phoenix Defendants argue that the Chandler Plaintiffs may not raise the fraudulent-concealment argument because they did not plead the defense nor facts to support application of the defense. Defs.' Br. Supp. Mot. Summ. J. 8, ECF No. 65. The Chandler Plaintiffs need not have pleaded the defense, but they did need to plead the fraudulent facts with particularity. *See* FED. R. CIV. P. 9(b); Colonial Penn. Ins. Co. v. Market Planners Ins. Agency, 1 F.3d 374, 376 & n.2 (5th Cir. 1993); *Levels v. Merlino, 969 F. Supp. 2d 704, 721 (N.D. Tex. 2013)*. The Chandler Plaintiffs only pleaded two relevant and potentially fraudulent facts with particularity: (1) the '993 Patent inventor's failure to "disclose any of the 61 frac jobs to the Patent Trademark Office ('PTO') during prosecution as potential on-sale or public uses of the invention that might have triggered the on-sale bar," and (2) HOTF's threatening of the Chandler Plaintiffs' customers via cease-and-desist letters. First Am. Compl. ¶¶ 12, 14, ECF No. 23.

The Chandler Plaintiffs argue **[*25]** that the Federal Circuit's holding that "the '993 Patent is unenforceable due to inequitable conduct, and that the infringement claim was asserted in bad faith . . . is ample evidence of acts by Defendants to conceal this *antitrust* cause of action, not merely an action based on inequitable conduct." Pls.' Br. Supp. Resp. 8, ECF No. 71. They also argue "there is further documentary evidence that the fraudulent nature of the patent prosecution and the subsequent enforcement of the '993 Patent was expressly concealed by HOTF and its lawyers." *Id.* The record evidence does suggest HOTF and its attorneys knew of and actively concealed the prior use from the USPTO. *See* Pls.' App. Supp. Resp. 16-18, 21, 24, 573-81, 588-91, 597, ECF No. 72. And though the Phoenix Defendants differentiate between concealment from plaintiffs and concealment from third parties, Defs.' Reply 3, ECF No. 74, Fifth Circuit case law does not make this distinction. *See, e.g.,* State of Texas v. Allan Constr. Co., Inc., 851 F.2d 1526, 1529 (5th Cir. 1988) [hereinafter *Allan Construction*] (discussing affirmative acts of fraudulent concealment generally, not just as to the plaintiffs). Thus, a jury could find that this act constitutes an "affirmative act[] of concealment." *Id.* (internal citation omitted).

However, the **[*26]** Chandler Plaintiffs cannot show that they did not and could not discover the actionable conduct through due diligence. Throughout the litigation, the Chandler Plaintiffs' counsel was in regular communication with patent-plaintiff Energy Heating's counsel. *See* Defs.' App. Supp. Mot. Summ. J. 131, ECF No. 66 (stating Energy Heating's counsel "was involved in very similar litigation and so it was helpful to talk to him about what he was experiencing in that litigation."). "Plaintiffs' privilege log shows extensive communications with Energy Heating's counsel," including "53 emails alone starting in starting in early September, right before Energy Heating sought to amend its complaint." Defs.' Br. Supp. Mot. Summ. J. 9-10, ECF No. 65 (internal emphasis omitted) (citing Defs.' App. Supp. Mot. Summ. J. 132-33, ECF No. 66).

On December 4, 2014, Energy Heating amended its complaint to add the inequitable-conduct claim. It listed "[s]pecific invalidating prior art public use and on-sale projects" as its invalidity contentions. *Id.* at 10 (quoting Defs.' App. Supp. Mot. Summ. J. 136, ECF No. 66). Given the Chandler Plaintiffs' knowledge of the *Energy Heating* litigation and their interactions with counsel, **[*27]** the Chandler Plaintiffs are presumed to be aware of the contents of the amended complaint and, therefore, aware of the actionable conduct. *Cf.* Allan Constr., 851 F.2d at 1533 (presuming the plaintiffs had knowledge of the basis for claims asserted in "a nearly identical antitrust claim against the same defendants[, which] had been filed several years earlier in California"). But even without the presumption of knowledge, the Chandler Plaintiffs would be unable to invoke the fraudulent-concealment exception because they have not and cannot prove they "failed, *despite the exercise of due diligence* on [their] part, to discover the facts that form the basis of [their] claim[s]." In re Beef Indus. Antitrust Litig., 600 F.2d at 1169 (emphasis added).

Moreover, were the Court to accept the Chandler Plaintiffs' contention that they were unaware of the actionable conduct until the District of North Dakota issued its inequitable-conduct ruling, a key concession would still undercut their fraudulent-concealment argument. In their Response to the Phoenix Defendants' Motion for Summary Judgment, the Chandler Plaintiffs state they "*agree* with Defendants that actual notice of facts to support a *Walker Process* fraud claim did not arise as to either Plaintiffs or Defendants . . . **[*28]** until January 2016 when the District Court made its inequitable conduct finding." Pls.' Br. Supp. Resp. 15, ECF No. 71 (emphasis in original). If the Phoenix Defendants did not know of their actionable conduct until the district court found it unlawful, they would not have the ability to fraudulently conceal it.

Finally, within their fraudulent-concealment argument, the Chandler Plaintiffs make two arguments based on fairness. First, they contend "[t]here is at least a triable issue of fact as to the reasonableness of tolling the statute of limitations as to Plaintiffs based on fraudulent concealment to further investigate a complex antitrust claim based on *Walker Process* fraud and sham litigation." *Id.* at 16. The Chandler Plaintiffs note they filed suit on January 29, 2019—only four years and about five weeks after HOTF filed the patent-infringement suit—and they argue a jury should consider whether Supertherm, "an unsophisticated 'Mom and Pop' family-run oilfield manufacturing and services business in Wichita Falls, Texas . . . exercised sufficient due diligence as to both the *Walker Process* patent fraud claim and the sham patent litigation claim." *Id.* But they do not cite a single case in **[*29]** support of this argument, and they do not tie "reasonableness" to fraud. The Chandler Plaintiffs also argue that "[a]dequate notice to Plaintiffs of facts necessary to support an *antitrust* claim is a far more complex issue than even just the already complex issue of an inequitable conduct counterclaim." *Id.* (emphasis in original). They discuss details about the market share covered by the '993 Patent, which they did not discover until 2016. *See id.* at 17-19. But this argument also fails for two reasons. First, there is no indication that the Phoenix Defendants "fraudulently concealed" details regarding their engagement with the market or market power. And second, even if they did, the Chandler Plaintiffs did not plead this at all—much less with the particularity required under *Rule 9(b)*. *See generally* First Am. Compl., ECF No. 23

Each of the Chandler Plaintiffs' arguments regarding fraudulent concealment is unavailing. Thus, this exception does not toll the statute of limitations.

b. *Damages Not Yet Ascertainable*

The Chandler Plaintiffs also contend the statute of limitations should be tolled because their damages were not ascertainable when HOTF sent Plaintiff Supertherm its cease-and-desist letter and when HOTF filed **[*30]** its patent-infringement claims against the Chandler Plaintiffs. *See* Pls.' Br. Supp. Resp. 20-22, ECF No. 71. They argue "Supertherm's damage claim thus did not accrue until the damages could be ascertained, which began in May, 2016 with the failure of the business." *Id.* at 22. But while Supertherm could not have known the exact amount of lost profits, it did know of their existence.

Antitrust plaintiffs may recover both past and future damages. *See* *Zenith, 401 U.S. at 338*. "The fact that the act may inflict damages in the future, as opposed to at the time the acts are committed, does not prevent the cause of action from accruing." *Astoria Entm't, Inc. v. Edwards, 159 F. Supp. 2d 303, 316 (E.D. La. 2001)* (quoting Julian O. van Kalinowski, Peter Sullivan & Maureen McGuirl, 8 ANTITRUST LAWS AND TRADE, § 162.02[1], at 162-5 (citations omitted)). Rather, to prove that damages are not ascertainable, plaintiffs must prove that both the *existence* and the *amount* of damages are uncertain. *See* *Delta Produce, L.P., 2013 WL 12121118, at *4*.

The Chandler Plaintiffs knew they were financially damaged as soon as Hess reduced its business with Supertherm. Thus, they knew damages existed well before January 2015, even if they did not yet know the monetary amount. In *Delta Produce*, the Western District of Texas considered nearly identical facts and concluded **[*31]** the damages-not-initially-ascertainable exception did not apply. *2013 WL 12121118, at *4* ("While the amount of damages may have been speculative, the injury itself, assuming Delta's allegations are true, was not. Delta alleges that it first sustained injury in 2002, when it was prevented from selling products to an HEB competitor. Thus, Delta's cause of action under Section One of the Sherman Act is barred by limitations."). The Phoenix Defendants argue this Court should do the same, as "[u]nder Plaintiffs' theory, if Supertherm has never gone out of business, Plaintiffs could wait to file suit indefinitely, always alleging that their damages were 'not ascertainable' because its business was ongoing." Defs.' Reply 10-11, ECF No. 74.

The Court finds the *Delta Produce* court's holding and the Phoenix Defendants' reasoning persuasive. Accordingly, the damages-not-yet-ascertainable exception does not apply.

c. *Continuing Violation*

Finally, the Chandler Plaintiffs also argue the continuing-violation exception applies. They state that "[t]he key question is whether some injurious act actually occurred during the limitations period." Pls.' Br. Supp. Resp. 22, ECF No. 71 (quoting *Eurotec Vertical Flight Sols., LLC v. Safran Helicopter Engines S.A.S., No. 3:15-CV-3454, 2019 U.S. Dist. LEXIS 129084, [WL] at *14 (N.D. Tex. Aug. 1, 2019)* (emphasis omitted)). **[*32]** And they contend "[t]he answer to this question for purposes of HOTF's conduct is 'yes' for two reasons: (1) HOTF filed a Response to the USPTO on April 13, 2015 in a reexamination proceeding . . . and (2) in February, 2018 through January 29, 2019, Defendant Phoenix Services modified its website to reference the '993 Patent and offer licensing." *Id.* at 22-23. However, these acts do not constitute continuing violations.

There are two restrictions to the continuing-violation exception, both of which foreclose its application here. First, the act must actually injure the plaintiffs. *See* [*Edwards, 159 F. Supp. 2d at 316*]() ("The key to this exception is that plaintiff itself, not some other third party, was injured by the continuing conspiratorial conduct."). Second, plaintiffs can only recover damages caused by the new act; the new act does not revive old damages occurring before the limitations period. *See* [*Zenith, 401 U.S. at 338*]() ("In the context of a continuing conspiracy to violate the antitrust laws, . . . each time plaintiff is injured by an act of the defendants, a cause of action accrues to him to recover those damages *caused by that act* and that, as to **[*33]** *those* damages, the statute of limitations runs from the commission of the act." (emphasis added)).

The Chandler Plaintiffs pleaded three allegedly injurious acts: (1) HOTF's sending the cease-and-desist letter to Hess, (2) HOTF filing patent-infringement claims against the Chandler Plaintiffs, and (3) Phoenix advertising the '993 Patent on its website. *See* Am. Compl. ¶¶ 14, 15, 19, ECF No. 23. As discussed, the first two indisputably occurred before the limitations period and the Chandler Plaintiffs were not injured by the third. *See supra* Section III.B.1. The only potentially injurious act occurring within the limitations period is HOTF's response to the USPTO. But the Chandler Plaintiffs did not plead the response in their Amended Complaint. *See generally* First Am. Compl., ECF No. 23. In fact, "[t]his is a brand new allegation." Defs.' Reply 14, ECF No. 74. And regardless, "[t]here is no evidence . . . that this document caused any injury to the Plaintiffs. None of the Plaintiffs' deposition witnesses cited the reexamination as causing injury to the Plaintiffs, instead pointing solely [to] the cease and desist letter and litigation filings." *Id.* So, even if the Court did find that the response **[*34]** constituted a violation, it could not revive the actual damages—all of which allegedly stem from the cease-and-desist letter and patent-infringement claims. *See* [*Zenith, 401 U.S. at 338*]().

Thus, the continuing-violation exception also does not apply to toll the statute of limitations. Because none of the three exceptions applies, the Sherman Act's four-year statute of limitations bars the Chandler Plaintiffs *Walker Process* fraud and sham patent litigation claims.

C. The Phoenix Defendants' Liability for HOTF's Conduct

Even if the Chandler Plaintiffs had standing and their claims were not barred by the statute of limitations, the Court would grant summary judgment in favor of the Phoenix Defendants because neither Phoenix nor Fisher may be held liable for HOTF's alleged antitrust violations. The Chandler Plaintiffs admit that they "*agree* with Defendants that actual notice of facts to support a *Walker Process* fraud claim did not arise as to either Plaintiffs or Defendants . . . until January 2016 when the District Court made its inequitable conduct finding." Pls.' Br. Supp. Resp. 15, ECF No. 71 (emphasis in original). Given this concession, Phoenix and Fisher cannot be held liable under the applicable single-enterprise **[*35]** and the corporate-officer standards of liability.

1. <u>Single-Enterprise Liability</u>

Whether a parent may be liable for the attempted monopolization of its subsidiary is an issue of first impression in the Fifth Circuit. Accordingly, the Court looks to the single-enterprise-liability standard advanced by the Ninth Circuit and the Tenth Circuit—the only two federal circuits to have addressed the issue. [*Arandell Corp. v. Centerpoint Energy Servs., 900 F.3d 623 (9th Cir. 2018)*](); [*Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 847 F.3d 1221 (10th Cir. 2017)*]() [hereinafter *Lenox*]. The Court finds the *Arandell Corp.* and *Lenox* opinions persuasive and, in adopting their approach, concludes that Phoenix may not be held liable for HOTF's allegedly anticompetitive conduct.

Both circuits' opinions rely on the Supreme Court's opinion in [*Copperweld Corporation v. Independence Tube Corporation, 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*](). In *Copperweld*, the Supreme Court concluded that a parent cannot conspire with its subsidiary in violation of *§ 1* of the Sherman Act. *Id. at 771-72*. The Supreme Court reasoned:

> [T]he coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act. A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, **[*36]** but one. They are not unlike a multiple team of horses drawing a vehicle under the control of a single driver. With or without a formal "agreement," the subsidiary acts for the benefit of the parent, its sole shareholder.

Id. "For these reasons, the Court held that 'the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise.'" *Lenox, 847 F.3d at 1233* (quoting *Copperweld, 467 U.S. at 771*). In the context of conspiracy claims, several courts have "held that affiliated entities which must be treated as a single enterprise for purposes of *§ 1* also must be treated as a single enterprise for purposes of *§ 2*." *Id. at 1235* (collecting cases).

The Tenth Circuit was the first circuit court to address whether *Copperweld*'s reasoning also applies to *§ 2* Sherman Act claims for monopolization or attempted monopolization. *See generally id.* "[A]lthough *Copperweld* did not expressly reach this issue, [the Tenth Circuit] conclude[d] *Copperweld*'s reasoning necessarily denounces [the defendants'] belief that [the plaintiff] could directly establish its non-conspiracy *§ 2* claims only by proving that '*specific* Defendants' independently satisfied each necessary element of the claims." *Id. at 1236* (emphasis in original). Rather, the court **[*37]** reasoned, "in a single-enterprise situation, it is the affiliated corporations' collective conduct—i.e., the conduct of the *enterprise* they jointly compose—that matters; it is the *enterprise* which must be shown to satisfy the elements of a monopolization or attempted monopolization claim." *Id.* (emphasis in original) (citing 7 Phillip E. Arreda & Herbert Hovencamp, ***Antitrust Law*** ¶ 1464g, at 227 (3d ed. 2008) ("[A] single entity can violate *§ 2* if the prerequisites of monopolization or attempted monopolization are met.")). "To hold otherwise—to require that each affiliated defendant independently satisfy every element in order to be held liable—would be difficult to justify . . . in part because the enterprise they form 'is fully subject to *§ 2* of the Sherman Act.'" *Id.* (quoting *Copperweld, 467 U.S. at 776-77*). And rejection of the single-enterprise theory "would all but eviscerate the statute with respect to sophisticated competitors," like Phoenix. *Id.* "So long as a corporation spreads its anticompetitive scheme over multiple subsidiaries, such that no one entity met all the requirements for individual antitrust liability, it could unlawfully monopolize with impunity." *Id.* The Tenth Circuit says "*Copperweld* forecloses **[*38]** this result." *Id.*

The Ninth Circuit became the second circuit to address the issue, and it agreed with the Tenth Circuit's interpretation of *Copperweld. See* *Arandell Corp., 900 F.3d 623 (Bea, J.)*. The Ninth Circuit noted that "Supreme Court precedent establishes that 'a parent and a wholly owned subsidiary *always* have a "unity of purpose"' and thus act as a 'single enterprise' whenever they engage in 'coordinated activity.'" *Id. at 625* (citing *Copperweld, 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628*). The court further reasoned that "[i]t would be inconsistent to insist" that, though the parent and subsidiary "'always' share a 'unity of purpose,'" one can nevertheless escape liability "by disavowing the anticompetitive intent of the other, even where the two acted together." *Id. at 631-32*. Accordingly, Judge Bea, writing for the unanimous panel, concluded that "*Copperweld* supports the following rule: A wholly owned subsidiary that engages in coordinated activity in furtherance of the anticompetitive scheme of its parent and/or commonly owned affiliates is deemed to engage in such coordinated activity with the purpose of the single 'economic unit' of which it is a part." *Id. at 632*.

The Phoenix Defendants do not address *Copperweld, Lenox*, or *Arandell Corp.*. Rather, they claim that "[b]ecause the Fifth Circuit **[*39]** has not recognized a single enterprise theory of antitrust liability, the Plaintiffs' claims against Phoenix are not viable." Defs.' Br. Supp. Resp. 5, ECF No. 68. And they reference, without explanation, the Texas Supreme Court's rejection of the theory in the context of tort claims. *Id.* (citing *SSP Partners v. Gladstrong Invest. (USA) Corp., 275 S.W.3d 444 (Tex. 2008))*. Given that both *Walker Process* and sham patent litigation are federal claims, and that the only two federal circuits to review the issue have endorsed the single-enterprise theory under like circumstances, the Phoenix Defendants' reliance on a state supreme court provides a weak refutation. Thus, the Court follows the Ninth and Tenth Circuit's lead and applies the single-enterprise theory of liability.

But the Court must also determine how to apply this theory—an issue that the appellate courts did not resolve. It is well established that a parent cannot be held liable for the anticompetitive conduct of its subsidiary "merely by virtue of its place in the same corporate family." Lenox, 847 F.3d at 1237. Indeed, "*Copperweld* 'held that only "the coordinated activity" of [related entities] must be viewed as that of a single enterprise.'" *Id.* (quoting Copperweld, 467 U.S. at 771). Thus, a plaintiff is "still required to come forward with evidence **[*40]** that each defendant independently participated in the enterprise's scheme, to justify holding that defendant liable as part of the enterprise." *Id.* But how involved must the parent-defendant be?

In *Lenox*, after observing that no circuit had "provided a clear answer to the question of what level of involvement is sufficient to meet that burden," the Tenth Circuit looked to two district court cases, in which the courts concluded that, "[w]hen the parent controls, dictates or encourages the subsidiary's anticompetitive conduct, the parent engages in sufficient independent conduct to be held directly liable as a single enterprise with the subsidiary under the Sherman Act." Id. at 1237-38 (quoting Climax Molybdenum Co. v. Molychem, LLC, 414 F. Supp. 2d 1007, 1012 (D. Colo. 2005) (quoting Nobody in Particular Presents, Inc. v. Clear Channels Comm'cns, Inc., 311 F. Supp. 2d 1048, 1071 (D. Colo. 2004) [hereinafter *Nobody in Particular*])). Because the Tenth Circuit could resolve the issue on other grounds, it left the issue's "resolution for another day . . . [and] express[ed] no opinion" on the test. Id. at 1239. Given this is still "uncharted territory at the federal circuit level," the Court applies the Colorado district courts' "control, dictates or encourages" test. *Id.* (internal citations omitted).

This brings the Court back to the Chandler Plaintiffs' concession, that "actual notice of facts to support **[*41]** a *Walker Process* fraud claim did not arise as to either Plaintiffs or Defendants . . . until January 2016 when the District Court made its inequitable conduct finding." Pls.' Br. Supp. Resp. 15, ECF No. 71. The Chandler Plaintiffs argue that HOTF's inequitable conduct also satisfies the first two Sherman Act elements. Pls.' Br. Supp. Mot. Partial Summ. J. 4-5, ECF No. 62 (citing TransWeb, LLC, 812 F.3d at 1307). The Phoenix Defendants concede that when "the party that engaged in inequitable conduct is the same party that subsequently asserts the patent, it makes sense to hold that the inequitable conduct finding also established the 'anticompetitive conduct' and 'specific intent to monopolize' requirements." Defs.' Br. Supp. Resp. 19, ECF No. 68. Here, however, HOTF engaged in the inequitable conduct, but the Chandler Plaintiffs intend to hold Phoenix liable for asserting the patent.

To be liable for its subsidiary's conduct, a parent must engage in "coordinated activity," Copperweld, 467 U.S. at 771, to "purposely advance the very same scheme . . . for an illegal, anticompetitive purpose," Arandell Corp., 900 F.3d at 631. Without knowledge that HOTF was engaging in inequitable conduct when it sent the seventeen cease-and-desist letters and filed several patent-infringement **[*42]** claims against non-licensed competitors, Phoenix could not have purposely "control[led], dictate[d] or encourage[d]" HOTF's anticompetitive conduct by continuing to enforce the '993 Patent. Nobody in Particular, 311 F. Supp. 2d at 1071. Contra id. at 1069 ("To conclude that a parent can direct and require anticompetitive conduct of its subsidiaries, like any principal directing the conduct of an agent, and then escape antitrust liability by hiding behind the separate corporation is counterintuitive."). And the Chandler Plaintiffs provide no evidence that Phoenix shared HOTF's "intention of monopolizing the relevant market." Climax Molybdenum Co., 414 F. Supp. 2d at 1013. Thus, given Phoenix's lack of knowledge, intent, and involvement in HOTF's injurious acts, Phoenix may not be held liable as part of a single enterprise.

2. Individual Liability

For similar reasons, Fisher also cannot be held liable for HOTF's anticompetitive conduct. In its Memorandum Opinion and Order denying Defendants' Motion to Dismiss, the Court addressed the issue of Fisher's potential individual liability. Chandler, 419 F. Supp. 3d at 986-89. There, the Court applied the reasoning from MVConnect, LLC v. Recovery Database Network, Inc., No. 3:10-CV-1948, 2011 U.S. Dist. LEXIS 161409, 2011 WL 13128799 (N.D. Tex. May 27, 2011). In *MVConnect*, this Court held that "a corporate officer or director can be held personally liable for damages arising **[*43]** out of an anti-trust violation where he participated in the unlawful acts, or where he acquiesced or ratified the actions of other officers or agents of the corporation which were in violation of the anti-trust law." 2011 U.S. Dist. LEXIS 161409, [WL] at *10. The "essential principle" necessary to hold a director or officer individually liable for a company's alleged violation is the director's or officer's "direct, personal participation." *Id.* Accordingly, to survive a motion to dismiss a claim for individual liability based on an antitrust violation, a plaintiff must plead "factual allegations of some sort of conscious wrongdoing by [an] officer on the corporation's behalf" and that the officer had "some direct role" in the alleged violation. *2011 U.S. Dist. LEXIS 161409, [WL] at *9* (citing *In re Morrison, 555 F.3d 473, 481 (5th Cir. 2009)*; *Mozingo v. Correct Mfg. Corp., 752 F.2d 168, 174 (5th Cir. 1985))*.

Applying this standard at the *Rule 12(b)(6)* stage, the Court the found that "the Chandler Plaintiffs ha[d] pleaded facts sufficient to allege that Fisher had a direct role in the attempted monopolization and a specific intent to monopolize the in-line frac water-heating market." *Chandler, 419 F. Supp. 3d at 988*. But this only applied to Fisher's actions on behalf of HOTF. *See* *id. at 988-89*. Though the Chandler Plaintiffs also contended that Fisher should be held liable for his acts on behalf of Phoenix, the Court dismissed the **[*44]** claim because the Chandler Plaintiffs presented only a "mere suggestion of what Fisher *likely knew* or *should have known*—not a factual allegation regarding his 'direct role.'" *Id.* (emphasis in original) (quoting *MVConnect, 2011 U.S. Dist. LEXIS 161409, 2011 WL 13128799, at *9)*.

Now, at the *Rule 56* stage, the Court must consider whether the summary-judgment evidence creates a genuine issue of fact regarding whether Fisher had a direct role in HOTF's attempted monopolization. The Chandler Plaintiffs claim there is "no genuine issue of material fact that Mark Fisher had the requisite 'direct role' and 'conscious wrongdoing' in the enforcement of the '993 Patent against Plaintiff Supertherm as an attempted monopolization." Pls.' Br. Supp. Mot. Partial Summ. J. 25, ECF No. 62. The Phoenix Defendants respond that "there is substantial evidence in the record that Fisher did not know or have reason to know when he authorized the patent infringement claims against Plaintiffs that the '993 Patent was unenforceable due to inequitable conduct." Defs.' Br. Supp. Resp. 24, ECF No. 68.

Just as the Chandler Plaintiffs' concession that the Phoenix Defendants did not have "actual notice of facts to support a *Walker Process* fraud claim . . . until January 2016 when the District Court made its inequitable **[*45]** conduct finding" negates Phoenix's corporate liability, it also negates Fisher's individual liability for his actions on behalf of HOTF. Pls.' Br. Supp. Resp. 15, ECF No. 71. The Chandler Plaintiffs list several ways in which Fisher participated in the enforcement of the '993 Patent after Phoenix acquired HOTF. *See* Pls.' Br. Supp. Mot. Partial Summ. J. 23-25, ECF No. 62. But given that the only two potentially injurious actions—HOTF's sending Hess a cease-and-desist letter and HOTF suing the Chandler Plaintiffs for patent infringement—occurred before the District of North Dakota's ruling, Fisher did not previously have the requisite knowledge to engage in "conscious wrongdoing." *MVConnect, 2011 U.S. Dist. LEXIS 161409, 2011 WL 13128799, at *9*. Arguably, Fisher could have consciously engaged in continuing the *Newco* litigation on behalf of HOTF, but given that the case has been stayed since 2015, the Chandler Plaintiffs should not have expended fees on litigation since the District of North Dakota's ruling. *See* 7:14-CV-87-O. Accordingly, because Fisher also did not have the requisite knowledge, intent, and direct involvement in HOTF's alleged anticompetitive injurious acts, Fisher also cannot be held liable for his role as an HOTF corporate officer.

IV. CONCLUSION [*46]

Due to the Chandler Plaintiffs' lack of standing to bring antitrust claims for lost-profit damages, failure to file suit within the four-year limitations period, and inability to establish Phoenix's corporate liability and Fisher's individual liability, the Chandler Plaintiffs may not proceed on the merits of their *Walker Process* and sham patent litigation claims. Accordingly, the Court **DENIES** the Chandler Plaintiffs' Motion for Partial Summary Judgment and **GRANTS** the Phoenix Defendants' Motion for Summary Judgment. The Chandler Plaintiffs' claims are **DISMISSED with prejudice**.

SO ORDERED on this **13th day** of **April, 2020**.

Opinion

ORDER GRANTING IN PART AND DENYING IN PART MOTIONS TO DISMISS

Re: ECF No. 56, 58

Plaintiffs Shonetta Crain and Kira Serna have filed a putative class action complaint against various **[*6]** members of the California bail bonds industry, alleging that Defendants have conspired to artificially inflate the price of bail bonds in California. Consolidated Amended Class Action Complaint ("CAC"), ECF No. 46. Defendants have filed a motion to dismiss the CAC. ECF No. 56. A subset of Defendants have filed an additional motion to dismiss the claims against them. ECF No. 58.

The Court will grant in party and deny in part both motions.

I. BACKGROUND

A. Factual Background

Plaintiffs bring this action against 28 members of the California bail bonds industry. As set forth in the operative complaint, Crain purchased a bail bond from Defendant All-Pro Bail Bonds Inc. ("All-Pro") in 2016 to secure the pretrial release of a relative. CAC ¶ 11. The bond was underwritten by Defendant Bankers Insurance Company. *Id.* Serna purchased a bail bond from Defendant Two Jinn, Inc. ("Two Jinn") in 2016 to secure her own pretrial release. *Id.* ¶ 12. That bond was underwritten by Defendant Seaview Insurance Company. *Id.*

Plaintiffs allege that they paid inflated prices for these bonds due to a conspiracy by Defendants to fix the price of bail bonds in California. They name four categories of defendants: (1) **[*7]** eighteen surety companies, who underwrite bail bonds sold by bail agents;[1] (2) two bail agencies, whose agents sell bail bonds to customers; (3) three bail agent associations, nonprofit trade associations for the bail industry; and (4) two individuals who have served as executives for various Defendant organizations. *Id.* ¶¶ 13-45. They bring the action on behalf of themselves as well as a putative class of individuals who "paid for part or all of a commercial bail bond premium in connection with a California state court criminal proceeding" between February 24, 2004 and the present. *Id.* ¶ 47.

For the purposes of these motions to dismiss, the Court adopts the following factual allegations from the CAC. Most criminal arrestees in California have the right to seek and post bail for their release. *Id.* ¶ 56. Many arrestees (or their friends or family members) who cannot afford bail purchase bail bonds to obtain pretrial release. *Id.* ¶ 57. Bail agents charge purchasers a non-refundable premium to post a bond with the court. *Id.* If the defendant attends all court dates, the bond is exonerated and the bail agency is released from liability. *Id.* If the defendant does not show up to court, the **[*8]** bond is theoretically forfeited to the court, though Plaintiffs allege that this rarely happens — both that defendants rarely "jump bail" and that, even when they do, bail agencies are usually released from their

[1] Plaintiffs stipulated to the dismissal without prejudice of surety Defendant Crum & Forster Indemnity Company on July 15, 2019. ECF No. 55.

obligation to pay. *Id.* ¶ 63. Regardless, the purchaser does not receive any of her premium back, even if charges are dropped or never filed. *Id.* ¶ 58.

Bail agencies contract with sureties, who underwrite the bonds. *Id.* ¶ 91. Sureties collect a portion of the premiums paid by purchasers while bail agents take a commission. *Pacific Bonding Corp. v. John Garamendi*, No. GIC815786, at *3 (Cal. Super. Ct. Feb. 24, 2004) (ECF No. 57-2).[2] California law requires sureties to submit proposed premium rates to the California Department of Insurance ("CDI"). *Cal. Ins. Code § 1861.05*. CDI approves the rates unless they are "excessive, inadequate, unfairly discriminatory" or otherwise unlawful. *Id.* Once CDI has approved a premium rate, a surety must charge that rate. *Id.*

Bail agents, however, are permitted to offer customers rebates on bail bonds. CAC ¶ 67. Rebates are discounts to purchasers that come out of the bail agent's commission. ECF No. 57-2 at 5. In 1988, California voters passed Proposition **[*9]** 103, which allowed insurers to offer rebates on insurance products, to encourage competition in insurance markets. CAC ¶ 66; *Cal. Ins. Code § 750(d)*; *see also* *Calfarm Ins. Co. v. Deukmejian, 48 Cal. 3d 805, 841, 258 Cal. Rptr. 161, 771 P.2d 1247 (1989)* (noting that Proposition 103 "repeals laws that . . . prohibit rebates to consumers"); *Schmidt v. Found. Health, 35 Cal. App. 4th 1702, 1711, 42 Cal. Rptr. 2d 172 (1995)* (noting that "rebating by insurance brokers [has been] permissible since the passage of Proposition 103"). In 2004, a California Superior Court made clear that Proposition 103 extended to bail bonds, and enjoined CDI from enforcing a bail bond anti-rebating regulation (*§ 2054.4 of Title 10 California Code of Regulations*). *Pacific Bonding Corp.*, No. GIC815786 (ECF No. 57-2). From that point forward, bail agents were free to lawfully discount bail bond prices below the maximum rates sureties submitted to CDI. CAC ¶ 67. CDI points its website visitors to the *Pacific Bonding* decision, noting that "to become more competitive, a bail agent may choose to negotiate a lower fee by rebating, as allowed by Proposition 103." *Id.; see also* ECF No. 57-3 at 4.[3]

Plaintiffs allege a conspiracy by sureties, bail agencies, bail industry associations, and two individual Defendants "to keep default premium rates fixed at 10%, advertise them as legal minimums, and prevent discounting or rebating **[*10]** as much as possible." CAC ¶ 65. These allegations can be sorted into two categories: (1) the fixing of premium rates, and (2) the prevention of rebating.

As for the first category, Plaintiffs allege that the surety Defendants have "nearly uniformly filed for a default premium rate of 10 percent of the posted bond, with an 8 percent maximum for consumers who meet enumerated and nearly identical criteria (*e.g.*, veterans, homeowners, union members, government employees, or certain arrestees represented by a private lawyer)." *Id.* ¶ 61; *see also id.* ¶ 140(b). In effect, Plaintiffs allege that the surety Defendants have fixed the maximum price of bail bonds.

The second category of allegations is much broader. Plaintiffs allege that, despite knowing since 2004 that rebating was allowed, "Defendants have agreed to advertise only the default Maximum Rate, to conceal their ability to charge a lower effective rate through rebating, and generally to refrain from offering competitive rebates." *Id.* ¶ 68. They also allege that Defendants have "misrepresent[ed] that rebating or discounting is unlawful" and "intimidate[] competitors" into not offering rebates, often through retaliation. *Id.* ¶¶ 69-70, **[*11]** 104. The Court will discuss specific examples of the alleged behavior where relevant below. For now, it notes that these allegations amount to a claim that Defendants have also fixed the minimum price of bail bonds.

B. Procedural Background

Plaintiffs filed a class action complaint against Defendants in Alameda County Superior Court on January 29, 2019. No. 19-cv-01265-JST, ECF No. 1. Defendants removed the action to this district on March 8. *Id.* On March 19, the

[2] As discussed below, the Court takes judicial notice of the California Superior Court's unpublished decision in *Pacific Bonding*. *See* ECF No. 57-2.

[3] The Court also takes judicial notice of two pages on the CDI website, discussed below. *See* ECF Nos. 57-3, 57-4.

Court related Plaintiffs' case to a similar case brought by a different plaintiff. ECF No. 14. The Court consolidated the cases pursuant to *Federal Rule of Civil Procedure 42(a)* on May 1, ECF No. 29, and appointed interim class counsel on June 3, ECF No. 44. On June 13, Plaintiffs filed a consolidated amended class action complaint ("CAC"), ECF No. 46, which the Court ruled shall relate back to January 29, 2019, the date Plaintiffs filed their first complaint in state court, ECF No. 29. The CAC brings claims for violations of (1) *Section 1* of the *Sherman Act*, *15 U.S.C. § 1*; (2) the *Cartwright Act, Cal. Bus. & Prof. Code § 16720*; and (3) *California's Unfair Competition Law ("UCL"), Cal. Bus. & Prof. Code § 17200, et seq.* CAC ¶¶ 126-55.

On July 15, 2019, Defendants filed a joint motion to dismiss the CAC, ECF No. 56, along with a related request for judicial **[*12]** notice, ECF No. 57. The same day, a subset of Defendants filed a consolidated motion to dismiss the CAC. ECF No. 58. Plaintiffs filed a single opposition responding to both motions, ECF No. 68, as well as an accompanying request for judicial notice, ECF No. 66. Defendants filed two separate replies. ECF Nos. 72, 74. The Court has stayed discovery pending resolution of these motions. ECF No. 64.

II. JURISDICTION

This Court has subject-matter jurisdiction pursuant to *15 U.S.C. §§ 15* and *26* and *28 U.S.C. §§ 1337* and *1367*.

III. REQUESTS FOR JUDICIAL NOTICE

Before turning to the merits, the Court addresses the parties' requests for judicial notice. "Generally, district courts may not consider material outside the pleadings when assessing the sufficiency of a complaint under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*." *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018)*. Judicial notice provides an exception to this rule. *Id.*

Pursuant to *Federal Rule of Evidence 201(b)*, "[t]he court may judicially notice a fact that is not subject to reasonable dispute because it: (1) is generally known within the trial court's territorial jurisdiction; or (2) can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)*. If a fact is not subject to reasonable dispute, the court "must take judicial notice if a party requests it **[*13]** and the court is supplied with the necessary information." *Id. 201(c)(2)*. The Ninth Circuit has cautioned, however, that courts must be wary that the "use of extrinsic documents to resolve competing theories against the complaint risks premature dismissals of plausible claims that may turn out to be valid after discovery." *Khoja, 899 F.3d at 998*. Accordingly, "a court cannot take judicial notice of disputed facts contained in . . . public records," when, for instance, "there is a reasonable dispute as to what the [record] establishes." *Id. at 999, 1001*.

A. Defendants' Requests

Defendants' first request for judicial notice, which is unopposed, is for the *Pacific Bonding Corp.* decision. ECF No. 57 at 3. The Court grants this request. *See U.S. ex rel. Robinson Rancheria Citizens Council v. Borneo, Inc., 971 F.2d 244, 248 (9th Cir. 1992)* (taking judicial notice of "proceedings in other courts, both within and without the federal judicial system, if those proceedings have a direct relation to matters at issue") (citation omitted). The Court also grants Defendants' unopposed request for judicial notice of the definition of "loss ratio" on Investopedia.com, a publicly available website. ECF No. 57 at 4; *see Terraza v. Safeway Inc., 241 F. Supp. 3d 1057, 1067 (N.D. Cal. 2017)*.

Defendants next request judicial notice for two different pages on the CDI website, one of which Plaintiffs cite in the CAC. **[*14]** ECF No. 57 at 4; CAC ¶ 108. The web pages themselves are judicially noticeable as a general matter. *See Daniels-Hall v. Nat'l Educ. Ass'n, 629 F.3d 992, 998-99 (9th Cir. 2010)* (taking judicial notice of information "made publicly available by government entities" online, where "neither party disputes the authenticity of the web sites or the accuracy of the information displayed therein"). The parties do not currently dispute the accuracy of the information therein. ECF No. 65 at 2. The Court therefore grants notice of the two web pages, though it will limit that notice to the existence of the pages should any dispute over the facts therein arise in the future. Likewise, it grants judicial notice of the existence of the CDI report regarding Defendant Danielson National Insurance Company, *see* ECF No. 57 at 5, but not of its content, the accuracy of which Plaintiffs dispute, ECF No. 65 at 3.

B. Plaintiffs' Requests

Plaintiffs request judicial notice of six documents currently or formerly available on publicly accessible websites. ECF No. 66 at 4-6. They support their request as follows:

> Plaintiffs request that the Court judicially notice these materials in response to Defendants' assertion in their motion that some of the quoted statements are taken out of **[*15]** context and/or represent only the personal opinions of the author. *See, e.g.*, Dkt. 56 at ECF 34. Judicial notice of the materials will allow the Court to consider the context of the statements. Defendants do not contend that any of the statements or documents in which they appear are inauthentic.

ECF No. 66 at 4. Defendants do not dispute the authenticity of these documents, ECF No. 75 at 2, but they do dispute the accuracy of the statements therein, *id.*; ECF No. 73 at 3.

The Court starts by observing that a document is not judicially noticeable "simply because it appears on a publicly available website." *Rollins v. Dignity Health, 338 F. Supp. 3d 1025, 1032 (N.D. Cal. 2018)*. Plaintiffs are correct, however, that Defendants attack Plaintiffs' use of the quoted statements in the CAC, *e.g.*, ECF No. 56 at 34; ECF No. 58 at 16, and so the Court grants judicial notice based on the incorporation by reference doctrine. The Court also notes, however, that Plaintiffs do not discuss many of these judicially noticed exhibits in their brief, so it is unclear why Plaintiffs requested judicial notice in the first place. Where Plaintiffs failed to discuss a document in their brief, the Court has not considered it.

Plaintiffs also seek judicial notice pursuant to Rule **[*16]** of *Evidence 201(b)* of the *Antitrust Guidelines for the Insurance Industry* issued by the State of California Department of Justice in March 1990. ECF No. 66 at 6. They argue that "[c]ourts in this circuit have taken judicial notice of similar advisory documents from the California Attorney General's office," citing *Call v. Badgley, 254 F. Supp. 3d 1051, 1061 & n.5 (N.D. Cal. 2017)*. Defendants oppose judicial notice on the grounds that "the contents of Exhibit 7 [the *Guidelines*], a 29 year old document, do not constitute an 'adjudicative fact.'" ECF No. 73.

Neither side's brief is of much help to the Court on this point. *Call* is inapposite because, in that case, no party objected to judicial notice. Nor is Defendants' argument helpful, given that the contents of the *Guidelines* are not a "fact." Ultimately, however, the dispute is beside the point. A party may cite guidelines promulgated by the California Attorney General as non-binding legal authority without resorting to the use of judicial notice. *See, e.g., People v. Jackson, 210 Cal. App. 4th 525, 536 n.2, 148 Cal. Rptr. 3d 375 (2012)*; *People v. Solis, 217 Cal. App. 4th 51, 57, 158 Cal. Rptr. 3d 34 (2013)*. As to this document, the request is therefore denied as moot.

Lastly, the Court grants Plaintiffs' request to judicially notice an excerpt from a CDI rate review file, which they cite as an example of the savings clause CDI uses in its disposition **[*17]** of rate filings. ECF No. 66 at 6; ECF No. 68 at 36. Defendants do not oppose this request. ECF No. 73 n.1.

IV. LEGAL STANDARD

A. *Federal Rule of Civil Procedure 12(b)(1)*

"If the court determines at any time that it lacks subject-matter jurisdiction, the court must dismiss the action." *Fed. R. Civ. P. 12(h)(3)*. A defendant may raise the defense of lack of subject matter jurisdiction by motion pursuant to

Federal Rule of Civil Procedure 12(b)(1). The party asserting subject matter jurisdiction bears the burden of establishing it. *Kokkonen v. Guardian Life Ins. Co. of Am., 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)*.

B. *Federal Rule of Civil Procedure 12(b)(6)*

A complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. Dismissal under *Federal Rule of Civil Procedure 12(b)(6)* "is appropriate only where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory." *Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*. A complaint need not contain detailed factual allegations, but facts pleaded by a plaintiff must be "enough to raise a right to relief above the speculative level." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable **[*18]** for the misconduct alleged." *Id.* While this standard is not a probability requirement, "[w]here a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief." *Id.* (internal quotation marks and citation omitted). In determining whether a plaintiff has met this plausibility standard, a court must "accept all factual allegations in the complaint as true and construe the pleadings in the light most favorable" to the plaintiff. *Knievel v. ESPN, 393 F.3d 1068, 1072 (9th Cir. 2005)*.

V. DISCUSSION

A. Immunity Defenses

Defendants make a number of arguments that the alleged conduct is immune from antitrust review. The defenses largely boil down to the same proposition: that Defendants cannot be liable for fixing the price of bail bonds when California law requires them to submit proposed premium rates to CDI and charge only the approved premiums. While this argument does shield Defendants' submission of proposed premium rates from Sherman Act review, it misses the point. Plaintiffs allege not just that Defendants conspired to fix the premium rates approved by CDI, but also that they conspired to prevent rebates, effectively setting a minimum **[*19]** price for bail bonds in California.

Defendants contend that CDI sets "both a ceiling and a floor" for bail bond premiums and that Plaintiffs "obfuscate premiums (what the CAC fundamentally claims were fixed through the supposed conspiracy) with the agents' right to rebate purchasers some portion of their commission." ECF No. 72 at 9-10. It is true that when an agent offers a rebate, the savings to the customer comes out of his commission, not the premium. ECF No. 57-2 at 5. It is also true that Plaintiffs sometimes incorrectly refer to the alleged rebate agreement as the fixing of premiums. *See, e.g.*, CAC ¶ 127 (accusing Defendants of "the fixing of commercial bail bond premiums sold to Plaintiffs and members of the Class . . . by restraining competition in . . . the offering of rebates or discounts from the maximum filed rate"). But Plaintiffs' core argument is that this agreement has "had the purpose and effect of fixing or inflating bail bond *prices* in California." *Id.* at ¶¶ 128, 141 (emphasis added). Had Defendants not conspired to prevent the offering of rebates, Plaintiffs argue, customers would be paying less for bail bonds. The Court finds any obfuscation between premiums and **[*20]** prices semantic and will treat Plaintiffs' rebating arguments as an allegation that Defendants have conspired to set a minimum price for bail bonds.

And while California law does set *maximum* prices for bail bonds, Proposition 103 and *Pacific Bonding Corp.* eliminated any argument that it also sets *minimum* prices. Defendants do not dispute this. *See, e.g.*, ECF No. 72 at 11. Instead, they dismiss Plaintiffs' theory "that the Defendants agreed to prohibit 3200+ agents from offering purchasers some cash back" as a "narrow claim." *Id.; see also id.* at 7 n.2. Narrow or not, however, this claim is not barred by Defendants' immunity defenses.

1. McCarran-Ferguson Act

Defendants first argue that Plaintiffs' Sherman Act claim is barred by the *McCarran-Ferguson Act*, which exempts from federal antitrust laws "the business of insurance, but only to the extent that such business is regulated by the state, and does not involve a boycott, coercion or intimidation." *Feinstein v. Nettleship Co. of Los Angeles, 714 F.2d 928, 931 (9th Cir. 1983)*. "[E]xemptions from the antitrust laws must be construed narrowly." *Union Labor Life Ins. Co. v. Pireno, 458 U.S. 119, 126, 102 S. Ct. 3002, 73 L. Ed. 2d 647 (1982)*.

Courts consider three factors in determining whether something is "the business of insurance": "(1) whether the practice has the effect of transferring or spreading the policyholders' **[*21]** risks; (2) whether the practice is an integral part of the policy relationship between the insurer and insured; and (3) whether the practice is limited to entities within the insurance industry." *Feinstein, 714 F.2d at 931* (citing *Pireno, 458 U.S. at 129*). "[T]he primary characteristic of the business of insurance is the transferring or spreading of risk." *Id.* "Provided the risk spreading factor is present, the business of insurance is not limited to traditionally recognized areas of insurance." *Id.*

In *Group Life & Health Insurance Co. v. Royal Drug Co., 440 U.S. 205, 211, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979)*, the Supreme Court held that an agreement between a health insurer and pharmacies on how much to charge insured customers was not "the business of insurance" because it did not have to do with spreading risk. Rather, it was a mere "cost-savings arrangement[]" between the insurer and a third party. *Id.* The Court distinguished this agreement from the "cooperative ratemaking efforts" that the drafters of the *McCarran-Ferguson Act* intended to exempt from antitrust laws. *Id. at 221*. Similarly, the *Pireno* Court found that an agreement between a chiropractic trade association and an insurance company to fix the prices of chiropractic services "was logically and temporally unconnected to the transfer of risk accomplished by [the defendant's] insurance **[*22]** policies." *458 U.S. at 130*. Following this reasoning, the Ninth Circuit has held that an agreement between a medical association and a medical malpractice insurer to only cover doctors who were members of the association *was* "the business of insurance" because it was "demonstrably related to the allocation and spreading of risk" by "defin[ing] a pool of insureds over which risk is spread." *Feinstein, 714 F.2d at 932*.

As explained above, Plaintiffs allege that Defendants have violated the Sherman Act by "the fixing of commercial bail bond premiums sold to Plaintiffs and members of the Class . . . by restraining competition" in (1) "decisions on what maximum default rates to file," CAC ¶ 127, and (2) "the offering of rebates or discounts from the maximum filed rate," *id.* The first category of activity seems at first glance like the kind of "cooperative ratemaking" that the *McCarran-Ferguson Act* intended to exempt from antitrust scrutiny. *See* *Royal Drug, 440 U.S. at 225 n.32* ("It is clear from the legislative history [of the *McCarran-Ferguson Act*] that the fixing of rates is the 'business of insurance.'"). However, Plaintiffs are targeting not the actual filing of rates but the alleged agreement beforehand concerning what rates to file. Plaintiffs argue that **[*23]** this collusive pre-filing activity is not the business of insurance.

While the argument has common-sense appeal, Plaintiffs cite no authority directly supporting it. Plaintiffs' principal case on this point is *Perry v. Fidelity Union Life Insurance Co., 606 F.2d 468 (5th Cir. 1979)*. The *Perry* court did say that in determining whether something constituted the business of insurance, "the appropriate focus is thus the nature of the activity itself, not the type of business that is conducting it." *Id. at 470*. But the facts of that case were different than the ones at issue here. *Perry* held that the *McCarran-Ferguson Act* did not apply to financing plans that an insurance company offered to help purchasers pay their premiums because "financing activity is purely ancillary to the insurance relationship between the insurance company and the policyholder." *606 F.2d at 470*. The court pointed out that the insurance company was playing "two distinct roles": "On the one hand, the company is an insurer, the purchaser an insured; but on the other hand, the company is a creditor, the purchaser a debtor. The former relationship constitutes the 'business of insurance,' while the latter does not." *Id.*

Here, unlike in *Perry*, Plaintiffs are challenging conduct that is interconnected with the filing **[*24]** of premium rates. In addition, *Perry* was issued before *Pireno* and does not apply its "business-of-insurance" framework. Applying that framework here, the alleged agreement to file uniform rates appears to meet the first two *Pireno* factors because the setting of premium rates is essential to the "transferring or spreading" of risk between the insurer and insured and is "an integral part of the policy relationship" between them. *Pireno, 458 U.S. at 129*; *see also In re Workers' Compensation Ins. Antitrust Litig., 867 F.2d 1552, 1556-57 (8th Cir. 1989)* (finding that alleged "fixing of rates . . . whether by private or by state-approved rate setting, is integral to the price charged to policy holders and to the contractual relationship with the insured"). And because only surety companies file proposed rates to CDI, the alleged activity is also "limited to entities within the insurance industry." *Pireno, 458 U.S. at 129*. Based on these authorities, the Court concludes that Defendants' alleged agreements regarding which rates to submit constitutes the business of insurance for purposes of the *McCarran-Ferguson Act*.

In order for the conduct to fall within McCarran-Ferguson, however, it must also be "regulated by the state" and "not involve a boycott, coercion or intimidation." *Feinstein, 714 F.2d at 933*. Plaintiffs' allegations satisfy this prong **[*25]** as well. As for the regulation requirement, "[i]t is not necessary to point to a state statute which gives express approval to a particular practice; rather, it is sufficient that a state regulatory scheme possess jurisdiction over the challenged practice." *Id. at 933* (holding that California's "extensive regulatory scheme with jurisdiction over all rating practices of insurers," including the medical malpractice insurer defendants, clearly satisfied this requirement). Like the insurance practices at issue in *Feinstein*, the issuance of bail bonds in California is subject to an "extensive regulatory scheme." *Id.; see Cal. Ins. Code §1860 et seq.* And the CAC does not allege any "boycott, coercion, or intimidation" within the meaning of the *McCarran-Ferguson Act*. Accordingly, the Court finds that Plaintiffs' Sherman Act claim that Defendants conspired to submit uniform maximum rates to CDI is barred by the *McCarran-Ferguson Act*. Defendants' motion to dismiss is granted as to this portion of Plaintiffs' Sherman Act claim. Because Plaintiffs cannot amend their complaint to resolve this issue, this dismissal is with prejudice.

The second category of alleged activity, however — an alleged agreement not to rebate — does not meet **[*26]** the *Royal Drug* and *Pireno* requirements for McCarran-Ferguson Act immunity. First, the Court fails to see how an agreement not to rebate, when that rebate comes out of the agent's commission rather than the premium, has to do with spreading the risk that a defendant will jump bail. Defendants claim that this alleged practice "relates to risk evaluation," but they do not even attempt to explain how. ECF No. 72 at 8. When asked about this argument at the hearing, Defendants referred to several cases that do not employ the *Royal Drug*/*Pireno* framework and are thus not on point.[4] ECF No. 76. The Court can only conclude that, like the "cost-savings arrangement[]" in *Royal Drug*, the alleged anti-rebating practices serve the purpose of maximizing profits rather than spreading risk. Because the first *Pireno* factor is not met, the Court need not proceed to the other factors. Plaintiffs' Sherman Act claim regarding the alleged agreement not to rebate, including Defendants' alleged misrepresentation of their ability to do so, is thus not barred by the *McCarran-Ferguson Act*.

2. State Action Doctrine

Defendants make largely the same points in arguing that Plaintiffs' Sherman Act **[*27]** claim is barred by the state action doctrine, which "provides generally that the antitrust laws do not apply to action by a state operating in its sovereign capacity, or to private conduct approved and supervised by the state as a matter of state policy." William

---

[4] Defendants cite *Buckman v. American Bankers Insurance Co. of Florida, 924 F. Supp. 1156, 1157 (S.D. Fla. 1996)*, which held that posting a bail bond is "the business of insurance." ECF No. 56 at 21; ECF No. 72 at 8. But this holding relies solely on Florida law's definition of "surety insurance" and does not consider any of the *Pireno* factors. *Buckman, 924 F. Supp. at 1157*. Defendants' assertion that "courts give heavy weight to a state's determination that an activity constitutes the 'business of insurance,'" ECF No. 72 at 8, is premised on Fifth Circuit law before the Supreme Court decided *Royal Drug*. *See Buckman, 924 F. Supp. at 1157* (citing *Royal Drug Co., Inc. v. Grp. Life & Health Ins. Co., 556 F.2d 1375, 1384 (5th Cir.1977)*). Equally unhelpful is *Groves v. City of Los Angeles, 40 Cal. 2d 751, 753, 256 P.2d 309 (1953)*, which does not even mention the *McCarran-Ferguson Act*.

C. Holmes & Melissa Mangiaracina, ***Antitrust Law*** *Handbook* § 8:7 (2018). "[S]tate action immunity derives from principles of federalism: Certain actions of the state that restrict competition are immunized from federal ***antitrust law***." *Snake River Valley Elec. Ass'n v. PacifiCorp, 357 F.3d 1042, 1047 (9th Cir. 2004)*. The test for state action immunity is "that the challenged restraint must (1) reflect a clearly articulated state policy that permits the anti-competitive conduct and (2) that the permitted anti-competitive activities are actively supervised by the state." *Id. at 1047-48*.

Defendants' state action arguments regarding the alleged agreement not to rebate fail for the same reasons they did under the *McCarran-Ferguson Act*. Defendants' argument that the "uniformity in bail bond pricing that Plaintiffs challenge flows directly from the Department's statutorily-mandated rate-setting process," ECF No. 56 at 21, again conflates Defendants' obligation to offer fixed premiums with their ability to offer rebates. Claiming that **[*28]** the latter is foreclosed by the CDI rate-setting process is an attempt to cast a "gauzy cloak of state involvement over what is essentially a private price-fixing arrangement." *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 106, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. The state action doctrine does not bar Plaintiffs' claims of minimum price fixing.

3. Filed Rate Doctrine

Defendants argue that Plaintiffs' Sherman Act and Cartwright Act claims are barred by the filed rate doctrine. ECF No. 56 at 22. Because the Court has concluded that Plaintiffs' Sherman Act claim regarding submission of uniform premium rates to CDI is barred by the *McCarran-Ferguson Act*, it need not address Defendants' argument that it is also barred by the filed rate doctrine. As for Plaintiffs' Sherman Act and Cartwright Act claims regarding rebating, Defendants concede that they are not barred by this doctrine. ECF No. 72 at 11. That leaves only Plaintiffs' Cartwright Act claim regarding maximum premium rates.

"The filed rate doctrine and associated principles of federal preemption bar challenges under state law and federal antitrust laws to rates set by federal agencies." *E. & J. Gallo Winery v. EnCana Corp., 503 F.3d 1027, 1033 (9th Cir. 2007)*. "At its most basic, the filed rate doctrine provides that state law, and some federal law (e.g. ***antitrust law***), may not be used to **[*29]** invalidate a filed rate nor to assume a rate would be charged other than the rate adopted by the federal agency in question." *Wah Chang v. Duke Energy Trading & Mktg., LLC, 507 F.3d 1222, 1225 (9th Cir. 2007)* (quoting *Transmission Agency of N. Cal. v. Sierra Pac. Power Co., 295 F.3d 918, 929-30 (9th Cir. 2002)*). "[C]ourts have [also] concluded that the 'rationales underlying the filed rate doctrine apply equally strongly to regulation by state agencies.'" *Blaylock v. First Am. Title Ins. Co., 504 F. Supp. 2d 1091, 1100 (W.D. Wash. 2007)* (quoting *Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17, 20 (2d Cir. 1994)*). "Many courts, both state and federal, have concluded that the doctrine bars . . . challenges to rates set by state agencies regulating insurance premiums." *Id. at 1100*.

Here, the parties dispute whether the doctrine applies to challenges to insurance rates approved by CDI. Plaintiffs rely on *Cellular Plus, Inc. v. Superior Court, 14 Cal. App. 4th 1224, 1241-42, 18 Cal. Rptr. 2d 308 (Cal. Ct. App. 1993)*, which declined to adopt the filed rate doctrine for Cartwright Act claims challenging rates approved by the California Public Utilities Commission. *See also* *Fogel v. Farmers Grp., Inc., 160 Cal. App. 4th 1403, 1418, 74 Cal. Rptr. 3d 61 (Cal. Ct. App. 2008)* (holding that the filed rate doctrine did not apply to California insurance laws because, unlike in federal cases establishing the doctrine, California insurers "are allowed to rebate excess premiums to their policyholders"). The Ninth Circuit has deferred to this approach, rejecting an argument that the filed rate doctrine barred a Cartwright Act claim challenging milk prices set by a California agency. *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 992 (9th Cir. 2000)* ("Whether damages can be awarded to the injured parties **[*30]** is a matter of state law. California has held, in contrast to federal law, that no filed rate doctrine exists as a bar."). The California Department of Justice's *Antitrust Guidelines* also echo this approach, noting that "[t]he filed rate doctrine does not apply to insurance rates in California." ECF No. 67-7 at 38-39.

Defendants, however, rely heavily on *MacKay v. Superior Court, 188 Cal. App. 4th 1427, 1449, 115 Cal. Rptr. 3d 893 (Cal. Ct. App. 2010)*, which disagreed with *Fogel* "to the extent that it rejected the application of the filed rate doctrine to California insurance rates." Defendants claim that "the California Court of Appeals has unequivocally held that the filed rate doctrine bars suits like this one." ECF No. 56 at 23 (*citing MacKay, 188 Cal. App. 4th at 1448*). The Court is not convinced by this argument. *MacKay*'s passing reference to the filed rate doctrine is dicta; that court based its decision on statutory grounds. Because Defendants provide no other authority for the proposition that the filed rate doctrine bars a Cartwright Act claim challenging California insurance rates, the Court denies the motion to dismiss Plaintiffs' Cartwright Act claim on these grounds.

4. Exclusive Jurisdiction of CDI

Defendants also contend that Plaintiffs' California claims are barred by the California Insurance Code, **[*31]** which "vests exclusive jurisdiction over the setting of bail bond premium rates with CDI." ECF No. 56 at 24. Two provisions of the code are relevant here: (1) *Section 1860.1*, which states that "[n]o act done, action taken or agreement made pursuant to the authority conferred by this chapter shall constitute a violation of or grounds for prosecution or civil proceedings under any other law of this State heretofore or hereafter enacted which does not specifically refer to insurance," *Cal. Ins. Code § 1860.1*, and (2) *Section 1861.03(a)*, which provides that "[t]he business of insurance shall be subject to the laws of California applicable to any other business, including, but not limited to . . . the antitrust and unfair business practices laws," *id. § 1861.03(a)*.

In order to resolve the "apparent contradiction" between these provisions, the *MacKay* court explored their legislative history. *188 Cal. App. 4th at 1442*. In 1947, in the wake of a Supreme Court decision holding that insurance was subject to federal ***antitrust law***, the California legislature enacted *Section 1860.1* as part of the *McBride-Grunsky Act* "in order to immunize insurers from antitrust laws." *Id. at 1444*. The *McBride-Grunsky Act* included a provision "permitting insurers to act in concert." *Id. at 1445*. In 1988, however, California voters passed Proposition **[*32]** 103, which "was intended to eliminate insurers' exemption from antitrust laws." *Id. at 1447*. Among other things, Proposition 103 repealed the portion of the *McBride-Grunsky Act* "permitting insurers to act in concert." *Id. at 1445-46*. That proposition, however, left *Section 1860.1* in place. *Id. at 1446*. The *MacKay* court concluded that *Section 1860.1* should thus be read narrowly, to "exempt[] from other California laws acts done and actions taken pursuant to the ratemaking authority conferred by the ratemaking chapter, including the charging of a preapproved rate." *Id. at 1443* (emphasis omitted). The court stressed that the provision "does not extend to insurer conduct *not* taken pursuant to that authority." *Id. at 1449*.

Defendants rightly note that the key question in determining whether CDI has exclusive jurisdiction over Plaintiffs' California claims is whether the "CAC challenges the reasonableness of Defendants' approved rates." ECF No. 56 at 25. But Plaintiffs' claims do no such thing. The first category of conduct that Plaintiffs identify — the alleged agreement to submit identical premium rates to CDI — is exactly the type of concerted insurer conduct that California law once immunized but that Proposition 103 subjected to antitrust scrutiny. And the second category **[*33]** of conduct — the alleged agreement not to offer rebates — has nothing to do with the reasonableness of the approved premium rates. Because neither of these agreements were authorized by the ratemaking authority as laid out in *MacKay*, *Section 1860.1* poses no bar to Plaintiffs' remaining claims.

5. The *Noerr-Pennington* Doctrine

Defendants also argue that the *Noerr-Pennington* doctrine bars Plaintiffs' Cartwright Act claim "that Defendants conspired to secure the Department's approval of a uniform rate."[5] ECF No. 56 at 25. "[T]he *Noerr-Pennington* doctrine . . . places certain '[j]oint efforts to influence public officials' beyond the reach of the antitrust laws." *F.T.C. v. Ticor Title Ins. Co., 504 U.S. 621, 627, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)* (citing *Mine Workers v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* and *E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 136, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*). While the doctrine originated in

[5] Defendants do not argue that *Noerr-Pennington* bars Plaintiffs' rebating claims.

the Sherman Act context, it applies to the Cartwright Act as well. *See* Blank v. Kirwan, 39 Cal. 3d 311, 322, 216 Cal. Rptr. 718, 703 P.2d 58 (1985).

In *Noerr*, the Court held that the Sherman Act did not apply to an anti-trucking publicity campaign staged by a group of railroads insofar as it was designed to "foster the adoption and retention of laws and law enforcement practices destructive of the trucking business . . . ." *Id. at 129*. The Court distinguished this sort of "attempt to persuade the legislature or the executive to take particular action with respect to **[*34]** a law that would produce a restraint or a monopoly" from "the agreements traditionally condemned by § 1 of the Act," such as "price-fixing agreements, boycotts, market-division agreements, and other similar arrangements." *Id. at 136*. Summarizing part of the *Noerr* holding in *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)* (emphasis added), the Court noted that "where, independent of any government action, the anticompetitive restraint results directly from private action, the restraint cannot form the basis for antitrust liability if it is 'incidental' to a *valid* effort to influence governmental action."

Plaintiffs do not allege that Defendants jointly lobbied the California legislature to set certain premium rates, or that they staged a misleading but lawful publicity campaign intended to obtain a legislative or regulatory result.[6] They allege that Defendants covertly conspired to submit identical rates to CDI, the very type of "price-fixing agreement[]" that the *Noerr* Court emphasized was still subject to Sherman Act scrutiny. *365 U.S. at 136*; *see also* *Allied Tube, 486 U.S. at 503* ("If all such conduct were immunized then, for example, competitors would be free to enter into horizontal price agreements as long as they wished to propose that price as an appropriate level for governmental **[*35]** ratemaking or price supports."). Because this arrangement is not a "valid effort to influence governmental action," *Allied Tube, 486 U.S. at 499*, the *Noerr-Pennington* doctrine does not bar Plaintiffs' Cartwright Act claim.

In sum, the portion of Plaintiffs' Sherman Act claim relating to submission of uniform premium rates to CDI is barred by the McCarran-Ferguson Act, but the rebating portion of their Sherman Act claim and the entirety of their Cartwright Act and UCL claims are not barred by any of the argued immunity defenses. The Court now turns to Defendants' 12(b)(6) arguments regarding these claims.

B. Antitrust Conspiracy Claim

Defendants next argue that the CAC fails to state claims under the Sherman and Cartwright Acts. Because the Cartwright Act was modeled after the Sherman Act, the Court's analysis addresses both statutes together pursuant to federal ***antitrust law***. *See, e.g.,* *County of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*.

1. Legal Standard

Section one of the Sherman Act prohibits any contract, combination, or conspiracy constituting an "unreasonable restraint" of trade. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. In order to state a Section 1 claim, antitrust plaintiffs must claim more than parallel conduct and a conclusory allegation of agreement. "Without more, parallel conduct does not suggest **[*36]** conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality." *Twombly, 550 U.S. at 556-57*. Allegations of parallel conduct must thus "be placed in a context that raises a suggestion of a preceding agreement." *Id. at 557*.

The Ninth Circuit "has distinguished permissible parallel conduct from impermissible conspiracy by looking for certain 'plus factors.'" *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1194 (9th Cir. 2015)*.

---

[6] Plaintiffs' allegations regarding misleading advertising relate only to their rebating claims — essentially, that Defendants misled consumers into thinking that they were not legally permitted to offer rebates.

"Whereas parallel conduct is as consistent with independent action as with conspiracy, plus factors are economic actions and outcomes that are largely inconsistent with unilateral conduct but largely consistent with explicitly coordinated action." *Id.* (citing *Twombly, 550 U.S. at 557 n.4*). "If pleaded, they can place parallel conduct 'in a context that raises a suggestion of preceding agreement.'" *Id.* (quoting *Twombly, 550 U.S. at 557*).

When the court evaluates whether a plaintiff has plausibly alleged an antitrust conspiracy, a "co-conspirator need not know of the existence or identity of the other members of the conspiracy or the full extent of the conspiracy." *In re High-Tech Employee Antitrust Litig., 856 F. Supp. 2d 1103, 1118 (N.D. Cal. 2012)* (citing *Beltz Travel Serv. Inc. v. Int'l Air Transp. Ass'n, 620 F.2d 1360, 1366-67 (9th Cir. 1980)*); *see also Beltz, 620 F.2d at 1367* ("Participation by each conspirator in every detail in the execution of the conspiracy is unnecessary to establish liability, for each conspirator may be performing different **[*37]** tasks to bring about the desired result."). Nor should courts indulge antitrust defendants who move to dismiss by "tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each . . . ." *High-Tech Employee, 856 F. Supp. 2d at 1118* (quoting *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*). "[T]he character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole . . . ." *Id.*

2. Sufficiency of Allegations

Plaintiffs do not plead direct evidence of a conspiracy. Instead, they allege that Defendants engaged in parallel conduct that, viewed in the context of various plus factors, "raises a suggestion of a preceding agreement." *Twombly, 550 U.S. at 556*. As discussed above, Plaintiffs allege two main types of parallel conduct: (1) filing uniform maximum premium rates with CDI, *see* CAC ¶¶ 61, 140(b), and (2) declining to offer (or encouraging or instructing agents to decline to offer) rebates on bail bonds, along with various activities designed to prevent rebating, *see id.* ¶¶ 140(c)-(f), 149. While the Court has already dismissed Plaintiffs' Sherman Act claim as it relates to the uniform filing allegations, these allegations are still relevant to Plaintiffs' Cartwright Act claim. The **[*38]** Court therefore considers both categories of parallel conduct.

As for the first, Plaintiffs allege that the surety Defendants "have nearly uniformly filed for a default premium rate of 10 percent of the posted bond, with an 8 percent maximum for consumers who meet enumerated and nearly identical criteria . . . ." *Id.* ¶ 61; *see also id.* ¶ 115 ("Despite the emergence of market pressures and sureties' knowledge of their ability to rebate, the sureties have largely stayed the course with their rates. With limited exceptions, the default rate for sureties in California remains 10%."); *id.* ¶ 120 ("sureties in California have filed for the same Maximum Rate, offered under nearly identical conditions (including the standard Fully Earned Term)"); *id.* ¶ 140(b). They also allege that Aladdin (another name for Two Jinn, *id.* ¶ 38) "uses the SAA as a justification for setting its standard rate, and has said in its CDI filings that '[t]he standard rate is based on Surety Association of America (SAA) pricing.'" *Id.* ¶ 74. These facts, taken together, sufficiently allege that Defendants engaged in parallel conduct by filing for uniform premium rates.

As for the second category, Plaintiffs allege that **[*39]** since 2004, when the *Pacific Bonding Corp.* decision and CDI clarified that Proposition 103 permits bail agents to offer rebates "to become more competitive," Defendants have "generally" declined to do so. CAC ¶¶ 67-68. They also allege that Defendants uniformly "advertise only the default Maximum Rate, to conceal their ability to charge a lower effective rate through rebating," "misrepresent[] that rebating or discounting is unlawful," and "intimidate[] competitors to toe the line" when it comes to rebating. *Id.* ¶¶ 68-69. Defendants argue that these allegations are conclusory because Plaintiffs offer "no facts about rebating, such as statistics on the frequency of rebating or even whether Plaintiffs themselves sought or received rebates." ECF No. 56 at 31. They also note that the statements Plaintiffs provide as examples of misleading advertising "were made by bail agents who are not Defendants." *Id.*

As for the first criticism, Plaintiffs admittedly allege very little in terms of actual rebating practices. The CAC's only allegation that Defendants do not in fact offer rebates is its statement that Defendants "generally . . . refrain from offering competitive rebates." CAC ¶ 68. Plaintiffs **[*40]** note that Defendant California Bail Agents Association ("CBAA") "maintains information regarding premiums charged that Defendants and their agents can use to detect and prevent premium discounting," *id.* ¶ 84, though Plaintiffs presumably do not have access to this information. They also note that "[w]ith limited exceptions, the default rate for sureties in California remains 10%." *Id.* ¶ 115. It is unclear, however, whether this "default rate" refers to the CDI-approved premium rate or the rate actually charged by bail agents, taking any rebates (or lack thereof) into account. If Plaintiffs' parallel conduct claims depended solely on allegations of actual rebating practices, these statements might not be enough to state a claim. But the alleged conspiracy hinges just as much on Plaintiffs' allegations of uniform premium rate filing and misrepresentation regarding Defendants' ability to offer rebates.

And Plaintiffs provide multiple examples of such misrepresentations, including two statements made by Defendants. *See id.* ¶ 73 (citing statements on the website of Defendant Aladdin Bail Bonds, also known as Two Jinn); *id.* ¶ 83 (citing statements on the website of Defendant CBAA). They also **[*41]** provide examples of allegedly misleading representations by bail agencies who contract with Defendant sureties. *See id.* ¶ 93 (citing statement by Quick Bail Bonds Covina, which contracts with Defendant surety AIA); *id.* ¶ 94 (citing statement by Padilla Bail Bonds, a representative of Defendant surety Lexington National Insurance); *id.* ¶ 95 (citing statements by 888 Bail Bonds, a representative of Defendant sureties Allegheny Casualty Company and International Fidelity Insurance Company). In addition, Plaintiffs cite statements by members of the bail industry who are not named as Defendants. *See id.* ¶ 88 (citing an "industry-sponsored, privately-run bail agent training course[]" that included the line, "the right answer on the test: no rebates"); *id.* ¶ 90 (citing passage from e-book that Defendant CBAA "advises is an essential starting point for all bail agents"); *id.* ¶¶ 96-100 (citing statements by bail agencies with no purported connection to Defendants). Taken together, these allegations suffice to show parallel conduct in the form of similarly allegedly misleading statements about Defendants' ability to offer rebates.[7]

While Plaintiffs provide a number of statements by Defendants **[*42]** or bail agents in contractual relationships with Defendants, the statements by non-Defendant members of the bail industry also help state a conspiracy claim. "Under *Twombly*, parallel conduct, such as competitors adopting similar policies around the same time in response to similar market conditions, may constitute circumstantial evidence of anticompetitive behavior." *Musical Instruments, 798 F.3d at 1193*. Plaintiffs allege a price-fixing conspiracy throughout the California bail bonds industry. Allegations that members of this industry "adopt[ed] similar policies around the same time in response to similar market conditions" establish parallel conduct for the purpose of *Twombly*. *Id.*

Of course, where Plaintiffs name a particular industry member as a Defendant, they must allege sufficient facts about that Defendant's role in the conspiracy to "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Twombly, 550 U.S. at 555* (citation and quotation omitted). But that is a separate question from whether Plaintiffs have alleged enough parallel conduct to describe the conspiracy as a whole.

Having identified allegations of parallel conduct, the Court now turns to whether Plaintiffs have alleged plus factors that **[*43]** are "largely inconsistent with unilateral conduct but largely consistent with explicitly coordinated action." *Musical Instruments, 798 F.3d at 1194*. Plus factors that courts have found, taken in context, tend to suggest conspiracy include: participation in trade associations that provide "opportunities to exchange information or make agreements," *In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896, 903 (N.D. Cal. 2008)*; public statements by defendants that could be construed as "invitations to agree," *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1116 (N.D. Cal. 2008)*; and factors suggesting a "market susceptible to conspiratorial price-fixing," such as high barriers to entry, waning demand, and saturation, *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 577 (M.D. Pa. 2009)*.

Plaintiffs allege all three of these plus factors. The CAC alleges that the industry association Defendants "host meetings that have provided opportunities for Defendants to maintain and enforce the conspiracy," CAC ¶ 80, and gives examples of meetings that included all three association Defendants, *id.* ¶¶ 81, 86. It also cites numerous statements by individual Defendants that could plausibly be interpreted as inviting cooperation to prevent rebating. *See, e.g., id.* ¶ 78 (predicting that "if left unchecked, rampant premium discounting will result in the end of the bail bond business as we know it, to be replaced by a new model that properly reflects the **[*44]** proper balance of risk

---

[7] The Court addresses whether these allegations are adequate as to particular Defendants in Section V.B.3.

and reward" and urging members of the bail industry "to recognize the serious nature of the threats to our industry and work collectively to repel them"); *id.* ¶ 79 (urging bail agents to "recogniz[e] and alert[] all to the impending attack [on the industry]. When you [agents] become aware of a situation, please contact us so that we may assess the depth of the threat and work alongside of you to craft an appropriate response."). The CAC additionally alleges market factors that create a susceptibility to price fixing, such as increasing supply and waning demand, *id.* ¶ 111-14, as well as regulatory and networking barriers to entry, *id.* ¶ 116. Lastly, the CAC alleges market factors that suggest the presence of price fixing, such as an unusually low loss ratio, *id.* ¶ 63, and competition on factors other than price, such as marketing and credit terms, *id.* ¶¶ 118-19.

Taken together with Plaintiffs' allegations of uniform filing and parallel decisions not to offer rebates and to misrepresent the availability of discounts, these factors "raise[] a suggestion of a preceding agreement." *Twombly, 550 U.S. at 556*.

3. Specific Allegations About Defendants

Defendants also argue that Plaintiffs fail **[*45]** to allege sufficient facts about how each Defendant "joined or participated" in the alleged conspiracy. ECF No. 56 at 27. A subset of Defendants, some of whom the CAC names only in the caption and list of parties, make similar arguments in a separate motion to dismiss. ECF No. 58.

To survive a motion to dismiss, a complaint alleging an antitrust conspiracy "must allege that each individual defendant joined the conspiracy and played some role in it because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it." *TFT-LCD, 586 F. Supp. 2d at 1117* (citation omitted). The complaint "need not plead each defendant's involvement in the alleged conspiracy in elaborate detail, but must simply include allegations specific to each defendant alleging that defendant's role in the alleged conspiracy." *Id.*

The *TFT-LCD* court followed this rule in dismissing horizontal price-fixing claims against particular corporate entities where the complaint included only "general allegations as to all defendants, to 'Japanese defendants,' or to a single corporate entity such as 'Hitachi.'" *Id.* The plaintiffs amended their complaints to add detail about "numerous illicit conspiratorial communications **[*46]** between and among defendants"; "facts of the guilty pleas entered by four defendants for fixing prices of TFT-LCD"; "specific information about the group and bilateral meetings by which the alleged price-fixing conspiracy was effectuated," including "the structure and content of these meetings, as well as the types of employees who attended the meetings"; details of "bilateral discussions between various defendants . . . [that] took the form of in-person meetings, telephone calls, e-mails and instant messages"; and information about "which types of meetings the defendants and co-conspirators participated in," including in some instances "more detail such as the year of a meeting and other meeting participants." *TFT-LCD, 599 F. Supp. 2d 1179, 1184 (N.D. Cal. 2009)*. The court held that the amended complaints sufficiently alleged each defendant's participation in the conspiracy, despite defendants' objection that they "still [did] not differentiate between related corporate entities." *Id. at 1184-85*.

Plaintiffs cite *In re Cathode Ray Tube (CRT) Antitrust Litigation*, in which the district court "permitted other plaintiffs to proceed not with detailed, defendant-by-defendant allegations but with more general — but still plausible — contentions that each **[*47]** defendant participated in the alleged conspiracy." ECF No. 68 at 24 (citing *No. C-07-5944-SC, 2013 U.S. Dist. LEXIS 141115, 2013 WL 5425183, at *2 (N.D. Cal. Sept. 26, 2013)*). However, the plaintiffs who were allowed to proceed in that litigation had alleged far more specific facts about each defendant than Plaintiffs have here. The *CRT* complaints contained "allegations concerning specific Defendants' participation in the alleged unlawful meetings and agreements," including the estimated number of meetings each defendant participated in, what sorts of agreements were reached, and in some cases what types of employees had represented defendants at the meetings. *CRT, 738 F. Supp. 2d 1011, 1019-22 (N.D. Cal. 2010)*.

Bearing this analysis in mind, the Court now turns to particular defendants or categories of defendants.

a. Surety Defendants

Plaintiffs make many allegations about the surety Defendants as a group: that they have agreed not to compete on the price of bail bonds and to file uniform rates with CDI, CAC ¶¶ 61, 120, directed their agents not to compete on price, used industry associations and bail education courses to enforce this agreement, and retaliated against agents who have offered rebates, *see, e.g., id.* ¶ 71. They provide sample language from a contract between a surety and a bail agency, though they do **[*48]** not say which ones. *Id.* ¶ 92. They also make some allegations related to particular surety Defendants, for example, citing allegedly misleading statements by bail agencies, some of whom they allege are contractually connected to certain Defendant sureties. *Id.* ¶¶ 93-95. They also quote statements by executives of certain surety Defendants. *See, e.g., id.* ¶¶ 75-79, 80, 87, 104, 106.

These claims, however, do not sufficiently allege each surety Defendant's "role in the alleged conspiracy." *TFT-LCD, 586 F. Supp. 2d at 1117*; *see also* *In re TFT-LCD (Flat Panel) Antitrust Litig., Nos. M 07-1827 SI, C 09-5609 SI, 2010 U.S. Dist. LEXIS 64930, 2010 WL 2629728, at *6-7 (N.D. Cal. June 29, 2010)* (dismissing claim against particular defendant where the complaint alleged only its "corporate status," that it "manufactured, sold, and/or distributed LCDs to other purchasers," and that it "participated in the conspiracy"). This is especially true for the 17 surety Defendants who are mentioned by name only in the caption and in the list of parties. ECF No. at 13-14. However, since Plaintiffs' opposition does not attempt to distinguish between these Defendants and those for whom the CAC includes additional allegations, *see* ECF No. 68 at 24-26, the Court dismisses the claims against all surety Defendants with leave **[*49]** to amend.

b. Bail Agency Defendants

Plaintiffs name two bail agency Defendants in their complaint: Two Jinn and All-Pro. CAC ¶¶ 37-38. The CAC alleges that Two Jinn, which also does business as Aladdin Bail Bonds, sold Plaintiff Serna a bail bond and that it is "[a]t the center of the conspiracy." *Id.* ¶¶ 12, 38, 72-74. It also alleges that Aladdin representatives attended a trade association meeting in November 2011 but says nothing about what occurred at that meeting. *Id.* ¶ 86. Lastly, the CAC cites a statement on Defendant Aladdin's website claiming that "Aladdin Bail Bonds is authorized to offer an 8% rate in addition to the standard 10%. Nobody has lower prices than Aladdin." *Id.* ¶ 73. These allegations are insufficient to allege liability on the part of Two Jinn. A firm cannot enter a conspiracy merely by selling a bail bond, and the law is well-settled that attending a trade association meeting, without more, is not evidence of participation in a conspiracy. *See, e.g.,* *Jones v. Micron Tech. Inc., 400 F. Supp. 3d 897, 918 (N.D. Cal. 2019)* ("Membership in associations and attendance at trade meetings presents nothing more than an opportunity to collude, and an opportunity, without more, is insufficient to state a claim under *§ 1*." (footnote and citation **[*50]** omitted)); *In re Cal. Title Ins. Antitrust Litig., No. C 08-01341 JSW, 2009 U.S. Dist. LEXIS 43323, 2009 WL 1458025, at *5 (N.D. Cal. May 21, 2009)* ("If such meetings occurred, Plaintiffs do not set forth facts about where or when those meetings took place, or whether the Defendants communicated with one another in advance of or after the meetings."); *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1023 (N.D. Cal. 2007)* ("Attendance at industry trade shows and events is presumed legitimate and is not a basis from which to infer a conspiracy, without more. . . . [T]here are no allegations that representatives from ATI and Nvidia actually met or spoke with one another during those widely-attended conferences. Here, plaintiffs have pleaded no facts indicating that defendants' attendance at trade shows and conferences was part of a conspiracy."). Aladdin's statement about its rates, while potentially somewhat misleading as the rates it is "authorized" to charge, also is not evidence of agreement. Finally, as for the naked allegation that Two Jinn was the "center" of the conspiracy, simply saying it does not make it so. *See* *Dietrick v. Securitas Sec. Servs. USA, Inc., 50 F. Supp. 3d 1265, 1276 (N.D. Cal. 2014)* (recalling Abraham Lincoln's aphorism that "calling a tail a leg doesn't make it one." (citation omitted)). Plaintiffs' claim against Two Jinn is dismissed with leave to amend.

The claim against All-Pro is even thinner. **[*51]** The only allegation against that firm is that it sold Plaintiff Crain an allegedly inflated bail bond. *Id.* ¶ 11. Plaintiffs' opposition brief claims that the CAC alleges that All-Pro failed to offer

Crain a rebate, ECF No. 68 at 26, but the CAC does not in fact make that allegation. Plaintiffs' claim against All-Pro is thus dismissed with leave to amend.

c. Industry Association Defendants

The CAC names three bail agent association Defendants: American Bail Coalition, Inc. ("ABC"), CBAA, and Golden State Bail Agents Association ("GSBAA"). CAC ¶¶ 40-42. The CAC alleges that the surety Defendants use all three association Defendants "as tools for enforcing their price-fixing cartel." *Id.* ¶ 71. It alleges that the association Defendants "host meetings that have provided opportunities for Defendants to maintain and enforce the conspiracy," *id.* ¶ 80, and gives examples of meetings that included all three association Defendants, *id.* ¶¶ 81, 86. Once again, however, the question is whether the CAC provides enough information regarding each individual defendant.

As to defendant CBAA, it does. The CAC alleges that CBAA "maintains information regarding premiums charged that Defendants and their agents **[*52]** can use to detect and prevent premium discounting." *Id.* ¶ 84. It notes that CBAA maintains a web page for consumers called "How Bail Bonds Works." *Id.* ¶ 83. CBAA there poses the question, "Are there any restrictions on how high my bail can be?," and gives the allegedly misleading answer that "Bail agents representing a company must charge the same, filed rates," without disclosing that agents are allowed to rebate. *Id.* The CAC states that CBAA promotes a book called "Bail Bonds 101," which includes the following advice about dealing with customers:

> [T]he caller may be shopping to see what fees you charge, but always keep in mind that your state DOI regulates the fees for bail bonds and if a competitor offers a lower percentage fee, they WILL make up the point or two somewhere in the transaction. In California, the only time you might lower the fee to 8%, which is 2% less than the standard 10%, is if you are working with a referral from an attorney.

Id. ¶¶ 89-90. These allegations provide the "something more" sufficient to allege CBAA's participation in the asserted conspiracy.

The allegations against ABC and GSBAA, by contrast, are inadequate. The only specific allegation concerning ABC **[*53]** relates to a statement made by a former — not current — executive director. *Id.* ¶ 104. And there are no specific allegations concerning GSBAA whatsoever.

Accordingly, the motion to dismiss claims against CBAA is denied. The motion to dismiss on behalf of ABC and GSBAA is granted with leave to amend.

d. Individual Defendants

The CAC names two individual Defendants: (1) Jerry Watson, vice president of the AIA[8] and senior counsel and board member of industry association Defendant ABC, *id.* ¶ 44, and (2) William B. Carmichael, president and CEO of Defendant American Surety Company ("ASC") and former president and executive director, as well as current chairman, of Defendant ABC, *id.* ¶ 45. The CAC alleges that both Watson and Carmichael "directly participated in" the alleged conspiracy and "approved and ratified the conduct of" AIA's member sureties and ASC, respectively, and that they both approved and ratified the conduct of ABC. *Id.* ¶¶ 44-45.

The CAC also cites multiple statements by each individual Defendant that it alleges demonstrate the existence of, and their participation in, a conspiracy. As for Watson, the CAC alleges that he made statements about the bail industry's low loss ratio **[*54]** as well as its shrinking demand and rising supply, *id.* ¶¶ 63, 111, and that he "derided

---

[8] The CAC makes several references to "Defendant AIA," CAC ¶¶ 63, 75, which it elsewhere describes as "the nation's largest bail surety administrator," of which three other surety Defendants are members, *id.* ¶¶ 14, 17, 25. The CAC does not name AIA in its list of parties or in its caption, however, so the Court is unclear as to whether AIA is in fact a separate named Defendant. Plaintiffs are instructed to clarify this inconsistency in any future amended complaint.

'price-cutting' as a 'cancer'" in an article on AIA's website, *id.* ¶ 75. As for Carmichael, the CAC cites a statement he made on behalf of Defendant ASC noting "the important role a surety must play in protecting our markets," i*d*. ¶ 80 (emphasis omitted), as well as one demonstrating his opposition to rebating, *id.* ¶ 106. *See also id.* ¶ 77 (Carmichael statement referencing a "cohesive band of agents and companies" who play "vital roles . . . in the protection and betterment of our markets"); *id.* ¶ 78 (Carmichael statement predicting that "if left unchecked, rampant premium discounting will result in the end of the bail bond business as we know it, to be replaced by a new model that properly reflects the proper balance of risk and reward" and urging members of the bail industry "to recognize the serious nature of the threats to our industry and work collectively to repel them"); *id.* ¶ 79 (Carmichael statement urging bail agents to "recogniz[e] and alert[] all to the impending attack [on the industry]. When you [agents] become aware of a situation, please contact us so that we may assess the depth **[*55]** of the threat and work alongside of you to craft an appropriate response.").

Individuals may be liable for the antitrust violations of their employers if they have directly participated in or knowingly approved or ratified "inherently wrongful" conduct. *Murphy Tugboat Co. v. Shipowners & Merchants Towboat Co., Ltd., 467 F. Supp. 841, 852-53 (N.D. Cal. 1979)*, *aff'd sub nom. Murphy Tugboat Co. v. Crowley, 658 F.2d 1256 (9th Cir. 1981)*. Plaintiffs allege both that Watson and Carmichael directly participated in the alleged conspiracy and that they approved and ratified of anticompetitive conduct by AIA's member sureties, ASC, and ABC — specifically, their alleged agreement not to rebate and to misrepresent their ability to do so. Because the allegations in the CAC sufficiently make this claim as to both Watson and Carmichael, the Court denies their motion to dismiss Plaintiffs' claims against them.

C. UCL Claim

The CAC alleges UCL violations based on a predicate Cartwright Act violation as well as conduct that is "otherwise unfair, unconscionable, unlawful, and fraudulent," CAC ¶¶ 153-54, though Plaintiffs' opposition brief argues a UCL claim based only on predicate violations of the *Sherman* and *Cartwright Acts*, ECF No. 68 at 29. Because Plaintiffs have sufficiently stated Sherman and Cartwright Act claims as to certain Defendants, they have sufficiently **[*56]** stated a UCL claim as to those Defendants. The Court therefore grants Defendants' motions to dismiss the UCL claim as to the surety Defendants, the bail agency Defendants, ABC, and GSBAA, and denies them as to CBAA and the individual Defendants.

D. Statutes of Limitations

Defendants also argue that Plaintiffs' pre-2015 claims are barred by the four-year statute of limitations on antitrust and UCL claims. ECF No. 56 at 38. "The burden of alleging facts which would give rise to tolling falls upon the plaintiff." *Hinton v. NMI Pac. Enters., 5 F.3d 391, 395 (9th Cir. 1993)*. However, because resolving tolling disputes is a fact-intensive process, statute of limitations defenses "may not be raised by motion to dismiss" unless they include "no disputed issues of fact." *Scott v. Kuhlmann, 746 F.2d 1377, 1378 (9th Cir. 1984)* (citing 5 Charles Alan Wright & Arthur R. Miller, *Fed. Practice & Proc.*, § 1277 (3d ed. 2019)).

Plaintiffs argue that the statutes should be tolled under the fraudulent concealment, discovery, equitable estoppel, and continuing violation doctrines. ECF No. 68 at 39-44.

1. Fraudulent Concealment and Equitable Estoppel

For fraudulent concealment, a plaintiff must plead facts alleging that (1) the defendant "affirmatively misled it," (2) the plaintiff "had neither actual nor constructive knowledge **[*57]** of the facts giving rise to its claim," and (3) the plaintiff acted diligently "in trying to uncover those facts." *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)* (quoting *Conmar Corp. v. Mitsui & Co. (U.S.A.), Inc., 858 F.2d 499, 502 (9th Cir. 1988)*). "Fraudulent concealment tolling must be pled with particularity under *Fed. R. Civ. P. 9(b)*." *In re Ford Tailgate Litig., No. 11-CV-2953-RS, 2014 U.S. Dist. LEXIS 32287, 2014 WL 1007066, at *8 (N.D. Cal. Mar. 12, 2014)*, *order corrected on* *denial of reconsideration*, *No. 11-CV-2953-RS, 2014 U.S. Dist. LEXIS 199411, 2014 WL 12649204 (N.D. Cal. Apr. 15, 2014)*. Because the equitable estoppel doctrine is interconnected with fraudulent concealment, *see* *Lukovsky v. City and County of San Francisco, 535 F.3d 1044, 1051 (9th Cir. 2008)*, the Court will assess these arguments together.

Plaintiffs have adequately alleged that Defendants "affirmatively misled" them as to whether they could obtain lower prices for bail bonds. *See, e.g.*, CAC ¶ 73 (citing statement on Defendant Aladdin's website claiming that "Aladdin Bail Bonds is authorized to offer an 8% rate in addition to the standard 10%. Nobody has lower prices than Aladdin."); *id.* ¶ 83 (citing statement on Defendant CBAA's website claiming that "[b]ail agents representing a company must charge the same, filed rates"); *id.* ¶ 95 (citing statement "on behalf of [bail agency's] sureties, including Defendants Allegheny Casualty Company and International Fidelity Insurance Company," that "[a]ny agent offering bail at 5% in the State of California is simply acting illegally or deceptively," and alleging that the statement was posted on **[*58]** the agency's website "continuously since at least October 2013"); *id.* ¶ 104-06 (alleging that Defendants retaliated against bail agents who offered rebates); *id.* ¶¶ 124-25 (alleging fraudulent concealment). Defendants argue that these statements are truthful and are not "'above and beyond' facts establishing the alleged conspiracy itself." ECF No. 56 (citing *In re Animation Workers Antitrust Litig., 87 F. Supp. 3d 1195, 1215 (N.D. Cal. 2015)*). But the defendants in *Animation Workers* were alleged to have "discussed the conspiracy in small in-person group meetings, avoided memorializing the scheme in writing, and attempted to keep the conspiracy secret from Plaintiffs," which the court held was passive concealment rather than "affirmative attempts to mislead 'above and beyond' the existence of the conspiracy itself." *87 F. Supp. 3d at 1215*. Here, the CAC alleges that Defendants have not only conspired to fix the price of bail bonds, but have taken affirmative steps to conceal this conspiracy from purchasers by misrepresenting their ability to offer rebates. These allegations are sufficient to allege the first prong of fraudulent concealment.

As for the second, Defendants argue that the statements Plaintiffs allege were affirmatively misleading gave Plaintiffs "constructive knowledge and inquiry **[*59]** notice of the alleged conspiracy." ECF No. 72 at 20. Given the questions of fact around where the statements were made and how a reasonable person in Plaintiffs' shoes would have interpreted them, the Court cannot hold on a motion to dismiss that they provided constructive knowledge. *See* *Lundy v. Union Carbide Corp., 695 F.2d 394, 397 (9th Cir. 1982)* (constructive knowledge is normally a question of fact for the jury). The same is true of whether the Plaintiffs acted diligently to uncover the conspiracy. *See* *In re Rubber Chemicals Antitrust Litig., 504 F. Supp. 2d 777, 789 (N.D. Cal. 2007)* ("As many courts have noted in the antitrust conspiracy context, it is generally inappropriate to resolve the fact-intensive allegations of fraudulent concealment at the motion to dismiss stage, particularly where the proof relating to the extent of the fraudulent concealment is alleged to be largely in the hands of the alleged conspirators."). The Court thus holds that Plaintiffs have pled facts to allege fraudulent concealment.

2. Discovery

Plaintiffs' argument that the discovery rule tolled the Sherman Act statute of limitations is barred as a matter of law because "the U.S. Supreme Court and Ninth Circuit have clearly held that claims under the *Sherman Act* are subject to an injury rule, rather than a discovery rule." *Animation Workers, 87 F. Supp. 3d at 1209*.

It is less clear whether **[*60]** the discovery rule applies to Cartwright Act and UCL claims. The California Supreme Court has rejected the theory that, because Sherman Act claims are not subject to the discovery rule, the same must be true of Cartwright Act claims. *Aryeh v. Canon Bus. Solutions, Inc., 55 Cal. 4th 1185, 1194-95, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)* ("Interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the *Cartwright Act* . . . ."). Defendants cite no case holding the converse. *See* ECF No. 72 at 21 (citing *Hexcel, 681 F.3d at 1060*, which discusses only fraudulent concealment, not the discovery rule, and *Ryan v. Microsoft Corp., 147 F. Supp. 3d 868, 893 (N.D. Cal. 2015)*, which discusses the discovery rule only in the context of UCL claims).

As for UCL claims, the California Supreme Court has held that they are subject to the same accrual rules as "any other statute": while the injury rule is the default, the discovery rule applies "precisely to the extent the preconditions for [its] application are met . . . ." *Aryeh, 55 Cal. 4th at 1196*; *but see* *Animation Workers, 87 F. Supp. 3d at 1211* (describing *Aryeh* as explaining that "the discovery rule might be appropriate for misrepresentation or fraud claims, but not in unfair competition claims"). The Court thus cannot hold that Plaintiffs' discovery rule argument as to their Cartwright Act and UCL claims is barred as a matter of law.

The discovery rule in California **[*61]** requires the plaintiff to plead facts "which show (1) the time and manner of discovery and (2) the inability to have made earlier discovery despite reasonable diligence . . . . However, mere conclusory assertions that delay in discovery was reasonable are insufficient." *In re Conseco Ins. Co., No. C-05-04726 RMW, 2008 U.S. Dist. LEXIS 111497, 2008 WL 4544441, at *8 (N.D. Cal. Sept. 30, 2008)* (internal citations omitted); *see also* *Asghari v. Volkswagen Grp. of Am., Inc., 42 F. Supp. 3d 1306, 1320-21 (C.D. Cal. 2013)*. To invoke the discovery rule, each Plaintiff must allege the time and manner by which she discovered the cause of action. *See* *Philips v. Ford Motor Co., No. 14-CV-02989-LHK, 2015 U.S. Dist. LEXIS 88937, 2015 WL 4111448, at *7 (N.D. Cal. July 7, 2015)*; *In re Conseco, 2008 U.S. Dist. LEXIS 111497, 2008 WL 4544441, at *9* (citing *Community Cause v. Boatwright, 124 Cal. App. 3d 888, 900, 177 Cal. Rptr. 657 (Cal. Ct. App. 1981)*). Relatedly, each Plaintiff must also show that she acted reasonably and diligently. *Plumlee v. Pfizer, Inc., No. 13-CV-00414-LHK, 2014 U.S. Dist. LEXIS 121634, 2014 WL 4275519, at *6 (N.D. Cal. Aug. 29, 2014)*, *aff'd*, *664 F. App'x 651 (9th Cir. 2016)*.

Plaintiffs here allege the time of discovery ("no earlier than January 2, 2019," CAC ¶ 124) and the inability to have made discovery earlier despite reasonable diligence ("Plaintiffs and the Class also lacked the specialized economic and industry knowledge necessary to discover the conspiracy sooner despite the exercise of reasonable due diligence," *id.*). Plaintiffs do not, however, allege the manner of discovery. Should they wish to rely on this argument in the future, they should amend the complaint **[*62]** accordingly. *See* *Gerstle v. Am. Honda Motor Co., No. 16-cv-04384-JST, 2017 U.S. Dist. LEXIS 100580, 2017 WL 2797810, at *7 (N.D. Cal. June 28, 2017)*.

3. Continuing Violation

The continuing violation doctrine holds that, "[i]n the context of a continuing conspiracy to violate the antitrust laws, . . . each time a plaintiff is injured by an act of the defendant[ ] a cause of action accrues to him to recover the damages caused by that act." *Solo v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)* (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*). The statute of limitations restarts with each "new overt act that: (1) is 'new and independent ... [and] not merely a reaffirmation of a previous act,' and (2) 'inflict[s] new and accumulating injury on the plaintiff.'" *Id.* (quoting *Pace Indus., Inc. v. Three Phoenix Co., 813 F.2d 234, 238 (9th Cir. 1987)*). "[E]ach time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act." *Id.* (citing *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* and *Hennegan v. Pacifico Creative Serv., Inc., 787 F.2d 1299, 1301 (9th Cir. 1986)*).

The CAC alleges that "Plaintiffs and Class members have been forced to pay inflated bail bond premiums." CAC ¶¶ 128, 141. Under this theory, each sale of a bail bond that was artificially inflated as a result of the alleged conspiracy thus constitutes an overt act restarting the statute of limitations. Because Plaintiffs have alleged that bail bonds are continuously **[*63]** sold in California, *see, e.g., id.* ¶¶ 3, 114, they have sufficiently alleged continuing violations for the purposes of tolling.

4. Danielson National Insurance Company

Defendant Danielson National Insurance Company ("DNIC") makes an additional argument that, because it "exited the bail bond industry prior to the limitations period," all claims against it should be dismissed. ECF No. 58 at 23-24. Because Plaintiffs argue that their claims against DNIC are timely under the fraudulent concealment and discovery doctrines, ECF No. 68 at 44, and because withdrawal from a conspiracy is an affirmative defense, *TFT-LCD, 820 F. Supp. 2d 1055, 1060 (N.D. Cal. 2011)*, the application of which Plaintiffs dispute, Danielson's motion on this point is also denied.

CONCLUSION

For the foregoing reasons, the Court grants Defendants' joint motion to dismiss Plaintiffs' Sherman Act claim regarding the filing of uniform premium rates. This claim is dismissed with prejudice. The Court denies the motion as to Plaintiffs' Sherman and Cartwright Act claims regarding rebating, their Cartwright Act claim regarding uniform rate filing, and their UCL claim. As for the consolidated motion to dismiss the claims against certain Defendants, the Court grants the motion to **[*64]** dismiss all claims as to the surety Defendants, the bail agency Defendants, ABC, and GSBAA, with leave to amend, and denies it as to CBAA and the individual Defendants. Lastly, the Court denies the motion to dismiss Plaintiffs' pre-2015 claims.

Plaintiffs may file an amended complaint within 30 days of this order that addresses the deficiencies identified herein.

IT IS SO ORDERED.

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] Summary Judgment, Entitlement as Matter of Law

On review of a summary judgment proceeding, the standard to be applied by an appellate court is identical to that employed by the trial court. This means that the inferences to be drawn from the underlying facts alleged in the materials (such as depositions, answers to interrogatories, admissions and affidavits) considered by the court in making its determination must be viewed in the light most favorable to the party opposing the motion. Further, in considering the validity of the granting of summary judgment under *Haw. R. Civ. P. 56(c)*, the appellate court must determine whether any genuine issue as to a material fact was raised and, if not raised, whether the moving party was entitled to judgment as a matter of law.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Governments > Legislation > Interpretation

Labor & Employment Law > ... > Employment Contracts > Conditions & Terms > Trade Secrets & Unfair Competition

HN2[] Trade Practices & Unfair Competition, State Regulation

As a general rule, any contract that is in restraint of trade or commerce, is illegal. *Haw. Rev. Stat. § 480-4(a)*. *Haw. Rev. Stat. § 480-4* is a remedial statute, and as such should be liberally construed to suppress the perceived evil and advance the enacted remedy. However, *Haw. Rev. Stat. § 480-4(c)* contains exceptions to the general rule. Exceptions or exclusions to a remedial law are narrowly construed.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Labor & Employment Law > ... > Employment Contracts > Conditions & Terms > Trade Secrets & Unfair Competition

HN3[] Trade Practices & Unfair Competition, State Regulation

The Hawaii Supreme Court has concluded that the exceptions listed in *Haw. Rev. Stat. § 480-4(c)* are not exclusive. Rather, restrictive covenants should be evaluated, in much the same way that federal courts would, in Section 1 Sherman Act Cases, analyze such covenants. Thus, the court adopted federal case analysis which applied a rule of reason test to determine the validity of restrictive covenants, which in turn considered three factors: Generally courts will find a restrictive covenant not reasonable, and therefore invalid, if: (i) it is greater than required for the protection of the person for whose benefit it is imposed; (ii) it imposes undue hardship on the person restricted; or (iii) its benefit to the covenantee is outweighed by injury to the public. This reasonableness analysis is done by the court, as a matter of law.

Opinion

MEMORANDUM OPINION

I.

In this consolidated appeal,[1] Plaintiff-Appellant Prudential Locations LLC (**Locations**), appeals from the following orders entered by the First Circuit Court (**Circuit Court**):[2]

In CAAP-16-0000890,

(1) the August 25, 2016 "Findings of Fact, Conclusions of Law, and Order [(**FFCLO)**] Denying [Locations's] Motion for Partial Summary Judgment [(**MPSJ**)] Against [Defendant-Appellee] Lorna Gagnon [(**Gagnon**)]";

(2) the August 25, 2016 "[FFCLO] Granting Defendants [Appellees Gagnon] and Prestige Realty Group Limited Liability Company's [(**Prestige**)] Cross-Motion for Summary Judgment [(**XMSJ**)] on the First Amended Complaint of [Locations]";

(3) the August 25, 2016 "[FFCLO] Granting [Defendants-Appellees RE/MAX LLC (**RE/MAX**)] and **[*2]** Lorraine Clawson's [(**Clawson**)] [XMSJ] Against [Locations]";

(4) the November 1, 2016 "Order Denying [Locations's] Motion for Leave to File Second Amended Complaint" (**SAC**);

(5) the November 7, 2016 "Order Granting Defendant [RE/MAX's] Motion for Protective Order as to the Deposition of Tim Burns [(**Burns**)] Noticed for September 14, 2016, Filed September 2, 2016";

(6) the November 15, 2016 "Order Denying [Locations's] Motion to Compel";[3]

---

[1] On May 2, 2017, this court consolidated CAAP-17-0000216 into CAAP-16-0000890.

[2] The Honorable Karl K. Sakamoto presided. The Honorable Virginia Lea Crandall entered an order addressing the renewed motion for attorneys' fees and costs and Final Judgment.

[3] The order also denied Locations's Hawai'i Rules of Civil Procedure (**HRCP**) *Rule 56(f)* request for discovery continuance.

(7) the December 9, 2016 Judgment;

(8) the December 28, 2016 "Order Granting in Part and Denying in Part [Gagnon and Prestige's] Motion for Award of Attorney's Fees and Costs [(**MFC**)] Against [Locations]"; and

(9) the December 28, 2016 "Order Denying [RE/MAX and Clawson's] Motion to Recover Attorneys' Fees and Costs Pursuant to [Hawaii Revised Statutes (**HRS**)] §§ 607-9, 607-14, and 607-14.5".
In CAAP-17-0000216, Locations appealed from
(1) the March 3, 2017 "Order Granting in Part and Denying in Part [RE/MAX and Clawson's] Renewed Motion for Award of Attorneys' Fees and Costs Against [Locations]"; and
(2) the March 22 2017 "Final Judgment".

Locations contends that the Circuit Court erroneously determined that the Agreement Not to Compete (**Non-Compete Clause**) contained as Paragraph 3 of the Confidentiality **[*3]** and Non-Competition Agreement (**CNA**) signed by Gagnon was invalid and unenforceable; improperly denied Locations leave to file a second amended complaint; abused its discretion in denying discovery; and abused its discretion in awarding attorneys' fees to RE/MAX and Clawson.

II.

A.

Locations is a real estate brokerage firm in Hawai'i. Gagnon started working in real estate in 1989, as a sales person, in New Hampshire. In 1999 she became a licensed real estate broker. From 2003 to 2008, Gagnon owned and operated a RE/MAX franchise in New Hampshire. Gagnon and her five children moved to Hawai'i from New Hampshire on July 1, 2008.

Locations offered and Gagnon accepted a "Sales Coach" position by letter dated August 6, 2008. As a Sales Coach, Gagnon mentored and monitored Locations's agents' engagement with the company, discussed Locations's agents' plans for business and personal challenges and assisted Locations's agents' growth as real estate sales professionals by developing sales skills, role playing, and setting sales goals and ways to achieve those goals. On August 8, 2008, Gagnon signed the CNA[4] that is at issue here.

---

[4] CONFIDENTIALITY AND NON-COMPETITION AGREEMENT

THIS CONFIDENTIALITY AND NON-COMPETITION AGREEMENT (the "Agreement"), **[*4]** is made and entered into as of the date set forth below, by and between Prudential Locations Real Estate LLC, a [Hawai'i] limited liability company, the employer described below ("Company") and the employee described below ("Employee").

1. <u>Recitals</u>.

1.1 The primary business of the Company is to provide real estate brokerage and/or property management services in the State of [Hawai'i], hereinafter collectively referred to as the "Business".

1.2 The Business involves confidential and proprietary information and procedures and trade secrets of the Company and its subsidiaries, and such Information is a special, valuable and unique asset of the Business.

1.3 Employee is employed by the Company and will have access to such confidential and proprietary information, procedures and trade secrets of the Company.

1.4 Employee, in consideration of future employment, agrees to enter into this Agreement for the protection of the Business.

NOW, THEREFORE, the parties hereto, intending to be legally bound hereby, do promise and agree as follows:

On June 28, 2013, Gagnon submitted a resignation letter to Locations's Executive Vice President of Sales, Scott

---

2. Confidentiality and Proprietary Rights. Employee acknowledges and agrees that he or she will have access to confidential and proprietary information and procedures **[*5]** and trade secrets of the Company and its subsidiaries, and that such information is a special, valuable and unique asset of the business of the Company and its subsidiaries. Employee further acknowledges and agrees that such confidential and proprietary Information and procedures and trade secrets belonging exclusively to the Company includes, without limitation, the following: (i) any information which is not generally known to the public which was or is used, developed, made or obtained by the Company or any of its subsidiaries or which otherwise came into possession of the Company or any of its subsidiaries or which relates to the Company or any of its subsidiaries, (ii) all memoranda, files, books, papers, letters, drawings, documents, formulas, specifications, investigations, and other processes data, and all copies thereof and therefrom, in any way relating to the Company or any of its subsidiaries, whether used, developed, made or obtained by the Company or any of its subsidiaries or which otherwise came into the possession of the Company or any of its subsidiaries; (iii) all information related to clients and customers, including without limitation, clients and customer lists, **[*6]** the identities of existing, past and prospective clients and customers, prices charged or proposed to be charged to any existing, past or prospective client or customer, client or customer contacts, special customer requirements, and all related information; (iv) sales and marketing strategies, plans, materials and techniques, research and development information, trade secrets and other know-how or other information pertaining to the financial condition, business, research and development or prospects of the Company or any of its subsidiaries; and (v) patterns, devices, compilations of information, copyrightable material and technical information, if any, in any way relating to the Company or any of its subsidiaries (hereinafter collectively referred to as the "Confidential Information").

2.1 Restriction on Use of Confidential Information. Employee agrees that, except in performance of duties under an employment arrangement with the Company, Employee **shall not** directly or indirectly, at any time or place, during his or her employment and at anytime after Employee ceases to be an employee for any reason whatsoever, use for his or her own benefit or for the benefit of any third party, **[*7]** or disclose to any third party, any Confidential Information acquired by reason of his or her status as an employee or former employee of the Company, including without limitation, Confidential Information belonging or relating to the Company or Its subsidiaries, affiliates and customers. Employee agrees that the duration, geographic area and scope of this provision is reasonably necessary for the protection of the Company and does not and will not impose undue hardship on Employee.

3. Agreement Not To Compete. Employee agrees that Employee shall not, directly or indirectly, within the State of [Hawai'i] where the Company conducts or has conducted business, during his or her employment and for a period of one (1) year after Employee ceases to be an employee for any reason whatsoever, (i) represent, furnish consulting services to, be employed by, or engage or participate in the same or similar business or businesses conducted by the Company, including without limitation, the Business, or perform services for third parties which are generally comparable or competitive with those performed by the Company with respect to the Business ("Comparable Services"), (ii) own or operate, or become **[*8]** proprietor, partner, principal, agent, consultant, employee, trustee, director, officer, stockholder or Investor, of any person, firm or business which engages or participates in the same or similar business or businesses conducted by the Company, including without limitation, the Business, or which performs Comparable Services, (iii) engage in any activity or conduct adverse to the Business or interests of the Company, or (iv) induce or encourage any other persons employed or affiliated with the Company to terminate their relationship with the Company. Notwithstanding the foregoing, Company agrees that the Employee may, independently or as an employee or independent contractor of an existing real estate brokerage company act as a real estate salesperson or broker/salesperson, and such conduct shall not constitute a violation of this paragraph (the "Permitted Activities"). Permitted Activities however shall not include (i) Employee's formation of a real estate brokerage company with other real estate salesperson(s), (ii) Employee's solicitation of other persons employed or affiliated with the Company.

4. Remedies of Company. Employee and Company hereby acknowledge and agree that the **[*9]** duration, scope and geographic area applicable to the restrictions set forth in this Agreement are fair, reasonable and necessary, and represent the area in which the goodwill associated with the conduct of the Business has been or will be developed by the Company. It is the intent of the parties that the provisions of this Agreement shall be enforced to the fullest extent permissible under the laws and public policies of the State of [Hawai'i]. Employee and Company agree that (i} a monetary remedy for a breach of this Agreement will be inadequate, and will be impracticable and extremely difficult to prove, and further agrees that such a breach would cause the Company irreparable harm, and that the Company shall be entitled to temporary and permanent injunctive relief without the necessity of proving actual damages, and (ii) the Company shall be entitled to such injunctive relief, including temporary restraining orders, preliminary injunctions and permanent injunctions, without the necessity of posting bond or other undertaking in connection therewith.

Higashi (**Higashi**). Gagnon's **[*10]** letter stated that her last day of employment would be July 3, 2013. According to Gagnon, she discussed her resignation with Higashi, who asked her to remain with Locations until August 15, 2013.

At some point in time, Gagnon and Clawson began discussing Gagnon opening a new RE/MAX franchise in Hawai'i. On July 3, 2013, Gagnon formally acknowledged receipt of a RE/MAX franchise disclosure document as a prospective RE/MAX franchisee.

On July 15, 2013, Gagnon and Kevin Tengan, who was the manager of Locations's technology department, entered into a RE/MAX franchise partnership agreement. On July 18, 2013, Gagnon, as registered agent and organizer, submitted Prestige's articles of organization to the Hawai'i Department of Commerce and Consumer Affairs (**DCCA**). On July 22, 2013, Gagnon, as a managing member of Prestige, submitted to DCCA an Application for Registration of Trade Name. Several days later, Tengan purchased several domain names for Prestige to develop websites for Oahu and Maui. On August 8, 2013, Gagnon and Tengan executed a RE/MAX franchise agreement.

On August 13, 2013, Gagnon informed Higashi that Sherri Au (**Au**), a Locations agent who had been one of Gagnon's mentees, was **[*11]** terminating her agency relationship with Locations. Gagnon's last day at Locations was August 15, 2013. On August 26, 2013, the Real Estate Commission of DCCA issued to Prestige a Notice of Licensure, authorizing "RE/MAX Prestige" to act as a real estate broker, effective August 15, 2013. Au was listed as the Principal Broker for Prestige in the application for licensure submitted on August 15, 2013. On September 1, 2013, Prestige opened its sole office in Hawai'i Kai.

B.

On August 23, 2013, Locations filed a complaint against Gagnon and Prestige, alleging breach of the CNA and tortious interference with contract by forming Prestige and encouraging others to leave Locations. On May 23, 2014, Locations filed its First Amended Complaint (**FAC**), which added tortious interference with contract claims against RE/MAX and Clawson.

On August 7, 2015, Locations filed a motion for leave to file the SAC to add an unfair method of competition claim against RE/MAX. On October 22, 2015, RE/MAX and Clawson filed their answer and cross-claim against Gagnon and Prestige.[5]

Following discovery, the parties filed MPSJs: on December 22, 2014, Locations filed an MPSJ against RE/MAX and Clawson for a determination **[*12]** that they tortiously interfered with Gagnon and Locations's CNA;[6] on November 17, 2015, Locations filed an MPSJ against Gagnon seeking enforcement of the Non-Compete Clause, a finding that she was in breach of the Non-Compete Clause, and damages; on July 11, 2016, Gagnon and Prestige filed their XMSJ for a determination that the Non-Compete Clause was invalid and unreasonable and that the Non-Solicitation Clause did not apply to agents or independent contractors; and on July 15, 2016, RE/MAX and Clawson filed a XMSJ for a determination that there was no tortious interference with Gagnon's CNA. At the hearing on August 3, 2016, the Circuit Court took these matters under advisement.

On August 23, 2016, Locations filed a notice of taking deposition upon oral examination of Burns (to whom Clawson reported) for September 14, 2016, in Merrillville, Indiana.

On August 25, 2016, the Circuit Court issued the FFCLOs. The court ruled that the Non-Compete Clause was illegal and unenforceable as a matter of law, and that the Non-Solicitation Clause was an illegal restraint on trade or

---

(Emphasis in original).

[5] RE/MAX and Clawson also filed a third-party complaint against Tengan, which was later dismissed by stipulation.

[6] This motion was denied on March 2, 2015 but has not been included in this appeal.

commerce.[7] Locations then filed a motion to compel RE/MAX and Clawson to produce discovery and to produce for deposition Burns, Garrett Matthews (a RE/MAX consultant), and *HRCP Rule 30(b)(6)*[8] designated witness(es).

On September 2, 2016, RE/MAX filed a motion **[*13]** for protective order, arguing that after the Circuit Court's ruling on the MPSJs and XMSJs, no claim remained against RE/MAX and Locations's motion for leave to file a SAC to add an unfair method of competition claim against RE/MAX had not been decided, making discovery on this claim moot.

On November 1, 2016, the Circuit Court denied Plaintiff's motion for leave to file the SAC, explaining that the proposed SAC sought to reassert and relitigate claims identical to those asserted in the FAC, all of which had been dispositively adjudicated through the FFCLOs and, as a result, no claims or parties remained. As Locations's proposed claim for unfair method of competition against RE/MAX was predicated on the validity of the CNA between Locations and Gagnon and having already determined that the Non-Compete Clause was not reasonable and invalid and unenforceable, the Circuit Court ruled that any attempt to add an unfair method of competition claim would be futile and thus, moot.

On November 7, 2016, the Circuit Court granted RE/MAX's motion for protective order and consequently denied Locations's motion to compel.

On November 18, 2016, Gagnon and Prestige filed a MFC. RE/MAX and Clawson filed a MFC pursuant **[*14]** to *HRS §§ 607-9*, *607-14* and *607-14.5*.[9]

Judgment in favor of Defendants Gagnon, Prestige, RE/MAX, and Clawson and against Locations on all claims was entered on December 9, 2016.

On December 28, 2016, the Circuit Court denied without prejudice RE/MAX and Clawson's MFC. The court agreed that they were entitled to reasonable attorneys' fees pursuant to *HRS § 607-14* because the tortious interference claims asserted against them were derived from the breach of contract action against Gagnon and Prestige. However, the court found the requested amount was excessive and unreasonable, and there was insufficient evidence to establish that Locations's claims were frivolous under *HRS § 607-14.5*. The Circuit Court granted in part and denied in part Gagnon and Prestige's MFC, due to, *inter alia*, insufficient evidence to establish that Locations's claims were frivolous under *HRS § 607-14.5*.

Locations filed a timely notice of appeal from the Judgment on December 29, 2016.

On January 9, 2017, RE/MAX and Clawson filed a renewed MFC. A Final Judgment was entered on March 22, 2017, which incorporated the December 9, 2016 Judgment, the December 28, 2016 orders on fees and costs, and added a March 3, 2017 order granting in part and denying in part RE/MAX and Clawson's renewed **[*15]** request for fees and costs.

On March 23, 2017, Locations filed a notice of appeal from the March 22, 2017 Final Judgment.

III.

---

[7] On September 8, 2016, seeking to vacate the FFCLOs, Locations filed a petition for writ of mandamus against Judge Sakamoto, which the Hawai'i Supreme Court denied.

[8] ***HRCP Rule 30(b)(6)*** covers subpoenas to persons designated by an organization to testify as to matters known or reasonably available to the organization.

[9] *HRS § 607-9* provides for taxable costs; *HRS § 607-14* provides for attorneys' fees to the prevailing party in all actions (1) in the nature of assumpsit, (2) on a promissory note, and (3) contract in writing, not to exceed 25 percent of the judgment; *HRS § 607-14.5* provides for attorneys' fees and costs to be paid by either party upon the court's specific finding that all or a portion of the party's claim or defense was frivolous.

Locations asserts that the Circuit Court:

(A) erred in granting summary judgment against Locations in ruling that the Non-Compete Clause: (1) is greater than required for the protection of Locations and that Locations lacks a legitimate interest in enforcing it; (2) imposes an undue hardship on Gagnon; (3) the harm to the public is outweighed by the benefit; and (4) the clause did not fit any of the exceptions listed in *HRS §480-4(c)* (Supp. 2019)[10] and is an illegal restraint on trade or commerce;

(B) erred in determining that all non-solicitation clauses are *per se* against public policy and illegal under *HRS § 480-4*;

(C) abused its discretion: (1) in delaying decision on Locations's motion for leave to file SAC over fourteen months and then denying it after ruling against Locations on summary judgment; (2) refusing to consider Locations's motions to compel; (3) instructing the parties that it would rule on the validity of the Non-Compete Clause on summary judgment prior to allowing discovery of RE/MAX; (4) granting RE/MAX's motion for protective order; (5) considering RE/MAX's untimely renewed MFC; (6) ruling that RE/MAX, **[*16]** who is the target of a tort claim, is entitled to attorney's fees under *HRS § 607-14*; (7) awarding uncapped attorney's fees to Defendants; and (8) denying Locations's *HRCP Rule 56(f)* request.

IV.

A. The Motions for Summary Judgment to Determine the Validity and Enforceability of the Non-Compete Clause

1.

In this case, the parties' motions for summary judgment turned on a single, legal determination: Whether the Non-Compete Clause was reasonable and enforceable, or whether it was an illegal restraint on trade, prohibited by *HRS § 480-4*.[11]

---

[10] *HRS §480-4(c)* is set forth infra p. 10 n.11.

[11] *HRS § 480-4(a) through (c)* provides:

> ***§480-4*** **Combinations in restraint of trade**, **price-fixing [*17] and limitation of production prohibited**. (a) Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce in the State, or in any section of this State is illegal.
>
> (b) Without limiting the generality of *subsection (a)*, no person, exclusive of members of a single business entity consisting of a sole proprietorship, partnership, trust, or corporation, shall agree, combine, or conspire with any other person or persons, or enter into, become a member of, or participate in, any understanding, arrangement, pool, or trust, to do, directly or indirectly, any of the following acts, in the State or any section of the State:
>
> (1) Fix, control, or maintain the price of any commodity;
>
> (2) Limit, control, or discontinue, the production, manufacture, or sale of any commodity for the purpose or with the result of fixing, controlling or maintaining its price;
>
> (3) Fix, control, or maintain, any standard of quality of any commodity for the purpose or with the result of fixing, controlling, or maintaining its price;

> *HN1*[] On review of a summary judgment proceeding, the standard to be applied by this court is identical to that employed by the trial court. Wright & Miller, Federal Practice and Procedure: Civil § 2716. This means that "the inferences to be drawn from the underlying facts alleged in the materials (such as depositions, answers to interrogatories, admissions and affidavits) considered by the court in making its determination must be viewed in the light most favorable to the party opposing the motion." *Gum v. Nakamura, 57 Haw. 39, 549 P.2d 471 (1976)*; *Aku v. Lewis, 52 Haw. 366, 477 P.2d 162 (1970)*; *Abraham v. S. E. Onorato Garages, 50 Haw. 628, 50 Haw. 639, 446 P.2d 821 (1968)*. Further, in considering the validity of the granting of summary judgment under *H.R.C.P. Rule 56(c)*, the appellate court must determine whether any genuine issue as to a material fact was raised and, if not raised, whether the moving party was entitled to judgment as a matter of law. *Abrahm v. Onorato Garages, supra.*

Technicolor, Inc. v. Traeger, 57 Haw. 113, 118-19, 551 P.2d 163, 168 (1976) (ellipsis omitted).

The Non-Compete Clause was part of the CNA drafted by Locations and signed by Gagnon, as a condition of her employment with Locations. As quoted, *supra* at n.4, the Non-Compete Clause forbade Gagnon, for one year after her employment with Locations ceased, in the State of Hawai'i, from performing the Business[12] or "Comparable Services"[13] of Locations for third parties; having virtually any relationship with a "person, firm or business" engaged in the same or similar Business or Comparable Services of Locations; engaging in any conduct adverse to Locations's interests; or inducing or encouraging anyone employed or affiliated with Locations to terminate their relationship with Locations. However, the Non-Compete Clause explicitly allowed Gagnon to act as a real estate salesperson or broker/salesperson for an existing company, so long as she did not form a brokerage company with other real estate salespersons or solicit other persons from Locations. **[*20]** Id.

HN2[] As a general rule, and as pertinent here, any contract that is in restraint of trade or commerce, is illegal. *HRS § 480-4(a)*. *HRS § 480-4* is a remedial statute, *Cieri v. Leticia Query Realty, Inc., 80 Hawai'i 54, 68, 905 P.2d 29, 43 (1995)*, and as such "should be liberally construed to suppress the perceived evil and advance the enacted remedy." *Kalima v. State, 111 Hawai'i 84, 100, 137 P.3d 990, 1006 (2006)* (internal quotation marks omitted).

> > (4) Refuse to deal with any other person or persons for the purpose of effecting any of the acts described in *paragraphs (1) to (3)*.
>
> (c) Notwithstanding *subsection (b)* and without limiting the **[*18]** application of *subsection (a)*, it shall be lawful for a person to enter into any of the following restrictive covenants or agreements ancillary to a legitimate purpose not violative of this chapter, unless the effect thereof may be substantially to lessen competition or to tend to create a monopoly in any line of commerce in any section of the State:
>
> > (1) A covenant or agreement by the transferor of a business not to compete within a reasonable area and within a reasonable period of time in connection with the sale of the business;
> >
> > (2) A covenant or agreement between partners not to compete with the partnership within a reasonable area and for a reasonable period of time upon the withdrawal of a partner from the partnership;
> >
> > (3) A covenant or agreement of the lessee to be restricted in the use of the leased premises to certain business or agricultural uses, or covenant or agreement of the lessee to be restricted in the use of the leased premises to certain business uses and of the lessor to be restricted in the use of premises reasonably proximate to any such leased premises to certain business uses;
> >
> > (4) A covenant or agreement by an employee or agent not to use the trade secrets of the employer or principal **[*19]** in competition with the employee's or agent's employer or principal, during the term of the agency or thereafter, or after the termination of employment, within such time as may be reasonably necessary for the protection of the employer or principal, without imposing undue hardship on the employee or agent.

[12] Defined in the CNA as "real estate brokerage and/or property management services."

[13] Defined in the Non-Compete Clause as services "which are generally comparable or competitive with those performed by [Locations] with respect to the Business."

However, *HRS 480-4(c)* contains exceptions to the general rule. See n.11 *supra*. "Exceptions or exclusions to a remedial law are narrowly construed." *73 Am. Jur. 2d Statutes § 176*.

HN3[] In *Technicolor*, relying primarily on the legislative history of *HRS § 480-4*,[14] the Hawai'i Supreme Court concluded that the exceptions listed in *HRS § 480-4(c)* were not exclusive. Rather, restrictive covenants should be evaluated, "in much the same way that federal courts would, in *Section 1*[] Sherman Act Cases,[15] analyze such covenants." *Technicolor, 57 Haw. at 121-22, 551 P.2d at 170*. Thus, the Technicolor court adopted federal case analysis which applied a "rule of reason" test to determine the validity of restrictive covenants, which in turn considered three factors:

> Generally courts will find a restrictive covenant "not reasonable", and therefore invalid, if:
>
> > (i) it is greater than required for the protection of the person for whose benefit it is imposed; (ii) it imposes undue hardship on the person restricted; **or** (iii) its benefit to the covenantee **[*21]** is outweighed by injury to the public. . . .
>
> This "reasonableness analysis" is done by the court, as a matter of law[.]

Technicolor, 57 Haw. at 122, 551 P.2d at 170 (citation omitted, emphasis added).

2.

Taking these concepts in hand, we review the Non-Compete Clause at issue here.

The Non-Compete Clause prevents Gagnon from engaging in the types of business or services as that of Locations for third parties, for the duration of her employment through one year after leaving Locations, in the State of Hawai'i. Such an agreement not to compete is generally considered a restraint on trade which is prohibited by *HRS § 480-4* unless it qualifies for an exception under *HRS § 480-4(c)*, or it is considered "reasonable" as determined by the court. See *Technicolor, 57 Haw. at 120-22, 551 P.2d at 169-70* (the "'reasonableness analysis' is done by the court, as a matter of law.").

We conclude that the Non-Complete Clause is reasonable. First, it is not "greater than required for the protection" of Locations. Its geographical scope is limited to the State of Hawai'i, and then only where Locations conducts, or has conducted, business. Its one-year duration is no longer than other such covenants approved by Hawai'i courts. See *The 7's Enters. v. Rosario, 111 Hawai'i 484, 486, 143 P.3d 23, 25 (2006)* (three years); *Technicolor, 57 Haw. at 115, 551 P.2d at 166* (three years); see also *Merrill Lynch, Pierce, Fenner & Smith v. McClafferty, 287 F. Supp. 2d 1244 (D. Haw. 2003)* (one-year restriction was valid under Hawai'i law); *UARCO Inc. v. Lam, 18 F. Supp. 2d 1116 (D. Haw. 1998)* (two-year restriction was valid **[*22]** under Hawai'i law). Most importantly, the breadth of the services prohibited, which initially appears co-terminus with the services provided by Locations, was limited as it did not prevent Gagnon from acting as a real estate salesperson or broker/salesperson in Hawai'i, independently or as an employee or independent contractor for an existing real estate firm.

The Non-Compete Clause does not impose undue hardship. Gagnon was not prevented from earning a living -- as an independent broker/salesperson or an independent contractor for an established real estate firm -- from real estate sales or brokerage, beginning immediately after leaving Locations, so long as she did not solicit others affiliated with Locations.

---

[14] See Conf Comm. Report No. 16 on H.B. 27, reprinted in 1961 House Journal at 1067, 1075 (advising that comparable provisions of federal antitrust laws would guide the interpretation and application in light of the economic and business conditions in this State).

[15] The Sherman Antitrust Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal[.]" ***Ch. 647, 26 Stat. 209 (1890)***, as amended, *15 U.S.C. § 1 (1970)*.

Finally, the benefit to Locations does not appear to be outweighed by injury to the public. The terms of the Non-Compete Clause do not deprive the public of Gagnon's services and expertise.

B. The Non-Solicitation Clause Is Valid

Locations argues that the Circuit Court erred in ruling the "Non-Solicitation Clause" contained within the Non-Compete Clause was illegal.

As quoted above, *supra* at n.4, Gagnon was prohibited, without exception, from inducing or encouraging persons employed or affiliated with Locations to terminate their association with Locations. ***HN4***[] Non-solicitation agreements can be lawful **[*23]** even under statutes which forbid non-compete covenants. 3 R. Callmann on Unfair Competition, Trademarks & Monopolies § 16.44 (4th ed. 1983). A non-solicitation clause is not a *per se* violation of federal ***antitrust law***, id. (citing *Aydin Corp. v. Loral Corp., 718 F.2d 897 (9th Cir. 1983))*.

In any event, under *Technicolor*, the non-solicitation clause is reasonable. Like the Non-Compete Clause, its geographic and temporal terms are no more than the anticompetitive provisions evaluated in other Hawai'i cases. Nor does the benefit of the Non-Solicitation Clause to Locations appear to deprive the public of these employees' or associates' services or expertise, which remain available to the public for the time they maintain their relationship with Locations, or if they choose to leave Locations without being solicited by Gagnon.

Thus, we conclude that the anti-solicitation clause was not prohibited by *HRS § 480-4*.

V.

For the foregoing reasons, we vacate the findings of fact, conclusions of law, and orders on the parties' motions for summary judgment, and remand this case to the Circuit Court for further proceedings. Because we hold that the CNA is valid and enforceable, the defendants are no longer the prevailing parties and we vacate the orders granting the defendants' respective motions for attorneys' fees and costs, without **[*24]** prejudice to any party moving for an award of attorneys' fees and/or costs at the appropriate time. We vacate the order denying Locations's motion to file a second amended complaint, without expressing any opinion on whether such a motion should be granted if renewed on remand. We vacate the discovery orders, without expressing any opinion on what discovery should be allowed or not allowed on remand.

DATED: Honolulu, Hawai'i, April 15, 2020.

Opinion

[*1062] OPINION and ORDER

Plaintiff Mountain Crest SRL, LLC, which owns and operates Minhas Brewery in Monroe, Wisconsin, is suing defendants Anheuser-Busch Imbrue SA/NV (ABI) and Molson **[**2]** Coors Brewing Company (Molson Coors) for alleged anticompetitive behavior in Ontario, Canada. The case is now on remand after the Court of Appeals for the Seventh Circuit affirmed in part and reversed in part the judgment dismissing all of Mountain Crest's claims. *See* *Mountain Crest SRL, LLC v. Anheuser-Busch InBev SA/NV, 937 F.3d 1067 (7th Cir. 2019)*.

This court dismissed the case under the act of state doctrine, which prohibits federal courts from invalidating the public acts of a foreign government. The court understood Mountain Crest's challenge to be limited to the so-called "six-pack rule," which prohibits some Ontario liquor stores **[*1063]** from selling larger packs of beer or offering discounts for buying multiple six-packs.[1] Because the six-pack rule is embodied in Ontario law, Liquor Control Act, R.S.O. 1990, c. L.18, § 10(3) (Can.), the act of state doctrine required dismissal.

The court of appeals agreed that the act of state doctrine required dismissal of Mountain Crest's challenge to the six-pack rule. But the court concluded that Mountain Crest was also challenging other conduct not implicated by the act of state doctrine. The court did not determine whether the other challenges should proceed but instead directed "the district court [to] address these claims in due **[**3]** course." *Id. at 1086*.

Now defendants have filed a new motion to dismiss all of the claims remanded by the court of appeals. Dkt. 75. For its part, Mountain Crest moves for reconsideration of the decision that its challenge to the six-pack rule is barred by the act of state doctrine, contending that a new bill by the Ontario legislature undermines that decision. Dkt. 73.

The court isn't persuaded that the bill cited by Mountain Crest requires reconsideration of the holding regarding the six-pack rule, so the court will deny Mountain Crest's motion. As for defendants' motion to dismiss, the court concludes that Mountain Crest hasn't stated a claim upon which relief may be granted. Some of Mountain Crest's claims arise out of injuries caused by the Ontario government's conduct, not defendants' conduct. And the remaining claims relate to conduct by an Ontario cooperative that is not a party to this case. Although Mountain Crest includes conclusory allegations in its complaint that defendants were involved in a conspiracy to control the cooperative to harm American beer exporters, conclusory allegations are not enough to state a claim, especially in a complex lawsuit involving alleged antitrust violations. **[**4]** So the court will grant defendants' motion to dismiss.

BACKGROUND

A full summary of Mountain Crest's allegations may be found in the court of appeals's decision, *Mountain Crest, 937 F.3d at 1069-77*, and in this court's decision granting defendants' original motion to dismiss, Dkt. 60, at 2-9, so only a brief overview of factual and regulatory background is provided here.

Under Ontario law, there are only two places that an individual may purchase beer for off-site consumption in Ontario: (1) stores operated by the Liquor Control Board of Ontario (LCBO); and (2) The Beer Store, which is operated by Brewers Retail Inc. (BRI). The LCBO is a government agency that regulates liquor sales. BRI is a cooperative of Ontario brewers. The primary members of BRI are Labatt Breweries of Canada and Molson Inc. (Canada), which each own 49 percent of the cooperative. Labatt is a subsidiary of defendant ABI and Molson is a subsidiary of defendant Molson Coors.

The LCBO controls the sale and delivery of beer at BRI stores and establishes specific terms and conditions related to the operation of such stores. When the Beer Store and an LCBO store are in the same community, their inventories differ. LCBO "ordinary" stores sell wine and spirits **[**5]** as well as beer in packages of six or fewer; the Beer Store may sell larger packages of beer. This arrangement was reflected in a 2000 agreement between BRI and LCBO and is now codified in a 2015 Ontario law.

[*1064] Mountain Crest entered the Ontario beer market in 2009. Since then, Mountain Crest alleges that its ability to sell its beer in Ontario has been unfairly restricted, both at LCBO stores and at the Beer Store. As for the LCBO, Mountain Crest says that the six-pack rule is harmful, especially to a "value beer" such as Mountain Crest, because it prevents Mountain Crest from offering discounts on purchases for larger quantities of beer. Mountain Crest says

[1] *See* Dkt. 60, at 10 n.3 ("[B]oth sides have assumed in their briefing that Mountain Crest's claims under the Sherman Act are limited to restrictions on selling larger packs of beer and pack-up pricing, so the court has made the same assumption.").

that defendants are responsible for the six-pack rule because they pressured the LCBO into adopting the rule, using tactics that are prohibited under ***antitrust law***. As for the Beer Store, Mountain Crest says that the stores are stocked and laid out in a way that discriminates against Mountain Crest and other American brands not owned by defendants.

MOTION FOR RECONSIDERATION

Mountain Crest seeks reconsideration of the portion of this court's decision that was affirmed by the court of appeals. Dkt. 73. Specifically, Mountain Crest says **[**6]** that the act of state doctrine has no application to this case in light of a bill passed by the Ontario legislature in June 2019.

The parties disagree about whether Mountain Crest is entitled to a consideration of the merits of its motion. Mountain Crest cites footnote 78 of the court of appeals's decision, in which the court declined to consider any effect that the bill might have, stating instead that "the most expeditious manner of evaluating this development is to permit the district court to address it on remand." *Mountain Crest, 937 F.3d at 1085*. Defendants don't directly address footnote 78, but they contend that Mountain Crest must still meet the requirements of either *Rule 59* or *Rule 60 of the Federal Rules of Civil Procedure* if it wants to disturb the judgment. *Rule 59* motions must be brought within 28 days of entering judgment, and *Rule 60* motions must be brought within one year or "within a reasonable time," depending on which provision is at issue. Defendants contend that Mountain Crest has failed to meet any of those deadlines.

Rule 59 and *Rule 60* apply only to final judgments. After the court of appeals remanded the case, "the earlier final judgment became interlocutory. What had been a judgment on all claims in the case became a judgment on only some claims. And without a *Rule 54* certification, **[**7]** that judgment was not final." *Carmody v. Bd. of Trustees of Univ. of Illinois, 893 F.3d 397, 408 (7th Cir. 2018)*. So the court need not determine whether Mountain Crest's motion complied with the time limits in *Rule 59* or *Rule 60*. Rather, the more appropriate question is whether reconsideration is permitted by the mandate rule and the law of the case doctrine, which "prohibit a district court from revisiting on remand any issues expressly or impliedly decided on appeal." *United States v. Fox, 783 F. App'x 630, 632 (7th Cir. 2019)*. In this case, the court of appeals did decide that the act of state doctrine precluded some of Mountain Crest's claims. But footnote 78 appears to give this court permission to consider the June 2019 bill, so that is what the court will do. *See also* *Carmody, 893 F.3d at 408* ("[T]he law-of-the-case doctrine may yield if an intervening change in the law, or some other special circumstance, warrants reexamining the claim." (internal quotation marks omitted)).

Mountain Crest attached a copy of the bill to its motion. Dkt. 73-1. The bill "enacted an amendment to the Liquor Control Act terminating the 2015 Agreement," but "[t]he effective date of the termination is to be announced by the province's Lieutenant Governor" and "this date has not yet been announced." *Mountain Crest, 937 F.3d at 1077*.

The court is not persuaded that a bill that has not been given legal effect **[**8]** is **[*1065]** enough to require a different result in this case. The court of appeals described the act of state doctrine as "a judicial rule that generally forbids an American court to question the act of a foreign sovereign that is lawful under that sovereign's laws." *Id. at 1080* (internal quotation marks omitted). The court articulated a two-part test for determining whether the doctrine applied in this case: (1) "whether the six-pack rule is attributable to the government of Ontario for the purposes of the act of state doctrine"; and (2) "whether a decision in Mountain Crest's favor would invalidate those acts." *Id. at 1083*. The court concluded that the answer to both questions was "yes."

The June 2019 bill, even once it takes effect, does not change the answer to either question. The six-pack rule is still attributable to the government of Ontario and a decision in Mountain Crest's favor would still invalidate acts of the Ontario government. Mountain Crest doesn't argue otherwise, and it doesn't point to any portion of the court of appeals's decision that is undermined by the bill. The court will deny Mountain Crest's motion for reconsideration.

MOTION TO DISMISS

Mountain Crest is raising claims under *Section 1* and *Section 2* of the **[**9]** Sherman Act as well as a claim for unjust enrichment under Wisconsin common law. *Section 1* applies to conspiracies in restraint of trade. *15 U.S.C. § 1*. *Section 2* applies to monopolies. *15 U.S.C. § 2*. Although *§ 1* and *§ 2* are criminal laws, "any person . . . injured in his business or property" because of a violation of those laws may bring a civil action. *15 U.S.C. § 15(a)*.

The court of appeals identified two types of conduct alleged in the complaint that are not barred by the act of state doctrine: (1) "antecedent and allegedly deliberate acts to bring about the six-pack rule"; and (2) "a pattern of other marketing and distribution practices that . . . disfavor[ed] American products, including Mountain Crest's product." *Mountain Crest, 937 F.3d at 1086*. Defendants' motion to dismiss challenges Mountain's Crest's claims based on both types of conduct.[2]

A. Acts leading up to the six-pack rule

The court of appeals identified three acts discussed in the complaint related to alleged attempts to promote the six-pack rule. First, Labatt Breweries of Canada and Molson Inc. (Canada) pressured the LCBO through a group boycott, restricting the supply of beer to the LCBO. Second, Anheuser-Busch and Molson Coors threatened **[*1066]** to sue the LCBO under the North American **[**10]** Free Trade Agreement. Third, BRI offered small ownership stakes to all Ontario-based brewers to dissuade them from opposing the six-pack rule. Although defendants seek dismissal of all three claims, Mountain Crest discusses only the group boycott in its opposition brief, so the court will assume that Mountain Crest has abandoned any challenges based on defendants' threat to sue or offer of ownership stakes.[3]

The court of appeals described the alleged boycott as follows: "Labatt and Molson refused to supply additional six packs of beer beyond what the LCBO already had, to provide packages of their beer in cases larger than a six pack, or to provide any beer in cans." *Mountain Crest, 937 F.3d at 1073*. Defendants' arguments for dismissing the group boycott claim focus on the LCBO's involvement: the boycott doesn't give rise to an antitrust claim against defendants because the boycott did not harm Mountain Crest, and the only alleged indirect harm—the six-pack rule—was imposed by the LCBO and the Ontario government, not defendants. Defendants rely on several related doctrines to make this argument.

1. *Noerr-Pennington* doctrine

Defendants invoke the *Noerr-Pennington* doctrine, which "extends absolute immunity under the antitrust **[**11]** laws to businesses and other associations when they join together to petition legislative bodies, administrative agencies, or courts for action that may have anticompetitive effects." *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 841 (7th Cir. 2011)* (internal quotation marks and citations omitted).[4] Because Mountain Crest is alleging

---

[2] In addition to challenging the merits of Mountain Crest's claims, defendants raise secondary and relatively brief arguments about whether the United States is the proper forum for this case under the doctrines of comity and forum non conveniens. But defendants' comity argument rests entirely on a test that neither the Supreme Court nor the Court of Appeals for the Seventh Circuit has adopted. *See* *In re Vitamin C Antitrust Litig., 837 F.3d 175, 183 (2d Cir. 2016)*, *vacated and remanded sub nom.* *Animal Sci. Prod., Inc. v. Hebei Welcome Pharm. Co., 138 S. Ct. 1865 201 L. Ed. 2d 225 (2018)*. And defendants' forum non conveniens argument is not well developed. So the court concludes that defendants have not satisfied their "heavy burden" to show that Mountain Crest should have filed this case in Canada rather than in Mountain Crest's home district. *See* *In re Factor VIII or IX Concentrate Blood Products Litigation, 484 F.3d 951, 955-56 (7th Cir. 2007)* ("[W]hen the plaintiff has sued in his or her home forum, there is a strong presumption in favor of that choice. Under those circumstances, a defendant invoking forum non conveniens bears a heavy burden in opposing the plaintiff's chosen forum." (internal quotation marks, citations, and alterations omitted)).

[3] Even if Mountain Crest hadn't abandoned those aspects of its claim, the court would conclude that they fail for the same reasons as the challenge to the group boycott.

that defendants were using the boycott to influence the LCBO, defendants say that they are entitled to immunity under *Noerr-Pennington*.

Mountain Crest says that *Noerr-Pennington* doesn't apply when a defendant's conduct is a group boycott, citing *Federal Trade Commission. v. Superior Court Trial Lawyers Association, 493 U.S. 411, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)* (*SCTLA*). Mountain Crest is right, but only to a point.

In *SCTLA*, an association of criminal defense lawyers refused to represent any more clients for the District of Columbia until the district enacted legislation that increased the lawyers' compensation. The federal government sued, contending that the association's conduct was a group boycott that qualified as a restraint of trade. The Supreme Court agreed and rejected the association's assertion of immunity under *Noerr-Pennington*. The Court explained that *Noerr-Pennington* applies when "the alleged restraint of trade was the intended *consequence* of public action;" it does not apply when a "boycott was the *means* by which [the **[**12]** defendants] sought to obtain favorable legislation." *Id. at 424-25*. Applying that principle to the case before it, the Court observed that "[t]he restraint of trade that was implemented while the boycott lasted would have had precisely the same anticompetitive consequences during that period even **[*1067]** if no legislation had been enacted." *Id. at 425*.

SCTLA makes it clear that defendants aren't entitled to immunity for a claim based on harm caused by the alleged boycott itself. The Court of Appeals for the First Circuit has stated the rule succinctly: "private actors who conduct an economic boycott violate the Sherman Act and may be held responsible for direct marketplace injury caused by the boycott, even if the boycotters' ultimate goal is to obtain favorable state action." *Sandy River Nursing Care v. Aetna Cas., 985 F.2d 1138, 1142 (1st Cir. 1993)*. So if Mountain Crest could point to an injury caused by the boycott, it could seek damages for the boycott. But Mountain Crest hasn't done that. After all, the alleged boycott wasn't against Mountain Crest, it was against the LCBO. And the boycott involved defendants withholding their *own* products from the LCBO, not Mountain Crest's products. Mountain Crest identifies no way it suffered as a result of that alleged conduct. If anything, limiting **[**13]** the supply of defendants' beer would give Mountain Crest an opportunity to sell more beer to the LCBO.

As the court of appeals recognized, Mountain Crest's challenge to the boycott "raise[s] significant questions of causality." *Mountain Crest, 937 F.3d at 1086*. Mountain Crest's theory is not that it was harmed directly by the boycott but that the boycott induced the LCBO to enact the six-pack rule, which limited Mountain Crest's sales by preventing it from providing discounts for higher-volume sales. But Mountain Crest can't challenge the six-pack rule directly because of the act of state doctrine. So the question is whether Mountain Crest can maintain an antitrust claim based on an alleged group boycott that caused it no direct harm but that Mountain Crest says set off a chain of events that hurt Mountain Crest's sales in Ontario.

SCTLA provides little guidance in answering that question because there were no issues of causation in that case. The plaintiff was representing the interests of the District of Columbia, which was directly harmed by the group boycott. Other cases more similar to this one suggest that a private defendant cannot be held liable for an alleged antitrust violation when the harm was caused directly **[**14]** by the government, even if the defendant "improperly" influenced the government. In that situation, the government's conduct is a supervening cause that breaks the link between the defendant and any injury the plaintiff suffered. *See* *Associated Bodywork & Massage Professionals v. Am. Massage Therapy Ass'n, 897 F. Supp. 1116, 1120 (N.D. Ill. 1995)* ("Although Defendant may have encouraged the legislatures' actions, the choice to enact massage therapy regulations constituted an independent governmental choice, comprising a supervening 'cause,' and breaking the link between Defendant's actions and any injury Plaintiff may have suffered."); 1A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** § 202c (4th ed. 2015).

Sandy River Nursing Care is a good example. In that case, the plaintiffs alleged that a group of insurance companies used a group boycott to coerce the state legislature into allowing them to charge higher rates for

---

[4] The doctrine gets its name from two Supreme Court cases that applied it, *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*.

workers' compensation insurance. When a group of employers sued the insurers for antitrust violations, the court concluded that the boycott was a restraint of trade and that *Noerr-Pennington* did not provide immunity for the boycott. But, as in this case, the plaintiffs in *Sandy River Nursing Care* weren't claiming damages for the boycott itself. *985 F.2d at 1143*. Rather, they contended that the boycott **[**15]** coerced the state legislature into allowing **[*1068]** higher rates, which the defendants then imposed. The court rejected that claim, holding that the legislation was an act of the legislature, not the insurers. The court also rejected the argument that the higher rates could be attributed to the insurers because they used "unlawful activity to coerce the favorable legislation," reasoning that the legislature's motive was irrelevant. *Id. at 1144*.

Sandy River Nursing Care is not identical to this case because the court relied on the principle that the "Sherman Act d[oes] not apply to anticompetitive restraints imposed by the States 'as an act of government.'" *Id.* (quoting *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991))*. But that principle, which is called "state action immunity," is similar to the act of state doctrine. Both doctrines rest on the principle that the Sherman Act doesn't reach conduct of a sovereign, whether domestic or foreign. The important point is the same: there is no liability under the Sherman Act when the "only anticompetitive injuries that [the plaintiff] complains of are the direct result of governmental action." *Sessions Tank Liners, Inc. v. Joor Mfg., Inc., 17 F.3d 295, 300-01 (9th Cir. 1994)*.

This is not simply an issue of immunity. Rather, it is a basic question of causation. *See* Arreda & Hovenkamp ¶201a **[**16]** ("Setting aside the Constitution and the substantive meaning of the statute, when the anticompetitive harm results from the government action . . . then the government itself becomes the 'cause' of action."). The court in *Sessions Tank* recognized this. Allowing parties to assert antitrust claims for private conduct alleged to have caused the government to impose a restraint of trade "would entail deconstructing the decision-making process to ascertain what factors prompted the various governmental bodies to erect the anticompetitive barriers at issue." *Id. at 301*.

In this case, the deconstruction process would be complicated by an additional factor. Specifically, when Mountain Crest entered the Ontario market in 2009, it had already been nine years since the LCBO had officially adopted the six-pack rule in the 2000 agreement.[5] And Mountain Crest doesn't contend that defendants can be held liable for anything that happened before 2000. So this is not a situation in which the plaintiff is alleging that a group boycott caused the government to *adopt* an anticompetitive policy. In other words, Mountain Crest's theory is not that defendants' alleged group boycott caused any change in government policy; **[**17]** rather, Mountain Crest's theory is that the boycott persuaded the Ontario government to retain a policy that had already been in place for nearly a decade, if not longer. *See Hughes v. Liquor Control Bd. of Ontario*, 2018 CarswellOnt 3969, para. 157 (Can. Ont. S.C.J.) (WL) ("The LCBO would have needed the Provincial Government's approval to change this status quo, and the Government refused to grant such approval."). This makes the alleged causal connection between defendants' conduct and Mountain Crest's harm even more attenuated than in other cases involving the *Noerr-Pennington* doctrine.

[*1069] So Mountain Crest is correct that the *Noerr-Pennington* doctrine does not provide unequivocal support to defendants because, under *SCTLA*, a group boycott against the government is not entitled to immunity. But, as the other cases and authorities cited above demonstrate, *Noerr-Pennington* is about more than simply immunizing protected conduct. It is also a recognition of both the evidentiary and policy-based reasons for limiting antitrust liability when anticompetitive harm is the direct result of government action. Applying those reasons to the facts **[**18]** of this case supports a conclusion that Mountain Crest cannot maintain an antitrust claim against defendants based on the group boycott. But the court need not rest its decision on *Noerr-Pennington* because there are other causation doctrines that point to the same result.

---

[5] In fact, as noted in one of the attachments to Mountain Crest's complaint, even in 2000, the LCBO recognized that the six-pack rule was "[c]onsistent with historical practice." Dkt. 49-14. *See also Hughes v. Liquor Control Bd. of Ontario*, 2018 CarswellOnt 3969, para. 157 (Can. Ont. S.C.J.) (WL) *aff'd* 145 O.R.3d 401 (Can. Ont. C.A.). ("The 2000 Beer Framework Agreement did not change much in the way that the LCBO and Brewers Retail each operated. . . . Both before and after the Agreement was adopted, government policy precluded the LCBO from selling 12-packs and 24-packs at Ordinary Stores.").

2. Other causation doctrines

Apart from their reliance on *Noerr-Pennington*, defendants say that there are three other causation-related problems for any antitrust claim based on the group boycott: (1) Mountain Crest's injury is not "fairly traceable" to defendants' conduct, as required by Article III of the Constitution; (2) Mountain Crest has not satisfied the requirements for an "antitrust injury," as required for its claims under both *§ 1* and *§ 2* of the Sherman Act; and (3) Mountain Crest has not satisfied the requirement in the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA), *15 U.S.C. § 6a*, to allege a "direct" injury on domestic export commerce.

Defendants' first argument is about constitutional standing, which requires the litigant to show that he has suffered a concrete and particularized injury that is fairly traceable to the defendants' conduct and is likely to be redressed by a favorable judicial decision. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. Defendants rely on the proposition that **[**19]** the plaintiff's injury is not fairly traceable to the defendant if the injury is "the result of the independent action of some third party not before the court." *Id.* (internal quotation marks and alterations omitted). Defendants say that Mountain Crest's injury is the result of the LCBO, not defendants, so Mountain Crest doesn't have standing. Mountain Crest doesn't respond to this argument in its opposition brief; it doesn't address constitutional standing at all. That could be reason enough to dismiss this claim. *Kirksey v. R.J. Reynolds Tobacco Co., 168 F.3d 1039, 1041 (7th Cir. 1999)* ("If [courts] are given plausible reasons for dismissing a complaint, they are not going to do the plaintiff's research and try to discover whether there might be something to say against the defendants' reasoning.").

Having said that, the causation requirement for standing is fairly liberal; it doesn't require a showing of proximate cause. *See* *Bennett v. Spear, 520 U.S. 154, 169, 117 S. Ct. 1154, 137 L. Ed. 2d 281 (1997)* ("While . . . it does not suffice if the injury complained of is the result of the independent action of some third party not before the court, that does not exclude injury produced by determinative or coercive effect upon the action of someone else." (internal quotation marks and alterations omitted)). But even if the court assumes **[**20]** that Mountain Crest has standing to sue, that doesn't mean it meets the requirements to sue under the Sherman Act. *See* *McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056, 1063 (7th Cir. 2019)* (concluding that plaintiffs had standing but failed to prove causation under the Sherman Act).

Two causation requirements for antitrust claims are relevant to this analysis. **[*1070]** First, "Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action," so courts have required "the plaintiff [to] demonstrate[] [a] direct link between the alleged antitrust violation and the claimed antitrust injury." *Id. at 1064* (internal quotation marks omitted). For example, in *McGarry and McGarry*, the court held that the plaintiff could not bring a claim under the Sherman Act because its alleged injury was "entirely derivative" of the injury of a third party, who the court said was "a more appropriate person to pursue the claim." Defendants make the same argument in this case, contending that Mountain Crest's injury is derivative of the injury to the LCBO, so the LCBO, as the target of the alleged group boycott, is the proper plaintiff, if any.

Second, the FTAIA imposes additional limits on Sherman Act claims that are based on anticompetitive conduct **[**21]** in a foreign country. For the purpose of this case, Mountain Crest must show that the group boycott had a "direct, substantial, and reasonably foreseeable effect" on exports from the United States. *15 U.S.C. § 6a(1)(B)*. "Direct" in this context means "proximate cause." *Minn-Chem, Inc. v. Agrium, Inc., 683 F.3d 845, 856-57 (7th Cir. 2012)*. "Just as tort law cuts off recovery for those whose injuries are too remote from the cause of an injury, so does the FTAIA exclude from the Sherman Act foreign activities that are too remote from the ultimate effects on U.S. domestic or import commerce." *Id. at 857*. Defendants contend that the LCBO's six-pack rule, not the group boycott, was the proximate cause of the harm alleged by Mountain Crest in this case.

Again, Mountain Crest doesn't meaningfully respond to defendants' arguments on causation. It says that defendants committed "myriad" antitrust violations that were "independent of Ontario's regulatory scheme," Dkt. 85, at 23, but it doesn't explain how the group boycott harmed it other than as a barrier to removing the six-pack rule.

Mountain Crest also relies on United States v. Sisal Sales Corp., 274 U.S. 268, 47 S. Ct. 592, 71 L. Ed. 1042 (1927), for the proposition that defendants are not "absolve[d]" simply because "they were assisted by an act of state." Dkt. 85, at 23. But Mountain Crest is conflating issues. The court **[**22]** of appeals relied on *Sisal Sales* to hold that the act of state doctrine does not "bar an antitrust complaint where defendants took deliberate acts to bring about forbidden results simply because the anticompetitive conspiracy was aided by discriminatory legislation." Mountain Crest, 937 F.3d at 1085-86 (internal quotation marks and alterations omitted). This principle would allow Mountain Crest to bring a claim for an antitrust injury caused by the alleged group boycott. But Sisal Sales isn't about causation, and the facts of that case aren't helpful for Mountain Crest. The alleged harm in that case was a monopoly controlled by the defendant; the "discriminatory legislation" facilitated defendants' conduct but was not a direct cause of the harm.

Mountain Crest's only discussion in its brief of a "direct effect" is a reference to past litigation by Miller Brewing Company against Molson Coors, but Mountain Crest doesn't explain how that litigation is connected to the group boycott or to its own injuries.

The bottom line is that Mountain Crest hasn't pointed to any direct harm it suffered as the result of the group boycott. So the court will dismiss this claim with prejudice.

B. Marketing and distribution practices

Neither **[**23]** Mountain Crest's brief nor its complaint enumerates the marketing **[*1071]** and distribution practices it is challenging. But it doesn't take issue with the list provided by defendants: (1) BRI's failure to stock Mountain Crest's beer in sufficient quantities; (2) BRI's decision to give the store's top selling beers a more prominent display; (3) BRI's decision to discontinue its practice of allowing brewers to pay for in-store advertisements; (4) the layout of BRI's stores; and (5) fees charged to brewers by BRI. The court understands Mountain Crest to be challenging these practices under both § 1 and § 2 of the Sherman Act as restraints on trade and an attempt to create a monopoly.

Causation does not appear to be a problem with these challenged practices. Mountain Crest alleges that it was directly harmed, either through loss of sales, or, in the case of fees, as a result of direct payments. Defendants challenge these claims on numerous grounds, some of which apply only to a subset of the claims.[6] But a problem common to all of the claims is that Mountain Crest hasn't identified any participation by *defendants* in the alleged practices.

All of these claims relate to practices of BRI, a cooperative of **[**24]** Ontario brewers, not defendants. Mountain Crest alleges that BRI is controlled by Labatt Breweries of Canada and Molson Inc. (Canada), but even if BRI's conduct could be imputed to Labatt and Molson, those are Canadian subsidiaries of defendants. And it is well established that parent companies generally cannot be held liable for the conduct of their subsidiaries. *See* Motorola Mobility LLC v. AU Optronics Corp., 775 F.3d 816, 820 (7th Cir. 2015) ("[C]orporate formalities should be respected unless one of the recognized justifications for piercing the veil, or otherwise deeming a parent and a subsidiary one, is present."); IDS Life Ins. Co. v. SunAmerica Life Ins. Co., 136 F.3d 537, 540 (7th Cir. 1998) ("Parents of wholly owned subsidiaries necessarily control, direct, and supervise the subsidiaries to some extent, but unless there is a basis for piercing the corporate veil and thus attributing the subsidiaries' torts to the parent, the parent is not liable for those torts.").

Mountain Crest devotes half of a page to its argument that it has "pled facts which directly implicate the named defendants." Dkt. 85, at 28. But instead of explaining how it has done that, it simply refers the court to "rows [of]

[6] For example, defendants say that BRI is an integrated joint venture, so it is "incapable" of engaging in a conspiracy; Mountain Crest has failed to define the relevant market; Mountain Crest hasn't identified an agreement that is "per se" illegal; a joint monopolization claim is not cognizable under § 2 of the Sherman Act; and the complaint includes no facts showing an intent to monopolize. Dkt. 76, at 34-42.

citations" in the complaint without elaboration. *Id* (citing ¶¶ 25-26, 79, 82-84, 86-88, 90, 98, 110-112, 118, 130, 142-145, ¶ 147-50, 152-154, **[**25]** 160, 162, 166, 168, 177-178, 180-183, 187, 192-195, 197-98, 201-03, 206, 210, 213). "It is not the job of this court to develop arguments" for the parties. *Fabriko Acquisition Corp. v. Prokos, 536 F.3d 605, 609 (7th Cir. 2008)*. *See also McKevitt v. Pallasch,* *339 F.3d 530, 533 (7th Cir. 2003)* (string cite unaccompanied by explanation not sufficient to preserve argument). In their opening brief, defendants went through the allegations in the complaint, explaining why they believed that the allegations weren't sufficient to show defendants' involvement. To support a contrary view, Mountain Crest must do more than direct defendants and the court to review the 93-page complaint again.

In any event, the paragraphs cited by Mountain Crest do not tie defendants to the alleged marketing and distribution **[*1072]** practices, let alone identify an agreement between defendants to adopt those practices. Rather, the vast majority of the allegations relate to attempts to influence the LCBO or the decision to offer ownership interests in the BRI to smaller Ontario breweries. Mountain Crest doesn't point to any allegations describing a conspiracy between defendants directing BRI to understock certain brands, to change the layout of its stores, or to charge importers a discriminatory fee.

Mountain Crest does cite some allegations about **[**26]** defendants' involvement that are broad enough to include the marketing and distribution practices. For example, Mountain Crest alleges that executives for defendants "conspired . . . to continue and enforce the restraints on U.S. export sales to Ontario," Dkt. 49, ¶ 160, "worked closely . . . on maintaining their price fixing and market allocation restraints to limit competing brewers' ability to export beer to Ontario," *id.*, ¶ 181, and "conspired to continue and enforce the restraints, "*id.*, ¶ 187. But those allegations are so broad and conclusory that they cannot be accepted as true.

It is well established that legal conclusions are not enough to satisfy federal pleading standards. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice."). "[A] complaint must be dismissed unless it contains a plausible claim." *Bank of Am., N.A. v. Knight, 725 F.3d 815, 818 (7th Cir. 2013)*. This means that the complaint "must actually suggest that the plaintiff has a right to relief, by providing allegations that raise a right to relief above the speculative level." *Windy City Metal Fabricators & Supply, Inc. v. CIT Technical Financing Services, Inc., 536 F.3d 663, 667-68 (7th Cir. 2008)* (internal quotation marks omitted).

Courts apply the plausibility requirement with added rigor in the context of complex cases: "[t]he **[**27]** required level of factual specificity rises with the complexity of the claim." *McCauley v. City of Chicago, 671 F.3d 611, 616-17 (7th Cir. 2011)*. This is in part because of the added burdens associated with defending a complex claim. *Stark Trading v. Falconbridge Ltd., 552 F.3d 568, 574 (7th Cir. 2009)* ("[T]he complaint in a complex case must, to avert dismissal for failure to state a claim, include sufficient allegations to enable a judgment that the claim has enough possible merit to warrant the protracted litigation likely to ensue from denying a motion to dismiss."); *Limestone Dev. Corp. v. Vill. of Lemont, Ill., 520 F.3d 797, 802-03* (7th Cir. 2008 ("[A] defendant should not be forced to undergo costly discovery unless the complaint contains enough detail, factual or argumentative, to indicate that the plaintiff has a substantial case."). Conspiracy allegations are also reviewed carefully because they are so easy to allege and so hard to prove. *See* *Cooney v. Rossiter, 583 F.3d 967, 970-71 (7th Cir. 2009)*. Even at the pleading stage, it is "essential to show that a particular defendant joined the conspiracy and knew of its scope." *Knight, 725 F.3d at 818*.

It was an antitrust case that gave rise to the plausibility requirement. *See* *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In *Twombly*, the Court could not have been clearer: "a bare assertion of conspiracy will not suffice." *Id. at 556*. Because that is all that Mountain Crest offers in this case, it has not stated a plausible claim.

Mountain Crest identifies **[**28]** two other theories in its complaint for holding defendants liable. First, Mountain Crest invokes **[*1073]** the concept of "enterprise liability," under which parents and subsidiaries can be viewed as a single "enterprise" for the purpose of antitrust violations. But Mountain Crest doesn't respond to defendants' argument that no court has recognized such a theory under the Sherman Act, and Mountain Crest doesn't explain in its brief why the court should adopt the theory in this case. Second, Mountain Crest refers to "single-factor piercing" of the corporate veil, Dkt. 49, ¶ 237, without explaining what that means. But Mountain Crest doesn't attempt to defend that theory in its brief. Instead, it insists that "none of [its] allegations are aimed at any of Defendants' subsidiaries." Dkt. 85, at 28. So the court concludes that Mountain Crest has abandoned both of these theories, and the court declines to consider them.

When a plaintiff fails to plead adequate facts, the general rule is that a plaintiff should have at least one opportunity to amend its complaint. But Mountain Crest has already amended its complaint twice. *See* Dkt. 30 and Dkt. 49. It did not ask for leave to amend its complaint after **[**29]** the remand, and it does not request leave to amend now. Under these circumstances, the court sees no reason to give Mountain Crest leave to replead. *See Alarm Detection Sys., Inc. v. Vill. of Schaumburg, 930 F.3d 812, 829 (7th Cir. 2019)* (plaintiffs "have never requested leave to amend," so "[t]hey . . . waived any right to replead"). The court will dismiss these claims with prejudice.

C. Unjust enrichment

This leaves Mountain Crest's claim for unjust enrichment under Wisconsin common law. That claim has three elements: (1) the plaintiff conferred a benefit upon the defendant; (2) the defendant had an appreciation or knowledge of the benefit; and (3) the defendant accepted or retained the benefit under circumstances making it inequitable for the defendant to retain the benefit without payment of its value. *Buckett v. Jante, 2009 WI App 55, ¶ 10, 316 Wis. 2d 804, 812, 767 N.W.2d 376, 380*. Mountain Crest alleges that it conferred a benefit on "defendants" by paying listing fees to BRI and that it would be inequitable to allow defendants to keep the fees because of the alleged restraints of trade alleged in the complaint.

Defendants contend that the unjust enrichment claim must be dismissed if the antitrust claims are dismissed because the alleged antitrust violations are Mountain Crest's only basis for contending that defendants were unjustly enriched. **[**30]** Mountain Crest doesn't respond to this argument. In any event, the fees at issue in this claim went to BRI, not defendants, so defendants are not a proper party. *See State Mech. Servs., LLC v. NES Equip. Servs. Corp., No. 17-cv-5950, 2018 U.S. Dist. LEXIS 80584, 2018 WL 2193248, at *5 (N.D. Ill. May 14, 2018)* (plaintiff may not sue parent company for benefit conferred on subsidiary). The court will dismiss this claim as well.

D. Conclusion

The allegations in the complaint make it clear that Mountain Crest's claims relate solely to events in Canada and conduct by Canadian entities that are not before this court. The alleged group boycott by defendants did not cause Mountain Crest any harm. Rather, the harm Mountain Crest is complaining about is the direct result of decisions by the Ontario government. And the marketing and distribution policies at the Beer Store were put in place by BRI, which is controlled by defendants' subsidiaries, not defendants. So Mountain Crest has sued the wrong parties.

Mountain Crest may have had good reasons for not bringing claims against a foreign provincial government, an Ontario **[*1074]** cooperative, and defendants' Canadian subsidiaries. But whatever substantive or procedural barriers those claims would have faced, it does not give Mountain **[**31]** Crest a cause of action against defendants. Mountain Crest hasn't plausibly alleged that defendants caused it any harm, so the court will dismiss the complaint with prejudice.

ORDER

IT IS ORDERED that:

1. Plaintiff Mountain Crest SRL, LLC's motion for reconsideration, Dkt. 73, is DENIED.
2. The motion to dismiss filed by defendants Anheuser-Busch InBev SA/NV and Molson Coors Brewing Compan, Dkt. 76, is GRANTED, and this case is DISMISSED with prejudice.
3. The clerk of court is directed to enter judgment in favor of defendants and close this case.

Entered April 24, 2020.

Opinion

REPORT AND RECOMMENDATION

This is an antitrust case. Plaintiff Simon and Simon, PC d/b/a City Smiles ("City Smiles" or "Plaintiff") filed this class action suit against Defendant Align Technology, Inc. ("Align" or "Defendant") on March 14, 2019, alleging violations of *Section 2 of the Sherman Act, 15 U.S.C. § 2*. (D.I. 1.) Align sells the Invisalign system, an orthodontic treatment for straightening teeth without metal braces. It involves the use of custom-made, plastic dental aligners. To make the aligners, Align requires a dental professional **[*2]** to obtain an impression of the patient's teeth and transmit that impression to Align. One way to take an impression is with a digital intraoral scanner. In September 2015, Align introduced a scanner called the iTero Element, which can be used to order Invisalign from Align. City Smiles purchased Align's iTero Element scanner in December 2016 and has prescribed Invisalign to its patients.

Pending before the Court is Align's motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* or, in the alternative, to transfer the case to the Northern District of California. (D.I. 6.) Because City Smiles has failed to allege acts that—taken individually or together— constitute anticompetitive conduct, I recommend that Align's motion to dismiss be GRANTED.[1]

I. BACKGROUND[2]

Defendant Align is a Delaware corporation that sells Invisalign, a system of clear plastic aligners for straightening teeth. (D.I. 1 ¶¶ 31, 40.) As of September 2018, Invisalign's share of the United States aligner market was over 80%. (*Id.* ¶ 41.)

Invisalign aligners are custom made and must be obtained from dental professionals, who order them from Align. (*Id.* ¶¶ 43-45.) To order Invisalign, a dental professional must send an impression of a patient's **[*3]** teeth to Align. (*Id.* ¶¶ 50-51.) In 2015, Align introduced the iTero Element digital intraoral scanner, which can be used to obtain a digital impression for ordering aligners. (*Id.* ¶¶ 49-50.) The iTero Element scanner is another market leader, accounting for over 80% of the scanner market in the United States in 2017. (*Id.* ¶ 71.) Non-party 3Shape Trios A/S is a Danish corporation that produces the Trios, another digital intraoral scanner that can be used to order aligners. (*Id.* ¶¶ 32, 53.) 3Shape started selling the Trios in the United States in 2012. (*Id.* ¶ 48.)

Plaintiff City Smiles is a dental practice in Chicago, Illinois that prescribes aligners to its patients. (*Id.* ¶ 30.) City Smiles purchased an iTero Element scanner from Align in 2016 and purchased Invisalign for multiple patients between 2015 and 2018. (*Id.*)

The Complaint takes issue with two categories of conduct by Align that, Plaintiff contends, amount to an anticompetitive scheme to monopolize both the scanner and the aligner markets. The first relates to the criteria under which Align accepts orders for Invisalign. (*Id.* ¶ 80.) A dental professional can order Invisalign by sending Align a physical impression of a patient's **[*4]** teeth, for example, by creating a silicone mold. The Complaint alleges that silicone molds "are burdensome and inefficient and not an acceptable substitute for a proper Scanner." (*Id.* ¶ 68.)

Alternatively, a dental professional can order Invisalign by using the iTero Element scanner and sending Align a digital impression. (*Id.* ¶ 52.) For a fifteen-month period in 2016 to 2018, Align also accepted digital scans sent directly from 3Shape's Trios scanners, pursuant to an agreement between Align and 3Shape (the "Interoperability Agreement").[3] (*Id.* ¶¶ 55-56, 58, 64-65.) Pursuant to the Interoperability Agreement, Trios scanners were used to place over 40,000 Invisalign orders. (*Id.* ¶ 56.) In January 2018, shortly after Align filed four patent infringement

---

[1] On October 15, 2019, I issued a Report and Recommendation recommending that the Court grant Defendant's motion to dismiss. (D.I. 17.) In my Report and Recommendation, I cited a decision from the Northern District of Illinois, *Viamedia, Inc. v. Comcast Corp., No. 16-5486, 2017 U.S. Dist. LEXIS 24213, 2017 WL 698681, at *5-6 (N.D. Ill. Feb. 22, 2017)*. Plaintiff filed an objection to my Report and Recommendation (D.I. 18) and Defendant responded (D.I. 20).

On February 24, 2020, after I issued my original Report and Recommendation, the Seventh Circuit reversed the district court's decision in *Viamedia. 951 F.3d 429 (7th Cir. 2020)*. On March 9, 2020, Chief Judge Stark referred proceedings on Defendant's motion to dismiss back to me "to evaluate the impact, if any, of the Seventh Circuit's decision in *Viamedia*" before he "address[ed] the pending motion and objections to the Report and Recommendation." (D.I. 25.) On March 10, 2020, I requested supplemental briefing regarding *Viamedia*. Plaintiff filed a brief on March 27, 2020 (D.I. 26), and Defendant filed a brief on April 9, 2020 (D.I. 28). Having reviewed the parties' briefs, I now issue a revised Report and Recommendation. My recommendation to GRANT Defendant's motion to dismiss remains the same.

[2] I assume the facts alleged in the Complaint to be true for purposes of resolving this motion. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

[3] 3Shape sold the Trios scanner in the United States for approximately four years without an Interoperability Agreement with Align. (*See* D.I. 1 ¶¶ 48, 55.)

lawsuits against 3Shape relating to the Trios scanner, Align terminated the Interoperability Agreement and stopped accepting scans sent directly from Trios scanners. (*Id.* ¶ 16; *see* Nos. 17-1646, -1647, -1648, -1649 (D. Del.).)

Align also accepts digital scans from scanners made by two other manufacturers: 3M's True Definition and Dentsply Sirona's CEREC Omnicam. (D.I. 1 ¶¶ 50, 57, 94-95.) According to the Complaint, however, those scanners **[*5]** are designed to scan individual teeth and are unsuitable for making aligners. (*Id.*) Thus, according to the Complaint, a scanner is the only "acceptable" way to order aligners, and Align's iTero Element and 3Shape's Trios are the only "suitable" scanners. (*Id.* ¶ 68.) Since Align no longer accepts Invisalign orders from Trios scanners, the only "viable" way to order Invisalign-brand aligners is to use Align's iTero Element. (*Id.*)

The second category of challenged conduct relates to the design of the iTero Element. (*Id.* ¶ 81.) Align designed the iTero Element with the capability to send digital scans directly to Align for orders of Invisalign. (*Id.* ¶ 52.) The iTero Element cannot send scans directly to Align's competitors in the aligner market. If a dental professional wants to send a scan taken by the iTero Element to another aligner manufacturer, the dental professional must pay a fee to Align to convert the scan into another format. (*Id.*) The Complaint does not provide any further information about the fees.

According to City Smiles, those two categories of conduct by Align—(1) Align's refusal to accept scans from the Trios scanner for Invisalign orders and (2) the design of Align's **[*6]** scanner— operate as "a de facto bundle by making it impracticable for Dental Practices to sell Invisalign without an iTero Scanner, or for Dental Practices with an iTero Scanner to sell other Aligners." (*Id.* ¶¶ 103, 107, 117.) City Smiles alleges that Align's actions have harmed competition in the scanner and aligner markets, "resulting in higher prices, reduced competition, and reduced product choice." (*Id.* ¶¶ 82-83.) According to City Smiles, it was injured as a direct result of its purchase of an iTero Element scanner in 2016 and the numerous Invisalign orders it made between 2015 and 2018, all at "artificially inflated" prices. (*Id.* ¶¶ 10, 30.)

City Smiles' Complaint sets forth the following claims: monopolization of the clear aligner market under *Section 2 of the Sherman Act*, *15 U.S.C. § 2* (Count 1); and monopolization of the market for scanners for orthodontic treatment under *Section 2 of the Sherman Act* (Count 2). (*Id.* ¶¶ 104-123.) City Smiles seeks treble damages and injunctive relief under *Sections 4* and *16 of the Clayton Act*, respectively. (*Id.*)

Align filed the pending motion to dismiss on April 5, 2019 (D.I. 6), and the parties completed the briefing on May 10, 2019. (D.I. 7, 12, 13.) Align requested oral argument **[*7]** (D.I. 14), and I heard oral argument on August 1, 2019. ("Tr. __".) At the Court's request, City Smiles filed a supplemental brief on March 27, 2020 (D.I. 26), and Align filed a supplemental brief on April 9, 2020 (D.I. 28).

II. LEGAL STANDARDS

A defendant may move to dismiss a complaint under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is plausible on its face when the complaint contains "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* A possibility of relief is not enough. *Id.* "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of entitlement to relief.'" *Id.* (quoting *Twombly, 550 U.S. at 557*). In determining the sufficiency of the complaint under the plausibility standard, all "well-pleaded facts" are assumed to be true, but legal conclusions are not. *Id. at 679*.

"[W]hen the allegations in a complaint, however true, could not raise a claim of entitlement to relief, **[*8]** this basic deficiency should be exposed at the point of minimum expenditure of time and money by the parties and the court." *Twombly, 550 U.S. at 558* (internal marks omitted). "Antitrust claims in particular must be reviewed carefully at the pleading stage because false condemnation of competitive conduct threatens to 'chill the very conduct the antitrust laws are designed to protect.'" *In re Keurig Green Mt. Single-serve Coffee Antitrust Litig., 383 F. Supp. 3d 187, 218 (S.D.N.Y. 2019)* (quoting *Verizon Commc'ns., Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 414, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004))*. However, the same *Twombly* plausibility standard applies. *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 98 (3d Cir. 2010)* ("[I]t is inappropriate to apply Twombly's plausibility standard with extra bite in antitrust and other complex cases.").

III. DISCUSSION

Section 2 of the Sherman Act, *15 U.S.C. § 2*, makes it unlawful to "monopolize" or "attempt to monopolize."[4] It does not prohibit monopolies. Indeed, the possession of monopoly power is not only legal, "it is an important element of the free-market system." *Trinko, 540 U.S. at 407* ("The opportunity to charge monopoly prices—at least for a short period—is what attracts 'business acumen' in the first place; it induces risk taking that produces innovation and economic growth.").

A *Section 2* plaintiff must therefore do more than just prove a monopoly. To succeed on a monopolization claim, the plaintiff must demonstrate both (1) the defendant's possession of monopoly power in a relevant **[*9]** market and (2) anticompetitive conduct. *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307 (3d Cir. 2007)*. A private plaintiff (as opposed to a government plaintiff) must also demonstrate that it suffered injuries caused by the defendant's anticompetitive conduct. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 281 (3d Cir. 2012)*.

Align argues that the Complaint fails to plausibly allege anticompetitive conduct. I agree.

Anticompetitive conduct is "generally defined as conduct to obtain or maintain monopoly power as a result of competition on some basis other than the merits." *Broadcom, 501 F.3d at 308*. On the other hand, "[c]onduct that merely harms competitors, . . . while not harming the competitive process itself, is not anticompetitive." *Id.*; *W. Penn, 627 F.3d at 108* ("The line between anticompetitive conduct and vigorous competition is sometimes blurry, but distinguishing between the two is critical, because the Sherman Act 'directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself.'" (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*.

"'Anticompetitive conduct can come in too many different forms, and is too dependent upon context, for any court or commentator ever to have enumerated all the varieties.'" *LePage's Inc. v. 3M, 324 F.3d 141, 152 (3d Cir. 2003)* (quoting *Caribbean Broad. Sys., Ltd. v. Cable & Wireless PLC, 148 F.3d 1080, 1087, 331 U.S. App. D.C. 226 (D.C. Cir. 1998))*. Examples of agreements that may constitute anticompetitive conduct under **[*10]** *Section 2* include conspiracies to exclude a rival, *W. Penn, 627 F.3d at 109*, exclusive dealing arrangements, *United States v. Dentsply, 399 F.3d 181, 187 (3d Cir. 2005)*, and tying agreements, *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 483, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*.

As a general rule, however, "purely unilateral conduct does not run afoul of *section 2* — 'businesses are free to choose' whether or not to do business with others and free to assign what prices they hope to secure for their own products." *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1072 (10th Cir. 2013)* (citing *Pac. Bell Tel. Co. v. linkLine Commc'ns, 555 U.S. 438, 448, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009))*; *see also* *Trinko, 540 U.S. at 408* ("[A]s a general matter, the Sherman Act 'does not restrict the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will

[4] "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $100,000,000 if a corporation, or, if any other person, $1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court." *15 U.S.C. § 2*.

deal.'" (quoting *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919))*; *Broadcom, 501 F.3d at 316* ("A firm is generally under no obligation to cooperate with its rivals.").

But general rules generally have exceptions, and the rule protecting unilateral conduct does too. One exception is predatory pricing. *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-23, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. A more controversial exception (albeit one recognized in the Third Circuit) is bundled discounts. *LePage's, 324 F.3d at 154-58*. Another is antitrust duty to deal. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 600-01, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. Courts also recognize that deceptive or bad faith conduct can be anticompetitive. *See* *Broadcom, 501 F.3d at 314* (patentee's deception of a standards setting organization can be anticompetitive); *Prof'l Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ("*PRE*") (sham litigation can be anticompetitive). **[*11]** There are legal rules that govern the application of each of these exceptions.

As explained above, the Complaint in this case sets forth two categories of conduct that, City Smiles alleges, are anticompetitive: (1) Align's refusal to accept Invisalign aligner orders sent from 3Shape's Trios scanner and (2) Align's design of its iTero scanner (to make it easier and cheaper to order Invisalign aligners than aligners made by its competitors). For the reasons set forth below, I agree with Align that those actions do not constitute actionable anticompetitive conduct, viewed either alone or together.

A. Refusal to Accept Scans from 3Shape's Trios

As explained above, a firm generally has no duty to cooperate with its rivals. Firms can usually choose to do business with their rivals or they can choose not to, and they can change their minds. *See* *linkLine, 555 U.S. at 448* ("As a general rule, businesses are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing."); *Christy Sports, LLC v. Deer Valley Resort Co., Ltd., 555 F.3d 1188, 1198 (10th Cir. 2009)* ("The antitrust laws should not be allowed to stifle a business's ability to experiment in how it operates, nor forbid it to change course upon discovering a preferable path."); *Olympia Equipment Leasing Co. v. Western Union Tel. Co., 797 F.2d 370, 376 (7th Cir. 1986)* ("If a monopolist **[*12]** does extend a helping hand, though not required to do so, and later withdraws it as happened in this case, does he incur antitrust liability? We think not."). Thus, the mere termination of a contract with a rival does not constitute anticompetitive conduct. *See, e.g.,* *In re Adderall XR Antitrust Litig., 754 F.3d 128, 135 (2d Cir. 2014)* ("The mere existence of a contractual duty to supply goods does not by itself give rise to an antitrust 'duty to deal.'"); *Insight Equity A.P. X, LP v. Transitions Optical, Inc., No. 10-635, 2016 U.S. Dist. LEXIS 85751, 2016 WL 3610155, at *13 (D. Del. July 1, 2016)*.

Here, Plaintiff challenges Align's termination of the Interoperability Agreement with 3Shape. If there is any requirement that Align cooperate with 3Shape, it must fall under the narrow refusal to deal doctrine created by the Supreme Court in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. In that case, the plaintiff and defendant ski operators had previously cooperated to offer joint passes to both companies' mountains, until the defendant terminated the arrangement. *Id. at 587-95*. When the plaintiff tried to recreate the multi-mountain pass by offering to pay the defendant market price for its tickets, the defendant refused. *Id. at 593-94*.

The Supreme Court affirmed a jury verdict finding that the defendant's termination of the arrangement was anticompetitive and violated *Section 2*. While *Aspen* could be interpreted **[*13]** to require a competitor to continue to engage in a pre-existing course of dealing once it starts, the Supreme Court has since held that *Aspen* "is at or near the outer boundary of *§ 2* liability." *Trinko, 540 U.S. at 409*. To proceed under the limited duty to deal exception created by *Aspen*, not only must the plaintiff show a pre-existing business relationship with the defendant, the circumstances surrounding the termination of that relationship must "suggest[] a willingness to forsake shortterm profits to achieve an anticompetitive end." *Trinko, 540 U.S. at 409*.

In *Aspen*, the circumstances suggested that the preexisting joint ticket arrangement was profitable for the defendant, and the defendant was unwilling to renew the ticket even if compensated at its own retail price. *472 U.S. at 589-94*; *Trinko, 540 U.S. at 409*. Those facts permitted an inference that the defendant acted solely to reduce the value of the plaintiff's ski mountain and force it to sell. *Trinko, 540 U.S. at 409*. In other words, the defendant's conduct was "irrational but for its anticompetitive effect." *Novell, 731 F.3d at 1075*; *see also* Areeda & Hovencamp, ***Antitrust Law*** ¶ 772d3 (Supp. 2019) ("[B]efore a unilateral refusal to deal is unlawful under *§ 2*, the refusal must be 'irrational' in the sense that the defendant sacrificed an opportunity to make a profitable **[*14]** sale only because of the adverse impact the refusal would have on a rival.").

Limiting antitrust scrutiny of refusals to deal to circumstances where the defendant's conduct is economically irrational is potentially underinclusive, *i.e.*, it may allow some refusals to deal to evade antitrust scrutiny even when they actually have anticompetitive effects. *See* *Novell, 731 F.3d at 1073, 1076*. But the Supreme Court has concluded that the benefits of expanding the refusal to deal doctrine do not outweigh the costs, including (1) the risk of false positives, which may harm innovation, (2) the risk of collusion between companies forced to deal, (3) the inability of courts to supervise the terms and conditions of forced dealing, and (4) the absence of fair notice to business people. *linkLine, 555 U.S. at 452-453*; *Trinko, 540 U.S. at 408, 414*; *see also* *Novell, 731 F.3d at 1076* ("If the [refusal to deal] doctrine fails to capture every nuance, if it must err still to some slight degree, perhaps it is better that it should err on the side of firm independence—given its demonstrated value to the competitive process and consumer welfare—than on the other side where we face the risk of inducing collusion and inviting judicial central planning.").

Because companies are generally free to choose with whom **[*15]** they deal, the only path forward for Plaintiff's allegations about Align's termination of the Interoperability Agreement is under the refusal to deal doctrine. But Plaintiff's allegations lack the essential feature of an anticompetitive refusal to deal. Assuming the Interoperability Agreement was profitable for Align (as alleged in the Complaint), that does not by itself lead to a plausible inference that Align's termination of the agreement was economically irrational but for its tendency to eliminate competition, as required by *Aspen*. Rather, Align's conduct, as alleged, is also consistent with an inference that Align wanted to increase sales of its own scanner. *See* *Novell, 731 F.3d at 1075, 1077* (explaining that a firm may choose to withdraw from a profitable course of dealing for procompetitive reasons, such as when a firm desires "to pursue an innovative replacement product of its own," and that courts should look at profits across business lines to determine if conduct is economically irrational).

To plead an antitrust refusal to deal, the Complaint must contain allegations plausibly suggesting that the defendant's conduct made no economic sense but for its anticompetitive purpose. *See* *Novell, 731 F.3d at 1075*. Here, the Complaint **[*16]** itself reveals an alternative, procompetitive explanation for Align's refusal to deal with 3Shape, and there is no allegation (conclusory, plausible, or otherwise) that Align's conduct made no economic sense across the aligner and scanner markets.[56]*Id.*

---

[5] My original Report and Recommendation cited as authority *Viamedia, Inc. v. Comcast Corp., No. 16-5486, 2017 U.S. Dist. LEXIS 24213, 2017 WL 698681, at *5-6 (N.D. Ill. Feb. 22, 2017)* and *VBR Tours, LLC v. Nat'l R.R. Passenger Corp., No. 14-804, 2015 U.S. Dist. LEXIS 130455, 2015 WL 5693735, at *9 (N.D. Ill. Sept. 28, 2015)*. The district court's decision in *Viamedia* was subsequently reversed by the Seventh Circuit on appeal and, in light of that decision, it is debatable whether *VBR Tours* would have come out the same way.

As mentioned above, *see supra* note 1, the parties filed supplemental briefs addressing the impact, if any, of the Seventh Circuit's decision in *Viamedia*. Not surprisingly, City Smiles argues that I should reconsider my earlier recommendation to dismiss the Complaint. It argues that the "no economic sense" test requires a balancing of anticompetitive and procompetitive effects, which the Seventh Circuit suggested was inappropriate at the pleading stage. *See* *Viamedia, 951 F.3d at 462*. Align, on the other hand, points out that the Seventh Circuit's opinion expressly refrained from delineating a new pleading standard for refusal to deal cases. *See* *id. at 463*. Align further argues that the Seventh Circuit's decision relied on similarities between the complaint in that case and the relevant facts from *Aspen Skiing, see* *Viamedia, 951 F.3d at 458-463*, and that those similarities are absent here. Align also points out that the Seventh Circuit's decision did not challenge the applicability of the "no economic sense" test to refusal to deal cases. *Id. at 461-62*.

Having carefully considered the Seventh Circuit's decision in *Viamedia*, I do not think it would change the outcome here even if it were binding on this Court (which it is not). To start with, it would be inconsistent with the Supreme Court's decision in *Trinko* to hold that a plaintiff can proceed with a refusal to deal claim merely by pleading the defendant's market power and an

Because the Complaint does not plausibly allege circumstances invoking the refusal to deal doctrine, Align's

---

exclusionary effect resulting from its refusal to deal. 540 U.S. at 409 (dismissing refusal to deal claim because it lacked features present in *Aspen Skiing*). Something more is required.

The Seventh Circuit's *Viamedia* decision did not attempt to define the precise contours of an adequately pleaded refusal to deal claim. While it did not define the minimum necessary, it did hold that pleading "some of the key anticompetitive characteristics" of *Aspen Skiing* was sufficient. *See* 951 F.3d at 462 ("To the extent that refusal-to-deal claims require more at the pleading stage, it is enough to allege plausibly that the refusal to deal has some of the key anticompetitive characteristics identified in *Aspen Skiing*.").

In this case, unlike in *Viamedia*, the Complaint fails to allege certain key aspects of *Aspen Skiing*. For example, unlike in *Aspen Skiing* and *Viamedia* where the terminated business relationships had been ongoing for years and the termination was alleged to result in financial losses to the defendants, 3Shape and Align's business relationship only lasted 15 months and there is no allegation that the termination resulted in losses across Align's business lines. There is also no allegation that Align refused to sell any product to 3Shape at retail price, as in *Aspen Skiing* and *Viamedia*.

Moreover, no one in this case seriously disputes that, to ultimately succeed on a refusal to deal claim, a plaintiff must prove that the defendant's conduct was irrational but for its anticompetitive effect, *i.e.*, that it made no economic sense but for its tendency to lessen competition. That requirement has been endorsed not only by the Supreme Court, *see* Aspen Skiing, 472 U.S. at 597; Trinko, 540 U.S. at 409, but also by circuit courts, *see, e.g.,* Novell, 731 F.3d at 1074-75, the United States Department of Justice, *see, e.g.*, Brief for the United States as Amicus Curiae in Support of Neither Party, Viamedia, Inc. v. Comcast Corp., No. 18-2852, 2018 WL 5919386, at *11-16 (7th Cir. Nov. 8, 2018), and other leading authorities. *See* Areeda & Hovencamp, ***Antitrust Law*** ¶ 772d3 (Supp. 2019); Gregory J. Werden, *Identifying Exclusionary Conduct Under Section 2: The "No Economic Sense" Test*, 73 Antitrust L.J. 413, 414 (2006). I do not read the Seventh Circuit's *Viamedia* decision to the contrary. And, given that to succeed on a refusal to deal claim a plaintiff must ultimately prove that a defendant's conduct was irrational but for its anticompetitive effect, a plaintiff must also allege facts in its complaint making such a claim plausible. *Cf.* Comcast Corporation v. National Association of African American-Owned Media, 140 S. Ct. 1009, 1014, 206 L. Ed. 2d 356 (2020) ("[T]o determine what the plaintiff must plausibly allege at the outset of a lawsuit, we usually ask what the plaintiff must prove in the trial at its end.").

In my view, the most significant difference between this case and *Viamedia* is that the complaint in that case expressly alleged that the defendant's conduct was "irrational but for its anticompetitive effect" and contained factual allegations to back it up. 951 F.3d at 463. As the Seventh Circuit summarized:

> In a section of the First Amended Complaint entitled '*Comcast's Refusal to Deal with Viamedia is Irrational But for its Anticompetitive Effects*,' [Plaintiff] Viamedia walked through the long-term course of dealing prior to [Defendant] Comcast's conduct; the subsequent degradation of the value of the cooperative Interconnects; *the financial losses suffered by Comcast itself*, as well as by Viamedia and Comcast's competitor MVPDs; Comcast's willingness to offer Interconnect-only access in other markets where it did face competition; *and the fact that "[t]here are no procompetitive justifications" to be achieved by [Comcast's] conduct* ***[*17]*** given that there were "no material administrability problems in allowing Viamedia to participate in Interconnects" on behalf of its MVPD customers.

Id. (emphases added).

Here, in contrast, City Smiles did not allege that Align's conduct was irrational but for its anticompetitive effect. Nor did it allege facts that would suggest the same, for example, that Align suffered financial losses across business lines. City Smiles only alleges that Align lost profits in one of two relevant product lines. (D.I. 1 ¶¶ 16, 78.) That is not enough. *See* Novell, 731 F.3d at 1075, 1077 (holding that courts must look at profits across business lines to determine if conduct is economically irrational). Insofar as City Smiles contends that it can prevail on its refusal to deal claim with a showing that Align suffered a loss in only one product line, it is wrong as a matter of law. And there is no reason to let a legally deficient claim proceed past the pleading stage.

I am mindful of the Seventh Circuit's admonition that it is inappropriate to weigh procompetitive justifications proffered by the defendant against anticompetitive harms at the pleading stage. Viamedia, 951 F.3d at 460, 462. But I do not consider any procompetitive justifications offered by Align, nor do I balance procompetitive justifications against anticompetitive harms. Rather, I consider whether City Smiles' own allegations plausibly allege that Align's termination of the interoperability agreement was irrational but for its anticompetitive purpose. I conclude that they do not.

termination of the agreement with 3Shape by itself is not anticompetitive.

B. Design of the iTero Element scanner

The second category of conduct alleged to be anticompetitive relates to Align's introduction of its iTero Element scanner in 2015. Plaintiff takes issue with the design of Align's iTero Element scanner, which is capable of sending scans directly to Align. If a dental professional desires to send a scan taken by the iTero Element to one of Align's competitors, the dental professional must take additional steps and pay a fee to Align. In essence, Plaintiff contends that Align should have designed its scanner to make it easier and cheaper for dental professionals to order scans from Align's competitors.

That is just another refusal to deal claim. Plaintiff is asking Align to deal with its rivals in the aligner market by designing its iTero Element scanner to send them business on favorable terms, namely, (1) directly **[*18]** from the scanner and (2) without charge to the user. However, as already explained, "[a]s a general rule, businesses are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing." *linkLine, 555 U.S. at 448*.

Once again, the only path forward for 3Shape is under the refusal to deal doctrine set forth in *Aspen Skiing*. But the Complaint here fails to plausibly allege the first requirement of *Aspen*: "a preexisting voluntary and presumably profitable course of dealing between the monopolist and the rival." *Novell, 731 F.3d at 1074*. Align never had a deal with its rivals in the aligner market governing the terms and conditions under which the iTero Element could be used to send them business.[7]

Absent a duty to deal, ***antitrust law*** does not require a firm to lend its competitors a helping hand. *See Novell, 731 F.3d at 1072*. Align's design of its iTero Element scanner by itself does not constitute anticompetitive conduct.

C. Scheme of Anticompetitive Conduct

Plaintiff next contends that, even though Align's acts viewed individually may not be anticompetitive, as a whole they amount to a scheme of anticompetitive conduct cognizable under *Section 2*. (D.I. 1 ¶¶ 8, 11, 13; D.I. 13 at n.20; Tr. 17-29.) I disagree. **[*19]**

Plaintiff cites no case for the novel proposition that a defendant may incur antitrust liability for unilaterally refusing to deal in two markets under circumstances where it has no antitrust duty to deal in either market. And I am unaware of any. Rather, as I explained in my Report and Recommendation in *3Shape Trios A/S v. Align Technology, Inc.*,

---

[6] Perhaps recognizing the difficulty in proceeding under the refusal to deal doctrine, City Smiles tries to recast Align's termination of the Interoperability Agreement as a design change to Align's manufacturing process. (D.I. 12 at 15.) That does not change the analysis. Whatever you want to call it, the result was that Align quit accepting orders for Invisalign from 3Shape's Trios scanner. That makes this a refusal to deal case, and City Smiles cannot evade refusal to deal doctrine simply by calling the conduct another name. *See Novell, 731 F.3d at 1079* ("Whether one chooses to call a monopolist's refusal to deal with a rival an act or omission, interference or withdrawal of assistance, the substance is the same and it must be analyzed under the traditional [refusal to deal] test . . . .").

[7] The Complaint does not allege that the design of Align's iTero Element scanner has ever changed. The Court is therefore not confronted with an allegation of anticompetitive product redesign.

Nor does this case concern the interoperability or integration of complementary products in two markets, as was at issue in *United States v. Microsoft. 253 F.3d 34, 64-67, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (assessing antitrust consequences relating to the interoperability of browser and operating system under circumstances where the defendant's products were distributed together and could not be disaggregated). Unlike the product markets at issue in *Microsoft*, intraoral scanners and aligners are sold independently, can be used independently, and don't interact with each other in operation.

plaintiffs proceeding under an anticompetitive scheme theory must plead at least one instance of conduct that is not protected from antitrust scrutiny. *2019 U.S. Dist. LEXIS 137982, 2019 WL 3824209, at *10-12 (D. Del. Aug. 15, 2019)*, *adopted by* *2019 U.S. Dist. LEXIS 165242, 2019 WL 4686614 (D. Del. Sept. 26, 2019)*; *see also* Eatoni Ergonomics, Inc. v. Research in Motion Corp., 486 Fed. App'x 186, 191 (2d Cir. 2012) (affirming dismissal of an antitrust claim; "[b]ecause these alleged instances of misconduct are not independently anti-competitive, we conclude that they are not cumulatively anti-competitive either"); *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-md-02503-DJC, 2015 U.S. Dist. LEXIS 125999, 2015 WL 5458570, at *12 (D. Mass. Sept. 16, 2015)* (concluding that a complaint failed to state a *Section 2* claim under an "overarching scheme" theory when none of the alleged conduct was independently anticompetitive); *In re Lipitor Antitrust Litig., No. 13-2389, 2013 U.S. Dist. LEXIS 126468, 2013 WL 4780496, *23 (D.N.J. Sept. 5, 2013)* ("Having already determined that all of the specific allegations of conduct in violation of *Section 2* . . . are meritless and insufficient to state a claim for relief, the Court finds that a claim based on the purported 'combined' impact of Plaintiffs' **[*20]** claims is also without merit.").

Plaintiff's two wrong refusal to deal claims do not make a right. Plaintiff's characterization of Align's otherwise non-actionable refusals to deal as a "scheme" do not save its claims.

D. "Bundling"

Plaintiff nevertheless alleges that Align's conduct, viewed together, amounts to anticompetitive "bundling." (*See* D.I. 1 ¶¶ 77, 99-103.) I disagree.

The Third Circuit (but not the Supreme Court) has recognized a bundled discount exception to the general rule protecting above-cost (*i.e.*, non-predatory) price discounts from antitrust scrutiny. A bundled discount is when a firm sells a bundle of goods for a lower price than the seller charges for the goods purchased individually. *LePage's, 324 F.3d at 154-157*; *Eisai, Inc. v. Sanofi Aventis U.S., LLC, 821 F.3d 394, 405 (3d Cir. 2016)* ("[A] bundling arrangement generally involves discounted rebates or prices for the purchase of multiple products."). In *LePage's*, the Third Circuit held that bundled discounts can constitute anticompetitive conduct when the effect of the discounts is to "foreclose portions of the market to a potential competitor who does not manufacture an equally diverse group of products and who therefore cannot make a comparable offer." *Id. at 155*. The *LePage's* standard for bundled discounts has not been **[*21]** adopted by any other Circuit, and it has not been expanded in the Third Circuit. *See Cascade Health Solutions v. Peacehealth, 515 F.3d 883, 894-903, 908-09 (9th Cir. 2008)* (discussing the controversy over *LePage's*). The Third Circuit has instructed courts to interpret *LePage's* narrowly in light of more recent Supreme Court precedent. *ZF Meritor, 696 F.3d at 274 n.11*; *see also* *Eisai, 821 F.3d at 405-406* (rejecting novel bundling theory based on a bundle of different types of demand as opposed to a bundled discount for multiple products).

The Complaint in this case does not allege that Align offered bundled discounts, *i.e.*, that it offered discounts to customers who purchased both scanners and aligners. The Complaint alleges that Align charged "inflated" prices on both aligners and scanners. (D.I. 1 ¶¶ 2, 18, 103.) *LePage's* is thus inapposite.

Plaintiff acknowledges that *LePage's* is distinguishable because it involves price discounts, but it argues (in a footnote) that the conduct here "is even more plainly harmful because the customer gets no discount with the bundle and, instead, faces a penalty for breaking the bundle." (D.I. 12 at 17 n.27.) I disagree on the facts and the law. As for the facts, the Complaint does not allege that iTero Element owners paid a penalty for ordering aligners from other manufacturers. The Complaint **[*22]** alleges that Align only charged a fee if a dental professional wanted Align to convert a scan made by the iTero Element. Dental professionals who owned iTero Element scanners could order other manufacturers' aligners without paying a fee by using another scanner or by using silicone molds. Conversely, dental professionals without an iTero Element scanner could order Invisalign by using silicone molds or by purchasing one of the other scanners able to order Invisalign.

As for the law, even if I were to analyze Align's conduct under the standard set forth in *LePage's*, the facts alleged do not plausibly suggest that Align's charging of file conversion fees operated to foreclose other aligner manufacturers from the market. For example, there is no suggestion in the Complaint that the fee was so high that a rival aligner manufacturer couldn't offset it with a price discount. In other words, the facts do not plausibly suggest that rival aligner manufacturers could not make a "comparable offer." *LePage's, 324 F.3d at 155*.

The Third Circuit has instructed lower courts not to extend *LePage's*, and I see no basis to do so on the allegations here. Plaintiff's characterization of Align's conduct as "bundling" does not save **[*23]** its claims.

E. Monopoly Leveraging

Plaintiff also attempts to proceed on a monopoly leveraging theory. A monopoly leveraging claim is a *Section 2* monopolization claim or attempted monopolization claim involving conduct in more than one market. To succeed, a plaintiff must demonstrate "that a party has a monopoly in one area, uses unlawful acts to leverage that monopoly into another area, and achieves or is likely to achieve that second monopoly." *IQVIA Inc. v. Veeva Systems, Inc., No. 17-cv-177, 2018 U.S. Dist. LEXIS 171456, 2018 WL 4815547, at *4 (D.N.J. Oct. 3, 2018)*.

Monopoly leveraging, however, is not a standalone theory of liability under *Section 2*. *See* *Trinko, 540 U.S. 398 at 415 n.4, 124 S. Ct. 872, 157 L. Ed. 2d 823* (rejecting standalone monopoly leveraging claim); *Daisy Mountain Fire Dist. v. Microsoft Corp., 547 F. Supp. 2d 475, 487 (D. Md. 2008)* ("The Supreme Court has held that monopoly leveraging does not provide a basis for recovery distinct from a monopolization claim."). Nor does pleading monopoly leveraging relieve a party's obligation to allege anticompetitive conduct. *Four Corners Nephrology Assocs., P.C. v. Mercy Med. Ctr. of Durango, 582 F.3d 1216, 1222 (10th Cir. 2009)* ("*Trinko* further emphasized that, '[i]n any event, leveraging [like, we might add, any other *Section 2* claim'] presupposes anticompetitive conduct,' rather than providing an excuse for establishing such conduct." (quoting *Trinko, 540 U.S. at 415 n.4*)); *Vesta Corp. v. Amdocs Mgmt. Ltd., 129 F. Supp. 3d 1012, 1035 (D. Ore. 2015)* ("The Supreme Court has established that a claim for monopoly leveraging 'presupposes anticompetitive conduct.' That is, **[*24]** there must be some other conduct that is actionable for Plaintiff's claim to be cognizable." (internal citation omitted)).

The cases relied on by Plaintiff are distinguishable because they involved independent allegations of anticompetitive conduct (in addition to leveraging). *IQVIA Inc., No. 17-cv-177, 2018 U.S. Dist. LEXIS 171456, 2018 WL 4815547, at *1-2* (refusal to deal); *Yeager's Fuel, Inc. v. Pennsylvania Power & Light Co., 953 F. Supp. 617 (E.D. Pa. 1997)* (exclusive dealing); *Hewlett-Packard Co. v. Arch Assocs. Corp., 908 F. Supp. 265 (E. D. Pa. 1995)* (refusal to deal). As explained above, the Complaint here does not allege any anticompetitive conduct. Plaintiff's monopoly leveraging claim must therefore fail. *See, e.g.,* *Vesta Corp., 129 F. Supp. 3d at 1035* (concluding that the "monopoly leveraging claim fails for the same reasons as Plaintiff's other antitrust claims fail—Plaintiff fails to allege anticompetitive conduct").

As 3Shape's failure to plead anticompetitive conduct fully supports granting Align's motion to dismiss,[8] the Court need not decide whether the other grounds raised by Align (lack of standing[9] and failure to allege relevant product markets) would also support dismissal.[10]

---

[8] In the alternative, Align sought transfer of the case to the Northern District of California. (D.I. 7.) Because I recommend that the case be dismissed, I do not address Align's transfer arguments. *See* Tr. 15 (Align's agreement that dismissal in lieu of transfer is appropriate).

[9] Antitrust standing is a prudential limitation. As it does not affect subject matter jurisdiction, there is no requirement that the Court consider it at this time. *See* *Shionogi Pharma, Inc. v. Mylan, Inc., No. 10-1077, 2011 U.S. Dist. LEXIS 58774, 2011 WL 2174499, *3 (D. Del. May 26, 2011)* (dismissing *Section 2* claim for failure to state a claim without addressing the parties' dispute over antitrust standing).

[10] Plaintiff's Complaint also alleged a class. The Court need not address class certification before dismissing the case. *See, e.g.,* *Donnenfeld v. Petro Home Servs., No. 16-882, 2017 U.S. Dist. LEXIS 43945, 2017 WL 1250992, at *6 (D.N.J. Mar. 24, 2017)* ("[B]ecause the Court is dismissing the Complaint, the Court will not consider Defendants' arguments regarding class certification at this time.").

IV. CONCLUSION

For the reasons set forth above, City Smiles' Complaint fails to plausibly allege anticompetitive conduct, a required element of monopolization under *Section 2* of the Sherman Act. I recommend that Align's motion be GRANTED, **[*25]** that the Complaint be DISMISSED without prejudice, and that City Smiles be granted leave to amend the Complaint within 21 days.[11]

This Report and Recommendation is filed pursuant to *28 U.S.C. § 636(b)(1)(B)*, *(C)*, *Federal Rule of Civil Procedure 72(b)(1)*, and District of Delaware *Local Rule 72.1*. Any objections to the Report and Recommendation shall be filed within fourteen days and limited to ten pages. Any response shall be filed within fourteen days thereafter and limited to ten pages. The failure of a party to object to legal conclusions may result in the loss of the right to *de novo* review in the district court.

The parties are directed to the Court's "Standing Order for Objections Filed Under *Fed. R. Civ. P. 72*," dated October 9, 2013, a copy of which can be found on the Court's website.

Dated: April 24, 2020

/s/ Jennifer L. Hall

Honorable Jennifer L. Hall

United States Magistrate Judge

End of Document

---

[11] Align requests that the Complaint be dismissed without leave to amend because any amendment would be futile. However, it is not clear on this limited record that amendment would necessarily be futile. *See* *Alston v. Parker, 363 F.3d 229, 235-36 (3d Cir. 2004)* (holding that leave to amend should be granted "unless a curative amendment would be inequitable, futile, or untimely").

Opinion

ORDER

Defendants' motion [27] to dismiss is denied.

STATEMENT

In this case, which is consolidated with *Deslandes v. McDonald's, USA, LLC*, case no. 17-cv-4857, plaintiff Stephanie Turner (like plaintiff Leinani Deslandes before her) alleges that defendants violated the Sherman Act by agreeing with franchisees not to hire each other's employees or each other's former employees for a period of six months after employment. (Familiarity with the allegations in *Deslandes* and with the Court's decisions in that case is assumed. The Court does not include the detailed allegations here, because defendants do not move to dismiss this case for failure to state a claim.) Plaintiff alleges that the no-hire clause caused her wages to be depressed such that she was paid less than she would have been paid absent the no-hire clause in the franchise agreements.

In their motion to dismiss, defendants argue that plaintiff lacks Article III standing as well as antitrust standing and that plaintiff's claim is barred by the statute of limitations.

A. Article III standing

Defendants first argue that plaintiff lacks standing under Article III. Article III of the United States Constitution limits a **[*3]** federal court's jurisdiction to "Cases" and "Controversies," and "the irreducible constitutional minimum of standing contains three elements." *Lujan v. Defenders of Wildlife, 504 U.S. 555, 559-60, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. To have standing, a plaintiff must have "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v. Robins, ___ U.S. ___, 136 S.Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)* (citations omitted). A plaintiff must establish standing "with the manner and degree of evidence required at the successive stages of the litigation." *Lujan, 504 U.S. at 561*. Thus, here, at the pleadings stage, allegations will suffice.

In this case, plaintiff alleges she "suffered reduced wages" due to the no-hire clause. (Compl. ¶ 18). She alleges that the "fact that she could not even apply [for other positions at other McDonald's restaurants] also contributed to downward pressure on her own wages at the McOpCo, as she could not use a competing offer to negotiate better wages[.]" (Compl. ¶ 66). She alleges the restraints "constrained competition" among McDonald's restaurants and "caused her wages to be depressed during her employment." (Compl. ¶ 71).

Defendants argue that plaintiff suffered no injury in fact, but the Court does not agree. Defendants **[*4]** argue that plaintiff cannot have been injured by the no-hire clause unless she applied for and was rejected on account of the no-hire policy. The argument misses the point of plaintiff's alleged injury: plaintiff alleges she suffered depressed wages, which is to say the wages she was actually paid were less than the wages she would have been paid absent the allegedly-unlawful no-hire policy. The loss of those wages is an injury in fact. *See Reiter v. Sonotone Corp., 442 U.S. 330, 342, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)* ("where petitioner alleges a wrongful deprivation of her money . . . by reason of respondents' anticompetitive behavior, she has alleged an injury in her 'property' under *§ 4* [of the *Clayton Act*]"); *see also Milwaukee Police Assoc. v. Flynn, 863 F.3d 636, 639 (7th Cir. 2017)* ("concrete financial injuries, namely deprivation of wages . . . are prototypical injuries for the purposes of Article III standing.").[1]

Plaintiff's claim is akin to a supplier who sells at a reduced price due to the anti-competitive behavior of a cartel of buyers. The Seventh Circuit has held "farmers who sold soybeans at allegedly depressed prices suffered injury sufficient to confer standing under Article III." *Sanner v. Board of Trade of City of Chi., 62 F.3d 918, 924 (7th Cir. 1995)* ("The fact of a sale at an allegedly depressed price establishes discernable injury in a manner in which a failure to sell cannot."). **[*5]** Here, plaintiff alleges she sold her labor at an allegedly depressed price, and that is sufficient allegation of injury in fact.

---

[1] That plaintiff may never be able to prove the quantity of such damages does not mean she has not suffered injury in fact. *See Blue Cross and Blue Shield United of Wis. v. Marshfield Clinic, 152 F.3d 588, 594 (7th Cir. 1998)* ("We are not saying that Blue Cross did not in fact lose any money as a result of the division of markets. . . . [T]here is . . . , and here critically, a difference between an actual and a quantifiable harm and also between a quantifiable and a quantified harm—and only the last supports an award of damages.").

Next, defendants argue that depressed wages cannot confer standing in this case, because such depressed wages are not fairly traceable to the alleged antitrust violation. Defendants argue that other factors, such as the unemployment rate, might have suppressed her wages and that plaintiff's allegation that the depressed wages were caused by the no-hire agreement is not plausible. Again, the Court disagrees. Plaintiff's causation allegations are plausible due to basic principles of economics: if fewer employers compete for the same number of employees, wages will be lower than if a greater number of employers are competing for those employees.[2] In addition, "[f]actual disputes over the relative market significance" of the no-hire agreement versus other factors "should not be resolved on a motion to dismiss." *Sanner, 62 F.3d at 926*. Plaintiff has alleged an injury that is fairly traceable to defendants' alleged antitrust violation.

Thus, this Court agrees with courts that have concluded plaintiffs have standing to pursue antitrust claims based on no-hire agreements **[*6]** when they allege their wages were depressed by such agreements. *Blanton v. Domino's Pizza Franchising, LLC, Case No. 18-13207, 2019 U.S. Dist. LEXIS 87737, 2019 WL 2247731 at *3-4 (E.D. Mich. May 24, 2019)* ("[Plaintiff] says that his own wages were depressed. . . . He asserts that his depressed wages were a direct result of the allegedly unlawful no-hire agreement . . . The Court finds that [plaintiff] has sufficiently alleged standing."); *see also* *Butler v. Jimmy John's Franchise, LLC, 331 F. Supp.3d 786, 793-94 (S.D. Ill. 2018)*.

In sum, plaintiff has adequately alleged standing by alleging the no-hire agreement depressed her wages. Whether she can *prove* that is a question for another day.

B. Antitrust standing

Defendants also state that plaintiff has not alleged antitrust injury. The Court disagrees.

In addition to injury in fact, a plaintiff asserting an antitrust claim "must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' act unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. The Supreme Court went on to explain that "[t]he injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick, 429 U.S. at 489*. Thus, in *Brunswick*, the plaintiffs could not recover as damages additional profits they might have earned had their competitors gone out of business. The Supreme Court explained:

> At base, **[*7]** [plaintiffs] complain that by acquiring the failing centers [defendant] preserved competition, thereby depriving [plaintiffs] of the benefits of increased concentration. The damages [plaintiffs] obtained are designed to provide them with the profits they would have realized had competition been reduced. The antitrust laws, however, were enacted for 'the protection of competition not competitors.' *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. It is inimical to the purposes of these laws to award damages for the type of injury claimed here.

Brunswick, 429 U.S. at 488. Thus, antitrust injury requires injury to competition.

Here, plaintiff has alleged injury to competition, namely the injury of depressed prices (wages) to sellers (employees) due to anticompetitive behavior of buyers (employers). The Seventh Circuit has explained why this type of injury is an injury to competition:

---

[2] Defendants argue that plaintiff's allegation that the no-hire clause depressed her wages is not plausible in light of the Court's conclusion in *Deslandes* that Deslandes had not stated a claim for a *per se* violation of the antitrust laws. The Court disagrees. The reason Deslandes had not alleged a *per se* violation was *not* that a no-hire agreement would be unlikely to depress wages but rather that the no-hire agreement was ancillary to an agreement that was procompetitive in that it enhanced the output of hamburgers.

> Just as a sellers' cartel enables the charging of monopoly prices, a buyers' cartel enables the charging of monopsony prices; and monopoly and monopsony are symmetrical distortions of competition from an economic standpoint.

Vogel v. American Soc. of Appraisers, 744 F.2d 598, 601 (7th Cir. 1984); *cf.* *Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)* (sugar beet suppliers had antitrust claim for price-fixing against sugar beet refiners); *see also* *Omnicare, Inc. v. UnitedHealth Group, Inc., 524 F. Supp.2d 1031, 1040 (N.D. Ill. 2007)* ("In a buyer's conspiracy case, a seller sufficiently **[*8]** alleges antitrust injury by pleading that it has received excessively low prices from members of the buyers' cartel.").

Accordingly, plaintiff has alleged antitrust injury in this case. *See* *Hunter v. Booz Allen Hamilton, Inc., 418 F. Supp.3d 214, 223 (S.D. Ohio 2019)* ("Plaintiffs alleged that the no-poach agreements . . . 'did in fact suppress wages, benefit[s], and other aspects of compensation and eliminate competition.' As such, Plaintiffs have pleaded . . . an injury of the type the antitrust laws were intended to prevent[.]"); *In re: Papa John's Employee and Franchisee Employee Antitrust Litigation, Case No. 18-cv-825, 2019 U.S. Dist. LEXIS 181298, 2019 WL 5386484 at *9 (W.D. Ky. Oct. 21, 2019)* ("Plaintiffs also sufficiently plead antitrust injury. Plaintiffs contend that the No-Hire provision is an agreement not to compete for labor and that the agreement had the purpose and effect of depressing wages and diminishing employment opportunities."); *In re: High-Tech Employee Antitrust Litigation, 856 F. Supp.2d 1103, 1123 (N.D. Cal. 2012)* ("In alleging that Defendants conspired to fix salaries at artificially low levels, Plaintiffs have alleged 'an example of the type of injury the antitrust laws are meant to protect against.'") (citation omitted); Phillip E. Areeda & Herbert Hovencamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application*, ¶ 352a (3rd and 4th Editions, 2018 Cum. Supp. 2010-2017) ("Employees **[*9]** may challenge antitrust violations that are premised on restraining the employment market . . . Standing for employees thus parallels that for 'suppliers' generally[.]").

C. Statute of limitations

Finally, defendants argue that plaintiff's claim is barred by the four-year statute of limitations applicable to antitrust claims. *15 U.S.C. § 15b* ("Any action to enforce any cause of action under *section 15*, *15a*, or *15c* of this title shall be forever barred unless commenced within four years after the cause of action accrued."). Defendants' theory is that plaintiff's cause of action accrued no later than 2009 or 2010, when she alleges she first learned about the no-hire clause. (Compl. ¶ 66) ("In or around 2009 or 2010 . . . [plaintiff's] supervisor at the McOpCo restaurant told her she could not be hired at a franchise-owned McDonalds' without a release unless she first stopped working at the McOpCo for six months. The supervisor also informed [plaintiff] that the franchisee would not be permitted to speak with her without a release from the McOpCo.").

Failure to comply with a statute of limitations is an affirmative defense. *See* *United States Gypsum Co. v. Indiana Gas Co., Inc., 350 F.3d 623, 626 (7th Cir. 2003)*; *Fed.R.Civ.P. 8(c)(1)*. A plaintiff need not plead around an affirmative defense, and the Court may not dismiss **[*10]** on the basis of an affirmative defense unless the plaintiff alleges, and thus admits, the elements of the affirmative defense. *Chicago Bldg. Design, P.C. v. Mongolian House, Inc., 770 F.3d 610, 613-14 (7th Cir. 2014)*; *United States Gypsum, 350 F.3d at 626*. Here, plaintiff's allegations do not establish that her claim is time-barred.

"The period of limitations for antitrust litigation runs from the most recent injury caused by the defendants' activities rather than from the violation's inception." *Xechem, Inc. v. Bristol-Myers Squibb Co., 372 F.3d 899, 902 (7th Cir. 2004)* (citing *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971))*. In *Zenith Radio*, the Supreme Court said "each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and . . . as to those damages the statute of limitations runs from the commission of the act." *Zenith Radio, 401 U.S. at 338*. In *Xechem*, the Seventh Circuit cited *Klehr v. A.O. Smith Corp., 521 U.S. 179, 188-191, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* as "describing how this approach works[.]" *Xechem, 372 F.3d at 902*. In *Klehr*, the Supreme Court explained:

> ***Antitrust law*** provides that, in the case of a 'continuing violation,' say, a price-fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, 'each overt act that is part of the violation and that injures plaintiff,' *e.g., each sale to the plaintiff, 'starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier* ***[*11]*** *times.*' But the commission of a separate new overt act generally does not permit the plaintiff to recover for the injury caused by old overt acts outside the limitations period.

Klehr, 521 U.S. at 189 (emphasis added) (citations omitted). In other words, in a sellers' cartel, each additional sale is an injury that starts the statute of limitations for that injury, and, in a buyers' cartel, each purchase is an injury that starts the statute of limitations for that injury. Analogously, in this case, each time plaintiff was paid a depressed wage for her labor, she was injured and the four-year statute of limitations for that injury began.[3]

Here, plaintiff alleges that she was paid a depressed wage for her labor as recently as September 2018. (Compl. ¶¶ 70-71). She filed her complaint on August 15, 2019. Plaintiff has not alleged (and thus admitted) the ingredients of defendants' statute-of-limitations affirmative defense, and the Court will not dismiss her claim on statute-of-limitations grounds.

For all of these reasons, defendants' motion to dismiss is denied.

ENTERED: April 24, 2020

SO ORDERED.

Opinion

MARTINOTTI, DISTRICT JUDGE

Before this Court is a Motion to Dismiss filed by Defendant REV Ambulance Group Orlando, Inc. d/b/a McCoy Miller Emergency Vehicles, Marque Emergency Vehicles, and Road Rescue Emergency Vehicles ("REV" or "Defendant") seeking to dismiss Plaintiff First Priority Emergency Vehicles, Inc.'s ("First Priority" or "Plaintiff") Second Amended Complaint ("SAC") pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (ECF No. 35.) First Priority filed an Opposition to Defendants' Motion to Dismiss (ECF No. 38.) Having reviewed the submissions filed in connection with the motion and having declined to hold oral argument pursuant to *Federal Rule of Civil Procedure 78(b)*, for the reasons set forth below and for good cause appearing, Defendant's Motion to Dismiss is **GRANTED**.

I. BACKGROUND[1]

A. Factual Background

For the **[*2]** purposes of this Motion to Dismiss, the Court accepts the factual allegations in the Amended Complaint as true and draws all inferences in the light most favorable to the plaintiff. *See* *Phillips v. Cty. of Allegheny, 515 F.3d 224, 228 (3d Cir. 2008)*. Furthermore, the Court also considers any "document *integral to or explicitly relied upon* in the complaint." *In re Burlington Coat Factory Secs. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997)* (quoting *Shaw v. Dig. Equip. Corp., 82 F.3d 1194, 1220 (1st Cir. 1996))*.

First Priority is a New Jersey corporation with its principal place of business in Manchester, New Jersey. (ECF No. 34 ¶ 6.) REV is a Florida corporation with its principal place of business in Florida. (*Id.* ¶ 7.) REV does business under a variety of names, including McCoy Miller Emergency Vehicles ("McCoy Miller"), Marque Emergency Vehicles ("Marque"), Road Rescue Emergency Vehicles ("Road Rescue"), and Wheeled Coach Vehicles ("Wheeled Coach"), among others. (*Id.*)

B. Procedural History

On May 29, 2018, First Priority filed a Complaint (the "Complaint") against REV asserting causes of action for violations of the NJFPA, breach of contract and of the implied covenant of good faith and fair dealing, and violations of state and federal ***antitrust law***. (ECF No. 1.) On November 9, 2018, First Priority filed an Amended Complaint (the "Amended Complaint"). (ECF No. 17.) On July 30, 2019, this **[*3]** Court issued an opinion (the "July 30, 2019 Opinion") granting REV's Motion to Dismiss Counts One, Five, Six, Seven, Eight, Nine and Ten of the Amended Complaint, denying REV's Motion to Dismiss Count Two of the Complaint, and granting First Priority's Cross-Motion for Leave to Amend the Amended Complaint. (ECF No. 31.)

On August 30, 2019, First Priority filed the SAC asserting breach of contract and the implied covenant of good faith and fair dealing (Count One), violation of *Section 1 of the Sherman Act*, *15 U.S.C. § 1* (Count Two), violations of *Section 2 of the Sherman Act*, *15 U.S.C. § 2* (Counts Three and Four), violation of the *Clayton Act, 15 U.S.C. § 14* (Count Five), and violation of New Jersey Antitrust Laws (Count Six) . (ECF No. 34.) On September 13, 2019, REV filed a Motion to Dismiss all Antitrust Counts (Counts Two through Six) in the SAC. (ECF No. 35.) On October 9, 2019, First Priority filed an Opposition to the Motion to Dismiss. (ECF No. 38.) On October 14, 2019, REV filed a Reply Brief to First Priority's Opposition. (ECF No. 39.)

II. LEGAL STANDARD

In deciding a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a district court is "required to accept as true all factual allegations in the complaint and draw all inferences in the facts alleged **[*4]** in the light most favorable to the [plaintiff]." *Phillips v. Cty. of Allegheny, 515 F.3d 224, 228 (3d Cir. 2008)*. "[A] complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citations omitted). However, the plaintiff's "obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action." *Id.* (citing *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986))*. A court is "not bound to accept as true a legal conclusion couched as a factual allegation." *Papasan, 478 U.S. at 286*. Instead, assuming the factual allegations in the complaint are true, those

---

[1] The Court writes for the parties and assumes familiarity with the facts. For a detailed account of the relevant facts, refer to this Court's July 30, 2019 Opinion on Defendants' Motion to Dismiss Plaintiffs' Amended Complaint. (ECF No. 31.)

"[f]actual allegations must be enough to raise a right to relief above the speculative level." Twombly, 550 U.S. at 555.

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim for relief that is plausible on its face.'" Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (citing Twombly, 550 U.S. at 570). "A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for misconduct alleged." *Id.* This "plausibility standard" requires the complaint allege "more than a sheer possibility that a defendant has acted unlawfully," but it "is not akin to a probability requirement.'" *Id.* (quoting Twombly, 550 U.S. at 556). "Detailed **[*5]** factual allegations" are not required, but "more than an unadorned, the defendant-harmed-me accusation" must be pled; it must include "factual enhancements" and not just conclusory statements or a recitation of the elements of a cause of action. *Id.* (citing Twombly, 550 U.S. at 555, 557).

"Determining whether a complaint states a plausible claim for relief [is] . . . a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." Iqbal, 556 U.S. at 679. "[W]here the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged—but it has not 'show[n]'—'that the pleader is entitled to relief.'" Id. at 679 (quoting Fed. R. Civ. P. 8(a)(2)). However, courts are "not compelled to accept 'unsupported conclusions and unwarranted inferences,'" Baraka v. McGreevey, 481 F.3d 187, 195 (3d Cir. 2007) (quoting Schuylkill Energy Res. Inc. v. Pa. Power & Light Co., 113 F.3d 405, 417 (3d Cir. 1997)), nor "a legal conclusion couched as a factual allegation." Papasan, 478 U.S. at 286.

While, as a general rule, the court may not consider anything beyond the four corners of the complaint on a motion to dismiss pursuant to Rule 12(b)(6), the Third Circuit has held that "a court may consider certain narrowly defined types of material without converting the motion to dismiss [to one for summary judgment pursuant to Rule 56]." In re Rockefeller Ctr. Props. Sec. Litig., 184 F.3d 280, 287 (3d Cir. 1999). Specifically, courts may consider **[*6]** any "document *integral to or explicitly relied upon* in the complaint." Burlington Coat Factory, 114 F.3d at 1426 (quoting Shaw, 82 F.3d at 1220).

III. Decision

REV contends each of First Priority's antitrust claims—Counts Two (15 U.S.C. § 1), Three (15 U.S.C. § 2-attempt to monopolize), Four (15 U.S.C. § 2-monopolization), Five (15 U.S.C. § 14), and Six (New Jersey State antitrust violations, N.J. Stat. Ann. § 56:9, et seq.)—because First Priority has not met its burden of alleging a relevant market. (ECF No. 35-1 at 3-6.) First Priority argues the allegations in its SAC "adequately distinguish[] between the role of used verses new ambulances in the subject market, which provides legal basis for excluding old and new ambulances as interchangeable substitutes by consumers." (ECF No. 38 at 3.)

In antitrust actions, plaintiffs have the "burden of defining the relevant market." Queen City Pizza v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997) (citing Tunis Bros. Co., Inc. v. Ford Motor Co., 952 F.2d 715, 726 (3d Cir. 1991)).[2] "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." Id. at 436 (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 375, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)). Furthermore, the test for determining interchangeability of use is not "reasonably interchangeable by a particular plaintiff, but 'commodities reasonably interchangeable by consumers for the same purpose.'" Id. at 436 (quoting United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)). The relevant market is legally insufficient, **[*7]** and thus dismissal is appropriate, when a plaintiff "fails to define its proposed relevant market with reference to the

[2] Importantly, the Third Circuit has also held that although defining a proper market can be a fact intensive inquiry requiring discovery, *see* Eastman Kodak Co. v. Image Tech. Servs, Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992), there is no "*per se* prohibition against dismissal of antitrust claims for failure to plead a relevant market under Fed. R. Civ. P. 12(b)(6)." Queen City, 124 F.3d at 436.

rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor." *Id. at 436* (citing *TV Commc'ns Network, Inc. v. Turner Network Television, 964 F.2d 1022, 1025 (10th Cir. 1992))*. The New Jersey Antitrust Act has incorporated the "reasonable interchangeability" standard applicable to federal antitrust claims by virtue of statute. *See* *N.J. Stat. Ann. § 56:9-18* (stating that the *New Jersey Antitrust Act* "shall be construed in harmony with ruling judicial interpretations of comparable Federal antitrust statutes and to effectuate, insofar as practicable, a uniformity in the laws of those states which enact it").

In the July 30, 2019 Opinion, this Court dismissed First Priority's antitrust claims because the relevant market in the Amended Complaint did "not encompass all reasonably interchangeable substitutes, nor [did] it adequately distinguish between the role of used verses new ambulances in the subject market." (ECF No. 31 at 20.) In the SAC, First Priority attempts to fix these deficiencies by offering **[*8]** the following:

> 78. The ambulance market as alleged by Plaintiff herein is defined, in part, based on the concepts of reasonable interchangeability, substitutability and cross-elasticity of demand. Consumers of the ambulances I the ambulance market shop for only new ambulances, not old or used ambulances. In this regard, 85-90% of consumers of new ambulances fall into three general categories as set forth below. Customers in each of these customer classes do not view used or older ambulances to be reasonably interchangeable with new ambulances, which comprise the ambulance market alleged in this case.
> 79. Volunteer ambulance purchasers ("VAPs") are funded through donation and/or municipal contributions. These customers buy and consider buying only new ambulances, not used ambulances. VAPs will extend the time between purchase of new ambulances rather than purchase used ambulances. Also, VAPs buy new ambulances in order to avoid accepting the liability associated with purchasing used ambulances without warranty or unknown vehicle maintenance or history.
> 80. Municipal ambulance purchasers ("MAPs") are funded thru [
>
> (sic] municipal contributions and billing. MAPs include fire department EMSs **[*9]** and may include some County organizations. MAPs in the normal course purchase new ambulances, not old or used ones. MAPs will extend the time between purchases of new ambulances rather than purchase used ambulances. Also, MAPs buy new ambulances in order to avoid accepting the liability associated with purchasing used ambulances without warranty or unknown vehicle maintenance or history.
> 81. Hospital-based ambulance purchasers ("HAPs") are hospital funded purchasing entities. HAPs almost always (over 90% of the time) purchase only new, not used ambulances. In the small number of cases that HAPs might use older ambulances, this is usually upon their takeover of municipal/volunteer territory for use in that territory only. Further, frequently when bidding on contracts HAPs required to provide new or 'like new' vehicles as part of the contract.
>
> 82. In sum, VAPs, MAPs, and HAPs primarily buy new ambulance vehicles with a few exceptions. The separation is based in large measure on the lack of any warranty of a used vehicle, the unknown history of a used vehicle's use and the known fact that ambulance use of a vehicle is extremely rigorous and hard on the chassis systems (brakes, suspension, **[*10]** engine) that become a reputational and financial liability. In addition, most bids and contracts require the purchase of new ambulances.
> 83. Although not part of the ambulance market as defined in this case, there exist some consumers that do not usually buy new ambulances, but do buy older or used ambulances as the rule. These customers are ambulance entities that service contracts though nursing homes and care centers and bid on a lowest acceptable price basis. These customers do not compete with VAPs, MAPs and HAPs for the purchase of new ambulances; instead, they compete with other such entities that need to survive financially based on non-market based Medicare/Medicaid reimbursements.

(ECF No. 34 ¶¶ 78-83.)

REV contends the above allegations do not "create a plausible relevant market." (ECF No. 35-1 at 2-4.) In so arguing, REV notes the SAC—like the Amended Complaint—continues to limit the relevant market to newly manufactured ambulances while continuing to admit the presence of used ambulances in the market "substantially impact[ed] the ability to sell new ambulances. (*Id.* at 4 (citing ECF No. 34 ¶¶ 73, 57).) As such, First Priority "cannot plausibly allege that its relevant market encompasses **[*11]** all interchangeable substitute products." (ECF No. 39 at 2.)

Indeed, the relevant market proposed in the SAC remains insufficient as a matter of law. As was the flaw with the relevant market in the Amended Complaint, the relevant market here does not encompass all reasonably interchangeable substitutes. While First Priority's new allegations (ECF No. 34 ¶¶ 78-83) distinguish between the role of new and used ambulances, these allegations are insufficient to demonstrate used ambulances are not reasonably interchangeable substitutes.

Further, in its Opposition, First Priority mischaracterized its own allegations. In responding to Rev's arguments, First Priority contends used ambulances should not be included in the proposed product market because there was a "very rare and unique occurrence of one period where a glut caused *some* intermarket impact." (ECF No. 38 at 9 (emphasis added).) However, by First Priority's own admission, they could not meet their contractual sales goals because the large number of used ambulances on the market *substantially impacted*" its ability to sell to ambulances. (ECF No. 34 ¶ 57 (emphasis added).)

Therefore, for the same reasons this Court set forth in its July **[*12]** 30, 2019 Opinion, First Priority's proposed relevant market fails as a matter of law. By not including used ambulances that "substantially impact[ed] the ability to sell new ambulances," the relevant market does not encompass all reasonably interchangeable substitutes. Accordingly, REV's Motion to Dismiss Counts Two, Three, Four, Five, and Six of the SAC is **GRANTED**.

IV. Conclusion

For the reasons set forth above, REV's Motion to Dismiss is **GRANTED**.

Date: April 28, 2020

Opinion by: Ellen L. Hollander

Opinion

MEMORANDUM OPINION

Plaintiffs Christina Richardson and Gordon Clark filed suit against their former employer, defendant Alliance Residential Company ("Alliance" or the "Company"). ECF 1. They alleged violations of the Fair Labor Standards Act ("FLSA"), 29 U.S.C. § 201 et seq., and corresponding provisions under Maryland law. *See* Md. Code (2016 Repl. Vol., 2017 Supp.), § 3-401 et seq. of the Labor & Employment Article. Following discovery, plaintiffs moved for partial summary judgment. ECF 28. In a Memorandum Opinion (ECF 40) and Order (ECF 41) of February 4, 2020, I denied plaintiffs' motion.

Alliance has filed a motion (ECF 42) seeking "an Order clarifying and/or reconsidering one of the findings/conclusions contained" in the Court's Memorandum Opinion. *Id.* at 1. Specifically, the Company seeks to clarify whether the Memorandum Opinion forecloses it from arguing at trial that it lacked knowledge that Mr. **[*2]** Clark worked overtime, without pay. *See id.* at 1-2. If so, Alliance asks the Court to revisit its ruling. *Id.* at 4. The Company's motion is supported by a memorandum of law. ECF 42-1 (collectively, the "Motion" or "Motion to Reconsider"). Plaintiff opposes the Motion (ECF 43), and Alliance has replied. ECF 44.

No hearing is necessary to resolve the Motion to Reconsider. *See* *Local Rule 105.6*. For the reasons that follow, I shall grant the Motion in part and deny it in part.

I. Background

A. Factual Background[1]

Alliance, a property management company, manages an 82-unit apartment building located on East Saratoga Street in Baltimore (the "Property"). ECF 3 (Answer), ¶ 4; *see also Our Company*, ALLIANCE RESIDENTIAL COMPANY, http://www.allresco.com/ (last visited Jan. 23, 2020). An on-site "business manager" oversees the Property's day-to-day operations, such as marketing and leasing, collecting rent, managing on-site staff, and interfacing with residents. ECF 28-1 (Elizabeth Karl Deposition) at 23, Tr. 7, 9. Generally, the business manager reports to a "regional manager," who, in turn, is supervised by a "regional vice president." *Id.* at 23, Tr. 7.

Ms. Richardson served as the Property's business manager from April 18, 2016 to November 1, 2017. ECF 28-1 (Richardson Answers to Interrogatories) at 60, No. 2. When **[*3]** Ms. Richardson began working at Alliance, the Company lacked a regional manager. As a result, Ms. Richardson was supervised by regional vice president Elizabeth Karl. ECF 28-1 at 23, Tr. 8. In December 2016, Alliance hired Sarah Malone as a regional manager. As of that time, Ms. Malone supervised Ms. Richardson until Ms. Richardson left employment with Alliance. *Id.*; *see also* ECF 28-1 at 60, No. 2.

Mr. Clark worked as the Property's on-site service supervisor from approximately October 2016 to October 2017. ECF 28-1 (Clark Answers to Interrogatories) at 71, No. 2; *see also* ECF 28-3 (Clark Deposition) at 110, Tr. 12; *id.* at 115, Tr. 32. Employed as an hourly worker, Mr. Clark's regular hours were Monday through Friday from 8:00 a.m. to 4:00 p.m. ECF 28-1 at 81, No. 2; ECF 29-1 (Clark Deposition) at 4, Tr. 67.[2] Mr. Clark was supervised by Ms. Richardson throughout his time at Alliance. ECF 28-1 (Alliance Admissions) at 82, No. 6; *see also* ECF 28-1 at 25, Tr. 16. Per the Company's policy, Ms. Richardson, as Mr. Clark's direct supervisor, was responsible for approving Mr. Clark's overtime work. ECF 28-1 at 33, Tr. 46.

When Alliance hired Ms. Richardson and Mr. Clark, it provided them with a copy of its Associate Handbook (the "Handbook"). ECF 28-2 at 6, Tr. 20-21; ECF 29-1 at 3-4, Tr. 65-66. Plaintiffs agreed **[*4]** to read the Handbook and become familiar with its provisions. *Id.* The Handbook advised employees that federal and state law require accurate timekeeping, and that Alliance had implemented timekeeping procedures for employees to record and submit accurate time records. *See* ECF 36-1 (Alliance Handbook) at 27. The Handbook stated, in part, *id.*:

> **Accurate Time**. Accurately recording time worked is the responsibility of every Associate. Federal and state laws require the Company to keep an accurate record of time worked in order to calculate Associate pay and benefits. Time worked is all the time actually spent on the job performing assigned duties. Associates are expected to regularly arrive at work on time, ready to work. Associates will be disciplined for excessive and/or unexcused absences. Non-exempt Associates should accurately record the time they begin and end their work, as well as the beginning and ending time of each meal period. They also should record the beginning and ending time of any split shift or departure from work for personal reasons.

Further, the Handbook contained a section titled "**OVERTIME PAY FOR NON-EXEMPT ASSOCIATES**." *Id.* at 57 (emphasis in original). The section provided, *id.*:

---

[1] The facts underlying this dispute are set forth in the Memorandum Opinion of February 4, 2020. ECF 40. Those facts are incorporated herein. The facts presented in this Memorandum Opinion are limited to those pertinent to the Motion to Reconsider.

[2] At his deposition, Mr. Clark testified that he believed that his work schedule did not include a break for lunch. ECF 29-1 at 4, Tr. 67-68. Although not entirely clear, it appears that Ms. Richardson received an unpaid lunch break. ECF 28-2 at 8, Tr. 29.

a. **Prior Approval** **[*5]** . Non-exempt Associates may be required to work overtime at their Supervisor's request. All overtime requires the prior approval of the Associate's Supervisor or Manager. Associates who work overtime without prior approval will be paid in accordance with the law, however, may be subject to disciplinary action up to and included termination for violating the prior approval requirement.

b. **Record All Hours Worked**. If your position is classified as non-exempt, you must record all hours worked. Working off the clock is prohibited, and no manager has the authority to require any Associate to do so. Any Associate who works off the clock or any manager that requests an Associate work off the clock may be subject to disciplinary action up to and including termination.

c. **Miscellaneous**. To respect each Associate's personal schedule, every effort will be made to minimize unwanted overtime. However, business demands are such that overtime may be required as a condition of employment. The company pays overtime in accordance with applicable federal and state laws. "Hours worked" does not include paid time off for holidays, vacation, illness, inclement weather, jury duty or bereavement.

Mr. Clark acknowledged **[*6]** at his deposition that he had read the Handbook. ECF 29-1 at 7, Tr. 78-79; *see id.* at 3-4, Tr. 65-57. When asked if he "understood that it was the company's policy that 'working off the clock is prohibited and no manager has the authority to require an associate to do so,'" Mr. Clark responded: "Yeah. I mean, its—it says it here." *Id.* at Tr. 79.

According to plaintiffs, Ms. Malone met with Ms. Richardson in February 2017, and instructed Ms. Richardson not to record more than forty hours of work per week. *See* ECF 28-2 at 16, Tr. 16; *see id.* at 18, Tr. 18. Ms. Richardson testified at her deposition that Ms. Malone said: "[Alliance] didn't have any money right now to pay overtime, my hours that I could get paid for were 9:00 to 5:00, but my job description expectations did not change." *Id.* at 25, Tr. 97; *see also id.* at 26, Tr. 100 ("[S]he stated that I could only basically get paid from 9:00 to 5:00, but my expectations and me being on call, none of that was changing."). Further, Ms. Richardson testified that she knew Ms. Malone's directive violated Alliance's policies. *Id.* at 29, Tr. 112. But, she did not report the conversation to Ms. Karl or to the Company's human resources department because she was worried that doing so could **[*7]** lead to her termination. *Id.* at 29, Tr. 112-13; *see also id.* at 30, Tr. 115.

Shortly after Ms. Richardson met with Ms. Malone in February 2017, Ms. Richardson spoke with Mr. Clark. ECF 28-2 at 13, Tr. 49; *see* ECF 29-1 at 14-15, Tr. 106-113. According to Mr. Clark, Ms. Richardson indicated that she had just talked to Ms. Malone. ECF 29-1 at 14, Tr. 109. Both Ms. Richardson and Mr. Clark testified that Ms. Richardson then told Mr. Clark that he could not record more than 40 hours of work per week on his timecard. ECF 28-2 at 13, Tr. 48; ECF 29-1 at 15, Tr. 110, 113. Mr. Clark testified that he became upset and walked away from Ms. Richardson, ending the conversation. ECF 29-1 at 16, Tr. 114. Mr. Clark never spoke directly with Ms. Malone about his overtime work. *Id.* at 13, Tr. 105.

Mr. Clark maintains that when Ms. Karl supervised Ms. Richardson, Mr. Clark would record time for work occurring outside of his regular hours when he considered it a "major" task, such as a repair that took an hour or more to complete. ECF 29-1 at 12, Tr. 98; *see id.* at 19, Tr. 128-29. In contrast, he did not record "minor" tasks that took 15-20 minutes or less, such as assisting a resident who was locked out of an apartment. *Id.* at 12, Tr. 98-100.

Following **[*8]** Mr. Clark's conversation with Ms. Richardson, Mr. Clark claims that he worked 50 hours per week: 40 regular hours between Monday and Friday and an additional 10 hours of overtime work on the evenings or weekends. ECF 28-1 at 71, No. 2. However, Mr. Clark admitted during his deposition that he did not change how he recorded his hours after talking to Ms. Richardson. That is, he continued to record hours outside of his regular schedule for "major" tasks, but not for minor tasks. ECF 29-1 at 19, Tr. 129; *see also id.* at 12, Tr. 98-101.

Mr. Clark resigned from Alliance in October 2017, and Ms. Richardson left on November 1, 2017. ECF 28-1 at 60, No. 2. Mr. Clark seeks $14,944.20 for the ten hours of overtime that he alleges he worked each week, without compensation, from February 1, 2017 to October 27, 2017. ECF 28-1 at 76, No. 10. Ms. Richardson seeks compensation for 51.5 hours of overtime pay for a period of 36 weeks. *See* ECF 28-1 at 76, No. 10; ECF 28-2 at 48, Tr. 189. The Motion implicates the Court's ruling only as to Mr. Clark.

B. Procedural History

Plaintiffs filed suit on April 17, 2018. ECF 1. On July 20, 2018, after defendants answered the Complaint, the Court issued a Scheduling Order. **[*9]** ECF 8. It set, *inter alia*, a deadline of December 17, 2018 to complete discovery, and January 29, 2019, as the deadline for filing dispositive pretrial motions. *Id.* Following several extensions, dispositive motions were due by June 11, 2019. *See* ECF 27.

On that date, plaintiffs moved for partial summary judgment, asserting, *inter alia*, that there was no genuine dispute of material fact and that Alliance was liable to plaintiffs for unpaid overtime hours. ECF 28. The motion was supported by several hundred pages of exhibits. *See* ECF 28-1 at 21-120; ECF 29-1; ECF 30-1; ECF 31-1. As to the FLSA, plaintiffs argued that Alliance violated the FLSA because "Plaintiffs' supervisors knew that Plaintiffs were working overtime hours but failed to ensure that the hours were recorded properly or take affirmative action to stop them from doing so." ECF 28-1 at 6. With respect to Mr. Clark, plaintiffs asserted that "there is no question Alliance was aware he was working overtime hours," given that Ms. Richardson, Mr. Clark's supervisor, "instructed him to work [overtime] hours, and told him that he would not be paid for them and that he should not record the time." ECF 28-1 at 10.

Alliance filed an **[*10]** opposition to the motion and submitted its own exhibits. ECF 34; ECF 35; ECF 36. The Company asserted that Mr. Clark was not entitled to summary judgment "because the evidence demonstrates that he did not have an objectively reasonable basis for concluding that Christina Richardson had actual authority or apparent authority to instruct him to work off the clock." ECF 34 at 35. Ms. Richardson lacked actual authority, Alliance contended, because the Handbook was clear that a supervisor could not instruct a subordinate to perform unrecorded work. *Id.* And, Ms. Richardson lacked apparent authority, according to Alliance, because Mr. Clark had read the Handbook and knew Alliance's policies. *Id.*

As indicated, I denied plaintiffs' motion in a Memorandum Opinion (ECF 40) and Order (ECF 41) of February 4, 2020. Of relevance here, I rejected Alliance's "contention that it is insulated from liability [as to Mr. Clark] because Ms. Richardson lacked actual or apparent authority to instruct Mr. Clark to manipulate his timesheets." ECF 40 at 26. I explained: "'Knowledge may be imputed to the employer when its supervisors or management encourage[] artificially low reporting.'" *Id.* (internal quotation **[*11]** marks omitted) (quoting *Bailey v. TitleMax of Ga., Inc., 776 F.3d 797, 803-04 (11th Cir. 2015))*.

The case of *Brennan v. General Motors Acceptance Corp., 482 F.2d 825 (5th Cir. 1973)*, was "instructive" on this point. ECF 40 at 26. I stated, *id.* 26-27:
