Trademark Law > Special Marks > Trade Names > General Overview

Trademark Law > Conveyances > General Overview

HN4[] **Conveyances, Licenses**

Mass. Gen. Laws ch. 138, § 25A, provides in pertinent part that: No licensee authorized under this chapter to sell alcoholic beverages to wholesalers or retailers shall-- (a) Discriminate, directly or indirectly, in price, between one wholesaler and another wholesaler, or between one retailer and another retailer purchasing alcoholic beverages bearing the same brand or trade name and of like age and quality. All price lists or price quotations made to a licensee by a wholesaler shall remain in effect for at least thirty days after the establishment of such price list or quotation. Any sale by a wholesaler of any alcoholic beverages at prices lower than the price reflected in such price list or quotation within such thirty day period shall constitute price discrimination under this section.

Governments > State & Territorial Governments > Licenses

HN5[] **State & Territorial Governments, Licenses**

The related, relevant regulations require each wholesaler by the fifth day of each month to post the prices that it will charge during the next following month for each item that the wholesaler sells. Mass. Regs. Code tit. 204, § 6.03(3). The regulations permit the wholesaler by the fifteenth day of the month to amend its posted prices, but only to meet a specific lower price or a specific greater discount for an individual item filed by a competitor. Mass. Regs. Code tit. 204, § 6.05(1). In other words, a wholesaler may not increase its previously posted price or decrease its price to any price other than the exact lower price for the same product that was posted by a rival wholesaler. The prices, as amended, become effective on the first day of the following month and they must remain unchanged throughout that calendar month. Mass. Regs. Code tit. 204, § 6.03(3).

Constitutional Law > Supremacy Clause > Federal Preemption

Constitutional Law > Supremacy Clause > General Overview

Constitutional Law > Supremacy Clause > Supreme Law of the Land

HN6[] **Supremacy Clause, Federal Preemption**

In the federal system of government established by our constitution, the laws of the United States are the supreme Law of the Land, U.S. Const. art. VI, and thus preempt and invalidate inconsistent state laws in certain circumstances.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Per Se Rule & Rule of Reason, Per Se Violations**

A state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1* when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Per Se Rule & Rule of Reason, Per Se Violations**

With regard to a possible per se violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, the court must in this case first decide if the restraint on trade at issue is a "unilateral restraint" or a "hybrid restraint." Second, if it is a "hybrid restraint," the court must decide if it involves a per se violation of *§ 1*.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN9[] **Exemptions & Immunities, Parker State Action Doctrine**

With regard to possible antitrust immunity as state action, the court must decide, first, whether there is a clearly articulated and affirmatively expressed state policy that the restraint at issue is intended to serve. If so, second, the court must decide whether that policy is actively supervised by the state itself.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Antitrust & Trade Law, Sherman Act

Not all restraints imposed upon private actors by government units necessarily constitute unilateral action outside the purview of § 1 of the Sherman Act, 15 U.S.C.S. § 1. Certain restraints may be characterized as "hybrid," in that nonmarket mechanisms merely enforce private marketing decisions. Where private actors are thus granted a degree of private regulatory power, the regulatory scheme may be attacked under § 1.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] Per Se Rule & Rule of Reason, Per Se Violations

A "hybrid restraint" does not necessarily involve any violation of § 1 of the Sherman Act, 15 U.S.C.S. § 1, let alone a per se violation. It depends upon the particular facts of the case.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN12[] Antitrust & Trade Law, Sherman Act

There are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. These agreements or practices are deemed unlawful per se without further examination under the rule of reason generally applied in Sherman Act cases.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Per Se Rule & Rule of Reason, Per Se Violations

The mere exchange of price data is not a per se violation of § 1 of the Sherman Act, 15 U.S.C.S. § 1.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] Per Se Rule & Rule of Reason, Per Se Violations

Where announced prices are coupled with a requirement that those prices be adhered to for a period of time, a per se violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1* exists.

Governments > Courts > Judicial Precedent

HN15[] Courts, Judicial Precedent

Federal appellate courts are bound by the United States Supreme Court's considered dicta almost as firmly as by the United States Supreme Court's outright holdings, particularly when a dictum is of recent vintage and not enfeebled by any subsequent statement. This principle applies equally to federal district courts.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN16[] Scope, Exemptions

Actively supervising, and thus assuring, a per se violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, is not sufficient to create state action immunity. A state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN17[] Exemptions & Immunities, Parker State Action Doctrine

A state may establish a regulatory scheme to displace free competition in order to serve some other, clearly stated public policy. If it does so, however, it must provide as part of that regulatory scheme state power to assure that the resulting prices are reasonable because the free market can no longer be relied upon to do so. Ideally in a democracy, if a state has this power and responsibility, competing economic interests should operate to cause the state to assure that the prices established through its regulatory scheme are reasonable.

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

HN18[] **Remedies, Injunctions**

At the conclusion of a successful federal challenge to a state statute or local ordinance, a district court can generally protect the interests of a federal plaintiff by entering a declaratory judgment, and therefore the stronger injunctive medicine will be unnecessary.

Opinion by: Mark L. Wolf

Opinion

[*42] *ORDER*

WOLF, D.J.

February 3, 1998

The following analysis is based upon the transcript of the decision rendered orally on January 27, 1998, granting plaintiffs' motions for summary judgment (Docket Nos. 158 & 166) and denying defendants' motions for summary judgment (Docket Nos. 162 & 169). This memorandum adds citations, revises and amplifies some **[**2]** of the discussion, and deletes certain non-essential matters.

The transcripts of the hearings on January 26 and 27, 1998, are being prepared and may be acquired from the court reporter.

* * * *

The present plaintiffs in this case are Sea Shore Corporation, which does business as Canterbury Liquors and Pantry, a licensed retailer of alcoholic beverages, [1] and an intervenor as plaintiff, Whitehall Company Limited, a licensed wholesaler of alcoholic **[*43]** beverages [2] **[**3]** (collectively, the "plaintiffs"). The defendants are the Chairman and Commissioners of the Massachusetts Alcoholic Beverages and Control Commission ("the Commission"), sued in their official capacities, [3] and a defendant-intervenor, Massachusetts Wholesalers of Malt

[1] The other original plaintiffs were Luke Brothers, Inc.; Cape Cod Package Store, Inc.; Andy's Market, Inc.; and Yankee Spirits, Inc. They voluntarily dismissed their claims in 1995.

[2] In February, 1996, Whitehall was granted leave to intervene as a plaintiff. Whitehall filed a complaint in intervention which mirrored the original plaintiffs' complaint.

Beverages, Inc. ("MWMBI"), a trade association whose members are engaged primarily in the wholesale sale beer [4] (collectively, the "defendants").

The plaintiffs brought this action seeking declaratory and injunctive relief. Count I seeks a declaration that *M.G.L. c. 138, § 25A* which relates to the pricing of wholesale liquor, violates *§ 1* of the Sherman Act both on its face and as applied, and that it is not shielded from invalidation by the immunity doctrine enunciated in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. Count I also seeks an order permanently enjoining the Commission from enforcing the state statute. *See* Verified Complaint at 7-9, PP 25-30.

Count II seeks the same declaratory and injunctive relief with respect to the regulations **[**4]** promulgated by the Commission to implement *§ 25A*. 204 C.M.R. §§ 6.00-6.07. *See* Verified Complaint at 9-11, PP 31-36.

The plaintiffs' fundamental contention is that the Massachusetts regulatory scheme concerning the pricing of wholesale liquor violates *§ 1* of the Sherman Act. *Section 1* states, in pertinent part, that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . . is illegal." *15 U.S.C. § 1*.

The Supreme Court has explained that:

> The Sherman Act was designed to be a comprehensive charter of economic liberty aimed at preserving free and unfettered competition as the rule of trade. It rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality, and the greatest material progress … The policy unequivocally laid down by the Act is competition.

Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 4, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958).

The Supreme Court has held that ***HN1***[] some conduct constitutes a *per se* violation of *§ 1*. *Id. at **[**5]** 5*. All other conduct is subject to a rule of reason test. *Broadcast Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 8, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*.

With regard to the procedural history of this matter, which began in 1994, the parties engaged in the limited discovery relevant to the alleged *per se* violation of *§ 1*. The parties filed cross-motions for summary judgment on this issue. The parties agreed at the hearing on January 26, 1998, that this issue can be decided on the cross-motions or summary judgment.

More specifically, the defendants assert that there are no material facts in dispute.

The plaintiffs contend that the question of whether the state actually monitors its regulatory scheme is not undisputed, but that this factual question is not material. As I will describe later, I agree that this issue is not material. Thus, the issues relating to the alleged *per se* violation can and should be decided on the cross-motions for summary judgement.

At the inception of this case I referred it to the Magistrate Judge. The Magistrate Judge heard argument on the cross-motions for summary judgment in December, 1996. He issued a Report and Recommendation **[**6]** on June 27, 1997 (the "Report"). He recommended that summary judgment be entered for the defendants. The plaintiffs filed objections to the Report. The defendants responded. I held a hearing on January 26, **[*44]** 1998, on the issues relating to the alleged *per se* violation of *§ 1*. If the plaintiffs do not prevail on their claims of a *per se* violation, discovery and further litigation will be necessary with regard to their rule of reason claim.

---

[3] At the time suit was brought, the Chairman was Stuart P. Krusell and the sole Commissioner was Pamela M. Nourse. The present Chairman is Walter J. Sullivan, Jr., and the other two members of the Commission are Suzanne Iannella, who replaced Nourse, and Frederick W. Riley. By operation of *Fed. R. Civ. P. 25(d)(1)*, they are, in their official capacities, the defendants.

[4] In September, 1994, MWMBI was granted leave to intervene as defendant-intervenor.

The Magistrate Judge's Report and Recommendation is instructive. However, **HN2**[] as a matter of law, this court is required to decide *de novo* the portions of the Report placed in dispute by the objections. 28 U.S.C. § 636(b)(1)(C). *See also* Fed. R. Civ. P. 72(b); Local Rule 3(b) of the Rules for United States Magistrates in the United States District Court for the District of Massachusetts.

HN3[] As these are motions for summary judgment, I am, with regard to each motion, required to look at the record in the light most favorable to the opposing party, *Woods v. Friction Materials, Inc., 30 F.3d 255, 259 (1st Cir. 1994)*, and to decide if any material fact is genuinely placed in dispute by the admissible evidence. *Fed. R. Civ. P. 56(c)*; **[**7]** *Anderson v. Liberty Lobby, 477 U.S. 242, 247-48, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. I agree with the parties that the evidence does not place any material fact genuinely in dispute. Thus, as I said, it is necessary and appropriate to decide now who is entitled to prevail as a matter of law.

I have decided that the plaintiffs are entitled to prevail on their motion for summary judgment. I reach this conclusion essentially for the reasons stated by the Ninth Circuit in addressing a similar regulatory scheme in *Miller v. Hedlund 813 F.2d 1344 (9th Cir. 1987)*, *cert. denied, 484 U.S. 1061, 98 L. Ed. 2d 983, 108 S. Ct. 1018 (1988)*. Comparable analysis was done by Judge Ralph Winter in his dissent concerning the virtually identical regulatory scheme involved in *Battipaglia v. New York State Liquor Auth., 745 F.2d 166, 179 (2d Cir. 1984)* (Winter, J., dissenting), *cert. denied, 470 U.S. 1027, 84 L. Ed. 2d 782, 105 S. Ct. 1393 (1985)*. The Ninth Circuit and Judge Winter essentially implement the analysis previously done by Professor Phillip Areeda and his colleagues in their treatise on ***antitrust law***; the reasoning of the Ninth Circuit and Judge Winter has been endorsed **[**8]** in the most recent edition of that treatise. 1 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 217, at 310-12 (1997). [5]

[9]** The statute now at issue, **HN4**[] *M.G.L. c. 138, § 25A*, provides in pertinent part that:

> No licensee authorized under this chapter to sell alcoholic beverages to wholesalers or retailers shall--
> (a) Discriminate, directly or indirectly, in price, . . . between one wholesaler and another wholesaler, or between one retailer and another retailer purchasing alcoholic beverages bearing the same brand or trade name and of like age and quality.

And then, in a further paragraph, it states:

> All price lists or price quotations made to a licensee by a wholesaler shall remain in effect for at least thirty days after the establishment of such price list or quotation. Any sale by a wholesaler of any alcoholic beverages at prices lower than the price reflected in such price list or quotation within such thirty day period shall constitute price discrimination under this section.

The plaintiffs do not challenge the broad prohibition against price discrimination contained in the first quoted paragraph, subsection (a). Rather, they challenge only the provisions of the second quoted paragraph.

HN5[] The related, relevant regulations require each wholesaler by the fifth day **[**10]** of each month to post the prices that it will charge during the next following month for each item that the wholesaler sells. 204 C.M.R. § 6.03(3). The regulations permit the wholesaler **[*45]** by the fifteenth day of the month to amend its posted prices, but only to meet a specific lower price or a specific greater discount for an individual item filed by a competitor. 204 C.M.R. § 6.05(1). In other words, a wholesaler may not increase its previously posted price or decrease its price to any price other than the exact lower price for the same product that was posted by a rival wholesaler. The prices, as amended, become effective on the first day of the following month and they must remain unchanged throughout that calendar month. 204 C.M.R. § 6.03(3). Plaintiffs challenge the validity of these regulations.

---

[5] The majority in *Battipaglia* expressly recognized that its suggestion, but not holding, that the regulatory scheme at issue might enjoy state action immunity if it otherwise constituted a *per se* violation of *§ 1* was contrary to the conclusion reached by "the most influential treatise on the subject, Areeda & Turner, 1 ***Antitrust Law*** P 213d, at 75 (1978)." *745 F.2d at 176*. Professor Areeda and his colleagues subsequently considered the observations made by the majority in *Battipaglia* and were unpersuaded, both on the issue of whether the New York regulatory scheme involved a *per se* violation of *§ 1* and whether there was state action immunity. *See* Areeda & Hovenkamp, *supra,* P 217, at 311. Professors Areeda and Hovenkamp also found the Ninth Circuit's decision in *Miller, supra,* to apply properly the approach employed by the Supreme Court in *Midcal. Id.* at 311-12.

HN6[] In the federal system of government established by our Constitution, the laws of the United States are the "supreme Law of the Land," U.S. Const. Art. VI, and thus preempt and invalidate inconsistent state laws in certain circumstances. *See, e.g., Gibbons v. Ogden, 22 U.S. (9 Wheat.) 1, 210-11, 6 L. Ed. 23 (1824)*. The standard for determining whether the statute and regulations **[**11]** now at issue are preempted by *§ 1* of the Sherman Act is set forth in the Supreme Court's decision in *Rice v. Norman Williams Co., 458 U.S. 654, 73 L. Ed. 2d 1042, 102 S. Ct. 3294 (1982)*. The Supreme Court in *Rice* said:

> HN7[] [A] state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under *§ 1* of the Sherman Act when the conduct contemplated by the statute is in all cases a *per se* violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

458 U.S. at 661. As I said earlier, at this point **[**12]** the motions for summary judgment address only the plaintiffs' claim of a *per se* violation of *§ 1* and, therefore, the Supreme Court's formulation of the issue in the *Rice* case applies here.

The analysis involved in deciding the cross-motions for summary judgment requires two steps. First, I must determine whether the Massachusetts regulatory scheme violates *§ 1* under the *Rice* test. If so, second, I must determine whether the state has and exercises sufficient power to prevent anticompetitive conduct to provide that regulatory scheme antitrust immunity as state action pursuant to the Supreme Court's decision in *Parker, supra.*

Each of these two steps also has two parts to the analysis. HN8[] With regard to a possible *per se* violation of *§ 1*, I must in this case first decide if the restraint on trade at issue is what the Supreme Court has called a "unilateral restraint" or a "hybrid restraint." *Fisher v. City of Berkeley, 475 U.S. 260, 267-68, 89 L. Ed. 2d 206, 106 S. Ct. 1045 (1986)*. Second, if it is a "hybrid restraint," I must decide if it involves a *per se* violation of *§ 1*.

HN9[] With regard to possible immunity, I must decide, first, whether there is a clearly **[**13]** articulated and affirmatively expressed state policy that the restraint at issue is intended to serve. *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)* (citing *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978))*. If so, second, I must decide whether that policy is actively supervised by the state itself *Id.*

As I will soon describe, I find that this case involves a "hybrid restraint." Furthermore, I find that the requirements that prices be announced, not be changed except to meet a competitor's lower announced price, and be maintained for a month effect a *per se* violation of *§ 1*.

In addition, I find that there is no state action immunity for this regulatory scheme because, while Massachusetts has a clearly articulated policy concerning what the restraint on trade is intended to serve, the **[*46]** state does not have the power to attempt to assure that the resulting prices are reasonable. Rather, the Commission merely enforces a *per se* violation of *§ 1*, and this conduct is insufficient to generate state action immunity. The reasons for **[**14]** these conclusions are as follows.

First, as I said, the Massachusetts regulatory scheme creates a "hybrid restraint" as defined by the Supreme Court in its 1986 decision in *Fisher.* In *Fisher,* the Supreme Court found a city rent control ordinance was not preempted by *§ 1* because the city unilaterally established the maximum rents that could be charged in Berkeley, California. 475 U.S. at 267. The Supreme Court went on to say, however:

> HN10[] Not all restraints imposed upon private actors by government units necessarily constitute unilateral action outside the purview of § 1. Certain restraints may be characterized as "hybrid," in that nonmarket mechanisms merely enforce private marketing decisions. *See* Rice v. Norman Williams Co., 458 U.S. at 665 (Stevens, J., concurring in judgment). Where private actors are thus granted "a degree of private regulatory power," id. at 666 n.1, the regulatory scheme may be attacked under § 1.

475 U.S. at 267-68.

The Supreme Court has characterized its decisions in Schwegmann Bros. v. Calvert Distillers Corp., 341 U.S. 384, 95 L. Ed. 1035, 71 S. Ct. 745 (1951), Midcal, supra, and *324* Liquor Corp. v. Duffy, **[**15]** 479 U.S. 335, 93 L. Ed. 2d 667, 107 S. Ct. 720 (1986), as involving "hybrid restraints." Each of those cases involved the liquor industry and some form of retail price maintenance. *Schwegmann;* 341 U.S. at 386; Midcal, 445 U.S. at 103; Duffy, 479 U.S. at 341. All involved the state authorizing price setting and enforcing the price established by private parties. Schwegmann, 341 U.S. at 387; Midcal, 445 U.S. at 105; Duffy 479 U.S. at 341.

In its 1987 decision in *Miller,* after examining *Schwegmann* and *Midcal,* the Ninth Circuit characterized a regulatory scheme relating to wholesale liquor prices that was comparable to the scheme at issue in the instant case as a "hybrid restraint" because it allowed private parties to set prices and the state did not review the reasonableness of them; rather, the regulatory scheme merely enforced private pricing decisions. 813 F.2d at 1350-51. Implicit in the *Miller* decision is the understanding that there may be a "hybrid restraint" concerning wholesale liquor prices as well as concerning retail liquor prices. I agree and, essentially for the reasons stated by the Ninth Circuit, find that this case involves a **[**16]** "hybrid restraint." Id. at 1351. [6]

In addition, I find that the Massachusetts regulatory scheme effects a *per se* violation of § 1. It Is important to recognize, however, that HN11[] a "hybrid restraint" does not necessarily involve any violation of § 1, let alone a *per se* violation. It depends upon the particular facts of the case. Hertz Corp. v. City of New York, 1 F.3d 121, 129 (2d Cir. 1993), cert. denied, *510 U.S. 1111, 127 L. Ed. 2d 375, 114 S. Ct. 1054, 114 S. Ct. 1055 (1994)*.

The Supreme Court has defined a *per se* violation most notably in Northern Pacific Ry. Co., 365 U.S. 1, 5, 81 S. Ct. 435, 5 L. Ed. 2d 377, stating that HN12[] "there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed **[**17]** to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." These agreements or practices are deemed unlawful *per se* "without further examination under the rule of reason generally applied in Sherman Act cases." Broadcast Music, Inc., 441 U.S. at 8.

The Ninth Circuit in *Miller* and Judge Winter in his dissent in *Battipaglia* deemed the regulatory schemes at issue in each of **[*47]** those cases to be a *per se* violation of § 1. They relied on statements of the Supreme Court in reaching their respective conclusions. I am persuaded by the reasoning and statements of the Supreme Court to concur with the Ninth Circuit and Judge Winter in this case.

Contrary to plaintiffs' contention, however, I do not find that merely exchanging price information, as the Massachusetts regulatory scheme in effect requires, is a *per se* violation, despite certain language in United States v. Container Corp., 393 U.S. 333, 21 L. Ed. 2d 526, 89 S. Ct. 510 (1969). There, the Supreme Court ruled that the result of a "reciprocal exchange of prices was to stabilize prices though at a downward level." 393 U.S. **[**18]** at 336. The Court held that "the limitation or reduction of price competition" resulting in this stabilization in prices "brings the case within the ban [of the Sherman Act], for … interference with the setting of price by free market forces is unlawful *per se*." 393 U.S. at 337 (citation omitted). Justice Fortas, however, wrote in a concurrence to *Container Corp.* that, "I do not understand the Court's opinion to hold that the exchange of specific information

[6] The Second Circuit decided *Battipaglia* in 1984, two years before the Supreme Court's decision in *Fisher.* Thus, the Second Circuit did not analyze whether the New York regulatory scheme at issue created a "hybrid restraint."

among sellers as to prices charged to individual customers, pursuant to mutual arrangement, is a *per se* violation of the Sherman Act." *Id. at 338-39* (Fortas, J., concurring). The Supreme Court has at least twice cited with approval this concurrence in stating that ***HN13***[] the mere exchange of price data is not a *per se* violation of *§ 1*. *United States v. United States Gypsum Co., 438 U.S. 422, 441 n.16, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*; *United States v. Citizens and Southern Nat'l Bank, 422 U.S. 86, 113, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975)*.

However, the Supreme Court has also stated that ***HN14***[] where, as here, announced prices are coupled with a requirement that those prices be adhered to for a period **[**19]** of time, a *per se* violation of *§ 1* exists. More specifically, in *Catalano, Inc. v. Target Sales, Inc.,446 U.S. 643, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)* (*per curiam),* the Supreme Court held an agreement among competing wholesalers not to sell on credit to be a form of price fixing that constituted a *per se* violation of *§ 1*.

In doing so, the Supreme Court said:

> We have held agreements to be unlawful *per se* that had substantially less direct impact on price than the agreements alleged in this case. For example, in *Sugar Institute v. United States, 297 U.S. 553, 601-02, 80 L. Ed. 859, 56 S. Ct. 629 (1936)*, the Court held unlawful an agreement to adhere to previously announced prices and terms of sale, even though advance price announcements are perfectly lawful and even though the particular prices and terms were not themselves fixed by private agreement.

446 U.S. at 647.

I recognize, as the Magistrate Judge pointed out, that the *Sugar Institute* case was decided after a non-jury trial and was based on detailed findings of fact, *297 U.S. at 571*; the Supreme Court's decision in 1936 did not characterize the violation being found **[**20]** as a *per se* violation; and the statement in *Catalano* is dictum. Report at 42. However, as the First Circuit said in *McCoy v. Massachusetts Inst. of Tech., 950 F.2d 13, 19 (1st Cir. 1991)*, *cert. denied, 504 U.S. 910, 118 L. Ed. 2d 545, 112 S. Ct. 1939 (1992)*, ***HN15***[] "federal appellate courts are bound by the Supreme Court's considered dicta almost as firmly as by the Court's outright holdings, particularly when ... a dictum is of recent vintage and not enfeebled by any subsequent statement." *See also United States v. Santana, 6 F.3d 1, 9 (1st Cir. 1993)*. This principle applies equally to federal district courts.

In the instant case, the Supreme Court's characterization in *Catalano* of an agreement to adhere to a previously announced price as a *per se* violation of *§ 1* is relatively recent. It appears to have been considered. Indeed, it was highly relevant to the Supreme Court's analysis in *Catalano.* Moreover, it has not been qualified by any subsequent statements by the Supreme Court to this court's knowledge.

In addition, the Supreme Court's characterization of an agreement to adhere to previously announced prices as a *per se* violation of *§ 1* makes **[**21]** sense when the purposes of the Sherman Act are considered. As indicated **[*48]** earlier, the "Sherman Act reflects a legislative judgment that ultimately competition will produce not only lower prices, but also better goods and services." *National Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 695, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. Thus, as the Supreme Court noted in *Catalano, 446 U.S. at 647*, an agreement among competing firms of professional engineers to refuse to discuss prices with potential customers until an engineer had been initially selected, while "not price fixing as such," constituted a *per se* violation of *§ 1* because no elaborate industry analysis was required to demonstrate that a ban on competitive bidding was anticompetitive. *National Soc'y of Prof'l Eng'rs, 435 U.S. at 692*. Similarly, in the instant case, no elaborate inquiry is needed to demonstrate that the Massachusetts regulatory scheme for pricing wholesale liquor is anticompetitive because it plainly precludes individual retailers from seeking to negotiate more favorable prices from competing wholesalers.

Thus, like the Ninth Circuit and Judge Winter in *Battipaglia,* I am guided if not governed by the Supreme Court's **[**22]** statements and reasoning in *Catalano,* and find that this case too involves a *per se* violation of *§ 1*.

See also Areeda & Hovenkamp, *supra,* P 217, at 311 ("Given the great danger that agreements to post and adhere will facilitate horizontal collusion, the dissent's position [in *Battipaglia]* is more consistent with Midcal."). [7]

[23]** The fact that a *per se* violation of *§ 1* has been demonstrated is not the end of the inquiry, however. As indicated earlier, a state may immunize an otherwise impermissible violation of *§ 1* if its regulatory scheme meets certain standards. However, as also indicated earlier, in this case those standards are not met.

To reiterate, the Supreme Court's decision in *Midcal* establishes the two-part test for determining whether immunity exists. *445 U.S. at 105*. The Magistrate Judge found with regard to the first prong that the challenged restraint was clearly articulated and affirmatively expressed as state policy. Report at 33. No objection has been taken to this finding. The parties do not dispute that this prong of the test is satisfied. I agree that the statute and regulations meet this requirement.

Midcal also requires, however, that the policy at issue be actively supervised by the state itself. U.S. 445 at 105. The defendants claim that the Commission monitors to assure that the regulatory scheme it administers is being followed by wholesalers and that enforcement action is sometimes taken in appropriate circumstances to prevent wholesale price discrimination. They **[**24]** assert, in part, that this is all that is required.

In *Battipaglia,* the majority, in dictum, stated that it felt there was "some force" to this argument. *745 F.2d at 176*. The majority also recognized, however, that Professors Areeda and Turner in their treatise rejected this contention. *Id.* (citing Areeda & Turner, ***Antitrust Law*** P 213d, at 75 (1978)). The Second Circuit did not decide this issue in *Battipaglia* because it was unnecessary in that case to do so. *Id.*

As indicated earlier, the plaintiffs state that, if it were material, they would seek more discovery and a trial to determine whether the state even actively enforces the regulatory scheme now being challenged. **[*49]** They assert, however, that this issue is immaterial because ***HN16***[] actively supervising, and thus assuring, a *per se* violation of *§ 1* of the Sherman Act is not sufficient to create state action immunity. I agree. As the Supreme Court has written, "a state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful." *Parker, 317 U.S. at 351*. *See also* Areeda & Hovenkamp, *supra,* P 226, at 470 ("The state itself **[**25]** might wish simply to yield discretion to private firms to break the antitrust laws when and how they please, but this is the place where federal antitrust policy draws the line.").

In essence, I find this case to be in material respects analogous to the Supreme Court's decisions in *Midcal* and *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 119 L. Ed. 2d 410, 112 S. Ct. 2169 (1992)*, and closely comparable to the Ninth Circuit's decision in *Miller.*

Midcal involved a regulatory scheme that had the effect of permitting private parties to set retail prices of wine in *California. 445 U.S. at 103*. The Supreme Court held that the California program was not actively supervised, and therefore was not protected by state action immunity, because:

> The State simply authorizes price setting and enforces the prices established by private parties. The State neither establishes prices nor reviews the reasonableness of the price schedules; nor does it regulate the terms of fair trade contracts. The State does not monitor market conditions or engage in any "pointed reexamination" of the program.

---

[7] The fact that the regulatory scheme at issue effects a *per se* violation of *§ 1* renders immaterial any dispute that may be created by competing affidavits in this case concerning whether the ability to amend a posted price downward in certain circumstances is anticompetitive or procompetitive. *Compare* Statement of Phoebe Morse, Director of the Boston Regional Office of the Federal Trade Commission, Appendix to Whitehall's Motion for Summary Judgment, Exh. C, *and* Statement and Affidavits of Daniel S. Levy, Memorandum in Support of MWMBI's Motion for Summary Judgment, Exh. C, D; Opposition of MWMBI to Plaintiff's Motions for Summary Judgment, Exh. B. It is this type of complicated economic analysis that a *per se* rule moots. *Northern Pacific Ry. Co., 356 U.S. at 5* ("This principle of *per se* unreasonableness … avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable -- an inquiry so often wholly fruitless when undertaken.").

445 U.S. at 105-06. *See also* Duffy, 479 U.S. at 344-45. In *Midcal,* the **[**26]** Supreme Court held that: "The national policy in favor of competition cannot be thwarted by casting such a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement." 445 U.S. at 106. The fatal flaw in *Midcal* was not the private price fixing, but the failure of state officials to set or regulate the prices resulting from California's regulatory scheme. *See* Areeda & Hovenkamp, *supra,* P 217, at 308.

In *Miller,* the Ninth Circuit held that the Oregon law at issue also did not involve sufficiently active supervision to generate immunity because:

> "Oregon mandates the posting of prices to be charged by each wholesaler, but does not in any way review the reasonableness of the prices set. While the Commission 'may reject any price posting which is in violation of any of its rules,' the effect of that rule is simply to effectuate the price posting. . . . It does not provide for government establishment or review of the prices themselves. . . . Oregon merely authorizes and enforces the disputed pricing practices."

813 F.2d at 1351 (quoting Miller v. Oregon Liquor Control Comm'n, 688 F.2d 1222, 1226-27 (9th Cir. 1982)). **[**27]**

Miller was decided in 1987. The Supreme Court's 1992 decision in *Ticor* reenforces the validity of the view expressed by the Ninth Circuit in that case. In *Ticor* the Supreme Court held that state regulators had not sufficiently supervised the uniform prices established by title insurers through rate bureaus to provide state action immunity under *Parker. Ticor,* 504 U.S. at 639-40. In doing so, the Supreme Court made several statements that I find particularly meaningful here.

First, it said that:

> *Midcal* confirms that while a State may not confer antitrust immunity on private persons by fiat, it may displace competition with active state supervision if the displacement is both intended by the State and implemented in its specific details. *Actual state involvement, not deference to private price-fixing arrangements under the general auspices of state law, is the precondition for immunity from federal law.*

Id. at 633 (emphasis added). The Supreme Court explained this point further, stating that the purpose of the active supervision inquiry:

> is to determine whether the State has exercised sufficient independent judgment and control **[**28]** so that the details of the rates or prices have been established as a product **[*50]** of deliberate state intervention, not simply by agreement among private parties. . . . The question is not how well state regulation works but whether the anticompetitive scheme is the State's own.

Id. at 634-35.

In addition, the Supreme Court explained that for this standard to be met, the state must both have and exercise the power to review and revise the pricing decisions made by private parties.

More specifically, it stated:

> "The active supervision requirement mandates that the State exercise ultimate control over the challenged anticompetitive conduct. . . . The mere presence of some state involvement or monitoring does not suffice. . . . The active supervision prong of the *Midcal* test requires that state officials *have and exercise* power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy."

Id. at 634 (quoting Patrick v. Burget, 486 U.S. 94, 101, 100 L. Ed. 2d 83, 108 S. Ct. 1658 (1988)) (emphasis added). *See also* New England Motor Rate Bureau, Inc. v. FTC, 908 F.2d 1064, 1070 (1st **[**29]** Cir. 1990).

This means, in part, that:

> For States which … choose to displace the free market with regulation, [the Supreme Court's] insistence on real compliance with both parts of the *Midcal* test [authorization and supervision] will serve to make clear that the State is responsible for the price fixing it has sanctioned and undertaken to control.

504 U.S. at 636. Thus, to generate immunity, it is not sufficient for a state, like Massachusetts, to articulate clearly a public policy reason -- in this case the goal of preventing price discrimination in the wholesale sale of liquor -- for authorizing a form of price fixing. It must also have and exercise the power to assure that the resulting prices are reasonable.

The reason for this requirement emerges from *Ticor.* There, the Supreme Court indicated that it had been, and would be, "adhering in most cases to fundamental and accepted assumptions about the benefits of competition within the framework of the antitrust laws." *Id. at 636*. As described previously, the Sherman Act is aimed at preserving free competition in order to, among other things, assure the lowest prices for the highest quality of goods. **[**30]** *National Soc'y of Prof'l Eng'rs, 435 U.S. at 695*; *Northern Pacific Ry Co., 365 U.S. at 4*. ***HN17***[] A state may establish a regulatory scheme to displace free competition in order to serve some other, clearly stated public policy. If it does so, however, it must provide as part of that regulatory scheme state power to assure that the resulting prices are reasonable because the free market can no longer be relied upon to do so. Ideally in a democracy, if a state has this power and responsibility, competing economic interests should operate to cause the state to assure that the prices established through its regulatory scheme are reasonable. In *Ticor,* however, the Supreme Court expressed its unwillingness to rely on the functioning of the democratic process alone. Rather, it instructed courts to determine whether states which in effect authorize a form of price fixing both have the power to prevent abuses and also exercise that power. *504 U.S. at 637-38*.

These principles as applied in the present case demonstrate that the *per se* violation of *§ 1* of the Sherman Act generated by *M.G.L. c. 138, § 25A* and the related regulations is not protected by state action immunity. As described **[**31]** earlier, the system of announced prices coupled with a requirement that those prices be adhered to for a period of time constitutes a form of price fixing that ordinarily constitutes an impermissible *per se* violation of *§ 1*. *Catalano, 446 U.S. at 643*; *Miller, 813 F.2d at 1349*. State action immunity for such anticompetitive conduct exists only if Massachusetts both has and exercises the power to assure that the prices privately set for wholesale liquor are reasonable.

Under Massachusetts law, however, the Commission does not have the statutory authority to review or revise wholesale liquor prices. More specifically, neither *M.G.L. c.* ***[*51]*** *138, § 25A*, the related regulations, nor any other statute or regulation gives the Commission this power. This contrasts, for example, with *M.G.L. c. 138, § 25C*, which requires the filing of minimum consumer prices for alcoholic beverages, and Commission approval as "not being excessive, inadequate or unfairly discriminatory" before those consumer prices can go into effect.

If the state in this case had the power to assure that its regulatory system generated reasonable wholesale liquor prices, it would also be necessary to decide whether **[**32]** it actually exercises that power. As the Commission lacks such power, this issue is not material. [8]

---

[8] However, since the parties have agreed that the record is complete concerning this issue and that it can be resolved on summary judgment, in the interest of completeness I note that there is little evidence that the Commission exercises any conceivable power it might have to try to assure the reasonableness of prices for wholesale liquor.

Mr. Krusell, a former Commissioner, gave some testimony with regard to his activities in considering the reasonableness of prices. Memorandum in Support of MWMBI's Motion for Summary Judgment, Exh. F (Stuart Krusell Deposition Transcript), at 2:84, 3:58-59. There is considerably more evidence indicating that the Commission does not actively seek to evaluate or assure the reasonableness of prices. For example, there is no document in the record showing that the Commission ever reviewed, let alone approved, the reasonableness of a wholesale liquor price. The depositions of Commission employees Robert Temple and Peter Connelly are consistent with the conclusion that the Commission did not do this. Appendix to Whitehall's Opposition, Exh. 5 (Robert Temple Deposition Transcript), at 34, 90-91; Appendix to Whitehall's Opposition, Exh. 4 (Peter Connelly Deposition Transcript), at 41-44, 48-50.

[33]** In view of the foregoing, the plaintiffs are entitled to summary judgment of their request for a judgment declaring that the pertinent portion of *M.G.L. c. 138, § 25A* and the implementing regulations are preempted by *§ 1* of the Sherman Act and, therefore, are invalid. It is not clear, however, whether it will be necessary or appropriate to issue the injunctive relief plaintiffs seek. ***HN18***[] "At the conclusion of a successful federal challenge to a state statute or local ordinance, a district court can generally protect the interests of a federal plaintiff by entering a declaratory judgment, and therefore the stronger injunctive medicine will be unnecessary." *Doran v. Salem Inn, Inc., 422 U.S. 922 931, 45 L. Ed. 2d 648, 95 S. Ct. 2561 (1975)*. Thus, unless the Commonwealth of Massachusetts states that it does not intend to comply with the declaratory judgment which will be issued, the court perceives no imminent threat of irreparable harm and, therefore, no need to issue an injunction. *See South Boston Allied War Veterans Council v. City of Boston, 875 F. Supp. 891, 920 (D. Mass. 1995)* (entering declaratory judgment, but not injunction, concerning decision that City could not **[**34]** condition issuance of a permit for St. Patrick's Day Parade on the inclusion of a gay and lesbian group because City intended to comply with the declaratory judgment).

If either the Commonwealth or the defendant-intervenor Massachusetts Wholesalers of Malt Beverages, Inc. wishes to appeal this decision and requests a stay pending appeal, I will decide whether a stay is justified. *See, e.g., Exxon Corp. v. Esso Worker's Union, Inc., 963 F. Supp. 58 (D. Mass. 1997)*.

Accordingly, it is hereby ORDERED that:

1. The Attorney General shall by February 17, 1998, inform the court:

(a) Whether the Chairman and Commissioners of the Alcoholic Beverages and Control Commission intend to comply voluntarily with the declaratory judgment to be entered or whether it will be necessary for the court to enter the requested injunction;

(b) Whether the Chairman and Commissioners of the Alcoholic Beverages and Control Commission intend to appeal; and, if so

(c) Whether they seek a stay of this court's Order pending appeal.

2. Defendant-Intervenor Massachusetts Wholesalers of Malt Beverages, Inc. shall, by February 17, 1998, inform the court whether it intends to appeal and, if so, whether it seeks **[**35]** a stay of this court's Order pending appeal.

3. If either defendant moves for a stay pending appeal, it shall, by February 24, 1998, file a supporting memorandum and affidavit(s).

[*52] 4. If plaintiffs wish to oppose any requested stay, they shall, by March 2, 1998, file their memorandum and affidavit(s).

5. If necessary, a further hearing will be held on March 10, 1998, at 3:00 p.m.

HN1[] **Motions to Dismiss, Failure to State Claim**

In ruling on a motion to dismiss, the court must construe the complaint's allegations in the light most favorable to the plaintiff and all well-pleaded facts and allegations in the plaintiff's complaint must be taken as true. The allegations of a complaint should not be dismissed for failure to state a claim unless it appears beyond a doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Nonetheless, in order to withstand a motion to dismiss, a complaint must allege facts sufficiently setting forth the essential elements of the cause of action.

HN3[] Filed Rate Doctrine, Public Utilities & Telecommunications Carriers

The filed rate doctrine prohibits claims against a regulated utility based on allegations that the utility's "filed rate" -- in other words, one approved by the governing regulatory agency -- is too high and the product of anticompetitive activity. Courts have frequently invoked the doctrine to dismiss overcharge claims by ratepayer plaintiffs.

HN7[] Alternative Dispute Resolution, Arbitration

Sections 271 and 272 of Telecommunications Act of 1996 (Act), codified at 47 U.S.C.S. §§ 271, 272, merely set forth a checklist of conditions that local exchange carriers must meet before they will be permitted to compete in the long-distance service market. If there are problems with carriers failing to satisfy these duties to their competitors, the Act establishes the sole remedy: state public utility commission arbitration and enforcement proceedings, with review by federal courts.

Opinion

MEMORANDUM* [*2] *OPINION AND ORDER

CHARLES P. KOCORAS, District Judge:

This matter is before the Court on Defendant Ameritech's motion to dismiss Plaintiffs' complaint pursuant to *Fed.R.Civ.P. 12(b)(6)*. For the following reasons, Ameritech's motion is granted.

BACKGROUND

The following facts are taken from Plaintiffs' complaint, the allegations of which must be taken as true for the purposes of this lawsuit.

A brief summary of the evolution of the telecommunications industry is first appropriate. During the early part of this century, American Telephone and Telegraph Company (AT&T) and the Bell Operating Companies, which were wholly-owned subsidiaries of AT&T, controlled much of the local and long-distance telephone markets. In 1974, the United States filed a lawsuit against AT&T alleging violations of the Sherman Act. Ultimately, in 1984, AT&T was divested of control over the seven Regional Bell Operating Companies (RBOCs) and thus exited the local telephone business. The RBOCs, including Ameritech, were barred from providing long distance services, and were required to provide long-distance carriers with exchange access that was equal in type, quality and price to the access provided **[*3]** to AT&T.

Local telephone companies, such as the RBOCs, are commonly referred to as local exchange carriers ("LECs"). Local exchange carriers generally provide business and residential customers with local exchange services, such as local telephone calls, operator services, and advanced features such as call waiting, call forwarding, and voice mail. They also provide exchange access services, which allow long distance carriers to use the local exchange facilities to originate and terminate long distance calls to end users. In addition to the RBOCs, there are now hundreds of other LECs operating in the United States.

The Telecommunications Act of 1996 ("the 1996 Act") became law on February 8, 1996. The Act sought to adopt a "pro-competitive, de-regulatory policy framework" by creating competition in both the local telephone and long-distance service markets. The intent of the Act was to create competition without delay so that consumers could reap the benefits of such competition as soon as possible. The Act defined the seven original RBOCs and GTE as "incumbent local exchange companies" ("ILECs"), imposing specific requirements on these corporations.

Recognizing that the ILECs (including **[*4]** Ameritech) had previously existed as natural monopolies in their respective local markets, the Act requires the ILECS to provide potential competitors access and connections to their lines and equipment on just, reasonable and non-discriminatory rates and charges. In addition, the ILECs are also required to provide competitors the same quality service to competitors' customers that the ILECs provide to themselves.

With respect to long-distance service, the 1996 Act establishes a detailed mechanism for the RBOCs to compete in the long-distance market (with incumbents AT&T, MCI, Sprint and GTE). Before the RBOCS can offer long-distance telephone service, however, the Act requires them to, *inter alia*, satisfy a 14-point checklist of requirements and demonstrate that there is competition in their respective local markets. *See 47 U.S.C. § 271(b)(1)*. The Act vests the FCC with the power to decide, upon the request of an RBOC, if and when the RBOC has met the requirements to enter the long-distance market.

As for local service, the Act preempts the states from adopting or enforcing any barriers to entry, such as exclusive local telephone franchises. Section 251 of the 1996 Act **[*5]** also imposes certain obligations on the ILECs which are designed to permit new entrants to use some or all of the ILECs' established networks to offer competitive local exchange services. ILECs are specifically required to: (1) allow competitors to interconnect with its network so that the competitor can provide calls to and from that network; (2) sell to competitors access to components of its network ("network elements") on an unbundled or individual basis; and (3) sell its retail telephone services to competitors at wholesale prices. All of these requirements are to be provided by the ILEC "on rates, terms, and conditions that are just, reasonable, and nondiscriminatory."

Plaintiffs Richard Goldwasser, Michael Cohn, Eric Carter and Richard Lozon (collectively "Plaintiffs") are citizens of the states of Illinois, Wisconsin, Indiana and Michigan, respectively, and all are local telephone service subscribers in their respective states. Plaintiffs seek to certify a class action on behalf of "all subscribers for local telephone services from the defendant or its competitors, who reside or resided in the states of Illinois, Indiana, Michigan, Ohio and Wisconsin, and are or were subscribers **[*6]** for the period of February 8, 1996 [until present]." Defendant Ameritech provides local telephone service to subscribers and customers in Illinois, Indiana, Michigan, Ohio and Wisconsin. Plaintiffs allege that Ameritech controls in excess of 90 percent of the markets for local telephone service in its geographic areas.

Plaintiffs allege that Ameritech has committed monopolistic acts in furtherance of an anticompetitive objective of maintaining a monopoly for local phone service in the five-state region. Ameritech is accused of a litany of activities which violate its duties under Sections 251 and 252 of the Telecommunications Act of 1996. Primarily, Plaintiffs assert that Ameritech has denied its competitors many of the elements which are required by the Act and are necessary for competition. For example, Ameritech is alleged to have violated Section 251(c)(3) of the Act by delaying the provision to its competitors of unbundled elements, loops, and access to local transport interoffice transmission facilities. All told, the Plaintiffs' complaint lists 20 separate anticompetitive activities that Ameritech is alleged to be engaged in.

Plaintiffs essentially accuse Ameritech of engaging **[*7]** in anticompetitive activity to prevent competition in the local telephone service market. Count I of Plaintiffs' complaint, asserting a claim under § 2 of the Sherman Act, alleges that Ameritech's anticompetitive acts have harmed Plaintiffs' ability to select among a competitive group of local telephone providers, thus causing Plaintiffs to have to pay supracompetitive prices for telephone prices. In other words, Plaintiffs claim that Ameritech's actions have caused them to be damaged by having to pay telephone bills that were and are higher than they would be with the competition that would be generated but for Ameritech's unlawful acts. In Count II, Plaintiffs allege a cause of action under *§§ 206* and *207* of the Communications Act of 1934 (as amended by the Telecommunications Act of 1996), asserting that Ameritech's anticompetitive acts violate the provisions of the statute.

Ameritech has now filed a motion to dismiss Plaintiffs' complaint, asserting several bases as to why it fails as a matter of law. Before addressing the substance of this motion, however, it is necessary to set forth the appropriate standard of review at this stage of the case.

STANDARD OF REVIEW

The **[*8]** purpose of a motion to dismiss pursuant to *Rule 12(b)(6)* is to test the sufficiency of the complaint, not to decide the merits of the case. Defendants must meet a high standard in order to have a complaint dismissed for failure to state a claim upon which relief may be granted. ***HN1***[] In ruling on a motion to dismiss, the court must construe the complaint's allegations in the light most favorable to the plaintiff and all well-pleaded facts and allegations in the plaintiff's complaint must be taken as true. *Bontkowski v. First National Bank of Cicero, 998 F.2d 459, 461* (7th Cir.), *cert. denied*, *510 U.S. 1012, 126 L. Ed. 2d 567, 114 S. Ct. 602 (1993)*. The allegations of a complaint should not be dismissed for failure to state a claim "unless it appears beyond a doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. *See also* *Hartford Fire Insurance Co. v. California, 509 U.S. 764, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)*; *Sherwin Manor Nursing Center, Inc. v. McAuliffe, 37 F.3d 1216, 1219 (7th Cir. 1994)*, *cert. denied*, *516 U.S. 862,* ***[*9]*** *116 S. Ct. 172, 133 L. Ed. 2d 113 (1995)*. Nonetheless, in order to withstand a motion to dismiss, a complaint must allege facts sufficiently setting forth the essential elements of the cause of action. *Lucien v. Preiner, 967 F.2d 1166, 1168* (7th Cir.), *cert. denied*, *506 U.S. 893, 121 L. Ed. 2d 196, 113 S. Ct. 267(1992)*.

HN2[] In reviewing a *Rule 12(b)(6)* motion to dismiss for failure to state a claim, the court is limited to the allegations contained in the pleadings themselves. Documents incorporated by reference into the pleadings and documents attached to the pleadings as exhibits are considered part of the pleadings for all purposes. *Fed.R.Civ.P.*

10(c). In addition, "documents that a defendant attaches to a motion to dismiss are considered a part of the pleadings if they are referred to in the plaintiff's complaint and are central to her claim." Venture Associates Corp. v. Zenith Data Systems Corp., 987 F.2d 429, 431 (7th Cir. 1993). It is with these principles in mind that we turn to the motion before us.

DISCUSSION

Ameritech asserts three basic arguments as to why Plaintiffs' complaint must be dismissed. Ameritech first contends that the filed rate doctrine **[*10]** bars the claims for damages of both counts of Plaintiffs' complaint. Furthermore, Ameritech asserts that Plaintiffs have no standing to assert either count in this case. Finally, Ameritech also argues that Count II is legally without merit because the 1996 Act does not establish free-standing duties for which consumers can bring private actions for violations thereof.

I. Filed Rate Doctrine

Ameritech's first argument is that the damage claims of Plaintiffs' complaint, which basically seek recompense for Plaintiffs' overpayment for telephone services, are barred by the filed rate doctrine. ***HN3***[] This doctrine prohibits claims against a regulated utility based on allegations that the utility's "filed rate" -- in other words, one approved by the governing regulatory agency -- is too high and the product of anticompetitive activity. *See* Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17, 18 (2d Cir. 1994) (a filed rate is "per se reasonable and unassailable in judicial proceedings brought by ratepayers"). In fact, courts have frequently invoked the doctrine to dismiss overcharge claims by ratepayer plaintiffs. *See, e.g.*, In re Wheat Rail Freight Rate Antitrust Litig., 759 F.2d 1305, 1311-13 **[*11]** (7th Cir. 1984) (affirming dismissal of antitrust claim under Fed.R.Civ.P. 12(b)(6)), *cert. denied 476 U.S. 1158 (1986)*; County of Stanislaus v. Pacific Gas & Elec. Co., 114 F.3d 858 (9th Cir. 1997) (same), *cert. denied 139 L. Ed. 2d 754, 1998 U.S. LEXIS 494, 1998 WL 15468, 118 S. Ct. 854 (1998)*. Thus, Ameritech argues that since Plaintiffs' claims are merely disputing the reasonableness of Ameritech's filed rates, these claims must be dismissed under the filed rate doctrine.

Plaintiffs first point out, and Ameritech concedes, that the filed rate doctrine does not bar the claims in this case insofar as they seek injunctive relief. *See* Georgia v. Pennsylvania R. Co., 324 U.S. 439, 456-59, 89 L. Ed. 1051, 65 S. Ct. 716 (1945) (suit that seeks to enjoin anticompetitive conduct rather than revoke tariff is not barred by doctrine); *see also Gelb v. AT&T Co., 813 F. Supp. 1022, 1033 (S.D.N.Y. 1993)* ("the filed rate doctrine does not affect plaintiff's claim for declaratory or injunctive relief"). In addition, Plaintiffs argue that, because the conduct complained of does not directly involve the rate-setting process, this case falls outside the parameters of the filed rate doctrine and therefore is not barred. Finally, **[*12]** Plaintiffs contend that the filed rate doctrine is only applicable when the regulatory agency conducts a meaningful review of a rate to ensure that it is reasonable. Asserting that the five states' Public Utility Commissions (PUCs) do not review telephone tariffs with sufficient scrutiny, Plaintiffs argue that the filed rate doctrine does not apply in this case.

It is first appropriate to discuss the origins of the filed rate doctrine and the limits of its scope. The doctrine was first recognized by the Supreme Court in Keogh v. Chicago & N.W. R. Co., 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47 (1922). In *Keogh*, the Court held that a shipper could not recover damages based upon a claim that, but for the alleged conspiracy among carriers, the shipper would have been entitled to transportation rates lower those which had been filed and approved by the Interstate Commerce Commission (ICC). Id. at 160. The Court based its decision on three policy considerations: (1) plaintiffs should not be allowed an antitrust remedy for rates found reasonable by the ICC; (2) awarding an antitrust remedy would result in unjust discrimination in favor of the litigious plaintiffs; and (3) it **[*13]** would be near impossible for the Court to determine that a particular hypothetical lower rate would have existed absent the antitrust violation and that this rate would have been approved by the ICC. Id. at 164-65. Simply put, "the filed rate doctrine prohibits a party from recovering damages measured by comparing the filed rate and the rate that might have been approved absent the conduct in issue." H. J. Inc. v. Northwestern Bell Tel. Co., 954 F.2d 485, 488 (8th Cir.) (*citing* Arkansas Louisiana Gas Co. v. Hall, 453 U.S. 571, 578-79, 69 L. Ed. 2d 856, 101 S. Ct. 2925 (1981)), *cert. denied 504 U.S. 957, 112 S. Ct. 2306, 119 L. Ed. 2d 228 (1992)*. The Supreme Court has affirmed the continuing vitality of the filed rate doctrine, *see* Square D Co. v. Niagara Frontier

Tariff Bureau, 476 U.S. 409, 90 L. Ed. 2d 413, 106 S. Ct. 1922 (1986), and the Seventh Circuit has also recently recognized the doctrine in the telecommunications context. *See* *Cahnmann v. Sprint Corp., 133 F.3d 484, 1998 U.S. App. LEXIS 118, 1998 WL 3357 (7th Cir. 1998)*.

Ameritech asserts that this case presents exactly the kinds of claims that the filed rate doctrine is intended to bar. Ameritech contends that Plaintiffs, no matter what **[*14]** the underlying conduct that they complain of, are merely seeking recovery for Ameritech's overcharge for local telephone services. To bolster this contention, Ameritech points to Plaintiffs' complaint, which claims damage for "having to pay telephone bills that were and are higher than they would be with the competition that would be generated but for the defendant's unlawful acts and conduct." Since Plaintiffs' damage claims implicate the reasonableness of a filed rate, therefore, Ameritech argues that the filed rate doctrine bars these claims.

Plaintiffs vehemently disagree with Ameritech's characterization of their claims in this case. They argue that the filed rate doctrine only shields unlawful conduct which is integral to the rate-making process, something which is not at issue in this case. *Cf.* *Wegoland, 27 F.3d 17* (ratepayers barred from challenging telephone company's misrepresentation of costs to justify higher rates); *Taffet v. Southern Co., 967 F.2d 1483* (11th Cir.) (filed rate doctrine applies to utility's fraudulent misrepresentations to state rate-setting commission), *cert. denied 506 U.S. 1021, 121 L. Ed. 2d 583, 113 S. Ct. 657 (1992)*; *Keogh, 260 U.S.* **[*15]** *156, 67 L. Ed. 183, 43 S. Ct. 47* (doctrine bars suit alleging conspiracy to fix railroad rates). In this case, in contrast, Plaintiffs allege that Ameritech has effectively fenced-out competitors from the local telephone service market, thus preserving Ameritech's monopoly power and its ability to extract supracompetitive prices from consumers. The gist of Plaintiffs' claims is that Ameritech has failed to comply with its duties under the 1996 Act, which was intended to open the local telephone markets to free and fair competition. Though such conduct may indirectly impact telephone rates, Plaintiffs contend that it is not integral to the rate-setting process. Thus, Plaintiffs assert that the filed rate doctrine should not bar its claims in this case.

The principal case upon which Plaintiffs rely in drawing this distinction between rate and non-rate anticompetitive activity is *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144 (3d Cir. 1993)*. In *Lower Lake Erie*, steel companies, dock companies and trucking companies asserted antitrust claims against railroad companies, alleging that the railroads "conspired ... to preclude competitors from entering the market of **[*16]** lake transport, dock handling, storage and land transport of iron ore." *Id. at 1151*. A central issue in the case was whether the steel companies, as consumers in the iron ore market, were barred from asserting their claims by the filed rate doctrine. Relying on this doctrine, the district court had previously dismissed the steel companies' claims that were "based on the allegation that, absent the conspiracy, these plaintiffs would have paid lower rates for costs associated with the transportation of ore." *Id. at 1154*. However, the steel companies were allowed to proceed with their damage claims insofar as they alleged "non-rate anticompetitive activity" -- specifically, "that the railroads conspired to protect their stronghold in the ore transport market by blocking entry by low-cost competitors, not that the railroads charged an unlawful rate." *Id. at 1159*. Plaintiffs contend that such market exclusion is exactly what they are accusing Ameritech of in this case, and that therefore the filed rate doctrine does not apply.

Assuming that the *Lower Lake Erie* court properly applied the filed rate doctrine (which is subject to debate), this Court is convinced that *Lower* **[*17]** *Lake Erie* is nevertheless distinguishable from the facts of this case. In *Lower Lake Erie*, the alleged anticompetitive activity sought to exclude an entirely new alternative means of competition -- shipping by truck instead of rail -- which would have otherwise been available to the consumer steel company plaintiffs. The court explained that "the question of hypothetical lower rates [was] ancillary" since the excluded trucking competitors would not have been subjected to the same rate-setting regulatory review. *Id. at 1160*. Thus, the filed rates of the railroads were only relevant to the extent that consumers were constrained to pay them for lack of any other options.

In stark contrast, the competitors allegedly excluded in this case are telephone companies, just like Ameritech, that are governed by the same rate-filing requirements in that industry. Unlike the steel companies in *Lower Lake Erie*, consumers in the local telephone market are captive to rates approved by the state PUCs. Any measure of damages in this case would necessarily involve the Court's determination of a hypothetical lower rate that would have been approved by the various state PUCs -- exactly **[*18]** the messy task which the filed rate doctrine seeks to avert. Thus, since filed rates are necessarily implicated by Plaintiffs' claims, the distinction drawn by *Lower Lake Erie* is not relevant to the case at bar. *See* *County of Stanislaus v. Pacific Gas & Elec. Co., 114 F.3d 858, 865 (9th Cir. 1997)* (similarly finding *Lower Lake Erie*'s distinction irrelevant where filed rates are unavoidable).

In the Court's opinion, the filed rate doctrine properly governs the anticompetitive conduct alleged in this case. Though Plaintiffs' complaint specifically attacks Ameritech's actions with respect to suppressing competition in the local telephone service market, rather than activity directly involved in the rate-setting process, their claims necessarily seek damages for the result these anticompetitive activities have allegedly had on the telephone rates which they, as consumers, must pay. The damages sought by Plaintiffs -- indeed, their only possible basis for standing to assert these claims -- stem from these filed rates allegedly inflated by the lack of fair competition. Ameritech's alleged actions to exclude competition, without making the link that these actions have on telephone **[*19]** rates, do not of themselves harm consumers. Thus, when reduced to its essence, Plaintiffs' complaint simply seeks damages for Ameritech's overcharging for telephone services. In this Court's opinion, such claims clearly fall under the filed rate doctrine.

Plaintiffs alternatively argue that, even if the filed rate doctrine applies to Ameritech's conduct in this case, the doctrine is still inapplicable because Ameritech's local telephone rates are not subjected to sufficient regulatory review. Some courts have held that, where filed rates are the product of anticompetitive activity, but are not afforded meaningful review by the state agency, the filed rate doctrine does not apply. *See* *Brown v. Ticor Title Ins. Co., 982 F.2d 386, 394 (9th Cir. 1992)*; *Wileman Bros. & Elliott, Inc. v. Giannini, 909 F.2d 332 (9th Cir. 1990)*. To that end, Plaintiffs accuse the state regulatory agencies in this case as possessing little more than a rubber stamp in the rate-setting process. Though the state statutes require varying notice prior to imposition of a new rate, Plaintiffs point out that in certain instances Ameritech's rates can become effective without consideration by the respective **[*20]** PUCs. *See, e.g.*, *Ohio Rev. Code § 4909.42* (rate increases become effective 245 days after filing absent action by commission); *220 ILCS 5/9-201(a)* (45-day notice to amend tariff, takes effect absent suspension by commission). Such review, requiring only "non-disapproval", has been held inadequate to justify application of the filed rate doctrine. *See* *Brown, 982 F.2d at 393-94*; *Wileman, 909 F.2d at 337-38*. Thus, because there is some question as to the level of review through which Ameritech's rates must pass, Plaintiffs argue that the filed rate doctrine cannot be held to apply as a matter of law.

In contrast to the Ninth Circuit's view, however, the Seventh Circuit has opined that it is unnecessary for a rate to undergo rigorous review for it to fall within the protection of the filed rate doctrine. *In re Wheat Rail Freight Rate Antitrust Litig., 759 F.2d 1305 (7th Cir. 1985)*. In *Wheat Rail*, recent legislation had limited the regulatory agency's review of the reasonableness of a railroad's rates unless it first found the railroad at issue had market dominance. *Id. at 1311*. Given this limited review, the plaintiffs argued that the filed rates should not be **[*21]** afforded protection under the filed rate doctrine. Since the agency retained the power to ensure that rates did not discriminate among consumers, however, the court held that the filed rate doctrine barred the antitrust damage claims in that case. *Id.* Thus, ***HN4***[] as long as the agency has the power to review and challenge a filed rate, it is unnecessary to consider the fastidiousness with which that power is exercised. *Id.; see also* *Square D, 476 U.S. at 417* (noting that the lower court properly concluded that the filed rate doctrine applied, not only where rates have been investigated and approved by the governing agency, but whenever tariffs have been filed). Since Ameritech's rates are filed with, and subject to the review of, the state PUCs, this is enough to trigger the applicability of the filed rate doctrine.

The Court is therefore of the opinion that both counts of Plaintiffs complaint, insofar as they seek damages, are barred by the filed rate doctrine. Thus, the claims for damages must be dismissed.

II. Standing

Ameritech additionally argues that Plaintiffs do not have standing to bring either of the counts in their complaint. They assert that Plaintiffs lack standing **[*22]** to bring their Sherman Act claim in Count I because the causal link between the alleged conduct and harm is too indirect, the injury asserted by Plaintiffs is too speculative, and there is a risk of duplicative recovery because of the complex damage estimates which would be required. Ameritech further asserts that Plaintiffs, as consumers in the local telephone market, do not have standing to bring a claim under the 1996 Act. Finally, Ameritech argues that standing should be denied because this case will interfere with the scheme of the 1996 Act. Of course, in light of our conclusion that the filed rate doctrine bars Plaintiffs' damage claims, these arguments only remain potentially dispositive for the injunctive relief sought by Plaintiffs.

In arguing that Count I should fail for Plaintiffs lack of standing to bring such an antitrust claim, Ameritech relies on the factors for denying antitrust standing set forth in the Supreme Court's decision in *American General Contractors v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* ("*AGC*"): (1) "the tenuous and speculative character of the relationship between the alleged antitrust violation **[*23]** and the [] alleged injury"; (2) "the potential for duplicative recovery or complex apportionment of damages"; and (3) "the existence of more direct victims of the alleged conspiracy." *Id. at 545*. Ameritech contends that Plaintiffs' antitrust claims must fail for all of these reasons. The Court, however, is not so convinced. Since Plaintiffs' lawsuit essentially involves consumers suing for overcharges by a monopolist, the Court believes that Plaintiffs do have antitrust standing under the analysis of *AGC*.

Unlike the plaintiffs in *AGC*, who were unions suing an association of building contractors, Plaintiffs are consumers in the market in which Ameritech has allegedly sought to suppress competition. *See Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)* (finding standing where plaintiff was a consumer of psychotherapeutic services and had alleged she was injured by defendants' conspiracy to restrain competition in the market for such services). The *AGC* Court specifically noted that the "Union was neither a consumer nor a competitor in the market in which trade was restrained." *AGC*, 459 U.S. at 539. Thus, as consumers **[*24]** in the market of which they complain, Plaintiffs would seem to have standing in this case.

Furthermore, Ameritech's citation to *Jeffrey v. Southwestern Bell, 518 F.2d 1129 (5th Cir. 1975)*, a case in which a consumer of telephone services was denied standing, is also unpersuasive. In *Jeffrey*, the "residential subscribers eschewed any direct attack on the rates themselves," instead only attacking the predatory (below-cost) pricing tactics of the defendants in another market, the losses from which defendants allegedly sought to recoup by charging residential customers more. *Id. at 1130*. In contrast, Plaintiffs in this case seek redress for "the payment of supracompetitive prices for telephone services" in the market in which Plaintiffs are consumers. Thus, the Court believes that where a consumer seeks recovery of overcharge damages, alleging that a monopolist (or cartel) excluded competition in the consumer's market, a direct injury has been alleged.

Plaintiff's claims are also not too speculative. Though Ameritech raises legitimate concerns about proving the link between Plaintiffs harm and the alleged misconduct, the Court is cognizant that the determination that market **[*25]** conditions would be different "but for" the defendant's conduct is always a difficult issue in antitrust cases. *See J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 566-67, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)* ("The vagaries of the marketplace usually deny us sure knowledge of what plaintiff's situation would have been in the absence of the defendant's antitrust violation."). The Court is persuaded that telephone rates will be lower once the telecommunications industry becomes competitive; thus, if Ameritech is at fault for this industry not yet being competitive, Ameritech's actions have harmed Plaintiffs. Furthermore, Ameritech's worries as to the complexity of any damage calculations, and the potential for duplicative recoveries, are assuaged by the fact that the Court has found that Plaintiffs' damages claims are barred by the filed rate doctrine.

Ameritech's arguments against Plaintiffs' standing under *AGC* are most concisely refuted by the Seventh Circuit's dicta in *Serfecz v. Jewel Food Stores, 67 F.3d 591 (1995)*, *cert. denied 516 U.S. 1159, 116 S. Ct. 1042, 134 L. Ed. 2d 189 (1996)*. Though a shopping mall owner was held not to have standing to bring a Sherman Act claim with regard **[*26]** to the grocery retail market, the court explained that "grocery consumers could maintain an action if defendants' actions stifled competition allowing defendants to engage in monopoly pricing in the retail grocery market." *67 F.3d at 598*. Furthermore, the court cited with approval the following treatise language: "'Because protecting consumers from monopoly pricing is the central concern of antitrust,[…] consumer standing to recover for an overcharge paid directly to an illegal cartel or monopoly is seldom doubted.'" *Id. at 598, fn. 6* (*quoting* II Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, P 370 at p. 253 (Rev. ed. 1995). Similarly, Plaintiffs in the instant case are consumers seeking relief from the telephone rates which they allege to be the product of anticompetitive activity by a monopolist. Especially considering that the only remaining claims are those seeking injunctive relief, the Court finds that Plaintiffs have standing to assert their Sherman Act claim under the analysis of *AGC. See [Bubar v. Ampco Foods, Inc., 752 F.2d 445](#)* (9th Cir.), *cert. denied*, *472 U.S. 1018, 87 L. Ed. 2d 616, 105 S. Ct. 3481 (1985)* (standing in claims for injunctive relief **[*27]** "are less stringent" than those for damages claims).

As for Count II, Plaintiffs allege that the same anticompetitive acts which comprise the basis for Count I also constitute violations of the Telecommunications Act of 1996. Ameritech seizes on this fact, and thus argues that all of the reasons for denying antitrust standing in Count I equally require dismissal of Count II. As the Court has already explained, however, Plaintiffs have standing to bring an antitrust claim in this case. Therefore, Ameritech's argument that *AGC* should bar Count II is also unpersuasive.

Ameritech lastly contends that the Supreme Court's decision in *Block v. Community Nutrition Institute 467 U.S. 340, 81 L. Ed. 2d 270, 104 S. Ct. 2450 (1984)*, dictates that Plaintiffs must be denied standing to avoid "severely disrupting the complex and delicate ... scheme" of the *1996 Act. Id. at 348*. Ameritech argues that, like the Agricultural Agreement Act that was at issue in *Block*, the statutory scheme established by the Telecommunications Act of 1996 would be severely undermined if Plaintiffs' lawsuit is allowed to proceed. Thus, Ameritech contends that Plaintiffs should be denied standing on this **[*28]** basis.

In *Block*, consumers of milk products sued to set aside "milk orders" issued by the Secretary of Agriculture setting minimum prices that processors of milk (handlers) must pay to dairy farmers (producers). *Id. at 343-44*. The consumer plaintiffs in *Block* sought lower prices between producers and handlers so that retail prices paid by consumers would also be lower. *Id. at 352 n.3*. Despite the fact that the general purpose of the Act was to promote consumer interests, the Court found the "structure of the Act indicates that Congress intended only producers and handlers, not consumers, to ensure that the statutory objectives would be realized." *Id. at 347*. The Court thus denied the consumer plaintiffs standing, explaining that "consumer suits would undermine the congressional preference for administrative remedies and provide a mechanism for disrupting administration of the congressional scheme." *Id. at 352*.

Ameritech asserts that *Block* is directly on point in this case. Permitting consumer lawsuits to enforce the 1996 Act, Ameritech warns, would upset the scheme fashioned by Congress to implement the de-regulation of the telecommunications industry. **[*29]** Indeed, Plaintiffs' allegations of anticompetitive conduct all involve Ameritech's purported failure to comply with its obligations to competing carriers under the 1996 Act. In order to resolve Plaintiffs' claims, the Court would be required to examine Ameritech's dealings with their competitors and determine what the Act specifically requires and whether Ameritech has complied. In fact, these are precisely the same issues which are currently being addressed by regulatory agencies and federal courts. *See, e.g., AT&T v. Illinois Bell Tel. Co.*, No. 97 C 0886 (N.D. Ill., Coar, J.); *Illinois Bell Tel. Co. v Miller*, No. 97 C 8285 (N.D. Ill., Grady, J.); *AT&T Corp. v. Iowa Utilities Bd., cert. granted U.S. , 139 L. Ed. 2d 867, 118 S. Ct. 879, 1998 U.S. LEXIS 661, 1998 WL 23494 (1998)*.

Plaintiffs respond by citing statutory provisions which seemingly afford them a right to sue. ***HN5***[] *Section 206* of the Communications Act provides that "any common carrier" found to have violated the Act shall "be liable to the person or persons injured thereby for the full amount of damages sustained in consequence of any such violation." *47 U.S.C. § 206*. ***HN6***[] *Section 207* further permits "any person claiming to be damaged" by the **[*30]** actions of any common carrier to bring suit for the recovery of these damages. *47 U.S.C. § 207*. Despite these provisions, however, Plaintiffs fail to cite a single case in which consumer plaintiffs have sued to enforce provisions of the 1996 Act. Furthermore, Ameritech notes that the principles of antitrust standing (which limit the class of plaintiffs to those best positioned to seek redress for anticompetitive conduct) must be applied to ensure that Plaintiffs are entitled to bring these claims. Thus, a consideration of the ramifications of allowing Plaintiffs' suit to proceed is appropriate.

The 1996 Act envisions that the opening of the local telephone markets is primarily a matter between the local carriers, carriers seeking entry into the local markets, and the state regulatory commissions. The 1996 Act has established a detailed regime of negotiation, mediation, arbitration, regulatory evaluation and federal court review -- all of which are directed at incumbent local carriers and their prospective competitors. To grant Plaintiffs the injunctive relief they seek (which is all that survives the filed rate doctrine), the Court would have to stick its nose into this complicated **[*31]** morass of regulatory review. This is not something the Court is prepared to do, nor is something that Congress intended. *See* 141 Cong. Rec. S7942, S7958 (June 8, 1995) (statement of Sen. Stevens) ("the intention of the [Act] is to take the regulations of the telecommunications service away from the courts"). Hence, as Ameritech so eloquently states, this suit would merely be a "monkey wrench jammed into the workings of state utility commissions, the FCC and the federal courts."

The Court is thus of the opinion that, because of the potential for frustrating the goals of the 1996 Act, Plaintiffs should not be permitted standing to continue with its claims in this case. In the Court's mind, these claims could severely threaten the delicate balance that Congress has struck in attempting to ease the transition of the telecommunications industry into a competitive marketplace. This is not to say, however, that consumers have no role to play in ensuring compliance with the antitrust laws, as these laws will become increasingly important in preserving the marketplace as it moves toward competition. The Court simply holds that Plaintiffs have no standing to bring claims seeking to require **[*32]** Ameritech to comply with its duties to prospective competitors under the 1996 Act. Thus, Plaintiffs claims must be dismissed in their entirety.

III. Duties Under the 1996 Act

Ameritech finally argues that the 1996 Act imposes no free-standing duties on local exchange carriers, and that therefore Count II does not allege a cognizable cause of action. Count II alleges that Ameritech's anticompetitive acts violate Sections 251, 252, 271 and 272 of the Act. Ameritech contends that these sections merely establish duties that Ameritech owes to prospective competitors, and that these duties are only triggered upon the request of a competitor who is seeking to enter Ameritech's local markets. As their sole response to Ameritech's argument, Plaintiffs again point to *Sections 206* and *207* as providing a right to sue under the Act.

The Court is persuaded that Plaintiffs are not entitled to sue Ameritech for its failure to comply with these sections of the Act. Sections 251 and 252 require Ameritech to provide certain access to its facilities, but only when "any requesting telecommunications carrier" seeks to enter their local market. These duties exist, therefore, only within the framework **[*33]** of the negotiation/arbitration process which the Act establishes to facilitate the creation of local competition. ***HN7***[] Likewise, *Sections 271* and *272* merely set forth a checklist of conditions that RBOCs must meet before they will be permitted to compete in the long-distance service market. If there are problems with carriers (such as Ameritech) failing to satisfy these duties to their competitors, the Act establishes the sole remedy: state PUC arbitration and enforcement proceedings, with review by federal courts.

Since these sections do not establish duties that Ameritech owes to consumers, Plaintiffs cannot sue Ameritech for its alleged breach of these duties. Therefore, Count II of Plaintiffs' complaint must also be dismissed on this basis.

CONCLUSION

For the foregoing reasons, Ameritech's motion to dismiss Plaintiffs' complaint is granted with prejudice.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

A motion for summary judgment should be granted if the record, taken as a whole, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN2[] **Summary Judgment, Burdens of Proof**

Fed. R. Civ. P. 56 mandates the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, on which that party will bear the burden of proof at trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN3[] **Entitlement as Matter of Law, Genuine Disputes**

A party moving for summary judgment must demonstrate the absence of a genuine issue of material fact, but need not negate the elements of the nonmovant's case. The movant accomplishes this by informing the court of the basis for its motion, and by identifying portions of the record which highlight the absence of genuine factual issues. If the moving party fails to meet this initial burden, the motion must be denied, regardless of the nonmovant's response. If this burden is met, *Fed. R. Civ. P. 56* requires the nonmovant to go beyond the pleadings and to show by affidavits, depositions, answers to interrogatories, admissions on file, or other admissible evidence that specific facts exist over which there is a genuine issue for trial. The nonmovant's burden may not be satisfied by conclusory allegations, unsubstantiated assertions, metaphysical doubt as to the facts, or a mere scintilla of evidence.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > Actual Controversy

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN4[] **Case & Controversy Requirements, Actual Controversy**

Factual controversies surrounding a motion under *Fed. R. Civ. P. 56* are to be resolved in favor of the nonmovant, but only when there is an actual controversy, that is, when both parties have submitted evidence of contradictory facts. A court will not, in the absence of any proof, assume that the nonmoving party could or would prove the necessary facts. Unless there is sufficient evidence for a reasonable jury to return a verdict in the nonmovant's favor, there is no genuine issue for trial.

HN5[] **Trade Libel, Elements**

To recover damages for the tort of business disparagement under Texas law, a plaintiff must prove (1) publication by the defendant of disparaging words, (2) that were false, (3) that were published with malice, (4) the absence of any privilege, and (5) that plaintiff suffered special damages. Because falsity is an element of a business disparagement claim, truth is a negative defense.

Torts > Intentional Torts > Defamation > Libel

Torts > Intentional Torts > Defamation > General Overview

HN6[] **Defamation, Libel**

In Texas libel is defined by *Tex. Civ. Prac. & Rem. Code Ann. § 73.001* as a defamation expressed in written or other graphic form that tends to blacken the memory of the dead or that tends to injure a living person's reputation and thereby expose the person to public hatred, contempt or ridicule, or financial injury or to impeach any person's honesty, integrity, virtue, or reputation or to publish the natural defects of anyone and thereby expose the person to public hatred, ridicule, or financial injury.

Torts > ... > Defamation > Elements > General Overview

Torts > Intentional Torts > Defamation > General Overview

HN7[] **Defamation, Elements**

A plaintiff is required to prove falsity as an element of a cause of action for defamation.

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN10[] **Intentional Interference, Defenses**

Legal justification is an affirmative defense to tortious interference with business relations and tortious interference with a contract. The affirmative defense of legal justification protects a defendant who provides truthful information about a plaintiff to third parties. One who intentionally causes a third person not to perform a contract or not to enter into a prospective contractual relation with another does not interfere improperly with the other's contractual relation, by giving the third person truthful information.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Antitrust & Trade Law > Clayton Act > General Overview

HN11[] **Clayton Act, Claims**

The Clayton Act, *15 U.S.C.S. § 15(a)*, limits the class of private persons who may sue on antitrust violations to any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. To demonstrate antitrust standing a plaintiff must show (1) injury-in-fact, (2) antitrust injury, and (3) status as a proper plaintiff.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN12[] **Private Actions, Standing**

To establish the first element of standing in an antitrust action, injury-in-fact, a plaintiff must show an injury to its business or property proximately caused by the conduct of the defendant.

Healthcare Law > Healthcare Litigation > Actions Against Healthcare Workers > Doctors & Physicians

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Healthcare Law > Healthcare Litigation > Actions Against Healthcare Workers > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN13[] **Actions Against Healthcare Workers, Doctors & Physicians**

To demonstrate the antitrust injury element of standing a plaintiff must show anticompetitive effects of the defendant's actions; in other words, antitrust injury should be the type of loss that the claimed violations of the antitrust laws would be likely to cause.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN14[] **Private Actions, Standing**

To establish the third element of antitrust standing a plaintiff must show that it is a proper plaintiff. In evaluating this element a court must examine (1) whether the plaintiff's injuries or their causal link to the defendant are speculative, (2) whether other parties have been more directly harmed, and (3) whether allowing the plaintiff to sue would risk multiple lawsuits, duplicative recoveries, or complex damage apportionment.

Torts > Business Torts > Trade Libel > Elements

Torts > Business Torts > Trade Libel > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

HN15[] **Trade Libel, Elements**

Even if a plaintiff shows falsity in a product disparagement action, it must overcome a presumption that the disparagement had only a de minimis effect on competition. A de minimis effect is presumed for three reasons: (1) it is generally difficult to distinguish mere puffery from patently false statements relied upon by a consumer; (2) the effects of disparagement are speculative at best, especially when the disparagement is not systematic; and (3) most consumers view statements about a competitor cynically, recognizing the inherent bias and lack of objectivity. To satisfy the test for rebutting the de minimis presumption, a plaintiff must prove that the allegedly disparaging statements were (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to consumers having little understanding of the subject matter, (5) continued for extended time periods, and (6) not readily susceptible to counter statement, explanation, or other neutralizing effort or offset by the plaintiff.

Evidence > Relevance > Relevant Evidence

HN16[] **Relevance, Relevant Evidence**

A material fact is one that is of consequence to the determination of the action. *Fed. R. Evid. 401*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN17[] **Monopolies & Monopolization, Actual Monopolization**

To prevent a potential expansion of monopoly power under the essential facilities doctrine, the Sherman Antitrust Act imposes a duty on the owner of an essential facility to open it to competitors on a nondiscriminatory basis. To prevail on an essential facilities claim a plaintiff must establish that (1) the defendant is a monopolist, (2) the facility is essential, (3) the defendant has the type of control over the facility that is forbidden by the Sherman Act, (4) duplication of the facility is unreasonable or impractical, (5) the defendant denied the plaintiff use of the facility, and (6) providing access to the plaintiff was feasible.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN18[] **Monopolies & Monopolization, Actual Monopolization**

To establish a monopolist, a plaintiff must show that the company possesses monopoly power in the relevant geographic and product markets. In an essential facilities case a court must define several markets: (1) the relevant product market for the alleged essential facility (the "primary product market"), (2) the relevant product market for the potentially monopolized product (the "secondary product market"), and (3) the relevant geographic markets.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN19[] **Monopolies & Monopolization, Actual Monopolization**

The essential facilities doctrine applies to four situations: (1) natural monopolies; (2) facilities whose duplication is forbidden by law; (3) publicly subsidized facilities that cannot practically be built privately; and (4) the sole facility in the relevant geographic market, i.e., the only facility in town.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN20[] **Monopolies & Monopolization, Actual Monopolization**

Natural monopolies occur in industries having large initial fixed costs but declining marginal production costs.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN21[] **Monopolies & Monopolization, Actual Monopolization**

To establish denial of access a plaintiff must have at the very least sought access to the facility.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN22[] **Monopolies & Monopolization, Actual Monopolization**

A manufacturer is under no obligation to pre-disclose or disclose its knowledge about its products so that competition may arise in the related peripheral hardware, software, and repair service markets.

Opinion

[*732] ***OPINION AND ORDER***

At issue in this action is the liability of Microsoft Corporation under Texas tort law and federal ***antitrust law*** for the demise in sales of the Cache86 disk cache program. Pending before the court is Microsoft's Motion for Summary Judgment. For reasons explained below the motion will be granted in part and denied in part.

I. *BACKGROUND*

An appreciation of the legal issues in this case requires a basic understanding of computer operating systems in general and Microsoft's Windows95 operating system in particular.

A. Computer Operating Systems

Modern personal computers consist of a microprocessor and several components ("peripheral devices"), including volatile and nonvolatile memory chips; [1] **[**3]** data input devices, **[**2]** such as keyboards and mouses; data storage devices, such as hard and floppy disk drives; [2] output devices, such as printers and monitors; and communication interfaces, such as fax/modems and ethernet connections. Computers only perform operations when told to do so. An operating system is a program that coordinates activities among the various components of the computer and controls the flow of data among them. [3] It is a computer's operating system, for example, that instructs the computer to download data from memory to a disk or to execute the necessary procedures to open a program when requested to do so by the user. While personal computer users could conceivably write their own customized operating system programs, commercially available operating systems are far more desirable to most users.

---

[1] Volatile memory is more commonly referred to as "random-access memory" (RAM); while nonvolatile memory is known as "read-only memory" (ROM). Generally speaking, both RAM and ROM are computer chips that store data electronically. The technical details of how this is done are not relevant to this case. Because a computer can only store, read, and delete data in RAM while the computer has power, it is called volatile memory. The data held in RAM disappears when the computer is turned off. The data stored in ROM does not disappear when the computer is off. Because of the way the ROM chip stores the data, however, the computer cannot store fresh data or otherwise alter data stored in ROM. ROM is thus called nonvolatile memory.

[2] Unlike RAM and ROM chips, disk drives store data magnetically on hard or floppy computer disks.

[3] Affidavit of Ralph Lipe (Microsoft senior software development designer) P 2. The affidavits and depositions cited in this Opinion and Order are contained in appendices to Microsoft's Motion for Summary Judgment (Docket Entry Nos. 26-29) and Plaintiffs' Response (Docket Entry No. 31).

[*733] Microsoft Corporation is a software manufacturer that sells numerous computer programs, including the MS-DOS operating system. [4] As personal computers proliferated, MS-DOS became the operating system of choice among users of computers modeled on IBM's personal computer design. [5] Software manufacturers began tailoring their programs to run in conjunction with MS-DOS. [6] Many software companies also wrote programs, known as utilities, to improve the performance of operating systems in general, and MS-DOS in particular. [7] Plaintiffs developed a utility program called Cache86 that accelerated the disk-writing functions of MS-DOS. David L. Aldridge, the owner of The David L. Aldridge Company, originally wrote **[**4]** the computer code for this program. Technical Partners owns the program, and The David L. Aldridge Company markets and sells it. (For simplicity, the court will refer to the three plaintiffs collectively as Aldridge.)

B. Disk Cache Programs

Cache86 is a disk cache program. Disk cache programs are designed to improve the speed at which computers function. [8] An application program such as a word processor will **[**5]** often direct the operating system to download ("write") or upload ("read") data from the computer's hard or floppy disk. Because of the great speed of modern microprocessors the computer cannot physically perform these read-write operations as fast as the microprocessor can process the data. Read-write operations occur more slowly because disk drives are mechanical devices that can only move so quickly, while the rest of a computer's operations occur electrically and are theoretically only limited by the speed of light. The microprocessor must thus often wait idle while the read-write operations are completed.

Disk caches solve this problem by intercepting information that the operating system is reading from or writing to the computer's hard disk and temporarily using vacant portions of the computer's RAM as a pseudo-disk. This allows the operating system to perform the read-write operations electrically **[**6]** instead of using the hard disk. The disk cache program sets aside a portion of RAM to temporarily store data; this set-aside area of memory is called a "cache." When an application program reads data from a disk, the disk cache program copies the data into the set-aside portion of RAM. The next time the application program needs that same data it can read that data electrically from the cache in RAM rather than having to read mechanically from the hard disk. When the application program writes data onto the disk, the disk cache program directs the data to the set-aside cache in RAM. Because reading from and writing to RAM is an electrical operation, the computer can perform these operations much faster than it can with a mechanical disk drive. [9]

The way the Cache86 disk cache utility program functions is important to this case. Aldridge designed Cache86 to improve the performance of MS-DOS. [10] MS-DOS (and versions of Windows that run in conjunction with **[**7]** MS-DOS) performs read-write operations to the hard disk by "calling" a "device driver" [11] -- a program used by operating systems to control peripheral devices such as a hard disk drive. [12] The hard disk drive driver then sends

---

[4] DOS stands for "disk operating system." (Lipe Deposition at 47) Operating systems that are capable of controlling disk drives are called disk operating systems. MS-DOS is a version of DOS designed and marketed by Microsoft. (Lipe Deposition at 47) Other disk operating systems include OS/2, Windows NT, Linux, SCO Unix, and Solaris. (Lipe Deposition at 205-07)

[5] Affidavit of Herbert Lyon (plaintiffs' market share expert) P 3 (stating that Microsoft's three operating systems comprised 81% of the operating system market in 1995).

[6] Lipe Affidavit P 8.

[7] Aldridge Deposition at 57.

[8] Lipe Affidavit PP 10, 12; Aldridge Deposition at 15. The version of Cache86 at issue in this case is 5.03.

commands to an interface **[*734]** on the microprocessor known as "Interrupt 13." [13] Cache86 monitors Interrupt 13 and intercepts the information and instructions that pass through that interrupt (a process referred to as "hooking"). [14] Cache86 thus reroutes read-write operations to the cache in RAM by hooking Interrupt 13. [15]

C. Windows95

For years Microsoft developed gradually more sophisticated versions of its MS-DOS operating system. Eventually, Microsoft introduced **[**8]** a supplemental operating system, Windows, to run in conjunction with MS-DOS. Windows allowed users to perform tasks by "pointing and clicking" on small pictures ("icons"') displayed on the computer's video screen. This "graphical user interface" enabled users to operate their computers without having to enter typewritten commands into the computer. [16] The evolution of operating systems and extensive advances in computer technology ultimately caused Microsoft to replace MS-DOS and Windows with a new, fundamentally different operating system called Windows95. [17] This new system combined the graphical user interface made popular by Windows with more advanced programming techniques. [18]

Windows95 can operate in three different modes: DOS-compatibility mode, real-mode DOS, and protect mode. When Windows95 operates in DOS-compatibility mode it emulates MS-DOS by calling the hard disk drive in the same manner as MS-DOS. [19] **[**9]** Microsoft included this mode so that Windows95 could run most MS-DOS programs as if they had been designed for use with Windows95. When operating in DOS-compatibility mode, however, Windows95 cannot use several of the new features designed to improve the operating system over its predecessors. [20] Real-mode DOS is a hybrid between DOS-compatibility mode and protect mode. When operating in real-mode DOS the computer remains in protect mode but runs DOS as an application program. In other words, the user has opened DOS as an application program to run under the guidance of protect mode.

When in protect mode the Windows95 operating system functions in a new, fundamentally different way. [21] Among numerous changes and improvements, protect mode uses a different file system [22] and does not use device drivers; instead, in protect mode Windows95 interacts directly with peripheral devices. While the file system in MS-DOS cannot function while **[**10]** MS-DOS performs other tasks, the file system in protect mode can operate simultaneously while the operating system performs other tasks, a property known as "multitasking." Moreover, while MS-DOS only allows data to flow in one direction at a time between the operating system and the hard drive, protect mode permits data to flow in both directions at the same time, a property known as "asynchronous input-output." [23]

[21] Lipe Deposition at 46-49.

[22] Computers store programs as files. "File system" refers to the manner in which an operating system indexes, stores, searches for, and retrieves programs on the hard and floppy disks.

[23] Lipe Affidavit P 7.

How protect mode accomplishes these features is not relevant to this action except for one important point: Protect mode does not perform read-write operations only through Interrupt 13. [24] Protect mode also uses other interrupts. Because Cache86, like many other disk cache programs, operates under the assumption that the computer will transfer all **[**11]** read-write data through Interrupt 13, Cache86 only monitors and hooks the data passing through Interrupt 13. [25] Since computers running under Windows95 protect mode do not exclusively use Interrupt 13, a disk cache program like Cache86 will not **[*735]** reroute all of the data sent between the microprocessor and the hard disk. [26] Programs such as Cache86 that hook Interrupt 13 thus posed a serious concern for the designers of Windows95. [27]

For example, while a disk cache program performs read-write operations of the data passing through Interrupt 13 to the cache in RAM, Windows95 protect mode could be sending data to the hard disk directly or through other data pathways. If that occurred, the data stored in RAM might no longer be synchronized with the corresponding information on the hard disk. [28] This would create the danger of a problem known **[**12]** as "data corruption" that could cause the computer to lose all of the information stored on the hard disk. [29] **[**13]** Microsoft wanted to avoid this problem [30] while ensuring that computer owners could continue to use their existing MS-DOS and Windows-compatible programs. [31]

Because of the popularity of MS-DOS and Windows, over the years software developers sold thousands of programs specifically designed to function with the MS-DOS and Windows operating systems. [32] When Microsoft designed its new operating system it wanted to ensure that computer users could still use their MS-DOS-and Windows-compatible programs with the new system; in other words, Microsoft intended to make Windows95 "backwardly compatible." [33] The problem Microsoft faced was to design Windows95 with the capability of running MS-DOS- and Windows-compatible programs, while preventing programs that hook Interrupt 13 (or certain other interrupts) from corrupting hard disk data. The way that Microsoft solved this problem ultimately led to this lawsuit.

First, Microsoft designed **[**14]** Windows95 to detect programs that hooked certain interrupts, including Interrupt 13. [34] Some programs that hook Interrupt 13, such as data encryption or antivirus programs, remain valuable on

[24] Lipe Affidavit P 14; Lipe Deposition at 48-49.

[25] Aldridge Deposition at 16; Lipe Affidavit P 15.

[26] Lipe Affidavit PP 14-15.

[27] Lipe Affidavit P 14.

[28] Lipe Affidavit P 15.

[29] In his affidavit Microsoft senior software development designer Ralph Lipe gave a specific example of what could happen:

> One of the most frequently accessed portions of a hard disk is the index of its contents, called the File Allocation Table (or FAT). Because the FAT is being read from and written to constantly, it is almost always present in the disk cache's memory space [the cache in RAM]. If the copy of the FAT being maintained in the disk cache gets out of synchronization with the original FAT on the hard disk, the entire hard disk can be rendered useless when the FAT on the hard disk is overwritten by the copy of the FAT in the disk cache's memory space. Once the index to the contents of a hard disk has been corrupted, the operating system will be unable to find particular information on the hard disk, which typically is not stored sequentially. That includes, for example, not only documents created using a word processing program like Microsoft Word but also the word processing program -- and perhaps the operating system itself.

Lipe Affidavit P 17.

[30] Lipe Deposition at 47.

[31] Lipe Affidavit P 8; Lipe Deposition at 47.

[32] Arun Deposition at 105; Lipe Affidavit P 8.

[33] Lipe Affidavit P 8.

[34] Lipe Affidavit P 18.

computers using Windows95. [35] Others, such as some older computer games, will not function in protect mode; to use them, Windows95 must operate in an alternative mode. [36] In addition, disk cache utility programs remain useful when Windows95 is running in DOS-compatibility mode or real-mode DOS. [37] In these modes Windows95 performs read-write operations in the same manner as MS-DOS and Windows, and a disk cache program operating in conjunction with either mode offers the same advantages it provides to a computer that uses MS-DOS. Microsoft therefore designed Windows95 not to delete programs it detected hooking interrupt 13. [38]

Instead, Microsoft **[**15]** created a list of all known hooking programs that could potentially corrupt the hard disk in a file named **[*736]** SETUPC.INF. [39] When Windows95 begins "booting up" on a computer (the process by which an operating system loads itself into the computer when it is turned on) it refers to this file and looks for any of the listed programs. If Windows95 finds a program listed in SETUPC.INF, it disables the program. [40]

Because it was impossible to identify all existing hooking programs, [41] and because it was likely that new hooking programs would be marketed after the release of Windows95, [42] Microsoft also added a second program to protect against data corruption from unrecognized hooking programs. [43] When Windows95 detects a program hooking Interrupt 13 that is not listed in SETUPC.INF., it refers to this second file, IOS.INI. This file contains a list of known hooking programs that will *not* cause **[**16]** data corruption while Windows95 runs in protect mode. [44] If the detected hooking program appears on this "safe" list Windows95 continues operating in protect mode; if not, Windows95 automatically shifts from protect mode to DOS-compatibility mode. [45] In DOS-compatibility mode the operating system performs read-write operations in the same way as MS-DOS and Windows, and read-write data and commands pass only through Interrupt 13. Because DOS-compatibility mode functions the same way that a disk cache program like Cache86 assumes the operating system will function, there is no risk that the disk cache program will corrupt data. [46] Succinctly stated, Windows95 protects against data corruption from unrecognized programs that hook Interrupt 13 by shifting into DOS-compatibility mode. [47]

[17]** A computer operating in DOS-compatibility mode loses the efficiencies and advancements provided by Windows95's preferred mode of operation, protect mode, and is no more efficient than one using MS-DOS. [48] To alert users of the shift to DOS-compatibility mode Microsoft programmed Windows95 to display a series of messages when Windows95 detects that an unfamiliar program has triggered the shift in modes. [49] These messages are the basis of all of Aldridge's claims against Microsoft.

D. Windows95's Treatment of Cache86

Microsoft did not list Cache86 in either the disabling file (SETUPC.INF) [50] **[**18]** or the safe list (IOS.INI). [51] Thus, upon detecting Cache86, Windows95 will not disable it because it is not listed in SETUPC.INF. Because Cache86 does not appear on the safe list in IOS.INI, however, Windows95 will shift into DOS-compatibility mode. [52]

Microsoft programmed Windows95 to display a generic warning to the user the first time an unknown program causes a shift to DOS-compatibility mode. [53] The warning appears **[*737]** in a box on the video screen captioned "Performance Warning." The box contains a triangle with an exclamation point. Next to the triangle is a statement to the user. (The statement is the same for any program that causes such a shift, but Windows95 inserts the filename of the particular triggering program into the statement. [54]) The statement that Windows95 displays when it detects Cache86 and shifts to MS-DOS compatibility mode says

> A new MS-DOS resident program named **[**19]** 'C86EXTEN' [55] may decrease your system's performance. Would you like to see more information about this problem?

Below this statement are a "yes" box and a "no" box. [56] (The court will refer to this message box as Message One.)

[20]** If a user clicks on the yes button, a new message box appears on screen, captioned "System Properties" and subcaptioned "Performance." This box includes a statement that

> C86EXTEN in AUTOEXEC.BAT [57] **[**21]** forces MS-DOS compatibility mode. Compatibility mode paging [58] reduces overall system performance. [59]

---

[50] Lipe Affidavit P 18 & Exhibit A.

[51] Arun Deposition at 138, 150; Lipe Deposition at 59-60, 74. The parties dispute whether Microsoft knew of Cache86 when it designed Windows95. Compare Lipe Affidavit P 4 (stating that the architect of Windows95 did not know Cache86 existed until the filing of this action), with Aldridge Affidavit PP 12-14 (explaining the several conversations he had over the years with various Microsoft personnel concerning Cache86).

[52] Lipe Affidavit PP 18-22.

[53] Aldridge Deposition at 83; Arun Deposition at 89-90; Deposition of Terrence Lee Canup (former vice-president for marketing for the David L. Aldridge Co.) at 105-06; Lipe Deposition at 156-57. Windows95 will display these messages in only two circumstances -- when a user installs Windows95 on a computer that already has Cache86 stored on its hard disk, or when a user attempts to install Cache86 on a computer that already operates under Windows95. (Aldridge Deposition at 83; Lipe Deposition at 157-59) In either case, Windows95 only displays the initial warning message the first time it detects Cache86.

[54] Lipe Affidavit P 25.

[55] C86EXTEN is the name of the file in Cache86 that hooks Interrupt 13. (Aldridge Affidavit P 17; Lipe Affidavit P 25) Windows95 identifies programs that hook Interrupt 13 by their filename, not their brand name.

[56] Lipe Affidavit Exhibit B.

[57] A computer's AUTOEXEC.BAT file contains the master task list that MS-DOS and Windows95 initially use to set up the computer when it is first turned on. AUTOEXEC stands for "automatic execution." BAT tells the operating system that this is a batch file. Batch files contain a series of commands for the computer to execute.

When a user starts MS-DOS or Windows95 the operating system searches the hard disk for AUTOEXEC.BAT and executes each command contained in that file. AUTOEXEC.BAT is thus an essential file opened by the operating system every time a user turns on the computer.

When a user installs Cache86 on a computer Cache86 edits the AUTOEXEC.BAT file to include a command to open and begin running Cache86. The computer recognizes Cache86 by its filename, C86EXTEN. Thus, when the message says "C86EXTEN in AUTOEXEC.BAT," it is telling the user that it found Cache86 in the list of programs to run in AUTOEXEC.BAT.

[58] "Paging" is the process by which an operating system transfers ("swaps") data out of RAM and onto the hard disk. (Lipe Deposition at 32) "Compatibility mode paging" refers to the manner in which DOS-compatibility mode swaps data.

(Message Two)

Users can obtain additional information by highlighting either sentence in Message Two and clicking on the "details" box. A new message box, captioned "Windows Help," then appears on the screen with Message Two. If the user highlights the first sentence of Message Two and clicks on the details box the following explanation of the first sentence appears in the Windows Help box:

> **[Filename] in AUTOEXEC.BAT forces MS-DOS compatibility mode.**
> Windows was unable to identify the specified memory-resident program which was loaded in your Autoexec.bat file.
> If you no longer need this program, remove it from your Autoexec.bat file. Otherwise, contact the manufacturer of this program to see if an updated version is available. Windows will not perform optimally while this program is loaded. [60]

(Message Three) **[**22]**

If a user highlights the second sentence in Message Two and clicks on the "details" box the following explanation of the second sentence appears in the Windows Help box:

> **Compatibility mode paging reduces overall system performance.**
>
> Windows was unable to identify a real-mode driver or memory-resident program loaded in your Config.sys [61] **[**23]** or Autoexec.bat file. You will see another message that lists the name of the driver or program causing the problem.
>
> **[*738]** Because Windows could not identify the driver or program, it has switched to MS-DOS compatibility mode to ensure the program will run. However, this slows down overall performance. To improve performance, remove the program or driver causing the problem, or contact its manufacturer for an updated version. [62]

(Message Four)

Windows95 only displays Message One once for each program that causes Windows95 to shift into DOS-compatibility mode. [63] If the user takes no action, either by removing the program or by installing an updated version compatible with Windows95, the computer shifts into DOS-compatibility mode, but does not warn the user each time it again detects the previously discovered hooking program. [64] Windows95 will not display Messages Two, Three, or Four again without directions to do so from the user. [65]

[24]** Microsoft included two of its own disk cache programs with Windows95: VCACHE and SMARTDRV. VACHE is a disk cache designed by Microsoft to operate safely while Windows95 functions in protect mode. [66] Like

[59] Lipe Affidavit Exhibit C.

[60] Lipe Affidavit Exhibit D (emphasis in original).

[61] CONFIG.SYS is a special file that allows a user to modify some of the features and functions of the operating system. The operating system opens this file and configures the operating system to the file's specifications before it executes the commands in AUTOEXEC.BAT.

[62] Lipe Affidavit Exhibit E (emphasis in original).

[63] Aldridge Deposition at 83; Arun Deposition at 89-90; Canup Deposition at 105-06; Lipe Deposition at 156-57.

[64] If Windows95 detects another, previously undiscovered, program that hooks Interrupt 13 but which does not appear on the safe list, it will display Message One again, referencing the new program this time. (Lipe Deposition at 159)

[65] Deposition of Terrence Canup (vice-president for marketing of The Aldridge Company) at 106-07; Deposition of Peggy Foerch (Microsoft's technical writer responsible for drafting the warning messages) at 48-49; Lipe Deposition at 194.

[66] Lipe Deposition at 117, 137.

Windows95, it functions according to principles and assumptions fundamentally different from those of Cache86 and SMARTDRV. For purposes of this action it is not relevant how VCACHE functions, except to note that rather than assuming that all read-write operations will pass through Interrupt 13, VCACHE takes advantage of Windows95's asynchronous input-output system. [67] Aldridge does not allege that Cache86 competes with VCACHE.

Like Cache86, SMARTDRV caches read-write data by hooking Interrupt 13. [68] Windows95's treatment of SMARTDRV is different, however, from its treatment of Cache86. When Windows95 detects SMARTDRV it does not shift into DOS-compatibility mode. [69] Microsoft developed a way to allow Windows95 to remain in protect mode **[**25]** despite the presence of its SMARTDRV disk cache program on the system without risking data corruption. [70] Microsoft reprogrammed SMARTDRV so that it can determine if Windows95 is running in protect mode. [71] If it is, SMARTDRV disables itself by reducing the size of the reserved cache in RAM to zero. [72] Because the cache size is zero it does not save any data, and the read-write data passes directly to the hard disk. [73] The data hooked by SMARTDRV therefore remains synchronized with the hard disk. By eliminating the danger of asynchronization Microsoft avoided the possibility of data corruption and placed SMARTDRV on the safe list in IOS.INI. [74] Aldridge alleges that Cache86 competes with SMARTDRV.

[**26] E. Events Leading to this Action

Although Microsoft did not release Windows95 for sale to the public until August of 1995, [75] it distributed trial versions of the operating system as part of a series of design tests, called "beta tests," before the public **[*739]** release. Some 400,000 computer users received test versions of Windows95 as part of this program. [76] These "beta testers" could run Windows95 on their computers and report any problems to Microsoft. [77] Microsoft then examined the reports generated by the beta testers in an effort to correct any problems with Windows95. Once Microsoft was satisfied that it had identified and corrected the problems, it began publicly selling Windows95.

Although Aldridge had previously beta tested earlier versions of Windows, [78] Microsoft did not send him a beta-test version of Windows95, [79] nor did Aldridge ask for one. [80] During one of the last rounds of beta testing **[**27]** Aldridge obtained a beta-test version of Windows95 from a third party. [81] In April of 1995, four months before the

[79] Aldridge Affidavit P 9.

[80] Aldridge Deposition at 24, 31, 33.

[81] Aldridge Affidavit P 7; Aldridge Deposition at 109.

general release of Windows95, Aldridge discovered that Windows95 would display messages when it detected Cache86 and would shift into DOS-compatibility mode. [82]

Sales of Cache86 began to decline even before the general release of Windows95. [83] Aldridge later developed an upgraded version of Cache86 (version 6.0) that functioned like SMARTDRV and was compatible with Windows95. [84] The release of version 6.0 had little impact on the plummeting sales of Cache86, however. In addition to the decline in sales of individually packaged units of Cache86, Aldridge claims to have lost at least one contract with a major software designer, Quarterdeck, to include Cache86 in a software program designed to improve **[**28]** performance of computer games. [85]

Aldridge blames Microsoft for the lost sales of Cache86. [86] Aldridge alleges that Microsoft is liable under Texas law for

(1) business disparagement,
(2) defamation,
(3) tortious interference with contract, and
(4) tortious interference with business relations.

Aldridge also alleges that Microsoft is guilty of actual and attempted monopolization in violation of section 2 of the Sherman Antitrust Act, 15 U.S.C. § 2. In support of the antitrust claims Aldridge relies on the doctrines of product disparagement and essential facilities.

F. Microsoft's Motion for Summary Judgment

Microsoft has **[**29]** moved for summary judgment, asserting truth as a defense to all claims. With respect to Aldridge's antitrust claims Microsoft also argues that any damages from product disparagement were *de minimis*, that Windows95 is not an essential facility, and that Microsoft did not deny access to Windows95.

HN1[] A motion for summary judgment should be granted if the record, taken as a whole, "together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*; *New York Life Ins. Co. v. Travelers Ins. Co., 92 F.3d 336, 338 (5th Cir. 1996)*; *Rogers v. International Marine Terminals, Inc., 87 F.3d 755, 758 (5th Cir. 1996)*. The Supreme Court has interpreted the plain language of ***HN2***[] *Rule 56* as mandating "the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, on which that party will bear the burden of proof at trial." *Celotex Corp. v. Catrett, 477 U.S. 317, 106 S. Ct. 2548, 2552, 91 L. Ed. 2d 265 (1986)*.

[*740] ***HN3***[] As the party **[**30]** moving for summary judgment Microsoft "must 'demonstrate the absence of a genuine issue of material fact,' but need not *negate* the elements of the nonmovant's case." *Little v. Liquid Air Corp., 37 F.3d 1069, 1075 (5th Cir. 1994)* (*en banc*) (emphasis in original) (quoting *Celotex, 106 S. Ct. at 2553*). If Microsoft meets this burden *Rule 56* requires Aldridge, as the nonmovant, to go beyond the pleadings and to show by affidavits, depositions, answers to interrogatories, admissions on file, or other admissible evidence that specific facts exist over which there is a genuine issue for trial. *EEOC v. Texas Instruments, Inc., 100 F.3d 1173, 1180 (5th Cir. 1996)*; *Wallace v. Texas Tech Univ.,* ***[**31]*** *80 F.3d 1042, 1046-47 (5th Cir. 1996)*. The nonmovant's burden may not be satisfied by conclusory allegations, unsubstantiated assertions, metaphysical doubt as to the facts, or a mere scintilla of evidence. *Wallace, 80 F.3d at 1047*; *Little, 37 F.3d at 1075*.

HN4[] Factual controversies are to be resolved in favor of the nonmovant, "but only when there is an actual controversy, that is, when both parties have submitted evidence of contradictory facts." *Wallace, 80 F.3d at 1047*; *accord, S.W.S. Erectors, Inc. v. Infax, Inc., 72 F.3d 489, 494 (5th Cir. 1996)*. The court will not, "in the absence of any proof, assume that the nonmoving party could or would prove the necessary facts." *McCallum Highlands, Ltd. v. Washington Capital DUS, Inc., 66 F.3d 89, 92* (5th Cir.), *as modified*, *70 F.3d 26 (5th Cir. 1995)*. Unless there is sufficient evidence for a reasonable jury to return a verdict in the nonmovant's favor, there is no genuine issue for trial. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 106 S. Ct. 2505, 2511, 91 L. Ed. 2d 202 (1986)*; *Texas Instruments, 100 F.3d at 1179*.

II. *STATE LAW CLAIMS*

A. Burden of Proof

Microsoft argues that none **[**32]** of Aldridge's state law claims have merit because all of the Windows95 messages are true. Whether falsity is an element of Aldridge's state law claims, or an affirmative defense to these claims, is an important issue because this distinction governs which party has the burden of proof. If truth is an affirmative defense Microsoft has the burden of proof at trial, and to prevail on its summary judgment motion Microsoft must prove that the messages are true. *See Exxon Corp. v. Oxxford Clothes, Inc., 109 F.3d 1070, 1074* (5th Cir.), *cert. denied*, *139 L. Ed. 2d 231, 118 S. Ct. 299 (1997)*. On the other hand, if falsity is an element of Aldridge's causes of action, Aldridge must produce summary judgment evidence that would support a jury finding of falsity to *avoid* summary judgment for Microsoft. *See EEOC v. Texas Instruments, Inc., 100 F.3d 1173, 1180 (5th Cir. 1996)*. In this context truth is a negative defense. *See Emmons v. Southern Pac. Transp. Co., 701 F.2d 1112, 1118 (5th Cir. 1983)* (explaining that negative defenses are those tending to disprove at least one element of a plaintiff's cause of action).

1. *Business Disparagement*

HN5[] To recover damages for the tort **[**33]** of business disparagement under Texas law a plaintiff must prove

(1) publication by the defendant of disparaging words,

(2) that were false,

(3) that were published with malice,

(4) the absence of any privilege, and

(5) that plaintiff suffered special damages.

See Hurlbut v. Gulf Atl. Life Ins. Co., 749 S.W.2d 762, 766 (Tex. 1987). Because falsity is an element of a business disparagement claim, truth is a negative defense. Aldridge must raise a fact issue as to the falsity of the Windows95 messages to avoid summary judgment on this claim.

2. *Defamation*

There are two forms of defamation; libel and slander. ***HN6***[] In Texas libel is defined by statute:

> **[*741]** A libel is a defamation expressed in written or other graphic form that tends to blacken the memory of the dead or that tends to injure a living person's reputation and thereby expose the person to public hatred, contempt or ridicule, or financial injury or to impeach any person's honesty, integrity, virtue, or reputation or to publish the natural defects of anyone and thereby expose the person to public hatred, ridicule, or financial injury.

Tex. Civ. Prac. & Rem. Code Ann. § 73.001 **[**34]** (Vernon 1986). Although Texas has no parallel statutory provision for slander, Texas courts recognize a common-law cause of action for slander. *See* *Cain v. Hearst Corp., 878 S.W.2d 577, 580 (Tex. 1994)*. Because Microsoft's messages appear in graphic form they are governed by the law of libel.

The Texas libel statute does not list falsity as an element, and in a later section of the statute truth is identified as a defense. *See* *Tex. Civ. Prac. & Rem. Code Ann. § 73.005* (Vernon 1986). Because falsity is not a statutorily required element of a libel claim, but an independent ground for denying recovery, the statutory scheme implies that truth is an affirmative defense on which a defendant has the burden of proof at trial.

Texas appellate courts are divided on whether truth is an affirmative defense to a libel claim. *Compare* *Frank B. Hall & Co. v. Buck, 678 S.W.2d 612, 623* (Tex. App. -- Houston [14th Dist.] 1984, writ ref'd n.r.e.) ("For many years the courts of Texas have held in libel and slander actions that truth of the defamatory statements is an affirmative defense, and the burden of proving truth by a preponderance of the evidence is on the defendant."), *with* **[**35]** *A.H. Belo Corp. v. Rayzor, 644 S.W.2d 71, 79-80* (Tex. App. -- Fort Worth 1982, writ ref'd n.r.e.) (holding that the *First Amendment* requires the plaintiff to prove falsity when claiming defamation).

The Texas Supreme Court has not squarely addressed the issue. In *Cain v. Hearst Corp., 878 S.W.2d 577 (Tex. 1994)*, the court was asked to decide if Texas recognized the tort of false-light invasion of privacy. One of the reasons the court held that Texas does not recognize that tort was because false-light invasion of privacy duplicates the existing cause of action for defamation. In particular, the court observed that both torts require proof of falsity. *Cain, 878 S.W.2d at 580*.

In *Randall's Food Markets, Inc. v. Johnson, 891 S.W.2d 640, 646 (Tex. 1995)*, however, the court characterized truth as an affirmative defense to a slander action. Johnson worked as a store manager for Randall's. One day she bought several items from the store but failed to pay for a large wreath she held in her hands at the checkout station. The checkout clerk charged Johnson for the other items and asked her if there was anything else to ring up; Johnson said no. Randall's investigated the incident **[**36]** and eventually suspended Johnson, who then sued on a variety of theories, including slander. Johnson alleged that statements made by employees during the investigation were slanderous. Because the statements were true and protected by the employer's qualified investigative privilege, the Texas Supreme Court affirmed summary judgment in favor of Randall's. The court made no reference to the statement in *Cain* that "defamatory statements must be false in order to be actionable." *Cain, 878 S.W.2d at 580*. Instead, the court stated that "in suits brought by private individuals, truth is an affirmative defense to slander." *Randall's, 891 S.W.2d at 646* (footnote omitted). [87]

[37]** The Fifth Circuit has interpreted Texas law as requiring the ***HN7***[] plaintiff to prove falsity as an element of a cause of action for defamation. *See* *Brown v. Petrolite Corp., 965 F.2d 38, 43 (5th Cir. 1992)* ("A defamation plaintiff must prove that the allegedly defamatory **[*742]** language is false."). Because this court is bound to follow

---

[87] The parties' briefs shed little light on the confusing status of Texas law. Aldridge does not even address the defamation claim in his response to Microsoft's motion for summary judgment, except for a one-sentence footnote arguing for denial on the same grounds as for business disparagement. (Plaintiffs' Response at 17 n.10) Microsoft argues both that falsity is an element of Aldridge's defamation claim and that the truth of the messages is a complete defense to the defamation claim, without ever attempting to harmonize this inconsistency. (Microsoft's Motion for Summary Judgment at 18)

Fifth Circuit precedent on the interpretation of Texas substantive law, [88] the court will require Aldridge to prove that the messages were false to establish his defamation claim.

3. *Tortious Interference with Contract and with Business Relations*

HN8[] To recover on a claim of tortious interference with contract a plaintiff must prove

(1) the existence of a contract,

(2) a willful and intentional act by the defendant that interfered with the contract,

(3) the willful and intentional act proximately caused damage to the plaintiff, and

(4) **[**38]** actual damages.

See Texas Beef Cattle Co. v. Green, 921 S.W.2d 203, 210 (Tex. 1996); *Browning-Ferris, Inc. v. Reyna, 865 S.W.2d 925, 926 (Tex. 1993)*; *Victoria Bank & Trust Co. v. Brady, 811 S.W.2d 931, 939 (Tex. 1991)*; *see also Thrift v. Hubbard, 44 F.3d 348, 356 (5th Cir. 1995)*.

HN9[] To recover for tortious interference with business relations a plaintiff must prove

(1) a reasonable probability that the plaintiff would have entered a contract,

(2) willful and intentional acts by the defendant effectively interfered with the prospective business relationship, and

(3) the plaintiff suffered actual harm.

See Kiepfer v. Beller, 944 F.2d 1213, 1220 (5th Cir. 1991).

HN10[] Legal justification is an affirmative defense to both causes of action. *Id.* (tortious interference with business relations); *Texas Beef Cattle Co., 921 S.W.2d at 210* (tortious interference with contract); *Sterner v. Marathon Oil Co., 767 S.W.2d 686, 690 (Tex. 1989)* (tortious interference with contract). The affirmative defense of legal justification protects a defendant who provides truthful information about a plaintiff to third parties. *Tarleton State Univ. v.* ***[**39]*** *Rosiere, 867 S.W.2d 948* (Tex. App. -- Eastland 1993, writ dism'd by agr.). As the Restatement of Torts explains, "one who intentionally causes a third person not to perform a contract or not to enter into a prospective contractual relation with another does not interfere improperly with the other's contractual relation, by giving the third person . . . truthful information." *Restatement (Second) of Torts § 772* (1979); *accord id. § 772 cmt. b* ("There is of course no liability for interference with a contract or with a prospective contractual relation on the part of one who merely gives truthful information to another.").

Because the falsity of Microsoft's messages is an element of Aldridge's business disparagement and defamation claims, to avoid summary judgment on these claims Aldridge must present evidence that the messages are false. Conversely, because truth is an affirmative defense to Aldridge's tortious interference claims, Microsoft must prove that the messages are true to prevail on its motion for summary judgment on these claims.

B. The Evidence

Aldridge generally alleges that the four messages falsely state that Cache86 reduces overall system performance. **[**40]** [89] He also alleges that the following specific statements are false:

---

[88] *See Satcher v. Honda Motor Co., 984 F.2d 135, 137* (5th Cir.), *vacated on other grounds*, *993 F.2d 56 (5th Cir. 1993)*.

[89] Aldridge Affidavit PP 15, 25; Plaintiffs' Responses to Interrogatory Nos. 3-6.

(1) Cache86 is a new program (as to Message One), [90]

(2) Cache86 *may* decrease overall system performance (as to Message One), [91]
(3) Cache86 is a problem (as to Messages One and Four), [92]

[*743] (4) Cache86 forces MS-DOS compatibility mode (as to Messages Two and Four), [93]
(5) MS-DOS compatibility mode reduces overall system performance (as to Messages Two and Four), [94]
(6) Cache86 is unknown to Windows95 (as to Messages Three and Four), [95]
(7) Windows95 will not perform optimally while Cache86 is on the system (as to Message Three), [96]
(8) Windows95 switched to MS-DOS compatibility mode to ensure that Cache86 will run (as to Message Four), [97] and
(9) performance will improve if Cache86 is removed (as to Messages Three and Four). [98]

Because many of Aldridge's allegations represent only minor semantic differences, and because neither Aldridge nor Microsoft discusses all of the allegations separately in their motion papers, the court will group them into three general categories:

(1) Was Cache86 new and unknown to Windows95,

(2) does Cache86 **[**41]** decrease system performance, and
(3) does Windows95 call Cache86 a problem, and if so, is this statement true?

[42]** 1. *Was Cache86 new or unknown to Windows95*

Aldridge argues that Message One calls Cache86 a new program, despite the fact that Cache86 has been on the market since 1989. [99] Windows95 considers "new" any program installed after Windows95 had last been run on the computer. [100] Aldridge admits that Windows95 only labels Cache86 as new when a user has "newly introduced" the program on a computer running Windows95. [101] **[**43]** The evidence also establishes that Cache86 was unknown to Microsoft. The software engineer responsible for including the warning messages testified that he had never heard of Cache86 before this lawsuit. [102] Windows95 will generate the warning messages only if a program that hooks Interrupt 13 is not on the safe list. Because Cache86 is not on the safe list it is accurate for Windows95 to characterize Cache86 as unknown. Because it is accurate for Windows95 to call Cache86 new and unknown, these statements cannot support any of Aldridge's state law claims.

2. *Does Cache86 decrease system performance*

Microsoft argues that results of tests conducted both by Microsoft and Aldridge confirm that Cache86 decreases performance of the Windows95 operating system. First, Microsoft offers the results of tests conducted by one of its employees, Steve Goan, and repeated by its expert, Jeffrey Brumfield. Goan used a pair of computer programs, Winstone 96 and Winbench 96, commonly employed to evaluate computer performance. Microsoft argues that these tests show that computers using Windows95 do not perform as well with Cache86.

Aldridge's expert, Gavin Clarkson, questions the reliability of these test results. Goan ran the tests on computers having only eight megabytes of RAM. [103] Clarkson states that users of disk cache programs usually have more than eight megabytes of RAM on their computers. Because a computer's performance **[*744]** is directly related to the amount of RAM, Clarkson states that the amount of memory in the computer influenced the performance scores on Microsoft's tests. [104] Although Microsoft protests **[**44]** that Aldridge presents no evidence that a typical computer user had more than eight megabytes of RAM when Windows95 was first marketed, Clarkson, who was himself a disk cache program user, had at least sixteen megabytes of RAM on his computers at that time. [105] This testimony raises a fact issue whether Cache86, or the amount of memory on the computers, caused the low Winstone and Winbench test scores.

Clarkson also states that Winstone and Winbench were designed to test hardware performance and are not appropriate for evaluating the performance of software. [106] Microsoft counters that Clarkson once worked for a company that used the programs to test **[**45]** software, that Microsoft used Winstone and Winbench during the development of Windows95, and that Aldridge also used these test programs to evaluate software performance. Although Microsoft's evidence undercuts Clarkson's opinion, he has nevertheless raised a fact issue whether Winstone and Winbench are proper testing tools.

Clarkson also criticizes Goan for not properly controlling the testing environment. Clarkson states that "running the same Winstone test on the same machine twice should net the same result." [107] Yet, two separate Winstone tests yielded somewhat different scores. One test produced a score of 12.70 on an undefined rating scale, while another test produced a score of 12.47. Without an explanation of how Winstone calculates its results, however, the court cannot determine whether the 0.23 difference in test scores has any statistical significance or is within the expected scientific error. The court therefore concludes that Aldridge has not shown that this difference **[**46]** undermines the integrity of the Winstone test results. [108]

Microsoft also argues that tests run by Aldridge confirm that Cache86 decreases the performance of the Windows95 operating system. David Aldridge and his staff set up a series of tests to measure the time for a computer to perform twenty-eight common functions run two times on two different hard-disk drives (a total of 112 tests). [109] **[**48]** **[*745]** With Cache86, Windows95 performed each series of tests faster (by 13, 4, 23, and 15

---

[103] Goan Deposition at 11. Computers use the binary number system to store and compute data. Each bit of data is stored as a 1 or 0. Eight bits make a byte of data. One megabyte consists of one million bytes. A computer that has eight megabytes of RAM can thus store a maximum of sixty-four million bits in RAM.

[104] Clarkson Affidavit P 9.

[105] *Id*.

[106] Clarkson Affidavit P 6.

[107] Clarkson Affidavit P 10.

[108] Aldridge's argument that Winstone and Winbench are biased because some components of the programs were provided by Microsoft fails to raise a fact issue. Even if Microsoft provided components for the programs there is no evidence that this caused any bias in results of the tests run with the programs.

[109] The 28 functions were:

(1) Start Win95 GUI (Graphical User Interface) using Microsoft Scandisk to verify all disks error free

seconds, respectively) than Windows95 alone. [110] Although at first blush these results appear to contradict its argument, Microsoft asks the court to disregard the first, or "boot-up," function in each **[**47]** series of Aldridge's tests. Since users boot-up a computer only once a day, Microsoft argues that booting up is not a normal operation, and that test times that include boot-up time do not accurately reflect overall system performance. If the test times are recalculated to exclude boot-up, Windows95 with Cache86 performed slower in the first, second, and fourth series of tests. [111] The court is not persuaded by this argument because the senior Microsoft software designer

(26) Delete 1015 files with 32 bit drivers manually disabled

(27) Open Approach database file

(28) Start Microsoft Access.

(Aldridge Affidavit Exhibit B, at DLA-04849) Aldridge and his staff also conducted four series of tests on systems operating Windows95 and disk compression software to see if Cache86 enhanced or dampened performance. (Aldridge Affidavit P 18) Because these tests did not isolate the effect of Cache86 on overall performance, they are not relevant.

[110] With Cache86, Windows95 performed each series of tests in 464, 449, 430, and 433 seconds, respectively. Without Cache86, Windows95 performed each series in 477, 453, 453, and 448 seconds, respectively. Aldridge Affidavit Exhibit B, at DLA-04851.

admitted that boot-up time is relevant to system performance. [112] At the very least, Aldridge has raised a fact issue on this point.

However, Microsoft does raise a salient point about Aldridge's tests. Aldridge focuses on the aggregate time for each series of functions and ignores the fact that many individual functions were slower with Cache86. Cache86 caused slower performance in nine of the first series of tests, seventeen of **[**49]** the second series of tests, eight of the third series of tests, and thirteen of the fourth series of tests, for a total of 47 out of 112 slower functions. [113]

To summarize the relevance of the parties' test results on the truthfulness of the Windows95 messages about Cache86's performance, Aldridge has raised a fact issue as to the reliability of Microsoft's Winstone and Winbench tests. The tests performed by Aldridge show that Cache86 does slow the performance of Windows95 in some circumstances.

As an alternative to arguing that tests prove that Cache86 *always* improves performance, Aldridge argues that Cache86 improves performance when programs other than Cache86 cause Windows95 **[**50]** to shift into DOS-compatibility mode. Aldridge claims that since DOS-compatibility mode performs read-write operations the way MS-DOS and Windows do, Cache86 necessarily provides the same performance advantages to that mode as it does for DOS and Windows. Aldridge also claims that Cache86 always improves performance in real-mode DOS.

Because Aldridge's argument only focuses on whether Cache86 improves performance of the two subordinate modes, the court concludes that it is not relevant to the broader question whether Cache86 decreases *overall* Windows95 system performance. Aldridge's argument would be relevant only to the extent that any of the four Microsoft messages can be read as stating that Cache86 *always decreases* Windows95 performance. Having examined the parties' summary judgment evidence of the effect of Cache86 on Windows95's performance, the court turns to the actual text of each message to determine if the statements about performance are false.

(a) Message One

Message One states:

> A new MS-DOS resident program named C86EXTEN *may* decrease your *system's performance*. Would you like to see more information about *this problem*? [114]

[51] [*746]** The parties agree that Microsoft defines system performance as "the overall speed at which a computer performs a wide variety of functions." [115] Message One states that Cache86 *may* decrease performance; it does not affirmatively declare that Cache86 *will* do so. Clarkson performed three different tests designed to simulate typical uses of a personal computer. These tests measured the speed at which the computer operated a spreadsheet, a word processor, and web graphics program. Windows95 ran faster with Cache86 than without it in the spreadsheet and word processing tests. However, Windows95 ran 2.4859 seconds slower with Cache86 on the web graphics test. [116] Cache86 thus improved performance for two "typical" uses, but decreased performance in

---

[111] Subtracting boot-up time (column 1 in the table of results included in Exhibit B of Aldridge's Affidavit) from the Windows95-only tests produces total times of 392, 364, 388, and 359 seconds, respectively. Subtracting boot-up time from the Windows95-with-Cache86 tests produces total times of 407, 390, 387, and 376 seconds, respectively. The Windows95-only results for the first, second, and fourth series are 15, 26, and 17 seconds faster. Windows95 with Cache86 was faster in the third series by one second.

[112] Lipe Deposition at 77-79.

[113] See Aldridge Affidavit Exhibit B, at DLA-04851; Affidavit of Microsoft Attorney Eric J.R. Nichols, Exhibit A (offering a demonstrative exhibit illustrating relative performances of each test in each series). Cache86 caused faster performance in 19 of the 112 total tests. Results were identical in the remaining 46 tests. *Id*.

[114] Lipe Affidavit Exhibit B (emphasis added).

[115] Plaintiffs' Response at 2; Microsoft's Motion for Summary Judgment at 13.

the third. The tests run by David Aldridge's employees also showed that Cache86 decreases performance in many circumstances. While Cache86 yielded faster aggregate times for each of the four series of tests, Cache86 caused slower performance in many of the individual functions. Because both David Aldridge's and Clarkson's tests show that Cache86 sometimes decreased performance, the court concludes that Aldridge has not shown that Message **[**52]** One falsely states that Cache86 decreases performance.

(b) Message Two

Message Two states:

> C86EXTEN in AUTOEXEC.BAT forces MS-DOS compatibility mode. Compatibility mode paging reduces overall system performance. [117]

Windows95 shifts into MS-DOS compatibility mode when it detects an unfamiliar program, such as Cache86, hooking Interrupt 13. The very manner in which Cache86 functions compels Windows95 to shift modes to avoid the danger of data corruption. Message Two does not state that *Cache86* reduces overall system performance; it states that "*compatibility mode paging* reduces overall system performance." Aldridge argues that the court should assume that most users **[**53]** will not understand the term "compatibility mode paging." This argument may support a claim that the message is confusing, but not that it is false. The court concludes that Aldridge has failed to present evidence that Message Two is false.

(c) Message Three

Message Three states:

> Windows was unable to identify the specified memory-resident program which was loaded in your Autoexec.bat file.
>
> If you no longer need this program, remove it from your Autoexec.bat file. Otherwise, contact the manufacturer of this program to see if an updated version is available. *Windows will not perform optimally while this program is loaded*. [118]

This message tells users that Windows95 will not perform optimally because of Cache86. Neither party has explained what "optimal" performance is. The Oxford English Dictionary defines optimal as "best or most favourable, most satisfactory." 10 Oxford English Dictionary 876 (2d ed. 1989). [119] A fair reading of Message **[**54]** Three tells users that Windows95 will not perform at its best as long as Cache86 remains on the system. Unlike the conditional language of Message One, this is a more universal statement. Aldridge's tests and those conducted by his expert raise a fact issue whether this statement is always true.

(d) Message Four

Message Four states:

> Windows was unable to identify a real-mode driver or memory-resident program loaded in your Config.sys or Autoexec.bat file. You will see another message that lists the name of the driver or program causing the problem.
>
> Because Windows could not identify the driver or program, it has switched to MS-DOS compatibility mode to ensure the program will run. However, *this slows down overall performance*. To improve performance, **[*747]**

---

[116] Clarkson Affidavit PP 3 and 4.

[117] Lipe Affidavit Exhibit C.

[118] Lipe Affidavit Exhibit D (emphasis added).

[119] *Accord*, Random House College Dictionary 933 (rev. ed. 1980) ("best; most desirable"); Webster's Third New International Dictionary (Unabridged) 1584 (Philip Babcock Gove ed. 1961) ("most desirable or satisfactory").

> remove the program or **[**55]** driver causing the problem, or contact its manufacturer for an updated version. [120]

Message Four notifies users that Windows95 has switched modes and explains why. Thus far, the message is true. It then says that this switch in modes slows down overall performance. However, Aldridge's tests and those of his expert demonstrate that in some instances performance does not decline. For example, in the four series of twenty-eight tests run by Aldridge's employees, performance time did not change in 46 of the 112 tests. In 19 of the tests performance time improved when Cache86 ran in DOS-compatibility mode. Aldridge has thus produced some evidence that Message Four is false when it unequivocally states that overall performance slows down.

3. *Does Windows95 call Cache86 a problem, and if so, is this statement true*

Aldridge argues that Messages One and Four falsely characterize Cache86 as the problem that causes decreased performance. "This problem" as used **[**56]** in Message One clearly refers to the problem of decreased system performance, not to Cache86. The Microsoft software designers responsible for drafting the message confirmed that they intended the phrase "this problem" to refer to decreased system performance, not to Cache86 or any other program. [121] Furthermore, even if the message could be read as calling Cache86 a problem, it only characterizes Cache86 as a potential problem. The message states that Cache86 "*may* decrease" performance; it does not say that Cache86 *will* decrease performance. As explained above, such a statement is true.

Message Four makes two references to a problem. The first paragraph states "Windows was *unable to identify* a real-mode driver or memory-resident program loaded in your Config.sys or Autoexec.bat file. You will see another message that lists the *name of the driver or program causing the problem*" (emphasis added). The "problem" here is the inability to **[**57]** identify the triggering program. Cache86 is not on the disabling list in SETUPC.INF or on the safe list in IOS.INI. Thus, the statements in this paragraph are true.

The second paragraph of Message Four states:

> Because *Windows could not identify* the driver or program, it has switched to MS-DOS compatibility mode to ensure the program will run. However, *this slows down overall performance*. To improve performance, remove *the program or driver causing the problem*, or contact its manufacturer for an updated version. (Emphasis added.)

It is unclear whether the problem referred to in this paragraph is the inability of Windows95 to identify Cache86 or slow overall performance. Which meaning Microsoft intended is an issue of fact for the jury. While a statement that the inability to identify Cache86 was a problem would be true, a statement that Cache86 causes the problem of slow overall performance would raise an issue of fact as to its truthfulness. The court concludes that Aldridge has raised an issue of fact as to Message Four.

C. Conclusion

There is no issue of material fact as to Messages One and Two. Aldridge has failed to support the business **[**58]** disparagement and defamation claims by producing evidence of the falsity of Messages One and Two, and Microsoft has met its affirmative burden on the tortious interference claims by establishing the truth of these two messages. The court will therefore grant Microsoft's motion for summary judgment on all of Aldridge's state law claims as to Messages One and Two. Because issues of material fact preclude summary judgment as to Messages Three and Four, and because Microsoft relies solely on its defenses of truth in its motion for summary judgment on all of the state-law claims, the court will deny summary judgment as to Messages Three and Four.

III. *ANTITRUST CLAIMS*

---

[120] Lipe Affidavit Exhibit E (emphasis added).

[121] Lipe Deposition at 161-62; Foerch Deposition at 35-37.

Aldridge alleges that Microsoft violated section two of the Sherman Act, *15 U.S.C. [*748] § 2*, under the theories of product disparagement and essential facilities. As a preliminary matter Microsoft challenges Aldridge's standing to assert an antitrust claim.

A. Antitrust Standing

HN11[] The Clayton Act, *15 U.S.C. § 15(a)*, limits the class of private persons who may sue on antitrust violations to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." **[**59]** To demonstrate antitrust standing Aldridge must show

(1) injury-in-fact,

(2) antitrust injury, and

(3) status as a proper plaintiff.

Doctor's Hosp. of Jefferson, Inc. v. Southeast Med. Alliance, Inc., 123 F.3d 301, 305 (5th Cir. 1997) (citing *McCormack v. National Collegiate Athletic Ass'n, 845 F.2d 1338, 1341 (5th Cir. 1988))*. In analyzing Aldridge's standing under this test the court should assume that Microsoft has committed the antitrust violations alleged and then determine whether Aldridge has shown the three elements of standing. *123 F.3d at 306*.

HN12[] To establish the first element, injury-in-fact, Aldridge must show an injury to its business or property proximately caused by the conduct of Microsoft. *See Doctor's Hospital, 123 F.3d at 305*; *United Indus., Inc. v. Eimco Process Equip. Co., 61 F.3d 445, 448 (5th Cir. 1995)*; *Ancar v. Sara Plasma, Inc., 964 F.2d 465, 468 (5th Cir. 1992)*. Aldridge's evidence shows a significant decline in sales of Cache86 after November of 1994 when Microsoft began releasing early versions of Windows95 for beta testing [122] and establishes the necessary causal link between the claimed injury (lost sales) and **[**60]** the alleged antitrust violations (denial of access to Windows95 and disparagement of Cache86).

Aldridge must next show antitrust injury. This is different from the requirement that a plaintiff show market-wide injury to competition, which is often a component of substantive antitrust liability. *Doctor's Hosp., 123 F.3d at 305*. ***HN13***[] To demonstrate the antitrust injury element of standing a plaintiff must show anticompetitive effects of the defendant's actions; in other words, antitrust injury should be the "type of loss that the claimed violations of the antitrust laws would be likely to cause." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 89 S. Ct. 1562, 1577, 23 L. Ed. 2d 129 (1969)*; *see Bell v. Dow Chem. Co., 847 F.2d 1179, 1182 n.4 (5th Cir. 1988)*. Lost sales and declining market share, as alleged by Aldridge and supported by Aldridge's summary judgment evidence, [123] are the types of losses that would likely result from an anticompetitive campaign **[**61]** of product disparagement or denial of access to an essential facility.

HN14[] To establish the third element of antitrust standing Aldridge must show that it is a proper plaintiff. In evaluating this element the court must examine

(1) whether Aldridge's injuries or their causal link to Microsoft are speculative,

(2) whether other parties have been more directly harmed, and

(3) whether allowing Aldridge to sue would risk multiple lawsuits, duplicative recoveries, or complex damage apportionment.

See McCormack v. National Collegiate Athletic Ass'n, 845 F.2d 1338, 1341 (5th Cir. 1988). Aldridge's evidence of lost sales of Cache86 demonstrates that neither Aldridge's injuries nor their causal link to Microsoft's alleged

---

[122] Aldridge Affidavit P 31 & Exhibit C.

[123] Aldridge Affidavit PP 31 and 32 & Exhibit C; Lyon Affidavit P 5 & Exhibit A.

product disparagement and denial of access to Windows95 are speculative. Nothing submitted by the parties indicates that any other party has suffered harm more directly; and allowing Aldridge's **[**62]** antitrust claims to proceed will not risk multiple lawsuits, duplicative recoveries, or complex damage apportionment. The court concludes that Aldridge has standing under the Clayton Act to pursue antitrust claims against Microsoft.

B. Product Disparagement

Microsoft argues that Aldridge cannot succeed on the product disparagement claim because the allegedly disparaging information is true and because the anticompetitive **[*749]** effect of any disparaging remarks is *de minimis*. An evaluation of whether Aldridge's damages were *de minimis* encompasses the question of whether the statements were false. The court will therefore consider Microsoft's truth defense as part of its evaluation of Microsoft's *de minimis* defense.

HN15[] Even if a plaintiff shows falsity it must overcome a presumption that the disparagement had only a *de minimis* effect on competition. *American Prof'l Testing Serv., Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Publications, Inc., 108 F.3d 1147, 1151, 1152 (9th Cir. 1997)*; *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 288 n.41 (2d Cir. 1979)*; *see* IIIA Areeda & Turner, *supra*, § 782b, at 260-61 (rev. ed. 1996). Courts and commentators **[**63]** presume a *de minimis* effect for three reasons:

(1) it is generally quite difficult to distinguish mere puffery from patently false statements relied upon by a consumer;

(2) the effects of disparagement are speculative at best, especially when the disparagement is not systematic; and

(3) most consumers view statements about a competitor cynically, recognizing the inherent bias and lack of objectivity of such statements.

See American Prof'l Testing Serv., 108 F.3d at 1152; IIIA Areeda & Hovenkamp, *supra*, § 782d, at 263 (rev. ed. 1996).

At the suggestion of Professors Areeda and Hovenkamp, courts have adopted a strenuous test for rebutting the *de minimis* presumption. To satisfy this test a plaintiff must prove that the allegedly disparaging statements were

(1) clearly false,

(2) clearly material,

(3) clearly likely to induce reasonable reliance,

(4) made to consumers having little understanding of the subject matter,

(5) continued for extended time periods, and

(6) not readily susceptible to counter statement, explanation, or other neutralizing effort or offset by the plaintiff.

National Ass'n of Pharm. **[**64]** *Mfrs., Inc. v. Ayerst Lab., 850 F.2d 904, 916 (2d Cir. 1988)*; IIIA Areeda & Hovenkamp, *supra*, § 782b, at 261 (rev. ed. 1996).

Aldridge concedes that falsity is an essential element of its product disparagement claim. The alleged false statement or misrepresentation must amount to more than mere puffery by the defendant. *General Communications Eng'g, Inc. v. Motorola Communications & Elecs., Inc., 421 F. Supp. 274, 289-90 (N.D. Cal. 1976)*; *see* IIIA Areeda & Hovenkamp, *supra*, § 782d, at 263 (rev. ed. 1996). Because Aldridge has failed to show that Message One and

Two are false, proof of Aldridge's product disparagement claim must rely on Messages Three and Four. [124] The court is persuaded that a fact issue exists as to the clear falsity of these two messages.

In addition to showing clear **[**65]** falsity, Aldridge must show that the challenged messages are clearly material. ***HN16***[] A material fact is one "that is of consequence to the determination of the action." *Fed. R. Evid. 401*; *see* 22 Charles Alan Wright & Kenneth W. Graham, Jr., *Federal Practice & Procedure* § 5164, at 40 (1978). Aldridge argues that the messages meet this factor because they bring into question the marketability of Cache86 by telling users that it may or does decrease performance. The court agrees that Aldridge has raised a fact issue as to the clear materiality of the four messages.

Aldridge must next show that the challenged messages were clearly likely to induce reliance. Message One is captioned as a "Performance Warning," and the message box includes an exclamation point, which implies urgency. The message invites the user to view further information, suggesting that the operating system has anticipated these circumstances and can explain what is happening. [125] Message Two appears in a message box captioned as "System Properties." **[*750]** In addition to the message about Cache86, the box contains diagnostic information about the computer, such as the amount of available memory, the current mode in which **[**66]** Windows95 is operating, and whether certain auxiliary hardware devices (PCMCIA cards, for example) are running. [126] Messages Three and Four appear in boxes captioned "Windows Help," implying that the information contained in the messages will assist the user. [127] Microsoft acknowledges that it sought to make all four messages understandable to assist the user in knowing what to do. [128] The court concludes that Aldridge has raised a fact issue as to the reliance factor.

Aldridge also has established the fourth factor -- that Microsoft published the messages to consumers who had little understanding of the subject matter. Microsoft admits that it assumed users would not understand terms like DOS-compatibility mode. [129]

[67]** To satisfy the fifth factor Aldridge must show that the messages were displayed for long periods of time. Aldridge argues that "the warnings are continued for a prolonged period because Windows95 generates them every time it detects CACHE86 on the computer." [130] The court does not agree. Message One appears only once. When the user acknowledges Message One it disappears from the video screen and will not reappear unless the user takes Cache86 off the computer and later reinstalls it. [131] None of the three other messages automatically appear on the screen; the user must seek them out. [132] None of the other messages remain on display after the computer is turned off. Because the messages do not appear for extended periods of time, the court concludes that Aldridge has failed to raise a fact issue as to the fifth rebuttal factor.

---

[124] Although the court has found that Messages One and Two are true, in the interest of thoroughness the court will also evaluate Messages One and Two under the remaining *de minimus* rebuttal factors.

[125] Lipe Affidavit Exhibit B.

[126] Lipe Affidavit Exhibit C.

[127] Lipe Affidavit Exhibits D and E.

[128] Foerch Deposition at 22.

[129] Foerch Deposition at 64-66.

[130] Plaintiffs' Response at 24.

[131] *See supra* note 63 and accompanying text; Lipe Deposition at 159.

[132] Users may view Messages Two through Four by accessing the "control panel" window of Windows95. The control panel will then display Message Two. (Lipe Deposition at 160-61) By highlighting either of the two sentences in Message Two, a user may then bring up Messages Three and Four. None of the messages remain on the screen after the control panel window is closed or the computer is turned off.

[68]** The sixth factor requires Aldridge to show that the messages were not readily susceptible to explanation or neutralization. Aldridge argues it had no way of neutralizing these warnings until it was too late, and that it did not receive a copy of Windows95 until April of 1995, four months before the general release of Windows95. Aldridge also argues that Microsoft should have informed it about the new read-write system and told it how to avoid triggering the switch to DOS-compatibility mode.

The court is not persuaded by these arguments. Microsoft did not have an affirmative duty to predisclose the messages or the new design of Windows95 to Aldridge. As the Second Circuit has observed:

> [A] firm may normally keep its innovations secret from its rivals as long as it wishes, forcing them to catch up on the strength of their own efforts after the new product is introduced. . . . It is the possibility of success in the marketplace, attributable to superior performance, that provides the incentives on which the proper functioning of our competitive economy rests. If a firm that has engaged in the risks and expenses of research and development were required in all circumstances **[**69]** to share with its rivals the benefits of those endeavors, this incentive would very likely be vitiated.

Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 281 (2d Cir. 1979) (citation omitted).

Messages Three and Four encourage users to contact the manufacturer of Cache86 for an updated version of Cache86 as an alternative to removing the program. Aldridge could have countered these messages by giving information to users who called. Even if no users responded, Aldridge could have designed **[*751]** an updated version of Cache86 that would operate under Windows95 protect mode without triggering the messages. (In fact, Aldridge eventually did market such a product, known as Cache86 version 6.0.) The fact that Aldridge took no action, despite knowing that Windows95 was being developed and despite learning from beta-testers at least a year before Windows95 was introduced that it would display warning messages about Cache86, severely undercuts Aldridge's argument that the messages were not susceptible to explanation or neutralization. [133] The court concludes that Aldridge has failed to raise a fact issue as to the sixth factor.

[70]** Because Aldridge has failed to show that Messages One and Two are clearly false and has failed to show that any of the four messages continued for extended periods or that they were not readily susceptible to explanation or neutralization, the court concludes that Aldridge has failed to rebut the strong presumption that any damage caused by Microsoft's allegedly disparaging messages was *de minimis*. Aldridge's claim of anticompetitive product disparagement therefore fails.

C. Essential Facilities

Aldridge alleges that Windows95 is an essential facility because all software must operate under an operating system, Windows95 is the most prevalent system, [134] and if software cannot function under Windows95 it is not usable to most computer users. Aldridge argues that by disabling or disparaging all competing disk cache programs Microsoft denied Aldridge access to Windows95. Aldridge also contends that Microsoft prevented disk cache developers from updating their programs to operate under Windows95, and thereby continuing to compete in the disk cache market, by not disclosing design details about Windows95 to disk cache developers. Microsoft responds

---

[133] Terrence Canup, who was then vice-president for marketing of the Aldridge Company, testified that the issuance of the new Windows95 operating system was general knowledge in the computer industry two or three years before it was commercially released in August of 1995. Six to eight months before Aldridge obtained an advance copy of Windows95 in April of 1995, half a dozen beta-testers had reported the Windows95 messages about Cache86 to Canup. Canup reported this to David Aldridge, who did nothing other than express interest. Aldridge did not attempt to replicate the messages the beta-testers had seen, ask Microsoft about the messages, or upgrade Cache86 to make it compatible with Windows95. (Canup Deposition at 24-27, 70-73)

[134] Plaintiffs' Response at 18.

that Windows95 is not **[**71]** an essential facility, and even if it were, Microsoft did not deny Aldridge access to it. [135]

Often criticized, [136] the essential facilities doctrine nevertheless remains a viable part of the federal antitrust laws. The doctrine protects a competitor from having to enter an additional market with large capital requirements in order to compete. *Fishman v. Estate of Wirtz, 807 F.2d 520, 540 (7th Cir. 1986)*. "The core concern of the doctrine is that a monopolist possesses a resource that is 'essential' in some sense for the business of someone else, but that the monopolist refuses to share." IIIA Areeda & Hovenkamp, *supra*, P 772a, at 177 (rev. ed. 1996). By controlling the "essential" facility, a monopolist can potentially extend its monopoly power "from one stage **[**72]** of production to another, and from one market into another." *MCI Communications Corp. v. AT&T, 708 F.2d 1081, 1132 (7th Cir. 1983)*; *accord* *Interface Group, Inc. v. Massachusetts Port Auth., 816 F.2d 9, 12 (1st Cir. 1987)*; IIIA Areeda & Hovenkamp, *supra*, P 771a, at 172 (rev. ed. 1996). ***HN17***[] To prevent this potential expansion of monopoly power the Sherman Act imposes a duty on the owner of an essential facility to open it to competitors on a nondiscriminatory basis. *Ferguson v. Greater Pocatello Chamber of Commerce, Inc., 848 F.2d 976, 983 (9th Cir. 1988)*; *Hendricks Music Co. v. Steinway, Inc., 689 F. Supp. 1501, 1509 (N.D. Ill. 1988)*; IIIA Areeda & Hovenkamp, *supra*, P 771a, at 172 (rev. ed. 1996). [137]

[73]** **[*752]** To prevail on an essential facilities claim a plaintiff must establish that

> (1) the defendant is a monopolist,
>
> (2) the facility is essential,
>
> (3) the defendant has the type of control over the facility that is forbidden by the Sherman Act, [138]
>
> (4) duplication of the facility is unreasonable or impractical,
>
> (5) the defendant denied the plaintiff use of the facility, and
>
> (6) providing access to the plaintiff was feasible.

---

[135] Microsoft also asserts truth as a defense to Aldridge's essential facilities claim. Microsoft presents no authority, however, that falsity is an element of this claim or that truth is a defense to it.

[136] *See, e.g.*, IIIA Areeda & Hovenkamp, *supra*, P 771c, at 176 (rev. ed. 1996).

[137] As Professors Areeda and Hovenkamp explain:

> The essential facility doctrine concerns vertical integration -- in particular, the duty of a vertically integrated monopolist to share some input in a vertically related market, which we call market # 1, with someone operating in an upstream or downstream market, which we shall call market # 2. If the facility is truly "essential," then the # 1 monopoly facility also establishes a # 2 monopoly.

IIIA Areeda & Hovenkamp, *supra*, P 771a, at 172 (rev. ed. 1996).

[138] Most cases articulate four elements for showing a violation of the essential facilities doctrine. The first of these elements is commonly stated as "control of the essential facility by a monopolist." *MCI Communications Corp., 708 F.2d at 1132*; *accord* *Ferguson, 848 F.2d at 983*; *City of College Station v. City of Bryan, 932 F. Supp. 877, 887 (S.D. Tex. 1996)*; *TCA Bldg. Co. v. Northwestern Resources Co., 873 F. Supp. 29, 39 (S.D. Tex. 1995)*. However, this element requires proof that

> (1) the defendant is a monopolist,
>
> (2) the facility is essential, and
>
> (3) the defendant has the type of control over the essential facility forbidden by the Sherman Act.

Because the customary first element consists of three "subelements" a plaintiff must prove as part of its case, for clarity's sake the court lists these subelements as separate elements.

See Twin Lab., Inc. v. Weider Health & Fitness, 900 F.2d 566, 569, 570 (2d Cir. 1990); Ferguson, 848 F.2d at 983; MCI Communications Corp., 708 F.2d at 1132; City of College Station v. City of Bryan, 932 F. Supp. 877, 887 (S.D. Tex. 1996); TCA Bldg. Co. v. Northwestern Resources Co., 873 F. Supp. 29, 39 (S.D. Tex. 1995); International Audiotext Network, Inc. v. AT&T Co., 893 F. Supp. 1207, 1220-21 (S.D.N.Y. 1994), *aff'd*, 62 F.3d 69 (2d Cir. 1995); IIIA Areeda & Hovenkamp, *supra*, P 773c, at 208 (rev. ed. 1996).

[74]** 1. *Is Microsoft a monopolist*

HN18[] To establish that Microsoft is a monopolist Aldridge must show that Microsoft possesses monopoly power in the relevant geographic and product markets. In an essential facilities case the court must define several markets:

(1) the relevant product market for the alleged essential facility (the "primary product market"),

(2) the relevant product market for the potentially monopolized product (the "secondary product market"), and

(3) the relevant geographic markets.

Herbert Lyon, Aldridge's market share expert, concludes (and Microsoft does not dispute) that the relevant primary market is the worldwide market for personal computer operating systems, and the relevant secondary market is the United States market for disk cache programs. [139] **[**75]** Aldridge must also show that Microsoft possessed the power to control prices or exclude competition in the market for personal computer operating systems. Lyon's report and affidavit conclude that Microsoft has such monopoly power, and Microsoft's summary judgment papers do not dispute this conclusion. [140]

2. *Is Windows95 essential*

The purpose of the antitrust laws is to promote competition. State Oil Co. v. Khan, 522 U.S. 3, 139 L. Ed. 2d 199, 118 S. Ct. 275, 282 (1997); Doctor's Hosp., Inc. v. Southeast Med. Alliance, Inc., 123 F.3d 301, 306 (5th Cir. 1997). To show that a monopolist's facility is essential a plaintiff must first demonstrate that the facility is critical to the plaintiff's own competitive viability. *See* Fishman v. Estate of Wirtz, 807 F.2d 520, 539 (7th Cir. 1986); TCA Bldg. Co. v. Northwestern Resources Co., 873 F. Supp. 29, 39 (S.D. Tex. 1995); IIIA Areeda & Hovenkamp, *supra*, PP 773a, 773b, at 199, 202 (rev. ed. 1996). The plaintiff must then demonstrate that sharing the facility is vital **[*753]** to enhancing competition in general. IIIA Areeda & Hovenkamp, *supra*, P 773b3, at 206 (rev. ed. 1996). A facility is essential under the antitrust laws only when it is vital to both the plaintiff's individual competitive **[**76]** viability and the viability of the market in general.

Aldridge only addresses the first requirement, arguing that without access to Windows95, "Cache86 cannot run, cannot be sold, and therefore cannot compete in the software market." [141] The court agrees that Cache86, like any commercial software program, must be compatible with an operating system in order to function on a computer. However, Aldridge has not produced any evidence that Cache86 cannot run on other operating systems in the primary market, such as IBM's OS/2 system. In fact, Cache86 does run, as it was designed to do, on at least two other operating systems, MS-DOS and Windows. [142] Lyon estimated that MS-DOS and Windows had a 21.5% share of the operating-system market in 1996, the year after Microsoft allegedly denied Aldridge access to Windows95. Aldridge offers no evidence that a 21.5% market share made those operating systems inadequate "facilities." Furthermore, although Lyon also predicts that the market share for MS-DOS and Windows will decline to 0.4% by 2000, Lyon presented no opinion or evidence about the present or projected market share of operating systems produced by firms other than Microsoft. Aldridge **[**77]** has failed to show that it cannot compete viably in the secondary market of disk cache programs by using operating systems other than Windows95.

---

[139] June 1, 1997, report of Lyon, attached as Exhibit A to his affidavit.

[140] The court emphasizes that it has made no independent finding or holding that Microsoft is a monopolist. The issue has simply not been joined by Microsoft.

[141] Plaintiffs' Reply Brief [Docket Entry No. 35] at 10.

[142] Aldridge Affidavit P 3.

Nor has Aldridge presented any evidence of the effect of Windows95 on competition in general in the secondary market for disk cache programs. While demand for *Windows95-compatible* disk cache programs may have declined sharply or even disappeared, Aldridge presents no evidence that the entire relevant secondary product market for disk cache programs has disappeared.

Lyon opines that by including its own disk cache software (SMARTDRV) with Windows95 and by disabling non-Microsoft disk cache programs, or displaying warnings about them, "Microsoft effectively owns 100% of the relevant market for disk cache utilities operating within the domain of the Windows95 operating system." [143] But the relevant secondary market is disk cache programs in general, not disk cache programs **[**78]** operating within the domain of the Windows95 operating system. Although Lyon may be correct that there is effectively no competition in the "submarket" of Windows95-specific disk cache programs, that fact does not establish that Windows95 is vital to competitors in the disk cache program market.

Even had Aldridge brought evidence to support both requirements of this element, the court concludes as a matter of law that in this case Windows95 is not essential to the disk cache program market under the Sherman Act. Cache86 relies upon an imperfection in the design of MS-DOS and Windows -- the practice of passing all read-write information between the hard disk and microprocessor through Interrupt 13. This imperfection caused slow performance, and Aldridge developed the Cache86 program to overcome it and to improve the speed of MS-DOS and Windows. Microsoft, the maker of those two operating systems, chose an alternative method for improving performance; it designed the new Windows95 operating **[**79]** system to avoid this imperfection in its primary mode. In essence, Microsoft's operating systems are essential to Aldridge only to the extent that the systems operate less efficiently.

Acceptance of Aldridge's arguments would mean that Microsoft could be punished under the antitrust laws for improving its own product. Such a result would inhibit, not promote, competition in the market. The antitrust laws do not require a competitor to maintain archaic or outdated technology; even monopolists may improve their products. *See* *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 281 (2d Cir. 1979)* ("It is the possibility of success in the marketplace, attributable to superior performance, that provides the incentives on which **[*754]** the proper functioning of our competitive economy rests.").

The essentialness issue in this case presents a crucial distinction from previous cases applying the essential facilities doctrine. The plaintiffs here marketed a product, Cache86, whose sole purpose was to improve the operation of the allegedly monopolized product. In the usual essential facilities case the alleged facility is a conduit for the distribution of another product. Sports stadiums facilitate **[**80]** the display of indoor sports. *See* *Fishman v. Estate of Wirtz, 807 F.2d 520, 532 (7th Cir. 1986)*; *Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 989 (D.C. Cir. 1977)*. Railroad bridges permit continuation of rail service and delivery of freight. *See* *United States v. Terminal R.R. Ass'n, 224 U.S. 383, 32 S. Ct. 507, 509, 56 L. Ed. 810 (1912)*. Telecommunications networks distribute information. *See* *MCI Communications Corp. v. AT&T, 708 F.2d 1081, 1093 (7th Cir. 1983)*. Ski mountains provide access to recreational skiing. *See* *Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1521 (10th Cir. 1984)*, *aff'd on other grounds*, *472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*.

While Windows95 does facilitate the use of application software, Cache86 is not such a product; it is a utility program designed to improve the distributing product. Windows95 is analogous to a long-distance telephone network. It is very doubtful that a long-distance carrier like AT&T could be liable to a copper wire manufacturer under the essential facilities doctrine for switching from copper wire to faster fiber-optic lines. While it could be argued that **[**81]** access to AT&T's long-distance network may be essential to competitors in the market for delivery of long-distance telephone service, the network would not be essential to the market for copper wire. Similarly, even were the court to assume for purposes of argument that Windows95 could be an essential facility for application software, such as a word processing program, it is not essential to a market whose sole purpose is to improve on imperfections in the facility at issue.

---

[143] Lyon Affidavit P 6.

3. *Does Microsoft have the type of control over the facility that is forbidden by the Sherman Act*

Courts have only applied the ***HN19***[] essential facilities doctrine to four situations:

(1) natural monopolies;

(2) facilities whose duplication is forbidden by law;

(3) publicly subsidized facilities that cannot practically be built privately; and

(4) the sole facility in the relevant geographic market, i.e., "the only facility in town."

See Twin Lab., Inc. v. Weider Health & Fitness, 900 F.2d 566, 569 (2d Cir. 1990); *International Audiotext Network, Inc. v. AT&T Co., 893 F. Supp. 1207, 1220-21 (S.D.N.Y. 1994)*; IIIA Areeda & Hovenkamp, *supra*, PP 771c, 773b2, at 176, 205 (rev. **[**82]** ed. 1996).

Microsoft does not hold a natural monopoly over operating systems. ***HN20***[] Natural monopolies occur in industries having large initial fixed costs but declining marginal production costs. *Greenwood Utils. Comm'n v. Mississippi Power Co., 751 F.2d 1484, 1502 (5th Cir. 1985)*. In such circumstances a single firm can produce more efficiently than multiple firms because the single firm can constantly expand its capacity at a much lower cost than the fixed costs required to enter the market. *Fuchs v. Rural Elec. Convenience Coop. Inc., 858 F.2d 1210, 1212 n.5 (7th Cir. 1988)*; *Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 990 n.26 (D.C. Cir. 1977)*. While Microsoft may hold a natural monopoly over the distribution of its own products, that kind of monopoly does not offend the Sherman Act. *See Sports Ctr., Inc. v. Riddell, Inc., 673 F.2d 786, 791 (5th Cir. 1982)*. To argue, as Aldridge appears to, [144] that Microsoft holds a natural monopoly over Windows95 is therefore irrelevant. Aldridge has not shown that Microsoft holds a natural monopoly over the worldwide market for personal computer operating systems.

[83]** Nor has Aldridge shown that creation of a personal computer operating system is forbidden by law, that personal computer operating **[*755]** systems are publicly subsidized facilities, or that Windows95 is the only operating system in the relevant geographic market. Instead, Aldridge argues that "antitrust violations based on essential facility claims are recognized whenever monopolists such as Microsoft deny equal access to a product that is essential for competition." [145] The essential facilities doctrine is not that broad, however. The cases Aldridge relies on as authority for his argument confirm the narrowness of the doctrine because each falls within one of the four categories mentioned above. [146] The court concludes that Aldridge has not established that Microsoft's control of Windows95 is the type of control that is forbidden by the Sherman Act.

---

[144] Plaintiffs' Reply Brief at 10.

[145] Plaintiffs' Reply Brief at 11.

[146] Aldridge cites *Fishman v. Estate of Wirtz, 807 F.2d 520 (7th Cir. 1986)*; *Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982 (D.C. Cir. 1977)*; *Zschaler v. Claneil Enters., Inc., 958 F. Supp. 929 (D. Vt. 1997)*; *Blue Cross & Blue Shield United v. Marshfield Clinic, 881 F. Supp. 1309 (W.D. Wis. 1994)*; *Bellsouth Adver. & Publ'g Corp. v. Donnelley Info. Publ'g, Inc., 719 F. Supp. 1551 (S.D. Fla. 1988)*, *rev'd*, *999 F.2d 1436 (11th Cir. 1993)*; and *Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509 (10th Cir. 1984)*, *aff'd on other grounds*, *472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*.

The Supreme Court explicitly declined to address the essential facilities arguments in its review of the Tenth Circuit's decision in *Aspen Highlands Skiing*. *See Aspen Skiing Co.*, 105 S. Ct. at 2862 n.44. However, to the extent that the Tenth Circuit's application of the essential facilities doctrine is relevant, the facility there would fall under the first category, natural monopoly, because the fixed cost in acquiring possession of a skiable mountain is much greater than the marginal cost of expanding facilities on existing slopes. *See Twin Lab., Inc. v. Weider Health & Fitness, 900 F.2d 566, 569 (2d Cir. 1990)* (categorizing *Aspen Skiing*). *Cf.* IIIA Areeda & Hovenkamp, *supra*, PP 772c1-c2 (rev. ed. 1996) (criticizing the Tenth Circuit's essential facilities analysis in *Aspen Skiing* and contending that it should not have been analyzed as an essential facilities case).

[84]** 4. *Is duplication of an operating system unreasonable or impractical*

Because Microsoft does not address this factor, the court will assume that it is unreasonable or impractical for a disk cache program manufacturer to produce its own operating system in order to gain market access for its programs.

5. *Has Microsoft denied Aldridge access to the Windows95 operating system*

Aldridge argues that Microsoft denied access to Windows95 by encrypting the Windows95 program code, by not disclosing functional details about the program to Aldridge before releasing Windows95, and by designing the operating system "to disable or disparage all competing disk caches." [147] Microsoft responds that Aldridge never asked for any information about the design or operation of Windows95 and never asked to be a beta tester for the operating system.

HN21[] To establish denial of access a plaintiff must have at the very least sought access to the facility. *City of Vernon v. Southern Cal. Edison **[**85]** Co., 955 F.2d 1361, 1367 (9th Cir. 1992)*. David Aldridge admitted that he did not ask for any information that would have allowed him to upgrade Cache86 for Windows95. Nor did he ask for a beta version of Windows95. Instead, he expected Microsoft to invite him into the beta-testing program, as it had with respect to previous software products. [148] ***HN22***[] "[A] manufacturer is under no obligation to pre-disclose or disclose its knowledge about its products so that competition may arise in the related peripheral hardware, software, and repair service markets." *Data Gen. Corp. v. Grumman Sys. Support Corp., 761 F. Supp. 185, 192 (D. Mass. 1991)*, *aff'd*, *36 F.3d 1147 (1st Cir. 1994)*; *accord* *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 281 (2d Cir. 1979)* ("Withholding from others advance knowledge of one's new products, therefore, ordinarily constitutes valid competitive conduct."). Because Microsoft could lawfully decline to reveal **[*756]** advances in technology, it did not offend the antitrust laws by failing to distribute design information about Windows95 to Aldridge or by encrypting the computer code for the operating system.

[86]** Aldridge fairs no better on his argument that "Microsoft denied access to Windows95 by designing it to disable or disparage all competing disk caches." [149] Aldridge offers no evidence to show that Windows95 disables Cache86, [150] and nothing in the messages prevents a user from employing Cache86 in DOS-compatibility mode or from contacting Aldridge for an updated version of the program. Aldridge has thus failed to show that Microsoft denied Aldridge access to the Windows95 operating system.

6. *Was it feasible for Microsoft to provide Aldridge access to Windows95*

Aldridge argues that Cache86 runs as designed in DOS-compatibility mode and that Cache86 could have been updated to function in protect mode as well. [151] Microsoft does not contest these arguments and, indeed, **[**87]** Aldridge did redesign Cache86 to disable itself in protect mode and to operate as designed when Windows95 runs

---

Bellsouth falls under the category of facilities (a copy-righted telephone directory) whose duplication is forbidden by law. *Bellsouth, 719 F. Supp. at 1563*. The facility in *Hecht* enjoyed public subsidies. *Hecht, 570 F.2d at 985* & n.1 (identifying the United States as owner and the District of Columbia Armory Board as operator of the allegedly essential facility, RFK stadium). The facilities at issue in *Zschaler, Blue Cross*, and *Fishman* were effectively the only ones in town. *Fishman, 807 F.2d at 540*; *Zschaler, 958 F. Supp. at 944-45*; *Blue Cross, 881 F. Supp. at 1312-13*.

[147] Plaintiffs' Response at 20, 21.

[148] Aldridge Deposition at 24.

[149] Plaintiffs' Response at 20.

[150] Because Windows95 only disables those programs that appear in the SETUPC.INF file and because Cache86 does not appear on this list, the evidence establishes that Windows95 does not disable Cache86.

[151] Plaintiffs' Response at 20.

other programs in DOS-compatibility mode. The court therefore concludes that Aldridge has shown that it was feasible to provide access.

7. *Conclusion*

While Aldridge has shown feasibility, and the parties have not contested that Microsoft is a monopolist and that duplicating Windows95 would be unreasonable or impractical, Aldridge has failed to establish the remaining elements required for an essential facilities claim. Aldridge has not shown that Windows95 is essential, that Microsoft has the type of control over Windows95 that is forbidden by the Sherman Act, or that Microsoft has illegally denied Aldridge access to Windows95. Accordingly, Aldridge cannot recover under the Sherman Act on the theory that Microsoft denied him access to an essential facility.

IV. *CONCLUSION*

Because Aldridge has only raised issues of fact as to the truth of Messages Three **[**88]** and Four, Microsoft is entitled to summary judgment on Aldridge's state law claims as to Messages One and Two. Because Aldridge has failed to rebut the presumption of *de minimis* damage in his antitrust product disparagement claim and has failed to establish an antitrust claim under the essential facilities doctrine, Microsoft is also entitled to summary judgment on those claims.

Microsoft's Motion for Summary Judgment (Docket Entry No. 26) is **GRANTED IN PART** and **DENIED IN PART**. Aldridge's antitrust claims will be dismissed with prejudice. Aldridge's state law claims will be dismissed with prejudice as to Messages One and Two.

SIGNED at Houston, Texas, on this 5th day of February, 1998.

SIM LAKE

UNITED STATES DISTRICT JUDGE

[Gateway Western Ry. v. Terminal R.R. Ass'n of St. Louis]

United States District Court for the Southern District of Illinois

February 5, 1998, Decided ; February 5, 1998, Filed

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate and should be granted where there exists no genuine issue of material fact. A motion for partial summary judgment should be granted on an issue as to which there is no material factual dispute, even if there exists a substantial controversy with respect to other issues. The existence of a factual dispute, standing alone, is not sufficient to bar summary judgment. A factual dispute will not preclude summary judgment unless the disputed fact is outcome determinative under the governing law.

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

HN3[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Illinois courts have extended the protections of the Noerr-Pennington doctrine to insulate parties from claims alleging intentional interference with a contract right or other economic expectation. Rather than limit the application of the doctrine to antitrust claims, the courts view the *First Amendment* right to petition the government for redress to be superior to contract rights as well.

Opinion by: PAUL E. RILEY

Opinion

MEMORANDUM AND ORDER

RILEY, District Judge:

I. Introduction

The operative Second Amended Complaint in this matter was filed on December 19, 1997. Plaintiff seeks damages under theories of contract, property and under Sections 1 and 2 of the Sherman Act. **[*2]** This matter is now before the Court on Defendant's motion for partial summary judgment on Counts II through VII (Doc. 151).

II. Facts

Terminal Railroad Association of St. Louis ("TRRA"), a Class II railroad, operates in Illinois and Missouri as a local switching carrier. It is subject to regulation by the Surface Transportation Board ("STB"), the successor to the Interstate Commerce Commission ("ICC"). It switches freight between railroads that meet in the St. Louis area and provides transportation across the Mississippi River via the McArthur and Merchants bridges. Gateway Western Railway Company ("Gateway") (now owned by Kansas City Southern Transportation) began operating as a Class II railroad in 1990. It primarily transports freight between Kansas City and East St. Louis. Gateway is also subject to STB regulation.

For more than 100 years, TRRA has operated a rail line known as the Eads Main Line. In November 1991, Gateway purchased a small strip of land from CSX Transportation, Inc., which is a major east-west carrier. A portion of the land lies underneath TRRA's Eads Main Line. In 1991, Gateway informed TRRA that Gateway was undertaking construction of a new segment **[*3]** of track, known as the Q connection and that a new track would cross TRRA's Eads Main Line.

Gateway originally applied for and received ICC authority to construct the track as a "relocation" but failed to include in its application the fact that the Q connection track would cross the Eads Main Line.

TRRA objected to the proposed crossing and refused to allow Gateway to construct a crossing over the Eads Main Line. When Gateway notified TRRA that Gateway crews planned to unilaterally install the crossing without TRRA's consent, TRRA filed an action in this Court, *Terminal Railroad Association of St. Louis v. Gateway Western Railway Company,* No. 92-CV-0210-WLB. Judge William L. Beatty held in an Order of Referral that the question of whether Gateway had also to obtain authority under **29 U.S.C. § 10901(d)** to cross the Eads Main Line was within the primary jurisdiction of the ICC. The ICC held in September 1992 that Gateway had to obtain both construction and crossing authority from the ICC before constructing and operating the Q connection.

On November 23, 1994, after Gateway acknowledged the planned crossings and made appropriate application to the ICC seeking crossing **[*4]** authority, the ICC granted authority for Gateway to cross TRRA's Eads Main Line at grade level and required Gateway to pay TRRA compensation for the crossing. TRRA and Gateway were unable to agree on the appropriate compensation to be paid by Gateway to TRRA for each Gateway train that crosses TRRA's track. TRRA took the position that the compensation issue should be resolved before Gateway began running trains over the crossing. When the track and signals were completed in May 1995, Gateway initiated this action by seeking a temporary restraining order allowing Gateway to cross while the compensation issue remained unresolved. This Court granted the order. The parties subsequently agreed on the terms of an operating agreement and this Court entered an agreed injunction incorporating that agreement. TRRA filed a proceeding before the STB to resolve the amount of the compensation. Gateway objected and asked that the matter be stayed. There has been no decision by the STB, and Gateway has been utilizing the Q connection and crossing the Eads Main Line since May 1995 without paying any compensation to TRRA.

III. Summary Judgment Standard

HN1[] Summary judgment is appropriate and **[*5]** should be granted where there exists no genuine issue of material fact. A motion for partial summary judgment should be granted on an issue as to which there is no material factual dispute, even if there exists a substantial controversy with respect to other issues. ***Celotex Corp. v.***

Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986); ***Unterreiner v. Volkswagen of Am., Inc., 8 F.3d 1206, 1209 (7th Cir. 1993)***. The existence of a factual dispute, standing alone, is not sufficient to bar summary judgment. ***Posey v. Skyline Corp., 702 F.2d 102, 105*** **(7th Cir.), cert. denied, *464 U.S. 960, 78 L. Ed. 2d 336, 104 S. Ct. 392 (1983)*.** A factual dispute will not preclude summary judgment unless the disputed fact is outcome determinative under the governing law. ***Egger v. Phillips, 710 F.2d 292, 296*** **(7th Cir.), cert. denied, *464 U.S. 918, 78 L. Ed. 2d 262, 104 S. Ct. 284 (1983)*.** There are no disputed, outcome determinative facts with respect to Counts II, III, IV, V, VI and VII of Plaintiff's Second Amended Complaint.

IV. Analysis

TRRA's opposition to Gateway's crossing plan in this Court and before the ICC was not "wrongful" conduct and, **[*6]** thus, cannot be the basis for any damage allegedly resulting from a delay in the construction from 1991 until the ICC ruling authorizing the crossing on November 28, 1994, Accordingly, Counts II through VII should be dismissed.

The *Noerr-Pennington* doctrine protects TRRA from liability under Sections 1 and 2 of the Sherman Act and from Gateway's contract claim. ***HN2***[] The immunity provided by the *Noerr-Pennington* doctrine certainly extends to opposition to competitors' petitions at administrative agencies. **See *Envirosource, Inc. v. Horsehead Resource Development Company, 1996 U.S. Dist. LEXIS 9099, 1996-1 Trade Cas. (CCH) P71,492 (S.D.N.Y. 1996)*; *State ex rel. Hartigan v. Panhandle Eastern Pipe Line Company, 730 F. Supp. 826, 937-39 (C.D. Ill. 1990)*, aff'd, *935 F.2d 1469 (7th Cir. 1991)*.** Further, as the Supreme Court held in the *Pennington* case itself, Gateway cannot collect any damages from TRRA under the Sherman Act for any injury it suffered as a result of the injunctive relief and Order of Referral issued by this Court and the ICC's "delay" in granting Gateway authority to construct and use the Q Connection Project. ***United Mine Workers v. Pennington, 381 U.S. 657, 671, 14 L. Ed. 2d 626, 85 S. Ct. 1585*, [*7] (1965).** Moreover, ***HN3***[] Illinois courts have extended the protections of the *Noerr-Pennington* doctrine to insulate parties from claims alleging intentional interference with a contract right or other economic expectation. Rather than limit the application of the doctrine to antitrust claims, the courts view the *First Amendment* right to petition the government for redress to be superior to contract rights as well. ***Village of Lake Barrington v. Hogan, 272 Ill. App. 3d 225, 649 N.E.2d 1366, 208 Ill. Dec. 705 (Ill. App. 1995)*, cert. denied, *516 U.S. 1172, 116 S. Ct. 1263, 134 L. Ed. 2d 211 (1996)*.** Accordingly, Gateway cannot prevail in its claim and summary judgment should be entered for TRRA on Count II, III, IV, V, VI and VII of Plaintiff's Amended Complaint.

Additionally, Gateway has no claim based on contractual rights allegedly arising from an 1885 agreement between the Ohio & Mississippi Railway Company and the St. Louis Bridge Company which memorialized a verbal agreement between those parties entered into in June 1881. There is nothing in the 1885 agreement which prohibits TRRA from opposing the ICC petitions filed by Gateway. Thus, the 1885 agreement **[*8]** is not relevant to this dispute and TRRA is entitled to summary judgment on Counts III and IV.

Finally, Gateway has no claim based on property rights it alleges it obtained as a result of its acquisition of property from CSXT in November 1991. This Court has already held in an Order of Referral in *Terminal Railroad Association of St. Louis v. Gateway Western Railway Company,* No. 92-CV-0210-WLB, that the question of whether Gateway had to obtain § 10901(d) authority to cross the Eads Main Line was within the primary jurisdiction of the ICC. The ICC held, in September 1992, that Gateway had to obtain both construction and crossing authority from the ICC before constructing and operating the Q connection. These two decisions establish that Gateway did not have any "property rights" which precluded TRRA from objecting to the construction of the Q Connection Project and the crossing of its Eads Main Line. Summary judgment is appropriate on Counts II and V.

V. Conclusion

Accordingly, the Court **GRANTS** Defendant's motion for partial summary judgment (Doc. 151).

IT IS SO ORDERED.

DATED this 5th day of February, 1998.

PAUL E. RILEY

United States District **[*9]** Judge

ORDER

RILEY, District Judge:

Plaintiff Gateway's motion for summary judgment on liability for Counts II, III and IV of the Second Amended Complaint is hereby **DENIED.**

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN1[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss for failure to state a claim, the court should not dismiss the complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > General Overview

HN2[] **Motions to Dismiss, Failure to State Claim**

The United States Court of Appeals for the Second Circuit has stated that in deciding a *Fed. R. Civ. P. 12(b)(6)* motion, a court may consider only the facts alleged in the pleadings, documents attached as exhibits or incorporated by reference in the pleadings and matters of which judicial notice may be taken.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

In ruling on a *Fed. R. Civ. P. 12(b)(6)* motion, it is not the court's function to weigh the evidence that might be presented at a trial; the court must merely determine whether the complaint itself is legally sufficient, and in doing so, the court must accept the allegations of the complaint as true, and construe all reasonable inferences in favor of the plaintiff.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN4[] **Complaints, Requirements for Complaint**

Under the modern rules of pleading, a plaintiff need only provide a short and plain statement of the claim showing that the pleader is entitled to relief, *Fed. R. Civ. P. 8(a)(2)*, and all pleadings shall be so construed as to do substantial justice, *Fed. R. Civ. P. 8(f)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Motions to Dismiss, Failure to State Claim**

Recovery may appear remote and unlikely on the face of a pleading, but that is not the test for dismissal under *Fed. R. Civ. P. 12(b)(6)*.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN6[] **Antitrust & Trade Law, Sherman Act**

In antitrust cases it must appear on the face of the complaint that the plaintiff could prove no set of facts to sustain a recovery. The complaint need only allege sufficient facts to state the elements of injury from an act prohibited by the antitrust laws. On the other hand, for the court to grant a *Fed. R. Civ. P. 12(b)(6)* motion, a defendant in an antitrust case must meet a more stringent standard because the proof is often in the hands of the alleged conspirators, and the plaintiff may need an opportunity to discover the facts necessary to withstand the motion.

Antitrust & Trade Law > Sherman Act > General Overview

International Trade Law > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

HN7[] **Antitrust & Trade Law, Sherman Act**

To state a claim under *§ 1* of the Sherman Act, a plaintiff must allege: (1) concerted action, (2) by two or more persons that (3) unreasonably restrains trade. The complaint must identify the co-conspirators, and describe the nature and effects of the alleged conspiracy. To measure the sufficiency of the plaintiffs' claim, the court must determine whether the complaint contains either direct or inferential allegations respecting all the material elements necessary to sustain a recovery under some viable legal theory.

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

Concerted action need not be proved directly, but can be based upon circumstantial evidence; for example, from inferences drawn from the words and conduct of the parties to the agreement and from their course of dealing.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Regulated Industries, Higher Education & Professional Associations**

The Sherman Act does not require competitive bidding; it prohibits unreasonable restraints on competition.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

A corollary of a firm's right to select with whom it will deal is that, if it determines to solicit bids or proposals, it can select from whom it wishes to receive proposals.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Sherman Act, Claims**

A departure from competitive bidding does not in itself constitute or prove a violation of the Sherman Act, and cannot be helpful to plaintiff unless he can rationally relate it to other conduct by the alleged conspirators.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Regulated Practices, Price Fixing & Restraints of Trade**

In order to survive a motion to dismiss, a claim under §§ 1 and 2 of the Sherman Act must allege a relevant geographic and product market in which trade was unreasonably restrained or monopolized. A complaint must allege a relevant product market in which the anticompetitive effects of the challenged activity can be assessed. A relevant product market includes all products reasonably interchangeable, determination of which requires consideration of cross-elasticity of demand.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

The United States Court of Appeals for the Second Circuit has not made a showing of market power a prerequisite for recovery in all § 1 of the Sherman Act cases. If a plaintiff can show an actual adverse effect on competition, such as reduced output, we do not require a further showing of market power. To prevail on a § 1 claim, plaintiffs must demonstrate an adverse effect in competition among different sellers of the same product (intrabrand competition). Then, because the focus of our inquiry is the relevant market as a whole, restriction of intrabrand competition must be balanced against any increases in interbrand competition. The overarching standard is whether defendants' actions diminish overall competition, and hence consumer welfare.

Opinion

[*135] ***MEMORANDUM OF DECISION AND ORDER***

SPATT, District Judge.

This putative class action seeks redress for alleged violations of the federal and state antitrust laws arising from the defendants' alleged unlawful and conspiratorial bid-rigging, price fixing, and termination and exclusion of all orthotic and prosthetic ("O&P") providers within the five boroughs of New York City and the surrounding six Counties of Nassau, Suffolk, Westchester, Rockland, Orange and Putnam, by the defendants Health Insurance Plan of Greater New York, Inc. ("HIP"), Advanced Orthopedic Technologies, Inc. ("Advanced"), Arimed Orthotics, Prosthetics and Pedorthics, Inc. ("Arimed"), and five individual officers and executives of the corporate defendants, beginning on or about July 31, 1995, and continuing to date. Presently before the Court is the defendants' motion to dismiss the plaintiffs' First Amended Complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*, for failure to state a claim upon which relief can be granted.

I. BACKGROUND

A. *Factual background*

This lawsuit arises from a decision made by HIP, a health management organization **[**3]** ("HMO"), to enter into certain exclusive contracts for O&P service with Advanced and Arimed, which became effective on August 1, 1995 and February 13, 1997. Orthotics is the design, fabrication, fitting, and supervised use of custom-made braces and other devices that provide external support to treat musculoskeletal disorders. Prosthetics is the design, fabrication, and fitting of custom-made artificial limbs for patients who have lost limbs as a result of traumatic injuries, diabetes, cancer, mastectomy, vascular disease, or congenital disorders. The facts set forth below are taken from the First Amended Complaint.

Effective August 1, 1995, Advanced and Arimed are alleged to be "preferred providers" in regard to O&P services provided to HIP's customers in the Counties of Queens, Nassau, Suffolk, Brooklyn, and Staten Island (collectively, the "Five County Region" or the "Lower County Region"), notwithstanding that these providers, combined, allegedly had at most six outlets in these counties. As a result of these contracts, the former O&P providers, including the plaintiffs, no longer will be the recipient of HIP's business in the Lower County Region. Simultaneously, each and every **[**4]** O&P provider who had previously attempted to become a HIP provider was forever foreclosed from becoming a member in the HIP network comprising of the Lower County Region.

HIP allegedly did not notify any of the O&P providers of their termination or, upon information and belief, the affected enrollees. However, apparently some time later, HIP provided the following memorandum, which it delivered to each terminated provider who inquired as to its termination:

> The Health Insurance Plan of Greater New York (HIP) has recently entered into agreements with Advanced Orthopedic Technology and Arimed whereby these two vendors will be preferred providers of O&P services for HIP members in the Queens-Long Island/Brooklyn and Staten Island Regions.
>
> Any cases which have already been referred to your company will continue to be monitored by the HIP Alternate Care Utilization Management Department. However, any new cases as of August 1, 1995 will be referred to one of the preferred providers. If you have any questions or issues with regard to the above change[,] please feel free to contact the HIP Alternate **[*136]** Care Utilization Management Department at (212) 630-8203.
>
> HIP would like **[**5]** to thank you for your past service to HIP Members and appreciates your anticipated cooperation with this transition.

First Amended Complaint ("Am. Compl.") P 78.

The plaintiffs allege that their termination and exclusion occurred despite their background, experience, training, competence, adherence to the ethics of the profession, good reputation, and the ability to work with others. All plaintiffs were Board-certified pursuant to the American O&P Association. ("AOPA") and the New York State O&P Association ("NYOPA"). Nevertheless, only one entity among the plaintiffs was allegedly afforded an opportunity to submit bids to HIP prior to their termination.

On or about February 13, 1997, HIP disclosed that it had "extended" exclusive contracts to Advanced and Arimed to provide O&P services for "all HIP New York members" in the Counties of New York (i.e., Manhattan), Bronx, Westchester, Orange, Rockland, and Putnam (collectively, the "Upper County Region"). These territories were conferred to Advanced and Arimed even though in most counties comprising the Lower and Upper County Regions, Advanced and Arimed allegedly had only one or two sites, and in some counties, had no O&P **[**6]** sites at all to service HIP's customers. As a result of these contracts, the former O&P providers, including the plaintiffs, would no longer be the recipient of HIP's business in the Upper County Region. Simultaneously, each and every O&P provider who had previously attempted to become a HIP provider was forever foreclosed from becoming a member in the HIP network in the Upper County Region.

The plaintiffs allege that, once again, HIP did not timely notify any of the affected O&P providers of their termination or, upon information and belief, the affected enrollees. Rather, HIP prepared a memorandum dated February 13, 1997, which mirrored the language of the July 31, 1995 termination letter, stating that HIP had "recently extended" its "agreements" with Advanced and Arimed "whereby these two vendors will be preferred providers of orthotic and prosthetic services for all HIP New York Members." Am. Compl. P 84. In a later memorandum dated March 15, 1997, which upon information and belief, was provided only to HIP personnel on a distribution list, HIP detailed the partitioning of the Upper County Region among Advanced and Arimed. Upon information and belief, HIP gave no explanation to **[**7]** its personnel for the sudden "extension" of coverage of the Upper County Region to Advanced and Arimed.

The plaintiffs allege that their termination and exclusion occurred despite their background, experience, training, competence, adherence to the ethics of the profession, good reputation, and the ability to work with others. All plaintiffs were Board-certified pursuant to the AOPA and NYOPA. Nevertheless, none of the plaintiffs were allegedly afforded an opportunity to submit bids to HIP prior to their termination.

The plaintiffs allege that "HIP, Advanced and Arimed agreed to carry out a plan whereby HIP would sharply cut its own costs by virtually eliminating the supply of O&P services to HIP enrollees, which services HIP had contracted to provide for its patients." Am. Compl. P 49. The defendants allegedly

> combined, conspired and agreed to (1) terminate all HIP's O&P providers, except Advanced and Arimed ("A&A"); (2) channel all HIP's O&P patients to A&A; (3) artificially restrict the supply of O&P services to HIP's

> patients; (4) fix the prices A&A would charge for providing O&P services; and (5) rig the bidding process for HIP's O&P providers so that A&A would be the **[**8]** only ones chosen as HIP's preferred O&P providers.

Am. Compl. P 68.

The First Amended Complaint sets forth four antitrust claims, two based on federal law and the remaining based on state law. The first and second claims allege structural and tacit conspiracies, respectively, in violation of *section 1* of the Sherman Antitrust Act, *15 U.S.C. § 1*. The third and fourth claims allege companion antitrust conspiracy **[*137]** claims based on the New York State Donnelly Act, *N.Y. Gen. Bus. Law § 340, et. seq.*

B. *Procedural history*

The plaintiffs' original complaint alleged structural and tacit conspiracies and monopolization pursuant to federal and state law. By a Memorandum Decision and Order dated February 26, 1997, the Court dismissed with prejudice all claims of monopoly and dismissed the complaint without prejudice, as to the plaintiffs United Orthopaedic Appliances, Inc., Stahl Surgical Supply, Inc., Archfame, Inc., J.C. Orthopedics Co., Inc., and James Case Enterprises, Inc., based on lack of standing. *Continental Orthopedic Appliances, Inc. v. Health Insurance Plan of Greater New York, Inc., 956 F. Supp. 367 (E.D.N.Y. 1997)* (the "Order" or "*Continental*"). In **[**9]** addition, the Court dismissed without prejudice, the federal and state law conspiracy claims, finding the conspiracy allegations insufficient to state a claim. The Court held that the plaintiffs had successfully pleaded all elements of a *section 1* violation of the Sherman Antitrust Act, *15 U.S.C. § 1*, except the allegations of a conspiracy. The Court stated that the complaint asserted

> only conclusory allegations of a conspiracy. In fact, the only factual bases for the "conspiracy" are the agreements by HIP to terminate the plaintiffs as O&P providers and, instead, replace them with the defendants Advanced and Arimed. There are no facts set forth in support of a claim of a conspiracy in restraint of trade other than the replacement of the plaintiffs and the exclusive provider contracts with the two defendants.

Continental, 956 F. Supp. at 373. The Court observed that if it

> were to rule that these facts alone could state a valid *Section 1* antitrust conspiracy cause of action, then every such exclusive contract under similar facts could be the basis for a *Section 1* conspiracy antitrust action. That the plaintiffs' complaint alleges a conspiracy based only **[**10]** on the facts that the defendant HIP terminated the plaintiff and chose two other preferred providers, is clear from a reading of the complaint.

Id. at 373-74. Rather than dismissing the plaintiffs' claims with prejudice, the Court granted the plaintiffs an opportunity to replead their claims but cautioned against squandering this opportunity by making "perfunctory or cosmetic changes." *Id. at 374*. The Court denied the defendants' motion to dismiss in all other respects.

The plaintiffs filed their First Amended Complaint on April 25, 1997, adding five individual defendants who are executives of HIP, Advanced, and Arimed, and asserting allegations of their exclusion from the HIP network encompassing the Upper County Region.

II. DISCUSSION

A. *Fed. R. Civ. P. 12 (b) (6) standard*

HN1[] On a motion to dismiss for failure to state a claim, "the court should not dismiss the complaint pursuant to *Rule 12(b)(6)* unless it appears 'beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.'" *Goldman v. Belden, 754 F.2d 1059, 1065 (2d Cir. 1985)* (quoting *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d **[**11]** 80, 78 S. Ct. 99 (1957))*; *see also IUE AFL-CIO Pension Fund v. Herrmann, 9 F.3d 1049, 1052-53 (2d Cir. 1993)*, *cert. denied*, *513 U.S. 822, 115 S. Ct. 86, 130 L. Ed. 2d 38 (1994)*. **HN2**[] The Second Circuit stated that in deciding a *Rule 12(b)(6)* motion, a court may consider "only the facts alleged in the pleadings, documents attached as exhibits or incorporated by reference in the pleadings and matters of which judicial notice may be taken." *Samuels v. Air Transport Local 504, 992 F.2d 12, 15 (2d Cir. 1993)*; *see also*

International Audiotext Network, Inc. v. AT&T, 62 F.3d 69, 72 (2d Cir. 1995); *Paulemon v. Tobin, 30 F.3d 307, 308-09 (2d Cir. 1994)*; *Rent Stabilization Ass'n of the City of New York v. Dinkins, 5 F.3d 591, 593-94 (2d Cir. 1993)* (citing *Samuels, 992 F.2d at 15*).

HN3[] It is not the Court's function to weigh the evidence that might be presented at a trial; the Court must merely determine whether the complaint itself is legally sufficient, *see* *Goldman, 754 F.2d at 1067*, and in doing so, **[*138]** it is well settled that the Court must accept the allegations of the complaint as true, *see* *Leeds v. Meltz, 85 F.3d 51 (2d Cir. 1996)*; *LaBounty v. Adler, 933 F.2d* ***[**12]*** *121, 123 (2d Cir. 1991)*; *Procter & Gamble Co. v. Big Apple Indus. Bldgs., Inc., 879 F.2d 10, 14 (2d Cir. 1989)*, *cert. denied*, *493 U.S. 1022, 110 S. Ct. 723, 107 L. Ed. 2d 743 (1990)*, and construe all reasonable inferences in favor of the plaintiff. *See* *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974)*; *Leeds, supra, 85 F.3d at 51*; *Bankers Trust Co. v. Rhoades, 859 F.2d 1096, 1099 (2d Cir. 1988)*, *cert. denied*, *490 U.S. 1007, 109 S. Ct. 1642, 104 L. Ed. 2d 158 (1989)*.

HN4[] The Court is mindful that under the modern rules of pleading, a plaintiff need only provide "a short and plain statement of the claim showing that the pleader is entitled to relief", *Fed. R. Civ. P. 8(a)(2)*, and that "all pleadings. shall be so construed as to do substantial justice," *Fed. R. Civ. P. 8(f)*.

The issue before the Court on a *Rule 12(b)(6)* motion "is not whether a plaintiff will ultimately prevail, but whether the claimant is entitled to offer evidence to support the claim." *Villager Pond, Inc. v. Town of Darien, 56 F.3d 375, 378 (2d Cir. 1995)*, *cert. denied*, *U.S. , 117 S. Ct. 50, 136 L. Ed. 2d 14 (1996)* (citing *Scheuer, 416 U.S.* ***[**13]*** *at 235-36*). ***HN5***[] Recovery may appear remote and unlikely on the face of the pleading, but that is not the test for dismissal under *Rule 12(b)(6)*. *Gant v. Wallingford Bd. of Educ., 69 F.3d 669, 673 (2d Cir. 1995)* (citing *Scheuer, 416 U.S. at 236*).

HN6[] In addition, in antitrust cases, it must appear on the face of the complaint that the plaintiff could prove no set of facts to sustain a recovery. *Ware v. Associated Milk Producers, Inc., 614 F.2d 413 (5th Cir. 1980)*. The complaint need only allege sufficient facts to state the elements of injury from an act prohibited by the antitrust laws. *Newman v. Universal Pictures, 813 F.2d 1519 (9th Cir. 1987)*, *cert. denied*, *486 U.S. 1059, 108 S. Ct. 2831, 100 L. Ed. 2d 931 (1988)*. On the other hand, for the court to grant this kind of motion, a defendant in an antitrust case must meet a more stringent standard because the proof is often in the hands of the alleged conspirators, and the plaintiff may need an opportunity to discover the facts necessary to withstand the motion. *HRM, Inc. v. Tele-Communications, Inc., 653 F. Supp. 645 (D. Colo. 1987)*; *Hughes Auto v. Mid-Atlantic Toyota Dist., Inc., 543 F. Supp. 1056 (D. Md. 1982)*. **[**14]**

It is within this framework that the Court addresses the present motions to dismiss.

B. *The defendants' motions*

1. *Allegations of a conspiracy*

HN7[] To state a claim under *section 1* of the Sherman Act, a plaintiff must allege: (1) concerted action, (2) by two or more persons that (3) unreasonably restrains trade. *See* *Discon, Inc. v. NYNEX Corp., 93 F.3d 1055, 1059 (2d Cir. 1996)*, *cert. denied*, *U.S. , 139 L. Ed. 2d 14, 118 S. Ct. 49 (1997)*; *Brenner v. World Boxing Council, 675 F.2d 445, 451* (2d Cir.), *cert. denied*, *459 U.S. 835, 103 S. Ct. 79, 74 L. Ed. 2d 76 (1982)*; *In re NASDAQ Market-Makers Antitrust Litigation, 894 F. Supp. 703, 710 (S.D.N.Y. 1995)*. The complaint "must identify the co-conspirators, and describe the nature and effects of the alleged conspiracy." *International Television Products, Ltd. v. Twentieth Century Fox Television Division, 622 F. Supp. 1532, 1537 (S.D.N.Y. 1985)*. To measure the sufficiency of the plaintiffs' claim, the Court must determine whether the complaint "contains either direct or inferential allegations respecting all the material elements necessary to sustain a recovery under some viable legal theory." **[**15]** *Fort Wayne Telsat v. ESPN, 753 F. Supp. 109, 111 (S.D.N.Y. 1990)* (citation omitted); *see also* *Brenner, 675 F.2d at 451* ***HN8***[] ("Concerted action need not be proved directly, but can be based upon circumstantial evidence; for example, from inferences drawn from the words and conduct of the parties to the agreement and from their course of dealing").

In its prior opinion, the Court recognized that "a health maintenance organization has the right to determine the companies it chooses to recommend to its customers, if it does not do so as a result of an illegal conspiracy to restrain trade. Generally, an HMO 'has the right to recommend or refuse to recommend whatever company it likes, so **[*139]** long as it does so independently.'" *Continental, 956 F. Supp. at 373* (quoting *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984))*; *see also* *Fuchs Sugars & Syrups, Inc. v. Amstar Corp., 602 F.2d 1025, 1030* (2d Cir.) (a manufacturer "is free to choose the type of mechanism through which he will distribute his goods and can designate certain sales representatives as his exclusive agents"), *cert. denied*, *444 U.S. 917, 100 S. Ct. 232, 62 L. Ed.* ***[**16]*** *2d 172 (1979)*. Using the Court's previous opinion as ammunition, the defendants maintain that, once again, the plaintiffs have failed to allege the existence of an agreement. Although the plaintiffs allege that the exclusive provider arrangements were the product of a "conspiracy," the defendants contend that the plaintiffs continue to rely on the same conclusory allegations the Court previously found lacking. According to the defendants, rather than pleading facts, the plaintiffs rely on antitrust jargon to mischaracterize lawful conduct. The Court disagrees.

Although the plaintiffs do not plead facts which would provide direct evidence of a conspiracy, the Court finds that such allegations, if true, provide the requisite circumstantial evidence. The plaintiffs have alleged facts which, if true, would provide circumstantial evidence that the defendants adhered to an agreement that was designed to achieve an unlawful objective, namely, to insulate Advanced and Arimed from increased competition, to artificially restrict the supply of O&P services to HIP's patients, and to fix the prices Advanced and Arimed would charge for providing O&P services. The plaintiffs allege that HIP failed **[**17]** to follow its own internal procedures with regard to accepting bids from O&P providers and that Advanced and Arimed's qualifications were deficient. The plaintiffs also allege that the defendants violated every one of HIP's internal standards for O&P providers in the bidding, selection and administration processes of the Lower and Upper County Region contracts. *See* Am. Compl. PP 69-73. For example, the plaintiffs allege that "HIP did not engage in *any* pre-qualification of O&P providers to determine if they were suitable to participate in the bidding process," *see* Am. Compl. P 73(b) (emphasis in original), which evaluation was allegedly required by HIP's internal Bid Standards, *see id. P 71*.

On the other hand, the defendants assert that these allegations are insufficient, both factually and legally. The defendants maintain that the antitrust laws do not require that HIP select its O&P providers through a process of competitive bidding. *See* *National Society of Professional Engineers v. U.S., 435 U.S. 679, 694-95, 98 S. Ct. 1355, 1367, 55 L. Ed. 2d 637 (1978)* ***HN9***[] ("The Sherman Act does not require competitive bidding; it prohibits unreasonable restraints on competition."). **[**18]** They contend that it was HIP's exclusive prerogative to select the O&P providers with whom it would deal. *See* *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*. ***HN10***[] A corollary of a firm's right to select with whom it will deal is that, if it determines to solicit bids or proposals, it can select from whom it wishes to receive proposals. *See e.g.,* *Brown v. Western Massachusetts Theatres, Inc., 288 F.2d 302, 304 (1st Cir. 1961)* ***HN11***[] (". . . a departure from competitive bidding does not in itself constitute or prove a violation, and cannot be helpful to the plaintiff unless he can rationally relate it to other conduct by the alleged conspirators."); *Seago v. North Carolina Theatres, Inc., 42 F.R.D. 627, 635 (E.D.N.C. 1966)* ("Plaintiff has inserted the idea that the lack of competitive bidding at all times is in fact evidence of a conspiracy. This Court disagrees."), *aff'd*, *388 F.2d 987 (4th Cir. 1967)*, *cert. denied*, *390 U.S. 959, 88 S. Ct. 1039, 19 L. Ed. 2d 1153 (1968)*.

The Court finds that while HIP had no obligation to choose an O&P provider by means of competitive bidding, once HIP affirmatively and voluntarily decided to undertake such **[**19]** a procedure, allegations that the defendants subverted the competitive machinery so that Advanced and Arimed would be awarded the O&P contract as exclusive providers may provide circumstantial evidence of a conspiracy. Ignorance of its own internal written standards may provide an inference that HIP's rejection of the plaintiffs' request to submit bids in favor of Advanced and Arimed, was in furtherance of the **[*140]** defendants' alleged illegal scheme. *See* *Capital Imaging Associates, P.C. v. Mohawk Valley Medical Associates, Inc., 996 F.2d 537, 545* (2d Cir.) ("Ignoring its own written standards in the case of [the plaintiff's] application for membership [in the defendant's association of member radiologists] strongly suggests the objection to that application based on appellant's geographic location may have been a sham."), *cert. denied*, *510 U.S. 947, 114 S. Ct. 388, 126 L. Ed. 2d 337 (1993)*.

The plaintiffs also allege irregularities in the identification of prospective bidders, namely, that HIP "excluded qualified O&P providers" and sent bid requests to only three out of "335 eligible candidates" in the Lower County Region. Am. Compl. PP 9, 73(a). Arimed and Advanced were allegedly **[**20]** selected exclusively even though they had a limited number of outlets and purportedly did not adequately service the region. Am. Compl. P 73 (g)-(k), (m). The plaintiffs further allege that "HIP itself tacitly, if not outwardly, conceded in a September 21, 1995 letter to New York State Senator Guy J. Velella that Advanced and Arimed would not be able to service all its HIP members." Am. Compl. P 73(g) (emphasis in original). The defendants allegedly conspired to restrict output and fix prices. These allegations of discrepancies between HIP's standard and practice and the allegations as to the restrictions on output and the fixing of prices, if true, may provide circumstantial evidence in support of the plaintiffs' theory of a conspiracy.

In sum, viewing the totality of the plaintiffs' allegations, accepting these allegations as true, construing all inferences in favor of the plaintiffs, and bearing in mind the very stringent burden on a moving defendant in an antitrust case, the Court finds that the plaintiffs have alleged a conspiracy cause of action under *section 1* of the Sherman Act. Therefore, the defendants' motion to dismiss the complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*, **[**21]** for failure to sufficiently state a claim of conspiracy under *section 1* of the Sherman Act, is denied.

2. *Market definition*

Initially, the Court notes that the defendants previously moved to dismiss the complaint based on the grounds that the plaintiffs had failed to allege a relevant product market. In its previous opinion, the Court had summarily deemed the defendants' contention to be without merit. Once again, the defendants move to dismiss the complaint for failure to allege a relevant product market. The Court will now reconsider this issue.

HN12[] "In order to survive a motion to dismiss, a claim under *Sections 1* and *2* of the Sherman Act must allege a relevant geographic and product market in which trade was unreasonably restrained or monopolized." *Global Discount Travel Services, LLC v. Trans World Airlines, Inc., 960 F. Supp. 701, 704 (S.D.N.Y. 1997)* (citations omitted). A complaint must allege a relevant product market in which the anticompetitive effects of the challenged activity can be assessed. *See* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*. A relevant product market includes all products reasonably interchangeable, **[**22]** determination of which requires consideration of cross-elasticity of demand. *See* *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

In the present case, the plaintiffs define the relevant product market as "O&P health care services to all HIP's enrollees." Am. Compl. P 88. The relevant geographic market is defined as the Upper and Lower County Regions. *See id.* The defendants contend that a product market defined by a single firm's product - in this case, O&P referrals to HIP's enrollees - fails as a matter of law and therefore, that the plaintiffs' claims should be dismissed for failure to define a necessary element of their antitrust claim. Memorandum of Law of Defendants Health Insurance Plan of Greater New York, Watson and Neek in Support of Their Motion to Dismiss the Amended Complaint at 15-17.

Although the plaintiffs cite to *Capital Imaging* in support of their assertion that a single firm's product can constitute a relevant product market, a closer examination of the case reveals otherwise. In *Capital Imaging, 996 F.2d at 547*, the plaintiff defined the relevant geographic market as a "100-mile radius of Albany, **[**23]** New York," and it **[*141]** defined the relevant product market as "radiological services." The Second Circuit considered the market to be comprised of either (i) all HMO subscribers; or (ii) all insured patients. *Id.* Hence, the Second Circuit did not accept a market definition, such as the one the plaintiffs propose here, limited to the enrollees of a single defendant HMO.

In addition, the Court finds that the other cases cited by the plaintiffs do not support their contention. The plaintiffs cite *Key Enterprises of Delaware, Inc. v. Venice Hospital, 919 F.2d 1550 (11th Cir. 1990)*, *Advanced Health-Care Services, Inc. v. Radford Community Hospital, 910 F.2d 139 (4th Cir. 1990)*, and *M&M Medical Supplies and Service, Inc. v. Pleasant Valley Hospital, Inc., 981 F.2d 160* (4th Cir.), *cert. denied*, *508 U.S. 972, 113 S. Ct. 2962, 125 L. Ed. 2d 662 (1993)*, for the proposition that the relevant product market in those cases consisted of durable medical equipment referrals stemming from a single hospital. First, the Court notes that *Key Enterprises*, was vacated en banc by the Eleventh Circuit. *See* Key Enterprises, 979 F.2d 806 (11th Cir. 1990). Then the case became moot when **[**24]** the parties settled. *See* Key Enterprises, 9 F.3d 893 (11th Cir. 1993). Second, upon review of the other two cases, the Court finds that each case demonstrates that a single hospital could be found to have market or monopoly power in its market and therefore, foreclosure of the plaintiff from the portion of the durable medical equipment market represented by referrals from that single hospital constituted a substantial foreclosure from the market of all durable medical equipment purchasers. In the present case, although the plaintiffs allege that HIP represents 20% of the HMO market, Am. Compl. P 6, they also allege that HIP's enrollment has "plummeted by more than 30,000 from 1994 to 1995," id. P 57, and that HIP's enrollees constitute 25% of the population of New York State, id. P 60. However, the plaintiffs do not allege what percentage of the O&P market HIP possesses. Without this latter information, the Court is unable to assess whether the present case would be comparable to *Advanced Health-Care Services* and *M&M Medical Supplies*. It may be possible that although HIP represents only 20% of the HMO market, it represents a larger percentage of those using the **[**25]** services of O&P providers to warrant a factual similarity to *Advanced Health-Care Services* and *M&M Medical Supplies*. At this point in the litigation, the Court is unable to make this determination. However, one point is clear. The plaintiffs' alleged product market consisting of O&P health care services to all HIP's enrollees is not an economically viable product market.

However, our inquiry does not end here. ***HN13***[] The Second Circuit "has not made a showing of market power a prerequisite for recovery in all § 1 cases. If a plaintiff can show an actual adverse effect on competition, such as reduced output, we do not require a further showing of market power." K.M.B. Warehouse Distributors, Inc. v. Walker Manufacturing Co., 61 F.3d 123, 129 (2d Cir. 1995) (citations omitted). "To prevail on a § 1 claim, [the] plaintiff[s] must demonstrate an adverse effect in competition among different sellers of the same product ("intrabrand" competition), ..." K.M.B. Warehouse Distributors, 61 F.3d at 127. Then, "because the focus of our inquiry is the relevant market as a whole, restriction of intrabrand competition must be balanced against any increases in interbrand competition." **[**26]** Id. at 128. "The overarching standard is whether defendants' actions 'diminish overall competition, and hence consumer welfare.'" *Id.*

In its prior decision, the Court held that the plaintiffs had adequately pled harmful effect on competition. Continental, 956 F. Supp. at 371-72. The plaintiffs must demonstrate an adverse effect in competition among different O&P providers for HIP enrollees. Since the restriction of intrabrand competition must be balanced against the effects on interbrand competition, the relevant product market cannot consist of merely HIP's O&P referrals. To this extent, the Court finds that the plaintiffs' definition of a relevant product market consisting of only O&P health care services to all HIP's enrollees, does not properly define a relevant product market.

The Court notes that in opposition to the defendants' previous motions to dismiss, the **[*142]** plaintiffs requested an opportunity to replead the complaint should the defendants' motion be granted. If the Court had then granted the defendants' motions to dismiss with regard to the allegations of a relevant product market, the plaintiffs would have had an opportunity to replead those allegations. Since **[**27]** the Court granted, in effect, a reconsideration of the issue of whether the plaintiffs have adequately pleaded a relevant product market, the Court finds that fairness demands that the plaintiffs be afforded an opportunity to replead these allegations.

3. *Individual defendants*

HN14[] Individual officers of corporations may be held liable under section 1 of the Sherman Act for conspiracies or combinations in restraint of trade where those conspiracies or combinations are with persons other than the corporations for whom they serve as officers. *See* Eye Encounter, Inc. v. Contour Art, Ltd., 81 F.R.D. 683, 689 (E.D.N.Y. 1982). In State of New York v. Cedar Park Concrete Corp., 665 F. Supp. 238, 247-48 (S.D.N.Y. 1987), Judge Sand held that the complaint adequately pled antitrust conspiracy against individuals by alleging conspiracy on part of their corporations, including corporations of which they were not officers, to rig bids on public construction projects and alleging that the individual defendants dominated and controlled the corporations as officers, directors, and principal stockholders, and alleging specific overt acts of some defendants.

Like *Cedar Park Concrete*, none **[**28]** of the individual defendants charged as co-conspirators in the present case are minor employees; Andrew H. Meyers was President and Chief Executive Officer of Advanced, Matthew and Steven Mironis were high Executive Officers and/or owners of Arimed, Bernard Neek was Chairman of HIP Hospitals, Anthony L. Watson was President and Chief Financial Officer of HIP. The First Amended Complaint pleads generally, and in some circumstances, specific facts, that the individual defendants held meetings at various times at which they agreed to rig bids, communicated with each other to carry out their illegal scheme, authorized and participated in the conspiracy, and allegedly communicated false information to the media. *See* Am. Compl. PP 54-56, 75. Under these circumstances and in light of the legal principles which govern the liability of conspirators, the case against the individual defendants is sufficiently pled and the Court declines to dismiss the complaint against the individual defendants. *See* *Cedar Park Concrete, 665 F. Supp. at 248*.

5. *Novacare*

The First Amended Complaint names Novacare Prosthetic and Orthotics, Inc. ("Novacare") as a defendant based upon the sole allegation, **[**29]** made upon information and belief that on or about December 1996, it purchased all the assets of Advanced. Novacare maintains that under settled rules of corporate and ***antitrust law***, ownership alone does not afford a basis for holding a parent corporation liable for the actions of its subsidiary.

For the first time, the plaintiffs allege in paragraph 34 of the First Amended Complaint that "on or about November 1996, defendant Novacare purchased all of the shares of Advanced." This is the only allegation in the First Amended Complaint with regard to Novacare. In order to assert liability against Novacare, the plaintiffs maintain that "Novacare acquired all or substantially all of the assets of Advanced by way of merger, making Advanced its wholly-owned subsidiary and then expressly agreed to assume the liabilities of Advanced -- which would, of necessity, include Advanced's liability for violating antitrust laws herein." Class Plaintiffs' Memorandum of Law in Opposition to Defendants' Motion to Dismiss the Amended Complaint at 23. The plaintiffs request the Court to take judicial notice of the September 30, 1996 Agreement and Plan of Merger between and among Novacare and Advanced (the **[**30]** "Agreement"). The Court notes that this is the first time that the plaintiffs have mentioned the Agreement. The Agreement was not incorporated by reference into the First Amended Complaint and the plaintiffs do not cite to any case law which permits the Court to take judicial notice of a contract. Therefore, the Court declines to do so.

[*143] The Court finds that the plaintiffs have not satisfied the requirements of notice pleading with regard to Novacare. However, the plaintiffs request leave to amend their complaint so that they may "amend the complaint with regarding this narrow issue." *See* *id. at 24*. The Court grants the plaintiffs' request to amend the First Amended Complaint as to this issue.

III. CONCLUSION

Having reviewed the parties' submissions and heard oral arguments, and for the reasons set forth above, it is hereby

ORDERED, that the defendants' motion to dismiss the complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*, for failure to state a claim based on the relevant product market issue and as against the defendant Novacare Prosthetic and Orthotics, Inc., is **GRANTED without prejudice**. The plaintiffs are permitted to file a Second Amended Complaint with **[**31]** regard to the defendant Novacare Prosthetic and Orthotics, Inc. and the allegations regarding a relevant product market, within twenty (20) days from February 6, 1998, the date that this decision was orally rendered by the Court; and it is further

ORDERED, that the defendants' motion to dismiss the complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*, for failure to state a claim, is **DENIED** in all other respects.

SO ORDERED.

Dated: Uniondale, New York

HN1[] **Entitlement as Matter of Law, Appropriateness**

A motion for summary judgment may be granted only when there is no genuine issue of material fact remaining for trial and the moving party is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(c). The burden of showing the absence of any factual dispute rests on the party seeking summary judgment. When the moving party has carried its burden under Rule 56(c), its opponent must do more than simply show that there is some metaphysical doubt as to the material facts. In considering the motion, the trial court's responsibility is not to resolve disputed issues of fact but to assess whether there are any factual issues to be tried, while resolving ambiguities and drawing reasonable inferences against the moving party. In the context of antitrust litigation the range of inferences that may be drawn from ambiguous evidence is limited. The non-moving party must set forth facts that tend to preclude an inference of permissible conduct. Though summary judgment disposition of antitrust cases is difficult to obtain because of their inherent factual complexity, that does not mean that summary disposition is thereby precluded or disfavored in ***antitrust law***.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN2[] Antitrust & Trade Law, Sherman Act

In order to establish a prima facie case under *§ 1* of the Sherman Act, a plaintiff must show that (1) there is an agreement or concerted action between two or more parties, (2) the agreement constitutes an unreasonable restraint of trade either per se or under the rule of reason, and (3) the agreement affects interstate commerce.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Contracts Law > Defenses > Illegal Bargains

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN3[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

Certain business practices are considered illegal per se, meaning that a defendant's actions are so plainly harmful to competition and so lacking in any redeeming virtue that they are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. Evidence of actual effect on competition is not required where there are per se violations. Among the practices found to be per se illegal are agreements among competitors at the same level of the market structure to allocate territories and thus reduce competition (termed a "horizontal" restraint), horizontal price-fixing, some vertical price-fixing schemes, and some group boycotts.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Healthcare Law > Business Administration & Organization > Covenants not to Compete > Employer & Physician Covenants

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN4[] Practices Governed by Per Se Rule, Boycotts

The per se approach is generally limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor. In contrast, agreements between single entities at different levels of the market structure are not analyzed under the per se doctrine as group boycotts. Rather, such vertical refusals to deal must be analyzed under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under the rule of reason analysis, the plaintiff bears an initial burden of demonstrating that the defendant's conduct has had a substantially harmful effect on competition. The plaintiff may satisfy this burden by (1) offering proof of actual detrimental effects to the market, or (2) establishing that the defendants possess the requisite market power so that their 'arrangement has the potential for genuine adverse effects on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > Dismissal > Involuntary Dismissals > General Overview

HN6[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In order to determine what effect an alleged antitrust violation has had on a particular market, the trial court must first define the relevant market. A market will include all reasonably interchangeable products and services. A plaintiff's failure to include allegations in the complaint of the relevant geographical and product market and the cross-elasticity of demand is ground for dismissal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Market power is the ability to raise price significantly above the competitive level without losing all of one's business.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN8[] Monopolies & Monopolization, Actual Monopolization

A market share below 50 percent is rarely evidence of monopoly power, and a share between 50 percent and 70 percent can only occasionally show monopoly power.

Opinion by: JAMES C. FRANCIS IV

Opinion

REPORT AND RECOMMENDATION

TO THE HONORABLE WHITMAN KNAPP, U.S.D.J.:

In June 1996, the plaintiff, Andrew Blanco, was purportedly denied the opportunity to rent facilities to teach a bartending course at a Howard Johnson hotel in Middletown, New York. The hotel is allegedly owned by the defendant Remington Hotel Corporation ("Remington"). [1] According to Mr. Blanco, he was barred from the Howard Johnson because Remington **[*2]** had entered into an agreement that gave defendant Wines, Steins, and Cocktails ("WSC") the exclusive right to conduct bartending courses at that hotel. The plaintiff alleges that this agreement was a violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1* ("*Section 1*"). All parties have now moved for summary judgment. For the reasons that follow, I recommend that the plaintiff's motion be denied and the defendants' motions be granted.

Background

The background of this case is straightforward, and the defendants do not contest the facts as set forth in the Amended Complaint for purposes of the pending motion. Mr. Blanco contends **[*3]** that on or about June 20, 1996, he called a sales manager at the Middletown Howard Johnson hotel to discuss the availability of banquet rooms for three dates in August. Am. Compl., Count I, P 7. The sales manager informed the plaintiff that the dates were available for rent, but that WSC had an exclusive agreement, pursuant to which no other organization could conduct bartending seminars at the hotel. Am. Compl., Count I, PP 8-10. Mr. Blanco maintains that the Howard Johnson and another hotel -- the Holiday Inn -- are the only hotels in Middletown that rent banquet rooms. Am. Compl., Count II, P 3. The plaintiff contacted the Holiday Inn at that time and was advised that it did not allow any bartending courses to be conducted there. Am. Compl., Count II, P 5.

---

[1] Remington asserts that the Howard Johnson hotel is actually owned by Middletown New York Limited Partnership and that Remington acts only as consultant to the operator of the hotel, Remington Employers Corporation. Defendant's Amended Statement Pursuant to Local Rule 3(g), PP 1-3. Nevertheless, Remington has not raised the issue of ownership in the context of this motion.

Nonetheless, the plaintiff concedes that both he and WSC have subsequently conducted seminars at the Holiday Inn. Plaintiff's Answer to Defendant Wines, Steins & Cocktails, a/k/a Wines, Steins & Cocktails, Limited, Statement of Material Facts Pursuant to S.D.N.Y. Rule 3(g) ("Plaintiff's 3(g) Answer") P 2. Mr. Blanco himself apparently held two programs there in the winter of 1996. Deposition of Andrew B. Blanco dated June 23, **[*4]** 1997 ("Blanco Dep."), attached as Exh. B to Affidavit of Michael J. Lendino dated September 29, 1997 ("Lendino Aff.") at 17. The plaintiff also conducted bartending classes in Newburgh, New York, about thirty miles from Middletown. Blanco Dep. at 86-87. Finally, the plaintiff appears to have conducted bartending seminars on January 5, 12, and 19, 1997, at the Howard Johnson hotel which is the subject of this dispute. *See* Facsimile Transmission of Andrew Blanco dated June 24, 1997, attached as Exh. D. to Lendino Aff. ("Blanco Letter").

The defendants argue that they are entitled to summary judgment because the plaintiff has failed to present evidence that would establish an antitrust violation.

Discussion

A. *Standard for Summary Judgment*

HN1[] A motion for summary judgment may be granted only when there is no genuine issue of material fact remaining for trial and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*; *see also* *Tomka v. Seiler Corp., 66 F.3d 1295, 1304 (2d Cir. 1995)*; *Richardson v. Selsky, 5 F.3d 616, 621 (2d Cir. 1993)*. The burden of showing the absence of any factual dispute rests on the party seeking summary judgment. **[*5]** *See* *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 26 L. Ed. 2d 142, 90 S. Ct. 1598 (1970)*; *Gummo v. Village of Depew, 75 F.3d 98, 107* (2d Cir.), *cert. denied, 517 U.S. 1190, 116 S. Ct. 1678, 134 L. Ed. 2d 780 (1996)*. "When the moving party has carried its burden under *Rule 56(c)*, its opponent must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. In considering the motion, "the court's responsibility is not to resolve disputed issues of fact but to assess whether there are any factual issues to be tried, while resolving ambiguities and drawing reasonable inferences against the moving party." *Knight v. United States Fire Insurance Co., 804 F.2d 9, 11 (2d Cir. 1986)*.

"In the context of antitrust litigation the range of inferences that may be drawn from ambiguous evidence is limited; the non-moving party must set forth facts that tend to preclude an inference of permissible conduct." *Capital Imaging Associates, P.C. v. Mohawk Valley Medical Associates, 996 F.2d 537, 542 (2d Cir. 1993)* (citing **[*6]** *Matsushita, 475 U.S. at 587-88*). Moreover, though "summary judgment disposition of antitrust cases is difficult to obtain because of their inherent factual complexity[,] . . . that does not mean that summary disposition is thereby precluded or disfavored in ***antitrust law***." *Id. at 541*. Rather, "summary judgment remains a vital procedural tool to avoid wasteful trials and may be particularly important in antitrust litigation to prevent lengthy and drawn-out litigation that has a chilling effect on competitive market forces." *Id.*

B. *Section 1* *Antitrust Analysis*

Mr. Blanco argues that the defendants violated *Section 1* of the Sherman Act when they allegedly agreed that WSC alone would be permitted to teach bartending courses at the Howard Johnson. ***HN2***[] In order to establish a prima facie case under *§ 1*, a plaintiff must show that (1) there was an agreement or concerted action between two or more parties; (2) the agreement constituted an unreasonable restraint of trade either per se or under the rule of reason; and (3) the agreement affected interstate commerce. *Maric v. St. Agnes Hospital Corp., 65 F.3d 310, 313 (2d Cir. 1995)*; *Blaine v. Meineke, 670 F. Supp. 1107,* **[*7]** *1113 (D. Conn. 1987)*.

HN3[] Certain business practices are considered illegal per se, meaning that the defendant's actions are so plainly harmful to competition and so lacking in any redeeming virtue that they are "conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)* (evidence of actual effect on competition is not required where there are per se violations). Among the practices found to be per se illegal are agreements among competitors at the same level of the market structure to allocate territories and thus reduce competition (termed a "horizontal" restraint), horizontal price-fixing, some vertical price-fixing schemes, and some group boycotts. *See* *United States v. Topco Associates, Inc., 405 U.S. 596, 608, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*; *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 211-12, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)*; *Capital Imaging, 996 F.2d at 542-43* (citing cases).

This case, like most antitrust actions, deals with conduct **[*8]** that is not illegal per se. The business practice alleged here is an agreement between the defendants that Howard Johnson would refuse to deal with competitors of WSC. The per se rule is applied to only a narrow class of refusal-to-deal situations. In *Federal Trade Commission v. Indiana Federation of Dentists, 476 U.S. 447, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*, the Court stated that ***HN4***[] the per se approach has generally been "limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor." *Id. at 458*. In contrast, agreements between single entities at different levels of the market structure are not analyzed under the per se doctrine as group boycotts. *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 131 (2d Cir. 1978)*. Rather, such vertical refusals to deal must be analyzed under the rule of reason. *Id.; see also* *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 298, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)* ("mere allegation of a concerted refusal to deal does not suffice [as a per se violation] because not all concerted refusals to deal are predominantly **[*9]** anticompetitive.").

HN5[] Under the rule of reason analysis, the plaintiff bears an initial burden of demonstrating that "the defendant's conduct has had a substantially harmful effect on competition." *Capital Imaging, 996 F.2d at 546*. The plaintiff may satisfy this burden by (1) offering proof of actual detrimental effects to the market, or (2) establishing that the defendants "possess the requisite market power so that their 'arrangement has the potential for genuine adverse effects on competition.'" *Id.* (quoting *Indiana Federation of Dentists, 476 U.S. at 460-61*).

1. *Actual Detrimental Effects to the Market*

HN6[] In order to determine what effect the alleged antitrust violation has had on a particular market, the court must first define the relevant market. *Re-Alco Industries, Inc. v. National Center for Health Education, Inc., 812 F. Supp. 387, 391 (S.D.N.Y. 1993)* (citing *Jefferson Parish Hospital District Number 2 v. Hyde, 466 U.S. 2, 29, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984))*. A market will include all reasonably interchangeable products and services. *Id.* A plaintiff's failure to include allegations in the complaint of the relevant geographical and product **[*10]** market and the cross-elasticity of demand is ground for dismissal. *B.V. Optische Industrie de Oude Delft v. Hologic, 909 F. Supp. 162, 172 (S.D.N.Y. 1995)*; *Kramer v. Pollock-Krasner Foundation, 890 F. Supp. 250, 255 (S.D.N.Y. 1995)*; *Re-Alco, 812 F. Supp. at 391*.

Mr. Blanco makes no reference in his complaint to any relevant market area. Nor does he allege any reasonably available substitutes for the Howard Johnson banquet room. These failures alone would warrant dismissal. *Id.; B.V. Optische, 909 F. Supp. at 172* (plaintiff's pleadings failed to refer to any reasonably interchangeable alternatives); *Theatre Party Associates, Inc. v. Shubert Organization, Inc., 695 F. Supp. 150, 154 (S.D.N.Y. 1988)* (requiring "a theoretically rational explanation to support [the plaintiff's] proposed relevant product market").

Even looking beyond the complaint, Mr. Blanco has failed to enunciate a consistent view of the relevant market. He has defined it variously as the city of Middletown alone, Plaintiff's Answer to Defendant Wines, Steins & Cocktails, a/k/a Wines, Steins & Cocktails, Limited Motion for Summary Judgment ("Plaintiff's Motion Answer") at P 10, or as a geographical **[*11]** area extending either 60 or 100 miles in all directions from Middletown. Blanco Dep. at 26-28.

Regardless of the appropriate definition of the relevant market, Mr. Blanco has failed to demonstrate any antitrust injury. To prove "actual detrimental effects to the market" under the rule of reason, the plaintiff must show an adverse effect on competition as a whole in the relevant market, not merely harm to an individual competitor. Insisting on proof of harm to the market fulfills the broad purpose of the ***antitrust law*** to promote competition in general, not merely to protect individual competitors. *Capital Imaging, 996 F.2d at 543* (citing *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 343-44, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*; *Austin v. McNamara, 979*

F.2d 728, 739 (9th Cir. 1992)). Otherwise, "routine disputes between business competitors would be elevated to the status of an antitrust action, thereby trivializing the Act because of its too ready availability." *Id.* (citations omitted).

Mr. Blanco has proffered no evidence to indicate actual detrimental effects to the market for bartending courses as a result of his exclusion from the Middletown Howard **[*12]** Johnson hotel. *See, e.g.* Capital Imaging, 996 F.2d at 546 (no antitrust violation where plaintiff conceded that price of services would remain the same, and failed to adduce significant evidence that any decrease in the quality of services would result from its exclusion). Rather, he has alleged only that the defendants have "produced adverse anticompetitive effects." *See* Am. Compl. Count I, P 14. Mr. Blanco is apparently unable to offer any "proof of actual detrimental effects, such as a reduction of output." Capital Imaging, 996 F.2d at 546 (quoting Indiana Federation of Dentists, 476 U.S. at 460-61). Even in substantiating his own injury, the plaintiff states merely that "plaintiff has been injured as a proximate result of the conspiracy." Am. Compl., Count I, P 15. Indeed, Mr. Blanco admitted at his deposition that he was unable to quantify his damages and had no records that would indicate lost revenue. Blanco Dep. at 38-41.

Finally, Mr. Blanco's own allegations cut against any inference of harm to the market for bartending training courses in the greater Middletown area. He has apparently been able to continue conducting his business. He concedes that he held **[*13]** bartending courses in Newburgh, New York, about thirty miles from Middletown. Blanco Dep. at 86-87. Even if the market analysis focussed on Middletown alone, the evidence demonstrates that Mr. Blanco has not been prevented from conducting his business. The plaintiff has apparently held three bartending seminars in January 1997 at the very same Howard Johnson hotel that is the subject of this dispute. Blanco Letter at 1. *See* Balaklaw v. Lovell, 14 F.3d 793, 799 (2d Cir. 1993) (three year exclusivity contract that could be terminated without cause by either party on six months' notice did not sufficiently harm competition so as to establish an antitrust injury). Further, Mr. Blanco acknowledges that the other hotel in Middletown now allows bartending seminars. Plaintiff's 3(g) Answer P 2. *See* Optivision, Inc. v. Syracuse Shopping Center Associates, 472 F. Supp. 665, 677 (N.D.N.Y. 1979) (availability of market alternatives is an important factor in determining whether an exclusivity clause unreasonably restrains competition). Thus, the plaintiff has not demonstrated any detrimental effects to the market, however the relevant market is defined.

2. *Market Power*

Mr. Blanco **[*14]** is also unable to prove an antitrust violation based on the defendants' market power. He has failed to provide evidence from which to infer that the defendants possess the economic force needed for their agreement to have genuine adverse effects on competition. The Second Circuit has defined ***HN7***[] market power as "the ability to raise price significantly above the competitive level without losing all of one's business." K.M.B. Warehouse Distributors, Inc. v. Walker Manufacturing Co., 61 F.3d 123, 129 (2d Cir. 1995) (quoting Graphic Products Distributors, Inc. v. Itek Corp., 717 F.2d 1560, 1570 (11th Cir. 1983)); *see also* Broadway Delivery Corp. v. United Parcel Service of America, Inc., 651 F.2d 122, 126-27 (2d Cir. 1981) (defining market power as "the power to control prices or exclude competition" in the context of § 2 monopolization claim). An analysis of market power may take into account market share. *Id.*

Mr. Blanco has proffered no evidence to indicate that either WSC or Howard Johnson is able to influence the market for bartending courses by virtue of their respective market shares. There is nothing in the record showing the size of the market for bartending services **[*15]** or for rentable banquet space, or the share of each market that WSC or Howard Johnson commands. The plaintiff has therefore failed present evidence to indicate either defendant's ability to affect prices.

Even if the Court gave Mr. Blanco the benefit of any possible inference and limited its analysis to Middletown alone, the plaintiff still would be unable to demonstrate market power. *See* Zschaler v. Claneil Enterprises, Inc., 958 F. Supp. 929, 942 (D. Vt. 1997) (axiomatic that the smaller the market, the easier it is for the plaintiff to establish market share). Assuming that the two hotels in Middletown are interchangeable from the perspective of a business attempting to rent facility space -- and there is no evidence here to the contrary -- the Howard Johnson was unable to control more than fifty percent of even the smallest possible market. Yet, ***HN8***[] "a market share below 50% is rarely evidence of monopoly power, [and] a share between 50% and 70% can [only] occasionally show monopoly power." *Broadway Delivery Corp., 651 F.2d at 129*; *see also* *Graphic Products Distributors, 717 F.2d at 1570* (70-75% market share indicative of significant market power).

Because Mr. Blanco **[*16]** has been unable to demonstrate either actual detrimental effects to the relevant market or the requisite market power that might substitute for a showing of detrimental effects, I recommend that the defendants' motion for summary judgment be granted, and the plaintiff's motion be denied.

C. *State Counterclaims*

In its answer, WSC asserted counterclaims based on a settlement in a prior case that the plaintiff had filed in the Court of Common Pleas of Lehigh County, Pennsylvania. Since the plaintiff's federal claims should be dismissed before trial, the state claims also should be dismissed in the exercise of the Court's discretion. *28 U.S.C. § 1367(c)(3)*; *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*; *Purgess v. Sharrock, 33 F.3d 134, 138-39 (2d Cir. 1994)* (exercise of pendent or supplemental jurisdiction is best left to the discretion of the district court). [2]

[*17] *Conclusion*

For the reasons stated above, I recommend that the defendant's motion for summary judgment be granted and the plaintiff's motion be denied. I further recommend that WSC's counterclaims be dismissed for lack of jurisdiction.

Pursuant to *28 U.S.C. § 636(b)(1)* and *Rules 72*, *6(a)* and *6(e) of the Federal Rules of Civil Procedure*, the parties shall have ten (10) days to file written objections to this report and recommendation. Such objections will be filed with the Clerk of the Court, with extra copies mailed to the chambers of the Honorable Whitman Knapp, Room 1201, 40 Foley Square, New York, New York 10007, and to the chambers of the undersigned, Room 1960, 500 Pearl Street, New York, New York 10007. Failure to file timely objections will preclude appellate review.

Respectfully submitted,

JAMES C. FRANCIS IV

HN1[] **Motions to Dismiss, Failure to State Claim**

The court may not dismiss a cause of action for failure to state a claim under Fed. R. Civ. P. 12(b)(6) unless it appears beyond doubt that the claimant can prove no set of facts supporting its claim which would entitle it to relief. In considering a Rule 12(b)(6) motion, the court must assume as true all well-pleaded facts, as distinguished from conclusory allegations, and must draw all reasonable inferences in favor of the nonmovant. The issue in reviewing the sufficiency of a complaint is not whether the plaintiff will ultimately prevail, but whether the claimant is entitled to offer evidence to support its claim.

HN4[] **Pleadings, Heightened Pleading Requirements**

To state a claim for defamation under Kansas law, the plaintiff must plead false and defamatory words, communicated to a third person, and which result in harm to the reputation of the person defamed. Since Kansas no longer recognizes a cause of action for defamation per se, every claim for defamation requires proof of damage to the plaintiff's reputation.

Opinion

[*1186] **MEMORANDUM AND ORDER**

This matter is before the court on Classic Communications, Inc.'s, Classic Telephone, Inc.'s, and Classic Cable, Inc.'s Motion to Dismiss the Counterclaims Asserted by Rural Telephone Service Co., Inc. and Vision Plus, Inc. (Doc. 220). For the reasons set forth below, plaintiffs' motion is granted in part and denied in part.

I. BACKGROUND

This action arises from the efforts of Classic Communications, Inc. and its subsidiary telephone and cable companies (collectively "Classic") to expand its telecommunications business into western Kansas. In each of the cities into which Classic attempted to expand its business, Rural Telephone Service Co., Inc. or its wholly-owned subsidiary, Vision Plus, Inc. (collectively "Rural"), was already operating a local telephone exchange or a cable television system, or both.

Classic alleges that Rural has engaged in **[**4]** illegal conduct and schemes designed to prevent Classic from competing with Rural. Specifically, Classic alleges that Rural has interfered with Classic's business relationships, made misrepresentations in order to injure Classic's business reputation, and conspired with members of the local city governments to prevent Classic from entering into and competing in the region's telecommunications market. At present, Classic's only remaining claim against Rural is a federal Lanham Act claim brought pursuant to *15 U.S.C. § 1125*.

In answer to Classic's amended complaint, Rural asserts a counterclaim against Classic alleging an illegal horizontal market allocation in violation of the Sherman Antitrust Act, *15 U.S.C. § 1*. By an "illegal horizontal market allocation" Rural refers to the agreement between Classic and Pioneer Telephone Association Incorporated ("Pioneer") not to compete with each other in certain product and geographical markets including the western Kansas cities of Wakeeny, Hill City, and Quinter. According to Rural, but for the agreement between Classic and Pioneer, which horizontally allocated the telephone exchange and cable television markets, Rural Telephone, as the **[**5]** highest qualified final bidder, would have purchased Sprint/United's Wakeeney, Hill City, and Quinter local telephone exchanges in 1995. Rural also asserts a counterclaim against Classic alleging defamation under Kansas state law. Specifically, Rural claims that J. Meritt Belisle, Classic's Chief executive Officer, made two statements concerning Rural that are *per se* defamatory.

II. *RULE 12(B)(6)* MOTION TO DISMISS STANDARD

HN1[] The court may not dismiss a cause of action for failure to state a claim under *Rule 12(b)(6)* unless it appears beyond doubt that the claimant can prove no set of facts supporting its claim which would entitle it to relief. *H.J. Inc. v. Northwestern Bell Tel. Co., 492 U.S. 229, 249-50, 106 L. Ed. 2d 195, 109 S. Ct. 2893 (1989)*. In considering a *Rule 12(b)(6)* motion, the court must assume as true all well-pleaded facts, as distinguished from conclusory allegations, and must draw all reasonable inferences in favor of the nonmovant. *Housing Auth. of the Kaw Tribe v. City of Ponca City, 952 F.2d 1183, 1187 (10th Cir. 1991)*; *Swanson v. Bixler, 750 F.2d 810, 813 (10th Cir. 1984)*. The issue in reviewing the sufficiency of a complaint is not whether **[**6]** the plaintiff will ultimately prevail, but whether the claimant is entitled to offer evidence to support its claim. *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*.

III. DISCUSSION

A. Rural's Antitrust Counterclaim

Classic moves to dismiss Rural's antitrust counterclaim for lack of standing. In *Roman v. Cessna Aircraft*, the Tenth Circuit enumerated ***HN2***[] six factors that are relevant in **[*1187]** ascertaining whether a plaintiff has standing to pursue an antitrust claim:

> (1) the causal connection between the antitrust violation and the plaintiff's injury; (2) the defendant's intent or motivation; (3) the nature of the plaintiff's injury--i.e., whether it is one intended to be redressed by the antitrust laws; (4) the directness or the indirectness of the connection between the plaintiff's injury and the market restraint resulting from the alleged antitrust violation; (5) the speculative nature of the damages sought; and (6) the risk of duplicative recoveries or complex damages apportionment.

55 F.3d 542, 543 (10th Cir. 1995)(citing *Sharp v. United Airlines, Inc., 967 F.2d 404, 406-07* (10th Cir.), *cert. denied*, *506 U.S. 974, 121* ***[**7]*** *L. Ed. 2d 372, 113 S. Ct. 464 (1992))*. The third factor set forth in *Roman* requires that a plaintiff's injury must be "intended to be redressed by the antitrust laws." *Id.* Classic contends that Rural's counterclaim fails to adequately allege the requisite antitrust injury to establish its standing to pursue a private cause of action under the Sherman Act.

The heart of Rural's antitrust claim is that the Classic/Pioneer agreement enabled Classic to outbid Rural for the Sprint/United telephone system. Rural attempts to establish the anticompetitive effect of the Classic/Pioneer agreement by alleging that it caused Rural to suffer damages as a result of losing the bid for the telephone system.

According to Classic, Rural's alleged injury does not result form a reduction in competition and, therefore, is not the type of injury for which the federal antitrust laws were intended to redress. The court agrees. ***HN3***[] "Whether a practice violates the antitrust laws is determined by its effect on competition, not its effect on an individual competitor." *Bright v. Moss Ambulance Service, Inc., 824 F.2d 819, 824 (10th Cir. 1987)* (citing *Richter Concrete Corp. v. Hilltop Concrete Corp., **[**8]** 691 F.2d 818, 825 (6th Cir. 1982))*. Injury to Rural as a competitor, therefore, does not constitute injury to Rural's ability to fairly compete; and it is the latter type of injury for which the antitrust laws were enacted to prevent. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)* (Antitrust laws were enacted to protect competition, not to protect competitors.).

Furthermore, simply alleging that the Classic/Pioneer agreement is a horizontal restraint on trade and therefore presumptively anticompetitive is not enough to preserve its claim absent allegations that Classic's conduct hampered Rural's ability to compete. This is particularly true in the present case, since Rural's allegation that the nature of the agreement was anticompetitive is contradicted by its allegation that, but for the agreement, Sprint/United would have received a lower price for telephone system offered for sale. Rural is essentially saying that, but for the agreement, it would have had no serious competition for the Sprint/United telephone system. This is not the kind of "distorted" biding process, however, from which antitrust actions arise. It would thus **[**9]** be contrary to the purpose of the antitrust laws to permit Rural to rest its claim on allegations that the Classic/Pioneer agreement is a horizontal restraint on trade and therefore presumptively anticompetitive. The court concludes that the allegations in Rural's antitrust counterclaim, taken as true, are not sufficient to state antitrust standing.

B. Rural's Defamation Counterclaim

Classic also moves to dismiss Rural's defamation counterclaim. ***HN4***[] To state a claim for defamation under Kansas law, the plaintiff must plead false and defamatory words, communicated to a third person, and which result in harm to the reputation of the person defamed. *Batt v. Globe Engineering Co., Inc., 13 Kan. App. 2d 500, 774 P.2d 371 (1989)*. Since Kansas no longer recognizes a cause of action for defamation *per se*, every claim for defamation requires proof of damage to the plaintiff's reputation. *Gobin v. Globe Publ. Co., 232 Kan. 1, 649 P.2d 1239 (1982)*. Classic contends that Rural's defamation counterclaim must fail because the statements complained of were true when published. The court disagrees. At this stage of the pleadings, there is sufficient doubt concerning the truth or falsity **[**10]** of the alleged defamatory statements to prevent the court from finding beyond doubt that Rural can prove no set of facts supporting its claim **[*1188]** which would entitle it to relief. The court concludes that the allegations in Rural's defamation counterclaim, taken as true, are sufficient to state a claim for defamation.

IT IS THEREFORE BY THE COURT ORDERED that Classic's Motion to Dismiss the Counterclaims Asserted by Rural Telephone Service Co., Inc. and Vision Plus, Inc. (Doc. 220) is granted as to Rural's federal antitrust counterclaim and is denied as to Rural's state law defamation counterclaim.

Dated this 11 day of February, 1998, at Topeka, Kansas.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] Sherman Act, Claims

To demonstrate a violation of *section 1* of the Sherman Antitrust Act, codified at *15 U.S.C.S. § 1*, a plaintiff must provide proof of an illegal contract, combination, or conspiracy, which results in an unreasonable restraint of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Most antitrust claims are analyzed under a rule of reason, according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition. This "rule of reason" analysis involves an inquiry into the market structure and the defendant's market power in order to assess the actual effect of the restraint.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Certain types of restraint are so inherently anticompetitive that they are illegal per se, without inquiry into the reasonableness of the restraint or the harm caused. It is only after considerable experience with certain business relationships that courts classify them as per se violations of the Sherman Antitrust Act. Per se treatment is appropriate once experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Practices which have been held to be illegal per se include price-fixing, division of markets, group boycotts, and tying arrangements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN11[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Horizontal restraints of trade result when combinations of traders at one level of the market structure agree to exclude direct competitors from the same level of the market. A plaintiff alleging a horizontal restraint must at least define the market and its participants.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

HN12[] **Vertical Restraints, Nonprice Restraints**

Vertical restraints of trade result from agreements among combinations of persons at different levels of the market structure, e.g., manufacturers and distributors. Vertical nonprice restrictions are governed by the rule of reason and are not per se violations, because they promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN13[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Vertical refusals to deal are subject to the rule of reason unless they are price-related or are designed to enforce underlying restrictions that would otherwise be subject to per se analysis, such as an illegal tying arrangement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN14[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Generally, vertical price restrictions are per se antitrust violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN15[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Vertical maximum price-fixing is not a per se violation but is subject to the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Contracts Law > Personal Property > Personalty Leases > General Overview

Contracts Law > Types of Contracts > Lease Agreements > General Overview

HN16[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is the sale or lease of one item, the tying product, on the condition that the buyer or lessee purchase a second item, the tied product, from the same source. A per se illegal tying arrangement does not exist unless the defendant has coerced buyers into purchasing a product or service, which such buyers otherwise would not have purchased or would have purchased from a different source than the defendant.

HN17[] **Sherman Act, Claims**

The "rule of reason" analysis involves an inquiry into market power and market structure to assess the actual effect of the restraint. The plaintiff must allege a valid relevant market in order to prevail on its monopoly claim. *Section 2* the Sherman Antitrust Act, codified at *15 U.S.C.S. § 2*, requires a plaintiff to plead and prove that the defendant (1) possessed monopoly power in the relevant market and (2) willfully acquired or maintained that power as opposed to gaining it as a result of a superior product, business acumen, or historical accident.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN18[] **Market Definition, Relevant Market**

It is the plaintiff's burden to define the relevant market. The definition of the relevant market has two components - a product market and a geographic market. The relevant product market includes all reasonably interchangeable products. The geographic market is defined by considering the commercial realities faced by consumers. It includes the geographic area in which consumers can practically seek alternative sources of the product, and it can be defined as the market area in which the seller operates.

Counsel: Counsel who presented argument on behalf of the appellant was G. Stephen Walters of Winterset, Iowa.

Counsel who presented argument on behalf of the appellee was Edward M. Mansfield of Des Moines, IA. Roger T. Stetson of Des Moines appeared on the brief.

Judges: Before RICHARD S. ARNOLD, Chief Judge, LOKEN and HANSEN, Circuit Judges.

Opinion by: HANSEN

Opinion

[*556] HANSEN, Circuit Judge.

Double D Spotting Service, Inc. (Double D) brought this suit against Supervalu, Inc. (Supervalu) and World Super Services, Inc. (World Super Services), alleging that the defendants violated federal antitrust laws, state competition laws, and a federal motor carrier law. The district court dismissed Double D's complaint for failure to state a claim. See *Fed. R. Civ. P. 12(b)(6)*. We affirm in part and reverse in part.

I.

HN1[] When reviewing a *Rule 12(b)(6)* dismissal for failure to state a claim, we look only to the facts alleged in the complaint and construe them in the light most favorable to the plaintiff. See *Doe v. Norwest Bank Minnesota, N.A., 107 F.3d 1297, 1303-04 (8th Cir. 1997)*. In its amended and substituted **[**2]** complaint, Double D pleaded that until 1996, it had been in the business of competing with other companies to provide semitrailer unloading services for over the road trucking companies that deliver goods to the Supervalu warehouse in Urbandale, Iowa. The semitrailers travel in interstate commerce, carrying goods that are unloaded at the Supervalu warehouse and subsequently shipped to grocery stores in several states. In addition to unloading trucks driven to the warehouse by **[*557]** the trucking company drivers, Double D offered trucking companies a more involved unloading service. By agreement with Double D, the trucking company could drop its loaded, unhooked semitrailer at a nearby interstate truck stop. A Double D driver driving a Double D tractor would then hook on to the trailer and transport it to the Supervalu warehouse. The Double D driver would then unload the semitrailer and return it empty to the same truck stop location for the over the road trucking company to retrieve at its convenience. This service allowed the over the road trucking company to save the time and expense of paying its own driver both to deliver the semitrailer to the warehouse and to wait for it to be unloaded. **[**3]** It also freed up the trucking company's tractor for other work.

In 1996, Supervalu entered into an agreement granting World Super Services the exclusive right to provide unloading services at the Urbandale warehouse. The agreement provided fixed prices to be charged by World Super Services and barred all other unloading companies from performing any unloading services at the Urbandale warehouse. Thereafter, trucking companies could choose either to unload their own trucks at the warehouse or to hire World Super Services to unload them. Double D complains that the agreement between Supervalu and World Super Services wrongfully eliminated competition and imposed an unreasonable restraint on the unloading services trade at Supervalu's Urbandale warehouse.

Double D originally brought suit against Supervalu and World Super Services in state court, seeking an injunction and damages for the defendants' alleged restraint of trade and competition in violation of state and federal ***antitrust law*** and for alleged tortious interference with Double D's business relationships. The defendants removed the case to federal district court and moved to dismiss the complaint pursuant to *Rule 12(b)(6)* for **[**4]** failure to state a claim upon which relief may be granted. Double D filed an amended and substituted complaint in federal district court, alleging in counts I through IV that the defendants contracted to restrain trade in violation of *Iowa Code § 553.4* (1997) and *Section 1* of the Sherman Antitrust Act, *15 U.S.C. § 1 (1994)*; and that they attempted to establish a monopoly in violation of *Iowa Code § 553.5* and Section 2 of the Sherman Antitrust Act, *15 U.S.C. § 2*. Count V alleges a violation of *49 U.S.C.A. § 14103(b) (West 1997)*, which prohibits the act of coercing any motor carrier operator to pay someone to load or unload the property being transported in interstate commerce.

The district court granted the defendants' motion to dismiss. The court held that Double D failed to state a claim of restraint of trade or monopoly as alleged in counts I through IV, concluding that the facts as alleged do not constitute a legally cognizable relevant market or demonstrate an actual adverse impact on competition within that market. Additionally, the district court concluded that count V, asserting coercion of a "person providing transportation of property by motor vehicle for compensation **[**5]** in interstate commerce," fails to state a claim because there is no allegation that any trucking companies were forced or coerced to pay World Super Services to unload their semitrailers. Double D appeals the dismissal of its complaint.

II.

We review de novo the district court's grant of a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. *Association of Commonwealth Claimants v. Moylan, 71 F.3d 1398, 1402 (8th Cir. 1995)*. Using the same standard as the district court, we must accept the factual allegations of the complaint as true and construe the complaint in the light most favorable to the plaintiff. *Doe, 107 F.3d at 1303-04*. We affirm a *Rule 12(b)(6)* dismissal if "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Hafley v. Lohman, 90 F.3d 264, 266 (8th Cir. 1996)* (internal quotations omitted), cert. denied, *137 L. Ed. 2d 216, 117 S. Ct. 1081 (1997)*.

A. Antitrust Claims

The first four counts of Double D's complaint allege violations of state and federal ***antitrust law***. Two counts are based on the **[*558]** Sherman Antitrust Act, which declares ***HN2***[] it unlawful **[**6]** to contract or form a conspiracy "in restraint of trade or commerce among the several States," *15 U.S.C. § 1*, and which makes ***HN3***[] it a felony to "monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States," *15 U.S.C. § 2*. Two counts are based on Iowa statutes that mirror these federal prohibitions, absent the interstate commerce element. See *Iowa Code §§ 553.4*, *553.5*. [1] "***HN4***[] The essential elements of a private antitrust claim must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's [Rule] 12(b)(6) motion." *Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir. 1988)*.

[7]** The district court concluded that Double D's antitrust claims failed to state a claim because Double D failed to plead a valid relevant market. Double D contends that it was not required to plead a relevant market because it pleaded per se antitrust violations. Alternatively, Double D asserts that even if it was necessary for it to plead a relevant market, the Supervalu warehouse in Urbandale itself is the relevant market for trailer unloading services.

HN7[] To demonstrate a violation of *section 1* of the Sherman Act, a plaintiff must provide proof of an illegal contract, combination, or conspiracy which results in an unreasonable restraint of trade. *State Oil Co. v. Khan, 139 L. Ed. 2d 199, 118 S. Ct. 275, 279 (1997)*. "***HN8***[] Most antitrust claims are analyzed under a rule of reason,'

[1] ***HN5***[] *Section 553.4* provides, "A contract, combination, or conspiracy between two or more persons shall not restrain or monopolize trade or commerce in a relevant market." ***HN6***[] *Section 553.5* provides, "A person shall not attempt to establish . . . a monopoly of trade or commerce in a relevant market for the purpose of excluding competition or of controlling, fixing, or maintaining prices."

according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition." Id. This "rule of reason" analysis involves an inquiry into the market structure and the defendant's market power in order to assess the actual effect of the restraint. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*; **[**8]** see also *Flegel v. Christian Hosp., Northeast-Northwest, 4 F.3d 682, 688 (8th Cir. 1993)*.

HN9[] Certain types of restraint are so inherently anticompetitive that they are illegal per se, without inquiry into the reasonableness of the restraint or the harm caused. *Copperweld Corp., 467 U.S. at 768*; see also *Khan, 118 S. Ct. at 279*. "It is only after considerable experience with certain business relationships that courts classify them as *per se* violations of the Sherman Act." *United States v. Topco Assocs., 405 U.S. 596, 607-08, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. "*Per se* treatment is appropriate once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it." *Khan, 118 S. Ct. at 279* (internal quotations and alterations omitted).

HN10[] Practices which have been held to be illegal per se include price-fixing, division of markets, group boycotts, and tying arrangements. See *Arizona v. Maricopa County Med. Soc., 457 U.S. 332, 344 n.15, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*; *Northern Pac. Ry. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. The district court concluded that under a liberal **[**9]** construction of the factual circumstances pleaded, Double D failed to plead circumstances under which it could prove a per se antitrust violation. We agree.

In support of its contention that it has pleaded per se violations, Double D contends that the agreement between Supervalu and World Super Services amounts to a horizontal restraint of trade, which the Supreme Court has described as a "naked restraint[] of trade with no purpose except stifling of competition." *Topco, 405 U.S. at 608* (internal quotations omitted). ***HN11***[] Horizontal restraints of trade result when combinations of traders at one level of the market structure agree to exclude direct competitors from the same level of the market. See id. Thus, a plaintiff alleging a **[*559]** horizontal restraint must at least define the market and its participants, which, for reasons discussed below, Double D has failed to do. Supervalu is not a participant in the unloading services market at the same level as Double D or World Super Services. Furthermore, for reasons discussed more fully below, we conclude that Supervalu's agreement with World Super Services has no improper effect of restraining trade in the relevant unloading services **[**10]** market, because Double D has failed to plead a valid relevant market. Thus, Double D has not stated a claim of a per se horizontal restraint of trade.

Double D asserts that it has also alleged vertical price-fixing as a per se violation. ***HN12***[] Vertical restraints of trade result from agreements among "combinations of persons at different levels of the market structure, *e.g.*, manufacturers and distributors." Id. Vertical nonprice restrictions are governed by the rule of reason and are not per se violations, because they "promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 54, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. We have noted that ***HN13***[] vertical refusals to deal are subject to the rule of reason unless they are price-related "or are designed to enforce underlying restrictions that would otherwise be subject to *per se* analysis," such as an illegal tying arrangement. *Lomar Wholesale Grocery, Inc. v. Dieter's Gourmet Foods, Inc., 824 F.2d 582, 590 (8th Cir. 1987)*, cert. denied, *484 U.S. 1010, 98 L. Ed. 2d 658, 108 S. Ct. 707 (1988)*. ***HN14***[] Generally, **[**11]** vertical price restrictions are per se antitrust violations. *Business Elec. Corp. v. Sharp Elec. Corp., 485 U.S. 717, 735-36, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)* ("A vertical restraint is not illegal per se unless it includes some agreement on price or price levels."). Recently, however, the Supreme Court has clarified that ***HN15***[] vertical maximum price-fixing is not a per se violation but is subject to the rule of reason. See *Kahn, 118 S. Ct. at 283*. Double D asserts that the agreement between Supervalu and World Super Services is one fixing prices between market participants at different levels of the market structure and therefore amounts to a vertical per se price-fixing violation. We disagree. The agreement at issue does not fix prices between different levels of the market structure. Instead, the agreement fixes the price that one unloading service provider can charge at Supervalu's one warehouse in Urbandale, Iowa. Such an arrangement does not amount to an unlawful restraint between different levels of the market structure. Rather, it demonstrates an isolated agreement concerning Supervalu's operation of its warehouse. Double D has not stated a claim of a per se vertical **[**12]** price-fixing violation.

Double D also asserts that it has stated an unlawful tying arrangement. "***HN16***[] A tying arrangement is the sale or lease of one item (the tying product) on the condition that the buyer or lessee purchase a second item (the tied product) from the same source.'" *Marts v. Xerox, Inc., 77 F.3d 1109, 1112 (8th Cir. 1996)* (quoting *Amerinet, Inc. v. Xerox Corp., 972 F.2d 1483, 1498 (8th Cir. 1992))*, cert. denied, *506 U.S. 1080, 122 L. Ed. 2d 356, 113 S. Ct. 1048 (1993))*. "[A] per se illegal tying arrangement does not exist unless the defendant has coerced buyers into purchasing a product [or service] which such buyers otherwise would not have purchased or would have purchased from a different source than the defendant." *Amerinet, 972 F.2d at 1499*. In this case, Double D asserts that a tying arrangement arose because trucking companies who deliver trailers to Supervalu's Urbandale warehouse (the alleged tying service) and who want to use an unloading service have no choice but to use World Super Service's unloading service (the alleged tied service). Double D's attempt to define this situation as a tying arrangement is unsuccessful. The trucking companies **[**13]** always remain free to unload their own trucks, and they are not coerced into hiring World Super Service's third-party unloading service. Furthermore, to demonstrate a per se tying violation the plaintiff must show that the defendant has sufficient market power in the tying product or service market to restrain competition. *Marts, 77 F.3d at 1112*. As we will discuss below, Double D's complaint fails to plead a valid relevant market, and thus Double D could not demonstrate sufficient market **[*560]** power necessary to state or sustain a tying violation.

Because no per se violation is established, it is necessary for Double D to allege a valid relevant market in order to apply the rule of reason analysis to determine whether the arrangement amounts to an unreasonable restraint of trade within the meaning of *section 1* of the Sherman Act. As we noted above, ***HN17***[] the "rule of reason" analysis involves "an inquiry into market power and market structure" to assess the actual effect of the restraint. *Copperweld Corp., 467 U.S. at 768*. Double D must also allege a valid relevant market in order to prevail on its monopoly claim. *Section 2* of the Sherman Act requires a plaintiff to plead and prove **[**14]** that the defendant "(1) possessed monopoly power in the relevant market and (2) willfully acquired or maintained that power as opposed to gaining it as a result of a superior product, business acumen, or historical accident.'" *Amerinet, 972 F.2d at 1490* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966))*. Thus, in order to state a Sherman Act claim under either *section 1* or *section 2*, the plaintiff must identify a valid relevant market. See *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 877 (3d Cir. 1995)*; *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 726 (3d Cir. 1991)*, cert. denied, *505 U.S. 1221, 120 L. Ed. 2d 903, 112 S. Ct. 3034 (1992)*.

We note that courts are hesitant to dismiss antitrust actions before the parties have had an opportunity for discovery, because the proof of illegal conduct lies largely in the hands of the alleged antitrust conspirators. *Huelsman v. Civic Ctr. Corp., 873 F.2d 1171, 1174 (8th Cir. 1989)*. A dismissal on the pleadings should be "granted sparingly and with caution.'" Id. (quoting 5 Charles Alan Wright & Arthur R. Miller, Federal Practice and Procedure § 1349 (1969)). **[**15]** Most often, "proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers." *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*, petition for cert. filed (Jan. 5, 1998). This general rule, however, does not amount to "a *per se* prohibition against dismissal of antitrust claims for failure to plead a relevant market under *Fed. R. Civ. P. 12(b)(6)*." Id.

HN18[] It is the plaintiff's burden to define the relevant market. Id. "Antitrust claims often rise or fall on the definition of the relevant market." *Bathke v. Casey's Gen. Stores, Inc., 64 F.3d 340, 345 (8th Cir. 1995)*. "The definition of the relevant market has two components - a product market and a geographic market." Id. The relevant product market includes all reasonably interchangeable products. See *Queen City Pizza, 124 F.3d at 436*. The geographic market is defined by considering the commercial realities faced by consumers. *Bathke, 64 F.3d at 345*. It includes the geographic area in which consumers can practically seek alternative sources of the product, and it can be defined as "the market area in which the seller **[**16]** operates." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*; see *Bathke, 64 F.3d at 345*.

In each of the four antitrust counts of its complaint, Double D states that Supervalu and World Super Services engaged in anticompetitive activity within the relevant market "for unloading services at the Supervalu, Inc. warehouse in Urbandale, Iowa." (Appellant's App. at 26, 31, 34, and 36.) Thus, the product market is defined as unloading services and the geographic market is alleged to be the Supervalu warehouse in Urbandale, Iowa, which is a suburb of Des Moines. We agree with the district court that, as a matter of law, this stated geographic market is too narrow to support a claim of an antitrust violation. At issue is one contract between the owner of one particular warehouse within the Des Moines metropolitan area and one unloading service provider. The contract provides that this one unloading service provider has the right, subject to an agreed upon price schedule, to provide all of the unloading services at this particular warehouse. Supervalu's one warehouse in Urbandale does not amount to a relevant market for unloading services **[**17]** of this type. Rather, the market for unloading services would seem to be more properly defined as including all warehouses within, at **[*561]** least, the entire Des Moines, Iowa, metropolitan area, if not an even larger area.

"It is axiomatic that the antitrust laws were passed for the protection of *competition*, not *competitors*.'" *Bathke, 64 F.3d at 344* (quoting *Brooke Group, Ltd. v. Brown & Williamson Tobacco, 509 U.S. 209, 224, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993))* (other internal quotations omitted). As the district court in the present case aptly stated, "plaintiff's complaint does no more than state plaintiff's commercial disappointment at losing the unloading business at the Supervalu warehouse." (Appellant's Adden. at 6.) Disappointment at not receiving one unloading contract at one particular warehouse is insufficient as a matter of law to rise to the level of an antitrust violation within a relevant market.

For the same reasons, the Iowa state law claims pursuant to *sections 553.4* and *553.5* of the Iowa Code fail as well. The Iowa Competition Law, *Iowa Code §§ 553.1-553.18* (1997), must "be construed to complement and be harmonized with the applied laws of the **[**18]** United States which have the same or similar purpose as this chapter." *Iowa Code § 553.2*. See also *State v. Cedar Rapids Bd. of Realtors, 300 N.W.2d 127, 128 (1981)*. Double D asserts that several material differences exist between the express language of *section 553.4* of the Iowa Competition Law and *section 1* of the Sherman Act, and likewise between *Iowa Code section 553.5* and section 2 of the Sherman Act, which indicate that a smaller relevant market is acceptable under the Iowa Competition Law than the Sherman Act would tolerate. Aside from the lack of an interstate commerce requirement, the wording of the state provisions is very similar to that of their federal counterparts. Our research has produced no Iowa case law dealing with the requirement to plead a relevant market. In an absence of state case law on point, it is necessary to examine the comparable federal statutes and case law, see *Cedar Rapids Bd. of Realtors, 300 N.W.2d at 128*, which we have done above.

We conclude that Double D has not stated a per se violation or valid relevant market under either federal or state law. Accordingly, the district court properly dismissed counts I through IV of the amended and **[**19]** substituted complaint for failure to state a claim.

B. Motor Carrier Operator Claim

In count V of its complaint, Double D asserts that by precluding it from delivering and unloading semitrailers for trucking companies, Supervalu and World Super Services wrongfully coerced operators of motor carriers into either unloading their semitrailers themselves or employing the only unloading service available, World Super Services, in violation of *49 U.S.C.A. § 14103(b) (West 1997)*. The district court dismissed this count for failure to state a claim, concluding that Double D lacks standing to bring this claim and that Double D did not allege that any carrier was forced to pay someone else to unload its truck. The court noted that each trucker was free to unload his own truck. Thus, the district court concluded that the conduct alleged was not coercive within the meaning of the statute and failed to state a claim. Double D argues on appeal that the district court's ruling ignores its pleaded facts that Double D itself has been engaged in providing transportation of property by motor vehicle within the meaning of the statute when it hooks on to the trailer left for it at nearby truck **[**20]** stops and transports it to the warehouse, and that it acts not just as an unloader.

HN19[] *Section 14103(b)* provides as follows:

> It shall be unlawful to coerce or attempt to coerce any person providing transportation of property by motor vehicle for compensation in interstate commerce (whether or not such transportation is subject to jurisdiction

> under subchapter I of chapter 135) to load or unload any part of such property onto or from such vehicle or to employ or pay one or more persons to load or unload any part of such property onto or from such vehicle . . . .

The wording of this statute is not limited to protecting only actual trucking companies or registered motor carriers "under subchapter I of chapter 135." Id. Instead, the statute says, "any person providing transportation **[*562]** of property by motor vehicle for compensation in interstate commerce" must be allowed to unload his own truck free of coercion to pay someone else to do the job. Id. (emphasis added). We conclude that Double D's complaint alleges facts at least sufficient to survive a *Rule 12(b)(6)* motion to dismiss. As we noted before, Double D alleges that it often provided a service to interstate trucking **[**21]** companies where a Double D driver would transport a semitrailer from a local truck stop to the Supervalu warehouse and would return the semitrailer to the designated location after unloading the truck.

Double D has alleged a set of facts which if proved come within the provisions of the statute. Accordingly, we reverse the dismissal of count V and remand for further proceedings.

III. Conclusion

For the reasons stated above, we affirm the judgment of the district court dismissing counts I through IV of the amended and substituted complaint. We reverse the judgment of the district court dismissing count V and remand to the district court for further proceedings on that count.

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

When considering a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court accepts all factual allegations in the complaint as true and construes them in the light most favorable to the plaintiff. A court may dismiss a complaint only if it is clear no relief could be granted under any set of facts that petitioner could prove consistent with the allegations. At a minimum, however, a complaint must contain facts sufficient to state a claim as a matter of law and must not be merely conclusory in its allegations.

HN5[] **Racketeer Influenced & Corrupt Organizations, Claims**

Standing to bring a civil suit under *18 U.S.C.S. § 1964(c)* is limited to persons whose harm has been proximately caused by the commission of the alleged predicate acts under the Racketeer Influenced and Corrupt Organizations Act.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

HN6[] Private Actions, Racketeer Influenced & Corrupt Organizations

A Racketeering Influenced and Corrupt Organizations Act (RICO) enterprise exhibits the following three characteristics: (1) a common or shared purpose; (2) some continuity of structure and personnel; and (3) an ascertainable structure distinct from that inherent in a pattern of racketeering. The "distinct structure" requirement focuses on whether the enterprise encompasses more than what is necessary to commit the predicate RICO offense. The enterprise's common activities must extend beyond the minimal association necessary to sustain the pattern of racketeering. The mere fact that each group member carries on activities distinct from the pattern of racketeering is insufficient; the group as a whole must have a common link other than the racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN7[] Private Actions, Racketeer Influenced & Corrupt Organizations

An enterprise may be an association in fact, that is, more than one entity or individuals that are associated although not a legal entity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN8[] Private Actions, Racketeer Influenced & Corrupt Organizations

To participate, directly or indirectly, in the conduct of an enterprise's affairs, a person must have some part in directing those affairs.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN9[] Private Actions, Racketeer Influenced & Corrupt Organizations

A pattern of racketeering activity is present only when predicate acts are linked by two elements: continuity plus relationship. The relatedness element is satisfied by criminal acts that have the same or similar purposes, results, participants, victims, or methods of commission, or otherwise are interrelated by distinguishing characteristics and are not isolated events. To establish a pattern, a plaintiff must show the predicate acts amount to, or otherwise constitute a threat of, continuing racketeering activity. Whether the predicate acts establish a threat of continued racketeering activity depends on the facts of each case.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN10[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In all averments of fraud, including claims of mail and wire fraud as predicate acts in a Racketeer Influenced and Corrupt Organizations Act claim, circumstances constituting fraud must be stated with particularity. *Fed. R. Civ. P. 9(b)*. Normally, the "circumstances" include the time, place and contents of false representations, as well as the identity of the person making the misrepresentation and what was obtained or given up thereby. In a case where the plaintiffs do not allege the mail or wire fraud involve a misrepresentation of fact, the "circumstances" consist of the following four elements: (1) a scheme to defraud; (2) intent to defraud; (3) reasonable foreseeability that the mails (or wires) would be used; and (4) use of the mails (or wires) in furtherance of the fraudulent scheme. The specificity with which fraud must be pleaded depends on the circumstances of the transaction.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN11[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

When a complaint accuses multiple defendants of participating in a scheme to defraud, plaintiffs must identify which defendants were responsible for the separate acts of fraud.

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

Healthcare Law > ... > Actions Against Facilities > Governmental & Nonprofit Liability > Health Care Quality Improvement Act

HN12[] **Business Administration & Organization, Peer Review**

42 U.S.C.S. §§ 11111(a)(1), *11112(a)* of the Health Care and Quality Improvement Act, provides qualified immunity from damages actions for hospitals, doctors and other participants in professional peer review proceedings, if the participants have met certain standards, including affording adequate notice and hearing procedures to the physician under review.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN13[] **Private Actions, Remedies**

To qualify for standing to maintain a private damages action under federal antitrust laws, a plaintiff must establish the following: (1) the causal connection between the alleged antitrust violation and the harm to the plaintiff; (2) improper motive; (3) whether the injury was of a type that Congress sought to redress with the antitrust laws; (4) the directness between the injury and the market restraint; (5) the speculative nature of the damages; and (6) the risk of duplicative recoveries or complex damage apportionment. Some courts have divided these factors into two prongs, requiring a plaintiff to show: (1) the plaintiff suffered antitrust injury; and (2) that he is a proper antitrust plaintiff, that is, an efficient enforcer of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] **Private Actions, Remedies**

Antitrust injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. A private plaintiff can recover on an antitrust claim only where the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN15[] **Private Actions, Remedies**

An antitrust plaintiff must prove that challenged conduct affected the prices, quantity or quality of goods or services, and not just its own welfare.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN16[] **Private Actions, Remedies**

The injury alleged in a federal antitrust case must be palpable and distinct, rather than abstract, conjectural or hypothetical.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN17[] **Regulated Practices, Price Fixing & Restraints of Trade**

The mere allegation that prices have or will increase in the future is insufficient for antitrust injury; a plaintiff must allege that prices will increase above competitive levels.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN18[] **Regulated Practices, Market Definition**

In assessing the sufficiency of an antitrust claim, the court cannot ignore commercial realities.

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] **Antitrust & Trade Law, Sherman Act**

Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal under *15 U.S.C.S. § 1* of the Sherman Act. In passing the Sherman Act, Congress intended to outlaw only unreasonable restraints.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN20[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

An alleged trade restraint may be adjudged unreasonable either because it fits within a class of restraints that has been held per se unreasonable, or because it violates the rule of reason, under which the test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. A plaintiff need not prove the anticompetitive effects of a restraint within a class subject to per se analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN21[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

To adequately allege the illegality of a restraint of trade under the rule of reason, a complaint must define a relevant market, and refer to genuine market-wide anticompetitive effects, actual or probable.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN22[] **Regulated Practices, Market Definition**

To establish a defendant has market power, a plaintiff must identify the relevant market and the effect on that market of the defendant's alleged acts in restraint of trade. In defining a relevant market, a plaintiff must adequately define both a product and geographic market.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN23[] **Regulated Practices, Private Actions**

The essential elements of a private antitrust claim must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's *Fed. R. Civ. P. 12(b)(6)* motion.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN24[] **Regulated Practices, Trade Practices & Unfair Competition**

Mere unfair competition, without more, does not violate antitrust laws.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > Output, Exclusive & Requirements Agreements

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN25[] **Regulated Practices, Private Actions**

A complaint that does no more than state plaintiff's commercial disappointment at losing a segment of business is insufficient as a matter of law to rise to the level of an antitrust violation within a relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN26[] **Regulated Practices, Market Definition**

Products are in the same market when they are reasonably interchangeable for the same uses, thus exhibiting a high cross-elasticity of demand from buyers. A high cross-elasticity of supply, that is, substitution by sellers, must also be considered in determining a relevant product market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN27[] **Regulated Practices, Market Definition**

A court may determine the boundaries of an antitrust market by analyzing such indicia as industry or public recognition of the market as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers or prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN28[] **Regulated Practices, Market Definition**

Market definition is not determined by formal labels, but rather takes into account the realities of competition.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN29[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act does not require that products be fungible to be considered in the relevant market. In determining the market under the Sherman Act, it is the use or uses to which the commodity is put that control.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN30[] **Relevant Market, Geographic Market Definition**

The geographic market encompasses the geographic area to which consumers can practically turn for alternative sources of the product and in which antitrust defendants face competition. Distance and convenience are important in determining the relevant geographic market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN31[] **Regulated Practices, Market Definition**

A geographic market is determined by inquiring into the commercial realities faced by consumers.

Appendix A

[*1085] ***I. Procedural Background***

Plaintiffs' Complaint, **[**2]** filed April 18, 1997, and First Amended Complaint, filed April 24, 1997, contained the following counts: Count I, claims under the Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.A. § 1964(c)* (West 1984 & Supp. 1996); Count II, claims arising under the Sherman Act, *15 U.S.C. §§ 1* and *2 (1994)*; Count III, tortious interference with a valid economic expectancy; Count IV, claims under the Health Care and Quality Improvement Act (HCQIA), *42 U.S.C.A. § 11112* (West 1991 & Supp. 1996); Count V, breach of contract; Count VI, conspiracy under Iowa law; Count VII, defamation; Count VIII, intentional infliction of emotional distress; Count IX, negligent supervision; and Count X, breach of the duty of good faith and fair dealing.

On May 30, 1997, Defendant Genesis Medical Center (Genesis) filed a Motion to Dismiss (Clerk's No. 9), seeking dismissal of Counts I, II, IV, VII, and IX. Defendant Anesthesia & Analgesia (A&A) filed a Motion to Dismiss (Clerk's No. 11) on June 2, 1997, seeking dismissal of Counts I, II, and VII.

Plaintiffs filed a Second Amended Complaint on August 18, 1997, and a Corrected Second Amended Complaint on August 19, 1997. Both listed the following **[**3]** counts: Count I, RICO; Count II, Sherman Act, *§ 1*; Count III, Sherman Act, *§ 2*; Count IV, Title VII, *42 U.S.C.A. § 2000e to 2000e-17* (West 1991 & Supp. 1996), ethnicity discrimination; Count V, Iowa antitrust laws, *Iowa Code § 553.5* (1996); Count VI, intentional interference with contractual, prospective contractual, and business relations; Count VII, defamation; Count VIII, intentional infliction of emotional distress; and Count IX, breach of contract.

On September 8 and 9, 1997, Genesis filed a Motion to Dismiss the Corrected Second Amended Complaint and a Brief (Clerk's Nos. 29 & 30), which challenged Counts I through IV, and Count VII. On September 15, 1997, A&A filed a Motion to Dismiss the Corrected Second Amended Complaint and a Brief (Clerk's Nos. 31 & 35), joining in Genesis' Motion to Dismiss, and further alleging that Plaintiffs failed to state a claim under Count V.

In summary, the Court notes that all Defendants' motions to dismiss challenged the following counts: Count I, RICO; Count II, Sherman Act, *§ 1*; and Count III, Sherman Act, *§ 2*. Additionally, in response to claims either added or amended in the Corrected Second Amended Complaint, Defendants challenged **[**4]** the following claims in the second round of motions to dismiss: Count IV, Title VII; Count V, Iowa antitrust laws; and Count VII, Defamation. Defendants did not challenge the following claims: Count VI, intentional interference with contractual relations; Count VIII, intentional infliction of emotional distress; and Count IX, breach of contract. Some issues were raised and resolved through the pleadings process, and thus do not need further order from the **[*1086]** Court. By the Corrected Second Amended Complaint, Plaintiffs dismissed their HCQIA and negligent supervision claims (Counts IV and IX, respectfully, in the First Amended Complaint), which had been challenged in the first Motions to Dismiss (Clerk's Nos. 9 & 11).

II. Standard for Motion to Dismiss

HN1[] When considering a motion to dismiss under *Federal Rules of Civil Procedure 12(b)(6)*, a court accepts all factual allegations in the complaint as true and construes them in the light most favorable to the plaintiff. *Leatherman v. Tarrant Co. Narcotics Intelligence & Coordination Unit, 507 U.S. 163, 163-65, 122 L. Ed. 2d 517, 113 S. Ct. 1160 (1993)*; *Springdale Educ. Assoc. v. Springdale Sch. Dist., 133 F.3d 649 **[**5]** (8th Cir. 1998)*; *McSherry v. Trans World Airlines, Inc., 81 F.3d 739, 740 (8th Cir. 1996)*. A court may dismiss a complaint only if it is clear no relief could be granted under any set of facts that petitioner could prove consistent with the allegations. *H.J., Inc. v. Northwestern Bell Telephone Co., 492 U.S. 229, 249-250, 106 L. Ed. 2d 195, 109 S. Ct. 2893 (1989)*; *accord, Double D Spotting Service, Inc. v. Supervalu, Inc., 136 F.3d 554, 562, 1998 U.S. App. LEXIS 1820 (8th Cir. 1998)*. "At a minimum, however, a complaint must contain facts sufficient to state a claim as a matter of law and must not be merely conclusory in its allegations." *Springdale Educ. Assoc.*, No. 97-2284, at 3 (affirming district court's dismissal of complaint, where amended complaint did not allege facts that, if true, would be sufficient to demonstrate elements of claim).

HN2[] In an antitrust case, the complaint's description of the defendant's acts must, however, be consistent with the alleged restraint of trade. *Hammes v. AAMCO Transmissions, Inc., 33 F.3d 774, 782 (7th Cir. 1994)*.

As set forth in the Corrected Second Amended Complaint, the relevant facts are as follows.

[6]** ***III. Facts***

Plaintiff Gerald G. Davies, M.D. (Davies), is a licensed medical doctor and a board certified anesthesiologist. He is a shareholder in the other Plaintiff, Anesthesia and Pain Consultants, P.C. (APC), which is an Iowa professional corporation of licensed medical doctors formed in 1991 by Davies and Dr. John Dooley, not a party in this case.

Davies and APC provide medical services, including anesthesiology services, to patients in the area known collectively as the Quad Cities, comprising Davenport and Bettendorf, Iowa, and Rock Island and Moline, Illinois. Before 1995, APC provided most of the cardiovascular and thoracic anesthesiology services at St. Luke's Hospital and its successor, Defendant Genesis Medical Center (Genesis).

Genesis is an Iowa non-profit corporation serving the Quad Cities area. Genesis was formed in June 1994, when St. Luke's Hospital and Mercy Hospital merged. Both hospitals are located in Davenport.

Defendant A&A is an Iowa professional corporation of licensed medical doctors. Defendant Richard J. Leth, M.D., an anesthesiologist with medical staff privileges at Genesis, was president of the Anesthesia Department and chairman of the Anesthesia **[**7]** Service Committee (ASC) at Genesis, and he was a shareholder and president of A&A. Defendants Timothy J. Miller, M.D., Janice K. Baker, M.D., and Michael A. Swanson, M.D., are anesthesiologists with medical staff privileges at Genesis, shareholders of A&A, and members of the ASC. All Defendants provide medical services, including anesthesiology services, in the Quad Cities area.

In May 1993, Davies and Dooley announced plans to open an outpatient surgery center. In the same month, St. Luke's and Mercy Hospitals announced their intention of merging. Shortly after the announcement, St. Luke's began reorganizing its anesthesiology department from an open-staff to a closed-staff model. St. Luke's conducted a bidding process to select a single anesthesiology supplier.

Plaintiffs claim that in 1993 Defendants [1] began a campaign of character assassination under the guise of peer review. Plaintiffs allege that certain Defendants placed unfavorable reports in Davies' peer review file, and that Defendants were attacking Davies' **[*1087]** reputation in order to prevent the opening of his outpatient surgery center and eliminate competition in the market for cardiovascular anesthesiology in the Quad Cities **[**8]** and surrounding area.

St. Luke's Hospital opposed Plaintiffs' outpatient surgery center's application for a Certificate of Need in 1993.

In April 1994, A&A was formed.

On May 12, 1994, the Iowa Health Facilities Council granted a Certificate of Need to the outpatient surgery center. St. Luke's and Mercy Hospitals allegedly discouraged an owner from selling his real estate to Davies and his partners for the outpatient surgery center, and the hospitals allegedly suggested to real estate lenders that the project was not credit-worthy.

After St. Luke's and Mercy Hospitals merged to form Genesis Medical Center in June 1994, APC continued to provide most of the cardiovascular and thoracic anesthesiology services at Genesis. Genesis is the largest hospital in the Quad Cities area, and is the only hospital in the Quad Cities with facilities for invasive cardiology and cardiac surgery services.

In August 1994, APC and **[**9]** A&A reached an informal agreement to merge.

Genesis continued St. Luke's efforts to reorganize delivery of anesthesiology at the hospital. On October 12, 1994, Genesis issued a "Request for Proposal" to all anesthesiologists with medical staff privileges at Genesis, which included Davies. The request stated that any anesthesiology group and its members chosen to be the exclusive provider of anesthesiology services, "must agree not to directly or indirectly have an ownership interest in any other entity which renders one or more of the same services," provided by Genesis' anesthesiology department. Plaintiffs allege the bidding process was a sham, and that Genesis designed the request to give an exclusive contract to A&A. APC and A&A ceased work on their plans to merge.

---

[1] Plaintiffs do not state which Defendants participated in the alleged character assassination.

In January 1995, Genesis awarded A&A the exclusive contract to provide anesthesiology services at Genesis. [2] Any anesthesiologist who wanted to work at Genesis had to work for A&A, and had to comply with the exclusive contract's prohibition against having an ownership interest in any other entity that rendered the same services as Genesis' anesthesiology department. These terms meant Davies or Dooley, who had financial **[**10]** interests in the outpatient surgery center, could not work at Genesis.

APC was forced to discharge some employees. Some APC members left to join A&A. At some point after obtaining the exclusive contract, A&A raised its prices.

On April 19, 1995, the exclusive contract prevented Davies from providing anesthesiology services at Genesis. On April 25, 1995, Defendants let Davies resume practice at Genesis on a temporary basis, but required him to sign an agreement stating APC would pay 5.5 percent of its net revenues to A&A. Plaintiffs do not state the reason that Davies ultimately stopped practicing at Genesis, or discontinued this contract, on February 4, 1997.

In September 1995, Genesis' Medical Executive Committee (MEC) suspended Davies for 31 days and imposed restrictions on his practice, permitting him to perform only emergencies or high-risk cardiac anesthesiology. [3] MEC told Davies the length of the suspension **[**11]** was based on an intent to report the suspension to the National Practitioner's Data Bank, which would inhibit Davies' ability to practice medicine elsewhere in the United States. Davies appealed the decision to the hospital's Judicial Review Committee.

On January 12, 1996, the Judicial Review Committee reversed MEC's decision and held that Davies' suspension was unwarranted. On February 9, 1996, MEC appealed the Judicial Review Committee's decision to the Genesis Board of Directors, which appointed five of its members, none of whom were **[*1088]** doctors, to an Appellate Review Committee. On April 23, 1996, the Board adopted the MEC's report, imposing a 10-day suspension and restrictions on Davies' practice **[**12]** at Genesis. The complaint alleges that the restrictions were impractical, and were intended to prevent Davies from continuing to provide medical care at Genesis. It is unclear if or when the 10-day suspension was ever effectuated. None of the Genesis Board members who served on the Appellate Review Committee are named as defendants here.

Throughout the peer review process, Davies told the reviewers that his accusers had a personal stake in the review, and he asked to have his performance judged by outside peer reviewers. Plaintiffs allege certain unidentified Defendants denied these requests.

IV. Discussion

A. Civil RICO (Count I)

Defendants allege that Plaintiffs have failed to state a claim for the violation of civil RICO.

"***HN3***[] Any person injured in his business or property by reason of a violation of *section 1962*" may recover treble damages from the violator. *18 U.S.C. § 1964(c)*. *Section 1962(c)* states it is unlawful "for any person employed by or associated with," an enterprise as defined under RICO, "to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity." *18 U.S.C. §* ***[**13]*** *1962(c)*; *Atlas Pile Driving Co. v. DiCon Financial Co., 886 F.2d 986, 990 (8th Cir. 1989)*.

HN4[] A "pattern of racketeering activity" includes two or more predicate acts in violation of various criminal statutes, including *18 U.S.C. §§ 1341* (mail fraud) and 1343 (wire fraud). *18 U.S.C. § 1961*; *see* *Murr Plumbing, Inc. v. Scherer Bros. Financial Services Co., 48 F.3d 1066, 1069 (8th Cir. 1995)*; *Atlas, 886 F.2d at 990*.

[2] The pleadings do not state the length of the contract, when it expires, or how it may be renewed.

[3] At some unidentified time, but presumably before September 1995, the MES appointed three of its members, not defendants in this case, to an ad hoc committee to investigate charges against Davies. The complaint alleges that the committee did not contact Davies, but interviewed his competitors and people hostile to him.

HN5[] Standing to bring a civil suit under *18 U.S.C. § 1964(c)* is limited to persons whose harm has been proximately caused by the commission of the alleged RICO predicate acts. *Bowman v. Western Auto Supply Co., 985 F.2d 383, 386-87 (8th Cir. 1993)*; *DeWit v. Firstar Corp., 879 F. Supp. 947, 962 (N.D. Iowa 1995)*.

Defendants assert Plaintiffs have not adequately plead the conduct and existence of a RICO enterprise; have not adequately pled predicate acts with the required specificity, and thus have failed to properly allege that Defendants engaged in a pattern of racketeering activity; and have not pled proximate cause.

1. Conduct of an Enterprise

HN6[] A RICO enterprise exhibits the following three characteristics: (1) a common or shared purpose; (2) **[**14]** some continuity of structure and personnel; and (3) an ascertainable structure distinct from that inherent in a pattern of racketeering. *United States v. Davidson, 122 F.3d 531, 534 (8th Cir. 1997)*; *United States v. Nabors, 45 F.3d 238, 240 (8th Cir. 1995)*; *Diamonds Plus, Inc. v. Kolber, 960 F.2d 765, 769-70 (8th Cir. 1992)*. The "distinct structure" requirement focuses on "whether the enterprise encompasses more than what is necessary to commit the predicate RICO offense." *Diamonds Plus, 960 F.2d at 770*; *Stephens, Inc. v. Geldermann Inc., 962 F.2d 808, 815 (8th Cir. 1992)*. The enterprise's common activities must extend beyond the minimal association necessary to sustain the pattern of racketeering. *McDonough v. National Home Ins. Co., 108 F.3d 174, 177 (8th Cir. 1997)*. The mere fact that each group member "carries on activities distinct from the pattern of racketeering is insufficient; the group as a whole must have a common link other than the racketeering activity." *Id.* (affirming dismissal of RICO claim, where plaintiffs failed to allege existence of structure distinct from minimal association necessary to defraud plaintiffs into buying defective land **[**15]** and homes; conclusory allegation that alleged enterprise consisted of more than what was necessary to defraud was insufficient).

HN7[] An enterprise may be an association in fact, i.e., more than one entity or individuals that are associated although not a legal entity. *See* *Davidson, 122 F.3d at 534*; *18 U.S.C. § 1961(4)*.

[*1089] *HN8*[] To participate, directly or indirectly, in the conduct of an enterprise's affairs, a person must have some part in directing those affairs. *Reves v. Ernst & Young, 507 U.S. 170, 178-79, 122 L. Ed. 2d 525, 113 S. Ct. 1163 (1993)* (affirming Eighth Circuit's "operation or management" test); *DeWit, 879 F. Supp. at 964* (holding allegation that defendants conducted enterprise's alleged banking scheme was insufficient to allege conduct of enterprise's affairs, where defendants were not alleged to have had some part in directing affairs of enterprise itself).

Plaintiffs allege the existence of two RICO enterprises: (1) Genesis and A&A, and (2) "certain members of the Board of Directors of Genesis, certain members of the Medical Executive Committee, and certain members of the Anesthesia Service Committee." Plaintiffs allege each enterprise was "separate and distinct **[**16]** from the patterns of racketeering through which they managed or controlled the defendants." (Corr. Sec. Am. Compl. at 17, P 76.)

Plaintiffs have not identified the persons included in the second alleged enterprise. They also have not identified any Defendant who participated in operating or managing the second enterprise, or described the nature of the operation or management by Defendants. In fact, Plaintiffs allege both enterprises managed or controlled the defendants.

The Court can reasonably infer from the pleadings that Genesis and A&A, as an association-in-fact enterprise, had a structure that was required to provide anesthesiology services at Genesis and that was distinct from the alleged pattern of racketeering activity. The Court also can reasonably infer from the facts pled that Genesis and A&A participated in the conduct of this enterprise's affairs.

The Court cannot, however, reasonably draw the same inferences about the second enterprise as pled. Plaintiffs have not alleged the existence of a structure distinct from the minimal association necessary to defraud Plaintiffs through the alleged fraudulent peer review. Plaintiffs' conclusory allegation that the alleged second **[**17]** association-in-fact enterprise consisted of more than what was necessary to defraud was insufficient to meet the pleading requirement. Furthermore, Plaintiffs have not alleged any defendant participated in the conduct of the second enterprise's affairs.

The Court holds the Plaintiffs' pleading regarding the second alleged enterprise is inadequate to establish the elements of an enterprise, and of conducting the enterprise's affairs. The Court therefore grants Defendants' Motion to Dismiss the claims in Count I concerning the second alleged enterprise.

2. Pattern of Racketeering Activity

HN9[] A pattern of racketeering activity is present only when predicate acts are linked by two elements: continuity plus relationship. *H.J., 492 U.S. at 239*. *Handeen v. Lemaire, 112 F.3d 1339, 1353 (8th Cir. 1997)*. The relatedness element is satisfied by criminal acts that have "the same or similar purposes, results, participants, victims, or methods of commission, or otherwise are interrelated by distinguishing characteristics and are not isolated events." *H.J., 492 U.S. at 240*; *Manion v. Freund, 967 F.2d 1183, 1185 (8th Cir. 1992)*. To establish a pattern, a plaintiff must show **[**18]** the predicate acts amount to, or otherwise constitute a threat of, continuing racketeering activity. *H.J., 492 U.S. at 240*. Whether the predicate acts establish a threat of continued racketeering activity depends on the facts of each case. *H.J., 492 U.S. at 242*.

Plaintiffs in this case alleged predicate offenses of mail fraud and wire fraud.

HN10[] In all averments of fraud, including claims of mail and wire fraud as predicate acts in a RICO claim, circumstances constituting fraud must be stated with particularity. *Fed.R.Civ.P. 9(b)*; *Murr Plumbing, 48 F.3d at 1069*; *DeWit v. Firstar Corp., 904 F. Supp. 1476, 1524 (N.D. Iowa 1995)*. Normally, the "circumstances" include the "time, place and contents of false representations, as well as the identity of the person making the misrepresentation and what was obtained or given up thereby." *Murr Plumbing, 48 F.3d at 1069*. In a case such as this, however, where the plaintiffs do not allege the mail or wire fraud involve a misrepresentation of fact, the "circumstances" consist of the following **[*1090]** four elements: (1) a scheme to defraud; (2) intent to defraud; (3) reasonable foreseeability that the mails (or wires) would be used; and **[**19]** (4) use of the mails (or wires) in furtherance of the fraudulent scheme. *See* *Murr Plumbing, 48 F.3d at 1069 n.6* (citing *Atlas, 886 F.2d at 991*); *accord,* *United HealthCare Corp. v. American Trade Ins. Co., 88 F.3d 563, 571 (8th Cir. 1996)*; *Demerath Land Co. v. Sparr, 48 F.3d 353, 356 (8th Cir. 1995)*. The specificity with which fraud must be pleaded depends on the circumstances of the transaction. *Brown v. North Central F.S., Inc., 173 F.R.D. 658, 670 (N.D. Iowa 1997)*.

HN11[] When a complaint accuses multiple defendants of participating in a scheme to defraud, plaintiffs must identify which defendants were responsible for the separate acts of fraud. *Vicom, Inc. v. Harbridge Merchant Servs., Inc., 20 F.3d 771, 778 (7th Cir. 1994)*; *DeWit, 879 F. Supp. at 972*; *see* *Bennett v. Berg, 685 F.2d 1053, 1062 (8th Cir. 1982)*.

Plaintiffs allege the scheme to defraud was a fraudulent peer review process initiated against Davies to control him and other APC physicians. Plaintiffs assert that Defendants used the mails and telephones in furtherance of their unlawful scheme on more than two occasions in the past ten years, and that Defendants had to use the mail and telephone **[**20]** to appear to comply with Genesis' bylaws and the HCQIA requirements for peer review. Plaintiffs state Defendants implemented their scheme against Davies in 1993, have used the scheme against other physicians, and that a threat of continued criminal activity exists.

Three paragraphs in the Corrected Second Amended Complaint present facts relating to the peer review:

> 17. Defendants Leth, Miller, Baker, and Swanson were four of the six members of the Anesthesia Service Committee ("ASC"). The ASC was and is responsible for anesthesia peer review. The ASC was controlled by A&A as five of the six members were shareholders in A&A.
>
> . . . .

> 60. That unbeknownst to Dr. Davies a campaign of character assassination, under the guise of peer review, had begun in 1993 after Dr. Dooley and he had announced the idea of building an outpatient surgery center. The "character assignation" was clandestine at the outset, as the Defendants took highly critical positions regarding Dr. Davies' medical performance and judged Dr. Davies [sic] competency against the Defendants' subjective standard of care rather than an objective one. The Defendants "papered" Dr. Davies' peer review file with **[**21]** unfavorable reports that were based upon their subjective standards and contained unsubstantiated hearsay and rumor.
>
> . . . .
>
> 67. That throughout his "peer review" Dr. Davies advised the peer reviewers that his accusers had a personal stake in the "review" and asked to have his performance judged by outside peer reviewers, but the Defendants denied these requests.

Corr. Sec. Am. Compl. at 5, 12-13, and 14.

Plaintiffs do not state which Defendants allegedly engaged in the fraudulent peer review scheme, or which Defendants engaged in the alleged predicate acts of mail and wire fraud. [4] Plaintiffs do not state when the fraudulent peer review scheme took place, or describe any circumstances surrounding the place, manner, or scope of the mail and wire fraud, including the fraudulent scheme. Are Plaintiffs alleging the fraudulent peer review occurred only in 1993 when the "campaign of character assassination, under the guise of peer review" began? (Corr. Sec. Am. Compl. at 12, P 60.) Or are Plaintiffs alleging the fraudulent scheme included the unspecified time period when the MEC's ad hoc committee investigated allegations against Davies? (*Id.* at 6, P 23.) Possibly, **[**22]** but they may be **[*1091]** alleging that the scheme encompassed activities in 1996, as evidenced by paragraph 67, quoted above, which refers generally to "peer review," and follows several paragraphs describing actions by the MEC and the Judicial Review Committee. (*Id.* at 13-14, PP 62-66.) Plaintiffs' allegations supply no information regarding the identity of the other physicians purportedly harmed by the alleged scheme of fraudulent peer review, or of the circumstances, including the time frame, of such acts.

[23]** Nothing in the Corrected Second Amended Complaint, other than Defendants' conclusive assertions, suggests the peer review process was fraudulent. Plaintiffs allege Defendants engaged in character assassination and took critical positions of Davies' medical performance based on subjective judgments of his competency. Plaintiffs claim Defendants placed in Davies' peer review file unfavorable reports based on subjective judgments and unsubstantiated hearsay and rumor. Some or all Defendants allegedly attacked Davies' reputation and the public's view of his character to eliminate him from the competitive market of cardiac anesthesiology. Again, Plaintiffs do not identify which defendants were responsible for these acts.

Moreover, Plaintiffs do not set forth any content of any specific statements made by any defendant about Davies' performance, competence, or character. There is nothing obviously false about subjective judgments, disparaging or offensive comments, hearsay or rumors. *Cf.* *Jepson, Inc. v. Makita Corp., 34 F.3d 1321, 1330 (7th Cir. 1994)* (affirming dismissal of complaint; holding competitor's statement in trade magazine regarding "rip-offs," although perhaps disparaging **[**24]** to manufacturer, did not rise to level of fraud that would support RICO claim, where there was nothing obviously false about these statements; followed on other grounds by *DeWit, 879 F. Supp. at 973*). Plaintiffs do not state which statements are allegedly false, which allegedly false statements were made by particular defendants, or to whom the allegedly false statements were made.

The Board suspended Davies and placed restrictions on his staff privileges, which indicates that generally the statements were not obviously false, although certain defendants may have taken an aggressive posture toward Davies. *See* *Jepson, 34 F.3d at 1330* (holding even to extent one or two statements defendant purportedly made may have contained misrepresentations, they were insufficient to establish pattern of racketeering RICO requires).

---

[4] At the hearing on this matter, Plaintiffs argued, in another context, that the defendants on the ASC were acting as A&A's agents. If the Defendants on the ASC were responsible for the acts alleged to be mail and wire fraud, A&A and Genesis cannot be held responsible on a theory of respondeat superior. *Luthi v. Tonka Corp., 815 F.2d 1229, 1230 (8th Cir. 1987)* (declining to apply respondeat superior doctrine to RICO claims); *Prochaska & Assocs., Inc. v. Merrill Lynch Pierce Fenner & Smith, 798 F. Supp. 1427, 1431 (D. Neb. 1992)*; *K&S Partnership v. Continental Bank, 127 F.R.D. 664, 669 (D. Neb. 1989)*.

Plaintiffs have not alleged the content of any misrepresentations that reasonably could be characterized as fraud. *See Demerath, 48 F.3d at 355* (holding mere labeling of representations as fraudulent did not make them so without evidence to support assertion). The Corrected Second Amended Complaint fails to allege with particularity either the falsity of **[**25]** the alleged misrepresentations or the defendants' knowledge of such falsity. *See Brown, 173 F.R.D. at 670*. Plaintiffs thus have failed to adequately allege mail and wire fraud in furtherance of an alleged fraudulent scheme. *See Vicom, 20 F.3d at 778*; *DeWit, 879 F. Supp. at 973*.

Furthermore, hospital bylaws and HCQIA regulations required the use of certain notice procedures, [5] which were apparently followed through the alleged predicate acts involving the mail and telephones. Plaintiffs do not allege any predicate acts other than compliance with these requirements. Plaintiffs' attempts to characterize commonly accepted hospital procedures as racketeering are insufficient alone to plead a pattern of racketeering activity, where Plaintiffs have not adequately pled a fraudulent scheme. *Cf. Lambert A. Plumbing v. Western Sec. Bank, 934 F.2d 976, 981 (8th Cir. 1991)* (holding fact bank had problem loans in past and moved to protect its position in regard to current problem loan did not alone indicate pattern of racketeering; "Bankers do not become racketeers by acting like bankers").

[26]** Plaintiffs' general allegations fail to apprize Defendants of the claims against them and the acts relied on as constituting the **[*1092]** alleged fraud, even though Davies, as recipient of the mailed notices and telephone calls allegedly constituting the mail and wire fraud, and as the subject of the peer review, had the ability to obtain the necessary information to state the circumstances of the communications and peer review alleged to constitute the fraud. In light of the circumstances of this case, Plaintiffs' conclusory allegations fail to satisfy the requirement in *Rule 9(b) of the Federal Rules of Civil Procedure* for stating allegations of fraud with particularity, and therefore the allegations cannot be relied on to show a continuing pattern of fraudulent acts. *See Menasco, Inc. v. Wasserman, 886 F.2d 681, 684 (4th Cir. 1989)* (cited with approval on other grounds in *Lambert Plumbing, 934 F.2d at 981*). These allegations thus lack the specificity needed to show a threat of continuing racketeering activity. *See Menasco, 886 F.2d at 684*. The Court holds Plaintiffs have not stated a claim for violation of civil RICO.

3. Proximate Cause

The hospital's Judicial Review **[**27]** Committee reversed the MEC's decision to suspend Davies and impose restrictions. The Board made the final decision concerning Davies' suspension and restrictions. Furthermore, Plaintiffs do not allege they are prevented from working at Genesis because of the peer review action, but because of Genesis' exclusive contract with A&A. Therefore, the harm Plaintiffs allege they incurred was not proximately caused by the alleged predicate acts of Defendants. *See Bowman, 985 F.2d at 386-87*; *DeWit, 879 F. Supp. at 962*.

Because Defendants were not final decision-makers in the peer review process, whatever scheme, if any, Defendants participated in was never going to be more than part of a peer review process that routinely uses mail and telephones, and such a scheme as pled cannot rise to the level of racketeering activity.

Plaintiffs have not adequately alleged that any defendant conducted the affairs of a RICO enterprise through a pattern of racketeering activity, including predicate acts that caused harm to Plaintiffs. Therefore, the Court grants Defendants' Motions to Dismiss the first cause of action.

B. Sherman Act Violations (Counts II and III)

---

[5] ***HN12***[] The HCQIA provides qualified immunity from damages actions for hospitals, doctors and other participants in professional peer review proceedings, if the participants have met certain standards, including affording adequate notice and hearing procedures to the physician under review. *Brown, M.D. v. Presbyterian Healthcare Servs., 101 F.3d 1324, 1333 (10th Cir. 1996)*; *see 42 U.S.C. §§ 11111(a)(1)*, *11112(a) (1994)*.

Plaintiffs allege **[**28]** that Defendants conspired to restrain Plaintiffs' trade and monopolize trade in violation of Sections 1 and 2 of the Sherman Act. Defendants allege that Plaintiffs lack standing to bring these claims and have failed to adequately state the claims for relief in their Corrected Second Amended Complaint. [5]

1. Standing

HN13[] To qualify for standing to maintain a private damages action under federal antitrust laws, a plaintiff must establish the following: (1) the causal connection between the alleged antitrust violation and the harm to the plaintiff; (2) improper motive; (3) whether the injury was of a type that Congress sought to redress with the antitrust laws; (4) the directness between the injury and the market restraint; (5) the speculative nature of the damages; and (6) the **[**29]** risk of duplicative recoveries or complex damage apportionment. *Lovett v. General Motors Corp., 975 F.2d 518, 520 (8th Cir. 1992)* (citing *Associated General Contractors v. California State Council of Carpenters, 459 U.S. 519, 534-45, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983))*. Some courts have divided these factors into two prongs, requiring a plaintiff to show: (1) the plaintiff suffered antitrust injury; and (2) that he is a proper antitrust plaintiff, i.e., an efficient enforcer of the antitrust laws. *Todorov v. DCH Healthcare Authority, 921 F.2d 1438, 1449 (11th Cir. 1991)* (cited on other grounds by *Read, M.D. v. Medical X-Ray Ctr., P.C., 110 F.3d 543, 546* (8th Cir.), *cert. denied*, *U.S.* *, 139 L. Ed. 2d 230, 118 S. Ct. 299 (1997))*; *Baglio v. Baska, 940 F. Supp. 819, 830 (W.D. Penn. 1996)*, *aff'd*, *116 F.3d 467 (3d Cir. 1997)*; *Leak v. Grant Med. Ctr., 893 F. Supp. 757, 762 (S.D. Ohio 1995)*, *aff'd*, *103 F.3d 129 (6th* ***[*1093]*** *Cir. 1996)*, *cert. denied*, *U.S.* *, 138 L. Ed. 2d 175, 117 S. Ct. 2408 (1997)*.

a. Antitrust Injury

HN14[] Antitrust injury is "injury of the type the antitrust laws were intended to prevent **[**30]** and that flows from that which makes defendants' acts unlawful." *NCAA v. Board of Regents of Univ. of Okla., 468 U.S. 85, 103, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*; *see* *Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. A private plaintiff can recover on an antitrust claim only where the loss "stems from a competition-reducing aspect or effect of the defendant's behavior." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*.

HN15[] An antitrust plaintiff must prove that challenged conduct affected the prices, quantity or quality of goods or services, and not just its own welfare. *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 641 (3d Cir. 1996)* (affirming finding that orthopedic surgeon failed to establish he suffered antitrust injury as result of sham peer review that resulted in restriction of staff privileges; orthopedic services were still readily available to consumers in area, and surgeon could still practice medicine, only his ability to perform spine surgery at one hospital was extinguished).

HN16[] The injury alleged must be palpable and distinct, rather than abstract, conjectural or hypothetical. *Slowiak* ***[**31]*** *v. Land O'Lakes, Inc., 987 F.2d 1293, 1296 (7th Cir. 1993)*; *Vakharia v. Little Co. of Mary Hosp. & Health Care Ctrs., 917 F. Supp. 1282, 1301 (N.D. Ill. 1996)* (granting motion to dismiss plaintiff anesthesiologist's Sherman Act, § 1, claim against hospital that allegedly used sham process to select exclusive provider of anesthesiology services and forced plaintiff to surrender staff privileges, where plaintiff stated conspirators intended to affect competition in Chicago and throughout nation and stated competition was restricted in hospital, but failed to assert palpable injury to competition in Chicago market, thus failing to allege antitrust injury; holding one hospital's staffing decision did not give rise to § 1 claim; "Injecting the powerful medicine of the Sherman Act into [plaintiff's] staffing dispute would be like treating a hangnail with amputation of the finger.").

Most courts addressing the issue have held that a mere staffing decision at a single hospital affecting a single practitioner, absent harm to a relevant market, did not violate the Sherman Act, and some of those courts have based their holdings on lack of standing and/or antitrust injury. *Mathews,* ***[**32]*** *87 F.3d at 641*, *BCB Anesthesia Care, Ltd. v. Passavant Memorial Area Hosp. Ass'n, 36 F.3d 664, 668 (7th Cir. 1994)* (citing exhaustive list of

---

[5] Defendants also assert that Plaintiffs have failed to allege they are entitled to relief under the Clayton Act. Because Plaintiffs could easily remedy this deficiency in an amended complaint, the Court does not analyze the issue.

decisions, commenting that in vast majority of cases, plaintiff physicians were denied relief; dismissing at summary judgment stage for failure to state claims, because plaintiffs failed to establish antitrust injury where anesthetists' contract with hospital was terminated in favor of other anesthetists); *Oksanen v. Page Mem. Hosp., 945 F.2d 696, 709 (4th Cir. 1991)* (en banc) (affirming district court's summary judgment, holding physician whose privileges were revoked did not establish antitrust injury), *cert. denied*, *502 U.S. 1074, 117 L. Ed. 2d 137, 112 S. Ct. 973 (1992)*; *Baglio, 940 F. Supp. at 829* (holding termination of doctor's staff privileges and position as director of pathology laboratory, and damage to his reputation did not constitute antitrust injuries, and therefore doctor lacked standing, where doctor's termination did not cause injury to consumers, because laboratory continued to operate under direction of several other pathologists); *Leak, 893 F. Supp. at 763* (holding physician and corporation did not suffer antitrust injury, where they could **[**33]** compete with others offering pain-related medical services at two other area hospitals, even though plaintiffs were foreclosed from offering services to segment of patients whose managed-care plans limited them to defendant hospital, which had entered exclusive contract with another provider of anesthesia services and had denied staff privileges to plaintiffs; noting court would have reached same decision under motion to dismiss as under motion for summary judgment); *Robles v. Humana Hosp. Cartersville, 785 F. Supp. 989, 998, 998 n.7 (N.D. Ga. 1992)* (holding obstetrics physician who lost hospital staff privileges following peer review had **[*1094]** not suffered antitrust injury and therefore lacked standing). [6]

[34]** In Count II, Plaintiffs allege Defendants' acts have harmed competition in the relevant market, which they define as the provision of cardiac anesthesiology services to patients in the Quad Cities area, an area they define as encompassing 23 Iowa and Illinois counties. (Corr. Sec. Am. Compl. at 19, P 87).

Plaintiffs contradict this market definition, however, in their Corrected Second Amended Complaint. Plaintiffs make many more factual allegations concerning anesthesiology or general medical care than about cardiac anesthesiology, and Plaintiffs' factual assertions indicate the relevant market is the provision of anesthesiology services. For example, Plaintiffs make the following statements in their Corrected Second Amended Complaint: "Genesis' scheme to control the delivery of medical care in the Quad Cities, and surrounding areas," (*id.* at 2); "defendants have dictated the flow of anesthesiology referrals by controlling the delivery of anesthesia," (*id.* at 2, P 2); "Davies [and] . . . shareholders of APC, all of whom are medical doctors providing anesthesia services to patients in the Iowa-Illinois Quad Cities, and surrounding areas," (*id.* at 4, P 9); "[Plaintiffs] **[**35]** have provided medical services, including anesthesia services," (*id.* at 7, P 25); "conducting a bidding process to select a single anesthesia provider," (*id.* at 10, P 40); "A&A . . . was offered an exclusive contract to provide anesthesia services at St. Luke's hospital . . . . [which] would have precluded [plaintiffs] from delivering anesthesia services," (*id.* at 10, P 44); "give the exclusive contract to A&A [Genesis'] favored group of anesthesiologists," (*id.* at 11, P 51), "awarded an exclusive contract, to provide anesthesia services at Genesis, to A&A," (*id.* at 12, P 54); "contract . . . deprived consumers of the competition of other anesthesiologists," (*id.* at 12, P 56); "Davies . . . was prevented by this contract from providing anesthesia services at Genesis," (*id.* at 12, P 58); "prevent Dr. Davies from continuing to provide medical care at Genesis," (*id.* at 14, P 66); and, "Davies . . . was permanently prohibited from providing anesthesia services at Genesis," (*id.* at 15, P 69).

Essentially, Plaintiffs allege that they provide anesthesiology services, and that among their consumers are cardiac patients. They do not state that the **[**36]** anesthesiology services they provide cardiac patients differ substantially from general anesthesiology services. Nor do they allege that any other physician anesthesiologists cannot provide the same services they provide to cardiac patients. Accepting the facts stated in the complaint as true, the Court concludes that Plaintiffs' claims appear merely to infer that a segment of Plaintiffs' anesthesiology business has

---

[6] Unpublished decisions have reached the same conclusion. *See, e.g.,* ***Patel v. Scotland Mem. Hosp., 91 F.3d 132*** (unpublished table decision), 1996 WL 383920, at *4 (4th Cir. 1996) (dismissing for failure to state Sherman Act claim, where nurse anesthetist failed to adequately allege facts necessary to demonstrate antitrust injury; complaint focused on injuries anesthetist incurred, not those the competitive market incurred; stating anesthetist alleged only staffing decision and personal economic injury); *Huhta v. Children's Hosp. of Philadelphia, 1994 U.S. Dist. LEXIS 7327*, No. Civ. A. 93-2765, 1994 WL 245454, at *2 (E.D. Pa. May 31, 1994) (holding pediatric cardiologist's loss of referrals and lost revenue as result of hospital's bar to him using pediatric cardiology equipment and facilities was not antitrust injury; "The harm alleged in the complaint is really only harm to the individual doctor, and not to competition within the marketplace"), *order aff'd*, ***52 F.3d 315 (3d Cir. 1995)***.

been closed to them through the exclusive contract and Davies' loss of staff privileges. *See Leak, 893 F. Supp. at 763*.

Plaintiffs rely on *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 875 (3d Cir. 1995)*, for the proposition that a physician's allegation that he has been excluded from the relevant market and that such exclusion constitutes an unreasonable restraint on trade constitutes a sufficient allegation of antitrust injury. *Brader*, however, unlike this case, concerned a hospital's suspension of a physician, through use of unfair proceedings and for no reasonable basis related to performance reasons, and the hospital's dissemination of a report about the doctor's suspension, which allegedly prevented the doctor from obtaining another position and caused **[**37]** a reduction in the provision of medical services in the Pittsburgh market. *Id. at 871-72*.

[*1095] Here, Plaintiffs have pleaded no facts from which a reasonable inference can be drawn that Defendants made a concerted effort to keep Plaintiffs from practicing in the Quad Cities area or elsewhere. In fact, Plaintiffs' factual pleadings belie such an allegation. Plaintiffs asserted that Davies continued to work at Genesis for a period after the exclusive contract was awarded to A&A and after the peer review. A reasonable inference can be drawn that APC will once again have the opportunity to bid on the exclusive contract when it is open for renewal. Furthermore, as noted previously, the hospital's Judicial Review Committee reversed the MEC's decision to suspend Davies and impose restrictions, and the Board made the final decision concerning Davies' suspension and restrictions. Plaintiffs do not allege they are prevented from working at Genesis because of the peer review action, and Davies does not allege why he was ultimately foreclosed from practicing at Genesis in February 1997.

Although Plaintiffs' assertions nominally regard prices and competition, the type of injury covered under antitrust **[**38]** laws, Plaintiffs have not alleged any palpable change in the market. ***HN17***[] The mere allegation that prices have or will increase in the future is insufficient for antitrust injury; a plaintiff must allege that prices will increase above competitive levels. *Robles, 785 F. Supp. at 998, 998 n.7*. Plaintiffs claimed that doctors left APC to join A&A, which means patients now have more choice concerning which anesthesiologist to use, and which means Genesis is a more competitive hospital with the addition of new anesthesiologists. *Id. at 998*.

The relevant markets possibly affected by the exclusive contract granted to A&A were (1) the consumers of anesthesiology services, and (2) the providers of anesthesiology services. *See Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 7, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*; *Balaklaw v. Lovell, 14 F.3d 793, 798 (2d Cir. 1994)*. From the consumers' viewpoint, "What occurred after the implementation of the [exclusive] contract . . . was only a reshuffling of competitors." *See Balaklaw, 14 F.3d at 798* (quoting *Coffey v. Healthtrust, Inc., 955 F.2d 1388, 1392 (10th Cir. 1992)*). In both *Balaklaw* and *Coffey*, as here, the **[**39]** plaintiff doctor or group had a de facto exclusive arrangement with a hospital to provide certain medical services, but was replaced when the hospital entered into an exclusive contract with another provider. *See Balaklaw, 14 F.3d at 798 n.10*; *Coffey, 955 F.2d at 1390*. The same situation has occurred here.

From the providers' viewpoint, the Court notes Plaintiffs stated that competition for the exclusive contract regarded all Genesis' anesthesiology services, not just services for cardiac patients. Genesis solicited proposals from several anesthesiologists. Nothing in the Corrected Second Amended Complaint identified any competitors for Plaintiffs in the market for cardiac anesthesiology. The only competitors mentioned were those for the provision of all anesthesiology services at Genesis. Plaintiffs have not asserted any facts tangibly indicating that either the anesthesiology or asserted cardiac anesthesiology market has been hampered by the exclusive contract.

HN18[] In assessing the sufficiency of Plaintiff's claim, the Court cannot ignore commercial realities. *See United States v. Grinnell Corp., 384 U.S. 563, 572-73, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *Balaklaw, **[**40]** 14 F.3d at 799*; *Oksanen, 945 F.2d at 709* ("The relevant market definition must encompass the realities of competition."). Within the Quad Cities and the surrounding 23-county area, several cities have hospitals, and a few miles from the edges of the area defined by Plaintiffs, large hospitals are found in several cities, such as Iowa City, with the University of Iowa Hospital and Clinics, and including Chicago, Rockford, Peoria, and Springfield, Illinois. (*See* Appendix A.) Plaintiffs do not allege any facts suggesting the contract or staffing decision caused them, or other anesthesiologists, to be excluded from, or limited in, the market for anesthesiology services. *See* *Balaklaw, 14 F.3d at 799*. It therefore appears extremely unlikely that the Sherman Act prohibits Defendants' conduct.

The Court recognizes that under certain circumstances, a staffing decision can conceivably support an antitrust claim. *Cf.* *Islami v. Covenant Med. Ctr., Inc., 822 F. Supp. 1361, 1387 (N.D. Iowa 1992)* (denying motion for summary judgment on basis of injury to **[*1096]** relevant market, where geographic market was in dispute, and evidence of injury to competition existed in form of one doctor's **[**41]** monopoly on thoracic surgeries at hospital, and of radiologists' possible monopoly on testing at lab).

In this case, however, considering all the facts stated in the Corrected Second Amended Complaint as true, taking into account the contradictions in the complaint regarding the nature of the market, and absent factual allegations raising a reasonable inference of injury to competition or of a causal connection between an alleged antitrust violation and harm to Plaintiffs, the Court holds Plaintiffs have alleged injury only to themselves and thus have not alleged the antitrust injury essential to their claim under ***antitrust law***. *Cf.* *BCB Anesthesia, 36 F.3d at 669* (holding that before court engaged "in the micromanagement of the staffing arrangements . . . under the aegis of the antitrust laws," court needed "better reasons than the plaintiffs have given."). Plaintiffs, therefore, have not established antitrust standing, and the Court need not address the remaining factors regarding antitrust standing. *See* *Lovett, 975 F.2d at 520-21*.

Even if Plaintiffs had adequately pleaded antitrust injury, the Court holds they have not satisfied the second prong of that antitrust standing **[**42]** test: Plaintiffs have not shown they are the proper antitrust plaintiffs.

Other courts have determined that physicians challenging termination of staff privileges at a hospital are not appropriate plaintiffs to enforce antitrust laws. *See* *Todorov, 921 F.2d at 1455* (holding doctor's interests were not aligned with patients' interests, where doctor would benefit from radiologists' inflated prices; patients, their insurers, or government were interested in ensuring consumers paid competitive price, and they could bring antitrust action); *Baglio, 940 F. Supp. at 830* (holding even if doctor had established antitrust injury, he was not appropriate plaintiff to represent interests of those who might use pathology lab; patients and larger payors, who would be directly injured by alleged antitrust violations, must bring action); *Leak, 893 F. Supp. at 764* (noting existence of "at least two more easily imagined efficient enforcers": patients and the government).

Here, Plaintiffs might benefit if A&A charged patients inflated prices on procedures both perform, because consumers would have an added incentive to seek these anesthesiology services from Plaintiffs. Thus, Plaintiffs would **[**43]** not be the appropriate parties to raise this issue, because they would not be directly injured by the prices charged by A&A.

Because Plaintiffs have not shown they suffered antitrust injury and that they are proper antitrust plaintiffs, the Court grants Defendants' Motions to Dismiss the second and third causes of action.

Because Plaintiffs have not pleaded an antitrust injury, the Court need not address the adequacy of Plaintiffs' pleadings regarding the statement of their claims for relief under *Sections 1* and *2*. *See* *Brunswick Corporation v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690*; *Midwest Communications, Inc. v. Minnesota Twins, Inc., 779 F.2d 444, 450 (8th Cir. 1985)* (where plaintiff fails to establish threshold issue of antitrust injury, it lacks standing to sue under antitrust laws and court need not reach merits of antitrust claims), *cert. denied*, *476 U.S. 1163, 90 L. Ed. 2d 730, 106 S. Ct. 2289 (1986)*. Nevertheless, the Court analyzes the balance of the grounds for the Motions to Dismiss the Sherman Act claims, because of the issues' importance and for the sake of efficiency should this case be considered on appeal.

2. Section 1 Claim (Count II)

Defendants seek to dismiss Count II of Plaintiffs' **[**44]** complaint for failing to state a claim under *Section 1* of the Sherman Act.

HN19[] "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal . . . ." *15 U.S.C.A. § 1*. In passing the Sherman Act, Congress intended to outlaw only unreasonable restraints. *State Oil Co. v. Khan*, U.S. , , *139 L. Ed. 2d 199, 118 S. Ct. 275, 279 (1997)*.

Plaintiffs claim that by awarding an exclusive contract and conducting a fraudulent **[*1097]** peer review, Defendants have adversely affected the provision of anesthesiology services to cardiac patients and restrained Plaintiffs' business.

HN20[] An alleged trade restraint may be adjudged unreasonable either because it fits within a class of restraints that has been held per se unreasonable, or because it violates the rule of reason, under which the "test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Flegel v. Christian Hosp. Northeast-Northwest, 4 F.3d 682, 686 (8th Cir. 1993)* **[**45]** (quoting *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 457-58, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986))*. A plaintiff need not prove the anticompetitive effects of a restraint within a class subject to per se analysis. *Flegel, 4 F.3d at 686*; *cf.* *Klor's, Inc. v. Broadway-Hale Stores, 359 U.S. 207, 210, 212, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)* (cited in *Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 114 L. Ed. 2d 366, 111 S. Ct. 1842 (1991))*.

Most antitrust claims are analyzed under the rule of reason. *Kahn*, U.S. at , 118 S. Ct. at 279. Federal courts generally examine the denial or revocation of hospital privileges under the rule of reason. *Id.* (citations omitted); *Lie v. St. Joseph Hosp. of Mount Clemens, 964 F.2d 567, 570 (6th Cir. 1992)*.

Plaintiffs do not assert, and the Court does not find, that Plaintiffs' claims fit within a class of restraints that have been held to be per se unreasonable. The Court therefore will analyze Plaintiffs' *Section 1* claim under the rule of reason. ***HN21***[] To adequately allege the illegality of a restraint of trade under the rule of reason, a complaint must define a relevant market, and refer to genuine market-wide **[**46]** anticompetitive effects, actual or probable. *Flegel, 4 F.3d at 688*; *see also* *Double D Spotting Service, Inc.v. Supervalu, Inc., 136 F.3d 554, 561, 1998 U.S. App. LEXIS 1820*, No. 97-1456, slip op. at 4 (8th Cir. Feb. 11, 1998) (dismissing complaint for failure to plead valid relevant market).

Because Plaintiffs have not asserted actual detrimental effects on competition, [7] the Court must examine the claims that Defendants have market power. *Flegel, 4 F.3d at 688*; *accord, Double D Spotting Service*, No. 97-1456, slip op. at 4, 7. ***HN22***[] To establish a defendant has market power, a plaintiff must identify the relevant market and the effect on that market of the defendant's alleged acts in restraint of trade. *Flegel, 4 F.3d at 688*; *Princess House, Inc. v. Lindsey, 918 F. Supp. 1356, 1370 (W.D. Mo. 1994)*. In defining a relevant market, a plaintiff must adequately define both a product and geographic market. *United States v. Mercy Health Servs., 107 F.3d 632, 634 n.3 (8th Cir. 1997)*; *FTC v. Freeman Hospital, 69 F.3d 260, 268 (8th Cir. 1995)*; *Morgenstern v. Wilson, 29 F.3d 1291, 1296 (8th Cir. 1994)*, *cert. denied*, *513 U.S. 1150, 130 L. Ed. 2d 1068, 115 S. Ct. 1100 (1995)*; *Ryko Manufacturing Co. v. Eden Services, **[**47]** 823 F.2d 1215, 1233 (8th Cir. 1987)* (stating plaintiff attacking vertical nonprice restraint must prove defendants' substantial market power in relevant market), *cert. denied*, *484 U.S. 1026, 98 L. Ed. 2d 763, 108 S. Ct. 751 (1988)*.

HN23[] "The essential elements of a private antitrust claim must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's [Rule] 12(b)(6) motion." *Double D Spotting Service*, No. 97-1456, slip op. at 3-4 (quotation omitted).

---

[7] Plaintiffs asserted A&A raised prices, but do not specify for which services prices were raised, or that the prices were raised higher than to a competitive level.

As discussed above, Plaintiffs have not adequately pled a causal connection between harm to Plaintiffs and any alleged concerted action by Defendants in violation of the Sherman Act.

The Court recognizes that to injure or destroy one or two competitors in a market through unfair competition will not, if the market has many competitors, substantially **[**48]** affect consumers or anyone else besides the competitors injured. *See* *Sutliff, Inc. v. Donovan Co., Inc., 727 F.2d 648, 655 (7th Cir. 1984)*. ***HN24***[] Mere unfair competition, without more, does not violate antitrust laws. *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*.

Similarly, ***HN25***[] a complaint that "does no more than state plaintiff's commercial disappointment" **[*1098]** at losing a segment of business is insufficient as a matter of law to rise to the level of an antitrust violation within a relevant market. *Double D Spotting Service*, No. 97-1456, slip op. at 9 (affirming district court's dismissal of complaint, where complaint did no more than state plaintiff's disappointment at not receiving exclusive contract at one warehouse). "Hospitals are not public utilities, required to grant staff privileges to anyone with a medical license." *Blue Cross & Blue Shield United of Wis. v. Marshfield Clinic, 65 F.3d 1406, 1413 (7th Cir. 1995)*, *cert. denied*, *516 U.S. 1184, 116 S. Ct. 1288, 134 L. Ed. 2d 233 (1996)*.

a. Product Market

HN26[] Products are in the same market when they are "reasonably interchangeable" for the same uses, thus **[**49]** exhibiting a high "cross-elasticity of demand" from buyers. *Community Publishers, Inc. v. Donrey Corp., 892 F. Supp. 1146, 1153 (W.D. Ark. 1995)*; *see* *United States v. Arnold Schwinn & Co., 388 U.S. 365, 381, 18 L. Ed. 2d 1249, 87 S. Ct. 1856 (1967)*; *United States v. E.I. Du Pont de Nemours & Co., 351 U.S. 377, 380, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. A high cross-elasticity of supply, i.e., substitution by sellers, must also be considered in determining a relevant product market. *Blue Cross, 65 F.3d at 1411* (holding definition of submarkets of specific, very narrowly defined medical procedures was unrelated to conditions of supply, where many physicians performed or could perform more than one procedure, and therefore were part of the market if not active in it; holding health maintenance organizations did not constitute market separate from other contractual forms in which many of same doctors sold their services); *see* *General Indus. Corp. v. Hartz Mountain Corp., 810 F.2d 795, 805 (8th Cir. 1987)*, *cert. denied*, *506 U.S. 447, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *cf.* *Lee v. Life Ins. Co. of North America, 23 F.3d 14, 17 (1st Cir. 1994)* (affirming dismissal of *§ 1* claim; appellants **[**50]** could assert no colorable claim that university had appreciable economic power in market for university education or market for health care services, where university competed for students on regional and national level with several universities and colleges, and although university was "unique" in colloquial sense, appellants could not claim other institutions did not or could not provide functionally similar educational offerings); *Midwest Radio Co. v. Forum Publishing Co., 942 F.2d 1294, 1297 (8th Cir. 1991)* (holding proposed definition of relevant product market for mass media advertising was too narrow as a matter of law).

HN27[] A court may determine the boundaries of an antitrust market by analyzing such indicia as industry or public recognition of the market as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers or prices, sensitivity to price changes, and specialized vendors. *Brown Shoe, 370 U.S. at 325*; *Community Publishers, 892 F. Supp. at 1153*.

HN28[] Market definition is not determined by formal labels, but rather takes into account "the realities of competition." *Weiss v. York Hosp., 745 F.2d* ***[**51]*** *786, 826 (3d Cir. 1984)*, *cert. denied*, *470 U.S. 1060, 84 L. Ed. 2d 836, 105 S. Ct. 1777 (1985)*; *accord*, *Langenderfer v. S.E. Johnson Co., 917 F.2d 1413, 1421 (6th Cir. 1991)* (stating market must correspond to commercial realities of industry; following *Brown Shoe, 370 U.S. at 336-37*). Determination of the competitive market depends on how different from one another the offered products are in character or use. *Du Pont, 351 U.S. at 393*. For example, differences exist in the formulas for soft drinks, but each one is not an illegal monopoly. *Id.; see* *Times-Picayune Publ. Co. v. United States, 345 U.S. 594, 613, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)* (holding readership "bought" by advertisers in morning newspaper was same "product" sold by evening newspaper, where nothing suggested advertisers viewed city's morning or evening newspaper readers as other than fungible customer potential).

HN29[] The Sherman Act does not require that products be fungible to be considered in the relevant market. *Du Pont, 351 U.S. at 394*. "In determining the market under the Sherman Act, it is the use or uses to which the commodity is put that control." *Id. at 395*.

Here, Plaintiffs allege **[**52]** the relevant market is cardiac anesthesiology services, a submarket of anesthesiology services. As **[*1099]** discussed above, Plaintiffs contradict this allegation through their many factual assertions regarding general medical care and anesthesiology services. Furthermore, Plaintiffs make no allegations distinguishing the cardiac anesthesiology market from the anesthesiology market in terms of being recognized as a separate economic entity by the industry or public, having peculiar characteristics and uses, requiring unique facilities, featuring distinct prices or sensitivity to price changes, and requiring specialized training. *See Brown Shoe, 370 U.S. at 325*.

Distinct customers, specifically those patients requiring invasive cardiac surgery, are the only indicia that can be inferred from the Corrected Second Amended Complaint as supporting Plaintiffs' narrow product market definition. However, Plaintiffs make no allegations that physician anesthesiologists who offer cardiac anesthesiology services at Genesis are not interchangeable with other physician anesthesiologists, and thus that there are no comparable alternatives available and no cross-elasticity of demand between the services **[**53]** offered by anesthesiologists who provide cardiac anesthesiology and services offered by substitutes for these physicians. *See Id.* Plaintiffs fail to explain how cardiac anesthesiology services are unique and the reasons they have no substitute. The realities of competition in this case are that the cardiac patients could easily have switched from the Plaintiffs to other anesthesiologists, which many presumably did when Genesis chose a new provider group, and thus a high elasticity of demand exists.

Furthermore, a high elasticity of supply exists. The only factual information given relates to Genesis' use of, and staffing patterns for, anesthesiologists. Plaintiffs state that when Genesis sought bids for its exclusive contract for anesthesiology services, it sent information to all anesthesiologists with staff privileges. Plaintiffs do not contend that A&A, the contract winners, are specialists in cardiac anesthesiology. The facts pled imply that other anesthesiologists can supply anesthesiology to cardiac patients.

Because of the length and complexity of cardiac surgery, providing anesthetics during such surgery is likely to require the use of more time and experience and of **[**54]** increased anesthetics than are required during many other types of surgery. This additional input, however, is not enough to carve out a separate market for the provision of anesthetics during cardiac surgery from the market of anesthesiology services; physicians commonly expend more time and skill during certain procedures as compared to others. *See Bhan v. NME Hospitals, Inc., 772 F.2d 1467, 1471 (9th Cir. 1985)* (holding nurse anesthetists and M.D. anesthesiologists competed in same market even though nurse anesthetists required "input" of physician's supervision, where supervision was easily obtainable and common practice in medical profession), *cert. denied*, *502 U.S. 994, 116 L. Ed. 2d 639, 112 S. Ct. 617 (1991)*.

Davies cannot make a colorable claim that other physician anesthesiologists do not or cannot provide anesthesiology for cardiac surgery. *Cf. Blue Cross, 65 F.3d at 1411*; *Lee, 23 F.3d at 17*. Davies' narrow definition of a submarket of cardiac anesthesiology services thus appears unrelated to conditions of supply and demand and fails to take into account the economic realities of the marketplace.

Absent the existence of any other of the specific factors **[**55]** listed in *Brown Shoe*, and considering the contradictory assertions in the Corrected Second Amended Complaint, the Court holds that Plaintiffs' claim of a narrow market for cardiac anesthesiology is insufficient as a matter of law to establish the relevant product market. Plaintiffs therefore cannot identify the effect on the relevant market of Defendants' alleged restraint of trade. *See Flegel, 4 F.3d at 688*.

b. Geographic Market and Market Power

HN30[] The geographic market encompasses the geographic area to which consumers can practically turn for alternative sources of the product and in which antitrust defendants face competition. *Morgenstern, 29 F.3d at 1295* (citing *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 331-32, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961))*.

The *Morgenstern* court recognized the importance of distance and convenience in determining the relevant geographic market. *Morgenstern, 29 F.3d at 1297* (holding as a matter of law that facts did not support proposed relevant market of adult cardiac surgery patients to include Lincoln, Nebraska, and 26 surrounding Nebraska counties extending over 200 miles beyond **[*1100]** Lincoln in certain directions, **[**56]** while excluding heart programs in Omaha, to which Lincoln residents needed to travel only 58 miles by main highway, and programs in other regional and national heart programs).

HN31[] A geographic market is determined by inquiring into the commercial realities faced by consumers. *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 452-56, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*; *Freeman Hospital, 69 F.3d at 270* (holding plaintiff failed to meet burden of establishing relevant market, where expert's analysis based on zip code data gave "a static, rather than a dynamic, picture of that acute care market," by addressing only the question of where patients currently went, rather than where they could practicably go for services); *Bathke v. Casey's General Stores, 64 F.3d 340, 345 (8th Cir. 1995)* (affirming district court's entry of summary judgment against plaintiffs, where gasoline retailers in 67 small Iowa towns sued multi-state retailer of gasoline for alleged predatory pricing and tried to establish each small town as separate geographic market for gasoline, but failed to show where consumers could practicably travel to avoid buying gas at a Casey's store); **[**57]** *United States v. Mercy Health Servs., 902 F. Supp. 968, 981 (N.D.Iowa 1995)*, *vacated as moot*, *107 F.3d 632 (8th Cir. 1997)* (holding relevant geographic market was not county in which hospitals were located and half-circle within 15-mile radius extending from county's edge; significant number of Dubuque, Iowa, residents used University of Iowa Hospitals and Clinics in Iowa City, a 90-mile drive, due to factors including quality and price concerns).

The market for a hospital's specialized medical services may encompass a broader geographic area than the market for its general medical services. *Freeman Hospital, 69 F.3d at 271* (noting that as patients came to three Joplin, Missouri, hospitals to receive specialized, sophisticated services, hospitals in larger cities in four-state area, such as Springfield and Kansas City, Missouri, or Tulsa, Oklahoma, might become viable competitive alternatives to Joplin hospitals).

In the instant case, Plaintiffs' allegations do not address the critical question of where consumers of cardiac anesthesiology services could reasonably turn for alternative care.

The Corrected Second Amended Complaint states Genesis is the only hospital in **[**58]** the Quad Cities and surrounding area that provides invasive cardiology and cardiac surgery care. Plaintiffs describe the surrounding area as comprising 23 counties, but do not identify which counties are in which states. A map shows the following listed counties are in Iowa: Cedar, Clinton, Jackson, Jones, Louisa, Muscatine, and Scott, and the following counties are in Illinois: Carroll, Bureau, Hancock, Henderson, Knox, Marshall, McDonough, Mercer, Ogle, Putnam, Rock Island, Stark, Warren, and Whiteside. The Corrected Second Amended Complaint lists two counties, Henry and Lee, that could be in either Iowa or Illinois. The area stretches approximately 200 miles north to south in Illinois, and approximately 100 miles north to south in Iowa. The area extends in some locations to approximately 100 miles wide.

In Iowa, parts of Louisa, Muscatine, Cedar, and Jones counties are closer to the University of Iowa Hospital and Clinics (UIHC) in Iowa City, Iowa, than to the Quad Cities. (*See* Appendix A.) Davenport is approximately 56 miles from Iowa City. UIHC provides surgical services and is easily accessible to many residents of these counties by interstate and state highways. [8] Similarly, **[**59]** in Illinois, cardiac services and surgery are easily accessible by

[8] The Court cannot ignore the commercial reality, well known in Iowa, that UIHC is a major tertiary care center, any more than it could ignore in an antitrust case involving proposed markets for county fairs the existence of the Iowa State Fair in Des Moines.

As noted in another case, "[A] significant number of Dubuque residents use the University of Iowa Hospitals and Clinics . . . a ninety mile drive, due to quality concerns." *Mercy Health Servs., 902 F. Supp. at 982*. Therefore, it is reasonable to assume that a significant number of Quad Cities residents use the UIHC, which for them is approximately a 56-mile drive. Not to consider the impact of UIHC on this market would be similar to ignoring an elephant in the room.

interstate and state highways to many residents of **[*1101]** counties in the designated geographic market. Reviewing the areas identified by Plaintiffs as relevant, it appears that portions of McDonough and Hancock Counties are closer to Springfield, the location for Southern Illinois University's medical school and hospital, than to the Quad Cities. Areas of Ogle and Lee Counties are closer to Chicago, home to several medical schools, hospitals and medical centers, than to the Quad Cities. Ogle County abuts the city of Rockford (population approximately 139,426), and portions of Bureau, Marshall, Stark, and Knox counties are closer to Peoria (population approximately 111,504) than to the Quad Cities. Considering these populations, it would be unreasonable to infer residents of the Quad Cities area could not practicably turn to hospitals in Rockford or Peoria for cardiac surgery.

[60]** A proper market definition can most often be determined only after a factual inquiry into the commercial realities facing consumers. *Double D Spotting Service*, No. 97-1456, slip op. at 8. "This general rule, however, does not amount to a per se prohibition against dismissal of antitrust claims for failure to plead a relevant market under *Fed.R.Civ.P. 12(b)(6)*." *Id.* (internal quotations omitted).

In assessing the sufficiency of Plaintiff's claim under *Fed.R.Civ.P. 12(b)(6)*, the Court cannot ignore blatant geographic and commercial realities referenced by the pleadings. As a matter of law, Plaintiffs' stated geographic market is too narrow to support the claimed antitrust violation. *See Double D Spotting Service*, No. 97-1456, slip op. at 8 (dismissing antitrust claim on grounds geographic market alleged to be one Supervalu warehouse in suburb was too narrow to support claim, stating, "the market for [truck] unloading services would seem to be more properly defined as including all warehouses within, at least, the entire . . . metropolitan area, if not an even larger area.") Facts in the Corrected Second Amended Complaint do not adequately identify a relevant geographic **[**61]** market, and therefore Plaintiffs cannot establish market power by identifying the effect on the relevant market of Defendants' alleged restraint of trade. If not, then injuring Plaintiffs might have no effect on the market as distinct from the harm to Plaintiffs.

The Court holds the factual allegations in Plaintiffs' Corrected Second Amended Complaint do not adequately plead the existence of a relevant product and geographic market and therefore do not state a Section I antitrust claim. The Court grants Defendants' Motions to Dismiss the second cause of action.

3. Section 2 Claim (Count III)

HN32[] *Section 2* provides that, "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fines not exceeding fifty thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court." *15 U.S.C.A. § 2*.

Plaintiffs allege Defendants violated *Section 2* by monopolizing, attempting to monopolize, **[**62]** and forming a conspiracy to monopolize the market for cardiac anesthesiology.

HN33[] To avoid dismissal of its complaint, a plaintiff asserting a claim under *Section 2* must allege a relevant product and geographic market. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)* (attempt to monopolize); *Double D Spotting Service*, No. 97-1456, slip op. at 7 (same); *Morgenstern, 29 F.3d at 1295-96* (monopolize); *Alexander v. National Farmers Org., 687 F.2d 1173, 1182 (8th Cir. 1982)* (conspiracy) [9], *cert. denied*, *461 U.S. 937, 77 L. Ed. 2d 313, 103 S. Ct. 2108, 461 U.S. 938, 77 L. Ed. 2d 314, 103*

---

[9] ***HN34***[] The Eighth Circuit does not require as rigorous a showing for the relevant market in the context of a conspiracy claim as for a showing for the relevant market for other *Section 2* claims. *See* *Alexander, 687 F.2d at 1182* (holding civil conspiracy claim, standing alone, requires at least minimal showing of product and geographic context to ensure claim is not based on some abstract showing of unlawful intent). Even applying a less rigorous standard than for Plaintiffs' other *Section 2* claims, the Court holds that for the reasons outlined above, Plaintiffs have not adequately pled the showing of a relevant market required for a *Section 2* conspiracy claim. To hold otherwise would permit a fact finder to infer a conspiracy where such an inference is

S. Ct. 2110 **[*1102]** *and 461 U.S. 939 (1983)*; *accord* *TV Communications Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1028* (10th Cir.), *cert. denied*, *506 U.S. 999, 121 L. Ed. 2d 537, 113 S. Ct. 601 (1994)* (affirming dismissal of amended complaint because plaintiff "did not allege a relevant product market which [defendant] was capable of monopolizing, attempting to, or conspiring to monopolize"); *B.V. Optische Industrie de Oude Delft, 909 F. Supp. 162 (S.D.N.Y. 1995)* (dismissing *§ 2* attempted monopoly claim, where plaintiff failed to adequately show relevant product market was chest **[**63]** equalization radiography and that no other persons besides parties had capacity to provide radiography equipment in United States; plaintiff did not refer to any reasonably interchangeable alternatives and did not explain why market was defined in such narrow terms).

[64]** ***HN35***[] An exclusive provider contract, without more, does not violate *Section 2*. *Vakharia, 917 F. Supp. at 1302* (noting Seventh Circuit had long since determined that a single hospital's staffing decision did not give rise to *§ 2* claim).

For the reasons discussed above, Plaintiffs have not adequately pled a relevant product or geographic market. Therefore, the Court holds that Plaintiffs' complaint does not state a *Section 2* antitrust claim. The Court grants Defendants' Motions to Dismiss the third cause of action.

C. Title VII (Count IV)

Plaintiffs assert A&A discriminated against Davies in employment because of his national origin. He was born and educated in South Wales.

Defendant A&A argues, and Plaintiffs admit, that Plaintiffs' complaint does not properly identify A&A as an employer as defined in *42 U.S.C. § 2000e(b)*, which is required for federal court jurisdiction. Specifically, Plaintiffs do not claim that A&A ***HN36***[] "has fifteen or more employees for each working day in each of 20 or more calendar weeks in the current or preceding calendar year." *42 U.S.C. § 2000e(b)*. [12]

[65]** ***HN37***[] The Court is limited to a review of the pleadings under a *Fed.R.Civ.P. 12(b)(6)* motion to dismiss. Because Plaintiffs have not pled any facts identifying A&A as an employer as defined in *42 U.S.C. § 2000e(b)*, including whether A&A has fifteen or more employees, the Court grants A&A's Motion to Dismiss this claim.

D. Supplemental State Claims (Counts V to IX)

Having granted Defendants' RICO, Sherman Act, and Title VII claims, the Court turns to the remaining supplemental state claims in Counts V to IX. Of these, Defendants moved to dismiss Count V, Iowa Antitrust laws, and Count VII, defamation.

---

implausible. *Cf.* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 593, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* (analyzing market in context of whether alleged conspirators had plausible chance of achieving monopoly in market, and therefore motive for conspiring; stating courts should not permit fact finders to infer conspiracies when such inferences are implausible, because otherwise procompetitive conduct could be deterred).

[12] The Court notes that several courts have determined that shareholders in professional corporations were not "employees" for purposes of determining whether a corporation had the required number of employees to qualify as a "employer" under Title VII. *See* *Devine v. Stone, Leyton & Gershman, 100 F.3d 78, 82 (8th Cir. 1996)*, *cert. denied*, ***137 L. Ed. 2d 821, 117 S. Ct. 1694 (1997)*** (holding attorney shareholder-directors of professional corporation were not employees; adopting "form over substance" test); ***Goudeau v. Dental Health Servs., Inc., 901 F. Supp. 1139, 1147 (M.D. La. 1995)*** (holding dentist shareholders in professional corporation were not employees; where management, ownership, and control of corporation resembled that of partnership). However, because this is raised as a motion to dismiss, the Court makes no findings as to the number of employees A&A has.

1. Iowa Antitrust Laws (Count V)

Plaintiffs brought their state antitrust claim under ***HN38***[] *Iowa Code § 553.5*, which prohibits monopoly and the attempt to monopolize: "A person shall not attempt to establish or establish, maintain, or sue a monopoly of trade or commerce in a relevant market for the purpose of excluding competition or of controlling, fixing, or maintaining prices." [13] *Iowa Code § 553.5* (1996).

[66] [*1103]** Defendants rely on *Iowa Code § 553.2* for the proposition that Plaintiffs' Iowa antitrust claims should be dismissed for the same reasons their federal antitrust claims are dismissed. Plaintiffs counter that the Corrected Second Amended Complaint states a valid cause of action under Iowa's Antitrust Laws.

HN40[] *Iowa Code § 553.2* provides as follows:

> This chapter shall be construed to complement and be harmonized with the applied laws of the United States which have the same or similar purposes as this chapter. This construction shall not be made in such a way as to constitute a delegation of state authority to the federal government, but shall be made to achieve uniform application of the state and federal laws prohibiting restraints of economic activity and monopolistic practices.

Iowa Code § 553.2.

HN41[] When interpreting Iowa antitrust statutes, Iowa courts are required by *Section 553.2* to give considerable weight to federal cases construing similar sections of the Sherman Act. *Neyens v. Roth, 326 N.W.2d 294, 297-98 (Iowa 1982)* (holding district court erred in concluding § 553.6(4)'s exemption applied to defendants; stating reasoning of United States Supreme Court **[**67]** case, filed after district court's ruling, required reflection of defendants' argument, even though federal statute regarding exemption for antitrust liability had different rationale than § 553.6(4)'s rationale); *accord* *Federal Land Bank of Omaha v. Tiffany, 529 N.W.2d 294, 296 (Iowa 1995)* (holding, because federal case law had held farm credit banks were not subject to federal ***antitrust law***, such banks were exempt under Iowa ***antitrust law***), *cert. denied*, *516 U.S. 1043, 116 S. Ct. 700, 133 L. Ed. 2d 657 (1996)*; *Northwestern Bell Tel. Co. v. Iowa Utils. Bd., 477 N.W.2d 678, 684-86 (Iowa 1991)*; *State v. Cedar Rapids Bd. of Realtors, 300 N.W.2d 127 (Iowa 1981)* (applying rule of reason from federal antitrust cases).

Section 553.5's prohibition against attempts to monopolize and monopolization closely resemble the Sherman Act, *Section 2*'s, prohibition against attempts to monopolize and monopolization. [14] *See Double D Spotting Service*, No. 97-1456, slip op. at 9.

[68]** Because Plaintiffs' claims of attempt to monopolize and monopolization are dismissed under *Section 2* of the Sherman Act, which is similar to *Section 553.5*, and because ***HN43***[] *Section 553.2* requires a "uniform application of state and federal laws prohibiting restraints of economic activity and monopolistic practices," the Court holds Iowa courts would interpret *Section 553.5* to require dismissal of Count V.

Therefore, the Court grants Defendants' Motion to Dismiss Count V for the reasons discussed regarding dismissal of Count III.

2. Counts VI to IX

---

[13] ***HN39***[] "Relevant market" is defined as "the geographical area of actual or potential competition in a line of commerce, all or any part of which is within this state." *Iowa Code § 553.3(6)*.

[14] ***HN42***[] The Sherman Act, *Section 2*'s, prohibition against conspiracy to monopolize has a counterpart in *Iowa Code § 553.4*, which also prohibits the restraint of trade: "A contract, combination, or conspiracy between two or more persons shall not restrain or monopolize trade or commerce in a relevant market." *Iowa Code § 553.4*.

Defendants did not challenge Count VI (intentional interference with contractual relations); Count VIII (intentional infliction of emotional distress), or Count IX (breach of contract). Defendants sought dismissal of Count VII (defamation).

Pursuant to *28 U.S.C. § 1367(c)(3)*, the Court declines to exercise jurisdiction over the remaining state law claims. *See* *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*; *Pioneer Hi-Bred Internat'l v. Holden Foundation Seeds, Inc., 35 F.3d 1226, 1242 (8th Cir. 1994)*; *Moebus v. Ob-Gyn Assocs., Inc., 937 F. Supp. 867, 870 (E.D. Mo. 1996)*. The **[**69]** Court therefore will dismiss the remaining state law claims without prejudice. The Court anticipates that should Plaintiffs replead their defamation claim in state court, they will take into account the challenges to the claim Defendants raised here.

V. Conclusion.

Because Plaintiffs have not pled the conduct of an enterprise, a pattern of racketeering activity, or probable cause under RICO, the Court grants Defendants' Motions to Dismiss **[*1104]** Count I. Because Plaintiffs lack federal antitrust standing, and have failed to state a claim for violation of *Sections 1* and *2* of the Sherman Act, the Court grants Defendants' Motions to Dismiss Counts II and III. Because Plaintiffs have not identified Defendant A&A as an employer as defined in *42 U.S.C. § 2000e(b)*, the Court grants Defendant A&A's Motion to Dismiss Count IV. Giving considerable weight to federal cases construing sections of the Sherman Act that are similar to *Iowa Code § 553.5*, the Court grants Defendants' Motions to Dismiss Count V.

The Court dismisses the remaining state law claims, Counts VI through IX, without prejudice to Plaintiffs' right to assert their state law claims in state court. [15]

[70]** The Motions to dismiss (Clerk's Nos. 9, 11, 30, and 31) are granted, subject to Plaintiffs' right to assert their state law claims in state court.

IT IS SO ORDERED.

Dated this 12th day of February, 1998.

CELESTE F. BREMER

---

[15] In their brief in resistance to Defendants' Motions to Dismiss, Plaintiffs requested leave to amend the Second Corrected Amended Complaint if the Court granted Defendants' motions. ***HN44***[] *Rule 15(a) of the Federal Rules of Civil Procedure* states that leave to amend "shall be given freely when justice so requires." *Foman v. Davis, 371 U.S. 178, 182, 9 L. Ed. 2d 222, 83 S. Ct. 227 (1962)*; *see* *In re NationsMart Corp. Securities Litigation v. Thaman, 130 F.3d 309, 322 (8th Cir. 1997)*. Permission to amend may, however, be denied where amendment would be futile. *Taylor v. United States, 106 F.3d 833, 838 (8th Cir. 1997)*.

Plaintiffs have not submitted a proposed amendment. Although approximately five months have passed since Defendants filed their motions to dismiss, Plaintiffs have made no attempt to remedy the defects in the Second Corrected Amended Complaint identified by Defendants. Plaintiffs have already amended their complaint twice, the second time in response to Defendants' first round of motions to dismiss. Nothing in Plaintiffs' brief in support of their resistance to the motions to dismiss indicates what a third amended complaint would have contained. "***HN45***[] Absent some indication as to what might be added to the complaint to make it viable, the appellant is not entitled to leave to amend." *Wolgin v. Simon, 722 F.2d 389, 395 (8th Cir. 1983)* (affirming district court's denial of leave to amend, where in brief in opposition to motion to dismiss, plaintiff requested leave to amend complaint, but did not submit proposed amendment; court could not rule on question of amendment, and granting leave to amend would have been inappropriate); *accord* *Clayton v. White Hall School District, 778 F.2d 457, 460 (8th Cir. 1985)*; *cf.* *Oliver v. Resolution Trust Corp., 955 F.2d 583, 584 (8th Cir. 1992)*.

For these reasons, and because the contradictions between the facts pled and the claims asserted persuade the Court that any attempt to amend would be futile, the Court denies Plaintiffs' request to amend their complaint for a third time. *See* ***Patel, 91 F.3d 132, 1996 WL 383920***, at *4.

HN1[ ] **Supporting Materials, Discovery Materials**

Fed. R. Civ. P. Rule 56(c) provides that summary judgment shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. When considering a motion for summary judgment, all inferences and ambiguities must be resolved in favor of the party against whom summary judgment is sought. If, after considering the evidence in the light most favorable to the nonmoving party, the court finds that no rational jury could find in favor of that party, a grant of summary judgment is appropriate.

HN2[] **Parker State Action Doctrine, Local Governments & Private Parties**

The United States Supreme Court has held that private companies can be held immune from liability under federal ***antitrust law*** if their allegedly anticompetitive conduct was authorized and regulated by the state. The conduct is exempt under the state action defense if two requirements are met. First, the state has articulated a clear and affirmative policy to allow the anticompetitive conduct, and second, the state provides active supervision of anticompetitive conduct undertaken by private actors.

Opinion

[*173] DECISION and ORDER

INTRODUCTION

Plaintiff the United States of America brings this action against defendant Rochester Gas and Electric Corporation, ("RG&E"), pursuant to *Section 1* of the Sherman Act, codified at *15 U.S.C. § 1*, alleging that RG&E has engaged in anticompetitive acts. Specifically, plaintiff alleges that RG&E illegally engaged in anticompetitive activities by entering into a contract with **[**2]** the University of Rochester, ("University" or "U of R") whereby, *inter alia,* RG&E promised to provide electricity to the U of R at reduced rates in return for, *inter alia,* the University's promise not to compete against RG&E in the sale of electricity to consumers. Complaint at P 15. According to the United States, RG&E entered into its agreement with the U of R for the purpose of preventing the University from constructing a competing power producing facility. The United States alleges that as a result of the agreement between the U of R and RG&E, the University discontinued its plans to produce a power generating facility, thereby preventing a potential competitor from entering the market. The Government contends that RG&E's actions in preventing a potential competitor from entering the market were harmful to consumers in that RG&E denied consumers an alternative source from which to buy electricity, and increased costs for other RG&E customers who were required to pay more for electricity to offset the discounts that were given to the U of R.

Defendant RG&E moves pursuant to *Rule 56 of the Federal Rules of Civil Procedure* for summary judgment on grounds that it is immune **[**3]** from antitrust liability under the state action doctrine, and in the alternative, that it has not engaged in any anticompetitive behavior. The United States cross-moves for summary judgment claiming that RG&E is subject to antitrust liability, and that as a matter of law, defendant engaged in anticompetitive activity prohibited by the Sherman Act. Plaintiff also moves to strike portions of an affidavit submitted in support of defendant's motion for summary judgment.

The New York State Attorney General's office submits an amicus curiae brief contending that RG&E should not be immune from antitrust liability under the state action doctrine.

BACKGROUND

The following facts are uncontested except where noted. Sometime in the late 1980's or early 1990's, in an effort to reduce energy costs, the University of Rochester began to consider generating its own power using a "cogeneration" facility. A cogeneration facility is a powerplant that burns fuel to produce two types of energy: electricity and steam. The U of R used electricity throughout its campus, and used steam to heat and cool its buildings.

In early 1993, University President Dennis O'Brien convened a special task group to **[**4]** study the feasibility of constructing and operating a cogeneration facility. After months of study, the task group determined that a cogeneration facility would be a viable source of energy for the University. The group concluded that a 23 megawatt plant would be required, and that the cost of such a plant **[*174]** would be approximately $ 36 million. The task group determined that because the plant would generate more electricity than required by the University, approximately one-third of the electricity produced could be sold. According to the United States, the U of R considered selling this electricity to other consumers, including the Rochester Institute of Technology. RG&E contends that the University planed to sell the electricity back to RG&E.

On July 20, 1993, the Executive Committee of the Board of Trustees of the University of Rochester voted to authorize officers of the University to proceed with development of a 23 megawatt cogeneration facility, and allocated $ 1.3 million to initiate that development. Soon thereafter, RG&E approached the University with a proposal to sell electricity to the University at a discounted rate, and to provide other financial incentives that would **[**5]** negate any savings that would have been realized through the school's production of its own steam and electricity. The University negotiated the proposal with RG&E, and on October 27, 1993, the parties entered into a "Memorandum of Understanding," ("MOU"), which served as the basis for a contract which followed. The MOU explicitly acknowledged that the University had alternative sources of energy that might be available to it including "the installation of a cogeneration power plant . . . ." Given those circumstances, the parties agreed that, *inter alia:* (1) the University would remain an RG&E customer until December 31, 2000; (2) the University would pay a specified discounted rate for electricity; (3) RG&E would make yearly grants to the University of at least $ 163,000 to be used by the school to pay for energy efficiency projects; (4) RG&E would continue to make yearly research and development grants to the University averaging $ 400,000 per year; (5) the University would enter into an contract with an RG&E sponsored contractor under which RG&E would fund energy efficiency projects recommended by the contractor; and, (6) the University would be allowed to continue to study **[**6]** alternative sources of energy, but the studies would be "confined to the service of the University's own needs." *See* Memorandum of Understanding, Attached as Exhibit 4 to Plaintiff's Statement of Uncontested Facts.

Based on the MOU, RG&E and the University entered into an Individual Service Agreement, ("ISA"), on March 31, 1994. Under the ISA, the University agreed to remain a customer of RG&E until December 31, 2000. Additionally, in return for: (1) reduced rates on electricity service; (2) an "inducement" payment to induce the University to forego other electric supply options; (3) payments to the University for implementing energy-saving projects; and (4) payments to the University for entering into a contract with an energy service company and implementing energy-saving projects recommended by the company, (guaranteed to be at least $ 1,743,000), the University agreed, during the term of the agreement, "not to solicit or join with other customers of RG&E to participate in any plan designed to provide them with electric power and/or thermal energy from any source other than RG&E." *See* Individual Service Agreement, attached as Exhibit 5 to Plaintiff's Statement of Uncontested **[**7]** Facts at P 6.3.

DISCUSSION

I. *Motions for Summary Judgment*

HN1[] *Rule 56(c) of the Federal Rules of Civil Procedure* provides that summary judgment "shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." When considering a motion for summary judgment, all inferences and ambiguities must be resolved in favor of the party against whom summary judgment is sought. *Gallo v. Prudential Residential Services, 22 F.3d 1219, 1223 (2d Circ. 1994)*. If, after considering the evidence in the light most favorable to the nonmoving party, the court finds that no rational jury could find in favor of that party, a grant of summary judgment is appropriate. *Id. at 1224*.

Defendant moves for summary judgment on two grounds. First, defendant claims that it is immune from antitrust liability under **[*175]** the state action doctrine, and therefore is entitled to judgment as a matter of law. Second, RG&E argues that even if it is not immune from antitrust liability, it can not be held **[**8]** liable under the Sherman Act because its actions did not violate ***antitrust law***. The Government moves for summary judgment on grounds that the contract between RG&E and the U of R is a *per se* violation of the Sherman Act, in that it restrains trade by preventing a potential competitor from entering the market.

II. *Defendant's Motion*

A. *State Action Doctrine.*

Defendant argues that it is immune from antitrust liability under the state action doctrine as first espoused by the Supreme Court in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, and as interpreted in *Southern Motor Carriers Rate Conference, Inc. v. U.S., 471 U.S. 48, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)*. In *Southern,* ***HN2***[] the Supreme Court held that private companies could be held immune from liability under federal ***antitrust law*** if their allegedly anticompetitive conduct was authorized and regulated by the State. The Court held that:

> Conduct is exempt under the state action defense if two requirements are met. First, the State has articulated a clear and affirmative policy to allow the anticompetitive conduct, and second, the State provides active supervision of anticompetitive **[**9]** conduct undertaken by private actors.

Southern, 471 U.S. at 56, 57. According to RG&E, because utility companies are authorized by New York State law to negotiate discounted rates with customers who are capable of obtaining electricity from other sources, (including other suppliers or self-generation), and because the discounting of rates is closely supervised by the New York Public Service Commission, RG&E should be held immune from antitrust liability under the state action doctrine. Plaintiff, and the New York State Attorney General, who appears as an *amicus curiae,* oppose defendant's contention that it is immune from antitrust liability under the state action doctrine.

HN3[] While it is true that under New York law a utility company may negotiate discounted rates with certain qualified consumers, and that discounting rates is carefully supervised by the New York Public Service Commission to prevent abuse of such a practice, New York law does not authorize utility companies to offer discounted rates to potential competitors for the purpose of preventing those potential competitors from becoming actual competitors. Thus, while RG&E may be correct in arguing that the discounting **[**10]** of electricity rates under New York law does not violate federal antitrust laws, that conclusion does not end the inquiry. The United States contends that RG&E went too far in negotiating the discounted rate by imposing a condition in the agreement the provision that the University not compete with RG&E, nor solicit or join with RG&E customers to generate electricity. It is that aspect of the agreement that the United States claims is violative of federal ***antitrust law***.

I find nothing in the New York Public Service Law or its legislative history supporting RG&E's contention that it is authorized under that law to impose anti-competitive conditions on potential competitors in return for discounted utility rates. *New York Public Service Law § 66(12-b)(a)* provides that the Public Service Commission may authorize reduced "incentive" rates that utilities may offer to customers "in order to prevent loss of such customers . . . ." *N.Y. Pub. Serv. Law § 66(12-b)(a)* (McKinney, 1989) The legislative history of this Section indicates that the New York legislature was concerned with the loss of business and industry in New York State, and the "severe economic hardship and dislocation" that **[**11]** occurred as a result of that loss. 1983 N.Y. Laws 626. The legislature "determined that the cost of utility services can be a significant factor in retaining and attracting healthy businesses and employment opportunities . . . ." 1983 N.Y. Laws 626. Accordingly, the legislature authorized the Public Service Commission to identify areas in New York where "reduced economic activity, unemployment and underutilization of utility facilities justifies the approval of reduced incentive rates for utility services . . . ." *N.Y. Pub. Serv. Law § 66(12-b)(a)* (McKinney, **[*176]** 1989). Based on the language of the statute, and the legislative history, it is clear that New York Law does not expressly authorize utility companies to offer discounted rates to consumers who are also potential competitors for the purpose of inducing them not to compete against the utility.

RG&E contends, however, that the contract with the University prohibiting competition was a foreseeable result of the State's policy of allowing discounted rates, and accordingly, it is implicitly authorized under the Public Service Law. *See* *Cine 42nd Street Theater Corp. v. Nederlander Organization, Inc., 790 F.2d 1032, 1043 (2nd Cir.* ***[**12]*** *1986)* (anticompetitive activities that are a foreseeable consequence of state delegation satisfy the *Southern* requirement that the state articulate a clear and affirmative policy to allow anti-competitive conduct). According to RG&E, such a contract was foreseeable because, "if the University were permitted to participate in a plan [to purchase electricity from an alternative source] with other RG&E customers that would result in the loss of those other customers, the goal of the flexible rate tariff [maintaining the utilities' full system capacity] would have been thwarted." Memorandum of Law in Support of Motion for Summary Judgment at p. 16.

I find that the New York Public Service Law does not permit a utility to offer discounts to a potential competitor in return for that competitor's promise not to compete. Despite RG&E's contention that the goal of the State's policy is to maintain full capacity of utilities, I find that the goal of the State's policy of offering lower utility rates is to reduce utility costs and retain or attract businesses based on those lower utility costs. Competition from "cogenerators" in the sale of electricity is consistent with that goal: it **[**13]** lowers the utility costs of the cogenerator, and keeps the cogenerator in the area. Moreover, because cogenerators are in most cases exempt from the State rate regulations imposed on utility companies, cogenerators may under certain circumstances, sell their excess electricity directly to consumers at a reduced rate, thus giving consumers a choice between electric providers. Accordingly, I find that the State's policy of allowing discounted rates does not implicitly authorize anticompetitive actions on the part of Utilities seeking to prevent potential competitors from entering the market.

Finally, RG&E argues that its contract, and the allegedly anticompetitive provisions contained therein, are authorized under State law on grounds that the Public Service Commission has rigorously reviewed the contract, and has found it to be not only acceptable under New York State Law, but a model for agreements offering rate reductions. The Public Service Commission, however, is not charged with enforcing federal ***antitrust law***, and did not review the contract to determine whether or not it violates that law. The fact that the New York Public Service Commission has approved the contract at issue **[**14]** does not mean that the State has authorized, and shielded from federal law, allegedly anticompetitive behavior. I thus deny defendant's motion for summary judgment on grounds that it is immune from antitrust liability.

B. *Alleged Antitrust Activity.*

Defendant argues in the alternative that even if it is not shielded from antitrust liability, the conduct it engaged in was not anticompetitive as a matter of law and it is entitled to summary judgment. RG&E makes two arguments in support of this claim. First, it contends that because the University was neither a competitor, nor a potential competitor in the electricity market, an agreement between the two not to compete can not violate the Sherman Act. *See TV Communications Network, Inc. v. ESPN, Inc., 767 F. Supp. 1062, 1075 (D. Col. 1991)* (agreement between non-competitors does not violate *§ 1* of the Sherman Act); *aff'd 964 F.2d 1022 (10th Cir 1992)*; *cert. denied, 506 U.S. 999 (1992)*. Second, RG&E argues that the Government's claims against RG&E are based on unwarranted speculation about the University's ability to become a *bona fide* competitor. I find that a question of fact exists as to whether or not the University **[**15]** intended to compete against RG&E, and therefore, deny defendant's motion for summary judgment.

[*177] In support of its argument that the University did not intend to compete with RG&E, defendant submits an affidavit from Richard W. Greene, ("Greene"), Executive Vice President and Treasurer of the University of Rochester. Greene states that at the time the University negotiated the contract with RG&E, it had no intention to sell energy to RG&E customers. Greene affidavit at P 17. However, Green also admitted that the University considered competing directly with RG&E by selling output from the proposed cogeneration plant, but that "to the best of [his] knowledge," no plan to sell electricity to other facilities was adopted. Greene affidavit at P 15. Additionally, William Daigneau, ("Daigneau"), who at the relevant time was the Director of University Facilities, stated that the University had considered building "a [cogeneration] plant that would be located on our south campus that would provide much more power than what we could consume individually . . . which could be wheeled or perhaps used by other institutions." Deposition of William A. Daigneau at pp 35-6. Additionally, Daigneau **[**16]** could not recall whether or not the University engaged in discussions with other institutions regarding the possibility of building a cogeneration plant. It is thus uncontroverted that at least at some point during the University's planning, it considered becoming a competitor of RG&E. Greene's contention that to the "best of his knowledge" the University never seriously pursued selling to outside sources, and Daigneau's failure to recall whether discussions took place with potential consumers of University-supplied power at least makes it unclear whether or not the University was a potential competitor. Thus, the important question of whether or not the U of R was a potential competitor of the University is a question of fact for the trier of fact.

Next, RG&E argues that the Government's characterization of the U of R as a potential competitor of RG&E is too attenuated, and therefore, its theory of recovery against RG&E is too speculative to go forward. According to RG&E, even if the University had intended to compete with RG&E, actually doing so was fraught with legal and regulatory obstacles that could have prevented it from entering the market despite its intent to do so. For **[**17]** example, RG&E points out that if the U or R had attempted to sell electric power, it would have had to first obtain approval from the Public Service Commission, and then it would have been subject to the Commission's regulatory control, (unless it came under a narrow exception applicable to certain cogeneration facilities). Also, if the University were to sell electricity to the Rochester Institute of Technology, it would have had to apply for and have had approved franchises from the City of Rochester and the towns of Brighton and Henrietta to deliver the electricity. RG&E claims that because the Government has failed to demonstrate that the University could have actually competed with it, the plaintiff's claim is too speculative, and must be dismissed.

I find that while the Government's theory that the University intended to compete with RG&E is based on some speculation, the question of whether or not the University actually intended to compete with RG&E is a question of fact, that must be resolved by a trier of fact and summary judgment must be denied.

III. *Plaintiff's Motion for Summary Judgment.* Plaintiff asserts that the agreement between the defendant and the University **[**18]** not to compete is a *per se* violation of ***antitrust law***. However, ***HN4***[] a contract between non-competitors to not compete does not violate the antitrust laws. *TV Communications Network, Inc., 767 F. Supp. at 1075*; *cert. denied, 506 U.S. 999 (1992)*. Because there is a question of fact as to whether or not the University was a potential competitor of RG&E, I cannot hold that as a matter of law this agreement is evidence of a *per se* violation of the antitrust laws and, therefore, plaintiff's motion for summary judgment is also denied.

IV. *Plaintiff's Motion to Strike.*

Plaintiff moves to strike portions of an affidavit of Thomas Fogg, Manager of Regulatory Affairs for RG&E during the relevant time period, as not based on personal **[*178]** knowledge, and because they contain legal arguments. I deny plaintiff's motion to strike.

CONCLUSION

Because a material, triable issue of fact exists as to whether or not the University of Rochester was a *bona fide* potential competitor of the defendant, I deny both parties' motions for summary judgment. Additionally, I deny plaintiff's motion to strike. This case will proceed to a bench trial on April 27, 1998 at 9:00 a.m. Pretrial submissions **[**19]** shall be submitted to the Court no later than April 22, 1998 by 12:00 p.m.

ALL OF THE ABOVE IS SO ORDERED.

MICHAEL A. TELESCA

United States District Judge

HN5[] Antitrust & Trade Law, Sherman Act

Federal and Florida antitrust laws are analyzed under the same rules and case law. *Fla. Stat. ch. 542.32*. "It is the intent of the Legislature that, in construing this chapter, due consideration and great weight be given to the interpretations of the federal courts relating to comparable federal antitrust statutes."; The Florida legislature has, in effect, adopted as the law of Florida the body of ***antitrust law*** developed by the federal courts under the Sherman Act.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A restraint may be violative of the Sherman Act because it is solely a naked restraint of trade so offensive to competition as to be unreasonable per se, or because it runs afoul of the more detailed rule of reason inquiry.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A rule of reason is generally applied to determine what acts are permissible. Thus, a presumption exists that the circumstances of a case will be looked at in the light of the rule of reason standard and will not be deemed per se unreasonable. But, there are no bright lines. The decision to apply the per se rule instead of the rule of reason turns on whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output or instead one designed to increase economic efficiency and render markets more, rather than less, competitive. Considerable inquiry into the market conditions and market power of the defendant is often necessary before conduct can be presumed to be anticompetitive.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

That price fixing is equally violative of antitrust laws whether it is done by buyers or sellers is undisputed. And, it is no excuse that the price fixed is reasonable. But whether the per se rule should apply is not a question simply of determining whether two or more potential competitors have literally fixed a price.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN9[] Regulated Practices, Price Fixing & Restraints of Trade

That price-fixing includes more than the mere establishment of uniform prices is clearly evident. Prices are fixed if the range within which purchases or sales will be made is agreed upon, if the prices paid or charged are to be at a certain level or on ascending or descending scales, if they are to be uniform. They are fixed because they are agreed upon.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN10[] Regulated Practices, Price Fixing & Restraints of Trade

Not all arrangements among actual or potential competitors that have an impact on price are per se violations of the Sherman Act or even unreasonable restraints.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Express Contracts

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN11[] Cartels & Horizontal Restraints, Price Fixing

In the context of a blatant agreement to fix prices, it makes no difference whether the motives of the participants are good or evil; whether the price fixing is accomplished by express contract or by some more subtle means; whether the participants possess market control; whether the amount of interstate commerce affected is large or small; or whether the effect of the agreement is to raise or to decrease prices.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Business & Corporate Compliance > ... > Business & Corporate Law > Cooperatives > Formation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

HN12[] **Practices Governed by Per Se Rule, Boycotts**

Not all concerted refusals to deal are predominantly anticompetitive. In cases of group boycotts where the per se rule has been applied, the boycott often cuts off access to a supply, facility, or market necessary to enable the boycotted firm to compete, and frequently the boycotting firms possessed a dominant position in the relevant market. Unless the cooperative possesses market power or exclusive access to an element essential to effective competition, the conclusion that the conduct is virtually always likely to have an anticompetitive effect is not warranted.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The rule of reason requires the factfinder to weigh all of the circumstances of the case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. The rule of reason should be applied to practices designed to increase economic efficiency or render markets more, rather than less, competitive. To satisfy the rule of reason, the plaintiff must prove that the conduct had an adverse effect on competition.

Opinion

---

[*] Honorable Harry W. Wellford, Senior U.S. Circuit Judge Sixth Circuit, sitting by designation.

[*743] EDMONDSON, Circuit Judge:

Two separate actions (with different plaintiffs) against the same defendants for alleged antitrust violations have been consolidated and are treated as one appeal. Plaintiffs appeal a jury verdict for defendants on antitrust claims. They also appeal the jury verdict against them on counterclaims for state and federal RICO violations. Many **[**2]** issues were raised on appeal. But we conclude that most of the challenges obviously lack merit, and we do not discuss them in this opinion. We do discuss a couple of issues in some detail, and we affirm the district courts' judgments.

Background

Beginning in the mid-1980's the United States experienced a severe nursing shortage. Southern Florida was hit especially hard due to its increased demand for nurses in winter months to accommodate the high influx of people to the area at that time of year. This shortage, along with other market considerations, caused an increase in prices for nursing services and a difficulty in staffing hospitals (and other facilities) with sufficiently licensed nurses. [1]

Hospitals use full or part-time hospital nurses, contract nurses (nurses hired for a specified period of time), travel nurses (contract **[**3]** nurses hired from different areas of the country), and temporary nurses (nurses employed by agencies and hired by hospitals for a shift at a time). [2] Temporary nursing agencies send their nurses to hospitals, nursing homes, clinics, doctors' offices, and patients' homes. They have the choice to provide services for any facility or person in need of such care. They are not limited to providing nurses to hospitals.

During the pertinent period, hospitals were faced with quality concerns, as well as rising prices. No efficient means existed to share information with other hospitals about agency nurses. This lack of information resulted in problems with some agencies, including plaintiff-appellant All Care Nursing Services, Inc. ("All Care"). [3] These problems included "phantom booking"--where a hospital requests a specific nurse with whom it has dealt in the past, only to be sent a different nurse; "blind booking"--where **[**4]** a hospital sets up to receive the services of a nurse from an agency only to have the agency cancel at the last minute; fraudulent billing--billing hospitals for services of an RN when actually a less qualified LPN or CNA performed the services; cheating on certification exams; and altering certification documents.

[*744] In response to the problems the South Florida Hospital Association ("SFHA") approached hospitals in Palm Beach County about a potential purchasing arrangement. In 1988, twelve (12) Palm Beach County hospitals set up an arrangement whereby they would solicit bids from temporary nursing agencies and would then select agencies to be preferred providers of such services, the Preferred Provider Program ("PPP"). The selection of the preferred agencies was to be made based upon competence, services provided, quality, and bid price. Under this joint-buying arrangement all the **[**5]** participating hospitals agreed to seek first nurses from preferred providers before going to nonpreferred agencies for nurses on each occasion.

All agencies were invited, either by letter or by advertisement in the Palm Beach newspaper (*Palm Beach Post*), to participate in the bidding. Sixteen (16) agencies presented bids and eight (8) were selected as preferred. [4]

---

[1] Nurse qualifications fall into at least three different licensing categories: Registered Nurse (RN), Licensed Practical Nurse (LPN), and Certified Nursing Assistant (CNA).

[2] These temporary nursing agencies are also providers of travel and contract nurses to hospitals.

[3] The problems described formed the basis of the counterclaim against All Care and Monahan for federal and state RICO violations.

[4] Some of the appellant agencies participated in the bidding process, others did not. Following the submission of the initial bids four (4) agencies were eliminated based on their bid prices, which in some instances were 50% higher than other agencies' bids. The remaining twelve (12) rebid and were considered using the established criteria. Which agencies actually resubmitted bids is

In November 1988, the PPP began operation. Each hospital entered into **[**6]** individual contracts with each of the preferred agencies. All the agencies selected as preferred providers were required to agree to things like treating their nurses as employees by providing workers' compensation, paying taxes, and providing necessary insurance. Before the PPP, agencies had treated their nurses as independent contractors, not employees; and the higher costs associated with unprotected workers were borne by the hospitals. [5]

The preferred agencies did not contract with the hospitals at the same prices, but instead at the prices that each particular agency had bid. Agencies were also required to agree in the contracts not to change their prices for one year--the length of each contract--and, thus, were somewhat tied into their bid prices. **[**7]** But to allow for shifts due to market changes, each agency could terminate its contract with a particular hospital upon 30 days notice (the "escape clause").

After the creation of the PPP, plaintiffs-appellants filed suit against the participating hospitals, preferred agencies, and the SFHA [6] **[**8]** alleging antitrust violations under *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and under *Florida Statutes §§ 542.18* and *542.19*. Defendants then filed a counterclaim against All Care, and its operator Monahan, for violations of federal and state RICO statutes by billing fraudulently, aiding cheating on certification exams, and aiding persons to obtain false certification. [7]

Awaiting trial, plaintiffs-appellants sought and received a preliminary injunction, which halted implementation of the PPP. That preliminary injunction, however, was vacated by this court because of the district court's failure to hold the necessary evidentiary hearing. *All* *Care Nursing Serv., Inc. v. Bethesda Memorial Hosp., Inc., 887 F.2d 1535 (11th Cir.1989)*. The request for an injunction was never reinstated.

After a four-week jury trial, a verdict was entered in favor of defendants on all relevant claims. Plaintiffs filed motions for new trial, for judgment as a matter of law, and for amendment of the pleadings to conform with **[*745]** the evidence. All these motions were denied by the district court; and we now affirm those denials. [8] Plaintiffs-appellants also appeal the antitrust and RICO counterclaim verdicts against them; but we affirm those judgments, too.

[9]** *Discussion*

I. Federal and State RICO Claims

Plaintiffs-appellants All Care and Monahan argue that the Florida and Federal RICO claims against them are barred by the economic-loss rule. That rule provides that "***HN1***[] parties to a contract can only seek tort damages if conduct occurs that establishes a tort distinguishable from or independent of [the] breach of contract." *Jones v. Childers, 18 F.3d 899, 904 (11th Cir.1994)* (citations and quotations omitted). The rule is based upon the idea that

---

unclear. But, all of the accepted agencies bid prices higher than the price ranges suggested by the SFHA in its invitation to bid. None of the appellants was selected as preferred providers.

5 The hospitals felt the need to place some of the financial burden on the agencies because after the bidding, agency services were actually costing more than before the PPP. These contract provisions were a way to shift some of the cost back to the agencies.

6 Plaintiffs-appellants include: All Care Nursing Services, Inc.; A Complete Health Care Services, Inc.; Benson's Health Care Services, Inc.; Critical Health Care, Inc.; Quality Professional Nursing of Florida, Inc.; and P.D.Q. Nurse, Inc.

Defendants-appellees include the SFHA, twelve (12) Palm Beach County hospitals, and four (4) remaining agency defendants (four (4) agencies settled with plaintiffs before final disposition in the district court).

7 Claims of fraud, civil theft, and false representation against All Care and Monahan were dismissed before trial.

8 Also affirmed is the district court's decision in the bench trial of Defendant High Tech's Lanham Act counterclaim.

"contract principles are more appropriate than tort principles for resolving economic loss claims." Florida Power & Light Co. v. Westinghouse Elec. Corp., 510 So. 2d 899, 901 (Fla.1987).

Neither All Care nor Monahan can use the economic-loss rule to escape liability under the federal RICO statutes. [9] We have already ruled that **HN2**[] Florida's economic-loss rule does not bar a plaintiff from "bringing a [federal] RICO action where a breach of contract claim also exists .... many RICO cases involve contract disputes." Arabian American Oil Co. v. Scarfone, 939 F.2d 1472, 1478 (11th Cir.1991).

[10]** About the state RICO claims, Florida's RICO statutes have consistently been interpreted using federal RICO claims cases. No reason has been presented to us to justify applying the economic-loss rule differently to RICO claims made under state and federal RICO statutes. [10] Thus, the economic-loss rule does not bar these claims.

II. Antitrust Claims

Plaintiffs-appellants argue that the formation and operation of the Palm Beach County PPP is a violation **[**11]** of the antitrust laws of the Sherman Act and Florida Statutes §§ 542.18 and 542.19, [11] prohibiting restraints on trade. **HN4**[] The Sherman Act, in relevant part, sets out these rules:

> Section 1: Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal....
>
> **[*746]** Section 2: Every person who shall monopolize, or attempt to monopolize, or combine or conspire ... to monopolize ... shall be deemed guilty of a felony.

15 U.S.C. § 1; 15 U.S.C. § 2.

[12]** Despite the expansive language of the statute, the Supreme Court has interpreted this statute to prohibit only "unreasonable" restraints on trade. **HN6**[] "A restraint may be violative of the Sherman Act because it is solely a naked restraint of trade so offensive to competition as to be unreasonable per se, or because it runs afoul

---

[9] Defendants argue that Monahan cannot be afforded the benefit of the economic-loss rule because she, individually, entered into no contract with the defendant hospitals: she lacked privity of contract. All contracts were between her agency, All Care, and the hospitals. Because we conclude that the economic-loss rule does not bar RICO claims, state or federal, we need not decide this question. But, the Florida Supreme Court has held, at least under one set of facts, that privity is not required for the economic-loss rule to apply. *See* Casa Clara Condominium Ass'n v. Charley Toppino and Sons, Inc., 620 So. 2d 1244 (Fla.1993); *see also* Hoseline, Inc. v. U.S.A. Diversified Products, Inc., 40 F.3d 1198, 1200 (11th Cir.1994) (where this court applied *Casa Clara* to make "meritless" a claim that the rule does not bar tort claims between parties who lack contractual privity).

[10] Plaintiffs-appellants also challenged the RICO counterclaims on another ground: that reliance on the alleged misrepresentations made by All Care and Monahan was not proved by defendants. **HN3**[] Reliance is only an element of a RICO claim to the extent that a RICO plaintiff must prove he was injured by reason of the RICO defendant's deception and fraud. Pelletier v. Zweifel, 921 F.2d 1465, 1499 (11th Cir.1991). But, no argument is made by the plaintiffs-appellants that injury was inadequately shown. So, lack of reliance does not require reversal on this claim.

[11] **HN5**[] Federal and Florida antitrust laws are analyzed under the same rules and case law. Fla. Stat. § 542.32 ("It is the intent of the Legislature that, in construing this chapter, due consideration and great weight be given to the interpretations of the federal courts relating to comparable federal antitrust statutes."); *see also* St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc., 457 So. 2d 1028, 1032 (Fla.Dist.Ct.App.1984) ("The Florida legislature has, in effect, adopted as the law of Florida the body of ***antitrust law*** developed by the federal courts under the Sherman Act."); Fla. Stat. §§ 542.16 (Florida antitrust laws complement federal antitrust laws), 542.18 (analogous to § 1 of the Sherman Act). So, for purposes of this opinion discussion of the law under the Sherman Act is equally applicable to the plaintiffs-appellants' state antitrust claims.

of the more detailed rule of reason inquiry." Retina Assocs., P.A. v. Southern Baptist Hosp. of Florida, Inc., 105 F.3d 1376, 1380 (11th Cir.1997).

Some acts have been said to be so facially anticompetitive that by their very nature they are deemed unreasonable and, thus, per se violative of antitrust laws. These "practices are "so plainly anticompetitive,' and so often "lack … any redeeming virtue,' that they are conclusively presumed illegal without further examination under the rule of reason…." Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 7-8, 99 S. Ct. 1551, 1556, 60 L. Ed. 2d 1 (1979) (internal citations omitted) ("*BMI* "). Price fixing, horizontal market divisions, tying arrangements, and group boycotts have emerged as practices that are generally illegal per se. *See* National Bancard Corp. (NaBanco) v. VISA **[**13]** U.S.A., Inc., 779 F.2d 592, 598 (11th Cir.1986) (citing United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 [1960]); State Oil Co. v. Khan, U.S. , 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997); International Salt Co. v. United States, 332 U.S. 392, 68 S. Ct. 12, 92 L. Ed. 20 (1947); Fashion Originators' Guild of America v. FTC, 312 U.S. 457, 61 S. Ct. 703, 85 L. Ed. 949 (1941).

"But easy labels do not always supply ready answers." *BMI,* 441 U.S. at 8, 99 S. Ct. at 1556. Since the emergence of these per se categories, we have stressed that "whether the ultimate finding is the product of a presumption or actual market analysis, the essential inquiry remains the same--whether or not the challenged restraint enhances competition." National Bancard Corp., 779 F.2d at 598 (citation and quotation omitted). The Supreme Court, as well, has refused to force various practices into "pigeonholes and [to invoke] the per se rule." FTC v. Indiana Federation of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 2018, 90 L. Ed. 2d 445 (1986).

HN7[] A "rule of reason" is generally applied to determine what acts are permissible. **[**14]** Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 60, 31 S. Ct. 502, 515-16, 55 L. Ed. 619 (1911). Thus, a presumption exists that the circumstances of a case will be looked at in the light of the rule of reason standard and will not be deemed per se unreasonable. Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 723, 726, 108 S. Ct. 1515, 1518-19, 1520-21, 99 L. Ed. 2d 808 (1988). But, there are no bright lines. "The decision to apply the per se rule [instead of the rule of reason] turns on "whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output … or instead one designed to "increase economic efficiency and render markets more, rather than less, competitive.' " Northwest Wholesale Stationers, Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, 289-90, 105 S. Ct. 2613, 2617, 86 L. Ed. 2d 202 (1985).

In *Northwest,* the Supreme Court observed that what activities might fall into a per se category is "far from certain." Id. at 294, 105 S. Ct. at 2619. Considerable inquiry into the market conditions and market power of the defendant is often necessary **[**15]** before conduct can be presumed to be anticompetitive. Id. at 296, 105 S. Ct. at 2620-21 (addressing group boycotts).

Plaintiffs-appellants claim that the PPP's arrangement is per se illegal as both price fixing and as a group boycott. Thus, plaintiffs-appellants have the burden to make a threshold showing that the PPP falls into one of these forbidden categories. *See* Id. at 298, 105 S. Ct. at 2621. In this case, plaintiffs-appellants allege that, because price bids were a consideration in determining which temporary nurse agencies would become preferred providers, this conduct falls into the forbidden category of price fixing. They also claim that the exclusion of the nonpreferred **[*747]** agencies from the PPP amounts to a group boycott.

The decision whether the PPP established by defendants-appellees amounts to either a price fix or a group boycott, deserving of per se treatment, determines the antitrust issue on appeal. [12]

[16]** *A. Per se Violations*

---

[12] If we decide the PPP is deserving of per se treatment the case ends; plaintiffs-appellants must win. But if we decide that conduct such as the establishment of the PPP does not rise to the level of anti-competitiveness necessary to hold it per se illegal, the rule of reason applies; and we will defer to the determination of the jury--that plaintiffs-appellants failed to establish the relevant market in which to judge the PPP's reasonableness.

1. Price Fixing

That the PPP has some impact on the prices of obtaining temporary nurses is undisputed. **HN8**[] That price fixing is equally violative of antitrust laws whether it is done by buyers or sellers is also undisputed. *Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 233-37, 68 S. Ct. 996, 1005-06, 92 L. Ed. 1328 (1948)*. And, it is no excuse that the price "fixed" is reasonable. *FTC v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 423-24, 110 S. Ct. 768, 775, 107 L. Ed. 2d 851 (1990)*. But whether the per se rule should apply "is not a question simply of determining whether two or more potential competitors have literally "fixed' a "price.' " *BMI,* 441 U.S. at 9, 99 S. Ct. at 1556-57.

Plaintiffs-appellants argue that the intent of the PPP was to stabilize prices and that such intent makes this practice a per se violation. But anticompetitive effects--not intent--is the focal point of antitrust legislation. The question is not did defendants intend to fix prices, but instead whether the PPP did so. In defining "price fixing" the Supreme Court wrote in these terms:

> **HN9**[] That price-fixing includes more than the **[**17]** mere establishment of uniform prices is clearly evident…. Prices are fixed … if the range within which purchases or sales will be made is agreed upon, if the prices paid or charged are to be at a certain level or on ascending or descending scales, if they are to be uniform…. They are fixed because they are agreed upon.

United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 222-23, 60 S. Ct. 811, 843-44, 84 L. Ed. 1129 (1940). In forming the PPP, the hospitals, among themselves, never agreed to a uniform price, to an acceptable price range, [13] or to a scale for determining price.

The PPP has an impact on price; all preferred agencies contracting with the hospitals will, to some degree, be tied into a set price for their services. But this point of law must be remembered: **[**18]** "**HN10**[] Not all arrangements among actual or potential competitors that have an impact on price are per se violations of the Sherman Act or even unreasonable restraints." *BMI,* 441 U.S. at 23, 99 S. Ct. at 1564. And, it cannot be forgotten that market fluctuations could result in a preferred agency's exercise of the escape clause--allowing that agency to reenter the market free to charge the prices it chooses. Most important, this case involves lots of distinct contracts. A pricing agreement of some kind is necessary in the contracting for goods and services; and competitive bidding is an acceptable way to decide with whom the hospitals wish to contract.

Earlier Supreme Court cases were faced with more direct price fixing, which led to the per se categorization of such schemes. **HN11**[] In the context of a blatant agreement to fix prices,

> it makes no difference whether the motives of the participants are good or evil; whether the price fixing is accomplished by express contract or by some more subtle means; whether the participants possess market control; whether the amount of interstate commerce affected is large or small; or whether the effect of the agreement is to raise or to decrease **[**19]** prices.

United States v. McKesson & Robbins, Inc., 351 U.S. 305, 310, 76 S. Ct. 937, 940, 100 ***[*748]*** *L. Ed. 1209 (1956)*. But we do not have an agreement to fix prices in this case: no prices were preset for nursing services.

The Supreme Court has recently taken another step away from per se treatment, particularly in maximum vertical price fixing arrangements. [14] *See State Oil Co. v. Khan, ___ U.S. ___, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Maximum vertical price fixing is no longer a per se violation. *Id. at ___, 118 S. Ct. at 278*.

---

[13] That the SFHA--when it requested bids--suggested a price range to the participating agencies does not create an agreement on the prices they would accept. As shown by the accepted bids, prices outside the range were acceptable.

[14] The alleged attempt to fix prices by the hospitals' agreement with each other would be horizontal--an agreement among competitors. The alleged attempt to fix prices by the hospitals' agreements with the preferred agencies would be vertical.

The key to per se treatment is whether the conduct is of the kind that can only be anticompetitive. But, the PPP, arranged by the SFHA and the Palm Beach County hospitals, is not inherently an anticompetitive **[**20]** practice. No temporary nursing agency was precluded from competing to become a preferred agency. Also, all agencies are still able to provide nurses to medical facilities other than hospitals and even to hospitals should the need for nurses not be met by the preferred agencies. Although the PPP may stabilize prices to some degree, it is not the kind of "stabilization" that can be viewed as price fixing, especially when the escape clauses in the contracts are taken into account. These escape clauses allow the market and not the SFHA to be the ultimate decisionmaker for each hospital and each agency on the issues of price, demand, supply, and terms of dealing.

2. Group Boycotts

The same principles apply to a consideration of application of the per se rule whether the act complained of is labeled price fixing or a group boycott. "The recent jurisprudence of the Supreme Court and of the Court of Appeals of this Circuit cautions against the haphazard expansion of the "group boycott label' and the concomitant imposition of per se liability." *Retina Assocs., 105 F.3d at 1381*. "***HN12***[] Not all concerted refusals to deal are predominantly anticompetitive." *Northwest, 472 U.S. at 298, **[**21]** 105 S. Ct. at 2621*. In cases of group boycotts where the per se rule has been applied, "the boycott often cuts off access to a supply, facility, or market *necessary to enable the boycotted firm to compete,* … and frequently the boycotting firms possessed a *dominant position in the relevant market.*" *Id. at 294, 105 S. Ct. at 2619* (emphasis added).

In dealing with group boycott situations, market analysis has found its way into the determination of whether a given practice should be per se illegal. No longer is relevant market a factor only after it has been decided that the rule of reason applies. "Unless the cooperative possesses market power or exclusive access to an element essential to effective competition, the conclusion that [the conduct] is virtually always likely to have an anticompetitive effect is not warranted." *Northwest, 472 U.S. at 296, 105 S. Ct. at 2620-21*.

In this case, no refusal to deal has been shown. All agencies were able to participate in the bidding to become preferred providers, and generally a hospital will still deal with any nursing agency when the preferred agencies with which the hospital has contracted for nursing services fail to **[**22]** meet its needs. The record shows, in fact, that more than a trifling portion of hospital nursing business in Palm Beach County continued to go to nonpreferred agencies after the PPP was in operation. Also, due to the rise in HMOs, home care, and similar trends in the medical world, facilities other than hospitals provide the market, the supply, and the facilities necessary for nonpreferred agencies to compete with each other and with preferred agencies in the marketplace.

Per se treatment has been given to those practices which history has shown have only anticompetitive effects. "Analyzing this case under the per se rubric would remain inappropriate absent some demonstration that the practice at issue historically leads to anticompetitive effects in the market." *Retina Assocs., 105 F.3d at 1381*. No history of this kind seems to exist for health-care preferred-provider programs materially similar to what we have before us now.

[*749] We conclude, based upon undisputed facts, that the practice of this PPP is not deserving of per se treatment and was properly evaluated under the rule of reason.

B. Rule of Reason

HN13[] The rule of reason requires "the factfinder [to weigh] all of the **[**23]** circumstances of the case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 2557, 53 L. Ed. 2d 568 (1977)*. The rule of reason should be applied to practices designed to "increase economic efficiency or render markets more, rather than less, competitive." *BMI,* 441 U.S. at 19-20, 99 S. Ct. at 1562-63; *see also* *Northwest, 472 U.S. at 289-90, 105 S. Ct. at 2616-17*.

"To satisfy the rule of reason, the plaintiff must prove that the [conduct] had an adverse effect on competition." *Coffey v. Healthtrust, Inc., 955 F.2d 1388, 1392 (10th Cir.1992)*. But, competition occurs only in a market. Thus, "before we can reach the larger question of whether [defendants] violated any of the antitrust laws, we must confront the threshold problem of defining the relevant market." *Thompson v. Metropolitan Multi-List, Inc., 934 F.2d 1566, 1572 (11th Cir.1991)*. [15]

[24]** Interrogatories went to the jury. [16] The jury found that plaintiffs-appellants failed to establish the relevant market. Because no definable market was proved, plaintiffs could show no adverse effect on competition. Plaintiffs-appellants try to debate the required showing of market power. But their argument is based upon per se treatment of the antitrust claim. Because we have decided, as did the district court, that the PPP triggers no per se analysis, relevant market was critical to plaintiffs-appellants' claims.

The jury found that no relevant market was shown; and we will reverse the jury's determination on this factual issue only if it is clearly erroneous. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 381, 76 S. Ct. 994, 999, 100 L. Ed. 1264 (1956)*. We cannot say the finding that no relevant market was established is clearly erroneous. **[**25]** The failure to establish the relevant market (either by product or geography) was fatal to plaintiffs-appellants' antitrust claims. So, we accept the jury verdict against them.

AFFIRMED.

Concur by: WELLFORD

Concur

WELLFORD, Senior Circuit Judge, concurring:

I concur in Judge Edmondson's opinion. The antitrust issues were addressed early in this case through a decision on setting aside a preliminary injunction in and expanded on in a concurring opinion authored by then *Chief Judge Tjoflat, 887 F.2d 1535, 1539 (11th Cir.1989)* (Tjoflat, C.J., concurring).

There were contested issues as to whether defendants possessed market power in a relevant market for temporary nursing services. The jury decided the contested relevant issue on which plaintiffs had the burden. There were contested issues as to whether defendants had monopoly "control over access to an essential element of competition" by means of the arrangement. Plaintiffs had the burden to prove this and they failed in this burden.

Judge Edmondson points out, as Judge Tjoflat previously did in this case, that *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 105 S. Ct. 2613, 86 L. Ed. 2d 202 **[**26]** (1985)*, is key, and it "prohibits the application of the per se rule to cooperative buying arrangements unless a court has made certain preliminary findings of fact." *Id. Northwest* held that " **[*750]** absent a showing [of market power or *exclusive access* to an element essential to effective competition] with respect to a cooperative buying arrangement, courts should apply a rule-of-reason analysis." *Northwest, 472 U.S. at 297, 105 S. Ct. at 2621*, *quoted in All* *Care Nursing Service, 887 F.2d at 1539*; *see also* Areeda & Havenkamp, ***Antitrust Law*** (1989 Supp.) P 1511 (discussing *Northwest* and suggesting that plaintiffs must establish market power of defendant before the court should finally decide *per se* or rule of reason application).

---

[15] Because this case is subject to the rule of reason and because of the importance of relevant market and market power in evaluating the reasonableness of a purported restraint, the district court's jury instructions and interrogatories directing that the jurors must find for defendants if plaintiffs failed to establish the relevant market were proper applications of the law governing this case.

[16] The interrogatories, among other things, directed the jury to find for the defendants if the plaintiffs did not establish the necessary relevant market.

In addition, this circuit has indicated that "the presumption in cases brought under *section 1* of the Sherman Act is that the rule-of-reason standard applies." *Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1567 (11th Cir.1991)*. We observed in that case, moreover, that "the Supreme Court has made it clear that the per se label should be applied infrequently and with caution." *Id.*

The majority opinion has covered all **[**27]** of the questions in this case; I merely emphasize the application of the rule-of-reason principle under the circumstances.

Opinion

[*773] MEMORANDUM AND ORDER

I.

This is an antitrust case. Plaintiffs RADS, P.C., and Dr. Donald Bronn (collectively referred to as "RADS") are suing defendant Mercy Memorial Hospital (Mercy), accusing Mercy of limiting competition in violation of the Sherman Antitrust Act, *15 U.S.C. §§ 1-2*. Count one of RADS's complaint claims an unlawful attempt to monopolize in violation of *15 U.S.C. § 2*; count two claims a conspiracy to restrain trade in violation of *15 U.S.C. § 1*. RADS specifically contends that Mercy unlawfully attempted to monopolize the provision of "radiation oncology services to [Mercy's] cancer patients who are in need of radiation oncology services," and Mercy's cancer patients are defined as the relevant market. RADS also asserts that Mercy and Dr. Arthur Porter [1] conspired to negotiate **[**2]** a contract with another radiation oncology center, thereby preventing RADS from servicing the relevant market.

Mercy originally moved to dismiss the complaint under *Fed. R. Civ. P. 12(b)(6)*, arguing that RADS did not allege an injury to competition, a requirement to have standing to bring a federal antitrust suit. In so responding to the complaint, Mercy limited the Court to an examination of the allegations of the complaint. Mercy put the issue as a determination of whether or not Mercy's purported denial to its cancer patients of a choice between radiation oncology treatment facilities constitutes an injury to competition. [2]

[3]** At the time RADS filed suit in this Court, however, Mercy had also sued RADS in a Michigan state court. In state court, Mercy sought a declaration that there was no contract or other legal relationship between RADS and Mercy; RADS filed a counterclaim. The counterclaim was in multiple counts: count one claims breach of contract; count two, promissory estoppel; counts three and four, tortious interference; count five, violation of the Michigan Antitrust Reform Act, *§ 3*; and count six, violation of the Michigan Antitrust Reform Act, *§ 2*. RADS's complaint in this Court and its counterclaim in the state court are identical, reading almost word-for-word in the factual allegations. The same may also be said of the antitrust allegations, except for two additional paragraphs in the federal complaint alleging Mercy's involvement in interstate commerce.

On October 17, 1997, the Monroe County Circuit Court dismissed RADS's antitrust counterclaims, determining that RADS failed to state claims under the Michigan Antitrust Reform Act, M.S.A. § 28.70(1) et seq. See Exhibits A & B. Mercy now moves to dismiss RADS's federal complaint on grounds of issue preclusion. For the following reasons, **[**4]** Mercy's motion is GRANTED, and the case is DISMISSED.

II.

A.

---

[1] Although RADS initially named Dr. Porter as a defendant, the parties stipulated to his dismissal. See Order of Dismissal as to Defendant, Arthur Porter, M.D. (Sept. 25, 1997).

The parties have not addressed how Dr. Porter's dismissal affects RADS's claim of conspiracy.

[2] As the United States Court of Appeals for the Sixth Circuit has recently stated:

> Under the caselaw, it is not enough for the plaintiff to claim economic injury: "Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful."

Valley Products Co. v. Landmark, a Div. of Hospitality Franchise Systems, Inc., 128 F.3d 398, 402 (6th Cir. 1997) (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))*.

Mercy asserts that the state court judgment has preclusive effect on RADS's federal antitrust claims. In *Marrese v. American Academy of Orthopaedic Surgeons, 470 U.S. 373, 84 L. Ed. 2d 274, 105 S. Ct. 1327 (1985)*, the United States Supreme Court determined that, in some circumstances, a state-court judgment may have preclusive effect on a federal antitrust claim:

> To be sure, a state court will not have occasion to address the specific question **[*774]** whether a state judgment has issue or claim preclusive effect in a later action that can be brought only in federal court. Nevertheless, a federal court may rely in the first instance on state preclusion principles to determine the extent to which an earlier state judgment bars subsequent litigation.

Id. at 381-82.

HN1[] To determine whether the Monroe County Circuit Court's judgment precludes this Court's consideration of RADS's complaint, the Court must turn to Michigan law of claim and issue preclusion. See id. Michigan law directs that a prior judgment bars a subsequent action if:

> (1) the subject matter of the second action [is] the same; (2) **[**5]** the parties or their privies [are] the same; and (3) the prior judgment [was] on the merits.

In re Pardee, 190 Mich. App. 243, 248, 475 N.W.2d 870 (1991). "A grant of summary judgment is considered a determination on the merits." *Franklin v. City of Pontiac, 887 F. Supp. 978, 983 (E.D. Mich. 1995)*. "The pendency of an appeal, if any, generally does not alter the finality of a judgment for purposes of res judicata." *Eliason Corp. v. Bureau of Safety and Regulation of the Michigan Department of Labor, 564 F. Supp. 1298, 1302 (W.D. Mich. 1983)*.

B.

Here the parties in both the state and federal actions are identical. In addition, the subject matter of RADS's complaint in this Court is the same as the subject matter of the antitrust counts of RADS's counterclaim in the Monroe County Circuit Court. In both the federal complaint and state counterclaim, RADS alleges that Mercy originally promised real property for a radiation oncology treatment center as well as staff privileges for the RADS oncologist. After RADS acquired a Certificate of Need from the Michigan Department of Health and otherwise relied on the hospital's promises, Mercy informed RADS that it would **[**6]** build its own radiation oncology treatment center. Mercy also declined to give an application for full staff privileges to the RADS oncologist. In the state counterclaim and here in the complaint, the allegations with respect to injury to the relevant market are identical.

As previously noted, in the Monroe County Circuit Court, RADS based its counterclaim on theories of breach of contract; tortious interference with a business relationship; and antitrust violations, including monopolization in violation of M.S.A. § 28.70(3) [3] and unlawfully conspiring to restrain trade in violation of M.S.A. § 28.70(2). [4] **[**7]** In this Court, RADS accuses Mercy of monopolization in violation of *15 U.S.C. § 2* [5] and conspiracy to restrain trade in violation of *15 U.S.C. § 1*. [6]

---

[3] The statute reads:

> ***HN2***[] The establishment, maintenance, or use of a monopoly, or any attempt to establish a monopoly, of trade or commerce in a relevant market by any person, for the purpose of excluding or limiting competition or controlling, fixing, or maintaining prices, is unlawful.

M.S.A. § 28.70(3).

[4] The statute reads:

> A contract, combination, or conspiracy between 2 or more persons in restraint of, or to monopolize, trade or commerce in a relevant market is unlawful.

M.S.A. § 28.70(2).

[5] The statute reads:

The Monroe County Circuit Court rendered a decision on the merits as to the antitrust claims. The court granted summary disposition to Mercy, presumably under M.C.R. 2.116, stating:

> The purpose of antitrust and unfair competition laws is obviously to protect the public by healthy competition and not primarily to protect individual plaintiffs. So the starting point in evaluating such claims **[*775]** is whether the purported restraint in trade is reasonable, under the circumstances.
> * * *
>
> In order ***HN4***[] to properly allege an antitrust violation, a party must demonstrate that there is a decreased **[**8]** competition in the whole market. A personal individualized harm will not sustain a viable cause of action.... RADS' allegation that Mercy somehow was conspiring against them in denying them the ability to apply for staff privileges is speculative at best. There's no concrete evidence or factual support to base their assertion upon.
> The -- so with respect to the conspiracy aspect of the -- of the complaint... the motion is going to be granted... for summary disposition....
> Now... Mercy can legally enter into an exclusive contract with any oncology group it sees fit, and not run afoul of [the Michigan Antitrust Reform Act] .... With respect to RADS being denied the ability to work with Mercy, the Court finds that there is no genuine issue of material fact that would -- and as a result, as a matter of law, that Mercy is entitled to have their motion granted as to this section of the Act....
> An important point here is RADS brings this... action... really as a personal injury to themselves. The Court finds that these antitrust allegations are appropriately dismissed by summary disposition....

See Exhibits A & B.

RADS has not undermined the preclusive effect of the Monroe **[**9]** County Circuit Court's ruling. Although RADS objects to the Monroe County Circuit Court's interpretation of Michigan ***antitrust law***, this is a subject for an appeal to the Michigan Court of Appeals. [7] **[**10]** Moreover, RADS has not alleged that the Monroe County Circuit Court lacked jurisdiction to hear state antitrust claims. See *S.S. Aircraft Co. v. Piper Aircraft Corp., 159 Mich. App. 389, 393, 406 N.W.2d 304 (1987)* ("[Plaintiff] has not alleged that the trial court lacked jurisdiction to hear the wrongful death cases, thus it may not attack the court's order by bringing a second suit."). [8]

> ***HN3***[] Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States... shall be deemed guilty of a felony....

15 U.S.C. § 1.

[6] The statute reads:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States... is hereby declared to be illegal.

15 U.S.C. § 2.

[7] RADS points out that remedies under state and federal ***antitrust law*** vary, but RADS does not dispute that analysis of an antitrust injury is essentially the same under both state and federal ***antitrust law***. See *Kelley ex rel. Slay v. Michigan Nat'l Bank, 377 Mich. 481, 492, 141 N.W.2d 73 (1966)* ("In examining any combination, the overriding test, of course, is protection of the public interest."); *Goldman v. Loubella Extendables, 91 Mich. App. 212, 219, 283 N.W.2d 695 (1979)* ("The Michigan antitrust act is patterned after the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.*, and Federal court interpretations of the Sherman Act are persuasive authority as to the meaning of the Michigan act.").

[8] RADS correctly notes that ***HN5***[] federal courts have exclusive jurisdiction over federal antitrust claims. See *15 U.S.C. § 4*. Nevertheless, it is settled law that state-court judgments on state antitrust claims may preclude a federal court from deciding federal antitrust claims. See *Marrese, 470 U.S. at 380* ("Our decisions indicate that a state court judgment may in some circumstances have preclusive effect in a subsequent action within the exclusive jurisdiction of the federal courts.").

In cases in which a Michigan circuit court's judgment has preclusive effect on a federal claim, federal courts have dismissed the federal claim. See *Kaufman v. Seidman, 984 F.2d 182, 185 (6th Cir. 1993)*. RADS's federal complaint must therefore be dismissed. [9]

[11]** SO ORDERED.

[9] In addition, going beyond issue preclusion, clearly RADS's complaint must be dismissed under *Fed. R. Civ. P. 12(b)(6)*. There is no allegation of an injury to competition since the relevant market consists only of Mercy's cancer patients. It has not been alleged that Mercy possesses "dominance" over area residents. See *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 26, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*. Mercy is permitted to enter into exclusive contracts for medical services, thereby limiting the choices of its patients. See *id. at 31*.

[*780] THE COURT: All right. The antitrust claims deal with the Michigan Antitrust Reform Act. One -- *section 2*, which is *MCL 445.772*, I believe, provides that: A contract, combination, or conspiracy between two or more persons in restraint of or to monopolize trade or commerce in a relevant market is unlawful.

The other section of the Act deals with *Section 3*, which is 445.773 of the Compiled Laws, provides that: The establishment, maintenance, or use of a monopoly or any attempt to establish a monopoly of trade or commerce in a relevant market by any person for the purpose of excluding or limiting competition or controlling, fixing, or maintaining prices is unlawful.

Now, the case of Attorney General versus Michigan National Bank found at *377 Mich. 481, 141 N.W.2d 73*, stated, I believe at page 492, the -- or articulated a test to examine whether an alleged restraint on trade is unreasonable.

The case stated: In examining any combination, the overriding test, of course, is protection of the public interest. But not every joinder of competing businesses or acquisition of instrumentalities that have been used in competition is an undue restraint of trade or creation of **[**14]** a monopoly. Each situation must be measured by the rule of reason and a fundamental test is injury to the public.

Now, it seems that there are -- that two **[*781]** significant allegations relative to the antitrust violation is that -- is, first, that Mercy violated the Act when it failed to allow Dr. Bronn or RADS an application, and whatever derived from that; and, secondly, that Mercy violated the Act when it did not allow RADS to have an exclusive contract with Mercy.

That's -- those are some relevant areas here. Now, the Michigan National Bank case that the Court just cited suggests that: In examining these cases, the Court must approach it from a public policy perspective. Furthermore, the case also requires the Court to find an injury to the public-at-large. It does not, however, state -- the case, that is -- does not, however, state that a cause of action may be maintained if the injury was to an individual.

The purpose of antitrust and unfair competition laws is obviously to protect the public by healthy competition and not primarily to protect individual plaintiffs. So the starting point in evaluating such claims is whether the purported restraint in trade is reasonable, under **[**15]** the circumstances.

Another case that the Court found instructive, although distinguishable on its facts -- nevertheless, it did cite certain principles that I think are important -- and that was Jefferson Parish Hospital **[*782]** District Number 2 versus Hyde, found at *466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2*. In that case, the -- it was the United States Supreme Court -- it involved an exclusive contract, and the Supreme Court held that such an agreement cannot be held to be a restriction on trade as the ordinary consumer is unable to distinguish between different doctors, as they are unsophisticated.

They further reference -- or the case further states that a hospital has an unquestioned right to exercise control over the physicians to whom it accords staff privileges. And I think they're referring to another case when they -- when they make that statement. I didn't write that in my notes, but -- the -- and, of course, the Court believes that -- that any allegation that Mercy violated the Antitrust Act provisions when it denied RADS an exclusive contract appears to be tenuous at best.

Jefferson case clearly held that a hospital is well within its rights to enter an exclusive arrangement with other physician **[**16]** groups if it desires to do so.

Now, if another corporation entered into an exclusive arrangement with Mercy, this would not violate *Section 3* of the Act. I think the Jefferson court -- or case supports that, and there's no indication, other than conclusory statements that would even suggest that **[*783]** Mercy ever intended to fix prices or exclude competition. Rather, Mercy seems to have taken steps to insure a competitive bid for the building and contractual arrangement of a radiation/oncology clinic.

In order to properly allege an antitrust violation, a party must demonstrate that there is a decreased competition in the whole market. A personal individualized harm will not sustain a viable cause of action under both *Sections 2* and *3* of the Act.

With respect to *Section 2* of the Act, RADS' allegation that Mercy somehow was conspiring against them in denying them the ability to apply for staff privileges is speculative at best. There's no concrete evidence or factual support to base their assertion upon.

The -- so with respect to the conspiracy aspect of the -- of the complaint, which is *Section 2* of the Act, the motion is going to be granted pursuant -- for summary disposition pursuant **[**17]** to 2.116(c)(10).

Now, turning to *Section 3* of the Act, Mercy can legally enter into an exclusive contract with any oncology group it sees fit, and not run afoul of this Act. As stated in Jefferson, Mercy appears to be on legally solid ground if they -- if they were even to build their own facility; however, the possibility of

HN4[] **Costs & Attorney Fees, Clayton Act**

The Clayton Act § 4 provides that a person injured by an antitrust violation shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney fee. *15 U.S.C.S. § 15*. The fee award is mandatory, and the purpose of such an award in antitrust cases is threefold: (1) to encourage private enforcement of the antitrust laws, (2) to insulate the treble damages award from the costs of obtaining recovery, and (3) to deter violations of the antitrust laws by requiring the payment of that fee by a losing defendant as part of his penalty for having violated the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Legal Ethics > Client Relations > Conflicts of Interest

Legal Ethics > Client Relations > Attorney Fees > General Overview

HN5[] **Private Actions, Costs & Attorney Fees**

Simultaneous representation of clients with conflicting interests (and without written informed consent) is an automatic ethics violation in California and grounds for disqualification. An attorney cannot recover fees for such conflicting representation, because payment is not due for services not properly performed. This applies even where the matters in which the firm represents the clients with conflicting interests are unrelated. An attorney may claim fees only for services provided before the conflict arose and the ethical breach occurred.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

HN6[ ] Private Actions, Costs & Attorney Fees

While in general, statutes bestow fees upon parties, not upon attorneys, weighty authority demonstrates that the client himself is not entitled to keep the fees which are measured by and paid on account of the attorney's services.

Opinion by: BETTY B. FLETCHER

Opinion

[*1355] OPINION

FLETCHER, Circuit Judge:

Image Technical Service, Inc. and other companies ("Image Tech") filed an antitrust suit against Eastman Kodak Co. ("Kodak"). Before trial, Kodak moved to disqualify Coudert Brothers, a law firm representing Image Tech, because the firm represented a division of Kodak in other matters. The district court disqualified Coudert from further representation of Image Tech. Image Tech eventually won the lawsuit. In this appeal, Kodak seeks to reverse a district court judgment that it must pay Image Tech $ 400,000 in statutory legal fees for Coudert's representation.

FACTS

Image Tech is an independent service organization ("ISO") which services Kodak copying and micrographic equipment. **[**2]** In 1987, Image Tech and other ISOs (hereinafter referred to collectively as Image Tech) filed an antitrust suit against Kodak under *15 U.S.C. §§ 1* and *2*, alleging that Kodak adopted policies limiting the availability of parts to ISOs, and made it more difficult for ISOs to compete with Kodak in servicing Kodak equipment. The district court granted summary judgment for Kodak, and the Ninth Circuit reversed. *Image Technical Serv., Inc. v. Eastman Kodak Co., 903 F.2d 612 (9th Cir. 1990)*. Image Tech was represented by The Law Offices of James A. Hennefer.

The Supreme Court granted Kodak's petition for certiorari. In July 1991, Image Tech retained Coudert Brothers as co-counsel to assist in the Supreme Court and in further district court proceedings. Coudert prepared the Supreme Court briefs. The Supreme Court affirmed the court of appeals' reversal of the summary judgment, *Eastman Kodak Co. v. Image Technical Serv., Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*, and remanded the case for trial. Coudert, which planned to participate in the preparation for trial and in the trial itself, began discovery and factual investigation in the district court.

On January **[**3]** 19, 1993, Kodak filed a motion to disqualify Coudert. District Judge Barbara Caulfield granted the motion on May 19, 1993, following a hearing. The district court found that Coudert had represented one of Kodak's major operating divisions, Eastman Chemicals, for at least six years in various international matters. The work did not involve issues directly relevant to the antitrust litigation. Coudert had violated Rule 3-310 of the California Rules of Professional Conduct, which stated at the time:

> HN1[] (A) If a member has or has had a relationship with another party interested in the representation . . . the member shall not accept or continue such representation without all affected clients' informed written consent.
> (B) A member shall not concurrently represent clients whose interests conflict, except with their informed written consent.

Coudert's representation of Image Tech conflicted with the interests of its existing client, Kodak, and Coudert had failed to obtain the informed written consent required, or even informed consent. Coudert thus had breached **[*1356]** its "duty of . . . undivided loyalty" and disqualification was required.

The district court also found that **[**4]** Kodak had not waived the right to object to Coudert's representation of Image Tech by failing to object in a timely fashion. There was no showing that Kodak was aware that Coudert represented one of its divisions and intentionally delayed filing a motion to disqualify, and so no waiver occurred. Further, Coudert as a law firm had the responsibility to perform a conflict check, while Kodak had no such obligation. Blecher & Collins took Coudert's place as co-counsel.

More than two years later, on September 19, 1995, a unanimous jury returned a verdict in favor of Image Tech and the other ISO plaintiffs, and awarded $ 23,948,300 in damages. After the trebling mandated by the Clayton Act, *15 U.S.C. § 15*, the damages award was $ 71.7 million.

Image Tech moved for an award of mandatory reasonable attorneys' fees and costs, seeking fees for all its counsel, including fees for the legal services Coudert provided before the firm's disqualification in 1993. The parties stipulated to an award of $ 3,950,000 for the services of other counsel, but Kodak disputed Image Tech's entitlement to any fee award for Coudert's work, because of the disqualification.

On January 18, 1996, the district court **[**5]** (A. Wallace Tashima, Circuit Judge, sitting by designation) filed the stipulation regarding fees for the work of the other counsel, and an interim order finding that Image Tech was entitled to receive fees for Coudert's representation. The court reasoned that Coudert's disqualification was prospective only, adding that it was not clear that the conflict would have required Coudert's disqualification before the Supreme Court but declining to address the issue. Because Clayton Act fees are awarded to the parties, not to their attorneys, it remained between Image Tech and Coudert whether Image Tech would pay Coudert any fees. The order stated "the court shall enter its final order on plaintiffs' motion for an award of attorneys' fees and costs" after the parties tendered their stipulation regarding amount to the court (or indicated that they could not agree on an amount).

Kodak filed a notice of appeal on the merits on February 13, 1996, with a docketing statement that included the issue whether attorneys' fees could be awarded to plaintiffs for work done by disqualified counsel. Kodak's motion for leave to file an oversized brief also mentioned the issue. Kodak's opening brief, filed **[**6]** April 12, 1996, did not raise the attorneys' fees issue. [1]

At about the same time as the notice of appeal, Kodak and Image Tech agreed to stipulate to a fee award to Coudert of $ 400,000, but the signed stipulation was not lodged with the district court until April 11, 1997. The stipulation "reserved the right to challenge on appeal the Court's finding that plaintiffs are entitled under the antitrust laws to recover fees and expenses for the work performed for Coudert Brothers." On April 29, 1997, the district court issued a "Post-judgment Order Awarding Reasonable Fees and Costs to Plaintiffs and Supplemental Judgment," simultaneously entering the stipulation as to the $ 400,000 in fees awarded Coudert. Kodak filed a timely appeal from the fee order on May 22, 1996.

I. *Waiver*

---

[1] In the merits appeal, this court affirmed in part and reversed in part, with no mention of the Coudert fee issue. *Image Technical Servs. v. Eastman Kodak Co., 125 F.3d 1195 (9th Cir. 1997)*.

Image Tech argues that Kodak **[**7]** has waived the argument that it was improper to award fees to disqualified counsel, because Kodak raised the issue in its docketing statement attached to the notice of appeal on the merits and then failed to address it in its opening brief in that appeal.

HN2[] This court "will not ordinarily consider matters on appeal that are not specifically and distinctly argued in appellant's opening brief." *Officers for Justice v. Civil Serv. Comm'n, 979 F.2d 721, 726 (9th Cir. 1992)* (quotations omitted). That principle applies when a party attempts to raise a new issue in its reply brief, because "an issue advanced only in reply provides the appellee no opportunity **[*1357]** to meet the contention." *Ellingson v. Burlington N., Inc., 653 F.2d 1327, 1332 (9th Cir. 1981)* (appellant cannot raise attorneys' fees issue for first time in reply brief).

This is a different situation. Image Tech argues not that Kodak failed to raise the attorneys' fees issue in its opening brief in the instant appeal, but rather that it failed to raise the issue in its earlier opening brief in the appeal on the merits, and so is precluded from raising it at all. That amounts to arguing that Kodak lost the right to appeal the **[**8]** district court's final judgment on attorneys' fees because it mentioned the fees issue in its docket statement in the earlier appeal on the merits, but failed to include or develop the issue in the opening brief in that appeal.

We reject this reasoning. Judge Tashima's order finding that Image Tech was entitled to attorneys' fees for Coudert was entitled "*Interim* Order on Motion for Attorneys' Fees" (emphasis in original), and expressly reserved jurisdiction to enter a final order after the parties stipulated to an amount of fees, or to determine an amount if the parties could not agree. ***HN3***[] "An award of attorney's fees does not become final until the amount of the fee award is determined." *Intel Corp. v. Terabyte Int'l, Inc., 6 F.3d 614, 617 (9th Cir. 1993)*. As in *Intel,* Kodak's first notice of appeal, "timely filed after the district court's . . . judgment but before the determination of the fee amount, pertained only to the *merits* of the litigation." *Id.* (emphasis in original). It was thus premature to appeal the fee award until the amount was determined by the court. The lack of an attorneys' fees argument in the opening brief on the merits appeal was therefore **[**9]** proper, and did not preclude Kodak from appealing the fee award once the award was final. Kodak did not waive its right to appeal the award of attorneys' fees for Coudert's representation.

II. *Fees for Coudert's Representation*

Kodak argues that because the district court found that Coudert had breached its duty of undivided loyalty to Kodak by representing both Kodak's division and Image Tech, Kodak was not required to pay the $ 400,000 in fees to Image Tech for Coudert's representation before the firm's disqualification. We review de novo the legal question whether Kodak was required to pay fees for Coudert's work. *United States ex rel Virani v. Jerry M. Lewis Truck Parts & Equip., Inc., 89 F.3d 574, 576 (9th Cir. 1996)*, *cert. denied, 117 S. Ct. 945, 136 L. Ed. 2d 834 (1997)*. California law controls whether an ethical violation occurred. *See* N.D. Cal. Local Rule 110-3 (standards of professional conduct in the Northern District are those of California Rules of Professional Conduct).

HN4[] Section 4 of the Clayton Act provides that a person injured by an antitrust violation "shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." **[**10]** *15 U.S.C. § 15*; *see id* § 26 (plaintiff who prevails in action for injunctive relief under antitrust laws also entitled to reasonable attorneys' fee). The fee award is mandatory, *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 676 F.2d 1291, 1314 (9th Cir. 1982)*, and the purpose of such an award in antitrust cases is threefold: 1) to encourage private enforcement of the antitrust laws, 2) to insulate the treble damages award from the costs of obtaining recovery, and 3) to deter violations of the antitrust laws by requiring the payment of that fee by a losing defendant as part of his penalty for having violated the antitrust laws. *Perkins v. Standard Oil, 474 F.2d 549, 554 (9th Cir. 1973)*; *Ohio-Sealy Mattress Mfg. Co. v. Sealy Inc., 776 F.2d 646, 661 (7th Cir. 1985)*.

Any fee award in an antitrust case goes to the successful plaintiff, not to plaintiff's counsel. "The court's award goes first to the plaintiff as part of his recovery in accordance with the language of section 4. If he chooses to pass that money on to his attorneys, that is his business." *Farmington Dowel Prods. Co. v. Forster Mfg. Co., 421 F.2d 61, 88 (1st Cir. 1970)*. This is consistent **[**11]** with the goal of deterrence, which regards the fee award as part of the penalty for the defendant's violation of the antitrust laws. For example, when the contingent fee agreement between the plaintiff and its attorney would generate little in the way of fees because the damages award is small, a "reasonable" attorneys' fee still may be awarded **[*1358]** even if the contract between the plaintiff and the attorney would result in a smaller amount. *Id.*

"The imposition of this penalty was [not] meant to turn in any way on the nature or amount of the plaintiff's fee arrangement, a fortuity wholly unrelated to defendant's illegal conduct." . . . . The ultimate question in every inquiry into the fee award is what contribution the defendant should make toward the fees of plaintiff's counsel.

Perkins, 474 F.2d at 553 (quoting *Farmington Dowel, 421 F.2d at 90*).

Image Tech thus urges us to treat Kodak like any other antitrust defendant, and to evaluate the award of fees as just one part of the penalty for Kodak's antitrust violations, closing our eyes to the eventual disposition of the $ 400,000. But courts have been uneasy with such an absolutist approach, qualifying statements **[**12]** that it "is his business" what an antitrust plaintiff does with a fee award by adding that courts need not be willfully blind. "The fact that section 4 is concerned with awarding a fee which is reasonable for defendant to pay plaintiff does not preclude the court from concerning itself with what is excessive for plaintiff to pay his attorney." *Farmington Dowel, 421 F.2d at 87*. The mere fact that the plaintiff is entitled to receive the attorneys' fees does not prevent the court from deviating from the general rule where exceptional circumstances exist. The determination under the antitrust statute of "what contribution the defendant should make toward the fees of plaintiff's counsel" is complicated in this case, because defendant Kodak is not merely an antitrust violator, but is also the victim of an ethical violation by plaintiff's counsel Coudert. ***HN5***[] Simultaneous representation of clients with conflicting interests (and without written informed consent) is an automatic ethics violation in California and grounds for disqualification. *Flatt v. Superior Ct., 9 Cal. 4th 275, 885 P.2d 950, 955 (Cal. 1994)*. An attorney cannot recover fees for such conflicting representation, *Blecher* **[**13]** *& Collins v. Northwest Airlines, Inc., 858 F. Supp. 1442, 1457 (C.D. Cal. 1994)*, because "payment is not due for services not properly performed." *Cal Pak Delivery, Inc. v. United Parcel Serv., 52 Cal. App. 4th 1, 60 Cal. Rptr. 2d 207, 215 n.2 (Cal. Ct. App. 1997)* (quotation omitted). This applies even where, as here, the matters in which the firm represents the clients with conflicting interests are unrelated. *Jeffry v. Pounds, 67 Cal. App. 3d 6, 136 Cal. Rptr. 373, 376 (Cal. Ct. App. 1977)*. An attorney may claim fees only for services provided before the conflict arose and the ethical breach occurred. *136 Cal. Rptr. at 377*.

The district court awarded fees because Coudert's disqualification was prospective only. But Coudert's ineligibility to recover fees was not prospective. Under California law the bar to compensation extended back to the beginning of Coudert's representation. Coudert represented Kodak throughout its representation of Image Tech, so there was never a time when the representation was conflict-free.

The district court also disavowed any responsibility for determining whether Coudert would receive any of the $ 400,000 awarded, concluding that the issue remained **[**14]** between Image Tech and Coudert. Yet when an attorney's ethical violation is in question, the district court retains some power to look beyond an award of fees to a *party* to determine whether an attorney will receive compensation for a breach of ethical rules. As the Second Circuit stated in *Litton Sys., Inc. v. AT&T, 700 F.2d 785, 827 (2d Cir. 1983)*,

> The payment of attorneys' fees is a part of the penalty for violating the antitrust laws. At the same time there is no doubt that attorneys as officers of the court must operate on an honor system, and must be appropriately disciplined to provide both specific and general deterrence.
>
> Our recent opinion in *Virani* articulates a similar dilemma in the context of evaluating a fee award under the False Claims Act, 31 U.S.C. § 3729-3732. Like the ***antitrust law***, the FCA provides that successful plaintiffs "shall" receive reasonable attorneys' fees from defendants. *Id.* at § 3730(d)(1). Such language on its face seems to say that the plaintiff can recover the attorneys' fee for himself. What then of the attorney? Are not the **[*1359]** fees for his services and should not he, if anyone receive them? It is usually assumed that the **[**15]** answer to the latter question is "Yes, of course, how could it be otherwise." That assumption simply tends to be in the background of decision making about fees. Yet there are times when someone will ask that a usually

> unacknowledged part of the background be brought to the forefront and perused before it recedes again into relative obscurity.

Virani, 89 F.3d at 577. **HN6**[] While "in general, statutes bestow fees upon parties, not upon attorneys . . . weighty authority demonstrates that the client himself is not entitled to keep the fees which are measured by and paid on account of the attorney's services." *Id.*; *see* Heston v. Secretary of HHS, 1997 U.S. Claims LEXIS 257, No. 90-3318 V, 1997 WL 702661 (Fed. Cl. Oct. 3, 1997) (discussing case law under a variety of fee-shifting statutes); Earth Island Inst. v. Christopher, 942 F. Supp. 597, 607 (Ct. Int'l Trade 1996) (noting dilemma and quoting *Virani*).

Virani concluded that under the FCA the client's right to a reasonable fee was actually a "power" to demand such a fee, and after the client exercised that power the attorney had a right to the fees. 89 F.3d at 578. The opinion notes in dictum that the appropriate fee under California law **[**16]** would be zero when an attorney represents clients with conflicting interests. Id. at 579.

A separate concurrence adheres to reasoning closer to that found in antitrust fees cases: "absent a contractual assignment to the attorney, the False Claims Act requires payment of the attorneys' fee award to the party, with the ultimate disposition of the award dependent upon the contract between the attorney and client." Id. at 580 (Thomas, J., concurring). "The fee award may bear no relation to the actual fee paid by the prevailing party to his or her attorney." Id. at 581. The concurrence does not address the situation in which there has been an ethical violation by the attorney.

While "court intervention in [antitrust] fee dispositions is bound to be confined to exceptional circumstances," International Travel Arrangers, Inc., v. Western Airlines, Inc., 623 F.2d 1255, 1278 n.27 (8th Cir. 1980), the circumstances in this case are exceptional: a law firm representing the antitrust plaintiffs simultaneously represented the antitrust defendant, a clear violation of the applicable ethical rules. Image Tech is under no obligation to pay any fees to the law firm, Coudert, for **[**17]** its conflicted representation. Absent some representation that Image Tech, the party requesting fees, will not retain the $ 400,000, it stands to receive a sizable windfall. And if Image Tech does not retain the $ 400,000 and pays Coudert, Coudert will receive compensation which California law says it cannot recover.

If Coudert had breached a duty of loyalty to Image Tech only, there would be a better argument for allowing Image Tech to recover and retain the fees. The $ 400,000 would not be so much a windfall as recompense for conflicted representation. Here, however, it compounds injustice to allow Image Tech to receive $ 400,000 from Kodak, the party injured by the ethical violation. Moreover, it is less of a concern that Kodak, as the defendant potentially liable for the fees, will receive a windfall if it is not ordered to pay Image Tech the fees, because Kodak is the client injured by Coudert's breach of its duty of loyalty when it simultaneously represented Kodak and Image Tech.

Image Tech warns of dire consequences if it is denied a fee award, arguing that defendants will strategically delay disqualification motions to avoid paying the largest possible amount of fees. The **[**18]** district court found that no strategic delay occurred in this case, however, so we are not faced with that situation.

We reverse the district court. In these exceptional circumstances Kodak need not pay Image Tech the $ 400,000 fee for Coudert's services.

REVERSED.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act provides in part that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is hereby declared to be illegal. *15 U.S.C.S. § 1*. Although the Sherman Act prohibits every agreement in restraint of trade, this language relates only to unreasonable restraints. Consequently, most antitrust claims are analyzed under a rule of reason. Under that analysis, a factfinder must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Some types of restraints have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se. Per se treatment is appropriate once experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Constitutional Law > Supremacy Clause > Federal Preemption

Governments > State & Territorial Governments > Legislatures

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Constitutional Law > Supremacy Clause > General Overview

HN10[] **Per Se Rule & Rule of Reason, Per Se Violations**

Under the *Supremacy Clause, U.S. Const. art. VI, cl. 2*, a statute enacted by Congress may not be abridged by an act of a state legislature. A state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under *§ 1* of the Sherman Act when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Judges: Before: GUY, NELSON, and SUHRHEINRICH, Circuit Judges.

Opinion

Per Curiam. Plaintiffs appeal the district court's order denying their motion for a preliminary injunction and dismissing their antitrust claims against the State of Ohio. Plaintiffs had sought to enjoin the enforcement of an Ohio motor vehicle dealer licensing statute that requires remanufacturers of specialty trucks to have binding repair agreements with local dealers or dealers who are located near the purchaser. *See* OHIO REV. CODE ANN. § 4517.02(E) (Anderson 1997). They contend the injunction should have been issued on the grounds that the statute is a *per se* violation of federal antitrust laws. For the following reasons, we affirm.

I.

Plaintiffs, McNeilus Truck and Manufacturing, Inc., McNeilus Financial Services, Inc., and McNeilus Financial, Inc. (McNeilus), are engaged in the manufacture, sale, and lease of ready-mix concrete transit mixers and refuse packer trucks. In producing these trucks, McNeilus purchases truck chassis from truck manufacturers, such as Ford, Mack, **[*3]** Kenworth, and Navistar. Ohio sales are made at McNeilus' Gahanna, Ohio, location. McNeilus provides purchasers with a warranty for the cab portion of the vehicle, but chassis repairs must be made by the chassis manufacturer's authorized dealers.

In the spring of 1996, the Ohio Bureau of Motor Vehicles informed McNeilus that McNeilus' application for renewal of its license to sell new motor vehicles would be denied. The grounds given were failure to comply with the binding repair agreement requirements of Ohio Rev. Code Ann. § 4517.12(C)(2) (Anderson 1993) (current version at *id.* (1997)), which had been in effect since 1987 and at the time provided that binding repair agreements had to be obtained with dealers who were located within 20 miles of the license applicant's sales location:

> That, at the time of the sale of the vehicle, each customer of the applicant will be furnished with a binding agreement ensuring that the customer has the right to have the vehicle serviced or repaired by a new motor vehicle dealer who is licensed to sell and service vehicles of the same line-make as the chassis of the remanufactured vehicle purchased by the customer and whose service or repair **[*4]** facility is located within twenty miles of the applicant's location and place of business.

The Bureau withdrew its denial, however, when the Ohio legislature amended the provision to expand ***HN1***[] the class of acceptable repair dealers to include those within 20 miles of the purchaser's residence or place of business or a chassis dealer "located nearest to the remanufacturer's location and place of business or the customer's residence or place of business." S. 182, 121st Gen. Assembly, 2d Sess. *§ 4517.12(C)(2)* (Ohio 1996) (codified at *OHIO REV. CODE ANN. § 4517.12(C)(2)* (Anderson 1997)).

In addition to enlarging the number of dealers who would qualify under the binding repair agreement requirements, the 1996 amendments to Ohio's motor vehicle dealer licensing laws also redefined "remanufacturer" to expressly include businesses like McNeilus': ***HN2***[] "'Remanufacturer' means . . . a person who modifies a truck chassis supplied by a manufacturer or distributor for use as a public safety or public service vehicle . . . . 'Public safety vehicle or public service vehicle' means a . . . garbage packing truck or cement mixer." *Id. § 4517.01(GG)* (codified at *OHIO REV. CODE ANN. § 4517.01(GG)* **[*5]** (Anderson 1997)).

The amendments also added the binding repair agreement requirements to the separate statutory provision listing conditions for engaging in new motor vehicle sales in Ohio. *See id. § 4517.02(E)* (codified at *OHIO REV. CODE ANN. § 4517.02(E)* (Anderson 1997)). That provision provides in pertinent part as follows:

> ***HN3***[] (E) No remanufacturer shall engage in the business of selling at retail any new motor vehicle without having written authority from the manufacturer or distributor of the vehicle to sell new motor vehicles and to perform repairs under the terms of the manufacturer's or distributor's new motor vehicle warranty, unless, at the time of the sale of the vehicle, each customer is furnished with a binding agreement ensuring that the customer has the right to have the vehicle serviced or repaired by a new motor vehicle dealer who is franchised to sell and service vehicles of the same line-make as the chassis of the remanufactured vehicle purchased by the customer and whose service or repair facility is located within either twenty miles of the remanufacturer's location and place of business or twenty miles of the customer's residence or place of business. **[*6]** If there is no such new motor vehicle dealer located within twenty miles of the remanufacturer's location and place of business or the customer's residence or place of business, the binding agreement furnished to the customer may be with the new motor vehicle dealer who is franchised to sell and service vehicles of the same line-make as the chassis of the remanufactured vehicle purchased by the customer and whose service or repair facility is located nearest to the remanufacturer's location and place of business or the customer's residence or place of business. Additionally, at the time of sale of any vehicle, each customer of the remanufacturer shall be furnished with a warranty issued by the remanufacturer for a term of at least one year.

OHIO REV. CODE ANN. § 4517.02(E).

HN4[] Persons who violate Ohio's motor vehicle dealer licensing laws are subject to criminal penalties. *See id. § 4517.99(A)* (misdemeanor of the fourth degree). Those who violate the statutes' provision relating to conditions of engaging in sales, *id. § 4517.02*, face penalties of a minor misdemeanor for a first offense and a $ 100 fine, and for subsequent offenses, a misdemeanor of the first degree and **[*7]** a $ 1000 fine, *id. § 4517.99(C)*.

McNeilus unsuccessfully attempted to obtain binding repair agreements with authorized dealers in Ohio. When it could not, it filed this action in federal court for injunctive and declaratory relief. It sought an order declaring that *§ 4517.02(E)(1)* violated federal antitrust laws and therefore was invalid under the *Supremacy Clause*; (2) violated due process and denied plaintiffs equal protection under the law; and (3) contravened the *Commerce Clause*. McNeilus also petitioned the court to enjoin defendants, the State of Ohio, its Attorney General, and the Commissioner of the Ohio Bureau of Motor Vehicles, from enforcing *§ 4517.02(E)*.

McNeilus moved for a preliminary injunction "to maintain the status quo," pending its challenge. Following a hearing, the court denied the motion and dismissed plaintiffs' antitrust claims against the State of Ohio.

Plaintiffs appealed pursuant to ***HN5***[] *28 U.S.C. § 1292(a)(1)*, which grants this court jurisdiction of appeals from interlocutory orders refusing injunctions. [1] Pending appeal, plaintiffs moved this court for an injunction, which motion was denied on the grounds that plaintiffs had not demonstrated a likelihood **[*8]** of success on the merits or irreparable harm.

II.

HN6[] We review the denial of a preliminary injunction under an abuse of discretion standard and accord great deference to the decision of the district court. *Dayton Area Visually Impaired Persons, Inc. v. Fisher, 70 F.3d 1474, 1480 (6th Cir. 1995)*. A district court's determination will be upheld unless the district court "relied upon clearly erroneous findings of facts, improperly applied the governing law, or used an erroneous legal standard." *Michigan Coalition of Radioactive Material Users, Inc. v. Griepentrog, 945 F.2d 150, 153 (6th Cir. 1991)*.

HN7[] In deciding whether to grant a preliminary injunction, **[*9]** a district court must consider

> (1) the likelihood that the party seeking the preliminary injunction will succeed on the merits of the claim; (2) whether the party seeking the injunction will suffer irreparable harm without the grant of the extraordinary relief; (3) the probability that granting the injunction will cause substantial harm to others; and (4) whether the public interest is advanced by the issuance of the injunction.

Washington v. Reno, 35 F.3d 1093, 1099 (6th Cir. 1994).

In balancing these four factors, the district court noted that defendants did not contend that the issuance of a preliminary injunction would cause serious harm to others. The court further opined that the fourth factor, public interest, was inextricably intertwined with the first two factors. Therefore, it limited its analysis to consideration of plaintiffs' likelihood of success on the merits and irreparable harm.

A. Likelihood of Success on the Merits

On appeal, plaintiffs take issue with the court's determination that they were unlikely to prevail on their antitrust claims. Plaintiffs argue that the binding repair agreement requirements contained in the licensing statutes **[*10]** are *per se* violations of federal antitrust laws, and, therefore, are invalid under the *Supremacy Clause*.

HN8[] The Sherman Act provides in pertinent part as follows: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal . . . ." *15 U.S.C. § 1*. Although the Sherman Act prohibits every agreement "in restraint of trade," the Supreme Court has long interpreted this language to relate only to "unreasonable restraints." *State Oil Co. v. Khan, 139 L. Ed. 2d 199, 118 S. Ct. 275, 279 (1997)*. Consequently, most antitrust claims are analyzed under a "'rule of reason.'" *Id.* Under that analysis, a factfinder must decide "whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *Id.*

[1] Defendants argue that plaintiffs' objections "are best raised in other, more appropriate state proceedings," and that judicial economy requires denial of plaintiffs' request for relief. These arguments are without merit in light of explicit statutory authority granting this court jurisdiction to hear this appeal. *See* *28 U.S.C. §§ 1292(a)(1)*, *1331*.

The Supreme Court has recognized, however, that ***HN9***[] some types of restraints "have such predictable and pernicious anticompetitive effect, **[*11]** and such limited potential for procompetitive benefit, that they are deemed unlawful *per se." Id.* (citing *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958))*. *Per se* treatment, according to the Court, is appropriate "'once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it.'" *118 S. Ct. at 279* (quoting *Arizona v. Maricopa County Med. Soc'y., 457 U.S. 332, 344, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982))*. Boycotts are an example of *per se* restraints. *United States v. General Motors Corp., 384 U.S. 127, 145, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966)*.

HN10[] Under the *Supremacy Clause, U.S. Const. art. VI, cl. 2*, a statute enacted by Congress may not be abridged by an act of a state legislature. *Testa v. Katt, 330 U.S. 386, 91 L. Ed. 967, 67 S. Ct. 810 (1947)*. The test for determining whether state laws are preempted by federal ***antitrust law*** was articulated by the Supreme Court in *Rice v. Norman Williams Co., 458 U.S. 654, 661, 73 L. Ed. 2d 1042, 102 S. Ct. 3294 (1982)*. In that case, the Court addressed a constitutional challenge under the *Supremacy **[*12]** Clause* to a California statute that prohibited a liquor importer from importing any brand of distilled spirits for which it was not a designated importer. The Court applied the following standard:

> [A] state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under *§ 1* of the Sherman Act when the conduct contemplated by the statute is in all cases a *per se* violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

Id. The Court held the statute was not preempted because the statute authorized **[*13]** a manufacturer to use vertical non-price restraints, which the Court had previously determined were not *per se* illegal. In this case, plaintiffs contend that the Ohio statutes are invalid in that they mandate boycotts.

With this background we turn now to the district court's assessment of the plaintiffs' likelihood of success on the merits. The provisions at issue require remanufacturers to make available to purchasers repair dealers who are conveniently located to them. The challenged provisions do not preclude dealers from agreeing to binding repair agreements. Indeed, plaintiffs themselves introduced evidence that at least two other remanufacturers had obtained binding agreements in compliance with *§ 4517.02(E)*.

McNeilus' "inability" to comply with the binding repair agreement requirements is, to some degree at least, a result of the way it assembles its vehicles. Because McNeilus circumvents local chassis dealers to buy chassis direct from manufacturers, local chassis dealers do not want to sign binding agreements with it to repair its finished products. As the district court noted, McNeilus could offer to repair the chassis as it does the cabs or it could purchase chassis **[*14]** from local dealers. Under these circumstances, we conclude the district court did not abuse its discretion in the conclusion it reached on the likelihood of success on the merits. *See New Motor Vehicle Bd. of Calif. v. Orrin W. Fox Co., 439 U.S. 96, 111, 58 L. Ed. 2d 361, 99 S. Ct. 403 (1978)* (if mere adverse economic effect could render state statutes invalid, states' power to engage in economic regulation would be effectively destroyed). We hasten to add that we make no finding at this juncture that plaintiffs cannot succeed on the merits. We review only the trial judge's exercise of discretion on a preliminary matter.

B. Irreparable Harm

Although the district court devoted the majority of its analysis to plaintiffs' likelihood of success on the merits, it also briefly addressed whether plaintiffs would suffer irreparable harm if the statutes were not enjoined pending plaintiffs' challenge. Plaintiffs do not take issue with the court's findings regarding irreparable harm. They contend that although the district court denied the injunction, the court ruled in their favor on this issue. Defendants vigorously deny this contention. The court's discussion of irreparable **[*15]** harm focused on repercussions to a licensee who had been convicted for violating the binding repair agreement provisions and whose license was revoked on those grounds. According to the court, such a licensee "would be unable to lawfully engage in business during the pendency of the appeal of the conviction, and might possibly go out of business." (App. 55.) The record does not support these facts, however. Defendants have made no attempt to prosecute plaintiffs, and according to the parties this matter is scheduled for trial in May. Therefore we conclude no irreparable harm has been shown in this case.

III.

We next consider whether the district court properly dismissed the antitrust claims against the State of Ohio on the grounds that the state was immune from suit. [2] The Supreme Court, in *Seminole Tribe v. Florida, 517 U.S. 44, 116 S. Ct. 1114, 1131-32, 134 L. Ed. 2d 252 (1996)*, held that ***HN11***[] states are immune under the *Eleventh Amendment* from suits in federal court for claims under the *Commerce Clause* unless they consent to be sued. [3] The Sherman Act was enacted pursuant to the *Commerce Clause*. *See, e.g.,* *McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232,* ***[*16]*** *241, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980)*. The State of Ohio did not consent to suit in this case. [4]

[*17] Plaintiffs contend alternatively that they may maintain their antitrust claims against the State of Ohio under the doctrine of *Ex Parte Young, 209 U.S. 123, 52 L. Ed. 714, 28 S. Ct. 441 (1908)*. That doctrine, however, only allows a plaintiff to seek injunctive relief against a state official, not against the state itself. *Id. at 159-60*. [5]

AFFIRMED.

End of Document

[2] The parties erroneously contend that the district court dismissed the State and the Attorney General. A court speaks through its orders. Although the court's opinion concluded the Attorney General is not charged with enforcement of the licensing statutes, the order only provides "McNeilus' claim under the Sherman Antitrust Act, as it relates to the State of Ohio, is DISMISSED." (App. 63-64.) *See also* *id. at 4*.

[3] That Amendment provides that "the Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens or another State, or by Citizens or Subjects of any Foreign State." *U.S. CONST. amend. XI*.

[4] There is a question as to whether the dismissal of the State of Ohio is properly before us in these proceedings. However, since plaintiffs conceded at oral argument that a dismissal as to the State of Ohio only was proper, we find it unnecessary to address the jurisdictional issue.

[5] The plaintiffs also challenge the district court's determination that plaintiffs failed to name a defendant who is charged with enforcement of the statutes at issue in this case. It was revealed at oral argument that plaintiffs have subsequently added as defendants in this lawsuit Ohio's county and city prosecutors, who defendants concede, are the proper suable entities. Therefore, we need not address this matter further.

CDC Techs., Inc. v. IDEXX Labs., Inc.

United States District Court for the District of Connecticut

March 2, 1998, Decided; March 2, 1998, Filed

Civ. No. 3:95cv339 (JBA)

Opinion by: William I. Garfinkel

Opinion

[*122] **Recommended Ruling on Defendant's Motion for Summary Judgment**

Plaintiff, CDC Technologies, Inc. ("CDC"), brings this action against defendant, IDEXX Laboratories, Inc. ("IDEXX"), alleging unlawful exclusive dealing under *15 U.S.C. §§ 1* and *14*, and *Conn. Gen. Stat. § 35-29*; unlawful restraint of trade under *15 U.S.C § 1* and *Conn. Gen. Stat. § 35-28*; and monopolization, conspiracy to monopolize, and attempt to monopolize under *15 U.S.C. § 2* and *Conn. Gen. Stat. § 35-27*. Plaintiff also alleges unfair trade practices **[**2]** under *Conn. Gen. Stat. § 42-110a et seq.*; civil conspiracy; and tortious interference with business relations.

Presently pending is IDEXX's Motion for Summary Judgment (Doc. # 48). For reasons set forth below, defendant's motion is GRANTED.

[*123] **FACTS**

IDEXX is a Maine-based corporation which sells products for the testing and analysis of veterinary blood samples. Among other products, IDEXX distributes the QBC® VetAutoread ("Autoread"), an instrument which performs hematology tests [1] on veterinary blood. (Def. SMF ¶ 1.) IDEXX also sells the related consumables. [2] (Id.) IDEXX sells the instruments both directly and through third party distributors. (Def. Mem. at p. 2.)

CDC is a Connecticut corporation which designs, manufactures and sells instruments (and the consumable products) to perform hematology analyses on veterinary blood. (Pl. SMF ¶¶ 2, 4.) CDC has sold its instruments directly through its own sales force and has used distributors to provide qualified leads [3] for **[**3]** instrument sales. (Pl. SMF ¶21.)

Both IDEXX and CDC hematology analyzers measure complete blood counts ("CBCs") on veterinary blood. The underlying technology of the instruments is identical to that used for human applications. (Def. SMF ¶ 14.) Indeed, instruments used for human applications have been adapted for use in veterinary clinics. (Def. SMF ¶¶ 15-17.)

In addition to in-clinic hematology analyzers, there are also other methods to measure CBCs of veterinary blood. Practitioners may send blood samples to independent veterinary reference laboratories at a cost of a few dollars per test. (Pl. Ex. 12 at 1002447; Def. Mem. at 3.) Practitioners may use manual methods, such as microscopes. (Id.) CBCs may also be measured by chemical analysis. (Id.) Moreover, CBC tests have been performed in a wide variety of locations including animal hospitals, private practitioner laboratories, animal disease laboratories, universities, pharmaceutical and toxicology laboratories, and human laboratories. (Def. Ex. 20 at 1004215.)

In early 1991, CDC contacted IDEXX **[**4]** to explore a possible business relationship wherein IDEXX would sell CDC's hematology products through its own sales force. (Def. SMF ¶ 18.) No agreement was ever reached, and by early 1992, CDC began to investigate other means to market its product. (Pl. SMF ¶ 20.)

In 1992 and 1993, CDC formed relationships with four major distributors: J.A. Webster, Inc. ("Webster"), A.J. Buck & Son, Inc. ("Buck"), Burns Veterinary Supply ("Burns"), and Midwest Veterinary Supply, Inc. ("Midwest"). (Pl. Mem. at 4.) CDC used these distributors to establish contact with significant veterinary clinics in the United States and to provide sales leads for its products. (Def. Mem. at 6-7.) However, CDC did not have distributor coverage throughout the entire country. (D.Carver dep. v.2 at 30.) Additionally, CDC did not permit distributors to sell or conduct demonstrations of CDC's hematology analyzer. (Dougherty dep. v.1 at 218-19; Pereira dep. v.1 at 62, 115.)

As noted above, CDC also reached customers through its direct sales force. Indeed, it found direct sales more profitable than sales through leads from distributors. (Pereira dep. v.1 at 60-1.) CDC also relied on other methods to pursue sales including **[**5]** telemarketing, direct mail campaigns, customer lists, advertising, and participation in trade shows. (D. Carver dep. v.1 at 228; Dougherty dep. v.1 at 112-13, 170, 173-74, 186; Pereira dep. v.1 at 37, 147).

In 1993, IDEXX entered into an agreement with Becton Dickinson, the company that developed Autoread, to market that instrument in the United States and other parts of the world. (Def. SMF ¶¶ 49-50.) IDEXX, in certain planning documents, noted that other sellers of hematology instruments had "poor distribution" and could be "block[ed] ... at [the] distribution channel[s]" in the United States. (Pl. SMF ¶ 46.) **[*124]** Additionally, certain of IDEXX's marketing plans noted an effort to "erect barriers to entry" and "to create an environment hostile to competitive entry." (Id. ¶ 47.) Moreover, Patricia Panaia, an IDEXX Marketing Manager, wrote a note on IDEXX marketing materials which stated "KILL MASCOT," an apparent reference to CDC's product. (Id. ¶ 50.) Although she did not recall what she

---

[1] "Hematology tests" involve the counting of red blood cells, white blood cells, platelets, and associated diagnostic information.

[2] "Consumables" are products used to treat blood samples before their analysis by the instrument.

[3] A "qualified lead" is the identification of potential customers who have expressed interest in the purchasing of a product. (Pl. SMF ¶ 4.)

meant by "KILL MASCOT," she also wrote a note on another marketing document stating, "PUT THEM OUT OF BUSINESS." Ms. Panaia explained that this note referred to a competitor, Abaxis. (Id.) IDEXX's goal, **[**6]** among other things, was to "achieve [a] dominant share of the veterinary in-clinic hematology market." (Mackinnon dep. v.3 at 38-39; Pl. Ex. 8; Pl. Ex. 73 at 1002846.)

IDEXX began selling Autoread in 1994 and offered it to its existing distributors of other veterinary products. (Def. SMF ¶ 54.) The four distributors that had previously worked with CDC (Webster, Burns, Buck and Midwest) elected to carry IDEXX's Autoread and ceased carrying CDC's hematology instruments. (Pl. Mem. at 10.)

IDEXX had a longstanding policy of denying a distributor the right to market an IDEXX product if the distributor offered a competing product from another manufacturer. (Def. SMF ¶ 52.) In 1995, this exclusive dealing policy was formalized in writing between IDEXX and its distributors (for all products including Autoread). (Def. SMF ¶¶ 59- 60.) These written agreements were for a one year period, and a distributor could terminate the agreement without cause on 60 days notice. (Id.) Currently, IDEXX has control of at least 50% of the distributor market. (Pl. Mem. at 16.) Moreover, since IDEXX entered the in-clinic hematology market, they have accounted for 80% of the sales. (Pl. SMF ¶ 11.)

After IDEXX entered **[**7]** the market, CDC, initially, chose not to pursue relationships with available non-IDEXX national distributors. (Campbell dep. at 24; Caterino dep. v.1 at 43-46; Pereira dep. v.2 at 25-6; E.Carver dep. v.2 at 155-56.) Moreover, even before IDEXX entered the in-clinic hematology market, CDC had not had distributor coverage for some areas of the country. (D.Carver dep. v.2 at 30.) Eventually, CDC began once again to seek distributor relationships. By November, 1995, IDEXX had developed distributor coverage throughout much of the United States. (D.Carver dep. v.2 at 28-29.) In April, 1996, CDC had relationships with at least eight non-IDEXX distributors. (Caterino dep. at 47.)

Over the two years following IDEXX's entry into the in-clinic hematology market, CDC doubled its direct sales force, expanded its telemarketing and increased its budget for direct mail campaigns and advertising. (D.Carver dep. v.2 at 59-61, 70-72; Dougherty dep. v.1 at 111-12.) Despite the loss of their major distributors, CDC's sales rate continued to increase after IDEXX, entered the market. (Def. SMF ¶ 83.) CDC's sales generated by third-parties increased from 55 sales in 1992-1993 to 56 sales in 1994-1995. (Def. **[**8]** Mem. at 16.) CDC's direct sales increased from 52 sales in 1992-1993 to 402 sales in 1994-1995. (Id.)

While CDC has primarily focused its sales efforts in the United States, CDC has distributors in Korea, Canada and the United Kingdom. (E.Carver dep. v.3 at 53.) CDC has also sold products in foreign markets. (Geisel dep. v.1 at 132.) Likewise, IDEXX has distributors outside the United States. (Pollock dep. at 57-9.) However, IDEXX's contracts with these distributors does not include the exclusive dealing agreement at issue (Pl. Mem. at 25.)

Other companies have also developed and marketed hematology instruments for use on veterinary blood. (Def. SMF ¶ 12.) In fact, one company, ZynoCyte, Ltd., has introduced an in-clinic hematology instrument designed to analyze veterinary blood samples and has nationwide distribution of its product. (Sanderson dep. at 14-16.) Moreover, foreign companies have sold veterinary products in the United States (D.Carver v.4 at 54.)

SUMMARY JUDGMENT STANDARD

A motion for summary judgment may not be granted unless the court determines that there is no genuine issue of material fact to be tried and that the moving party is entitled to judgment as a matter of law. **[**9]** *Fed. R. Civ. P. Rule 56(c)*; **[*125]** *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. The substantive law governing the case identifies those facts that are material on a motion for summary judgment. *Id. at 248*. A court must grant summary judgment "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with affidavits, if any, show that there is no genuine issue as to any material fact...." *Rule 56(c)*; See *Miner v. City of Glens Falls, 999 F.2d 655, 661 (2d Cir. 1993)* (citations omitted). A dispute regarding a material fact is genuine "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Aldrich v. Randolph Cent. Sch. Dist., 963 F.2d 520, 523 (2d Cir. 1992)* (internal quotation marks and citations omitted). The burden of showing that no genuine dispute about any material fact exists rests on the party seeking summary judgment. See *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*.

After discovery, if the party against whom summary judgment is sought "has failed to make a sufficient showing on an essential element of [its] case with respect to which [it] has the burden of proof," then summary judgment is appropriate. **[**10]** *Celotex Corp. V. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. In assessing the record to determine whether a genuine dispute as to a material fact exists, the court is required to resolve all ambiguities and draw all inferences in favor of the party against whom summary judgment is sought. See *Anderson, 477 U.S. at 255*. Thus, "[o]nly when reasonable minds could not differ as to the import of the evidence is summary judgment proper." *Bryant v. Maffucci, 923 F.2d 979, 982 (2d Cir. 1991)* (citations omitted).

DISCUSSION

I. EXCLUSIVE DEALING CLAIMS

Even if a contract is found to be an exclusive dealing arrangement, it will not violate § 3 of the Clayton Act, unless the court believes that performance of the contract "may . . . substantially lessen competition" or "tend to create a monopoly." [4] *Tampa Electric v. Nashville Coal Company, 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. In considering the legality of an exclusive dealing contract, a court must analyze three areas. *Tampa Electric, 365 U.S. at 327*. First, the line of commerce in question must be determined. Id. Second, the court must ascertain the area of competition in this line of commerce by careful examination of the market area in which the seller operates. **[**11]** Id. Finally, the court must determine whether the competition foreclosed by the exclusive dealing contract constitutes a substantial share of the market. *Id. at 328*. [5]

A. Relevant Product Market - The Line of Commerce in Question

In an antitrust action, the first issue is to define the relevant market. *Hayden Publishing Co., 730 F.2d 64, 69-70 (2d Cir. 1984)*; *Topps Chewing Gum. Inc. v. Major League Baseball Players Assoc., 641 F.Supp. 1179, 1189 (S.D.N.Y. 1986)*. Determination of the relevant market is a necessary predicate to **[*126]** an examination of the defendant's alleged violations. *United States v. E.I. Du Pont De Nemours and Company, 353 U.S. 586, 593, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)*. Market definition is an attempt to oversimplify complex economic interactions between different parties who have different costs, needs and interests. Id. Indeed, "[t]here is no subject in ***antitrust law*** more confusing than market definition." *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 598 (1st Cir.1993)*. "[T]he frustrating but routine question how to define the product market is answered in antitrust cases by asking expert economists to testify . . . . Usage patterns, customer **[**13]** surveys, actual profit levels, comparison of features, ease of entry, and many other facts are pertinent in answering the question." *Id. at 599*.

---

[4] Section 3 of the Clayton Act states:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods . . . for use, consumption, or resale within the United States . . . on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods . . . of a competitor or competitors of the lessor or seller where the effect of such lease, sale, or contract for Sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

15 U.S.C. § 14.

[5] Under *§ 1* of the Sherman Act, an exclusive dealing contract is unlawful if it illegally restrains trade. *15 U.S.C. § 1*. For purposes of this case, the analysis of Section 3 of the Clayton Act encompasses the standard prescribed for in *§ 1* of the Sherman Act. See Tampa Electric, 365 at 335. This Court further notes that *Conn. Gen. Stat. § 35-29* is patterned after, and substantially similar **[**12]** to, § 3 of the Clayton Act. Therefore, examination under the Clayton Act obviates the need for a separate analysis under *Conn. Gen. Stat. § 35-29*. See *State v. Hossan-Maxwell, Inc., 181 Conn. 655, 436 A.2d 284, 288 (Conn. 1980)*.

IDEXX defines the relevant product-market as the methods of chemical and hematological analysis of blood used to determine a CBC. (IDEXX Mem. at 3.) IDEXX maintains that the market includes at least three procedures by which practitioners attain the results of a hematology test: (1) sending a blood sample to an independent veterinary reference laboratory; (2) use of manual methods, such as microscopes; and (3) running the test on an in-clinic instrument. (Id.) [6] IDEXX further claims that in an early CDC business plan, CDC found that there were 250 million tests performed in the veterinary CBC market by a wide variety of means including tests in animal hospitals, private practitioner labs, veterinary reference labs, animal disease labs, universities, pharmaceutical and toxicology labs, and predominantly human labs. (Def. Ex. 20 at 1004215.) Additionally, IDEXX notes, and CDC admits, that most CBCs are performed in outside laboratories (E. Carver dep. v.5 at 33-34; Def. Ex. 37 at 12) and that CDC's expert admits that a majority of veterinarians **[**14]** look to sources other than CDC or IDEXX instruments for hematology testing. (Geisel dep. v.1 at 285-86.) Finally, IDEXX maintains that the technology underlying hematology instruments is interchangeable for human and animal samples and that, therefore, products which are currently used for analysis of human blood should be included in the product-market definition of hematology analyzers. (Def. SMF at 6-7.)

CDC counters that IDEXX's market definition is too broad and includes products different from those sold by CDC and IDEXX. (CDC Mem. at 22.) CDC claims that the product-market definition should be comprised solely of in-clinic hematology analyzers for use by veterinarians. (Id. at 24.) In support, CDC argues that IDEXX has focused sales efforts on customers for in-clinic instruments. (Pl. SMF at 4.) CDC also avers that IDEXX described the company's goal as to "achieve [a] dominant share of the veterinary in-clinic hematology market." (Mackinnon dep. v.3 at 38-39; Pl. Ex. 8; Pl. Ex. 73 at 1002846.) Moreover, CDC claims that CDC and IDEXX sell instruments specifically designed for use in veterinary clinics, while veterinary laboratories **[**15]** sell a service to test blood samples, not a product. (Pl. Ex. 2 at I004005; Def. Ex. 22 at CDC000230.) At very least, CDC maintains, veterinary hematology instruments for in-clinic use constitute a "submarket" within the broader market of hematology blood testing. "[W]ell defined submarkets may exist, which, in themselves, constitute product markets for antitrust purposes." *Brown Shoe v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. Moreover, CDC claims that blood testing other than hematology, such as chemical tests, are not part of the same market in that they use different instruments and report different information. (CDC's SMF at ¶ 16.)

Both parties submit substantial and persuasive evidence to support their vastly different market definitions. However, each of the three general items that IDEXX includes in their market definition are very different approaches to measuring CBCs. The first issue for this Court is whether these methods are "reasonably interchangeable." *Hayden Publishing Co., 730 F.2d at 70-71* (citing *E.I. du Pont de Nemours & Co., 351 U.S. 377, 394, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. This Court cannot rule, for purposes of this motion, that in-clinic instruments are **[*127]** reasonably interchangeable with **[**16]** other methods for measuring CBCs.

The CDC and IDEXX in-clinic hematology instruments both measure CBCs. While outside laboratories may also measure CBCs, the competition from outside laboratories does not involve a competing instrument. Moreover, in-clinic instruments cost in the range of $10,000 whereas reference laboratories charge only a few dollars per test to measure CBCs. (See Pl. Ex. 12 at 1002447.) Additionally, CDC argues persuasively, at least at this juncture, that laboratories provide a service as opposed to a product. See *United States v. Grinnell Corp., 384 U.S. 563, 572-574, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. Moreover, the manual methods that IDEXX claims to be in the product market are not interchangeable with in-clinic instruments. They are arguably less sophisticated and are difficult to compare to in-clinic instruments. Finally, there are numerous exhibits [7] which assert a difference between in-clinic instruments and other products and services nominated by IDEXX for inclusion in the product market definition. These exhibits also raise a question of fact. See *Hayden Publishing Co., 730 F.2d at 70*.

Even if this Court where to **[**17]** include reference laboratories and manual methods in the product market of in-clinic instruments, there is still an issue of fact as to whether in-clinic instruments are a "well-defined submarket"

---

[6] CDC and IDEXX instruments are in-clinic instruments.

[7] (See, inter alia, Pl. Ex. 2 at 1004005; Def. Ex. 22 at CDC 000230.)

within the broader product market. See *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. In determining whether a submarket may exist, the Court must look at , among other things, a product's particular characteristics including its uses, its prices and its customers. Id. In this case, there is a wide divergence of cost in testing CBCs. (See Pl. Ex. 12 at 1002447.) Arguably, the customers for in-clinic instruments would be larger facilities that could afford such a cost, while the customers for laboratories would be veterinarians with a small practices that requires sending blood samples to outside laboratories. Finally, while the uses for in-clinic instruments, reference laboratories, and manual methods are all to test veterinary blood, these uses may vary widely if the Court were to consider the volume, the accuracy and the manner of the testing.

In this case, there is a genuine issue of material fact concerning the relevant product market definition. "The conclusion that genuine **[**18]** issues of material fact preclude a finding as to relevant market as a matter of law is not unexpected." *Jennings Oil Company, Inc., 539 F.Supp. at 1352*. Pronouncement of the relevant market definition is a question of fact, not a question of law. *Hayden Publishing Co., 730 F.2d at 70*; *Jennings Oil Company, Inc., 539 F.Supp. at 1352*.

B. Relevant Market - The Area of Competition

The Court must next consider the relevant geographic area in which the sellers operate. *Tampa Electric, 365 U.S. at 327*. IDEXX argues that the relevant geographic market is the world. In support, IDEXX claims that CDC has made international sales and has relationships with foreign distributors. Additionally, they claim that there is a free flow of sales and marketing relationships internationally. Finally, IDEXX avers that foreign manufacturers sell blood-testing instruments in the U.S.

CDC maintains that the relevant geographic market is the United States. While CDC and IDEXX have sold hematology analyzers in other countries, CDC argues that there is no evidence that any foreign seller sold analyzers in the U.S. Moreover, CDC claims that the exclusive dealing arrangements imposed by IDEXX are focused on IDEXX distributors **[**19]** in the U.S. CDC additionally argues that they market their products very differently in foreign countries and that IDEXX's exclusive dealing contract was imposed upon distributors solely in the U.S.

For purposes of this motion, the Court concludes that the relevant geographic market is the United States. Moreover, even if the geographic market extended to foreign markets, it would not change this Court's ultimate decision.

[*128] C. Effect on Competition in the Relevant Market

Even if there are genuine issues of material fact regarding product and geographic market definitions, the Court must still determine whether IDEXX's exclusive dealing contract foreclosed a substantial share of the more narrowly defined market. *Tampa Electric, 365 U.S. at 327*. [8] Previously, the Supreme Court analyzed exclusive dealing agreements under a "quantitative" approach by considering solely the extent of the market foreclosure. *Standard Oil Co. v. United States, 337 U.S. 293, 313-14, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)*. Later, the Supreme Court established a "qualitative" test which required a "rule of reason" analysis. *Tampa Electric v. Nashville Coal Company, 365 U.S. at 329*. The rule of reason test requires a court to examine the percentage **[**20]** of the market foreclosed, the duration of the exclusive arrangement, the "notice of termination" period, and the competitive effect of the exclusive dealing contract in the relevant market. Mary Lou Steptoe and Donna L. Wilson, Developments in

---

[8] CDC's per se claim under *§ 1* of the Sherman Act is unavailing. So long as vertical arrangements between manufacturers and distributors do not involve explicit price-fixing, they are to be judged under the rule of reason test. *Business Electronics Corp. v. Sharp Elec. Corp., 485 U.S. 717, 726, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*. The Court notes that exclusive dealings arrangements have never been held to a per se violation of antitrust laws. See *Bravman v. Bassett Furniture Industries, Inc., 552 F.2d 90, 101 (3d Cir. 1977)*; see also, Wayne D. Collins, Tying and Exclusive Arrangements, 720 PLI/Corp. 153, *258 (1991).

Exclusive Dealing, 10-SUM Antitrust 25, *25 (1996); see also, *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 18, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*.

In this case, the dispute involves a contract between IDEXX and each of its distributors and its effect on competition in the in-clinic hematology market. Even though the contract is undisputably an exclusive dealing arrangement, **[**21]** it does not necessarily violate the Clayton Act. Of course, virtually all exclusive dealing arrangements foreclose a competitor from some portion of the market. See *Tampa Electric, 365 U.S. at 322*; see also, *Omega Environmental, Inc., 127 F.3d at 1162* (citations omitted). Nevertheless, there may be economic benefits to exclusive dealing arrangements, including the enhancement of competition. *Omega Environmental, Inc. v. Gilbarco, 127 F.3d 1157, 1162 (9th Cir. 1997)* (citations omitted). For an exclusive dealing contract to violate § 3 of the Clayton Act, the probable effect must be to foreclose competition in a substantial line of the germane market. *Tampa Electric, 365 U.S. at 327-328*; *Standard Oil v. United States, 337 U.S. 293, 299, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)*; see also, *Jefferson Parish Hosp. Dist. No. 2, 466 U.S. at 45* (O'Connor, J., concurring) ("Exclusive dealings is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are frozen out of the market by the exclusive deal"). Additionally, and most significantly here, where a restraint functions at the distributor level, "it is less clear that [the] restraint . . . will have a corresponding impact on the level of competition **[**22]** in the consumer market." *Ryko Mfg. Co. v. Eden Services, 823 F.2d 1215, 1235 (8th Cir. 1987)*.

In the present case, there is scant evidence that IDEXX's exclusive dealing contract at the distributor level impeded CDC's ability to reach the ultimate customers of its hematology analyzer. Initially, the Court notes that distributors have always had a limited role at CDC. Distributors have provided sales leads, but have not sold or conducted demonstrations of CDC's hematology analyzer. (Dougherty dep. v.1 at 218-19; Pereira dep. v.1 at 62, 115.) CDC has reached customers through its direct sales force and CDC has found direct sales to be more profitable than sales through distributors. (Pereira dep. v.1 at 60-1.) Moreover, CDC has relied on numerous other avenues to pursue sales including telemarketing, direct mail campaigns, customer lists, advertising, and participation in trade shows. (D. Carver dep. v.1 at 228; Dougherty dep. v.1 at 112-13, 170, 173-74, 186; Pereira dep. v.1 at 37, 147). Over the two years following IDEXX's entry into the in-clinic hematology market, CDC doubled its direct sales force, expanded its telemarketing and increased its budget **[*129]** for direct mail campaigns and **[**23]** advertising. (D.Carver dep. v.2 at 59-61, 70-72; Dougherty dep. v.1 at 111-12 .) Most significantly, CDC's sales increased during this period.

CDC argues that these alternate avenues to generate sales and sales leads have no bearing on whether IDEXX's exclusive dealing agreement foreclosed the distributor market. (Pl. Mem. at 26.) This Court disagrees. The issues faced by this Court are substantially similar to those faced by the Ninth Circuit in *Omega Environmental, Inc., 127 F.2d 1157*. In Omega Environmental, Inc., the Ninth Circuit reversed a $9,000,000 jury verdict, which the trial judge had trebled. The Omega court found alternative channels, such as direct sales, relevant to assessing market foreclosure at the distributor level. Id. (citations omitted). Likewise, in the present case, the numerous alternatives that CDC availed itself to in marketing its product substantially eliminated any foreclosure effect of IDEXX's exclusive dealing policy with distributors. Antitrust laws were not designed to equip CDC with IDEXX's "legitimate competitive advantage." See Id.

Additionally, as in Omega, alternate distributors existed to provide generation of sales leads. (Geisel dep. Exh. 2.) **[**24]** CDC had never had distributor coverage throughout the entire country. (D.Carver dep. v.2 at 30.) Moreover, for a period of time after IDEXX entered the market, CDC chose not to pursue relationships with available non-IDEXX national distributors. (Campbell dep. at 24; Caterino dep. v.1 at 43-46; Pereira dep. v.2 at 25-6; E.Carver dep. v.2 at 155-56.) When CDC again sought distributor relationships, it developed distributor coverage throughout much of the United States. (D.Carver dep. v.2 at 28-29.) By April, 1996, CDC had formed relationships with at least eight non-IDEXX distributors. (Caterino dep. at 47.) The Court finds, therefore, that CDC was able to develop alternate distributor relationships, adequate for its purposes, despite IDEXX's exclusive dealing agreements.

This Court further concludes that the one-year duration of the IDEXX distributor contract, with its 60 day terminability clause, is sufficiently brief to negate any likelihood of substantial competition foreclosure. See *Omega Environmental, Inc., 127 F.2d at 1163* (citations omitted). Significantly, in Omega, the contract at issue had a similar one year term and 60 day terminability clause. In light of the fact that **[**25]** IDEXX's distributors could be released from the IDEXX contract within 60 days, CDC "need only offer a better product or a better deal to acquire their services." *Omega Environmental, Inc., 127 F.2d at 1164* (citations omitted).

CDC claims that distributors would be reluctant to leave IDEXX because of IDEXX's contract with these same distributors to sell other veterinary products. However, there is no admissible evidence in the record which would support such a proposition. Additionally, a distributor's reluctance to establish ties to a reasonably small company rather than a company with a strong reputation in the veterinary products market is not surprising or anticompetitive. In fact, "[i]t is the essence of competition." Id. (citations omitted).

Significantly, since 1994, at least one additional supplier has introduced an in-clinic hematology instrument designed to analyze veterinary blood samples: ZynoCyte, Ltd. ("ZynoCyte") (Sanderson dep. at 14-16.) IDEXX's exclusive dealing arrangements have apparently not been a substantial barrier to ZynoCyte, which enjoys nationwide distribution of its product. (Id.)

CDC alternatively argues that IDEXX's 80% share of the in-clinic hematology market **[**26]** and foreclosure of 50% of the distributor market require this Court to find a genuine issue of material fact regarding foreclosure. While, at first glance, these percentages appear significant, they "'considerably overstate the size of the foreclosure and its likely anticompetitive effect.'" *Omega Environmental, Inc., 127 F.3d at 1162* (quoting *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 237 (1st Cir. 1983)*. In Omega Environmental, Inc., the defendant captured 55% of the total market and 24% of the distributor market. Additionally, the Court found that defendant's policy foreclosed approximately 38% of the relevant market for sales. Although IDEXX's percentages of the **[*130]** total market and the distributor market are higher than those in Omega, the analysis is the same. There is no evidence that IDEXX's distributor agreements have prevented CDC from marketing or selling its product to veterinarians. Moreover, by virtue of the relatively brief exclusive dealings contracts, with their 60 day terminability clause, CDC is not prevented from competing with IDEXX for distributors. IDEXX should not be penalized for developing a strong and successful reputation within veterinary products **[**27]** market. In any event, CDC's sales continued to increase significantly after IDEXX entered the market in 1994. (Def. SMF ¶¶ 81-84.)

The ultimate issue is whether an exclusive dealings contract "suppresses competition." *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 676 F.2d 1291, 1304 (9th Cir. 1982)*. In this case, CDC sells its product through direct sales, markets its products through numerous non-distributor sources, uses non-IDEXX distributors, and can compete for IDEXX's existing distributors by offering them a superior deal. "Antitrust laws require no more." *Omega Environmental, Inc., 127 F.2d at 1163*. Even when considering the evidence in the light most favorable to CDC, this Court concludes that IDEXX's Motion for Summary Judgement must be granted with respect to CDC's exclusive dealing claims.

II. MONOPOLY CLAIMS

In light of the Court's analysis under § 3 of the Clayton Act, IDEXX's Motion for Summary Judgment must also be granted with respect to CDC's claims under *§ 2* of the Sherman Act. [9] When there is no genuine issue of material fact regarding market foreclosure under § 3 of the Clayton Act, a claim under *§ 2* of the Sherman Act fails. If a claim "does not fall **[**28]** within the broader proscription of § 3 of the Clayton Act it follows that" it will not violate *§ 2* of the Sherman Act. *Tampa Electric, 365 U.S. at 335*. For the same reasons, CDC's corresponding state claim fails. [10]

---

[9] *Section 2* of the Sherman Act states:

> Every person who shall monopolize, or attempt to monopolize, or combine to conspire with any other person or persons, to monopolize any part of trade of commerce ... shall be deemed guilty of a felony.

[10] The elements of *Conn. Gen. Stat. § 35-27* are substantially similar to the elements under *§ 2* of the Sherman Act. See *Westport Taxi Serv., Inc. v. Westport Transit Dist., 235 Conn. 1, 664 A.2d 719, 729 (Conn. 1995)*. Thus, the *§ 35-27* claim must fall with the failure of CDC's federal claim. Id.

Under *§ 2* of the Sherman Act, the offense of monopolization requires proof of two elements: (1) monopoly power in the relevant market and (2) willful acquisition or maintenance of that power as distinguished from growth or development as a result of a superior product or business acumen. *Grinnell, 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778*; *Delaware & Hudson Ry. v. Consolidated Rail Corp., 902 F.2d 174, 178 (2d Cir. 1990)*.

CDC cannot show that IDEXX has monopoly power in the in-clinic **[**29]** hematology market. There is no direct evidence in the record that CDC has monopoly power. CDC's expert stated that he had not measured market power and that he did not think it "possible to quantitatively measure market power in this instance." (Geisel dep. v.2 at 414-416.) Significantly, CDC's expert admitted that IDEXX had not reduced output of its product. (Geisel dep. v.1 at 283.) Monopoly power is equated with a company's power over price or ability to raise prices by reducing output. See, e.g., *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1414 (7th Cir. 1989)* (citation omitted).

CDC maintains that this Court should infer monopoly power from IDEXX's 80% share of the in-clinic hematology market. However, there is no evidence that this market share resulted in monopoly power in the relevant market CDC has not shown and cannot show that IDEXX can maintain an 80% market share over a period of time. To show market power, a plaintiff must show not only that defendant had a significant share of the market, but also that this share can be sustained over a period of time. *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1434-43 (9th Cir. 1995)*. As discussed previously, **[**30]** there are no barriers to entry in the in-clinic hematology market. This point is illustrated by ZynoCyte's entrance into the **[*131]** market and relationship with national distributors. [11] Additionally, CDC's own sales have significantly increased in that same market since IDEXX entered the market in 1994. Market power cannot be sustained unless there are barriers that would prevent new competitors from entering the market or existing competitors from expanding to offset any potential output reduction. Id. Thus, CDC's monopoly claim fails.

To prove the offense of attempted monopolization under *§ 2* of the Sherman Act, the plaintiff must show: (1) the intent to monopolize; (2) that defendant has engaged in predatory or anticompetitive conduct; and (3) a dangerous probability of obtaining monopoly power. *Delaware & Hudson Ry., 902 F.2d at 180*. For reasons noted above, this claim also fails. CDC cannot show that IDEXX has a dangerous probability of obtaining monopoly power.

Finally, the conspiracy count, **[**31]** under *§ 2* of the Sherman Act, also fails. A conspiracy to monopolize requires proof of: (1) concerted action; (2) overt acts in furtherance of the conspiracy; and (3) specific intent to monopolize. *Discon, Inc. v. NYNEX Corp., 93 F.3d 1055, 1062 (2d Cir. 1996)*. There is no evidence that any distributor intended for IDEXX to achieve a monopoly position. If one party's intent to monopolize is not shared by another party, there can be no conspiracy to monopolize. *Belfiore v. New York Times, Co., 826 F.2d 177, 183 (2d Cir. 1987)*. [12] Thus, all of CDC's claims under *§ 2* of the Sherman Act fail as a matter of law. [13]

III. STATE LAW CLAIMS

---

[11] The Court notes that there is also a substantial possibility that companies who market products for analysis of human blood could readily market those or similar devices to the veterinary market.

[12] Similarly, CDC's other claims under *§ 2* of the Sherman Act fail. CDC's claim of "leveraging" (Count III) fails as CDC cannot prove any anticompetitive effect or monopoly power in the in-clinic hematology market. See *Viacom Intern. Inc. v. Time. Inc., 785 F.Supp 371, 378 (S.D.N.Y. 1992)*. Likewise, CDC's "essential facility" claim fails. Even assuming that the distributor market satisfied the definition of a "facility," CDC "must show that an alternate to this facility is not economically feasible." *Twin Laboratories v. Weider Health and Fitness, 900 F.2d 566, 568 (2d Cir. 1990)*(citations **[**32]** omitted) As previously noted, alternative channels are available and economically feasible for CDC. Moreover, CDC cannot show that "'denial of its use inflicts a severe handicap on potential market entrants.'" *Twin Laboratories v. Weider Health and Fitness, 900 F.2d 566, 568 (2d Cir. 1990)* (quoting *Hecht v. Pro-Football, Inc., 570 F.2d 982, 992, 187 U.S. App. D.C. 73 (D.C. Cir. 1977)*. Thus, there are no severe barriers to potential or current market participants.

[13] While certain IDEXX documents, which indicate a desire to "create barriers to entry" and to "KILL MASCOT," may raise a question as to the intent element of the monopoly claims, there is not sufficient evidence to raise a genuine issue of material fact regarding the other elements of those claims.

A. Civil Conspiracy

The elements of the tort of civil conspiracy include: "'(1) a combination of two or more persons, (2) to do a criminal or unlawful act or a lawful act by criminal or unlawful means, (3) an act done by one or more of the conspirators pursuant to the scheme and in furtherance of the object, (4) which act results in damage to the plaintiff.'" *Marshak v. Marshak, 226 Conn. 652, 665, 628 A.2d 964 (1993)* (quoting *Williams v. Maislen, 116 Conn. 433, 437, 165 A. 455 (1933))*. **[**33]** This count is based on the same allegations as are CDC's exclusive dealing claims. When a civil conspiracy claim fails to set forth a separate cause of action, it must be dismissed. *Marshak, 226 Conn. at 665-66 (1993)*. Moreover, as noted above, there is no evidence of a conspiracy. Thus, IDEXX is entitled to summary judgment on this claim.

B. Tortious Interference

A claim of tortious interference with business relations and business expectancies requires proof that IDEXX intentionally interfered with CDC's business expectancies and, in doing so, caused CDC's harm or actual loss. *Harry A. Finman & Son, Inc. v. Connecticut Truck & Tractor Serv. Co., 169 Conn. 407, 415, 363 A.2d 86 (1975)*. In this case, CDC cannot prove interference which caused harm or actual loss. CDC's sales continued to increase after IDEXX entered the market in 1994. In addition, many other **[*132]** avenues existed for CDC to directly sell its products, pursue alternate distributors, or compete for distributors currently under contract with IDEXX. Moreover, in the absence of a contract between CDC and its former distributors, [14] IDEXX cannot be liable "'for interfering with the rights of parties to a contract that is terminable at will.'" **[**34]** *Consolidated Marketing Corp. v. Carol Cable Co., Civ. No. H81-262 (JAC), 1985 U.S. Dist. LEXIS 13682, *5 (D.Conn. Nov. 20, 1985)* (Cabranes, D.J.) (citing *Restatement (Second) of Torts § 768, comment i*). [15]

C. CUTPA

Finally, CDC alleges that IDEXX engaged in unfair methods of competition and unfair acts or practices in violation of *Conn. Gen Stat. §42-110a et seq*. ("CUTPA"). The allegations are based entirely on facts previously discussed **[**35]** under CDC's antitrust claims. Claims of unfair trade practices fail if no underlying antitrust violation is found. *Ben Elfman & Son, Inc. v. Criterion Mills, Inc., 774 F.Supp. 683, 687 (D.Mass. 1991)*; *J.H. Westerbeke Corp. v. Onona Corp., 580 F.Supp. 1173, 1192 (D.Mass. 1984)*. While the Connecticut Supreme Court has not yet ruled on this issue, this Court finds the rulings of the Massachusetts district court persuasive on this issue. [16] Thus, CDC's claims under CUTPA must fall.

---

[14] CDC does not allege and there is no evidence in the record that an actual contract existed between IDEXX and its distributors, but only a "relationship." (Compl ¶¶ 20-25.)

[15] The *Restatement (Second) of Torts § 768* states:

> (1) One who intentionally causes a third person not to enter into a prospective contractual relation with another who is his competitor or not to continue an existing contract terminable at will does not interfere improperly with the other's relation if
>
> > (a) the relation concerns a matter involved in the competition between the actor and the other and
> >
> > (b) the actor does not employ wrongful means and
> >
> > (c) his action does not create or continue an unlawful restraint of trade and
> >
> > (d) his purpose is at least in part to advance his interest in competing with the other.

[16] Connecticut courts look to Massachusetts courts to interpret CUTPA claims because Massachusset's unfair trade practices act is virtually identical to CUTPA. See, e.g., *Normand Josef Enterprises v. Connecticut National Bank, 230 Conn. 486, 646 A.2d 1289, 1306 (Conn. 1994)* (where the Connecticut Supreme Court noted that Connecticut has "repeatedly looked to the reasoning and decisions of the Supreme Judicial Court of Massachusetts with regard to the scope of CUTPA") (citations and quotations omitted).

CONCLUSION

For reasons set forth, defendant's Motion for Summary Judgment (Doc. # 48) is hereby: GRANTED. Any objections to this recommended ruling must be filed with the Clerk of the Court within ten (10) days of the receipt of **[**36]** this order. Failure to object within ten (10) days may preclude appellate review. See *28 U.S.C. § 636(b)(1)*; *Rules 72*, *6(a)* and *6(e) of the Federal Rules of Civil Procedure*; *Rule 2 of the Local Rules* for United States Magistrates; *Small v. Secretary of H.H.S., 892 F.2d 15 (2d Cir. 1989)*(per curiam); *FDIC v. Hillcrest Assocs., 66 F.3d 566, 569 (2d Cir. 1995)*. So Ordered this 2nd day of March, 1998 at Bridgeport, Connecticut.

HN1[] **Attempts to Monopolize, Elements**

In order to maintain an attempted monopolization claim under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, plaintiffs must prove: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

HN2[] **Summary Judgment, Opposing Materials**

Summary judgment is appropriate when the court finds that there is no genuine issue as to any material fact, and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The party opposing summary judgment may not rest on its pleadings but must present significant probative evidence demonstrating that a genuine dispute of material fact exists and that the moving party is not entitled to judgment as a matter of law. The court must view these materials in the light most favorable to the nonmovant, drawing all reasonable inferences in the nonmovant's favor. The moving party bears the initial burden of informing the court of the basis for the motion and of identifying those parts of the record which demonstrate absence of a genuine issue of material fact. Once the moving party has met its burden, the nonmovant may not rely on conclusory allegations or mere conjecture, but rather must offer specific facts to support a verdict in its favor. As to any claim, or essential element thereof, for which the nonmoving party bears the burden of proof at trial, the nonmoving party must make a showing sufficient to establish the existence of that claim or element.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN4[] **Regulated Practices, Market Definition**

The same proof which proves the existence of a relevant product market also shows the existence of a product submarket. In the absence of market data or similar hard evidence, courts are incapable of determining the extent of cross-elasticity of demand in the market.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

In ***antitrust law***, as a rule of thumb, market shares under 30 percent should be presumptively rejected.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[ ] **Monopolies & Monopolization, Actual Monopolization**

Whether a company is sufficiently poised to achieve monopoly power is defined as the power to raise prices or to exclude competition. In making the "dangerous probability" determination, courts primarily focus on market share as a measure of market power. Other factors relevant to determining dangerous probability include the strength and capacity of existing and potential competition, barriers to entry, the concentration of the market, the nature of the defendant's conduct, and the elasticity of consumer demand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[ ] **Monopolies & Monopolization, Actual Monopolization**

If a genuine issue exists as to whether defendant succeeded in monopolizing the relevant market, it follows that there is at least a genuine issue as to whether plaintiff can prove a dangerous probability of success in monopolizing the market.

Opinion

ORDER

Currently before the Court is Defendant's motion for summary judgment on Plaintiffs' claims of attempted monopolization of the stern drive and outboard boat markets. [1]

---

[1] On October 21, 1997, Plaintiffs filed a response to the motion arguing, *inter alia*, that a ruling on the motion should be deferred until discovery was complete. The Court granted Plaintiffs' request on November 19, 1997, and deferred a ruling on the motion until the close of factual discovery. On January 13, 1998, Plaintiffs filed a supplemental response, and on January 21, 1998 Defendant filed a reply memorandum. Defendant supplemented the record on February 2, 1998 to reflect proof obtained during expert depositions. The motion was argued orally on February 13, 1998. Plaintiffs were allowed to supplement the record on March 2, 1998 and March 5, 1998.

[*2] I. Background

Defendant Brunswick Corporation ("Brunswick") is a large, vertically integrated corporation which conducts business in several segments of the marine industry. Through its Mercury Marine Division, Brunswick manufactures marine engines which are distributed to a network of dealers, to independent boat manufacturers, and to Brunswick's sister boat building divisions, U.S. Marine and Sea Ray. Brunswick acquired U.S. Marine and Sea Ray in 1986.

Plaintiffs are a group of twenty-four independent boat builders and a large marine buying cooperative, Independent Boat Builders Incorporated ("IBBI"). All of the Plaintiffs are customers of Mercury Marine to the extent that they purchase a percentage of their engine needs directly from Mercury Marine or, alternatively, through IBBI. Plaintiffs are direct competitors of Sea Ray and U.S. Marine in the manufacture of boats.

Plaintiffs brought suit against Brunswick on December 7, 1995, alleging violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, and *Section 7* of the Clayton Act, *15 U.S.C. § 18*, along with various state law claims. Count Three of Plaintiffs' Fourth Amended Complaint ("Complaint") alleges **[*3]** an unlawful attempt to monopolize the relevant stern drive boat market. Count Five of the Complaint alleges an unlawful attempt to monopolize the relevant outboard boat market. Brunswick moves for summary judgment on these two claims.

HN1[] In order to maintain an attempted monopolization claim under *Section 2*, Plaintiffs must prove: "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*; *Amerinet, Inc. v. Xerox Corp., 972 F.2d 1483, 1490 (8th Cir. 1992)*. Brunswick's motion focuses solely on element (3) above: whether there is a dangerous probability of achieving monopoly power. For the purposes of the motion Brunswick concedes that the relevant markets are those as stated in the Complaint. [2] Brunswick contends that it possesses such a low market share in the two relevant markets that there is no dangerous probability that it will achieve monopoly power.

[*4] In support of its motion, Brunswick submits the affidavit of Anthony J. Romersa, Brunswick's Director of Planning, Marine Operations. Romersa states that in 1996, Brunswick's share of the stern drive boat market was 37.1%, and that Brunswick's share of the outboard boat market was 12.6%. See, Romersa Affidavit at P 6 and Ex. C and D. Romersa's calculations were determined by comparing the worldwide sales of Brunswick boats at retail (the numerator) with the National Marine Manufacturing Association's ("NMMA") estimate of boats sold at retail by United States dealers (the denominator). Id. at P 6 and Ex. C. [3] Romersa states that his estimate of the number of

---

[2] Brunswick has opposed Plaintiffs' definitions of the relevant markets throughout this case. The Complaint defines the relevant stern drive boat market as "the market for recreational power boats, except luxury motor yachts, which are packaged with a stern drive or inboard marine engine and sold in the relevant geographic market." See Complaint at P 37. The Complaint defines the outboard marine boat market as:

> The market for recreational power boats and fishing boats which are packaged with an outboard engine, or prerigged to take a particular brand of engine, and sold in the relevant geographic market. The outboard boat market consists of two segments or sub-markets, a freshwater segment and a saltwater segment.

See Complaint at P 39. These markets are to be distinguished from the separate markets for outboard and stern drive engines sold apart from a boat or "loose." Plaintiffs have brought actual monopolization claims with respect to those alleged product markets.

[3] It is undisputed that the geographic market in this case is the United States and Canada. Because of the nature of the available data, the estimates given by Romersa are slightly skewed. First, the estimate of Brunswick's retail sales is an estimate of worldwide sales. Thus, the numerator in the equation would be smaller if it were possible to determine Brunswick's retail sales solely in the United States and Canada. Second, the NMMA estimates only reflect sales by United States dealers. Thus, if it were possible to include sales by Canadian dealers, the denominator in the equation would be larger. In sum, according to

Brunswick boats sold at retail in a given year is based on the number of warranty cards that are returned to Brunswick after retail purchases of Brunswick boats, and on a monthly polling of dealers regarding the number of boats in their inventory. Id. at P 7.A. The number of warranty card returns is "grossed up" by a factor which represents an estimate of the percentage of boats sold for which warranty cards are not returned. Id. Romersa notes that Brunswick sold its fishing boat lines in 1996. He states that following **[*5]** the sale of those lines, Brunswick's share of the stern drive boat market is 35.7% and its share of the outboard boat market is less than 5%. Id. at P 7.D.

Plaintiffs' response and supplemental response level a number of attacks at Brunswick's motion. First, **[*6]** Plaintiffs argue that the Romersa Affidavit does not comport with *Rule 56(e)* because portions of the affidavit are not based on the personal knowledge of the affiant. Plaintiffs state that Romersa has no personal knowledge regarding the practices of the NMMA in compiling and computing the statistics which form the bases for his calculations of Brunswick's market shares. Second, Plaintiffs argue that the possible existence of submarkets should preclude summary judgment. And finally, Plaintiffs argue that this case is not one where the Court can focus solely on market share to determine a dangerous probability of success. Plaintiffs point to a variety of alleged anticompetitive conduct by Brunswick and argue that the alleged conduct, when factored in with Brunswick's market share, create sufficient questions of fact for the jury as to whether Brunswick has a dangerous probability of achieving monopoly power.

II. Discussion

A. Summary Judgment Standard

HN2[] Summary judgment is appropriate when the Court finds that there is no genuine issue as to any material fact, and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*; *Celotex Corp. v. **[*7]** Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 2552, 91 L. Ed. 2d 265 (1986)*. The party opposing summary judgment may not rest on its pleadings but must present "significant probative evidence" demonstrating that a genuine dispute of material fact exists, and that the moving party is not entitled to judgment as a matter of law. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 2510, 91 L. Ed. 2d 202 (1986)*. The Court must view these materials in the light most favorable to the nonmovant, drawing all reasonable inferences in the nonmovant's favor. *Id. at 255, 106 S. Ct. at 2513*. The moving party bears the initial burden of informing the court of the basis for the motion and of identifying those parts of the record which demonstrate absence of a genuine issue of material fact. *Celotex, 477 U.S. at 323, 106 S. Ct. at 2552-53*. Once the moving party has met its burden, the nonmovant may not rely on conclusory allegations or mere conjecture, but rather must offer specific facts to support a verdict in its favor. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 585-87, 106 S. Ct. 1348, 1355-56, 89 L. Ed. 2d 538 (1986)*(construing *Fed. **[*8]** R. Civ. P. 56(e)*). As to any claim, or essential element thereof, for which the nonmoving party bears the burden of proof at trial, the nonmoving party must make a showing sufficient to establish the existence of that claim or element.

B. The Romersa Affidavit

Plaintiffs contend that the Romersa Affidavit is insufficient under *Rule 56(e)* as a matter of law because he does not have personal knowledge of the practices of the NMMA in compiling and computing the market statistics which form the basis for his calculations of Brunswick's market share. In response, Brunswick argues that Romersa is not required to have personal knowledge of the information because the records are business records of the NMMA and as such they are properly considered as part of the affidavit. Brunswick has submitted an affidavit from Charles Janini of the NMMA describing the process the NMMA uses to produce the documents at issue. During oral

---

Romersa these estimates are the most accurate available, but the actual market shares would be smaller. See, Romersa Aff. at P 7.B.

argument, Plaintiffs seemed to concede that the NMMA records were admissible as business records, but stressed that the application of the business record exception should be applied even-handedly. [4]

[*9] The Court has doubts as to whether the Romersa Affidavit was ever deficient. ***HN3***[] Business records are properly considered in connection with a *Rule 56* affidavit. Romersa stated in his affidavit that Brunswick relies on the NMMA records in evaluating its performance in the marine industry. Thus, Romersa's reliance on the documents in the affidavit was proper. See, *United States v. Jakobetz, 955 F.2d 786, 801 (2nd Cir. 1992)*("Rule 803(6) allows business records to be admitted 'if witnesses testify that the records are integrated into a company's records and relied upon in its day to day operations'"); *United States v. Childs, 5 F.3d 1328, 1333 (9th Cir. 1993)*("Exhibits can be admitted as business records of an entity, even when that entity was not the maker of those records, so long as the other requirements of Rule 803(6) are met and the circumstances indicate the records are trustworthy.")

Even if the Romersa affidavit was insufficient to establish the foundation for the business records exception, the submission of the Janini affidavit has resolved any remaining issues. The Janini affidavit establishes that the NMMA records considered by Romersa are in fact business records **[*10]** under Rule 803(6). They would be admissible at trial, and Romersa's reliance on the records in connection with his affidavit was proper. Thus, the Court finds that the Romersa Affidavit is sufficient to meet the requirements of *Fed. R. Civ. P. 56(e)*.

Plaintiffs have questioned the reliability of the NMMA statistics based on conversations with Charles Janini. See, Letter from K. Craig Wildfang to Court dated March 5, 1998. Specifically, Janini disclosed that the NMMA's retail sales estimates are derived by estimating changes in the sales of a "control group" of boat builders that report wholesale shipments to the NMMA. Only a percentage of boat builders actually belong to the NMMA and report their wholesale sales. Plaintiffs argue that the NMMA statistics are more realistically an estimate of wholesale shipments derived from a very small sample of the marine industry rather than "Annual Retail Sales Estimates" as indicated by the title of Exhibit "B" to the Janini Affidavit. [5]

[*11] The Court has always recognized that the NMMA statistics are estimates only and do not represent the exact number of new outboard and sterndrive boats sold annually at retail. Because they are estimates, the Court also accepts that some margin of error should be considered in applying these figures to any analysis of market power for the purposes of the motion. The Court has taken this margin of error into account in assessing Brunswick's market power in the outboard and stern drive boat markets. As will be demonstrated below, the presence of this margin of error was not sufficient to change the Court's conclusions with respect to either market.

C. The Submarket Issue

For the purposes of this motion, Brunswick has conceded that the relevant markets are those defined in the Fourth Amended Complaint. Plaintiffs seek to avoid summary judgment by arguing that possible submarkets exist. This argument is rejected.

First, it should be noted that Plaintiffs' complaint is completely devoid of claims based upon alleged submarkets. The complaint does purport in one paragraph to define submarkets for the outboard boat market consisting of a "freshwater segment" and a "saltwater segment." **[*12]** See, Complaint at P 39. However, the remainder of the Complaint, which sets forth the operative language of Plaintiffs' claims, contains no reference whatsoever to any submarkets. See, Complaint at PP 82-86, 96-102. The claims themselves are brought on behalf of either "the stern

---

[4] Plaintiffs' concern here (and willingness to concede that the NMMA records are business records) apparently stems from an ongoing dispute with Brunswick regarding other alleged business records, wherein Brunswick has refused to stipulate that certain documents are admissible as business records. The Court will in fact apply the law on Rule 803(6) even-handedly; however, each instance will have to be evaluated on its own merits.

[5] Although Plaintiffs challenge the reliability of the NMMA statistics, they have offered no statistics reflecting market shares that are more reliable or that dispute the NMMA estimates.

drive plaintiffs" or "the outboard plaintiffs" rather than any subset of Plaintiffs that manufacture a particular type of boat (which one would expect in the case of a submarket). In addition, other filings by Plaintiffs further demonstrate that the attempt claims were directed only at the broader markets consisting of the stern drive boat market and the outboard boat market. See, Preliminary Report of Dr. Robert E. Hall at 14 ("In my opinion, there are related product markets for the boats: the market for boats installed with stern drive or inboard engines and the market for boats installed with, or pre-rigged for, outboard engines."); see also, Plaintiffs' Second Supp. Resp. to Def.'s Damage Interrogatories dated Nov. 10, 1997 (omitting any reference to submarkets or damages arising from the attempted monopolization of submarkets.)

It is difficult for the Court to view Plaintiffs' submarket **[*13]** argument as anything but an eleventh hour tactic invoked solely to avoid summary judgment. The deadline for amending pleadings is long past, and expert discovery (at least as to economic experts) is complete. Final expert reports, which are preclusive in nature, have been submitted. Plaintiffs' expert has submitted no opinions or analyses regarding submarkets, and his reports and deposition testimony comport with the broader definition of the relevant boat markets as alleged in the Complaint.

Most importantly, however, Plaintiffs make no attempt to state which categories they believe are the appropriate submarkets even though the parties have conducted exhaustive discovery for over two years. An examination of Plaintiffs' pleadings demonstrates that they do not know what the appropriate submarkets would be at this time. [6] The trial of this matter is set to start in a little over a month, and it would be inappropriate to allow Plaintiffs to proceed on such a vague and disjointed submarket theory.

[*14] Plaintiffs have also submitted insufficient evidence to raise genuine issues regarding the existence of submarkets. Plaintiffs' supplemental and second supplemental memoranda purport to show that these submarkets may exist by merely demonstrating that Brunswick and the NMMA classify boats into certain categories and that Brunswick is capable of computing its market share in some discrete categories. Plaintiffs submit various exhibits that identify the categories in which boats can be classified, and also submit the testimony of several Brunswick representatives wherein they acknowledge the usefulness of categorizing certain types of boats.

The Eighth Circuit has noted that ***HN4***[] "the same proof which proves the existence of a relevant product market also shows . . . the existence of a product submarket." *H.J. Inc. v. International Telephone and Telegraph, 867 F.2d 1531 (8th Cir. 1989)*. In H.J. the Court went on to state that in the absence of market data or similar hard evidence Courts are incapable of determining the extent of cross-elasticity of demand in the market. Id. Although Plaintiffs have had ample opportunity to produce concrete evidence of cross-elasticity **[*15]** in support of a submarket definition, the only evidence they have produced is conjectural at best, and is certainly not the type a Court would consider conclusive in identifying a relevant market or submarket. Furthermore, because of the preclusive nature of the expert reports, Plaintiffs' expert will not have the opportunity to add opinions or analyses which might salvage Plaintiffs' arguments here.

The Court finds that Brunswick is entitled to move for summary judgment on the product markets as defined in the Complaint. Accordingly, the Court will proceed to address Brunswick's motion as it applies to the separate markets alleged in the Complaint for outboard and stern drive boats.

D. The Outboard Boat Market

In order to prevail on an attempted monopolization under *Section 2*, Plaintiffs must prove: "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous

[6] Plaintiffs argue that the following might be appropriate submarkets in this case: fiberglass boats, aluminum boats, bass boats, open express fish boats, utility boats, open deck boats (with or without pontoons), express cruisers, runabouts, performance I/O, stern drive cruisers, entry boats, mid-level boats, premium boats, entry cruiser stern drive boats, entry runabout outboards, mid-level yachts, cruiser fiberglass boats, fiberglass outboard runabouts, fiberglass stern drive runabouts, fiberglass stern drive cruisers, and fiberglass center console outboard boats. The foregoing is only a partial list of the categories raised in Plaintiffs' pleadings.

probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*; *Amerinet, Inc. v. Xerox Corp., 972 F.2d 1483 (8th Cir. 1992)*. Brunswick argues that it possesses **[*16]** an insufficient market share in the outboard boat market to meet the dangerous probability of success requirement.

The Romersa affidavit lists Brunswick's market share in the outboard boat market for the years 1987 to 1996 inclusive. In 1987 Brunswick held a 6.9% share of the outboard boat market. Brunswick's market share reached as high as 16.3% in 1989, but has steadily declined since then, reaching 12.6% in 1996. In 1996, Brunswick sold its fishing boat lines. The Romersa Affidavit states that following that sale, Brunswick's share of the outboard boat market dropped to less than 5.0%.

Brunswick's market share of the outboard boat market is now less that 5%, and with the exception of a few anomalies, has been declining since 1989. Under no construction of the law of attempted monopolization could Plaintiffs ever prevail on this claim. [7] Two leading commentators on ***HN5***[] ***antitrust law*** propose that as a rule of thumb, market shares under 30% should be presumptively rejected. See, IIIA Areeda & Hovenkamp, ***Antitrust Law*** P 807 (1996). The case law has generally embraced this concept as well. See, e.g., *M & M Medical Supplies and Service, Inc. v. Pleasant Valley Hosp., Inc.,* ***[*17]*** *981 F.2d 160 (4th Cir. 1992)*; *Acme Markets, Inc. v. Wharton Hardware and Supply Corp., 890 F. Supp. 1230 (D. N.J. 1995)*; ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments, p.299 n.399 (4th ed. 1997)(collecting cases).

Brunswick's low market share of the outboard boat market is conclusive as to this claim. The Court finds that there are no genuine issues of material fact on this issue. There is no dangerous probability that Brunswick will succeed in monopolizing the outboard boat market, and Brunswick's motion for summary judgment as to Count Five of the Complaint will be granted.

E. The Stern Drive Boat Market

Brunswick argues that its market share of the stern drive boat market is also too low to demonstrate a dangerous probability of success. The Romersa Affidavit states **[*18]** that in 1987, Brunswick's market share was 29.1%. The market share peaked in 1991 at 36.5%, and then declined slightly for three years. The share rose slightly in 1995 and 1996 to an all time high of 37.1%. Following the sale of the fishing boat lines, Brunswick's market share of the stern drive boat market is approximately 35.7%.

As Plaintiffs correctly point out, a claim for attempted monopolization is focused on the future. The ultimate issue is ***HN6***[] whether Brunswick is sufficiently poised to achieve monopoly power, which is defined as the power to raise prices or to exclude competition. *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*; *National Reporting Co. v. Alderson Reporting Co., 763 F.2d 1020 (8th Cir. 1985)*. In making the "dangerous probability" determination, courts primarily focus on market share as a measure of market power. Other factors relevant to determining dangerous probability include the strength and capacity of existing and potential competition, barriers to entry, the concentration of the market, the nature of the defendant's conduct, and the elasticity of consumer demand.

The Seventh Circuit has noted that **[*19]** "market share is at best an indicator of market power." *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1413 (7th Cir. 1989)*. While recognizing the relevance of market share statistics, Plaintiffs caution the Court to be "particularly wary of the numbers game." See, Plf.'s Mem. at 1-2 (citing, *Cliff Food Stores v. Kroger, Inc., 417 F.2d 203 (5th Cir. 1969)*.

This case is indeed one where the "numbers game" is not outcome determinative. Plaintiffs argue that the Court should consider the conduct of Brunswick to assess whether there is a dangerous probability of success. Plaintiffs

[7] Even making liberal allowances for inaccuracies in the NMMA statistics as to the number of boats sold, Brunswick's market share is still so far removed from a permissible threshold that the outcome remains the same.

focus on the fact that Brunswick possesses alleged monopoly power in the stern drive engine market. According to Plaintiffs, "control over marine engines translates into control over boats." See Plf. 's Supp. Mem. at 6. Plaintiffs argue that this alleged control over engines must be considered.

The Court has found two cases which uniquely support Plaintiffs' proposition that Brunswick's alleged control over marine engines should be a factor considered in conjunction with the dangerous probability requirement. In *Zschaler v. Claneil Enterprises, Inc., 958 F. Supp. 929 (D.* ***[*20]*** *Ver. 1997)*, the plaintiffs alleged that the defendants had monopolized and attempted to monopolize the markets for rental and property management services at a resort ski area. *Id. at 941*. The defendants were in a unique position in that they owned and controlled the ski area's long-standing telephone reservation system, and the plaintiffs alleged that the defendants were abusing this control by steering customers to defendants' own rental units. *Id. at 935*. Although the plaintiffs conceded that the defendant controlled only 35% of the rental market and 35% of the property management market, the court found:

> Plaintiffs have shown a genuine factual dispute as to the steering of Central Reservations callers . . . . Defendants' market share, when combined with their control of Central Reservations and alleged customer steering, does demonstrate a factual dispute as to the existence of a dangerous probability that Defendants would achieve monopoly control.

Id. at 942-943 (emphasis added). Thus, the court implicitly recognized that defendant had the potential to increase its market power due to its outright control of a crucial market resource, the Central **[*21]** Reservation system. The rationale of Claneil is applicable to the instant case.

Similarly, in *Energex Lighting Industries, Inc. v. North American Philips Lighting Co., 1990 U.S. Dist. LEXIS 7181, 1990-1 Trade Cas. (CCH) P69,057 (S.D.N.Y. 1990)*, the court was faced with a motion for summary judgment on a monopolization and attempted monopolization claim wherein the defendant, Phillips, possessed 25% of the relevant market for long life flourescent light bulbs. Phillips was Energex's sole source for flourescent bulbs. Phillips distributed bulbs to Energex but also sold directly to its own customers. In a separate opinion, found at *765 F. Supp. 93*, the court described the relationship as follows:

> Energex was a competitor of Philips but at the same time depended upon Philips to supply it with fluorescent bulbs. In the same vein, Phillips was a competitor of Energex but Energex was a very large customer of [Phillips]. . . . Due to these circumstances, Philips was in a position in which it could "squeeze" Energex by selling Energex fluorescent bulbs for resale at one price and selling the same product directly to companies that were customers of Energex at the same or lower prices.

Energex ***[*22]*** *v. North American Philips Lighting Co., 765 F. Supp. 93 (S.D.N.Y. 1991)*. In denying the motion for summary judgment on the monopolization claim, the court noted the significance of the vertically integrated relationship:

> Defendants do not dispute that they had 25% of the [market] when the alleged anti-competitive practice occurred. As a vertically integrated company, defendants were also in a unique position to exert further market power on Energex. . . . Although [Defendants' later market share increase] by itself does not prove monopoly power, When added to defendants' power as an integrated company, its potential ability to squeeze Energex, and the alleged predatory pricing practice, it can hardly be said, as defendants contend, that they lacked monopoly power as a matter of law.

Energex, 1990 U.S. Dist. LEXIS 7181, 1990-1 Trade Cas. (CCH) P69,057 (emphasis added). The Court went on to note that "***HN7***[] if a genuine issue exists as to whether defendant succeeded in monopolizing the relevant market, it follows that there is at least a genuine issue as to whether plaintiff can prove a dangerous probability of success in monopolizing the market." Id. As stated above, the Court made **[*23]** this finding in spite of the fact that Phillips only held a 25% share of the relevant market at the time of the alleged anticompetitive conduct.

The Court recognizes that the above cases are not factually identical to the present case, but both courts' consideration of other market "control" factors seems intuitive. Brunswick is in a unique position with respect to the stern drive boat market. If Brunswick does in fact have monopoly power in the stern drive engine market, it logically follows that Brunswick has some degree of control over the price at which independent boat manufacturers can bring their products to the marketplace. In the opinion of the Court, this substantially lessens the significance of Brunswick's market share statistics as an indicator of Brunswick's dangerous probability of attaining monopoly power.

The Court finds that Brunswick's market share of the stern drive boat market is not conclusive, and genuine issues of material fact exist as to whether there is a dangerous probability that Brunswick will succeed in monopolizing the stern drive boat market. Accordingly, summary judgment is not warranted, and Brunswick's motion will be denied with respect to Count **[*24]** Three of the Complaint.

III. Conclusion

In accordance with the above, Brunswick's motion for summary judgment on Plaintiffs' claims of attempted monopolization of the outboard and stern drive boat markets is GRANTED IN PART and DENIED IN PART. Summary judgment is hereby GRANTED with respect to Plaintiffs' Fifth Claim for Relief. Summary judgment is hereby DENIED with respect to Plaintiffs' Third Claim for Relief.

IT IS SO ORDERED this 6 day of March, 1998.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN2[] **US Department of Justice Actions, Civil Actions**

Where the complaint alleges new antitrust conduct subsequent to the last date alleged in the prior adjudication, the subsequent claim is not barred by res judicata or collateral estoppel. It is elementary that new antitrust violations may be alleged after the date covered by decision or settlement of antitrust claims covering an earlier period. It cannot be emphasized too strongly that the continuation of conduct under attack in a prior antitrust suit is generally held to give rise to a new cause of action.

Contracts Law > ... > Affirmative Defenses > Coercion & Duress > General Overview

HN4[] **Affirmative Defenses, Coercion & Duress**

Duress by threat makes a contract voidable if a party's manifestation of assent is induced by an improper threat by the other party that leaves the victim no reasonable alternative; the contract is voidable by the victim.

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

Contracts Law > ... > Affirmative Defenses > Coercion & Duress > General Overview

HN5[] **Settlements, Consent Judgments**

A party claiming duress must show that it was illegally compelled or coerced to act by fear of serious injury to its person, reputation, or fortune.

Contracts Law > ... > Affirmative Defenses > Coercion & Duress > General Overview

HN6[] **Affirmative Defenses, Coercion & Duress**

Once the duress that forced a party to agree to a contract has ceased to exist, the victim of duress must tell the other party that it regards the contract as void or else lose the voidability created by the duress. The power of a party of avoid a contract for duress is lost if, after the circumstances that made it voidable have ceased to exist, he does not within a reasonable time manifest to the other party his intention to avoid it.

Constitutional Law > Congressional Duties & Powers > Copyright & Patent Clause

HN7[] **Congressional Duties & Powers, Copyright & Patent Clause**

See *U.S. Const. art. I § 8*.

Patent Law > Ownership > Patents as Property

HN8[] **Ownership, Patents as Property**

The owner of the patent is given a limited monopoly. The justification is that the public is best served by giving inventors monopolies on commercial exploitation of their innovations for enough time to furnish an incentive to do the work and spend the money creating them. The monopoly is conditioned on public disclosure of the details of their inventions, so that others can use or improve upon them after the limited times for which the United States Constitution allows patents.

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Constitutional Law > Congressional Duties & Powers > General Overview

Patent Law > Ownership > General Overview

Patent Law > Ownership > Patents as Property

Patent Law > ... > Damages > Collateral Assessments > Costs

HN9[] **Interstate Commerce, Stimulation of Commerce**

The stated objective of the United States Constitution in granting the power to Congress to legislate in the area of intellectual property is to promote the progress of science and useful arts. The patent laws promote this progress by offering a right of exclusion for a limited period as an incentive to inventors to risk the often enormous costs in terms of time, research, and development. The productive effort thereby fostered will have a positive effect on society through the introduction of new products and processes of manufacture into the economy and the emanations by way of increased employment and better lives of United States' citizens. In return for the right of exclusion, this reward for inventions, the patent laws impose upon the inventor a requirement of disclosure.

Patent Law > Ownership > Patents as Property

HN10[] **Ownership, Patents as Property**

To ensure adequate and full disclosure so that upon the expiration of the 17 year period the knowledge of the invention inures to the people, who are thus enabled without restriction to practice it and profit by its use, the patent laws require that the patent application shall include a full and clear description of the invention and of the manner and process of making and using it so that any person skilled in the art may make and use the invention.

Patent Law > Ownership > Patents as Property

HN11[] **Ownership, Patents as Property**

The concept of theft does not apply to useful inventions after their patent protection expires.

Opinion

[*1384] OPINION

KLEINFELD, Circuit Judge:

International Technologies has been engaged for some time in attempts to participate in the plate glass industry, dominated by Pilkington and its licensees, including Guardian. An earlier pair of lawsuits between International Technologies and Guardian resulted in a consent decree. The issue before us is whether the consent decree barred this new lawsuit.

FACTS

The district court granted judgment on the pleadings, so no evidence has been presented and no findings have been made. We do not know whether the facts set out below are true. They are a summary of what the unsuccessful plaintiff pleaded. **[**2]** The appellate task in reviewing dismissal under *Federal Rule of Civil Procedure 12(c)* is to determine whether, if the facts were as pleaded, they would entitle the plaintiff to a remedy. See *Merchants Home Delivery Serv., Inc. v. Hall & Co., 50 F.3d 1486, 1488 (9th Cir. 1995)*.

International Technologies Consultants ("ITC") has been trying for years to get into the engineering and consulting end of the plate glass business. It has been thwarted by Pilkington and its licensees. ITC claims that the means by which Pilkington and its licensees have thwarted its participation in the industry amount to antitrust violations under the Sherman Act, sections 1 and 2, and also constitute various common law torts.

Glass is made by melting sand, limestone, and other minerals such as dolomite. Until a few decades ago, good plate glass that would allow a clear view without bubbles or ripples was made by drawing glass from a furnace in strips, rolling it to the desired thickness, grinding it flat, and polishing it on both sides. The modern "float" technique is to pour the molten glass on a layer of very pure molten tin, so that the molten glass floats on the tin. The surface of the molten tin **[**3]** is very smooth. When the glass hardens it is about as smooth as the molten tin was and does not need grinding and polishing. This float process makes better plate glass for less money than the old way.

Although the float process was first patented in 1905, it did not become commercially widespread until Alistair Pilkington developed a practical version, patented in the late 1950's and early 1960's.

By the beginning of 1992, Pilkington plc owned all but one of the manufacturing plants around the world employing the float process for making plate glass. Because the older method was commercially obsolete, this gave the Pilkington firm a monopoly. But the firm had two problems maintaining its monopoly, expiring patents and difficulty maintaining secrecy.

The critical patents expired in the late 1970's and early 1980's. Expiration of the patents did not by itself destroy Pilkington's ability to control the industry. While the patents had still been in effect, Pilkington had licensed their use, and required the licensees to keep the details of the float glass process secret. But the nature of plate glass makes it hard to keep a secret about how to make it. It cannot all be made in one **[**4]** plant by one manufacturer. Unlike, say, photographic film, glass is brittle and heavy, so shipping expense and breakage make it impractical **[*1385]** to manufacture all the world's plate glass in one place. Instead, factories produce glass by the float process all over the world. Yet 95% of the commercial grade plate glass in the world is produced by Pilkington and its licensees.

Guardian started out as a challenger to Pilkington's dominance. It hired experts from the glass manufacturing division of Ford Motor Company, a Pilkington licensee, and went into the business of designing and operating float glass factories. After a flurry of lawsuits, Pilkington and Guardian settled their differences and made a secret agreement to prevent new entrants into the market. Guardian was to take the lead in order to enable Pilkington, a British company, to reduce its exposure to United States ***antitrust law***.

Appellant ITC began effective marketing of float technology in the early 1980's. ITC does not actually manufacture glass; rather, it sells engineering and consulting services to glass manufacturers, to help them build float process manufacturing plants. Its engineers used the public domain information **[**5]** in Pilkington's expired patents, and their own knowledge, rather than Pilkington's manufacturing secrets, to design ITC's technology.

Pilkington successfully destroyed a number of ITC ventures. In 1984, ITC had Norwegian government and private support for a float glass plant there. Pilkington falsely told the Norwegian government that its proprietary rights prevented anyone from operating float glass manufacturing plants without a Pilkington license, told ITC's sources of financing that ITC had stolen the design, and threatened to sue them if they cooperated with ITC. ITC's major source of financing pulled out because of Pilkington's threats of lawsuits.

ITC then obtained government and private financing to build a plant in Donora, Pennsylvania. One of the subcontractors it hired to formulate bid specifications, Stewart Engineering, had done work for Pilkington, but not on the design of the tin bath component of the float technology. Pilkington had Guardian sue Stewart Engineering in state court in Michigan. The lawsuit was based on false allegations with no reasonable basis that Stewart had stolen the Pilkington-Guardian float process technology. This baseless litigation had the **[**6]** practical consequence, as intended, of driving away ITC's financing so that the project collapsed. Guardian then took no further action in the lawsuit, leaving it pending but unpursued.

In 1990, ITC bid on a huge project to build a plant in Indonesia, again using Stewart Engineering. Guardian told ITC's financing sources, the government of Indonesia and private sources, that it would sue for patent infringement if they proceeded with ITC. Though some suppliers backed out, the project was still proceeding. When it was more than half done, Guardian began filing papers in the Michigan lawsuit against Stewart Engineering. The lawsuit had been lying fallow for 18 months, yet Guardian moved for a temporary restraining order, returnable the same day as the motion. ITC was added as a defendant and slapped with the temporary restraining order, with no practical opportunity for it to defend itself. The Michigan state court order prevented ITC from building the tin bath in Indonesia using the Stewart Engineering design, so at this critical stage of construction, the Indonesia project was stopped. To get around the state court order, ITC brought an antitrust suit in federal court and tried to **[**7]** get a preliminary injunction and removal of the Michigan state court action. This strategy failed, and the federal antitrust suit was dismissed without prejudice.

About a month after the Indonesia project was shut down by the Michigan state court order, the Indonesian joint venturer began the termination process to fire ITC as co-venturer. The Indonesian company told ITC that it had to either defeat the trade secrets claim immediately, or else quickly redesign the tin bath to avoid the trade secrets issue. ITC's engineer, Robert Greenler, then redesigned the tin bath. His new design avoided the supposed trade secrets. After the Michigan state court judge strongly encouraged Guardian and ITC to settle, they reached an agreement in principle, and the court vacated the temporary restraining order against ITC.

[*1386] The Michigan state court settlement is in the form of a confidential consent decree. It says it "will be held confidential except as required by law or as necessary to enforce the terms of this Consent Decree." The decree says that ITC would use the Greenler design for the plant in Indonesia, and Guardian would not assert any trade secret claims with respect to use of the Greenler **[**8]** design. The parties agreed that "this Consent Decree and non-assertion shall not be used by any party in any manner in any future litigation among the parties." ITC covenanted not to sue Guardian on all claims "which arise out of the same facts" as the Michigan state court lawsuit, and all claims brought or arising out of the same facts as those in the federal antitrust suit that ITC had dismissed. ITC was permanently enjoined from using the Stewart design.

According to the complaint, the reason ITC agreed not to sue Guardian for claims arising out of the same facts or claims was economic coercion. Guardian and Pilkington had driven it to the edge of financial ruin by their relentless and illegal tactics, and ITC was about to be fired from the Indonesian project unless it settled the Michigan case.

When Dean Wiley, ITC's managing director, flew to Indonesia to tell the Indonesians that the Michigan case was settled and get the project going again, the Indonesian co-venturer wanted to see a copy of the consent decree. Even though the purpose of the consent decree was to enable ITC to resume the Indonesia project, Guardian refused to allow ITC to show it to the Indonesian company, **[**9]** insisting that the confidentiality provision applied. Because ITC could not show its Indonesian co-venturer the consent decree, the co-venturer fired ITC.

In 1989, ITC agreed to work with a European glass distributor on constructing a float glass plant in France. Work on what they called the "Euroglas" project began in 1991. One of Pilkington's licensees persuaded a bank to deny a loan on the basis that Pilkington was the exclusive worldwide licensor of float glass technology. Another bank was interested in lending, but the financing had to await government permits. Pilkington and Guardian worked with environmental groups so that they would oppose issuance of the permits. Guardian also claimed with no basis whatsoever that the tin bath design ITC proposed to use was a secret owned by Guardian, and threatened litigation. By making this threat, Guardian intentionally violated the consent decree, because it knew full well that ITC was using the permitted Greenler design and not the Stewart design. As a result of Guardian's aggressive and meritless attacks, the Euroglas project stalled.

ITC then went back to the Michigan state court and obtained an order clarifying the decree. The order **[**10]** provided that a mutually agreeable consultant would decide whether ITC's design was permitted or prohibited under the consent decree. The expert consultant reported that the ITC design was entirely unobjectionable. Thus ITC had been in the right all along, that it was not using Pilkington's trade secrets.

Numerous subsequent prospective customers of ITC were warned off by Pilkington and Guardian. Though meritless, the threats of litigation and claims of proprietary rights had the practical effect of causing a worldwide boycott of ITC. As a result, ITC was unable to complete a single float glass plant, and Pilkington and its licensees retained a worldwide monopoly on float glass technology. This monopoly rested on expired patents and fraudulent claims of trade secrets.

ITC sued Guardian and Pilkington in federal district court in Arizona, claiming that their conduct summarized above entitled ITC to antitrust and other remedies. The district court granted judgment on the pleadings in favor of Guardian, on the ground that the Michigan state court consent decree barred the action, as a matter of res judicata. ITC appeals. ITC's case against Pilkington was not the subject of a final judgment **[**11]** in district court, but there was a Rule 54(b) certification making the Guardian judgment final.

ANALYSIS

ITC makes two arguments, that the covenant not to sue in the Michigan state court consent decree does not apply to its claims in **[*1387]** the case at bar, and that the covenant is unenforceable.

A. Scope of the consent decree.

The res judicata effect of the Michigan consent decree is the central issue in this case. The Michigan state court case was settled, not litigated to a conclusion. ***HN1***[] A consent decree in a private action imposes no more on the party to be bound than that party agreed to. See *United States v. Armour & Co., 402 U.S. 673, 682, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971)* ("The instrument must be construed as it is written, and not as it might have been written had the [party seeking enforcement] established his factual claims and legal theories in litigation.").

In the Michigan case, ITC covenanted not to sue on designated claims, and its covenant was incorporated in the consent decree. The res judicata question is whether the claims ITC brought in the case at bar were covered by its covenant not to sue. The answer is plain - ITC promised not to sue again **[**12]** on claims which were brought in the Michigan state and federal cases, and those arising out of the same facts alleged in those cases. Here is the language delineating the scope of the covenant not to sue:

> A. All claims which were brought, or which arise out of the same facts as those, in the Action.
>
> B. All claims which were brought, or which arise out of the same facts as those, in the case *Wiley and International Technologies Consultants, Inc. v. Guardian Industries Corp. and Pilkington P.L.C.* Civil action 91-CV-40293-PL (U.S. District Court for the Eastern District of Michigan).

To determine whether ITC stated a claim as to which relief was barred by the consent decree, in light of this language delineating its scope, we compare the Michigan antitrust complaint that ITC filed in the Michigan federal case with the complaint filed in district court in the case at bar. [1]

[13]** The complaints in the case at bar and the Michigan antitrust case overlap. The Michigan complaint asserts the same general background regarding Pilkington's scheme to use licensing to maintain a world wide monopoly after its patents expired. The old and new complaints both allege that Pilkington and Guardian conspired to monopolize the plate glass market by sabotaging ITC's Donora, Pennsylvania, project and its Indonesia project. The words of the averments are different, but the claims arise out of the same facts.

The consent decree barred ITC from making claims brought or arising out of the same facts as those brought in the Michigan antitrust case. Thus, unless economic coercion relieves ITC from the consent decree, the district court properly dismissed ITC's claims based on the Donora project. Even if Guardian's conduct regarding the Donora project was an antitrust violation, ITC promised not to sue them again for it.

Indonesia is a little more complicated. ITC promised not to sue Guardian again for its conduct regarding Indonesia, insofar as any such claims "were brought, or . . . arise out of the same facts" as those in the Michigan case. Yet ITC did just that. Unless economic **[**14]** coercion relieves ITC from the terms of the decree, the district court properly dismissed ITC's claims arising out of Guardian's alleged conduct that led up to the Michigan cases.

But ITC's complaint in the case at bar deals also with subsequent Indonesia conduct that was not and could not have been pleaded in the Michigan case. The averments are **[*1388]** that *after* the consent decree, Guardian

---

[1] We have in the excerpts of record Guardian's complaint against ITC filed in Michigan state court, and ITC's complaint against Guardian filed in Michigan federal court. We apparently do not have in the excerpts ITC's answer and counterclaims filed in Michigan state court. We have obtained the complete record and have been unable to find it there either. It is conceivable that it is in one place or the other, but the combination of poor indexing, lack of sequential page numbers, and discontinuous tab numbers in the excerpts, and excessive sealing of most items in the clerk's record, makes it a practical impossibility to assure that anything is, or is not, in the record. We therefore take ITC's allegations in the Michigan cases from the complaint it filed in Michigan federal court, without regard to what may or may not be in whatever answer and counterclaim might have been filed in the Michigan state court case.

without any legitimate basis prevented ITC from showing the Indonesians the consent decree settling the Michigan case, and thereby caused the Indonesians to back out of the deal in fear of Guardian's trade secret and patent claims. Those claims were not "brought" and did not "arise out of the same facts as those" brought in the Michigan case. They could not have been brought, because the facts had not yet transpired when the Michigan case settled. As to these claims arising out of post-consent decree conduct, dismissal was not justified by the language of the consent decree.

The Euroglas project in France was not mentioned at all in the Michigan case. It could not have been, because it had not happened yet. The conduct alleged regarding the Euroglas project occurred after the decree was issued. **[**15]** ITC could not have and did not make any claim in the Michigan litigation, or allege any facts out of which a claim could arise, regarding the later Euroglas project. Thus the Euroglas claims were not barred by the consent decree.

The complaint in the case at bar alleges that Guardian and Pilkington sabotaged ITC's Euroglas project. Partly they used the old techniques of threatening baseless litigation based on false claims of patents and trade secrets, to scare the financing off. Additionally they used a new tactic: encouraging and working with environmental groups to clog the government permit process.

Two questions arise regarding the Euroglas project. The first is whether the new conduct, such as using environmental groups as cat's paws, and manipulating a director of a French bank, could be used as the basis of ITC's antitrust claims. These ITC claims cannot be characterized as arising out of the same facts as those in the Michigan cases. Accordingly, unless a subsequent amendment to the consent decree, discussed below, expands the decree to cover them, the antitrust claims arising out of these subsequent events are not barred.

The second question is whether conduct, to the **[**16]** extent that it is the same as Guardian and Pilkington used to sabotage the Pennsylvania and Indonesia projects, can be the basis of a claim regarding the Euroglas project. On this issue, Guardian argues that the claims are barred under the new damage from previously adjudicated conduct rule in *Go-Video, Inc. v. Matsushita Elec. Indus. Co. (In re Dual-Deck Video Cassette Recorder Antitrust Litig.), 11 F.3d 1460 (9th Cir. 1993)*. ITC contends that there is no bar under the new conduct rule in *Harkins Amusement Enters., Inc. v. Harry Nace Co., 890 F.2d 181 (9th Cir. 1989)*. ITC is correct.

In *Harkins,* we held that ***HN2***[] where the "complaint alleges new antitrust conduct subsequent to" the last date alleged in the prior adjudication, the subsequent claim is not barred by res judicata or collateral estoppel. *Id. at 183*. "It is elementary that new antitrust violations may be alleged after the date covered by decision or settlement of antitrust claims covering an earlier period." *Id. at 183*. We quoted the leading antitrust scholar, Professor Areeda, for the proposition that "'it cannot be emphasized too strongly that the continuation of conduct under attack in a prior antitrust **[**17]** suit is generally held to give rise to a new cause of action.'" *Id. at 183* (quoting 2 Philip Areeda and Donald F. Turner, ***Antitrust Law*** § 323c (1978)). By winning the first action, the defendants "did not acquire immunity in perpetuity from the antitrust laws." *Harkins, 890 F.2d at 183*.

We noted an exception in *Harkins,* where a prior litigation defeat would bar the plaintiff. Where particular conduct was charged in the first case, and the same conduct was alleged to have caused subsequent damages in the second case, the determination in the first case might bar the plaintiff from asserting that particular claim in the second case. *Id. at 183*.

Dual-Deck Video fell within the *Harkins* exception. The plaintiff alleged damages from subsequent consequences of the earlier conduct, and that conduct had already been held not to violate the antitrust laws. *See Dual-Deck Video, 11 F.3d at 1464*. We distinguished *Harkins,* and followed a Fifth Circuit case, *Exhibitors Poster Exchange Inc., v. National Screen Service, Corp., 517 F.2d 110 (5th Cir. 1975)*. *See Dual-Deck Video, 11 F.3d at 1463*. The complaint alleged "only **[*1389]** subsequent market consequences **[**18]** of the old conspiracy," and "continuation of commercial activity pursuant to the old arrangements held not to be an antitrust conspiracy." *See id. at 1463-64*. "Nothing new was alleged - no new conspiracy, no new kinds of monopolization, no new acts. Distinct conduct was alleged only in the limited sense that every day is a new day, so doing the same thing today as yesterday is distinct from what was done yesterday." *Id. at 1464*. Collateral estoppel applied because the earlier lawsuit "already answered the question" of whether the conduct amounted to an antitrust conspiracy. *Id.*

The case at bar is, as to the post-Michigan events, like Harkins, not *Dual Deck Video*. The consent decree did not say that ITC could not sue if Pilkington and Guardian did in the future what they had done in the past. Nor was there any adjudication that conduct such as Pilkington and Guardian had allegedly engaged in the past did not violate the antitrust laws. The consent decree said no more and no less than that ITC would not sue Guardian for claims brought or arising out of the same facts as those in state and federal Michigan actions. It presented no bar to suing Guardian for claims **[**19]** which were not brought in the Michigan actions and not arising out of the same facts, such as the French Euroglas project.

As to the Indonesia project, the complaint in the case at bar alleges both old claims and new. The new claim arising out of post-decree conduct is that by forbidding ITC from showing the Indonesians the consent decree, which would have proven ITC's right to use the Greenler design, Guardian committed an additional antitrust violation.

Appellee argues that because the consent decree was subsequently amended, it does apply to the subsequent conduct. A 1992 amendment made two substantive changes. One is to the confidentiality provision. The old confidentiality provision said that the consent decree would be held confidential except as required by law or as necessary to enforce it:

> 3. This Consent Decree will be held confidential except as required by law or as necessary to enforce the terms of this Consent Decree. All parties agree that this confidentiality provision is not a bar to enforcement of all or any part of this Consent Decree.

Because the consent decree obligated Guardian not to assert any trade secret claims with respect to use of the Greenler **[**20]** design in Indonesia, arguably enforcement of the consent decree entitled ITC to show it to the Indonesians when Guardian did subsequently assert trade secret claims with respect to use of the Greenler design in Indonesia. Showing it to the Indonesians might be a self-help means of enforcement.

The 1992 revision also changed paragraph 3, though the substantive difference is not entirely clear. This sentence was added:

Guardian shall not bring to the attention of third parties the existence of this Consent Decree unless it has reason to believe that the Consent Decree is being violated or in a reasonable response to an inquiry by a third party.

The previous sentences of paragraph 3 were not deleted.

There is nothing in the 1992 amendment that expands the covenant not to sue. Guardian's conduct in preventing the Indonesians from finding out about the consent decree, which occurred after the earlier decree was entered, is not sheltered by the amendment. ITC's theory is that the whole purpose of the consent decree, that is, of why it caved in on its claims, was so that it could proceed with the Indonesia project. Then, violating the implied covenant of good faith and fair dealing, **[**21]** and in furtherance of the Pilkington-Guardian worldwide monopoly on float glass technology, Guardian prevented ITC from using the consent decree to show the Indonesians that the trade secret dispute was over. That is a new claim and the amendment to the consent decree does not bar it.

The order amending the consent decree also adds a new provision referring to the French project. In the original consent decree, the parties agreed that ITC would designate a consultant acceptable to Guardian to inspect the tin bath being built in Indonesia. To verify that ITC was using the permitted **[*1390]** Greenler-Stewart design, not the prohibited Guardian design, ITC agreed to let Guardian inspect future float glass projects for five years.

Although the parties here agreed to a procedure which might settle their differences and enable ITC's participation in the Euroglas project to move ahead, that appears to be all they agreed upon. There is no language in the amendment changing the covenant not to sue. There are no words purporting to expand the covenant not to sue to apply to the French project. Nor does logic compel the conclusion that, by agreeing to a procedure for a consultant, ITC by implication **[**22]** waived its antitrust claims. It would be logical for ITC to say "we don't think you have any right to prevent us from using the patented design, now that the patents have expired, and we don't think there are any trade secrets associated with it, but in fact we're not using it and we're willing to let you look and see that we're not using it." There was no contested adjudication, so there is nothing on which to base our decision except the language to which the parties agreed. Guardian did not obtain language which expressly or by implication amounted to a waiver or release of whatever antitrust claims ITC might have relating to the French project. The parties agreed that "the conclusions of the inspection do not constitute an adjudication or determination that is legally binding on either party." Thus, ITC's antitrust claims relating to the Euroglas project are not barred.

B. Duress.

As we have explained above, the consent decree binds ITC not to sue Guardian on claims brought in the two Michigan actions, or arising out of the same facts. ITC has covenanted not to sue Guardian for its conduct affecting the Donora project and the Indonesia project (except for preventing ITC **[**23]** from showing the consent decree to the Indonesians).

ITC argues that as to those claims covered by the consent decree, it should nevertheless be allowed to sue, because its covenant not to sue was obtained by duress. Its pleadings allege that improper threats by Guardian of baseless litigation left ITC no reasonable alternative except to agree to the consent decree.

It is well established ***HN3***[] as a matter of ***antitrust law*** that the use of baseless litigation to drive out competition can amount to an antitrust violation. See, e.g., *A & E Plastik Pak Co. v. Monsanto Co., 396 F.2d 710, 715 (9th Cir. 1968)*; *CVD, Inc. v. Raytheon Co., 769 F.2d 842 (1st Cir. 1985)* (bad faith assertion of trade secrets claim for purpose of restraining competition can be a violation of antitrust laws). ITC has pleaded that Guardian used baseless litigation and threats of baseless litigation to maintain its 95% world monopoly, including an improperly obtained temporary restraining order that shut down its Indonesia project. Because the Michigan decree was a consent decree in a private action based entirely upon the agreement of ITC and not on any judgment in adversarial proceedings, it can have no effect **[**24]** beyond that to which ITC validly agreed. *See* *United States v. Armour & Co., 402 U.S. 673, 681-82, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971)*.

The conduct alleged in ITC's complaint falls within the traditional definition of duress which makes a contract voidable:

> *Section 175 - When* ***HN4***[] *duress by threat makes a contract voidable*
> (1) If a party's manifestation of assent is induced by an improper threat by the other party that leaves the victim no reasonable alternative, the contract is voidable by the victim.

Restatement (Second) of Contracts § 175 (1981).

The threat must be improper. ITC's pleadings aver impropriety; ITC alleges that Guardian threatened a lawsuit and obtained a temporary restraining order by claiming that ITC was stealing its intellectual property, even though Guardian knew full well that the patents had expired, and that ITC had used knowledge in the public domain. Duress also requires that the victim have no reasonable alternative to succumbing to the duress, such as defending against an improperly brought lawsuit. ITC sufficiently pleaded absence of a reasonable alternative, for two reasons. **[*1391]** The threats made to lenders and employers of ITC **[**25]** could and did, according to the pleadings, kill the projects, and there was no way ITC could do anything about them. As for the actual litigation, the obtaining of a temporary restraining order was pleaded as "use of oppressive tactics," because ITC had no fair opportunity to contest it, it was obtained despite Guardian's knowledge that it was meritless, and it had the practical effect of giving Guardian the victory, ending ITC's participation in the Indonesia project, regardless of whether ITC ultimately won the lawsuit. The duress pleaded is analogous to Illustration 2 in the Restatement:

> 2. A makes an improper threat to commence a civil action and to file a lis pendens against a tract of land owned by B, unless B agrees to discharge a claim that B has against A. Because B is about to make a contract with C for the sale of the land and C refuses to make the contract if the levy is made, B agrees to discharge the claim. B has no reasonable alternative, A's threat is duress, and the contract is voidable by B.

Guardian argues that Michigan defines duress more narrowly, citing *Apfelblat v. National Bank Wyandotte-Taylor, 158 Mich. App. 258, 404 N.W.2d 725 (Mich. Ct. App.* ***[**26]*** *1987)* and *Enzymes of Am., Inc. v. Deloitte, Haskins & Sells, 207 Mich. App. 28, 523 N.W.2d 810 (Mich. Ct. App. 1994)*, *rev'd on other grounds sub nom. Porta-John Corp. v. Deloitte, Haskins & Sells, 450 Mich. 889, 539 N.W.2d 513 (Mich. 1995)*. These cases establish a rule that ***HN5***[] a party claiming duress must show that it was *illegally* compelled or coerced to act by fear of serious injury to its person, reputation, or fortune. *See Enzymes, 523 N.W.2d at 814*; *Apfelblat, 404 N.W.2d at 728*. [2] ITC alleges that Guardian violated the antitrust laws by maintaining sham litigation which left ITC with no alternative but to agree to the consent decree. Thus, Guardian's conduct fits even within the narrow Michigan definition of duress.

[27]** Guardian argues that duress cannot void the agreement, because ITC waited too long to challenge the consent decree on this ground, and ratified its covenant not to sue by subsequent conduct. The pleadings aver duress on June 21, 1991, when Guardian moved for a temporary restraining order in the Michigan case. ITC first claimed duress in the case at bar, filed December 6, 1993, two and a half years later. As for ratification, Guardian argues that ITC took the benefits of the consent decree, so it cannot now disaffirm its burdens.

There is no merit to Guardian's argument that ITC ratified the consent decree by taking its benefits. The benefit ITC sought by agreeing to the consent decree was elimination of the barrier to the Indonesia project. But according to its pleading, Guardian improperly deprived ITC of this benefit by preventing ITC from showing the consent decree to the Indonesians.

Guardian's delay argument is more substantial. According to ITC's pleading, Guardian drove it out of the Indonesia project in August of 1991. [3] Yet ITC did not claim voidability for duress until it filed this lawsuit in December of 1993, two and a half **[*1392]** years later. Indeed, after the Indonesia project **[**28]** had been killed, ITC consented to the inspection procedure amendment to the consent decree, relating to the Euroglas project in France, without claiming duress. The duress that allegedly forced ITC to agree to the consent decree ended once it had lost the Indonesia project, in August of 1991.

[29]** ***HN6***[]

Once the duress that forced a party to agree to a contract has ceased to exist, the victim of duress must tell the other party that it regards the contract as void, or else lose the voidability created by the duress:

> *Section 381. Loss of power of avoidance by delay.*
> (1) The power of a party of avoid a contract for . . . duress . . . is lost if, after the circumstances that made it voidable have ceased to exist, he does not within a reasonable time manifest to the other party his intention to avoid it.

Restatement (Second) of Contracts § 381(1) (1981). ITC lost the power to avoid the consent decree for duress by not manifesting its intention to avoid it within a reasonable time after its participation in the Indonesia project was

---

[2] A federal district court has predicted that the Michigan Supreme Court would abandon the element of illegality, and rule that duress need not arise from an illegal act. *See Kelsey-Hayes Co. v. Galtaco Redlaw Castings Corp., 749 F. Supp. 794, 797 n.5 (E.D. Mich. 1990)*. We need not decide whether that court was correct, because ITC has alleged conduct on the part of Guardian that was both "improper," under the Restatement rule, and "illegal," per the Michigan cases.

[3] The dates are somewhat confusing. The Michigan state court decree in the record does not show the filestamp, but ITC's pleading avers that it was entered August 13, 1991, and that is consistent with the rest of the record. The pleading is inconsistent regarding the date ITC was driven out of the Indonesia project. Paragraph 49 says Mulia sent a letter July 26, 1993 firing ITC effective August 26, 1993. But paragraphs 42 through 48 describes ITC's firing by Mulia was part of a crisis that happened fast, in the summer of 1991. Paragraphs 50 through 54 describe events subsequent to Mulia's letter, leading up to the covenant not to sue in August 1991. These paragraphs aver that ITC's managing director flew to Indonesia to get its firing rescinded immediately after the consent decree was entered August 13, 1991, but on August 15 Guardian prevented ITC from showing the consent decree to the Indonesians, so ITC was terminated with finality. The context shows that the 1993 date in paragraph 49 was a typographical error.

dead. We therefore conclude that the district court correctly determined that ITC pleaded itself out of a duress defense to the consent decree.

CONCLUSION

The founding fathers recognized a critical difference between intellectual and other forms of property, by specifying in the Constitution that patents can be granted only "for limited times":

> HN7[] The Congress shall have Power to . . .
>
> promote the Progress of Science **[**30]** and useful Arts by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;

U.S. Const. art. I § 8.

HN8[] The owner of the patent is given a limited monopoly. The justification is that the public is best served by giving inventors monopolies on commercial exploitation of their innovations for enough time to furnish an incentive to do the work and spend the money creating them. The monopoly is conditioned on public disclosure of the details of their inventions, so that others can use or improve upon them after the "limited Times" for which the Constitution allows patents.

HN9[] The stated objective of the Constitution in granting the power to Congress to legislate in the area of intellectual property is to "promote the Progress of Science and useful Arts." The patent laws promote this progress by offering a right of exclusion for a limited period as an incentive to inventors to risk the often enormous costs in terms of time, research, and development. The productive effort thereby fostered will have a positive effect on society through the introduction of new products and processes of manufacture into the economy, and the **[**31]** emanations by way of increased employment and better lives for our citizens. In return for the right of exclusion - this "reward for inventions" - the patent laws impose upon the inventor a requirement of disclosure. HN10[] To ensure adequate and full disclosure so that upon the expiration of the 17-year period "the knowledge of the invention enures to the people, who are thus enabled without restriction to practice it and profit by its use," the patent laws require that the patent application shall include a full and clear description of the invention and "of the manner and process of making and using it" so that any person skilled in the art may make and use the invention.

Kewanee Oil Co. v. Bicron Corp., 416 U.S. 470, 480-81, 40 L. Ed. 2d 315, 94 S. Ct. 1879 (1974) (internal citations and footnote omitted).

Alistair Pilkington invented an ingenious new method of making high quality flat glass at high speed, much less expensively than by grinding and polishing it, in the 1950's. He thereby made a great contribution to cheap, good plate glass for everyone. There was no way to exploit his invention while keeping it a close secret, as with the formula for Coca-Cola, because the weight **[**32]** and fragility of glass required that the method be used in factories around the world. The patent enabled the Pilkington company to take exclusive benefit of the idea for a limited period of time, even though numerous other people necessarily knew the method almost immediately. **[*1393]** But intellectual property, unlike, say, real estate, can be owned pursuant to a patent only for a limited time.

Thomas Jefferson explained why HN11[] the concept of theft does not apply to useful inventions, after their patent protection expires:

> It has been pretended by some, (and in England especially,) that inventors have a natural and exclusive right to their inventions, and not merely for their own lives, but inheritable to their heirs. . . . Stable ownership is the gift of social law, and is given late in the progress of society. It would be curious then, if an idea, the fugitive fermentation of an individual brain, could, a natural right be claimed in exclusive and stable property. If nature has made any one thing less susceptible than all others of exclusive property, it is the action of the thinking power called an idea, which an individual may exclusively possess as long as he keeps it to himself; **[**33]** but the moment it is divulged, it forces itself into the possession of everyone, and the receiver cannot dispossess

> himself of it. Its peculiar character, too, is that no one possess the less, because every other possess the whole of it. He who receives an idea from me, receives instruction himself without lessening mine; as he who lights his taper at mine, receives light without darkening me. That ideas should freely spread from one to another over the globe, for the moral and mutual instruction of man, and the improvement of his condition, seems to have been peculiarly and benevolently designed by nature, when she made them, like fire, expansible over all space, without lessening their density in any point, and like the air in which we breath, move, and have our physical being, incapable of confinement or exclusive appropriation. Inventions then cannot, in nature, be a subject of property. Society may give an exclusive right to the profits arising from them, as an encouragement to men to pursue ideas which may pursue utility, but this may or may not be done, according to the will and convenience of society, without claim or complaint from anybody . . . .

Thomas Jefferson, **[**34]** letter to Isaac McPherson, August 13, 1813, in Adrian Koch and William Peden, eds., *The Life and Selected Writings of Thomas Jefferson* 629-30 (1944).

We do not know whether Guardian and Pilkington have conspired to prevent others from using the ideas in Pilkington's expired patents, in violation of the antitrust laws, by means of unjustified litigation and threats of litigation. But if they have, as the complaint alleges, then the world is being deprived of the economic value of Alistair Pilkington's great invention. Indeed, in poorer areas of the world, doubtless people lack windows to let in the sun and keep out the rain, wind, cold, and insects, because of improper exploitation of monopoly pricing. Though ITC has given away its right to sue Pilkington and Guardian for some of its claims, it has not for others. The claims are at the heart of what is socially valuable in ***antitrust law***. A good way to find out if they are true is to put the parties to their proof, and if there is a genuine issue of fact, to require them to try the case. Indeed that is the only lawful way to test the truth of the averments.

Accordingly, we affirm in part and reverse in part. ITC is bound by the **[**35]** consent decree, and barred by its covenant not to sue from asserting the claims brought or arising out of the same facts as those brought in the Michigan state court and federal cases. It is not barred from asserting the claims not so brought and not arising out of the same facts. Costs are awarded in favor of ITC against Guardian.

HN1[] **Noerr-Pennington Doctrine, Sham Exception**

The court reviews de novo dismissal under *Fed. R. Civ. P. 12(b)(6)*. Under the Noerr-Pennington doctrine, the Supreme Court has held that persons seeking redress through administrative agencies and the courts are immune from antitrust liability for seeking such redress. Sham litigation is an exception to this grant of immunity.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

HN2[] **Motions to Dismiss, Failure to State Claim**

To determine if litigation is a sham, the Supreme Court instructs to first determine if the lawsuit is objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. Then, only if the challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. The court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor, through the use of the governmental process-as opposed to the outcome of that process-as an anticompetitive weapon. In addition to this test, the court requires that when the antitrust plaintiff challenges a single suit rather than a pattern a finding of sham requires not only that the suit is baseless, but also that it has other characteristics of grave abuse, such as being coupled with actions or effects external to the suit that are themselves anticompetitive.

Opinion

MEMORANDUM *

Repeat-O-Type ("ROT") appeals the decision of the district court dismissing for failure to state a claim ROT's claim that Hewlett-Packard ("HP") engaged in sham litigation against ROT. ROT argues that HP's patent claims were objectively baseless.

HN1[] We review de novo dismissal under *Federal Rule of Civil Procedure 12(b)(6)*. *See* *Stone v. Travelers Corp., 58 F.3d 434, 436-37 (9th Cir. 1995)*. Under the *Noerr-Pennington* doctrine, the Supreme **[*2]** Court has held that persons seeking redress through administrative agencies and the courts are immune from antitrust liability for seeking such redress. *See* *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*. Sham litigation is an exception to this grant of immunity. ***HN2***[] To determine if litigation is a sham, the Supreme Court instructs us to first determine if "the lawsuit [is] objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)*. Then, "only if [the] challenged litigation is objectively meritless may a court examine the litigant's subjective motivation." *Id.* "The court should focus on whether the baseless lawsuit conceals an attempt to interfere *directly* with the business relationships of a competitor, through the use of the governmental process-as opposed to the

* This disposition is not appropriate for publication and may not be cited to or by the courts of this circuit except as provided by *9th Cir. R. 36-3*.

outcome of that process-as an anticompetitive weapon." *Id.* (emphasis in original) (citation and internal quotation marks omitted). In **[*3]** addition to this test, we require that "when the antitrust plaintiff challenges a single suit rather than a pattern . . . a finding of sham requires not only that the suit is baseless, but also that it has other characteristics of grave abuse, such as being coupled with actions or effects external to the suit that are themselves anticompetitive." *Boulware v. State of Nevada, Dep't of Human Resources, 960 F.2d 793, 797-98 (9th Cir. 1992)* (citation and internal quotation marks omitted).

As an initial matter, the grant of summary judgment to ROT on the patent claims is no proof that HP's claims were baseless. *See* *Professional Real Estate Investors, 508 U.S. at 65* (concluding that "even in the absence of supporting authority, [the defendant] would have been entitled to press a novel copyright claim as long as a similarly situated reasonable litigant could have perceived some likelihood of success"); *see also* *Liberty Lake Investments, Inc. v. Magnuson, 12 F.3d 155, 158 (9th Cir. 1993)* ("When the antitrust defendant has lost the underlying litigation, a court must resist the understandable temptation to engage in post hoc reasoning by concluding that an ultimately unsuccessful **[*4]** action must have been unreasonable or without foundation.") (quoting *Professional Real Estate Investors, 508 U.S. at 60 n.5*).

HP argues that its twelve patent claims were not objectively baseless and that they were based upon a reasonable extension of the theory of impermissible reconstruction, which prohibits the purchasers of a patented product from transforming the product into another product. HP argued in its suit against ROT for trademark and patent infringement that ROT's modification of the Stanley and Kukla cartridges was not permissible repair because the items replaced (ink in the Stanley cartridge and the cap on the Kukla cartridge) were not worn or spent and did not involve any repair necessary to preserve the intended life of the cartridge. Instead, HP argued that ROT's modifications were designed to create a new, refillable, product and therefore constituted a reconstruction of a patented product.

ROT argues that HP's patent claims were baseless because: 1) HP did not explain infringement on nine of the twelve patents, but only discussed three patents in its Motion for Partial Summary Judgment; 2) HP did not file a claims chart identifying which patent claims were **[*5]** violated; 3) HP's assertion of infringement of U.S. Patent No. 4,931,811 (the " '811" patent) is a per se violation of ***antitrust law***; [1] and 4) HP's assertion of infringement of U.S. Patents No. 4,827,294 (the " '294" patent) and No. 5,108,503 (the " '503" patent) had nothing to do with any of the products involved in this case.

We are not persuaded that HP's actions were objectively baseless or that they demonstrated grave abuse. We note that HP discussed its infringement theory with reference to several representative patent claims because the dispositive issue on eleven of them (excluding the ink patent) was the same: "whether ROT's modifications to unused HP ink-jet cartridges constituted an impermissible reconstruction of the cartridges." Nor do we find that **[*6]** a claims chart is a prerequisite for a suit.

The '811 patent claim is not like the patent misuse found in *Morton Salt Co. v. G.S. Suppiger Co., 314 U.S. 488, 86 L. Ed. 363, 62 S. Ct. 402 (1942)*. HP is not selling patented refillable cartridges, requiring its customers to buy only HP unpatented ink and suing a competitor for its creation of the cartridges; it is asserting that ROT made illegal modifications to HP's patented, non-refillable cartridges.

Although ultimately unsuccessful, HP's claims based on the '294 and '811 patents were not objectively baseless. Claim 3 of the '294 Patent describes an inkjet cartridge and its pen body housing with an ink storage compartment therein; ROT's modification of the Kukla cartridge involved breaking the cap off of this housing. HP's theory of infringement was that this action impermissibly modified the patented housing. Similarly, with respect to the '811 patent, HP did perform an infringement analysis of ROT's inks before it added the claim to its complaint on November 30, 1993, and it produced, documents setting forth that analysis on April 15, 1994.

---

[1] ROT argues that it is a violation of the Sherman Act to attempt to use a patent on a container to establish a monopoly on the contents of the container. *See* *Morton Salt Co. v. G.S. Suppiger Co., 314 U.S. 488, 86 L. Ed. 363, 62 S. Ct. 402 (1942)*.

Overall, HP's patent claims, while unavailing, are not objectively baseless nor do **[*7]** they demonstrate grave abuse, therefore, the judgment of the district court is affirmed.

AFFIRMED.

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment pursuant to *Fed. R. Civ. P. 56* is appropriate where there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. The plain language of *Fed. R. Civ. P. 56(c)* mandates the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial. To survive a motion for summary judgment, a nonmovant must establish that there is a genuine issue of material facts. A nonmovant must do more than simply show that there is some metaphysical doubt as to the material facts.

HN2[] **Noerr-Pennington Doctrine, Sham Exception**

The Noerr-Pennington doctrine, developed in the context of ***antitrust law***, is applied to other areas as a constitutional defense based upon *First Amendment* principles. Litigation cannot be deprived of immunity as a sham unless it is objectively baseless. Neither Noerr immunity nor its sham exception turns on subjective intent alone. Rather, to be a "sham," litigation must meet a two-part definition. First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. The immunity is extended to efforts to influence adjudicative bodies, including courts. Further, a threat of litigation bears the same petitioning immunity as actual litigation.

Opinion

ORDER

This Order addresses the Motion to Dismiss/For Summary Judgment (Docket # 146) of the Defendant, Major League Baseball Players Association, an unincorporated association (MLBPA). The Court considers the motion as one for Summary Judgment and shall apply the standard applicable to such motions in its determination. Further, in order to consider all argument and evidence presented, the Court grants Cardtoons' Motion to File Supplemental Brief in Response to MLBPA's Motion to Dismiss/For Summary Judgment (Docket # 163).

Legal Analysis

HN1[] Summary judgment pursuant to *Fed.R.Civ.P. 56* is appropriate where "there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *Celotex Corp. v. Catrett, 477 U.S. 317, 106 S. Ct. 2548, 91 L. Ed. 2d 265, 274 (1986)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *Windon Third Oil and Gas v. Federal Deposit Insurance Corporation, 805 F.2d 342 (10th Cir. 1986)*. In *Celotex, 477 U.S. at 317 (1986)*, **[*3]** it is stated:

> "The plain language of *Rule 56(c)* mandates the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial."

To survive a motion for summary judgment, nonmovant "must establish that there is a genuine issue of material facts…" Nonmovant "must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita v. Zenith, 475 U.S. 574, 585, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

This action was originally brought by Plaintiff for declaratory judgment that its trading cards featuring parodies of active major league baseball players did not infringe on the publicity rights of members of the MLBPA. Plaintiff also joined in the original complaint claims for injunctive relief and tortious interference with contract. The Court later allowed Plaintiff to file an Amended Complaint which added claims for prima facie tort, libel and negligence.

The Court first addressed Plaintiff's claim that the parody **[*4]** cards did not violate MLBPA's right of publicity. Cardtoons prevailed on this issue at both the trial level and on appeal. The claim for injunctive relief has been granted.

There remains for determination the Plaintiff's pendent state tort claims. All of Plaintiff's tort claims arise from the action of Defendant in sending cease-and-desist letters to Plaintiff and its printer, CHAMPS Marketing, Inc. in which Defendants claimed Plaintiff and CHAMPS were infringing upon the publicity rights of the members of MLBPA.

Defendant urges a motion to dismiss the remaining counts pursuant to *Fed.R.Civ.P. 12(b)(6)* on the grounds that Defendant's conduct was privileged as a matter of law arising from the right to petition government for redress of grievances guaranteed by the *First Amendment to the United States Constitution* and thus each count of the Amended Complaint fails to state a claim upon which relief can be granted. Defendant alternatively moves for summary judgment pursuant to *Fed.R.Civ.P. 56* urging that no genuine issue exists as to any material fact relating to Plaintiff's claims and that Defendant is entitled to immunity under the *First Amendment to the United States Constitution* **[*5]** as a matter of law. Plaintiff urges that summary judgment is not proper since there are uncertainties over the predicate facts arising from a conflict in evidence offered by opposing experts on mixed issues of law and fact. Cardtoons' position is that discovery is needed to determine MLBPA's subjective intent in sending the letters.

Neither party's expert opinion is necessary or proper for the resolution of the basic issue nor will they be considered. The issue before the Court is clear cut and unambiguous. The sending of the cease-and-desist letters is undisputed. The only question is whether they were covered by a *First Amendment* privilege, the same privilege that protects the initiation of litigation. There need be no further fact-finding on that issue.

HN2[] The *Noerr-Pennington* doctrine was developed in the context of ***antitrust law***; however it has been applied to other areas as a constitutional defense based upon *First Amendment* principles.

The United States Supreme Court in *Professional Real Estate Investors v. Columbia Pictures Industries, Inc., 508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* held:

> "Litigation cannot be deprived of immunity as **[*6]** a sham unless it is objectively baseless. ... Neither Noerr immunity nor its sham exception turns on subjective intent alone. See, e.g., *Allied Tube & Conduit Corp. V. Indian Head, Inc., 486 U.S. 492, 503, 108 S. Ct. 1931, 1938, 100 L. Ed. 2d 497*. Rather, to be a "sham," litigation must meet a two-part definition. First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation."

The opinion recognizes the extension of the Noerr-Pennington doctrine to other areas. The immunity has been extended to efforts to influence adjudicative bodies, including courts. See also *California Motor Transport Co. V. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*.

Here, the case history establishes objective reasonableness. The Report and Recommendation of the Magistrate, the initial ruling of this Court and the conclusions of the appellate court all acknowledge the reasonableness of MLBPA's position and the fact that the issue presented a close call.

[*7] Further, a threat of litigation bears the same petitioning immunity as actual litigation. *Coastal States Marketing, Inc. V. Hunt, 694 F.2d 1358 (5th Cir. 1983)*.

Conclusion

The threats of litigation contained in Defendant's letters are protected under immunity granted by the *First Amendment to the United States Constitution*. Application of the Noerr-Pennington doctrine is appropriate. Plaintiff's remaining claims for Tortious Interference with Contract, Prima Facie Tort, Libel and Negligence must fail as a matter of law. The Motion to Dismiss/For Summary Judgment (Docket # 146) is granted in favor of Defendant on all claims. Plaintiff's Motion to File Supplemental Brief (Docket # 163) is granted.

It is so ORDERED this 11TH Day of March, 1998.

JAMES O. ELLISON, Senior Judge

United States District Court

JUDGMENT

In accord with the Order filed this date sustaining the Defendant's Motion for Summary Judgment, the Court hereby enters judgment in favor of the Defendant, Major League Baseball Players Association, an unincorporated association, and against the Plaintiff, Cardtoons. Plaintiff shall take nothing of its claim.

DATED, THIS 11TH DAY OF MARCH, 1998.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN1[] **Defenses, Demurrers & Objections, Motions to Strike**

When considering a motion to strike, the court construes the complaint in a manner most favorable to sustaining its legal sufficiency and accepts all the facts alleged in and reasonably inferred from the challenged count or counts.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Interpretation

Governments > Courts > Judicial Precedent

HN2[] **Public Enforcement, State Civil Actions**

The Connecticut Antitrust Act was intentionally patterned after the ***antitrust law*** of the federal government. Therefore, the Connecticut courts' construction of the Connecticut Antitrust Act is aided by reference to judicial opinions interpreting the federal antitrust statutes. Accordingly, the court follows federal precedent when it interprets the act unless the text of the state antitrust statutes, or other pertinent state law, requires the court to interpret it differently.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN3[] **Public Enforcement, State Civil Actions**

A plaintiff cannot recover for personal injuries under the antitrust statutes.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN4[] **Public Enforcement, State Civil Actions**

Lost profits can be recovered under the antitrust statutes. *Conn. Gen. Stat. § 35-35*.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] **Public Enforcement, State Civil Actions**

The Connecticut Antitrust Act (CUTPA) is concerned with conduct, and not the relationship between the parties. Indeed, CUTPA is not limited to conduct involving consumer injury and a competitor or other business person can maintain a CUTPA cause of action without showing consumer injury. This is consistent with the statutory provision which grants a private cause of action to private persons. It states that any person who suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment of a method, act or practice prohibited by CUTPA may bring an action. *Conn. Gen. Stat. § 42-110g(a)*.

Opinion

MEMORANDUM OF DECISION RE DEFENDANTS' MOTION TO STRIKE

Before the court is the defendants' motion to strike the first, second, third, sixth, and seventh counts of the plaintiff's amended complaint. ***HN1***[] When considering a motion to strike, the court construes the complaint in a manner most favorable to sustaining its legal sufficiency; *Nestor v. Travelers Indemnity Co., 41 Conn. App. 625, 629, 677 A.2d 475 (1996)*; and accepts all the facts alleged in and reasonably inferred from the challenged count or counts. See *Clohessy v. Bachelor, 237 Conn. 31, 33, 675 A.2d 852 (1996)* (where the court recited and accepted as true the facts alleged in, and reasonably inferred from, the stricken third count alleging a cause of action for negligent infliction of emotional distress).

In the present case, the same facts are alleged to support each count within the amended complaint. **[*2]** The alleged facts, accepted as true, are as follows. In 1987, the plaintiff, Ann L'Altrella, was hired as a company provider by the defendant companies, Weight Watchers International and Weight Watchers North America. In the spring of 1994, while still employed by the defendants, the plaintiff started her own business. As a part of her new business, the plaintiff advertised and sold a dietary food supplement known as Thermachrome 5000. The plaintiff alleges that the business of advertising and selling Thermachrome 5000 was outside the scope of her employment with the defendants.

The amended complaint further alleges that Maryann Povodnich and Donna Walker were also employed by the defendants. On or about June 14, 1994, while acting within the scope of their employment, Povodnich and Walker met with the plaintiff to discuss her sale of Thermachrome 5000. The amended complaint does not set forth any further details of this meeting.

Approximately three weeks later, on July 5, 1994, the plaintiff was directed to sign a letter from the defendants. The letter contained the following statements, which the plaintiff alleges were substantially false: that Thermachrome 5000 was the **[*3]** product of a competitor of the defendants; that Thermachrome 5000 was a product in competition with the defendants' products or services; that the plaintiff was therefore endorsing, promoting or selling a product in competition with the defendants' products; that the plaintiff agreed to sign a letter acknowledging these facts; and, that if the plaintiff refused to sign an acknowledgement letter, it would be deemed to signify her resignation from employment with the defendants. The letter further refers to a prior letter dated June 15, 1994.

Three days later, on July 8, 1994, the defendants notified the plaintiff, through their employee Povodnich, that in order to continue her employment with the defendants, she had to sign a document that contained a purported admission by the plaintiff that the sale of Thermachrome 5000 was the sale of a competitor's product, and, a statement by the plaintiff that she would cease any further sale of Thermachrome 5000. The defendants would deem the plaintiff's failure to sign the document as the plaintiff's resignation. The plaintiff refused to sign the document.

The following day, July 9, 1994, the plaintiff was denied entry into the defendant's **[*4]** workplace. She was informed in the parking lot that she was denied entry because she resigned from her position with the defendants. The plaintiff alleges that she did not resign from her position, and instead was terminated for refusing to accede to the defendants' demand that she stop selling Thermachrome 5000.

In the first, second, third, sixth, and seventh counts, the plaintiff alleges that the defendants' actions constitute a violation of the Connecticut Antitrust Act (CUTPA), a breach of the implied covenant of good faith and fair dealing, a tortious interference with a business relationship and, a wrongful termination respectively. As a result of the defendants' alleged wrongful conduct, the plaintiff alleges that she has sustained the following substantial injuries, which she seeks to recover in each of the five counts challenged by the defendants' motion to strike: (a) lost profits; (b) loss of business opportunity; (c) impaired earning ability; (d) reduced income; (e) injury to credit and financial standing; (f) shock to her nervous system, migraines, and loss of sleep; and, (g) harassment, humiliation, and injury to her reputation. [1]

[*5] II

Count One--The Connecticut Antitrust Act

The defendants move to strike the first count on the ground that the plaintiff lacks standing to bring an antitrust claim under the Connecticut Antitrust Act. The defendants argue that the plaintiff was not the target of the defendants' alleged antitrust activity, and she did not suffer an "antitrust injury" that is compensable under the act. The defendants therefore argue that the first count should be stricken.

HN2[] The Connecticut Antitrust Act "was intentionally patterned after the ***antitrust law*** of the federal government . . . Therefore, our construction of the Connecticut Antitrust Act is aided by reference to judicial opinions interpreting the federal antitrust statutes . . . Accordingly, we follow federal precedent when we interpret the act unless the text of our antitrust statutes, or other pertinent state law, requires us to interpret it differently." (Brackets omitted; citations omitted; footnote omitted; internal quotations omitted.) *Westport Taxi Service, Inc. v. Westport Transit District, 235 Conn. 1, 15-16, 664 A.2d 719 (1995)*; see also *General Statutes 35-44b* (It is the intent of the General Assembly that in construing **[*6]** [the Connecticut Antitrust Act], the courts of this state shall be guided by interpretations given by the federal courts to federal antitrust statutes").

Although inartfully pled, the plaintiff has stated an antitrust claim that withstands a motion to strike. The facts alleged by the plaintiff are on all fours with the facts recited in *Bowen v. Wohl Shoe Co., 389 F. Supp. 572 (S.D. Tex. 1975)*. In *Bowen*, the court concluded that the facts as alleged were sufficient to state a cause of action under the federal antitrust statutes. See *id., at 577-82*. The court therefore follows this federal precedent because the text of Connecticut's antitrust statutes, or other pertinent state law, does not require otherwise. *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 15-16*; *General Statutes 35-44b*.

The confusion in the present case concerning the plaintiff's standing arises from the plaintiff's dual personality. The plaintiff wears two hats in the amended complaint. She is the defendants' ex-employee and, she is the owner/proprietor of a business that was arguably the target or, within the target area, of the defendants' conduct. The defendants' **[*7]** assertion that the plaintiff is proceeding as an ex-employee is not without substantiation. In the amended complaint the plaintiff seeks damages for injuries that are personal, for instance, shock to her nervous system, migraines and loss of sleep. ***HN3***[] The plaintiff cannot recover these personal injuries under the antitrust

[1] In the first count, the plaintiff also seeks treble damages, attorneys fees, and costs, pursuant to *General Statutes 35-35*.

statutes. See Young v. Colonial Oil Co., 451 F. Supp. 360, 361 (MD GA 1978) (emotional distress is not a "business injury," and thus, not compensable under the federal antitrust statutes).

Nonetheless, the plaintiff also seeks damages for injuries to her "business or property," i.e., **HN4**[] lost profits, which can be recovered under the antitrust statutes. General Statutes 35-35. The defendants should have utilized a request to revise to separate the plaintiff's dual personalities and delete the non-antitrust injuries from the enumerated claim of damages. Hence, although inartfully pled, the plaintiff's first count withstands the motion to strike.

III

Count Two--CUTPA

The plaintiff's dual personality also confuses the second count, which alleges a violation of CUTPA. The defendants seize upon the plaintiff's status as an ex-employee, and argue that the second **[*8]** count should be stricken because CUTPA does not extend to the employee/employer relationship.

HN5[] CUTPA is concerned with conduct, and not the relationship between the parties. Larsen Chelsey Realty Co. v. Larsen, 232 Conn. 480, 492, 656 A.2d 1009 (1995). Indeed, CUTPA is not limited to conduct involving consumer injury and a competitor or other business person can maintain a CUTPA cause of action without showing consumer injury. Id., 496. This is consistent with the statutory provision which grants a private cause of action to private persons. It states that any person who suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment of a method, act or practice prohibited by CUTPA may bring an action. General Statutes 42-110g(a). The plaintiff has alleged that the defendants' conduct, allegedly an unfair and deceptive trade practice, injured the plaintiff's business, and thus, injured the plaintiff. The defendants' alleged conduct, if proven, may constitute conduct which falls within the wide range of conduct prohibited by CUTPA. See Associated Investment Co. v. Williams Assoc., 230 Conn. 148, 172, 645 A.2d 505 (1994) (Katz, **[*9]** J., dissenting). Therefore, the second count also survives a motion to strike, even though the plaintiff seeks damages for injuries that cannot be recovered under CUTPA.

IV

Counts Three and Seven

Construed in the manner most favorable to the plaintiff, the amended complaint alleges that the plaintiff was fired by the defendants because she refused to engage in conduct that allegedly violated the Connecticut Antitrust Act and CUTPA. If it is against public policy to terminate an employee for reporting the violation of a law; General Statues 31-51m(b); it is against public policy for an employer to terminate an employee because she refused to participate in violating the Connecticut Antitrust Act. See Faulkner v. United Technologies Corp., 240 Conn. 576, 583, 588, 693 A.2d 293 (1997); see also id., 586, citing, Tameny v. Atlantic Richfield Co., 27 Cal. 3d 167, 170, 179, 610 P.2d 1330, 164 Cal. Rptr. 839 (1980) (noting that the *Tameny* court found that a plaintiff who alleged that his employer discharged him for refusing to violate federal antitrust statutes, stated a cause of action). The plaintiff therefore has alleged that the defendants violated a strong public **[*10]** policy. The motion to strike the third and seventh counts is therefore denied.

V

Count Six--Tortious Interference with Business Relationship

In the sixth count, the plaintiff alleges that the defendants tortiously interfered with her business relationship with the distributors and manufacturer of Thermachrome 5000. **HN6**[] The essential elements of the tort of unlawful interference with a business relationship are (1) a business relationship between the plaintiff and another party, (2) the defendant's intentionally interfering with it while knowing of the relationship and (3) as a result of the interference, the plaintiff suffered actual loss. *Dinapoli v. Cooke, 43 Conn. App. 419, 426, 682 A.2d 603 (1996)*. As argued by the defendants, the plaintiff has failed to allege any facts in the amended complaint to demonstrate in what manner the defendants interfered with a relationship between the plaintiff and the distributors and manufacturer of Thermachrome 5000. The facts alleged only indicate that the plaintiff was fired for her refusal to allow the defendants to interfere with her business relationship. Further, the plaintiff has failed to allege facts that demonstrate that she suffered **[*11]** any actual loss. Indeed, the facts alleged indicate that the plaintiff refused to sever her relationship with her business relations. The plaintiff attempts to provide the facts necessary to support her claim in her memoranda of law in opposition to the defendants' motion to strike. ***HN7***[] The court, however, cannot consider facts outside the pleading. Such is an impermissible speaking motion to strike. Therefore, the facts alleged by the plaintiff in her amended complaint are insufficient to state a claim for tortious interference with a business relationship. Accordingly defendant's motion to strike is granted.

VI

Conclusion

The motion to strike the first, second, third and seventh counts is denied. The motion to strike the sixth count is granted.

SO ORDERED

Civil Procedure > Parties > Pro Se Litigants > Pleading Standards

Civil Procedure > Parties > Pro Se Litigants > General Overview

HN10[] **Pro Se Litigants, Pleading Standards**

When plaintiff is a pro se litigant, the court has a special obligation to construe the complaint liberally.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN11[] **Amendment of Pleadings, Leave of Court**

Pursuant to *Fed. R. Civ. P. 15(a)*, a plaintiff has an absolute right to amend the complaint once at any time before a responsive pleading is served. Thereafter, a plaintiff must seek leave of the district court to amend the pleading. Although it is within the district court's discretion, district courts should grant such requests freely when justice so requires.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN12[] **Pleadings, Amendment of Pleadings**

A plaintiff has no right to amend where both the complaint and the action are dismissed, but may seek leave of court to do so.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN13[] **Standards of Review, Abuse of Discretion**

While the grant or denial of an opportunity to amend is within the discretion of the district court, an outright refusal to grant the leave without any justifying reason appearing for the denial is not an exercise of that discretion; it is merely an abuse of that discretion and is inconsistent with the spirit of the federal rules. On the other hand, a district court justifiably may deny leave to amend on grounds such as undue delay, bad faith, dilatory motive, and prejudice, as well as on the ground that an amendment would be futile. An amendment is futile if the complaint, as amended, would not survive a motion to dismiss for failure to state a claim upon which relief could be granted. In determining whether the amendment would be futile, the district court applies the same standard of legal sufficiency as under *Fed. R. Civ. P. 12(b)(6)*.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN14[] **Standards of Review, Abuse of Discretion**

If a district court concludes that an amendment is futile based upon its erroneous view of the law, it abuses its discretion in denying a plaintiff leave to amend to include a legally sufficient allegation.

Opinion

[*182] OPINION OF THE COURT

GREENBERG, Circuit Judge.

I. INTRODUCTION

Renee M. Smith, a pro se litigant, appeals from the district court's order of May 21, 1997, dismissing her complaint for failure to state a claim, and from the district court's order of June 5, 1997, denying her motion for leave to amend her complaint. Smith's complaint alleges violations of *section 1* of the Sherman Act, *15 U.S.C. § 1*, and Title IX of the Educational Amendments of 1972, *20 U.S.C. § 1681*, as well as a state law breach **[**3]** of contract claim against the National Collegiate Athletic Association ("NCAA"). Smith's allegations arise from the NCAA's promulgation and enforcement of a bylaw prohibiting a student-athlete from participating in intercollegiate athletics while enrolled in a graduate program at an institution other than the student-athlete's undergraduate institution.

The district court had jurisdiction over the federal claims in this matter pursuant to *28 U.S.C. §§ 1331* and *1337* and *15 **[*183]** U.S.C. § 15*, and over the state law claim pursuant to *28 U.S.C. § 1367*. This court has jurisdiction to review the final orders of the district court pursuant to *28 U.S.C. § 1291*. [1]

---

[1] According to the NCAA rules, a student-athlete is eligible to participate in intercollegiate athletics for a total of four seasons within a five-year period. Because Smith's five year-period of eligibility has expired and, according to the NCAA her complaint seeks only declaratory relief, the NCAA concludes that her Title IX claim is moot. We disagree.

Smith's Title IX claim is not moot although her period of eligibility has expired because she retains a claim for damages. *See Ellis Bhd. of Ry., Airline & S.S. Clerks, 466 U.S. 435, 442, 104 S. Ct. 1883, 1889, 80 L. Ed. 2d 428 (1984)* (holding that ***HN1***[] a claim is not moot where there is a viable damages claim); *National Iranian Oil Co. v. MAPCO Int'l, Inc., 983 F.2d 485, 489 (3d Cir. 1992)*; *Jersey Cent. Power & Light Co. v. New Jersey, 772 F.2d 35, 41 (3d Cir. 1985)*. Although count II of Smith's complaint, which asserts a Title IX claim, states that "this action is a request for a declaratory relief challenging sex discriminatory practices and policies of the NCAA . . . in violation of Title IX," her complaint also includes a clause which prays

[4]** ***HN2***[] We exercise plenary review over the district court's dismissal of Smith's complaint for failure to state a claim. *See* *Lake v. Arnold, 112 F.3d 682, 684 (3d Cir. 1997)*. We accept all of her allegations as true, view them in the light most favorable to her, and will affirm the dismissal only if she can prove no set of facts entitling her to relief. *See* *Nami v. Fauver, 82 F.3d 63, 65 (3d Cir. 1996)*; *ALA, Inc. v. Litig., 114 F.3d 1410, 1434 (3d Cir. 1997)*.

II. FACTS AND PROCEDURAL HISTORY

Smith graduated from high school in the spring of 1991 and enrolled in St. Bonaventure University the following fall, where she participated in Division I athletics. Smith played intercollegiate volleyball for St. Bonaventure during the 1991-92 and 1992-93 athletic seasons. By her choice, Smith did not participate in intercollegiate volleyball for St. Bonaventure during the 1993-94 season.

Smith graduated from St. Bonaventure in two and one half years. Thereafter, she enrolled in a postbaccalaureate **[**5]** program at Hofstra University, and then in 1995 she enrolled in a second postbaccalaureate program at the University of Pittsburgh. St. Bonaventure did not offer either of these postbaccalaureate programs. The NCAA is an unincorporated association comprised of public and private colleges and universities and is responsible for promulgating rules governing all aspects of intercollegiate athletics, including recruiting, eligibility of student-athletes, and academic standards. The member institutions agree to abide by and enforce these rules. The NCAA denied Smith eligibility to compete for Hofstra and the University of Pittsburgh in the 1994-95 and 1995-96 athletic seasons, respectively, based upon Bylaw 14.1.8.2 in the NCAA Manual (the "Postbaccalaureate Bylaw"). The Postbaccalaureate Bylaw provides that a student-athlete may not participate in intercollegiate athletics at a postgraduate institution other than the institution from which the student earned her undergraduate degree. [2] Both Hofstra and the University of Pittsburgh applied to the NCAA for a waiver of the bylaw with respect to Smith, but the NCAA denied both requests. **[*184]** Smith was, however, in good academic standing and in compliance **[**6]** with all other NCAA eligibility requirements for the 1994-95 and 1995-96 athletic seasons.

In August 1996, Smith instituted this suit challenging the NCAA's **[**7]** enforcement of the bylaw as well as the NCAA's refusal to waive the bylaw in her case. More particularly, Smith alleged that the Postbaccalaureate Bylaw is an unreasonable restraint of trade in violation of *section 1* of the Sherman Act and the NCAA's refusal to waive the bylaw excluded her from intercollegiate competition based upon her sex in violation of Title IX. Smith also asserted a state law breach of contract claim based upon the NCAA's denial of eligibility. On May 21, 1997, the district court dismissed Smith's federal claims for failure to state a claim upon which relief could be granted. The court held that the NCAA's refusal to waive the bylaw was not the type of action to which the Sherman Act applied. It also held that Smith's complaint did not allege adequately that the NCAA was a recipient of federal funding so as to be subject to Title IX. By the same order, the district court exercised its discretion to dismiss Smith's state law contract claim

---

for additional relief including damages and any further relief which the court finds appropriate. App. at 5. In our view, a fair reading of the complaint establishes that it asserts an action for damages under Title IX. *See* *Franklin v. Gwinnett County Pub. Schs., 503 U.S. 60, 112 S. Ct. 1028, 117 L. Ed. 2d 208 (1992)* (holding that a claim for damages exists in an action to enforce Title IX).

[2] The bylaw at issue provides that

> [a] student-athlete who is enrolled in a graduate or professional school of the institution he or she previously attended as an undergraduate (regardless of whether the individual has received a United States baccalaureate degree or its equivalent), a student-athlete who is enrolled and seeking a second baccalaureate or equivalent degree at the same institution, or a student-athlete who has graduated and is continuing as a full-time student at the same institution while taking course work that would lead to the equivalent of another major or degree as defined and documented by the institution, may participate in intercollegiate athletics, provided the student has eligibility remaining and such participation occurs within the applicable five-year or 10-semester period . . . .

Rule 14.1.8.2 of NCAA Manual.

pursuant to *28 U.S.C. § 1367(c)*. *See* *Smith v. National Collegiate Athletic Ass'n, 978 F. Supp. 213 (W.D. Pa. 1997)*.

Thereafter, Smith submitted a proposed amended complaint and moved the district court for leave to amend **[**8]** her complaint, which the district court denied "as moot" on June 5, 1997. Smith filed timely appeals from these orders, which we have consolidated.

III. DISCUSSION

A. SHERMAN ACT CLAIM

Count I of Smith's complaint alleges that the NCAA, in promulgating and enforcing the Postbaccalaureate Bylaw, violated *section 1* of the Sherman Act because the bylaw unreasonably restrains trade and has an adverse anticompetitive effect. As we have indicated, the district court dismissed this claim for failure to state a claim upon which relief could be granted, holding that "the actions of the NCAA in refusing to waive the Postbaccalaureate Bylaw and allow the Plaintiff to participate in intercollegiate athletics is not the type of action to which the Sherman Act was meant to be applied." *See* *Smith, 978 F. Supp. at 218*. Smith argues that the district court erred in limiting the application of the Sherman Act to the NCAA's commercial and business activities. We disagree.

HN4[] *Section 1* of the Sherman Act provides, in relevant part, that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, **[**9]** is declared to be illegal." *15 U.S.C. § 1*. Although the section literally prohibits "every" contract, *section 1* does not preclude all restraints on trade, but only those that are unreasonable. *See* *National Collegiate Athletic Ass'n v. Board of Regents of the Univ. of Okla., 468 U.S. 85, 98* & n.17, *104 S. Ct. 2948, 2959* & n.17, *82 L. Ed. 2d 70 (1984)*; *Arizona v. Maricopa County Med. Soc'y, 457 U.S. 332, 342-44, 102 S. Ct. 2466, 2472-73, 73 L. Ed. 2d 48 (1982)*. The Clayton Act, *15 U.S.C. §§ 15*, *26*, grants a private right of action to, *inter alia*, a person "injured in his business or property" by a violation of *section 1* of the Sherman Act. [3] Smith misconstrues the law in arguing that the Supreme Court has refused to limit antitrust remedies to commercial interests. The cases she cites address whether the plaintiffs alleged injuries within the meaning of the Clayton Act; in that context, the Court held that the statute was not limited to redressing injuries to commercial interests. *See* *Reiter v. Sonotone Corp., 442 U.S. 330, 338-39, 99 S. Ct. 2326, 2330, 60 L. Ed. 2d 931 (1979)* (holding that "injury to business or property" was not limited to commercial interests); **[**10]** *Blue Shield of Va. v. McCready, 457 U.S. 465, 473,* ***[*185]*** *102 S. Ct. 2540, 2545, 73 L. Ed. 2d 149 (1982)* (holding that a subscriber to a health plan who had employed the services of a psychologist alleged a redressable antitrust injury); *see also McNulty v. Borden, Inc., 474 F. Supp. 1111, 1115-18 (E.D. Pa. 1979)* (holding that an employee of an alleged antitrust violator was injured in his business or property). The question which we now face is different; it is whether antitrust laws apply only to the alleged infringer's commercial activities. Thus, rather than focus on Smith's alleged injuries, we consider the character of the NCAA's activities.

[11]** In this regard, we recognize that the Supreme Court has suggested that antitrust laws are limited in their application to commercial and business endeavors. Thus, the Court has explained that

> [the Sherman Act] was enacted in the era of 'trusts' and of 'combinations' of businesses and of capital organized and directed to control of the market by suppression of competition in the marketing of goods and services, the monopolistic tendency of which had become a matter of public concern. The end sought (by these laws) was the prevention of the restraints to the competition in business and commercial transactions which tended to restrict production, raise prices or otherwise control the market to the detriment of purchasers or consumers of goods and services, all of which had come to be regarded as a special form of public injury.

---

[3] Section 4 of the Clayton Act provides:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States . . . without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

15 U.S.C. § 15.

Apex Hosiery Co. v. Leader, 310 U.S. 469, 492-93, 60 S. Ct. 982, 992, 84 L. Ed. 1311 (1940). The Court also has noted that "in *Apex* [it] recognized that the Act is aimed primarily at combinations having commercial objectives and is applied only to a very limited extent to organizations . . . which normally have other objectives." **[**12]** Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 213 n.7, 79 S. Ct. 705, 710 n.7, 3 L. Ed. 2d 741 (1959).

The Supreme Court addressed the applicability of the Sherman Act to the NCAA in National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70, holding that the NCAA's plan to restrict television coverage of intercollegiate football games violated *section 1*. The Court discussed the procompetitive nature of the NCAA's activities such as establishing eligibility requirements as opposed to the anticompetitive nature of the television plan. *See* id. at 117, 104 S. Ct. at 2969. Yet, while the Court distinguished the NCAA's television plan from its rule making, it did not comment directly on whether the Sherman Act would apply to the latter.

Although insofar as we are aware no court of appeals expressly has addressed the issue of whether antitrust laws apply to the NCAA's promulgation of eligibility rules, *cf.* McCormack v. National Collegiate Athletic Ass'n, 845 F.2d 1338, 1343 (5th Cir. 1988) (assuming without deciding that the NCAA's eligibility rules were subject to antitrust scrutiny and holding that the "no-draft" **[**13]** and "no-agent" rules do not have an anticompetitive effect), many district courts have held that the Sherman Act does not apply to the NCAA's promulgation and enforcement of eligibility requirements. *See* Gaines v. National Collegiate Athletic Ass'n, 746 F. Supp. 738, 744-46 (M.D. Tenn. 1990) (holding that ***antitrust law*** cannot be used to invalidate NCAA eligibility rules, but noting in dicta that the "no-agent" and "no-draft" rules have primarily procompetitive effects); Jones v. National Collegiate Athletic Ass'n, 392 F. Supp. 295, 303 (D. Mass. 1975) (holding that ***antitrust law*** does not apply to NCAA eligibility rules); College Athletic Placement Servs., Inc. v. National Collegiate Athletic Ass'n, 1974 U.S. Dist. LEXIS 7050, 1975 Trade Cas. (CCH) P60,117, *available in* 1974 WL 998, * 2, * 3 (D.N.J. 1974) (holding that ***HN5***[] the NCAA's adoption of a rule furthering its noncommercial objectives, such as preserving the educational standards of its members, is not within the purview of ***antitrust law***), *aff'd* , 506 F.2d 1050 (3d Cir. 1974) (table).

We agree with these courts that the eligibility rules are not related to the NCAA's commercial or business activities. Rather than intending to provide **[**14]** the NCAA with a commercial advantage, the eligibility rules primarily seek to ensure fair competition in intercollegiate athletics. Based upon the Supreme Court's recognition that the Sherman Act primarily was intended to prevent unreasonable **[*186]** restraints in "business and commercial transactions," Apex, 310 U.S. at 493, 60 S. Ct. at 992, and therefore has only limited applicability to organizations which have principally noncommercial objectives, *see* Klor's, Inc., 359 U.S. at 214 n.7, 79 S. Ct. at 710 n.7, we find that the Sherman Act does not apply to the NCAA's promulgation of eligibility requirements. [4]

[15]** Moreover, even if the NCAA's actions in establishing eligibility requirements were subject to the Sherman Act, we would affirm the district court's dismissal of this claim. The NCAA's ***HN6***[] eligibility requirements are not "plainly anticompetitive," National Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 1365, 55 L. Ed. 2d 637 (1978), and therefore are not per se unreasonable, *see* National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. at 101, 104 S. Ct. at 2960 (refusing to apply per se rule to NCAA's television plan because the NCAA is involved in an industry where horizontal restraints are necessary to the availability of the product); McCormack, 845 F.2d at 1343-44; College Athletic Placement Servs., 1974 U.S. Dist. LEXIS 7050, 1975 Trade

[4] The recent decision of the Court of Appeals for the Tenth Circuit in Law v. National Collegiate Athletic Ass'n, 134 F.3d 1010, 1998 WL 23710 (10th Cir. 1998), does not alter our result. At issue in *Law* was the NCAA's bylaw restricting entry-level coaches' annual compensation. The court held that although the restriction was a horizontal price restraint, which is usually per se invalid, the rule of reason applied because certain products, such as intercollegiate sports, require horizontal restraints in order to exist. *See id.* at * 5-* 6 (citing National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. at 100-01, 104 S. Ct. at 2959-60).

The bylaw at issue in *Law* concerned a restriction on the business activities of the institutions, whereas the Postbaccalaureate Bylaw does not. Because our analysis regarding the applicability of the Sherman Act focuses on the distinction between commercial and noncommercial activities, *Law* is inapposite. Further, because of the significant difference in the nature of the bylaw at issue in *Law* and the Postbaccalaureate Bylaw, the *Law* court's rule of reason analysis is not instructive here.

Cas. (CCH) P60,117, *available in* 1974 WL 998, * 3. Consequently, if the eligibility requirements were subject to the Sherman Act, we would analyze them under the rule of reason.

Under the "rule of reason" test, a court considers all relevant factors in determining a defendant's purpose in implementing the challenged restraint and the effect of the restraint on competition, *see* *Orson, Inc. v. Miramax Film Corp.,* ***[**16]*** *79 F.3d 1358, 1367-68 (3d Cir. 1996)* (citing *Board of Trade of Chicago v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 243-44, 62 L. Ed. 683 (1918))*, and asks essentially whether the challenged rule promotes or hinders competition. *See* *McCormack, 845 F.2d at 1344*.

As noted above, the Supreme Court has recognized the procompetitive nature of many of the NCAA's restraints, including eligibility requirements. *See* *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. at 117, 104 S. Ct. at 2969*. According to the Supreme Court,

> what the NCAA and its member institutions market in this case is competition itself--contests between competing institutions. Of course, this would be completely ineffective if there were no rules on which the competitors agreed to create and define the competition to be marketed. A myriad of rules . . . must be agreed upon, and all restrain the manner in which institutions compete. . . . Thus, the NCAA plays a vital role in enabling [intercollegiate sports] to preserve its character, and as a result enables a product to be marketed which might otherwise be unavailable. In performing this role, its actions widen consumer choice **[**17]** . . . and hence can be viewed as procompetitive.

468 U.S. at 101-02, 104 S. Ct. at 2960-61 (footnote omitted). In particular, the Court explained that "it is reasonable to assume that most of the regulatory controls of the NCAA are justifiable means of fostering competition among amateur athletic teams and therefore procompetitive because they enhance public interest in intercollegiate athletics" and suggested that rules establishing eligibility requirements of student-athletes were such controls, while rules limiting television broadcasts were not. *See* *id. at 117, 104 S. Ct. at 2969*.

[*187] While the parties have not cited any opinion addressing the particular bylaw at issue here, and we have found none, other courts have held that the NCAA's "no-draft" and "no-agent" rules, which disqualify a student-athlete from further intercollegiate competition if the student-athlete enters a professional draft or contacts an agent, are reasonable because they are procompetitive. *See* *McCormack, 845 F.2d at 1343*; *Banks v. National Collegiate Athletic Ass'n, 977 F.2d 1081, 1087-94 (7th Cir. 1992)* (holding that NCAA's "no-draft" and "no-agent" rules do not have an anticompetitive **[**18]** impact on a discernable market); *Gaines, 746 F. Supp. at 746*; *Jones, 392 F. Supp. at 304* (noting in dicta that "any limitation on access to intercollegiate sports is merely the incidental result of the organization's pursuit of its legitimate goals"); *see also* *Justice v. National Collegiate Athletic Ass'n, 577 F. Supp. 356, 379 (D. Ariz. 1983)* (holding that NCAA sanctions such as rendering a college team ineligible for post-season play and for television appearances imposed for violations of rule against providing compensation to student-athletes did not violate ***antitrust law*** because sanctions were reasonably related to the NCAA's goals of preserving amateurism and promoting fair competition).

We agree with these courts that, in general, the NCAA's eligibility rules allow for the survival of the product, amateur sports, and allow for an even playing field. *See* *McCormack, 845 F.2d at 1345*. Likewise, the bylaw at issue here is a reasonable restraint which furthers the NCAA's goal of fair competition and the survival of intercollegiate athletics and is thus procompetitive. Clearly, the rule discourages institutions with graduate or professional schools from inducing undergraduates **[**19]** at other institutions to forgo participating in the athletic programs at their undergraduate institutions in order to preserve eligibility to participate in intercollegiate athletics on a postbaccalaureate basis. Likewise, the rule discourages undergraduates from forgoing participation in athletic programs on their own initiative to preserve eligibility on a postbaccalaureate basis at another institution. Indeed, we think that the bylaw so clearly survives a rule of reason analysis that we do not hesitate upholding it by affirming an order granting a motion to dismiss Smith's antitrust count for failure to state a claim on which relief can be granted.

B. TITLE IX CLAIM

HN7[] Title IX provides that "no person in the United States shall, on the basis of sex, be excluded from participating in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance." *20 U.S.C. § 1681(a)*. Intercollegiate athletics is an educational program or activity within the statute. *See 20 U.S.C. § 1687*; *34 C.F.R. § 106.41 (a)*. [5]

[20]** Thus, the NCAA is subject to Title IX provided that it receives federal financial assistance within the meaning of *section 1681(a)*.

Federal regulations define "recipient" as including

> any public or private agency, institution or organization, or other entity, or any other person, *to whom Federal financial assistance is extended directly or through another recipient* and which operates an educational program or activity *which receives or benefits* from such assistance, including any subunit, successor, assignee or transferee thereof.

34 C.F.R. § 106.2(h) (1997) (emphasis added). The plain language of the statute and regulation is quite broad and encompasses indirect recipients of federal funds. *See Grove City College v. Bell, 465 U.S. 555, 564,* ***[*188]*** *104 S. Ct. 1211, 1216, 79 L. Ed. 2d 516 (1984)* (holding that a college received federal funds where the funds were granted to its students as financial aid rather than directly to the college because the language of the section does not distinguish between direct and indirect receipt of federal funds).

The Court of Appeals for the Sixth Circuit addressed the applicability of Title IX to a state high school athletic **[**21]** association in *Horner v. Kentucky High Sch. Athletic Ass'n, 43 F.3d 265 (6th Cir. 1994)*. In *Horner*, the plaintiffs, female student-athletes, alleged that the association received dues from its member high schools, many of which receive federal funds, and that a state statute authorized the designation of the association as an agent of the state board of education. *See Ky. Rev. Stat. Ann. § 156.070(1)*, *(2)*. In that capacity, the association performed the board's statutory duties with respect to interscholastic sports. The plaintiffs alleged that the association violated Title IX by sanctioning fewer sports for girls than boys and by refusing to sanction a particular sport for girls. The court held that the association would be subject to Title IX if the plaintiff could prove her allegations with respect to its functioning and financing. *See id.*

The district court attempted to distinguish *Horner* by noting that "even if the [NCAA] receives dues from member schools which receive federal funds, unlike the situation in Horner, there is no statutory connection between the parties such that the Defendant can be considered the 'agent' of its member institutions that **[**22]** receive federal financial assistance." *See Smith, 978 F. Supp. at 220*. Thus, according to the district court, the distinguishing characteristic here is the lack of statutory authority for the NCAA. We disagree. The NCAA acts no less than the association in *Horner* as an agent of its member institutions merely because it lacks statutory authority for its activities. The NCAA is a voluntary organization created by and comprised of the educational institutions which essentially acts as their surrogate with respect to athletic rules.

---

[5] ***HN8***[] The statute defines "program or activity" as

> (2)(A) a college, university, or other postsecondary institution, or a public system of higher education; or . . .
>
> (4) any other entity which is established by two or more of the entities described in paragraph (1), (2), or (3); any part of which is extended Federal financial assistance . . . .

20 U.S.C. § 1687. In addition, federal regulation in part provides that

> ***HN9***[] no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, be treated differently from another person or otherwise be discriminated against in any interscholastic, intercollegiate, club or intramural athletics offered by a recipient, and no recipient shall provide any such athletics separately on such basis.

34 C.F.R. § 106.41(a).

In its construction of section 504 of the Rehabilitation Act, which contains language identical to that of Title IX in 20 U.S.C. § 1681(a) regarding receipt of federal assistance, [6] **[**24]** the Supreme Court has indicated that Congress, as in Title IX, did not distinguish between direct and indirect financial assistance. *See* United States Dep't of Transp. v. Paralyzed Veterans of Amer., 477 U.S. 597, 606-07, 106 S. Ct. 2705, 2711-12, 91 L. Ed. 2d 494 (1986) (citing Grove City College, 465 U.S. at 564, 104 S. Ct. at 1216 (holding that a college received federal funds where the funds were granted to its students as financial aid rather than directly **[**23]** to the college)). The Court, however, drew a distinction between those entities which indirectly *benefit from* federal assistance and those that indirectly *receive* federal assistance, holding that only those the *receive* federal funds are within the statute. Thus, the Court rejected the argument that all commercial airlines are "recipients" of federal funds simply because airport operators receive federal funds which benefit the airlines in the form of runways, *inter alia*. *See* id. at 606, 106 S. Ct. at 2711. The Court defined "recipient" from a contractual perspective, limiting "recipients" of federal funds, and therefore the obligations of the act, to those who are in a position to decide whether to "receive" federal funds and thereby accept the concomitant obligations of the statute. *See id.* [7]

[*189] Notwithstanding the parallel language of the Rehabilitation Act and Title IX, we do not apply the *Paralyzed Veterans* Court's definition of "recipient" to Title IX in the circumstances here. In our view, the broad regulatory language under Title IX, which defines a recipient as an entity "which operates an educational program or activity which *receives or benefits*" from federal funds, 34 C.F.R. § 106.2(h) (1997) (emphasis added), requires that we reach a different result. Application of *Paralyzed Veterans* here would render the regulatory definition **[**25]** of "recipient" under Title IX a nullity. After all, unlike the commercial airlines in *Paralyzed Veterans*, the NCAA is not merely an incidental beneficiary of federal funds. Quite to the contrary, it seems to us that the relationship between the members of the NCAA and the organization itself is qualitatively different than that between airlines and airport operators, for we think that it would be unreasonable to characterize the latter as surrogates for the airlines. Given the breadth of the language of the Title IX regulation defining recipient, we hold that allegations in Smith's proposed amended complaint, that the NCAA receives dues from its members which receive federal funds, if proven, would subject the NCAA to the requirements of Title IX.

The district court found that Smith's original complaint did not allege that the NCAA was a recipient of federal funds, and therefore dismissed the Title IX claim. *See* Smith, 978 F. Supp. at 219. Smith's complaint included the following allegation:

> This action is a request for declaratory relief challenging sex discriminatory practices and policies of the NCAA, Hofstra University, and the University of Pittsburgh in violation **[**26]** of Title IX of the Educational Amendments of 1972, 20 U.S.C. § 1681. Title IX prohibits sex discrimination in an educational program or activity receiving federal financial assistance.

Compl. P 25. We agree that Smith's original complaint did not contain an allegation that the NCAA receives federal financial assistance. Thus, the district court properly dismissed her original Title IX complaint. [8]

---

[6] The Rehabilitation Act states that

> no otherwise qualified individual with a disability in the United States, as defined in section 706(8) of this title, shall, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under *any program or activity receiving Federal financial assistance*.

29 U.S.C. § 794 (emphasis added).

[7] The Court noted that "Congress enters into an arrangement in the nature of a contract with the recipients of the federal funds: the recipient's acceptance of the funds triggers coverage under the nondiscrimination provision." 477 U.S. at 605, 106 S. Ct. at 2711. The Court further noted that "by limiting coverage to recipients, Congress imposes the obligations of § 504 upon those who are in a position to accept or reject those obligations as a part of the decision whether or not to 'receive' federal funds." Id. at 606, 106 S. Ct. at 2711.

But we have not confined our analysis to Smith's original complaint for, as we have indicated, following the district court's dismissal of her claims, Smith moved for leave to amend her complaint pursuant to *Fed. R. Civ. P.* ***[**27]*** *15*. By order dated June 5, 1997, the district court denied this motion, stating only that the motion "is denied as moot, the court having granted defendant's motion to dismiss on May 20, 1997." App. at 117. Because the district court gave no further explanation, it is unclear whether the district court was unaware of its discretion to allow the proposed amended complaint despite the dismissal or whether the court believed that the amendment would be futile even if pleaded. Nevertheless, under either view, the district court erred in denying Smith's motion for leave to amend.

HN11[] Pursuant to *Fed. R. Civ. P. 15(a)*, a plaintiff has an absolute right to amend her complaint once at any time before a responsive pleading is served. Thereafter, a plaintiff must seek leave of the district court to amend her pleading, and although it is within the district court's discretion, district courts should grant such requests freely when justice so requires. *Id.*

After the district court enters judgment on a motion to dismiss, a plaintiff no longer may amend her complaint as of right. *See* *Newark Branch, NAACP v. Town of Harrison, 907 F.2d 1408, 1417 (3d Cir. 1990)*; *Kauffman v. Moss, 420 F.2d* ***[**28]*** *1270, 1276 (3d Cir. 1970)*. However, even though Smith no longer was entitled to amend her complaint as of right after the dismissal of her claim, it was within the district court's discretion to grant her leave to amend. *See* *Newark Branch, NAACP, 907 F.2d at 1417*; *Kauffman, 420 F.2d at 1276*; *In re Sverica Acquisition Corp. v. Load Rite Trailers, Inc., 179 B.R. 457, 459 (E.D. Pa. 1995)*; *Fearon v. Community Fed. Sav. & Loan of Phila., 119 F.R.D. 13, 15 (E.D. Pa. 1988)* ***HN12***[] (plaintiff had no right to **[*190]** amend where both complaint and action dismissed, but could seek leave of court to do so). Thus, her motion to amend was not moot in the sense of being too late or being foreclosed by the dismissal.

HN13[] While "the grant or denial of an opportunity to amend is within the discretion of the District Court . . . outright refusal to grant the leave without any justifying reason appearing for the denial is not an exercise of that discretion; it is merely an abuse of that discretion and inconsistent with the spirit of the Federal Rules." *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 230, 9 L. Ed. 2d 222 (1962)*. On the other hand, a district court justifiably may deny leave to amend **[**29]** on grounds such as undue delay, bad faith, dilatory motive, and prejudice, as well as on the ground that an amendment would be futile. *See id.*; *In re Burlington Coat Factory Sec. Litig., 114 F.3d at 1434*; *Massarsky v. General Motors Corp., 706 F.2d 111, 125 (3d Cir. 1983)*. An amendment is futile if the complaint, as amended, would not survive a motion to dismiss for failure to state a claim upon which relief could be granted. *See* *In re Burlington Coat Factory, 114 F.3d at 1434* (citing *Glassman v. Computervision Corp., 90 F.3d 617, 623 (1st Cir. 1996))*. In determining whether the amendment would be futile, the district court applies the same standard of legal sufficiency as under *Fed. R. Civ. P. 12(b)(6)*. *See id.*

Smith alleged facts in her proposed amended complaint which, if proven, would establish that the NCAA was a recipient of federal funds within the meaning of Title IX. Her motion states that she intended the amended complaint to cure any allegational defects, and the proposed amended complaint includes an allegation that the NCAA is an indirect recipient of federal funds. In particular, her proposed amended complaint alleges that "the NCAA is a recipient **[**30]** of federal funds because it is an entity which receives federal financial assistance through another recipient and operates an educational program or activity which receives or benefits from such assistance." App. at 98. This allegation plainly alleges that the NCAA receives dues from member institutions, which receive federal funds. As discussed above, this allegation would be sufficient to bring the NCAA within the scope of Title IX as a recipient of federal funds and would survive a motion to dismiss.

HN14[] If a district court concludes that an amendment is futile based upon its erroneous view of the law, it abuses its discretion in denying a plaintiff leave to amend to include a legally sufficient allegation. *See* *Centifanti v. Nix, 865 F.2d 1422, 1431 (3d Cir. 1989)* (holding that the district court, which erred in its conclusion that there was

---

[8] However, Judge McKee would hold that Smith's original complaint sufficiently states that the NCAA receives federal financial assistance under the pleading requirements that we apply to pro se complaints. *See* *Zilich v. Lucht, 981 F.2d 694 (3d Cir. 1992)* ***HN10***[] ("When, as in this case, plaintiff is a pro se litigant, we have a special obligation to construe [her] complaint liberally.").

jurisdictional defect, abused its discretion in denying a plaintiff's motion for leave to amend his complaint because the proposed amendment would not cure the jurisdictional defect). Thus, if the district court denied Smith leave to amend because it viewed the proposed amendments as futile, it erred because the conclusion was based on an **[**31]** error of law. Furthermore, we see no basis to conclude that the district court justifiably could have denied the motion to amend on the grounds that Smith had acted in bad faith, with a dilatory motive, or had delayed unduly in bringing the motion or that granting the motion would prejudice the NCAA. Indeed, there is nothing in the record to support a conclusion that the district court denied the motion to amend on any of these grounds. Overall, therefore, we are satisfied that the district court abused its discretion in denying the motion to amend the complaint. [9]

IV. **[**32]** CONCLUSION

For the foregoing reasons, we will affirm the district court's dismissal of appellant's Sherman Act claim, vacate its dismissal of the Title IX claim, and reverse the district court's denial of her motion for leave to amend her complaint with respect to her Title IX claim. In light of this conclusion, we **[*191]** will remand to the district court for further proceedings consistent with this opinion and direct the district court to reinstate her state law contract claim, over which the district court declined to exercise jurisdiction pursuant to *28 U.S.C. § 1367(c)*. The parties will bear their own costs on this appeal.

End of Document

[9] We do not imply that we have any view of the merits of Smith's Title IX claim. The parties have not briefed the merits, and the district court will address those issues on remand if Smith can prove her allegations to support the applicability of Title IX to the NCAA. Thus, we emphasize that we merely hold that the amendment would not have been futile in the sense that it would not have pled adequately that the NCAA was subject to Title IX.

Mitel Corp. v. A&A Connections

United States District Court for the Eastern District of Pennsylvania

March 19, 1998, Decided ; March 20, 1998, Filed, Entered

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[ ] **Regulated Practices, Private Actions**

A claim may be dismissed under *Fed. R. Civ. P. 12(b)(6)* only if it appears beyond a reasonable doubt that the plaintiff could prove no set of facts in support of the claim that would entitle him to relief. In considering such a motion, a court must accept all of the facts alleged in the complaint in the light most favorable to the plaintiff. Additionally, when reviewing antitrust claims the dismissal standard is elevated because motive and intent play leading roles; thus the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. Nonetheless, the court will not shy away from dismissing antitrust claims that are vague and conclusory in nature.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

Under the Sherman and Clayton Acts, individual harm is irrelevant: consumer protection is the primary concern. In antitrust cases, a plaintiff must prove injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. In other words, because ***antitrust law*** aims to protect competition, not competitors, a court must analyze the antitrust injury question from the viewpoint of the consumer. An antitrust plaintiff must prove that challenged conduct affected the prices, quantity, or quality of goods or services, not just his own welfare.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Sherman Act, Claims**

To establish a violation *§ 1* of the Sherman Act for unreasonable restraint of trade, a plaintiff must prove (1) concerted action by the defendants, (2) that produced anticompetitive effects within the relevant product and geographic markets, (3) that the concerted action was illegal, and (4) that the plaintiff was injured as a proximate result of the concerted action.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN4[] **Regulated Practices, Private Actions**

Courts recognize the procompetitive effects of limiting distribution of a product to company authorized dealers.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN5[] **Monopolies & Monopolization, Actual Monopolization**

The offense of monopoly under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of superior product, business acumen, or historical accident. To state a claim for attempted monopolization, a plaintiff must allege that (1) a defendant had engaged in predatory conduct or anticompetitive conduct with (2) specific intent to monopolize and with (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Regulated Practices, Market Definition**

The outer bounds of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. In certain limited situations, a product market may consist of only a single brand. In circumstances where the product or service is unique and therefore not interchangeable with other products or services, the single brand can constitute the relevant market.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

HN7[] **Tying Arrangements, Clayton Act**

Whether brought under *§ 1* of the Sherman Act or § 3 of the Clayton Act, the essential elements of a tying claim are the same. A "tying arrangement" is unlawful where (1) the scheme in question involves two distinct items and provides that one, the tying product, may not be obtained unless the other, the tied product, is also purchased; (2) the tying product possesses sufficient economic power to appreciably restrain competition in the tied product market; and (3) a "not insubstantial" amount of commerce must be affected by the arrangement. Finally, the United States Court of Appeals for the Third Circuit requires that the manufacturer of the tying product must garner some economic benefit from the tying arrangement.

Civil Procedure > Parties > Intervention > General Overview

HN8[] **Parties, Intervention**

Fed. R. Civ. P. 24(b) provides, in part, that upon timely application, anyone may be permitted to intervene in an action when applicant's claim or defense and the main action have a question of law or fact in common. In exercising its discretion, the court shall consider whether the intervention will unduly delay or prejudice the adjudication of the rights of the original parties.

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Commercial Interference > Contracts > General Overview

HN9[] **Intentional Interference, Elements**

To state a claim for tortious interference with contractual relations, a claimant must allege the following four elements: (1) a contractual relation, (2) a purpose or intent to harm the claimant by preventing that relationship from developing, (3) the absence of any privilege or justification on the part of the defendant, and (4) damage resulting from defendants' conduct.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > Business Torts > General Overview

HN10[] **Contracts Law, Breach**

The key to a tortious interference with business relations claim is demonstration by plaintiff of defendant's intent to destroy plaintiff's good will and reputation. Where a defendant's breach of contract with the plaintiff has only an incidental consequence of affecting plaintiff's business relationships with third persons, an action lies only in contract for defendant's breaches.

Opinion

MEMORANDUM

BUCKWALTER, J.

March 19, 1998

Plaintiffs, Mitel Corporation and its distributors in the United States, Mitel Inc. ("Mitel-USA") and in the Far East, Mitel Far-East Limited ("Mitel-Far East", collectively "Mitel") have instituted this breach of contract/copyright infringement action against defendants A&A Connections Inc. ("A&A Connections"), d/b/a Teleq and d/b/a Franz Telecom Investments ("FTI") and its president Andrew F. Silverman (collectively "A&A"). Mitel's claims spring from circumstances surrounding termination of a dealership agreement between Mitel-Far **[*2]** East and FTI (the "Complaint"). In response A&A filed four antitrust and four state law counterclaims ("A&A's Complaint"). Presently before the court are Mitel's motion to dismiss A&A's Complaint and non-party Franz Telecom Investments, Inc.'s motion to intervene. Based on the following, Mitel's motion to dismiss is granted, in part, and Franz Telecom Investments Inc.'s motion to intervene is denied.

I. Background [1]

Mitel manufactures internal telephone systems for organizations with multiple telephone extensions, commonly known as private business exchanges ("PBX systems"). Including Mitel, there are approximately four major manufacturers of PBX systems in the United States. Unsurprisingly, Mitel distributes its PBX systems in the United States through Mitel-USA and in the Far East through Mitel-Far East. Mitel-USA operates through independently **[*3]** owned authorized dealers ("Authorized Dealers") who are each given designated territories.

[1] In response to Mitel's motion to dismiss A&A filed an amended complaint. Unless otherwise indicated, the above facts are derived from this amended version.

New Mitel PBX systems are sold by Authorized Dealers exclusively. Installation and repair service, PBX subsystems, add-ons, upgrades and replacement parts are sold on a non-exclusive basis and therefore, Authorized Dealers compete with independent service organizations in this regard.

A&A Connections is an independent broker/service organization of Mitel PBX products. A&A Connections purchases new and used Mitel products from Authorized Dealers, dealers in foreign countries, unauthorized dealers and end users and resells this equipment to end users. Additionally, A&A Connections services Mitel PBX systems. A&A Connections applied to become a Mitel Authorized Dealer but was turned down.

To expand into the new PBX systems market A&A Connections entered into a joint venture with a Vietnamese Company, Cua Viet ("Cua Viet") to market PBX systems in Vietnam. A&A Connections also entered into an agreement with PCS International ("PCS") under which PCS agreed to provide marketing support for the sale of PBX equipment in Vietnam. FTI was formed to acquire new PBX systems on behalf of A&A Connections. **[*4]** In January 1996 FTI entered into a dealership agreement ("Dealership Agreement") with Mitel-Far East for the primary purpose of obtaining new PBX systems to supply the joint venture in Vietnam. Section 2.1 of the Dealership Agreement stated "It is a fundamental condition of this Agreement that FTI will not sell any Product [new Mitel PBX systems] to customers outside of Vietnam." In early 1997 Mitel learned that, contrary to the limits of section 2.1, FTI was importing PBX systems purchased under the Dealership Agreement into the United States. Consequently, Mitel terminated the Dealership Agreement and commenced this litigation on June 23, 1997. (Complaint PP 30-41).

After termination of the Dealership Agreement, in June 1997, Mitel-Far East and PCS entered into a distribution agreement ("Distribution Agreement") under which PCS would distribute Mitel systems in Vietnam. [2] Section 2.7 of the Distribution Agreement contained the following restriction:

> "The Distributor [PCS] shall not sell the Products [PBX systems] to any customer which is outside the Territory [Vietnam] or within the Territory if to the knowledge of the Distributor that customer intends to resell **[*5]** the Products in any country which is outside of the Territory. . . should any Products be exported from Vietnam with the knowledge of Distributor (knowledge being defined as "knew or should have reasonably known under the circumstances") then the Distributor agrees to pay Mitel liquidated damages in the amount equal to 33% of the purchase price plus investigative costs an attorneys fees not to exceed US $ 25,000 for each violation. . . ."

Pursuant to the Distribution Agreement, PCS ordered four Mitel PBX systems and related equipment and paid to Mitel-Far East $ 149.063.50. A&A alleges that PCS's order was actually made on behalf of non-party Franz Telecom Investments, Inc. ("FTI, Inc.") and that FTI, Inc. prepaid PCS for the equipment. Before filling the order Mitel discovered PCS's plans to deliver the equipment to FTI, Inc. **[*6]** for resale in the United States. Based on this information, Mitel-Far East terminated the Distribution Agreement, refused to deliver the ordered equipment and retained $ 82,874.25 of PCS's payment. Nothing in the record or pleadings indicate that A&A Connections was affected by the Distribution Agreement.

II. Standard of Review

HN1[] A claim may be dismissed under *Rule 12(b)(6)* only if it appears beyond a reasonable doubt that the plaintiff could prove no set of facts in support of the claim that would entitle him to relief. *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. In considering such a motion, a court must accept all of the facts alleged in the complaint in the light most favorable to the plaintiff. *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*. Additionally, when reviewing antitrust claims the dismissal standard is elevated because motive and intent play leading roles, thus the "proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot." *Poller v. Columbia Broadcasting System Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*. Nonetheless, this court **[*7]** has previously acknowledged that it will not shy away from

---

[2] It is unclear whether at the time of execution of the Distribution Agreement Mitel was aware of any relationship among A&A Connections, PCS, FTI and Franz Telecom Investments, Inc.

dismissing antitrust claims that are vague and conclusory in nature. *See* *Rototherm v. Penn Linen & Uniform Service, Inc., 1997 U.S. Dist. LEXIS 10057, 1997 WL 419627* (E.D.Pa. Jul. 3, 1997)(citations omitted).

III. A&A's Antitrust Counterclaims

Counts I though IV are permissive counterclaims containing general allegations that Mitel's exclusive distribution practices in the United States violate federal antitrust laws. Mitel argues that all four antitrust claims must be dismissed as A&A has failed to adequately plead antitrust injury. Specifically, Mitel claims that A&A has alleged only individual harm, which is not protected under relevant ***antitrust law***.

It is clear that under those portions of ***HN2***[] the Sherman and Clayton Acts presently at issue, individual harm is irrelevant -- consumer protection is the primary concern. In antitrust cases, a plaintiff must prove "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Alberta Gas Chemicals Ltd. v. E.I. Du Pont De Nemours and Co., 826 F.2d 1235, 1240 (3d Cir. 1987)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat,* ***[*8]*** *Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))*. In other words, because "***antitrust law*** aims to protect competition, not competitors, [a court] must analyze the antitrust injury question from the viewpoint of the consumer." *Alberta Gas, 826 F.2d 1235 at 1241*. "An antitrust plaintiff must prove that challenged conduct affected the prices, quantity or quality of goods or services," not just his own welfare. *Tunis Bros. Co., Inc. v. Ford Motor Co., 952 F.2d 715, 728 (3d Cir. 1991)*.

Mitel is correct, in part. A&A's allegations and argument focus on harm suffered by independent PBX brokers, specifically A&A Connections. However, P 157 of A&A's Complaint, alone, contains the requisite allegation of harm to consumers. Paragraph 157 alleges that as a result of Mitel's actions "the ultimate end-users of Mitel PBX systems have been injured by not being able to buy the replacement and/or add-on parts from independent brokers [e.g. A&A Connections] and by not being able to choose a service and/or maintenance provider other than Mitel authorized distributors." Accepting as true A&A's allegations and all reasonable inferences therefrom I conclude that these allegations **[*9]** are sufficient to survive a motion to dismiss because the exclusion alleged constitutes antitrust injury. *See* *Schuylkill Energy Resources, Inc. v. Pennsylvania Power & Light Company, 113 F.3d 405, 418 (3d Cir. 1997)*; *Brader v. Allegheny General Hospital, 64 F.3d 869, 876 (3d Cir. 1995)*(The existence of antitrust injury is not typically resolved through motions to dismiss). Thus, I turn to Mitel's specific arguments.

A. Count I: Unreasonable Restraint of Trade

A&A alleges that Mitel's practice of selling PBX equipment only through Authorized Dealers has unreasonably restrained trade in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. Specifically, that Mitel and its Authorized Dealers have conspired together to elevate unreasonably prices for replacement parts, add-on, and up-grades and thus exclude competitors such as A&A Connections from the Mitel PBX parts market within the United States.

HN3[] To establish a *§ 1* violation for unreasonable restraint of trade, a plaintiff must prove (1) concerted action by the defendants; (2) that produced anticompetitive effects within the relevant product and geographic markets; (3) that the concerted action was illegal; and (4) **[*10]** that the plaintiff was injured as a proximate result of the concerted action. *See* *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 442 (3d Cir. 1996)*(citations omitted).

Mitel counters that A&A's claim must be dismissed because the goal of their practice of using only to Authorized Dealers is "procompetitive." The company argues that the existence of a network of Mitel dealers who provide valuable service to end user increases goodwill among end users and makes Mitel more competitive. Mitel explains that its Authorized Dealers "employ skilled and fully trained technicians who are fully qualified to properly install and maintain Mitel brand PBX systems, and who adhere to strict industry and customer satisfaction standards."

Mitel is correct; ***HN4***[] courts have recognized the procompetitive effects of limiting distribution of a product to company authorized dealers. *See e.g.* *Continental T.V. Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97*

S. Ct. 2549 (1977); Business Electronics v. Sharp Electronics, 485 U.S. 717, 721, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988) Yet, at this early stage, without the benefit of discovery, Mitel's mere allegations that its **[*11]** relationship with its Authorized Dealers is "procompetitive" is insufficient to refute A&A's claim of antitrust injury. A determination as to the nature of the effect Authorized Dealers have on the relevant market, namely whether they do, as Mitel suggests, actually increase customer satisfaction can only be made through discovery. Therefore, Mitel's motion, as it pertains to Count I, is denied.

B. Counts II and III: Monopolization or Attempted Monopolization

A&A claims that it competes with Mitel Authorized Dealers in the United States market for replacement Mitel PBX system parts, upgrades, repairs and add-ons and that Mitel has unlawfully monopolized (Count II) or attempted to unlawfully monopolize (Count III) such market.

HN5[] The offense of monopoly under *§ 2* of the Sherman Act, *15 U.S.C. § 2*, has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of superior product, business acumen, or historical accident." *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 481, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*(citations **[*12]** omitted). To state a claim for attempted monopolization, a plaintiff must allege that "(1) Defendant had engaged in predatory conduct or anticompetitive conduct with (2) specific intent to monopolize and with (3) a dangerous probability of achieving monopoly power." *Ideal Dairy Farms Inc., v. John Labatt Ltd., 90 F.3d 737, 750 (3d Cir. 1996)*.

Mitel challenges the adequacy of A&A's relevant market description. Mitel claims that A&A's proposed market is too narrow because it is limited to only a single brand; replacement parts, upgrades, repair service and add-ons for Mitel PBX systems in the United States.

HN6[] The outer bounds of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. *Brown Shoe Co. v. U.S., 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. In certain limited situations a product market may consist of only a single brand. For example, in *Eastman Kodak*, the Supreme Court held that the market for repair parts and services for Kodak photocopiers was a valid relevant market because repair parts and services for Kodak machines were not interchangeable **[*13]** with the service and parts used to fix copiers. *Kodak, 504 U.S. at 482*. Thus, in circumstances where the product or service is unique and therefore not interchangeable with other products or services, the single brand can constitute the relevant market. *Id.*; *See also* *Queen City Pizza Inc., 124 F.3d at 439*. A&A alleges, and Mitel does not refute, that add-ons, upgrades, replacement parts for Mitel's PBX systems must be manufactured by Mitel. Other PBX parts are not compatible with Mitel's PBX systems. Therefore, for purposes of surviving Mitel's motion to dismiss A&A's market definition is sufficient and its claims of monopolization and attempted monopolization are adequately pled.

C. Count IV: Tying

A&A claims that as a precondition to purchase, consumers of Mitel PBX systems and parts are required to use only the installation, maintenance and repair services of Authorized Dealers. A&A states "Mitel and Mitel-USA have accordingly tied the sale of Mitel PBX systems, subsystems and component parts (the tieing products) to the use of its Authorized Dealers' installation and maintenance services (the tied products)."

HN7[] Whether brought under *§ 1* of the Sherman Act or **[*14]** § 3 of the Clayton Act, the essential elements of a tying claim are the same. *See* *Borschow Hospital & Medical v. Cesar Castillo, 96 F.3d 10, 17 n.5 (1st Cir. 1996)*; *Grappone, Inc. v. Subaru of New England, Inc., 858 F.2d 792, 794 (1988)*. A "tying arrangement" is unlawful where (1) the scheme in question involves two distinct items and provides that one (the tying product) may not be obtained unless the other (the tied product) is also purchased. *Times-Picayune Publishing Co. v. U.S., 345 U.S. 594, 613-14, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*; (2) the tying product possesses sufficient economic power to appreciably restrain competition in the tied product market. *Northern Pacific R. Co. v. United States, 356 U.S. 1, 6, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1957)*; and (3) a "not insubstantial" amount of commerce, must be affected by the arrangement. *International Salt Co. v. United States, 332 U.S. 392, 92 L. Ed. 20, 68 S. Ct. 12 (1947)*. Finally, like many circuits, this circuit requires that the manufacturer of the tying product must garner some economic benefit from the tying arrangement. *Venzie Corp. v. United States Mineral Products Co. Inc., 521 F.2d 1309, 1317* ***[*15]*** *(3d Cir. 1975)*.

Mitel correctly notes that A&A fails to meet this final requirement. Absent from A&A's Complaint is any indication that Mitel, the manufacturer of the tying products, directly benefited from its dealers maintenance contracts. From the pleadings it is clear that only Mitel's Authorized Dealers received compensation for maintenance and repair services they performed. Therefore, because Mitel does not share in the profits derived from maintenance contracts that its dealers sell, it does not have a direct economic interest in the tied market as contemplated by *Venzie*. Consequently, A&A has failed to state a tying claim and Count IV of A&A's Complaint is dismissed.

IV. FTI, Inc.'s Motion to Intervene

Presently FTI, Inc. seeks to intervene for purposes of asserting four state law counterclaims against Mitel which have been included in A&A's Complaint. [3] A&A initially attempted to gain access into this lawsuit for FTI, Inc. by simply adding FTI, Inc.'s name to the caption of its state law counterclaims. Thus, because they were asserted, in part, by a non-party who had not intervened, Mitel sought dismissal of the claims. Consequently, FTI, Inc. filed this **[*16]** motion for intervention.

A&A's Complaint contains two state law claims brought on behalf of A&A and FTI, Inc., Count V: tortious interference with contractual relations and Count VI: tortious interference with business relations (the "tortious interference claims") and two state law claims brought by FTI, Inc. alone, Counts VII: breach of contract and Count VIII: conversion (the "contract claims").

Though FTI, Inc., references several rules of civil procedure (13, 19 and 20) it is evident that *Rule 24* governs its intervention request. FTI, Inc., admits as much as its motion is aptly captioned "Motion to Intervene Pursuant to *Federal Rule of Civil Procedure 24*." Furthermore, it is evident and FTI, Inc. makes no assertion otherwise, that section (b) of the rule, **[*17]** which allows for permissive intervention, is applicable.

HN8[] *Rule 24(b)* provides, in relevant part,

> "Upon timely application anyone may be permitted to intervene in an action . . . when applicant's claim or defense and the main action have a question of law or fact in common. . . . In exercising its discretion the court shall consider whether the intervention will unduly delay or prejudice the adjudication of the rights of the original parties."

Because FTI, Inc.'s counterclaims lack factual and legal commonality with the main action and/or would further confound an already complex matter, FTI, Inc.'s request for intervention is denied.

Despite vague and obscure wording the tortious interference claims revolve around termination of the Distribution and Dealership Agreements. The contract claims relate only to the Distribution Agreement. Circumstances surrounding termination of the Dealership Agreement are at issue in the main action. Therefore, insofar as the tortious interference claims relate to the Dealership Agreement common questions of law and fact exist. However, this commonality is irrelevant to FTI, Inc.'s present motion as FTI, Inc. has no connection with the **[*18]** Dealership Agreement. FTI, Inc. was not a party to the agreement (parties to the agreement were only FTI and Mitel-Far East) and has not alleged that it was in any way affected by enforcement or termination of the agreement.

All four counterclaims reference the Distribution Agreement, which has some facts in common with the main action (both involve contracts for PBX systems to which Mitel-Far East is a party). This commonality, however, is not

[3] FTI and FTI, Inc are two distinct entities. As evidenced by public corporate records attached to Mitel's opposition to intervention, FTI is a registered fictitious name under which A&A Connections does business and FTI, Inc. is a separate corporation.

dispositive. Intervention under 24(b) is discretionary and in this instance slight factual commonality does not outweigh the undue complication assertion of FTI, Inc.'s Distribution Agreement claims would create. *See* Vol 6 Moore's Federal Practice, § 24.00 *et*. *seq*. (Matthew Bender 3d ed. 1997). This litigation already involves issues of antitrust, copyright and patent law. Therefore, to add to this heap litigation over an extraneous contract, which has no bearing on disposition of the main action and does not even involve the main defendant, A&A Connections, would only further complicate an already complex matter. *See* Wright, Miller and Kane, 7C Federal Practice and Procedure 2d § 1913 (1986 & Supp. 1997)(In denying intervention, **[*19]** courts may take into account in exercising their discretion the complicating effect of additional issues). Accordingly, FTI, Inc.'s motion to intervene is denied. [4]

[*20] V. Remaining State Law Counterclaims

The only remaining claims to review are A&A's tortious interference counterclaims, Counts V and VI, both of which Mitel argues have been insufficiently pled. Neither party disputes that Pennsylvania law governs.

A. Count V: Tortious Interference with Contractual Relations

HN9[] To state a claim for tortious interference with contractual relations, a claimant must allege the following four elements: (1) a contractual relation; (2) a purpose or intent to harm the claimant by preventing that relationship from developing; (3) the absence of any privilege or justification on the part of the defendant; and (4) damage resulting from defendants' conduct. *Gundlach v. Reinstein, 924 F. Supp. 684, 693 (E.D.Pa. 1996)*.

A&A claims that Mitel intentionally interfered with its contractual relationship with nonpartys PCS and Cua Viet by terminating the Dealership Agreement with FTI without justification, thereby rendering FTI and A&A Connections unable to perform their contractual obligations to PCS and Cua Viet. A&A alleges that prior to the Dealership Agreement, Mitel gave FTI oral permission to resell systems parts in the United States **[*21]** and therefore Mitel's subsequent termination of Dealership Agreement was a "set-up" designed to disparage FTI's good name. As a

[4] Additionally, Mitel argues that as a general rule federal courts should deny permission to intervene when, as in FTI, Inc.'s case, the intervenor seeks only to assert counterclaims. Mitel's position is based on Judge Bechtle's decision in *Hubner v. Schoonmaker* which concluded that *Rule 24* was not designed to allow parties to interject affirmative interests into a lawsuit through counterclaims. *Hubner v. Schoonmaker, 1990 U.S. Dist. LEXIS 13035, 18 Fed. R. Serv. 3d (Callaghan) 741*; 1990 WL 149207 at *7 (E.D.Pa. 1990). In reaching this conclusion, Judge Bechtle relied on the following excerpt from chapter 24.17 of volume 3A of the second edition of Moore's Federal Practice:

> "The desire of the petitioner to present a counterclaim or to add new parties may be one reason for denying intervention if the right to intervene is only discretionary. The fact that the intervenor's 'position is essentially aggressive' . . . may be one reason for denying intervention. The addition of new issues and new parties may be considered contrary to orderly procedure. . . . The court may properly deny or limit permissive intervention where it feels that the interposition of counterclaims not related to the matters at issue between the plaintiff and defendant would unduly delay or complicate the determination of those issues."

Id. (citing 3A Moore's Federal Practice, § 24.17 (Matthew Bender 1987).

Though several other federal courts have also based denial of a motion to intervene on § 24.17, Moore's editors chose to omit the section from the third edition of Moore's Federal Practice which was published in 1997. *See Medd v. Westcott, 32 F.R.D. 25 (N.D.Iowa 1963)*; *Beard-Laney v. Pressley, 18 F.R.D. 162 (W.D.S.C. 1955)*; *Kauffman v. Kebert, 16 F.R.D. 225 (W.D.Pa. 1955)*; Vol.6 Moore's Federal Practice § 24.00 *et*. *seq*. (Matthew Bender 1997). Nevertheless, I find Judge Bechtle's decision sound and applicable.

Mitel also argues that litigation between Mitel Far-East and PCS over termination of the Distribution Agreement is currently underway in Hong Kong, therefore, it is more appropriate for FTI, Inc. to seek intervention in that suit. Without evidentiary support of such litigation I refrain from passing on what if any impact such litigation would have on FTI, Inc.'s current motion.

result A&A Connections and FTI have incurred damages. Based on the above I find that A&A has made the requisite bare bones allegations and therefore Count V survives Mitel's 12(b)(6) motion.

B. Count VI: Tortious Interference with Business Relations

HN10[] The key to a tortious interference with business relations claim is demonstration by plaintiff of defendant's intent to destroy plaintiff's good will and reputation. *Rototherm, 1997 U.S. Dist. LEXIS 10057*, *34, 1997 WL 419627 *14; *Chrysler Credit Corp. v. B.J.M., Jr., Inc., 834 F. Supp. 813, 843 (E.D.Pa. 1993)*. Where a defendant's breach of contract with the plaintiff has only an incidental consequence of affecting plaintiff's business relationships with third persons, an action lies only in contract for defendant's breaches. *Id*. (citations omitted).

A&A alleges, in relevant part, that Mitel "acted with the specific intent to harm [their] business reputation" and that "the willful and intentional actions of [Mitel] were calculated to cause damage. . . ." Taken together with its allegations regarding the "set up" of FTI, **[*22]** it is clear that A&A has pled the relevant elements of its claim and therefore Mitel's motion as it pertains to Count VI is denied.

An appropriate order follows.

ORDER

AND NOW, this 19th day of March 1998, upon consideration of:

(1) Plaintiffs' 12(b)(6) motion to dismiss (Docket No. 14); Defendants' response (Docket No. 17); Plaintiffs' reply (Docket No. 18); Defendants' sur-reply (Docket No. 19); Plaintiffs' response to Defendants' sur-reply (Docket No. 21) and Defendants' supplemental reply to Plaintiffs' response (Docket No. 23); and

(2) Non-party, Franz Telecom Investments, Inc.'s motion to intervene (Docket No. 20); Plaintiffs' response (Docket No. 22); Franz Telecom Investments, Inc.'s reply (Docket No. 24); it is hereby ordered that Plaintiffs' motion to dismiss is **GRANTED,** in part, and **DENIED**, in part. Accordingly, counterclaims IV, VII and VIII of Defendants' Amended Complaint (Docket No. 16) are dismissed. It is further ordered that Franz Telecom Investments, Inc.'s motion to intervene is **DENIED**.

BY THE COURT:

RONALD L. BUCKWALTER, J.

Tampa Bay Storm v. Arena Football League

United States District Court for the Middle District of Florida, Tampa Division

March 19, 1998, Decided ; March 19, 1998, Filed

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN5[] Discovery, Methods of Discovery

Once the moving party meets its summary judgment burden, the nonmoving party must go beyond the pleadings and designate specific facts in affidavits, or in the depositions, answers to interrogatories, and admissions, if any, that show a genuine issue of material fact.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN6[] Entitlement as Matter of Law, Materiality of Facts

In summary judgment, issues of material fact are "genuine" only if a reasonable jury considering the evidence presented could find for the nonmoving party. Material facts are those that will affect the outcome of the trial under the governing substantive law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN7[] Entitlement as Matter of Law, Materiality of Facts

In determining whether a material fact exists for the purposes of summary judgment, the court must consider all evidence in the light most favorable to the nonmoving party. All reasonable doubts and all justifiable inferences are resolved in favor of the nonmoving party.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN8[] Entitlement as Matter of Law, Appropriateness

Although factual disputes preclude summary judgment, the mere possibility that a factual dispute may exist, without more, is not sufficient to overcome a convincing presentation by the party seeking summary judgment. When a party's response consists of nothing more than a repetition of his conclusional allegations, summary judgment is not only proper but required.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN13[] **Practices Governed by Per Se Rule, Boycotts**

Absent a claim for per se antitrust violations, such as price fixing, group boycotting, and customer allocation, a plaintiff must allege and prove three elements to establish an antitrust claim: (1) a specifically defined market, (2) that the defendant had the ability to affect the price or output, and (3) that the plaintiff's exclusion from the market did affect or was intended to affect the price or supply of goods in the market. A plaintiff must allege more than injury to itself; there must be an allegation of harm to competition in general.

Antitrust & Trade Law > Regulated Industries > Sports > Football

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

HN14[] **Sports, Football**

Professional sports are subject to antitrust laws.

Antitrust & Trade Law > Regulated Industries > Sports > Football

Governments > Legislation > Interpretation

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN15[] **Sports, Football**

The antitrust statute broadly defines "trade or commerce" to include any economic activity of any type whatsoever involving any commodity or service whatsoever. *Fla. Stat. ch. 542.17(4)*. The statute also provides that it was the intent of the legislature to "liberally" construe this act. *Fla. Stat. ch. 542.16*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN16[] **Regulated Practices, Trade Practices & Unfair Competition**

Antitrust laws are for the protection of competition, not primarily for the protection of individual competitors. In ***antitrust law***, it is not enough to allege that the plaintiff was injured; there must be an allegation of harm to competition in general. In stating and proving an antitrust claim, it is necessary for the plaintiff to allege the market-wide anti-competitive effects of a defendant's acts.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN18[] **Regulated Practices, Trade Practices & Unfair Competition**

The stated purpose of Florida's Deceptive and Unfair Trade Practices Act is to provide as its central aim the protection of the consuming public at large and legitimate business enterprises from those who engage in unfair methods of competition, or unconscionable, deceptive, or unfair acts or practices in the conduct of any trade or business. Fla. Stat. ch. 501.22(2).

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN19[] **Public Enforcement, State Civil Actions**

The "trade or commerce" provision defines a protected transaction as the advertising, soliciting, providing, offering, or distributing, whether by sale, rental or otherwise, of any good or service, or any property, whether tangible or intangible, or any other article, commodity, or thing of value, wherever situated. *Fla. Stat. ch. 501.203(8)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN20[] **Consumer Protection, Deceptive & Unfair Trade Practices**

The definition of "consumer" includes individuals as well as various business organizations, including "corporations." *Fla. Stat. ch. 501.203(7)*.

Contracts Law > ... > Types of Damages > Compensatory Damages > General Overview

Torts > ... > Compensatory Damages > Types of Losses > Economic Losses

Contracts Law > Breach > General Overview

HN21[] **Types of Damages, Compensatory Damages**

Under Florida law, contract principles are more appropriate than tort principles to resolve purely economic claims. The economic loss rule applies to prevent tort recovery when damages flow from a breach of contract unless the tort is independent of the breach of contract.

Contracts Law > Breach > Breach of Contract Actions > General Overview

Torts > ... > Compensatory Damages > Types of Losses > Economic Losses

Contracts Law > Breach > General Overview

HN22[] **Breach, Breach of Contract Actions**

Where the facts surrounding a breach of contract action are indistinguishable from an alleged tort, and where the alleged tort does not cause harm distinct from that caused by the breach of contract, a plaintiff is barred from bringing a separate tort action. Claims are barred by the economic loss rule if claims are factually "interwoven" with the breach of contract claim. Accordingly, it is only when the breach of contract is attended by some additional conduct which amounts to an independent tort that such breach can constitute negligence.

Opinion

ORDER ON DEFENDANT'S MOTION FOR SUMMARY JUDGMENT

This cause is before the Court on Defendant's Motion for Summary Judgment (Dkt. 83), Plaintiff's Memorandum in Opposition (Dkt. **[*2]** 85), and Defendant's Motion to Strike Portions of Plaintiff's Memorandum in Opposition and in the Alternative Motion for Leave to Amend (Dkt. 87).

Dkt. 87 Motion for Leave to Amend

Defendant, Arena Football League, Inc. ("AFL"), has requested leave to amend its Answer, (Dkt. 11), to include the affirmative defenses of res judicata and collateral estoppel. These defenses were not pled in Defendant's original Answer. Plaintiff, Tampa Bay Storm, Inc. ("TBS"), contends Defendant waived these defenses by not pleading them in Defendant's answer and that Defendant's request for leave to amend is untimely.

Defendant also seeks to apply the economic loss rule to Count IV of Plaintiff's complaint. Because the economic loss rule is not a listed defense under *Federal Rule of Civil Procedure 8(c)*, and because Plaintiff has adequately responded to the merits of the economic loss rule's application to Count IV, the Court will address it on its merits in the Count IV discussion. As for res judicata and collateral estoppel, the Court dispenses with them now as the Court agrees with Plaintiff that Defendant's motion for leave to amend is untimely.

HN1[] *Federal Rule of Civil Procedure 8(c)* plainly **[*3]** states that "a party shall set forth affirmatively…res judicata…and any other matter constituting an avoidance or affirmative defense." Collateral estoppel has been treated as such "an avoidance or affirmative defense" within the meaning of the federal rules. *North Ga. Elec. Membership Corp. v. City of Calhoun, 989 F.2d 429, 431 (11th Cir. 1993)*. Courts have routinely held that "affirmative defenses must be set forth in a responsive pleading or be deemed waived." *American Nat'l Bank of Jacksonville v. FDIC, 710 F.2d 1528, 1537 (11th Cir. 1983)* (quoting *Funding Sys. Leasing Corp. v. Pugh, 530 F.2d 91, 95 (5th Cir. 1976)*.

Ostensibly relying on *Rule 15(a)*, Defendant asserts, however, that leave to amend "shall be freely given when justice so requires." (Dkt. 87, P 8.) Defendant also asserts that "these amendments will not interfere with the time requirements established by the Court." (Dkt. 87, P 7.) The Court disagrees, and finds that Defendant's request interferes with the deadline to amend pleadings as established by the Case Management and Scheduling Order (Dkt. 23).

HN2[] *Federal Rule of Civil Procedure 16(b)* requires district courts to limit the time to "amend the pleadings" **[*4]** in the scheduling order. *Fed. R. Civ. P. 16(b)(1)*. This action's Case Management and Scheduling Order provides that "motions to amend any pleadings . . . filed after this Case Management and Scheduling Order[] are disfavored[] pursuant to Local Rules 3.05(C)(2)(E) and 3.05(C)(3)(D). (*Dkt. 23 P 8*.). These Local Rules echo the scheduling order's time limit to amend pleadings. Here, the Court issued the Case Management and Scheduling Order on December 6, 1996. Defendant filed its Motion for Leave to Amend(Dkt. 87) on December 29, 1997, more than a year after the Scheduling Order. Unlike *Rule 15*'s liberal amendment standard, the Court finds that *Rule 16* mandates that a court's scheduling order "shall not be modified except upon a showing of good cause . . . ." *Fed. R. Civ. P. 16(b)(6)*; *Payne v. Ryder Sys., Inc., 173 F.R.D. 537, 540 (M.D. Fla. 1997)* (holding the Eleventh Circuit has consistently held that absent a showing of good cause, "motions filed after a deadline imposed by a court should be denied as untimely"). It is therefore within this Court's discretion to enforce the time limit set forth in the Scheduling Order absent Defendant showing good cause.

The Eleventh Circuit **[*5]** has recently upheld a Florida district court's order denying a motion for leave to amend filed after the district court's scheduling order. *Sosa v. Airprint Sys., Inc., 133 F.3d 1417, 1418 (11th Cir. 1998)*. The *Sosa* Court found that ***HN3***[] where the party filed the motion to amend after the scheduling order's deadline, the party "must first demonstrate good cause under *Rule 16(b)* before [the court] will consider whether amendment is proper under *Rule 15(a)*." *Id. at 1419*. If federal courts considered only *Rule 15(a)*, the courts would "render scheduling orders meaningless and effectively would read *Rule 16(b)* and its good cause requirement out of the Federal Rules of Civil Procedure." *Id.* The good cause standard requires the party seeking extension to show that the "schedule cannot 'be met despite the diligence of the party seeking the extension.'" *Id.* (quoting *Fed. R. Civ. P. 16* advisory committee's note). When a party seeking the extension is not diligent, the good cause inquiry ends. *Sosa, 133 F.3d at 1418* (citing *Johnson v. Mammoth Recreations, Inc., 975 F.2d 604, 609 (9th Cir. 1992)*.

The Court has already noted that Defendant filed its motion for leave to **[*6]** amend well past the scheduling order's deadline. In addition, even though Defendant's motion does not address *Rule 16*'s "good cause" standard, the Court finds that, based on Defendant's own Motion (Dkt. 87), Defendant cannot show good cause for Defendant's untimely amendment. Specifically, Defendant asserts that res judicata and collateral estoppel were obvious defenses in response to Plaintiff's complaint, which referred to a prior bankruptcy proceeding. (Dkt. 87, P 3.) Defendant's Motion also states "the issues in this lawsuit are identical to those raised by the Plaintiff in the bankruptcy court proceeding." (Dkt. 87, P 4.) Defendant goes so far as to cite documents created well before this litigation which Defendant believed showed the issues in both case were identical.

Although Defendant couched its motion in terms of the notice Plaintiff had at the time the complaint was filed with respect to potential res judicata and collateral estoppel defenses, it is also clear that Defendant enjoyed the same notice but failed to plead these defenses in its answer or a timely amendment. The Court concludes, therefore, that Defendant could not demonstrate "good cause" because if Defendant **[*7]** had exercised reasonable diligence, Defendant could have easily amended its answer to include the defenses prior to the scheduling order's deadline. Accordingly, the Court **denies** Defendant's Motion to Strike Portions of Plaintiff's Complaint and **denies** as untimely Defendant's Alternative Motion for Leave to Amend. The Court now turns to consideration of Defendant's remaining summary judgment motion.

STANDARD OF REVIEW

HN4[] Summary judgment is proper if the "pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue of material fact and that the moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. The moving party must state the basis for its motion and must identify the portions of the record that show the absence of a genuine issue of material fact. The burden can be discharged by "showing . . . that there is an absence of evidence to support the nonmoving party's case." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*.

HN5[] Once the moving party meets its burden, the nonmoving party must go beyond the pleadings **[*8]** and designate specific facts in affidavits, or in the depositions, answers to interrogatories, and admissions, if any, that show a genuine issue of material fact. *Id. at 324*.

HN6[] Issues of material fact are "'genuine' only if a reasonable jury considering the evidence presented could find for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. Material facts are those that will affect the outcome of the trial under the governing substantive law. *Id. at 248*.

HN7[] In determining whether a material fact exists, the court must consider all evidence in the light most favorable to the nonmoving party. *Sweat v. Miller Brewing Co., 708 F.2d 655 (11th Cir. 1983)*. All reasonable doubts and all justifiable inferences are resolved in favor of the nonmoving party. *Fitzpatrick v. City of Atlanta, 2 F.3d 1112, 1115 (11th Cir. 1993)*.

HN8[] Although factual disputes preclude summary judgment, the "mere possibility that a factual dispute may exist, without more, is not sufficient to overcome a convincing presentation by the party seeking summary judgment." *Quinn v. Syracuse Model Neighborhood Corp., 613 F.2d 438, 445 (2d Cir.* ***[*9]*** *1980)*. When a party's response consists of nothing "more than a repetition of his conclusional allegations," summary judgment is not only proper but required. *Morris v. Ross, 663 F.2d 1032, 1034 (11th Cir. 1981)*.

FACTS

Plaintiff, Tampa Bay Storm, Inc. ("TBS"), a Florida corporation, brought this action against Defendant, Arena Football League, Inc. ("AFL"), a Delaware corporation, alleging: Count I, Breach of Contract; Count II, violation of Florida's Antitrust Act; Count III, violation of Florida's Deceptive and Unfair Trade Practices Act; and Count IV, Tortious Diminution in Value. The Court finds that the parties are in general agreement with respect to the following facts relevant to this motion for summary judgment.

In or about 1991, Denver Dynamite, Ltd. ("Dynamite"), the owner of the Denver Dynamite Arena Football team, indicated to the AFL that it had insufficient capital to complete the season. In response to the Dynamite's financial situation, various league members, including Plaintiff, Tampa Bay Storm, Inc. ("TBS"), established the Denver Dynamite Partnership ("DDP") to financially assist the Dynamite. Plaintiff owns a 57% interest in the DDP. In February **[*10]** 1992, an original involuntary Chapter 7 bankruptcy proceeding against the Dynamite was converted to a Chapter 11 proceeding. In September 1992, the Dynamite filed an adversary proceeding against the DDP to determine ownership of the team assets and to avoid a lien.

On or about February 22, 1994, the adversary proceeding settled, and a voluntary stipulation was formed among the Dynamite, the DDP, and the AFL. On May 18, 1994, the bankruptcy court approved this settlement stipulation. On May 15, 1995, pursuant to the stipulation, the Dynamite found a purchaser and moved to sell the Denver license. On July 10, 1995, the bankruptcy court entered a judgment approving the sale without objection by any party. On September 15, 1995, the bankruptcy court granted Dynamite's motion for a formal order approving the sale. This order confirmed that the sale was to be completed pursuant to the terms in Dynamite's motion, which incorporated the terms of the February 22, 1994 stipulation. On or about August 7, 1995, the AFL board of directors approved the sale of the Denver assets to Hollis Godfrey ("Godfrey") for the price of $ 230,000.

On or about October 12, 1995, the sale was completed and the **[*11]** property left bankruptcy and was transferred to Godfrey. Objections to the sale were required to be filed no later than January 17, 1996. In December 1995, Plaintiff sued Defendant in state court. The case was subsequently removed from the Sixth Judicial Circuit, Pinellas County, Florida, to this Court. On March 4, 1996, the bankruptcy court's order confirmed the Dynamite's plan of reorganization.

DISCUSSION

Count I: Breach of Contract and Treble Damages

In Count I, Plaintiff alleges breach of contract and has demanded treble damages pursuant to Florida Statute § 772. Defendant has moved for summary judgment on the issue of treble damages, arguing Plaintiff alleges no criminal activity pursuant to § 772 to support a demand for treble damages. Plaintiff's Memorandum in Opposition, (Dkt. 85), does not rebut Defendant's assertion.

HN9[] Florida Statute § 772 provides that it is unlawful for any person:

> (1) Who has with criminal intent received any proceeds derived, directly or indirectly, from a pattern of criminal activity or through the collection of an unlawful debt to use or invest, whether directly or indirectly, any part of such proceeds, or the **[*12]** proceeds derived from the investment or use thereof, in the acquisition of any title to, or any right, interest, or equity in, real property or in the establishment or operation of any enterprise.
> (2) Through a pattern of criminal activity or through the collection of an unlawful debt, to acquire or maintain, directly or indirectly, any interest in or control of any enterprise or real property.
> (3) Employed by, or associated with, any enterprise to conduct or participate, directly or indirectly, in such enterprise through a pattern of criminal activity or the collection of an unlawful debt.
> (4) To conspire or endeavor to violate any of the provisions of subsection (1), subsection (2), or subsection (3).

Fla. Stat. Ann. § 772.103 (West 1997).

HN10[] To have a cause of action for treble damages, Plaintiff must prove by clear and convincing evidence that Defendant violated a provision of *§ 772.103*. *Id.* § 772.104. Defendant asserts that, absent any criminal conduct pursuant to the statute, Plaintiff's sole breach of contract allegation, without more, is insufficient to substantiate a claim for treble damages. Having brought the absence of any criminal allegations to the Court's **[*13]** attention, the Court finds Defendant has discharged its burden on summary judgment by showing that there is "an absence of evidence to support the nonmoving party's case." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. The burden now shifts to Plaintiff to go beyond the pleadings and designate specific facts in affidavits, or in the depositions, answers to interrogatories, and admissions, if any, that show a genuine issue of material fact. *Id. at 324*. Since Plaintiff's Memorandum in Opposition, (Dkt. 85), fails to bring forth any facts to show there is a genuine issue for trial, the Court must grant Defendant's Motion for Summary Judgment. Accordingly, Defendant's Motion for Summary Judgment as to Count I treble damages is granted.

Count II: Violation of Florida's Antitrust Act

Plaintiff has alleged violations of Florida Statute § 542 ("Florida's Antitrust Act"). The relevant provisions provide that ***HN11***[] "every contract, combination, or conspiracy in restraint of trade or commerce in this state is unlawful. *Fla. Stat. Ann. § 542.18*. Plaintiff also alleges ***HN12***[] § 452.19, which states that "it is unlawful for any person to monopolize, **[*14]** attempt to monopolize, or combine to conspire with any other person or persons to monopolize any part of trade or commerce in this state."

HN13[] Absent a claim for per se antitrust violations, such as price fixing, group boycotting, and customer allocation, Florida courts have required plaintiffs to allege and prove three elements to establish an antitrust claim: 1) a specifically defined market, 2) that defendant had the ability to affect the price or output, and 3) that the plaintiff's exclusion from the market did affect or was intended to affect the price or supply of goods in the market. *Greenberg v. Mount Sinai Med. Ctr., 629 So. 2d 252, 257 (Fla. 3d DCA 1993)*; *see also* *Parts Depot Co. v. Florida Auto Supply, Inc., 669 So. 2d 321, 326 (Fla. 3d DCA 1996)*. A plaintiff must allege more than injury to itself; "there must be an allegation of harm to competition in general." *Greenberg, 629 So. 2d at 257*.

1. Specifically Defined Market

Defendant argues there is no specifically defined market at issue. (Dkt. 83 at 13-14.) The Florida Supreme Court has recognized a number of United States Supreme Court decisions which have addressed the issue of whether various professional **[*15]** sports are exempt from antitrust laws. *Butterworth v. National League of Prof'l Baseball Clubs, 644 So. 2d 1021, 1023 (Fla. 1994)* (citing *Radovich v. National Football League, 352 U.S. 445, 451, 1 L. Ed. 2d 456, 77 S. Ct. 390 (1957)* (holding exemption from antitrust laws does not apply to football); *United States v.*

International Boxing Club, 348 U.S. 236, 99 L. Ed. 290, 75 S. Ct. 259 (1955) (stating boxing is not exempt from antitrust laws); *Haywood v. National Basketball Ass'n, 401 U.S. 1204, 1205, 28 L. Ed. 2d 206, 91 S. Ct. 672 (1971)* (finding basketball not exempt from antitrust laws)). Since these cases establish that ***HN14***[] professional sports are subject to antitrust laws, this Court finds no reason why the Arena Football League should not receive similar treatment.

HN15[] The antitrust statute itself broadly defines "trade or commerce" to include "any economic activity of any type whatsoever involving any commodity or service whatsoever." *Fla. Stat. Ann. § 542.17(4)*. The statute also provides that it was the intent of the legislature to "liberally" construe this act. *Id. § 542.16*. In applying this liberal interpretation, the Court finds that the Arena Football League **[*16]** falls within the scope of the Florida Antitrust Act. Plaintiff has satisfied the first element.

2. Defendant Possessed the Ability to Affect the Price

Defendant argues that the AFL did not posses the ability to affect the purchase price for the Denver Dynamite team. (Dkt. 83 at 14.) Deposition testimony offered by Defendant states that the two entities that approved the purchase price were "The Denver Dynamite, Limited" and "the Bankruptcy Court." (Graham Dep. at 43, lines 2-6.) Additional deposition testimony provided that "the [AFL] could not approve the purchase price because the league didn't own the membership." (Godfrey Dep. at 71, lines 20-25.) When asked again why the AFL approved the sale of the Denver Dynamite for a price of $ 285,000, Godfrey answered:

> I'm going to make it real abundantly apparent to you. The league did not approve the purchase price. The league had no control over what I paid for it. Only the federal bankruptcy court did. The league had--if I'd have wanted to give one dollar for it and the bankruptcy court would have approved it, the league could do nothing about it. They didn't control it. That's real simple. So you're asking me a **[*17]** question that the league had nothing to do with.

(*Id. 72*, lines 11-24.)

Based on this deposition testimony, Defendant asserts that there is no genuine issue of material fact relating to Defendant's ability to affect the purchase price. In its response, Plaintiff merely restates conclusory allegations that Defendant's actions affected the purchase price. (Dkt. 85 at 18.) Specifically, Plaintiff states that "this wrongful conduct by the league, which affected the price and availability of AFL memberships, is precisely the type of claim anticipated by the Florida Antitrust Act." (*Id. at 18-19*.) The Court notes, however, that Plaintiff has failed to go beyond the pleadings to bring forth facts in affidavits, depositions, answers to interrogatories, and admissions, if any, to show a genuine issue of material fact. Having not done so, the Court finds that Plaintiff has failed to meet its burden with respect to the second element.

3. Plaintiff's exclusion from the Market Affected or was Intended to Affect the Market

Defendant alleges that Plaintiff was not excluded from the market because Plaintiff's counsel was present when the bankruptcy court approved the sale. **[*18]** (Dkt. 83 at 14; Graham Dep. at 36-38.) In addition, Defendant asserts that the market was not affected: the price for an AFL team before the sale at issue ranged from $ 500,000 to $ 750,000. Prices for an AFL team during the sale at issue, and after, continued to increase with sale prices ranging from $ 950,000 to $ 1,000,000. (Dkt. 83 at 15.)

Plaintiff's response points to no specific facts in the record that indicate Defendant's actions affected the market. (Dkt. 85). Plaintiff's only response to this issue states that "the harm to the arena football market is established by the fact that the Plaintiff and various team purchasers, were financially damaged by the acts of the AFL when it approved the Denver sale." (*Id., at 18*.)

It is well settled that ***HN16***[] "antitrust laws are for the protection of competition, not primarily for the protection of individual competitors." *St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc., 457 So. 2d 1028, 1047 (Fla. 3d DCA 1984)*. In ***antitrust law***, "it is not enough to allege that plaintiffs were injured; there must be an allegation of harm to competition in general." *Greenberg, 629 So. 2d at 257* (citing *Robert's Waikiki U-Drive, Inc.* ***[*19]*** *v. Budget Rent-A-Car Sys., Inc., 732 F.2d 1403, 1408 (9th Cir. 1984)*; *Manufacturing Research Corp. v. Greenlee Tool Co., 693 F.2d 1037, 1043 (11th Cir. 1982))*. In stating and proving an antitrust claim, it is necessary for the plaintiff to "allege the market-wide anti-competitive effects of defendant's acts." *Havoco of Am., Ltd. v. Shell Oil Co., 626 F.2d 549, 554 (7th Cir. 1980)*.

In this case, the Court finds Plaintiff's bald allegations of injury to its own franchise insufficient to constitute injury to the AFL market in general. In addition, Plaintiff's broad, vague, and conclusory allegation that various other "team purchasers" were financially damaged by Defendant's acts suffers from a similar lack of specificity and factual support. (Dkt. 85 at 18.) Because Plaintiff failed to go beyond the pleadings to bring forth specific facts in the record to rebut Defendant's assertions, the Court cannot find that a material question of fact exists to warrant an ultimate determination by the trier of fact. Plaintiff has failed to satisfy the third element.

The Court concludes that Plaintiff has not alleged sufficient facts to state a Florida antitrust claim. By failing to set **[*20]** forth specific facts to create a genuine issue of material fact with respect to the second and third elements, the Court concludes that Defendant's Motion for Summary Judgment, (Dkt. 83), is proper. Accordingly, Defendant's Motion for Summary Judgment as to Count II is **granted**.

Count III: Unfair and Deceptive Act and Practice

Plaintiff has alleged violation of Florida Statute § 501, Florida's Deceptive and Unfair Trade Practices Act ("FDUTPA"). This statute, in relevant part, provides: ***HN17***[] "unfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful." *Fla. Stat. Ann. § 501.204(1)*.

Defendant contends that because Plaintiff has been involved in the AFL, in various capacities, for a number of years, Plaintiff is not a "consumer" and the transaction did not qualify as a "consumer transaction" within the meaning of the FDUTPA. The Court notes, however, that the cases Defendant cites as authority were decided before the 1993 amendments to the FDUTPA.

In 1993, the Florida legislature amended ***HN18***[] the stated purpose of the FDUTPA to provide as its central aim **[*21]** the protection of "the consuming public at large and legitimate business enterprises from those who engage in unfair methods of competition, or unconscionable, deceptive, or unfair acts or practices in the conduct of any trade or business." Fla. Stat. Ann. § 501.22(2). Prior to 1993, the same provision read, "[To protect consumers from suppliers who commit deceptive and unfair trade practices." *Id.* § 501.202(2) 1993 amendment history. Since 1993, it appears that the Florida legislature contemplated protecting "legitimate business enterprises" in addition to the consuming general public from deceptive or unfair trade practices. *Id.* § 501.202(3), codified as amended; *see also* *Suris v. Gilmore Liquidating, Inc., 651 So. 2d 1282 (Fla. 3d DCA 1995)* (citing the FDUTPA's new language including "business enterprises").

This shift in purpose is reflected in other provisions that were also amended in 1993. Specifically, the Definitions provision omitted the "consumer transaction" definition found prior to 1993, in favor of defining unlawful transactions as those concerning "trade or commerce." *Id.* *§ 501.203*. ***HN19***[] The "trade or commerce" provision defines a protected transaction **[*22]** as "the advertising, soliciting, providing, offering, or distributing, whether by sale, rental or otherwise, of any good or service, or any property, whether tangible or intangible, or any other article, commodity, or thing of value, wherever situated." *Id.*, *§ 501.203(8)*; *see also* *Delgado v. J.W. Courtesy Pontiac GMC-Truck, Inc., 693 So. 2d 602, 609 (Fla. 2d DCA 1997)*. ***HN20***[] The definition of "consumer" in 1993 continued to include individuals as well as various business organizations, including "corporations." *Id.* *§ 501.203(7)*.

The facts here suggest that Plaintiff, as a Corporation incorporated under the laws of Florida, satisfies the FDUTPA definition of "consumer." Moreover, viewing the facts in the light most favorable to Plaintiff, the complained of activity falls within the ambit of possible protected activity under the broad "trade or commerce" definition. Specifically, Plaintiff's Complaint alleges Defendant "withheld any best efforts to comply with the criteria under the Contract by opting to deal with GODFREY as an insider because in doing so the Defendant was ensured to maximize its proceeds from the license sales to other buyers." (*Dkt. 3 P 43*.) Accordingly, the **[*23]** Court finds Plaintiff has stated a cause of action under the FDUTPA's 1993 amended definitions. Defendant's Motion to Dismiss Count III is **denied**.

Count IV: Tortious Diminution in Value

Plaintiff has alleged a common law tort of diminution in value. Defendant asserts that Plaintiff's claim is barred by the economic loss rule and, in the alternative, that Plaintiff cannot now complain of diminution in value since the stipulation at issue provided for a price below the actual sale price. (Dkt. 83 at 17.)

HN21[] Under Florida law, "contract principles are more appropriate than tort principles to resolve purely economic claims." *Airport Rent-A-Car v. Prevost Car, Inc., 660 So. 2d 628 (Fla. 1995)*; *Florida Power & Light Co. v. Westinghouse Elec. Corp., 510 So. 2d 899, 900 (Fla. 1987)*. Florida courts apply the economic loss rule to prevent tort recovery "when damages flow from a breach of contract unless the tort is independent of the breach of contract." *Brass v. NCR Corp., 826 F. Supp. 1427, 1428 (S.D. Fla. 1993)*.

HN22[] Where the facts surrounding a breach of contract action are indistinguishable from an alleged tort, and where the alleged tort does not cause harm distinct **[*24]** from that caused by the breach of contract, a plaintiff is barred from bringing a separate tort action. *Serina v. Albertson's, Inc., 744 F. Supp. 1113, 1117-18 (M.D. Fla. 1990)*. This Court has recently addressed this issue based on a Florida Supreme Court decision which held that claims are barred by the economic loss rule if claims are factually "interwoven" with the breach of contract claim. *Florida College of Osteopathic Med., Inc. v. Dean Witter Reynolds, Inc., 982 F. Supp. 862, 862 (M.D. Fla. 1997)* (citing *HTP, Ltd. v. Lineas Aereas Costarricenses, S.A., 685 So. 2d 1238 (Fla. 1996))*. Accordingly, it is only when the breach of contract is attended by some additional conduct which amounts to an independent tort that such breach can constitute negligence. *Serina, 744 F. Supp. at 1115*; *Electronic Sec. Sys. Corp. v. Southern Bell Tel. & Tel. Co., 482 So. 2d 518, 519 (Fla. 3d DCA 1986)*.

Here, Plaintiff asserts that the diminution in value allegation is independent from the stipulation agreement at issue and is therefore not precluded by the economic loss rule. (Dkt. 85 at 17-18.) After close examination, the Court finds the February 22, 1994 stipulation agreement between **[*25]** the Dynamite, the AFL, and the DDP, of which Plaintiff controlled fifty-seven percent of the stock, is void of any provision relating to Defendant's duty to procure workers compensation coverage. (Dkt. 83, Ex. A.) Accordingly, the Court finds that Plaintiff has alleged additional conduct sufficiently independent from the breach of contract claim to support an independent tort for diminution in value. Therefore, the Court **denies** Defendant's Motion for Summary Judgment based on the economic loss rule.

Defendant also asserts that because the stipulation agreement specifically addressed a potential sale of the Denver team for less than what the team actually sold for, Plaintiff cannot now allege diminution in value. (Dkt. 83 at 17.) In assessing this brief assertion in Defendant's Memorandum, the Court finds it difficult to grasp the complete gist of Defendant's argument without supporting case law or a more detailed analysis. The Court's best response would be to reiterate Plaintiff's assertions, which allege that the diminution in value allegation is distinct from the stipulation agreement and any sale price contemplated within that agreement. (Dkt. 83 at 18.). The contemplated **[*26]** sale prices, and distribution of proceeds from an eventual sale, were based on compliance with the stipulation agreement. (Dkt. 83, Ex. A PP 9-10.) Plaintiff here alleges conduct that goes beyond the stipulation agreement. This additional conduct is alleged as an independent tort, which Plaintiff claims had an independent effect on the actual sale price. Defendant's Motion for Summary Judgment as to Count IV is **denied**. Accordingly, it is

ORDERED that Defendant's Motion to Strike Portions of Plaintiff's Memorandum in Opposition and Alternative Motion for Leave to Amend, (Dkt. 87), is **denied**. Defendant's Motion for Summary Judgment(Dkt. 83), as to: 1) Count I, treble damages, is **granted**; 2) Count II, is **granted**; Counts III and IV, is **denied**.

DONE AND ORDERED in Chambers, in Tampa, Florida, on this 19th day March, 1998.

ELIZABETH A. KOVACHEVICH

United States District Judge

Nobelpharma AB v. Implant Innovations, Inc.

United States Court of Appeals for the Federal Circuit

Civil Procedure > Appeals > Standards of Review > General Overview

HN1[] **Standards of Review, De Novo Review**

The appellate court reviews a district court's grant of a motion for judgment as a matter of law under *Fed. R. Civ. P. 50(a)(1)* de novo by reapplying the standard applicable at the district court. Under that standard, the appellate court examines the record in the light most favorable to the non-movant and affords it the benefit of all reasonable inferences. Accordingly, the appellate court may affirm only if the judgment entered was the only one possible under the controlling law.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN2[] Trials, Judgment as Matter of Law

Fed. R. Civ. P. 50(a)(1) provides, in part, that if a party has been fully heard on an issue and there is no legally sufficient evidentiary basis for a reasonable jury to find for that party on that issue, the court may determine the issue against that party and may grant a motion for judgment as a matter of law against that party with respect to a claim or defense that cannot under the controlling law be maintained or defeated without a favorable finding on that issue. Thus, the verdict may be directed after the plaintiff's case is presented, when it is clear that completion of the trial is unnecessary in that the only sustainable verdict could be in favor of the defendant.

HN4[] Patent Invalidity, Fact & Law Issues

The patent statute requires that a patent specification shall set forth the best mode contemplated by the inventor of carrying out his invention. 35 U.S.C.S. § 112, P1. Determining whether a patent fails to comply with the best mode requirement and is thus invalid involves two factual inquiries. First, the fact-finder must determine whether at the time an applicant filed an application for patent, he or she had a best mode of practicing the invention, which is a subjective determination. Second, if the inventor had a best mode of practicing the invention, the fact-finder must determine whether the best mode was disclosed in sufficient detail to allow a skilled artisan to practice it without undue experimentation, which is an objective determination.

Patent Law > Infringement Actions > Summary Judgment > General Overview

HN5[] **Burdens of Proof, Allocation**

Normally, evidence presented by a patentee-plaintiff will not support a grant of a motion for judgment as a matter of law (JMOL) invalidating a patent. That is because the burden is on an accused infringer to show by clear and convincing evidence facts supporting the conclusion that the patent is invalid. Accordingly, grant of a motion for JMOL in favor of a party bearing the burden of proof may be granted only where (1) the movant has established its case by evidence that the jury would not be at liberty to disbelieve and (2) the only reasonable conclusion is in the movant's favor. However, in unusual cases, an admission made by a plaintiff's witness can be sufficient to support entry of a JMOL in favor of a defendant after the close of the plaintiff's case-in-chief, even where the defendant bears the burden of proof on the decided issue.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Patent Law > Infringement Actions > Summary Judgment > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN6[] **Standards of Review, De Novo Review**

The appellate court reviews a district court's denial of a post-trial motion for judgment as a matter of law under *Fed. R. Civ. P. 50(b)*, de novo by reapplying the standard applicable at the district court. Thus, the appellate court must determine whether there exists evidence of record upon which a jury might properly have returned a verdict in the non-movant's favor when the correct legal standard is applied. If there is not, the movant was entitled to have the question removed from the jury and decided as a matter of law.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN12[] **Jurisdiction, Exclusive Jurisdiction**

Whether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question of Federal Circuit law. That conclusion applies equally to all antitrust claims premised on the bringing of a patent infringement suit. *Therefore, Cygnus Therapeutic Sys. V. ALZA Corp., 92 F.3d 1153, 39 U.S.P.Q.2D (BNA) 1666 (Fed. Cir. 1996)*, Loctite corp. v. *Ultraseal Ltd., 781 F.2d 861, 228 U.S.P.Q. (BNA) 90 (Fed. Cir. 1985)*, and *Atari, Inc. v. JS&A Group, Inc., 747 F.2d 1422, 223 U.S.P.Q. (BNA) 1074 (Fed. Cir. 1984)*, are expressly overruled to the extent they hold otherwise. However, the Federal Circuit continues to apply the law of the appropriate regional circuit to issues involving other elements of ***antitrust law*** such as relevant market, market power, and damages, as those issues are not unique to patent law, which is subject to the Federal Circuit's exclusive jurisdiction.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

HN13[] Regulated Practices, Intellectual Property

A patentee who brings an infringement suit may be subject to antitrust liability for the anti-competitive effects of that suit if the alleged infringer, the antitrust plaintiff, proves (1) that the asserted patent was obtained through knowing and willful fraud or (2) that the infringement suit was a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > Infringement Actions > General Overview

HN14[] Inequitable Conduct, Anticompetitive Conduct

In order to strip a patentee of its exemption from the antitrust laws because of its attempting to enforce its patent monopoly, an antitrust plaintiff is first required to prove that the patentee obtained the patent by knowingly and willfully misrepresenting facts to the Patent and Trademark Office. The plaintiff in the patent infringement suit must also have been aware of the fraud when bringing suit.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

HN15[] Inequitable Conduct, Anticompetitive Conduct

Inequitable conduct is a broader, more inclusive concept than the common law fraud needed to support an antitrust counterclaim.

Criminal Law & Procedure > Criminal Offenses > Lesser Included Offenses > Fraud

Governments > Courts > Common Law

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Knowledge

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Willfulness

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

HN16[] Lesser Included Offenses, Fraud

Inequitable conduct in fact is a lesser offense than common law fraud, and includes types of conduct less serious than knowing and willful fraud.

Criminal Law & Procedure > Criminal Offenses > Acts & Mental States > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

HN17[] **Criminal Offenses, Acts & Mental States**

The concept of fraud is most often used by the courts, in general, to refer to a type of conduct so reprehensible that it could alone form the basis of an actionable wrong; that is, the common law action for deceit. Because severe penalties are usually meted out to the party found guilty of such conduct, technical fraud is generally held not to exist unless the following indispensable elements are found to be present: (1) a representation of a material fact, (2) the falsity of that representation, (3) the intent to deceive or, at least, a state of mind so reckless as to the consequences that it is held to be the equivalent of intent (scienter), (4) a justifiable reliance upon the misrepresentation by the party deceived which induces him to act thereon, and (5) injury to the party deceived as a result of his reliance on the misrepresentation.

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

HN18[] **Inequitable Conduct, Burdens of Proof**

Regarding inequitable conduct, the courts look at the equities of the particular case and determines whether the conduct before them was still so reprehensible as to justify the court's refusing to enforce the rights of the party guilty of such conduct.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN19[] **Bad Faith, Fraud & Nonuse, Fraud**

Inequitable conduct is an equitable defense in a patent infringement action and serves as a shield, while a more serious finding of fraud potentially exposes a patentee to antitrust liability and thus serves as a sword.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Damages > Collateral Assessments > Attorney Fees

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

Patent Law > ... > Damages > Collateral Assessments > General Overview

HN20[] **Inequitable Conduct, Anticompetitive Conduct**

Antitrust liability can include treble damages. In contrast, the remedies for inequitable conduct, while serious enough, only include unenforceability of the affected patent or patents and possible attorney fees. *35 U.S.C.S. §§ 282*, *285*. Simply put, fraud is a more serious offense than inequitable conduct.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

HN21[] **Bad Faith, Fraud & Nonuse, Fraud**

If the evidence shows that the asserted patent was acquired by means of either a fraudulent misrepresentation or a fraudulent omission and that the party asserting the patent was aware of the fraud when bringing suit, such conduct can expose a patentee to liability under the antitrust laws. A fraudulent omission can be just as reprehensible as a fraudulent misrepresentation. In addition, in order to find liability, the necessary additional elements of a violation of the antitrust laws must be established.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

HN22[] **Inequitable Conduct, Anticompetitive Conduct**

To establish fraud, a misrepresentation or omission must evidence a clear intent to deceive the examiner and thereby cause the Patent and Trademark Office to grant an invalid patent. The fact misrepresented must be the efficient, inducing, and proximate cause, or the determining ground of the action taken in reliance thereon.

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

HN23[] **Inequitable Conduct, Burdens of Proof**

A conclusion of inequitable conduct may be based on evidence of a lesser misrepresentation or an omission, such as omission of a reference that would merely have been considered important to the patentability of a claim by a reasonable examiner.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN24[] **Inequitable Conduct, Anticompetitive Conduct**

A finding of fraud for purposes of establishing an antitrust counterclaim requires higher threshold showings of both intent and materiality than does a finding of inequitable conduct. Moreover, unlike a finding of inequitable conduct, a finding of fraud may not be based upon an equitable balancing of lesser degrees of materiality and intent. Rather, it must be based on independent and clear evidence of deceptive intent together with a clear showing of reliance, that is, that the patent would not have issued but for the misrepresentation or omission. Therefore, for an omission such as a failure to cite a piece of prior art to support a finding of fraud, the withholding of the reference must show evidence of fraudulent intent. A mere failure to cite a reference to the Patent and Trademark Office will not suffice.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN25[] **Bad Faith, Fraud & Nonuse, Fraud**

Irrespective of the patent applicant's conduct before the Patent and Trademark Office, an antitrust claim can also be based on an allegation that a suit is baseless; in order to prove that a suit was within the "sham" exception to immunity, an antitrust plaintiff must prove that the suit was both objectively baseless and subjectively motivated by a desire to impose collateral, anti-competitive injury rather than to obtain a justifiable legal remedy.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN26[] **Inequitable Conduct, Anticompetitive Conduct**

In order to prove that a lawsuit is within the sham exception to immunity, first, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under that second part of the definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor, through the use of the governmental process, as opposed to the outcome of that process, as an anticompetitive weapon.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN27[] **Inequitable Conduct, Anticompetitive Conduct**

Even a plaintiff who defeats the defendant's claim to antitrust immunity by demonstrating both the objective and the subjective components of a sham must still prove a substantive antitrust violation. Proof of a sham merely deprives the defendant of immunity; it does not relieve the plaintiff of the obligation to establish all other elements of his claim.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Bad Faith

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Infringement Actions > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

HN28[] **Bad Faith, Fraud & Nonuse, Bad Faith**

A sham suit must be both subjectively brought in bad faith and based on a theory of either infringement or validity that is objectively baseless. Accordingly, if a suit is not objectively baseless, an antitrust defendant's subjective motivation is immaterial. In contrast with a fraud claim, a patentee's activities in procuring the patent are not necessarily at issue. It is the bringing of the lawsuit that is subjectively and objectively baseless that must be proved.

Counsel: Donald R. Dunner, Finnegan, Henderson, Farabow, Garrett & Dunner, L.L.P., of Washington, D.C., argued for the plaintiff/counterclaim defendant-appellant and counterclaim defendant-appellant. With him on the brief were Robert D. Bajefsky and David A. Manspeizer. Of counsel on the brief were Robert A. Bourque, Kathleen M. Scanlon, and Lawrence M. Young, Simpson, Thacher & Bartlett, of New York, New York, and Alan I. Becker, Burditt & Radzius, Chartered, of Chicago, Illinois.

D. Dennis Allegretti, Burns & Levinson, LLP, of Boston, Massachusetts, argued for the defendant counterclaimant-appellee. With him on the brief were Stephen G. Rudisill, Arnold, White & Durkee, and Edward L. Foote and Peter C. McCabe, III, Winston & Strawn, of Chicago, Illinois.

Opinion by: LOURIE

Opinion

[*1098]** **[*1061]** LOURIE, Circuit Judge.

Nobelpharma AB and Nobelpharma USA, Inc. (collectively, NP) appeal from **[**2]** the **[***1099]** judgment of the United States District Court for the Northern District of Illinois holding that (1) U.S. Patent 4,330,891 is invalid under *35 U.S.C. § 112*, P 1 (1994), for failure to disclose the best mode of carrying out the invention, (2) Implant Innovations, Inc. (3I) did not infringe the '891 patent, and (3) NP was not entitled to JMOL or, in the alternative, a new trial following the jury verdict in favor of 3I on its antitrust counterclaim against NP, Dr. Per-Ingvar Branemark, and the Institute for Applied Biotechnology. See *Nobelpharma **[*1062]** AB v. Implant Innovations, Inc., 930 F. Supp. 1241 (N.D. Ill. 1996)*. We conclude that the district court did not err in granting judgment that the patent is invalid as a matter of law at the close of NP's case-in-chief, and that it did not err in denying NP's motion for JMOL or a new trial on the antitrust counterclaim. Accordingly, the decision of the district court is affirmed. [1]

[3]** BACKGROUND

Drs. Branemark and Bo-Thuresson af Ekenstam are the named inventors on the '891 patent, the application for which was filed in 1980 and claimed priority from a Swedish patent application that was filed in 1979. The patent claims "an element intended for implantation into bone tissue." This "element," when used as part of a dental implant, is placed directly into the jawbone where it acts as a tooth root substitute. The implants described and claimed in the patent are preferably made of titanium and have a network of particularly-sized and particularly-spaced "micropits." These micropits, which have diameters in the range of about 10 to 1000 nanometers or, preferably, 10 to 300 nanometers, allow a secure connection to form between the implant and growing bone tissue through a process called "osseointegration."

Branemark is also one of the authors of a book published in 1977, entitled "Osseointegrated Implants in the Treatment of the Edentulous Jaw Experienced from a 10-Year Period" (hereinafter "the 1977 Book"). As its title suggests, this book describes a decade-long clinical evaluation of patients who had received dental implants. The 1977 Book includes a single page **[**4]** containing four scanning electron micrographs (SEMs) of titanium implants that exhibit micropits. The caption describing these SEMs reads, in part: "Irregularities are produced during manufacturing in order to increase the retention of the implants within the mineralized tissue." 3I determined, based on measurements and calculations that it presented to the trial court, that the micropits shown in the 1977 Book have diameters within the range claimed in the '891 patent. However, the 1977 Book does not specifically refer to "micropits."

In preparing to file the Swedish patent application, af Ekenstam submitted a draft written description of the invention to the inventors' Swedish patent agent, Mr. Barnieske. This draft referred to the 1977 Book in the following translated passage:

> In ten years of material pertaining to titanium jaw implants in man, Branemark et al. [in the 1977 Book] have shown that a very high frequency of healing, as stated above, can be achieved by utilizing a carefully developed surgical technique and adequately produced implants.

However, Barnieske deleted all reference to the 1977 Book from the patent application that was ultimately filed **[**5]** in Sweden. Similarly, the 1977 Book is not mentioned in the U.S. patent application filed by Barnieske on behalf of Branemark and af Ekenstam.

In June 1980, while the U.S. patent application was pending, Branemark entered into an exclusive license agreement with NP covering the claimed technology. [2] Barnieske kept NP informed of the prosecution of the U.S. patent application and received assistance from NP's U.S. patent agent. The '891 patent issued in 1982; NP has since asserted it in at least three patent infringement suits.

In July 1991, while Branemark was a member of NP's Board of Directors, NP brought this suit alleging that certain of 3I's dental implants infringed the '891 patent. 3I defended on the grounds of invalidity, unenforceability, and non-infringement. **[**6]** 3I also brought an antitrust counterclaim, based in part on the assertion that NP attempted to enforce a patent that it knew was invalid and unenforceable. Specifically, 3I alleged that when NP brought suit, NP was aware that the inventors' intentional failure to disclose **[***1100]** **[*1063]** the 1977 Book to the U.S. Patent and Trademark Office (PTO) would render the '891 patent unenforceable.

---

[1] Following the filing of a combined petition for rehearing and suggestion for rehearing in banc, the panel has reconsidered and modified its decision in this case. Accordingly, the earlier-issued decision is hereby vacated and the opinion, reported at *129 F.3d 1463, 44 U.S.P.Q.2D (BNA) 1705*, is hereby withdrawn.

[2] The district court indicated that Branemark and af Ekenstam assigned the '891 patent to NP prior to NP's bringing this suit. 3I has not challenged NP's standing to bring this patent infringement claim without joining Branemark and af Ekenstam.

During its case-in-chief, NP introduced portions of a deposition of Branemark that apparently was conducted several years before this trial began in connection with a lawsuit involving neither NP nor 3I. NP also introduced into evidence portions of that deposition that were counter-designated for introduction by 3I. Branemark's deposition testimony included his admissions that one "could consider" the procedure used to manufacture the micropitted surface a trade secret, and "it might be" that there are details "important to making" the micropitted surface that are not disclosed in the patent. At the close of NP's case-in-chief, the district court granted 3I's motion for JMOL of invalidity and non-infringement. The court held that the patent was invalid under *§ 112*, P 1, for failure to disclose the best mode and **[**7]** that NP had failed to prove infringement. The court then denied NP's motion for JMOL on 3I's antitrust counterclaim, proceeded to inform the jury that the court had held the patent invalid, and allowed 3I to present the counterclaim to the jury.

After trial limited to the antitrust issue, the jury found in special verdicts, inter alia, that 3I had proven that (1) "the inventors or their agents or attorneys obtained the '891 patent through fraud," (2) NP "had knowledge that the '891 patent was obtained by fraud at the time this action was commenced against 3I," and (3) NP "brought this lawsuit against 3I knowing that the '891 patent was either invalid or unenforceable and with the intent of interfering directly with 3I's ability to compete in the relevant market." The jury awarded 3I approximately $ 3.3 million in compensatory damages, an amount the court trebled pursuant to section 4 of the Clayton Act, *15 U.S.C. § 15 (1994)*. The court declined to rule on whether the patent was unenforceable for inequitable conduct, concluding that its judgment of invalidity rendered the issue of enforceability moot. *Nobelpharma AB v. Implant Innovations, Inc., 875 F. Supp. 481, 34 U.S.P.Q.2D (BNA) **[**8]** 1090 (N.D. Ill. 1995)*.

The court then denied NP's renewed motion for JMOL on the counterclaim or, in the alternative, for a new trial on both the counterclaim and the infringement claim. *Nobelpharma AB, 930 F. Supp. at 1246*. In denying NP's post-verdict motion for a new trial on the issue of infringement, the district court again concluded that the patent was invalid for failure to disclose the best mode. *Id. at 1247-49*. The court also concluded that NP was not entitled to JMOL on the counterclaim because, inter alia, "NP, as the assignee of the patent, maintained and enforced the patent with knowledge of the patent's fraudulent derivation." *Id. at 1257*. The court denied NP's motion for a new trial on the counterclaim, holding, inter alia, that it did not err in its evidentiary rulings or in refusing to instruct the jury that in order to impose antitrust liability against NP, it must find NP's lawsuit "objectively baseless." *Id. at 1264*.

NP appealed to this court, challenging the district court's grant of 3I's motion for JMOL of invalidity and non-infringement and its denial of the post-verdict motion for JMOL or a new trial. We have jurisdiction pursuant **[**9]** to *28 U.S.C. § 1295(a)(1) (1994)*.

DISCUSSION

A. Invalidity

At the close of NP's case-in-chief, the district court granted 3I's motion for judgment of invalidity under *§ 112*, P 1, as a matter of law for failure to disclose the best mode of practicing the invention. NP then filed a motion for reconsideration, which was denied, in order to reopen the evidence and offer proof regarding its compliance with *§ 112*, P 1. After the jury returned its verdict in favor of 3I on its antitrust counterclaim, NP moved for a new trial, again arguing that the court had erred in granting 3I's motion for JMOL. In reaffirming its decision to grant 3I's motion for JMOL, the district court held that Branemark's own testimony "demonstrates that when [he] filed his patent application, he contemplated a best mode of practicing his invention, but his disclosures were inadequate to enable one skilled in the art to practice that best mode." *930 F. Supp. at 1248*. The district court also explicitly **[*1064]** noted that its decision was not based on Branemark's purported "non-disclosure" of NP's later-developed manufacturing procedure. Id.

On appeal, NP again argues that the district court erred in granting **[**10]** JMOL on the invalidity issue because in doing so the court drew improper, unsupported inferences against NP and erroneously imposed on NP the burden of proving validity. NP also argues that the grant of JMOL denied it due process because the court had mandated a "natural order of proof" at trial and thus had effectively barred NP from introducing any evidence to show that it had satisfied the best mode requirement during its case-in-chief.

In response, 3I argues that Branemark's own unequivocal admissions indicate that he had developed and tested a preferred method **[***1101]** of making the claimed implants when the patent application was filed. 3I also argues that Branemark admitted that the patent does not contain a disclosure adequate to enable one of ordinary skill in the art to practice this method. Finally, 3I argues that NP was not denied due process because NP had sufficient opportunity to offer evidence in opposition to 3I's motion for JMOL of invalidity and failed to do so. We agree with 3I that the court did not err in its grant of the motion for JMOL and therefore that the court did not err in denying NP's motion for a new trial on its infringement claim.

HN1[] We review a district court's **[**11]** grant of a motion for JMOL under *Fed. R. Civ. P. 50(a)(1)* de novo by reapplying the standard applicable at the district court. See *Allied Colloids Inc. v. American Cyanamid Co., 64 F.3d 1570, 1573, 35 U.S.P.Q.2D (BNA) 1840, 1841 (Fed. Cir. 1995)*. Under that standard, we examine the record in the light most favorable to the non-movant, which in this case is NP, and afford it the benefit of all reasonable inferences. Id. Accordingly, "we may affirm only if the judgment entered was the only one possible under the controlling law." *Burroughs Wellcome Co. v. Barr Lab., Inc., 40 F.3d 1223, 1227, 32 U.S.P.Q.2D (BNA) 1915, 1919 (Fed. Cir. 1994)*, cert. denied, *516 U.S. 1070, 116 S. Ct. 771, 516 U.S. 1071, 133 L. Ed. 2d 724 (1996)* (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)* (prohibiting JMOL "if reasonable minds could differ as to the import of the evidence.")).

HN2[] *Rule 50(a)(1)* provides, in relevant part, that if

> a party has been fully heard on an issue and there is no legally sufficient evidentiary basis for a reasonable jury to find for that party on that issue, the court may determine the issue against that **[**12]** party and may grant a motion for judgment as a matter of law [JMOL] against that party with respect to a claim or defense that cannot under the controlling law be maintained or defeated without a favorable finding on that issue.

Fed. R. Civ. P. 50(a). "Thus, the verdict may be directed after the plaintiff's case is presented, when it is clear that completion of the trial is unnecessary in that the only sustainable verdict could be in favor of the defendant." *Allied Colloids, 64 F.3d at 1573, 35 U.S.P.Q.2D (BNA) at 1841*.

HN3[] By statute, patents are presumed to be valid. *35 U.S.C. § 282 (1994)*. Thus, 3I had the burden of establishing by clear and convincing evidence facts supporting the conclusion that the '891 patent is invalid. See *Transco Prods. Inc. v. Performance Contracting, Inc., 38 F.3d 551, 560, 32 U.S.P.Q.2D (BNA) 1077, 1084 (Fed. Cir. 1994)*. ***HN4***[] The patent statute requires that a patent specification "shall set forth the best mode contemplated by the inventor of carrying out his invention." *35 U.S.C. § 112*, P 1 (1994). Determining whether a patent fails to comply with the best mode requirement and is thus invalid involves two factual inquiries. First, the fact-finder must determine **[**13]** whether at the time an applicant filed an application for patent, he or she had a best mode of practicing the invention, which is a subjective determination. Second, if the inventor had a best mode of practicing the invention, the fact-finder must determine whether the best mode was disclosed in sufficient detail to allow a skilled artisan to practice it without undue experimentation, which is an objective determination. See *United States Gypsum Co. v. National Gypsum Co., 74 F.3d 1209, 1212, 37 U.S.P.Q.2D (BNA) 1388, 1390 (Fed. Cir. 1996)*.

[*1065] For whatever reason, NP introduced as part of its own case-in-chief all of the portions of Branemark's deposition that were counter-designated by 3I. [3] These included Branemark's statements, introduced by and unchallenged by NP, that (1) "there were some minor details that were not included [in the patent] and which proved to be quite important," (2) other skilled artisans would have to be "lucky" to obtain a suitable micropitted implant "by cutting a piece of titanium at a speed less than twenty meters per minute," the cutting speed disclosed

[3] NP suggests that it introduced the portions counter-designated "as a matter of convenience and efficiency" during its own case-in-chief. At oral argument, NP also suggested that it introduced these portions "as a courtesy" to 3I. While such motives are commendable, they do not change the significance and meaning of this evidence.

in the patent, and (3) "any of the small detailed recipes that I discussed but did not specify" in the patent **[**14]** "can cause you to fail to get micropitting even though you were cutting the metal at less than twenty meters per minute." The record also unambiguously indicates that when he filed his patent application, Branemark was aware that a variety of undisclosed machining parameters were critical to the production of a functional implant, i.e., one that would allow for osseointegration. Moreover, the research on which the 1977 Book was based also indicates that Branemark possessed a preferred mode of making the claimed implants by the time the U.S. patent application was filed in 1980. Thus, the evidence at trial leads to only one reasonable conclusion: Branemark possessed **[***1102]** a preferred method of making the claimed invention and failed to disclose it sufficiently to enable those skilled in the art to practice that method.

[15]** ***HN5***[]

Normally, evidence presented by a patentee-plaintiff will not support a grant of a JMOL invalidating a patent. That is because the burden is on an accused infringer to show by clear and convincing evidence facts supporting the conclusion that the patent is invalid. See generally 9A Charles Alan Wright & Arthur R. Miller, Federal Practice and Procedure § 2535, at 325 (2d ed. 1994) ("Courts often caution that granting a [JMOL] for the party bearing the burden of proof is reserved for extreme cases."). Accordingly, grant of JMOL in favor of a party bearing the burden of proof may be granted only where (1) the movant "has established [its] case by evidence that the jury would not be at liberty to disbelieve" and (2) "the only reasonable conclusion is in [the movant's] favor." *Hurd v. American Hoist & Derrick Co., 734 F.2d 495, 499 (10th Cir. 1984)*. However, in unusual cases, an admission made by a plaintiff's witness can be sufficient to support entry of a JMOL in favor of a defendant after the close of the plaintiff's case-in-chief, even where the defendant bears the burden of proof on the decided issue. See, e.g., *Falco Lime, Inc. v. Tide Towing Co., 29 F.3d* ***[**16]*** *362, 365-66 (8th Cir. 1994)* (holding that JMOL was properly granted after the close of plaintiff's case in view of the admissions of plaintiff's chief witness regarding a contract that established defendant's affirmative defense). Given Branemark's admissions, we conclude that this is one of those "extreme" cases in which it was not improper to grant JMOL in favor of a defendant on an issue regarding which it bore the burden of proof.

Contrary to NP's arguments, the district court did not draw adverse inferences against NP to support its judgment. Rather, it properly relied on a co-inventor's statements "that the jury would not be at liberty to disbelieve." *Hurd, 734 F.2d at 499*. Similarly, the district court did not place the burden of proving validity on NP; NP's own evidence was clear and convincing that the patent is invalid. This evidence led to "the only reasonable conclusion." Id.

We also agree with 3I that NP was not denied due process. When NP was confronted with 3I's motion for JMOL, it was not unfairly surprised. 3I had consistently alleged that the '891 patent was invalid under *§ 112*, P 1. Moreover, NP had an opportunity to oppose 3I's motion, but it failed **[**17]** to do so adequately. After the court's grant of JMOL, NP responded by offering evidence and argument only concerning NP's later-developed manufacturing procedure. However, as noted above, the district court's ultimate decision did not rely on the "non-disclosure" **[*1066]** of NP's later-developed manufacturing processes. Likewise, in affirming the decision of the district court, we do not rely on that evidence. Rather, we rely only on the clear and convincing evidence that Branemark failed to disclose his best mode of practicing the claimed invention when he filed his patent application. NP failed to present any evidence or argument to undermine the import of that evidence, even though it knew that the best mode issue was before the court; it thus had ample opportunity to prepare and present evidence and argument. Whatever disadvantage NP may have suffered when the JMOL was granted was rectified by the opportunity it had after the judgment was rendered. Any error was thus harmless. NP was therefore not denied due process.

Accordingly, we affirm the judgment that the '891 patent is invalid as a matter of law under *§ 112*, P 1, for failure to disclose the best mode of practicing the invention. **[**18]** Because we affirm the district court's decision holding the patent invalid, we need not consider NP's arguments concerning infringement. See *B.F. Goodrich Co. v. Aircraft Braking Sys. Corp., 72 F.3d 1577, 1583, 37 U.S.P.Q.2D (BNA) 1314, 1319 (Fed. Cir. 1996)*.

B. Antitrust Liability

I.

After the jury returned its verdict in favor of 3I on its counterclaim that NP violated the antitrust laws by bringing suit against 3I, the court denied NP's motion for JMOL or, in the alternative, for a new trial under *Fed. R. Civ. P. 50(b)*. In denying NP's motion, the district court held that the verdict was supported, inter alia, by the jury's factual findings that the patent was obtained through "NP's knowing fraud upon, or intentional misrepresentations to, the [PTO]" and that "NP maintained and enforced the patent with knowledge of the patent's fraudulent derivation" and with the intent of interfering directly with 3I's ability to compete in the relevant market. *930 F. Supp. at 1257*. The court further held, based on these findings, that the jury need not have considered whether NP's suit was "objectively baseless." *Id. at 1264*.

In support of its position that the court erred in denying **[**19]** its renewed motion for JMOL, NP argues that there was a lack of **[***1103]** substantial evidence to support the jury's findings that the patent was obtained through "fraud" and that NP was aware of that conduct when it brought suit against 3I. NP also argues that these findings, even if supported by substantial evidence, do not provide a legal basis for the imposition of antitrust liability. Finally, NP argues that it is entitled to a new trial because the court failed to instruct the jury that bringing a lawsuit cannot be the basis for antitrust liability if that suit is not "objectively baseless."

3I responds that the jury's explicit findings that the patent was procured through fraudulent conduct and that NP knew of that conduct when it brought suit were supported by substantial evidence, and that these findings provide a sound basis for imposing antitrust liability on NP. Responding to NP's arguments for a new trial, 3I argues that an "objectively reasonable" or "objectively baseless" jury instruction was not necessary because the district court required that 3I prove that NP had actual knowledge of the fraud when it brought suit and that even if such an instruction had been necessary, NP **[**20]** waived this argument by failing to propose a jury instruction relating to an "objectively baseless" standard. We agree with 3I that the court did not err in denying NP's motion for JMOL because substantial evidence supports the jury's findings that the patent was fraudulently obtained and that NP sought to enforce the patent with knowledge of its fraudulent origin. Similarly, the court did not err in denying NP's motion for a new trial because NP was not prejudiced by any legally erroneous jury instruction.

HN6[] We review a district court's denial of a post-trial motion for JMOL under *Fed. R. Civ. P. 50(b)* de novo by reapplying the standard applicable at the district court. Thus, this court

> must determine whether there exists evidence of record upon which a jury might properly have returned a verdict in [the non-movant's] favor when the correct legal standard is applied. If there is not, [the **[*1067]** movant] was entitled to have the question removed from the jury and decided as a matter of law.

Markman v. Westview Instruments, Inc., 52 F.3d 967, 975, 34 U.S.P.Q.2D (BNA) 1321, 1326 (Fed. Cir. 1995) (in banc) (quoting *Jamesbury Corp. v. Litton Indus. Prods., Inc., 756 F.2d **[**21]** 1556, 1560, 225 U.S.P.Q. (BNA) 253, 257 (Fed. Cir. 1985))*, aff'd, *517 U.S. 370, 116 S. Ct. 1384, 38 U.S.P.Q.2D (BNA) 1461, 134 L. Ed. 2d 577 (1996)*; see also *Deimer v. Cincinnati Sub-Zero Prods., Inc., 58 F.3d 341, 343 (7th Cir. 1995)*; *Shearing v. Iolab Corp., 975 F.2d 1541, 1544, 24 U.S.P.Q.2D (BNA) 1133, 1136 (Fed. Cir. 1992)* ("***HN7***[] On appeal after denial of a motion for JNOV, the appellant must prove that the record lacks substantial evidence to support the jury's verdict."). In applying this standard, we must also "view the evidence in the light most favorable to the nonmoving party," which in this case is 3I. *Deimer, 58 F.3d at 343*.

HN8[] We review a district court's denial of a motion for a new trial for an abuse of discretion. *Railroad Dynamics, Inc. v. A. Stucki Co., 727 F.2d 1506, 1512, 220 U.S.P.Q. (BNA) 929, 936 (Fed. Cir. 1984)*. Accordingly, we may reverse the district court if, inter alia, the district court prejudiced NP's substantive rights by abusing its discretion in admitting or excluding evidence, see *Munoz v. Strahm Farms, Inc., 69 F.3d 501, 36 U.S.P.Q.2D (BNA) 1499, 1501 (Fed. Cir. 1995)*, or by giving legally erroneous jury instructions, see Jamesbury, 756 F.2d at 1558, 225 U.S.P.Q.2D (BNA) at 255. **[**22]** See generally 12 McLaughlin et al., *Moore's Federal Practice § 59.20* to 59.25, at 59-27 to 59-47 (3d ed. 1997).

II.

HN9[] As a general proposition, when reviewing a district court's judgment involving federal ***antitrust law***, we are guided by the law of the regional circuit in which that district court sits. See *Loctite Corp. v. Ultraseal Ltd., 781 F.2d 861, 875, 228 U.S.P.Q. (BNA) 90, 99 (Fed. Cir. 1985)* ("We must approach a federal antitrust claim as would a court of appeals in the circuit of the district court whose judgment we review.") (citing *Atari, Inc. v. JS&A Group, Inc., 747 F.2d 1422, 1438-40, 223 U.S.P.Q. (BNA) 1074, 1086-87 (Fed. Cir. 1984)* (in banc)); see also *Cygnus Therapeutic Sys. v. ALZA Corp., 92 F.3d 1153, 1161, 39 U.S.P.Q.2D (BNA) 1666, 1672 (Fed. Cir. 1996)* (citing Loctite). However, we apply our own law, not regional circuit law, to resolve issues that clearly involve our exclusive jurisdiction. See *Pro-Mold & Tool Co. v. Great Lakes Plastics, Inc., 75 F.3d 1568, 1574-75, 37 U.S.P.Q.2D (BNA) 1626, 1631 (Fed. Cir. 1996)* (holding as a matter of Federal Circuit law that an allegation of inequitable conduct in the prosecution of a patent application cannot support a federal **[**23]** unfair competition claim) (citing *Chrysler Motors Corp. v. Auto Body Panels, Inc., 908 F.2d 951, 953 15 U.S.P.Q.2D (BNA) 1469, 1470 (Fed. Cir. 1990))*. See generally *Biodex Corp. v. Loredan Biomedical, Inc., 946 F.2d 850, **[***1104]** 855-58, 20 U.S.P.Q.2D (BNA) 1252, 1256-59 (Fed. Cir. 1991)*.

HN10[] Whether conduct in the prosecution of a patent is sufficient to strip a patentee of its immunity from the antitrust laws is one of those issues that clearly involves our exclusive jurisdiction over patent cases. It follows that whether a patent infringement suit is based on a fraudulently procured patent impacts our exclusive jurisdiction.

Moreover, *HN11*[] an antitrust claim premised on stripping a patentee of its immunity from the antitrust laws is typically raised as a counterclaim by a defendant in a patent infringement suit. See *Argus Chem. Corp. v. Fibre Glass-Evercoat Co., 812 F.2d 1381, 1383, 1 U.S.P.Q.2D (BNA) 1971, 1973 (Fed. Cir. 1987)* ("Walker Process, like the present case, was a patent infringement suit in which an accused infringer filed an antitrust counterclaim."). [4] **[**26]** **[*1068]** Because most cases involving these issues will therefore be appealed to this court, we conclude that we should decide these issues as a matter **[**24]** of Federal Circuit law, rather than rely on various regional precedents. We arrive at this conclusion because we are in the best position to create a uniform body of federal law on this subject and thereby avoid the "danger of confusion [that] might be enhanced if this court were to embark on an effort to interpret the laws" of the regional circuits. *Forman v. United States, 767 F.2d 875, 880 n.6 (Fed. Cir. 1985)*. Accordingly, we hereby change our precedent and hold that *HN12*[] whether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question of Federal Circuit law. [5] This conclusion applies equally to all antitrust claims premised on the bringing of a patent infringement suit. Therefore, *Cygnus, 92 F.3d at 1161, 39 U.S.P.Q.2D (BNA) at 1672*, *Loctite, 781 F.2d at 875, 228 U.S.P.Q. (BNA) at 99*, and *Atari, 747 F.2d at 1438-40, 223 U.S.P.Q. (BNA) at 1086-87*, are expressly overruled to the extent they hold otherwise. However, we will continue to apply the law of the appropriate regional

---

[4] Compare *Tank Insulation Int'l, Inc. v. Insultherm, Inc., 104 F.3d 83, 88* & n.5, 41 U.S.P.Q.2D (BNA) 1545, 1549 & n.5 (5th Cir.), cert. denied, ***139 L. Ed. 2d 191, 118 S. Ct. 265 (1997)***, and *Hydranautics v. FilmTec Corp., 70 F.3d 533, 536-37, 36 U.S.P.Q.2D (BNA) 1773, 1775 (9th Cir. 1995)* ("A claim that patent infringement litigation violated an antitrust statute is a permissive, not a mandatory, counterclaim in a patent infringement case, and is not barred in a subsequent suit by failure to raise it in the infringement suit." (citing *Mercoid Corp. v. Mid-Continent Inv. Co., 320 U.S. 661, 669-71, 60 U.S.P.Q. (BNA) 21, 26-27, 88 L. Ed. 376, 64 S. Ct. 268 (1944)))* with *Burlington Indus., Inc. v. Milliken & Co., 690 F.2d 380, 389, 217 U.S.P.Q. (BNA) 662, 668 (4th Cir. 1982)* (stating that Mercoid "has been read narrowly in this respect, and its continuing validity is open to serious question." (citing ***United States v. Eastport S.S. Corp., 255 F.2d 795, 805 (2d Cir. 1958)***; *Martino v. McDonald's Sys., Inc., 432 F. Supp. 499, 505 (N.D.Ill.1977)*, aff'd, *598 F.2d 1079 (7th Cir. 1979)))*, and *USM Corp. v. SPS Techs., Inc., 102 F.R.D. 167, 170-71, 225 U.S.P.Q. (BNA) 715, 717 (N.D. Ill. 1984)* ("Notwithstanding Mercoid, the majority of courts, when faced with this issue, have held that antitrust claims are compulsory counterclaims under Rule 13(a) if the antitrust claim arises out of the same transaction or occurrence as the original claim. The Seventh Circuit has expressly refused to decide the issue." (citations omitted)).

[5] Because precedent may not be changed by a panel, see *South Corp. v. United States, 690 F.2d 1368, 1370 n.2, 215 U.S.P.Q. (BNA) 657, 658 n.2 (Fed. Cir. 1982)* (in banc), the issue of "choice of circuit" law set forth in this Section B.II. has been considered and decided unanimously by an in banc court consisting of MAYER, Chief Judge, RICH, NEWMAN, MICHEL, PLAGER, LOURIE, CLEVENGER, RADER, SCHALL, BRYSON, and GAJARSA, Circuit Judges.

circuit to issues involving other elements of ***antitrust law*** such as relevant market, market power, damages, etc., as those issues are **[**25]** not unique to patent law, which is subject to our exclusive jurisdiction. See, e.g., *Virginia Panel Corp. v. MAC Panel Co., 133 F.3d 860, 872-73, 45 U.S.P.Q.2D (BNA) 1225, 1234-35 (Fed. Cir. 1997)* (applying Fourth Circuit law on antitrust injury).

III.

HN13[] A patentee who brings an infringement suit may be subject to antitrust liability for the anti-competitive effects of that suit if the alleged infringer (the antitrust plaintiff) proves (1) that the asserted patent was obtained through knowing and willful fraud within the meaning of *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 177, 147 U.S.P.Q. (BNA) 404, 407, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965)*, or (2) that the infringement suit was "a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor," *Eastern R.R. Presidents Conference v. Noerr **[**27]** Motor Freight, Inc., 365 U.S. 127, 144, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*; *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)* (holding that Noerr "governs the approach of citizens or groups of them . . . to courts, the third branch of Government"). See *Professional **[***1105]** Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 62 n.6, 26 U.S.P.Q.2D (BNA) 1641, 1646-47 n.6, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)* (PRE) (declining to decide "whether and, if so, to what extent Noerr permits the imposition of antitrust liability for a litigant's fraud or other misrepresentations").

In Walker Process, the Supreme Court held that ***HN14***[] in order "to strip [a patentee] of its exemption from the antitrust laws" because of its attempting to enforce its patent monopoly, an antitrust plaintiff is first required to prove that the patentee "obtained the patent by knowingly and willfully misrepresenting facts [6] to the [PTO]." 382 U.S. at 177, **[*1069]** 147 U.S.P.Q.2D (BNA) at 407. The plaintiff in the patent infringement suit must also have been aware of the fraud when bringing suit. *Id. at 177* & n.6, 147 U.S.P.Q.2D (BNA) at 407 **[**28]** & n.6. The Court cited prior decisions that involved the knowing and willful misrepresentation of specific facts to the Patent Office: *Precision Instrument Manufacturing v. Automotive Maintenance Machinery Co., 324 U.S. 806, 65 U.S.P.Q. (BNA) 133, 89 L. Ed. 1381, 65 S. Ct. 993 (1945)* (misrepresenting that the inventor had conceived, disclosed, and reduced to practice the invention on certain dates); *Hazel-Atlas Glass Co. v. Hartford-Empire Co., 322 U.S. 238, 61 U.S.P.Q. (BNA) 241, 88 L. Ed. 1250, 64 S. Ct. 997 (1944)* (misrepresenting that a widely known expert had authored an article praising the invention); and *Keystone Driller Co. v. General Excavator Co., 290 U.S. 240, 78 L. Ed. 293, 54 S. Ct. 146 (1933)* (involving an agreement to suppress evidence in the course of litigation). These cases indicate the context in which the Court established the knowing and willful misrepresentation test.

[29]** Justice Harlan, in a concurring opinion, emphasized that to "achieve a suitable accommodation in this area between the differing policies of the patent and antitrust laws," a distinction must be maintained between patents procured by "deliberate fraud" and those rendered invalid or unenforceable for other reasons. *Walker Process, 382 U.S. at 179-80, 147 U.S.P.Q. (BNA) at 408*. He then stated:

> To hold, as we do not, that private antitrust suits might also reach monopolies practiced under patents that for one reason or another may turn out to be voidable under one or more of the numerous technicalities attending the issuance of a patent, might well chill the disclosure of inventions through the obtaining of a patent because of fear of the vexations or punitive consequences of treble-damage suits. Hence, this private antitrust remedy should not be deemed available to reach [Sherman Act] § 2 monopolies carried on under a nonfraudulently procured patent.

Id. at 180, 147 U.S.P.Q. (BNA) at 408.

[6] The alleged misrepresentation in that case involved the patentee's sworn statement "that it neither knew nor believed that its invention had been in public use in the United States more than one year prior to filing its patent application when, in fact, [it] was a party to prior use within such time." *Walker Process, 382 U.S. at 174, 147 U.S.P.Q. (BNA) at 406*. The PTO does not currently require inventors to file a sworn statement regarding such knowledge or belief. See *35 U.S.C § 115 (1994)*; *37 C.F.R. § 1.63 (1996)*.

Consistent with the Supreme Court's analysis in Walker Process, as well as Justice Harlan's concurring opinion, we have distinguished "inequitable conduct" from Walker Process fraud, **[**30]** noting that ***HN15***[] inequitable conduct is a broader, more inclusive concept than the common law fraud needed to support a Walker Process counterclaim. See, e.g., *Hewlett-Packard Co. v. Bausch & Lomb Inc., 882 F.2d 1556, 1563, 11 U.S.P.Q.2D (BNA) 1750, 1756 (Fed. Cir. 1989)*; *FMC Corp. v. Manitowoc Co., 835 F.2d 1411, 1417-18, 5 U.S.P.Q.2D (BNA) 1112, 1117 (Fed. Cir. 1987)*; *Argus Chem., 812 F.2d at 1384-85, 1 U.S.P.Q.2D (BNA) at 1973-74*; *J.P. Stevens & Co. v. Lex Tex Ltd., 747 F.2d 1553, 1559, 223 U.S.P.Q. (BNA) 1089, 1092 (Fed. Cir. 1984)* ("Conduct before the PTO that may render a patent unenforceable is broader than common law fraud."). ***HN16***[] Inequitable conduct in fact is a lesser offense than common law fraud, and includes types of conduct less serious than "knowing and willful" fraud.

In *Norton v. Curtiss, 57 C.C.P.A. 1384, 433 F.2d 779, 792-94* & n.12, *167 U.S.P.Q. (BNA) 532, 543-45 & n.12 (CCPA 1970)*, our predecessor court explicitly distinguished inequitable conduct from "fraud," as that term was used by the Supreme Court in Walker Process. The court noted that

> ***HN17***[] the concept of "fraud" has most often been used by the courts, in general, to refer to a type of conduct so reprehensible that it could alone **[**31]** form the basis of an actionable wrong (e.g., the common law action for deceit.) . . . . Because severe penalties are usually meted out to the party found guilty of such conduct, technical fraud 7 is generally held not to exist unless the following indispensable elements are found to be present: (1) a representation of a material fact, (2) the falsity of that representation, (3) the intent to deceive or, at least, a state of mind so reckless **[***1106]** as to the consequences that it is held to be the equivalent of intent (scienter), (4) a justifiable reliance upon **[*1070]** the misrepresentation by the party deceived which induces him to act thereon, and (5) injury to the party deceived as a result of his reliance on the misrepresentation. See, e.g., W. Prosser, Law of Torts, §§ 100-05 (3d ed. 1964); 37 C.J.S. Fraud § 3 (1943).

433 F.2d at 792-93, 167 U.S.P.Q. (BNA) at 543; see also *J.P. Stevens, 747 F.2d at 1559, 223 U.S.P.Q. (BNA) at 1092* (citing Norton). The court then contrasted such independently actionable common law fraud with lesser misconduct, including what we now refer to as inequitable conduct, which "fails, for one reason or another, to satisfy all the elements of the technical offense." **[**32]** Norton, 433 F.2d at 793, 167 U.S.P.Q. (BNA) at 543. ***HN18***[] Regarding such misconduct, "the courts appear to look at the equities of the particular case and determine whether the conduct before them . . . was still so reprehensible as to justify the court's refusing to enforce the rights of the party guilty of such conduct." Id.

7

We understand from the enumeration of elements that the term "technical fraud" was used by the court to mean common law fraud.

HN19[] Inequitable conduct is thus an equitable defense in a patent infringement action and serves as a shield, while a more serious finding of fraud potentially exposes a patentee to antitrust liability and thus serves as a sword. See *Korody-Colyer Corp. v. General Motors Corp., 828 F.2d 1572, 1578, 4 U.S.P.Q.2D (BNA) 1203, 1207 (Fed. Cir. 1987)*; see also Norton, 433 F.2d at 796, 167 U.S.P.Q. (BNA) at 546 ("Where fraud is committed, injury to the public through a weakening of the Patent System is manifest."). ***HN20***[] Antitrust liability can include treble damages. See *15 U.S.C. § 15(a) (1994)*. **[**33]** In contrast, the remedies for inequitable conduct, while serious enough, only include unenforceability of the affected patent or patents and possible attorney fees. See *35 U.S.C. §§ 282*, *285 (1994)*. Simply put, Walker Process fraud is a more serious offense than inequitable conduct.

In this case, the jury was instructed that a finding of fraud could be premised on "a knowing, willful and intentional act, misrepresentation or omission before the [PTO]." This instruction was not inconsistent with various opinions of the courts stating that omissions, as well as misrepresentations, may in limited circumstances support a finding of Walker Process fraud. See, e.g., *Rolite, Inc. v. Wheelabrator Envtl. Sys., Inc., 958 F. Supp. 992, 1006 (E.D. Pa. 1997)* (finding an allegation of "fraud by omission" in a Walker Process claim sufficient to overcome defendant's motion to dismiss); *United States v. Ciba-Geigy Corp., 508 F. Supp.*

1157, 1170, 211 U.S.P.Q. (BNA) 529, 542 (D.N.J. 1979) (stating, in the context of Walker Process: "A misrepresentation is material if the patent would not have issued 'but for' the omission"). We agree that **HN21**[] if the evidence shows that the asserted **[**34]** patent was acquired by means of either a fraudulent misrepresentation or a fraudulent omission and that the party asserting the patent was aware of the fraud when bringing suit, such conduct can expose a patentee to liability under the antitrust laws. We arrive at this conclusion because a fraudulent omission can be just as reprehensible as a fraudulent misrepresentation. In addition, of course, in order to find liability, the necessary additional elements of a violation of the antitrust laws must be established. See Walker Process, 382 U.S. at 178, 147 U.S.P.Q.2D (BNA) at 407.

Such **HN22**[] a misrepresentation or omission must evidence a clear intent to deceive the examiner and thereby cause the PTO to grant an invalid patent. See 433 F.2d at 794, 167 U.S.P.Q. (BNA) at 544 ("The fact misrepresented must be 'the efficient, inducing, and proximate cause, or the determining ground' of the action taken in reliance thereon.") (quoting 37 C.J.S. Fraud § 18 (1943)). In contrast, **HN23**[] a conclusion of inequitable conduct may be based on evidence of a lesser misrepresentation or an omission, such as omission of a reference that would merely have been considered important to the patentability of a claim by a reasonable **[**35]** examiner. See *J.P. Stevens, 747 F.2d at 1559, 223 U.S.P.Q. (BNA) at 1092*. 8 **HN24**[] A finding of Walker Process fraud requires higher threshold showings of both intent and materiality **[*1071]** than does a finding of inequitable conduct. Moreover, unlike a finding of inequitable conduct, see, e.g., *Molins PLC v. Textron, Inc., 48 F.3d 1172, 1178-79, 33 U.S.P.Q.2D (BNA) 1823, 1826-27 (Fed. Cir. 1995)*, a finding of Walker Process fraud may not be based upon an equitable balancing of lesser degrees of materiality and intent. Rather, it must be based on independent and clear evidence of deceptive intent together with a clear showing of reliance, i.e., that the patent would not have issued but for the misrepresentation or omission. Therefore, for an omission such as a failure to cite a piece of prior art to support a finding of Walker Process fraud, the withholding of the reference must show evidence **[***1107]** of fraudulent intent. A mere failure to cite a reference to the PTO will not suffice.

8

We recognize that this criterion reflects an older PTO rule in effect at the time the instant patent was prosecuted and that the current PTO rule defines materiality differently. See *Critikon, Inc. v. Balston Dickinson Vascular Access, Inc., 120 F.3d 1253, 1257, 43 U.S.P.Q.2D (BNA) 1666, 1669-70 (Fed. Cir. 1997)* (quoting *37 C.F.R. § 1.56 (b)(2)(ii) (1996)*).

[36]**

IV.

The district court observed that the Supreme Court, in footnote six of its PRE opinion, "left unresolved the issue of how 'Noerr applies to the ex parte application process,' and in particular, how it applies to the Walker Process claim." *930 F. Supp. at 1253* (quoting James B. Kobak, Jr., Professional Real Estate Investors and the Future of Patent-Antitrust Litigation, 63 Antitrust L.J. 185, 186 (1994)). The court also accurately pointed out that we have twice declined to resolve this issue. See *FilmTec Corp. v. Hydranautics, 67 F.3d 931, 939 n.2, 36 U.S.P.Q.2D (BNA) 1410, 1415 n.2 (Fed. Cir. 1995)*, cert. denied, *136 L. Ed. 2d 24, 117 S. Ct. 62 (1996)*; *Carroll Touch, Inc. v. Electro Mechanical Sys., Inc., 15 F.3d 1573, 1583 n.10, 27 U.S.P.Q.2D (BNA) 1836, 1845 n.10 (Fed. Cir. 1993)*. Therefore, after reviewing three opinions from the Ninth and District of Columbia Circuit Courts of Appeals, see *Hydranautics v. FilmTec Corp., 70 F.3d 533, 537-38, 36 U.S.P.Q.2D (BNA) 1773, 1777 (9th Cir. 1995)*; *Whelan v. Abell, 310 U.S. App. D.C. 396, 48 F.3d 1247, 1255 (D.C. Cir. 1995)*; *Liberty Lake Invs., Inc. v. Magnuson, 12 F.3d 155, 158-60 (9th Cir. 1993)*, the district court made **[**37]** its own determination that PRE's two-part test for a sham is inapplicable to an antitrust claim based on the assertion of a patent obtained by knowing and willful fraud. See *930 F. Supp. at 1253*. We do not agree with that determination. PRE and Walker Process provide alternative legal grounds on which a patentee may be stripped of its immunity from the antitrust laws; both legal theories may be applied to the same conduct. Moreover, we need not find a way to merge these decisions. Each provides its own basis for depriving a patent owner of immunity from the antitrust laws; either or both may be applicable to a particular party's conduct in obtaining and enforcing a patent. The Supreme Court saw no need to merge these separate lines of cases and neither do we.

Consequently, if the above-described elements of Walker Process fraud, as well as the other criteria for antitrust liability, are met, such liability can be imposed without the additional sham inquiry required under PRE. That is because Walker Process antitrust liability is based on the knowing assertion of a patent procured by fraud on the PTO, very specific conduct that is clearly reprehensible. **[**38]** On the other hand, ***HN25***[] irrespective of the patent applicant's conduct before the PTO, an antitrust claim can also be based on a PRE allegation that a suit is baseless; in order to prove that a suit was within Noerr's "sham" exception to immunity, an antitrust plaintiff must prove that the suit was both objectively baseless and subjectively motivated by a desire to impose collateral, anti-competitive injury rather than to obtain a justifiable legal remedy. PRE, 508 U.S. at 60-61, 26 U.S.P.Q.2D (BNA) at 1646. As the Supreme Court stated:

> ***HN26***[] First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals "an attempt to interfere directly with the business relationships **[**39]** of a competitor," through the "use [of] the governmental process--as opposed **[*1072]** to the outcome of that process--as an anticompetitive weapon." . . . Of course, ***HN27***[] even a plaintiff who defeats the defendant's claim to Noerr immunity by demonstrating both the objective and the subjective components of a sham must still prove a substantive antitrust violation. Proof of a sham merely deprives the defendant of immunity; it does not relieve the plaintiff of the obligation to establish all other elements of his claim.

Id. (footnotes and internal citations omitted). Thus, under PRE, ***HN28***[] a sham suit must be both subjectively brought in bad faith and based on a theory of either infringement or validity that is objectively baseless. Accordingly, if a suit is not objectively baseless, an antitrust defendant's subjective motivation is immaterial. Id. In contrast with a Walker Process claim, a patentee's activities in procuring the patent are not necessarily at issue. It is the bringing of the lawsuit that is subjectively and objectively baseless that must be proved.

V.

As for the present case, we conclude that there exists substantial evidence upon which a reasonable **[**40]** fact finder could strip NP of its immunity from antitrust liability. In particular, there exists substantial evidence that the 1977 Book was fraudulently kept from the PTO during patent prosecution. 9 **[***1108]** The jury could reasonably have found that the 1977 Book was fraudulently withheld and that it disclosed the claimed invention. First, the jury could reasonably have concluded that Branemark, through his Swedish patent agent, Barnieske, withheld the 1977 Book with the requisite intent to defraud the PTO. The initial disclosure to Barnieske, provided by Branemark's co-inventor, af Ekenstam, indicated that the studies described in the 1977 Book verified the utility of the claimed invention. While Barnieske did testify that he did not recall his thoughts during the prosecution of the patent and that he would have submitted the 1977 Book to the PTO if he had considered it relevant, the jury was free to disbelieve him. Barnieske could not explain, even in retrospect, why he deleted all reference to the 1977 Book. Importantly, the 1977 Book was thought by at least one inventor to be relevant, as evidenced by the initial disclosure to the patent agent, but it was inexplicably not later disclosed **[**41]** to the PTO. Also, as the author of the 1977 Book and an inventor, Branemark presumably knew of the book's relevance to the invention and could have directed Barnieske not to disclose the book to the PTO. Thus, the jury could properly have inferred that Branemark had the requisite intent to defraud the PTO based on his failure to disclose the reference to the PTO. Such a scheme to defraud is the type of conduct contemplated by Walker Process.

9

Because we consider the conduct relating to the 1977 Book sufficient to uphold the jury's finding of fraud, we need not discuss 3I's allegations that Branemark fraudulently misrepresented the causal relationship between the claimed micropitted surface and osseointegration and fraudulently concealed the best mode of making and using the claimed invention from the PTO.

Second, substantial evidence upon which a reasonable jury could have relied also indicates that the 1977 Book was sufficiently material to justify a finding of fraud. 3I's expert witness, Dr. Donald Brunette, **[**42]** testified that the SEMs of the 1977 Book depict dental implants having all the elements of the claims asserted by NP. Specifically, he explained how he had determined that the SEMs depict a "biologically flawless material" suitable for use as a dental implant. He also explained how he determined that the depicted micropits have diameters within the claimed range of approximately 10 to 1000 nanometers. Even Branemark, in this deposition testimony, conceded that it would not have been difficult to calculate the size of the micropits depicted in the 1977 Book, given the magnification factors provided in the captions to the SEMs. Accordingly, a reasonable jury could have found, based on the unambiguous claim language, that the 1977 Book anticipated the patent and that the examiner would not have granted the patent if he had been aware of the 1977 Book.

Third, the record indicates that a reasonable jury could have found that NP brought suit against 3I with knowledge of the applicants' fraud. A reasonable jury could have found that two of NP's then-officers, Dr. Ralph Green, Jr. and Mr. Mats Nilsson, were **[*1073]** aware of the fraud based on Green's testimony that Nilsson told him: "If the Patent **[**43]** Office did not receive a copy of [the 1977 Book], and if that were true, then we would have a larger problem and that was fraud." Green's testimony also indicates that NP was aware that the 1977 Book was highly material and, in fact, likely rendered the patent invalid. Green testified that he, Nilsson, and Mr. George Vande Sande obtained a legal opinion from NP's attorney, Mr. David Lindley, who indicated that if "we were to sue anyone on the patent we would lose in the first round. . . . There was prior art, not the least of which was this textbook [the 1977 Book] that would invalidate the patent."

Regarding NP's motion for a new trial, we have concluded that the court's instructions to the jury regarding fraud, to which NP did not object, substantially comport with the law. Specifically, the court emphasized to the jury that to strip NP of its immunity from the antitrust laws, 3I "must prove that the *'891* patent was fraudulently . . . obtained by clear and convincing evidence." The court also pointed out that only "knowing, willful and intentional acts, misrepresentations or omission" may support a finding of fraud and that the jury should approach such a finding with "great **[**44]** care." As to reliance, the court instructed the jury that "materiality is shown if but for the misrepresentation or omission the *'891* patent would not have been issued." These instructions were not legally erroneous.

Because we conclude that the finding of Walker Process fraud was supported by substantial evidence and was based upon a jury instruction that was not legally erroneous or prejudicial, we affirm the denial of NP's motion for JMOL. NP was properly deprived of its immunity from the antitrust laws under Walker Process, and it could not have benefited from additional jury instructions regarding PRE or Noerr. The court's refusal to so instruct the jury therefore does not require a new trial. **[***1109]**

We have also considered NP's alternative arguments in support of its motion for a new trial, including its assertions that the district court erred in permitting Green to testify, in prohibiting Dr. Hodosh and Messrs. Vande Sande and Martens from testifying, in allowing 3I to present a theory of joint venture liability to the jury, and in impugning the credibility of NP's arguments before the jury. We do not find these arguments persuasive. The district court did not **[**45]** abuse its discretion or misapply the law of attorney-client privilege in making its evidentiary rulings, nor did it prejudice NP's substantive rights by allowing the jury to consider a joint venture theory of liability or by commenting on NP's arguments during the trial. Accordingly, the court did not abuse its discretion in denying NP's motion for a new trial.

CONCLUSION

The district court did not err in holding the *'891* patent invalid as a matter of law at the close of NP's case-in-chief because NP itself introduced evidence that was fatal to the patent's validity. Likewise, the district court did not err in denying NP's motion for JMOL or a new trial on 3I's antitrust counterclaim. A reasonable jury, applying the correct law, could have found that the facts of this case were sufficient to constitute fraud within the meaning of Walker Process.

AFFIRMED

LABORERS v. PHILIP MORRIS, INC.

United States District Court for the Southern District of New York

March 25, 1998, Decided ; March 26, 1998, Filed

97 Civ. 4550 (SAS) rel. 97 Civ. 4676, 97 Civ. 7346, 97 Civ. 8462, 97 Civ. 9395, 97 Civ. 9396, 97 Civ. 9397, 97 Civ. 9398, 97 Civ. 9399, 97 Civ. 9400, 97 Civ. 9401, 97 Civ. 9402

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN1[] **Subject Matter Jurisdiction, Federal Questions**

Federal courts have subject matter jurisdiction over an action pursuant to *28 U.S.C.S. §§ 1331*, *1337*, where counts of the complaint raise questions of federal law. Supplemental jurisdiction over state claims is asserted where the federal and state claims both derive from a common nucleus of operative fact.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN2[] Motions to Dismiss, Failure to State Claim

In deciding a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must accept all material facts alleged in the complaint as true and must draw all reasonable inferences in the nonmovant's favor. The court may not grant the motion merely because recovery seems remote or unlikely. A complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Torts > ... > Causation > Proximate Cause > General Overview

HN3[] Causation, Proximate Cause

As fundamental principles of proximate cause dictate, plaintiffs may only recover for injuries that they have suffered.

Torts > ... > Causation > Proximate Cause > General Overview

Torts > ... > Compensatory Damages > Types of Losses > Medical Expenses

Torts > ... > Elements > Causation > General Overview

HN4[] Causation, Proximate Cause

In general terms, the concept of "proximate cause" prevents a recovery from a party for remote and derivative injuries to a plaintiff resulting from that party's conduct toward another. Under the common law, therefore, one who pays the medical expenses of another may not recover those expenses from the third-party tortfeasor who caused the damage.

Torts > ... > Elements > Causation > Intervening Causation

Torts > ... > Elements > Causation > General Overview

Torts > ... > Causation > Proximate Cause > General Overview

HN5[] Causation, Intervening Causation

The law arbitrarily declines to trace a series of events beyond a certain point. That point is reached when the connection between the defendants' negligence and the claimants' damages becomes too tenuous and remote to permit recovery. While a variety of factors may be relevant in assessing legal proximate cause, in order to plead a prima facie case, a plaintiff is generally required to show that the defendant's negligence was a substantial cause of the events that produced the injury. If such a showing is made, no intervening acts will break the causal connection if such acts are a reasonably foreseeable result of the defendants' negligence.

Torts > ... > Causation > Proximate Cause > General Overview

Torts > Intentional Torts > General Overview

Torts > Intentional Torts > Defenses > Intent

Torts > ... > Elements > Causation > General Overview

HN6[] **Causation, Proximate Cause**

Factors that courts may consider when determining proximate cause in intentional tort cases include: 1) the defendant's intent to do harm, 2) the degree of moral wrong involved, and 3) the seriousness of the harm originally intended. These factors are considered because the greater the intent to harm, the more foreseeable it is that harm will result.

Torts > ... > Damages > Collateral Source Rule > General Overview

HN7[] **Damages, Collateral Source Rule**

Health plan participants who bring personal injury actions may not recover expenses that the plan has already reimbursed. *N.Y. C.P.L.R. 4545(c)* (1992).

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

Torts > Remedies > Damages > General Overview

HN8[] **Burdens of Proof, Ultimate Burden of Persuasion**

The fact that plaintiffs may not be able to sustain their burden of proof on damages does not mean, that they should not be allowed to make the attempt.

Torts > ... > Causation > Proximate Cause > General Overview

HN9[] **Causation, Proximate Cause**

Proximate cause is ordinarily a question for the fact finder to resolve.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN10[] **Motions to Dismiss, Failure to State Claim**

The issue on a motion to dismiss is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims. A pleading will survive a motion to dismiss if it alleges a set of facts that would entitle the plaintiff to relief if proven.

Contracts Law > Third Parties > Subrogation

Insurance Law > Claim, Contract & Practice Issues > Subrogation > General Overview

Labor & Employment Law > ... > Employment Contracts > Conditions & Terms > General Overview

HN11[] Third Parties, Subrogation

In general, subrogation is a legal device that enables one party, the "subrogee," to put itself in the place of a party who has sustained an injury in order to obtain recovery. Subrogation may be available either through statute or private agreement.

Contracts Law > Third Parties > Subrogation

Insurance Law > Claim, Contract & Practice Issues > Subrogation > General Overview

HN12[] Third Parties, Subrogation

Where there is no statute establishing subrogation as plaintiffs' exclusive remedy and instead, plaintiffs' subrogation rights were created by private contracts, such rights cannot limit plaintiffs' ability to recover from those not party to the agreements. Thus, if plaintiffs have stated valid causes of action, the fact that they may also be entitled to sue in subrogation would not extinguish them.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

Antitrust & Trade Law > Consumer Protection > Tobacco Products > General Overview

Antitrust & Trade Law > Consumer Protection > Tobacco Products > State Regulation

HN13[] Tobacco Products, Federal Cigarette Labeling & Advertising Act

The Cigarette Labeling and Advertising Act, *15 U.S.C.S. §§ 1331-40* mandates certain uniform warning labels on cigarette packaging and preempts all state regulation of tobacco advertising.

Antitrust & Trade Law > Consumer Protection > Tobacco Products > State Regulation

Antitrust & Trade Law > Consumer Protection > Tobacco Products > General Overview

HN14[] Tobacco Products, State Regulation

See *15 U.S.C.S. § 1334(b)*.

Antitrust & Trade Law > Consumer Protection > Tobacco Products > Federal Cigarette Labeling & Advertising Act

Communications Law > ... > Regulated Practices > Content Regulation > Advertising

Torts > Procedural Matters > Preemption > General Overview

Antitrust & Trade Law > Consumer Protection > Tobacco Products > General Overview

HN15[] **Tobacco Products, Federal Cigarette Labeling & Advertising Act**

Common law rules impose requirements or prohibitions within the meaning of the Cigarette Labeling and Advertising Act (Act), *15 U.S.C.S. §§ 1331-40* because they are premised on the existence of a legal duty. The Act, therefore, applies to common law claims. To determine whether a particular claim is preempted, a court must ask whether the legal duty that is the predicate of the common-law damages action constitutes a requirement or prohibition based on smoking and health imposed under state law with respect to advertising or promotion, giving that clause a fair but narrow reading.

Antitrust & Trade Law > Consumer Protection > Tobacco Products > Federal Cigarette Labeling & Advertising Act

Communications Law > ... > Regulated Practices > Content Regulation > Advertising

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > General Overview

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

Torts > Procedural Matters > Preemption > General Overview

HN16[] **Tobacco Products, Federal Cigarette Labeling & Advertising Act**

The Cigarette Labeling and Advertising Act, *15 U.S.C.S. §§ 1331-40* preempts fraudulent misrepresentation claims that merely allege that cigarette companies should have included additional or more clearly stated warnings in their advertisements. Claims of fraud by intentional misstatement are not preempted because they are predicated not on a duty based on smoking and health but rather on a more general obligation: the duty not to deceive.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Express Warranties

Torts > ... > Duty > Affirmative Duty to Act > Voluntary Assumption of Duty

Antitrust & Trade Law > Consumer Protection > Tobacco Products > General Overview

Antitrust & Trade Law > Consumer Protection > Tobacco Products > Federal Cigarette Labeling & Advertising Act

Communications Law > ... > Regulated Practices > Content Regulation > Advertising

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

Torts > Procedural Matters > Preemption > General Overview

HN17[] **Types of Contracts, Express Warranties**

A common-law remedy for a contractual commitment voluntarily undertaken should not be regarded as a requirement imposed under state law. The predicate duty is imposed not by the state, but by the party assuming the obligation. Claims based on voluntarily assumed obligations, then, are not preempted because they do not fall within the language of the Cigarette Labeling and Advertising Act, *15 U.S.C.S. §§ 1331-40*.

Antitrust & Trade Law > Consumer Protection > Tobacco Products > State Regulation

Communications Law > ... > Regulated Practices > Content Regulation > Advertising

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

Antitrust & Trade Law > Consumer Protection > Tobacco Products > General Overview

Torts > Procedural Matters > Preemption > General Overview

HN18[] **Tobacco Products, State Regulation**

A fair but narrow reading of the Cigarette Labeling and Advertising Act, *15 U.S.C.S. §§ 1331-40*, reveals that a claim of unjust enrichment is not within the statute's reach for preemption purposes.

Criminal Law & Procedure > Criminal Offenses > Obstruction of Administration of Justice > General Overview

HN19[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Racketeer Influenced and Corrupt Organizations Act authorizes private civil actions by any person injured in his business or property by reason of, *18 U.S.C.S. § 1964(c)*, a pattern of racketeering activity, *18 U.S.C.S. § 1962*, such as fraud or obstruction of justice. *18 U.S.C.S. § 1961*.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Governments > Legislation > Interpretation

HN20[] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

In an action brought pursuant to the Racketeer Influenced and Corrupt Organizations Act, standing requires more than mere causation: There is also the issue of statutory intent. To satisfy the requirement, the plaintiffs must show both that they are within the class the statute sought to protect and that the harm done was one that the statute was meant to prevent.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN21[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

Only the direct targets of a racketeering scheme have standing as intended beneficiaries of the Racketeer Influenced and Corrupt Organizations Act.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

International Trade Law > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN22[] Private Actions, Remedies

Federal ***antitrust law*** authorize private civil actions by any person injured in his business or property by reason of anything forbidden in the antitrust laws. *15 U.S.C.S. § 15*. Those laws forbid every contract, combination, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN23[] Private Actions, Remedies

New York ***antitrust law*** prohibits every contract, agreement, arrangement or combination whereby competition or the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service is or may be restrained. Donnelly Act, N.Y. Gen. Bus. Law § 340.1 (1988).

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN24[] Private Actions, Remedies

An antitrust violation is an agreement in restraint of trade that causes injury of the type the antitrust laws were intended to prevent. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN25[] Private Actions, Standing

Antitrust claims must be dismissed because plaintiffs are not within that area of the economy endangered by the breakdown of competitive conditions. The Second Circuit has adopted a "target area" test for determining antitrust standing: the plaintiff must either be the direct target of the alleged antitrust violation or fall within its target area. The target area is that sector of the economy endangered by a breakdown of competitive conditions in the particular industry.

Evidence > Burdens of Proof > Clear & Convincing Proof

Governments > Fiduciaries

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN26[] **Burdens of Proof, Clear & Convincing Proof**

Common law fraud may consist of either fraudulent misrepresentation or fraudulent concealment. To prove fraudulent misrepresentation under New York law, a plaintiff must show: 1) a material false representation, 2) intent to defraud the plaintiff thereby, 3) reasonable reliance on the representation, and 4) damage resulting from such reliance. Each element must be shown by clear and convincing evidence. To establish fraudulent concealment, a plaintiff must prove all of the above elements, and must show by clear and convincing evidence that the defendant had a duty to disclose the material information concealed as well. That duty may arise from the need to complete or clarify a partial or ambiguous statement, or from a fiduciary or confidential relationship between the parties. It may also arise where one party has superior knowledge of certain information, not readily available to the other party, and knows that the second party is acting on the basis of mistaken knowledge.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN27[] **Business Torts, Fraud & Misrepresentation**

New York follows a two-tier standard in determining whether reliance is reasonable. When matters are held to be peculiarly within defendant's knowledge, a plaintiff may rely on the defendant's statements without further investigation, as it has no independent means of ascertaining the truth. When misrepresentations concern matters not peculiarly within the defendant's knowledge, New York courts have often found no justifiable reliance, holding that if a plaintiff has the means of knowing, by the exercise of ordinary intelligence, the truth it must make use of those means.

Torts > ... > Duty > Affirmative Duty to Act > Failure to Act

Torts > ... > Elements > Duty > General Overview

Torts > ... > Duty > Affirmative Duty to Act > Voluntary Assumption of Duty

HN28[] **Affirmative Duty to Act, Failure to Act**

Under certain circumstances the law imposes a duty of care on one who acts for the benefit of another, even in the absence of a contractual relationship. One who assumes to act, even though gratuitously, may thereby become subject to the duty of acting carefully, if he acts at all. If a duty of care exists, then a tort may result as well from acts of omission as of commission. Existence of a duty is a question of law for the court to decide.

Torts > ... > Elements > Duty > General Overview

HN29[] **Elements, Duty**

One who undertakes to render services to another that he should recognize as necessary for the protection of the other's person or things, is subject to liability to the other for physical harm resulting from his failure to exercise reasonable care if (a) his failure to exercise such care increases the risk of such harm, or (b) the harm is suffered because of the other's reliance upon the undertaking.

Torts > ... > Elements > Duty > General Overview

Torts > ... > Types of Damages > Property Damages > General Overview

HN30[] **Elements, Duty**

Economic loss or damage to property may give rise to an action for breach of an assumed duty.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN31[] **Federal & State Interrelationships, Erie Doctrine**

A federal court should not restrict a common law cause of action in a manner that the state courts have not required.

Torts > ... > Elements > Duty > General Overview

HN32[] **Elements, Duty**

An assumed duty arises once a person undertakes a certain course of conduct upon which another relies. In deciding whether a duty was assumed under New York law, the question is whether defendant's conduct placed plaintiff in a more vulnerable position than plaintiff would have been in had defendant done nothing.

Torts > ... > Duty > Affirmative Duty to Act > Voluntary Assumption of Duty

Torts > ... > Elements > Duty > General Overview

HN33[] **Affirmative Duty to Act, Voluntary Assumption of Duty**

While plaintiffs may recover for breach of any duty that defendants assumed on their behalf, they may not recover for breach of a duty assumed to another. A duty directly assumed for the benefit of a particular person or entity does not extend to third parties who were not the intended beneficiaries of the subject undertaking. Neither may plaintiffs recover for breach of a duty voluntarily assumed on behalf of the public generally. It is the responsibility of the courts to fix the orbit of duty within the limits dictated by both policy and logic.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN34[] **Types of Contracts, Quasi Contracts**

Liability for unjust enrichment rests on the equitable principle that a person shall not be allowed to enrich himself unjustly at the expense of another. A claim for unjust enrichment is available when the acts of the parties or others have placed in the possession of one person money under such circumstances that in equity and good conscience he ought not to retain it.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN35[] Types of Contracts, Quasi Contracts

To recover for unjust enrichment, plaintiffs must show that services were performed for the defendants resulting in unjust enrichment. It is not enough that the defendant received a benefit from the activities of the plaintiff; if services were performed at the behest of someone other than the defendant, the plaintiff must look to that person for recovery.

For Plaintiffs (97 CIV 4550, 97 CIV 4676): William S. Lerach, Patrick J. Coughlin, Allen M. Mansfield, MILBERG WEISS BERSHAD HYNES & LERACH LLP, San Diego, CA.

For Plaintiffs (97 CIV 4550, 97 CIV 4676): Robert J. Connerton, James S. Ray, John McN. Broaddus, CONNERTON & RAY, Washington, D.C.

For Plaintiffs (97 CIV 4550, 97 CIV 4676): Stephen Gordon, Joel Spivak, MIRKIN & GORDON, Great Neck, NY.

For Plaintiffs (97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Michael A. Ciaffa, G. Oliver Koppell, MEYER, SUOZZI, ENGLISH & KLEIN, P.C., Mineola, NY.

For Plaintiffs **[**2]** (97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Robert S. Schachter, Natalie Blaney, ZWERLING, SCHACHTER & ZWERLING, LLP, New York, NY.

For Plaintiffs (97 CIV 9399, 97 CIV 9401): LEVY, RATNER & BEHROOZI, p.c., New York, NY.

For Plaintiffs (97 CIV 9399, 97 CIV 9401): David Paul Horowitz, LAW OFFICE OF DAVID PAUL HOROWITZ, New York, NY.

For Philip Morris Incorporated, Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Peter C. Hein, Barbara Robbins, WACHTELL, LIPTON, ROSEN & KATZ, New York, New York.

For Philip Morris Incorporated, Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Paul K. Stecker, Paul F. Jones, PHILLIPS, LYTLE, HITCHCOCK, BLAINE & HUBER, Buffalo, New York.

For Brown & Williamson Tobacco Corporation, Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 **[**3]** CIV 9401, 97 CIV 9402): Marjorie Press Lindblom, Peter A. Bellacosa, KIRKLAND & ELLIS, New York, New York.

For Brown & Williamson Tobacco Corporation, Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): David M. Bernick, KIRKLAND & ELLIS, Chicago, Illinois.

For Brown & Williamson Tobacco Corporation, Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Kenneth N. Bass, Paul B. Taylor, KIRKLAND & ELLIS, Washington, D.C.

For R.J. Reynolds Tobacco Company, RJR Nabisco Holdings Corp., RJR Nabisco, Inc., Defendants (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Robert W. Gaffey, Michael S. Chernis, JONES, DAY, REAVIS & POGUE, New York, New York.

For R.J. Reynolds Tobacco Company, RJR Nabisco Holdings Corp., RJR Nabisco, Inc., Defendants (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV **[**4]** 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Robert F. McDermott, Jr., Donald B. Ayer, JONES, DAY, REAVIS & POGUE, Washington, D.C.

For B.A.T Industries p.l.c., Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Mark Cunha, Adam Stein, SIMPSON THACHER & BARTLETT, New York, New York.

For British-American Tobacco Company Ltd., Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9399, 97 CIV 9401): Mark Cunha, Adam Stein, SIMPSON THACHER & BARTLETT, New York, New York.

For British-American Tobacco Company Ltd., Defendant (97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9400, 97 CIV 9402): Thomas J. McCormack, Robert Pruyne, CHADBOURNE & PARKE, New York, NY.

For Lorrilard Tobacco Company, Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Alan E. Mansfield, GREENBERG, TRAURIG, HOFFMAN, LIPOFF, ROSEN & QUENTEL, New York, New York.

For Lorrilard Tobacco Company, Defendant (97 CIV 4550, 97 CIV **[**5]** 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Robert E. Northrip, Bruce R. Tepikian, Samuel B. Sebree, SHOOK, HARDY & BACON, L.L.P., Kansas City, Missouri.

For United States Tobacco Company, Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Peter J. McKenna, Eric S. Sarner, Mark S. Cheffo, SKADDEN, ARPS, SLATE, MEAGHER & FLOM LLP, New York, New York.

For The Tobacco Institute, Inc., Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Anthony Mansfield, SEWARD & KISSEL, New York, New York.

For The Council for Tobacco Research-U.S.A., Inc., Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Steven Klugman, DEBEVOISE & PLIMPTON, New York, New York.

For Liggett Group, Inc., Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, **[**6]** 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Michael M. Fay, KASOWITZ, BENSON, TORRES & FRIEDMAN, New York, New York.

For Hill & Knowlton, Inc., Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Bruce M. Ginsberg, Michael C. Lasky, DAVIS & GILBERT, New York, New York.

For Smokeless Tobacco Council, Inc., Defendant (97 CIV 4550, 97 CIV 4676, 97 CIV 7346, 97 CIV 8462, 97 CIV 9395, 97 CIV 9396, 97 CIV 9397, 97 CIV 9398, 97 CIV 9399, 97 CIV 9400, 97 CIV 9401, 97 CIV 9402): Barry S. Schaevitz, JACOB, MEDINGER & FINNEGAN, LLP, New York, New York.

Opinion by: Shira A. Scheindlin

Opinion

[*282] OPINION AND ORDER

SHIRA A. SCHEINDLIN, U.S.D.J.:

I. Background

Plaintiffs are labor union health and welfare trust funds (the "Funds") that supplement employers' basic medical benefits by providing death, disability and prescription drug benefits and related services. Defendants are tobacco companies and tobacco public relations firms. Plaintiffs allege that defendants have **[**7]** engaged in a conspiracy to deceive the general public, including plaintiffs, as to the health risks associated with smoking, the addictiveness of nicotine, and the levels of nicotine in their products. As a result, plaintiffs allege, they have spent millions of dollars more than they otherwise would have to provide medical benefits to health plan participants. The Funds have brought this action "to recover money expended . . . to provide medical treatment to their participants and beneficiaries who have suffered and are suffering from tobacco-related illnesses and to obtain appropriate injunctive relief." Class Action Complaint and Demand for Jury Trial P 7, Laborers Local 17 Health & Benefit Fund v. Philip Morris, Inc., No. 97 Civ. 4550 (S.D.N.Y. filed June 19, 1997) [hereinafter Compl.]. [1] Plaintiffs allege RICO and antitrust violations, and assert common law claims for fraud, breach of special duty, and unjust enrichment.

[8]** Defendants have moved to dismiss the action under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim. They contend that plaintiffs have no direct claim against defendants for three reasons: 1) as a matter of law, the chain of causation between plaintiffs' injuries and defendants' alleged acts is too attenuated to support a verdict for plaintiffs, because the alleged injuries are only remotely connected to defendants' alleged acts, 2) plaintiffs' sole remedy is by subrogation to their participants' claims, and 3) the federal Cigarette Labeling and Advertising Act preempts all of plaintiffs' common law claims. Defendants also raise additional count-specific objections to each of plaintiffs' claims.

II. Jurisdiction

HN1[] This Court has subject matter jurisdiction over the action pursuant to *28 U.S.C. §§ 1331*, *1337 (1994)* because Counts I-III of the complaint raise questions of federal law. Supplemental jurisdiction over the state claims raised in Counts IV-X is asserted because the federal and state claims both derive from "a common nucleus of operative fact." *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*; *Promisel v. First Am. **[**9]** Artificial Flowers, Inc., 943 F.2d 251, 254 (2d Cir. 1991)*; *28 U.S.C. § 1367(a) (1994)*.

III. Legal Standard for Motion to Dismiss

HN2[] In deciding a motion to dismiss under *Rule 12(b)(6)*, the court must accept all material facts alleged in the complaint as true and must draw all reasonable inferences in the nonmovant's favor. See *Kaluczky v. City of White*

---

[1] Defendants presented their substantive arguments in memoranda filed in United Federation of Teachers Welfare Fund v. Philip Morris, Inc., No. 97-4676 (S.D.N.Y. filed June 25, 1997). Defendants' papers in Laborers Local 17 incorporate those arguments by reference. The reverse is true for plaintiffs. Accordingly, this opinion will refer to defendants' UFT opening and reply memoranda and to plaintiffs' Laborers Local 17 opposition brief. See Memorandum in Support of Defendants' Motion to Dismiss the Complaint for Failure to State a Claim, United Federation of Teachers Welfare Fund v. Philip Morris, Inc., No. 97-4676 (S.D.N.Y. filed June 25, 1997) (dated Oct. 17, 1997) [hereinafter Defs.' Mem.]; Plaintiffs' Memorandum of Law in Opposition to Defendants' Motion to Dismiss the Complaint, Laborers Local 17 Health & Benefit Fund v. Philip Morris, Inc., No. 97 Civ. 4550 (S.D.N.Y. filed June 19, 1997) (dated Dec. 5, 1997) [hereinafter Pls.' Mem.]; Memorandum in Support of Defendants' Motion to Dismiss the Complaint for Failure to State a Claim, United Federation of Teachers Welfare Fund v. Philip Morris, Inc., No. 97-4676 (S.D.N.Y. filed June 25, 1997) (dated Jan. 27, 1998) [hereinafter Reply].

Plains, 57 F.3d 202, 206 (2d Cir. 1995). The court may not grant the motion merely because recovery seems remote or unlikely. *Bernheim v. Litt, 79 F.3d 318, 321 (2d Cir. 1996)* (quoting *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974))*. A complaint should not be dismissed for failure to state a claim unless "it **[*283]** appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." Id. (quoting *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957))*.

IV. Discussion

In recent months, state and federal courts have seen an explosion of civil actions arising from the use, marketing or sale of tobacco products. To date over forty states have filed suit, as have cities, counties, and private third-party **[**10]** payors, all attempting to recover the cost of treating tobacco-related diseases. See Proposed Tobacco Industry Settlement, Preamble, P 22 (June 20, 1997). All of these cases address common questions: If in fact the tobacco industry is liable for the cost of tobacco-related disease, to whom should it be held responsible?

As the contents of the tobacco industry's internal research and marketing documents become increasingly available to the general public, some have become convinced that the tobacco industry should be held liable for the entire cost of tobacco-related disease, however that cost was incurred. [2] Whether an industry should be penalized for successfully marketing a legal product is certainly an interesting question, but it is beyond the scope of any single lawsuit. Policymaking on such a scale is ordinarily left to the legislature; in fact, there are various proposals before Congress that would "mandate a total reformation and restructuring of how tobacco products are manufactured, marketed, and distributed in this country." Proposed Tobacco Industry Settlement, Preamble P 1. [3] The issue addressed here, in contrast, is much more limited: to determine whether and **[**11]** how defendants should be held responsible to these particular plaintiffs.

As a result, allegations that the defendants have marketed their products to children, that these products are unreasonably dangerous, or that they have inflicted harm on individual smokers are not relevant here. Nor are claims of harm to society or to plaintiffs as members of the general public. Rather, ***HN3***[] as fundamental principles of **[**12]** proximate cause dictate, plaintiffs may only recover for injuries that they have suffered. If those injuries were caused by defendants, then defendants should indeed be held responsible. But plaintiffs have no standing to vindicate the public's rights. When stripped to the basics, the issues in this litigation are relatively simple: To the extent that plaintiffs have alleged that defendants have harmed them *directly*, they have stated a claim on which relief may be granted.

A. Do plaintiffs have a direct claim against defendants?

Because the issue of proximate cause is central to the disposition of this case, I will discuss it in some detail before addressing plaintiffs' state and federal claims individually.

1. Proximate Cause

Defendants' fundamental argument is that plaintiffs have no direct claim against them because they did not proximately cause plaintiffs' injuries. ***HN4***[] In general terms, the concept of "proximate cause" prevents a recovery from a party for remote and derivative injuries to a plaintiff resulting from that party's conduct toward another. See, e.g., *Holmes v. Sec. Investor Protection Corp., 503 U.S. 258, 268-69, 117 L. Ed. 2d 532, **[**13]** 112 S. Ct. 1311 (1992)*; *Mobile Life Ins. Co. v. Brame, 95 U.S. 754, 758-59, 24 L. Ed. 580 (1877)*. Under the common law, therefore, one who pays the medical expenses of another may not recover those expenses from the third-party

[2] See, e.g., Blue Cross Blue Shield of Minnesota, Tobacco Web Site (visited Mar. 19, 1998) <*www.mnbluecrosstobacco.com*> (publishing trial exhibits in State by Humphrey v. Philip Morris Inc., No. C1-94-8565 (Minn. filed Aug. 17, 1994)).

[3] See also Tobacco Sales to Minors Prevention, S. 1713, 105th Cong. (1997); Public Health Service Act, S. 1648, 105th Cong. (1997); Tobacco Products vs. Children, S. 1638, 105th Cong. (1997); Tobacco Quota Fluctuations, H.R. 3264, 105th Cong. (1997); Federal Fund Expenditure Under Tobacco Settlements, H.R.J. Res. 109, 105th Cong. (1997).

tortfeasor who caused the damage. See, e.g., *Associated Gen. Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 532 n.25, 74 L. Ed. 2d 723, 103 S. Ct. 897 [*284] (1983)* (citing 1 J. Sutherland, Law of Damages 55-56 (1882)); *Anthony v. Slaid, 52 Mass. 290, 291 (1846)* (plaintiff who undertook to support town paupers could not recover from tortfeasor who assaulted pauper, increasing plaintiff's expenses, as damages were too remote). Plaintiffs have alleged that defendants deceived them about the dangers of tobacco, inhibiting plaintiffs' ability to minimize health-care expenses, and shifting the cost of tobacco-related disease to the plaintiffs. See, e.g., Compl. PP 269-74. Defendants maintain that plaintiffs' claims are no different from those rejected in Anthony v. Slaid, and that the alleged injuries, though worded as direct claims, are equally remote.

The question of when an alleged injury becomes too remote to allow **[**14]** recovery is often difficult. "Because of convenience, of public policy, of a rough sense of justice, ***HN5***[] the law arbitrarily declines to trace a series of events beyond a certain point." *Palsgraf v. Long Island R. Co., 248 N.Y. 339, 352, 162 N.E. 99 (1928)* (Andrews, J. dissenting). [4] That point is reached when "the connection between the defendants' negligence and the claimants' damages [becomes] too tenuous and remote to permit recovery." *Kinsman Transit Co. v. City of Buffalo, 388 F.2d 821, 824-25 (2d Cir. 1968)*. While "a variety of factors may be relevant in assessing legal [proximate] cause," in order to plead a prima facie case, a plaintiff is generally required to "show that the defendant's negligence was a substantial cause of the events which produced the injury." *Derdiarian v. Felix Contracting Corp., 51 N.Y.2d 308, 315, 434 N.Y.S.2d 166, 414 N.E.2d 666 (1980)*; accord *Nallan v. Helmsley-Spear, Inc., 50 N.Y.2d 507, 520, 429 N.Y.S.2d 606, 407 N.E.2d 451 (1980)*. If such a showing is made, no intervening acts -- for example, the decision of plan participants to smoke -- will break the causal connection if such acts are a reasonably foreseeable result of the **[**15]** defendants' negligence. *Derdiarian, 51 N.Y.2d at 315*; *Stephenson by Coley v. S.C. Johnson & Son, Inc., 168 Misc. 2d 528, 638 N.Y.S.2d 889, 892 (Sup. Ct. N.Y. Co. 1996)*, aff'd, *239 A.D.2d 402, 658 N.Y.S.2d 636* (2nd Dep't 1997).

HN6[] Other factors that courts may consider when determining proximate cause in intentional tort cases include: 1) the defendant's intent to do harm, 2) the degree of moral wrong involved, and 3) the seriousness of the harm originally intended. *Restatement (Second) of Torts § 435B* (1965). These factors are considered because the greater the intent to harm, the more foreseeable it is that harm will result.

These general principles govern all common-law claims, including the intentional torts alleged in the complaint. **[**16]** They also apply to plaintiffs' statutory claims. Congress intended that antitrust litigation "would be subject to constraints comparable to well-accepted common-law rules applied in comparable litigation[,]" including rules defining proximate cause. *Associated Gen. Contractors, 459 U.S. at 533*. New York's antitrust statute, the Donnelly Act, has been interpreted similarly. *Anheuser-Busch, Inc. v. Abrams, 71 N.Y.2d 327, 335, 525 N.Y.S.2d 816, 520 N.E.2d 535 (1988)* (Donnelly Act "should generally be construed in light of Federal precedent"); *Van Dussen-Storto Motor Inn, Inc. v. Rochester Tel. Corp., 63 A.D.2d 244, 407 N.Y.S.2d 287, 293* (4th Dep't 1978) (defining proximate cause under Donnelly Act by citing to federal precedent); see also *Tri-Star Pictures, Inc. v. Leisure Time Productions, B.V., 1992 U.S. Dist. LEXIS 15232, 1992 WL 296314*, at *6 (S.D.N.Y. 1992), aff'd, *17 F.3d 38 (2d Cir. 1994)* (citing Van Dussen-Storto Motor Inn) (proximate cause under Donnelly Act). The same proximate cause constraints apply to RICO claims. *Holmes, 503 U.S. at 268*; *Hecht v. Commerce Clearing House, Inc., 897 F.2d 21, 23-24 (2d Cir. 1990)* (RICO violations "proximately cause a plaintiff's injury **[**17]** if they are a substantial factor in the sequence of responsible causation, and if the injury is reasonably foreseeable or anticipated as a natural consequence.").

[*285] The purpose of requiring a direct relationship between defendants' conduct and plaintiffs' injury is threefold. First, the more remote the injury, the more difficult it is to ascertain the amount of damages attributable to the defendants' acts, rather than to some other factor. *Holmes, 503 U.S. at 269*. Second, allowing indirectly injured

---

4

While not part of the majority opinion, the Andrews dissent is often quoted in discussions of proximate cause. See, e.g., *Associated Gen. Contractors, 459 U.S. at 537 n.34*; *Blue Shield of Va. v. McCready, 457 U.S. 465, 478 n.13, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*.

plaintiffs to proceed creates the risk of multiple recoveries. Id. Third, those who are directly injured are in a better position to "vindicate the law as private attorneys general," without any of the problems found in suits based on more remote injuries. *Id. at 269-70*.

If all of plaintiffs' allegations regarding defendants' knowledge and intent are true -- and I must assume as much for the purposes of this motion -- then a jury could reasonably find that plaintiffs' injuries were foreseeable, and that defendants' behavior was a substantial cause of those injuries. For example, plaintiffs maintain that defendants knew how to manufacture a less harmful cigarette but did not **[**18]** do so because it would have compromised their litigation strategy. Compl. PP 125-39. One direct consequence of such a decision would be to limit plaintiffs' ability to reduce their health care costs by encouraging their participants to use less harmful tobacco products. The next step, then, is to analyze the policy factors enunciated in Holmes to determine whether plaintiffs' injuries are too remote for recovery as a matter of law.

First, are there other parties better suited to act as "private attorneys general"? Individual smokers and public agencies have an incentive equal to that of the plaintiffs' to "prosecute" defendants for deceiving the public about the dangers of tobacco. None, however, would have a strong interest in vindicating the harm to plaintiffs -- their reduced ability to minimize health-care expenses and their assumption of the financial burden of tobacco-related disease among plan participants. There is a substantial risk that those harms will go unremedied if this action is not allowed to continue.

Next, is there a risk of multiple recoveries for the same harm? Plaintiffs are correct in arguing that there is not. No other party may recover for harm to the **[**19]** Funds' infrastructure, financial stability, or ability to project costs. To the extent that the harm took the form of increased expenses for medical care, those costs will only be recovered once. ***HN7***[] Plan participants who bring personal injury actions against the defendants may not recover expenses that the Funds have already reimbursed. *N.Y. C.P.L.R. 4545(c)* (McKinney 1992). Conversely, as defendants' briefs discuss at length, plaintiffs may not recover for the personal injuries of their participants. Because costs borne only by the Funds are recoverable only by the Funds, there can be no risk of multiple recoveries.

Finally, will it be difficult to ascertain the damages caused by the defendants? Plaintiffs face a significant burden in the damages phase of litigation. Not only will they have to translate intangible concepts such as "reduced ability to minimize health-care expenses" into monetary figures, but they will have to propose a plausible method of separating damages caused by defendants from damages caused by other factors. Ultimately, ***HN8***[] plaintiffs may not be able to sustain their burden of proof. That does not mean, however, that they should not be allowed to make the attempt. **[**20]** See Texas v. American Tobacco Co., No. 5-96-CV-91, slip op. at 17 (difficulty in and of itself does not bar action).

HN9[] Proximate cause is ordinarily a question for the fact finder to resolve. *Derdiarian, 51 N.Y.2d at 314-15*; *Nallan, 50 N.Y.2d at 520*. "Obviously there is a substantial difference between alleging something and proving it." Arizona v. American Tobacco Co., Inc., No. CV-96-14769, slip op. at 2 (Ariz. Super. Ct. May 27, 1997) (order denying motion to dismiss and holding that proximate cause was not precluded by the "very nature" of claimed damages). ***HN10***[] Nonetheless, "the issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*. A pleading will survive a motion to dismiss if it alleges a set of facts that would entitle the plaintiff to relief if proven. See *id. at 236*; **[*286]** *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. Plaintiffs have stated a prima facie case for several of their claims, as discussed in part IV.B below. While these claims may be difficult to prove, plaintiffs' **[**21]** claims of injury are not so remote as to warrant dismissal at this stage.

2. Subrogation

Defendants maintain that because plaintiffs' claims are indirect, their only remedy is by suing as subrogees of any plan participants harmed by the defendants. ***HN11***[] In general, subrogation is a legal device that enables one party (the "subrogee") to put itself in the place of a party who has sustained an injury in order to obtain recovery.

Subrogation may be available either through statute or private agreement. Plaintiffs here have no statutory right to subrogation; however, many of their employee benefit plan contracts contain subrogation provisions. See, e.g., Defs.' Mem. at 2 (quoting benefit plan for participants in the United Federation of Teachers Welfare Fund). As subrogees, plaintiffs would "stand in the shoes" of the injured participants, and their claims would be subject to the same affirmative defenses, such as assumption of risk, as would apply in actions brought by the harmed individuals.

Some courts in other tobacco-related cases have held that subrogation is the exclusive remedy against these defendants. However, in each of those cases, the right of subrogation **[**22]** arose by statute, not by private contract. Iowa v. R.J. Reynolds, No. CL71048 (Iowa Dist. Ct. Aug. 26, 1997); Maryland v. Philip Morris Inc., 1997 WL 540913 (Md. Cir. Ct. 1997); McGraw v. American Tobacco Co., No. 94-C1707 (W.Va. Cir. Ct. Mar. 31, 1997) (orders denying motions to dismiss on subrogation grounds). Iowa, Maryland, and West Virginia sued tobacco companies to recover the cost of providing health care to their citizens. In each case, the court relied on the principle that where there is a statutory remedy, that remedy is exclusive unless the statute indicates otherwise. Each court concluded that the applicable state Medicaid statute, which created a right of subrogation, was intended to provide an exclusive remedy for the State. Iowa, No. CL71048, slip op. at 6-7; Maryland, 1997 WL 540913 at *3; McGraw, No. 94-C1707, slip op. at 5. Courts applying other statutes have reached the opposite conclusion on the ground that the language in their State Medicaid statutes created a cumulative, rather than an exclusive remedy. Texas v. American Tobacco Co., No. 5-96CV-91, slip op. at 10-11 (E.D. Tex. Sept. 8, 1997) (statutory remedy does not extinguish prior **[**23]** common law cause of action unless it does so explicitly); Illinois v. Philip Morris, Inc., No. 96L13146, slip op. at 5 (Ill. Cir. Ct. Nov. 13, 1997) (nothing in the statute limits the State to subrogation) (orders partially granting motions to dismiss). Neither analysis is directly applicable here, as New York's Medicaid statute does not apply to these plaintiffs.

HN12[] There is no statute establishing subrogation as plaintiffs' exclusive remedy. Instead, plaintiffs' subrogation rights were created by private contracts with plan participants. Such rights cannot limit the Funds' ability to recover from those not party to the agreements. Thus, if plaintiffs have stated valid causes of action, the fact that they may also be entitled to sue in subrogation would not extinguish them.

3. Preemption

Defendants argue in the alternative that plaintiffs' common law claims have been preempted by the federal Cigarette Labeling and Advertising Act. *15 U.S.C. §§ 1331-40 (1994)* [hereinafter "the Act"]. ***HN13***[] The Act mandates certain uniform warning labels on cigarette packaging and preempts all State regulation of tobacco advertising: ***HN14***[] "No statement or prohibition based on smoking and health **[**24]** shall be imposed under State law with respect to the advertising or promotion of any cigarettes the packages of which are labeled in conformity with the provisions of this chapter." Id. *§ 1334(b)*. Defendants contend that this language preempts plaintiffs' fraud, breach of special duty, and unjust enrichment claims, which are New York common law causes of action.

The controlling decision addressing the scope of the preemption provision is *Cipollone **[*287]** v. Liggett Group, Inc., 505 U.S. 504, 120 L. Ed. 2d 407, 112 S. Ct. 2608 (1992)* (plurality opinion). Cipollone held that ***HN15***[] common law rules impose "requirements or prohibitions" within the meaning of the Act because they are "premised on the existence of a legal duty." *Id. at 522*. The Act, therefore, applies to common law claims. *Id. at 523* (Scalia and Thomas, JJ., concurring in relevant part). To determine whether a particular claim is preempted, the court must "ask whether the legal duty that is the predicate of the common-law damages action constitutes a 'requirement or prohibition based on smoking and health . . . imposed under State law with respect to advertising or promotion,' giving that clause a fair but narrow **[**25]** reading." *Id. at 523-24*.

Count V of the complaint alleges that defendants intentionally "misrepresented, failed to disclose and concealed material facts" about the hazards of tobacco use. Compl. P 265. ***HN16***[] The Act preempts fraudulent misrepresentation claims that merely allege that defendants should have included additional or more clearly stated warnings in their advertisements. *Cipollone, 505 U.S. at 524*. Plaintiffs, however, allege intentional fraud, both by false representation and by concealment of material facts. Cipollone expressly held that claims of fraud by intentional misstatement are not preempted because they "are predicated not on a duty 'based on smoking and health' but rather on a more general obligation: the duty not to deceive." *Id. at 528-29* (Blackmun, Kennedy, and Souter, JJ., concurring in the judgment in relevant part); see also State by Humphrey v. Philip Morris Inc., No. C1-94-8565 (Minn. Feb. 2, 1998); DaSilva v. American Tobacco Co., 1997 WL 810807 at *3 (Sup. Ct. N.Y. Co. 1997); *Small v. Lorillard Tobacco Co., Inc., 175 Misc. 2d 294, 668 N.Y.S.2d 307 (Sup. Ct. N.Y. Co. 1997)* (denying motions to dismiss on preemption grounds). **[**26]** The Act, therefore, does not bar plaintiffs' fraud claims.

Count VI states that defendants voluntarily assumed a special duty to protect the public health and to provide information about the effects of tobacco use. Compl. P 279. Cipollone did not discuss preemption of special duty claims. In the related context of express warranties, however, the Court concluded that ***HN17***[] "a common-law remedy for a contractual commitment voluntarily undertaken should not be regarded as a 'requirement . . . imposed under State law.'" *Cipollone, 505 U.S. at 526* (quoting *15 U.S.C. § 1334(b)*). The predicate duty is imposed not by the State, but by the party assuming the obligation. *Id. at 525*. Claims based on voluntarily assumed obligations, then, are not preempted because they do not fall within the language of the Act. *Id. at 525-26* (Blackmun, Kennedy, and Souter, JJ., concurring in the judgment in relevant part); State by Humphrey v. Philip Morris Inc., No. C1-94-8565 (Minn. Feb. 2, 1998) (order finding no preemption). Count VI is not preempted because the special duty that it alleges is one that would have been voluntarily assumed by defendants rather than one imposed by the State. **[**27]**

Plaintiffs' final common law claim is for unjust enrichment. Compl. PP 308-15. Plaintiffs allege that by paying their participants' tobacco-related medical costs, they have conferred a benefit on the defendants that the defendants should repay. Compl. PP 313-14. Payment of medical costs is unrelated to the "advertising and promotion" of tobacco. Assuming for the moment that plaintiffs' payments created a valid unjust enrichment claim, ***HN18***[] a "fair but narrow reading" of the Act, *Cipollone, 505 U.S. at 524*, reveals that such a claim is not within the statute's reach. Accordingly, the Cigarette Labeling and Advertising Act does not preempt any of plaintiffs' common law claims.

B. Have plaintiffs stated a prima facie case for each claim?

In addition to urging the court to dismiss the entire complaint on remoteness grounds, defendants raise count-specific objections to each of plaintiffs' federal and state claims. I will address each of these in turn.

[*288] 1. RICO

HN19[] RICO authorizes private civil actions by "any person injured in his business or property by reason of," *18 U.S.C. § 1964(c) (1994)*, "a pattern of racketeering activity" id. *§ 1962*, such as fraud **[**28]** or obstruction of justice. See id. *§ 1961*. As discussed above, plaintiffs' showing of factual and proximate cause is sufficient to survive a motion to dismiss. ***HN20***[] In an action brought pursuant to statute, however, standing requires more than mere causation: There is also the issue of statutory intent. To satisfy the requirement, "the plaintiff[s] must show both that [they are] within the class the statute sought to protect and that the harm done was one that the statute was meant to prevent." *Abrahams v. Young & Rubicam Inc., 79 F.3d 234, 237 (2d Cir. 1996)*.

Counts I and II describe the sort of "pernicious commercial practices" that RICO was intended to prevent. See *Ehrich v. B.A.T. Indus. P.L.C., 964 F. Supp. 164, 166-67 (D.N.J. 1997)* (quoting *Cuzzupe v. Paparone Realty Co., 596 F. Supp. 988, 991 (D.N.J. 1984)* (RICO designed to eliminate commercial practices, not personal injuries)). In Count I, plaintiffs allege that the defendant tobacco companies violated *§ 1962(c)* by conducting certain enterprises through a pattern of racketeering activity, including mail and wire fraud, perjury, and obstruction of justice. Compl. PP 212-25. Two or more of these acts constitute **[**29]** "racketeering" if they occur often enough to comprise a pattern of activity. [5] The enterprises identified are the Tobacco Institute, the Council for Tobacco Research, and a "public relations enterprise" that amounted to an association-in-fact in which all defendants participated. Plaintiffs'

[5] Defendants do not dispute the adequacy of plaintiffs' allegations regarding the "pattern" element.

RICO Statement at 38-39, Laborers Local 17 Health & Benefit Fund v. Philip Morris, Inc., No. 97 Civ. 4550 (S.D.N.Y. filed June 19, 1997) (dated Sept. 15, 1997) [hereinafter RICO Statement]. Count II alleges that defendants used income derived from that pattern of racketeering activity to acquire and operate the Tobacco Institute and the Council for Tobacco Research, in violation of *§ 1962(a)*. Compl. PP 226-33. The complaint also alleges a RICO conspiracy. [6] See *18 U.S.C. § 1962(d)*.

[30]** The question, then, is whether plaintiffs fall within RICO's protected "zone-of-interests." See *Holmes, 503 U.S. at 287* (Scalia, J., concurring). ***HN21***[] Only the direct targets of a racketeering scheme have standing as intended beneficiaries of the RICO laws. *Abrahams, 79 F.3d at 238* (plaintiff's injuries "did not flow from the harms that the predicate acts . . . were intended to cause and the laws against them were intended to prevent"); *In re American Exp. Co. Shareholder Litigation, 39 F.3d 395, 400 (2d Cir. 1994)* (shareholders harmed by public exposure of RICO violations aimed at competitor not intended targets of violations); *Hecht, 897 F.2d at 24* (salesman had no RICO claim where employer's fraud drove potential customers away); cf. *Standardbred Owners Assoc. v. Roosevelt Raceway Assoc., 985 F.2d 102, 104 (2d Cir. 1993)* (plaintiffs were direct targets of fraudulent schemes). Plaintiffs maintain that they, along with their participants and others, were among the direct targets of the fraud alleged. In support of that statement, they claim that defendants made "deliberate efforts . . . to give Plaintiffs . . . the materially false impression that there are no negative **[**31]** health consequences to tobacco use, . . . that nicotine is not addictive and that the Tobacco Companies are not manipulating the nicotine levels in their products." Compl. P 211; RICO Statement at 35-36. An alleged object of defendants' conduct "was the avoidance and shifting of tobacco-related health care costs onto others, including Plaintiffs." Compl. P 224; accord RICO Statement at 33, 46. Because these allegations demonstrate that plaintiffs do have standing, their RICO claims are sufficient to withstand a motion to dismiss.

Defendants argue that, causation issues aside, plaintiffs' RICO claims must be dismissed as a matter of law because "all of the **[*289]** Funds' claimed injuries result from alleged personal injuries to their participants," rather than injuries to business or property. Defs.' Mem. at 13. They particularly rely on the holding in *City and County of San Francisco v. Philip Morris, Inc., 957 F. Supp. 1130 (N.D. Cal. 1997)* [hereinafter San Francisco I], in which local governments sought to recover the cost of treating indigent residents suffering from tobacco-related diseases. There, the court dismissed the RICO claim with leave to amend, finding that **[**32]** plaintiffs' claims were "wholly derivative" of those of the individual smokers. [7] *Id. at 1139*. As a result, plaintiffs' injuries consisted only of the economic consequences of personal injuries, which are not compensable under RICO, and that plaintiffs therefore had failed to meet the proximate cause requirements outlined in Holmes. *Id. at 1138*.

When defendants argue that plaintiffs' claims are derived from personal injuries, they are simply repeating their argument that plaintiffs' injuries are too remote. By determining that plaintiffs have adequately alleged proximate cause, I have already concluded that plaintiffs' claims are not based on the personal injuries of their participants. See part IV.A.2. Instead, they **[**33]** are based on the harm to plaintiffs' infrastructure and financial stability caused by defendants' alleged attempts to deceive the plaintiffs. As a result, they do allege an injury to business or property, as the statute requires. Thus, defendants' motion to dismiss Counts I and II is denied.

2. Antitrust

HN22[] Federal ***antitrust law*** authorizes private civil actions by "any person . . . injured in his business or property by reason of anything forbidden in the antitrust laws[.]" *15 U.S.C. § 15 (1994)*. Those laws forbid "every contract, combination . . ., or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations[.]" Id. *§ 1*. ***HN23***[] New York ***antitrust law*** prohibits "every contract, agreement, arrangement or

[6] See *Salinas v. United States, 522 U.S. 52, 118 S. Ct. 469, 477-78, 139 L. Ed. 2d 352 (1997)* (RICO conspiracy exists if alleged conspirator knew of conspiracy's goals and agreed to facilitate them).

[7] Plaintiffs did not pursue the RICO claim in their Second Amended Complaint. City and County of San Francisco v. Philip Morris, Inc., No. C-26-2090 (N.D. Cal. Mar. 3, 1998) (order denying motion to dismiss second amended complaint) [hereinafter San Francisco II].

combination whereby . . . competition or the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service . . . is or may be restrained." Donnelly Act, N.Y. Gen. Bus. Law § 340.1 (McKinney 1988). As discussed in part IV.B.1 above, I have already concluded that plaintiffs, claims are for injuries to business or property that are not so remote as to prevent recovery. Standing **[**34]** thus depends on whether defendants' alleged acts constitute an antitrust violation and on whether plaintiffs are within the class the antitrust laws seek to protect. *McCready, 457 U.S. at 473*; see also *Abrahams, 79 F.3d at 237*.

HN24[] An antitrust violation is an agreement in restraint of trade that causes "injury of the type the antitrust laws were intended to prevent . . . . The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*; see also *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 125, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)* (injury should be "the type of loss that the claimed violations of the antitrust laws would be likely to cause.").

In Count III, plaintiffs allege that defendants conspired to restrain trade in the market for tobacco products by agreeing to eliminate competition in the research, development, production and marketing of safer alternative tobacco products. Compl. PP 240-41. [8] Conduct suppressing product innovation and development has an anticompetitive **[**35]** effect. See, e.g., *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*; *American Soc'y of Mechanical Eng'rs, Inc. v. Hydrolevel Corp., 456 U.S. 556, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982)* (refusal of standard-setting organizations to approve new products was anticompetitive); cf. Associated **[*290]** *Gen. Contractors, 459 U.S. at 528* ("Coercive activity that prevents its victims from making free choices between market alternatives is inherently destructive of competitive conditions . . . ."). In this respect, Count III alleges a violation of the type the antitrust laws are intended to prevent. [9]

[36]** Although plaintiffs have alleged an antitrust violation, their ***HN25***[] antitrust claims must be dismissed because plaintiffs are not "within that area of the economy . . . endangered by [that] breakdown of competitive conditions." *McCready, 457 U.S. at 480* (quoting *In re Multidistrict Vehicle Air Pollution, 481 F.2d 122, 129 (9th Cir. 1973))*. The Second Circuit has adopted a "target area" test for determining antitrust standing: the plaintiff must either be the "direct target" of the alleged antitrust violation or fall within its "target area." *Crimpers Promotions Inc. v. Home Box Office, Inc., 724 F.2d 290, 292 (2d Cir. 1983)* (citing *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292 (2d Cir. 1971)*; *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183 (2d Cir. 1970))*. The target area is that sector of the economy endangered by a breakdown of competitive conditions in the particular industry. Id. Plaintiffs have not alleged that they were a direct target of defendants' acts, or that they are within the target area of those acts.

Plaintiffs allege that defendants agreed to forego the development of safer alternative tobacco products. **[**37]** The direct targets of such an agreement, if it exists, are obviously consumers of tobacco products. The target area is the tobacco sector of the economy in that the unlawful agreement to suppress development would result in a market where neither demand nor prices would be governed by market forces. Plaintiffs claim that as a result of defendants' conduct, medical costs for their participants with tobacco-related diseases have increased. This is not an injury created by endangering competition in the target area. In fact, it is not clear that plaintiffs' interests would be served by enhanced competition in the tobacco market. See *Associated Gen. Contractors, 459 U.S. at 539*.

---

[8] Count IV restates the allegations in Count III in the context of New York law.

[9] Other activities alleged in Count III, while possibly unlawful, do not constitute antitrust violations. Plaintiffs claim that defendants suppressed information that would otherwise have affected consumer behavior in the market for tobacco products, causing price inflation and increasing the demand for tobacco products. Compl. PP 238, 241. Creating increased demand for a product is not an anticompetitive activity. There can be no antitrust violation when the effect of an agreement is to increase competition, even if that agreement is unlawful for some other reason. *Brunswick, 429 U.S. at 488*; see also *McCready, 457 U.S. at 482*. Plaintiffs also claim that defendants restrained research and withheld information from participants in the market for health care. Compl. PP 248-49, 254. Such activities are not antitrust violations because they do not restrict competition among health care providers. ***Antitrust law*** forbids agreements in restraint of the flow of commerce, not the flow of information.

While stifled product innovation may have increased the number of participants with tobacco-related disease, plaintiffs also allege that anticompetitive pressures have increased the price of tobacco products, an effect which would tend to reduce the number of tobacco consumers. Therefore, as they were not targets of the anticompetitive activity alleged, plaintiffs do not have standing to pursue the claimed antitrust violation. Accordingly, defendants' motion to dismiss Counts III and IV is granted.

[38] 3. Fraud**

HN26[] Common law fraud may consist of either fraudulent misrepresentation or fraudulent concealment. Plaintiffs' fraud claim alleges both. To prove fraudulent misrepresentation under New York law, a plaintiff must show: 1) a material false representation, 2) intent to defraud the plaintiff thereby, 3) reasonable reliance on the representation, and 4) damage resulting from such reliance. Banque Arabe et *Internationale D'Investissement v. Maryland Nat'l Bank, 57 F.3d 146, 153 (2d Cir. 1995)*; *Mallis v. Bankers Trust Co., 615 F.2d 68, 80 (2d Cir. 1980)*. Each element must be shown by clear and convincing evidence. Banque Arabe, 57 F.3d at 153. To establish fraudulent concealment, a plaintiff must prove all of the above elements, and must show by clear and convincing evidence that the defendant had a duty to disclose the material information concealed as well. Id. That duty may arise from **[*291]** "the need to complete or clarify [a] partial or ambiguous statement, or from a fiduciary or confidential relationship between the parties." *Id. at 155* (citations omitted). It may also arise where one party has superior knowledge of certain information, not readily available **[**39]** to the other party, and knows that the second party is acting on the basis of mistaken knowledge. Id.

Count V alleges that plaintiffs relied on statements in which defendants promised to disclose all material information discovered about the effects of tobacco on human health. Compl. PP 274-75. Plaintiffs charge that despite that promise, defendants intentionally "misrepresented, failed to disclose and concealed material facts about the human health hazards of tobacco use." *Id. P 265*. They allegedly misrepresented those facts by making partial and incomplete statements concerning the health effects of smoking, *id. P 267*, and fraudulently concealed material facts by burying the results of secret tobacco research not readily available to the public, *id. P 266*. Plaintiffs claim that because they accepted the information they received from the defendants as true, they did not take action as quickly or as thoroughly as they otherwise would have. Instead, they depended on false and incomplete information when deciding what actions to take to reduce tobacco use among their participants. This reliance ultimately led to an increase in their health care costs. *Id. PP 269, **[**40]** 274*.

For the purposes of this motion, I must accept as true plaintiffs' allegations that defendants have been conducting secret research into the dangers of tobacco and that they have intentionally suppressed the negative results of that research. If so, then defendants have had superior knowledge of material information not readily available to the plaintiffs, and their public statements regarding the health effects of smoking have been, at best, incomplete. Under these circumstances, defendants would have had a duty to disclose the results of their research, as plaintiffs were conducting their business on the basis of incomplete knowledge of the dangers of tobacco.

Defendants argue that if plaintiffs relied on defendants' representations, that reliance was not justifiable because plaintiffs were sophisticated parties with access to many other sources of information. ***HN27***[] New York follows a two-tier standard in determining whether reliance is reasonable. When matters are held to be "peculiarly within defendant's knowledge," a plaintiff may rely on the defendant's statements without further investigation, "as [it] has no independent means of ascertaining the truth." *Mallis, 615 **[**41]** F.2d at 80*; *Lazard Freres & Co. v. Protective Life Ins. Co., 108 F.3d 1531, 1542 (2d Cir. 1997)*. "Indeed some cases have imposed liability in situations in which plaintiff could have determined the truth with relatively modest investigation." *Mallis, 615 F.2d at 80*. When misrepresentations concern matters not peculiarly within the defendant's knowledge, New York courts have often found no justifiable reliance, holding that if a plaintiff "has the means of knowing, by the exercise of ordinary intelligence, the truth . . . [it] must make use of those means." *Mallis, 615 F.2d at 80-81*; Banque Arabe, 57 F.3d at 156; *Lazard Freres, 108 F.3d at 1542*. Such decisions have generally involved plaintiffs who were "placed on guard or practically faced with the facts." *Mallis, 615 F.2d at 81*.

In the cases pending here, a jury could reasonably conclude that the truth about the health effects of tobacco was peculiarly within the defendants' knowledge. Plaintiffs maintain that defendants assumed responsibility for conducting and reporting tobacco research, and that they took steps to ensure that the public would not be able to obtain the negative results. Compl. PP 109-24. **[**42]** A jury accepting those allegations could find that it was justifiable for plaintiffs to accept the defendants' statements about tobacco as true without conducting an independent investigation. These are questions of fact that cannot be decided at this stage of the proceedings. For the same reason, it is not yet appropriate to reach the question of whether plaintiffs relied to their detriment on defendants' statements -- i.e., whether their costs would have been reduced had they known of the concealed information. Plaintiffs have set forth "circumstances constituting fraud" with sufficient particularity. See *Fed. R. Civ. P. 9(b)*. Whether they will be able to **[*292]** prove their claim is a matter reserved for the trier of fact. See San Francisco II, slip op. at 14-15 (order denying motion to dismiss fraud claim as pleaded in second amended complaint). Consequently, defendants' motion to dismiss Count V is denied.

4. Breach of Special Duty

HN28[] Under certain circumstances the law imposes a duty of care on one who acts for the benefit of another, even in the absence of a contractual relationship. "One who assumes to act, even though gratuitously, may thereby become subject to **[**43]** the duty of acting carefully, if he acts at all." *Glanzer v. Shepard, 233 N.Y. 236, 239, 135 N.E. 275 (1922)* (citations omitted); see also *Nallan, 50 N.Y.2d at 522* (quoting *Moch Co. v. Rensselaer Water Co., 247 N.Y. 160, 167-68, 159 N.E. 896 (1928))*. If a duty of care exists, then "a tort may result as well from acts of omission as of commission." *Moch, 247 N.Y. at 167*. Existence of a duty is a question of law for the court to decide. *Gerdowsky v. Crain's N.Y. Business, 188 A.D.2d 93, 593 N.Y.S.2d 514, 515* (1st Dep't 1993).

In Count VI, plaintiffs contend that defendants assumed a duty to "those who advance the public health" by promising to assist in research efforts and to provide complete information about smoking and health. Compl. PP 278-79. They allege that defendants' subsequent conduct demonstrated a lack of reasonable care in the performance of that duty. *Id. P 281*. Finally, they claim that they delayed taking action to reduce costs associated with tobacco-related disease because they relied on defendants' promises. *Id. PP 280-82*. As discussed above, a jury could reasonably conclude that defendants were in the best position to discover the truth **[**44]** about the health effects of tobacco. See pt. IV.B.4. Having done so, it could then reasonably find that it was justifiable for plaintiffs to rely on defendants' promises to seek out and publicize that information.

The Restatement (Second) of Torts summarizes the breach of special duty doctrine as follows:

> ***HN29***[] One who undertakes . . . to render services to another which he should recognize as necessary for the protection of the other's person or things, is subject to liability to the other for physical harm resulting from his failure to exercise reasonable care if
>
> (a) his failure to exercise such care increases the risk of such harm, or
>
> (b) the harm is suffered because of the other's reliance upon the undertaking.

Restatement (Second) of Torts § 323 (1965). Defendants argue that Count VI does not state a claim because plaintiffs have not alleged that they suffered physical harm. Compare Illinois v. Philip Morris, Inc., No. 96L13146, slip op. at 17-18 (Ill. Cir. Ct. Nov. 13, 1997); Iowa v. R.J. Reynolds, No. CL71048, slip op. at 11 (Iowa Dist. Ct. Aug. 26, 1997); Washington v. American Tobacco Co., No. 96-2-15056-8-SEA, slip op. at 4 (Wash. Super. **[**45]** Ct., June 10, 1997) (special duty claims dismissed because no physical harm alleged) with *San Francisco I, 957 F. Supp. at 1143*; San Francisco II, slip op. at 21 (physical harm not required). New York has not adopted the Restatement's physical harm requirement. On the contrary, New York courts have recognized that ***HN30***[] economic loss or damage to property may give rise to an action for breach of an assumed duty. *Glanzer, 233 N.Y. 236, 135 N.E. 275* (defendant who negligently certified weight of shipment of beans liable for resulting economic loss); *Moch, 247 N.Y. 160, 159 N.E. 896* (no liability for property damage because no proximate cause found). While these cases predate the Restatement by several decades, no court has overruled them. It is likely that a New York court, if presented with the question, would hold that New York continues to recognize such causes of action. ***HN31***[] A federal court should not restrict a common law cause of action in a manner that the state courts have not required. Accordingly, plaintiffs are not required to allege that defendants have caused them physical harm.

The remaining issue to be decided is whether defendants assumed a duty of care to the **[**46]** plaintiffs. ***HN32***[] An assumed duty arises "once a person undertakes a certain course of conduct upon which another relies." **[*293]** *Heard v. City of New York, 82 N.Y.2d 66, 72, 603 N.Y.S.2d 414, 623 N.E.2d 541 (1993)*; *Nallan, 50 N.Y.2d at 522*. In deciding whether a duty was assumed under New York law, "the question is whether defendant's conduct placed plaintiff in a more vulnerable position than plaintiff would have been in had defendant done nothing." *Heard, 82 N.Y.2d at 72*; *Nallan, 50 N.Y.2d at 522*; *Jansen v. Fidelity & Casualty Co. of New York, 165 A.D.2d 223, 566 N.Y.S.2d 962, 964* (3rd Dep't 1991), aff'd, *79 N.Y.2d 867, 581 N.Y.S.2d 156, 589 N.E.2d 379 (1992)*; see also *Moch, 247 N.Y. at 168* ("The query always is whether the purported wrongdoer has advanced to such a point as to have launched a force or instrument of harm, or has stopped where inaction is at most a refusal to become an instrument of good.").

The allegations in Count VI, when assumed to be true, indicate that defendants voluntarily assumed a duty to the plaintiffs. Relying on defendants' promises to "aid and assist the research effort into all phases of tobacco use and health," Compl. P 279, plaintiffs **[**47]** made decisions that negatively affected the financial health of their businesses. That negative impact was the direct result of defendants' promise to act on plaintiffs' behalf. Had defendants fully kept those promises, plaintiffs would have been alerted to the full cost of tobacco-related disease. Had defendants remained silent, plaintiffs would likely have obtained that information from other sources. By assuming to act, defendants thereby become subject to the duty of acting carefully, if at all. See *Glanzer, 233 N.Y. at 239*.

HN33[] While plaintiffs may recover for breach of any duty that defendants assumed on their behalf, they may not recover for breach of a duty assumed to another. "[A] duty directly assumed for the benefit of a particular person or entity does not extend to third parties who were not the intended beneficiaries of the subject undertaking." [10] *Jansen, 566 N.Y.S.2d at 964*. Neither may plaintiffs recover for breach of a duty voluntarily assumed on behalf of the public generally. It is the responsibility of the courts to "fix the orbit of duty" within the limits dictated by both policy and logic. *Jansen, 566 N.Y.S.2d at 965*. If any member of the public could **[**48]** allege a special duty on the basis of general public statements, liability would be "unduly and indeed indefinitely extended by this enlargement of the zone of duty". See *Moch, 247 N.Y. at 168*. Taken to this extreme, the special duty doctrine would displace negligence-based tort law entirely. To recover, therefore, plaintiffs will have to show that defendants made promises directly to health care providers such as the plaintiffs. With that caveat, defendants' motion to dismiss Count VI is denied.

5. Unjust Enrichment

HN34[] Liability for unjust enrichment rests on the equitable principle that a person "shall not be allowed to enrich himself unjustly at the expense of another." *Miller v. Schloss, 218 N.Y. 400, 407, 113 N.E. 337 (1916)*; *Manufacturers Hanover Trust Co. v. Chemical Bank, 160 A.D.2d 113, 559 N.Y.S.2d **[**49]** 704, 707* (1st Dep't 1990). A claim for unjust enrichment is available when "the acts of the parties or others have placed in the possession of one person money under such circumstances that in equity and good conscience he ought not to retain it." *Miller, 218 N.Y. at 407*; *Manufacturers Hanover Trust, 559 N.Y.S.2d at 707*. In Count X, plaintiffs allege that by paying the medical expenses of their participants for treatment of tobacco-related diseases, they "expended sums which Defendants had . . . a duty to pay" because the expenses were consequences of defendants' unlawful activities. Compl. PP 311-13. They argue that defendants have been unjustly enriched as a result.

HN35[] To recover for unjust enrichment, plaintiffs must show that "services were performed for the defendant[s] resulting in . . . unjust enrichment." *Kapral's Tire Service, Inc. v. Aztek Tread Corp., 124 A.D.2d 1011, **[*294]** 508 N.Y.S.2d 777, 778* (4th Dep't 1986). "It is not enough that the defendant received a benefit from the activities of the plaintiff . . . ; if services were performed at the behest of someone other than the defendant, the plaintiff must look to that person for recovery." *Kagan v. K-Tel Entertainment, **[**50]** Inc., 172 A.D.2d 375, 568 N.Y.S.2d 756, 757* (1st

[10] Plaintiffs are not alleging that they were the intended third party beneficiaries of promises made to their participants. See *Restatement (Second) of Torts § 324A* (1965).

Dep't 1991); see also *Schuckman Realty, Inc. v. Marine Midland Bank, N.A., 244 A.D.2d 400, 664 N.Y.S.2d 73, 74* (2nd Dep't 1997); *Kapral's Tire Service, 508 N.Y.S.2d at 778*. The expenses that plaintiffs incurred were paid at the behest of their participants. They did not confer a benefit on the defendants. The simple assertion that without those payments "defendants would have been liable for lawsuits by individual smokers seeking to recover the cost of their medical care," Pls.' Br. at 49, is too speculative to constitute a benefit accepted by the defendants. See Maryland v. Philip Morris Inc., 1997 WL 540913 at *16 (Md. Cir. Ct. 1997). Under these circumstances, the plaintiffs cannot establish that their actions unjustly enriched the defendants. Defendants' motion to dismiss Count X is therefore granted.

V. CONCLUSION

Defendants' motion to dismiss the RICO claims stated in Counts I and II is denied.

Defendants' motion to dismiss the antitrust claims stated in Counts III and IV is granted.

Defendants' motion to dismiss the fraud claim stated in Count V is denied.

Defendants' motion to dismiss the breach of special duty claim **[**51]** stated in Count VI is denied.

The claims alleged in Count VII (strict liability), Count VIII (negligence), and Count IX (breach of express and implied warranties) are dismissed without prejudice with plaintiffs' consent.

Defendants' motion to dismiss the unjust enrichment claim stated in Count X is granted.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Sherman Act > General Overview

Governments > State & Territorial Governments > Claims By & Against

HN4[] Local Governments, Claims By & Against

Out of federal deference to state sovereignty, states are immune from federal ***antitrust law*** for their actions as sovereign. Three rules limit this immunity according to the antitrust defendant's status. First, state legislatures and courts are completely immune from antitrust liability. Second, political subdivisions such as municipalities are immune from antitrust liability if their anticompetitive acts follow a clearly articulated and affirmatively expressed state policy. Third, private actors benefit from state immunity only if they act pursuant to a clearly articulated and affirmatively expressed state policy, and the state actively supervises the anticompetitive conduct.

Governments > State & Territorial Governments > Claims By & Against

HN5[] State & Territorial Governments, Claims By & Against

The United States Court of Appeals for the Eleventh Circuit has found hospital and transit authorities to be political subdivisions. Other circuits have conferred political-subdivision status on a state bar organization, a transportation authority, and a rural electric cooperative.

Governments > State & Territorial Governments > Claims By & Against

HN6[] State & Territorial Governments, Claims By & Against

Factors favoring political-subdivision treatment include open records, tax exemption, exercise of governmental functions, lack of possibility of private profit, and the composition of the entity's decisionmaking structure. The presence or absence of attributes such as these tells whether or not the nexus between the state and the entity is sufficiently strong that there is little real danger that the entity is involved in a private anticompetitive arrangement. The more public the entity looks, the less the United States Court of Appeals for the Eleventh Circuit worries that it represents purely private competitive interests and the less need there is for active state supervision to ensure that the entity's anticompetitive actions are indeed state actions and not those of an alliance of interests that properly should be competing.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

A state anticompetitive action is pursuant to a clearly articulated policy when the action is both authorized by statute, and its anticompetitive effect is an intended (meaning foreseeable) result of this authorization.

Opinion

[*1294] PER CURIAM:

Bankers Insurance Company sued the Florida Residential Property and Casualty Joint Underwriting Association (the Association) and several of its officers and counsel, alleging a conspiracy to restrain trade in violation of federal and Florida ***antitrust law***. The district court granted the Association judgment on the pleadings. Bankers appeals, and we affirm.

I. Background

Florida's legislature reacted to Florida's post-Hurricane Andrew insurance crisis by creating an involuntary association of all Florida **[**2]** residential-property insurers. *See Fla. Stat. § 627.351(6)(a)*. This association, the Florida Residential Property and Casualty Joint Underwriting Association, is directed **[*1295]** to write policies for citizens who are unable to obtain property and casualty insurance on the "voluntary" insurance market. *Id.* The insurers required to participate in the Association make up the Association's losses pro rata, according to each insurer's market share. *See id. § 627.351(6)(b)(3)*.

The Association is authorized to contract for the servicing of policies it has written. *See Fla. Stat. § 627.351(6)(c)*. Bankers, a Florida insurer, provided a substantial part of these services from the Association's inception in 1993. In 1995, the Association announced competitive bidding for servicing contracts. The Association ultimately accepted three of the ten bids; Bankers was one of the disappointed bidders. Bankers alleges that the rejection of its bid was unjustifiable because the Association revised bid standards in mid-review and because the Association disregarded the preferences of the independent insurance agents who sell the Association's policies.

After Bankers' bid was refused, Bankers **[**3]** pursued its administrative remedies. When those failed, it sued the Association and the committee that controlled the bidding process for violations of the Sherman Antitrust Act and

Florida Antitrust Act of 1980, *Fla. Stat. § 542.15 et seq.* Bankers makes no monopoly- or monopsony-related claims under § 2 of the Sherman Antitrust Act; it claims only that the Association and the four individual defendants conspired to restrain trade in violation of § 1 of that Act.

The district court granted the defendants judgment on the pleadings. It reasoned that the Association was protected by the *Parker* doctrine, *see Parker v. Brown,* [1] which excludes from the Sherman Act's scope anticompetitive conduct by a state as sovereign, or by state political subdivisions under certain circumstances. Alternatively, the district court ruled that the Association and its agents could not conspire to restrain trade as a matter of law under the doctrine of *Copperweld Corp. v. Independence Tube Co.* [2] because they lack the requisite diversity of interests. Bankers appeals. It contends that the district court erred in treating the Association as a political subdivision of the state and in viewing **[**4]** the Association as a single entity incapable of conspiring with itself. [3] ***HN1***[] We review the district court's grant of judgment on the pleadings de novo. *See Slagle v. ITT Hartford, 102 F.3d 494, 497 (11th Cir.1996)*.

II. Discussion

HN2[] Judgment on the pleadings is appropriate when material facts are not in dispute and judgment can be rendered by looking at the substance of the pleadings and any judicially noticed facts. *See id.; Hebert Abstract Co. v. Touchstone Properties, **[**5]** Ltd., 914 F.2d 74, 76 (5th Cir.1990)*. For these purposes, we accept the facts alleged in the complaint as true and draw all inferences that favor the nonmovant, here Bankers. *See Slagle, 102 F.3d at 497*.

A. *Ability to Conspire*

HN3[] Purely unilateral action does not violate § 1 of the Sherman Antitrust Act; therefore, agents and employees of a single entity cannot conspire to restrain trade, as a matter of law. *See Tiftarea Shopper, Inc. v. Georgia Shopper, Inc., 786 F.2d 1115, 1118 (11th Cir.1986)*; *see also Copperweld,* 467 U.S. at 769, 104 S. Ct. at 2740-41. The district court thus correctly granted judgment in favor of the four individual defendants. The complaint alleges that the individual defendants are the executive director, counsel, and director of operations of the Association. As officers and counsel of the Association, they are its agents and submitted to its control in all matters relating to the Association. Their interests are, therefore, to that extent aligned, and the "plurality of persons" **[*1296]** needed for a § 1 violation is missing. *See Copperweld,* 467 U.S. at 769, 104 S. Ct. at 2740-41. We need not address whether a different conclusion would be appropriate **[**6]** if the individual defendants also represented other interests, *cf. St. Joseph's Hosp., Inc. v. Hospital Corp. of Am., 795 F.2d 948, 956 (11th Cir.1986)*, because the complaint contains no such allegations.

The question for the Association itself is more difficult. As Bankers argues, associations differ from corporations or other unitary entities enough that they may sometimes fall outside this intraenterprise conspiracy rule. *See Chicago Prof'l Sports, Ltd. v. National Basketball Ass'n, 95 F.3d 593, 598-99 (7th Cir.1996)*. We decline to reach this issue, however, because in any event the Association is entitled to state action immunity, as discussed below.

B. *State Action Immunity*

HN4[] Out of federal deference to state sovereignty, states are immune from federal ***antitrust law*** for their actions as sovereign. *Parker v. Brown, 317 U.S. 341, 351-53, 63 S. Ct. 307, 314, 87 L. Ed. 315 (1943)*. Three rules

[1] *317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*.

[2] *467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

[3] Bankers also asserts that the district court erred in not permitting Bankers to amend its complaint to add more conspirators. Bankers never sought to amend its complaint during the months between the motion for judgment on the pleadings and the district court's order, or at any time after that order. The district court did not abuse its discretion in not *sua sponte* inviting Bankers to amend.

limit this immunity, according to the antitrust defendant's status. *See Crosby v. Hospital Auth., 93 F.3d 1515, 1521-22 (11th Cir.1996)*, *cert. denied, __ U.S. __, 117 S. Ct. 1246, 137 L. Ed. 2d 328 (1997)*. First, state legislatures and courts are completely **[**7]** immune from antitrust liability. *Hoover v. Ronwin, 466 U.S. 558, 569, 104 S. Ct. 1989, 1995, 80 L. Ed. 2d 590 (1984)*. Second, political subdivisions such as municipalities are immune from antitrust liability if their anticompetitive acts follow a "clearly articulated and affirmatively expressed state policy." *See Town of Hallie v. City of Eau Claire, 471 U.S. 34, 44, 105 S. Ct. 1713, 1719, 85 L. Ed. 2d 24 (1985)* (quoting *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 415, 98 S. Ct. 1123, 1138, 55 L. Ed. 2d 364 (1978)* (opinion of Brennan, J.)); *Crosby, 93 F.3d at 1522-23*. Third, private actors benefit from state immunity only if they act pursuant to a "clearly articulated and affirmatively expressed state policy" *and* the state actively supervises the anticompetitive conduct. *Southern Motor Carriers Rate Conference v. United States, 471 U.S. 48, 57, 105 S. Ct. 1721, 1727, 85 L. Ed. 2d 36 (1985)*; *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 104, 100 S. Ct. 937, 943, 63 L. Ed. 2d 233 (1980)*. The central dispute in this case is into which category--political subdivision or private actor--the Association falls, **[**8]** and thus whether the Association must show active state supervision to obtain *Parker* immunity.

No simply stated rule draws the line between the two categories. Cases before the Supreme Court have concerned only municipalities, the paradigm of a political subdivision. *See City of Columbia v. Omni Outdoor Advertising, 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*; *Town of Hallie, 471 U.S. at 34, 105 S. Ct. at 1713*. ***HN5***[] This circuit, however, has found hospital and transit authorities to be political subdivisions. *See, e.g., Crosby, 93 F.3d at 1523-26*; *FTC v. Hospital Bd. of Dirs., 38 F.3d 1184, 1188 (11th Cir.1994)*; *Askew v. DCH Reg'l Health Care Auth., 995 F.2d 1033, 1038 (11th Cir.1993)*; *Bolt v. Halifax Hosp. Med. Ctr., 980 F.2d 1381, 1386 (11th Cir.1993)*; *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1460-62 (11th Cir.1991)*; *Commuter Transp. Sys., Inc. v. Hillsborough County Aviation Auth., 801 F.2d 1286, 1290 (11th Cir.1986)*. Other circuits have conferred political-subdivision status on a state bar organization, *Hass v. Oregon State Bar, 883 F.2d 1453, 1461 (9th Cir.1989)*, a transportation authority, *Interface Group v. Massachusetts **[**9]** Port Auth., 816 F.2d 9, 13 (1st Cir.1987)*, and a rural electric cooperative, *Fuchs v. Rural Elec. Convenience Coop., 858 F.2d 1210, 1217 (7th Cir.1988)*.

Each of these cases has focused on the government-like attributes of the defendant entity. ***HN6***[] Factors favoring political-subdivision treatment include open records, [4] tax exemption, [5] exercise of governmental functions, [6] **[*1297]** lack of possibility of private profit, [7] and the composition of the entity's decisionmaking structure. *See* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 212.7, at 208-10 (1997 Supp.). The presence or absence of attributes such as these tells us whether the nexus between the State and the entity is sufficiently strong that there is little real danger that the entity is involved in a *private* anticompetitive arrangement. *See Crosby, 93 F.3d at 1524*. The more public the entity looks, the less we worry that it represents purely private competitive interests, and the less need there is for active state supervision to ensure that the entity's anticompetitive actions are indeed state actions and not those of an alliance of interests that properly should be competing. *See Town of Hallie, 471 **[**10]** U.S. at 45, 105 S. Ct. at 1717*; *Fuchs, 858 F.2d at 1214*.

The Association is not short on public-entity trappings that suggest it is entitled to political-subdivision status. [8] The Association is subject to Florida's "sunshine laws." *See Fla. Stat. § 627.351(6)(n)*. It is exempt from corporate tax.

---

[4] *Commuter Transp. Sys., Inc., 801 F.2d at 1290*; *Hass, 883 F.2d at 1460*; *see also id. at 1466-67* (Ferguson, J., dissenting) (noting absence of mandatory disclosure obligations for state bar that majority found to be political subdivision).

[5] *See Crosby, 93 F.3d at 1525*; *Commuter Transp. Sys., Inc., 801 F.2d at 1290*.

[6] *See Crosby, 93 F.3d at 1525* (running a hospital); *Interface Group, Inc., 816 F.2d at 13* (issuing tax-exempt bonds, rulemaking).

[7] *See Fuchs, 858 F.2d at 1217*.

[8] Bankers argues that the Florida Supreme Court advisory opinion, *In re Advisory Opinion to the Governor--State Revenue Cap, 658 So. 2d 77 (1995)*, is dispositive of the issue whether the Association is a political subdivision. This argument overlooks the difference between the issue there (whether Association revenue falls within Florida's constitutional state revenue cap) and here

See id. § 627.351(6)(j). It is authorized to issue tax-free bonds. *See id. § 627.351(6)(c)(3)*. Upon its dissolution, its assets become property of the state. *See id. § 627.351(6)(k)*. **[**11]** The Association operates under a detailed plan that must be approved by the Department of Insurance. *See id. § 627.351(6)(a)*, *(c)*. A board of governors supervises the Association's operations; the 13-member board includes five consumer representatives, the insurance consumer advocate, and two representatives of the insurance industry appointed by the state insurance commissioner. Only five of the members are appointed by the insurance industry, and even those serve at the insurance commissioner's pleasure. *See id. § 627.351(c)(4)*.

[12]** On the other hand, the Association has one attribute that at first blush would seem to weigh on the private side of the public/private scale: it is at bottom an association of private, competing insurers. Two facts, however, suggest that this attribute matters little here. First, the Association was not created to compete in or regulate an existing market; rather, it invented a market where--by definition--none existed before. *See Fla. Stat. § 627.351(6)(a)* (creating Association to serve "applicants who are in good faith entitled, but are unable, to procure insurance through the voluntary market"). The members of the Association are not, therefore, competing in the market the Association serves. This impossibility of competition is an indicator that the Association represents public interests, rather than competing private interests. *Cf.* *Hass, 883 F.2d at 1465-66* (Ferguson, J., dissenting) (contending that a state bar should not be considered a political subdivision because its members compete in the very market the bar regulates). Second, the Association is involuntary. *See id. § 627.351(6)(b)*. Coerced private participation is yet another clue that the Association is **[**13]** an entity created by Florida's legislature to serve public interests and not a private, anticompetitive alliance formed with the state's blessing.

All things considered, the Association is entitled to be treated as a political subdivision for antitrust purposes. It thus merits state-action immunity if its allegedly anticompetitive actions were pursuant to a clearly articulated state policy. The Association's actions pass this test. Bankers' complaint appears to assert that the Association and its agents engaged in two kinds of improper conduct during the bid-review process: first, the Association in several respects altered its selection criteria during the bidding process; and second, the Association disregarded the preferences of independent agents who sell Association policies. These actions were for the purpose, Bankers alleges, of knocking **[*1298]** Bankers out of the running and thereby reducing competition for servicing contracts.

HN7[] A state anticompetitive action is pursuant to a clearly articulated policy when the action is *both* authorized by statute *and* its anticompetitive effect is an intended (meaning foreseeable) result of this authorization. *See* *Crosby, 93 F.3d at 1532*; **[**14]** *Lee County,* 38 F.3d at 1189. The first prong of this test is satisfied. Florida's legislature has granted the Association open-ended authority to plan to have its policies serviced by outside contractors:

> ***HN8***[] The plan of operation of the association may provide for one or more designated insurers, able and willing to provide policy and claims service, to act on behalf of the association to provide such service. Each licensed agent shall be entitled to indicate the order of preference regarding who will service the business placed by the agent. The association shall adhere to each agent's preferences unless after consideration of other factors in assigning agents, including, but not limited to, servicing capacity and fee arrangements, the association has reason to believe it is in the best interests of the association to make a different assignment.

Fla. Stat. § 627.351(6)(c)(1).

The second prong is also satisfied. The legislature's selection of the modal "may," rather than "shall," "will," or "must," shows that *all* of the first sentence of the section authorizing servicing contracts is permissive, not mandatory. The Association is therefore freely permitted to "provide **[**15]** for" policy service as it sees fit --or not to contract at all. It is foreseeable that conferring such unfettered discretion on the Association to select policy servicing services could result in potentially anticompetitive adjustment and revision of standards and selection criteria. *Cf.* *Hass, 883 F.2d at 1458* (general authorization for state bar to require malpractice insurance, and to establish its own insurance fund, made it foreseeable that bar would require lawyers to purchase insurance from the bar); *Kern-Tulare Water Dist. v. City of Bakersfield, 828 F.2d 514, 519-20 (9th Cir.1987)* (grant of authority to buy

---

(whether the Association is a political subdivision for antitrust purposes). *Cf.* *Crosby, 93 F.3d at 1525* (refusing to view a Georgia Supreme Court opinion concerning sovereign immunity as dispositive of a hospital authority's state-related status).

and sell water rights makes it foreseeable that a city would attach a no-resale-allowed condition to water sales). Furthermore, the legislature *explicitly* contemplates that the Association will do the other act Bankers complains of--disregarding independent agents' preferences--provided the Association believed it was in the Association's best interests to do so.

Because the Association is a political subdivision of the State of Florida and it acted pursuant to a clearly articulated legislative policy permitting it to select its contracting parties as it saw **[**16]** fit, the district court properly granted the Association judgment on the pleadings.

III. Conclusion

For the foregoing reasons, the district court's judgment is affirmed.

AFFIRMED.

Iams Co. v. L.A. Pet Foods

United States District Court for the Southern District of Ohio, Western Division

March 26, 1998, Filed

Case No. C-3-93-307

Reporter

1998 U.S. Dist. LEXIS 6584 *

THE IAMS COMPANY, Plaintiff, vs. L.A. PET FOODS, INC., et al., Defendants.

Disposition: **[*1]** Plaintiff's Motion to Enter Final Judgment (Doc.) # 91) sustained in part and overruled in part. No just cause for delay exists with respect to the Defendants' First, Second and Fourth through Sixth Claims for Relief in their Second Amended and Supplemental Counterclaim (Doc. # 46) final judgment entered with respect to those claims. Just cause for delay exists to Defendants' Third Claim for Relief.

Core Terms

Pet, claim for relief, Defendants', Declaration, distributor, products, Distributorship, customers, partial summary judgment, termination, parties, fiduciary duty, Counterclaim, deposition testimony, summary judgment, de facto, manufacturer, deposition, contradicts, fill-in, price fixing, employees, genuine issue of material fact, pet food, Sherman Act, nonrenewal, breached, solicit, breach of contract, final judgment

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

HN1[] **Discovery, Methods of Discovery**

Summary judgment must be entered against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial.

The moving party always bears the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, which it believes demonstrate the absence of a genuine issue of material fact. The burden then shifts to the nonmoving party who must set forth specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. Once the moving party has met its initial burden, the nonmoving party must present evidence that creates a genuine issue of material fact making it necessary to resolve the difference at trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN2[] **Judgment as Matter of Law, Directed Verdicts**

A party may move for summary judgment by demonstrating that the opposing party will not be able to produce sufficient evidence at trial to withstand a directed verdict motion (now known as a motion for judgment as a matter of law. *Fed. R. Civ. P. 50*).

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > Discovery Materials

Evidence > Burdens of Proof > Burdens of Production

HN3[] **Summary Judgment, Opposing Materials**

Once the burden of production has shifted, the party opposing summary judgment cannot rest on its pleadings or merely reassert its previous allegations. It is not sufficient to simply show that there is some metaphysical doubt as to the material facts. Rather, *Fed. R. Civ. P. 56(e)* requires the nonmoving party to go beyond the unverified pleadings and present some type of evidentiary material in support of its position. Summary judgment shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. Summary judgment shall be denied if there are genuine factual issues that properly can be resolved only by a finder of fact because they may reasonably be resolved in favor of either party.

Civil Procedure > ... > Discovery > Methods of Discovery > General Overview

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN4[] **Summary Judgment, Evidentiary Considerations**

In determining whether a genuine issue of material fact exists, a court must assume as true the evidence of the nonmoving party and draw all reasonable inferences in the favor of that party. If the parties present conflicting evidence, a court may not decide which evidence to believe, by determining which parties' affiants are more credible; rather, credibility determinations must be left to the fact-finder. In ruling on a motion for summary judgment (in other words, in determining whether there is a genuine issue of material fact), a district court is not obligated to wade through and search the entire record for some specific facts that might support the nonmoving party's claim. A court is entitled to rely, in determining whether a genuine issue of material fact exists on a particular issue, only upon those portions of the verified pleadings, depositions, answers to interrogatories and admissions on file, together with any affidavits submitted, specifically called to its attention by the parties.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

HN5[] **Summary Judgment, Opposing Materials**

A party cannot raise a genuine issue of material fact and, thus, avoid the entry of summary judgment against it, by submitting an affidavit which contradicts the affiant's previously given deposition testimony. However, an inconsistent affidavit may be used to create a genuine issue of material fact if the affiant states that he was confused at his deposition, if the affidavit explains the seeming inconsistencies between the deposition and the affidavit or if the affiant lacked access to material facts at the time of his deposition and the affidavit is based upon newly discovered evidence. Although an affiant can explain his deposition, he cannot raise a genuine issue of material fact by contradicting it.

Wine importer had just cause, as required by *Ohio Rev. Code Ann. § 1333.85*, to terminate distributor, because the two had developed an antagonistic and truculent relationship.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Releases

Contracts Law > Contract Interpretation

HN7[] **Types of Contracts, Releases**

A release is a contract. Whether a particular agreement constitutes a release is to be determined, as with all contracts, from the intent of the parties. A release is to be examined in accordance with ordinary contract principles.

Business & Corporate Compliance > ... > Contract Conditions & Provisions > Contracts Law > Contract Conditions & Provisions

HN8[] **Contracts, Contract Conditions & Provisions**

Where a binding promise is made from which benefits would accrue to the promisee, the promisor impliedly agrees to do nothing that would deprive the promisee of such benefits, or of the opportunity to endeavor to reap such benefits. A grantor or promisor cannot derogate from his own grant.

Contracts Law > Contract Interpretation > Fiduciary Responsibilities

Governments > Fiduciaries

HN9[] **Contract Interpretation, Fiduciary Responsibilities**

A fiduciary relationship is one in which special confidence and trust is reposed in the integrity and fidelity of another and there is a resulting position of superiority or influence, acquired by virtue of this special trust. The fiduciary's role may be assumed by formal appointment or it may rise de facto from a more informal confidential relationship, which is a relationship in which one person comes to rely on and trust another in his important affairs and the relations there involved are not necessarily legal, but may be moral, social, domestic, or merely personal. Such a confidential relationship, however, cannot be unilateral. A fiduciary duty may arise from an informal relationship only if both parties understand that a special trust or confidence has been reposed.

Contracts Law > Contract Interpretation > Fiduciary Responsibilities

Governments > Fiduciaries

HN10[] Contract Interpretation, Fiduciary Responsibilities

A fiduciary has a duty to act for someone else's benefit, while subordinating his or her personal interests to that of the other person.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

Business & Corporate Compliance > ... > Distributorships & Franchises > Termination > Antitrust Issues

HN11[] Antitrust & Trade Law, Sherman Act

Section 1 of the Sherman Act, specifically *15 U.S.C.S. § 1*, declares illegal every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade. As can be seen from the quoted language, *§ 1* does not outlaw unilateral activity; rather, the touchstone of a violation of that statute is concerted activity, action taken by more than an individual entity, such as entering into a contract, combination or conspiracy. A manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently. The manufacturer can announce its resale prices in advance and refuse to deal with those who fail to comply. And a distributor is free to acquiesce in the manufacturer's demand in order to avoid termination.

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN12[] Distributorships & Franchises, Termination

Concerted activity and, thus, liability under *§ 1* of the Sherman Act, specifically *15 U.S.C.S. § 1*, cannot be based upon a distributor's coerced, involuntary acquiescence with its supplier's demands. No agreement is formed when a dealer unwillingly complies solely because he wishes to avoid termination.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Abstention

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN13[] Federal & State Interrelationships, Abstention

The Younger abstention doctrine applies in cases in which a federal court is asked to enjoin state court or administrative proceedings. To abstain from jurisdiction under Younger, three elements must exist: 1) an on-going state proceeding; 2) the proceedings must implicate important state interests; and 3) the proceeding must provide an adequate opportunity to raise constitutional challenges. Under that doctrine, which is predicated upon principles of federalism and comity, a federal court must abstain from enjoining state criminal, civil or administrative proceedings on the basis of a federal constitutional defense, when that defense can be litigated in the state proceedings.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Torts > ... > Defamation > Remedies > Damages

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Abstention

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Remedies

HN14[] Jurisdiction, Jurisdictional Sources

A district court may, under certain circumstances, abstain from exercising jurisdiction in the interests of judicial economy, when a parallel action is pending in state court. Generally, however, the mere pendency of a state court proceeding involving the same subject matter does not bar a federal court from exercising its jurisdiction, given the virtually unflagging obligation of the federal courts to exercise the jurisdiction given to them.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Civil Procedure > Judgments > Entry of Judgments > General Overview

Civil Procedure > Judgments > Entry of Judgments > Multiple Claims & Parties

HN15[] Pleadings, Counterclaims

Fed. R. Civ. P. 54(b) provides: (b) Judgment Upon Multiple Claims or Involving Multiple Parties. When more than one claim for relief is presented in an action, whether as a claim, counterclaim, cross-claim, or third-party claim, or when multiple parties are involved, the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties only upon an express determination that there is no just reason for delay and upon an express direction for the entry of judgment. In the absence of such determination and direction, any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties, and the order or other form of decision is subject to revision at any time before the entry of judgment adjudicating all the claims and the rights and liabilities of all the parties.

Civil Procedure > Judgments > Entry of Judgments > Multiple Claims & Parties

HN16[] **Entry of Judgments, Multiple Claims & Parties**

Before a district court can direct the entry of final judgment pursuant to *Fed. R. Civ. P. 54(b)*, three conditions must be present: 1) the case must involve multiple claims and/or multiple parties; 2) at least one claim or the rights of one party must have been finally decided; and 3) there must be no just reason for delaying the appeal.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Civil Procedure > Judgments > Entry of Judgments > Multiple Claims & Parties

HN17[] **Pleadings, Counterclaims**

Deciding whether there is no just cause for delay involves the exercise of discretion. A district court should consider the following factors when it exercises its discretion: (1) the relationship between the adjudicated and unadjudicated claims; (2) the possibility that the need for review might or might not be mooted by future developments in the district court; (3) the possibility that the reviewing court might be obligated to consider the same issue a second time; (4) the presence or absence of a claim or counterclaim which could result in set-off against the judgment sought to be made final; (5) miscellaneous factors such as delay, economic considerations, shortening the time of trial, frivolity of competing claims, expense, and the like.

Opinion

EXPANDED OPINION SETTING FORTH REASONING AND CITATIONS OF AUTHORITY IN SUPPORT OF COURT'S DECISION OF AUGUST 15, 1995 (DOC. # 90) TO SUSTAIN PLAINTIFF'S MOTION FOR PARTIAL SUMMARY JUDGMENT ON THE THIRD, FOURTH, FIFTH AND SIXTH CLAIMS FOR RELIEF IN DEFENDANTS' SECOND AMENDED AND SUPPLEMENTAL COUNTERCLAIM (DOC. # 61); TO SUSTAIN IN PART AND TO OVERRULE IN PART, AS MOOT, PLAINTIFF'S MOTION FOR PARTIAL SUMMARY JUDGMENT ON ITS THIRTEENTH ADDITIONAL DEFENSE TO DEFENDANTS' SECOND AMENDED AND SUPPLEMENTAL COUNTERCLAIM (DOC. # 66); TO SUSTAIN PLAINTIFF'S MOTION FOR PARTIAL SUMMARY JUDGMENT ON THE FIRST AND SECOND CLAIMS FOR RELIEF IN DEFENDANTS' SECOND AMENDED AND SUPPLEMENTAL COUNTERCLAIM (DOC. # 69); AND TO SUSTAIN IN PART AND TO OVERRULE IN PART PLAINTIFF'S MOTION TO STRIKE THE DECLARATION OF STEVE SEGNER (DOC. # 89); DECISION AND ENTRY SUSTAINING IN PART AND OVERRULING IN PART PLAINTIFF'S MOTION TO ENTER FINAL

JUDGMENT (DOC. # 91); DECISION AND ENTRY OVERRULING DEFENDANTS' MOTION TO DISMISS OR TO STAY (DOC. # 94); DECISION AND ENTRY OVERRULING, AS MOOT, PLAINTIFF'S MOTION FOR EXPEDITED DECISION (DOC. # 99); DECISION **[*3]** AND ENTRY OVERRULING, WITHOUT PREJUDICE TO RENEWAL, PLAINTIFF'S MOTION FOR TEMPORARY RESTRAINING ORDER AND PRELIMINARY INJUNCTION (DOC. # 102); CONFERENCE CALL SET

The Plaintiff is a manufacturer of pet food. For a number of years, the Defendants [1] were distributors for the Plaintiff. The relationship between the parties was governed by a series of one-year distributorship agreements, the last two of which are attached to Plaintiffs Second Amended Complaint (Doc. # 15), as Exhibits A and B. Exhibit A gave L.A. Pet the right to be a non-exclusive distributor of pet food manufactured by Plaintiff, from February 1, 1993, until January 31, 1994, within 10 counties in Southern California and four counties in Nevada. Exhibit B gave Premium the right to be a non-exclusive distributor of pet food manufactured by Plaintiff, from February 1, 1993, until January 31, 1994, within Arizona and Clark County, Nevada. On or about August 13, 1993, Plaintiff terminated the two Distributorship Agreements.

[*4] Plaintiff brought this action, seeking, *inter alia,* a declaratory judgment from the Court, declaring that it did not violate the Distributorship Agreements by terminating them. *See* Doc. # 15. In addition, Plaintiff set forth claims of breach of contract, libel of business reputation and intentional interference with prospective economic advantage. *Id.* Rather than merely defending against Plaintiff's claims, Defendants sought affirmative relief on their own behalf. In their Second Amended and Supplemental Counterclaim (Doc. # 46), Defendants set forth eight claims for relief, of which six remain, [2] to wit: 1) price fixing in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1* (First Claim for Relief); 2) restraint of trade in violation of *§ 1* of the Sherman Act (Second Claim for Relief); 3) breach of contract (Third Claim for Relief); 4) breach of contract/interference with contracts (Fourth Claim for Relief); 5) breach of *de facto* fiduciary duty (Fifth Claim for Relief); and 6) bad faith (Sixth Claim for Relief).

[*5] On August 15, 1995, this Court entered a Decision in which it sustained Plaintiff's Motion for Partial Summary Judgment on the Third, Fourth, Fifth and Sixth Claims for Relief in Defendants' Second Amended and Supplemental Counterclaim (Doc. # 61) ("First Motion for Partial Summary Judgment"); sustained in part and overruled, as moot, in part Plaintiff's Motion for Partial Summary Judgment on its Thirteenth Additional Defense to Defendants' Second Amended and Supplemental Counterclaim (Doc. # 66) ("Second Motion for Partial Summary Judgment"); sustained Plaintiff's Motion for Partial Summary Judgment on the First and Second Claims for Relief in Defendants' Second Amended and Supplemental Counterclaim (Doc. # 69) ("Third Motion for Partial Summary Judgment"); and sustained in part and overruled in part Plaintiff's Motion to Strike the Declaration of Steve Segner ("Segner") (Doc. # 89) ("Plaintiff's Motion to Strike"). *See* Doc. # 90. In this Expanded Opinion, the Court sets forth citations of authority and reasoning in support of that Decision. As a means of analysis, the Court will initially set forth the standards which govern all motions for summary judgment (including motions **[*6]** which seek only partial summary judgment). Then, the Court will set forth citations of authority and reasoning which support its ruling on Plaintiff's Motion to Strike, since much of the evidence upon which Defendants relied to oppose the Plaintiff's three motions for partial summary judgment was contained Segner's declaration. Finally, the Court will turn to the Plaintiff's three motions for partial summary judgment, discussing them in the order in which they were filed.

I. Standards which govern motions for summary judgment

---

[1] In its Second Amended Complaint, Plaintiff alleges that the Defendants are L.A. Pet Foods, Inc. ("L.A. Pet"), and Premium Pet Foods, Inc. ("Premium"). *See* Doc. # 15 at PP 2-3. According to the Defendants, Premium is not a separate corporate entity; rather, it is a fictitious name under which L.A. Pet does business in the states of Nevada and Arizona. *See* Doc. # 46 at P 3. It was not necessary for the Court to address the question of whether Premium is a separate corporate entity in ruling on the motions pending in this case.

[2] In their Seventh and Eighth Claims for Relief, Defendants alleged that the Plaintiff had violated § 2 of the Robinson-Patman Act, *15 U.S.C. § 13*, and *§ 3* of the Clayton Act, *15 U.S.C. § 14*. The Defendants have dismissed their Seventh and Eighth Claims for Relief, with prejudice. *See* Doc. # 81.

HN1[] Summary judgment must be entered "against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." Celotex Corp. v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986). Of course, the moving party:

> always bears the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any," which it believes demonstrate the absence of a genuine **[*7]** issue of material fact.

Id. at 323. *See also* Boretti v. Wiscomb, 930 F.2d 1150, 1156 (6th Cir. 1991) (The moving party has the "burden of showing that the pleadings, depositions, answers to interrogatories, admissions and affidavits in the record, construed favorably to the nonmoving party, do not raise a genuine issue of material fact for trial.") (quoting Gutierrez v. Lynch, 826 F.2d 1534, 1536 (6th Cir. 1987)). The burden then shifts to the nonmoving party who "must set forth specific facts showing that there is a genuine issue for trial." Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986) (quoting Fed. R. Civ. P. 56(e)). Thus, "once the moving party has met its initial burden, the nonmoving party must present evidence that creates a genuine issue of material fact making it necessary to resolve the difference at trial." Talley v. Bravo Pitino Restaurant, Ltd., 61 F.3d 1241, 1245 (6th Cir. 1995). Read together, *Liberty Lobby* and *Celotex* stand for the proposition that HN2[] a party may move for summary judgment by demonstrating that the opposing party will not be able to produce sufficient evidence at trial to **[*8]** withstand a directed verdict motion (now known as a motion for judgment as a matter of law. Fed.R.Civ.P. 50). Street v. J.C. Bradford & Co., 886 F.2d 1472, 1478 (6th Cir. 1989).

HN3[] Once the burden of production has so shifted, the party opposing summary judgment cannot rest on its pleadings or merely reassert its previous allegations. It is not sufficient to "simply show that there is some metaphysical doubt as to the material facts." Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986). *See also* Michigan Protection and Advocacy Service, Inc. v. Babin, 18 F.3d 337, 341 (6th Cir. 1994) ("The plaintiff must present more than a scintilla of evidence in support of his position; the evidence must be such that a jury could reasonably find for the plaintiff."). Rather, Rule 56(e) "requires the nonmoving party to go beyond the [unverified] pleadings" and present some type of evidentiary material in support of its position. Celotex Corp., 477 U.S. at 324. Summary judgment "shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, **[*9]** show there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." Fed.R.Civ.P. 56(c). Summary judgment shall be denied "if there are … 'genuine factual issues that properly can be resolved only by a finder of fact because they may reasonably be resolved in favor of either party.'" Hancock v. Dodson, 958 F.2d 1367, 1374 (6th Cir. 1992) (citation omitted). Of course, HN4[] in determining whether a genuine issue of material fact exists, a court must assume as true the evidence of the nonmoving party and draw all *reasonable* inferences in the favor of that party. Anderson, 477 U.S. at 255 (emphasis added). If the parties present conflicting evidence, a court may not decide which evidence to believe, by determining which parties' affiants are more credible; rather, credibility determinations must be left to the fact-finder. 10A Wright, Miller & Kane, *Federal Practice and Procedure,* § 2726. In ruling on a motion for summary judgment (in other words, in determining whether there is a genuine issue of material fact), "[a] district court is not … obligated to wade through and search the entire record for some specific **[*10]** facts that might support the nonmoving party's claim." Interroyal Corp. v. Sponseller, 889 F.2d 108, 111 (6th Cir. 1989), *cert. denied, 494 U.S. 1091 (1990)*. *See also* L.S. Heath & Son, Inc. v. AT&T Information Systems, Inc., 9 F.3d 561 (7th Cir. 1993); Skotak v. Tenneco Resins, Inc., 953 F.2d 909, 915 n. 7 (5th Cir.), *cert. denied, 506 U.S. 832, 113 S. Ct. 98, 121 L. Ed. 2d 59 (1992)* ("Rule 56 does not impose upon the district court a duty to sift through the record in search of evidence to support a party's opposition to summary judgment …."). Thus, a court is entitled to rely, in determining whether a genuine issue of material fact exists on a particular issue, only upon those portions of the verified pleadings, depositions, answers to interrogatories and admissions on file, together with any affidavits submitted, specifically called to its attention by the parties.

II. Plaintiff's Motion to Strike (Doc. # 89)

Plaintiff sought to have the Court strike the Declaration of Segner (Doc. # 75), who is the President of the Defendants, arguing that it contradicts the deposition testimony which he had given before he signed the declaration. [3] Although the **[*11]** Plaintiff requested that the Court strike the entirety of Segner's Declaration, it argued that only particular portions of it conflict with certain portions of his previously given deposition testimony. Accordingly, the Court considered striking only those portions of Segner's Declaration which the Plaintiff has specifically argued should be stricken.

On a number of occasions, the Sixth Circuit has said that ***HN5***[] a party cannot raise a genuine issue of material fact and, thus, avoid the entry of summary judgment against it, by submitting an affidavit which contradicts the affiant's previously given deposition testimony. *Jones v. General Motors Corp., 939 F.2d 380, 385 (6th Cir. 1991)*; *Reid v. Sears, Roebuck & Co., 790 F.2d 453, 460 (6th Cir. 1986)*; *Biechele v. Cedar Point, Inc., 747 F.2d 209, 215 (6th Cir. 1984)*. In *Biechele,* the Sixth Circuit explained:

> "If a party who has been examined at length on deposition could raise **[*12]** an issue of fact simply by submitting an affidavit contradicting his own prior testimony, this would greatly diminish the utility of summary judgment as a procedure for screening out sham issues of fact."

Id. (quoting *Perma Research & Development Co. v. Singer Co., 410 F.2d 572, 578 (2nd Cir. 1969))*. However, an inconsistent affidavit may be used to create a genuine issue of material fact if the affiant states that he was confused at his deposition, if the affidavit explains the seeming inconsistencies between the deposition and the affidavit or if the affiant lacked access to material facts at the time of his deposition and the affidavit is based upon newly discovered evidence. *Kennedy v. Allied Mut. Ins. Co., 952 F.2d 262, 266-67 (9th Cir. 1991)*; *Miller v. A.H. Robins Co., 766 F.2d 1102, 1104 (7th Cir. 1985)*. *See also, Franks v. Nimmo, 796 F.2d 1230* (10 Cir. 1986); *Camfield Tires v. Michelin Tire Corp., 719 F.2d 1361 (8th Cir. 1983)*. In other words, although an affiant can explain his deposition, he cannot raise a genuine issue of material fact by contradicting it. Therefore, in determining whether a portion of Segner's Declaration must be stricken, **[*13]** the Court will initially determine whether a particular portion is inconsistent with his previously given deposition testimony; then, if an inconsistency is found, the Court will decide whether that inconsistency contradicts his deposition testimony, or whether it was the "result of an honest discrepancy, a mistake, or the result of newly discovered evidence" or is just an explanation of that prior deposition testimony. [4] *Kennedy, 952 F.2d at 267*.

The initial portion of Segner's Declaration which Plaintiff argued must be stricken involved the question of which entity **[*14]** (Plaintiff or L.A. Pet) *sold* "fill-in product" to PetsMart. By way of background, in early 1992, Plaintiff decided to sell products directly to certain national chains such as PetsMart. "Fill-in product" refers to the pet food which a retailer such as PetsMart would need in order to keep a shelf fully stocked between deliveries by Plaintiff. During his deposition, Segner testified that Plaintiff *sold* "fill-in product" to PetsMart and that L.A. Pet merely delivered it and billed Plaintiff. II Segner Dep. at 340. [5] In its Motion to Strike, Plaintiff argued that Segner indicated, at pages 2-5 of his Declaration, that L.A. Pet, rather than Plaintiff *sold* "fill-in product" to PetsMart. Certainly, the statement in his Declaration that L.A. Pet, rather than Plaintiff, *sold* "fill-in product" to PetsMart would conflict with Segner's deposition testimony. Moreover, the Defendants have not explained the inconsistency between Segner's deposition testimony and his Declaration, either in that Declaration or elsewhere. Nevertheless, the Court has reviewed the allegedly offending portion and, with some exceptions, cannot agree with the Plaintiff. For the most part, Segner uses the **[*15]** words "provided," "supplied" or "delivered" when referring to what L.A. Pet did with "fill-in product" as it relates to PetsMart. Those characterizations are consistent with his deposition testimony; L.A. Pet

---

[3] The Defendants did not oppose the Plaintiff's Motion to Strike.

[4] In *Kennedy,* the Ninth Circuit explained that the purpose of the rule set forth in *Perma* and followed by its progeny (which include the Sixth Circuit cases cited above) is to prevent a party from creating a *sham* fact question; when the inconsistency was the "result of an honest discrepancy, a mistake, or the result of newly discovered evidence" the purpose of the rule is not advanced by striking the affidavit. *952 F.2d at 266-67*.

[5] The transcript of Segner's deposition consists of two volumes. The Court uses "I" to signify the first volume and "II" to signify the second.

did deliver "fill-in product" to that chain. The Court does not construe that language to mean that L.A. Pet actually *sold* "fill-in product" to PetsMart. The instances where Segner states that L.A. Pet *sold* "fill-in product" are found in the last complete sentence on page 3, the first independent clause of the second to the last sentence on page 5 and the second dependent clause of the last sentence on that page. In those places in his Declaration, Segner uses the word "sell" or "sold." Accordingly, the Court has struck the offending sentence on page 3 and the offending clauses on page 5.

On page 10 of his Declaration, Segner states:

> Declarant has **[*16]** been notified on numerous occasions that … L.A. Pet is not to undercut the prices being charged by competing distributors, including Pet Food Wholesale and UPM. At the direction of Mike Major and other Iams' employees, representatives of L.A. Pet (including declarant) and its competitors met and agreed not to try to win the customers of each other on the basis of price. Prior to said meeting Iams' representatives advised declarant and others employed by L.A. Pet that L.A. Pet would not be renewed or would be terminated as an Iams' distributor if it did not so agree with said other distributors.

On pages 22-23 of his Declaration, Segner stated that Plaintiff acted in bad faith and breached its *de facto* fiduciary duty by "directing L.A. Pet to price in accordance with Iams' directives." The Plaintiff argued that any reference in Segner's Declaration that it told L.A. Pet to price Iams' products in accordance with its directives is in contradiction with his deposition testimony. During his deposition, Segner was questioned about how L.A. Pet priced the products it sold as a distributor. Segner testified that L.A. Pet started with the price that the manufacturer had charged **[*17]** it and, after adding a profit margin to that sum, arrived at its base price. I Segner Dep. at 65-68. Then, if a discount were offered to a customer, that discount would be taken off the base price. [6] *Id.* In response to the specific question as to whether that pricing policy applied to Plaintiff's products, Segner testified that it did. *Id. at 68*. In his explanation of L.A. Pet's pricing policy, Segner did not testify that it charged a certain price for Plaintiff's products because Plaintiff had told it to charge that price. In addition, throughout his deposition, Segner testified about instances when either L.A. Pet would take business from one of its competing distributors of Plaintiff's products or the opposite would occur, because a better price was offered to the customer. Therefore, the Court concluded that the portion of Segner's Declaration in which he states that L.A. Pet priced Plaintiff's products in accordance with directives from Plaintiff contradicts his earlier deposition testimony. Moreover, the Defendants did not explain this inconsistency between Segner's deposition testimony and his later Declaration, either in that Declaration or elsewhere. Accordingly, **[*18]** the Court sustained the Plaintiff's Motion to Strike (Doc. # 89), to the extent that, with that motion, Plaintiff sought to have the Court strike the portion of Segner's Declaration in which he stated that L.A. Pet priced Plaintiff's products in accordance with directives from Plaintiff.

In his Declaration, Segner stated that there were numerous discount stores in the territory serviced by L.A. Pet which it did not sell to "because of the Iams' discount store prohibition." Doc. # 75 at 7. Furthermore, Segner states that L.A. Pet "would have considered selling Iams' products to discount stores at a profit if not prohibited from doing so by Iams." *Id.* at 11-12. Plaintiff argued that the quoted portions from Segner's Declaration contradict his previously given deposition testimony, during which he identified L.A. Pet's customers as "pet stores, feed stores, veterinarians, **[*19]** some upscale supermarkets, kennels [and] some home delivery." I Segner at 59. When asked whether L.A. Pet had sold any products to mass merchandisers such as Wal-Mart, Sams or Costco, Segner testified that it had not. *Id.* Segner explained that L.A. Pet had been concentrating on the six areas listed above, because it was all that company could do to service those customers, which Segner characterized as "our background," and that it did not occur to them "to go outside and look around." *Id. at 60*. That testimony contradicts, without question, the statement from Segner's Declaration to the effect that L.A. Pet did not sell to discount stores, because of Plaintiff's prohibition of such sales. Moreover, the Defendants did not explain this contradiction between Segner's deposition testimony and his Declaration, either in that Declaration or elsewhere. However, the Court did not agree with the Plaintiff that Segner's deposition testimony contradicted the statement in his Declaration that L.A. Pet "would have considered" selling Plaintiff's products to discount stores. That statement can be viewed as

---

[6] Segner testified that he or one of two other employees of L.A. Pet, Roman Versch and John Helt, had to approve discounts. I Segner Dep. at 67-68.

predicting what would have occurred in the future. During his deposition, Segner **[*20]** testified about events which had happened in the past, prior to the Declaration. Accordingly, the Court sustained the Plaintiff's Motion to Strike (Doc. # 89), to the extent that, with that motion, Plaintiff sought to have the Court strike the portion of Segner's Declaration in which he states that L.A. Pet did not sell Plaintiff's products to discount stores, because of the Plaintiff's prohibition on such sales. However, the Court overruled that motion as it relates to Segner's statement that L.A. Pet would have considered such sales, i.e., at a point in time following the Declaration, since that statement is not inconsistent with his deposition testimony.

In his Declaration, Segner stated that eight of Plaintiff's employees told him that L.A. Pet was not permitted to sell Plaintiff's products to discount stores, because "those stores sold [Plaintiff's] products too inexpensively." Doc. # 75 at 7. This Court did not agree with the Plaintiff that this statement contradicts Segner's cited deposition testimony. During the cited portion of his deposition, Segner testified about discussions with Plaintiff's employees regarding sales to one particular retailer, Price Club (which the **[*21]** Court assumes is a discount store). Segner was not questioned about discussions with Plaintiff's employees regarding its reasons for prohibiting sales to other discount stores. Therefore, this portion of Segner's Declaration is not inconsistent with his deposition testimony. Accordingly, the Court overruled this branch of Plaintiff's Motion to Strike (Doc. # 89).

In his Declaration, Segner stated that Plaintiff threatened L.A. Pet with the termination of its distributorship if it "solicited any retailers which were not on the L.A. Pet approved list." Doc. # 75 at 9. During his deposition, Segner testified that Plaintiff had "pressured" L.A. Pet not to solicit retailers that were not on its list. The Court saw no contradiction between Segner's Declaration and his deposition testimony and overruled this branch of Plaintiff's Motion to Strike (Doc. # 89).

In his Declaration, Segner set forth a detailed version of the discussions he had with employees of Plaintiff (and representations those employees made to him) regarding L.A. Pet's decision to open a location in Las Vegas, Nevada. Doc. # 75 at 21-22. During his deposition, Segner testified:

> When we were going to open up Las **[*22]** Vegas, Mike Major [an employee of Plaintiff] came to me and asked me to do it. He said, "Open up a small distributorship like you have in L.A. Carry the other brands. Be kind of a full-line distributor to the limited market there."

I Segner Dep. at 215. Segner's testimony about a limited discussion with one employee of Plaintiff contradicts the statements in his subsequently executed Declaration about extensive discussions with numerous such employees. Moreover, the Defendants have not explained this contradiction of Segner's deposition testimony with his Declaration, either in that Declaration or elsewhere. Accordingly, the Court sustained this branch of the Plaintiff's Motion to Strike (Doc. # 89).

Based upon all of the foregoing, the Court sustained in part and overruled in part the Plaintiff's Motion to Strike (Doc. # 89). The Court did not consider the stricken portions of Segner's Declaration, when ruling upon the Plaintiff's Motions for Partial Summary Judgment.

III. Plaintiff's First Motion for Partial Summary Judgment (Doc. # 61)

With its First Motion for Partial Summary Judgment (Doc. # 61), Plaintiff argued that it was entitled to summary judgment on **[*23]** the Third Claim for Relief (breach of contract), Fourth Claim for Relief (breach of contract/interference with contracts), Fifth Claim for Relief (breach of *de facto* fiduciary duty) and Sixth Claim for Relief (bad faith) in Defendants' Second Amended and Supplemental Counterclaim (Doc. # 46). With its Second Motion for Partial Summary Judgment (Doc. # 66), Plaintiff argues that it is entitled to summary judgment on its Thirteenth Additional Defense to that Second Amended and Supplemental Counterclaim, with which Plaintiff alleges that "Defendants' claims are barred because they served as independent contractors pursuant to the terms of the written distributorship agreements and there was no fiduciary duty between Defendants and Iams." *See* Doc. # 49 at 13. The Court will address the parties' arguments relating to the four claims for relief on Defendants' counterclaim, against which Plaintiff seeks summary judgment, in the above order. [7]

[*24] The two Distributorship Agreements, upon which Defendants base their Third Claim for Relief in their Second Amended and Supplemental Counterclaim, provided that they were effective from February 1, 1993, until January 31, 1994. Defendants allege that Plaintiff breached those agreements by terminating them on August 13, 1993. Doc. # 46 at P 45. Section 4.2 of the agreements provide:

> Either party, at any time, may terminate this Agreement with cause by giving thirty (30) days prior written notice of such termination to the other party. For purposes of this Agreement "cause" shall include, but is not limited to, a failure on the part of the Distributor to meet its minimum quarterly or annual sales performance standards described in Section 5.1(b) of this Agreement.

Section 4.3(c)(v) of the agreements provides that Plaintiff may terminate the agreement for the "gross misconduct" of a distributor. In its First Motion for Partial Summary Judgment (Doc. # 61), Plaintiff argued that it had cause to terminate the agreements and that the Defendants committed an act of "gross misconduct," because of a lawsuit which L.A. Pet filed against the Plaintiff and two of its employees in **[*25]** a state court in California. [8] The lawsuit alleged that Plaintiff and its employees had engaged in price fixing. Regardless of whether the filing of the state court action constituted "gross misconduct," as the Plaintiff argued, it certainly gave Plaintiff "cause" to terminate the agreements. In his affidavit (Doc. # 72 at Tab 1) Martin E. Walker ("Walker"), Vice President of Sales for the Plaintiff, set forth a detailed recitation of Plaintiff's marketing strategy and the vital role that a close relationship between the manufacturer and its distributors plays in that strategy. The purpose of the agreements was to allow the parties to work together in the sale and distribution of pet food manufactured by Plaintiff, to the mutual benefit of all. The ability of the parties to work together was destroyed when L.A. Pet filed the state court action. Moreover, L.A. Pet named as defendants in that litigation the two employees of Plaintiff with whom it was required to deal most closely, Mike Major (Plaintiff's western area business manager) and Wes Boots (Plaintiff's western area regional manager). These two key employees could not have been expected to work closely with Defendants after **[*26]** having been sued by L.A. Pet. *Cf. Excello Wine Co. v. Monsieur Henri Wines, Inc., 474 F. Supp. 203 (S.D.Ohio 1979)* (***HN6***[↑] wine importer had just cause, as required by *Ohio Revised Code § 1333.85*, to terminate distributor, because the two had developed an antagonistic and truculent relationship). Accordingly, the Court sustained the Plaintiff's First Motion for Partial Summary Judgment (Doc. # 61), to the extent that Plaintiff sought summary judgment on Defendants' Third Claim for Relief (breach of contract).

In their Fourth Claim for Relief, Defendants alleged that the Plaintiff breached the Distributorship Agreements by preventing them from soliciting some customers. [9] *See* Doc. # 46 at PP 47-54. The limitations on soliciting customers, which Plaintiff allegedly placed upon Defendants, fall into three categories, to wit: allowing Defendants **[*27]** to sell only "fill-in products" to PetsMart (P 51); using the "ABC" list (P 52); and preventing them from selling to certain other potential customers, such as mass merchandisers (P 53).

As an initial matter, Plaintiff relied on § 16 of the Distributorship Agreements and argued that these claims were barred by virtue of releases in those agreements. The agreements contain two provisions which purport to release

[7] These four claims are state law claims. In their memoranda, the Plaintiff and the Defendants rely on the substantive law of Ohio. Indeed, *§ 13* of the Distributorship Agreements provided that they would be governed by the law of that state. Therefore, in ruling on the Plaintiffs' First and Second Motions for Partial Summary Judgment, the Court relied upon the substantive law of Ohio.

[8] In its letter to Defendants, dated August 13, 1993, Plaintiff stated that it terminating the agreements, because of the fact that L.A. Pet had filed the lawsuit.

[9] The Defendants caption their Fourth Claim for Relief as one for breach of contract/interference with contracts. In their Memorandum in Opposition to Plaintiff's First Motion for Summary Judgment (Doc. # 74), the Defendants disclaimed any intention of relying upon a tortious interference theory. Accordingly, it was not necessary for the Court to address the arguments raised by the Plaintiff that it was entitled to summary judgment on the Defendants' Fourth Claim for Relief, to the extent that it was predicated upon such a theory.

one party from claims of the other. One such provision, § 16, provides **[*28]** that the signing of that agreement terminates the previous agreement, under which the parties conducted business, and that "EACH PARTY HEREBY RELEASES THE OTHER FROM ANY AND ALL CLAIMS ARISING AS A RESULT OF OR IN ANY WAY RELATING TO THE RELATIONSHIP BETWEEN [IAMS] AND THE DISTRIBUTOR UNDER SUCH OTHER AGREEMENTS OR AS A RESULT OF SUCH TERMINATION." [10] The other such clause is § 8.1(c), which provides:

> The party terminating or, in the case of expiration of this Agreement, electing not to renew this Agreement pursuant to Section 4 hereof shall not be liable to the other party for any damage of any kind whether direct, indirect or consequential, incurred by the other party by the termination, expiration or nonrenewal of this Agreement.

This Court agreed with Plaintiff that § 16 released it from liability for alleged breaches of Distributor Agreements, **[*29]** which occurred prior to January 31, 1993, the date upon which the final such agreements, the agreements at issue herein, between Plaintiff and Defendants became effective. ***HN7***[] A release is a contract. *Picklesimer v. The Baltimore & Ohio Rd. Co., 151 Ohio St. 1, 7, 84 N.E.2d 214 (1949)*. Whether a particular agreement constitutes a release is to be determined, as with all contracts, from the intent of the parties. *Miami Valley Carpenters District Council v. U.S. Fidelity & Guaranty Co., 590 F. Supp. 61, 65 (S.D.Ohio 1984)*. A release is to be examined in accordance with ordinary contract principles. *Shaheen v. B.F. Goodrich Co., 873 F.2d 105, 107 (6th Cir. 1989)*. Herein, § 16 of the Distributorship Agreements expressly provides that Plaintiff and Defendants release each other "from any and all claims arising as a result of or in any way relating to the relationship between [Plaintiff] and the distributor under such other agreements." In their Fourth Claim for Relief, the Defendants allege that the Plaintiff breached the Distributorship Agreements by preventing them from soliciting certain customers. In other words, the Defendants' Fourth Claim for Relief arises out of the **[*30]** Distributorship Agreements under which the parties conducted business. Therefore, to the extent that the Defendants' Fourth Claim for Relief is predicated upon actions of the Plaintiff occurring *before* January 31, 1993 (the effective date of the last Distributorship Agreements between the parties), it arises out of the relationship between the parties under another distributorship agreement and, as a consequence, comes within the explicit language of § 16. However, that provision of the Distributorship Agreements would not apply to the portion of the Defendants' Fourth Claim for Relief which is predicated upon the Plaintiff's actions which occurred *after* the execution of the final Distributorship Agreements, on January 31, 1993, since it would arise out of the, then, current Distributorship Agreements. In addition, this Court cannot agree with Plaintiff that § 8.1(c) of the Distributorship Agreements released that portion of the Defendants' Fourth Claim for Relief which is predicated upon the Plaintiff's actions which occurred *after* the execution of the final Distributorship Agreements, on January 31, 1993. Section 8.1(c) addresses claims which arise out of the conclusion **[*31]** of the distributorship arrangement, regardless of whether that event occurs as a result of the termination, expiration or non-renewal of a Distributorship Agreement. Defendants' Fourth Claim for Relief does not arise out of end of their relationship with the Plaintiff; rather, they allege that the Plaintiff committed a breach of contract, by not permitting them to solicit certain customers, while the Distributorship Agreements were in effect.

Accordingly, the Court concluded that the Plaintiff was entitled to summary judgment on that aspect of the Defendants' Fourth Claim for Relief, which arises out of Plaintiff's actions which occurred *before* January 31, 1993, because Defendants released those claims by signing the Distributorship Agreements which became effective on that date. However, the Plaintiff is not entitled to summary judgment, because of the two releases in the agreements, on the portion of Defendants' Fourth Claim for Relief which arise out of Plaintiff's actions occurring after January 31, 1993. With respect to that aspect of the Defendants' Fourth Claim for Relief, the Court turns to the Plaintiff's alternative argument, to wit: that it did not breach the Distributorship **[*32]** Agreements.

As is stated above, the Defendants contend that the Plaintiff breached the Distributorship Agreement by preventing them from soliciting certain customers. In particular, the Defendants allege that the limitations placed upon them fall into three categories, to wit: allowing Defendants to sell only "fill-in products" to PetsMart (P 51); using the "ABC" list (P 52); and preventing them from selling to certain other potential customers, such as mass merchandisers (P

---

[10] This release language excepts any claims Plaintiff may have against the distributor for goods or services it had provided to the distributor.

53). [11] In their Memorandum in Opposition to Plaintiff's First Motion for Partial Summary Judgment (Doc. # 74), Defendants add flesh to the theory which supports their Fourth Claim for Relief. According to the Defendants, Plaintiff's actions frustrated the purpose of the Distributorship Agreements, which was to allow them to sell products manufactured by the Plaintiff. In support of their theory the Defendants rely upon *Indianapolis v. Domhoff & Joyce Co., 69 Ohio App. 109, 36 N.E.2d 153 (Hamilton County 1941)*.

[*33] In *Domhoff & Joyce,* the parties entered into a contract, the term of which was five years and under which Domhoff & Joyce was appointed as the agent to sell coke produced by Indianapolis. [12] In essence, the contract provided that Domhoff & Joyce was given the first opportunity to sell all of the coke produced by Indianapolis; however, when it was not able to do so, Indianapolis was permitted to use the services of other agents. Under the contract, Domhoff & Joyce collected the proceeds from the sale of the coke and remitted that amount, less its commissions, to Indianapolis. In addition, Domhoff & Joyce was not required to remit an amount for items over which disputes relating to price, quantity or quality had arisen. The parties conducted business under the contract without controversy until Domhoff & Joyce remitted the final payment which it owed to Indianapolis under the contract. From that payment, Domhoff & Joyce deducted slightly in excess of $ 47,500. In a letter written to Indianapolis, the agent cited four instances by which Indianapolis had breached the contract between the two and had deprived it of commissions which could have been earned. As a consequence, Domhoff **[*34]** & Joyce asserted that it was entitled to set off the $ 47,500, which it had deducted from the final payment. The one instance which is of particular import, herein, was the allegation by Domhoff & Joyce that Indianapolis had breached the contract by allowing Hickman, Williams & Company to sell some of the coke which Indianapolis had produced.

The check, which was Domhoff & Joyce's final payment to Indianapolis, contained a restrictive endorsement that it was in full payment of any and all claims of any nature to the date of the check. After Indianapolis cashed the check, it sued Domhoff & Joyce for the $ 47,500, which the latter had deducted from the final payment. The agent, in turn, raised the affirmative **[*35]** defense of accord and satisfaction, relying upon the fact that Indianapolis had cashed a check with a restrictive endorsement. The trial court directed a verdict in favor of Domhoff & Joyce, concluding that the evidence (i.e., the fact that Indianapolis had cashed a check with a restrictive endorsement) established the defense of accord and satisfaction. Upon appeal, the Hamilton County Court of Appeals reversed, concluding that the jury must resolve the question of whether there was an accord and satisfaction. To reach its conclusion, the appellate court analyzed each of the four bases for deducting sums from the final payment, presented by Domhoff & Joyce in its letter, to determine whether the bases were *bona fide.* [13] With respect to the deduction for the commissions paid to Hickman, Williams & Company, the appellate court wrote:

> The third deduction is of commissions on foundry coke sold through Hickman, Williams & Company. Now it clearly appears in the evidence that when [Indianapolis] increased the amount of foundry coke, [Domhoff &

---

[11] The first of these limitations arises out of Plaintiff's decision, made in 1992, to sell its products directly to certain customers, such as PetsMart. As a result, independent distributors, such as L.A. Pet, have sold only "fill-in products" to PetsMart, since that date. Under that program, Plaintiff would sell pet food directly to PetsMart, without using its distributors. Plaintiff would deliver the pet food to a central location, and PetsMart would distribute it to its stores. When a particular PetsMart store needed additional pet food on an immediate basis (i.e., "fill-in products"), Plaintiff would purchase the product from one of its distributors, such as L.A. Pet, who would, in turn, deliver it to the PetsMart store in need of same. Plaintiff would then be billed for that product by the distributor. The second such limitation is the "ABC" lists. The Plaintiff used an "ABC" list in order to track customers of its distributors so that each customer was serviced. An "A" customer of a particular distributor purchased more products from that distributor than from any other distributor. The third such alleged limitation arises out of Plaintiff's marketing strategy. That strategy, which is fully detailed in the affidavit of Martin Walker, was to have Plaintiff's products sold only in pet stores, veterinary clinics, lawn and garden stores and upscale grocery stores.

[12] In reality, Domhoff & Joyce entered into the contract with an entity which assigned its rights to Indianapolis; however, since Domhoff & Joyce had agreed to the assignment, the Hamilton County Court of Appeals treated Indianapolis as if it had been a contracting party. *See* ***69 Ohio App. at 110-11***.

[13] An accord and satisfaction is an affirmative defense to a claim for money damages when there is a *bona fide* dispute over an unliquidated demand. *Allen v. R.G. Indus. Supply, 66 Ohio St. 3d 229, 611 N.E.2d 794 (1993)*.

Joyce] was unable to dispose of the increased quantity. The contract in express terms authorized [Indianapolis] under such circumstances **[*36]** to contract with another agent to dispose of the surplus. It did that and we fail to find any substantial evidence that [Domhoff & Joyce] disputed the fact that it was unable to dispose of the increased production of foundry coke. Its objection was to the fact of increased production. There was no denial of the right to employ Hickman, Williams & Company to dispose of this surplus if [Indianapolis] had the right to shift the preponderant production from domestic to foundry coke [which it did].

Aside from this, however, there was objection to the conduct of Hickman, Williams & Company in the sale of this surplus, in that in certain specific instances they intruded themselves between [Domhoff & Joyce] and customers after [Domhoff & Joyce] had started negotiations, and induced such customers to send in orders through them when but for such interference the customers would have submitted the orders through [Domhoff & Joyce], who would then have been entitled to the commissions on such sales.

It is fundamental in the law of contracts that ***HN8***[] *where a binding promise is made from which benefits would accrue to the promisee[,] the promisor impliedly agrees to do nothing that* **[*37]** *would deprive the promisee of such benefits, or of the opportunity to endeavor to reap such benefits.* 9 Ohio Jur. 543, 567, *et seq.,* Sections 298, 318. A grantor or promisor cannot derogate from his own grant. Therefore, [Indianapolis] by reason of this contract was obligated not to interfere between [Domhoff & Joyce] and any of its customers with whom it was negotiating, and if it did that directly or through an agent, it would be liable for all damage directly flowing from the breach of this implied term of the contract. This damage certainly could not exceed the commissions on the sales which were in process of negotiation at the time of the interference. It would not entitle [Domhoff & Joyce] to commissions on other sales made by Hickman, Williams & Company, which they had a right to make.

69 Ohio App. at 117-18 (emphasis added).

[*38] Defendants argued that, in accordance with the language from *Domhoff & Joyce,* which this Court has highlighted, a duty was imposed upon Plaintiff not to prevent them from making any sales of Plaintiff's product within the assigned territory. This Court did not agree with the Defendants. *Domhoff & Joyce* is clearly distinguishable from the present case. Therein, the contract between the parties gave Domhoff & Joyce the first opportunity to sell all of the coke produced by Indianapolis. It was the fact that Domhoff & Joyce had been given the first opportunity to sell the coke which caused the Hamilton County Court of Appeals to conclude that Indianapolis was obligated to refrain from interfering with attempts of its agent to sell that product. Herein, the Distributorship Agreements did not give Defendants an exclusive right to sell the Plaintiff's product or even the first opportunity to sell the pet food manufactured by the Plaintiff. On the contrary, the Distributorship Agreements gave Plaintiff the right to name as many distributors as it wished and, even, to sell its products directly to customers. Therefore, the Court rejected the Defendants' argument that Plaintiff had **[*39]** breached the Distributorship Agreements by violating the duty, allegedly imposed upon it in accordance with *Domhoff & Joyce,* not to interfere with their attempts to sell pet foods manufactured by the Plaintiff.

Accordingly, the Court sustained the Plaintiff's First Motion for Partial Summary Judgment (Doc. # 61), to the extent that Plaintiff sought summary judgment on Defendants' Fourth Claim for Relief (breach of contract/interference with contract).

In their Fifth Claim for Relief, the Defendants allege that the Plaintiff breached a *de facto* fiduciary duty which it owed to them. In its First Motion for Partial Summary Judgment (Doc. # 61), Plaintiff argued that it is entitled to summary judgment on this claim, because it did not owe any such *de facto* fiduciary duty to the Defendants. The Ohio Supreme Court has been loathe to recognize the existence of a *de facto* fiduciary duty. For instance, in *Belvedere Condominium Owners' v. R.E. Roark, 67 Ohio St. 3d 274, 617 N.E.2d 1075 (1993)*, the Ohio Supreme Court held, in P 1 of the syllabus, that the developer of a condominium project does not owe a fiduciary duty to the owners association "absent an understanding by **[*40]** both parties that special trust and confidence have been reposed in the developer." In *Blon v. Bank One, Akron, N.A., 35 Ohio St. 3d 98, 519 N.E.2d 363 (1988)*, the Ohio Supreme Court held, in P 2 of the syllabus, that a bank does not owe a fiduciary duty to a consumer who borrows from it, "absent an understanding by both parties that special trust and confidence [have] been reposed in the creditor," *See also, Umbaugh Pole Bldg. Co. v. Scott, 58 Ohio St. 2d 282, 390 N.E.2d 320 (1979)*. In *Craggett v.*

Adell Ins. Agency, 92 Ohio App. 3d 443, 451-52, 635 N.E.2d 1326, 1331-32 (Cuyahoga County 1993), the court summarized the standards governing *de facto* fiduciary relationships:

> HN9[] A fiduciary relationship is one in which "special confidence and trust is (sic) reposed in the integrity and fidelity of another and there is a resulting position of superiority or influence, acquired by virtue of this special trust." Stone v. Davis (1981), 66 Ohio St. 2d 74, 20 Ohio Op. 3d 64, 419 N.E.2d 1094; Haluka v. Baker (1941), 66 Ohio App. 308, 20 Ohio Op. 136, 34 N.E.2d 68; *Tool Steel Products Sales Corp. v. XTEK, Inc.* (Jan. 29, 1993), Hamilton App. No. C-910533, unreported, 1993 WL 19476. **[*41]** The fiduciary's role may be assumed by formal appointment or it may rise de facto from a more informal confidential relationship, Prudential Ins. Co. v. Eslick (S.D.Ohio 1984), 586 F. Supp. 763; Walters v. First Nat. Bank of Newark (1982), 69 Ohio St. 2d 677, 23 Ohio Op. 3d 547, 433 N.E.2d 608, which is a relationship in which:
>
> "'* * * One person comes to rely on and trust another in his important affairs and the relations there involved are not necessarily legal, but may be moral, social, domestic, or merely personal. * * *' Indermill v. United Savings (1982), 5 Ohio App. 3d 243, 245, 5 Ohio B. Rep. 530, 532, 451 N.E.2d 538, 540." Applegate v. Fund for Constitutional Govt. (1990), 70 Ohio App. 3d 813, 816-817 592 N.E.2d 878, 880-881.
>
> Such a confidential relationship, however, cannot be unilateral. The Ohio Supreme Court has explained that a fiduciary duty may arise from an informal relationship only if both parties understand that a special trust or confidence has been reposed. *Nielsen Enterprises, Inc. v. Ins. Unlimited Agency, Inc.* (May 8, 1986), Franklin App. No. 85AP-781, unreported, 1986 WL 5411 (no fiduciary relationship exists between an insurance agent and client which **[*42]** would require the agent, during the term of an existing policy, to apprise the client of new insurance offerings or to provide an interim review of the client's insurance coverage); *Roberts v. State Farm Mut. Auto. Ins. Co.* (Jan. 7, 1982), Cuyahoga App. No. 43388, unreported, 1982 WL 2284 ("The relationship between an insurance salesman and his customer may take on fiduciary dimensions when reliance is reasonably reposed in the salesman by the customer."); Umbaugh Pole Bldg. Co. v. Scott (1979), 58 Ohio St. 2d 282, 12 Ohio Op. 3d 279, 390 N.E.2d 320 (creditor's provision of advice and counseling to debtor in a congenial atmosphere not enough to create a fiduciary relationship); Warren v. Percy Wilson Mtge. & Fin. Corp. (1984), 15 Ohio App. 3d 48, 15 Ohio B. Rep. 76, 472 N.E.2d 364 (no fiduciary status arising from advice given in routine business relationship between debtor and creditor); Blon v. Bank One (1988), 35 Ohio St. 3d 98, 519 N.E.2d 363 (no fiduciary status conferred in arm's-length business transaction).

The Defendants did not cite one case in which a court concluded that a manufacturer owed a *de facto* fiduciary duty to its distributor (or even concluded that **[*43]** there was a genuine issue of material fact on the question).

Herein, the parties' relationship was governed by Distributorship Agreements, which provided that Defendants were independent contractors, a status which, objectively, contravenes the Defendants' assertion that Plaintiff owed them a *de facto* fiduciary duty. *See* Tool Steel Products Sales Corp. v. XTEK, Inc., 1993 Ohio App. LEXIS 333, 1993 WL 19476 (Hamilton County App. 1993) (manufacturer did not owe *de facto* fiduciary duty to distributor when agreement governing their relationship provided that the distributor was an independent contractor). Nevertheless, the Defendants argue that other provisions in the Distributorship Agreements evidenced the existence of a *de facto* fiduciary duty owed to them by the Plaintiff. In particular, the Defendants pointed to § 5(c) of the agreements, which obligated the Defendants to maintain a level of inventory which, in Plaintiff's judgment (after consultation with Defendants), was sufficient to service the needs of Defendants' customers. Defendants argued that this provision indicates that the parties understood that Defendants were putting their trust in Plaintiff. This Court did not agree. The **[*44]** fact that Plaintiff had the authority to require Defendants to maintain a certain level of inventory, in order that they could meet the needs of their customers, does not raise an inference that Plaintiff owed a *de facto* fiduciary duty to the Defendants. In reality, § 5(c) was for the benefit of the Plaintiff rather than for the Defendants. By requiring the Defendants to maintain minimum inventory levels, Plaintiff assured that its pet food was always available to customers, even though maintaining such levels may have increased the Defendants costs. [14] Moreover, ***HN10***[] a fiduciary "has a 'duty to act *for someone else's benefit,* while subordinating [his or her] personal interests to that of the other person.'" *Belvedere, 67 Ohio St. 3d at 282, 617 N.E.2d at 1082* (emphasis in the original and citation omitted). Provisions in the Distributorship Agreements objectively demonstrate that the Plaintiff was not a fiduciary of the Defendants. For instance, those agreements expressly state that neither contracting party has the authority to act for the other. In addition, under those agreements, Plaintiff could contract with additional distributors, who would compete with the Defendants **[*45]** in their territories; Plaintiff could even distribute its products in direct competition with the Defendants. Indeed, throughout the period that Defendants distributed the Plaintiff's pet food, the Plaintiff contracted with other distributors who competed directly with the Defendants. Those actions taken in reliance on specific contractual language are hardly the exercise of powers by or actions of a fiduciary.

Additionally, the Defendants argued that the existence of a *de facto* fiduciary duty is established by the fact that Plaintiff encouraged them to open a new distributorship in Nevada. As is discussed above (in connection with Plaintiff's Motion to Strike), the evidence on this point is one conversation with Mike Major ("Major"), **[*46]** an employee of Plaintiff. That conversation, in which Major advised the Defendants to open a small, full-line distributorship (i.e., a distributorship which carried products of manufacturers in addition to Plaintiff's), is not sufficient to raise a genuine issue of material fact regarding the existence of a fiduciary relationship. It simply does not raise an inference that the Plaintiff understood that the Defendants were placing their special trust and confidence in it, as that term is defined by law.

Accordingly, the Court sustained the Plaintiff's First Motion for Partial Summary Judgment (Doc. # 61), to the extent that, with that motion, Plaintiff sought summary judgment on Defendants' Fifth Claim for Relief (breach of *de facto* fiduciary duty).

In their Sixth Claim for Relief in their Second Amended and Supplemental Counterclaim, the Defendants allege that the Plaintiff took actions which constitute their claim of price fixing in their First Claim for Relief and actions which constitute the Third through Fifth such claims for Relief, and that the Plaintiff took these actions which constitute those claims in bad faith. The Court, based upon reasoning and citations of authority **[*47]** set forth above, has sustained the Plaintiff's First Motion for Partial Summary Judgment (Doc. # 61), as that motion related to the Defendants' Third through Fifth Claims for Relief. Further, the Court, based upon reasoning and citations of authority set forth below, has sustained the Plaintiff's Third Motion for Partial Summary Judgment (Doc. # 69), as that motion related to the Defendants' First Claim for Relief. Since the Court has concluded, as a matter of law, that the Plaintiff did not engage in price fixing, did not breach the contracts between the parties, [15] and did not owe the Defendants a *de facto* fiduciary duty, it cannot be held liable for doing any of those actions in bad faith. Therefore, the Court sustained the Plaintiff's First Motion for Summary Judgment (Doc. # 61), to the extent that, with that motion, Plaintiff sought summary judgment on Defendants' Sixth Claim for Relief (bad faith).

[*48] Accordingly, the Court sustained the Plaintiff's Motion for Partial Summary Judgment (Doc. # 61), in its entirety.

IV. Plaintiff's Second Motion for Partial Summary Judgment (Doc. # 66)

With this motion, the Plaintiff sought summary judgment on the Thirteenth Affirmative Defense contained in its Answer to Defendants' Second Amended and Supplemental Counterclaim (Doc. # 49). With that defense, the Plaintiff alleged:

---

[14] The Defendants would have been required to purchase the pet food from the Plaintiff for it to be part of their inventory. Therefore, by requiring the Defendants to maintain a minimum level of inventory, the Plaintiff was requiring the Defendants to increase their costs.

[15] In their Fourth Claim for Relief, the Defendants had also alleged that the Plaintiff had tortiously interfered with contracts; however, the Defendants have abandoned that allegation. *See* Footnote 9, *supra.*

> Defendants['] claims are barred because they served as independent contractors pursuant to terms of written distributorship agreements and there was no fiduciary duty between Defendants and Iams.

Doc. # 49 at 13. The Court construed the portion of that defense setting forth the allegation that Plaintiff did not owe a fiduciary duty to the Defendants as being asserted against the Defendants' Fifth Claim for Relief, alone, since that is their only claim predicated upon such a duty. For the same reasons that the Court sustained Plaintiff's First Motion for Partial Summary Judgment (Doc. # 61), as that motion related to Defendants' Fifth Claim for Relief (breach of *de facto* fiduciary duty), the Court sustained the Plaintiff's Second Motion for Partial **[*49]** Summary Judgment (Doc. # 66), to the extent that Plaintiff's Thirteenth Affirmative Defense was predicated upon the allegation that it did not owe a fiduciary duty to the Defendants. The Plaintiff's Second Motion for Partial Summary Judgment made clear that the other allegation in the Plaintiff's Thirteenth Affirmative Defense (i.e., that the Defendants' claims am barred because they were independent contractors) was a defense to more than just the Defendants' Fifth Claim for Relief. *See* Doc. # 66 at 4 (arguing that independent contractor status is relevant to Defendants' federal antitrust claims, as well as to their claim of breach of fiduciary duty). Given that the Court had concluded that the Plaintiff was entitled to summary judgment on the merits of the Defendants' claims, without the need to reach the issue, the Court overruled that motion, as moot, to the extent that the Plaintiff had argued that it was entitled to summary judgment on those claims, because of the Defendants' alleged status as independent contractors.

V. Plaintiff's Third Motion for Partial Summary Judgment (Doc. # 69)

In its First and Second Claims for Relief of their Second Amended and Supplemental **[*50]** Counterclaim (Doc. # 46), the Defendants allege that the Plaintiff violated *§ 1* of the Sherman Act by engaging in price fixing and other restraints of trade. In particular, with respect to price fixing (the First Claim for Relief), the Defendants allege:

> Within four years prior to the commencement of this action[,] Plaintiff Iams has been engaged in illegal price fixing by conspiring with Defendant L.A. Pet, as a coerced, involuntary co-conspirator, to fix, control, raise or stabilize the price of the products manufactured by Plaintiff Iams[,] as hereafter alleged:
>
> (a) Plaintiff Iams has directed Defendant L.A. Pet how to price the products which Defendant has purchased from Plaintiff, and threatened Defendant with nonrenewal or termination as an Iams' distributor if Defendant L.A. Pet did not comply with Plaintiff Iams' directive;
>
> (b) Plaintiff Iams has directed Defendant L.A. Pet not to sell to competitive retailers, under threat of termination or nonrenewal as a distributor of Plaintiff's products if Defendant did not follow Plaintiff's directive, for the purpose of maintaining or keeping up the prices of Plaintiff's goods;
>
> (c) Plaintiff Iams has divided the potential **[*51]** customers for Plaintiff's products (primarily retail pet stores and veterinarians) in Defendant L.A. Pet's market area into three groups, assigned one group of customers to Defendant L.A. Pet and the other two groups of customers to Defendant's two direct competitors. Defendant, and its direct competitors, have been instructed, under threat of termination or nonrenewal as a distributor of Plaintiff's products, not to solicit the groups of customers assigned to its two competitors for the purpose of maintaining or keeping up the price of Plaintiff's goods;
>
> (d) Plaintiff has directed Defendant, under threat of termination or nonrenewal, not to solicit the same business which Plaintiff is servicing directly, such as PetsMart (other than on a "fill-in" basis);
>
> (e) Plaintiff has directed Defendant, under threat of termination or nonrenewal as a distributor of Plaintiff Iams' products, not to solicit the customers of other Iams' distributors on the basis of price;
>
> (f) Plaintiff has directed Defendant, under threat of termination or nonrenewal as a distributor of Plaintiff's products, to coerce Defendant's retailer customers not too [sic] sell Plaintiff's products inexpensively.

Doc. **[*52]** # 46 at P 29. With respect to restraint of trade (the Second Claim for Relief), the Defendants allege:

> Within four years prior to the commencement of this action, Plaintiff Iams has been engaged in illegal restraint of trade by conspiring with Defendant L.A. Pet, as a coerced, involuntary co-conspirator, as hereafter alleged:

(a) Plaintiff Iams has directed Defendant L.A. Pet not to sell to price competitive retailers, under threat of termination or nonrenewal as a distributor of Plaintiff's products if Defendant did not follow Plaintiff's directive, for the purpose of maintaining or keeping up prices of Plaintiff's goods;

(b) Plaintiff Iams has divided the potential customers for Plaintiff's products (primarily retail pet stores and veterinarians) in Defendant L.A. Pet's market area into three groups, assigned one group of customers to Defendant L.A. Pet and the other two groups to Defendant's two direct competitors. Defendant, and its direct competitors, have been instructed, under threat of termination or nonrenewal as distributors of Plaintiff's products, not to solicit the groups of customers assigned to its competitors for the purpose of maintaining or keeping up the price **[*53]** of Plaintiff's goods;

(c) Plaintiff has directed Defendant, under threat of termination or nonrenewal, not to solicit the same business which Plaintiff is servicing directly, such as non "fill-in" PetsMart business. The foregoing conduct of Plaintiff Iams is either unlawful *per se* or unreasonable.

Id. at P 36.

Initially, Plaintiff argued that it is entitled to summary judgment on Defendants' claims under *§ 1* of the Sherman Act, because it did not engage in concerted activity. ***HN11***[] *Section 1* of the Sherman Act declares illegal, "every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade." As can be seen from the quoted language, *§ 1* does not outlaw unilateral activity; rather, the touchstone of a violation of that statute is concerted activity, action taken by more than an individual entity, such as entering into a contract, combination or conspiracy. See *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767-68, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*; *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 760-61, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*; *Nurse Midwifery Associates v. Hibbett, 918 F.2d 605, **[*54]** 611-12 (6th Cir. 1990)*. In *Monsanto,* the Supreme Court explained:

This Court has drawn two important distinctions that are at the center of this and any other distributor-termination case. First, there is the basic distinction between concerted and independent action--a distinction not always clearly drawn by parties and courts. *Section 1* of the Sherman Act requires that there be a "contract, combination … or conspiracy" between the manufacturer and other distributors in order to establish a violation. *15 U.S.C. § 1*. Independent action is not proscribed. A manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently. *United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*; cf. *United States v. Parke, Davis & Co., 362 U.S. 29, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)*. Under *Colgate,* the manufacturer can announce its resale prices in advance and refuse to deal with those who fail to comply. And a distributor is free to acquiesce in the manufacturer's demand in order to avoid termination.

465 U.S. at 760-61.

In the First Claim for Relief of their Second **[*55]** Amended and Supplemental Counterclaim, the Defendants alleged that Plaintiff conspired to violate *§ 1* of the Sherman Act with "L.A. Pet, as a coerced, involuntary co-conspirator." Doc. # 46 at P 29. The Defendants' Second Claim for Relief contains the same allegation. *Id. at P 36*. These are the only allegations of concerted activity contained in the Defendants' most recent pleading. For purposes of ruling on Plaintiff's Third Motion for Partial Summary Judgment (Doc. # 69), the Court assumed that the evidence presented by the Defendants raises a *genuine* issue of fact as to whether Plaintiff's coercion induced L.A. Pet into becoming an involuntary co-conspirator. However, that *genuine* issue of fact is not *material.* Quite simply, ***HN12***[] concerted activity and, thus, liability under *§ 1* of the Sherman Act cannot be based upon a distributor's coerced, involuntary acquiescence with its supplier's demands. In *Isaksen v. Vermont Castings, Inc., 825 F.2d 1158 (7th Cir. 1987)*, *cert. denied, 486 U.S. 1005, 100 L. Ed. 2d 193, 108 S. Ct. 1728 (1988)*, the Seventh Circuit noted that that "after *Monsanto,* 'no agreement is formed when a dealer unwillingly complies solely because **[*56]** he wishes to avoid termination.'" *Id. at 1164* (quoting 7 Areeda, ***Antitrust Law****,* P 1451e). *See also, International Logistics Group v. Chrysler Corp., 884 F.2d 904, 907 (6th Cir. 1989)* *cert. denied, 494 U.S. 1066, 108 L. Ed. 2d 784, 110 S. Ct. 1783 (1990)*; *Barnosky Oils, Inc. v. Union Oil Co., 665 F.2d 74 (6th Cir. 1981)* (where supplier merely exercises unilateral power, no antitrust concerted action is possible even if the supplier forced others to acquiesce in its restraints).

Defendants did argue that they had evidence which goes beyond the allegation that Plaintiff's threats of termination or nonrenewal "coerced" them to fix their prices. In particular, the Defendants relied on three particular incidents, which the Court will address in the order in which they were presented.

First, the Defendants pointed to Plaintiff's directive regarding "fill-in" orders for PetsMart. As is explained above (in connection with the Court's discussion of Plaintiff's Motion to Strike), Plaintiff decided, in 1992, to sell products directly to certain national chains such as PetsMart. Thus, Plaintiff would ship its products directly to PetsMart, with its independent distributors, **[*57]** such as L.A. Pet, no longer selling to such chains. When a particular PetsMart store needed additional products (between deliveries from Plaintiff), Plaintiff would purchase products from one of its independent distributors, such as L.A. Pet, which would then deliver the product to that store needing same. The uncontroverted evidence establishes that the pet food which L.A. Pet would deliver to PetsMart, as "fill-in products" was owned by that distributor. Defendants argue that this scenario evidences a conspiracy between Plaintiff and PetsMart, fixing the prices at which L.A. Pet would sell Plaintiff's products to PetsMart. The fatal flaw in Defendants' argument is that L.A. Pet did not *sell* Plaintiff's products to PetsMart. Rather, that distributor sold Plaintiff's pet food back to the Plaintiff and merely *delivered* same to PetsMart. The distributor would then bill the Plaintiff for the product. Defendants do not argue that a manufacturer violates *§ 1* of the Sherman Act, by fixing the price at which it will re-purchase its products from one of its distributors. Accordingly, the Court concluded that the Plaintiff was entitled to summary judgment on the Defendants' First **[*58]** Claim for Relief, to the extent that said claim is predicated upon the assertion that Plaintiff engaged in price fixing, when Plaintiff re-purchased these products from L.A. Pet, by paying L.A. Pet 108% of the price it (L.A. Pet) had paid to purchase the products initially.

Second, Defendants argued that the "ABC" lists constituted price fixing. This Court cannot agree. The maintaining of an "ABC" list was a method which the Plaintiff used to track customers of its distributors so that each customer was serviced. An "A" customer of a particular distributor purchased more products from that distributor than from any other distributor. Assuming for present purposes that the Plaintiff did refuse to allow Defendants to sell to the "A" customers of other distributors, this Court nevertheless cannot agree with the Defendants that such activity is evidence of concerted activity. Rather, it is merely a manifestation of Plaintiff's alleged unilateral activity. The fact that the Plaintiff may have caused its distributors to refrain from selling to certain customers, by threatening their termination if they sold to those customers, is not evidence of concerted activity.

Third, the Defendants **[*59]** argued that the Plaintiff engaged in concerted activity by preventing it from selling to mass or discount merchandisers. The uncontroverted evidence established that the Plaintiff, alone, made that decision, as an integral part of its marketing strategy. Therefore, this Court concluded that the evidence did not raise a genuine issue of material fact as to whether the Plaintiff's alleged refusal to allow Defendants to sell products to mass or discount merchandisers constituted concerted activity.

In sum, the Court concluded that there was no evidence that Plaintiff engaged in concerted activity. Since concerted activity is an essential element of any claim under *§ 1* of the Sherman Act (whether the claim is price-fixing or some other restraint of trade), the Defendants cannot establish either their First or Second Claims for Relief. [16] Accordingly, the Court sustained the Plaintiff's Third Motion for Partial Summary Judgment (Doc. # 69).

[*60] After this Court had issued its Decision (Doc. # 90), indicating how it would rule upon the Plaintiff's three Motions for Partial Summary Judgment, Plaintiff filed a Motion for Entry of Final Judgment (Doc. # 91), with which it requested that the Court enter such a judgment, pursuant to *Rule 54(b) of the Federal Rules of Civil Procedure*. [17] **[*61]** In addition to opposing that motion, the Defendants have filed a motion, with which they request this Court

[16] Since the Court had concluded that there was no evidence that the Plaintiff had engaged in concerted activity, it was not necessary to address Plaintiff's alternative argument, that the restraints in which it is alleged to have engaged were non-price, vertical restraints which are assessed under the "rule of reason" and that those restraints are, as a matter of law, reasonable.

to dismiss or to stay this litigation. *See* Doc. # 94. The genesis of these motions is the lawsuit which L.A. Pet filed against Plaintiff and its employees in the Superior Court for the County of San Bernardino, California. [18] That court initially stayed that litigation. However, on appeal, the California appellate court reversed the entry of the stay and remanded to the trial court to allow that litigation to proceed. Since a resolution of the Defendants' Motion to Dismiss or to Stay (Doc. # 94) could moot the necessity of a ruling on the Plaintiff's Motion to Enter Final Judgment (Doc. # 91), the Court will initially address the Defendants' motion, following it will turn to the Plaintiff's motion, if the former is overruled.

In support of their contention that this Court should dismiss or stay this litigation in favor of that pending in the California Superior Court, the Defendants rely upon *Younger v. Harris, 401 U.S. 37, 27 L. Ed. 2d 669, 91 S. Ct. 746 (1971)* and *Brillhart v. Excess Ins. Co., 316 U.S. 491, 86 L. Ed. 1620, 62 S. Ct. 1173 (1942)*. A comparison of the claims asserted by the parties in this litigation with the claims asserted by L.A. Pet in the California litigation convinces this Court that neither *Younger* nor *Brillhart* constitutes a basis for this Court to dismiss or to stay this litigation.

In the California litigation, L.A. Pet has alleged that Plaintiff and its employees violated California's state antitrust laws by engaging in resale price maintenance, by controlling prices and by committing unfair business practices. In this litigation, the Plaintiff has asserted four claims, to wit: a request for a declaration that it did not violate the Distributorship Agreements by terminating **[*62]** them and three claims for damages, predicated upon the Defendants' alleged breaches of those agreements, libel to its business reputation and interference with prospective economic advantage. *See* Doc. # 15. Rather than merely defending against Plaintiff's claims, Defendants sought affirmative relief on their own behalf. In their Second Amended and Supplemental Counterclaim (Doc. # 46), Defendants set forth eight claims for relief, of which the remaining six have been disposed of through summary judgment in this Decision, [19] to wit: 1) price fixing in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1* (First Claim for Relief); 2) restraint of trade in violation of *§ 1* of the Sherman Act (Second Claim for Relief); 3) breach of contract (Third Claim for Relief); 4) breach of contract/interference with contracts (Fourth Claim for Relief); 5) breach of *de facto* fiduciary duty (Fifth Claim for Relief); and 6) bad faith (Sixth Claim for Relief). Therefore, the claims asserted in this litigation, although sharing a common core of fact, are predicated upon different legal theories than those which L.A. Pet has plead in the California litigation.

[*63] ***HN13***[]

The *Younger* abstention doctrine has been applied in cases in which a federal court is asked to enjoin state court or administrative proceedings. *See e.g., Younger, 401 U.S. 37, 27 L. Ed. 2d 669, 91 S. Ct. 746* (criminal proceedings); *Huffman v. Pursue, Ltd., 420 U.S. 592, 43 L. Ed. 2d 482, 95 S. Ct. 1200 (1975)* (civil proceeding); *Middlesex County Ethics Comm. v. Garden State Bar Ass'n, 457 U.S. 423, 73 L. Ed. 2d 116, 102 S. Ct. 2515 (1982)* (administrative proceeding); *GTE Mobilnet of Ohio v. Johnson, 111 F.3d 469 (6th Cir. 1997)* (same). To abstain from jurisdiction under *Younger,* three elements must exist: 1) an on-going state proceeding; 2) the proceedings must implicate important state interests; and 3) the proceeding must provide an adequate opportunity to raise constitutional challenges. *Sun Refining & Marketing Co. v. Brennan, 921 F.2d 635, 639 (6th Cir. 1990)*; *Middlesex County Ethics Comm., 457 U.S. 423, 73 L. Ed. 2d 116, 102 S. Ct. 2515*.

Quite simply, *Younger* abstention does not apply to the facts of this case. Under that doctrine, which is predicated upon principles of federalism and comity, a federal court must abstain from enjoining **[*64]** state criminal, civil or

---

[17] The Plaintiff has also filed a motion requesting that this Court expedite disposition of its (Plaintiff's) Motion for Final Judgment (Doc. # 91). *See* Doc. # 99. Given that the Court rules, herein, upon the Plaintiff's request for entry of final judgment, the Court overrules, as moot, Plaintiff's Motion to Expedite Disposition (Doc. # 99).

[18] This is the litigation that caused Plaintiff to terminate the agreements between the parties.

[19] In their Seventh and Eighth Claims for Relief, Defendants alleged that the Plaintiff had violated § 2 of the Robinson-Patman Act, *15 U.S.C. § 13*, and *§ 3* of the Clayton Act, *15 U.S.C. § 14*. The Defendants have dismissed their Seventh and Eighth Claims for Relief, with prejudice. *See* Doc. # 81.

administrative proceedings on the basis of a federal constitutional defense, when that defense can be litigated in the state proceedings. *Pennzoil Co. v. Texaco, Inc., 481 U.S. 1, 10-11, 95 L. Ed. 2d 1, 107 S. Ct. 1519 (1987)*. Herein, the Plaintiff has not asserted a claim with which it challenges the constitutionality of California's antitrust laws; rather, it seeks a declaratory judgment to the effect that it has lawfully terminated its agreements with the Defendants and, in addition, compensatory damages for breach of contract, libel to its business reputation and interference with prospective economic advantage. Under *Colorado River Water Conservation District v. United States, 424 U.S. 800, 47 L. Ed. 2d 483, 96 S. Ct. 1236 (1976)*, ***HN14***[] a District Court may, under certain circumstances, abstain from exercising jurisdiction in the interests of judicial economy, when a parallel action is pending in state court. Generally, however, the mere pendency of a state court proceeding involving the same subject matter does not bar a federal court from exercising its jurisdiction, given "the virtually unflagging obligation of the federal courts to exercise the jurisdiction **[*65]** given to them." *Id. at 817*. Therein, the Supreme Court concluded that the District Court had properly abstained from exercising its jurisdiction, since the litigation in state court had been pending much longer and had advanced farther than in federal court. That factor is not present in this case. This Court has now ruled upon Motions for Partial Summary Judgment which dispose of the remaining claims asserted by the Defendants in this litigation, motions which the parties devoted significant resources to briefing. It would be perverse indeed, if this Court were to conclude that the interests judicial economy dictate that it abstain from exercising its jurisdiction herein, thus causing the expenditure of its resources and those of the parties to have been wasted. Accordingly, the Court concludes that neither *Younger* nor *Colorado River* abstention prevents it from complying with its "virtually unflagging obligation" to exercise its jurisdiction in this matter.

In *Brillhart,* the Supreme Court recognized that a federal court may stay a request for declaratory relief in favor of pending state court litigation between the parties. That principle flows from the fact that **[*66]** the granting of a declaratory judgment is discretionary. *See e.g., Aetna Cas. & Sur. Co. v. Sunshine Corp., 74 F.3d 685 (6th Cir. 1996)*. This Court declines to stay this litigation on the basis of *Brillhart.* This litigation involves far more than merely the Plaintiff's request for declaratory relief. The Plaintiff has also asserted three claims with which it seeks compensatory damages. In addition, the Defendants had sought affirmative relief with their Second Amended and Supplemental Counterclaim (Doc. # 46). Merely because litigation between the parties is pending in California state court does not warrant this Court staying this litigation, even though the award of declaratory relief is discretionary in nature. Rather, the Court will address the question of whether it should exercise its discretion to grant the requested declaratory relief in connection with the decision on the merits of Plaintiff's claim for such relief.

Accordingly, the Court overrules the Defendants' Motion to Dismiss or to Stay (Doc. # 94).

Having so concluded, the Court turns to the Plaintiff's request that it enter final judgment on the Defendants' counterclaims. The Plaintiff moves pursuant to ***HN15***[] *Rule **[*67]** 54(b)*, which provides:

> (b) *Judgment Upon Multiple Claims or Involving Multiple Parties.* When more than one claim for relief is presented in an action, whether as a claim, counterclaim, cross-claim, or third-party claim, or when multiple parties are involved, the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties only upon an express determination that there is no just reason for delay and upon an express direction for the entry of judgment. In the absence of such determination and direction, any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties, and the order or other form of decision is subject to revision at any time before the entry of judgment adjudicating all the claims and the rights and liabilities of all the parties.

HN16[] Before a district court can direct the entry of final judgment pursuant to *Rule 54(b)*, three conditions must be present: 1) the case must involve multiple claims and/or multiple parties; 2) at least one claim or the rights **[*68]** of one party must have been finally decided; and 3) there must be no just reason for delaying the appeal. 10 Wright, Miller & Kane *Federal Practice and Procedure* § 2656. Herein, all conditions but one are present. That exception is based upon the Defendants' Third Claim for Relief, with which they allege that the Plaintiff breached the Distributorship Agreements by terminating them.

First, Plaintiff asserted multiple claims against the Defendants, who, in turn, asserted multiple claims against the Plaintiff.

Second, the Court has adjudicated all of the claims asserted by the Defendants in their counterclaim, except the two which the Defendants voluntarily dismissed with prejudice.

Third, ***HN17***[] deciding whether there is no just cause for delay involves the exercise of discretion. The Sixth Circuit has said that a district court should consider the following factors when it exercises its discretion:

> "(1) the relationship between the adjudicated and unadjudicated claims; (2) the possibility that the need for review might or might not be mooted by future developments in the district court; (3) the possibility that the reviewing court might be obligated to consider the **[*69]** same issue a second time; (4) the presence or absence of a claim or counterclaim which could result in set-off against the judgment sought to be made final; (5) miscellaneous factors such as delay, economic considerations, shortening the time of trial, frivolity of competing claims, expense, and the like."

Corrosioneering v. Thyssen Environmental Systems, Inc., 807 F.2d 1279, 1283 (6th Cir. 1986) (quoting, *Allis-Chalmers Corp. v. Philadelphia Electric Co., 521 F.2d 360, 364 (3d Cir. 1975))*. *See also, Soliday v. Miami County, Ohio, 55 F.3d 1158 (6th Cir. 1995)*; *Solomon v. Aetna Life Insurance Co., 782 F.2d 58, 61 n.2 (6th Cir. 1986)*.

An application of those five factors convinces this Court that no just cause for delay exists as to the Defendants First, Second and Fourth through Sixth Claims for Relief. The Court will initially address those five claims and, then, turn to the Defendants' Third Claim for Relief. Although the five adjudicated claims share a common genesis with the Plaintiff's unadjudicated claims, the relationship between the parties relating to the distribution of the Plaintiff's pet food, those claims are not so interrelated as to preclude this **[*70]** Court from finding that no just cause for delay exists. The Plaintiff's claims arise out of the termination of the Distributorship Agreements and events which occurred contemporaneously (the filing of the lawsuit in California state court by L.A. Pet and letters it sent to its customers accusing Plaintiff of fixing prices). The five claims of the Defendants arise out of events which occurred while the relationship between the parties was ongoing (such as the claim that Plaintiff owed them a *de facto* fiduciary duty). Future events occurring in this litigation will not moot the need for appellate review of these claims, nor will the Sixth Circuit be required to review any issue more than once. Moreover, since the Court is being asked to grant final judgment in favor of Plaintiff on claims that have been asserted against it, there is no possibility of a set-off against this judgment. Finally, the pending litigation in the California state courts is a factor in favor of entering final judgment in favor of Plaintiff. This litigation has been vigorously prosecuted by all parties. The Plaintiff having obtained a favorable ruling on its three Motions for Partial Summary Judgment from this **[*71]** Court is entitled to have the opportunity to take advantage of the preclusive effect of this Court's Decision in the California litigation. Accordingly, the Court finds that no just cause for delay exists.

Since the Defendants' Third Claim for Relief is the flip side of the Plaintiff's request for declaratory relief, this Court concludes that said adjudicated claim is significantly interrelated to one which has not been adjudicated. Moreover, there is the possibility that the Sixth Circuit could be called upon to review the same issues twice, if this Court were to enter final judgment on Defendants' Third Claim for Relief. Accordingly, the Court cannot find that no just cause for delay exists with respect to that claim.

Accordingly, the Court sustains in part and overrules in part the Plaintiff's Motion to Enter Final Judgment (Doc. # 91). The Court expressly finds that no just cause for delay exists with respect to the Defendants' First, Second and Fourth through Sixth Claims for Relief in their Second Amended and Supplemental Counterclaim (Doc. # 46). The Court expressly directs that final judgment be entered with respect to those claims. As to the Defendants' Third Claim for **[*72]** Relief, the Court finds that just cause for delay exists. [20]

---

[20] The Plaintiff has filed a motion with which it requests that the Court enjoin the California Superior Court from proceeding with the litigation between the parties currently pending before it. *See* Doc. # 102. Although this Court has no doubt of its authority to enter such injunctive relief (see *28 U.S.C. § 2283*), it chooses not to exercise that authority at this time. Rather, the California

[*73] Counsel listed below should take note that a telephone conference call is scheduled for noon, on Tuesday, April 7, 1998, for the purpose of selecting a trial date and other pertinent dates leading to the resolution of this litigation.

WALTER HERBERT RICE, CHIEF JUDGE

UNITED STATES DISTRICT COURT

Superior Court should, in the first instance, determine the preclusive effect of this Decision. Accordingly, the Court overrules the Plaintiff's Motion for Temporary Retraining Order and Preliminary Injunction (Doc. # 102), without prejudice to renewal on an immediate basis, should events in the California litigation convince Plaintiff that renewal is an idea whose time has come.

In addition, this Court has not entered final judgment on the Defendants' Third Claim for Relief, with which they had alleged that Plaintiff had breached the Distributorship Agreements by terminating those agreements, although the Court has granted Plaintiff summary judgment on that claim. Based upon a review of the complaint filed by L.A. Pet in the California action (which has been furnished this Court), it appears that a similar claim is not being pursued in that litigation. Indeed, that lawsuit was filed *before* those agreements were terminated. In the event that an amended complaint is or has been filed in that litigation, setting forth a claim similar to the Defendants' Third Claim for Relief, the Plaintiff is directed to renew its request for injunctive relief, on an immediate basis. The Court, in turn, will grant a temporary restraining order, leading to a hearing on a request for preliminary injunction, in order to protect and/or to effectuate its judgment with regard to the grant of summary judgment to the Plaintiff on that Third Claim for Relief of the Defendants. *28 U.S.C. § 2283*.

HN1[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

15 U.S.C.S. § 15 makes it unlawful to sell goods on the condition, agreement, or understanding that the purchaser shall not use or deal in the goods of a competitor of the seller, where the effect may be to substantially lessen competition, or tend to create a monopoly. Even though a single contract between single traders may fall within the initial broad proscription of the section, it must also have tendency to work a substantial lessening of competition in the relevant competitive market. An exclusive dealing arrangement does not violate the Clayton Act unless the probable performance of the agreement will foreclose competition in a substantial share of the line of commerce affected. Thus, exclusive dealing is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are "frozen out" of the market by the exclusive deal. Notwithstanding the Clayton Act's proscription of certain exclusive dealing agreements, such agreements that are narrow in scope pose no threat of adverse economic

consequences, and may be substantially pro-competitive by ensuring stable markets and encouraging long term, mutually advantageous business relationships. Where market competitors may reach ultimate product consumers by using existing, or potential, alternate channels of distribution, an exclusive distributorship agreement may not foreclose competition in the market.

Opinion

[*120] RULING ON PLAINTIFF'S OBJECTION TO RECOMMENDED RULING [doc. 73]

In a March 12, 1998 Recommended Ruling, Magistrate Judge Garfinkel recommended that defendant Idexx Laboratories, Inc.'s ("IDEXX") motion for summary judgment be granted because plaintiff failed to demonstrate that IDEXX's exclusive dealing contract at **[**2]** the distributor level impeded plaintiff CDC Technologies, Inc.'s ("CDC") ability to reach the ultimate customers of its instruments used to perform clinic hematology analyses (veterinarians), as required by Section 3 of the Clayton Antitrust Act.

[*121] The Magistrate Judge also recommended summary judgment on CDC's claims under *sections 1* and *2* of the Sherman Antitrust Act, and on CDC's state law antitrust, CUTPA, civil conspiracy and tortious interference claims. CDC objects to the Recommended Ruling on the grounds that the Magistrate Judge erroneously concluded that CDC made an insufficient showing demonstrating a factual dispute that IDEXX's exclusive dealing agreements had an adverse effect on competition in the market for its clinical veterinary hematology instruments, the basis on which the Magistrate Judge recommended dismissal of CDC's federal antitrust claims and related state law claims.

HN1[] Section 3 of the Clayton Act makes it unlawful to sell goods on the condition, agreement, or understanding that the purchaser shall not use or deal in the goods of a competitor of the seller, where the effect may be to substantially lessen competition, or tend to create a monopoly. *15 U.S.C.* ***[**3]*** *§ 14*. "Even though a single contract between single traders may fall within the initial broad proscription of the section, it must also suffer the qualifying disability, tendency to work a substantial--not remote--lessening of competition in the relevant competitive market." *Tampa Electric Company v. Nashville Coal Company, 365 U.S. 320, 333, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*. An exclusive dealing arrangement does not violate the Clayton Act unless the probable performance of the agreement will "foreclose competition in a substantial share of the line of commerce affected." *Id. at 327*. Thus, exclusive dealing is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are "frozen out" of the market by the exclusive deal. *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* (O'Connor, J., concurring).

Notwithstanding the Clayton Act's proscription of certain exclusive dealing agreements, such agreements that are narrow in scope pose no threat of adverse economic consequences, and indeed, "may be substantially procompetitive by ensuring stable markets and encouraging long term, mutually **[**4]** advantageous business relationships." *Id.; Tampa Electric, 365 U.S. at 334*.

Where market competitors may reach ultimate product consumers by using existing, or potential, alternate channels of distribution, an exclusive distributorship agreement may not foreclose competition in the market. *Omega Environmental, Inc. v. Gilbarco, 127 F.3d 1157, 1163 (9th Cir. 1997)*; *Ryko Manufacturing Co. v. Eden Services,* 823 F.2d 1215, 1235 (8th Cir. 1987). The Magistrate Judge correctly found undisputed evidence on the submitted record that CDC has alternative avenues of reaching its end-users, which when buttressed by undisputed evidence of CDC's increase in sales since defendant entered the market, underscores the absence of evidence for jury determination of an anti-competitive effect from the exclusive arrangements at issue. Where the undisputed evidence shows that CDC continued to reach end-users in the relevant market, absent any other demonstration of anti-competitive effect, IDEXX's 80% share of the clinical hematology instrument market and its foreclosure of 65% of the distributor outlet market, claimed by CDC, are inadequate to support the inference of anti-competitiveness that **[**5]** their magnitude would suggest at first blush. CDC's focus on the impact of the exclusive agreements on "distributor outlets" ignores its failure to demonstrate an anti-competitive effect on the end-users in the relevant market. Inasmuch as the evidentiary showing CDC contends it has made addresses only the impact of the exclusive agreements on distributor outlets, it fails to show any anti-competitive consumer effect.

The Recommended Ruling ***HN2***[] properly focuses on whether the facts submitted by CDC demonstrated any anti-competitive effect on its relationship with end-users in the relevant market. *See* Omega Environmental, Inc., 127 F.3d at 1163 (generally, exclusive dealing arrangements imposed on distributors rather than end-users are generally less cause for anti-competitive concern); Ryko Manufacturing, 823 F.2d at 1235 (same). *Cf.* Jefferson Parish Hospital, 466 U.S. 2, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (dismissing suit by unaffiliated anesthesiologist and finding no antitrust violation in exclusive agreement between **[*122]** hospital and anesthesiologist group providing that only doctors in that group could practice anesthesiology at hospital).

Specifically, the Magistrate Judge **[**6]** considered the undisputed evidence on the role of the distributors in the selling process under the challenged arrangement, namely, providing "qualified leads" only. ***HN3***[] Because the distributor does not demonstrate or sell the product to the end-user veterinarian, or otherwise negotiate about the product, and such customers actually buy the product from direct sales forces, the challenged arrangement does not translate into evidence of customer foreclosure. *See* Omega Environmental, 127 F.3d at 1163 (finding undisputed evidence that direct sales to end-users are an alternative channel of distribution in the market).

The Magistrate Judge relied on undisputed evidence of numerous alternatives on which CDC can, and did, rely to pursue direct sales to the customers, i.e., telemarketing, direct mail campaigns, customer lists, advertising, and participation in trade shows. Further, the Recommended Ruling correctly found no evidence submitted that IDEXX coerced distributors to enter into these exclusive agreements. In fact, it was not disputed that the agreements are limited in duration (one year), as well as have a 60 day terminability clause, during which time the distributor may end the **[**7]** agreement, further underscoring the lack of probative value of the arrangement on the issue of consumer competition foreclosure.

Because CDC has not demonstrated the existence of genuine issues of material facts such that reasonable jurors could find that IDEXX's exclusive dealing agreements substantially lessened competition by impeding CDC's ability to reach the ultimate customers of its hematology instruments, the Court concludes that summary judgment is properly entered for IDEXX on CDC's Clayton Act claim.

Since the Supreme Court has expressly held that ***HN4***[] if a claim does not fall within the broader proscription of section 3 of the Clayton Act it is also not prohibited by sections 1 and 2 of the Sherman Act, IDEXX is entitled to judgment on those claims as well. *See* Tampa Electric, 365 U.S. at 335. Similarly, the elements of Conn. Gen. Stat. § 35-27 are substantially similar to the elements under § 2 of the Sherman Act, and thus fail with CDC's federal claim. *See* Westport Taxi Service v. Westport Transit District, 235 Conn. 1, 15, 664 A.2d 719 (1995) (recognizing that statute was intentionally patterned after federal ***antitrust law*** and is similar to federal law in every **[**8]** respect). The Connecticut Supreme Court also has held that since Conn. Gen. Stat. § 35-29 is patterned after section 3 of the Clayton Act, the elements of the federal cause of action must be used in determining whether a violation of § 35-29 has occurred, State v. Hossan-Maxwell, Inc., 181 Conn. 655, 436 A.2d 284 (1980), and the failure of CDC's federal claim warrants dismissal of its § 35-29 claim. Finally, as to CDC's state law claims for civil conspiracy, tortious interference and CUTPA, the Court accepts the well-reasoned analysis set forth in the Recommended Ruling.

Accordingly, upon review and pursuant to *28 U.S.C. § 636(b)(1)(A)* and Rule 2 of the Local Rules for United States Magistrates (D. Conn. 1995), the recommended ruling is APPROVED and ADOPTED as the ruling of this Court over objection.

IT IS SO ORDERED.

HN2[] **Relief From Judgments, Altering & Amending Judgments**

Under Local Rule 7.1(h)(3), the movant shall not only demonstrate a palpable defect by which the court and the parties have been misled but also show that a different disposition of the case must result from a correction thereof.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

HN3[] **Relief From Judgments, Altering & Amending Judgments**

The major grounds that justify reconsideration involve an intervening change of controlling law, the availability of new evidence, or the need to correct a clear error or prevent manifest injustice.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Appealability

HN4[] **Relief From Judgments, Altering & Amending Judgments**

On a renewed motion for summary judgment before a second judge, the district court must balance the need for finality against the forcefulness of any new evidence and the demands of justice. With respect to a non-appealable denial of summary judgment, the law of the case is not a limit on the court's jurisdiction, but a rule of practice which may be departed from in the sound discretion of the district court.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

HN5[] **Relief From Judgments, Altering & Amending Judgments**

A reviewing court need not decide whether the new evidence considered by the district court meets some threshold test of sufficiency. The district court does not have to rely on new evidence; if the demands of justice require, it may simply change its mind.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The prima facie elements of a per se tie-in claim are: 1. there must be a tying arrangement between two distinct products; 2. the seller must have sufficient economic power in the tying market to restrain appreciably competition in the tied product market; and 3. the amount of commerce affected must not be insubstantial.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN7[] **Price Fixing & Restraints of Trade, Tying Arrangements**

In the absence of an express or admitted tie, there must be some independent proof of "forcing" or "coercion" in order to demonstrate a tie.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Business & Corporate Law > Distributorships & Franchises > General Overview

HN8[] **Price Fixing & Restraints of Trade, Tying Arrangements**

In a setting where a franchisee can only obtain necessary goods to operate the franchise from a distributor approved by the franchisor, the question of whether there is an illegal tie within the meaning of prima facie element number 1 on the per se prohibition against tying can be proven in four distinct ways: 1. the tying arrangement is expressed in some written contract instrument; 2. the defendant admits that there is a tying arrangement; 3. the franchisee requested an alternate distributor, which alternate distributor is wrongfully denied approval for reasons motivated by an intent to restrain competition; or 4. The approval process can be demonstrated to be futile, including use of internal documents of the defendant, possibly obtained only after discovery in the litigation, and a. the franchisee did not apply for an alternate distributor because of the knowledge that the time and effort would be futile, or b. the futility could be demonstrated by sufficient evidence of other denials of other franchisees' requests for alternate distributors even if the individual plaintiff did not make a request for an alternate distributor.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN9[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tie should not be deemed to arise when the defendant announces quality standards under which he stands ready to approve, without profit to himself, as many qualified suppliers as wish to provide the tied product, although he has not yet approved many or any. To be sure, a tie-in exists if the willingness to approve others is merely a charade. Normally, however, the expressed willingness to approve all comers meeting a standard will suffice absent such contrary evidence as internal records indicating that the defendant would not have approved others, or the defendant's unjustified denial of requests to approve disinterested suppliers, or other conduct leading reasonable buyers to understand the defendant was unwilling to approve such requests.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

One recurring issue is whether any tying condition may fairly be found when buyers took the package without requesting separate provision. The answer is affirmative when such a request would be futile. The courts typically demand that futility be proved with evidence of what has occurred in the marketplace. They do not ask whether futility may fairly be presumed when the tribunal knows of the defendant's silent tying condition even though buyers did not.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN11[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Evidence that requests for separate provision are futile include defendant's announced policy that he will not sell product A separately, rebuffed requests, refusals to sell or continue selling to those who do that his product B, putting two products in one box, or any similar conduct creating a reasonable impression of such a policy. For convenience in administering the antitrust laws, moreover, one can infer futility from defendant's internal documents or admissions known to the tribunal, though not to customers, that defendant would not sell A separately.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Compliance > ... > Sales of Goods > Remedies > General Overview

HN12[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The "coercion" or "forcing" that the prohibition on tying is concerned with are seller abuses of power to restrain buyer choices as to product B. It is sustainable abuse of market power that concerns antitrust. Antitrust remedies generally should not be available as the initial recourse where simple market remedies exist and are unexhausted.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

HN13[] **Price Fixing & Restraints of Trade, Tying Arrangements**

There is no failure of the market if contract protections are available to franchisees to seek a second source of products needed to operate a franchise.

[*516] REPORT AND RECOMMENDATION ON PLAINTIFFS' MOTION TO AMEND THIS COURT'S AUGUST 7, 1995, ORDER

Plaintiffs have filed a motion under *Fed. R. Civ. P. 54(b)* to amend the August 7, 1995, order of this Court granting partial summary judgment **[**2]** on the tying claims of plaintiffs Hennessy and Fields. [1] In its August 7, 1995, opinion this Court denied nationwide class certification for franchisees who held pre-1990 Franchise Agreements, as did plaintiffs Hennessy and Fields. The Court also granted summary judgment on the tying claims of plaintiffs Hennessy and Fields because they did not exercise their contract rights to request an alternate distributor to Blue Line Distributing, Inc. ("Blue Line"), and because they could not prove that they did not make such a request because they knew it would be futile to do so. Thus, in the absence of an express tying arrangement (or a defendant's admission) plaintiffs Hennessy and Fields could not prove that they were "forced" or "coerced" to buy all goods from Blue Line as those terms are used in the antitrust cases to show that there was an illegal tie. *Little Caesar Enterprises, Inc. v. Smith, 895 F. Supp. 884, 894-96 (E.D.Mich. 1995)*.

[3]** Plaintiffs bring this motion asserting that since the August 7, 1995, ruling they have uncovered significant new evidence, and other courts, including the Sixth Circuit, have clarified the law concerning tying claims. They note that much of this new evidence was examined in the Court's certification of a class involving Little Caesar franchisees who signed post-mid-1990 Franchise Agreements. *Little Caesar Enter., Inc. v. Smith, 172 F.R.D. 236 (E.D.Mich. 1997)*. Plaintiffs also assert that the Court did not expressly address the plaintiffs' claim of fraudulent concealment of the 1989 Exclusive Licensing Agreement between Little Caesar and Blue Line in its earlier opinion.

The factual background as well as a substantial summary of plaintiffs' evidence, including the newly discovered evidence, is set out in detail in Section V.A, B and C of my March 31, 1998, Report and Recommendation on Defendant's Motion for Partial Summary Judgment (hereinafter "March 1998 Summary Judgment Report"). These facts and the background and procedural facts in that opinion are incorporated here by reference.

I. PROCEDURAL BACKGROUND:

HN1[] According to *Fed. R. Civ. P. 54(b)*, when multiple claims for **[**4]** relief are presented "the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties" if the Court determines that there is no just reason for delay. The Rule notes in addition:

> In the absence of such determination and direction, any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties, and the order or other form of decision is subject to revision at any time before the entry of judgment adjudicating all the claims and the rights and liabilities of all the parties.

In effect, *Rule 54* reserves for the court the power to revise any interim judgments prior to the direction of the entry of final judgment. While the Court has the **[*517]** power to modify its non-final judgments, plaintiffs' motion seeking to trigger this power is, in effect, a motion to amend or alter a judgment or for reconsideration. ***HN2***[] Under our Local Rule 7.1(h)(3):

> The movant shall not only demonstrate a palpable defect by which the Court and the parties have been misled but also show that **[**5]** a different disposition of the case must result from a correction thereof.

---

[1] This case is consolidated. Because Fields and Hennessy were co-plaintiffs of Gary Smith in Case No. 93-CV-40521 against LCE, this Report and Recommendation refers to LCE as the defendant. Plaintiffs' claims were initially brought against three defendants, LCE, Blue Line Distributing, Inc., and Little Caesar National Advertising Program, Inc. ("LCNAP"). This Court has granted summary judgment on all claims involving LCNAP. After this suit was filed, LCE merged with Blue Line. Thus, LCE is the sole remaining defendant.

Cale v. Johnson, 861 F.2d 943, 947 (6th Cir. 1988), cites from 18 C. Wright, A. Miller & E. Cooper, *Federal Practice and Procedure §* 4478 pp. 790-95 (1981):

> **HN3**[] The major grounds that justify reconsideration involve an intervening change of controlling law, the availability of new evidence, or the need to correct a clear error or prevent manifest injustice.

This section also notes concern when one judge is reexamining an opinion of another judge that there are concerns both of "an undesirable denial of comity between colleagues" and also "unfettered reexamination would unduly encourage efforts to shop around from one judge to another." *Id.* at 795 (footnotes omitted).

Judge Learned Hand in *Dictograph Products Co. v. Sonotone Corp., 230 F.2d 131, 134* (2d Cir.), *cert dismissed, 352 U.S. 883 (1956)*, considered both the factors of "mutual respect between members of the same court," and concerns that "the defeated party might shop around in hopes of finding a judge more favorably disposed." Judge Hand concluded:

> The first reason is clearly untenable: judicial sensibilities **[**6]** should play no part in the disposition of suitors' rights. The second reason has indeed much to recommend it, and, as a matter of practice, has been universally regarded a sufficient reason for treating the first ruling as conclusive. It is, however, quite another question whether under all circumstances it makes the first ruling immune from reconsideration.

Id. at 134-35. The Sixth Circuit in *Cale* cited *Corporacion De Mercadeo Agricola v. Mellon Bank International, 608 F.2d 43, 48 (2d Cir. 1997)*, noting:

> We held that **HN4**[] on a renewed motion for summary judgment before a second judge, the district court must balance the need for finality against the forcefulness of any new evidence and the demands of justice. With respect to a non-appealable denial of summary judgment [such as in the present case where the denial is not yet appealable], the law of the case is not a limit on the court's jurisdiction, but a rule of practice which may be departed from in the sound discretion of the district court.

In considering the challenge of the appellant in *Cale,* the appellant asserted that the new evidence, which was only an affidavit of the defendant, was insufficient. **[**7]** The Sixth Circuit noted:

> **HN5**[] We need not decide whether the new evidence considered by the district court meets some threshold test of sufficiency . . . . The district court does not have to rely on new evidence; if the demands of justice require, it may simply change its mind.

861 F.2d at 948.

II. THE PRIOR SUBSTANTIVE RULING:

As this Court has noted in its earlier summary judgment opinion **HN6**[] the *prima facie* elements of a *per se* tie-in claim are:

> 1. there must be a tying arrangement between two distinct products;
>
> 2. the seller must have sufficient economic power in the tying market to restrain appreciably competition in the tied product market; and
>
> 3. the amount of commerce affected must not be insubstantial.

Little Caesar Enter., Inc. v. Smith, 895 F. Supp. 884, 894 (E.D.Mich. 1995).

This case does not involve express contractual language that directly, or by necessary implication, binds the purchaser to buying the tied product in order to obtain the tying product. Nor does it involve the absence an admission of a tie by the defendant. Thus the Court in its earlier opinion was considering the issue of whether there was other suitable **[**8]** evidence to fulfill *prima facie* element # 1 to show that there was a tying arrangement between **[*518]** two products within the meaning of the *per se* tying rule. ***HN7***[] in the absence of an express or admitted tie, the case law has demonstrated there must be some independent proof of "forcing" or "coercion" in order to demonstrate a tie.

In the Court's earlier opinion, it ruled against plaintiffs Hennessy and Fields because of their inability to show either: (1) that they objected to Blue Line as a distributor by requesting approval of an alternate distributor; or (2) that they were aware that the approval process was futile, thus excusing their need to exercise their contractual rights to request an alternate distributor to Blue Line. The Court noted that prior to Smith's April 1992 request for AmeriServ to be an alternate distributor, which denial plaintiff Smith contends was wrongful, his earlier 1988 efforts to seek an alternate distributor along with franchisees was not pursued because "after a series of meetings, Smith's concerns were addressed and he decided to stay with Blue Line. *Id. at 895* With respect to Fields and Hennessy, the Court noted that Hennessy never sought an alternate **[**9]** distributor. Nor did Fields, and she "was only aware of the single rejection of AmeriServ as an alternate distributor for Smith." *Id. at 895-96*. The Court concluded:

> As to plaintiffs Hennessy and Fields, however, the court will grant Little Caesar's motion for summary judgment on the tying claim as to these two plaintiffs. Within the applicable time period, neither one requested approval of an independent distributor or were subject to an explicit contractual tie-in as part of the franchise agreements by which they were bound. Furthermore, these plaintiffs cannot show that had they made a request for an alternate distributor, it would have been futile. As a result, there is no indication that either Fields or Hennessy was forced to continue purchasing supplies through Little Caesar/Blue Line.

Id. at 896.

HN8[] In a setting where the franchisee can only obtain necessary goods to operate the franchise from a distributor "approved" by the franchisor, the question of whether there is an illegal tie within the meaning of *prima facie* element # 1 on the *per se* prohibition against tying can be proven in four distinct ways:

> 1. the tying arrangement is expressed **[**10]** in some written contract instrument;
> 2. the defendant admits that there is a tying arrangement;
> 3. the franchisee requested an alternate distributor, which alternate distributor is wrongfully denied approval for reasons motivated by an intent to restrain competition; [2]

---

[2] If a franchisor has a legitimate business justification for denying a franchisee's request for an alternate distributor, the mere fact that the franchisor may also have a secondary desire not to face competition does not involve a violation of the antitrust laws. In other words, if the defendant can demonstrate that they would have denied the request for an alternate distributor even in the absence of the fact that this would reduce the competition they would face, the denial would be justified and no ***antitrust law*** violated. Obviously a jury could determine either (1) that the business justification was a pretext, or alternatively (2) the business justification, while of some degree of legitimacy, would not have been sufficient to warrant the denial in the absence of the defendant's desire to restrain competition. *Cf.* *Mount Healthy City School Dist. Bd. of Educ. v. Doyle, 429 U.S. 274, 50 L. Ed. 2d 471, 97 S. Ct. 568 (1977)* (in a constitutional context, once a plaintiff has established a *prima facie* case that the defendant's action was taken against him in retaliation for the exercise of a constitutional right, the burden shifts to the defendant to show by a preponderance that he would have taken the same action even if the plaintiff had not engaged in the constitutionally protected action.) While this is not the central issue of this motion, and I am unaware of any specific antitrust case law on this precise point, the policy considerations lying behind the *Mount Healthy* case are consistent with and applicable to the policy considerations in ***antitrust law*** in precluding a franchisor from using otherwise legitimate reasons for denying an alternate distributor as a cover for a denial that is actually motivated by a desire to restrain competition. Courts in the constitutional context have made it clear that an act in retaliation for the exercise of a constitutionally protected right is actionable under *42 U.S.C. § 1983* even if the act, when taken for different reasons, would have been proper. *Franco v. Kelly, 854 F.2d 584, 590 (2d Cir. 1988)*; *Howland v. Kilquist, 833 F.2d 639, 644 (7th Cir. 1987)*; *Wright v. Newsome, 795 F.2d 964, 968 (11th Cir. 1986)* *(per curiam).* Similar analysis has been made in the antitrust context. *See* *Schine Chain Theatres v. United States, 334 U.S. 110,*

[*519] 4. The approval process can be demonstrated to be futile, including use of internal documents of the defendant (possibly obtained only after discovery in the litigation); and

a. the franchisee did not apply for an alternate distributor because of the knowledge that the time and effort would be futile, or

b. the futility could be demonstrated by sufficient evidence of other denials of other franchisees' requests for alternate distributors even if the individual plaintiff did not make a request for an alternate distributor.

[11]** III. PLAINTIFFS' ASSERTIONS:

Plaintiffs in their motion argue that PSI Repair Servs., Inc. v. Honeywell, Inc., 104 F.3d 811 (6th Cir.), *cert. denied, 138 L. Ed. 2d 195, 117 S. Ct. 2434 (1997)*, indicated that when a defendant conceals from a customer at the time of purchase a policy of tying two products together or a change in policy, in such cases that the tie could be found to violate § 1 of the Sherman Act. Plaintiffs are correct that in the present case if LCE failed to disclose its policy of refusing to approve alternate distributors at the time when Fields and Hennessy signed franchise agreements giving them contractual rights to seek an alternate distributor, and then, after Fields and Hennessy purchased their franchises and became "locked in" LCE implemented its policy of refusing to approve an alternate distributor request, plaintiffs Fields and Hennessy could assert a *Kodak*-type market for the tying product. Yet, for reasons stated in my Report and Recommendation on LCE's motion for partial summary judgment, the *Kodak/PSI* analysis deals with the second *prima facie* element of a *per se* tie-in claim. The Court's August 7, 1995, opinion dealt **[**12]** with the first *prima facie* element of a tying claim -- was there a forced tie between the continuing operation of a Little Caesar franchise and the purchase from Blue Line of all goods necessary to operate such a franchise?

IV. PROOF OF FUTILITY:

As noted by Professors Areeda, Hovenkamp and Elhauge in their antitrust treatise:

> ***HN9***[] Nor should a tie be deemed to arise when the defendant announces quality standards under which he stands ready to approve, without profit to himself, as many qualified suppliers as wish to provide the tied product, although he has not yet approved many or any. To be sure, a tie-in exists if the willingness to approve others is merely a charade. Normally, however, the expressed willingness to approve all comers meeting a standard will suffice absent such contrary evidence as internal records indicating that the defendant would not have approved others, or the defendant's unjustified denial of requests to approve disinterested suppliers, or other conduct leading reasonable buyers to understand the defendant was unwilling to approve such requests.

X AREEDA, HOVENKAMP AND ELHAUGE, ***ANTITRUST LAW*** (1990), P 1753g, at 299-300 (emphasis supplied, **[**13]** footnotes omitted).

Later the Areeda authors add:

> ***HN10***[] One recurring issue is whether any tying condition may fairly be found when buyers took the package without requesting separate provision. The answer is affirmative when such a request would be futile. The courts have typically demanded that futility be proved with evidence of what has occurred in the marketplace. They have not asked whether futility may fairly be presumed when the tribunal knows of the defendant's silent tying condition even though buyers did not. We would so presume on the ground that forcing the parties to litigate and the tribunal to resolve the futility issue seems wasteful when we can take the defendant's own word that such a request would have been futile.

Id. at P 19,556, p. 312 (emphasis supplied).

[*520] In examining how futility is proven, the authors state:

119, 92 L. Ed. 1245, 68 S. Ct. 947 (1948) ("Even an other otherwise lawful device may be used as a weapon in restraint of trade or in an effort to monopolize a part of trade or commerce.")

> *HN11*[] Evidence that requests for separate provision are futile include defendant's announced policy that he will not sell product *A* separately, rebuffed requests, refusals to sell or continue selling to those who do that his product *B,* putting two products in one box, or any similar conduct creating a reasonable impression of **[**14]** such a policy. For convenience in administering the antitrust laws, moreover, we would infer futility from defendant's internal documents or admissions known to the tribunal -- though not to customers -- that defendant would not sell *A* separately.

Id. at P 1756e, p. 325.

In the present case, there are no announced statements by LCE that it would not approve alternative distributors. There were only two refusals during the limitations period, one by AmeriServ in the southeastern United States (and possibly nationwide) and one by Chopping Block in Wisconsin. Plaintiffs have only challenged the defendant's reasons for denying the AmeriServ application. They have not challenged the business justification for LCE's denial of Chopping Block that it did not intend to carry a full line of products needed by Little Caesar franchisees.

Before considering plaintiffs' new evidence, it is helpful to review the cases the Areeda treatise cites on proof of futility in seeking seller approvals. This will set a context for determining whether the new evidence in light of the existing evidence and or a fuller understanding the of law warrant a modification of this Court's earlier determination **[**15]** to correct clear error or prevent manifest injustice.

In support of its proposition that a tie can exist where the willingness to approve other suppliers is a "charade," the Areeda authors cite *Tic-X-Press, Inc. v. Omni Promotions Co. of Ga., 815 F.2d 1407 (11th Cir. 1987)*; *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705 (11th Cir. 1984)*; *Advance Business Systems and Supply Co. v. SCM Corp., 415 F.2d 55 (4th Cir. 1969)*, *cert. denied, 397 U.S. 920, 25 L. Ed. 2d 101, 90 S. Ct. 928 (1970)*.

In *Tic-X-Press,* Atlanta Coliseum, Inc. ("ACI"), Omni Promotions Company, Limited ("TOPCOL" also "PROMOTIONS") had rights to lease the uniquely large Omni Coliseum for large concerts with audiences of 4,000 to 16,000. ACI, TOPCOL and SEATS were owned by a common entity and functioned as a single enterprise. In renting the Omni Coliseum, TOPCOL used a form agreement requiring tickets to be sold by PROMOTIONS ("TOPCOL") "or at other ticket agencies approved by PROMOTION . . ." *815 F.2d at 1412*. This was the "approved source" provision. PROMOTIONS did its ticket sales through SEATS. Defendants had no "written specifications on procedures for approving other ticketing services." **[**16]** *Id.* Plaintiff, Tic-X-Press, Inc. ("TXP"), had unsuccessfully requested on a number of occasions to sell some or all tickets to Omni concerts. TXP and SEATS were the only two ticket companies in Atlanta selling at multiple locations throughout the area. In *Tic-X-Press,* no promoter of a concert at the Omni had ever requested approval of another ticketing agency other than SEATS, and no one had requested TXP to see if the defendant would approve them. One promoter, Jim Veal, indicated he would have used TXP if they had been approved. *815 F.2d at 1416*.

The Eleventh Circuit rejected defendants' contention that proof of coercion in this case required proof that at least some of the promoters had requested permission to have TXP do their ticketing in the Omni. in reaching its decision, the Circuit opinion noted:

> In this case, the court found other facts tending to show that the use of SEATS was not voluntary, at least as to Jim Veal. More specifically, it found that promoters did not attempt to use other ticketing agencies because they understood through years of dealing with [TOPCOL] and using the Agreement that they were required to use SEATS.

Id. at 1418-19. **[**17]**

> * * *
>
> Furthermore, it also found that the appellants had never approved another ticket agency and that they had never established written standards and procedures **[*521]** for approving other agencies. *Cf. Kentucky Fried Chicken, supra,* 549 F.2d [368] at 378 (approval clause reasonable where seller had already approved 10 suppliers and had never refused a request for approval). Given these findings, it is reasonable to conclude that

> the approval clause was somewhat bogus under the circumstances present in this case and that promoters did not have meaningful freedom of choice in the tied market.

815 F.2d at 1417. [3] The Court acknowledged that the subjective perception of the buyer standing alone could not be enough to support a finding of liability. Yet, there were "several other factors" including "the language of the Producer's Agreement that sustained the lower court's finding."

[18]** In the present case, plaintiffs are not relying on subjective understanding, but rather other evidence to show that the alternate supplier clause was a bogus provision during the relevant time periods. In *Tic-X-Press,* the lower court had found the promoters, from years of dealings, understood that they were required to use SEATS when they promoted an event at the Omni. Thus, *Tic-X-Press* involved an "understood condition" as that term is defined in the Areeda treatise at P 1754c; *see Little Caesar Enterprises, Inc. v. Smith, 172 F.R.D. 236, 256 (E.D.Mi. 1996)*. The present case involves no apparent evidence of an understood condition. While plaintiffs' counsel argues now, in part from internal documents, that the "second source" provisions of Section VII of the Franchise Agreement were bogus and application for an alternate distributor would be futile, neither plaintiff asserts his or her understanding that seeking an alternate distributor was futile.

The Areeda authors also cite *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705 (11th Cir. 1984)*, in support of their contention that an approved source clause can be a "charade." In that case the franchisor, **[**19]** Waffle House, Inc., required its franchisees to purchase equipment from approved sources. At the time, the only approved source for its restaurant was The Hickman Company, and its only approved source for vending machines was Metro Distributors, Inc. *Id. at 710, 712*. Waffle House had financial interests in both of these companies. While not resolving the issue, the Eleventh Circuit notes that:

> Defendants contend that plaintiffs never sought to purchase equipment or obtain vending services from sources other than The Hickman Company and Metro Distributors, Inc. Plaintiffs' position is that to have done so would have been futile because they had been told that no other sources would be approved. Each of these contentions presents disputes of fact. Unless plaintiffs can prove they were coerced into purchasing equipment and vending services from The Hickman Company and Metro Distributor, Inc., their claim that illegal ties existed will fail.

Id. at 712. The Court does not discuss what evidence would be sufficient in order for the plaintiffs in this case to demonstrate that a request for an alternate source of equipment would be futile. While not clear from the opinion, **[**20]** it suggests that plaintiffs "had been told [by defendant] that no other sources would be approved." The present case involves no similar facts by agents or employees of LCE or Blue Line to prove futility.

The final case cited by the AREEDA authors on the "approved source/charade" issue is *Advance Business Systems and Supply Co. v. SCM Corp., 415 F.2d 55 (4th Cir. 1969)*, *cert. denied, 397 U.S. 920, 25 L. Ed. 2d 101, 90 S. Ct. 928 (1970)*. SCM sold extended warranties with various of its machines. The warranty agreement noted that the SCM copying machines were designed to give excellent performance when used with SCM photocopy supplies. Its warranty stated that:

> SCM reserves the right to suspend this agreement as to any machines in which other suppliers' paper or other supplies **[*522]** have been used. Agreement shall not apply to any repairs made necessary by the use in SCM

---

[3] The court also rejected the fact that several promoters would have used SEATS regardless, noting that the tying

> arrangement prevented them from making that choice freely. We reiterate that the principal evil of tie-ins is that they foreclose competition *on the merits* in the tied market.

Id. at 1417,

> photocopy machines dispersant, replenisher, electrostatic copy paper or other photocopy supplies made by other than SCM and not approved by SCM for use in SCM equipment.

415 F.2d at 65. It was found that SCM never approved any competitive paper for use in its machine even though they knew that Nashua **[**21]** paper was "safe and as effective as SCM paper for such use." *Id.* This *pre-Fortner II* and *pre-Kodak* case upheld the lower court finding "that the competitive supplies clauses in the service contracts gave rise to a *per se* violation of the Sherman Act . . ." Id. at 65. [4]

[22]** The Areeda authors also cite Photovest Corp. v. Fotomat Corp., 606 F.2d 704, 722 (7th Cir. 1979), as a case "implying that evidence that requests for approval were unreasonably denied would have sufficed to show a tie." AREEDA, ET AL., p. 300 n.47. The *Photovest* case actually held that because four of the Photovest franchises were permitted to purchase processing from alternate

Fotomat-approved sources, the tying arrangement was not established sufficiently.

> Photovest did not show that Fotomat unreasonably withheld approval. Indeed, it appears that Photovest never submitted a processor to Fotomat for approval during this time period. Photovest contends that the tie was nevertheless sufficiently established because Fotomat did not provide a list of approved processors. This does not in our opinion establish the requisite condition for illegal tying. Given the contractual language, which at least provides for the possibility of purchasing processing from non-Fotomat sources, we are reluctant to find a tying arrangement without some evidence that Fotomat applied the contract language so restrictively as to constitute a de facto tying clause.

606 F.2d at 722. **[**23]** [5]

---

[4] This *SCM* case also found a tie-in between the paper and the rental agreements of the SCM photocopying machines. While there was no express tie, the rental agreements acknowledge that "supplies which may cause damage or deterioration will not be used in the machines." 415 F.2d at 63. The lower court found a pattern of conduct by the SCM representatives "to threaten the cancellation of rental agreements with customers who used competitive supplies in their SCM machines[,]" and SCM representatives specifically misinformed customers that "the use of Nashua supplies would cause service calls and interrupt the continuous operation of their SCM machines[,]" and defendants did this to induce rental customers to stop dealing with the plaintiff who sold Nashua paper. Id. at 63 and 64. The contract noted "SCM reserves the right to suspend this agreement as to any machines in which other suppliers' paper or other supplies have been used." Id. at 65. This has later been referred to as the "tying by lying" theory.

In SCM, the misstatement of fact about Nashua paper coupled with the threat that the machines could break down and the service contracts could be voided induced people to purchase SCM paper, and thus this was causally linked to the establishment of the tie-in. In the present case, if, as plaintiffs assert, defendant's contractual agreement to approve alternate distributors was a misrepresentation, this representation that they would approve alternate sources did not "cause" any tie-in of the use of Blue Line. In *SCM,* the buyers relying on the representation of the defendant would be induced to buy the defendant's paper. In the present case, any franchisee relying on the representation of the defendant would be induced to believing they could seek an alternate source of goods other than Blue Line. Thus, even if plaintiffs are correct in their contention that the second source provision of the franchise agreement was a "charade," this does not result in "tying by lying" because relying on this representation did not cause the tie. At most, relying on this representation may have caused the franchisee to sign a franchise agreement and become locked in. This lock-in issue, however, may possibly relate to market power but this misrepresentation does not directly implicate the question of whether there is a tie. In the present case, if there is a tie because the second source provision of the contract is a charade, the tie is not caused by the second source provision in the Franchise Agreement and representation by the defendant, but rather by the defendant's allegedly wrongful refusal to honor it.

[5] In the *Photovest* case, for a period prior to the June 1971 *Chicken Delight* case, 12 of the 16 franchisees had signed agreements that required them to buy processing from Fotomat. Thus, there was an express tie in the tying contract. Four of the Photovest franchisees did not have such restrictive language in their contract but rather were permitted to obtain processing from Fotomat-approved sources. The Seventh Circuit ruled against the plaintiff with respect to these franchisees because plaintiff never attempted to exercise their contract rights and thus could not prove wrongful refusals to constitute a *de facto* tie-in.

In the present case, there are not the proofs of futility available in *Tic-X-Press,* **[*523]** *Midwest Waffles,* or *Advanced Business Systems.* There is no evidence of an understood condition as in *Tic-X-Press.* There is no defendant's statement that "no other sources would be approved" as apparently occurred in *Waffle House,* and there is no evidence of failing to approve **[**24]** a closely qualified alternate source as there was in *Advance Business Systems* where SCM refused to authorize use of Nashua paper even though they knew it was of suitable quality.

The case of Fields and Hennessy is closer to that of the four Photovest franchisees who could seek an alternate source for having their film processed other than by franchisor, Fotomat, but failed to do so. The Seventh Circuit found that these plaintiffs failed to demonstrate a tying arrangement because they could not prove futility.

V. PLAINTIFFS FIELDS' AND HENNESSY'S NEW EVIDENCE:

Two of the new documents discovered since the Court's earlier ruling are evidence that LCE intended to use its exclusive rights over logoed goods to make Blue Line the exclusive source of those goods and this was done "to more effectively posture Blue Line vis-a-vis its competition." David Deal's March 1989 Memo to LCE Board Member Jay Bielfield. Ex.3, Perry April 1997 Declaration, noted in the March 1998 Summary Judgment Report at 66.

The second newly discovered document was in a November 12, 1991, memo from David Deal to David Kushner, he notes:

> The original intent of the agreement was to provide an exclusive **[**25]** arrangement for Blue Line to distribute paper products and other supplies to Little Caesar restaurants so that Little Caesar would be able to exclude third parties from these offerings. It was not contemplated at that time to put in place an even broader agreement to involve products that do not ultimately find their way to the customer, such as uniforms, signage, etc. Plaintiff's Exh. 21.

Lockridge August 1995 Declaration, Ex. 21, March 1998 Summary Judgment Report at 66-67.

These new documents reinforce other earlier discovered documents from which a jury could find that LCE intended to use its control over its logoed goods to require that franchisees buy them from its subsidiary Blue Line. The undisclosed 1989 Exclusive Licensing Agreement is further evidence of this intent. A jury could also find that during the relevant statute of limitations period for this litigation, LCE intended to deny access to logoed goods to any alternate distributor who might compete with Blue Line knowing the lack of logoed goods would make it more difficult for rivals to compete with Blue Line. Yet, for reasons stated in the March 1998 Summary Judgment Report, there is not sufficient evidence **[**26]** in the record that during the limitations period LCE ever actually had to implement this covert policy. Thus, these two documents and the covert 1989 Licensing Agreement are not directly relevant to Fields' and Hennessy's claim that seeking an alternate distributor would be futile. The discovery of additional evidence of this LCE plan, including the 1989 Exclusive Licensing Agreement, also had no effect on the statute of limitations period because there is no evidence that LCE during the limitations period acted on this policy and used it to exclude an existing rival distributor or to prevent entry of any such rival.

The critical evidence relevant to Fields' and Hennessy's motion is whether any new documents were discovered that indicated a plan or intention of LCE to deny all applications for an alternate distributor. One of the new documents does deal with this issue. Plaintiffs have discovered a November 26, 1991, internal memorandum from Matt Ilitch to Al Thompson regarding franchisee Chuck Walls' request for an alternate distributor in the Madison, Wisconsin, area which notes:

> There is no formal approval process for outside food and paper distributors where there is an **[**27]** existing Blue Line distribution center in the market area.
>
> * * *
>
> In any event, Blue Line will not reveal to any distributor, information about Little Caesar products and how to get them without first establishing that Blue Line has **[*524]** not fulfilled both pricing and service obligations.

Ex, 4 Lockridge December 1996 Declaration, noted in the March 1998 Summary Judgment Report at 74-75. This document suggests that Blue Line would not cooperate in the approval process of an alternate distributor if a Blue Line warehouse was servicing the Little Caesar franchisees in that area.

The other document of which this Court was aware in August 1996, was a follow-up July 31, 1991, letter from Matt Ilitch to Kathy Campbell of LCE's Associate Distributor Leprino Foods in California. Matt Ilitch wrote her an official letter informing her that Blue Line would begin distribution operations in California and Nevada from a warehouse in Stockton, California, by mid-September 1991. He added:

> Please know that Leprino Foods did not fail as our associate distributor. Rather, it is part of the Little Caesar master plan to control distribution of Little Caesar brand products through its Blue **[**28]** Line distribution division. In fact, of all of our past and present associate distributors, Leprino Foods' reputation is at the top.

Lockridge August 1995, Declaration, Ex. 7, noted in the March 1998 Summary Judgment Report at 73.

The Matthew Ilitch 1991 memo to Al Thompson and his 1991 letter to Kathy Campbell are the only "internal" documents allegedly indicating a LCE policy not to approve alternative distributors. Taking defendant's word from internal documents that defendant would not approve qualified distributors would suffice for the Areeda authors to prove futility. Yet, the internal documents must clearly express company policy. These two documents are not the clear internal documents of a policy not to approve an alternate source that I believe the Areeda authors had in mind in the above quoted sections of their treatise. These two documents coupled with the denial of AmeriServ and Chopping Block are not sufficient evidence from which a jury could determine "futility" in the absence of more denied requests for approval or other evidence of futility. This would be the case even in the absence of the 1995 approvals of three alternate distributors.

HN12[] The "coercion" **[**29]** or "forcing" that the prohibition on tying is concerned with are seller abuses of power to restrain buyer choices as to product *B* -- here the goods needed to operate a Little Caesar franchise. It is sustainable abuse of market power that concerns antitrust. Antitrust remedies generally should not be available as the initial recourse where simple market remedies exist and are unexhausted.

HN13[] There is no failure of the market if contract protections are available to franchisees to seek a second source of products needed to operate a franchise. The second source language in Section VII of the Little Caesar Franchise Agreement is a contract safeguard (like fixed pricing, a pricing formula or most favored customer clauses) that a prudent franchisee would seek to protect against franchisor opportunism.

LCE can exercise sustainable power in the aftermarket for goods needed to operate a Little Caesar franchise (product *B)* only if it could continue to exclude competition. The rejection of AmeriServ, [6] even if wrongful, would not result in sustainable exclusion of other distributors from the market unless that rejection caused all other franchisees and possible distributors to give up **[**30]** hopes of applying to be an alternate distributor. Without more proofs than presently available, plaintiffs Fields and Hennessy do not have proof that the AmeriServ rejection caused this result.

The rejection of AmeriServ's application to be an alternative distributor did not alone cause the *sustained* market failure. The reluctance of other franchisees or alternative distributor to seek approval to compete with Blue Line contributed to this result. Unlike the plaintiffs in *Tic-X-Press, Advance Business Systems, Jefferson Parish, Kodak,* and *PSI,* who had no contract rights to counter the defendant's alleged abuse of power, here **[*525]** each franchisee individually and multiple franchisees collectively had legal entitlements in their Franchise Agreement to attempt to avoid precisely the type of franchisor opportunism of which they now accuse LCE. They knew the monopoly of Blue Line and chose **[**31]** not to challenge it by seeking alternative distributors individually or collectively. If these franchisees with available contract remedies were not sufficiently dissatisfied to challenge LCE with their contract tools the LCE Franchise Agreement gave them, courts should be reluctant to cobble up "antitrust remedies" for them. This is not to say that antitrust remedies should not be available to wronged franchisees, but

[6] In the present case, there is really only one contested denial during the limitations period, that of AmeriServ.

only that in the absence of a clearer showing of futility than exists in this case, they should not be too readily available.

If a single denial of approval of an alternate source coupled with two internal documents from a single author that suggest a tie will turn a wrongful denial contract case into an treble damages antitrust case for any other franchisee, possibly involving a nationwide class, there are significant social costs. Courts will face an increase in complex litigation. Litigants will incur substantial transaction costs. The risk of erroneous court determinations will increase because tolerating such limited evidence as sufficient will undermine the accuracy of jury determinations. Franchisors will become overly cautious and circumspect that a single, **[**32]** good faith, erroneous decision (or even one that is in the realm of reasonable business judgment but that is second-guessed and found wanting by a jury) could lead to crushing liability. While at some threshold of wrongdoing antitrust remedies should supplement or supplant contract remedies, antitrust laws should not be available unless there are intended anticompetitive activities that involve sustained abuses of power in the market.

While futility can be demonstrated in certain circumstances without each individual plaintiff having applied for an alternate approved source, it should not excuse seeking to exercise express contract rights in the absence of a number of failed attempts by other franchisees to obtain approval. A franchisee who has not asserted his or her legal power under a contract for a second approved source does not have any contract remedies, because in the absence of a demand there can be no breach. In certain circumstances with clearer proofs of futility than exist in this case, such a franchisee should have an antitrust remedy without individually having to have sought to exercise their contract rights. Yet, short of a clearer showing of futility than exists **[**33]** here, such a franchisee should not have available antitrust remedies where he or she would have no contract remedy.

If ***antitrust law*** against tying arrangements is concerned with sustainable abuses of power restraining buyer choice, it is not too much to ask that before invoking antitrust remedies the plaintiff has sought to exercise the legal power readily available to attempt to counter the allegedly abusive power of the defendant. This is not to say that a plaintiff must file a breach of contract law suit before asserting an antitrust claim. But it is reasonable to ask a franchisee who has express contract rights to a second source to at least make a formal request under the franchise agreement if the franchisee cannot show with clear proof that such a request would be futile.

The reality is that a franchisor may through courage or uninformed folly deny one or two requests for a second source, but may relent, with or without legal advice, in the face of a number of second source requests. Each successive denial of a second source increases the franchisor's exposure to an antitrust remedy and each successive denial increases the likelihood that such a lawsuit may succeed. This reality **[**34]** may reverse minor abuses of power without resort to complex litigation. When the abuse of power is more unrelenting, then antitrust remedies are available with increased chances of success and lesser risks of harmful social costs. To require a higher standard of proof of futility than Fields and Hennessy have shown is not a license to franchisors to abuse their power under approved source contracts. Rather, a few more applications for an alternate source need only be tried which will either reverse the franchisor's reluctance to approve alternate sources or, alternatively, **[*526]** build a sufficient claim of futility to get to a jury.

Plaintiffs in their brief in support of this motion cite the case of *Collins v. International Dairy Queen, 939 F. Supp. 875 (M.D.Ga. 1996)*, where in a class action franchise situation similar to the present case the district court found sufficient evidence of coercion to deny summary judgment. The court did not require a showing that each member of the class seek approval of an alternate source of goods needed to operate a Dairy Queen franchise.

In *Collins,* the district court in finding sufficient evidence of coercion for the class members discussed **[**35]** assertions by the plaintiffs of various coercive actions by defendant Dairy Queen to frustrate the approval of alternate sources. Dairy Queen refused to recognize the Dairy Queen Operators' Cooperative ("DQOC") as the agent of the franchisees and "additionally refused to consider DQOC's requests for approval Of alternate suppliers" thereby frustrating franchisees efforts "to obtain alternate sources of supply and more favorable prices." *Id. at 881-882*. DQOC was "a Minnesota corporation organized as a purchasing cooperative for the benefit of Dairy Queen franchisees and store owners" *Id. at 881 n.3*. [7] If this occurred in the present case, the evidence of it is not clear from the present record.

[36]** In addition there were multiple examples of Dairy Queen only giving summary specifications or making them available only for inspection and not for copying. Dairy Queen would change specifications or its logos after approved suppliers had invested in producing a product that complied with former specifications and had used the outdated logo. Additionally, there were examples of extreme delays in getting suppliers approved, some clearly unneeded because laboratory reports completed "several months" earlier confirmed the supplier met Dairy Queen's specifications. Dairy Queen approved warehouses refused at one time to stock an ice cream topping that had been used by its franchisees for years and met specifications where Dairy Queen had not approved the toppings because Dairy Queen would not approve the labels placed on its container. When these toppings were eventually allowed to be available to franchisees, the competition caused **[*527]** Dairy Queen to reduce substantially its own toppings prices.

A review of *Collins* shows that the evidence of Dairy Queen's misuse of its approval process from which the *Collins* court determined that futility could be proved is more substantial than **[**37]** the evidence of similar abuses in the current record. Thus, while common proofs of futility are possible in a franchise antitrust case, in the present case, without Fields and Hennessy seeking approval of an alternate distributor, or being able to point to a sufficient number of other franchisees' failed efforts to obtain approval of an alternative distributor, or more substantial and convincing internal LCE/Blue Line documents, the single rejection of AmeriServ and the two Ilitch memos are not sufficient new evidence to warrant a modification of this Court's earlier grant of summary judgment.

VI. RECOMMENDATION:

For the reasons noted above, IT IS RECOMMENDED THAT Plaintiffs' Motion Pursuant to *Rule 54(b)* be DENIED.

Any objections to this Report and Recommendation must be filed on or before May 11, 1998. *28 U.S.C. § 636(b)(1)*; E.D. Mich. LR 72.1(d)(2). Failure to file objections within the specified time constitutes waiver of any further right of appeal. *Thomas v. Arn, 474 U.S. 140, 88 L. Ed. 2d 435, 106 S. Ct. 466 (1985)*; *Ivey v. Wilson, 832 F.2d 950, 957-*

---

[7] At the October 16, 1997, hearing on this motion, *Collins v. International Dairy Queen, Inc., 168 F.R.D. 668 (M.D.Ga. 1996)*, was discussed. It was noted that in *Collins* the franchisees' association, DQOC, had sought to act as a buying cooperative and in other ways act on behalf of the Dairy Queen franchisees. While it was not earlier asserted, plaintiffs' counsel in a November 5, 1997, letter brief to the Court noted that "The facts underlying this case are similar [to *Collins]* in that plaintiff Smith also attempted to obtain alternate distributors on behalf of a franchisee cooperative, the A.L.C.F." (An Association for the Little Caesar Franchisee.) Unlike DQOC, it is not clear that A.L.C.F. is organized as a purchasing cooperative. Plaintiffs' counsel then asserts that a June 5, 1992, response from LCE's Vice Chairman Charles Jones to Gary Smith noted that Smith's request was written on A.L.C.F. stationary, but stated he "assumed that you were writing that letter in your capacity as a Little Caesar franchisee." This letter and other documents concerning Gary Smith's efforts to get AmeriServ approved as an alternate distributor are set out in the March 1998 Summary Judgment Report at and around p. 78. Plaintiffs' counsel claims that this indicates that "defendants flatly refused to recognize franchisees' efforts to purchase goods through a cooperative." Lockridge November 5, 1997, Letter the Court. Defense counsel responds that plaintiffs "now for the first time relies on a 1992 letter to establish a co-op request for a new distributor." Sussman November 7, 1997, Letter to the Court.

Plaintiffs are a little late in claiming that Gary Smith was acting on behalf of A.L.C.F. or all members of A.L.C.F. including Fields and Hennessy. It is also surprising that if A.L.C.F. was making the request that plaintiffs would not have some better proofs of Gary Smith's agency than the June 5, 1992, letter from LCE's Vice Chairman Charles Jones -- possibly a declaration or affidavit, or a notation of an A.L.C.F. meeting. While AmeriServ made a presentation to all A.L.C.F. members at their convention in early 1993, this is consistent with the application for AmeriServ to be an alternative distributor being from Gary Smith representing his franchises only. It is also noteworthy that AmeriServ's memo notes that "until someone in the organizations take[s] a stand for their contract rights against the corporation, we will not be able to purchase/stock logo products." Turnbull October 16, 1995, Declaration, Ex. 19, noted in the March 1998 Summary Judgment Report at 79. This new assertion that Gary Smith was seeking approval of AmeriServ in his capacity as President of A.L.C.F. was not even listed among the new evidence" that plaintiffs' counsel asserts warrants a reconsideration of this Courts denial of the tying claims of Fields and Hennessy. Nor is the association a plaintiff in this litigation.

58 (6th Cir. 1987); United States v. Walters, 638 F.2d 947 (6th Cir. 1981). Pursuant to E.D. Mich. LR 72.1(d)(2), **[**38]** a copy of any objections is to be served upon this Magistrate Judge.

On or before June 1, 1998, the opposing party may file a response to any objecting party's timely filed objections. The response shall address specifically, and in the same order raised, each issue contained within the objections.

Governments > Courts > Authority to Adjudicate

Trademark Law > Conveyances > General Overview

Business & Corporate Compliance > ... > Trademark Law > Conveyances > Licenses

HN2[] **Conveyances, Franchises**

The law is well-settled that a franchise license itself can be the tying product. A franchise license constitutes a separate and distinct marketable item. The weight of judicial authority supports the proposition that if prospective franchisees are compelled to purchase equipment or other tied products in order to obtain the franchise and trademark, an illegal tying arrangement exists.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN4[] **Tying Arrangements, Defenses**

When the per se rule against tying is invoked, market harm is presumed and this obviates the need for the extensive discovery and proofs of market harm and the balancing of procompetitive benefits against anticompetitive harms. The per se rule against illegal tying is a judicial shortcut available where risks of market harm are so obvious that courts will dispense with the cumbersome market harm inquiry and balancing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under tying's per se rule, the seller must possess substantial market power in the tying product market. In addition, tying's per se rule provides for an inquiry into whether the defendant's conduct has procompetitive effects.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] **Price Fixing & Restraints of Trade, Tying Arrangements**

There is a three-step analysis for determining whether a tying arrangement is likely to cause such an anticompetitive effect: (1) the seller must have power in the tying product market; (2) there must be a substantial threat that the tying seller will acquire market power in the tied-product market; and (3) there must be a coherent economic basis for treating the tying and tied products as distinct.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Market power in the tying product market is an indispensable requirement under either per se or rule-of-reason analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN8[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The prima facie elements of a per se tie-in claim are: there must be a tying arrangement between two distinct products; the seller must have sufficient economic power in the tying market to restrain appreciably competition in the tied product market; and the amount of commerce affected must not be insubstantial.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN9[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Market power has been defined as the power to force a purchaser to do something that he would not do in a competitive market such as buying a tied product that the buyer did not want at all or might have preferred to purchase elsewhere or on different terms. When such forcing is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Power can be inferred from a large share of the relevant market or from other factors such as a unique product with no substitutes, e.g. a patented product, or substantial barriers to the ease of entry.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN11[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Defendant bears a substantial burden in showing that it is entitled to summary judgment. It must show that despite evidence of increased prices and excluded competition, an inference of market power is unreasonable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN12[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A narrowed market definition is available for a per se tying claim when: there are information costs that prevent certain information from being generally known; and these information costs are sufficiently high that a reasonable consumer would not anticipate (and it would not be cost efficient to invest more in the acquisition of additional information on) the risk of some change of policy post-contract that would expose the consumer to a burdensome tie involving above market pricing; and after a substantial number of customers have sunk significant costs that are not recoverable and face other switching costs, the seller takes some action changing its policy (or acting on a prior undisclosed policy) that takes advantage of its locked in customers' lack of information in order to reap supracompetitive profits by imposing a burdensome tie-in.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

HN13[] **Price Fixing & Restraints of Trade, Tying Arrangements**

In the general case, a lack of market power in a competitive pre-market will prevent market power in the derivative aftermarkets. This general economic presumption, if unrebutted, would allow summary judgment for the defendant. Under this rebuttable presumption, the burden would then shift to the plaintiffs to prove that there is a specific reason to believe that normal economic reasoning does not apply.

REPORT AND RECOMMENDATION ON DEFENDANT'S MOTION **[**3]** FOR PARTIAL SUMMARY JUDGMENT (III)

Defendant Little Caesar Enterprises, Inc. ("LCE") has filed a motion for partial summary judgment which has been referred for Report and Recommendation under *28 U.S.C. § 636(b)(1)(B)*. [1]

[4]** I. BACKGROUND FACTS:

The current motion involves only the antitrust tie-in class certified by this Court in its March 31, 1997, order. *Little Caesar Enterprises, Inc. v. Smith, 172 F.R.D. 236 (E.D.Mich. 1997)*. Plaintiffs are approximately 400 franchisees of

[1] This case is consolidated. Because the class certified by this Court involves an antitrust claim (case No. 93-CV-40521) by class representative Gary Smith against LCE, this Report and Recommendation refers to the class members as plaintiffs and LCE as defendant. Gary Smith's claim was initially brought against three defendants, LCE, Blue Line Distributing, Inc. ("Blue Line"), and Little Caesar National Advertising Program, Inc. ("LCNAP"). This Court has granted summary judgment on all claims involving LCNAP. After this suit was filed, LCE merged with Blue Line. Thus, LCE is the sole remaining defendant. Case No. 93-CV-40521 was filed by Gary Smith along with two other franchisees, John Hennessy and Sharon Fields. This Court has granted summary judgment against Hennessy and Fields, although they have filed a motion for reconsideration of that ruling and an expanded class of plaintiffs. *Little Caesar Enterprises, Inc. v. Smith, 895 F. Supp. 884, 894-898 (E.D.Mich. 1995)*.

LCE throughout most of the nation who own and operate carry-out-only Little Caesar restaurant franchises under a mid-1990 Franchise Agreement. These franchisees purchase their supplies needed to operate from Blue Line Distributing, Inc. ("Blue Line"), formerly a wholly owned subsidiary that has now merged with LCE. The class plaintiffs seek damages, declaratory and injunctive relief for alleged antitrust tie-in violations by defendant. During the relevant class period, Blue Line, in areas where it had a warehouse, sold to LCE franchises virtually all goods necessary to operate their Little Caesar restaurants. [2]

[5]** Little Caesar was founded in Michigan in 1959 by Michael Ilitch, who began to franchise his "Little Caesar" restaurants in 1962. As noted in this Court's earlier opinion, as of June 1, 1995, there were 536 franchisees nationwide operating 2,867 carryout-type restaurants. *Little Caesar Enterprises, Inc. v. Smith, 895 F. Supp. 884, 887 (E.D.Mich. 1995)*. The majority of these are class plaintiffs. LCE also has over 1,000 company-owned outlets comprising approximately 25% of the carryout units and over 500 Little Caesar restaurants in Kmart stores. Blue Line purchases all of the items used in Little Caesar's restaurants from producers and suppliers and then re-sells them to LCE franchisees making a single delivery of the multiple goods. Most of these items are produced to meet LCE specifications. These items include foodstuffs, beverage products, sign equipment, paper products, salad dressing, other condiments with LCE's proprietary symbols and marks, and other items. Blue Line initially had only one warehouse in Farmington Hills, Michigan, and thus was limited in the number of Midwestern franchisees to whom it could distribute goods. Other associate distributors, not affiliated **[**6]** with defendant, were approved by LCE in various **[*464]** regions throughout the country to service its other franchisees and LCE's company owned carryout facilities.

In the middle 1980's, Blue Line began to expand the number of its distribution warehouses throughout the country. LCE replaced the other associate distributors with its Blue Line distribution warehouses. By August 1989, defendant had eliminated the majority of third party distributors servicing Little Caesar franchisees and thereafter eliminated virtually all of the remaining distributors in the continental United States, except for two remote areas in Idaho that was not economically feasible for Blue Line to service.

Plaintiffs accuse defendant of unlawfully tying sales of the above-noted goods from Blue Line to the sale and continued operation of the Little Caesar franchises. They allege that the defendant LCE has used its inherent monopoly power derived from its copyrights, trademark, service names, and trade names to impose contractual and other uniform restrictions on the distribution of the various goods to franchisees, thereby eliminating the possibility of renewed competition with Blue Line by other food distributors.

[7]** Plaintiffs also allege that because LCE franchisees have invested substantial funds and effort in their restaurants and goodwill, and have signed long-term franchise agreements with a continuing two year non-compete clause in the pizza, pasta and submarine sandwich markets, they are effectively "locked in" to the LCE franchise system. Section VII of the relevant mid-1990 Franchise Agreement specifically grants franchisees the right to purchase supplies, including logoed goods (but excluding proprietary spice and dough mixes) from "any source of its choosing . . . previously approved as a supplier by LITTLE CAESAR." While the franchise agreements provide to each franchisee the right to request that LCE approve an alternate supplier of products made to LCE specifications, the mid-1990 Franchise Agreement [3] **[**8]** -- unlike earlier franchise agreements and the more recent 1995 Franchise Agreement -- excluded logoed goods needed to operate a Little Caesar franchise. [4]

LCE in June 1989 entered into a licensing agreement that gave Blue Line the exclusive right to distribute logoed products to franchisees. This Court has determined that the "logoed products" involved in this 1989 Licensing Agreement as well as in the mid-1990 Franchise Agreement applied only to those items bearing the Little Caesar

---

[2] In September 1989, Blue Line had warehouses serving eight regions of the United States. By December 1992, it operated warehouses serving Little Caesar franchises in 16 regions covering most of the United States.

[3] The term "Franchise Agreement" or "mid-1990-Franchise Agreement" as used throughout this Report refers to the August 1990 form franchise agreement as distinguished from the "pre-mid-1990 Franchise Agreement" or the 1995 Franchise Agreement.

[4] All of the agreements before and after 1990 also precluded a request for an alternate source of signage, which practice, like the proprietary spice and dough mixes, is not challenged in this litigation.

registered mark, which a Little Caesar's franchise provides its customers in the sale of its food products. These include items such as logoed paper products (bags, cups, napkins), packaging, and condiments such as salad dressing. *895 F. Supp. at 890-92*. Defendant asserts that these logoed products comprise only about 6% of the food products and other items sold by Blue Line to a franchisee and needed to operate a franchise. While plaintiffs dispute these figures, they offer no substantial counter proofs. For purposes of this motion the logoed products will be **[**9]** considered less than 10% of the entire "market basket" of goods a franchisee needs to purchase in order to operate a Little Caesar carryout restaurant. Plaintiffs contend that because the profit margin for a distributor on logoed products is greater than other items, and because of the preference of many franchisees to obtain all their needed supplies from one source, other potential distributors cannot effectively compete with Blue Line if they are not given access to these logoed products. [5]

[*465] This 1989 Exclusive Licensing Agreement with Blue Line was not initially **[**10]** disclosed to the franchisees and only came to light several years later. Franchisees renewing their franchises on existing outlets [6] or those entering into franchises for a new outlet after the middle of 1990, would sign the Franchise Agreement that contained the restrictive language not permitting them to seek an alternate source of logoed products. Because the evidence would support such a finding and because disputed issues on a motion for summary judgment must be resolved in favor of the non-moving party, this Report will assume none of those franchisees who signed the mid-1990 Franchise Agreement were aware of the June 1989 Exclusive Licensing Agreement between LCE and Blue Line before the signing.

The logoed products are essential to the operation of **[**11]** a Little Caesar franchise and their usage is required. Under the Franchise Agreement plaintiffs contend that defendant is using this 1989 exclusive Blue Line licensing right on logoed paper, combined with the new 1990 contractual limits on franchisees seeking alternate distributors of logoed products, to preclude alternate sources of supply and competition on these logoed items. Plaintiffs assert that the defendant's denial of access to these logoed products is also intended to make it less profitable or more burdensome for alternate distributors of franchise supplies to enter the market.

Plaintiffs argue that the tying arrangement is not limited to logoed products. They assert that the practical economic effect of the exclusive licensing agreement for logoed products is to affect a tie-in of the entire "market basket" of goods needed to operate a Little Caesar franchise. Plaintiffs' experts also argue that the tied product is the market basket of goods, supplies and distribution services, not merely logoed products because "it is uneconomic to operate as a distributor without access to logoed products." Siwek and Nelson December 22, 1996, Declaration at PP 4-10.

Plaintiffs also **[**12]** contend that the forced tie-in of the entire "market basket" of goods is burdensome because Blue Line is charging supracompetitive prices. Because discovery on the pricing structure is not complete, this Report will accept the premise that plaintiffs by trial would have sufficient evidence to get to a jury on "supracompetitive" prices for the entire "market basket" of goods.

In addition to the arguments that franchisees in the class are forced to purchase the entire "market basket" of goods from Blue Line, because LCE/Blue Line uses the exclusive licensing agreement and the resulting market leverage over logoed goods to exclude rival distributors of the non-logoed items needed to operate a Little Caesar franchise, plaintiffs continued to accuse defendant of a pattern of wrongfully refusing requests for approval of alternative distributors other than Blue Line. Plaintiffs argue that until this litigation was commenced, it was "futile" for any franchisee to seek an alternate distributor to Blue Line because such a request would be denied. In its earlier

---

[5] In the present case, plaintiffs have not specifically alleged that Blue Line is charging "supracompetitive prices" on the logoed goods, but rather on the blended profit margins on the entire market basket of goods Blue Line sells. Defense counsel at a hearing on a related motion asserted, without challenge from plaintiffs, that plaintiffs are not charging, and could not prove that Blue Line is charging, above market prices for the logoed goods.

[6] In 1990, the carryout franchises contract term was for 10 years with an option to renew under the then current franchise agreement terms. The term of earlier franchise agreements that would need reviewing in the 1990's is not identified in the record.

opinion denying a nationwide class of franchisees, including those with pre-1990 Franchise Agreements, this Court granted summary judgment **[**13]** on the tying claims of plaintiffs Hennessy and Fields, and Gary Smith before April 1992, because they did not exercise their contract rights to request an alternate distributor to Blue Line, and because they could not prove they did not make such a request because they knew it would be futile to do so. Thus, in the absence of an express tying arrangement (or a defense admission) these plaintiffs could not prove they were "forced" or "coerced" to buy all goods from Blue Line as those terms are used in the antitrust cases to show there was an illegal tie. *895 F. Supp. at 894-96*. Plaintiffs have filed a motion under *Fed. R. Civ. P. 54(b)* to reconsider that ruling, which will be analyzed in a separate report and recommendation.

This case involves the certified class of franchisees who signed the mid-1990 Franchise Agreement that did not provide an **[*466]** express contract right to seek an alternate supplier of logoed products. [7] That class was certified to determine whether there was an illegal tie between the continued operation of a Little Caesar franchise and the purchase of logoed products from Blue Line. This case can determine the plaintiffs' contention that the practical economic effects **[**14]** of the tying of logoed goods also tied in the purchase of the entire "market basket" of goods needed to operate a Little Caesar franchise by raising rival distributors' entry barriers and costs of operation.

[15]** This Report's analysis will involve both the question of (1) whether there were any refusals by LCE/Blue Line to allow potential rivals access to logoed goods and whether the refusal made it economically infeasible for rivals to enter the market to compete with Blue Line; and (2) whether the knowledge of the unavailability of logoed goods to alternate distributors dissuaded any distributor from considering seeking LCE approval to become an alternate distributor. Yet, this post-mid-1990 Franchise Agreement class was not certified to revisit the issue of whether LCE wrongfully refused to approve alternate distributors or the issue of whether it was futile and/or known to be futile for an alternate distributor to apply. That issue will be addressed in the Report and Recommendation of plaintiffs' *Rule 54(b)* motion.

II. DEFENDANT'S MOTION FOR PARTIAL SUMMARY JUDGMENT:

LCE has moved for partial summary judgment, raising numerous issues. Because I recommend summary judgment be granted to defendant on an issue that involves the *per se* tying claims of all the class plaintiffs, this Court need only consider two of the issues.

First, LCE claims that the franchise agreement and the **[**16]** logo paper products that Blue Line sells are not separable and therefore are not products that can be tied together. For reasons stated below, these are two products that can be tied for antitrust purposes.

LCE's most forceful argument with respect to the tie-in class is that the plaintiffs cannot demonstrate that LCE has sufficient market power in the relevant tying market to appreciably restrain competition in the tied market. Defendant argues that the relevant tying market in the present case is the market for either carryout pizza franchises [8] **[**17]** or, alternatively, a larger market of all fast food franchises, and not the market comprised solely of Little Caesar franchises. [9] Defendant contends that it has no significant market power based on their market share of either of

[7] In reaching its decision denying certification of a class that included the pre-mid-1990 franchisees, the Court left open the question of whether there might be a "basis for certification of a national class action [involving] the franchise agreements signed after mid-1990 [that] prevent franchisees from requesting an alternate distributor of logoed products." *Id. at 905*. The Court noted: "It could be argued that the post mid-1990 agreements, combined with the 1989 exclusive licensing agreement, evidence an express contractual tie-in of logoed products which could receive class treatment." Thus, the Court did not grant summary judgment on the tie-in claim involving the mid-1990 Franchise Agreements. It was this class the Court later certified in its March 31, 1997, order. ***172 F.R.D. at 239*** and 268.

[8] Defendant's Brief Supporting its Motion for Partial Summary Judgment at 6-7 asserts that "the relevant market for a tie-in claim on logo products and on other products used by a pizza chain's franchisees is the 'pre contract' market for the sale of franchises for either take out pizza franchises, fast food franchises or restaurant franchises in general."

these markets. [10] Thus, plaintiffs **[*467]** cannot prove a critical element necessary to prevail on their *per se* tie-in claim.

[18]** III. IS THE PURCHASE AND OPERATION OF AN LCE FRANCHISE A SEPARATE PRODUCT FROM THE LOGOED PRODUCTS OR OTHER PRODUCTS NECESSARY TO OPERATE SUCH A FRANCHISE?

A. Can A Franchise Be a Tying Product?

In a subsequent motion, the defendant questions whether a franchise and its continued operation can be a tying "product." Many courts, without question, treat a franchise as such. As noted by the Seventh Circuit in *Photovest Corp. v. Fotomat Corp., 606 F.2d 704, 722 (7th Cir. 1979)*:

> ***HN2***[] The law is well-settled that a franchise license itself can be the tying product. In *Northern v. McGraw-Edison Co., 542 F.2d 1336, 1345 (8th Cir. 1976)*, *cert denied, 429 U.S. 1097, 97 S. Ct. 1115, 51 L. Ed. 2d 544 (1977)*, the court stated:
>
>> A franchise license constitutes a separate and distinct marketable item. The weight of judicial authority supports the proposition that if prospective franchisees are compelled to purchase equipment or other tied products in order to obtain the franchise and trademark, an illegal tying arrangement exists.
>
> *Accord, Milsen Co. v. Southland Corp., 454 F.2d 363 (7th Cir. 1971)*; *Siegel v. Chicken Delight, Inc., 448 F.2d 43 (9th* ***[**19]*** *Cir. 1971)*, *cert denied, 405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972)*.

See also, Wilson v. Mobil Oil Corp., 984 F. Supp. 450 (E.D.La. 1997); *Collins v. International Dairy Queen, Inc., 168 F.R.D. 668 (M.D.Ga. 1996)*.

Grappone v. Subaru, 858 F.2d 792, 797 (1st Cir. 1988), notes that a product distribution dealership is a franchise when privately owned, and one dealer can operate multiple franchises from a single location.

> The record shows that Subaru was but one of many automobile franchisors, and that Grappone itself held not only Subaru, but also AMC, Pontiac, Jeep, Toyota, and Peugeot franchises.

---

[9] Of the pizza chains listed in the top 100 fast food chains, LCE has a market share below 20%. Def. Motion Ex. 2-3. Because of the many smaller carryout pizza outlets, LCE's market share of all pizza outlets would be smaller. LCE's market share of the top 100 fast food chains (including pizza and other carryout foods) is approximately 3.4%. *Id.*

[10] *Jefferson Parish Hospital v. Hyde, 466 U.S. 2, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*, found ***HN1***[] a 30% market share insufficient to show significant market power in the tying product market that is needed to invoke the *per se* rule against tying. In light of *Jefferson Parish,* LCE concludes that plaintiffs have failed to show that LCE has enough market power in a market of all fast food franchises or of pizza franchises to invoke the *per se* rule on tying. The plaintiffs' claim of a *per se* tie-in violation requires the tying market to be defined as the single-brand Little Caesar carryout franchises, as they and their economic experts have alleged it to be. While market power can be shown by factors other than market share -- such as a unique product protected by a patent, copyright or trademark -- plaintiffs have failed to produce sufficient evidence that LCE has significant market power derived solely from its trademark or copyrighted products bearing its trademark, logo and other distinctive marks. *Mozart Co. v. Mercedes-Benz of North America, Inc., 833 F.2d 1342, 1346-47 (9th Cir. 1987)*; *A.I. Root co. v. Computer Dynamics, Inc., 806 F.2d 673, 676 (6th Cir. 1986)*. X AREEDA, HOVENKAMP AND ELHAUGE, ***ANTITRUST LAW*** (1990) at 95-96, P 1737, specifically cites *A.I. Root* as rejecting the earlier case law that inferred market power from copyright or trademark protection. *See also Town Sound and Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 480 n. 15 (3d Cir. 1992)* (*en banc*) ("The plaintiffs do cite several old cases that viewed trademarks as creating presumptions of market power. But modern courts and commentators reject this position.").

Professors Areeda, Hovenkamp and Elhauge cite *Chicken Delight* and *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348 (9th Cir. 1982)*, to note that at least in the "business format" franchise where the franchisee makes the product or service sold to the public:

> The trademark has been deemed the standard tying product for many franchises where the typical tied product was the equipment or ingredients used by the franchisee to make the final product.

AREEDA, ET AL., ***ANTITRUST LAW*** (1996) at 14, P 1733 (footnote omitted). **[**20]** The Areeda authors in considering when a single-brand tying market can be allowed under the *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*, "lock-in" theory specifically use franchises and dealerships with their trademarks as examples of a potential tying product. AREEDA at p. 139, P 1740; pp. 145-48, P 1740c2. Also, in discussing single-brand products such as machines that can be a tying product, the authors note: "to simplify we will not say much more about franchisees or dealers in this subparagraph. Most of what is said about the machine buyer also applies to them." *Id.* at p. 155 n.47, P 1740.

Plaintiffs' expert economists have also provided their opinion and economic explanation why the continued right to operate a franchise is an economic commodity for which a market exists for economic and antitrust purposes. Siwek and Nelson Dec. 1997 Declaration. [11]

[21]** **[*468]** Thus, substantial authority suggests that a franchise and its continual operation can be a tying product.

B. Are the Products Associated with a Franchise Trademark Separate From the Franchise Itself?

In the *Chicken Delight* case, portions of which have recently come under criticism, the Ninth Circuit held that a Chicken Delight franchise was a separate product from the various "commonplace articles" that needed to be sold to a franchisee in order to operate a Chicken Delight franchise. *448 F.2d at 47-49*. In *Krehl,* the Ninth Circuit distinguished between a business format franchise such as the one involved in *Chicken Delight* and a product distribution franchise. *664 F.2d at 1353. The Krehl* case noted that in contrast to *a business format* franchise, in a *product distribution* franchise where the trademark identifies the actual end product consumed -- the ice cream sold by Baskin-Robbins -- there are not two separate products but only one, and thus there could not be an illegal tie-in. [12]

[22]** Defendant argues, however, that the logoed products -- including the paper goods and condiments bearing the LCE Roman man and other distinctive marks -- that are allegedly being tied would not have any market value and could not be sold anywhere or used anywhere separate from a LCE franchise. LCE cites *Casey v. Diet Center, Inc., 590 F. Supp. 1561, 1563-66 (N.D. Cal. 1984)*, that suggests that no tying can exist in a franchise context where the products and services allegedly tied have "no market distinct from that of the franchise itself." *Id. at 1566*. Defendant argues there is no separate market for the LCE logoed paper goods apart from a Little Caesar franchise.

---

[11] Stephen Siwek and Philip Nelson note that an economic commodity that can be bought or sold can define *a market.* Siwek and *Nelson* December 1997 Declaration. They add that the franchise rights created by Little Caesar franchise agreements is an "economic commodity" and can be traded in markets. They assert that during the period 1993-1995 LCE repurchased 241 Little Caesar franchises, and third parties purchased 597 Little Caesar franchises (Little Caesar March 29, 1996, *Franchise Offering Circular). Id. at 3-4, P 10*. Thus, the authors conclude that there is "a distinguishable antitrust market for the right to operate as a Little Caesar[] franchisee."

[12] The Fourth Circuit in *Principe v. McDonald's Corp., 631 F.2d 303 (4th Cir. 1980)*, *cert. denied, 451 U.S. 970, 68 L. Ed. 2d 349, 101 S. Ct. 2047 (1981)*, took a different position with respect to franchising. It noted that when the tied items were integral components of the franchised business -- such as carefully selected outlet locations and unique design associated with the trademark -- there could not be a tie-in. The Sixth Circuit has never cited the *Principe* case in defining separate products, nor did the Supreme Court in considering the question of defining one versus two products in its *Jefferson Parish* case, *466 U.S. at 23 n.35*.

The Supreme Court in *Jefferson Parish Hospital v. Hyde, 466 U.S. 2, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*, noted that ***HN3***[] "the answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items." *Id. at 19*. *Jefferson Parish* involved the market for anesthesiologists and the market for hospitals. The Court found that even though these were used together and functionally related, they were two separate **[**23]** products that could be selected and marketed separately.

Since the date defendant filed its motion, the Sixth Circuit in *PSI Repair Servs., Inc. v. Honeywell, Inc., 104 F.3d 811* (6th Cir.), *cert. denied, 138 L. Ed. 2d 195, 117 S. Ct. 2434 (1997)* (hereafter *"PSI"),* reiterated the *Jefferson Parish* standard for determining whether there are two products for a tie-in claim. According to *PSI,* the issue is not whether the items provide a "functionally integrated package," but rather the "character of the demand for the two items." *Id. 104 F.3d at 815* (quoting *466 U.S. at 19*). In *PSI,* Honeywell manufactured and sold industrial control equipment ranging in price from $ 250 to $ 800,000 per unit. These devices were dependent on internal printed circuit boards. Ninety-five percent of the components on the circuit board were "generic components" that could be purchased from a component manufacturer or distributor. Five percent, however, were designed specifically for Honeywell by a third party manufacturer who was contractually bound not to sell these proprietary items to Honeywell equipment owners or to **[*469]** independent service providers, such as the plaintiff in PSI. Like the **[**24]** LCE logoed products, these small number of Honeywell parts would have no market apart from Honeywell industrial control machines. PSI offered circuit board repair services to owners of industrial control equipment. Because PSI was unable to obtain the five percent of the circuit board components manufactured exclusively for Honeywell control equipment, it was unable to compete in the market for the repair of Honeywell circuit boards. [13]

Honeywell provided replacement parts for faulty circuit boards by replacing the entire board with a new or refurbished board, charging the customer 50% of the list price for a new board so long as the customer returned the defective board. Honeywell would thereafter evaluate whether the defective board could be repaired, and if it could it would be repaired **[**25]** and put back into the inventory for replacement boards. The question before the Sixth Circuit was whether there was a separate market for two products -- "parts for the circuit boards" and "the servicing of circuit boards when a board required repair or replacement." *104 F.3d at 814*. Like the LCE logoed products needed to operate an LCE franchise, these items -- parts and service -- were functionally related.

The lower court found there were not two separate products that could be tied in violation of the antitrust laws. The Sixth Circuit reversed the lower court. It noted that the Supreme Court in *Kodak* also dealt with whether the unique replacement parts for Kodak copiers were separate from the services utilized to repair a Kodak copying machine. The Supreme Court in *Kodak* determined that parts and service could be separate products if there is "sufficient consumer demand so that it is efficient for a firm to provide service separately from parts." *Kodak, 504 U.S. at 462*, quoted in *PSI, 104 F.3d at 815*.

In applying the consumer demand test of *Kodak* to its facts, the Sixth Circuit in *PSI* framed the question as to whether it would "be efficient for a firm **[**26]** to provide some component parts separate from the circuit-board services." *104 F.3d at 816*. It noted that "PSI's very existence indicates the possibility of a separate market for service, because PSI does not manufacture any of the component parts for the circuit boards but instead purchases them from third-party manufacturers." *Id.* The Sixth Circuit also noted in applying the consumer-demand test that 95% of the components necessary to construct a Honeywell circuit board were "available for sale either directly or through the manufacturer or a third-party distributor." *Id.* Obviously firms sold these generic parts separate from service.

In applying the consumer demand test to the present case, it is clear that the market for Little Caesar franchises is separate from the market for the goods and services, including logoed paper goods, necessary to run a Little Caesar franchise. Prior to the expansion of Blue Line to nearly all regions of the country, other private distributors,

---

[13] An economic expert at the trial contended that absent the restrictive policies of Honeywell, "PSI's market share [for repairing Honeywell control equipment] should be as high as twenty-seven percent." *Id. 104 F.3d at 814*.

unrelated to Little Caesar, sold all the goods and services necessary to run Little Caesar franchises, including logoed paper goods. Yet, the Little Caesar franchises were sold separately by LCE and **[**27]** franchisees. Since the commencement of this suit, Little Caesar has also approved three alternate distributors of the goods necessary to run a Little Caesar franchise and has agreed to provide them logoed products to sell. [14] In the past, there was a period where PYA Monarch, one of the recently reapproved distributors, sold all of the products needed by LCE franchises except logoed goods, which at that time the Little Caesar franchises in the Atlanta area had to buy logoed separately from Blue Line. [15]

[28]** **[*470]** Thus, the past history as well as the current approvals of new distributors demonstrate that there is sufficient consumer demand both for logoed goods and the other goods necessary to operate a Little Caesar franchise to provide them separately from the sale and marketing of the Little Caesar franchise itself. Defendant's Motion for Partial Summary Judgment on the issue as to there being but one product should be denied.

IV. CAN THE CLASS PLAINTIFFS PROVE LCE HAS SUFFICIENT MARKET POWER IN THE TYING PRODUCT MARKET TO INVOKE THE *PER SE* RULE MAKING A TIE-IN ILLEGAL?

While a claim of illegal tying can be attacked as an antitrust violation under a rule-of-reason analysis, this requires actual proof of market harm in the tied product that can involve complex analysis of whether the anticompetitive consequences of the tie are outweighed by procompetitive business justifications asserted by the defendant. ***HN4***[] When the *per se* rule against tying is invoked, market harm is presumed and this obviates the need for the extensive discovery and proofs of market harm and the balancing of procompetitive benefits against anticompetitive harms. The *per se* rule against illegal tying is **[**29]** a judicial shortcut available where risks of market harm are so obvious that courts will dispense with the cumbersome market harm inquiry and balancing. *See Arizona v. Maricopa County Medical Society, 457 U.S. 332, 350-51, 102 S. Ct. 2466, 2476, 73 L. Ed. 2d 48 (1982)*. In the present case, class plaintiffs are asserting a *per se* tying violation and LCE's Motion for Partial Summary Judgment asserts that plaintiffs cannot prove sufficient power in the tying product market, as properly defined, to make any tie-in subject to a *per se* attack. [16]

---

[14] While none of these three distributors has entered the market, they were permitted to distribute products needed to operate a Little Caesar franchise except for special proprietary dough and spice mixes.

[15] This was in and before 1989, a time prior to Blue Line's 1990 merger into its parent corporation LCE. While Blue Line at the time was a subsidiary of LCE, the significant point is that some franchisees obtained their rights to operate a LCE franchise under the LCE trademark from one firm and obtained their food products and their logoed products from two separate firms. While Blue Line was the firm selling the logoed products, from an economic and antitrust point of view, it could have been a firm unrelated to LCE that was allowed to sell LCE's copyright and trademark protected products.

[16] While plaintiffs' counsel, at a hearing on a more recent motion, asserted that they also challenge the defendant's actions under the rule of reason doctrine, this has not been briefed or argued in this motion. It has been my assumption in both of my earlier Reports and Recommendations on class certification and in this Report, that plaintiffs' challenge to defendant's conduct is under the *per se* tie-in doctrine. The cases cited and analyzed are *per se* tie-in cases, and this Report and Recommendation considers the sufficiency of market power in the tying product that is needed to make out a *prima facie* element of a *per se* tie-in claim. *PSI* states that the *per se* rule and rule of reason analysis

> have, in effect, merged in recent years. Under traditional per se analysis, restraints of trade were condemned without any inquiry into the market power possessed by the defendant. *See, e.g., Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*. However, ***HN5***[] under tying's per se rule, the seller must possess substantial market power in the tying product market. In addition, tying's per se rule provides for an inquiry into whether the defendant's conduct has procompetitive effects. *See Kodak, 504 U.S. at 478-79, 112 S. Ct. at 2088-89*. Such an extensive factual inquiry is hardly the stuff of per se analysis. Under rule-of-reason analysis, the antitrust plaintiff must show, inter alia, an adverse effect on competition. *See Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 29-30, 104 S. Ct. 1551, 1567-68, 80 L. Ed. 2d 2 (1984)*. This circuit adopted the following ***HN6***[] three-step analysis for determining whether a tying arrangement is likely to cause such an anticompetitive effect: "(1) the seller must have power in the tying product market; (2) there must be a substantial threat that the tying seller will acquire market power in the tied-product market; and (3) there must be a coherent economic basis for treating the tying and tied products as distinct." *Hand v. Central Transp.,*

[30]** **[*471]** As this Court has noted in its earlier summary judgment opinion ***HN8***[] the *prima facie* elements of a *per se* tie-in claim are"

1. there must be a tying arrangement between two distinct products;

2. the seller must have sufficient economic power in the tying market to restrain appreciably competition in the tied product market; and

3. the amount of commerce affected must not be insubstantial.

Little Caesar Enter., Inc. v. Smith, 895 F. Supp. 884, 894 (E.D.Mich. 1995).

The earlier Report and Recommendation which this Court accepted addressed class certification of those LCE franchise owners who had signed the post-mid-1990 Franchise Agreement. Because this case does not involve an admitted tie nor an express tie clearly set out in the Franchise Agreement or other documents, a major issue in that class certification controversy concerned whether there was a tying arrangement under *prima facie* element # 1 above. Could class plaintiffs prove whether their purchase of logoed goods from Blue Line was actually a "coerced" or "forced" tie -- i.e. an understood condition of continuing as a Little Caesar franchise -- or was it a voluntary choice, and thus **[**31]** not illegal under ***antitrust law***. The core dispute for class certification purposes was whether under *Fed. R. Civ. P. 23(b)(3)* class plaintiffs had sufficient *common* proofs of this "forcing" or "conditioning" to proceed as a class, or would the issue of "coercion" depend predominately on *individual* proofs.

Inc., 779 F.2d 8, 11 (6th Cir. 1985). Thus, in this circuit, ***HN7***[] market power in the tying product market is an indispensable requirement under either per se or rule-of-reason analysis. As Professors Areeda, Elhauge, and Hovenkamp comment, "the per se rule against tying is 'per se' in only one respect--namely, dispensing with proof of anticompetitive effects. . . ." 10 PHILLIP E. AREEDA ET AL., ***ANTITRUST LAW*** P 1760e, at 372 (1996). The merger of these two theories is apparent in the majority in *Kodak,* which does not even mention the terms "per se" or "rule of reason," even though *Kodak* was technically a per se case.

104 F.3d at 815.

This statement, which was not the matter at issue in *PSI*, is not my understanding of the relation of rule of reason analysis to *per se* tying analysis, nor does the section cited from *Kodak* support this PSI statement. While current case law and substantial academic literature tout the procompetitive effects on certain tying arrangements, the analysis of actual harm to competition and the balancing process is not part of a *per se* tying case unless after plaintiff has made out the elements of the *prima facie per se claim* the defendant then wishes to assert a procompetitive justification for the tying arrangement to rebut the *per se presumption* of harm to the market. Thus, a defendant can raise an *affirmative defense* of procompetitive effects of the tie which then triggers the balancing test and a review of alternative means available to defendant that fulfill the procompetitive aspect with lesser harm to competition. *See, e.g., United States v. Jerrold Electronics Corp., 187 F. Supp. 545, 560 (ED Pa. 1960)*, *aff'd,* ***365 U.S. 567, 81 S. Ct. 755, 5 L. Ed. 2d 806 (1961)*** (per curiam). *See also Jefferson Parish, 466 U.S. at 25 n. 42* (where it classified alleged procompetitive effects by a defendant as a "goodwill" *defense* that is routinely rejected by a court's finding that less restrictive "contractual quality specifications" can protect a company's goodwill with less harm to competition than a tie-in).

In the present case, defendant is not in this motion asserting any procompetitive effects of its behavior. It is merely asserting that plaintiffs cannot prove market power in the tying product that is needed for them to invoke the *per se* anti-tying shortcut. While plaintiffs in the present case could attack an anticompetitive tie-in directly under the rule of reason by asserting that LCE's conduct has harmed competition in the market for foods and/or supplies sold to restaurants, this is not their claim. Rather, they are asserting a *per se* tying violation, and LCE is claiming they cannot prove an essential *prima facie* element of such a claim. Accord, *Digital Equip. Corp. v. Uniq Digital Technologies, 73 F.3d 756, 760 (7th Cir. 1996)* (Easterbrook, J.).

Even if I am wrong on this analysis of when and whether the rule of reason balancing enters the *per se* tying picture, *PSI* notes that "in this circuit, market power in the tying product market is an indispensable requirement under either per se or rule-of-reason analysis." *104 F.3d at 815*. Thus, a showing of no market power in the present case would defeat either claim.

The Areeda authors disagree with this position. They argue that even where a plaintiff cannot show market power in the tying product by large market share, an antitrust challenge can be made under the rule of reason test where substantial harm to competition can be shown in the tied product market. X AREEDA, ET AL., at 45, P 1734b4.

This Court determined that in light of the change in language in the mid-1990 Franchise Agreement, and the practical economic effects of the market realties and other internal documents of the defendant, this "coercion" issue on the "was there a tie" issue could proceed by common proofs and thus class treatment was appropriate. Also, in determining whether the case could proceed as a class action, this Court did not inquire "into the merits of plaintiffs' claims" and "assumed plaintiffs' legal theory was correct." *Little Caesar Enter., Inc. v. Smith, 172 F.R.D. 236, 241, 261 n.19 (E.D.Mich. 1997)*.

The "coercion" issue considered in that earlier class certification dispute dealt with *prima facie* element # 1 of a tying claim -- is there a tie of two products? [17] **[**33]** The present **[*472]** motion deals with element # 2-- does the defendant have sufficient economic power in the tying **[**32]** market to invoke the *per se* tie-in doctrine. The core dispute on the present motion is how the relevant tying product market should be defined. Plaintiffs contend the tying product market is the market of LCE franchises and the rights to continue operating these economic entities. If that is the case, LCE has substantial market power in the tying product. Defendant argues that plaintiffs have defined the wrong market. As noted above, defendant argues that the appropriate market for antitrust purposes is the market either for carryout pizza franchises or for all fast food franchises of which they have less than 20% of the market which is insufficient for plaintiffs to invoke the *per se* tying rule. [18]

A. Substantial Market Power in Tying Market After Fortner II and *Jefferson Parish*:

HN9[] Market power has been defined as the power "to force a purchaser to do something that he would not do in a competitive market" such as buying a "tied product that the buyer did not want at all or might have preferred to purchase elsewhere or on different terms. When such 'forcing' is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated." *Jefferson Parish, 466 U.S. at 12* and 14. It has also been defined as "the ability of a single seller to raise price and restrict output." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. It can be determined by various surrogate tests, but the most common is determining the defendant's share of the relevant market.

---

[17] As noted in that Report, in the absence of express tie-in language in the franchise agreement there had to be proof of some "forcing" or "coercion" to take Product *B* in order to obtain Product *A.* This "coercion" or "forcing" is a necessary element of proving two products are tied when the tie-in is not clearly expressed in the contract or admitted by the defendant. While this "coercion" element to prove the existence of a tie *(prima facie* element # 1) relates to a defendant's power, it is different (albeit overlapping to some extent) from the consideration of power in *prima facie* element # 2-- does defendant have significant market power in the tying market to restrain appreciably competition in the tied product market.

This distinction is more clearly illustrated in the example used by Justice Black in *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 7, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*:

> If one . . . food store[] in a community were to refuse to sell flour unless the buyer also took sugar it would hardly tend to restrain competition in sugar if its competitors were ready and able to sell flour by itself.

Assume the single food store that only sold flour [Product *A*] if the buyer took sugar [Product *B*] refused to admit this practice and used no written contracts with an express tie. Instead its cashiers used salesmanship, even overbearing tactics and threats to remove the sugar from the goods sold if the customer wanting flour did not also buy a bag of sugar. These sales practices would be evidence of "forcing" or "coercion" relevant to *prima facie* element # 1 on whether there is a tying arrangement.

In such a case, the proofs related to the "coercion" on *prima facie* element # 1 (are the two products tied in fact) are clearly separate from the proofs needed to show the seller had substantial market power in the market for Product A (*prima facie* element # 2). The former would involve what the cashiers said and did, and the latter would involve proofs of market share in the sale of flour. Yet, the proofs on the separate elements are related because the effectiveness of the salesman tying the sale of sugar to flour is dependent on the degree of the seller's power in the market for flour. If the customer can obtain flour or a satisfactory substitute from another grocer, the *customer* is free to buy sugar elsewhere or not at all. While the tying store can continue to insist (and "force") the sale of sugar when a customer wants to buy flour, ***antitrust law*** is unconcerned because consumer choice and competition are not seriously harmed. The reason is that there is no proof of *prima facie* element # 2 on market power.

[18] See n. 10 above.

While earlier *per se* tying cases were quick to condemn tying arrangements without too much attention to the strength of the defendant's power in the tying product market, this ended when Justice White's dissent in *Fortner I* [19] gained **[**34]** favor with Justice Stevens and a substantially different Court in *Fortner II* [20] United States Steel (through one subsidiary) was discriminating in price on certain tied sales -- it charged more for **[*473]** prefabricated homes that it sold to developers who financed those homes through another United States Steel subsidiary than it charged when the homes were purchased by a developer separately. The tying product loans were for 100% of the cost not only of the prefabricated houses, but also the land and development costs of the developer. These unique 100% loans were "unusually inexpensive" financing giving the U.S. Steel defendants power to attract credit hungry developers.

[35]** In assessing this tying arrangement, Justice Black in *Fortner I* suggested that economic power in the tying market for credit could be found when an "appreciable number" of buyers wanted the tying product sufficiently that they would take the tied product which they might have preferred to buy elsewhere, all other factors being equal. Because tie-ins were deemed to serve no legitimate procompetitive purpose that could not be achieved by a less restrictive means, Justice Black concluded that "the presence of any appreciable restraint on competition" can serve to trigger the *per se* tie-in doctrine.

> Such appreciable restraint results whenever the seller can exert some power over some of the buyers in the market . . . . despite the freedom of some or many buyers from the seller's power . . . . Accordingly, the proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie in, with respect to any appreciable number of buyers within the market.

Fortner I, 394 U.S. at 503-504. United States Steel by offering uniquely favorable credit terms (the tying product) was able to extract supracompetitive prices **[**36]** for its prefabricated houses (the tied product). [21]

After remand, Fortner prevailed in the lower court which allowed a finding that United States Steel had sufficient power in the credit market to invoke *per se* condemnation of the tying arrangement. When the case eventually returned to the Supreme Court, *Fortner II* held that a more careful analysis of actual power in the tying market was needed -- even for **[**37]** "unique" products and for powerful defendants such as United States Steel. As is alleged in the present case concerning the full "market basket" of goods purchased from Blue Line, United States Steel was charging its tied customers supracompetitive prices for the tied product, and there were a substantial number of buyers accepting this "burdensome" tie.

Nonetheless, the Supreme Court held that the plaintiff had to prove that "the seller has the power, within the market for the tying product, to raise prices" or "to require purchasers to accept burdensome terms that could not be exacted in a completely competitive market." *Id. at 620*. The defendant must have "some advantage not shared by his competitors in the market for the tying product." *Id. at 620*. Cheaper and more freely available credit terms are indeed a "unique" tying product, but this is because U.S. Steel was "willing to accept a lesser profit -- or to incur greater risks -- than its competitors." Without dissent, the *Fortner II* Court determined that this is not the "kind of uniqueness" that constitutes exploitable "economic power in the credit market." *Id. at 621-22*. The Court noted that United States Steel **[**38]** was willing "to provide cheap financing in order to sell expensive houses" and this

---

[19] *Fortner Enters. v. United States Steel Corp. (Fortner I), 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*.

[20] *United States Steel Corp. v. Fortner Enters. (Fortner II), 429 U.S. 610, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977)*. Justices Burger, Blackmun, Powell, Rhenquist and Stevens were not on the Court when *Fortner I* was decided. Even Justices Brennan and Marshall, in the majority in *Fortner I,* joined the majority of *Fortner II* which was unanimous on its treatment of market power in the tying market.

[21] Justice White in his *Fortner I* dissent determined first that there was nothing "unique" about the money U.S. Steel was lending other than its "low cost" which is "ordinarily no reflection of market power." *Id. at 515*. He added that if the great credit deal was not available from any source other than U.S. Steel, then Steel's competitors in the prefabricated house market lost no possible sales in the "tied market" because the potential buyer/developers who needed such otherwise unavailable credit to build these houses could not buy prefabricated houses from a competitor of U.S. Steel.

"unique . . . financing" does not support a finding that defendant "had the kind of economic power" which a plaintiff must demonstrate to invoke the *per se* rule against tie-ins.

Fortner II refused to infer market power from the fact United States Steel's prefabricated houses were sold at above-market prices, and there were a number of people that accepted its tie between credit and the purchase of these houses. The lack of apparent power for the fungible tying item -- the market for money -- led the Court to accept "the possibility" that the lower cost of borrowing **[*474]** offset the higher cost of the houses, and the bundled package was thus "competitive." *Fortner II, 429 U.S. at 618*. [22] When a seller defendant clearly dominates a conventionally defined market, the finding of market power is an easy task. In other cases, it is a far more complicated task involving comparisons of the product the defendant is offering with that of the defendant's rivals. The defendant's and its rivals' prices and costs must also be compared for each of the products and for the combined package. It is possibly for **[**39]** this reason that courts, such as *Fortner II,* will not infer substantial market power solely from the existence of numerous ties coupled with above-market prices for the *tied* product. [23]

[40]** *Jefferson Parish* reiterated that significant power in the tying product market is needed to find a tie-in *per se* illegal. The Court defined the tying market as competing hospitals in the Jefferson Parish geographic area from which a patient (with the advice or preference of his or her doctor) could select. Defendant had only a 30% share of that market. [24] The Supreme Court considered this insufficient market power in the tying product to condemn East Jefferson Hospital under the *per se* tie-in rule even though it unquestionably had a tie-in between the use of its surgical facilities and the services of its selected anesthesiologists. If patients, in consultation with their doctors, did not like East Jefferson Hospital's tie-in because it was more expensive or limited their free choice in the tied market, they could go to another hospital in the Jefferson Parish area and get a different anesthesiologist of their choice.

[41]** As commonly stated and recently reiterated by the Sixth Circuit, under tying's *per se rule* the seller must possess substantial market power in the tying product market. *PSI, 104 F.3d at 815 n.2*. Without significant market power in the tying product the defendant cannot force the buyer to pay higher prices or accept other burdensome terms such as buying a tied product on less favorable terms than offered by competitors or that the buyer would otherwise not have purchased at all. [25] **[**42]** As with every element of the *prima facie* case, plaintiffs have the burden of proof on showing significant market power in the tying market. [26]

---

[22] This suggests that before market power can be inferred from a number of customers accepting "burdensome" terms, a court must evaluate whether the terms of the tie really are "burdensome." One would need to know whether the quality-adjusted package price exceeds rival prices for the two products. One of the LCE claims argued in this motion that this Court need not address involves this issue of whether plaintiffs must prove that the total package is priced above market. *(See* Defendant's brief at 11-12.)

[23] *See also Will v. Comprehensive Accounting, 776 F.2d 665, 672-73 (7th Cir. 1985)*, *cert. denied,* ***475 U.S. 1129, 90 L. Ed. 2d 201, 106 S. Ct. 1659 (1986)*** (the Seventh Circuit assumed the tied product price was above market but refused to infer power in the absence of a showing that the tied price for both items exceeded the market price for the two items sold separately). *Jefferson Parish* found no market power even though there were a substantial number of ties and an asserted indifference to price in the tied product due to market imperfections and information costs.

[24] ***HN10***[] Power can be inferred from a large share of the relevant market or from other factors such as a unique product with no substitutes, *e.g.* a patented product, or substantial barriers to the ease of entry. *See Jefferson Parish, 466 U.S. at 16*; *Tic-X-Press, Inc. v. Omni Promotions Co. of GA., 815 F.2d 1407, 1420 (11th Cir. 1987)*. Most of the cases involving proof of market power by methods other than a high share of the relevant tying market were before 1977 when *Fortner II* turned a more critical eye on assertions of substantial market power in the absence of substantial market share.

[25] The Areeda treatise notes that "*Jefferson Parish* . . . indicated that a defendant without power in the tying market can neither coerce customers to take an unwanted product from him nor significantly impair competition in the tied market." *466 U.S. at 11-13*. The Areeda authors use an example of "suppose that all franchisors require their franchisees to take certain supplies from the franchisor. If none of them has the requisite power individually, the per se rule would be inapplicable. Nor would the restraints be unreasonable when the aggregate foreclosures were but a minor share of the tied market." AREEDA, ET AL., at 40, P 1734a n.6.

One of the most thoughtful analyses of the "significant" aspect of market power is found **[*475]** in *Grappone v. Subaru of New England, 858 F.2d 792 (1st Cir. 1988)*, where Justice (then Judge) Stephen Breyer wrote for the First Circuit. He defined "*significant* market power" as necessitating "more than the mere ability to raise price only slightly, or only on occasion, or only to a few of a seller's many customers." *Id. at 796*. "To show market power, the seller must have a significant market share or sell a unique, such as a patented, product for which there are not readily available substitutes." [27] *Id.* A seller with limited ability to raise prices "cannot easily cause harm in *tied* product markets" and "cannot easily harm consumers." *Id. at 796-97*.

[43]** *Grappone* noted that without market power in Product *A*, the seller cannot force a buyer to take "a more expensive or less desirable Product B." *Id. 858 F.2d at 795*. It notes that a seller with market power in Product *A* who has already exercised it by charging more for Product A

> cannot force buyers to take a more expensive or less desirable Product B, *unless* it provides buyers *equivalent* compensation by lowering the price of Product A (or maintaining Product A's price at a level lower than the Seller has the *power* to charge), for otherwise buyers, who were already paying as much as the Seller could charge them (with its degree of market power) would also likely switch to other sellers or discontinue use of Product A. *See Jefferson Parish, 466 U.S. at 39* & n. 8, 40, *104 S. Ct. at 1572* & n. 8, 1573 (O'Connor, J., concurring). This is simply to make the logical point that "fully exploited" buyers would not take a less desirable Product B without compensation, for otherwise they were not being "fully exploited."

Id. at 795. [28]

[44]** The *Grappone* opinion notes that *Jefferson Parish* brings into visibility the upshot "counterintuitive" notion

> that a "tie" does not hurt the typical buyer in any *obvious* way; one needs a more refined analysis to find the harm.
>
> * * *
>
> The *Jefferson Parish* Court provides that more refined analysis. The majority and concurrence recognized that a Seller, possessing significant market power with respect to Product A, may cause anticompetitive harm by tying as follows: by reducing the price of Product A slightly (or by otherwise not fully exploiting its power with respect to Product A), the Seller may induce the Buyer to accept the tie; by doing so, the Seller may build a strong market position in Product B; and *that position* in Product B, in turn, may increase its power to charge high prices in respect to Product A. If a monopolist of patented can-closing machinery, for example, insists, as a condition of selling his machines, that their purchasers buy his cans, he will likely soon have a monopoly in cans as well as machines. And, that fact--the fact that he controls *both* cans and machines--may make his monopoly safer from competitive attack when his patent **[**45]** on the can-closing machinery expires. A new competitor would then have to enter *both* levels of the business (cans and machines) to deprive him of monopoly profits. And, this added security may enable the machinery monopolist to charge higher prices. The tie, by permitting the Seller to extend its market power from one level to two, may thereby raise entry barriers,

---

[26] *A.I. Root Co. v. Computer Dynamics, 615 F. Supp. 727, 733 (N.D. Ohio 1985)*, *aff'd, 806 F.2d 673 (6th Cir. 1986)*, placed the burden on the plaintiff to show not only a substantial number of customers accepted the tie, but their doing so could only be explained in terms of the defendants having market power.

[27] As noted by Justice O'Connor in her concurring opinion in *Jefferson Parish,* even a patent does not make a product unique for purposes of determining market power if the relevant market contains reasonable substitute products to which a consumer can turn if the price of the patented item goes up significantly. *466 U.S. at 39-40*.

[28] *Jefferson Parish* suggests that this is not always the case because by tying *B* to *A* the seller may camouflage the true price of each product. The Court notes that a seller might increase "monopoly profits over what they would be absent the tie" either by price discrimination (against the less informed consumer) or "perhaps by [the buyer's] inability to evaluate the true cost of either product when they are available only as a package." *See also 466 U.S. at 15* and n.24.

> providing security that helps a monopolist-seller further harm the consumer. This point is made both by the *Jefferson Parish* majority, 466 U.S. at 14, 104 S. Ct. at 1559, and the concurring justices, id. at 36-37, 39, 104 S. Ct. at 1570-71, 1572; *see also* 3 Areeda and Turner PP 725h, 733e.
>
> **[*476]** Of course, in such circumstances, tying would hurt the Buyer or consumer only when it first hurts firms seeking to sell the *tied* product. Only if the tie significantly reduces the opportunities to sell Product B, can the tie significantly increase the Seller's power in respect to Product B, and thereby *(i.e.,* by raising entry barriers) increase the Seller's power in respect to Product A. *See* Jefferson Parish, 466 U.S. at 14, 18-25, 104 S. Ct. at 1559. And, insofar as tying impedes "competition on the merits," **[**46]** discouraging the search for innovation or efficiency, it does so in the *tied* product markets. Jefferson Parish, 466 U.S. at 14, 104 S. Ct. at 1559; 3 Areeda and Turner P 725g;
> * * *
>
> The majority and minority [concurring] opinions in *Jefferson Parish* disagree, not in respect to the nature of the link between tie and potential competitive harm, but in respect to the legal conclusions they would draw from the nature of this linkage. The minority would abandon the *per se* anti-tying rules and analyze tying under a "rule of reason"; it would prohibit tying only when according to its "demonstrated economic effects[,] . . . [tying's] anticompetitive impact outweighs its contribution to efficiency." Jefferson Parish, 466 U.S. at 41-42, 104 S. Ct. at 1573-74. The majority would retain pre-existing *per se* rules; but it also breathes life into the screening function that the preconditions of those *per se* rules serve. The majority, for example, makes clear that by its requirement of "market power" it means *significant market power--more than* the mere ability to raise price only slightly, or only on occasion, or only to a few of a seller's many customers. **[**47]**
> * * *
>
> That the "market power" hurdle is moderately high--that it cannot ordinarily be surmounted simply by pointing to the fact of the tie itself or to a handful of objecting customers--makes sense in light of the harms the anti-tying rules seek to avoid. . . . Virtually every seller of a branded product has *some* customers who especially prefer its product. But to permit that fact alone to show market power is to condemn ties that are bound to be harmless, including some that may serve some useful social purpose.

858 F.2d at 795-97 (various case citations and academic references omitted). [29]

While *Grappone* was pre-Kodak, and plaintiff Grappone was not "locked in" by high switching costs because the dealership in which he had "sunk costs" sold multiple brands of cars other than **[**48]** the Subaru, the opinion concludes that for most product distribution franchises or dealerships, the relevant tying market is the interbrand foremarket. In *Grappone,* the tied product was a package of Subaru parts, the tying *product* was the Subaru franchise, but the relevant tying product *market* was either all automobiles or all imported automobiles.

> Subaru's market share, whether measured in terms of sales of all autos or of imports or in any other reasonable way, is minuscule. *See* Kenworth of Boston, Inc. v. Paccar Financial Corp., 735 F.2d 622, 623-24 (1st Cir. 1984) (tying product is Paccar trucks, relevant market is that for all heavy trucks); Kingsport Motors, Inc. v. Chrysler Motors Corp., 644 F.2d 566, 571 (6th Cir. 1981) (tying product is Dodge cars, relevant market is that for all medium priced automobiles sold in U.S.); Anderson Foreign Motors, Inc. v. New England Toyota Distributors, Inc., 475 F. Supp. 973, 986 (D.Mass. 1979) (tying product is Toyotas, relevant market is that for all new foreign and domestic cars); *see also* A.I. Root Co. v. Computer/Dynamics, Inc., 806 F.2d 673, 675 (6th Cir. 1986) (tying product is specialized computer **[**49]** equipment, relevant market is that for all small computers).

Id. 858 F.2d at 797.

---

[29] *Fortner II* also noted that most sellers have the ability to raise prices and not lose particularly loyal customers, but this limited "power" does not trigger the *per se* tying rule. 429 U.S. at 621 n.14.

Thus, the *Fortner II-Jefferson Parish* cases insisted on a "more refined analysis" of the need for demonstrating substantial market **[*477]** power in the tying product market before the probability of harm in the tied market is so high that it can be presumed under the *per se* tying doctrine. Thereafter, courts were reluctant to find market power in single brand products, no matter how coveted or unique, if other brands of the product might, at a certain price level, be selected as substitutes for the preferred brand. [30] If the interbrand competition containing Product *A* is healthy, and no firm has a substantial market share suggesting market power in the pre-contract market, courts assumed that interbrand competition in the foremarket would police any market abuses by competing firms. Thus, with a competitive foremarket if any firm had a tie-in of its Product *A* with Product *B,* the normal economic assumption would be that acceptance of the bundling was a voluntary consumer choice and not "coerced." *Jefferson Parish* involved clearly tied products in which substantial consumers acquiesced. **[**50]** *Fortner II* involved not only a substantial number of consumers accepting the tie of the credit and houses, but also proven abovemarket prices for Product *B* when obtained as part of a tie. [31]

[51]** B. *Kodak* and Narrowed Market Definition:

The Supreme Court in *Kodak* called into question the reluctance of courts to use a single brand product to define a market for antitrust tying purposes and its *per se* rule. Kodak sold photographic and micrographic equipment which the majority opinion defined as "unique" at least to the extent that software programs and parts that operated with Kodak's machines were "not compatible with competitors' equipment, and visa versa." *504 U.S. at 457*. It provided service and parts to its customers. Some of its unique parts were made by Kodak but most were made by licensed manufacturers. Independent service organizations ("ISO's") in the 1980's began repairing Kodak equipment, selling its parts, reconditioning and reselling used Kodak equipment. In 1985-86 Kodak began a policy of selling replacement parts only to buyers of its equipment who used Kodak's repair service or who serviced their own equipment. The manufacturers of those Kodak parts that Kodak did not make agreed not to sell such parts to anyone except Kodak. As a result of this new policy, ISO's were unable to get adequate parts to service or rebuild Kodak machines, and many **[**52]** went out of business. *Id. at 458*.

The ISO's sued Kodak alleging an illegal tie under the *per se* rule that involved Kodak tying its service to its unique parts. After very limited discovery the district court granted Kodak summary judgment because the ISO's had provided no evidence that Kodak's *equipment* was tied to Kodak's *parts and service* -- a claim that the ISO's were not making. The Ninth Circuit reversed noting that there was a disputed issue of fact over whether there were separate markets for the tying product (which the Ninth Circuit correctly recognized the ISO's were claiming was the unique Kodak repair parts) and the tied product (the Kodak service). Having determined that there was sufficient evidence to allow a finding that two product markets existed, the Ninth Circuit considered the question of whether "Kodak has sufficient economic power in the tying product market [parts] to restrain competition in the tied product market [service]." *504 U.S. at 460* (quoting *Image Technical Service, Inc. v. Eastman Kodak Co., 903 F.2d 612, 616 (9th Cir. 1990)*, bracketed materials in original). Kodak argued that as a matter **[*478]** of law interbrand "competition in **[**53]** the equipment market [prevented] Kodak from possessing power in the parts market." *Id.* While the Ninth Circuit acknowledged that this "theoretical" premise "might be true" it would not allow summary judgment on a factually thin record because "market imperfections can keep economic theories about how consumers will act from mirroring reality." *903 F.2d at 617*. In its *certiorari* review, the Supreme Court majority opinion stated that "the principal issue here is whether a defendant's lack of market power in the primary equipment

---

[30] Courts have consistently refused to consider one brand to be a relevant market of its own when the brand competes with other potential substitutes. *A. I. Root v. Computer Dynamics, 615 F. Supp. 727, 733 (N.D. Ohio 1985)*, *aff'd, 806 F.2d 673, 675-76 (6th Cir. 1986)*, and the other cases cited in *Grappone* (small business computers was a relevant market, not just those that would run on BOSS software); *see also General Business Sys. v. North Am. Philips Corp., 699 F.2d 965, 972-75, 977-78 (9th Cir. 1983)* (small business computers and not the defendant's unique computer storage cards was the relevant market); *Will v. Comprehensive Accounting Corp., 776 F.2d 665, 672-73 (7th Cir. 1985)*, *cert. denied,* ***475 U.S. 1129, 90 L. Ed. 2d 201, 106 S. Ct. 1659 (1986)*** (franchises for an accounting system).

[31] There was clear price discrimination for the prefabricated homes in *Fortner II* between those who needed United States Steel's credit and those who did not.

market precludes -- as a matter of law -- the possibility of market power in derivative aftermarkets." 504 U.S. at 454-455. It noted later that:

> Kodak does not present any actual data on the equipment, service or parts markets. Instead, it urges the adoption of a substantive legal rule that "equipment competition precludes any finding of monopoly power in derivative aftermarkets . . . . Kodak argues that such a rule would satisfy its burden as the moving party of showing "that there is no genuine issue as to any material fact" on the market power issue. 11

11 Kodak argues that such a rule would be *per se,* with no opportunity for **[**54]** respondent to rebut the conclusion that market power is lacking in the parts market. . . .

504 U.S. at 466.

> A legal presumption against a finding of market power is warranted in this situation, according to Kodak, because the existence of market power in the service and parts market absent power in the equipment market "simply makes no economic sense," and the absence of a legal presumption would deter procompetitive behavior.

504 U.S. at 467. The majority opinion notes that in considering Kodak's *per se* defense:

> To determine whether Kodak has met [its summary judgment] burden, we must unravel the factual assumptions underlying its proposed rule that lack of power in the equipment market necessarily precludes power in the aftermarkets.
>
> The extent to which one market prevents exploitation of another market depends on the extent to which consumers would change their consumption of one product in response to a price change in another, *i.e.* the "cross-elasticity of demand."

* * *

504 U.S. at 469. Kodak argued that the Court should accept, as a matter of law, this "basic economic reality" . . . "that competition in the equipment market necessarily **[**55]** prevents market power in the aftermarket." 504 U.S. at 470.

The Supreme Court in *Kodak* stressed that in considering market power, economic theory provides useful guides. Yet, textbook economic models cannot be a substitute for the actual facts and the market realities of the case.

> Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***. This Court has preferred to resolve antitrust claims on a case-by-case basis, focusing on the "particular facts disclosed by the record." In determining the existence of market power, and specifically the "responsiveness of the sales of one product to price changes of the other," this Court has examined closely the economic reality of the market at issue.

504 U.S. at 466-67 (citations omitted). At least in a case where the plaintiff has come forward with some evidence of a dysfunction in the theory that markets control prices by competition and free access to new competitors, the *Kodak* court stressed that ***HN11***[] defendant "bears a substantial burden in showing that it is entitled to summary judgment. It must show that despite evidence of increased prices and **[**56]** excluded competition, an inference of market power is unreasonable." *Id. at 469*.

Citing *Jefferson Parish, Kodak* emphasized "the relevant market for antitrust purposes is determined by choices available to Kodak equipment owners." *Id. at 482*. "The proper market definition in this case can be determined only after a factual inquiry into the 'commercial realities' **[*479]** faced by consumers." *Id.* (quoting *United States v. Grinnell, 384 U.S. 563, 572, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966))*. *Grinnell* had held that after defining the appropriate market, monopoly may "ordinarily be inferred from the predominant share of the market." 384 U.S. at 571.

The Court stated that "Kodak's theory does not explain the actual market behavior revealed in the record." *504 U.S. at 473*. The ISO's had come forward with some evidence that was inconsistent with the general economic theory. They demonstrated that Kodak had raised prices and driven out ISO competition in the aftermarkets. *504 U.S. at 477*.

The Court found that:

> Respondents [the ISO's] offer a forceful reason why Kodak's theory, although perhaps intuitively appealing, may not accurately explain the behavior of the **[**57]** primary and derivative markets for complex durable goods: the existence of significant information and switching costs. These costs could create a less responsive connection between service and parts prices and equipment sales.

504 U.S. at 473.

The *Kodak* majority also noted that there was other evidence consistent with illegal ties. There was evidence of price discrimination favoring those Kodak customers who serviced their own equipment (which might be the more sophisticated customers) and thus could avoid any supracompetitive pricing of Kodak service. The Court added:

> Service prices have risen for Kodak, but there is no evidence or assertion that Kodak equipment sales have dropped.

504 U.S. at 472.

In light of these factors and "higher service prices and market foreclosure," the Court chided that "Kodak's service and parts policy is simply not one that appears always or almost always to enhance competition." *Id. at 478-79*. The Court concluded that Kodak

> has failed to demonstrate that respondents' inference of market power in the service and parts markets is unreasonable, and that, consequently, Kodak is entitled to summary judgment. It is **[**58]** clearly reasonable to infer that Kodak has market power to raise prices and drive out competition in the aftermarkets, since respondents offer direct evidence that Kodak did so. It is also plausible . . . to infer that Kodak chose to gain immediate profits by exerting that market power where locked in customers, high information costs, and discriminatory pricing limited and perhaps eliminated any long-term loss.

Id. at 477-78 (footnote omitted).

Justice Scalia, in his dissenting opinion, makes it clear that if Kodak had from the outset tied a lifetime parts and service warranty to the sale of its micrographic and photocopying equipment, or if it had announced its policy of limiting parts sales solely to customers who serviced their own machines, then the customers would have bought the equipment in the first hypothetical situation with knowledge of the tie between equipment and parts and service, and in the second hypothetical "with the knowledge that aftermarket support could be obtained only from Kodak." *504 U.S. at 491*. In both of these cases, Justice Scalia argues that "the *tying* product market would be the *equipment"* market in which Kodak had no market power **[**59]** that could have "effectively forced consumers to purchase Kodak micrographic or photocopying machines subject to the company's restrictive aftermarket practices." In such a case, summary judgment would be appropriate insofar as application of the *"per se* rule was concerned." *Id.*

There is nothing in the majority opinion to suggest that they disagree with either of these two hypotheticals of (1) an *express tie-in* or (2) an *announced* policy even though either hypothetical would foreclose ISO's from servicing Kodak machines. Justice Scalia notes that on the facts available to Kodak customers, at least after 1995, most of the purchasers of micrographic equipment and all of the

> purchasers of new Kodak copiers, could have been aware of Kodak's parts practices. The only thing lacking to bring all of these purchasers (accounting for the vast bulk of the commerce at issue here) **[*480]** squarely

> within the hypotheticals we have described is concrete evidence that the restrictive parts policy was announced or generally known.

Id. at 492.

In Justice Blackmun's majority opinion response to this assertion, there is absolutely no disagreement with the legal premise Justice **[**60]** Scalia uses. Rather, it is the lack of undisputed factual support in the record for the legal premise that Justice Blackmun determines is the bar to summary judgment. His majority opinion responds, "but the dissent's 'only thing lacking' is the crucial thing lacking -- evidence." Id. at 477 n.24. Again, Kodak was moving for summary judgment based solely upon its economic theory and had submitted no evidence to counter that of the plaintiffs. This footnote suggests that had there been adequate undisputed evidence that the restrictive parts policy was announced or generally known, the majority's concern over information and switching costs would no longer have existed, and summary judgment would have been granted to Kodak on the *per se* tie-in claim. [32]

[61]** If Kodak customers before purchasing their machines knew that parts would only be available to Kodak equipment owners who used Kodak's service or who serviced their own machines, these customers would also know that if they bought the Kodak machine, they would have to forego getting service from an ISO if their machine later failed. The reason most customers would know this is that if the Kodak restrictive parts policy is generally known, *it is obvious* to potential Kodak customers that ISO's would not have new replacement parts available. While this information may not solve the information cost problem of accurate life-cycle pricing, it at least gives enough information to a substantial number of potential Kodak customers *before they lock in* by purchasing a Kodak machine, that they face certain risks on future Kodak parts and/or service costs. Then these customers would have the freedom of: (1) shopping around with other equipment manufacturers to compare their price, parts and service policies and possibly find a better deal; or (2) seek contractual protections from Kodak through extended warranties or some price guarantees for parts and service either via fixed pricing **[**62]** lists or "most favored customer protections; or (3) knowingly gamble that their machine will not break down or Kodak will fix it without exploiting them on price for parts and/or service. Thus, in Kodak, if the restrictive parts policy were "generally known" before buying a Kodak machine, it is possible that there would be enough sophisticated potential Kodak customers around so that the equipment market would police and limit Kodak's aftermarket power to act opportunistically.

Yet, the *Kodak* majority immediately notes that this is not necessarily the case. If "acquiring the information is expensive," many may choose not to obtain it, limiting the number of informed customers. Id. at 474. Second,

> if the number of sophisticated customers is relatively small, the amount of profits to be gained by supracompetitive pricing in the [tied product] market could make it profitable to let the knowledgeable consumers take their business elsewhere. More importantly, if a company is able to price discriminate between sophisticated and unsophisticated consumers, the sophisticated will be unable to prevent the exploitation of the uniformed.

Id. at 475.

While Justice **[**63]** Scalia's hypotheticals would lessen the precontract information costs through an announced or generally known policy, they do not address those who learn the information after purchase where they are locked in by their sunk costs. While in some situations the need to attract new customers may protect those customers who are locked in, the majority notes that where "the **[*481]** number of locked in customers were high relative to the number of new purchasers" or where "the seller can price discriminate between its locked in customers and

---

[32] The Areeda treatise notes that in considering a known policy of not making unique parts available to independent repairs,

> the *Kodak* dissent urged that me relevant tying product would be the machine if Kodak's policy of not selling repair parts to independent service organizations were generally known to machine buyers. The majority apparently agreed when it emphasized the absence of evidence that Kodak's policy was generally known.

AREEDA at 150, P 1740 (footnotes omitted).

potential new customers," the strategy of a tie-in and supracompetitive pricing for the tied product may "prove profitable." *Id. at 476*.

Thus, while the majority seems to agree with Justice Scalia's two hypotheticals where there is evidence that the tie-in policy is announced or generally known pre-contract, it suggests several additional scenarios where a seller could exploit pre-contract information deficiencies and post-contract switching costs and not be constrained in its opportunism by the need for new sales or by sophisticated customers.

The two hypotheticals noted by Justice Scalia -- with which the *Kodak* majority implicitly agrees if *and* **[**64]** *when* supported by actual evidence and not merely by economic theorizing -- are relatively simple because the market implications or risks of such announced or generally known information would be *obvious* to most consumers.

What is less clear from *Kodak* is whether its narrowed tying market definition is available when the implications or risks flowing from what is "announced" or "generally known" precontract are *not obvious* to most reasonable potential consumers, and will not apprise them of the potential risk of future seller opportunism prior to getting "locked in" by purchasing the product without shopping around or seeking contract protections. In such a case, particularly where new foremarket sales are less important or can be preserved by discounts or price discrimination, the foremarket competition will not protect substantial "locked in" customers from aftermarket opportunism and exploitation. [33]

[65]** The *Kodak* case evoked an avalanche of professional and academic writing seeking to determine its exact meaning and potential reach. It has also been a source of substantial litigation in federal courts. One academic commentator has asserted the *Kodak* case and its discussion of the impact of information costs and switching costs on market definition has raised an issue that is "one of the most conceptually difficult courts face in antitrust litigation." Warren S. Grimes, Antitrust Tie-In Analysis After Kodak: Understanding the Role of Market Imperfections, 62 Antitrust L.J. 263 (1994). [34]

---

[33] As I note later, there may be in this case a disputed issue of material fact whether the mid-1990 Franchise Agreement disclosed enough for a reasonable potential consumer of LCE franchises to know (what the evidence suggests LCE knew) that (1) if many mid-1990 franchisees expose themselves to an LCE/Blue Line tie-in of logoed goods which was "generally known" or for most franchise shoppers fairly obvious from the language in the mid-1990 Franchise Agreement and other readily available facts); and (2) if LCE refused to sell logoed paper goods to alternative distributors, then (3) this would raise entry barriers and the ability to compete for alternative distributors because of many franchisees' preference for one stop shopping and the fact that logoed goods had higher profit margins than the other items in the "market basket" of products needed to operate a LCE franchise. This latter impact on potential alternate distributors' ability to enter the market and compete with Blue Line is not "so obvious" that this Court could, on this record, determine that it was "generally known" for purposes of granting partial summary judgment.

[34] Professor Grimes argues:

> The cases suggest the need to adopt a test for tie-ins that accounts for market imperfections. Making market power the exclusive key to anticompetitive injury pressures the courts to define the market narrowly to adjust for market imperfections that are present in tie-ins. A case such as Kodak presents the issue of a harmful tie because of market imperfections, not because of any fundamental structural problem with the micrographic industry. If the Court stretches market definitions to allow for these imperfections, market definitions are distorted. For example, when the Court defines the market to include only Kodak spare parts, this definition would have possible ramifications for merger analysis under Section 7 of the Clayton Act or for monopolization suits under Section 2 of the Sherman Act. Yet the structural remedies often used in merger or monopolization suits are surely inappropriate in a case like Kodak.
>
> Courts can reconcile this tension by simply decreeing that separate standards govern market definitions in tie-in cases. But such a declaration is likely to lead to more confusion on an issue that is already one of the most conceptually difficult courts face in antitrust litigation. If, instead, there is forthright recognition that market shares are not dispositive when the harm from a tie arises from market imperfections, much of the pressure to distort market definitions is reduced. Market definitions will still be critical in determining whether a tie is associated with cartel behavior or likely to raise competitors' costs. But in testing for such injury, there would appear to be no reason to define the tying product market any differently than would be done in a merger or monopoly case.

[66]** **[*482]** This author argues that "the confused and unsatisfactory state of current substantive law on tie-ins" could be improved with "a forthright recognition that market shares are not dispositive when the harm from a tie arises from market imperfections" and franchisor opportunism occurring after a franchisee is locked in. He argues that looking at market imperfections in light of the underlying policies and harms that antitrust tie-in law seeks to address would reduce "much of the pressure to distort market definitions . . ." *Id.* [35]

[67]** In other situations, the *Kodak* majority opinion is consistent with a reading that in light of what a defendant has announced and what is generally known the information concerning other consequences that the defendant may later be able to exploit is not sufficiently known, obvious or reasonably knowable so that in such a case, even with an announcement or general knowledge of certain facts, other substantial information costs remain and a *Kodak* lock-in theory market definition may still be possible.

In the present case, even if LCE's tying of logoed goods to continued operation of a Little Caesar franchise was announced or generally known pre-contract to the class plaintiffs, were most of these franchisees unaware pre-contract of the negative impact of this tie on alternate distributors' ability to enter the market and effectively compete with Blue Line? Would Little Caesar's awareness of these facts and later exploitation of locked in franchisees permit these franchisees to successfully assert a *Kodak*- type market definition because of their remaining information costs and switching costs even if they knew the logoed items were tied? Unlike Justice Scalia's two hypotheticals **[**68]** where the market consequences were *obvious,* here the consequences of an announced or generally known tie were not so obvious. While Justice Blackmun seems to implicitly agree with Justice Scalia's two hypotheticals (when actual evidence, and not just theory, supports them) his opinion clearly seems to leave the door open to a narrowed market definition where there remains substantial information and switching costs that are actively exploited by the defendant.

C. *PSI Repair Service v. Honeywell, Inc.*:

In the Sixth Circuit's PSI Repair *Services, Inc. v. Honeywell, Inc., 104 F.3d 811 (6th Cir. 1997)*, case, Honeywell, like Kodak, has a restriction on sale of its unique repair parts except as a part of its service. [36] In *Kodak* and *PSI,* the asserted market power came from the sunk costs or costs of abandoning expensive equipment and switching to other equipment. This "power" comes with any investment in something that later requires aftermarket goods or parts that are not available from sources other than the seller.

Id. at 316-17 (footnote omitted).

[35] The author notes that the ability of a buyer to negotiate with the seller for contractual protections before purchasing a tying product may not be an adequate pre-contract safeguard if market imperfections affect the buyer's motivation. "The real issue is not whether corrective mechanisms exist for knowledgeable buyers but how quickly and how pervasively knowledge of the unfavorable terms of the seller's tie will permeate the market." *Id. at 175 n.44*.

While consumer information pervades real world markets, that does not mean that certain information costs should not lead to antitrust remedies when they are exploited by sellers.

> The proper distinction here is that, as a policy matter, the law should address active and intentional behavior that creates new consumer injury even if a similar injury created by a seller's passive reliance on market imperfections is beyond the law. Like deceptive advertising or securities fraud, a seller's use of a harmful tie is voluntary and intentional behavior and it results in additional harm that would not occur if the seller were passively benefiting from market imperfections.

Id. at 280.

[36] As noted above, the Sixth Circuit found that notwithstanding Honeywell's denials, it was providing *service* as a separate product from its parts even though it immediately replaced a customer's defective control panel with a replacement panel. While it did not "service" all control panels, customers had to return the defective control panels. Honeywell then examined the returned defective panels and repaired many of them. These "serviced" control panel were placed in the inventory of control panels used to replace defective ones for their customers.

[69]** **[*483]** If the seller seeks and is financially dependent on continued sales in the foremarket, it risks substantial harm to its reputation and future sales if it uses aftermarket "leverage" to exploit its old customers by charging prices significantly above-market for aftermarket goods or by forcing a tie to another product or service. If prior to a purchase the customer knows of the existence of, or the reasonably foreseeable risk of, a tie or excessive pricing for needed aftermarket goods, that customer has the freedom to accept those terms and risks, seek a competitor's package without such risks, seek alternate contract protections, or forego the investment altogether. In such cases the concerns of antitrust tying law with either limiting a consumer's free choice in the market or excluding potential competitors from the market do not arise because competition in the foremarket should police opportunistic behavior in the aftermarket. What prevented this freedom of informed choice in *Kodak* was the fact that Kodak changed its policy after a substantial number of consumers had bought their machines and were locked in. [37]

[70]** In PSI, when considering the implications of *Kodak* for what an equipment manufacturer must do before a plaintiff can assert a single brand market as a tying product market, the Sixth Circuit focused on what actions the manufacturer undertook to increase or take advantage of the information costs faced by a potential consumer. It looked to what most consumers would have known. [38] *PSI* quotes Justice Blackmun's response to Justice Scalia's dissent regarding "the only thing lacking" is evidence that Kodak's "restrictive parts policy was . . . generally known." *104 F.3d at 819* (quoting *504 U.S. at 477 n.24*). It agreed with the interpretation of *Kodak* as holding that if

> its policy [of tying service to the availability of replacements parts] was generally known, the Court would have considered Kodak copiers as the tying product and service and parts combined as the product being tied. *See* 10 Phillip E. Areeda, et al., ***ANTITRUST LAW*** P 1740c, at 150 (1996).

104 F.3d at 819. The Sixth Circuit joined the First and Seventh Circuits in limiting the availability of a *Kodak* single brand tying market "to situations in which the seller's policy was not generally **[**71]** known." *Id.* It noted case authority holding that "the material dispute that called for a trial was whether the change in policy enabled Kodak *to* extract supracompetitive prices from customers who had already purchased its machines." *Id.* (citing *Digital Equip. Corp. v. Uniq Digital Techs, Inc., 73 F.3d 756, 763* ***[*484]*** *(7th Cir. 1996))*. The *PSI* panel found that in the facts of *Kodak* it was "the change in policy" by the defendant that was "the crucial factor in the Court's decision."

> By changing its policy after its customers were "locked in," Kodak took advantage of the fact its customers lacked the information to anticipate this change. Therefore, it was *Kodak's own actions that increased its*

---

[37] In *Kodak*, any buyer of the equipment without an extended warranty or a service contract with fixed prices could, on a moment's reflection, realize that the manufacturer had the power to raise replacement parts to above-market prices or condition their availability on purchasing above-market price service from Kodak. The majority, however, did not use this "could have known" information about the risk to bar the potential availability of a narrowed tying market definition.

Assuming our inferences noted above about Justice Blackmun's footnote 24 response to Justice Scalia are correct, then the majority would have denied the narrowed tying market definition if this policy were announced or generally known. The narrowed market definition is not necessarily foreclosed if the risk is "knowable" but not obvious or generally known. The majority may have left this potential availability of a narrowed tying market definition because the general economic assumption is that a manufacturer's concerns about its reputation in the foremarket and its desire for future equipment sales would prevent its aftermarket opportunism. Thus, not only was its change of policy not "obvious," it ordinarily would not be anticipated because of its potential for harm to Kodak's reputation in the equipment market.

[38] The use of "generally known" in *Kodak* and *PSI* suggests that a narrowed tying product market definition would not be available if a sufficient number of reasonable customers knew enough pre-contract to be "sophisticated" and thereby "police" the market in some manner for the less sophisticated. Thus, the unsophisticated customer will not have an antitrust claim using a *Kodak* market definition if competitive forces in the market are maintained through what is known by a sufficient number of sophisticated customers. This situation might be different if the seller can identify the informed/sophisticated customers and discriminate in their favor by lower prices or exclusion from the tying arrangement. Yet, where the market operates with reasonable effectiveness and the informed consumers protect most of the uninformed consumers, any injury incurred by the ignorant, reckless or foolish consumer will have a legal remedy, if at all, in contract, fraud or consumer protection law but not in antitrust.

> *customers' information costs.* In our view, this was the evil condemned by the Court and the reasons for the Court's extensive discussion of information costs. While PSI's argument seems to suggest that *Kodak* supports a finding of market power whenever information costs are present, such a position cannot be reconciled with *Jefferson Parish.*

104 F.3d at 820 (emphasis supplied).

[72]** The Sixth Circuit then noted that plaintiffs in *Jefferson Parish* also argued that information costs should be considered in defining the market as the "single brand" East Jefferson Hospital instead of all the hospitals in the Jefferson Parish area. Yet, the Supreme Court rejected that argument noting that "while these factors may generate 'market power' in some abstract sense, they do not generate the kind of market power that justifies condemnation of tying."

The PSI case interpreted this to mean that:

> Put another way, the Court rejected the premise that imperfect consumer information resulting from basic market imperfections could be used as a basis to infer market power for purposes of the Sherman Act.

Id. at 820.

The Sixth Circuit concluded:

> In light of our reading of *Jefferson Parish* and *Kodak*, we thus hold that an antitrust plaintiff cannot succeed on a Kodak-type theory when the defendant has not changed its policy after locking-in some of its customers, and the defendant has been otherwise forthcoming about its pricing structure and service policies. This rule should encourage manufacturers to divulge all relevant information at the time **[**73]** at sale. While we recognize that some information costs will still exist even with full disclosure by a seller . . . these additional information costs stem from the fact that our economy is not one of perfect information, a factor that alone should not invoke antitrust condemnation. Accepting PSI's argument would expose many manufacturers of durable, expensive equipment to potential antitrust liability for having inherent power over the aftermarkets of their products, a result certainly not intended by *Kodak* and not consistent with *Jefferson Parish.*

Id. at 820 (emphasis supplied). [39]

---

[39] While the Sixth Circuit in *PSI* said that the "evil" that the *Kodak* decision condemned "was Kodak's own actions that increased its customers' information costs" (*104 F.3d at 820*), this is not a complete statement of what *Kodak* seems to condemn. It would be true that "Kodak increased its customers' information costs only if *prior to sale* (1) it had already changed its parts policy but few customers yet knew this, or (2) it had already decided to change its parts policy in the future but chose not to disclose it. In these two situations, "Kodak's own actions," or rather inaction by a choice not to disclose to each potential customer, would have increased the customers' cost of finding out this information. Full disclosure by Kodak would have lowered the information costs. *PSI* noted how Honeywell's disclosures actually "reduce[d] the information costs faced by its customers." *104 F.3d at 821*. What appears to have occurred for many of Kodak's equipment customers is that after they bought Kodak equipment, Kodak took advantage of these customers' sunk costs and switching costs by its post-sale action of changing its parts policy.

The *Kodak* majority opinion seems to leave open an ***antitrust law*** condemnation of this use of market power even if Kodak did not decide to change its parts policy until after the contract and would, therefore, not be subject to any common law claim for misrepresentation by knowing concealment of a material fact. Rather than "Kodak's own actions . . . increasing its customers information costs" (*id.*), Kodak's post-contract action took advantage of many customers switching costs. The *Kodak* majority's discussion of lock-in and switching costs makes it clear that this is what the majority opinion would, on certain facts, condemn. It is also clear in other language of *PSI* that the Sixth Circuit agrees with this. It suggests that "an antitrust plaintiff can[] succeed on a Kodak-type theory when the defendant has . . . changed its policy after locking-in some of its customers." *Id. at 820*. It suggests further that where the seller's policy change was made pre-contract but kept secret, or at least was not "generally known," a *Kodak-type* theory might be available where "the defendant has [not] been otherwise forthcoming about its [change in or plan to change] policies." *Id.*

[74]** These passages make it clear that for a *Kodak* single brand or other narrowed market definition to be available to plaintiffs, **[*485]** only some of the consumers need to have become locked in at a time they lacked certain critical information. Yet, in most situations, that lack of information needs to be something more than the result of general market information deficiencies or market uncertainties that are normally recognized. Thus, even these ignorant consumers who get "locked in" and become exploitable cannot claim a *Kodak*-type tying market if the information that they lacked was "generally known" to others or if their lack of information was not caused or made relevant by some action of the defendant. It can be assumed that the "generally known" language that *PSI* uses three times means information that is available to the "reasonably prudent consumer," because antitrust is not intended to protect the careless or imprudent consumer but to protect competition by considering what the reasonable consumer would know, or could know if it made economic sense to do more research. [40] **[**76]** For antitrust purposes, the reasonable consumer can protect the efficient workings of the market **[**75]** and, to a certain extent, protect the carelessly ignorant and imprudent consumer. If antitrust *per se* tie-in claims were available to every carelessly ignorant consumer who gets "locked in" to some investment, they would become the "all-purpose remedy" for the unweary whenever their damages were significant. [41]

Thus, in light of *PSI,* a *Kodak*-type lock-in definition of market power in the tying product is not available whenever there are information costs upon which a seller passively relies to its benefit. [42] Rather, ***HN12***[] the **[*486]** *Kodak*-type narrowed market definition is available for a *per se* tying claim when:

The information costs that *PSI* notes were discussed and dismissed in *Jefferson Parish* were not ones that the East Jefferson Hospital exploited by some post-lock-in change of policy as apparently occurred in *Kodak.* That is why *PSI* notes that "information costs tied in" from market imperfections "alone should not invoke antitrust condemnation." *Id. at 820*. But, a post-lock-in opportunistic change in policy to exploit these market imperfections could trigger a Kodak-type approach to market power. (This seems to be what occurred in *Virtual Maintenance, Inc. v. Prime Computer, Inc., 11 F.3d 660, 663 (6th Cir. 1993)* *("Virtual II")).* It is also a caveat highlighted in *PSI:*

> If there were any evidence in the record that Honeywell took advantage of its customers' imperfect information in order to reap supra-competitive profits in the aftermarkets for its equipment, we would not hesitate to allow a Kodak-type theory to be submitted to the jury. However, we can find nothing in the record or PSI's brief that alleges that Honeywell engaged in such activity.

104 F.3d at 821.

Thus, *PSI* and *Kodak* seem consistent with Professor Grimes' analysis of the post-*Kodak* scope of ***antitrust law***. Professor Grimes notes that "the proper distinction here is that, as a policy matter, the law should address active intentional behavior that creates new consumer injury even if a similar injury created by a letter's passive reliance on market imperfections is beyond the law." Grimes, *supra,* at 280. See full quote above at footnote 36.

In *Jefferson Parish,* the market imperfections that the Court dismissed for antitrust market power purposes were those that worked to the advantage of all the rival hospitals in the area. Thus, East Jefferson Hospital was a "passive" beneficiary of these market imperfection, and it derived no significant market power for antitrust purposes from these market imperfections that also benefitted its rival hospitals. The Court noted that the one "profit enhancing" factor which resulted from East Jefferson's use of nurse-anesthetists was not related to any market imperfection and was a common practice "utilized in all hospitals in the area." *466 U.S. at 28 n.47*.

[40] The Areeda authors note that "***antitrust law*** does not seek to protect the foolish consumer who can fully protect himself by taking the steps that most similarly situated consumers take (or are presumed to take)." AREEDA, ET AL., P 1735d2, p. 67. "We conclude that any power resulting from consumer failure to use readily available information, as used by most buyers, is not the kind of power that triggers the per se rule." *Id.* at P l735d, p. 69. The Areeda authors suggest that a buyer's indifference or ignorance about market prices or the seller's opportunistic exploitation of an incomplete contract does not constitute "market power unless buyer ignorance was the result of a general 'market failure' making the necessary information too costly for most buyers to obtain efficiently." *Id. at 69, 104*, PP 1735d3 and 1738c.

[41] *Cf. Kodak, 504 U.S. at 503* (Scalia, dissenting).

[42] Other similarly situated sellers could also obtain these benefits flowing from basic market imperfections.

> 1. there are information costs that prevent certain information from being "generally known;" and
> 2. these information costs are sufficiently high that a reasonable consumer would not anticipate (and it would not be cost efficient to invest more in the acquisition of additional information on) the risk of some change of policy post-contract that would expose the consumer to a burdensome tie involving above market pricing; [43] and
>
> 3. after a substantial number of customers have sunk significant costs that are not recoverable and face other switching costs, the seller takes some action changing its policy (or acting on a prior undisclosed policy) that takes advantage of its locked in customers' lack of information in order **[**77]** "to reap supracompetitive profits" by imposing a burdensome tie-in.

While not discussed in *PSI* a *Kodak*-type market may be available even where a significant number of consumers in the pre-contract market may be sophisticated and knowledgeable, but these consumers will not police post-contract exploitation of locked customers either because new sales in the pre-contract market are of lesser financial concern to the seller or the seller can price-discriminate or take other steps to assure the knowledgeable customers they will not be exploited post-contract.

D. Areeda. Hovenkamp and Elhauge on *Kodak:*

1. The *Kodak* Analysis:

Before allowing *Kodak's* "market imperfections" **[**78]** and "lock-in" arguments to be used to define a narrow aftermarket for purposes of defining market power, Professors Areeda, Hovenkamp and Elhauge would require four conditions:

> I. A substantial number of customers must have made brand-specific investments that still have a useful life but that are substantially unrecoverable if they shift to other brands.
> II. A substantial number of those customers must be too ignorant of "lifecycle" prices to protect themselves by judicious interbrand comparisons or by contract before they become locked in . . . . (This ignorance can be caused by the rational consumer who determines that the cost of acquiring relevant information exceeds its benefits).
> III. The knowledgeable customers who can protect themselves must either be unimportant to the defendant or be protected by effective price discrimination from above-market prices paid by the ignorant . . . . [44]
> IV. The . . . resulting ability to exploit the ignorant must be "substantial."

AREEDA, ET AL., at 138, P 1740 (references to paragraph subsections omitted).

[79]** The authors concluded that:

> Courts should not infer substantial market power simply from the information imperfections that are common in the world's numerous product-differentiated markets. The courts should continue to find a lack of power, even at the summary judgment stage, in most cases in which appliances, office and household electronics, and other products with a significant "design" component are sold in a reasonable competitive market in which many purchasers are reasonably well-informed, especially when substantial price discrimination is not feasible.

Id. at 141, P 1740.

This conclusion is consistent with *PSI's* and *Jefferson Parish's* acceptance of certain information costs as well as with the holding of *Kodak,* if the latter ruling is read and limited in light of the procedural posture in which the case was presented. In the absence **[*487]** of much discovery and any evidentiary submissions, the Supreme Court merely rejected Kodak's position that "the Court should accept, as a matter of law [the] 'basic economic reality,' . . .

---

[43] Thus, a consumer pre-contract is deprived of the opportunity to shop around with rivals, seek contract or other protections from the seller, knowingly accept the risk or forego the investment.

[44] Areeda, et al., note that "higher prices . . . do not reflect [market] power when they disfavor the knowledgeable . . . ." *Id. at 138*, P 1740.

that competition in the equipment market necessarily prevents market power in the aftermarket." *Kodak, 504 U.S. at [**80] 470*. "Kodak argues that such a rule would be *per se,* with no opportunity for respondents to rebut the conclusion that market power is lacking in the parts market." *Id. at 466 n. 11*.

The Areeda treatise argues that courts should read *Kodak* merely as rejecting the irrebuttable nature of the presumption from the "basic economic reality" and rather make it a rebuttable presumption. *Kodak, 504 U.S. at 470*. This was the "second best alternative" that Kodak argued and the position asserted by the United States government as *Amicus Curiae.* 504 U.S. at 467 n. 11. ***HN13***[] In the general case, a lack of market power in a competitive pre-market will prevent market power in the derivative aftermarkets. This general economic presumption, if unrebutted, would allow summary judgment for the defendant. Under this rebuttable presumption, "the burden would then shift to the plaintiffs to 'prove ... that there is a specific reason to believe that normal economic reasoning does not apply.'" *Id.* In the *Kodak* case, the defendant offered no evidence at all, whereas the ISO plaintiffs submitted substantial evidence inconsistent with the general economic presumption. As noted above, these **[**81]** included supracompetitive prices for the tied package, price discrimination in favor of the potentially "more knowledgeable" purchasers of the equipment that did their own service and an increase in service prices for Kodak customers, but no evidence that Kodak equipment sales dropped. *504 U.S. at 477, 476* and 472 respectively. Finally, there existed significant information and switching costs which "costs could create a less responsive connection between service and parts prices and equipment sales." *Id. at 473*.

The Areeda authors argue that *Kodak's* majority did no more than determine that in light of this evidence produced by the plaintiffs and the lack of a fully developed record, the plaintiffs for purposes of Rule 56(c) had come forward with sufficient evidence to allow a jury to rebut the presumption that competition in the foremarket will "preclude[] any finding of monopoly power in derivative aftermarkets." *Id. at 466*.

2. *Kodak* and Franchises:

Because consumer choices to buy a product or other item such as a franchise always limit future choices because of a "lock-in," the authors suggest that market power should be determined at the time "the customer **[**82]** became committed to the tying arrangement." AREEDA, ET AL., at 147, P 1740. In considering the franchise situation under *Kodak,* the Areeda treatise notes that in the foremarket a franchisor's trademark generally carries no market power at the outset of the franchise relationship. [45] **[**83]** When the tie-in is established at the beginning of the relationship, making that the relevant time to measure market power, the franchisor has no additional power to induce this tie. [46] AREEDA, **[*488]** ET AL. at 145, P 1740c2. Yet, they note that a franchisee may become "locked

---

[45] In another section, the Areeda authors note:

> We should not presume that fast-food restaurants lie in different markets from all other restaurants or that separate markets should be defined according to menus of hamburgers, chicken, seafood, pizza, and so on. While some courts defined narrow franchise markets, most of the franchise tying cases preceded the Supreme Court's insistence on genuine proof of power.
>
> The standard market definition methodology requires proof that fast-food restaurants or those with particular fare could maximize profits by charging significantly more than the competitive level. Such proof would be rare. If, as seems likely, the pre-fast-food restaurant business was highly -- perhaps even perfectly -- competitive, then fast food must have made its way with better quality (in terms of speed or consistency) or lower prices. Were prices to rise significantly, many patrons would return to nonfranchised fast-food establishments -- diners, coffee shops, "family" restaurants, and the like. Hence we would presume, for example that fast-food pizza franchises are not a market.

AREEDA, ET AL., at 101, P 1737e3 (footnote omitted).

[46] This is clearest when the tying and tied products are purchased simultaneously, but the authors contend "the same can be true for continuing future purchases. For example, suppose that the defendant conditions a permanent trademark license on the franchisee's agreement always to buy consumable supplies . . . from the defendant at prices specified in the original contract," even when these prices exceed market prices. *Id. at 146-47*. The franchisee can compare this premium in payment to the cost that would be necessary to obtain a rival franchise. The fact that the franchisee may later become locked in is irrelevant because he was not yet locked in when he accepted the tie.

in" after investing in realty, training, advertising, and development of goodwill for the franchise product, which sunk costs may not be "wholly or even partially useful for any alternative occupation." *Id. at 146*. Thus, a later threat to withdraw the trademark can acquire coercive force after the franchisee invests substantially and irreversibly in developing the franchise. Nonetheless, courts should presumptively assess the defendant's power at the outset of the relationship in the absence of those special and limited circumstances in which the *Kodak* factors might apply.

Of greater significance is the authors' position that:

> We should also measure power at the outset, even when the original trademark license does not specify the prices for the consumables that the franchisee is obliged to take, though it allows him to terminate the relationship if he objects to future prices. To be sure, the defendant might raise the price of the tied product above (or further above) market **[**84]** prices once a lock-in inhibits walking away from the franchise. Nevertheless, the tie did arise simultaneously with the trademark license, and franchisees knew at the outset that the tie allowed the franchisor to force them to choose between sacrificing nonsalvageable investments and accepting very high prices for the tied product. Moreover, all the justices in the *Kodak* case seemed to agree that a generally known commitment, de facto or by contract, to purchase the second product from the defendant implicates the defendant's power (if any) at the time that commitment was made.

Id. at 147, P 1740 (footnotes omitted).

The authors acknowledge that when the tie is imposed after the franchisee has become locked in, *e.g.* at a renewal period for the franchise license, the

> franchisee's nonsalvageable "switching" costs in abandoning the franchise, if substantial, might induce him to accept a tie . . . that he would have rejected at the outset of the franchise. . . . Measuring the defendant's power at the time this tie was entered makes switching costs relevant. 23
>
> 23 While this franchisee could have initially foreseen that he would become vulnerable to future **[**85]** ties, the cost of obtaining and processing the relevant information could be high. . . .

Id. at 148. [47]

[86]** Areeda, et al. note that there is substantial difference on whether the defendant's policies are generally known before the buyer commits to the product.

> Thus the key difference . . . is the degree of knowledge conveyed by the defendant or his rivals or otherwise reasonably available to the buyer when [the product] is purchased.

Id. at 151. While this portion of the Areeda text deals with a situation involving the sale of machines and repair parts with possible tie-ins for service, the authors make it clear that their analysis would be similar for a **[*489]** franchise situation. [48] When lifecycle pricing is not predictable and a claimant knows that certain goods are only available from the defendant at the time the contract is entered, the buyer

---

[47] The authors later stress that the case for market power being measured after lock-in is particularly strong when there is a change in policy and "if that [new] policy creates a tie. . . ." *Id. at 151 n.37*. The authors also note that in order to show that a lock-in is "substantial," there must be proof of substantial switching costs involving unrecoverable value and that this unrecoverable value in sunk costs exceeds the alleged above-market premium to be paid for the tying and more particular the tied product for the remaining useful life of the primary product or investment. *Id. at 152*. The authors reason that "even if switching costs allow the defendant to extract some premium, it may be too small to constitute the substantial power that ***antitrust law*** usually demands." *Id. at 153*. The authors also point out that a defendant can gain little from trying to exploit "locked in" customers unless they are a substantial group as well as a substantial share of all of defendant's customers unless the defendant can price discriminate in favor of new customers that the defendant wishes to attract.

[48] *See* AREEDA at 155 n.47.

> can protect himself by purchasing elsewhere or by conditioning his purchase from the defendant on such contract guarantees as market prices for [the item] or prices no higher than those charged the defendant's most favored customers.

Id. at 151.

[87]** The author also noted that a defendant's own market situation downstream may put "a ceiling on a locked-in customer's exploitability." If the locked in customer is already selling his or her product at a short-run marginal cost, they cannot pay an above-market price to the seller on an ongoing basis and survive in the market. [49]

With respect to the degree of ignorance in a pre-contract situation that the buyer must have, the authors note:

> All that the buyers need to know when making an initial purchase is that they may be at risk with respect to **[**88]** repair-part pricing or that the seller knows more than they do about the lifecycle price to them. There is no significant market failure unless (a) buyers fail to know that and (b) the relevant uncertainties cannot be made the subject of prior bargaining.

Id. at 154. The authors add that "the knowledge required for this purpose need not be perfect . . ." *Id.* The knowledgeable machine buyer or franchise trademark licensee

> has both the incentive to learn the lifecycle price of that purchase and the ability to learn -- from the market, the defendant, or his own experience -- the future volume and price of supplies and services needed to maintain the machine over its useful life. This knowledgeable customer cannot be exploited via high prices on unique repair parts because he took them into account in comparison with rival brands and their lifecycle prices when he bought the machine.

Id. at 155. [50]

> Knowledge does not eliminate . . . switching costs. Rather, it means that the estimated [future] costs . . . -- including the risk that the defendant may change its . . . policies -- are taken into account at the time of its initial purchase in **[**89]** comparison with rival [opportunities] . . . .
>
> * * *
>
> For such contracts, both theory and all the justices in *Kodak* agree that the defendant's power would be measured in terms of his machine (or trademark) relative to reasonable substitutes at the time of the initial purchase regardless of any subsequent switching costs.
>
> While the knowledgeable customer's estimate will be less precise than an explicit contract specifying lifecycle payments, the perfectly knowledgeable customer recognizes his uncertainty about the future, quantifies the post-lock-in risk of future exploitation and its magnitude, and discounts that quantity to the present when he chooses the defendant's machine in preference to rival machines.

Id. at 155 (footnotes omitted).

---

[49] In the franchise situation, even where the franchisor is no longer selling new franchises and is merely profiting off of royalties and the sales of goods and services to existing franchises, the franchisor has little incentive to put these franchisees at a competitive disadvantage with respect to their competitors and to put them out of business because that will reduce the defendant's profit and possibly put the defendant out of business altogether.

[50] The authors note the rare exception to this is the liquidating defendant who has no need to maintain a reputation to continue foremarket sales, or to maintain the goodwill of existing aftermarket customers, or the individual who has the capacity to price discriminate in favor of the new customers and against the old customers to allow the new customers to protect themselves from post-contract exploitation. Id. at 155 n.48.

[90]** The Areeda authors conclude "very imperfect knowledge suffices to date the tie from the outset of the parties' relationship and to make decisive the defendant's assumed lack of power in the interbrand [foremarket]." *Id. at 157*.

[*490] A buyer knowing an announced or generally understood restrictive policy, or even a buyer who could reasonably anticipate the risk of future policy can compare whether similar risks were faced with alternate competitors in the foremarket, or whether contractual protections would be available in the contract with the seller. Thus, the authors suggest that in order to invoke the *Kodak* narrow market definition for application of the *per se* tie-in rule,

> the plaintiff must prove that they are "ignorant" in the sense that they could not reasonably anticipate later "exploitation" when they bought the machine or entered the dealership or franchise and that they could not reasonably protect themselves in the marketplace by obtaining, say, contract guarantees or warranties from the defendant or his rivals.

Id. at 158. Again the authors suggest that the courts should look to the ignorance of the "reasonable buyer" rather than the particularly **[**91]** foolish buyer. "[A] reasonable buyer standard considers the relative ease and cost of acquiring the necessary information or protection relative to the potential savings." *Id.*

V. ANALYSIS:

A. Facts Known to Franchisees Signing the mid-1990 Franchise Agreement:

The starting point for determining what class plaintiffs knew pre-contract is what was in the mid-1990 Franchise Agreement and Offering Circulars. In section V.A. of this August 1990 Franchise Agreement, the franchise owner acknowledges that LCE owns the "Little Caesar" trade name and affiliated trademarks and service marks. The franchisees "shall use such applicable trademarks, service marks, trade names and copyrights ("Proprietary Marks") only in the manner and to the extent specifically licensed by this Agreement." (Franchise Agreement, Section V.A.)

The franchisee also acknowledges in section V.B. that any goodwill that arises "in the future through the activities of any Licensee of LITTLE CAESAR, inures directly and exclusively to the benefit of LITTLE CAESAR."

In section V.D., the franchisee covenants:

> 4. To use only the recipes, methods and trade secrets developed by LITTLE CAESAR and licensed **[**92]** hereunder in the preparation of pizza and other food items sold or offered for sale to the public by Franchise Owner.
> 5. To feature, sell or offer for sale only such menu items and other products or services as shall first have been approved in writing by LITTLE CAESAR as consistent with the image and quality standards of the LITTLE CAESAR System . . . .
> * * *
>
> 7. To use only paper products including carryout containers which strictly conform to the design and quality specifications of LITTLE CAESAR as to size, quality, quantity, texture, absorbency, strength, and appearance and other characteristics in compliance with section VII of this Agreement as may from time to time be prescribed by LITTLE CAESAR's operating manual. Said containers shall bear various Proprietary Marks of LITTLE CAESAR.

(Emphasis supplied.)

Section VII dealing with "SUPPLIES," notes that except for secret spices and dough mixes which

> shall be purchased only from LITTLE CAESAR or its designated distributor, Franchise Owner may purchase foods, ingredients, and other supplies, including paper goods as approved by LITTLE CAESAR from any source of its choosing, provided that said **[**93]** source has been previously approved as a supplier by LITTLE CAESAR in accordance with its standard practice and the food, ingredients and supplies adhere to LITTLE CAESAR's specifications and quality standards. *With the exception of suppliers of signage and other products*

> *bearing the LITTLE CAESAR name and Proprietary Marks,* Franchise Owner may request that LITTLE CAESAR place a supplier on LITTLE CAESAR's approved supplier list. LITTLE CAESAR shall not deny approval of **[*491]** any item which complies in all material respects with LITTLE CAESAR's specifications. The cost of any testing of said items by LITTLE CAESAR shall be borne solely by Franchise owner.

(Emphasis supplied to note the exclusion of logoed goods.)

The Offering Circular adds:

> LITTLE CAESAR does not require the Franchisee to purchase or lease any goods, services or supplies from a specified source, with two exceptions.
>
> The formula for the LITTLE CAESAR spice mix and the Pan! Pan! Pizza dough mix are trade secrets that LITTLE CAESAR will not disclose to the Franchisee.
>
> * * *
>
> OBLIGATIONS OF FRANCHISEE TO PURCHASE OR LEASE IN ACCORDANCE WITH SPECIFICATIONS OR FROM APPROVED SUPPLIERS
>
> It is important to **[**94]** LITTLE CAESAR that, to the greatest extent possible, there be uniformity throughout the LITTLE CAESAR franchise system with respect to format, methods of operation, and food preparation, taste, texture and quality of the products sold to the public.
>
> * * *
>
> In connection with these products, LITTLE CAESAR has specific standards of quality and product identity which apply to the principal ingredients of all pizza and other products used and sold in the LITTLE CAESAR franchise system. As to food products, these standards and specifications apply to flour, oil, sauce, cheese and other products associated with the various items that the public likes to have put on its pizzas. . . .
>
> * * *
>
> As in the case of food products, paper goods come in varying quality ranges, some of which are less suitable for LITTLE CAESAR Restaurants than others, and many of which bear LITTLE CAESAR proprietary marks or symbols specifically imprinted thereon for use in LITTLE CAESAR establishments. There are, therefore, also grade or quality standards for these non-food products.
>
> These food and non-food product specifications are maintained at LITTLE CAESAR's principal office and are available on request for **[**95]** examination. The Franchisee is required (Franchise Agreement, Section VII.) to use only those products which comply with these food and non-food standards and specifications in the operation of the franchise.
>
> * * *
>
> Except in the case of LITTLE CAESAR trade secret spice mix and dough blend mix referred to in the immediately preceding section of this Offering Circular, the Franchisee is free to purchase its supplies and equipment for use in the franchised business from any source of the Franchisee's choosing, provided that the Franchisee can demonstrate that the supplies and equipment conform to the specifications pertaining to them in each instance. The demonstration of compliance with LITTLE CAESAR specifications and standards will be by laboratory analysis and, since it is the responsibility of the Franchise to demonstrate compliance with such standards and specifications, all costs associated therewith shall be paid by the Franchisee. Where a Franchisee has successfully demonstrated that a product conforms to LITTLE CAESAR product and ingredient standards, that product and supplier shall be kept on an approved list by LITTLE CAESAR, which list shall be available for inspection **[**96]** on demand. . . .
>
> * * *
>
> Blue Line Distributing, Inc., a wholly-owned subsidiary of LITTLE CAESAR, to whom LITTLE CAESAR has granted an exclusive license to contract for the manufacture and distribution of certain supplies, derives substantial income from the sale of supplies to Franchisees as well as to LITTLE CAESAR-owned Restaurants. The audited financial statements of Blue Line Distributing, Inc. are consolidated with the audited financial statements of LITTLE CAESAR for the years ended December **[*492]** 31, 1986, 1987, and 1988 which are

> included in the financial information section of this Offering Circular. The profit earned by Blue Line Distributing, Inc. does benefit LITTLE CAESAR.

The 1995 Franchise Agreement has removed the restriction on the right of a franchisee to seek an alternative supplier of logoed goods that existed in section VIII of the mid-1990 Franchise Agreement. The Offering Circular listed the names, addresses and phone numbers of over 500 Little Caesar franchisees owning in excess of 1,500 carry-out outlets in 1989. The December 31, 1988, financial statements show LCE's earnings included $ 225 Million from its food service sales compared to $ 30 Million in royalties **[**97]** and franchise fees. The Offering Circular also disclosed that LCE owned 520 additional carryout outlets.

B. Other Facts Relevant to *Kodak* Lock-in Market:

In the Report on class certification that was adopted by this Court, it was noted that:

> LCE in June 1989 entered into a licensing agreement that gave Blue Line the exclusive right to distribute logoed products to franchisees . . . those items that bear the Little Caesar registered mark, such as items on logoed paper products (bags, cups, napkins), packaging, and condiments such as salad dressing . . . .

172 F.R.D. at 240.

In August 1990, LCE began using the form Franchise Agreement noted above. The earlier decision noted:

> The mid-1990 Franchise Agreement makes it clear that the franchisee can purchase logoed goods from an alternate source if one is approved other than Blue Line. If no other distributor of logoed goods is approved, however, the franchisee cannot ask that an alternate distributor of these goods be approved.

Id. at 243.

> This contract expressly prohibits the franchisees from requesting an alternate supplier of logoed paper products in a market in which Blue Line was **[**98]** at the time the sole distributor of such products.
>
> While the Little Caesar/Blue Line exclusive license agreement was not known to the parties at the time, its consequences were apparent in the marketplace at least to the extent that no other entities had produced or attempted to distribute logoed paper products to Little Caesar franchisees.

Id. at 260. [51] **[**99]**

---

[51] In reviewing a submission from defendants' January 31, 1995, Second Supplemental Brief Opposing Class Certification (which dealt with plaintiffs' initial class certification for pre- and post-mid-1990 franchisees), Exhibit 2 shows that as of August 1990 Blue Line had opened warehouses and began acting as a distributor in 10 of the current 16 regions. The other regions were served by LCE approved associate distributors. Four of the six distribution warehouses Blue Line opened between August 1990 and December 1992, when it opened its final warehouse, were more conveniently located warehouses for Little Caesar franchise units already being serviced by Blue Line from more distant warehouses. Yet, two of the warehouses opened after August 1990 (Stockton, California in September 1991 and Fife, Washington in July 1992) did begin servicing 243 franchise units who before then bought from associate distributors Leprino Foods and Food Service of America, respectively. Also, in November 1990, Blue Line began servicing 107 franchise units in the Kansas City area from its Dallas warehouse, whereas before then these units bought supplies from associate distributor Pegler Sysco. There is no evidence in the record of how many owners of these 350 units signed a mid-1990 Franchise Agreement at a time prior to Blue Line becoming the sole distributor in their area. Those class members who did sign the mid-1990 Franchise Agreement at a time they were still being serviced by an associate distributor are hereinafter referred to for purposes of identification as the "Associate Distributor Class Members." Plaintiffs' experts in their December 1996 declaration indicate there were 2,440 independent Little Caesar franchisees as of September 1993. By the fall of 1992, nearly all regions of the country were being served by Blue Line. Thus, it is likely that the substantial majority of Little Caesar franchisees signing the mid-1990 Franchise Agreement did so at a time when Blue Line was the sole distributor in their region. The associate distributor franchisees who signed the mid-1990 Franchise Agreement at a time that an Associate Distributor operated in their region are in the certified class. Yet, much of my analysis in this Report of what was "generally known" pre-contract -- which is necessary to do a *Kodak-PSI* determination of how the tying market is defined -- will not apply to these Associate Distributor Class Members. They will be considered separately.

> Thus, franchisees with a mid-1990 franchise agreement who chose to continue **[*493]** purchasing product A (continuing as a Little Caesar franchisee) knew they were required to continue buying paper products from Blue Line and could not seek an alternate supplier of such goods.

Id. at 259. [52]

> In the present case, the buyer's state of mind of proposed class members knew there were no competitors offering logoed goods or other supplies needed to operate a franchise. The reasonable franchisee with the post-mid-1990 Franchise Agreement also knew (even Gary Smith reasonably must have known) that he had contractually given up the right to seek an alternate supplier of logoed goods. All of this was because of defendants' intended acts.

Id. at 265. [53]

[100]** The earlier Report notes evidence that would support a finding that LCE's 1989 Exclusive Licensing Agreement and its mid-1990 modification of its Franchise Agreement were part of a plan to use LCE's proprietary rights and its trademark and copyright protections over logoed goods to improve its competitive position against other potential distributors once Blue Line entered a regional market.

> [In a] September 22, 1988, memorandum from Deal to Ilitch dealing with Blue Line's expansion into the southeast United States where it would compete with the existing distributor, PYA Monarch, Deal noted that the approach used in the past of merely disapproving the competitive distributor would not work because PYA had been doing a credible job in the southeast at the time. It appears another competitor, Sysco, would be disapproved. In dealing with the franchisees, the tone of the announcement was to state an expectation that the franchisees would swing over to Blue Line or "in the PYA area, we are going to fight them (albeit with a stacked deck)," apparently referring to the exclusive access to logoed products that Blue Line would have. Plaintiffs' Exh. 8 at p. 1.

Id. at 260. **[**101]** Lockridge August 31, 1995, Declaration, Ex. 8, Docket # 195, filed September 1, 1995, in support of Second Motion for Class Certification (hereinafter "Lockridge August 1995 Declaration").

In an internal memo of March 27, 1989, from David Deal to LCE Board Member Jay Bielfield, he notes his work with the Director of LCE's Legal Department:

> As you are aware, Gil Simon and I have been working on a number of issues to more effectively posture Blue Line vis-a-vis its competition, for example, we are proposing an agreement with Little Caesar whereby Blue Line becomes the exclusive distributor of all trademarked items.

Perry April 1, 1997, Declaration, Ex. 3 at p. 2, Docket # 257, filed April 1997, in support of Plaintiffs' Second Supplemental Brief in Opposition to Defendants' Motion for Partial Summary Judgment (hereinafter "Perry April 1997 Declaration"). This memo also notes that it was Blue Line that was principally involved in approving alternative distributors. [54] Mr. Deal acknowledged that the 1990 Franchise Agreement was changed "because we wanted to

---

[52] Again, for the Associate Distributor Class Members, as noted in footnote 52 above, this would not be apparent to them because they were buying their logoed and other goods from an associate distributor, not Blue Line, when they signed the mid-1990 Franchise Agreement.

[53] As noted in the earlier Report, the critical question for antitrust purposes is whether these "intended acts" "were legal competitive behaviors" or "impermissible restraints on the market choice of consumers or on alternate potential distributors' ability to enter the market and compete with Blue Line" and ". . . whether the actions of defendants impermissibly dissuaded potential alternate distributors from entering the market or from competing as effectively with Blue Line …." ***Id. at 265-66***. These questions were reserved in the class certification motion. "While plaintiffs may ultimately fail to prove defendants' actions were illegal, or fail to prove any effect on prices, or fail to prove the tie-in of logoed products leveraged a larger tie-in, all of these are merit questions that should not affect the class certification question." ***Id. at 266***.

[54] "Approved Distributors and Approved suppliers: While we are moving toward Little Caesar involvement in approving distributors through the Franchise Option Committee, this remains principally as a Blue Line function." *Id.*

conform the Franchise **[*494]** Agreement to the business intent we had to control distribution of our trademarked goods." **[**102]** Lockridge July 28, 1997, Declaration, Ex. 1, Docket # 265, filed July 29, 1997, in support of Plaintiffs' Motion Pursuant to *Fed. R. Civ. P. 54(b)* to Amend the August 7, 1995 Order Granting Partial Summary Judgment on the Tying Claim of Plaintiffs Hennessy and Fields (hereinafter "Lockridge July 1997 Declaration"); Deal November 30, 1994, Deposition at 186; Lockridge August 1995 Declaration, Ex. 14.

In a November 12, 1991, memo from David Deal to David Kushner, he notes:

> The original intent of the agreement was to provide an exclusive arrangement for Blue Line to distribute paper products and other supplies to Little Caesar restaurants so that Little Caesar would be able to exclude third parties from these offerings. It was not contemplated at that time to put in place an even **[**103]** broader agreement to involve products that do not ultimately find their way to the customer, such as uniforms, signage, etc.
>
> Plaintiff's Exh. 21.

172 F.R.D. at 261. Lockridge August 1995 Declaration, Ex. 21.

When Blue Line entered the Atlanta area in early 1989, the associate distributor PYA Monarch did not stop competing as apparently occurred with associate distributors in other areas.

> Little Caesar withdrew the rights to distribute logoed paper products from at least one of the prior competing distributors, PYA Monarch, and . . . this was known to be a strategic business tactic that made it more difficult for competing distributors to compete with Blue Line and satisfy the franchise preferences for one-stop shopping.

172 F.R.D. at 260. Mr. Deal wrote Michael Ilitch on January 9, 1989:

> Atlanta construction is on schedule and we continue to hold to our February 1st date. A decision will be made by week's end whether this date is final so we can notify franchisees in the area and cut PYA off from our proprietary products and national contracts.
>
> In retaliation, PYA/Schloss & Kahn continues to prospect our Florida franchisees. Bob Brewer (Tallahassee) **[**104]** has moved three stores and effective today, John Kronberg is moving 11 Orlando stores to PYA. In both cases we have notified the distributor that this behavior is unauthorized and could cause them loss of approved status. While these losses are unsettling, it still remains to be seen whether PYA will be competitive once they are denied access to our contracts and proprietary/trade-marked products.

Deal December 2, 1994, Dep. Ex. 275; Lockridge August 1995 Declaration, Ex. 10.

On January 17, 1989, Mr. Deal again wrote Mr. Ilitch, noting:

> The Atlanta warehouse opening date has been finalized as February 8th. A letter of announcement has gone out to our franchisees and Matt, Rod Bathurst (our warehouse manager) and I will be making sales solicitation calls over the next few weeks.
> In addition, it is our intent to proceed with the program we discussed in Ft. Lauderdale whereby our approved suppliers are advised that PYA may no longer purchase product under our national contracts and they will also be denied access to our super-proprietary items of square dough mix, spice mix and logoed packaging.
> We will also deny them access to our sauce due to very tight supplies.
>
> This **[**105]** approach, which will require those franchisees to place twice weekly food orders in the event they choose not to give us all of the business, is bound to generate some degree of resentment among certain franchisees. Over time, however, I believe that they will not begrudge us our right to totally control distribution of our proprietary items and this move will put us in the best possible competitive situation.

Deal Dep. Ex. 274; Lockridge August 1995 Declaration, Ex. 9.

This strategy had been planned since the prior fall. In a September 22, 1988, memo, Mr. Deal wrote Mr. Ilitch about a planned meeting with their franchisees in Ft. Lauderdale:

> **[*495]** I do not expect PYA to go quietly. They will battle us for the business. To maximize our penetration with the franchisees I am suggesting the following approach:
> 1. Phone call from me to the top eight to ten franchisees prior to the regional meetings advising them of Blue Line warehouse announcement to be made at the meeting.
> [Handwritten] Tone of the announcement to franchisees -
> - Say nothing unless asked about PYA still approved & Sysco not.
>
> - Expectation that they will all swing over or, in the PYA area **[**106]** we are going to fight them (albeit with a stacked deck)?

Deal Dep. Ex. 273; Lockridge August 1995 Declaration, Ex. 8.

At his deposition, when asked to explain what he meant when he said he was going to fight PYA Monarch "albeit with a stacked deck," Mr. Deal admitted: "That we were going to leverage every business advantage we had seen." *Id. at 400*. He later noted that the competitive strategy intended "Pushing our business advantages within the limit of the law." *Id. at 404*. He noted that one of those advantages was the fact that Blue Line had exclusive access to logoed items. *172 F.R.D. at 261*; Lockridge August 1995 Declaration, Ex. 14.

At his deposition, David Deal also acknowledged that PYA Monarch was denied access to logoed goods so that Little Caesar franchisees remaining with them would have to take two deliveries, one for logoed goods from Blue Line and one for other items from PYA Monarch. Lockridge July 1997 Declaration, Ex. 1, Deal December 1994 Deposition at 408. Blue Line was "leveraging" its exclusive right to distribute logoed products to develop a competitive edge. *Id. at 76, 378, 388-89, 400, 404*.

While the PYA Monarch early 1989 situation was **[**107]** prior to the limitations period for this class litigation, [55] plaintiffs have submitted other evidence which they contend is relevant to LCE attempting to extend its leverage over logoed goods against potential rival distributors in order to maintain its tie over the entire "market basket" of goods franchisees need to continue as a Little Caesar franchise.

At the time **[**108]** LCE was granting Blue Line the exclusive license, LCE wrote its suppliers to explain the new system. John Lay, LCE's Vice President for Franchise Operations, wrote Bill Koch of Henri's Food Products on May 16, 1989:

> Little Caesar Enterprises, Inc. has granted the exclusive license to Blue Line Distributing, Inc. to allow Blue Line to contract with third parties for the manufacture and production of certain supplies and paper products which utilize the Little Caesars proprietary trademarks. These items include, but are not limited to, carry out bags, wrappers, dishes, napkins, cups and boxes, salad containers, dressings and all Little Caesar logoed products.
> Blue Line will be the sole entity to enter into any agreements with third party manufacturers to produce and distribute Little Caesar logoed products as outlined on attachment A.
> Blue Line will be responsible for purchasing these Little Caesar logoed products for sale and distribution through Blue Line Distributing centers and for direct shipments to authorized Blue Line Associate Distributors.
>
> Effective May 17, 1989, Blue Line will accept orders from Authorized Associate Distributors and place shipment orders **[**109]** with you, the manufacturer, for direct shipment to the designated Authorized Associate Distributor's distribution center. No manufacturer of logoed products should accept shipment requests or purchase orders **[*496]** direct from any Associate Distributor or anyone else.
> Blue Line will purchase the product, give shipping directions, and will pay the manufacturer or supplier invoice for merchandise shipped against the Blue Line purchase orders.

---

[55] PYA Monarch and Schloss & Kahn stopped competing in the Atlanta area in 1989, and no class claims regarding the mid-1990 Franchise Agreement effecting a tie-in directly involve these former Atlanta associate distributors. These LCE/Blue Line involvements with PYA Monarch are relevant to LCE's motive concerning its more recent action. It might also be relevant if plaintiffs could prove that these events, coupled with other LCE acts with the statute of limitations period, contributed to alternate distributors not seeking to enter the market and competing with Blue Line after class members were locked in to their mid-1990 Franchise Agreements.

> * * *
>
> The cost and pricing of merchandise should NOT appear on any document provided to the Associate Distributors. All costs and pricing will be displayed on correspondence forwarded to Blue Line only.

Lockridge June 9, 1994, Declaration, Ex. F, Docket # 30, filed June 13, 1994, in support of Plaintiffs' First Class Certification Motion. An attachment clearly identified the "LOGOED/TRADEMARKED ITEMS" subject to the exclusive Blue Line license. [56]

[110]** Plaintiffs submit a June 15, 1990, memo from David Deal to all LCE approved suppliers of food and packaging notifying them that Blue Line will begin servicing its Salt Lake City area outlets from its existing Denver warehouse, and that the existing Salt Lake City area Associate Distributor, Nicholas & Company, Inc. could no longer purchase under the existing supply contracts nor purchase logoed goods:

> From that time, Nicholas must negotiate their own contracts with your company for food and paper products. Nicholas will no longer be authorized to purchase any Little Caesar product under a Blue Line Distributing negotiated contract.
>
> Little Caesar logoed and/or proprietary products CAN NOT be sold to Nicholas by a Little Caesar supplier. All suppliers of Little Caesar logoed and/or proprietary products should call Bob Ames if any orders are placed by Nicholas for shipment beyond June 18, 1990.

Defendants' January 30, 1995, Addendum, Ex. 18 at p. 1, Docket # 127, filed January 31, 1995, in support of Defendants' Second Supplemental Brief Opposing Class Certification (hereinafter "Defendants' January 1995 Addendum").

A June 22, memo from a Jon McClain, apparently **[**111]** with one of the LCE meat suppliers, approved a final ham order to Nicholas on June 29, 1990, and added:

56

> Slice!Slice! Folding Carton
>
> Single Slice Folding Carton
>
> Bread and Bonus Bread Bags
>
> 8, 12, 20 # Printed Bags
>
> Baby Pan!Pan!
>
> Single Bags
>
> Double Bags
>
> All Miscellaneous Logoed Bags
>
> Salad Convenience Packs
>
> Salad Containers
>
> Little Caesar Dressings
>
> Cold and Hot Cups and Lids
>
> Crazy Sauce Cups and Lids
>
> Napkins
>
> Straws
>
> Cup Carriers

This Court has earlier noted that the scope of the exclusive licensing agreement applies only to these typed of logoed goods and not to the meats, cheeses, and other supplies on which wholesale packaging the manufacturer or suppliers may stamp a LCE logo to identify them as being LCE specification products.

> EFFECTIVE JULY 16, 1990 BLUE LINE DISTRIBUTING WILL BEGIN SERVICING ALL LITTLE CAESAR'S UNITS CURRENTLY SERVICED BY NICHOLAS, INC. OF SALT LAKE. NICHOLAS WILL NO LONGER BE AUTHORIZED TO PURCHASE ANY LITTLE CAESAR'S PRODUCTS....

Id. at Ex. 18, p. 2.

Later in 1990, when Blue Line began servicing the Kansas City area franchisees out of its existing Dallas warehouse, David Deal on November 20, 1990, sent LCE approved suppliers a similar memorandum regarding Associate Distributor Pegler Sysco.

> Effective November 26, 1990 Blue Line Distributing will begin servicing all Little Caesar units currently serviced by Pegler Sysco.
>
> From that time, Pegler must negotiate their own contracts with your company for food and paper products. Pegler will no longer be authorized to purchase any Little Caesar product under a Blue Line Distributing negotiated contract.

Id. at Ex. 18 p. 3.

Supplier Tony Alonso on November 23, 1990, forwarded the November 20 Deal **[*497]** memo and notified Jon McClain and David McConnell:

> As you can see by the attached memo from **[**112]** Blue Line, effective immediately Blue Line will be servicing all of the Little Caesars units that are currently serviced by Pegler Sysco in Omaha. For this reason, we are no longer authorized to ship Pegler Sysco any authorized Little Caesars product.
>
> By copy of this letter, Jon should delete anyone receiving Little Caesars pricing by teletype, or other means, in the Omaha area. If Pegler continues to request ham, pepperoni, or any other product, let's make sure that Blue Line has been communicated of their request and positively, under no circumstance, are we to sell Pegler Sysco at the same pricing as Blue Line.

Lockridge December 23, 1996, Declaration, Ex. 3, Docket # 249, filed December 27, 1996, in support of Plaintiffs' Brief in Opposition to Defendants' Motion for Partial Summary Judgment (hereinafter "Lockridge December 1996 Declaration").

A June 12, 1991, form letter from David Deal to the producers of its logoed goods explained that only Blue Line can authorize manufacturing and/or distributing of logoed materials:

> This is just a reminder that our franchisees do not have similar authority. In fact, if one of our franchisees contacts you directly asking **[**113]** you to produce items bearing LCE's proprietary marks, we are asking you to decline their request and contact the appropriate purchasing personnel as soon as possible.

Perry April 1997 Declaration, Ex. 4.

To follow up on a July 3, 1991, telephone call to Kathy Campbell of LCE's Associate Distributor Leprino Foods in California, Matt Ilitch wrote her an official letter informing her that Blue Line would begin distribution operations in California and Nevada from a warehouse in Stockton, California, by mid-September 1991. He added:

> Please know that Leprino Foods did not fail as our associate distributor. Rather, it is part of the Little Caesar master plan to control distribution of Little Caesar brand products through its Blue Line distribution division. In fact, of all of our past and present associate distributors, Leprino Foods' reputation is at the top.

Lockridge August 1995, Declaration, Ex. 7. He concluded that Blue Line would purchase unsold LCE specification inventory from Leprino Foods when Blue Line began operations in California unless "Leprino decides to retain the Little Caesar business."

In a November 26, 1991, internal memo to Al Thompson regarding **[**114]** franchisee Chuck Walls' request for an alternate distributor in the Madison, Wisconsin, area, Matt Ilitch notes:

> There is no formal approval process for outside food and paper distributors when there is an existing Blue Line distribution center in a market area.
>
> If a distributor, however, wants to compete with Blue Line they would be on their own to negotiate their pricing program. To get competitive pricing from our vendors they would have to meet minimums which I don't think

> the Chuck Walls stores would satisfy. In any event, Blue Line will not reveal to any distributor, information about Little Caesar products and how to get them without first establishing that Blue Line has not fulfilled both pricing and service obligations.

Lockridge December 1996 Declaration, Ex. 4.

Many of the submissions plaintiffs assert are relevant to the present motion are LCE's actions in response to plaintiff, and class representative, Gary Smith's 1992 failed effort to have LCE approve AmeriServ as an alternate distributor out of its Atlanta facility. Gary Smith operates three Little Caesar outlets in the Jacksonville, Florida, area. *895 F. Supp. at 887*.

On April 9, 1992, Gary **[**115]** Smith wrote certain LCE approved suppliers on A.L.C.F., Inc. letterhead:

> On behalf of A.L.C.F., Inc., (An Association for the Little Caesars Franchises), I hereby authorize the AmeriServ Food Company to obtain pricing for all Little Caesars propriety [sic] products into their Atlanta, Georgia and Charlotte, North Carolina facilities.

[*498] Defendants' January 30, 1995, Addendum, Ex. 15, p. 3.

> An internal memo from Mr. Deal to Mr. Ilitch on April 20, 1992, states:
>
> It now seems clear that AmeriServ is going to attempt, with Association support, to make a competitive play for our franchise business. Therefore I want to lay out my recommended strategy for addressing this challenge. Simply put, this strategy is grounded on the one hand in pushing our legal advantages to the limit while, on the other hand, upgrading our service commitment and adopting a more aggressive pricing approach. Key elements of this plan would include:
>
> 1. A hard-line position with supplier and ALCF that no information can be provided to AmeriServ until they have signed a confidentiality agreement and passed a first blush inspection. This will force AmeriServ to "come in through the front **[**116]** door."
>
> 2. Notification to all suppliers that AmeriServ will not have access to our national contracts.
>
> * * *
>
> The result of these elements will be to put us in the best competitive position and also require the stores to take two deliveries per week - one from us and one from AmeriServ. I am hopeful, that, over time, they will see that this inconvenience is not giving them any significant benefit. This was a fairly significant factor in our ability to wear down those stores that initially wanted to continue with PYA Monarch several years ago.
>
> * * *
>
> We must move to modestly reduce our margins on items we will be competing on. At this time, it is difficult to really know how good our pricing is. However, I do think it is high enough that we can be undercut [hand written insert] and AmeriServ still operate profitably. [end of insert] A percent or two we could respond to, but if they get really aggressive we run the risk of losing the credibility we have worked so hard to regain. To minimize the risk of this, I think we need to gradually move our margins down over the next two to three months, particularly in the southeast. Pricing would be adjusted on the high visibility **[**117]** items such as cheese, meats, boards and flour. Phasing this in over several months will reduce its visibility. I am suggesting price reductions which would lower our margin by 1.0 to 1.25 percentage points out of the Atlanta, Orlando and Greensboro, with reductions of about one-half that amount in other centers. This will probably not be enough to face down a competitive onslaught, but will reduce the attractiveness of our business and keep us within the credibility range.

Lockridge August 1995 Declaration at Ex. 11.

In response to Gary Smith's April 22, 1992, letter written as President of Smith Family Foods, Inc. requesting a list of approved suppliers, David Deal wrote on May 7, 1992, that the approved supplier list was sent to all Little Caesar franchisees in March 1990, and had not been updated since then. In reference to Smith's assertion concerning logoed goods, David Deal stated:

> In your April 22nd letter, you refer to the Franchise Agreement and state that you have the right to purchase supplies, including paper goods, from any source of your choosing, provided that source has been previously

> approved by Little Caesar as a supplier. Please note that Section **[**118]** VII of your Franchise Agreement reads, in part that:
>
> > "With the exception of suppliers of. . . products bearing LITTLE CAESAR name and Proprietary Marks, Franchise Owner may request that LITTLE CAESAR place a supplier on LITTLE CAESAR'S approved supplier list."
>
> Please be advised that Blue Line is the sole approved supplier of paper products containing the Little Caesar name or proprietary marks. It is my understanding that under the Franchise Agreement you do not have the right to request that any other suppliers be approved for those products.

[*499] Alterman September 29, 1995, Declaration, Ex. 4, Docket # 204, filed October 2, 1995, in support of Defendants' Response to Plaintiffs' Second Motion for Class Certification.

On May 14, 1992, David Deal for LCE responded to an April 21, 1992, letter and telephone contact from William Burgess, President and CEO of AmeriServ Food Company.

> In connection with your effort to obtain price quotes from approved suppliers, we have the following policy. Our specifications are proprietary and confidential, as is the price that Blue Line pays to the suppliers. We have reminded suppliers that they are not authorized to give out **[**119]** this information. We have no position as to you discussing potential prices with approved suppliers that they would charge to you if you were an approved distributor. Such discussions are presumably part of your source review. Please note, however, that logoed items, Pan!Pan! Dough Mix and our Spice Blend must be purchased from Blue Line.

Defendants' January 1995 Addendum, Ex. 15, p. 4.

Written notes of a David Deal oral presentation to a meeting of LCE approved suppliers responding to AmeriServ's and Gary Smith's inquiries state:

> I know that many of our food suppliers have received inquiries from Gary Smith and AmeriServ concerning our products as they attempt to develop alternative distribution to Blue Line. Our position on this is the same as it has been for years when it comes to distribution of our products. I outlined this for all food and packaging suppliers in a letter last month but I want to take this opportunity to restate it:
>
> 1. At this time, AmeriServ is not an authorized distributor for Little Caesars.
>
> 2. We expect all of you to respect the confidentiality agreements you have signed with us that preclude you from releasing pricing on our contracts, **[**120]** product specifications or details on upcoming promotions to anyone other than our approved distributors, and that means franchisees as well.
>
> 3. The contracts that we have negotiated with you are ours exclusively and cannot be drawn against by any other approved distributor or franchisee without our specific approval.
>
> I am not aware of any supplier who has indicated they have a problem in following our direction on these few points. I have also been advised that many of you have been solicited to quote on generic, house-branded products or near-specification substitutions. Whether you choose to quote on these types of products is again up to you. However, I want to remind all of you that we take our specifications very seriously. I have had a conversation with most of you, at one time or another, where you have told me that we use some of the highest quality ingredients in the industry and that if we were willing to compromise here we could lower our costs. Unlike our competition, we have steadfastly ignored this siren's call and we firmly believe it is one of the reasons for our success. So you can quote what you want on generic or house-branded products but we are not going **[**121]** to allow our system to deviate from the quality standards we have adhered to for the last 30 years. None of you should use the knowledge of our specifications to undermine the quality of our products.
>
> However, there appears to be some confusion on whether you can quote prices to AmeriServ on Little Caesar products. The decision to quote is up to you. However, if you supply us with logoed items, Pan!Pan! Dough Mix, or any element of our secret Spice Blend, then you cannot quote prices because these must be purchased from Blue Line. Moreover, no products can be sold to AmeriServ at this time because they are not an authorized distributor.

Perry April 1997 Declaration, Ex. 4.

While plaintiffs have not submitted the May 8, 1992, letter of class representative Gary Smith (apparently written of A.L.C.F. letterhead), they do provide by cover letter of November 7, 1997, the June 5, 1992, response from LCE's Vice Chairman Charles Jones to Gary Smith as President of "SMITH FAMILY FOODS, INC.":

> **[*500]** This is in response to your letter of May 8, 1992. I note that your letter was written on ALCF stationary. I have, however, assumed that you were writing that letter in your capacity **[**122]** as a Little Caesar franchisee. Therefore, this responsive letter is written to you in your capacity as a franchisee and not in any capacity you may hold with ALCF.
>
> * * *
>
> With regard to your request that a letter be sent to all approved Little Caesar suppliers regarding AmeriServ, I must, unfortunately, inform you that Little Caesar cannot accommodate such request. AmeriServ is not currently approved as a distributor by Little Caesar. In the event AmeriServ is approved as a Little Caesar distributor at some future date, you can re-raise this request.

Bates # 00371, September 2, 1994, Deposition Ex. 109.

> In an internal memo of September 23, 1992, from Mr. Deal to Mr. Ilitch, he notes:
>
> A supplier has just contacted us indicating he received the attached letter from AmeriServ. The letter indicates they may have support from franchisees representing 50-60 units and want quotes on generic products that meet our spec. I believe this is a response to Smith's recent newsletter.
>
> * * *

I feel support is coming from units that would be serviced out of AmeriServ's Atlanta facility which MIGHT include the following franchisees[.] Mr. Deal then lists Gary Smith, **[**123]** non-class plaintiff Sharon Fields, and fifteen other franchisees who together operated 111 Little Caesar units. Lockridge July 1997 Declaration.

On December 28, 1992, Marketing Vice President Jere Lehr of AmeriServ wrote Gary Smith as President of A.L.C.F., outlining an AmeriServ presentation to be given to Little Caesar franchisees at the upcoming A.L.C.F. convention. Siwek and Nelson August 4, 1994, Declaration, Docket # 59, filed August 4, 1994, in support of Plaintiffs' Motion for Class Certification.

A January 21, 1993, internal AmeriServ memo from Marketing Vice President Lehr noted:

> Attached is the final version of the presentation that was made to the A.L.C.F. group. The program is very exciting to the franchisees, but until someone in the organization take[s] a stand for their contract rights against the corporation, we will not be able to purchase/stock logo products. Without the logo products, it will be very difficult to make a successful program.
>
> The A.L.C.F. attorneys were present and discussed options with the franchisees, but at this time they did not agree on a plan for proceeding. It is going to continue to be a slow process!

Turnbull October **[**124]** 16, 1995, Declaration, Ex. 19, Docket # 206, filed October 16, 1995, in support of Plaintiffs' Reply to Defendants' Response to Plaintiffs' Second Motion for Class Certification (hereinafter referred to as "Turnbull October 1995 Declaration").

As noted in the earlier Report:

> William Burgess of AmeriServ, in his Declaration of August 3, 1994, noted that:
>
> Without the ability to distribute logoed products as part of the full-line distribution program, it is not economically possible to compete [with Blue Line] because the food items are traditionally sold on very low margins and to achieve an economic blended profit margin, it is necessary to be able to also sell the higher profit paper and packaging.
>
> Lockridge Exh., Burgess Declaration at P 17.

172 F.R.D. at 262. Lockridge August 1995 Declaration, Ex. 2.

C. <u>Testimony of Plaintiffs' Experts:</u>

Plaintiffs' economic experts, Stephen Siwek and Philip Nelson, Ph.D., have provided four declarations relevant to this lawsuit.

Plaintiffs' experts define the "tying product" in the present case as the right to continue operation as a Little Caesar franchise. Siwek and Nelson August 1994 Declaration at 11, P38. They **[**125]** define the "tied product" as "the purchase of food and nonfood **[*501]** supplies, including at least paper and other logoed products, from Blue Line Distributing, Inc. and/or Little Caesar Enterprises" (noting that Blue Line was merged into LCE in January 1994). Id. They note that the LCE franchise agreement requires each franchisee to purchase logoed products, and the franchisees are tied in to buying these products from Blue Line because it is the sole supplier of these logoed goods under an exclusive 1989 Licensing Agreement from Little Caesar. Id. Each franchisee has "the contractual right to use qualified distributors other than Blue Line, they had the right to 'shop' the market for distribution services." *Id. at 14, P44*. They accuse LCE of being involved in anticompetitive activities by refusing "requests by franchisees to approve alternate sources of distribution." *Id. at 11*, P38e. They assert further that:

> LCE's control over logoed products gives it control over other non-logoed products, since distributors find it uneconomic to distribute non-logoed products without also distributing logoed products. In addition, franchisees find "one stop shopping" for weekly supplies to be **[**126]** efficient.

Id. at 12, P38f. "By retaining only one approved distributor in each area [Blue Line] and by blocking franchisees' access to competitive distributors, LCE excluded competitive sources of distribution throughout the United States." *Id. at 13*, Pb.

Siwek and Nelson claim that LCE's and Blue Line's profit margins are higher than those of competitors. Had alternate distributors not been excluded from the market, some franchisees would have negotiated better prices with these alternate distributors than from Blue Line, resulting in competition that would lower the price of the aggregate "market basket" of goods necessary to operate a Little Caesar franchise. This lower profit would benefit not only the franchisees who would wish to switch to a different distributor but also those who remained with Blue Line, who would benefit from the new, more competitively priced, and lower aggregate cost of a market basket of goods necessary to operate a franchise.

The focus of this August 1994 declaration was primarily to show that all of these claims could be established through common proofs for a nationwide class.

In response to the current motion for summary judgment with **[**127]** respect to the certified class of franchisees who have signed mid-1990 Franchise Agreements, plaintiffs' experts prepared a declaration relevant to the definition of market and market power. [57]

[128]** After analyzing the facts to determine that there is a separate market for the tied products, thus demonstrating that the tying and tied products are "separate products," which is discussed in Section III above, plaintiffs' experts analyze first whether a tie exists for franchisees who have pre-mid 1990 Franchise Agreements, and further whether LCE and its affiliate Blue Line have "market power in the relevant market." *Id. at 2, P 3*. With respect to the former question, they assert that:

---

[57] In their December 1996 declaration at p. 4, P5b, they state:

> Under all Franchise Agreements (both Pre-Mid 1990 and Post-Mid 1990), franchisees are allowed to request approval of third-party suppliers. . . . While the Franchise Agreements do not specifically define the term "suppliers" as including "distributors," the fact that LCE has historically approved third-party distributors and also indicated that it would approve qualified independent distributors suggests that there is no dispute over whether franchisees (both under the Pre-Mid 1990 and Post-Mid 1990 contracts) had the right to seek approval of qualified third-party distributors and to expect that these distributors would be approved.

Siwek and Nelson December 1996 Declaration at 4-5, P5(b), referring to Alan Harnisch's June 30, 1993, letter to L.D. Klenda noting that "Little Caesar is prepared to and will continue to review requests to approve other potential distributors, and that each request is individually considered." For purposes of this motion, I will consider that there is no dispute of material fact that each franchisee does have the contractual right to seek an alternate distributor which is derivative from its express contractual right to seek the approval of third-party suppliers.

> The confidential June 1989 agreement between LCE and Blue Line that gave Blue Line the exclusive right to distribute logoed products had the practical economic effect of preventing "hybrid franchisees" from successfully exercising this right. Put simply, the combination of the Post-Mid 1990 Franchise Agreements, the June **[*502]** 1989 LCE/Blue Line agreement, and LCE's control over the supplier approval process meant that no third-party distributors of logoed products would be approved without litigation. Since franchisees need logoed products to fulfill their contractual commitments and it is uneconomic to operate as a distributor without access to logoed products, continued operation as a "hybrid franchisee" **[**129]** is tied to the purchasing of distribution services and Goods (including logoed products) from Blue Line.

Id. at 8-9, P9.

The bulk of this declaration by plaintiffs' experts deals with the issue of Little Caesar's market power under a lock-in theory. They note that each franchisee invests up front costs in excess of $ 100,000 to acquire a franchise, which includes a $ 15,000 initial franchise fee, as well as the leasehold improvements, equipment, initial inventories and other items. These sunk costs, as well as the good will developed by the efforts of a franchisee, locked these franchisees in and- exposed them to the franchisor charging supracompetitive prices for goods and services that it controls. *Id. at 9-10, 12 n. 13*. See also 12-13, PP15-16.

> Franchisees that are "locked in" have only legal remedies, since their contractual commitments, the nature of their investment in their franchise, and the presence of economic rents make it uneconomic for them to close down their franchise operation.

Id. at 10, P12. [58]

[130]** The experts note:

> The franchisor will find it profitable to exploit the existing franchisees if the franchisor is not punished legally by the franchisees and if the franchisor does not have to worry that its exploitation of the franchisees will adversely affect its efforts to recruit new franchisees. A franchisor will not have to worry about an adverse effect on the recruiting of new franchisees if potential new franchise recruits are unaware of the franchisor's anticompetitive behavior, if the franchisor has grown its franchise operation to the point where it no longer needs to recruit large numbers of new franchisees, if the franchisor lowers its franchise fee to future franchisees that are aware of the explotive behavior, or if the franchisor can convince prospective franchisees that its franchise operation is less risky and more remunerative than was the case when the existing franchisees signed up.

Id. at 11, P13.

Plaintiffs' economic experts acknowledge that:

> Once a Little Caesar franchisee is "locked in" to its contract with LCE, there are two possible factors that could protect it from monopolistic pricing by LCE/Blue Line: (1) LCE/Blue Line will not **[**131]** raise prices to its "locked in" franchisees if it wants to recruit additional franchisees that are not yet locked in and that would be discouraged by supra-competitive pricing by Blue Line. (2) LCE/Blue Line will not be able to raise prices to its "locked in" franchisees if these franchisees have the ability to turn to competitive distributors and suppliers. In this case, neither factor prevents LCE/Blue Line from raising prices.

Id. at 13-14, P17.

---

[58] The authors use the standard definition of economic rent as:

An economic rent is any payment to a factor that exceeds what would be required to bring that factor into existence. Economic rents arise in various contexts. For example, an economic actor may earn economic rents when he is more efficient than the marginal supplier that determines the market price.

Id. at 10 n.11.

While noting they have not yet been able to obtain certain discovery, including detailed LCE and Blue Line financial information, to allow them to understand the defendant's cost structures, over charges, and profitability, they assert that the factual record that they have reviewed contains evidence that LCE franchisees are locked in and that LCE has exploited them by forcing them to use Blue Line and allowing LCE and Blue Line to extract rents from its franchisees. *Id. at 12, P14*.

Plaintiffs' experts note that while LCE/Blue Line expanded the number of franchises **[*503]** to over 2,000 by the early 1990's, it now operates at a scale necessary to support national advertising and feels less pressure to grow rapidly. They note that **[**132]** two or three years prior to LCE's President David Deal's deposition of December 2, 1994, Little Caesar had stopped offering new franchises under a moratorium. Deal Dep. at 322; Lockridge December 1996 Declaration, Ex. 6. LCE added some outlets in the early 1990's, although some of these were corporate outlets, and others were purchased back from existing franchisees. *Id. at 14-15, P18*. [59]

As a result of this lessened demand for new franchises, plaintiffs' experts state that "LCE/Blue Line could be less sensitive to possible adverse reputational effects that might result from disputes with locked-in franchisees than it was earlier in its history." *Id. at 14*, P18a. Plaintiffs' experts also claim that:

> For "locked in" franchisees the investment in additional Little Caesar's outlets **[**133]** would be relatively attractive compared to the investment in other businesses because they can spread common costs across several Little Caesar operations and because contractual terms such as non-compete clauses, limit their investment opportunities.

Id. at 15, P18b. [60]

Plaintiffs' experts note that under the supply clause of the post-mid 1990 franchise agreements the franchise owners could purchase any goods,

> "including paper goods as approved by LITTLE CAESAR from any source of its choosing, provided that said source has been previously approved as a supplier by LITTLE CAESAR in accordance with its standard practice and the foods, ingredients and supplies adhere **[**134]** to LITTLE CAESAR specifications and quality standards. With the exception of suppliers of signage and other products bearing the LITTLE CAESAR name and Proprietary Marks, Franchise Owner may request that LITTLE CAESAR place a supplier on LITTLE CAESAR's approved supplier list. LITTLE CAESAR shall not deny approval of any item which complies in all material respects with LITTLE CAESAR's specifications." (Section VII of Franchise Agreement; Attachment # 3).

Id. at 19-20.

Siwek and Nelson acknowledge that while the mid 1990 Franchise Agreement does not allow franchisees to request LCE to approve a logoed product supplier, it does not indicate that Blue Line is the only distributor to whom franchisees could turn. They argue that in post-mid 1990 contract reference to the franchisees' ability

> to turn to "previously approved" sources of supply, it refers to LCE's approval of "in accordance with its standard practice" (which arguably refers to LCE's obligations under its earlier contracts),

and thus there is a basis in the contract for concluding that LCE was committed to allow franchisees to use competitive distributors. They note further that the offering circulars **[**135]** did not clarify that Blue Line had an exclusive license for trademarked good nor the implications of that licensing. They also note that the offering

---

[59] The experts do not note that David Deal also testified that a new franchise offering circular was being prepared in December 1994, and that LCE did expect to be offering new franchises for sale. Deal Dep. at 308.

[60] The August 1990 Franchise Agreement, Section XVII C.3, precludes a franchisee during and for two years following the termination of the franchise agreement from engaging in a fast food operation in market areas selling pizza, pasta, submarine sandwiches or related products similar to those sold by a Little Caesar outlet.

circular indicates that the franchisees will have access to "food and non-food specifications" so they can arrange to have competitive suppliers manufacture and distribute these products. In June 1993, LCE's attorney wrote to plaintiff Smith's attorney indicating the specifications for processed foods as well as logoed paper would not be available to Gary Smith. *Id.* at 16-17, P 20.

> Plaintiffs' experts conclude that because the supply clauses in both the Pre-Mid 1990 and Post-Mid 1990 contracts suggest that a prospective franchisee would be protected from post-lock in, supra-competitive pricing of Goods and **[*504]** distribution services, the behavior of LCE/Blue Line and statements contained in Blue Line documents indicate that franchisees were not really protected absent legal action. By not fulfilling the terms of the Franchise Agreements, LCE/Blue Line was in a position to exclude third-party distributors and charge supra-competitive prices to Little Caesar franchisees. While the modification of the "supply clause" in Mid-1990 revealed **[**136]** a contractual tie and provided some hint of LCE's overall strategy, the fact that LCE would use the explicit tie as part of a plan to exclude rival distributors and charge supra-competitive prices was not clearly revealed to prospective franchisees. Indeed, it continues to be denied by LCE, despite comments to the contrary in its documents.

Id. at 18, P21 (footnotes omitted).

The experts assert that:

> Once the franchisees signed the Post-Mid 1990 Franchise Agreement, they were locked into buying logoed products from Blue Line. Blue Line's control over logoed products and LCE's control over the approval of suppliers forced Plaintiffs to use Blue Line as their distributor.

Id. at 19, P22. They note that these behaviors of LCE/Blue Line were anticompetitive and if the Court approves this behavior,

> it will be approving behavior that threatens efficient franchising. <19> Specifically, efficient franchising requires franchisees to be able to count on the sanctity of the contracts they sign before they sink time and money into their franchise operations. To allow the franchisor to use its post-lock in market power to extract higher payments from franchisees **[**137]** (in this case through unannounced changes in distribution policies that give an affiliate a near monopoly) would make franchising riskier for franchisees and undermine efficient franchising.

<19> If the Court allows LCE/Blue Line to take the rents that would have flowed to the franchisee under an appropriate interpretation of the Franchise agreement, the Court would in essence be allowing LCE to change the rules of the game after the franchisee is locked in. This is similar to allowing merging pipelines to change the transportation costs that a "wildcatter" faces after it chose to prospect in an area because of the competitive transportation costs in the area. In both cases, approval of an anticompetitive practice would make the investment in socially-valuable risk taking activities less attractive by making it less likely that a successful effort will be rewarded. This will chill investment in socially valuable risk-taking. Approval of LCE's use of Blue Line as the exclusive distributor has the added adverse effect of encouraging LCE to use a relatively inefficient distributor, which wastes resources.

Id. at 19, P23b.

Based upon the limited financial data available to **[**138]** the experts and AmeriServ's estimates of its competitive pricing (which is that each franchise is overcharged $ 165 per week per outlet), and given the 2,400 independent franchisees as of September 1993, plaintiff's experts estimate the annual overcharges would exceed $ 20 million per year. *Id. at 21, P25*.

The experts then go on to discuss that the alleged overcharge by LCE/Blue Line's supracompetitive pricing has an impact and causes economic damages to all of the franchises. They note that the defendant has shown no evidence that LCE has lowered its initial franchise fee and royalty fees in anticipation of and to adjust for its later charging of supracompetitive prices on goods supplied for the operation of the franchise. *Id. at 22, P27*.

Plaintiffs' experts also argue that LCE/Blue Line do not have the economies of broad scale distributors that serve multiple restaurant chains. These entities buy substantially larger quantities of food than Blue Line, and make substantially larger "drops" of food to restaurants, and do so with more efficient transportation costs because of servicing more restaurants per trip. The experts assert that in a competitive market, LCE would **[**139]** earn below a competitive rate of return. They argue that the franchise agreement and the presentations by LCE to franchises that the franchisees would have a right to turn to competitive sources of supply, the fact that the franchise agreement did not disclose that potential franchisees should expect to pay above-market prices for goods, as well as other evidence suggests

> that LCE was using the market power it obtained through post-contract lock-in effects **[*505]** to force its franchisees to pay supra-competitive prices that were not required by the Franchise Agreements or envisioned at the time the Plaintiffs' Franchise agreements were signed.

Id. at 24, P30.

D. Legal and Factual Analysis and Conclusion:

On the present record a reasonable jury would, as a matter of law, have to find that the facts noted below were generally known, and therefore readily knowable with minimum information costs, to anyone considering signing a mid-1990 Franchise Agreement at a time after Blue Line had become the regional distributor in their area. [61]

[140]** 1. Little Caesar franchises had to use logoed goods and other foodstuffs and supplies meeting LCE specifications in order to operate a Little Caesar franchise.

2. Little Caesar franchisees could only obtain logoed and other specification goods from an approved source, which in effect meant an approved distributor who obtained the logoed and other products from an approved source.

3. Franchisees are free to purchase supplies, including logoed goods, from any source that the franchisee could demonstrate provided supplies that conformed to LCE specifications.

4. The LCE Offering Circular assured franchisees that "food and non-food product specifications are maintained at LITTLE CAESAR's principal office and are available on request for examination."

5. At the time of signing the mid-1990 Franchise Agreement, the only approved distributor of logoed goods still doing business in the region was Blue Line.

6. While other approved distributors in the past had distributed logoed goods, none of them were currently in the regional marketplace nor was there any reason to assume any of them would be entering that market in the near future.

7. Blue Line Distributing, Inc. is "a wholly owned **[**141]** subsidiary of LITTLE CAESAR, to whom LITTLE CAESAR has granted an exclusive license to contract for the manufacture and distribution of certain supplies."

8. Blue Line "derives substantial income from the sale of supplies to Franchisees as well as to LITTLE CAESAR-owned Restaurants."

9. The audited financial statements of Blue Line are consolidated with those of LCE for recent years and are available with the Offering Circular and for 1988 show that LCE derives more than seven times the income from food service sales for operation of Little Caesar franchises than from the combined sales of new franchises and collection of royalties obtained from its existing franchises.

10. Blue Line's profits benefit LCE.

---

[61] As noted above, those few class members who were in areas not being serviced by Blue Line at the time they considered signing a mid-1990 Franchise Agreement, the "Associate Distributor Class Members," warrant separate consideration.

11. LCE has a copyright on its trademark and other distinctive logos and marks used in its business and on its logoed products needed to operate a Little Caesar franchise.

12. LCE can control entirely who manufactures and/or distributes products with its copyrighted logo and marks. It could limit the manufacturing and/or distribution of logoed items to a single source which could be itself or Blue Line.

13. A list of approved suppliers who provide LCE foodstuffs and other **[**142]** products meeting LCE specifications is available.

14. Franchisees can request an alternate supplier be placed on LCE's approved list for all items meeting LCE specifications except for secret spices and dough mixes and "products bearing the LITTLE CAESAR name and Proprietary Marks.

15. While LCE secret spice mix and dough mixes are the only products that the franchisees are expressly bound to purchase from LCE through Blue Line, Blue Line is the only source in the regional market from which franchisees can purchase logoed products, and franchisees signing the mid-1990 **[*506]** Franchise Agreement had no rights under that contract to request an alternate source for those products.

16. Unless LCE approves an alternate source of logoed products on its own, or in response to a request from someone having a pre-mid-1990 Franchise Agreement, the franchisee runs the risk of having their continued right to operate a LCE franchise tied to their purchasing logoed products from LCE through its Blue Line distribution division.

17. LCE through Blue Line sets the price for logoed products and could set prices for logoed products that are higher than similar generic products.

18. Other carry out pizza **[**143]** franchises and other fast food franchises in which one might invest may have less restrictive provisions and fewer risks of a tie-in than the LCE franchise.

19. LCE has the legal right to charge more for logoed products through Blue Line than similar such products might cost if the potential Little Caesar investor obtained an alternative carry out food franchise.

20. The market for carry out food franchises is a competitive market for investors.

21. The retail fast food carry out markets, including the pizza carryout food market, are extremely competitive.

22. Because LCE franchises compete in a very competitive carry out food market, LCE through Blue Line is limited in the extent it could overcharge for logoed products (or any other products for which an alternative competitive distributor is not available) because either: (a) LCE could not sell new franchises on the existing terms if it became generally known that it exploited its existing franchisees; or (b) because even if it stopped selling new franchises and cared little about its reputation in the franchise sales market, it is dependent for substantial portions of its income and profits not only on royalties but more significantly **[**144]** on Blue Line sales profits from its franchisees, which would be lost if it charged supracompetitive prices of such a magnitude that its franchisees could not cover their marginal costs in the competitive fast-food and carryout market.

In addition to the above facts that would be generally known or knowable at minimum cost prior to the signing of a mid-1990 Franchise Agreement, the only change that LCE apparently implemented after the franchisees signed a mid-1990 Franchise Agreement was to change any policy it had not to permit alternate approved distributors to have access to logoed products. The three alternate distributors approved in 1995 were given access to logoed goods. [62] This change did not adversely affect Little Caesar class member franchisees. Each franchisee had

[62] While LCE denies the allegation that it had a policy in the early 1990's of not approving alternate distributors to rival Blue Line, if that was the policy, then there was a second change in that policy when in 1995 it approved the three alternate distributors

contractual protections against excessive franchisor opportunism post-contract by raising the price of goods in the market basket because each of them had a contractual right to seek approval of a second source of supplies for any and all items except Pan!Pan! Dough, Spice Mix, and logoed products.

[145]** Thus, prior to signing a mid-1990 LCE Franchise Agreement it was either generally known or easily knowable [63] to the non-Associate Distributor class members that to operate an LCE franchise there was a risk that one would be forced to purchase logoed products from LCE through Blue Line possibly at supracompetitive prices.

If class plaintiffs were suing LCE for charging supracompetitive prices for its logoed goods, class plaintiffs would have no claim under ***antitrust law*** to a Kodak-type market definition even though they might have some state claims under contract law. Based on the current record this Court could **[*507]** find as a matter of law that LCE made sufficient disclosures prior to signing a mid-1990 Franchise Agreement which, when evaluated in light of other generally known **[**146]** or readily available information, would put a reasonably prudent franchise purchaser on notice of the risk that logoed goods would be tied in with the franchisee having no contractual or other limitations on price. This information would be available to a prospective franchisee even though the mid-1990 Franchise Agreement does not expressly tie logoed products to the continued operation of a Little Caesar franchise. This would be known with or without knowledge of the exclusive June 1989 Licensing Agreement. [64] **[**147]** Thus, the evidence is such that no reasonable jury could conclude that it was not generally known to potential franchisees pre-contract in mid-1990 and thereafter that LCE, either directly or through Blue Line, could restrict their access to logoed goods from any source other than Blue Line. [65]

---

who applied in 1993 and 1994 -- PYA Monarch, Schloss and Kahn, and Gordon Food Service. Defendant notes that these three approved alternate distributors that were approved in 1995 have not entered the market to compete with Blue Line.

[63] The LCE Offering Circular provided potential investors not only the number and location of other LCE carryout franchises, but also the names of the owners so that any prospective franchisee could contact existing franchise owners.

[64] The exclusive licensing agreement and other documents obtained during discovery would support a finding that it was LCE's intention to use its legal monopoly over its proprietary marks to improve its competitive position vis-a-vis alternate potential distributors. While a potential franchise might not know that LCE intended to use its power in this manner, they would know LCE had that power to exercise if it chose to do so.

[65] In most areas of the country from mid-1990 on, Blue Line was the sole source of such items. This would be known to any franchisee who signed the mid-1990 Franchise Agreement to renew their franchise. It could also readily be determined by any potential new franchisee, who had never had a Little Caesar franchise, by either inquiring of Little Caesar during their franchise negotiations or calling any of the hundreds of franchisees listed in the Offering Circular. This is the case even though the mid-1990 Franchise Agreement does not expressly tie logoed products to the continued operation of a Little Caesar franchise.

Defendant argues in this Motion for Partial Summary Judgment that sufficient disclosures were made pre-contract to inform potential franchisees that signing the mid-1990 Franchise Agreement exposed the franchisee to a requirement that to continue as a Little Caesar's franchisee logoed products would have to be purchased from Blue Line. Plaintiffs in their Second Supplemental Brief note that defendant in its earlier efforts to defeat the plaintiffs' first motion for class certification argued that:

> **LCE intended that only one category of items, logoed products, be purchased only from Blue Line.** (Deal Decl. P 10) Although this intent was expressed in an internal document and in letters to logoed paper suppliers and third party distributors, the intent was never communicated in any uniform written or oral communication to the franchisees (Id.) The franchise agreement was amended in mid 1990 to provide that a franchisee could not request additional sources for logoed products, **but does not Inform franchisees who signed the new agreement that Blue Line was the only existing source of logoed paper products. . . . thus, a franchisee would have to be a mind reader to have discerned that Little Caesar's intent was that logoed products be purchased only from Blue Line.**

Plaintiffs' Second Supplemental Brief in Opposition to Defendants' Motion for Partial Summary Judgment at 3, filed April 4, 1997, quoting Defendant's Brief in Opposition to Class Certification, pp. 9-10, filed July 13, 1994, Docket # 43. (Emphasis supplied by plaintiffs' counsel.) This "mind reader" argument was later repeated in oral arguments.

Defendant responds that plaintiff's lead counsel argued in the second class certification motion that

[148]** Yet, the class plaintiffs are not claiming damages for paying supracompetitive prices for logoed goods. Rather, they are claiming that the defendant used its power over its logoed goods to extend its tie-in over these goods to the entire market basket of goods necessary to operate a Little Caesar franchise for which supracompetitive prices are being charged. As noted above, this claim is **[*508]** based on the assertion that denial of access to logoed goods raises the market entry level and reduces the ability to compete of potential rival distributors, both because of the higher profit margin on logoed goods and the preference of many franchisees for "one-stop shopping." Thus, according to plaintiffs' claim, LCE's denial of access to logoed goods keeps alternate distributors from competing with Blue Line in a manner similar to Kodak's denial of access to its unique repair parts kept independent service operators from competing with Kodak in providing service on Kodak machines. Resolving all disputed issues of fact in plaintiffs' favor, it must be assumed (as plaintiffs' expert contend and AmeriServ's Burgess stated) that a rival distributor could not enter the market and compete successfully **[**149]** without access to logoed goods. [66]

On the current record, it cannot be said as a matter of law that a potential franchisee in mid-1990, even an existing franchisee, would know or could reasonably anticipate that a rival distributor would be unable to enter the market and compete with Blue Line in the absence of having access to logoed products.

Thus, the record is such that there is a disputed issue of material fact as to whether any potential franchisee **[**150]** considering signing a mid-1990 Franchise Agreement could anticipate that the lack of access to logoed products would preclude alternate distributors from entering the market to compete with Blue Line. Each franchisee had contractual protections against excessive franchisor opportunism post-contract by raising the price of goods in the market basket because each of them had a contractual right to seek approval of a second source of supplies for any and all items except Pan!Pan! Dough, Spice Mix, and logoed products. (Franchise Agreement Section VII.) Thus, on the present record, and for purposes of considering whether a Kodak-type market definition is applicable, there is an unresolved factual question concerning whether a potential franchisee could anticipate that its contract protections in Section VII of the Franchise Agreement to obtain a second source was effectively undermined by its relinquishing of a right to seek a second source for logoed products. Unlike Kodak and PSI, where it would be obvious that an independent service provider could not compete with service being provided by the original equipment manufacturer if the independent service provider did not have access to **[**151]** replacement parts, it is not obvious that an alternate distributor cannot compete with Blue Line without access to logoed goods. [67] Not only is it not obvious, but defendant contends that it is not even true. Thus, under *Kodak* and *PSI,* there is a potential that the franchisor could take advantage of the franchisees' ignorance on this non-obvious

---

> As a practical matter, most of the franchisees, generally speaking, were aware of the fact that they didn't have any options, that there was no place else to go other than Little Caesar's. Certainly up until 1995, no other distributor was ever approved, not ever, so they had to go buy all their goods -- I mean, they had no place else to go.

July 22, 1996 Hearing Transcript at 45.

Plaintiffs' experts also acknowledge that "the modification of the 'supply clause' in Mid-1990 revealed a contractual tie . . ." although the use of it to exclude rival distributors was not disclosed.

While defendant's earlier adversarial arguments serving the moment may later appear inconsistent with current arguments, this Court must determine the facts and the legal implications from the facts based on the record and its best assessment of the legal interpretation that can be placed on the facts. It is not appropriate in doing so to seek to punish any past rhetorical overstatements. As my initial Report and Recommendation on Class Certification indicated, I did not accept defendant's "mind reader" argument then, nor do I feel bound by it now.

[66] This issue is disputed by the defendant that contends AmeriServ was willing to enter the distribution market without logoed goods. Defendant also contends that the number of franchisees in each distribution area are insufficient to make it economically feasible for there to be more than one distributor. Again, for purposes of this motion it will be assumed that if approved and provided access to logoed goods, a rival distributor could enter the market in each region or in some other geographical market combining or modifying existing distribution regions.

[67] Obviously at some level of supracompetitive pricing a rival distributor could enter the market and compete without logoed goods because it could "beat" the blended margin overcharges of Blue Line on the market basket of goods, and the preference of franchisees for "one stop" shopping will fade if it becomes too expensive.

fact by implementing an unanticipated change of policy to preclude rival distributors from entering the market by denying them access to logoed products after franchisees had signed their mid-1990 Franchise Agreement and become "locked in."

Defendant notes that the three 1993-1994 alternate distributor applications that were approved **[**152]** in 1995 were given access to logoed products. In addition, the newest form Franchise Agreement again allows a franchisee to seek an alternate source of logoed products. Yet, notwithstanding this, the facts are such that a reasonable jury could conclude that from mid-1990 until at least the filing of this lawsuit LCE/Blue Line had a policy that would deny access to logoed products to alternate distributors, similar to the policy it implemented against PYA Monarch when Blue Line entered the Atlanta area in 1989.

[*509] The fact that LCE had such a policy during the relevant time periods is not all that is necessary to resolve the question of whether plaintiffs are eligible for a Kodak-type market definition. The caveat expressed in PSI noted:

> If there were any evidence in the record that [the defendant] took advantage of its customers' imperfect information in order to reap supracompetitive profits in the aftermarket for [its product], we would not hesitate to allow a Kodak-type theory to be submitted to the jury.

104 F.3d at 821. PSI then stated that it could not find evidence that the defendant "engaged in such activities. In this situation a Kodak-type theory is not **[**153]** applicable." *Id.*

Thus, the critical question in the present case is whether LCE "engaged in such activities." Is there sufficient evidence in the record from which a reasonable fact-finder could conclude that during the relevant time periods LCE implemented this policy to exclude any potential alternate distributor from the market? During the relevant time period, only AmeriServ in the southeast (and possibly nationwide) and Chopping Block in Wisconsin sought to become alternate distributors. Yet, both did not become alternate distributors because LCE did not approve them. With respect to the denial of approval to Chopping Block, plaintiffs do not appear to contest the legitimacy of LCE's reasons for denial that Chopping Block did not offer a full line of products to Little Caesar franchisees. Plaintiffs do assert that the withholding of approval of AmeriServ was wrongfully undertaken to exclude competition. The issue of whether this was or was not a wrongful withholding of permission will be resolved in Gary Smith's individual case.

As noted above, the class certification deals with whether LCE violated antitrust laws by tying in its logoed paper products or by extending that **[**154]** tie to the entire market basket of goods needed to operate a Little Caesar franchise. There is no evidence that Chopping Block did not enter the market because of lack of access to logoed products. There is no evidence that Chopping Block even wanted to sell logoed products. There is evidence that had LCE approved AmeriServ, it did intend to deny them access to logoed goods. Yet this never occurred because the denial of AmeriServ was done for other reasons. Thus, as a matter of law, this Court can determine that no reasonable jury could find that AmeriServ did not become an alternate distributor in the southeast United States or other places because of its lack of access to logoed goods. While this situation might have occurred had AmeriServ been approved by LCE, and while such an action might be an antitrust violation because in such a hypothetical case the plaintiffs could make a viable claim to a Kodak-type tying market, the reality is that this hypothetical possibility (or probability) did not occur.

While the present case does involve information and switching costs of sufficient magnitude to warrant invocation of a Kodak-type market definition if the defendant took advantage **[**155]** of the franchisees' ignorance, the evidence does not show that during the limitations period for this lawsuit the defendant used its restrictive policy on the availability of logoed goods to alternate distributors to exclude any potential distributor from the market. Nor during the limitations period has any potential alternate distributor been precluded from entering the market to compete with Blue Line because of LCE's restriction on the availability of logoed goods.

While plaintiffs' economic experts assert that there is a need for logoed goods in order to enter the market and compete with Blue Line, the above analysis assumes, for purposes of this motion, that plaintiffs will prevail on this factual dispute. Yet, the economic experts do not point to any evidence of what occurred in the marketplace to put factual flesh on the bones of their economic theory. During the relevant time periods for the class, there is no proof that LCE's exercise of its power to deny access to logoed goods to an alternative distributor prevented any distributor from entering the market or remaining in the market. Nor is there evidence any potential rival to Blue Line failed to seek approval because **[**156]** of this LCE policy. One thing that Kodak stressed was that courts should look to the "market realities" and "particular facts disclosed by the record" **[*510]** and not depend solely on the theories of economists. To do so would allow juries to substitute their speculations for the evidence necessary to make out a Kodak-type showing of power in the tying market.

Resolving all facts in plaintiffs' favor, even if this Court assumed that LCE fully intended to deny AmeriServ access to logoed goods if they approved them, and assuming further that LCE fully intended to violate the antitrust laws in doing this, these intentions never materialized because AmeriServ was never granted approval to be an alternate distributor. Thus, LCE never got to the point where it implemented its "wrongful" plan concerning denial of access to logoed goods. [68] Nor is there any evidence that LCE's denial of access to logoed goods to alternate distributors actually contributed to any alternative distributors during the statute of limitations period for this litigation: (1) having to leave the market; (2) not being able to enter the market, or (3) being dissuaded from applying to be an alternate distributor. [69] Thus, **[**157]** on the present record, no reasonable jury could find that during the limitations period LCE used its power to deny access to logoed goods to alternate distributors to handicap or exclude any rival distributors. Thus, this Court can determine as a matter of law that plaintiffs have not made a sufficient showing from which a reasonable fact-finder could conclude that class plaintiffs are entitled to a Kodak-type market definition because of defendant implementing a change in policy to the detriment of "locked in" franchisees.

[158]** With respect to the Associate Distributor Class Members who had a distributor other than Blue Line in their region when they signed the mid-1990 Franchise Agreement, these class members may not have had sufficient knowledge prior to signing the mid-1990 Franchise Agreement to know that they would later be "tied in" to Blue Line as the sole distributor of logoed goods. At the time of their signing of the Franchise Agreement, they would have had a distributor of logoed goods other than Blue Line. Yet, as with the majority of the class, the critical question is whether LCE "engaged in . . . activities" taking advantage of the Associate Distributor Class Members' imperfect information. The associate distributors who ceased serving as distributors after LCE began using its mid-1990 Franchise Agreement were Pegler Sysco in the Kansas City area in 1990, Leprino Foods in California in 1991, and Food Services of America in Washington state in 1992.

There is no evidence in the record that Pegler Sysco sought to continue competing with Blue Line, nor that it sought but could not obtain logoed goods. While the evidence is such that a jury could find that Pegler Sysco, if it had asked, would **[**159]** have been denied continued access to logoed goods once Blue Line/Dallas began to distribute goods in the Kansas City area, that is not sufficient evidence to support a jury finding that Pegler Sysco was driven from the Kansas City market by LCE's restrictive policy concerning logoed goods. Similarly, there is no evidence that Leprino Foods or Food Services of America were forced to exit the Little Caesar distribution market because of lack of access to logoed goods. Thus, there is not sufficient evidence in the record from which these Associate Distributor Class Members could claim a Kodak-type market for the tying product.

Plaintiffs argue that *Collins v. International Dairy Queen, 939 F. Supp. 875 (M.D.Ga. 1996)*, rejected summary judgment arguments similar to those of defendant LCE both on the market definition issue as well as the sufficiency of the evidence of coercion on the tie-in claim. As in the present case, Collins is a franchise case involving the franchisor approval of products and supplies used in Dairy Queen franchise outlets to maintain the reputation for quality of Dairy Queen products. The district court acknowledged **[*511]** that "an approved source requirement can constitute **[**160]** an illegal tie if a franchisee is coerced into buying products from a company in which a franchisor has a financial interest." *939 F. Supp. at 881* (quoting *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 712 (11th Cir. 1984)*.

---

[68] As noted above, any other possible "wrongful plan" of illegally denying approval to a qualified alternative distributor will be litigated in Garyt Smith's individual case.

[69] While Burgess says that he could not compete without access to logoed goods, plaintiffs have submitted no evidence that any other distributors in the United States were dissuaded from seeking to become a competitor of Blue Line because of their awareness of this policy of LCE denying them access to logoed goods.

Dairy Queen made substantial profits by selling equipment, produce and supplies which they purchased for resale to authorized warehouses which paid Dairy Queen a commission and resold the items to franchisees. Dairy Queen also sold certain items directly to franchisees including its soft-serve ice cream mix. Dairy Queen received a fee of a half percent on all warehouse sales whether the warehouse obtained the items from Dairy Queen or from a manufacturer that met Dairy Queen specifications. The Dairy Queen Operators' Cooperative ("DQOC") had designated certain manufacturers who produced products meeting Dairy Queen's specifications. Dairy Queen also received a commission even when the warehouse bought these products directly from the DQOC-endorsed manufacturers rather than from Dairy Queen. DQOC also sought to operate as a purchasing cooperative for franchisees. *Id. 939 F. Supp. at 881*.

While the franchise agreement required that the "Franchisor [is] **[**161]** to consider requests of Licensee for approval of specific alternate sources of supply and to cooperate with Licensee in this regard," plaintiffs alleged that Dairy Queen routinely delayed and frustrated efforts to have alternate suppliers approved and refused to recognize DQOC as the agent of the franchisees and had refused to consider DQOC's requests for approval of alternate suppliers. *Id. at 881*.

The district court in *Collins* denied summary judgment for defendant. First, it rejected defendant's argument that "an illegal tying arrangement cannot exist as a matter of law between a franchisor and its existing franchisees." *Id. at 883*. Second, it rejected defendants' arguments that the relevant tying market is the pre-contract market for all fastfood sandwich franchises, of which Dairy Queen constituted less that 3% of that market. *Id. at 878*. It did this using traditional market definition analysis and concluded that a jury could determine that relevant tying market was "the market for soft-serve ice cream franchises" of which Diary Queen controlled over 90%. *Id. at 879*. The court also found that a "lock-in" could be found on the existing facts, but its analysis **[**162]** of this issue is a single paragraph. *Id. at 883*. The case also provided a greater number of incidents of the defendant taking steps to frustrate efforts to have alternate suppliers approved than have been shown in the present case.

Thus, while agreeing with the *Collins* court that an illegal tying arrangement can in certain circumstances be found in the franchisor-franchisee relation, this Court is facing a different fact situation where LCE does not have a 90% share of the potentially relevant tying market. The Collins court's brief analysis of lock-in is less significant than the PSI/Kodak analysis needed in this case where an intermediate tied product (logoed goods) is allegedly being used to extend the tie to the entire market basket of goods needed to operate a Little Caesar franchise.

Another recent franchise case dealing more extensively with a Kodak-type market definition is *Wilson v. Mobil Corp., 984 F. Supp. 450 (E.D.La. 1997)*, involving the franchisees of SpeeDee Oil Change Systems, Inc. ("SpeeDee"). During one period of time the franchise agreement noted that Castrol was the exclusive lubricant supplier for all SpeeDee outlets. The franchise agreement required **[**163]** the franchisee to use only approved brand named items in their outlets. In June of 1988, SpeeDee and Mobil entered into a contract whereby Mobil became the approved supplier. The new franchise agreement indicated this and again reiterated the requirement that the franchisees use only approved brand name items, including lubricants. *984 F. Supp. at 454*. At the time of the litigation, Mobil was the only company meeting SpeeDee's standards which included certain advertising contributions and equipment financing arrangements for the franchise outlets.

The defense filed a motion for summary judgment arguing that the tying market was the market for all franchises for which operation does not require specialized knowledge, and the initial investment is comparable of **[*512]** that of the SpeeDee franchise. While plaintiffs had initially argued that the defendants' market power was based in its "statutory trademarks, trade names, and copyrights which possess economic distinctiveness," the Court noted that plaintiffs had "apparently abandoned these contentions, now asserting in their opposition to Mobil's summary judgment motion that the relevant market is limited to the SpeeDee franchise network." **[**164]** The district court noted that other courts and commentators had urged that the Kodak-type narrowed market definition be utilized only when there has been a unilateral change in policy by the defendants. *Id. at 458*. The *Wilson* court concluded that the franchisees had not made out a Kodak-type showing and

> defendants' market power should be measured at the precontract stage because each plaintiff had sufficient information to evaluate the SpeeDee franchise opportunity before they "locked-in" to the franchise. Before signing their contracts, each potential franchisee knew that the franchise agreement was for fifteen years, there was a single approved brand of lubricants, that SpeeDee, not the franchisees, had the contractual authority to determine the number and identity of approved brands and/or suppliers, including lubricant brands and/or suppliers, and that if a franchisee chose to take advantage of equipment programs offered by the approved lubricant suppliers (Castrol and later Mobil), the franchisee must purchase certain amount of product from the approved suppliers. Thus, franchisees had sufficient information to conclude that they would be required to purchase **[**165]** from a single lubricant supplier indefinitely, that there was a possibility that SpeeDee's choice of supplier might differ from their own preferred choice, and that to take advantage of certain equipment packages, the franchisee would be required to buy specific volumes of lubricants each year from the approved suppliers.

Id. at 460-61.

Plaintiffs also complained about the lack of disclosures concerning current and future prices, but the Court rejected these arguments noting that:

> At the precontract stage, these plaintiffs were aware that prices for lubricants would vary, that the selection of the supplier was not theirs, and that if they accepted the equipment package they would be required to purchase specific volumes of lubricants from the designated supplier. These plaintiffs had sufficient information to determine whether this franchise opportunity was too risky to venture into and to compare it with other franchises. In addition, compared to a copier purchaser who is only buying one piece of equipment, a person about to venture long-term into a new business should have a strong incentive to shop around and to determine if he needs more information to make **[**166]** a decision. . . . Plaintiffs have not shown any evidence that information about Mobil's products or current prices was not available from other sources. . . . These plaintiffs have suggested no reasons why they could not have contacted Mobil, existing franchisees, or market sources about the pricing and desirability of Mobil's package. The offer circulars even listed names and addresses of other SpeeDee franchisees.

Id.

The *Wilson* analysis of Kodak-type definition is more detailed than that of Collins and supports a finding that class plaintiffs have no per se tying claim with respect to the logoed goods. Neither Collins nor Wilson, both of which involved a direct alleged tie-in, are of much help to this Court in analyzing the alleged two-step tie of using the tie over logoed goods to tie in the entire market basket of goods. Neither case suggests that the above analysis on that issue is flawed.

Thus, on the present record, class plaintiffs cannot use a Kodak-type analysis to define the relevant tying market as the continued operation of a Little Caesar franchise. Rather, the relevant tying market is no smaller than the pre-contract market for pizza or other fast-food **[**167]** carry out restaurants.

Given the fact that plaintiffs have not countered defendant's assertion that LCE lacks sufficient market share in the pre-contract market for pizza or fast food franchises to trigger a per se tying claim, and given the fact that the plaintiffs have failed to provide **[*513]** sufficient alternate evidence of market power (see n. 10 above), defendant should be granted summary judgment on the class tying claim because plaintiffs cannot prove prima facie element # 2 of its per se tying claim -- that defendant has sufficient market power over the tying product to restrain appreciably competition in the tied product market.

Because defendant is entitled to summary judgment against all class plaintiffs based on this market power argument, this Court need not address the alternate arguments made by defendant in its motion.

V. RECOMMENDATION:

For the reasons stated above, IT IS RECOMMENDED that defendant's Motion for Partial Summary Judgment be DENIED on the issue of there being one product and not two, and that defendant's motion be GRANTED on the issue that plaintiffs have insufficient proof of market power in the tying product market.

Any objections to this Report **[**168]** and Recommendation must be filed on or before May 11, 1998. *28 U.S.C. § 636(b)(1)*; E.D. Mich. LR 72.1(d)(2). Failure to file objections within the specified time constitutes waiver of any further right of appeal. *Thomas v. Arn, 474 U.S. 140, 88 L. Ed. 2d 435, 106 S. Ct. 466 (1985)*; *Ivey v. Wilson, 832 F.2d 950, 957-58 (6th Cir. 1987)*; *United States v. Walters, 638 F.2d 947 (6th Cir. 1981)*. Pursuant to E.D. Mich. LR 72.1(d)(2), a copy of any objections is to be served upon this Magistrate Judge.

On or before June 1, 1998, the opposing party may file a response to any objecting party's timely filed objections. The response shall address specifically, and in the same order raised, each issue contained within the objections.

Civil Procedure > Preliminary Considerations > Justiciability > General Overview

HN4[] Justiciability, Standing

There are several factors courts to consider in determining whether an antitrust plaintiff has standing to sue. As a threshold matter, the court must determine whether the plaintiff has met the requirements for standing under U.S. Const. art. III - that is, whether the plaintiff has suffered an injury which bears a causal connection to the alleged antitrust violation. If the plaintiff meets the requirements for standing under Article III, the court must then determine whether the plaintiff also meets the more demanding standard for antitrust standing. In deciding whether antitrust standing has been established, courts are to consider: (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages.

Antitrust & Trade Law > Clayton Act > General Overview

HN5[] Antitrust & Trade Law, Clayton Act

In order to demonstrate that it has suffered "antitrust injury," a plaintiff must prove that its alleged injury flows from that which makes defendants' acts unlawful.

HN8[] **Private Actions, Standing**

To maintain an antitrust divestiture suit, a private plaintiff must generally meet all the requirements that apply to the damages plaintiff, except that the injury itself need only be threatened, damage need not be quantified, and occasionally a party too remote for damages might be granted an injunction.

[*1230] OPINION

* The Honorable Robert H. Whaley, United States District Judge for the Eastern District of Washington, sitting by designation.

*** Writing for the court as to Part II.B.2 only.

O'SCANNLAIN, [**] Circuit Judge:

[2]** We must decide whether a distributor and downstream purchaser of vintage automobile tires has standing to bring an antitrust action under the Clayton Act against a competitor and supplier for damages and divestiture.

I

Coker Tire Company, Inc. ("Coker Tire") and Lucas Automotive Engineering, Inc. ("Lucas Automotive") sell vintage automobile tires to customers worldwide. Vintage tires are different from tires used on modern automobiles in terms of their size, dimensions, structure, design and manufacturing. They are replicas of the tires which originally were sold on vintage, antique and collector cars, and are no longer made for use on modern cars. Vintage tires are typically bias ply tires, whereas modern automobile tires are radial construction. Vintage tires are distributed through specialty tire channels of distribution.

Lucas alleges that the relevant market for purposes of this action is limited to original equipment ("OE") major brand vintage tires. These tires bear the trademarks of tires which originally were sold on vintage cars. For American cars, the OE major brands in vintage tires are Firestone, B.F. Goodrich, U.S. Royal and Goodyear. Coker Tire is the exclusive supplier **[**3]** for all of these OE brands except Goodyear, which comprises less than 10% of the market. There are approximately 40,000 tire dealers in the United States for the retail sales of OE major brand vintage tires. Following the district court, we assume that the relevant market is limited to original equipment brand name vintage tires. *See* Order Granting Defendant's Motion for Summary Judgment at 3 n.1.

Coker Tire is the world's largest supplier of vintage tires, with distributors in 27 countries and distribution sites in Chattanooga, Tennessee and Santa Fe Springs, California. There are more than 25 brands of vintage tires being sold in the world. Lucas Automotive, headquartered in Long Beach, California, initiated the Firestone Vintage Tire Program in the 1970s, operating since then as the importer and distributor of Firestone vintage tires worldwide. Prior to August 7, 1991, both Coker Tire and Lucas Automotive distributed Firestone brand vintage tires: Coker Tire distributed "wide ovals," vintage tires for "muscle cars" (those made primarily in the 1960s and 1970s), while Lucas Automotive distributed Firestone tires for antique cars. Firestone Tire and Rubber Company of New Zealand, **[**4]** Inc. ("FNZ"), a subsidiary of Bridgestone/Firestone, Inc. ("BFI") and operating under a license agreement with BFI, manufactured and sold the Firestone vintage tires in New Zealand, supplying them to Lucas Automotive for distribution and sale to end users. Because vintage tire production became unprofitable for FNZ in the late 1980s, it decided to cease manufacturing vintage tires in New Zealand. BFI sought to relocate production to a new facility in North America.

On August 7, 1991, BFI invited Lucas Automotive and Coker Tire to submit bids for an exclusive license to manufacture and distribute Firestone brand vintage tires worldwide. BFI limited the bid process to these two companies because they were the two principal sellers of vintage tires and because it was familiar with both organizations. BFI informed Lucas Automotive and Coker Tire of its goals in seeking bids: (1) to maximize the Firestone brand's exposure and to insure the continuity of the business; (2) to move production from New Zealand to North America; and (3) to organize for efficiency and profitability to Firestone. Lucas Automotive resisted the bid process; its final proposal lacked the required financial statements **[**5]** and business and credit references.

In January 1992, BFI selected Coker Tire as its new worldwide manufacturer and distributor of Firestone vintage tires. With the **[*1231]** exclusive Firestone distributorship, Coker Tire now controls approximately 75% of the vintage tire market and 90% of the original equipment market, with exclusive rights to all but one of the major brands. [1] BFI contends that Coker Tire's bid proposal was superior to Lucas Automotive's for several reasons. First, Coker Tire's multi-brand marketing approach was consistent with the approach used by BFI at its own stores.

[**] Writing for the court except as to Part II.B.2.

[1] Coker Tire disputes this market percentage: "Arriving at a determination of market share in the vintage tire business would be almost impossibly difficult, requiring as it would the contacting of 'every single seller . . . [for the purpose of] getting their gross [sales] numbers all over the world.'" Appellee's Brief at 12 (internal citation omitted).

Second, the license fee proposed by Coker Tire was based on a sliding percentage which decreased as sales went up, providing an incentive for Coker Tire to increase volume which was consistent with BFI's goal of greater name recognition. Lucas Automotive's license fee, on the other hand, was based on a straight percentage of cost of goods which provided no incentive in reduced expense for Lucas Automotive to increase its sales volume. Third, Corky Coker demonstrated "far superior public relations skills" than Stanley Lucas. And finally, Coker Tire had several management-level employees whereas Stanley Lucas **[**6]** was the sole management-level employee at Lucas Automotive. On April 2, 1992, BFI entered into a License & Lease Agreement with Coker Tire, giving it permission to manufacture and to distribute certain classic-vintage tires exclusively worldwide in accordance with BFI's trademarks and patents on classic-vintage Firestone brand tires.

On August 20, 1993, Lucas Automotive filed an action against BFI, FNZ and Coker Tire. The complaint contained six different counts, with each containing a separate cause of action: (1) antitrust violations based on *§ 2* of the Sherman Act, *15 U.S.C. § 2*, and *§ 7* of the Clayton Act, *15 U.S.C. § 18*; (2) breach of express contract; **[**7]** (3) breach of implied contract; (4) fraud; (5) tortious interference with prospective economic advantage; and (6) bad faith denial of existence of contract. Only the first count pertained to Coker Tire. The complaint alleged that Coker Tire, BFI and FNZ had conspired to monopolize the worldwide market for the "marketing and sale" of vintage automobile tires in violation of *§ 2* of the Sherman Act. The complaint also alleged that Coker Tire's acquisition of vintage tire molds and worldwide distribution rights from BFI violated *§ 7* of the Clayton Act, in that the acquisition would substantially lessen competition and create a monopoly in the marketing and sale of these tires throughout the world.

On December 19, 1994, BFI and FNZ filed a motion for summary judgment with respect to all the claims against them. On February 21, 1995, the district court awarded summary judgment to BFI and FNZ on all counts pertaining to them, including the alleged conspiracy violations by BFI and FNZ of *§ 2* of the Sherman Act and *§ 7* of the Clayton Act contained in the first count. The district court ruled that there was no specific intent to monopolize on the part of BFI and FNZ and that there were **[**8]** legitimate business reasons for BFI to prefer Coker Tire over Lucas Automotive as its exclusive licensee to manufacture and distribute Firestone vintage tires. Lucas Automotive did not appeal from this ruling. Thereafter, only that part of the first count pertaining exclusively to Coker Tire remained pending before the district court.

On June 27, 1995, Coker Tire, the remaining defendant, filed its summary judgment motion. The district court granted summary judgment in favor of Coker Tire on October 17, 1995. It concluded that: (1) Lucas Automotive has not produced evidence to show that its losses flow from any alleged monopoly by Coker Tire; (2) the fact that Coker Tire has the exclusive distribution rights to other major brand vintage tires does not transform Lucas Automotive's unsuccessful bid for the Firestone line into an antitrust injury; (3) Lucas Automotive has not produced any evidence to show that Coker Tire has in fact raised prices on the brand name vintage tires it distributes; and (4) Lucas Automotive also lacks standing to bring this claim because it has not actually purchased any tires from Coker Tire.

Lucas Automotive timely appealed.

[*1232] II

Lucas Automotive alleges **[**9]** that Coker Tire violated *§ 7* of the Clayton Act when it acquired the exclusive right to manufacture and to distribute Firestone brand vintage tires worldwide. ***HN1***[] *Section 7* provides in pertinent part:

> No person engaged in commerce or in any activity affecting commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no person subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another person engaged also in commerce or in any activity affecting commerce, where . . . the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

15 U.S.C. § 18. Pursuant to that allegation, Lucas Automotive seeks to recover treble damages and to compel divestiture of the Firestone distributorship.

Lucas Automotive is both a potential competitor of Coker Tire at the distributor level and a purchaser at the subdistributor level. Therefore, we must ask whether Lucas Automotive has either competitor standing or purchaser standing to assert either a treble damages claim or a divestiture claim against Coker Tire.

A

We first examine whether **[**10]** Lucas Automotive has standing to bring an action for treble damages against Coker Tire, either as a competitor of Coker Tire at the distributor level or as a downstream purchaser. ***HN2***[] The treble damages provision of the Clayton Act, § 4, reads in material part:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

15 U.S.C. § 15(a). ***HN3***[] Section 4 of the Clayton Act thus provides a private cause of action for parties injured by violations of *section 7* of the Act.

As we noted in *Amarel v. Connell, 102 F.3d 1494 (9th Cir. 1997)*, the Supreme Court has identified ***HN4***[] several factors courts are to consider in determining whether an antitrust plaintiff has standing to sue. As a threshold matter, the court must determine whether the plaintiff has met the requirements for standing under Article III - that is, whether the plaintiff **[**11]** "has suffered an injury which bears a causal connection to the alleged antitrust violation." *Amarel, 102 F.3d at 1507*. If the plaintiff meets the requirements for standing under Article III, the court must then determine whether the plaintiff also meets "the more demanding standard for *antitrust* standing." *Id.* (emphasis added). In deciding whether antitrust standing has been established, courts are to consider: "(1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages." *Id.* (citing *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*).

1

We first examine whether Lucas Automotive has standing under § 4 as a competitor of Coker Tire at the distribution level. [2] Lucas Automotive alleges that Coker Tire's purchase of the manufacturing and distribution rights for Firestone vintage tires increased Coker Tire's share of the vintage tire market **[**12]** from 49% to 74%, and increased Coker Tire's **[*1233]** share of the original equipment vintage tire market to 90%. Lucas Automotive claims that it has been injured by Coker Tire's gain in market share because it has been excluded from participating in the vintage tire market at the distribution level.

HN5[] In order to demonstrate that it has suffered "antitrust injury," Lucas Automotive must prove that its alleged injury "flows from that **[**13]** which makes defendants' acts unlawful." *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 113, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*). In *Brunswick,* three bowling centers brought suit against Brunswick, one of the two largest manufacturers of bowling equipment in the United States, claiming its acquisition of a large number of failing bowling centers violated antitrust laws. The plaintiffs alleged that the acquisitions might substantially lessen competition or tend to create a monopoly in violation of *§ 7* of the Clayton Act and thus sought treble damages under § 4 and a divestiture order under § 16. *See id. at 480-81*.

---

[2] At oral argument, counsel for Lucas Automotive stated:

> Judge Davies did note on page 7 of his memorandum decision granting summary judgment: "Lucas has also been unable to re-enter the market for the original equipment major brand vintage tires because it has been unable to secure the exclusive distributor rights to another major brand vintage tire. Lucas argues that these losses flow from the acquisition of monopoly power by Coker." So he understands what we're saying - that we've been excluded from effective, meaningful participation in the market at the distribution level.

The Court held that loss incurred because of an unlawful acquisition that would also have been incurred had the acquisition been lawful is not antitrust injury because it does not flow from that which makes the defendant's conduct unlawful. *See id. at 487-88*. The Court explained:

> If the acquisitions here were unlawful, it is because they brought a "deep pocket" parent into a market of "pygmies." Yet respondents' injury **[**14]** - the loss of income that would have accrued had the acquired centers gone bankrupt - bears no relationship to the size of either the acquiring companies or its competitors. Respondents would have suffered the identical "loss" - but no compensable injury - had the acquired centers instead obtained refinancing or been purchased by "shallow pocket" parents . . . . Thus, respondents' injury was not of "the type that the statute was intended to forestall."

Id. at 487 (internal citations omitted).

As a competitor of Coker Tire, Lucas Automotive's alleged injury is that it has been foreclosed from serving as a primary-line supplier of vintage tires. However, Lucas Automotive would have suffered the same injury had a small business acquired the exclusive right to manufacture and to distribute Firestone tires. Because it cannot demonstrate "antitrust injury" as defined in *Brunswick,* Lucas Automotive lacks competitor standing to sue Coker Tire for treble damages under § 4. *See Brunswick, 429 U.S. at 487-89*.

2

Lucas Automotive also claims to have standing to assert its § 4 claim as a downstream purchaser of vintage tires. Lucas Automotive alleges that it must now purchase **[**15]** tires from Coker Tire or another primary-line distributor in order to resell them at the subdistributor or retail level. However, since Coker Tire acquired the right to manufacture and to distribute Firestone tires on August 7, 1991, Lucas Automotive has not purchased any tires from Coker Tire. Instead, Lucas Automotive has bought tires from Universal Tire Company, which in turn purchases from Coker Tire.

Construing § 4 of the Clayton Act, the Supreme Court has held that ***HN6***[] an indirect or remote purchaser lacks standing to seek damages relief against the manufacturer for alleged violations of federal antitrust laws. *See Illinois Brick Co. v. Illinois, 431 U.S. 720, 728-29, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*; *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 492-93, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*. The indirect purchaser rule serves to avoid the complications of apportioning overcharges between direct and indirect purchasers and to eliminate multiple recoveries. *See Kansas v. Utilicorp United, Inc., 497 U.S. 199, 208, 212, 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990)*. The Supreme Court has applied the indirect purchaser rule in § 4 cases involving **[**16]** section 1 of the Sherman Act, *see Illinois Brick, 431 U.S. at 728-29*, and *section 2* of the Sherman Act, *see Hanover Shoe, 392 U.S. at 492-94*. Although the Supreme Court has never applied the indirect purchaser rule in a § 4 case involving **[*1234]** *§ 7* of the Clayton Act, its decisions construing the scope of the rule suggest that it applies to § 4 actions generally. *See Utilicorp United, 497 U.S. at 217 (1990)* ("We think it an unwarranted and counterproductive exercise to litigate a series of exceptions [to the indirect purchaser rule]. Having stated the rule in *Hanover Shoe,* and adhered to it in *Illinois Brick,* we stand by our *interpretation of § 4.*") (emphasis added); *Illinois Brick, 431 U.S. at 729* ("We decline to abandon the *construction given § 4* in *Hanover Shoe* - that the overcharged direct purchaser, and not others in the chain of manufacture or distribution, is the party 'injured in his business or property' within the meaning of the section . . . .") (emphasis added); *see also Alaska v. Chevron Chemical Corp., 669 F.2d 1299, 1300-01 (9th Cir. 1982)* (applying indirect purchaser rule to *§ 7* claim). Therefore, we hold that, as an indirect **[**17]** purchaser, Lucas Automotive lacks standing to bring a § 4 action charging Coker with a violation of *§ 7* of the Clayton Act. [3]

---

[3] Even if the indirect purchaser rule did not apply in this case, Lucas Automotive has not shown that it has paid higher prices as an indirect purchaser as a result of Coker Tire's acquisition of the Firestone line. We examine whether Lucas Automotive has succeeded in demonstrating that it is *threatened* with higher prices as an indirect purchaser in Part II.B.2.

Lucas Automotive argues that it falls within the exception to the indirect purchaser rule for sales made pursuant to "cost-plus" contracts. *See* *Illinois Brick, 431 U.S. at 735-36*. We disagree. *Illinois Brick* recognized that pass-on damages can be easily measured when a direct purchaser sells to his customers under a "pre-existing cost-plus contract." *Id.* However, Lucas Automotive offers no evidence that its purchases from Universal Tire Company were made pursuant to a fixed-quantity, cost-plus contract entered **[**18]** into prior to Coker Tire's obtaining the Firestone distribution rights.

B

We next examine whether Lucas Automotive has "antitrust standing" to bring an action to compel divestiture of the Firestone distributorship acquired by Coker Tire. ***HN7***[] The injunctive provision of the Clayton Act, § 16, reads in material part:

> Any person, firm, organization or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, including sections two, three, seven and eight of this Act, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue. . . .

15 U.S.C. § 26.

HN8[] To maintain an antitrust divestiture suit, a private plaintiff must generally meet all the requirements that apply to the damages **[**19]** plaintiff, except that the injury itself need only be threatened, damage need not be quantified, and occasionally a party too remote for damages might be granted an injunction. *See* 2 Areeda & Hovenkamp, ***Antitrust Law*** Par. 360, at 193-94. Although the Supreme Court did not address equity actions when it defined "antitrust injury" in *Brunswick,* the Court held in *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*, that threatened antitrust injury was a prerequisite to equitable relief. *Id. at 113*. Comparing § 16 of the Clayton Act with § 4, it said:

> Sections 4 and 16 . . . are best understood as providing complementary remedies for a single set of injuries . . . [and it] would be anomalous . . . to read the Clayton Act to authorize a private plaintiff to secure an injunction against a threatened injury for which he would not be entitled to compensation if the injury actually occurred.

Id. at 112-13. The *Cargill* Court further acknowledged that "the legislative history of Section 16 is consistent with the view that Section 16 affords private plaintiffs injunctive relief only for those injuries **[**20]** **[*1235]** cognizable under Section 4." *Id. at 112*.

We now examine whether Lucas Automotive has standing to bring a divestiture suit either as a competitor of Coker Tire or as a downstream purchaser of vintage tires.

1

Lucas Automotive lacks standing to assert a § 16 claim as a competitor of Coker Tire for the same reason that it lacks competitor standing to assert a § 4 claim. Lucas Automotive alleges that, as a result of Coker Tire's acquisition of the Firestone line, it is threatened with being permanently excluded from competing at the distributor level. [4] However, read in conjunction with *Cargill, Brunswick* compels the conclusion that, because Lucas Automotive cannot show that it would not be similarly threatened had a small business acquired the right to manufacture and to distribute Firestone tires, Lucas Automotive lacks competitor standing to sue for divestiture under § 16. *See* *Brunswick, 429 U.S. at 487*; *Cargill, 479 U.S. at 113*; *see also* 2 Areeda & Hovenkamp, ***Antitrust***

---

[4] At oral argument, Lucas Automotive's counsel stated, "If the defendant is able to exclude you through its pricing practices from competing, then you lose sales." Because Lucas Automotive has not specifically alleged that Coker Tire has engaged or threatens to engage in predatory pricing, we decline to address this issue on appeal.

Law Par. 349.2a, at 480-81 ("Standing is inappropriate when the plaintiff is a competitor challenging the expansive or typically competitive behavior or a rival.").

[21]** 2

TASHIMA, *** Circuit Judge, with whom WHALEY, District Judge, concurs:

The district court, without distinguishing Lucas Automotive's equitable claim from its treble damage claim, granted Coker Tire summary judgment on both claims because "Lucas has not produced any evidence to show that Coker has in fact raised these prices [on brand name vintage tires]. Therefore, it has not suffered any actual injury." Order Granting Defendant's Motion for Summary Judgment at 8 (Oct. 17, 1995) (citing *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421 (9th Cir. 1995))*. It further held that "Lucas also lacks standing to bring this claim because it has not actually purchased tires from Coker. Lucas does not buy its Firestone vintage tires directly from Coker." Citing *Illinois Brick, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707*, the district court held that "Lucas must buy directly from Coker to have standing to sue for any price increases Coker puts into effect as a result of its alleged **[**22]** monopoly." The district court concluded the portion of its opinion on antitrust standing: "The Court therefore finds that Lucas has not suffered an antitrust injury because its losses are not due to any anti-competitive acts by Coker. Therefore Lucas lacks standing to sue under the antitrust acts." The district court erred in failing to distinguish Lucas Automotive's standing to sue for equitable relief under *§ 7* of the Clayton Act from its standing to sue for treble damages.

First, indirect purchasers are not barred from bringing an antitrust claim for injunctive relief against manufacturers. *McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 856* (3d Cir.), *cert. denied, __ U.S. __, 117 S. Ct. 86, 136 L. Ed. 2d 42 (1996)*; *In re Beef Indus. Antitrust Litig., 600 F.2d 1148, 1167 (5th Cir. 1979)*; *Mid-West Paper Prods. Co. v. Continental Group, Inc., 596 F.2d 573, 590-94 (3d Cir. 1979)*; *In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 497 F. Supp. 218, 228-29 (C.D. Cal. 1980)*. Second, an antitrust plaintiff seeking injunctive relief need only show a *threatened* injury, not an actual one. *See* 2 Areeda & Hovenkamp, ***Antitrust Law*** Par. 360, at 193-94.

[23]** Lucas Automotive forthrightly states in its opening brief that "this is not a 'terminated distributor' case - Lucas does not claim injury flowing from the loss of the Firestone distribution rights against Coker . . . Lucas' injury flows from the fact that it is a purchaser and reseller of vintage original equipment tires and Coker now controls the supply of vintage tires. *Lucas thus is forced to operate in a market controlled by a monopolist* **[*1236]** *rather than by market forces*." (Emphasis added.)

The undisputed facts on summary judgment showed that after its acquisition of the Firestone vintage tire line, Coker Tire controlled 75 percent of the vintage tire market, and 90 percent of the original equipment market. Coker Tire controlled all major American vintage tire brands, except one, Firestone, B.F. Goodrich and U.S. Royal. Kelsey Tire Company, with less than 10 percent of the market, controlled the remaining Goodyear brand. Goodyear vintage tires, however, are limited in terms of available sizes.

The undisputed facts also established that there are insurmountable barriers to entry into the primary-line market for vintage tires, particularly the original equipment market. This is **[**24]** because what is acceptable to the consuming public as a vintage tire brand, by definition, was fixed many years ago. All of the trademarks and the tire molds necessary to manufacture vintage tires have been committed to existing manufacturers. *See generally Rebel Oil, 51 F.3d at 1439* (analyzing barriers to entry factor).

These undisputed facts, at the summary judgment stage, are sufficient fairly to support Lucas Automotive's claim that "Coker has monopoly power in the marketing and sale of vintage tires in the United States with the power to exclude competition and raise prices," *i.e.,* they make out a *prima facie* case. We held in *Rebel Oil* that a market share of 44 percent was "sufficient as a matter of law to support a finding of market power, if entry barriers are high and competitors are unable to expand their output in response to supracompetitive pricing." *Id. at 1438* (footnote

*** Writing for the court as to Part II.B.2 only.

omitted). *Accord* Oahu Gas Serv., Inc. v. Pacific Resources Inc., 838 F.2d 360, 366 (9th Cir. 1988) ("A firm with a high market share may be able to exert market power in the short run, but 'substantial market power can persist only if there are significant and continuing barriers **[**25]** to entry.'") (citation omitted).

It is a fair inference from the facts on summary judgment that, with the acquisition of the Firestone line of vintage tires, Coker Tire controls the supply of original equipment vintage tires; there no longer is virtually any competition at the primary level since Coker has a 90% market share; there are insurmountable barriers to entry; and it may be inferred that the sole remaining competitor in the original equipment vintage tire market, Kelsey Tire Company, is unable to increase output since the Goodyear brand of vintage tires controlled by Kelsey is limited in terms of size. [5] Coker Tire can now control prices and output, and exclude competition. Section 7 prohibits an acquisition the effect of which "may be substantially to lessen competition, or to tend to create a monopoly." 15 U.S.C. § 18. Lucas Automotive has shown, *prima facie,* that Coker Tire's conduct threatens "substantially to lessen competition" and "tends to create a monopoly" at the primary line level of the vintage tire market. That is precisely the antitrust harm § 7 was intended to protect against. As the Supreme Court has noted:

> Indeed, the evident import of Congress' **[**26]** reference to "*threatened* loss or damage" is not to constrict the availability of injunctive remedies against violations that have already begun or occurred, but rather to expand their availability against harms that are as yet unrealized.

California v. American Stores Co., 495 U.S. 271, 282 n.8, 109 L. Ed. 2d 240, 110 S. Ct. 1853 (1990) (citing Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130 & n.24, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)). *See also* Brown Shoe Co. v. United States, 370 U.S. 294, 318 n.32, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962) (recognizing that § 7 "was intended to reach incipient monopolies and trade restraints outside the scope of the Sherman Act").

[27]** **[*1237]** We conclude that Lucas Automotive, as a competitor at the secondary level, *i.e.,* as a customer in a market controlled by a monopolist, has standing to assert a § 7 claim for equitable relief, including divestiture, under § 16. It established a *prima facie* case, both that it was an active participant in the vintage tire market and that Coker Tire's conduct in that market violated § 7. This showing was thus sufficient to avoid summary judgment on Lucas Tire's Clayton Act § 7 claim for equitable relief.

III

We affirm the district court's grant of summary judgment dismissing Lucas Automotive's claim for damages under § 4 of the Clayton Act. As for Lucas Automotive's claim for equitable relief under § 16, we reverse the district court's grant of summary judgment and remand for further proceedings consistent with this opinion. Each side shall bear its own costs on appeal.

AFFIRMED IN PART, REVERSED IN PART, and REMANDED.

Dissent by: DIARMUID F. O'SCANNLAIN

Dissent

O'SCANNLAIN, Circuit Judge, dissenting only as to Part II.B.2.

I respectfully dissent from Part II.B.2 of the opinion, written by Judge Tashima.

[5] The dissent faults Lucas Automotive for not having offered "a shred of evidence as to the cross elasticity of demand between original equipment vintage tires of different sizes." What there is not a shred of evidence on is that there is any substitutability between original equipment vintage tires of different sizes. Moreover, in these circumstances, the burden to show cross elasticity of demand to defeat plaintiff's *prima facie* case would seem to fall on Coker Tire. Lucas Automotive should not be required to prove a negative - the non-existence of a cross elasticity of demand.

The majority holds that Lucas Automotive has consumer standing to assert **[**28]** a *section 7* claim for equitable relief, including divestiture, under section 16 of the Clayton Act. However, our decision in *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421 (9th Cir. 1995)*, viewed in conjunction with the Supreme Court's decision in *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*, compels the opposite conclusion.

As the Supreme Court held in *Cargill,* in order to establish antitrust standing to sue for divestiture under section 16 of the Clayton Act, a plaintiff is required to "allege threatened loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" *Cargill, 479 U.S. at 113* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))*. The majority concludes that, as a purchaser of tires at the subdistributor level, Lucas Automotive is threatened with antitrust injury resulting from Coker Tire's acquisition of market power at the distributor level. I respectfully disagree with the majority's conclusion, as it conflicts with our decision in *Rebel Oil*. **[**29]**

In *Rebel Oil,* we held that market power may be demonstrated in one of two ways. First, the plaintiff may offer "direct evidence of the injurious exercise of market power." *51 F.3d at 1434*. Lucas Automotive offers no direct evidence of a threat of the injurious exercise of market power by Coker Tire.

Second, the plaintiff may offer "circumstantial evidence pertaining to the structure of the market." *Id.* To demonstrate market power circumstantially, a plaintiff must: "(1) define the relevant market, (2) show that the defendant owns a dominant share of that market, and (3) show that there are significant barriers to entry *and show that existing competitors lack the capacity to increase their output in the short run.*" *Id. at 1434* (emphasis added).

The majority concludes that, after its acquisition of the right to distribute Firestone tires, Coker Tire possessed market power at the distributor level. However, although the majority does offer support for its conclusions that Coker Tire owns a dominant share of the relevant market and that there are significant barriers to entry, it fails to point to evidence in the record sufficient to demonstrate that Coker Tire's competitors, **[**30]** including Kelsey Tire, lack the capacity to expand their output in response to a price increase by Coker Tire.

Lucas Automotive argues in its brief that "Coker . . . has the power to restrict output and raise prices without a competitive response, and to exclude competition." In support of this assertion, Lucas Automotive cites only a conclusory statement by Stanley Lucas. However, conclusory allegations unsupported by factual data are insufficient to defeat a motion for summary judgment. *See* *Angel v. Seattle-First Nat'l Bank, 653 F.2d 1293, 1299 (9th Cir. 1981)*.

The only support that the majority offers for its tenuous (but essential to its holding) conclusion that Kelsey Tire "lacks the capacity to increase [its] output in the short **[*1238]** run," *Rebel Oil, 51 F.3d at 1434*, is that "the Goodyear brand of vintage tires controlled by Kelsey is limited in terms of size." *See* Majority Opinion at 2898. Lucas Automotive has offered not a shred of evidence as to the cross elasticity of demand [1] between original equipment vintage tires of different sizes. Consequently, it is difficult to understand (based on the record before us) how the fact that Coker Tire distributes a greater **[**31]** range of tire sizes than Kelsey Tire suggests that Kelsey Tire cannot "increase [its] output in the short run" following a price increase by Coker Tire. [2] *See* *Rebel Oil, 51 F.3d at 1434*. Indeed, the majority's analysis only seems to underscore why Lucas Automotive failed to produce sufficient evidence to survive summary judgment.

I would affirm the district court's holding that Lucas Automotive lacks standing under section 16 of the Clayton Act.

---

[1] The cross elasticity of demand measures the percentage change in the quantity of a good demanded for each one-percent change in the price of a substitute good. *See* H. Hovenkamp, *Economics and Federal* ***Antitrust Law*** Par. 1.1, at 62 (1985).

[2] I do not take the majority's analysis as challenging the district court's conclusion that the relevant market is that of original equipment vintage tires, as distinguished from original equipment vintage tires of a particular size.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Tying arrangements can be deemed illegal per se or be found to violate the rule of reason. Per se liability exists where the defendant is found to have appreciable market power in the tying market. In such cases, the ability to leverage this power to restrain trade in the tied market is presumed and no inquiry need be made into the actual prevailing market conditions in that market. Where appreciable tying market power cannot be shown, inquiry into the tied product market cannot be avoided, and the plaintiff therefore has the more difficult burden of showing that the arrangement violated the rule of reason because it unreasonably restrained competition in the tied product market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Reciprocal Dealing

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN9[] **Exclusive & Reciprocal Dealing, Reciprocal Dealing**

The per se test is used in cases where exploitation of leverage in the market for the tying product is probable. The elements of a per se claim are (1) the defendant seller must sell two distinct products; (2) the seller must possess market power in the tying product market; and (3) a substantial amount of interstate commerce must be affected. Where such elements are shown, the defendant's tying practices are condemned without further proof of anti-competitive effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

In order to impose per se antitrust liability, it must be shown that the defendant had appreciable economic power in the tying market. Market power is defined as the ability to raise prices or to require purchasers to accept burdensome terms that could not be exacted in a completely competitive market.

Evidence > ... > Exceptions > Residual Exception > Trustworthiness

HN22[] Criminal Offenses, Racketeering

The use of economic fear in business negotiations between private parties is not inherently wrongful.

Criminal Law & Procedure > ... > Extortion > Hobbs Act > General Overview

HN23[] Hobbs Act, Elements

The reach of the Hobbs Act is limited in cases, which involve the use of economic fear in a transaction between two private parties. The limitation is that a defendant is not guilty of extortion if he has a lawful claim to the property obtained.

HN24[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

Use of fear of economic loss is wrongful when employed to achieve the wrongful purpose of obtaining property to which one is not entitled.

Criminal Law & Procedure > ... > Racketeering > Extortion > Elements

Criminal Law & Procedure > ... > Racketeering > Extortion > General Overview

HN25[] Extortion, Elements

In a hard bargaining scenario the alleged victim has no pre-existing right to pursue his business interests free of the fear he is quelling by receiving value in return for transferring property to the defendant, but in an extortion scenario the alleged victim has a pre-existing entitlement to pursue his business interests free of the fear he is quelling by receiving value in return for transferring property to the defendant.

Criminal Law & Procedure > ... > Racketeering > Extortion > Elements

Criminal Law & Procedure > ... > Racketeering > Extortion > General Overview

HN26[] Extortion, Elements

Any intentional exploitation of fear by defendants is only part of hard bargaining in a deal which results in plaintiff receiving a benefit to which it is not otherwise entitled by law. Accordingly, defendants do not obtain property from plaintiff to which they have no lawful claim and therefore do not commit extortion.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN31[] **Intentional Interference, Elements**

Pennsylvania recognizes both interference with existing contractual relations and interference with prospective contractual relations as branches of the tort of interference with contract. While the two branches of tortious interference are distinct, they share essentially the same elements.

Torts > ... > Prospective Advantage > Intentional Interference > Defenses

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN32[] **Intentional Interference, Defenses**

In order to prevail on a claim for intentional interference with contractual or prospective contractual relations, a plaintiff must prove the existence of a contractual, or prospective contractual relation between itself and a third party; purposeful action on the part of the defendant, specifically intended to harm the existing relation, or to prevent the prospective relation from occurring; the absence of a privilege or justification on the part of the defendant; the occasioning of actual legal damage as a result of the defendants' conduct; and for prospective contracts, a reasonable likelihood that the relationship would have occurred but for the interference of the defendant.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN33[] **Intentional Interference, Elements**

One who intentionally causes a third person not to enter into a prospective contractual relation with another who is his competitor or not to continue an existing contract terminable at will does not interfere improperly with the other's relation if the relation concerns a matter involved in the competition between the actor and the other and the actor does not employ wrongful means and his action does not create or continue an unlawful restraint of trade and his purpose is at least in part to advance his interest in competing with the other. The fact that one is a competitor of another for the business of a third person does not prevent his causing a breach of an existing contract with the other from being an improper interference if the contract is not terminable at will.

Torts > ... > Commercial Interference > Contracts > General Overview

HN34[] **Commercial Interference, Contracts**

Competition is a necessary or desirable incident of free enterprise. Superiority of power in the matters relating to competition is believed to flow from superiority in efficiency and service. If the actor succeeds in diverting business from his competitor by virtue of superiority in matters relating to their competition, he serves the purposes for which competition is encouraged. If, however, he diverts the competitor's business by exerting a superior power in affairs unrelated to their competition there is no reason to suppose that his success is either due to or will result in superior efficiency or service and thus promote the interest that is the reason for encouraging competition. For this reason economic pressure on the third person in matters unrelated to the business in which the actor and the other compete is treated as an improper interference.

Torts > ... > Commercial Interference > Contracts > General Overview

HN35[] **Commercial Interference, Contracts**

Plaintiff is required to show that the defendant employed economic pressure and a superior power in the unrelated market as requiring evidence that the defendant used its economic power in that market to coerce the third party's decision in the competitive market. In order to show coercive pressure, the plaintiff must prove that the defendant exercised some market power in the unrelated market -- lest the third party simply ignore its demands. However, there is no reason why economic coercion cannot be generated by market power that, while not sufficient to violate the Sherman Act, is nonetheless not insignificant.

Torts > ... > Commercial Interference > Contracts > General Overview

HN36[] **Commercial Interference, Contracts**

Unlike federal ***antitrust law***, state tortious interference law is designed to protect competitors not competition. In this regard, it bases liability for competitors, in part, on the means of competition employed and their effect on a single competitive interaction.

VI. CONCLUSION

I. INTRODUCTION:

The revolutionary changes in the health care field over the past decade have spawned many novel market arrangements. Perhaps the most significant development is the ascendancy of managed-care driven health maintenance organizations ("HMOs"), whose hold over a large number of subscribers has permitted them **[**4]** to wield considerable economic power over health care providers. This antitrust, civil RICO, and state law tortious interference case against defendant U.S. Healthcare, one of the nation's largest HMO's, two of its wholly-owned subsidiaries, and three of its top officers, is an exemplar of the legal fallout from this development.

This appeal presents several quite difficult and important first impression questions for us, including: (1) whether the defendants' use of economic fear in the context of hard business bargaining constitutes wrongful conduct amounting to extortion for civil RICO purposes; (2) whether the inability of the plaintiff to prevail on antitrust and extortion-based civil RICO claims forecloses a successful state law tortious interference claim based on the same facts; and (3) whether the defendants' hard bargaining constituted "wrongful means" so as to forfeit the defense of privileged business competition to a tortious interference claim.

The lawsuit emanates from U.S. Healthcare's refusal to approve the application of a new Abington, Pennsylvania store of "I Got It at Gary's" ("Gary's"), a small southeastern Pennsylvania pharmacy, health and beauty aid chain, **[**5]** for membership in U.S. Healthcare's network of medical prescription providers. U.S. Healthcare conditioned membership in its provider network on Gary's agreement to discontinue its contractual relationship with plaintiff Brokerage Concepts, Inc. ("BCI"), a health care consulting firm whose specialty is serving as a Third Party Administrator ("TPA") for health benefit self-insurers (such as Gary's), and to give its TPA business to a U.S. Healthcare subsidiary, Corporate Health Administrators ("CHA").

U.S. Healthcare also applied pressure on Gary's in other ways -- through "hard-ball" negotiation tactics, which deliberately left Gary's "hanging" as to whether its new application would be approved, and a seemingly vindictive audit of Gary's generic prescription drug dispensing policy at one of its stores that was already part of the U.S. Healthcare network. Since U.S. Healthcare subscribers constituted a significant portion of its customer base, Gary's understandably yielded to the pressure and gave its TPA business to CHA. BCI thereupon sued in federal district **[*502]** court asserting Sherman Act and civil RICO claims, as well as a claim of tortious interference with contractual **[**6]** relations under Pennsylvania law. BCI sought compensatory and treble damages, injunctive relief, and counsel fees on its antitrust and civil RICO claims, and compensatory and punitive damages on its state law tortious interference claim. Gary's is not a party to the lawsuit.

The case proceeded to trial before a jury, which rendered a verdict finding U.S. Healthcare and its officers liable to BCI on all of BCI's claims, and awarding compensatory and punitive damages. On post-trial motions, the district court upheld the verdict but ruled that: (1) BCI must elect between the punitive damages awarded on its state law claim and the treble damages awarded on its federal claims (i.e., that it cannot recover both); and (2) if it elects the state law remedies, BCI cannot also collect the attorney's fees that are available under its RICO and antitrust claims. The defendants' appeal of the district court's denial of its post-verdict motion for judgment as a matter of law or, in the alternative, for a new trial, attacks the jury verdict on all fronts, asserting that the verdict is tainted by erroneous evidentiary rulings and jury instructions, and also that there is insufficient evidence to sustain **[**7]** any of the claims under proper instructions. BCI cross-appeals, contending that, under *Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 218-19 (3d Cir. 1992)*, the district court erred in requiring BCI to elect which remedies it will recover, and also in refusing to award injunctive relief to BCI under either RICO or the antitrust laws.

Because all three of BCI's claims are grounded upon U.S. Healthcare's leveraging of its economic power, and because, under the jury instructions given by the district court, the RICO and state law claims may depend on the existence of a viable antitrust claim, the threshold doctrinal battleground has been over ***antitrust law***. This aspect of the case is quite complex, not because of the need for sophisticated economic analysis or the resolution of any close or cutting-edge trade regulation issue, but rather because of the difficulty of attempting to shoehorn into the traditional antitrust model a claim that resists such characterization.

The matter was presented to the district court primarily as a tying case, under which a plaintiff can assert both a *per se* and a "rule of reason" claim. In a typical tying case, a seller leverages **[**8]** its market power in the market for the tying product to require the buyer of the product to purchase an unwanted product in the tied market, thereby (unlawfully) foreclosing competition in that market. But Gary's, the party who has been "put upon," is a seller, not a buyer, in the tying product market: when U.S. Healthcare accepts Gary's into its network of providers, what Gary's gains is the opportunity to sell drugs to U.S. Healthcare subscribers. The defendants, in contrast, contend that the case is better viewed as one of reciprocal dealing which, they submit, carries with it less stringent antitrust standards.

As will appear, our disposition of BCI's antitrust claim will take us through a number of layers of analysis, dealing with both its *per se* and rule of reason claims, and in the course thereof treating such matters as product market definition (and the applicability *vel non* of the decision in *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992))*; geographic market definition (and the lack of utility of a flawed market survey in identifying the market); and above all, with the sufficiency of the record **[**9]** evidence (including the inferences which can be drawn therefrom) to support a legally viable antitrust claim. In the end, we conclude that, since the record before us does not support a finding that U.S. Healthcare exercised appreciable market power in a properly defined tying market, or that the arrangement at issue harmed competition in the tied market, the antitrust jury verdicts on both the *per se* and the rule of reason claims must be set aside.

In support of its civil RICO claim, BCI alleges a variety of predicate acts, as a civil RICO claim requires. Although we deal with all of the predicate acts invoked, rejecting defendants' contention that BCI lacks RICO standing, the only acts that arguably could come within RICO's ambit are alleged **[*503]** extortionate acts by the defendants. ***HN1***[] Under the Hobbs Act, *18 U.S.C. § 1951*, "extortion" is defined as "the obtaining of property from another, with his consent, induced by wrongful use of actual or threatened force, violence, or fear." *18 U.S.C. § 1951(b)(2)*. The "fear" may be of economic **[**10]** loss as well as of physical harm. *See* *United States v. Addonizio, 451 F.2d 49, 72 (3d Cir. 1972)*. In this case, the evidence is clear that U.S. Healthcare employed economic leverage in an effort to force Gary's to chose CHA as its TPA. However, while BCI contends that this conduct amounts to extortion through the wrongful use of the fear of economic loss, defendants assert that the conduct is merely hard business bargaining that cannot be made to fit within the statutory framework of Hobbs Act extortion.

As will be shown, resolution of BCI's extortion claim turns on whether the defendants' use of economic fear in the context of hard business bargaining was legally wrongful, an issue with which we have not previously had occasion to deal. We conclude that ***HN2***[] the "claim of right" defense to extortion (i.e., a defense based on a lawful claim to the property obtained by the allegedly extortionate acts) formulated by the Supreme Court in *United States v. Enmons, 410 U.S. 396, 35 L. Ed. 2d 379, 93 S. Ct. 1007 (1973)*, is applicable in cases, such as this one, which **[**11]** involve solely the allegation of the use of economic fear in a transaction between two private parties. In so concluding, we are mindful of, and address, those cases that reject the broad application of *Enmons* outside of the labor context in which it arose for fear that it would "effectively repeal the Hobbs Act." *See* *United States v. Agnes, 753 F.2d 293 (3d Cir. 1985)*.

Having determined that the claim of right defense is available to the defendants in this case, we address the difficult problem of separating out lawful from unlawful claims to property. We make no effort to announce any broad principles in this difficult area. Drawing instruction from *Enmons* and *Viacom Int'l v. Icahn, 747 F. Supp. 205 (S.D.N.Y. 1990)*, we make a rule only for a very narrow subset of the potential universe of extortion cases: one involving the accusation of the wrongful use of economic fear where two private parties have engaged in a mutually beneficial exchange of property. We conclude that BCI's extortion claim can only survive if Gary's had a right to pursue its business interests free of the fear that it would be excluded from U.S. Healthcare's provider **[**12]** network. Albeit with misgivings, we find that since Pennsylvania, unlike other states, has no "Any Willing Provider" law that compels HMOs to allow *all* interested and minimally qualified providers into their network, BCI had no such right. If such a law was in force, Gary's would have had a legal entitlement to be a member of the provider network and thus to be free of the fear that it would be excluded from that network if it did not switch TPA providers. Having determined that BCI did not present a sustainable case of extortion, or establish any of the other predicate acts alleged, we set aside the jury verdict as to the civil RICO count.

That BCI's federal claims have fallen is not, however, the end of its case. BCI also alleges the defendants unlawfully and improperly interfered with its existing and prospective contractual relations with Gary's in violation of Pennsylvania tort law. While BCI must prove a number of things to prevail on a tortious interference claim under Pennsylvania law, only one is in serious dispute here. The battleground is over *Restatement (Second) of Torts § 768* which sets forth a competitors privilege, and in fact over only one facet of that section, **[**13]** *§ 768(1)(d)*, which withdraws immunity from liability if the competitor employs "wrongful means." The Pennsylvania Supreme Court has yet to define that term and hence we must predict how it would do so to resolve this case.

The parties' debate in this area was focused primarily on whether Pennsylvania would limit wrongful means to conduct that is independently actionable. While the parties have ably briefed that point, the disposition of BCI's claim does not require us to resolve it. Rather, we conclude, based upon a passage from *§ 768 comment (e)*, that even if the Pennsylvania Supreme Court were to require independently actionable means, it would not apply that requirement in cases, **[*504]** such as this one, where the defendant exerted "economic pressure" or "a superior power" in a market *unrelated* to the competitive market. Here, BCI proffered ample evidence from which a jury could conclude that U.S. Healthcare attempted to acquire Gary's TPA business by threatening Gary's with withdrawal of membership in the U.S. Healthcare provider network, an unrelated market. BCI also adduced evidence of heavy-handed tactics by U.S. Healthcare in that market for pharmacy customers.

[14]** In addition to our analysis of the substance of Pennsylvania tort law, we address defendants' more fundamental argument that tort liability is not appropriate here. The crux of that argument is that BCI's tort claims are predicated on the same conduct that underlie its federal claims, and that the law should therefore not permit BCI to repackage these failed claims as tortious interference. As will be shown, in our view, BCI has attempted just the opposite. That is, it has taken conduct that constitutes tortious interference with contractual relations and has attempted to turn it into a violation of both federal antitrust and racketeering laws. While these attempts have been frustrated on this appeal, that result does not foreclose BCI's state law claim. BCI's tortious interference claim does not require proof of criminal conduct as does its extortion claim, nor is it anchored in the same kind of market based considerations as is its antitrust claim. We see no need for congruence between federal ***antitrust law***, which is designed to protect competition and free access to markets, and state business tort law, which is designed to protect competitors.

Notwithstanding this conclusion, **[**15]** the tortious interference verdict cannot stand, and a new trial on the tort claims is necessary, because the jury instructions permitted the jury to find tortious interference based on antitrust and/or civil RICO violations which, we have concluded, did not exist. Hence, while we reverse outright on the antitrust and civil RICO claims, we will remand the tortious interference claims for a new trial. We intimate no view on the question whether defendants' behavior was outrageous enough to justify an award of punitive damages under Pennsylvania law; that will be for determination on remand. Since the antitrust and RICO claims are out of the case, we also need not address the question of the propriety of injunctive relief for either RICO or antitrust claims, or the interesting issues posed by the cross-appeal.

II. FACTS & PROCEDURAL HISTORY

A. The Parties

BCI serves as a TPA for employers who wish to self-insure for their health benefits and other insurance needs. In this capacity, BCI designs the employer's self-insured benefit plan and usually recommends a health services provider network. The providers in the network then supply the health care, and BCI reviews and processes **[**16]** the resulting claims for the employer. In addition, BCI typically helps the employer purchase "stop-loss" insurance policies that cap the employers' exposure for large individual and aggregate claims. BCI also serves as an insurance broker for employees who choose to purchase fully-insured policies.

U.S. Healthcare develops, owns, operates, and markets HMOs in many states in the eastern United States, including Pennsylvania and New Jersey. These HMOs are operated by wholly owned subsidiaries, including defendant United States Healthcare Systems of Pennsylvania, Inc., d/b/a The Health Maintenance Organization of Pennsylvania ("HMO PA"), which operates as U.S. Healthcare's HMO for Pennsylvania. As of December 31, 1994, U.S. Healthcare and its subsidiaries had approximately 1,695,000 subscribers enrolled in its insured plans.

CHA is also a wholly owned subsidiary of U.S. Healthcare. It is a TPA, and provides the same type of services for self-insured employers as does BCI. In the geographic areas in which U.S. Healthcare operates an HMO, CHA utilizes only the U.S. Healthcare network of doctors and hospitals. Similarly, U.S. Healthcare bars all TPAs other than CHA access to its network. **[**17]** At all times relevant to the present dispute, defendant Richard Wolfson was the Director of Pharmacy Programs and the Chairman of the Board of U.S. Healthcare, defendant William **[*505]** Brownstein served as the Regional Pharmacy Director for Pennsylvania, and defendant Scott Murphy was the Senior Vice President of U.S. Healthcare, and the senior marketing executive for CHA. We will at times refer to U.S. Healthcare, CHA, and HMO PA collectively as the "corporate defendants," and Wolfson, Brownstein and Murphy collectively as the "individual defendants."

B. *Gary's Decision to Self-insure*

U.S. Healthcare has established a network of health care providers which includes doctors, hospitals, and pharmacies in various geographic regions. Under the U.S. Healthcare prescription purchase program, individuals who enroll as subscribers in U.S. Healthcare's HMOs select one pharmacy from the network of providers at which they will purchase prescription drugs. Subscribers can change their pharmacy designation by filling out a form. Under this program, subscribers can purchase their prescription drugs for a small co-payment (such as $ 5.00), with the rest of the cost of the prescription **[**18]** reimbursed to the pharmacy by U.S. Healthcare. In addition, U.S. Healthcare pays the pharmacies that serve the prescription purchase plan a set monthly amount based on the number of U.S. Healthcare subscribers designating that pharmacy, without regard to the actual purchases of drugs from that pharmacy. Because subscribers seldom purchase prescription drugs from pharmacies other than those within the network, membership in the U.S. Healthcare network is highly coveted.

In 1991, Eagleville Pharmacy, Incorporated, d/b/a/ I Got It At Gary's ("Gary's") was a pharmacy chain of four stores in suburban Philadelphia. All four stores served as approved providers in the U.S. Healthcare pharmacy network. At this time, Gary's offered its full-time employees two options for their health insurance coverage: a Blue Cross/Blue Shield plan and a U.S. Healthcare HMO. Approximately 35 Gary's employees enrolled as U.S. Healthcare members. In 1991, to save costs, Gary's decided to terminate its relationship with Blue Cross/Blue Shield and U.S. Healthcare, and to self-insure.

In need of a TPA to process its claims, Gary's evaluated several contenders, and then entered a written contract with BCI, terminable **[**19]** upon 30 days prior written notice. Sandra Chen, the benefits manager at Gary's, sent termination letters to Blue Cross/Blue Shield and U.S. Healthcare. [1] **[**20]** In response to the letter, Chen testified that she received an angry and verbally abusive phone call from an unidentified U.S. Healthcare marketing executive. [2] So began the wrath of U.S. Healthcare. Upon receipt of Gary's letter terminating its insurance contract, David Rocchino, one of U.S. Healthcare's sales vice-presidents, telephoned Wolfson to inform him of the new development and expressed his displeasure. Wolfson became "upset" that Gary's had decided to self-insure, and knowing that Gary's was approved to serve as a pharmacy for U.S. Healthcare subscribers, promptly ordered an internal "quality assurance" review of the generic utilization rates of Gary's stores. Wolfson admitted at trial that his only reason for ordering such a review was that Gary's had terminated U.S. Healthcare coverage for its employees, but he testified that ordering a retaliatory review was not inappropriate. [3]

[*506] In August 1993, Gary's opened its fifth store, in Abington, Pennsylvania. Gary's applied for admission of the new store to U.S. Healthcare's pharmacy network. Wolfson, acting as director of U.S. Healthcare's pharmacy program, advised Brownstein not to process the application. **[**21]** U.S. Healthcare's executives acknowledged in their testimony that their motivation in refusing to process Gary's application was retaliatory, based on a belief that Gary's did not deserve U.S. Healthcare's business once Gary's had terminated U.S. Healthcare's contract in a manner that Wolfson and Brownstein found to be offensive. In compliance with Wolfson's instructions, Brownstein did not process the application. However, at this time, no one at U.S. Healthcare told Gary's of the decision to

---

[1] The letter to U.S. Healthcare read:

> Dear Sirs:
>
> This letter is to advise U.S. Healthcare that effective June 30th, 1991, . . . Gary's will discontinue its medical insurance coverage with your organization. Please adjust your records to reflect this upcoming change and advise me of any information you may need to finalize our relationship.

[2] In contrast, Chen testified to the receipt of a polite and professional phone call from a Blue Cross/Blue Shield representative, inquiring if they could accommodate Gary's needs in anyway and as to the reason behind Gary's decision to cancel their health care contract.

[3] When asked by BCI's counsel whether he ordered the review of Gary's in response to Gary's decision to terminate with U.S. Healthcare, Wolfson responded:

> Well, I didn't think it was appropriate with an account that we had a relationship with just to send a "dear sir" letter [of termination] to a post office box . . . . I didn't feel that they were giving us due consideration and if they were operating in that fashion, I wanted to look to see if in fact there were any other issues related to the I Got It At Gary's Pharmacies.

refuse to process the application. Instead, Gary's was informed that the application would be processed in due course. As Wolfson conceded at trial, the plan was to "let [Gary's] hang . . . until they did something."

At the same time that Gary's Abington store applied for membership in the pharmacy network, U.S. Healthcare, at the instruction of Brownstein, performed a two-day, on-site audit of the utilization of generic drugs at Gary's store in Eagleville, Pennsylvania. The audit measured the pharmacy's compliance with the requirement of U.S. Healthcare's provider agreement that generic drugs be used whenever possible to contain costs. The audit results suggested that Gary's dispensed brand-name **[**22]** drugs instead of generic drugs at a rate higher than the median of the U.S. Healthcare provider, and lacked complete documentation of prescription requests. Brownstein's audit also demonstrated that the average cost-per-prescription to U.S. Healthcare at the Eagleville pharmacy was in line with the network median, so that the store's prescriptions were not costing U.S. Healthcare more on average than other pharmacies. Brownstein forwarded the audit results to the Quality Assurance Committee, which referred the matter to the Peer Review Committee. The Peer Review Committee, consisting of three outside pharmacists, had the power to recommend sanctions to Wolfson, who would then decide whether or not to impose them.

On November 16, 1993, the Peer Review Committee recommended that Gary's Eagleville store be put on "freeze" for three-months. The freeze was implemented and, as a result, U.S. Healthcare removed the Eagleville store from the list of approved pharmacies, and new U.S. Healthcare subscribers could not designate that store as their location for purchasing prescription drugs. In contrast to the treatment of Gary's, other pharmacies with generic drug utilization rates lower than **[**23]** the Eagleville pharmacy and less complete documentation of prescription requests, had not been "frozen," and instead had received lesser or no sanctions. In fact, the parties stipulated that out of the approximately 1300 pharmacies in the U.S. Healthcare network for southeastern Pennsylvania and southern New Jersey, the freeze sanction had been imposed for generic utilization reasons only four times (including its use against Gary's) in all of 1993 and 1994.

Although the extent to which Wolfson and Brownstein were involved in the implementation of the freeze sanction is unclear, both had participated regularly in Quality Assurance and Peer Review Committee meetings. Brownstein later cited the results of the audit on the Eagleville store as the reason for the delay in processing the Abington store's application for membership in the pharmacy network, stating that U.S. Healthcare had concerns about Gary's dispensing too many brand-name drugs at its stores.

Faced with a freeze on its Eagleville store and no movement on the Abington store's application for membership in the pharmacy network, Gary's President, Gary Wolf, set up a meeting with U.S. Healthcare officials, including Wolfson **[**24]** and marketing executive Scott Murphy, for December 1, 1993. Among the issues discussed were Gary's generic drug use and the admission of the Abington store to the U.S. Healthcare provider network.

U.S. Healthcare expressed its displeasure with Gary's termination of U.S. Healthcare coverage in 1991, and Wolfson commented that "we like to do business with people who do business with us." At the same meeting, U.S. Healthcare requested and received permission to bid on Gary's **[*507]** TPA business for the next annual contract period.

C. *Gary's Switch to CHA/U.S. Healthcare*

Following the meeting with U.S. Healthcare, Wolf instructed his sister, Robin Risler, the Director of Human Resources at Gary's, to "take a look at" switching to the TPA services offered by CHA at the anniversary date of Gary's contract with BCI (at which time the contract could be terminated with 30 days advance notice.) Concurrently, Wolf sent a letter to Wolfson (dated December 6, 1993) expressing, among other things, his "commitment that we will do everything possible to afford [U.S. Healthcare/CHA] the opportunity to service our company's needs as long as the programs are mutually beneficial", and requesting **[**25]** that U.S. Healthcare consider acting on the pending application for Gary's Abington store.

When the December 6 letter failed to produce any movement on the Abington store, Wolf explained to Chen that, in order to get the Abington store approved, Gary's needed to "appease" U.S. Healthcare, and instructed her to write a further letter to U.S. Healthcare assuring them that Gary's would consider CHA's bid for its TPA services. This letter, dated January 3, 1994, and addressed to Murphy, was more explicit then the December 6 letter. It stated:

> As you requested, I am writing you to acknowledge the agreement made between I got it at Gary's and U.S. Healthcare. We agree that as long as there are no additional costs to the plan or reduction in service, US Healthcare will assume the role of TPA for our self insured medical plan on July 1, 1994.
>
> * * *
>
> We also understand that in anticipation of our strengthening relationship, US Healthcare will release the provider number for our pharmacy in Abington, PA.

Chen testified that once this letter was written, it was a "foregone conclusion" that, as long as CHA's bid was comparable and for the same services, Gary's would **[**26]** switch to CHA. As of this time, CHA had not yet submitted a formal proposal to Gary's.

In January 1994, within weeks of Chen's letter, U.S. Healthcare had inspected the Abington pharmacy, and, without further ado, approved its participation in the provider network. Brownstein testified that he was informed that Gary's had agreed to switch TPAs to CHA, and "on the basis of that," was instructed to enroll Gary's Abington store in the provider network. U.S. Healthcare acted with such speed in approving the Abington store's application for membership in the provider network that it failed to follow its own standard approval procedures, and did not present the store's application to the Membership Application Credentials Committee until after the pharmacy was already participating as a provider.

In February 1994, U.S. Healthcare lifted the freeze on the Eagleville store. Similarly, Gary's sixth pharmacy in Aston, Pennsylvania, was accepted into the provider network without delay. At approximately this same time, Robin Risler, who testified that, ultimately, the selection of a TPA was her responsibility, hired an insurance broker to assist her in evaluating the competing TPAs. In early **[**27]** June 1994, both BCI and CHA submitted bids for Gary's TPA business, but CHA was given the opportunity to review BCI's bid before submitting its final proposal. In May 1994, even before Gary's had received a proposal from U.S. Healthcare, Risler told Lori Manley, the BCI customer service representative, that Gary's would be switching to CHA/U.S. Healthcare. Manley testified that Risler confided that she felt she was being "strong-armed" by U.S. Healthcare, that "she herself did not want to leave BCI" and that the decision "was out of her control." Two other BCI employees similarly testified that in the spring of 1994, Risler denied having any real choice in the decision to give Gary's TPA business to CHA in light of the loss of U.S. Healthcare's business that Gary's would suffer if it failed to switch TPAs. The testimony with respect to Risler of Manley and the two additional BCI employees was admitted over U.S. Healthcare's objection as state of mind evidence. *See infra* note 31.

As the time for Gary's formal switch to CHA drew near, U.S. Healthcare scheduled **[*508]** another on-site "quality assurance" audit, this time of Gary's Lansdale store for June 16, 1994. In the second **[**28]** week of June, Risler officially informed BCI of Gary's decision to give its TPA business to CHA. After Gary's decision was officially announced, the audit of the Lansdale store uncovered no problems. Moreover, there were no further audits of Gary's pharmacies.

The reasons behind Risler's decision to switch to CHA are in dispute. BCI's TPA expert, Carlton Harker, testified that for the one year period of 1994-95, the BCI proposal would have saved Gary's approximately $ 64,000, or 14%, compared to the proposal submitted by CHA. Harker further testified that he did not perceive any significant differences in the services provided under the respective plans that would explain the cost differential. Risler testified that, in making the decision to give Gary's TPA business to CHA, she was motivated by non-price, quality of service reasons. She also acknowledged, however, that she had been satisfied with BCI's services. At all events, the results of the decision are clear -- BCI lost its contract with Gary's.

In March 1995, BCI filed the present suit challenging the defendants' actions that preceded Gary's decision to terminate its TPA contract with BCI. BCI proceeded at trial against defendants **[**29]** on four counts. Count I alleged that U.S. Healthcare, HMO PA, and CHA violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*, by tying the participation by Gary's in the U.S. Healthcare pharmacy network to the purchase of CHA's TPA services for Gary's employees. In Count II, BCI alleged that all defendants violated the Racketeer-Influenced and Corrupt

Organizations Act ("RICO"), *18 U.S.C. § 1961 et seq.*, by engaging in or conspiring to commit at least two acts of racketeering activities, among them extortion, bribery, mail and wire fraud, and violations of the Travel Act.

In a Count III, BCI also contended that, to the extent that defendants Wolfson, Murphy, and Brownstein were not principal wrongdoers, they are liable for aiding and abetting under RICO. Finally, in Count IV, BCI alleged that all defendants tortiously interfered with its existing or prospective contractual relationship with Gary's in violation of state law. BCI sought treble damages and attorneys fees under its federal law claims. It also sought punitive damages from each defendant in connection with its state law claim.

D. Economic Evidence

1. Impact on Gary's

[30]** BCI argued at trial that Gary's ability to operate profitably depended on the business of U.S. Healthcare subscribers. As evidence, BCI pointed to the parties' stipulation that, as of December 1993, when Wolfson told Gary Wolf that U.S. Healthcare likes to do business with people "who do business with us," 9,178 U.S. Healthcare subscribers had designated Gary's as their provider pharmacy, and that in 1993, Gary's subscribers purchased $ 1.66 million of prescription drugs. BCI's expert Dr. Calvin Knowlton, who is an associate professor and Chair of the Department of Pharmacy Practice and Pharmacy Administration at the Philadelphia College of Pharmacy and Science, and the President of the American Pharmaceutical Association, testified that, based on the stipulated information and Gary's Sales Reports, in 1993, U.S. Healthcare members accounted for between 3-15% of Gary's prescription drug sales, and, by 1995, for 20% of prescription drug sales in Gary's Montgomery County stores.

If Gary's operated as an unapproved pharmacy, any U.S. Healthcare subscriber who wanted to fill his or her prescription at Gary's would have to pay full price, instead of a small co-payment. Additionally, **[**31]** Gary's head pharmacist testified that prescription drug purchasers are valuable consumers because they typically purchase other items in addition to their prescription drugs. BCI also presented evidence that the prescription drug business of pharmacies is a low-margin business that depends on high volume in order to operate profitably. In order to maximize their sales, pharmacies typically become members of as many prescription drug plans as possible. Out of approximately 1300 participating pharmacies in southeastern Pennsylvania and southern New Jersey, only four pharmacies left the U.S. Healthcare pharmacy network in the period **[*509]** from January 1, 1993 to October 1, 1995 for reasons other than going out of business.

2. Knowlton's Survey

At trial, BCI presented a telephone survey of the market areas surrounding several of Gary's pharmacies, performed by Dr. Knowlton, which was admitted over objection. In this survey, pharmacy students telephoned six to eight pharmacies in the vicinity of three arbitrarily selected Gary's store locations and asked them a series of questions. Knowlton drew conclusions regarding U.S. Healthcare's market power based only on the responses **[**32]** of those stores that listed U.S. Healthcare as their primary HMO customer. He testified that based on this survey U.S. Healthcare's market share of prescription drug sales for the market areas served by the two largest Gary's pharmacies and the new Abington pharmacy was approximately 25%. Knowlton further testified that other sources of information indicated that his survey conclusions as to market share would apply generally in Montgomery County.

3. Interaction Between U.S. Healthcare and Other Pharmacy Operations

The jury also heard evidence of the interaction between U.S. Healthcare and Rite-Aid, Shop-Rite, Food Circus, Walmart, Phar-mor and Weis Markets. With respect to the pharmacy operation in each of these chains, U.S. Healthcare conditioned participation in the provider network upon their making U.S. Healthcare insurance available to their employees. Despite initial resistance, Rite-Aid, Phar-Mor and Weis Markets ultimately agreed to offer their employees U.S. Healthcare insurance products. There was, however, an absence of supporting evidence on the point, and it is not clear that these large companies made U.S. Healthcare a part of their benefits package in response **[**33]** to economic pressure rather than for legitimate business reasons.

Shop-Rite and Food Circus responded by filing complaints with the New Jersey Department of Insurance. [4] After the Department of Insurance took action, U.S. Healthcare agreed to accept the stores into its provider network notwithstanding their refusal to offer U.S. Healthcare coverage. The Walmart stores also resisted U.S. Healthcare's policy, choosing instead to forgo membership in the provider network. U.S. Healthcare did approve the Walmart stores in Massachusetts, where an Any Willing Provider statute was in force. Defendants' experts testified that linkage of network membership and purchase of TPA services was normal business behavior and was not anti-competitive.

[34]** *4. The Setting of Reimbursement Prices*

BCI also presented evidence of how U.S. Healthcare exercised its market power to set reimbursement prices. In January 1996, it effected a drastic reduction in the reimbursements it paid to participating pharmacies for prescription drugs dispensed to U.S. Healthcare subscribers. Dr. Knowlton testified that this reduction, when considered with the fact that U.S. Healthcare does not pay pharmacies a dispensing fee, made U.S. Healthcare's overall compensation to pharmacies the lowest of any third-party payor in the southeastern Pennsylvania region. Yet, notwithstanding the major reimbursement price reduction, only two pharmacies out of approximately 8000 in 12 or 13 states discontinued their participation in the U.S. Healthcare provider network.

Dr. Knowlton testified that, based on this evidence, and the evidence of U.S. Healthcare's successful dominance of other pharmacies, exclusion from the U.S. Healthcare provider network could threaten Gary's survival. As a result, he testified that Gary's had no choice but to accept U.S. Healthcare's arrangement.

E. The Jury Verdict

After 17 days of trial, the case was submitted to the jury on **[**35]** special interrogatories. The jury returned a verdict for BCI on all **[*510]** counts and awarded BCI $ 200,000 in compensatory damages. [5] The jury also awarded BCI $ 1,000,000 in punitive damages in connection with its tortious interference claim. That award was apportioned as follows: $ 400,000 against U.S. Healthcare, $ 200,000 against CHA, $ 100,000 against HMO PA, $ 200,000 against Wolfson, $ 75,000 against Murphy, and $ 25,000 against Brownstein.

[36]** At the close of BCI's case, and again at the close of all evidence, the defendants moved, pursuant to *Fed. R. Civ. P. 50(a)*, for judgment as a matter of law. These motions were denied. Following the verdict, defendants renewed their motion for judgment as a matter of law pursuant to *Fed. R. Civ. P. 50(b)*. Concurrently, defendants filed an alternative motion for a new trial pursuant to *Fed. R. Civ. P. 59*. The district court denied these motions in all respects. On appeal, defendants challenge the denial of these motions. The majority of the issues before us arise from the district court's denial of defendants' renewed motion for judgment as a matter of law, and, as to these issues, our review is plenary. *See Stelwagon Mfg. Co. v. Tarmac Roofing, 63 F.3d 1267, 1270-71 (3d Cir. 1995)* ("***HN3***[] The legal foundation for the jury's verdict is reviewed de novo while the factual findings are reviewed to determine whether the evidence and justifiable inferences most favorable to the prevailing party afford any rational basis for the verdict."). Where a different standard of review is implicated, **[**37]** it will be noted in the text.

---

[4] The record does not develop the extent to which these complaints may have been facilitated by New Jersey's enactment, in July 1994, of an Any Willing Provider statute which provides that a pharmacy cannot be excluded from an HMO if it "accepts the terms" of the HMO. *N.J. Stat. Ann. § 26:2J-4.7(a)(2)* (West 1996).

[5] The district court's initial order of judgment made it unclear whether BCI was to receive $ 200,000 in total compensatory damages, or to recover that amount separately on each of its three legal theories (thus allowing a total recovery of $ 600,000 in compensatory damages). In response to defendants' motion, pursuant to *Fed. R. Civ. P. Rule 59(e)*, to alter or amend the order of judgment, the district court subsequently amended its order to make clear that BCI may recover only once the $ 200,000 in compensatory damages that it was awarded. BCI does not dispute this point on appeal.

III. THE ANTITRUST ISSUES

A. Introduction -- Characterization of BCI's Claim

BCI's antitrust claim arises from U.S. Healthcare's decision to use the leverage acquired by virtue of its ability to provide Gary's access to thousands of potential pharmacy customers to pressure Gary's into selection of its subsidiary, CHA, as its TPA. BCI claims that this arrangement was an illegal tie in violation *§ 1* of the Sherman Act, ***HN4***[] *15 U.S.C. § 1*, which generally outlaws "every contract . . . in restraint of [interstate or international] trade or commerce." Defendants submit that their conduct was simply hard bargaining that is well within the mainstream of business conduct and does not form the basis of a cognizable antitrust claim.

At trial, BCI's theory of the case prevailed. The jury found that U.S. Healthcare's practices were illegal under both *per se* and rule of reason theories of antitrust liability. On appeal, defendants challenge the characterization of the arrangement at issue as a tying arrangement. They contend that the arrangement **[**38]** was one of reciprocal dealing and not tying, and that as a result the *per se* test for antitrust liability is inapplicable. Before turning to a review of the jury verdict, which the defendants challenge, we will consider the characterization question.

HN5[] Tying exists where a seller conditions the sale of one good (the tying product) on the buyer also purchasing another, separate good (the tied product). *See Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 475 (3d Cir. 1992)* (in banc). The antitrust concern over tying arrangements arises when the seller can exploit its market power in the tying market to force buyers to purchase the tied product which they otherwise would not, thereby restraining competition in the tied product market. [6] *See Allen-Myland, Inc. v. International* ***[*511]*** *Bus. Mach. Corp., 33 F.3d 194, 200 (3d Cir. 1994)*; *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*.

[39]** Unlike tying -- where one party is only a seller and the other only a buyer -- ***HN6***[] reciprocal dealing exists where "two parties face each other as both buyer and seller. One party offers to buy the other party's goods, but only if the second party buys other goods from the first party." *Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 424 (5th Cir. 1978)*. More colloquially, reciprocal dealing exists when one party tells the other: "I'll buy from you, if you buy from me." Again, like tying, not all reciprocal dealing arrangements are anti-competitive. ***HN7***[] The Sherman Act is concerned with what has been termed "coercive" reciprocal dealing, where a party uses its economic power as a purchaser in one market in order to restrict competition in another market where it is a seller. *See Betaseed, Inc. v. U & I, Inc., 681 F.2d 1203, 1216 (9th Cir. 1982)*. [7]

[40]** BCI argued, and the jury found, that U.S. Healthcare and CHA *tied* the purchase of CHA's TPA services to the right to continued participation in the U.S. Healthcare pharmacy network. In order to characterize this arrangement as a tie, U.S. Healthcare must be deemed to have "sold" Gary's the ability to participate in its pharmacy network, but only if Gary's also purchased CHA's TPA services. Defendants contend that BCI's characterization is not correct since U.S. Healthcare did not "sell" Gary's the ability to participate in the pharmacy network as participation in that network is free. In fact, the ultimate result of the contract was that money flowed in the opposite direction -- from U.S. Healthcare to Gary's in exchange for prescription drugs purchased by U.S.

[6] Of course, not all tying arrangements have anti-competitive effects in violation of the Sherman Act. The Supreme Court has twice made use of the following as an example of a tie that is not a concern of the antitrust laws: "If one of a dozen food stores in a community were to refuse to sell flour unless the buyer also took sugar it would hardly tend to restrain competition if its competitors were ready and able to sell flour by itself." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* (quoting *Northern Pac. R. Co. v. United States, 356 U.S. 1, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958))*. Indeed package sales such as those noted in the foregoing example may be used by a seller as a means of competing, and may be desired by buyers. The Sherman Act is not designed to preclude such arrangements. *See id*.

[7] This is distinguished from "mutual" reciprocal dealing which occurs "when both parties stand on equal footing with respect to purchasing power, yet they agree to purchase from one another." *Betaseed, 681 F.2d at 1216*.

Healthcare members that designated one of Gary's stores as their network pharmacy. Thus, defendants argue, the arrangement is more accurately labeled as reciprocal dealing where U.S. Healthcare conditioned its agreement to purchase prescription drugs from Gary's on Gary's agreement to purchase TPA services from CHA.

We agree that the arrangement is not tying. While there is force to defendants' broader argument, we do **[**41]** not believe that the relationship between Gary's and U.S. Healthcare can be neatly squeezed into the purchase/sale paradigm. As a result, we are hesitant to conclude that the arrangement was reciprocal dealing, but instead believe that the true character of the arrangement lies somewhere between the two practices. Fortunately, resolution of the antitrust issue presented in this appeal does not require us to wedge the facts into either doctrinal box, for we conclude that there was insufficient evidence to support liability under the Sherman Act regardless of the label placed on the challenged arrangement.

The law is well developed as to when tying arrangements should give rise to liability under the Sherman Act. ***HN8***[] Such arrangements can be deemed illegal *per se* or be found to violate the rule of reason. *Per se* liability exists where the defendant is found to have appreciable market power in the tying market. In such cases, the ability to leverage this power to restrain trade in the tied market is presumed and no inquiry need be made into the actual prevailing market conditions in that **[**42]** market. *See* *Jefferson Parish, 466 U.S. at 15-18* & n. 25; *Town Sound, 959 F.2d at 477*. Where appreciable tying market power cannot be shown, inquiry into the tied product market cannot be avoided, and the plaintiff therefore has the more difficult burden of showing that the arrangement violated the rule of reason because it unreasonably restrained competition in the tied product market. *See* *Jefferson Parish, 466 U.S. at 29*.

In contrast to tying arrangements, reciprocal dealing has not been the subject of extensive **[*512]** case law development. Indeed, this Court has yet to set forth a test for determining when a reciprocal dealing arrangement runs afoul of the Sherman Act. [8] **[**44]** Defendants seek to persuade us to fill this vacuum by holding that reciprocal dealing arrangements cannot be found illegal *per se*, but instead should be judged only under the less rigorous rule of reason test. [9] This position has not been adopted by any of our sister circuits. All those that have

---

[8] Defendants suggest that we set forth a rule for judging reciprocal dealing arrangements in *W. L. Gore & Assocs., Inc. v. Carlisle Corp., 529 F.2d 614, 624 (3d Cir. 1976)* where we stated that:

> The use of substantial purchasing power in one product market to coerce a supplier into a reciprocating purchase in another market may be an illegal restraint of trade if the user's purchasing power is sufficiently substantial and its use results in substantial foreclosure of competition in the other weaker product market.

In *Gore*, the owner of two patents brought an action for infringement. The defendant's answer denied the validity of the patents, asserted that one of the patents was unenforceable because of fraud in its procurement, and counterclaimed for damages alleging a violation of the Sherman Act. After trial, the district court entered a judgment holding one of the patents valid and infringed and the other patent invalid, granting the plaintiff an injunction restraining the defendant from infringing the valid patent, and determining that plaintiff had violated the Sherman Act. Both parties appealed from the judgment. In determining that we had jurisdiction to review the injunction, we expressly stated that we had no jurisdiction in an interlocutory appeal over the antitrust counterclaim of the defendant. *See* *id. at 618*. Thus, the statement in *Gore* regarding reciprocal dealing was dicta, and does not establish a rule.

[9] In support of this view, defendants primarily rely on Phillip E. Areeda et al., ***Antitrust Law***, a leading treatise. Areeda argues that "forced reciprocal exchanges are . . . legally distinct from ties and need not receive the same antitrust treatment." X Areeda, ***Antitrust Law*** P 1750c, at 268 (1996). He believes that reciprocal trading should not be illegal *per se*, and that such a claim should instead be judged solely under the rule of reason test. *See* *Id*. P 1778, at 460-61. Professor Areeda's view may be colored by his belief that tying arrangements also should not be illegal *per se*, a view that is contrary to current law. *See* IX Areeda, ***Antitrust Law*** P 1730, at 406 14 (1991).

examined the relationship between tying and reciprocal dealing have determined that each practice should be evaluated under both the *per se* and rule of **[**43]** reason tests. [10]

[45]** This position is logical since both practices implicate the same antitrust concern -- the unlawful extension of economic power in one market to another market. However, we decline to resolve this conflict here since the amorphous and idiosyncratic nature of this case does not provide an appropriate framework in which to fully flesh out the need for a separate test for reciprocal dealing arrangements. Further, we need not reach this issue in order to resolve the present appeal since we find that BCI failed to set forth either a valid *per se* or rule of reason antitrust claim -- a finding fatal to both a tying claim and a reciprocal dealing claim under any test we might devise.

B. Per se Liability

Since our jurisprudence regarding both *per se* and rule of reason liability has developed in the context of tying cases, we will use the terms "tying" product market and "tied" product market to describe the two markets at issue despite our belief that the arrangement in this case lies somewhere between tying and reciprocal dealing. ***HN9***[] The *per se* test is used in cases where exploitation **[**46]** of leverage in the market for the tying product is "probable". *See* *Jefferson Parish, 466 U.S. at 15*; *Town Sound, 959 F.2d at 476-77*. The elements of a *per se* claim are (1) the defendant seller must sell two distinct products; (2) the seller must possess market power in the tying **[*513]** product market; and (3) a substantial amount of interstate commerce must be affected. *See* *id. at 477*. Where such elements are shown, the defendant's tying practices are condemned without further proof of anti-competitive effect. *See id*. Principally at issue in this appeal is whether BCI met its burden of proving the second element of this test: that U.S. Healthcare exercised market power in the tying market. [11]

The jury determined **[**47]** that U.S. Healthcare exercised sufficient market power in the tying market to constitute a *per se* violation of the Sherman Act. The viability of that finding, however, depends on the correctness of the market definition sent to the jury. Defendants maintain that the definition was incorrect as a matter of law, and that U.S. Healthcare could not exercise sufficient power in a properly defined tying market to sustain a *per se* claim.

1. Defining the Relevant Market

Before we can evaluate the extent to which U.S. Healthcare exercises power in the tying market, that market must be properly defined. A market has two components, product and geographic. *See* *Brown Shoe Co. v. United States, 370 U.S. 294, 325-28, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. The burden is on the plaintiff to define both components of the relevant market. *See* *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*; *Pastore v. Bell Telephone Co., 24 F.3d 508, 512 (3d Cir. 1994)*; *Tunis Bros Co., Inc. v. Ford Motor Co., 952 F.2d 715, 726 (3d Cir. 1991)*. The tying market definition asserted by BCI and adopted by **[**48]** the jury was: "U.S. Healthcare members with prescription drug benefits in the areas surrounding . . . Gary's pharmacies in suburban Philadelphia." Defendants contend that this definition contains both a flawed product market -- U.S. Healthcare members with prescription drug benefits -- and a flawed geographic market -- the areas surrounding Gary's pharmacies in suburban Philadelphia. They submit instead that the relevant tying market consists of "all purchasers of prescription drugs in the greater Philadelphia area."

---

[10] *See, e.g.*, *Betaseed, Inc. v. U&I, Inc., 681 F.2d 1203, 1221 (9th Cir. 1982)* ("The similarity between coercive reciprocity and tying arrangements, both in form and in anti-competitive consequences, leads to the conclusion that the two practices should be judged by similar standards."); *Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 425 (5th Cir. 1978)* (holding that label of tying and reciprocal dealing was immaterial, and that the *per se* standard should be applied in both); *E.T. Barwick Indus. v. Walter E. Heller & Co., 692 F. Supp. 1331 (N.D. Ga. 1987)* (same legal standards apply to reciprocal dealing as tying), *aff'd 891 F.2d 906 (11th Cir. 1989)*. *See also* II Earl W. Kintner, *Federal* ***Antitrust Law*** § 10.67, at 264-65 (1980) ("The very presence of the element of coercion indicates that such reciprocal dealings are only anti-competitive in effect. It is widely agreed that coercive reciprocality, like tying arrangements, should be considered a *per se* violation of *Section 1* of the Sherman Act.").

[11] The other issues have not been briefed by the parties. The third element is plainly not disputed. While arguably there is an implicit challenge to the first element, it would involve the characterization question, and we need not reach it.

We agree that BCI failed to meet its burden of presenting sufficient evidence to support the product and geographic markets adopted by the jury. However, while the evidence enables us to determine that the proper product market consists of all purchasers of prescription drugs, it is more difficult to determine the relevant geographic market on the basis of the record. Fortunately, as will be shown, delineation of the exact contours of the geographic market is not necessary to an evaluation of the merit of plaintiff's *per se* claim. We turn first to the product market issue.

a. The Product Market

BCI has posited a single brand market consisting solely of U.S. **[**49]** Healthcare members with prescription drug benefits. Should we accept this market definition our inquiry would be at an end, for U.S. Healthcare must, by definition, control 100% of this product market regardless of the geographic market. BCI seeks to support this product market by arguing that no products are "reasonably interchangeable" with U.S. Healthcare members, and that it is compelled by the Supreme Court's decision in *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*. Examining each of these contentions in turn, we conclude that this narrow market definition cannot stand as a matter of law.

The outer boundaries of a product market are determined by evaluating which products would be reasonably interchangeable by consumers for the same purpose. *See Allen-Myland, 33 F.3d at 201 n.8*; *Town Sound, 959 F.2d at 480*. "Interchangeability implies that one product is roughly equivalent to another for the use to which it is put; while there might be some degree of preference for the one over the other, either would work effectively." *Allen-Myland, 33 F.3d at 206*. **[**50]** One measure of interchangeability is "cross elasticity of demand between the product itself and substitutes for it." *Queen City* **[*514]** *Pizza, 124 F.3d at 437* (quoting *Brown Shoe Co. v. U.S., 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*.

When there is cross-elasticity of demand between products in a market, "the rise in the price of a good within [the] relevant market would tend to create a greater demand for other like goods in that market." *Tunis Brothers*, 952 F.2d at 722.

Thus the issue is which products, if any, Gary's, the consumer, would find to be reasonably interchangeable with, or substitutable for, U.S. Healthcare members who purchase prescription drugs. Defendants argue that no evidence in the record contradicts the logical assumption that Gary's considers members of other prescription plans, or uninsured persons, completely interchangeable with U.S. Healthcare members. We agree.

The only evidence to which BCI directs us to support its argument that there are no products reasonably interchangeable with U.S. Healthcare customers is that when U.S. Healthcare lowered the prices it would pay to pharmacies **[**51]** for the purchase of prescription drugs by U.S. Healthcare members, none of the pharmacies dropped out of the U.S. Healthcare network. BCI asserts that this shows that there is no cross-elasticity of demand between U.S. Healthcare members and other purchasers of prescription drugs since, if there were, then the lowering of prices would have caused pharmacies to stop doing business with U.S. Healthcare customers in favor of other customers who paid more.

This evidence does not support BCI's market definition. The fact that participating pharmacies do not drop out of the U.S. Healthcare network when it lowers its payment schedule does not prove that U.S. Healthcare's action failed to increase the pharmacies demand for customers who are not members of U.S. Healthcare. Even though pharmacies undoubtedly desire higher profit customers, it would not be necessary for them to drop out of the U.S. Healthcare network in order to pursue, or acquire, these customers. Nor would it be economically rational to do so since pharmacies, like most businesses, seek as many customers as they can find. [12]

---

[12] We assume that membership in the U.S. Healthcare network remained profitable after U.S. Healthcare lowered its payment schedule. To the extent that BCI is arguing that pharmacies stayed in the U.S. Healthcare network despite the fact that it became unprofitable to do so, this argument renders their overall claim a non sequitur. U.S. Healthcare cannot exercise control over pharmacies via access to its network where membership in that network causes pharmacies to lose money.

[52]** Moreover, to the extent that BCI is arguing that U.S. Healthcare customers are not interchangeable with other customers because the market for prescription customers is so competitive that U.S. Healthcare members are difficult to replace, this argument also does not support its product market definition. Product market definition turns on the existence of close substitutes for a particular product, not on the ability of any particular consumer to switch effortlessly to such substitutes. It is true that when Gary's loses a supply of customers it must compete for other customers to make up lost sales; however, this does not mean that those new customers, when found, would not be interchangeable with U.S. Healthcare members from Gary's standpoint.

BCI also seeks to support its single brand market by reference to the Supreme Court's opinion in *Kodak*. That case, however, is inapposite. In *Kodak*, independent service organizations brought suit alleging that Kodak had tied replacement parts for its copiers to Kodak repair service. *See* *504 U.S. at 459*. Although Kodak exercised complete control over the market for the tying product -- replacement parts for its copiers **[**53]** -- since they were unique, *see* *id. at 456-57*, it argued that it could not, as a matter of law, have sufficient market power in that derivative aftermarket to restrain trade because the primary market for new copiers was competitive. According to Kodak, any attempt to exercise market power in the derivative market for copier parts would raise the "life cycle" cost of owning a Kodak copier, and customers would buy fewer Kodak copiers, making the attempt unprofitable. *See* *id. at 470*.

[*515] The Supreme Court declined to let Kodak's economic theory prevail on summary judgment, holding that, under certain circumstances, the buyer of a Kodak copier could be "locked in" to the Kodak parts market by virtue of the high "switching costs" of purchasing a new copier from another manufacturer. *See* *id. at 476*. In such a situation, Kodak copier owners would be forced to purchase copier parts from Kodak since there were no reasonable substitutes for such parts. Thus, *Kodak* establishes that a single brand market may be considered the relevant market where a legitimate class of consumers is locked in to purchasing a non-interchangeable tying **[**54]** product in a derivative market due to high switching costs in the primary market. *See* *Queen City Pizza, 124 F.3d at 439-40*.

BCI directs us to no evidence introduced at trial to support a conclusion that *Kodak* is applicable to this case. On appeal, they argue that *U.S. Healthcare members* are "locked in" to U.S. Healthcare and, by extension, to the pharmacies in its provider network. We doubt that this argument is factually correct, for we find no evidence suggesting that U.S. Healthcare members who wish to switch HMOs face switching costs significant enough to constitute a lock in. But even if it is, the argument is misplaced since *Kodak* is concerned with the situation where the victims of the alleged tie -- in that case, the purchasers of Kodak copiers -- are faced with high switching costs and thus are "locked in" to the market for the tying product. Under BCI's theory of the case, Gary's is the purchaser of the tying product which is U.S. Healthcare members who purchase prescription drugs. Thus in order to fall within *Kodak*'s concept of lock in, BCI needed to, at a minimum, provide evidence that Gary's -- not U.S. Healthcare members -- was locked **[**55]** into the U.S. Healthcare network. That it did not do.

b. The Geographic Market

BCI proposed a non-contiguous, gerrymandered geographic market consisting solely of the areas surrounding Gary's pharmacies in suburban Philadelphia. To meet its burden of proving the relevant geographic market, *see Tunis Brothers Co.*, 952 F.2d at 726, BCI was required to show that the geographic market it proposed was "the area in which a potential buyer may rationally look for the goods or services he or she seeks." *See id*. (quoting *Pennsylvania Dental Ass'n v. Medical Serv. Ass'n of Pa., 745 F.2d 248, 260 (3d Cir. 1984))*.

The only evidence that BCI offered to support its geographic market was testimony from Dr. Knowlton that the area from which Gary's stores, or any pharmacies, draw their customers is made up of primary and secondary trading areas surroundings its stores. Knowlton defines a primary trading area is the geographic area surrounding a pharmacy from which it draws 50% of its clientele, and a secondary trading area as the geographic area from which it draws 90% of its clientele.

We believe that Knowlton is undoubtedly correct to the extent that **[**56]** the jury could reasonably find that pharmacy customers generally use pharmacies near their home. Thus we reject defendants' argument that the relevant geographic market should be the greater Philadelphia area. [13] However, mere invocation of the common-sense precept that customers use pharmacies near their homes does not satisfy BCI's burden of showing that the *particular* geographic market chosen fairly represents "the area in which a potential buyer may rationally look for the goods or services he or she seeks." In this case, where BCI introduced no evidence to support such a conclusion, an amorphous and gerrymandered geographic market cannot stand as a matter of law. *See* 952 F.2d at 727 ("The mere delineation of a geographical area, without reference to a market as perceived by consumers and suppliers, fails to **[*516]** meet the legal standard necessary for the relevant geographic market.").

[57]** *2. U.S. Healthcare's Power in the Tying Market*

Having determined that the market definition adopted by the jury was erroneous as a matter of law, we are now faced with the task of assessing U.S. Healthcare's market power in a properly defined market on the basis of the trial record. Our task is made more difficult by the fact that the record does not contain sufficient evidence to enable us to clearly define the relevant geographic market. In most instances, the proper course in the face of such circumstances would be to remand the case for a new trial; however, our review of the record indicates that it is simply not possible for U.S. Healthcare to have exercised sufficient market power in the properly defined product market to constitute a *per se* violation in any plausible geographic market.

HN10[] In order to impose *per se* antitrust liability, it must be shown that the defendant had "*appreciable* economic power in the tying market." *Kodak, 504 U.S. at 464* (emphasis added). "Market power is defined as the ability 'to raise prices or to require purchasers to **[**58]** accept burdensome terms that could not be exacted in a completely competitive market.' " *Allen-Myland, 33 F.3d at 200* (quoting *United States Steel Corp. v. Fortner Enters., Inc. (Fortner II), 429 U.S. 610, 620, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977))*. Since "the existence of such power ordinarily is inferred from the seller's possession of a predominant share of the market," *Kodak, 504 U.S. at 464* (citations omitted), we turn first to an inquiry into U.S. Healthcare's share of the market for drug prescription customers. In so doing, we are mindful of the fact that "market share, of course, is only one type of evidence that may prove the defendant has sufficient market power to impose *per se* antitrust liability." *Allen-Myland, 33 F.3d at 209*.

a. Evidence of Market Share

At trial, BCI's sole evidence of market share derived from a survey conducted by Dr. Knowlton. His survey concluded that U.S. Healthcare members purchased twenty to twenty-five percent of the prescriptions at the surveyed pharmacies. Defendants argue that this market share is insufficient as a matter of law to serve as the basis for a finding **[**59]** of a *per se* violation. We agree. [14] The highest estimate of U.S. Healthcare's **[*517]**

---

[13] Defendants rely primarily on evidence that Gary's advertised in the greater Philadelphia area to support their expansive conception of the geographic market. This reliance is misplaced since "the geographic market is not comprised of the region in which the seller attempts to sell its product, but rather is comprised of the area where his customers would look to buy such a product." *Tunis Bros., 952 F.2d at 726*.

[14] Defendants also argue that the district court abused its discretion in admitting the survey. We also agree with this contention; however, since we conclude that even if the survey were admitted, it would not help BCI, we address the methodological errors that should have barred its admission only briefly.

HN11[] Survey results offered as proof of the matter asserted are hearsay, and thus the results of a survey, and any testimony based on those results, cannot be admitted into evidence unless the survey falls into a recognized class exception to the hearsay rule or into the residual exception contained in *Fed. R. Evid. 803(24)*. *See* *Pittsburgh Press Club v. United States, 579 F.2d 751, 755-58 (3d Cir. 1978)*. In this case none of the class exceptions are present, so we examine whether the survey contains the "circumstantial guarantees of trustworthiness" required for admissibility under *Rule 803(24)*.

In *Pittsburgh Press*, we stated that "***HN12***[] the circumstantial guarantees of trustworthiness are for the most part satisfied if the poll is conducted in accordance with generally accepted survey principles." *Id. at 758*. We then discussed several factors which must be examined in determining whether a poll meets generally accepted survey principles market share resulting from Knowlton's survey -- which, in addition to the methodological errors set out in note 14, used the improper geographic market discussed at pp. 32-33, *supra* -- was twenty five percent. Even were we to accept this percentage as accurate, it is insufficient in itself to impose *per se* antitrust liability. *See* Jefferson Parish, 466 U.S. at 27 (defendant hospital's 30 percent share of market showed that it lacked the "kind of dominant market position that obviates the need for further inquiry into competitive conditions."); *see also* Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 612-13, 97 L. Ed. 1277, 73 S. Ct. 872 (1953) (defendants share of 33-40 percent of advertising market insufficient to invoke *per se* rule). In fact, since *Jefferson Parish* no court has inferred substantial market power from a market share below 30 percent. *See*, *e.g.* Town Sound, 959 F.2d at 481 (affirming summary judgment for defendant with control of 10-12% of tying product market); Marts v. Xerox, 77 F.3d 1109, 1113 n.6 (8th Cir. 1996) **[**60]** (18% share of one portion of photocopier market too small for unlawful tying); *Continental Trend* Resources, Inc. v. OXY USA, Inc., 44 F.3d 1465, 1482 (10th Cir. 1995) (affirming grant of summary judgment for defendants where defendants controlled less than 10% of relevant market, since "plaintiffs failed to establish defendants had sufficient strength in the relevant market."), *vacated on other grounds and remanded*, *116 S. Ct. 1843 (1996)*; Breaux Bros. Farms, Inc. v. Teche Sugar Co., Inc, 21 F.3d 83, 87-88 (5th Cir. 1994) (17.5 percent share of relevant market for tying product "is not normally sufficient to satisfy the requirements of the *per se* rule.").

[61]**

Because U.S. Healthcare's true market share in a properly defined geographic area could be no higher than 25 percent, plaintiff's cannot rely solely on market share to establish a *per se* antitrust violation. [15]

> A proper universe must be examined and a representative sample must be chosen; the persons conducting the survey must be experts; the data must be properly gathered and accurately reported. It is essential that the sample design, the questionnaires and the manner of interviewing meet the standards of objective surveying and statistical techniques.

Id.

The proponent of the evidence has the burden of establishing these elements of admissibility. *See id*. In this case, we find that this burden was not met and that the methodology of the survey was so flawed that the district court's decision to admit it was not consistent with the exercise of sound discretion.

Knowlton's survey was designed to determine U.S. Healthcare's market share in the region close to three of Gary's six pharmacy locations. To determine market share, he had pharmacy students call six to eight to pharmacies within varying distances of each of the three pharmacies (resulting in a total universe of twenty pharmacies). The pharmacists at these pharmacies were then asked to name the HMO with which they did the majority of their business, and to report the percentage of their prescription business for which that HMO was responsible.

This methodology is flawed in several respects. We identify two particularly significant errors. First, the survey questions used were not objective. For example, pharmacists were asked:

> You provide services for people with prescription cards, like PCS and Paid, et cetera. You also provide services for people on specific HMO plans like Keystone, U.S. Healthcare, et cetera. What's the name of the HMO with which you did the most prescription business . . .?

This question improperly slants the response by highlighting respondent to U.S. Healthcare's market presence. People responding to a survey tend to react to the framing of a question. *See*, *e.g.* J.R. Eiser, *Social Psychology* 219-20 (1986). In addition, this question specifically excluded large institutional, non-HMO purchasers of prescription drugs such as PCS and PAID. As a result, it narrowed the product market from "purchasers of prescription drugs" to "HMO purchasers of prescription drugs".

Second, while Knowlton surveyed 20 pharmacies, he only used the data obtained from 14 of those pharmacies in tabulating his results. This decision resulted from the fact that only fourteen of the twenty pharmacies surveyed named U.S. Healthcare as their largest HMO customer. Knowlton simply ignored the other six pharmacies whose data presumably stated a lower estimate of U.S. Healthcare's market share. This type of selective analysis violates the requirement that, in order for survey results to be admissible, the "data must be properly gathered and accurately reported".

We conclude that the cumulative effect of these, and other, methodological errors render it impossible to say that this survey was "conducted in accordance with generally accepted survey principles," and thus it should not have been admitted.

b. Other Factors Bearing on Market Power

Factors other than market share can establish that U.S. Healthcare exercised appreciable power in the market for pharmaceutical customers. *See Allen-Myland, 33 F.3d at 209*. BCI contends that in this case market power can be inferred from the numerosity of the ties imposed by the defendants, and by "market realities" which indicate that the figures for prescription drug **[**62]** sales understate the importance of U.S. Healthcare members to a pharmacy's bottom line.

HN13[] In order to demonstrate tying market power through evidence of the widespread acceptance of a tie, the plaintiff must **[*518]** show that the tie was accepted by an appreciable number of buyers within that market, and that there is an "absence of other explanations for their willingness . . . to purchase the package." *See Fortner II, 429 U.S. 610, 618 n.10, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977)*; *see also Grappone, Inc v. Subaru of New England, Inc., 858 F.2d 792, 797-98 (1st Cir. 1988)* (widespread acceptance of tie not evidence of market power where there are plausible business reasons for accepting tie). In this case, BCI has failed to meet its burden.

At trial, the only evidence offered by BCI concerning other ties by defendants was that, with respect to six large chains -- Rite-Aid, Shop-Rite, Food Circus, Walmart, Phar-mor and Weis Markets -- defendants attempted to tie approval of additional pharmacies for participation in the U.S. Healthcare network to each **[**63]** chain agreeing to offer CHA and/or U.S. Healthcare to its employees. Of these purported tying attempts, only three -- those involving Rite-Aid, Phar-Mor and Weis Markets -- were deemed "successful" by the plaintiff. However, as we have already observed, BCI failed to demonstrate that these large companies did not base their decision to make U.S. Healthcare a part of their benefits package on plausible business reasons, *see supra* at *1998 U.S. App. LEXIS 6591* at *31-31. Without some such showing, the evidence of other tie-ins is insufficient to constitute proof of appreciable market power. [16]

BCI also argues that market power can be inferred from the fact that exclusion from the **[**64]** U.S. Healthcare pharmacy network would have a major adverse impact on a pharmacy, to the point of threatening that pharmacy's survival. BCI submits that since the prescription drug business is a low-margin business that depends on high volume, large purchasers such as U.S. Healthcare exert considerable market power. As an example of this market power, BCI again directs us to the evidence that U.S. Healthcare was able to lower its payment schedule to pharmacies without loss of pharmacy participation in its network. [17]

This argument has two flaws. In the first instance, it proves too much. The evidence at trial showed that Gary's was a member of forty or more networks that provided access to pharmaceutical customers. There is no evidence, and no reason to believe, that the customers that U.S. Healthcare delivers are any more desirable than those delivered by other networks. Thus, if we accept the logic of BCI's argument, each of these networks **[**65]** exercises sufficient market power to violate the *per se* rule of antitrust liability. Yet, it would pervert the antitrust notion of market power to find that each of over forty organizations, delivering the same product, has sufficient market power over a pharmacy such as Gary's to generate a *per se* violation of the antitrust laws.

BCI's argument also runs counter to the purpose of the antitrust laws. "The purpose of the Sherman Act 'is not to protect businesses from the working of the market; it is to protect the public from the failure of the market.' " *Queen City Pizza, 124 F.3d at 441* (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993))*; *see also Town Sound, 959 F.2d at 494* (it is "no concern of the antitrust laws" that a practice

---

[15] We note that evidence produced at trial showed that 16% of the residents of the greater Philadelphia area belong to a U.S. Healthcare plan. We assume, therefore, that U.S. Healthcare's market share in the relevant geographic market lies somewhere between 16%, its share in an impermissibly broad geographic market, and 25%, its share in an impermissibly narrow one.

[16] We further note that while it is apparent that Rite-Aid, Phar-Mor and Weis Markets are large chains, pharmacies are only a part of their business and BCI has offered no specific evidence that the number of pharmacies affected by the alleged tie-ins constituted "an *appreciable* number of buyers within the market."

[17] *See supra* at *1998 U.S. App. LEXIS 6591* at *31-32.

may consign even an entire "class of competitors . . . to competitive oblivion," unless "consumers are also hurt because of diminished competition."); *United States v. Syufy Enterprises, 903 F.2d 659, 668 (9th Cir. 1990)* ("it can't be said often enough that the antitrust laws protect competition, not competitors."). If we were **[**66]** to accept BCI's argument that a showing of appreciable market power can be based solely on a pharmacy's "need" for customers, we would in effect outlaw the agglomeration of pharmacy customers -- a result that provides benefits to individual consumers -- in order to protect pharmacies. This result would stand antitrust jurisprudence on its head, and establish a precedent whereby the antitrust laws **[*519]** would protect competitors rather than competition and consumers.

C. The Rule of Reason Claim

The jury also found that defendants were liable under the rule of reason standard for antitrust violations. Unlike a *per se* case where a showing that the defendant had market power in the tying market leads to a presumption that it is using that power to expand into the tied market, ***HN14***[] to succeed on a rule of reason claim the plaintiff must prove that the alleged tie "unreasonably restrained competition." *Jefferson Parish, 466 U.S. at 29*; *see also Town Sound, 959 F.2d at 495* (in order to support a rule of reason claim, plaintiff must prove that the tie **[**67]** in question caused an "injury to competition"). This burden "necessarily involves an inquiry into the actual effect of the [challenged conduct] on competition [in the tied market]." *466 U.S. at 29*. [18]

[68]** ***HN16***[] Before we can determine whether there was harm to competition in the tied market, that market must be defined. BCI had the burden of defining the tied market, but made no attempt to do so at trial. On appeal, BCI contends that the tied market consists of the market for the provision of health insurance and benefits -- a market that includes HMOs and personal choice plans in addition to TPAs. We find no support for this broad market definition. Instead, we believe, on the basis of the record, that the proper tied market consists solely of the market for TPA services. BCI is a TPA provider and the harm alleged to have occurred as result of the tying arrangement took place in the market for TPA services.

---

[18] BCI contends that by failing to specifically challenge the sufficiency of the evidence of anti-competitive effects in the tied market in their pre-verdict motions for judgment as a matter of law made pursuant to *Fed. R. Civ. P. 50(a)*, defendants waived their right to raise that specific argument in their post-trial *Rule 50* motions, or thereafter. In their pre-trial motions, made both at the conclusion of plaintiff's case and at the conclusion of all evidence, the defendants' challenge to the sufficiency of the evidence on the rule of reason claim read:

> The evidence is insufficient to support a finding or sustain a verdict that U.S. Healthcare's practices constituted an unreasonable restraint of trade in light of all the circumstances of the case. Plaintiff has offered no such evidence.

HN15[] Under *Rule 50(a)*, a pre-verdict motion for judgment as a matter of law "shall specify the judgment sought and the law and the facts on which the moving party is entitled to the judgment." Further, a post-trial motion for judgment as a matter of law made pursuant to *Rule 50(b)* "must be preceded by a *Rule 50(a)* motion sufficiently specific to afford the party against whom the motion is directed with an opportunity to cure possible defects in proof which otherwise might make its case legally insufficient." *Lightning Lube, Inc. v. Witco Corp., 4 F.3d 1153, 1173 (3d Cir. 1993)* (quoting *Acosta v. Honda Motor Co., 717 F.2d 828, 831-32 (3d Cir. 1983))*; *see also Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 183-84 (3d Cir. 1992)* (compliance with *Rule 50(a)* "ensures that the party bearing the burden of proof will have an opportunity to buttress its case before it goes to the jury and the moving party will not gain unfair advantage through surprise.").

While the text of the *Rule 50(a)* motion quoted above is far from a model of completeness or clarity, we do not measure its sufficiency by the text alone, but against the background, as reflected in the record, of what the party now claiming waiver understood as to the tenor of the *Rule 50* movant's position and theory. *See Acosta, 717 F.2d at 832* ("The communicative content, 'specificity' and notice giving function of an assertion [in a *rule 50(a)* motion] should be judged in context.") In *Fineman*, for example, we held that a general motion for a directed verdict contesting the sufficiency of the evidence with respect to "coercion" preserved defendant's challenge to the sufficiency of the evidence with respect to the tortious interference claim, because "plaintiffs' counsel was clearly on notice of the legal rubric under which [defendants] planned to proceed." *980 F.2d at 184*. We think that is the case here, and hence find no waiver.

In that market, the only evidence of harm to competition was that BCI failed to renew one contract, its contract with Gary's. That showing is insufficient as a matter of law since it fails to show competitive harm to the tied market as a whole. *See* *Town Sound, 959 F.2d at 493* (requiring foreclosure of a "substantial portion" of the tied market to hurt competition.); **[**69]** *see also* *Virtual Maintenance, Inc. v. Prime Computer, Inc., 957 F.2d 1318, 1330* (6th Cir.) ("the foreclosure of 400 computer systems out of the thousands of systems [in the tied market] is insignificant as a matter of law"), *vacated*, *506 U.S. 910* ***[*520]*** *(1992)*, *reinstated in pertinent part*, *11 F.3d 660, 663-64 (6th Cir. 1993)*.

Moreover, even if we accepted the broad market which BCI proposed, it still failed to provide sufficient evidence of competitive harm. The only evidence offered to show that competition was adversely affected in this broad market consisted of the previously mentioned studies of several large pharmacy chains which faced pressure to offer their employees membership in the U.S. Healthcare HMO. These studies do not provide *any* evidence of market foreclosure or harm to competition since those pharmacies that were "forced" to offer their employees U.S. Healthcare coverage did so *in addition to*, rather than instead of, other health insurance plans. Further, even if this evidence did show harm to competition, BCI has introduced no evidence in which to evaluate the extent to which such foreclosure harmed **[**70]** competition in the broad market for health insurance services generally.

D. Conclusion

Since the record before us does not support a finding that U.S. Healthcare exercised appreciable market power in a properly defined tying market or that the arrangement at issue harmed competition in the tied market, the antitrust jury verdicts on both the *per se* and the rule of reason claims must be set aside. [19]

IV. CIVIL RICO

A. Introduction

The jury found that U.S. Healthcare's business practices constituted a pattern of racketeering activity in violation of *18 U.S.C. §§ 1962(c)* and *(d)*. ***HN17***[] *Section 1962(c)* prohibits any person employed by or associated with an enterprise from conducting or participating in the conduct of that enterprise's affairs through **[**71]** a pattern of racketeering activity. A pattern of racketeering activity "requires at least two acts of racketeering activity", *18 U.S.C. § 1961(5)*. Racketeering activity is defined as an act or threat chargeable as one of a variety of state felonies or any act which is "indictable" under specifically listed federal criminal statutes, *see* *18 U.S.C. § 1961(A)-(B)*. *Section 1962(d)* outlaws any conspiracy to violate the other subsections of *§ 1962*, including, as is relevant to this case, *§ 1962(c)*.

U.S. Healthcare challenges the jury verdict on two primary grounds, asserting that (1) BCI failed to establish its standing to recover for any offenses allegedly committed against Gary's; and (2) BCI failed to present a sustainable case that the defendants committed any of the alleged predicate acts. We address each argument in turn.

B. RICO Standing

The section of RICO allowing private parties such as BCI to pursue a civil action provides that:

> ***HN18***[] any person injured in his business by reason of a violation of *section 1962* of this chapter **[**72]** may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.

---

[19] Since we find that the jury verdict must be set aside, we need not address defendants challenge to the rule of reason jury instructions.

18 U.S.C. § 1964(c)

The Supreme Court examined the standing requirement of this statutory provision in *Holmes v. Securities Investor Protection Corp., 503 U.S. 258, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)*. The Court noted that Congress modeled § 1964(c) on the Clayton Act, and found that **HN19**[] a plaintiff's right to sue under RICO, as under the federal antitrust laws, requires a showing that the alleged violation was the proximate cause of the plaintiff's injury. *See id. at 267-68*. The Court looked to the common law for guidance in defining the proximate cause requirement. In so doing, it focused primarily on one element of proximate cause: the directness of the relationship "between the injury asserted and the injurious conduct alleged." *Id. at 268*. This requirement of a direct relation was held to generally preclude recovery **[**73]** **[*521]** by "a plaintiff who complained of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts." *Id. at 268-69*.

On the facts presented in *Holmes*, the Court held that the plaintiff, Securities and Investor Protection Corporation ("SIPC"), had not met the proximate cause requirement and thus had no standing to bring suit under RICO . SIPC is a private nonprofit corporation, created pursuant to the Securities Investors Act, which most broker-dealers are required by law to join and which has a statutory duty to advance funds to reimburse the customers of member broker-dealers that are unable to meet their obligations. *See id. at 261*. SIPC brought a civil RICO action alleging that Holmes, and other former members of a brokerage firm, conspired in a stock manipulation scheme that prevented two broker-dealers from meeting their obligations, thereby requiring SIPC to advance nearly $ 13 million to cover claims by the customers of the affected broker-dealers. SIPC sought standing under § 1964(c) by arguing, *inter alia*, that it was subrogated to the rights of those customers of the broker-dealers who did not **[**74]** purchase the manipulated securities but incurred loses when the broker-dealers failed and could no longer meet their obligations. *See id. at 270*.

The Court assumed, for the sake of argument, that SIPC was entitled to stand in the shoes of the non-purchasing customers, but held that the defendants' conduct was not the proximate cause of those customers' injuries. The Court held that "the link is too remote between the stock manipulation alleged and the customers' harm, being purely contingent on the harm suffered by the broker dealers . . . the broker-dealers simply cannot pay their bills, and only that intervening insolvency connects the conspirators' acts to the losses suffered by the non-purchasing customers and general creditors." *Id. at 271*.

Defendants' argue that, under *Holmes*, BCI lacks standing in this case. They assert that since BCI is alleging that Gary's has been a victim of the RICO predicate acts, BCI exemplifies the "plaintiff who complains of harm flowing merely from the misfortunes visited upon a third person." *Id. at 268*. We disagree. The injury proved by BCI, the loss of its TPA contract with Gary's, is not **[**75]** *derivative* of any losses suffered by Gary's. Unlike the injuries suffered by the non-purchasing customers in *Holmes*, BCI's injury was not contingent upon any injury to Gary's, nor is it more appropriately attributable to an intervening cause that was not a predicate act under RICO. Here, BCI's TPA relationship with Gary's was a direct target of the alleged scheme -- indeed, interference with that relationship may well be deemed the linchpin of the scheme's success. Accordingly, we conclude that BCI had standing to pursue its civil RICO claim. [20]

C. Predicate Acts of BCI's RICO Claim

In its special verdict form, the jury found that each defendant **[**76]** had committed one or more types of the predicate acts of: (1) extortion under the Hobbs Act, *18 U.S.C. § 1951*; (2) violation of Pennsylvania's commercial bribery statute, *18 Pa. Cons. Stat. § 4108(b)*; (3) mail fraud, *18 U.S.C. § 1341*; (4) wire fraud, *18 U.S.C. § 1343*; and (5) violation of the Travel Act, *18 U.S.C. § 1952*. Defendants challenge the verdict on the ground that BCI has failed to prove that defendants' conduct violated any of these laws. Defendants contend that this failure to prove any

[20] We note, however, that BCI's RICO standing is limited to injuries arising from its competition with U.S. Healthcare for Gary's TPA business. BCI does not have RICO standing to recover for any injuries suffered by other pharmacies as a result of their relations with U.S. Healthcare since there is no evidence that these relations directly injured BCI.

predicate acts, and *a fortiori* to show a pattern of racketeering activity, entitles them to judgment as a matter of law on the RICO claims. In their submission, the conduct underlying each of the alleged predicate acts was at its bottom no more than aggressive business bargaining and, just as BCI cannot convert aggressive business tactics into antitrust violations, it cannot shoehorn such tactics into the definitions of the predicate acts at issue here. We shall devote **[*522]** the bulk of our time to the important and difficult issue of whether the defendants' conduct amounted to Hobbs **[**77]** Act extortion. The others alleged predicate acts are disposed of easily.

1. Extortion under the Hobbs Act

HN20[] The Hobbs Act imposes criminal penalties on "whoever in any way or degree obstructs, delays, or affects commerce or the movement of any article or commodity in commerce, by robbery or extortion or attempts or conspires to do so." *18 U.S.C. § 1951*. "Extortion" is defined in the Act as "the obtaining of property from another, with his consent, induced by wrongful use of actual or threatened force, violence, or fear, or under color of official right." *18 U.S.C. § 1951(b)(2)*. The term "fear" includes the fear of economic loss. *See United States v. Addonizio, 451 F.2d 49, 72 (3d Cir. 1972)*; *United States v. Capo, 817 F.2d 947, 951 (2d Cir. 1987)* (in banc).

BCI alleges that the defendants extorted Gary's health benefits business by conditioning access to the U.S. Healthcare provider network on Gary's agreement to switch to CHA as its TPA. According to BCI, this conduct amounts to extortion through the **[**78]** wrongful use of the fear of economic loss. Defendants respond that the use of economic leverage in this manner cannot be made to fit within the statutory framework of Hobbs Act extortion. They reason that any fear of economic loss felt by Gary's was the result of the give and take of bargaining between U.S. Healthcare and Gary's in a business setting in which both parties offered and received something of value. They contend that the use of this economic fear to extract concessions from Gary's was not wrongful, as required by the Hobbs Act, but is instead part and parcel of normal business negotiations.

As will appear, we conclude that plaintiff's theory, which is quite ingenious, does not state a viable claim of extortion because the defendants' use of the fear of economic loss in the context of hard business bargaining was not (legally) wrongful. While this decision may seem compelled by common sense, it is not easily derived from our precedent. This Court has not had prior occasion to address the line separating the legitimate use of economic fear to acquire property in a business setting (i.e., hard bargaining) from the wrongful use of such fear (i.e., extortion). Accordingly, **[**79]** we turn for guidance to the decisions of those few courts that have previously faced the issue. Because it looms so large on the Hobbs Act landscape, we must first, however, consider the Supreme Court's decision in *United States v. Enmons, 410 U.S. 396, 35 L. Ed. 2d 379, 93 S. Ct. 1007 (1973)*, which construes the meaning of the term "wrongful" under the Act.

a. The Definition of "wrongful".

In *Enmons*, the Court faced the question whether the use of violence in a labor strike to obtain higher wages and other benefits was extortion within the meaning of the Hobbs Act. The Court reviewed the wording of the Act and its legislative history and determined that such conduct was not extortion. In reaching its decision, the Court interpreted the word wrongful, which is not defined in the Act, as follows:

> The term "wrongful," which on the face of the statute modifies the use of each of the enumerated means of obtaining property -- actual or threatened force, violence, or fear -- would be superfluous if it only served to describe the means used. For it would be redundant to speak of "wrongful violence" or "wrongful force" since, as the government acknowledges, **[**80]** any violence or force to obtain property is "wrongful." *Rather, "wrongful" has meaning in the Act only if it limits the statute's coverage to those instances where the obtaining of the property would itself be "wrongful" because the alleged extortionist has no lawful claim to that property*.

Id. at 399-400 (emphasis added).

HN21[] The ability to defend against an extortion charge based on a lawful claim to the property obtained has been dubbed the "claim of right" defense to extortion. *See United States v. Agnes, 753 F.2d 293, 298 (3d Cir. 1985)*. Since *Enmons* dealt with the use of force to obtain property, and concluded that it was *not* extortion, read broadly, *Enmons* could stand for the principle that in *all* extortion **[*523]** cases, even "inherently" wrongful actions such as the use or threatened use of force or violence, do not constitute extortion where the defendant has a lawful claim to the property obtained. This broad application of *Enmons*, i.e., outside of the labor context, has, however, been uniformly rejected by the **[**81]** courts of appeals out of a fear that it would "effectively repeal the Hobbs Act." *See* United States v. Cerilli, 603 F.2d 415, 419 (3d Cir. 1979).

The effort to limit the potential impact of *Enmons* has led to a line of cases wherein this Court and others have refused to extend the claim of right defense to defendants accused of using actual or threatened *force* or *violence* to obtain property outside of the labor context. For example, in United States v. Agnes, supra, the defendant was convicted of extortion for using threats of force and actual violence in seeking property which was arguably his under state law. On appeal, he argued that the district court erred in refusing to allow him to assert a claim of right defense and in failing to properly instruct the jury that it is not wrongful to obtain property to which one has a legal right. *See* 753 F.2d at 297. We noted that defendant's contentions were predicated on *Enmons* and held that, contrary to defendant's suggestion, *Enmons* did not create a general claim of right defense in all cases involving the threatened or actual use of force or violence. Instead we **[**82]** interpreted *Enmons* to "create a claim of right defense only in . . . situations [such as those present in *Enmons*] *in which the use of force* is expressly identified by Congress as being outside the purview of the Hobbs Act." Id. at 299 (emphasis added). Other cases, noted in the margin, have similarly limited the reach of the claim of right defense in cases involving the threatened or actual use of force or violence. [21]

[83]** The present case does not fall within this line of cases limiting *Enmons* since it solely involves the accusation of the wrongful use of the fear of economic loss. Unlike the use or threatened use of force or violence, ***HN22***[] the use of economic fear in business negotiations between private parties is not "inherently" wrongful. *See* Sturm, 870 F.2d at 773 (citation omitted); United States v. Clemente, 640 F.2d 1069 at 1077; Hall Am. Ctr. Assoc. Ltd. Partnership v. Dick, 726 F. Supp. 1083, 1095 (E.D. Mich. 1989). Indeed, the fear of economic loss is a driving force of our economy that plays an important role in many legitimate business transactions. This economic reality leads us to conclude that ***HN23***[] the reach of the Hobbs Act is limited in cases, such as this one, which involve the use of economic fear in a transaction between two private parties. The limitation we apply is that set forth in *Enmons*: that a defendant is not guilty of extortion if he **[**84]** has a lawful claim to the property obtained.

We find support for our conclusion in the law of other circuits. The Second Circuit recognized the issues and concerns affecting this case in United States v. Capo, 791 F.2d 1054, 1062 (2d Cir. 1986), *vacated in part*, *on other grounds*, 817 F.2d 947 (2d Cir. 1987) (in banc), when it stated that:

> We recognize, of course, that fear of economic loss plays a role in many business transactions that are entirely legitimate; awareness of that fear and use of it as leverage in bargaining, in which each side offers the other property, services, or rights it legitimately owns or controls, is not made unlawful by the Hobbs Act. *What the Act reaches is not mere hard bargaining but the exploitation of the fear of* **[*524]** *economic loss in order to obtain property to which the exploiter is not entitled*.
>
> (emphasis added).

See also United States v. Clemente, 640 F.2d at 1076-78 (***HN24***[] use of fear of economic loss is wrongful when employed to achieve the wrongful purpose of obtaining **[**85]** property to which one is not entitled).

---

[21] *See* United States v. Zappola, 677 F.2d 264, 269, 270 (2d Cir. 1982) (*Enmons* inapplicable where businessmen beat and threatened victim to coerce payment of alleged debt); United States v. Porcaro, 648 F.2d 753, 759-60 (1st. Cir. 1981) (claim of right to property irrelevant where force or threats are used in resolution of contractual dispute); United States v. Kattar, 840 F.2d 118, 123 n.2 (1st Cir. 1988) ("Except in certain labor contexts . . . using threats of violence to induce the payment of money is unlawful, regardless of the extortionist's possible legal right to the funds at issue."); United States v. Sturm, 870 F.2d 769, 772-73 (1st Cir. 1989) (defendants "claim of right" to property obtained from victim is proper defense outside of labor context only if defendant did not use "inherently wrongful" means such as force or violence to obtain the property); United States v. Warledo, 557 F.2d 721, 729-30 (10th Cir. 1977) (*Enmons* inapplicable to Indian tribe's threats and violence to pursue allegedly valid claim against railroad); United States v. Cohen, 738 F.2d 287, 289 (8th Cir. 1984).

The First Circuit has explicitly extended the claim of right defense to cases involving solely the fear of economic harm. *See* Sturm, 870 F.2d at 773 ("For purposes of the Hobbs Act, the use of legitimate economic threats to obtain property is wrongful only if the defendant has no claim of right to that property."). The position of the First and Second Circuits is mirrored in the federal pattern jury instructions for the Hobbs Act. In those instructions "wrongful" is defined as "meaning that the defendant had no lawful claim or right to the money or the property (he)(she) sought or attempted to obtain", and district courts are directed that this definition "should be given only in cases involving a fear of economic loss or in trials concerning the use of violence by union leadership to secure higher wages for the membership as opposed to securing money for themselves." E. Devitt et al., Federal Jury Practice and Instructions, Criminal, § 45.08 & notes (4th ed. 1990). We believe that the position of the First and Second Circuits is sensible, and adopt it here.

b. Lawful Versus Unlawful Claims to Property

Our conclusion **[**86]** that the defendants are not guilty of extortion if they had a lawful claim to the property obtained from Gary's, while focusing our inquiry, does not resolve the issue before us since the line separating lawful from unlawful claims to property obtained in business negotiations is by no means self evident. Once again, we start with *Enmons* which, although addressing extortion through force or violence, provides direction as to the distinction between lawful and unlawful claims to property.

The Court in *Enmons*, having held that a Hobbs Act conviction could not be predicated on violence related to union activity that was aimed at obtaining property to which the alleged extortionist had a lawful claim, found that the defendants, union members and officials, had a lawful claim to the property -- in the form of wages and other employment benefits -- that they obtained from the employer. The Court found that where violence is employed "to achieve legitimate union objectives, such as higher wages, in return for genuine services which the employer seeks . . . there has been no 'wrongful' taking of the employer's property; he has paid for the services bargained for, and the workers receive **[**87]** the wages to which they are entitled in compensation for their services." *410 U.S. at 400*. This scenario was distinguished from cases where "union officials threatened force or violence against an employer in order to obtain personal payoffs, and where unions used the proscribed means to exact 'wage' payments in return for 'imposed, unwanted, superfluous and fictitious services' of workers." *Id.* In such cases, the union officials would not have a lawful claim to the property obtained, and thus the conduct would fall within the reach of the Hobbs Act.

We find particularly illuminating the application of *Enmons*' basic teaching by the District Court for the Southern District of New York in *Viacom Int'l v. Icahn, 747 F. Supp. 205 (S.D.N.Y. 1990)*, *aff'd on other grounds*, *946 F.2d 998 (2d Cir. 1991)*, a case involving the allegation of extortion through the wrongful use of the fear of economic loss. In *Viacom*, the defendants were accused of purchasing substantial stock in the plaintiff company (Viacom) and then coercing the plaintiff to buy its stock back for cash, stock warrants, and free advertising -- all allegedly under a threat **[**88]** of a corporate takeover. In return for the requested "greenmail," the defendants agreed not to buy the plaintiff's stock (or otherwise seek control of the plaintiff) for a period of eleven years. *See id. at 207-09*. Following this transaction, the plaintiff brought a civil RICO suit alleging, *inter alia*, that defendants had violated the Hobbs Act by obtaining above-market consideration for their shares from plaintiff with plaintiff's consent, with such consent induced through the wrongful use of economic fear. *See id. at 210*. On defendants' motion for **[*525]** summary judgment, the court dismissed as a matter of law the allegation that the challenged practice constituted extortion. *See id. at 213*.

The court recognized that it was faced with a case in which the alleged extortion victim received something of value -- an eleven-year standstill covenant, 3,498,200 shares of common stock, and, thereby, relief from the threat of a corporate takeover. It then surveyed existing case law in which the victim received something of value in exchange for his property, and found that in these circumstances "some acts constitute extortion **[**89]** and others are found to be 'hard bargaining.' " *Id. at 212-13*. The court drew the following distinction between the two:

> ***HN25***[] In a "hard bargaining" scenario the alleged victim has no pre-existing right to pursue his business interests free of the fear he is quelling by receiving value in return for transferring property to the defendant, but

> in an extortion scenario the alleged victim has a pre-existing entitlement to pursue his business interests free of the fear he is quelling by receiving value in return for transferring property to the defendant.

Id. at 213.

Applying this framework, the court used as examples of extortion, the "personal payoff cases" addressed in *Enmons*. In those cases the defendants "had no lawful claim to the property they received from the victims in exchange for providing the victims with influence and goodwill which quelled the victims fears of harm to their economic interests." *Id.* While the victim received something of value in return for this payment, "the victim [was] entitled by law to be free of the **[**90]** fear he [was] quelling by giving property to the defendant . . . [and thus] the 'something of value' the victim received [was], as a matter of law, as 'imposed, unwanted, superfluous and fictitious' as the hiring of a second worker to do the job that another worker is already doing." *Id.* (citations omitted).

The court then focused on those cases in which the victim receives something of value yet the conduct is found to be hard bargaining. It drew examples of this conduct from the Second Circuit's opinion in *United States v. Capo, 791 F.2d at 1062-63*, which stated that:

> although a job applicant who has long been out of work may have a fear of not obtaining employment that would constitute a fear of economic loss within the meaning of the Act, the Act would not ordinarily reach, for example, the efforts of a prospective employer to bargain down the level of compensation to be paid the applicant. Nor would it reach the normal activities of an employment agency in dealing with the applicant even if, for example the agency required payment from its applicants of some sort of filing fee, service charge, or contingent fee.

In these cases, the defendant **[**91]** is legally entitled to the property obtained from the victim since he has provided real value in exchange for that property, and the victim has no preexisting right to be free of the fear he is quelling in return for his payment to the defendant.

A further example of hard bargaining was provided by the facts of *Viacom* itself. Since the plaintiff had received something of value in return for the property transferred to the defendants, the court looked to whether the law entitled "Viacom to a right to pursue its business interests free of the problems and fears caused by the threat of a takeover by defendants." *747 F. Supp. at 213*. The court found that the law granted no such entitlement and thus that

> ***HN26***[] any intentional exploitation of fear by defendants was only part of "hard bargaining" in a deal which resulted in plaintiff receiving a benefit to which it was not otherwise entitled by law. Accordingly, defendants did not obtain property from plaintiff to which they had no lawful claim and therefore did not commit extortion.

Id. at 213-14. **[**92]**

In the present case, the property that U.S. Healthcare obtained from Gary's was the payments made by Gary's to CHA pursuant to its TPA contract. In return for this property, U.S. Healthcare gave Gary's access to its provider network -- something that is of considerable value to Gary's. Thus, like the court in *Viacom*, we deal with a very narrow subset of the potential universe of **[*526]** extortion cases: one involving solely the accusation of the wrongful use of economic fear where two private parties have engaged in a mutually beneficial exchange of property. While we believe that the fact-bound nature of this type of case will not supply a generalized precept, we are convinced by the logic of *Viacom* that BCI's extortion claim can only survive if Gary's had a right to pursue its business interests free of the fear that it would be excluded from the provider network. Albeit with misgivings, we find that it had no such right.

The chief obstacle to BCI's claim is the fact that Pennsylvania, unlike many other states, has not adopted an "Any Willing Provider" law which compels HMOs to allow *all* interested and minimally qualified providers into their networks. If such a **[**93]** law were in force, then Gary's would have had a legal entitlement to be a member of the provider network and thus to be free of the fear that it would be excluded from that network if it did not switch TPA providers. [22] **[**94]** However, in the absence of such a law, Gary's has no right of access to the U.S. Healthcare network and thus U.S. Healthcare could have denied Gary's access to its network for any reason, or for no reason at all. Under these conditions, U.S. Healthcare had the right to exchange the valuable consideration of inclusion in its network in return for consideration from Gary's in the form of its TPA contract. We thus conclude that this case provides an example of hard bargaining rather than extortion. [23]

BCI raises several arguments in opposition to this conclusion. First, BCI submits that even if Gary's had no right to membership in the provider network per se, it did have a right to compete for membership in that network free from coercion. BCI attempts to ground this right in our holding in *Addonizio, supra.* In that case, we considered extortion charges based on public corruption in which government officials demanded kickbacks from contractors, suppliers and engineers engaged in public works projects for the city of Newark, New Jersey. In upholding defendants' extortion convictions, we determined that, while the contractors have no right to obtain a contract with the city, they "have a right to **[**95]** expect that when they incur time and expense to bid on *public* projects, they will be awarded contracts when their bids are lowest . . . . The City of Newark had systematically destroyed this right." *451 F.2d at 73* (emphasis added).

Our holding in *Addonizio* is distinguishable since it is based on the right of private citizens to compete for government contracts on a level playing field. Such a right is solidly embedded in public policy. *See also United States v. Collins, 78 F.3d 1021, 1030* (6th Cir.), *cert. denied*, *U.S. , 117 S. Ct. 189 (1996)* (upholding Hobbs Act conviction of husband of Kentucky Governor charged with soliciting political contributions in exchange for right to contend for state contracts since "[payors] acted out of fear that without payments they could lose the opportunity to compete for government contracts on a level playing field, an opportunity to which they were legally entitled."). In this case, involving solely private parties, and in the absence of an Any Willing Provider Law, Gary's had no such right to a level playing field.

c. Evidence of Other Unlawful Objectives

BCI also **[**96]** argues that even if U.S. Healthcare did not have the unlawful objective of obtaining property to which it had no lawful claim, it had three other unlawful objectives **[*527]** that convert the economic coercion at issue here into extortion. [24] **[**97]** They are (1) violation of Pennsylvania's insurance fraud statute; (2) violation of New Jersey's Any Willing Provider law; and (3) violation of U.S. Healthcare's own internal procedures. Of these three objectives, the jury was only instructed as to BCI's theory that the defendants use of economic fear was wrongful because it had the unlawful objective of violating the Pennsylvania Insurance Fraud statute, and thus we address only that theory in the text. [25] The other two theories, on which the jury was not instructed, are rejected summarily in the margin. [26]

---

[22] Indeed, if Pennsylvania had such a law not only might the outcome of this suit, at least as it pertains to the RICO counts, be different, but it is likely that the underlying facts would never have occurred. Those facts, which demonstrate how heavy-handed tactics can be effectively applied by a large corporation (U.S. Healthcare) against a small firm (Gary's) in this context, might suggest to the Pennsylvania General Assembly that it is time to enact an Any Willing Provider law in Pennsylvania.

[23] This is also not a case where U.S. Healthcare exerted monopoly power in the market for pharmaceutical customers. Under such circumstances, the antitrust laws might well confer on Gary's the legal right to be free of the economic coercion arising from U.S. Healthcare's monopoly. However, we are not presented with such a case and thus do not opine on the potential success of such a theory.

[24] Since we conclude that each of these allegations of wrongful objectives lacks support, we need not decide whether proof that defendants' possessed one of these objectives would be sufficient to convert U.S. Healthcare's use of the fear of economic loss into extortion where U.S. Healthcare had a lawful right to the property obtained.

[25] The district court also instructed the jury that one such unlawful objective would be "a violation of the Federal antitrust laws." In light of the fact that we vacate the antitrust verdict, this instruction alone might compel us to vacate the jury finding with respect to extortion and, indeed, to the whole of the RICO count. However, since we find that both claims fall of their own weight, we need not rely on this flawed jury instruction as grounds for reversal, and thus do not address BCI's contention that U.S. Healthcare waived any objection to the instruction.

[98]** ***HN27***[] The Pennsylvania insurance fraud statute provides that:

> a health care provider may not compensate or give anything of value to a person to recommend or secure the provider's service to or employment by a patient or as a reward for having made a recommendation resulting in the provider's service to or employment by a patient.

18 Pa. Cons. Stat. Ann. § 4117(b)(2) (Purdon 1997). We disagree with BCI that the jury could reasonably have concluded that U.S. Healthcare's conduct violated this statute. By its terms the statute forbids providers from buying recommendations or referrals of patients, and is thus properly characterized as an "anti-kickback" statute directed at providers rather than insurers, such as HMOs. Even if we ignored the statute's clear focus, BCI's contention that U.S. Healthcare violated the statute by referring patients to pharmacies that agreed to give them a benefit fails for two reasons. First, the record does not support an inference that U.S. Healthcare recommended that its members patronize any particular pharmacy in the network. Second, health care **[**99]** providers generally give HMOs something of value (at least in the form of lower prices) in exchange for admission into a network. Thus, if the allegations in this case violated the statute, HMOs might be rendered illegal in Pennsylvania. The Pennsylvania General Assembly could not have so intended.

2. Commercial Bribery

HN28[] The Pennsylvania commercial bribery statute states that a "person who holds himself out to the public as being in the business of making disinterested selection, appraisal, or criticism of commodities or services" violates the law "if he solicits, accepts or agrees to accept any benefit to influence his selection, appraisal or criticism." *18 Pa. Cons. Stat. Ann. § 4108(b)* (Purdon 1983). Thus, in order for the conduct in this case to constitute commercial bribery, BCI would have to prove (1) that U.S. Healthcare held itself out as being in the business of making *disinterested* selection, appraisal or criticism of health care providers; and (2) that it solicited, accepted, or agreed to accept a **[*528]** benefit to influence that selection, appraisal or criticism.

[100]** BCI argues that the jury had sufficient evidence before it from which to conclude that the defendants held themselves out to the public as selecting providers disinterestedly, based solely on the quality of the provider. BCI points to the testimony of defendant Wolfson to the effect that U.S. Healthcare holds itself out as having quality assurance procedures, and to a snippet from U.S. Healthcare's annual report which boasts of U.S. Healthcare's performance monitoring and quality assessment systems for the health care providers in its networks, and which states that the quality assessments systems "begin with the certification of providers before they can become eligible to care for our members."

U.S. Healthcare responds convincingly that this evidence merely documents the reality that provider quality was a necessary, but not always sufficient, criterion for inclusion in its network. The "bottom line" is that U.S. Healthcare is not a disinterested appraiser of health care providers; it is an HMO. An HMO is designed to provide access to low-cost, good quality health care, at a profit for the HMO. Thus, while U.S. Healthcare is required by law to allow only qualified providers into **[**101]** its network, [27] and chooses its providers from the set of qualified providers, it alone decides whom within that set to admit largely on the basis of a provider's willingness to furnish care at managed

---

[26] BCI's claim that U.S. Healthcare had the unlawful objective of violating the New Jersey Any Willing Provider Law, *see N.J.S. 26:2J-4.7(a)(2)*, fails because BCI has RICO standing only to recover for the loss of its TPA contract with Gary's, all of whose pharmacies are located in Pennsylvania.

BCI's argument that U.S. Healthcare had the unlawful objective of violating its own internal regulations is founded on BCI's assertion that U.S. Healthcare's internal regulations required it to admit into its network all pharmacies whose applications met U.S. Healthcare's admission criteria. BCI's brief, however, does not clearly specify the exact regulation(s) in which such a requirement is contained, and it is not at all clear that such regulations exist. At all events, BCI's claim must fail since, even if U.S. Healthcare's regulations did contain such a requirement, we see no reason why violation of an internal regulation regarding provider admission would be unlawful.

[27] *See* 28 Pa. Code. § 9.71 (1997).

care rates. There is nothing disinterested about this process, and we find no evidence to support a finding that U.S. Healthcare represented to the public that the process was, in fact, disinterested.

Finally, we note that the essence of BCI's claim is that U.S. Healthcare used its quality assurance machinery not just to assure quality, but also to coerce Gary's into giving CHA its TPA business. The commercial bribery statute, however, is not concerned with the motive underlying U.S. Healthcare's use of its quality assurance procedures, so long as U.S. Healthcare did not hold itself out as a disinterested appraiser of pharmacies. Thus, while evidence of such coercion provides fodder for BCI's tortious interference claim, *see infra*, it is misplaced in the context of **[**102]** an argument regarding the carefully circumscribed crime of commercial bribery. In sum, since BCI failed to produce evidence to support a finding that U.S. Healthcare held itself out as a disinterested appraiser of pharmacies, we must set aside the jury's finding that some of the defendants committed commercial bribery.

3. Mail and Wire Fraud

HN29[] The federal mail and wire fraud statutes, *18 U.S.C. § 1341* and *18 U.S.C. § 1343*, prohibit the use of the mails or interstate wires for the purpose of carrying out any scheme or artifice to defraud. *See Kehr Packages, Inc. v. Fidelcor, Inc., 926 F.2d 1406, 1413 (3d Cir. 1991)*. "A scheme or artifice to defraud need not be fraudulent on its face, but must involve some sort of fraudulent misrepresentations or omissions reasonably calculated to deceive persons of ordinary prudence and comprehension." *Id. at 1415* (internal quotations omitted).

BCI contends that there was ample evidence for the jury reasonably to have found that the defendants engaged in a scheme to defraud **[**103]** Gary's concerning the nature and purpose of the quality assurance audit and freeze of the Eagleville store, and the reason for the refusal to process the Abington store application. BCI submits that, whereas the defendants led Gary's to believe that legitimate quality assurance concerns motivated their actions, U.S. Healthcare really intended to use the audit as a means to pressure Gary's into switching to CHA as its TPA. Assuming that BCI is correct regarding U.S. Healthcare's true motivation (and the record supports their view), the failure to disclose this motivation does not create a cognizable "scheme to defraud" in the absence of any evidence that this omission was "reasonably calculated to deceive" Gary's.

Here, such a conclusion is not supported by the record evidence, which instead supports the conclusion that Gary's was well aware of the fact that the audits were motivated either by a desire to retaliate against it **[*529]** for canceling the contract with U.S. Healthcare and switching to a self-insurance program, or by a desire to encourage it to choose CHA as its TPA. Indeed, the thrust of plaintiff's case is that Gary's was so acutely aware of this fact that it felt **[**104]** that it had no choice but to switch TPA providers. Moreover, if U.S. Healthcare's intention was to use the audits as a means of coercing Gary's to switch TPA providers, it would make little sense to conceal this underlying motivation from Gary's. [28]

As was the case with BCI's commercial bribery claim, the evidence of defendants' heavy-handed business tactics **[**105]** and, specifically, of their misuse of the quality assurance machinery, while relevant to a tortious interference claim, cannot be made to fit within the statutory and doctrinal constraints of the mail and wire fraud statutes.

4. The Travel Act

HN30[] To make out a violation of the Travel Act, *18 U.S.C. § 1952*, BCI is required to prove interstate travel or use of an interstate facility with the intent to promote unlawful activity. *See United States v. Zolicoffer, 869 F.2d 771, 774 (3d Cir. 1989)*. "Unlawful activity" is "extortion, bribery, or arson in violation of the laws of the State in which

[28] Further, to the extent that BCI contends that U.S. Healthcare's proffered justification for the audit -- Gary's excessive use of brand name drugs -- was an overt misrepresentation, we disagree. The record shows that Gary's employees conceded that the stated reason was accurate, and that the audit revealed that Gary's was using generic drugs far less than the network average and inadequately documenting decisions not to use them. Our conclusion does not diminish BCI's claim that the audit was intended to coerce Gary's choice of TPA providers since even a "legitimate" audit may, based on timing and other circumstances, have a coercive purpose and effect.

committed or of the United States." 18 U.S.C. § 1952(b)(2). Thus, BCI's Travel Act claim hinges on the success of its Hobbs Act and commercial bribery claims. Since we have determined that the jury's findings of these predicate acts must be set aside, so too must be the finding of a Travel Act violation.

D. Conclusion

Having found that the BCI did not present a sustainable case that defendants committed any of the alleged predicate **[**106]** acts, we must set aside the verdict that defendants violated 18 U.S.C. § 1962(c) and that they conspired to violate that section as prohibited by 18 U.S.C. § 1962(d). [29]

V. TORTIOUS INTERFERENCE

In addition to finding for BCI on its federal law claims, the jury also awarded BCI damages on the theory that defendants unlawfully and improperly interfered with BCI's existing and prospective contractual relations with Gary's. Defendants challenge this **[**107]** verdict on the ground that, as competitors for Gary's TPA business, they had a privilege to interfere with BCI's terminable at will contract with Gary's so long as they did not employ "wrongful means". *See* Restatement (Second) of Torts § 768(1)(b) (1979). Defendants contend that BCI made no legally sufficient showing of wrongfulness, and thus that the "competitors' privilege" compels entry of judgment in their favor on BCI's tortious interference claim. In the alternative, defendants argue that even if BCI presented a jury question on tortious interference, a new trial is required because of an error in the jury charge.

HN31[] Pennsylvania recognizes both interference with existing contractual relations and interference with prospective contractual relations as branches of the tort of interference with contract. *See* U.S. Healthcare, Inc. v. Blue Cross of Greater Philadelphia, 898 F.2d 914, 925 (3d Cir. 1990). While the two branches of tortious interference are distinct, they share essentially the same elements. **[*530]** ***HN32***[] **[**108]** In order to prevail on a claim for intentional interference with contractual or prospective contractual relations, a plaintiff must prove:

(1) the existence of a contractual, or prospective contractual relation between itself and a third party;

(2) purposeful action on the part of the defendant, specifically intended to harm the existing relation, or to prevent the prospective relation from occurring;

(3) The absence of a privilege or justification on the part of the defendant;

(4) the occasioning of actual legal damage as a result of the defendants' conduct; and

(5) for prospective contracts, a reasonable likelihood that the relationship would have occurred but for the interference of the defendant

Pelagatti v. Cohen, 370 Pa. Super. 422, 536 A.2d 1337, 1343 (Pa. Super. 1988); *see also* Thompson Coal Co. v. Pike Coal Co., 488 Pa. 198, 412 A.2d 466, 471 (Pa. 1979); Birl v. Philadelphia Elec. Co., 402 Pa. 297, 167 A.2d 472, 474 (Pa. 1960).

The defendants assert that BCI failed to present sufficient evidence to satisfy the third element of its claim, which is the absence of privilege or justification **[**109]** on the part of the defendants. In support of this contention the defendants direct us to § 768 of the Restatement (Second) of Torts which sets forth the competitors' privilege. That section provides:

§ 768. Competition as Proper or Improper Interference.

---

[29] Defendants have also argued that the aiding and abetting liability imposed on the three U.S. Healthcare executives cannot survive because the statutory analysis applied to securities cases by the Supreme Court in Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A., 511 U.S. 164, 128 L. Ed. 2d 119, 114 S. Ct. 1439 (1994), if applied to the RICO statute, would eliminate RICO aiding and abetting liability. In view of the dismissal of the RICO claims, that argument need not be reached.

(1) ***HN33***[] One who intentionally causes a third person not to enter into a prospective contractual relation with another who is his competitor or not to continue an existing contract terminable at will does not interfere improperly with the other's relation if

(a) the relation concerns a matter involved in the competition between the actor and the other and

(b) the actor does not employ wrongful means and

(c) his action does not create or continue an unlawful restraint of trade and

(d) his purpose is at least in part to advance his interest in competing with the other.

(2) The fact that one is a competitor of another for the business of a third person does not prevent his causing a breach of an existing contract with the other from being an improper interference if the contract is not terminable at will.

[110]** *Section 768* has been recognized by Pennsylvania courts, *see Gilbert v. Otterson, 379 Pa. Super. 481, 550 A.2d 550, 554 (Pa. Super. Ct. 1988)*; *Franklin Music Co. v. American Broadcasting Co., 616 F.2d 528, 543-44 (3d Cir. 1980)*, which are guided by the Restatement of Torts in the area of tortious interference, *see Adler, Barish, Daniels, Levin & Creskoff v. Epstein, 482 Pa. 416, 393 A.2d 1175 (Pa. 1978)*.

As a threshold matter, the parties dispute whether BCI's contract with Gary's was prospective or existing, and thus whether defendants can even seek the protection of *§ 768*. BCI contends that, since it had an existing contract with Gary's at the time of defendants' alleged interference, defendants' status as competitors could not make the interference proper. *See § 768(2)*. In response, defendants argue that BCI's contract with Gary's was terminable at will, and thus that the Restatement would characterize it as prospective, *see Restatement (Second) of Torts § 766 cmt. g*. ("an interference with [a contract terminable at will] is closely analogous to interference with prospective contractual relations."), thereby bringing **[**111]** defendants' behavior within the ambit of *§ 768(1)*. While the proper classification of at will contracts in tortious interference case law has been the subject of some controversy, we need not enter this debate here since *§ 768(1)*, by its terms, applies to alleged interference with *either* prospective contractual relations or existing contracts terminable at will. There is no question that BCI's contract with Gary's was terminable at will. [30]

Turning to the four elements set forth in *§ 768(1)*, the parties do not contest that elements **[*531]** (a) and (d) are satisfied. BCI and CHA were competitors for Gary's TPA contract, and defendants had the purpose, at least in part, of advancing their interests through their competition with BCI. We also conclude that **[**112]** to the extent that BCI is arguing that defendants' conduct constituted an unlawful restraint of trade within the meaning of *§ 768(1)(c)*, this contention is foreclosed by our reversal of BCI's antitrust claim and BCI's failure to show how defendants conduct violated any other federal or state statutory or common law anti-competitive prohibition. Thus, the question is whether defendants' actions were privileged business competition, which turns on whether they employed "wrongful means" of inducement in their efforts to secure Gary's TPA contract. *See § 768(1)(b)*.

The Pennsylvania Supreme Court has yet to provide a definition of "wrongful means", and thus we turn to the Restatement for guidance. In defining what kind of means are wrongful, *comment e to § 768* provides, in part, that:

---

[30] BCI's contract with Gary's provided that "either party may terminate this Agreement for any reason or no reason at any time upon thirty (30) days written notice." This language clearly marks the contract as terminable at will upon proper notice.

> If the actor employs wrongful means, he is not justified under the rule stated in this Section. The predatory means discussed in § 767, Comment c, physical violence, fraud, civil suits and criminal prosecutions, are all wrongful in the situation covered by this Section.

Other courts, relying partly on this language, have interpreted the wrongful means element of *§ 768* to require independently **[**113]** actionable conduct on the part of the defendant. *See*, *e.g.* *DP-Tek, Inc. v. AT&T Global Information Solutions Co., 100 F.3d 828, 833-35 (10th Cir. 1997)*.

Under this standard, wrongful means are those that are themselves capable of forming the basis of liability for the defendant. *Id. at 834* (citing *Amerinet, Inc. v. Xerox Corp., 972 F.2d 1483 (8th Cir. 1992))*. The defendants contend that the Pennsylvania Supreme Court would adopt this construction of wrongful means, and that we must therefore set aside the tortious interference verdict as a matter of law since BCI has failed to identify any basis on which the defendants' conduct could be independently actionable other than the antitrust and RICO theories which we have found to be legally untenable.

The disposition of BCI's claim, however, does not require us to determine whether Pennsylvania would limit wrongful means to those that are independently actionable because the allegations of wrongful means in this case differ in one crucial aspect from those in cases such as *DP-Tek*. Whereas in *DP-Tek* the defendant was accused of using wrongful means in the market in which **[**114]** it and the plaintiff competed, here BCI has alleged that the defendants employed economic pressure in what we have deemed the market for pharmacy customers (where BCI was not a competitor) in order to force Gary's hand in the TPA market (where BCI and CHA competed). This form of "competition" is specifically deemed wrongful by the portion of comment e which directly follows that quoted above. It reads:

> ***HN34***[] The rule stated in this Section rests on the belief that competition is a necessary or desirable incident of free enterprise. Superiority of power in the matters relating to competition is believed to flow from superiority in efficiency and service. If the actor succeeds in diverting business from his competitor by virtue of superiority in matters relating to their competition, he serves the purposes for which competition is encouraged. *If, however, he diverts the competitor's business by exerting a superior power in affairs unrelated to their competition there is no reason to suppose that his success is either due to or will result in superior efficiency or service and thus promote* **[**115]** *the interest that is the reason for encouraging competition. For this reason economic pressure on the third person in matters unrelated to the business in which the actor and the other compete is treated as an improper interference*.

§ 768, cmt. e. (emphasis added)

Based on the this section of comment e, we believe that even if the Pennsylvania Supreme Court were to require independently actionable means, it would not apply that requirement in cases, such as this one, where the defendant exerted "economic pressure" or "a superior power" in a market unrelated **[*532]** to the competitive market. *Cf.* *DP-Tek, 100 F.3d at 835 n.8* (citing comment e and noting that an exception to the independently actionable conduct requirement may exist "where a plaintiff proffers evidence that the defendant exerted 'a superior power in affairs unrelated' to the business in which they compete."). The defendants contend that Pennsylvania, while it has adopted *§ 768*, would ignore this portion of comment e. We disagree, since we see no reason why Pennsylvania would subscribe to the requirements of *§ 768*, but only to selective portions of the comments explaining that section.

[116]** BCI proffered ample evidence from which a jury could conclude that U.S. Healthcare attempted to acquire Gary's TPA business by threatening Gary's with withdrawal of its membership in the U.S. Healthcare provider network. BCI also adduced evidence of heavy-handed tactics by U.S. Healthcare in the market for pharmacy customers. As was discussed in the RICO section, a reasonable jury could have found that U.S. Healthcare used its quality assurance machinery not only to assure quality, but also to generate economic pressure on Gary's to switch TPA providers. While we found that this coercive misuse of the quality assurance apparatus was not cognizable as commercial bribery or mail/wire fraud, *see supra*, it is sufficient, based on comment e, to constitute wrongful means under Pennsylvania tortious interference law.

Defendants seek to avoid the clear application of comment e to their actions by arguing that since both comment e and federal tying/coercive reciprocal dealing jurisprudence are concerned with the extension of economic power from one market to another, the two bodies of law should be read in tandem, and thus that BCI's failure to show that the defendants possessed sufficient **[**117]** market power to violate the Sherman Act should preclude BCI, as a matter of law, from recovering on its tortious interference claim. Put differently, defendants assert that they could not apply "economic pressure" on Gary's in the market for pharmaceutical customers since they did not have appreciable market power, under federal law, in that market. We disagree both with the defendants' reading of comment e and with the premise that state tortious interference law and federal ***antitrust law*** should be read in *pari materia*.

Defendants' argument that the federal market power requirement must be grafted onto comment e is predicated on their suggestion that without such a requirement, comment e would render all reciprocal dealing/tying arrangements tortious -- even those that are pro-competitive. (Our reference to pro-competitive tying arrangements is to those that do not violate the Sherman Act.) Defendants submit that such a result would be contrary to the public policy of Pennsylvania as evidenced by the Commonwealth's failure to pass an Any Willing Provider law. According to the defendants, this failure indicates that Pennsylvania favors selective contracting between HMOs and providers, **[**118]** and thereby approves of the conduct at issue here.

We decline to read an affirmative policy statement into a legislature's failure to pass a law; to do so would be wholly speculative. But even if defendants are correct that Pennsylvania has a policy of allowing HMOs to decide whom to admit into their networks, it would stretch this policy beyond its logical constraints to find in it tacit approval of the use of threatened exclusion from a pharmacy network to foreclose competition on the merits in an unrelated market.

Furthermore, we do not agree with defendants' reading of comment e. Rather, ***HN35***[] we read the language requiring the plaintiff to show that the defendant employed "economic pressure" and "a superior power" in the unrelated market as requiring evidence that the defendant used its economic power in that market to coerce the third party's decision in the competitive market. In order to show coercive pressure, the plaintiff must prove that the defendant exercised *some* market power in the unrelated market -- lest the third party simply ignore its demands. However, we see no reason **[**119]** why economic coercion cannot be generated by market power that, while not sufficient to violate the **[*533]** Sherman Act, is nonetheless not insignificant, which is the case here. [31]

[120]** Viewing the preceding discussion in a broader context, defendants' contention that comment e should be read to include a federal market power requirement ignores the different purposes and scopes of inquiry of the two bodies of law. In particular, it fails to recognize both the gatekeeping role that the market power requirement plays in federal tying jurisprudence and the quite different policies of state tort law. Federal ***antitrust law*** is directed at protecting competition rather than individual competitors, and outlaws only those tying/reciprocal dealing arrangements that substantially foreclose competition in the tied product market. The market power requirement of the *per se* antitrust jurisprudence serves this goal since it is presumed that where the defendant exercises appreciable market power in the tying product market it can leverage that power to substantially foreclose competition in the tied product market.

The use of the federal market power screen is, however, inapposite to state tortious interference law which does not predicate liability on a showing that the defendant's conduct had broad anti-competitive effects. ***HN36***[] **[**121]**

[31] We reject defendants' argument that they are entitled to judgment as a matter of law since the only *direct* evidence that Gary's was coerced consists of hearsay testimony from three BCI employees to whom Gary's Robin Risler indicated that she was forced to fire BCI, and testimony from Sandra Chen that Gary Wolf had indicated to her that he was under pressure to entertain a bid for U.S. Healthcare's TPA service. The district court properly admitted these statements pursuant to *Fed. R. Evid. 803(3)*, the "state of mind" exception to the hearsay rule, with the limiting instruction that the jury should not view the testimony as proof of the truth of the underlying facts asserted. Defendants contend that despite this instruction, the jury must have improperly used the testimony as substantive evidence of coercion, because there was no other evidence of coercion. We disagree with this conclusion and with the defendants' view of the evidence, since we believe that there is ample *circumstantial* evidence from which a jury could have reasonably inferred that Gary's was coerced. Defendants are, of course, free to argue their view of the evidence on remand.

Unlike federal ***antitrust law***, state tortious interference law is designed to protect competitors not competition. In this regard, it bases liability for competitors, in part, on the means of competition employed and their effect on a single competitive interaction. This inquiry neither requires, nor is served by, a showing that the defendant exercised appreciable market power.

In the end, we take a fundamentally different view of BCI's tortious interference claim from that espoused by the defendants. As we noted earlier in this opinion, the crux of defendants' argument is that BCI should not be able to repackage a failed antitrust claim as tortious interference. In our view, BCI has attempted just the opposite. That is, it has taken conduct that constituted tortious interference with contractual relations and attempted to turn it into violations of federal antitrust and racketeering laws. While these attempts have been derailed on this appeal, that result does not foreclose BCI's state tort law claim.

Despite our determination that BCI adduced sufficient evidence at trial to allow a reasonable jury to find that defendants employed wrongful means and thus acted outside the scope of **[**122]** the competitors' privilege, we must reverse the judgment and remand the case for a new trial because of errors in the relevant jury charge. The district court instructed the jury on "wrongful means" as follows:

> It is -- wrongful means to take business away from a competitor by using economic power in matters that are unrelated to the business in which the competitors compete. Thus taking away a competitor's business by applying economic pressure in an area that is unrelated to the field in which the parties compete constitutes wrongful means.
>
> Wrongful means also include any unlawful conduct in violation of specific statutory provisions or of established public policy.
>
> To determine whether a defendant's interference was wrongful, you should consider the following factors: first, the nature of the actor's conduct; second, the actor's motive; third, the interests of the other with which the actor's conduct interferes; **[*534]** fourth, the interests sought to be advanced by the actor; fifth, the social interests in protecting the freedom of action of the actor and the contractual interests of the other; sixth, the proximity or remoteness of the actor's conduct to the interference **[**123]** and, seventh, the relations between the parties.

As set out in the proceeding discussion, the first paragraph of this instruction, which is derived from *comment e to § 768*, provides a proper basis on which the jury could have determined that the defendants' conduct was wrongful. However, the second paragraph, while an accurate statement of the law, necessitates a retrial because it invited the jury to import the errors in the antitrust and RICO analysis, as set out *supra*, into the tortious interference analysis. Indeed, based on the prominent position that BCI's antitrust claim occupied at trial, such infection almost certainly occurred. Faced with this circumstance, the proper course is for us to remand for a new trial rather than attempt to divine the basis of the jury's verdict. *See* *Wilburn v. Maritrans GP, Inc., 139 F.3d 350, 1998 U.S. App. LEXIS 4134, 1998 WL 100551*, *9 (3d Cir. 1998) ("***HN37***[] Where a jury has returned a general verdict and one theory of liability is not sustained by the evidence or legally sound, the verdict cannot stand because the court cannot **[**124]** determine whether the jury based its verdict on an improper ground."); *Avins v. White, 627 F.2d 637, 646 (3d Cir. 1980)* (" 'Where . . . a general verdict may rest on either of two claims -- one supported by the evidence and the other not -- a judgment thereon must be reversed.' ") (quoting *Albergo v. Reading Co., 372 F.2d 83, 86 (3d Cir. 1967))*; *see also* *McKenna v. Pacific Rail Service, 32 F.3d 820, 831-32 (3d Cir. 1994)*. [32]

---

[32] We do not believe that any doubt is cast on the applicability of this general rule by the fact that this case was submitted to the jury on special interrogatories and thus, unlike the cases cited, the jury did not render a general verdict. Our reading of the verdict sheet submitted to the jury in this case indicates that, at least as to the tortious interference count, the verdict rendered by the jury was the functional equivalent of a general verdict. The sole question relating to tortious interference liability posed to the jury was

> Do you find that the plaintiff has proven by a preponderance of the evidence that the following defendants intentionally interfered with the plaintiff's existing or prospective contractual relations.

[125]** BCI argues that remand is not required since defendants' waived any objection to the jury charge. Their argument has two bases. The first is ***HN38***[] *Fed. R. Civ. P. 51* which requires any objections to the jury charge to be made at the close of the charge. As BCI correctly notes, no such objection was lodged in this case. Despite this failure, we do not find waiver since we see no basis on which defendants could have objected to this portion of the instruction. As noted, the problem with the court's instruction was not that it misstated the law, but rather that, in correctly stating the law, it created the possibility that errors in the RICO and antitrust verdicts would contaminate the tortious interference verdict. Thus, it was not until our decision on appeal that the tortious interference instructions became erroneous. In such a situation, it would be unfair to visit the harsh consequence of waiver on the defendants. This conclusion is buttressed by the fact that defendants did object at trial to the jury instructions regarding the alleged antitrust violation.

BCI also contends that since the **[**126]** case was submitted to the jury on special interrogatories, defendants' failure to proffer any interrogatories requiring the jury to specify the basis on which they found defendants conduct to be wrongful resulted in a waiver by defendants of any right they had to a new trial on that basis. This contention is based on *Fed. R. Civ. P. 49(a)*, which governs the use of special verdicts in the federal courts. Specifically, plaintiff relies on that part of ***HN39***[] *Rule 49(a)* which provides that if, when submitting special interrogatories to the jury, "the court omits any issue of fact raised by the pleadings or by the evidence, each party waives the right to a trial by jury of the issue so omitted unless before the jury retires he **[*535]** demands its submission to the jury." *Fed. R. Civ. P. 49(a)*. [33]

[127]** While, under *Rule 49(a)*, a court may be deemed to have made a factual finding on an element of an offense that is necessary to sustain a judgment even though the jury did not specifically answer an interrogatory concerning that element, *see* *Watkins v. Fibreboard Corp., 994 F.2d 253, 257-58 (5th Cir. 1993)*, we do not read this rule, by its terms, as applying to the situation where, as here, the defendants' objection is not based on the fact that the wrongfulness issue was not submitted to the jury, but rather that the court gave a definition of wrongful that has been rendered erroneous by our decision on this appeal.

Nor would such an application be in keeping with the purpose of that section of *Rule 49(a)* that allows the trial court to "fill in the gaps" of a special verdict. As noted in *Watkins*, this ability

> is imperative if a special verdict . . . rather than a general verdict is to continue to be employed.
> Otherwise there would always be the danger that the special verdict would be set aside because the jury had failed to make a particular finding whereas a general verdict could not be challenged on this ground.

994 F.2d at 258 **[**128]** (citing 5A *Moore's Federal Practice* P 49.03(4) (1993); 9a Charles A. Wright & Arthur R. Miller, *Federal Practice and Procedure* § 2507 (1971)). In this case, even had the jury rendered a general verdict, we would be constrained to remand for a new trial based on errors in the charge. Thus, the need to preserve symmetry between the treatment of general and special verdicts would not be served, and would indeed be denigrated, by a finding of waiver predicated on *Rule 49(a)*.

As this interrogatory in no way facilitates our inquiry into the basis for the jury verdict, we find that the general rule requiring remand stated in *Wilburn* and *Avins* governs.

[33] ***HN40***[] *Rule 49(a)* provides:

> (a) Special Verdicts. The court may require a jury to return only a special verdict in the form of a special written finding upon each issue of fact. In that event the court may submit to the jury written questions susceptible of categorical or other brief answer or may submit written forms of the several special findings which might properly be made under the pleadings and evidence; or it may use such other method of submitting the issues and requiring the written findings thereon as it deems most appropriate. The court shall give to the jury such explanation and instruction concerning the matter thus submitted as may be necessary to enable the jury to make its findings upon each issue. If in so doing the court omits any issue of fact raised by the pleadings or by the evidence, each party waives the right to a trial by jury of the issue so omitted unless before the jury retires the party demands its submission to the jury. As to an issue omitted without such demand the court may make a finding; or, if it fails to do so, it shall be deemed to have made a finding in accord with the judgment on the special verdict.

VI. CONCLUSION

For the foregoing reasons, the judgment of the district court will be reversed and the case remanded with instructions to grant judgment for the defendants' on BCI's antitrust and civil RICO claim, and to conduct a new trial on BCI's claim for tortious interference with contractual relations. [34]

[129]** The parties shall bear their own costs.

End of Document

[34] On retrial, the jury will have to consider anew whether defendants' behavior was outrageous enough to warrant an award of punitive damages under Pennsylvania law. *See* *Takes v. Metropolitan Edison Co., 440 Pa. Super. 101, 655 A.2d 138, 146 (Pa. Super. 1995)* ***HN41***[] ("Punitive damages will lie only in cases of outrageous behavior, where defendant's egregious conduct shows either an evil motive or reckless indifference to the rights of others.") While the original jury found malice on the part of U.S. Healthcare and its executives, such a finding may not be inevitable at retrial where the jury will not be under the mistaken impression that defendants' conduct violated the Sherman Act, civil RICO, and the statutes underlying the predicate acts of the RICO count. We, of course, intimate no view on that subject.

J. Allen Ramey, M.D., Inc. v. Pacific Found. for Med. Care

HN1[] **Entitlement as Matter of Law, Appropriateness**

On a motion for summary judgment pursuant to *Fed. R. Civ. P. 56*, the moving party must first establish that there is no genuine issue of material fact and that the moving party is entitled to judgment as a matter of law. Summary judgment must be granted if the party responding to the motion fails to make a sufficient showing on an essential element of her case with respect to which she has the burden of proof.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[ ] **Entitlement as Matter of Law, Appropriateness**

Although the moving party has the initial burden of demonstrating that summary judgment is proper, that burden may be discharged by pointing out to the court an absence of facts to support the nonmoving party's case. The burden then shifts to the nonmoving party to show that summary judgment is not appropriate. To make such a showing, the nonmoving party must go beyond the pleadings to designate specific facts showing that there is a genuine issue for trial. When considering whether summary judgment is appropriate, the court should draw all reasonable factual inferences in favor of the nonmoving party. If the court finds that judgment may be entered as a matter of law or that no reasonable factfinder could find in favor of a party, summary judgment is warranted.

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

HN4[] **Remedies, Damages**

The Sherman Act does not authorize private causes of action. The available remedies for private plaintiffs are found in the Clayton Act, which authorizes certain antitrust suits for monetary relief (*15 U.S.C.S. § 4*) and injunctive relief (*15 U.S.C.S. § 16*). *15 U.S.C.S. §§ 15*, *26*. A private plaintiff may not recover damages under *§ 4* of the Clayton Act merely by showing injury causally linked to an illegal presence in the market. To proceed under the Clayton Act, a private plaintiff must show that he suffered an "antitrust injury" by showing that his injury resulted directly from the defendant's anticompetitive acts, that the harm was of the type that the antitrust laws are intended to prevent, and that the injuries reflect the anticompetitive effect of the violation. The antitrust injury requirement applies to plaintiffs even when they are alleging per se antitrust violations.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN5[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Bare allegations of threatened predatory pricing are inadequate to establish antitrust injury; the circumstances must be such as to make such an allegation credible. Courts should not find allegations of predatory pricing credible when the alleged predator is incapable of successfully pursuing a predatory scheme.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN6[] **Regulated Practices, Price Fixing & Restraints of Trade**

A competitor may not complain of conspiracies that set minimum prices at any level. Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.

Opinion

[*1356] ORDER DENYING PLAINTIFF'S MOTION FOR SUMMARY JUDGMENT AND GRANTING DEFENDANT'S MOTION FOR SUMMARY JUDGMENT

I. Case Type and Jurisdiction

Plaintiff is suing Defendant under the Clayton Act for treble damages and injunctive relief for alleged violations of *§ 1* of the Sherman Antitrust Act, *15 U.S.C. § 1*. The Court has federal question jurisdiction over this action pursuant to *15 U.S.C. §§ 15*, *26* and *28 U.S.C. § 1337*. The parties have **[*1357]** submitted cross-motions for summary judgment.

On January 22, 1998, the Court requested that the parties submit additional briefing on the following question: "Has the Plaintiff suffered an 'antitrust injury' cognizable under *§ 4* and *§ 16* of the Clayton Act? See *15 U.S.C. §§ 15*, *26*; *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*; *Atlantic Richfield Co. v. USA Petroleum, 495 U.S. 328, 109* ***[**2]*** *L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*."

II. Background

Plaintiff J. Allen Ramey, M.D., Inc. ("Plaintiff") is a corporation owned by Dr. Ramey that offers ear, nose, and throat ("ENT") medical services in San Diego County. [1] Defendant Pacific Foundation for Medical Care ("Defendant" or "PFMC") is a non-profit, preferred provider organization (PPO) headquartered in Santa Rosa, California, that facilitates business between health care providers (i.e., doctors, hospitals) and third-party payors (i.e., insurance companies, health care service plans). Doctors may apply to Defendant to become preferred providers. Defendant selects preferred providers based upon their willingness to agree to provide medical services within certain reimbursement rate schedules and to abide by certain cost-containment quality of care and utilization controls.

[3]** Defendant's reimbursement rate schedule is established each year by an at least nominally independent actuary, Mr. Robert Shirrell. The actuarial process reviews industry data to establish a schedule of conversion factors that weigh the relative value of different types of services. These conversion factors are multiplied by prices for specific medical procedures, as established in the 1974 California Relative Value Studies, to determine the maximum price that will be reimbursed to preferred providers for services rendered to PFMC-affiliated patients. [2] Health care providers and third-party payors are permitted, and sometimes do, lobby Mr. Shirrell to adjust the schedule. Defendant's board of trustees does not vote on the schedule, and the schedule is not submitted to doctor-members for group approval. The schedules must be accepted or rejected on a yearly basis by each individual provider when they decide whether to renew their association with Defendant.

[4]** The quality of care and utilization control standards are established by Defendant's liaison committees for each of some thirty specialties. The otolaryngology liaison committee is composed of eleven to fifteen ENT specialists from practice locations throughout the country. These standards prescribe guidelines for testing, surgery, use of alternate techniques, etc. These standards are used to determine the appropriate billing codes to be charged to a patient, and are designed to protect payors from unnecessary and excessive procedures and overbilling.

---

[1] Dr. Ramey personally is not a party to this case. In fact, on November 10, 1997, California revoked Dr. Ramey's medical license for gross negligence in his treatment of a patient, although revocation was stayed and Ramey was placed on probation for a term of two years. At the same time, the report noted that Dr. Ramey had practiced for twenty-six years without any disciplinary action having been taken against him, and that he was a competent and caring physician. Because Plaintiff's counsel has continued to prosecute this lawsuit, the Court infers that Dr. Ramey's practice continues to operate, and that it will allegedly suffer antitrust injuries from Defendant's practices. However, Dr. Ramey's declaration, filed on October 24, 1997, states that he recently sold his practice and that he is currently taking a sabbatical, but that he later intends to return to work as an independent contractor at his former practice. Were the Court not granting summary judgment to Defendant, it would need to consider whether these facts would affect this lawsuit.

[2] These patients are sometimes referred to as "PFMC-affiliated patients" in this Order. However, it is important to note that the patients do not have a direct relationship with Defendant, nor are their health care choices controlled by Defendant. Their relationship with Defendant is based upon the contract between their insurer and Defendant.

A five-person membership committee reviews membership applications from the San Diego area in accordance with specified procedures. Fifty-six ENT specialists are listed in Defendant's 1997 San Diego County preferred provider directory. These doctor-members are free to join other PPO organizations. Several other PPOs operate in the San Diego area, and there is no evidence that Defendant is a dominant market actor in this area.

[*1358] Defendant contracts with third-party payors to make available its "panel" of preferred providers in accordance with its cost-containing advantages. Patients who are affiliated with these third-party payors through **[**5]** their insurance coverage or employee health benefit plans are then permitted to obtain services from preferred providers under whatever payment arrangements are established by the agreements between patients and their insurers. Typically, patients pay less money out of pocket when they visit a preferred provider, but they are not prohibited from seeking services from any doctor. In any case, the actual payments made by patients and by their insurers are governed by patients' insurance agreements, and not by Defendant. [3]

Defendant serves to bring together doctors on one side, and patients and their third-party payors on the other, by developing arguably mutually beneficial cost-containment strategies, including maximum fees for certain services. This system, a common framework among PPOs, enables insurance companies to permit their customers greater freedom to choose **[**6]** their doctor while reducing the companies' exposed risk to overbilling and providing greater assurance to patients that they will be reimbursed on a relatively more familiar and simple system than an *ad hoc* reimbursement plan.

Dr. Ramey [4] was a doctor-member of PFMC until 1989, when he claims that he quit due to conflicts about his billing practices. On June 6, 1995, Ramey reapplied for membership. His application included an explicit acceptance of Defendant's reimbursement policies, including the maximum price schedules. On August 29, 1995, Ramey was informed that his application had been denied on the grounds that his "practice patterns have been found to be inconsistent with peer review norms adopted by the Foundation or that which is generally accepted in the community." Further letters to Ramey's counsel on February 16 and April 9, 1996, explain that the membership committee believed that Ramey had a history of billing for unnecessary tests and for "unbundling" extra charges that should have been included in a global fee (e.g., charging separately for office visit or supplies that should have been included in the fee charged for a performed procedure). Ramey declined invitations **[**7]** to appear for an interview or to appeal. On October 11, 1996, Plaintiff filed this antitrust action. Plaintiff seeks the following relief: (1) a declaration that Defendant has engaged in unlawful activities, (2) $ 2,000,000 in compensatory damages, to be trebled for violation of the antitrust laws, (3) a permanent injunction preventing Defendant from enforcing its maximum fee schedule on doctors, and (4) costs and attorney's fees.

On February 4, 1997, the Court denied Defendant's motion to dismiss the suit. Both Plaintiff and Defendant have now submitted motions for summary judgment.

III. Plaintiff's Claims

Plaintiff's first cause of action alleges that Defendant's refusal to accept Dr. Ramey as a member was an illegal group boycott that limits Plaintiff's access to PFMC-affiliated patients and handicaps its ability to compete in the market **[**8]** for ENT medical services. Plaintiff argues that the boycott (1) suppresses competition in ENT services, (2) prevents Plaintiff from competing for PFMC-affiliated patients, (3) shrinks Plaintiff's clientele, and (4) discourages Plaintiff from attempting new and innovative treatment techniques.

Plaintiff's second cause of action alleges that PFMC fixes prices for medical care by imposing maximum prices to be charged by its preferred providers. Plaintiff alleges that the price-fixing scheme stifles competition and innovation

---

[3] In some cases, the contracts between Defendant and third-party payors provide that Defendant will process and collect payments for the payors.

[4] Dr. Ramey, and not the Plaintiff, J. Allen Ramey, M.D., Inc., was a member of PFMC. Plaintiff itself did not apply for membership. See footnote 1 of this Order.

by rewarding the *status quo* and discouraging state-of-the-art medical care. Plaintiff further alleges that the scheme hinders its ability to compete for PFMC-affiliated patients and forces Dr. Ramey to accept the same compensation as less experienced doctors.

Plaintiff's third cause of action alleges that Defendant's rejection of Dr. Ramey's membership application was illegal because it was **[*1359]** done in furtherance of its price-fixing scheme.

IV. Discussion

A. Standard of Law

HN1[] On a motion for summary judgment pursuant to *Federal Rule of Civil Procedure 56*, the moving party must first establish that there is "no genuine issue of material fact and **[**9]** that the moving party is entitled to judgment as a matter of law." *British Airways Board v. Boeing Co., 585 F.2d 946, 951 (9th Cir. 1978)*. Summary judgment must be granted if the party responding to the motion fails "to make a sufficient showing on an essential element of her case with respect to which she has the burden of proof." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. ***HN2***[] Although the moving party has the initial burden of demonstrating that summary judgment is proper, that burden may be discharged by pointing out to the court an absence of facts to support the nonmoving party's case. *Id. at 325*.

The burden then shifts to the nonmoving party to show that summary judgment is not appropriate. *Celotex, 477 U.S. at 324*. To make such a showing, the nonmoving party must go beyond the pleadings to designate specific facts showing that there is a genuine issue for trial. Id. When considering whether summary judgment is appropriate, the Court should draw all reasonable factual inferences in favor of the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 257, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. If the Court **[**10]** finds that judgment may be entered as a matter of law or that no reasonable factfinder could find in favor of a party, summary judgment is warranted. *Id. at 249-52*.

B. Price-Fixing

Although Plaintiff's complaint alleges three separate causes of action, the heart of this suit is the allegation, found in the second cause of action, that Defendant's member-doctors conspired to fix a maximum price for ENT medical services in the San Diego market. ***HN3***[] Agreements by competitors to fix prices are "unlawful per se under the Sherman Act, and . . . no showing of so-called competitive abuses or evils which those agreements were designed to eliminate or alleviate may be interposed as a defense." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. In 1982, the Supreme Court applied this standard to horizontal maximum-price fixing conspiracies in the medical arena in *Arizona v. Maricopa County Medical Society, et al., 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*.

In Maricopa, the State of Arizona brought suit against two large medical societies and their respective "foundations for medical care." The defendants commanded **[**11]** the membership of large percentages of the practicing doctors in Maricopa and Pima Counties of Arizona. [5] The foundations adopted schedules establishing maximum prices for a variety of medical services. Their boards of trustees calculated "relative values" and "conversion factors" used to compute fees, and these schedules were submitted to the entire doctor-membership for approval by majority vote. Member-doctors agreed to charge no more than the maximum fee to any patient insured by a foundation-endorsed plan. Insurance policies typically permitted their insureds to visit any doctor but required them to pay any excess amount charged by the non-member physician. The Supreme Court held that, as a horizontal

[5] The Maricopa Foundation represented 70% of the practitioners in Maricopa County. *Maricopa, 457 U.S. at 339*. The Supreme Court was unable to determine precisely the membership of the Pima Foundation, noting that a 1975 publication reported 80% membership, while an affidavit filed in 1978 as part of the case reported 30%. *Id. at 340 n. 8*.

price-fixing agreement, the foundations' fee schedules constituted per se violations of *§ 1* of the Sherman Act. It was essential to Maricopa's determination of per se illegal horizontal price restraints that prices were fixed by doctors themselves. *Maricopa, 457 U.S. at 352-355*.

[12]** Defendant argues, and the Court finds at least plausible, that the instant case is distinguishable from Maricopa because doctors did not themselves establish the price schedules, and because each doctor acted individually. This argument could be construed as an attempt to characterize the price-fixing as vertical (vertical maximum prices are no longer per se illegal, *State Oil Co. v. Khan, et al., 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)*, and maximum medical prices vertically imposed by insurance companies in another case were found not to violate the antitrust laws, *Barry v. Blue Cross of California, 805 F.2d 866 (9th Cir. 1986))*. In the alternative, Defendant may be arguing that, even if it cannot be said to have a vertical relationship with its doctor-members, Maricopa still does not apply because the doctors themselves did not fix prices, but instead only made individual decisions to accept or reject fee schedules established by the actuary.

While Defendant's arguments may have merit, Plaintiff has at the least stated a case that bears a strong resemblance to Maricopa. It therefore is appropriate at this stage to determine whether, viewing the complete record **[**13]** before the Court, Plaintiff is entitled to bring a private cause of action pursuant to the Clayton Act. Therefore, the Court will first assume, *arguendo*, that Defendant's practices are congruous with those found to be per se violations in Maricopa.

C. Antitrust Injury

1. Standard of Law

HN4[] The Sherman Act does not authorize private causes of action. The available remedies for private plaintiffs are found in the Clayton Act, which authorizes certain antitrust suits for monetary relief (*§ 4*) and injunctive relief (*§ 16*). *15 U.S.C. §§ 15*, *26*. "A private plaintiff may not recover damages under *§ 4* of the Clayton Act merely by showing 'injury causally linked to an illegal presence in the market.'" *Atlantic Richfield Co. (ARCO) v. USA Petroleum, 495 U.S. 328, 334, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))*. To proceed under the Clayton Act, a private plaintiff must show that he suffered an "antitrust injury" by showing that his injury resulted directly from the defendant's anticompetitive acts, that the harm was of the type that the antitrust laws **[**14]** are intended to prevent, and that the injuries reflect the anticompetitive effect of the violation. *Brunswick, 429 U.S. at 488-489*. The activities of a monopolist or cartel may indeed injure a competitor through increased competition, but such harm does not create a private right of action. The antitrust injury requirement is purposed on the maxim that antitrust laws were enacted for the "protection of competition, not competitors." *Id. at 488* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. The requirement is not derived from constitutional standing, but instead from prudential concerns about potential misappropriation of ***antitrust law*** for unintended purposes.

The antitrust injury requirement applies to plaintiffs even when they are alleging per se antitrust violations. See *ARCO, 495 U.S. at 341-346*. ARCO involved allegations of vertical, maximum price fixing. At the time ARCO was decided, vertical maximum price-fixing was illegal per se, as established in *Albrecht v. Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)* (Albrecht was overruled in *State Oil Co. v. Khan, et* ***[*1360]*** *al., 139* ***[**15]*** *L. Ed. 2d 199, 118 S. Ct. 275 (1997))*. In ARCO, the Supreme Court rejected the plaintiff's argument that antitrust injury can be inferred by the existence of per se violations. The Court determined that the purpose of the antitrust injury requirement was unrelated to the factors that guide per se versus rule-of-reason analysis, and that "proof of a per se violation and of antitrust injury are distinct matters that must be shown independently." *ARCO, 495 U.S. at 344* (quoting 2 AREEDA & HOVENKAMP, ***ANTITRUST LAW***, P 334.2c, p. 380 (1989 Supp.).

The Court must be particularly sensitive to the antitrust injury requirement in this case because Plaintiff is a competitor, not a consumer. As the Seventh Circuit has noted, "competitors' theories of injury under *section 4* deserve particularly intense scrutiny. … Whenever the plaintiff and consumers have divergent rather than congruent interests, there is a potential problem in finding 'antitrust injury.' If, as in Brunswick, itself, the plaintiff and defendant are competitors, the plaintiff gains from higher prices and loses from lower prices--just the opposite of the consumers' interest. When the plaintiff is a poor champion of **[**16]** consumers, a court must be especially careful not to grant relief that may undercut the proper functions of antitrust." *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1419 **[*1361]** (7th Cir. 1989)* (citations omitted). See also 2 AREEDA & HOVENKAMP, ***ANTITRUST LAW***, P 373a, p. 275 (1995 ed.) ("Because a competitor opposes efficient, aggressive, and legitimate competition by his rivals, he has an incentive to . . . use an antitrust suit to delay their operations or induce them to moderate their competition. For that reason, the courts should be skeptical of a plaintiff's claims that his rivals have violated the antitrust laws and caused . . . antitrust injury.")

While the precise legal standards are stated elsewhere in this Order, it cannot be said too often that the only injuries that qualify as antitrust injuries are injuries of the type that Congress intended to protect when they adopted the antitrust laws. The definition does not include other injuries directly caused by acts clearly prohibited by the antitrust laws. Nor does the definition include injuries to an individual business' competitiveness (i.e., being forced out of business) that are ultimately caused by **[**17]** fair market forces, even in the presence of clear antitrust violations.

The Court must therefore examine the nature of Plaintiff's alleged injuries. To review possible bases for antitrust injury caused by a maximum price scheme, the Court will focus its evaluation on two cases: (1) ARCO, in which the Supreme Court considered whether a competitor could establish antitrust injury from a vertical maximum-price fixing conspiracy; and (2) because ARCO involved vertical price-fixing, the Court will evaluate potential theories of antitrust injury unique to a horizontal price-fixing scheme as contemplated in Maricopa.

2. ARCO

While ARCO involved vertical price-fixing, its analysis of competitor antitrust injury allegations is highly instructive. The plaintiff, USA Petroleum Company (USA), was an independent retail marketer of gasoline that purchased gasoline from major petroleum companies for resale under its own brand name. The defendant, Atlantic Richfield Co. (ARCO), was an integrated oil company that sold its gasoline to consumers directly through its own stations and indirectly through ARCO-brand dealers. In the early 1980s, ARCO developed a marketing strategy **[**18]** to compete with independent, discount gasoline retailers. The strategy included the elimination of credit card sales and the provision of short-term discounts to retailers to enable them to match retail prices offered by independents. USA sued, alleging that ARCO conspired to fix maximum prices at artificially low levels in violation of *§ 1* of the Sherman Act.

The district court granted summary judgment for ARCO on the *§ 1* claim, finding that "even assuming that [USA] can establish a vertical conspiracy to maintain low prices, [USA] cannot satisfy the 'antitrust injury' requirement of Clayton Act *§ 4*, without showing such prices to be predatory." *ARCO, 495 U.S. at 333* (internal quotations omitted). A divided panel of the Ninth Circuit reversed, but the Supreme Court granted *certiorari* and reversed.

The Supreme Court wrote that an injury, "although causally related to an antitrust violation, nevertheless will not qualify as antitrust injury unless it is attributable to an anti-competitive aspect of the practice under scrutiny, since it is inimical to the antitrust laws to award damages for losses stemming from continued competition." *ARCO, 495 U.S. at 334* (internal **[**19]** punctuation and citations omitted). The Court rejected the notion that the antitrust injury requirement can be satisfied by a showing that the long-term effect of the allegedly violative conduct would ultimately reduce competition. *Id. at 337 n.7*. "Rivals cannot be excluded in the long run by a nonpredatory maximum-price scheme unless they are relatively inefficient." Id. (citations omitted).

Plaintiff has not alleged that Defendant's prices are predatory. Even if it had, it appears highly unlikely that such a claim could be supported. [6] Therefore, ARCO suggests **[*1362]** that Plaintiff has not suffered an antitrust injury in this case.

[20]** Plaintiff's supplemental brief does not attempt to distinguish ARCO; therefore, it must be relying on additional theories of antitrust injury based upon Maricopa. [7] However, before proceeding to those theories, the Court will first consider whether ARCO is dispositive.

[21]** A pre-ARCO Supreme Court case lends support for the proposition that the logic of ARCO applies in horizontal price-fixing schemes. *Matsushita Elec. Industrial Co. v. Zenith Radio Corp, et al., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. In Matsushita, American television manufacturers sued twenty-one Japanese or Japanese-controlled corporations that manufactured and/or sold television sets in the United States, alleging that the Japanese companies, as horizontal competitors, had conspired to eliminate American producers by maintaining artificially low prices for their products in the United States. As horizontal price-fixing, the conspiracy would have been illegal per se under *§ 1* of the Sherman Act. The district court granted summary judgment for the defendants, finding that the plaintiffs had not presented sufficient evidence of a conspiracy to establish a triable issue of fact. The Third Circuit reversed, but the Supreme Court reversed the circuit.

The evidentiary issues upon which Matsushita turned are not relevant to this case. However, the opinion provides guidance regarding antitrust injury in horizontal price-fixing cases. The Court found **[**22]** that a plaintiff must "show that the conspiracy caused them an injury for which the antitrust laws provide relief," *citing* *Brunswick, 429 U.S. at 488-489*, and that such a showing required proof that "petitioners conspired to price *predatorily* in the American market, since the other conduct in the alleged conspiracy cannot have caused such an injury." *Matsushita, 475 U.S. at 584 n. 7* (emphasis added). In addition to dispelling any doubt that the antitrust injury requirement applies to suits alleging horizontal price-fixing, the language suggests that a *non-predatory* horizontal price-fixing conspiracy could not cause an antitrust injury.

Such an inference is not remarkable, given the Supreme Court's finding four years later in ARCO that a vertical maximum-price scheme could not cause antitrust injury unless it was predatory. From a competitor's vantage point, the exercise of a non-predatory, maximum-price scheme by another competitor or competitors should have the same or similar effects regardless of whether the price is established, for example, vertically by a competitor's franchisor or horizontally by a consortium of competing franchisees. In both cases, **[**23]** the uninvolved competitor is free from any constraints of the scheme, and is able to offer superior services if the maximum price is too low and to collect windfall profits if the price is too high. Regardless of who establishes prices, a competitor

[6] A defendant's behavior may fairly be characterized as predatory when the defendant is "attempting to exclude rivals on some basis other than efficiency." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)* (citations omitted). ***HN5***[] Bare allegations of threatened predatory pricing are inadequate to establish antitrust injury; the circumstances must be such as to make such an allegation credible. "Courts should not find allegations of predatory pricing credible when the alleged predator is incapable of successfully pursuing a predatory scheme." *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 120 n. 15, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. In this case, the record is void of any indication that Defendant possesses sufficient market power to pose a credible threat of predatory pricing.

[7] Plaintiff's supplemental pleadings do not materially address ARCO. Instead, Plaintiff continues to repeat Maricopa's explanation of why the alleged acts were illegal per se. As this Order has explained, the applicability of the per se test is an entirely separate matter from antitrust injury. *ARCO, 495 U.S. at 344*. Antitrust injury was not part of the appeal before the Supreme Court in Maricopa, so its opinion does not address the issue. The Maricopa plaintiff, the state of Arizona, should have been required to establish antitrust injury; only the United States is authorized to sue directly under the Sherman Act. At the time Maricopa was decided, some courts were less concerned with antitrust injury in injunctive relief suits, at least for a state government. It is irrelevant for the purposes of this motion why Maricopa does not address antitrust injury; the law is clear that a private individual plaintiff must establish antitrust injury as a prerequisite for both legal and injunctive relief. However, the Court notes that Arizona could have alleged antitrust injuries from suppression of medical competition that would increase its public aid burden, or argued that it was suing on behalf of its consumers (the availability of the latter argument is debatable). These arguments are not available to Plaintiff in this case.

cannot be excluded from the market by a non-predatory maximum price scheme unless the competitor is relatively inefficient. *ARCO, 495 U.S. at 337 n. 7*. Therefore, it appears that Plaintiff cannot establish an antitrust injury based upon Defendant's pricing policies.

[*1363] 3. Potential Antitrust Injuries Contemplated by Maricopa

While it appears to be irrelevant to a determination of antitrust injury whether maximum prices are established vertically or horizontally, the Court will still evaluate any additional potential theories of antitrust injury unique to a medical, horizontal price-fixing scheme. Maricopa describes three potential types of injuries: (1) "a price restraint that tends to provide the same economic rewards to all practitioners regardless of their skill, their experience, their training, or their willingness to employ innovative and difficult procedures in individual cases;" (2) "a restraint also may discourage **[**24]** entry into the market [8] and may deter experimentation and new developments by individual entrepreneurs;" and (3) a maximum price scheme "may be a masquerade for an agreement to fix uniform [i.e., maximum] prices, or it may in the future take on that character." *Maricopa, 457 U.S. at 348*. Plaintiff in this case has failed to establish an antitrust injury under any of these three categories.

a. Same Economic Rewards to All Practitioners

Maricopa expressed concern that a maximum price-fixing scheme would "provide the same economic rewards to all practitioners regardless of their skill, their experience, their training, or their willingness to employ innovative and difficult procedures in individual cases." However, such injury only could be suffered by doctors who participated in the price-fixing arrangement. They would be the ones who would receive the same compensation **[**25]** regardless of their skill. [9] Plaintiff is not a member of PFMC, so it can charge whatever it likes and will be paid according to skill (as established by the market).

Plaintiff alleges that Defendant's maximum prices force it to lower its prices lest it price itself out of the market. Plaintiff's arguments imply that its services are worth more than the PFMC maximum. If patients do in fact so value Plaintiff's services, then Plaintiff should be able to attract customers, including PFMC-affiliated patients, regardless of Dr. Ramey's non-member status. PFMC-affiliated patients are permitted to patronize nonmember providers; they are merely required to pay a deductible or some additional amount as prescribed by their agreement with a third-party payor. The additional cost could represent the premium value of a non-member provider's superior services. Patients who **[**26]** are unwilling to pay more for such services do not value it as such, and it is hardly unreasonable for these patients' third-party payors to seek to avoid paying for services not valued by their insureds. If Plaintiff is losing business to Defendant's preferred providers, it is because of their lower net prices offered to patients, and not because of any conspiracy to suppress competition. [10]

[27] b. Experimentation and Innovation**

---

[8] Plaintiff has already entered the market. Therefore, it cannot suffer an antitrust injury related to barriers to market entry.

[9] A court might reject a member-doctor's allegation of antitrust injury on the grounds that the doctor voluntarily agreed to the maximum-price policy.

[10] The Court recognizes that many PFMC-affiliated patients will never even be aware of Plaintiff's availability. However, Defendant has no duty to advertise Plaintiff's services and is not prohibited from encouraging patients to patronize preferred providers. The Ninth Circuit noted in a similar, but vertical, case involving maximum medical prices established by an insurance company, "We agree that paying lower benefits for treatment by nonparticipating physicians greatly discourages patients from using such physicians. This, however, is simply a consequence of every commercial contract . . . . The contract does not mean that the parties have agreed to an unlawful concerted refusal to deal. Under the Plan, the consumer still enjoys complete freedom to seek treatment from a nonparticipating physician. ... Ordinary competitive market forces--lower prices--have simply reduced the demand for the nonparticipating physician's services. *Barry v. Blue Cross of California, 805 F.2d 866, 872 (9th Cir. 1986)*.

Maricopa's next concern was that a horizontal price-fixing conspiracy could deter experimentation and innovation. Plaintiff argues that Defendant's maximum prices may force it to abandon expensive laser techniques and other advanced services. [11]

[*1364] To the contrary, Defendant's prices should not deter *competitive* experimentation or innovation by non-member competitors. Plaintiff is free to charge whatever prices he can command. If the market values a service that is too expensive to be offered by member-doctors within the rules of Defendant's maximum-price policy, then the price-fixing scheme would actually *help* Plaintiff because it would enable it to offer valued services effectively closed to PFMC-affiliated **[**28]** doctors. However, if consumers are not willing to pay for more costly services, they would not patronize those services regardless of the prices for alternative services. The antitrust laws do not require the market to subsidize underappreciated products to ensure their "competitiveness."

Maricopa's real concern was not for non-participating doctors such as Dr. Ramey, nor the participating doctors who voluntarily agreed to limits. The Court's concern was that if too many doctors were participating in the conspiracy, advanced techniques could become unavailable to consumers who would otherwise be willing to pay for them. A patient who needs and could pay for a complicated $ 300,000 heart transplant operation would be injured if doctors refused to perform the additional services because they could not charge more than $ 200,000. Consumers, not doctors, are the victims of this type of antitrust violation.

c. Disguised Minimum Prices

Maricopa's third concern was that a maximum-price scheme can be a masquerade for a more harmful minimum price scheme. *Maricopa, 457 U.S. at 347-348*. However, as a competitor, Plaintiff could only benefit from artificially high prices. ***HN6***[] **[**29]** "A competitor 'may not complain of conspiracies that . . . set minimum prices at *any* level.'" *ARCO, 495 U.S. at 337* (quoting *Matsushita Electric Industrial Corp. v. Zenith Radio Corp., 475 U.S. 574, 585 n. 8, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* (emphasis original)). "Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury." *ARCO, 495 U.S. at 340*. The ARCO Court added that "rivals cannot be excluded in the long run by a non-predatory maximum-price scheme unless they are relatively inefficient," *Id. at 337 n.7*, and that a "firm complaining about the harm it suffers from nonpredatory price competition is really claiming that it is unable to raise prices." *Id. at 337-338*. As noted above, Plaintiff has not alleged that Defendant's prices are predatory. Therefore, no basis for antitrust injury exists under this theory.

4. Plaintiff Has Not Suffered An Antitrust Injury

Plaintiff has not established any potential antitrust injuries contemplated by ARCO or Maricopa. Therefore, Plaintiff is injured, if **[**30]** at all, not by price fixing but by the increased efficiency that results from Defendant's cost-containing operation.

Although Defendant has no apparent market power to produce such results, suppose that Plaintiff's injuries did force it out of business. While conduct that eliminates rivals reduces competition, reduction of competition does not invoke the Sherman Act until it harms consumer welfare. *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*. Courts have repeatedly found that Congress designed the Sherman Act as a "consumer welfare prescription." Id. (quoting ROBERT H. BORK, THE ANTITRUST PARADOX 66 (1978)). Consumer welfare is maximized when economic resources are allocated to their best use and when consumers are assured competitive price and quality. Id. (citations omitted). Plaintiff has failed to demonstrate an injury to consumer welfare.

---

[11] Defendant notes that its pricing policies contemplate and provide for the use of advanced services, including lasers, when such services are warranted under Defendant's practice standards. It also appears that a review process exists to consider atypical cases.

Therefore, even if Plaintiff is correct that Defendant's practices constitute a per se illegal restraint of trade, absent a showing of antitrust injury as defined in Brunswick, that claim is not Plaintiff's to make. Plaintiff has failed to establish that it can demonstrate antitrust injury **[**31]** at trial. Therefore, Defendant's motion for summary judgment must be granted as to Plaintiff's second cause of action.

D. Rejection of Dr. Ramey as a Preferred Provider

Plaintiff's first cause of action alleges that Defendant's refusal to accept Dr. Ramey as a **[*1365]** member is an illegal group boycott because it limits Plaintiff's access to PFMC-affiliated patients and handicaps its ability to compete in the market for ENT medical services. Plaintiff's third cause of action alleges that Defendant's rejection of Dr. Ramey's application for membership was illegal because it was done in furtherance of its price-fixing scheme.

The only plaintiff in this case is J. Allen Ramey, M.D., Inc. Dr. Ramey himself is not a plaintiff. The medical corporation of a solo practitioner does not have standing to contest a hospital's rejection of privileges for the individual doctor. See *Todorov v. DCH Healthcare Authority, 921 F.2d 1438, 1441 n. 1 (11th Cir. 1991)*. Therefore, Defendant must be granted summary judgment as to Plaintiff's first and third causes of action.

Even if Dr. Ramey himself were a plaintiff, he would still be required to establish antitrust injury, which, as discussed above, **[**32]** the corporation has failed to do. In any case, antitrust injury would be difficult to establish. If Defendant was not engaging in anticompetitive activities, then it had the right as a private enterprise to reject Dr. Ramey's application. Numerous courts have rejected *§ 1* claims based upon the rejection of privileges or membership in the medical arena. See *BCB Anesthesia Care v. Passavant Mem. Area Hosp., 36 F.3d 664, 667-668 (7th Cir. 1994)* ("Hundreds, perhaps thousands of pages in West publications are devoted to [such questions] . . . [and they] almost always come to the same conclusion: the staffing decision at a single hospital was not a violation of *section 1* of the Sherman Act."). [12] If, on the other hand, Defendant's pricing polices represent an illegal, profitable price-fixing conspiracy, Dr. Ramey could not establish antitrust injury by arguing that he was prevented from participating in the illegal conspiracy. Dr. Ramey's application expressly stated his acceptance of Defendant's pricing policies. Participation in an illegal, anticompetitive conspiracy is not representative of the type of behavior the antitrust laws were designed to protect, and therefore a denial **[**33]** of such does not give rise to antitrust injury under Brunswick. See *Local Beauty Supply, Inc. v. Lamaur, Inc., 787 F.2d 1197, 1201-1204 (7th Cir. 1986)* (distributor allegedly terminated for underselling a price-maintenance scheme did not suffer antitrust injury; right to receive supercompetitive profits achieved by participation in price-fixing conspiracy is not protected by Sherman Act).

Therefore, summary judgment against Plaintiff on these claims may be fairly based on more than the technicality (albeit an important one) that the complaint fails to name Dr. Ramey as a plaintiff.

V. Conclusion

The Court denies Plaintiff's motion for summary judgment. The Court grants **[**34]** Defendant's motion for summary judgment as to all claims.

IT IS SO ORDERED.

DATED: APR 6 1998

Rudi M. Brewster

---

[12] In many cases, these determinations are made on their merits, reviewed under the rule of reason, rather than as a question of antitrust injury. However, the Court need not make such a determination since Dr. Ramey is not a party. The citations are provided to illustrate the unlikelihood that this cause of action could be successful.

UNITED STATES DISTRICT JUDGE

Administrative Law > ... > Defenses & Exemptions From Public Disclosure > Law Enforcement Records > General Overview

HN2[] **Law Enforcement Records, Personal Information**

Exemption 7(C) to the Freedom of Information Act, *5 U.S.C.S. § 552(b)(7)(C)* permits an agency to withhold information "compiled for law enforcement purposes" to the extent that such information can reasonably be expected to constitute an unwarranted invasion of personal privacy. *5 U.S.C.S. § 552(b)(7)(C)*. It does not exempt from disclosure, internal agency investigations in which an agency, acting as the employer, simply supervises its own employees. Material compiled in the course of such internal agency monitoring does not come within Exemption 7(C) even though it might reveal evidence that later could give rise to a law enforcement investigation. On the other hand, an agency's investigation of its own employees is for "law enforcement purposes" if it focuses directly on specifically alleged illegal acts, illegal acts of particular identified officials, acts which can, if proved, result in civil or criminal sanctions.

Administrative Law > Governmental Information > Freedom of Information > General Overview

HN3[] **Governmental Information, Freedom of Information**

The main purpose of the Freedom of Information Act (FOIA) is to open agency action to the light of public scrutiny. Although there is undoubtedly some public interest in anyone's criminal history, especially if the history is in some way related to the subject's dealing with a public official or agency, the FOIA's central purpose is to ensure that the government's activities are opened to the sharp eye of public scrutiny, not that information about private citizens that happens to be in the warehouse of the government is so disclosed.

Administrative Law > Governmental Information > Freedom of Information > General Overview

Antitrust & Trade Law > Regulated Industries > Sports > Baseball

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

HN4[] **Governmental Information, Freedom of Information**

In view of the purpose of the Freedom of Information Act, it is ordinarily enough for a court to consider, when balancing the public interest in disclosure against the private interest in exemption, the rank of the public official involved and the seriousness of the misconduct alleged.

Administrative Law > Governmental Information > Freedom of Information > General Overview

Administrative Law > Governmental Information > Personal Information > General Overview

HN5[] **Governmental Information, Freedom of Information**

A government official does not, merely by acknowledging an investigation and making a vague reference to its conclusion, waive all his interest in keeping the contents of his personnel file confidential. And although such government official may have a "somewhat diminished" privacy interest, he does not surrender all rights to personal privacy when he accepts a public appointment.

Administrative Law > ... > Freedom of Information > Compliance With Disclosure Requests > Deletion of Material

Administrative Law > Governmental Information > Freedom of Information > General Overview

HN6[] **Compliance With Disclosure Requests, Deletion of Material**

The Freedom of Information Act, specifically *5 U.S.C.S. § 552(b)* requires that any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt. *5 U.S.C.S. § 552(b)*. More specifically, non-exempt portions of a document must be disclosed unless they are inextricably intertwined with exempt portions.

Administrative Law > ... > Defenses & Exemptions From Public Disclosure > Law Enforcement Records > Personal Information

Administrative Law > ... > Freedom of Information > Methods of Disclosure > General Overview

Administrative Law > ... > Freedom of Information > Methods of Disclosure > Vaughn Indexes

HN7[] **Governmental Information, Personal Information**

In order to withhold an entire file pursuant to Exemption 7(C) to the Freedom of Information Act (FOIA), *5 U.S.C.S. § 552(b)(7)(C)*, the government must show that disclosure of any part of the file can reasonably be expected to constitute an unwarranted invasion of personal privacy. Moreover, the government must make that showing in its Vaughn index and in such affidavits as it may submit therewith. The purpose of a Vaughn index is to permit adequate adversary testing of the agency's claimed right to an exemption, and those who contest denials of FOIA requests--who are, necessarily, at a disadvantage because they have not seen the withheld documents--can generally prevail only by showing that the agency's Vaughn index does not justify withholding information under the exemptions invoked.

Administrative Law > ... > Defenses & Exemptions From Public Disclosure > Law Enforcement Records > General Overview

Administrative Law > Governmental Information > Freedom of Information > General Overview

Administrative Law > ... > Freedom of Information > Methods of Disclosure > Vaughn Indexes

Administrative Law > Governmental Information > Personal Information > General Overview

HN8[] **Defenses & Exemptions From Public Disclosure, Law Enforcement Records**

The focus in the Freedom of Information Act is information, not documents, and an agency cannot justify withholding an entire document simply by showing that it contains some exempt material. The Vaughn index requires agencies to specify in detail, which portions of the document are disclosable and which are allegedly exempt. A submission that does not do that does not even qualify as a Vaughn index.

Administrative Law > Governmental Information > Freedom of Information > General Overview

Civil Procedure > Appeals > Standards of Review > General Overview

HN9[] **Governmental Information, Freedom of Information**

It is error for a district court to simply approve the withholding of an entire document without entering a finding on segregability or the lack thereof.

Counsel: Julia Court, appointed by the court, argued the cause as amicus curiae supporting appellant, with whom Thomas M. Barba was on the briefs. Brett C. Kimberlin, appearing pro se, entered an appearance.

Cynthia A. Schnedar, Assistant U.S. Attorney, argued the cause for appellee, with whom Mary Lou Leary, U.S. Attorney at the time the brief was filed, and R. Craig Lawrence, Assistant U.S. Attorney, were on the brief.

Judges: Before: GINSBURG, HENDERSON, and RANDOLPH, Circuit Judges. Opinion for the Court filed by Circuit Judge GINSBURG.

Opinion by: GINSBURG

Opinion

[253]** **[*946]** GINSBURG, *Circuit Judge*: Appellant Brett C. Kimberlin sued the Department of Justice seeking disclosure, pursuant to the Freedom of Information Act, *5 U.S.C. § 552*, of documents relating to an investigation of an Assistant United States Attorney by the Department's Office of Professional Responsibility. The district court determined that the Government properly withheld the information pursuant to Exemption 7(C) to the FOIA because the Department had compiled the requested information for "law enforcement purposes." **[***2]** *See* *5 U.S.C. § 552(b)(7)(C)*. We agree that the nature of the withheld information brings it presumptively within Exemption 7(C). Because the district court failed to determine whether any of the information could be segregated and disclosed without compromising the nondisclosable material, however, we remand the case to the district court.

I. BACKGROUND

In 1982 the Drug Enforcement Administration investigated and found baseless certain allegations that then-U.S. Senator Dan Quayle had used cocaine. During the 1992 presidential campaign, renewed speculation in the media about Quayle's alleged cocaine use led AUSA John Thar, of the Southern District of Indiana, to disclose the findings of the 1982 investigation to the *Indianapolis Star* with the following explanation:

> I'm disclosing what I have, with approval, simply because so much has been made out of nothing.... It's all been so misconstrued.... I'm making an honest disclosure of what was found, hoping to put an end to it.

James A. Gillaspy, *Feds Reveal Details of Quayle Drug Probe,* Indianapolis Star, Nov. 13, 1991, at 1. The *Star* described Thar's disclosure as "a rare departure from the Department **[***3]** of Justice policy of withholding comment about any investigation." The Office of Professional Responsibility, which handles allegations of improper conduct by DOJ officials, investigated the disclosure. In response to an inquiry from the press Thar acknowledged that he was disciplined as a result of the OPR investigation at a level of severity somewhere between "you've done **[*947]** **[**254]** something wrong" and "you're fired." Aaron M. Freiwald, *Quayle Accuser Presses Conspiracy Claims,* Legal Times, March 30, 1992 at 1, 20.

In 1994 Kimberlin sought disclosure pursuant to the FOIA of "all papers, documents and things pertaining to the OPR investigation" of Thar. Initially the OPR gave a standard *Glomar* response, refusing either to confirm or to deny that such an investigation had taken place. *Cf.* *Phillippi v. CIA, 178 U.S. App. D.C. 243, 546 F.2d 1009, 1011 (D.C. Cir. 1976)* (CIA refused to confirm or deny existence of information regarding research vessel *Glomar Explorer*). When Kimberlin brought suit in district court to compel disclosure and confronted the OPR with evidence that Thar had acknowledged publicly that the OPR had investigated his disclosure to the *Star,* the OPR withdrew **[***4]** its *Glomar* response and released two press clippings from its file on the investigation. The OPR withheld the balance of the file on the ground that it comes within Exemption 7(C) to the FOIA, which provides that an agency may withhold "records or information compiled for law enforcement purposes" to the extent that the production thereof "could reasonably be expected to constitute an unwarranted invasion of personal privacy." *5 U.S.C. § 552(b)(7)(C)*.

The district court reviewed *in camera* some or all of the OPR file, together with a memorandum from the Government detailing its reasons for withholding the contents of the file. Upon cross-motions for summary judgment, the district court held that "the Government has properly invoked Exemption 7(C) and may continue to withhold such information from public disclosure." *Kimberlin v. Department of Justice, 921 F. Supp. 833, 836 (D.D.C. 1996)*. Kimberlin appealed, and this court appointed an *amicus curiae* to argue in support of Kimberlin.

II. ANALYSIS

The *amicus* argues that the district court erred in three ways: first, by determining that the OPR's investigation was for "law enforcement purposes" and hence potentially **[***5]** within the scope of Exemption 7(C); second, by failing properly to balance the interests for and against disclosure; and third, by failing to order release of any reasonably segregable portion of the OPR file. ***HN1***[] We review *de novo* the district court's grant of summary judgment, applying the same standards that governed the district court's decision. *See* *The Nation Magazine v. United States Customs Serv., 315 U.S. App. D.C. 177, 71 F.3d 885, 889 (D.C. Cir. 1995)*.

A. Does Exemption 7(C) Apply?

HN2[] Exemption 7(C) to the FOIA permits an agency to withhold information "compiled for law enforcement purposes" to the extent that such information "could reasonably be expected to constitute an unwarranted invasion of personal privacy." *5 U.S.C. § 552(b)(7)(C)*. It does not exempt from disclosure, as we have previously had occasion to note, "internal agency investigations … in which an agency, acting as the employer, simply supervises its own employees." *Stern v. F.B.I., 237 U.S. App. D.C. 302, 737 F.2d 84, 89 (1984)*. Material compiled in the course of such internal agency monitoring does not come within Exemption 7(C) even though it "might reveal evidence that later could give **[***6]** rise to a law enforcement investigation." *Id.* On the other hand,

> an agency's investigation of its own employees is for "law enforcement purposes" … if it focuses "directly on specifically alleged illegal acts, illegal acts of particular identified officials, acts which could, if proved, result in civil or criminal sanctions."

Id. (quoting *Rural Housing Alliance v. U.S. Dept. of Agriculture, 162 U.S. App. D.C. 122, 498 F.2d 73, 81 (D.C. Cir. 1974))*.

The OPR investigation here at issue was conducted in response to and focused upon a specific, potentially illegal release of information by a particular, identified official. The investigation was intended to discover whether John Thar had violated any law by revealing to the press information concerning an investigation of the Vice-President, who was then running for re-election. The investigation was not aiming generally, as was the investigation in *Rural Housing* for example, "to insure that [the agency's] employees are acting in accordance with statutory mandate and the agency's own regulations." *498 F.2d at 81*. **[*948] [**255]** We conclude, therefore, that the Government compiled the information in the OPR file **[***7]** for law enforcement purposes, with the result that the Government may withhold the requested records pursuant to Exemption 7(C) if such disclosure "could reasonably be expected to constitute an unwarranted invasion of personal privacy." *5 U.S.C. 552(b)(7)(C)*.

B. The Balance of Public and Private Interests

The district court weighed the interests for and against disclosure as follows:

> Public employees have an expectation that information gathered in the course of internal investigations will remain private. *Beck v. Department of Justice, 302 U.S. App. D.C. 287, 997 F.2d 1489, 1494 (D.C. Cir. 1993)*. While the public does have an interest in examining the internal disciplinary processes of the Department of Justice, such public interest cannot be held to be superior to the privacy interests of those employees who may, from time to time, come under the scrutiny of OPR. It would be grossly unfair to release such information and subject dedicated public servants to unnecessary scrutiny for every complaint that has been filed, regardless of the merits.

921 F. Supp. at 836. In stating that "the public does have an interest in examining the internal disciplinary **[***8]** processes of the Department of Justice," the district court followed the teaching of the Supreme Court that ***HN3***[] the main purpose of the FOIA is to open agency action to the light of public scrutiny. As the Supreme Court put the matter:

> Although there is undoubtedly some public interest in anyone's criminal history, especially if the history is in some way related to the subject's dealing with a public official or agency, the FOIA's central purpose is to ensure that the Government's activities be opened to the sharp eye of public scrutiny, not that information about private citizens that happens to be in the warehouse of the Government be so disclosed.

United States Dept. of Justice v. Reporters Committee for Freedom of the Press, 489 U.S. 749, 774, 103 L. Ed. 2d 774, 109 S. Ct. 1468 (1988) (emphases deleted).

The present parties take the Court's point, of course, but they disagree about how disclosure of the OPR materials concerning the investigation of Thar would serve the "central purpose" of the FOIA. On the one hand, the *amicus* argues that "the OPR records requested could not be more central to FOIA's core purpose ... because by nature such records contain **[***9]** information that examines and documents agency action." On the other, the Government contends that "how the Department of Justice handled one isolated case concerning an alleged leak would not shed enough light on how the Department in general handles any alleged leaks" to warrant disclosure of the requested materials. The Government also asserts that in this case Exemption 7(C) protects the privacy interests not only of Thar but also of "third persons whose identities would be revealed by release of the files."

The *amicus* faults the district court for creating a categorical rule against disclosure of OPR files and argues that OPR investigations

> are not sufficiently uniform in the privacy interests at stake, the subject matter involved, the rank of the public officials involved, the type of misconduct investigated, or a myriad of other factors, to comprise a single category in which the balance would always tip in favor of exemption.

Cf. Reporters Committee, 489 U.S. at 776 ("categorical decisions may be appropriate and individual circumstances disregarded when a case fits into a genus in which the balance [of interests for and against disclosure] characteristically **[***10]** tips in one direction"). For its part, the Government does not disagree with the *amicus* that the balancing of interests with regard to OPR files should be done on a case-by-case basis rather than categorically; the Government just reads the district court to have performed such an ad hoc balancing and not to have created a categorical rule.

In view of the parties' agreement, and regardless what the district court may have had in mind, we may assume for purposes of **[*949]** **[**256]** this opinion that the balance of interests relating to the disclosure of material in an OPR file will not so often tip toward withholding that a categorical rule against disclosure is appropriate. The alternative of case-by-case balancing should not be as complicated as implied by the *amicus*'s reference to a "myriad" of relevant factors, however, lest it come to resemble the open-ended " 'kitchen sink' rule of reason" in ***antitrust law***. Charles F. Rule, *Point: As American as Baseball, Apple Pie, or Guidelines,* 4 Antitrust 31, 32 (1989); *cf.* Frank H. Easterbrook, *The Limits of Antitrust,* *63 Texas L. Rev. 1, 12 (1984)* (commenting upon the rule of reason that "when everything is relevant, nothing is dispositive"). ***HN4***[] **[***11]** In view of the purpose of the FOIA, it will ordinarily be enough for the court to consider, when balancing the public interest in disclosure against the private interest in exemption, the rank of the public official involved and the seriousness of the misconduct alleged. *Cf.* *Stern, 737 F.2d at 94* ("There is a decided difference between knowing participation by a high-level officer in such deception and the negligent performance of particular duties by the two other lower-level employees").

Here the OPR has investigated a staff-level government lawyer in connection with the possibly unauthorized and perhaps illegal release of information to the press. Under these circumstances, we have no doubt that disclosure of the OPR investigative file would occasion an invasion of Thar's privacy disproportionate to, and therefore "unwarranted" by, such insight as the public would gain into "what the Government is up to." *Reporters Committee, 489 U.S. at 750*.

The *amicus* urges upon us the particularized claim that Thar "waived any privacy interest of his own when he admitted to the press that he was investigated and disciplined for releasing the Vice President's DEA files." But surely **[***12]** ***HN5***[] Thar did not, merely by acknowledging the investigation and making a vague reference to its conclusion, waive all his interest in keeping the contents of the OPR file confidential. And although government officials, as we have stated before, may have a "somewhat diminished" privacy interest, they "do not surrender all rights to personal privacy when they accept a public appointment." *Quinon v. FBI, 318 U.S. App. D.C. 228, 86 F.3d 1222, 1230 (D.C. Cir. 1996)*.

That said, Thar's statement to the press undoubtedly does diminish his interest in privacy: the public already knows who he is, what he was accused of, and that he received a relatively mild sanction. He still has a privacy interest, however, in avoiding disclosure of the details of the investigation, of his misconduct, and of his punishment--and perhaps, too, an interest in preventing hitherto speculative press reports of his misconduct from receiving authoritative confirmation from an official source. *Cf.* *Bast v. Department of Justice, 214 U.S. App. D.C. 433, 665 F.2d 1251, 1255 (D.C. Cir. 1981)*. We agree with the district court's implication, therefore, that official confirmation of what has been reported in the press **[***13]** and the disclosure of additional details could reasonably be expected to constitute an unwarranted invasion of Thar's personal privacy. Accordingly, the Government properly asserted Exemption 7(C) as a bar to disclosure with respect to Thar. It goes almost without saying, moreover, that individuals other than Thar whose names appear in the file retain a strong privacy interest in not being associated with an investigation involving professional misconduct; hence, the Government correctly asserted Exemption 7(C) with respect to them as well.

C. Segregability

HN6[] The FOIA requires that "any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt." *5 U.S.C. § 552(b)*. More specifically, "it has long been the rule in this Circuit that non-exempt portions of a document must be disclosed unless they are inextricably intertwined with exempt portions." *Mead Data Central, Inc. v. United States Dep't of the Air Force, 184 U.S. App. D.C. 350, 566 F.2d 242, 260 (D.C. Cir. 1977)*.

The *amicus* argues that the "OPR's Vaughn index failed to establish that OPR could not segregate and release nonexempt **[***14]** **[*950]** **[**257]** information" and, relatedly, that the district court erred by failing to determine whether there are any non-exempt portions of the requested information sufficiently segregable that the OPR could have released them. Both points are well-taken.

HN7[] In order to withhold an entire file pursuant to Exemption 7(C), the Government must show that disclosure of any part of the file "could reasonably be expected to constitute an unwarranted invasion of personal privacy." Moreover, the Government must make that showing in its *Vaughn* index and in such affidavits as it may submit therewith. *See generally* *Vaughn v. Rosen, 157 U.S. App. D.C. 340, 484 F.2d 820, 827-28 (D.C. Cir. 1973)* (outlining requirements agency must meet in indexing documents for which it claims exemption from disclosure under FOIA). We recently explained:

> The purpose of a *Vaughn* index is to permit adequate adversary testing of the agency's claimed right to an exemption, and those who contest denials of FOIA requests--who are, necessarily, at a disadvantage because they have not seen the withheld documents--can generally prevail only by showing that the agency's *Vaughn* index does not justify withholding **[***15]** information under the exemptions invoked.

Schiller v. NLRB, 296 U.S. App. D.C. 84, 964 F.2d 1205, 1209 (D.C. Cir. 1992) (citations omitted).

In the *Vaughn* index it submitted in this case, the Government asserts only that entire documents are exempt from disclosure. As the Government should know by now, however, **HN8**[] "the focus in the FOIA is information, not documents, and an agency cannot justify withholding an entire document simply by showing that it contains some exempt material." *Mead Data Central, 566 F.2d at 260*. In the most egregious instance the Government claims that Exemption 7(C) applies to a 37-page document consisting of a cover letter and 36 pages described only as "material collected by the United States Attorney's Office." As we have pointed out before, "*Vaughn* itself requires agencies to 'specify in detail which portions of the document are disclosable and which are allegedly exempt.' *484 F.2d at 827*. A submission that does not do that does not even qualify as a '*Vaughn* index.' " *Schiller, 964 F.2d at 1210*.

The Government does argue that because "the requested OPR file focuses completely on one government employee," the "release of any **[***16]** of the file, whether redacted or not, would necessarily ... cause AUSA Thar's name to be associated with allegations of misconduct and could cause him 'great personal and professional embarrassment.' " Neither the *amicus* nor the court, however, is obliged to accept that conclusion without more specification of the types of material in the file.

Perhaps because of the manifest inadequacy of the Government's *Vaughn* index, the district court exercised its discretion to perform its own *in camera* inspection of certain documents in the file. The district court does not appear to have considered the segregability issue in the course of its inspection, however; the court made no findings regarding segregability despite our prior guidance that **HN9**[] "it is error for a district court to simply approve the withholding of an entire document without entering a finding on segregability, or the lack thereof." *Schiller, 964 F.2d at 1210* (quoting *Church of Scientology v. Department of the Army, 611 F.2d 738, 744 (9th Cir. 1979))*. Therefore, we must remand this case to the district court to determine whether any of the withheld documents contains material that can be segregated and disclosed **[***17]** without unwarrantably impinging upon anyone's privacy. *See* *Krikorian v. Department of State, 299 U.S. App. D.C. 331, 984 F.2d 461, 467 (D.C. Cir. 1993)* (remanding "because the district court did not make specific findings of segregability regarding each of the withheld documents").

III. CONCLUSION

The district court correctly concluded that the OPR compiled its file on John Thar's release of information to the *Indianapolis Star* for "law enforcement purposes." The court also correctly determined that some information in the OPR file falls within Exemption 7(C) to the FOIA: Thar was not a high-ranking official in the Department of Justice, and the alleged wrongdoing concerning **[*951]** **[**258]** which he was investigated was not so serious that the public's interest in disclosure warrants the invasion of Thar's privacy that would attend disclosure of the investigative file. The district court erred, however, in failing to make any finding regarding the segregability of such disclosable information as may be in the file. Accordingly, we remand this matter for the district court to establish whether any reasonably segregable portion of the documents in the withheld OPR file can be disclosed.

[*18]** *So ordered.*

Southern Card & Novelty v. Lawson Mardon Label

United States Court of Appeals for the Eleventh Circuit

April 7, 1998, Decided

No. 96-3682.

Reporter
138 F.3d 869 *; 1998 U.S. App. LEXIS 6825 **; 1998-1 Trade Cas. (CCH) P72,104; 11 Fla. L. Weekly Fed. C 1175

SOUTHERN CARD & NOVELTY, INC., Plaintiff-Appellant, v. LAWSON MARDON LABEL, INC. d.b.a. Lawson Mardon Post Card, and Daniel J. Saunders, Defendants-Appellees.

Prior History: **[**1]** Appeal from the United States District Court for the Middle District of Florida. (No. 95-130-CVI-ORL-22), Anne C. Conway, District Judge.

Disposition: AFFIRMED.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Governments > Courts > Court Personnel

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Standards of Review, De Novo Review**

The court reviews the granting of summary judgment de novo, applying the same legal standards that bound the district court. There is no genuine issue for trial unless the non-moving party establishes, through the record presented to the court, that it is able to prove evidence sufficient for a jury to return a verdict in its favor.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN2[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Certain tying arrangements pose an unacceptable risk of stifling competition and therefore are unreasonable "per se." It is clear, however, that not every refusal to sell two products separately can be said to restrain competition. Thus, in a sense the question whether a case involves "tying" is beside the point. The legality of a seller's conduct depends on its competitive consequences, not whether it can be labeled "tying."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN4[] **Vertical Restraints, Nonprice Restraints**

Line forcing, be it full or representative, is a vertical nonprice restraint--an agreement between entities at different levels of distribution that does not purport to affect prices charged for the goods.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN5[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Economic analysis supports the view and no precedent opposes it, that a vertical restraint is not illegal per se unless it includes some agreement on price or price levels. This is so because such restraints have the real potential to stimulate interbrand competition, the primary concern of ***antitrust law***.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN6[] **Price Fixing & Restraints of Trade, Vertical Restraints**

"Full-line" or "representative-line" forcing occurs when a manufacturer agrees to license or franchise a dealer to sell its products, but only on condition that the dealer sell a full or representative line of those products.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN7[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Restraints imposed by agreement between competitors are traditionally denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN8[] **Regulated Practices, Trade Practices & Unfair Competition**

Interbrand competition is the competition among the manufacturers of the same generic product. In contrast, intrabrand competition is the competition between the distributors--wholesale or retail--of the product of a particular manufacturer.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the rule of reason, a plaintiff must prove an anticompetitive effect of the defendant's conduct on the relevant market, and that the conduct has no procompetitive benefit or justification.

Judges: Before HATCHETT, Chief Judge, EDMONDSON and COX, Circuit Judges.

Opinion by: HATCHETT

Opinion

[*871] HATCHETT, Chief Judge:

The appellant, Southern Card & Novelty, Inc. (Southern Card), a postcard distributor, challenges the district court's grant of summary judgment for the appellees, Lawson Mardon Label, Inc. (Lawson), a manufacturer of postcards and related products, and Daniel Saunders, the vice-president in charge of Lawson's postcard business, on its federal and state antitrust tying claims. We affirm.

I. FACTS

Lawson manufactures postcards and sells them to distributors throughout North America. [1] Those distributors then sell the postcards to retail outlets, which in turn sell them to consumers. Over a decade ago, Lawson's predecessor-in-interest, **[**2]** H.S. Crocker Company, Inc. (H.S.Crocker), secured a license agreement with the Walt Disney Company (Disney Company) that permits Lawson to manufacture postcards bearing the copyrighted images of Disney characters such as Mickey Mouse. Although the license agreement is "non-exclusive," the Disney Company has not granted similar rights to any other postcard manufacturer. Thus, Lawson is the sole producer of postcards bearing Disney images. Lawson also makes "local view" postcards, *i.e.,* postcards depicting nonlicensed local images. In Florida, these postcards might present, for example, pictures of beaches, palm trees or alligators. Local

[1] Lawson has about an eleven percent market share of the North American postcard business.

view postcards comprise over ninety percent of Lawson's total postcard **[*872]** production and accounted for over sixty percent of its sales in Florida in 1995. The parties do not dispute that at least six other postcard manufacturers produce postcards specific to areas in Florida.

Southern **[**3]** Card, located in Daytona Beach, distributes postcards to retailers--primarily "chain stores"--situated in central and northern Florida. Southern Card purchases its postcards from large commercial printers such as Lawson, and acts as a rack jobber in the stores it services. [2] From 1986--the year Southern Card commenced business dealings with H.S. Crocker--to 1991, Southern Card retained complete control over the quantity and types of postcards that it purchased from the manufacturer. [3] **[**4]** During the late 1980s and early 1990s, Southern Card bought a percentage of its local view postcard stock from Lawson's competitors, finding their products superior in terms of price and quality. [4]

In late 1991, Lawson introduced a "Disney Product Plan" in Florida. In a letter dated December 12, 1991, Saunders put forth the terms of the agreement he hoped to reach with Southern Card pursuant to this plan:

> d) Distributor will purchase Local View and General Florida post cards and allied products from [Lawson] equal to his purchases from [Lawson] of Disney products. [For example,] if distributor purchases $ 100,000 in 1992 of Disney product from [Lawson], distributor agrees to purchase a minimum of $ 100,000 in 1992 of Local View or General Florida product from [Lawson].
>
> e) Failure to meet the minimum requirement agreed to in d) above, may result in [Lawson's] decision to not sell any product to distributor in following year.

Because Southern Card feared losing its lone source of Disney postcards, it began buying Lawson's local view postcards in amounts equal to its purchases of Disney postcards.

In October 1993, Saunders wrote to Nyberg expressing his **[**5]** concern that Southern Card continued to buy a significant quantity of postcards from Lawson's competitors. The next month, Saunders wrote to Nyberg asking that Southern Card commit to having Lawson postcards comprise one hundred percent of Southern Card's business in the Orlando area. Southern Card refused, asserting that Lawson already received about seventy-five to eighty percent of its total business, and that it never committed to purchasing one hundred percent of its requirements from Lawson.

A few months later, in February 1994, Lawson began recruiting Southern Card's competitors to sell Lawson postcards to chain stores. The next month, Lawson limited Southern Card's purchases of Disney postcards to those that Southern Card had bought in 1993. [5] In the meantime, Lawson sold a number of Disney postcards that had **[*873]** been developed in 1994 to those distributors that bought only Lawson local view postcards. The district court found, and Southern Card does not dispute, that as a result of these developments, Southern Card "has faced new competition" in retail stores in the Orlando area.

---

[2] Southern Card asserts that "there are approximately eight main line independent postcard distributors in the state of Florida."

[3] It may well be that in the mid-to-late 1980s, Southern Card and Lawson entered into an informal arrangement whereby Southern Card acted as Lawson's exclusive vendor to chain stores in exchange for Lawson's promise not to sell Disney postcards to Southern Card's competitors. On November 22, 1989, John Nyberg, Southern Card's president, wrote to the chairman of the board of H.S. Crocker, detailing the "history of the relationship" between the two companies. Nyberg wrote that he had "wanted exclusivity on all H.S. Crocker postcard products, including all Walt Disney World items within [Southern Card's] territorial area," and that "with the understanding that H.S. Crocker would not manufacture for, or sell to any other distributor in the territory serviced by Southern Card & Novelty, our companies began to do business." Nyberg also acknowledged the existence of this arrangement when deposed on April 18, 1996, stating, "So de facto, I became--Southern Card & Novelty became the exclusive vendor to the chain stores. Although there was never any such agreement made between myself and Lawson Mardon, it had indeed evolved that way." However, in an affidavit dated July 30, 1996, Nyberg averred that while the parties had entered into an exclusivity agreement concerning retailers in Daytona Beach, they "had no territorial exclusive agreement for Orlando." For purposes of this appeal, we accept this assertion as true.

[4] About seventy percent of Southern Card's revenue is attributable to its sale of local view postcards.

[5] Since 1994, Southern Card has continued to purchase these Disney postcards from Lawson but has acquired its entire local view stock from other manufacturers.

[6]** II. PROCEDURAL HISTORY

Southern Card instituted this lawsuit in February 1995, and its amended complaint asserted federal and state claims of (1) illegal tying pursuant to *section 1* of the Sherman Act, *15 U.S.C. § 1*, *section 3* of the Clayton Act, *15 U.S.C. § 14*, and *Florida Statutes section 542.18*; and (2) monopolization and attempted monopolization under *section 2* of the Sherman Act, *15 U.S.C. § 2*, and *Florida Statutes section 542.19*. In outlining its tying claims, Southern Card stated that (1) Disney postcards constituted the "tying" product, and local view postcards were the "tied" product; (2) the "greater Orlando area" constituted the relevant geographic market or sub-market; and (3) the sale of local view postcards to distributors comprised the relevant product market. The crux of the tying claims was that Lawson "illegally compelled and coerced Southern Card and others to agree to purchase [local view postcards] from Lawson … as a condition of obtaining and retaining access to Disney Cards." Southern Card sought treble damages, injunctive relief and attorneys' fees. [6]

[7]** After the parties conducted extensive discovery, Lawson filed a motion for summary judgment that Southern Card vigorously opposed. In November 1996, the district court granted Lawson's motion. As to Southern Card's federal tying claims, the court first considered whether to deem Lawson's practices unlawful *per se* or subject to evaluation under the rule of reason. The court found that Lawson's practices were "unlike traditional tying arrangements" "because Southern Card does not allege that the ultimate consumer must buy the tied product (a local view postcard) to buy the tying product (a Disney postcard)." The court thus considered the challenged conduct to represent " "full' or "representative' line forcing," that is, a vertical nonprice restraint "undeserving of *per se* treatment." Applying the rule of reason, the court held that Southern Card failed to demonstrate that Lawson had unreasonably restrained competition in the local view postcard market.

Notwithstanding its conclusion regarding the applicability of the rule of reason, the district court also went on to hold that even if it "were to use a *per se* analysis, Southern Card's tying claims would fail" because "the **[**8]** alleged "Disney' and non-Disney classifications are not separate products such that there can be a "tie-in' between them…. Rather, all of Lawson Mardon's postcards are sufficiently unitary to be considered a single product." Next, the court rejected Southern Card's federal monopolization and attempted monopolization claims on the grounds that Southern Card "failed to produce any admissible evidence that creates triable issues of fact with respect to the existence of a cognizable market or Lawson Mardon's monopoly power in such a market." Finally, the court turned away Southern Card's state claims, recognizing that "Florida ***antitrust law*** mirrors federal law as applied to the tying, monopolization and attempted monopolization claims in the instant case." On appeal, Southern Card challenges the district court's grant of summary judgment only as to its federal and state tying claims.

III. DISCUSSION

HN1[] We review the granting of summary judgment *de novo,* applying the same legal standards that bound the district court. *Uniforce Temporary Personnel, Inc. v. National Council on Compensation Ins., Inc., 87 F.3d 1296, 1299 (11th Cir.1996)*. "There is no **[*874]** genuine issue for trial unless **[**9]** the non-moving party establishes, through the record presented to the court, that it is able to prove evidence sufficient for a jury to return a verdict in its favor." *Cohen v. United Am. Bank of Cent. Fla., 83 F.3d 1347, 1349 (11th Cir.1996)*.

A.

"***HN2***[] A tying arrangement is "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.' " *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 462, 112 S. Ct. 2072, 2079,*

---

[6] Southern Card's expert witness, Dr. Bruce Seaman, subsequently opined that Southern Card had suffered two types of injuries. According to Dr. Seaman, Southern Card "suffered economic damages linked to the overcharge on the tied non-Disney post cards." Also, Lawson's "refusal to allow Southern Card access to a full Disney array of post card products and other types of products has affected and will continue to affect Southern's profits on existing chain store accounts as well as the likelihood that chain store clients will continue to be lost due to the resulting weakening of Southern's relative competitive position."

119 L. Ed. 2d 265 (1992) (quoting Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 518-519, 2 L. Ed. 2d 545 (1958)). Such arrangements can run afoul of the Sherman Act's prohibition against agreements "in restraint of trade," 15 U.S.C.A. § 1 (West 1997), and section 3 of the Clayton Act, 15 U.S.C.A. § 14 (West 1997). *See* Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 428 (5th Cir.1978) ("The Clayton Act, passed as a response to what Congress considered grudging constructions of the Sherman Act by the courts, specifically bans tying arrangements."), *cert. denied,* **[**10]** *444 U.S. 831, 100 S. Ct. 59, 62 L. Ed. 2d 39 (1979)*. As our predecessor court made clear, the two statutory theories of liability are substantively synonymous. Bob Maxfield, Inc. v. American Motors Corp., 637 F.2d 1033, 1037 (5th Cir. Unit A Feb.1981), *cert. denied, 454 U.S. 860, 102 S. Ct. 315, 70 L. Ed. 2d 158 (1981)*; *see also* IX Phillip E. Areeda, ***Antitrust Law*** P 1719b, at 254 (1991) ("Although their words differ, the two statutes apply a single substantive standard."). [7]

> Although the Sherman Act, by its terms, prohibits every agreement "in restraint of trade," this Court has long recognized that Congress intended to outlaw only unreasonable restraints. As a consequence, most antitrust claims are analyzed under a "rule of reason," according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.
>
> Some types of restraints, however, have such predictable and pernicious anticompetitive effect, **[**11]** and such limited potential for procompetitive benefit, that they are deemed unlawful *per se. Per se* treatment is appropriate once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it. Thus, we have expressed reluctance to adopt *per se* rules with regard to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious.

State Oil Co. v. Khan, __ U.S. __, __, 118 S. Ct. 275, 279, 139 L. Ed. 2d 199 (1997) (internal quotation marks, citations and brackets omitted). *See also* Levine v. Central Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1549 (11th Cir.) ("The presumption in cases brought under section 1 of the Sherman Act is that the rule-of-reason standard applies. We apply the per se rule only when history and analysis have shown that in sufficiently similar circumstances the rule of reason unequivocally results in a finding of liability, *i.e.,* when the conduct involved always or almost always tends to restrict competition and decrease output.") (internal quotation marks, citations and brackets **[**12]** omitted), *cert. denied, __ U.S. __, 117 S. Ct. 75, 136 L. Ed. 2d 34 (1996)*.

"***HN3***[] Certain tying arrangements pose an unacceptable risk of stifling competition and therefore are unreasonable "per se.' " Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 9, 104 S. Ct. 1551, 1556, 80 L. Ed. 2d 2 (1984). "It is clear, however, that not every **[*875]** refusal to sell two products separately can be said to restrain competition." Jefferson Parish, 466 U.S. at 11, 104 S. Ct. at 1557. "Thus, in a sense the question whether this **[**13]** case involves "tying' is beside the point. The legality of [Lawson's] conduct depends on its competitive consequences, not whether it can be labeled "tying.' " Jefferson Parish, 466 U.S. at 21 n. 34, 104 S. Ct. at 1563 n. 34.

We believe that the terms that Lawson imposed on Southern Card pursuant to its "Disney Product Plan"--that Southern Card purchase local view postcards in amounts equal to its purchases of Disney postcards--are indicative of a manufacturer's "line force" upon a distributor. [8] "***HN4***[] Line forcing, be it full or representative, is a vertical nonprice restraint--an agreement between entities at different levels of distribution that does not purport to affect

[7] Because Southern Card does not discuss its state tying claim independently and fails to cite any Florida case law, we assume that federal antitrust doctrine controls that claim as well. *See* Fla. Stat. Ann. § 542.32 (West 1997); *see also* Parts Depot Co. v. Florida Auto Supply, Inc., 669 So. 2d 321, 324 (Fla.App. 4th D.C.A.1996) ("The Legislature has directed courts to rely on comparable federal antitrust statutes in construing [Florida Statutes section 542.18].").

[8] "***HN6***[] Full-line" or "representative-line" forcing occurs when "a manufacturer agrees to license or franchise a dealer to sell its products, but only on condition that the dealer sell a full or representative line of those products." Smith Machinery Co. v. Hesston Corp., 878 F.2d 1290, 1294 (10th Cir.1989), *cert. denied,* ***493 U.S. 1073, 110 S. Ct. 1119, 107 L. Ed. 2d 1026 (1990)***.

prices charged for the goods." Smith Machinery, 878 F.2d 1290 at 1295. [9] As the Supreme Court has made clear, "**HN5**[] economic analysis supports the view, and no precedent opposes it, that a vertical restraint is not illegal per se unless it includes some agreement on price or price levels." Business Electronics, 485 U.S. 717 at 735-36, 108 S. Ct. 1515 at 1525-26, 99 L. Ed. 2d 808. This is so because such restraints have the "real potential to stimulate interbrand competition, "the primary concern of ***antitrust law***.' " Business Electronics, **[**14]** 485 U.S. 717 at 724, 108 S. Ct. 1515 at 1519, 99 L. Ed. 2d 808 (quoting Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 51 n. 19, 97 S. Ct. 2549, 2558 n. 19, 53 L. Ed. 2d 568 (1977)). [10]

[15]** As Professor Areeda has written, "requiring dealers to purchase a tied product from the defendant need not impair consumers' purchases from his rivals who sell directly to consumers or who continue to reach them through an ample number of other dealers." IX Areeda, ***Antitrust Law*** P 1725a, at 317. The Tenth Circuit has similarly stated--in a case involving a distributor's claim that a manufacturer tied the sales of its established, popular farm machinery to sales of its new, unestablished tractors--that

> in a line forcing situation, where a dealer is serving as an intermediate link in a distribution chain, if one manufacturer is foreclosed from selling to a dealer because of the arrangement, it is likely going to find another way to take its product to market, providing a profit potential continues to exist. In such a case, there is no ultimate foreclosure to the consumer of a choice of goods. In other more traditional tying arrangements there is an ultimate foreclosure of choice to the ultimate consumer. Thus, a foreclosure of choice to an ultimate consumer appears to be the principal key to a tie that is illegal per se. No such foreclosure occurs or is threatened in **[**16]** a typical line forcing situation such as that at bar.

Smith Machinery, 878 F.2d at 1297 (citing Jefferson Parish, 466 U.S. 2 at 5, 104 S. Ct. 1551 at 1554; United States v. Loew's, Inc., 371 U.S. 38, 40, 83 S. Ct. 97, 99, 9 L. Ed. 2d 11 (1962); Northern Pac. Ry., 356 U.S. at 3, 78 S. Ct. at 517; and International Salt Co. v. United States, 332 U.S. 392, 393, 68 S. Ct. 12, 13, 92 L. Ed. 20 (1947)). *See also* Roy B. Taylor Sales, Inc. v. Hollymatic Corp., 28 F.3d 1379, 1383 (5th Cir.1994) ("Ties that constrain only dealers ... create relatively little danger to competition, provided consumers may purchase the two goods separately.") (footnote omitted), *cert. denied, 513 U.S. 1103, 115 S. Ct. 779, 130 L. Ed. 2d 673 (1995)*; Ransomes Am. Corp. v. Spartan Distribs., Inc., 914 F. Supp. 183, 185 (W.D.Mich.1996) ("Tying arrangements that constrain only dealers are **[*876]** not presumptively illegal because they pose little danger to competition, as long as consumers may purchase the two goods separately."); Paul E. Volpp Tractor Parts, Inc. v. Caterpillar, Inc., 917 F. Supp. 1208, 1229 (W.D.Tenn.1995) ("Because consumers are not hurt by vertical non-price restraints **[**17]** between manufacturers and dealers, the type of line-forcing/exclusive arrangement found in this case should not be subject to the same *per se* treatment as traditional tying arrangements."). Not surprisingly, then, "most courts dealing with the full-line force have not applied the per se rule against tying but have required proof in the particular case of a significant threat to competition." IX Areeda, ***Antitrust Law*** P 1725c, at 323.

Southern Card has made no showing that line-forcing arrangements like the one at issue always or almost always tend to restrict competition and decrease output. This fact, coupled with the strength of the authorities cited above, leads us to conclude that it would be inappropriate to deem Lawson's line-forcing practice unlawful *per se.* Thus, we will review the restraint under rule-of-reason analysis.

For the same reasons, Lawson's (unsuccessful) attempt to compel Southern Card to carry only Lawson-produced local view postcards does not require us to employ a different standard.

---

[9] "**HN7**[] Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints." Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 1522, 99 L. Ed. 2d 808 (1988).

[10] "**HN8**[] Interbrand competition is the competition among the manufacturers of the same generic product.... In contrast, intrabrand competition is the competition between the distributors--wholesale or retail--of the product of a particular manufacturer." GTE Sylvania, 433 U.S. at 51 n. 19, 97 S. Ct. at 2558.

> The claimed arrangement between [Lawson] and [Southern Card] constituted a vertical nonprice restraint between a manufacturer and a dealer on goods that **[**18]** the dealer offered to customers independently. It was in effect an exclusive-dealing arrangement in which [Lawson] required [Southern Card] to sell [Lawson], and only [Lawson], [local view postcards]. Such an arrangement is not the sort that would always or almost always tend to restrict competition and decrease output. It does not threaten competition to the same extent as tying arrangements that bind ultimate customers. Regardless of whether the restraint also constituted a tying arrangement, subjecting it to per se analysis would ignore our directive from the Court. The measure of legality of relationships between manufacturers and independent distributors must not be allowed to turn on labels.

Taylor Sales, 28 F.3d at 1384-85 (internal quotation marks and footnotes omitted).

B.

HN9[] Under the rule of reason, a plaintiff must prove an anticompetitive effect of the defendant's conduct on the relevant market, and that the conduct has no procompetitive benefit or justification. *Levine, 72 F.3d at 1551*. Southern Card argues that Lawson's behavior generated anticompetitive effects because it (1) foreclosed the market to competitive manufacturers; (2) caused consumers **[**19]** to pay higher prices; and (3) resulted in a dilution in product quality and service. Southern Card thus attempts to prove that Lawson's conduct had an actual detrimental effect on competition. *Levine, 72 F.3d at 1551*. We address Southern Card's contentions in turn.

1.

Southern Card asserts that the "record clearly supports the existence of market preclusion of competitive manufacturers of local view cards in the Orlando area." In support of this contention, Southern Card first argues that Lawson's "specific attack" on the sales base of one of its competitors, John Hinde Curteich & Co. (Hinde), evidences an anticompetitive effect. In making this argument, Southern Card relies primarily on the affidavit of Hinde vice-president Don Moffet.

Moffet's affidavit, however, does little to advance Southern Card's cause. Moffet avers that Lawson's practices caused Hinde to lose "some" of its share of the local view postcard market to Lawson. Moffet also states, however, that as Disney postcards increased in popularity in the late 1980s and early 1990s, Hinde's sales of local view postcards "began to decrease." We agree with Lawson that Moffet's affidavit is woefully deficient, as it fails **[**20]** to (1) state with any degree of specificity just how much business Hinde lost to Lawson; (2) describe any competitive actions Hinde took in response to Lawson's practices; or (3) explain away other potential reasons for Hinde's loss of business.

[*877] Unfortunately for Southern Card, none of the other evidence it proffers is even as probative as Moffet's affidavit. [11] In short, Southern Card has failed to show that Lawson's dealings somehow either precluded other manufacturers from gaining access to the local view postcard market or adversely impacted upon consumer choice. Thus, we have little difficulty in turning away Southern Card's contention here. As the Fifth Circuit has stated, "speculation about anticompetitive effects is not enough." *Taylor Sales, 28 F.3d at 1385*.

2.

Southern Card **[**21]** next asserts that as a result of Lawson's practices, "the average price of local view postcards in the Orlando area was significantly higher than in any other part of [Florida]." In support of this assertion, Southern Card relies on a survey that its expert, Dr. Seaman, conducted. [12] Dr. Seaman avers that "the result of the survey was that the average price of non-Disney local view cards in the Orlando area, as sold in gift shops by Scenic

---

[11] We reach this conclusion after carefully reviewing the record citations put forth at pages fourteen and forty-one through forty-four of Southern Card's initial brief, and at pages seven through twelve of its reply brief.

[12] Dr. Seaman surveyed postcard prices at over 200 retail stores located throughout approximately forty different vacation areas in Florida.

Card[] [a distributor that purchased all of its local view postcards from Lawson] is $ .30, which is … higher than the average price of $ .25 charged in retail outlets served by Southern Card [and another distributor]…. The average price of local view post cards in the non-Orlando locations is also approximately $ .25…."

Southern Card's evidence is again lacking. As the district court correctly pointed out, the cited price **[**22]** differential "is of little value" because it may result from "the biased sample of local view postcard purchases from Orlando gift and souvenir shops, rather than from lower-cost retail outlets served by Southern Card," or from Dr. Seaman's failure "to factor in differentials in the cost of living (or cost of a vacation) in the various parts of the state." Moreover, Southern Card has not referenced *any* record evidence that enables this court to assess whether Lawson charged disproportionately higher prices for its local view postcards as compared to other manufacturers. In sum, Dr. Seaman's conclusion, standing alone, would not enable reasonable jurors to conclude that Lawson's practices caused consumers to pay more for local view postcards in the Orlando area. Southern Card's purported proof regarding anticompetitive effects thus remains overly speculative.

3.

Finally, Southern Card argues that Lawson's practices caused a dilution in local view postcard quality and service in the Orlando area. Southern Card, however, fails to present any expert testimony or consumer survey evidence to support this subjective assessment. Instead, Southern Card first refers to a number of internal **[**23]** memoranda from Lawson describing various quality and service difficulties it experienced in its production and delivery of certain postcards. These documents, however, do not address the *relative quality* of Lawson's local view postcards. Southern Card also cites to the deposition testimony of Duncan Page, a president of both a postcard manufacturing company (*i.e.,* a Lawson competitor) and a postcard distribution company, who, not surprisingly, states that he prefers to buy postcards from his own manufacturing company (even though "the pricing is exactly the same as Lawson Mardon") because the "quality of our postcard and our images are better." Southern Card also references the affidavit of Joel Mittelberg, the president of Scenic Florida Distributors, Inc., who states, after noting that he purchases local view postcards from several manufacturers in addition to Lawson, that Lawson's delivery times on new work orders are "generally slower than is standard in the post card industry." The testimony of Page and Mittelberg, without more, certainly does not rise to the level of an anticompetitive effect in the relevant local view postcard market. [13]

[24]** **[*878]** IV. CONCLUSION

For the foregoing reasons, we hold that the district court was correct (1) in evaluating Southern Card's claims under the rule of reason, and (2) in concluding that Southern Card's evidence was insufficient for a reasonable jury to find that Lawson's sales practices generated an anticompetitive effect in the relevant market. Accordingly, we affirm the judgment of the district court.

AFFIRMED.

End of Document

[13] Because we conclude that Southern Card has failed to establish a violation of the antitrust laws, we have no occasion to consider Lawson's challenge to Southern Card's standing to bring this lawsuit. *See* *Levine, 72 F.3d at 1545*.

Tops Mkts., Inc. v. Quality Mkts., Inc.

United States Court of Appeals for the Second Circuit

October 27, 1997, Argued ; April 9, 1998, Decided

Docket Nos. 97-7392, 97-7448

HN1[] Sherman Act, Claims

The appellate court reviews a district court's grant of summary judgment de novo to ensure that the substantive law was correctly applied. The summary judgment remedy is appropriate only when there is no genuine issue of material fact. In making this determination, an appellate court must consider the evidence in the light most favorable to the non-moving party. Although all reasonable inferences are drawn in the non-movant's favor, in an antitrust case, those inferences must be reasonable in light of competing inferences of acceptable conduct. Where the non-moving party carries the burden of proof at trial, it must go beyond the pleadings to demonstrate the existence of some specific facts that create a genuine issue as to those matters for which it has the burden of proof.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] Sherman Act, Claims

Section 1 of the Sherman Act forbids every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. *15 U.S.C.S. § 1*. To establish a *§ 1* violation, a plaintiff must produce evidence sufficient to show: (1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under the rule of reason, before a factfinder may consider the harms and benefits of the challenged behavior, a plaintiff initially must show that the challenged action had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice. This requirement ensures that otherwise routine disputes between business competitors do not escalate to the status of an antitrust action. The Sherman Act protects competition as a whole in the relevant market, not the individual competitors within that market, so that a plaintiff may succeed only when the loss he asserts derives from activities that have a "competition-reducing" effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Market power, while necessary to show adverse effect indirectly, alone is insufficient. A plaintiff seeking to use market power as a proxy for adverse effect must show market power, plus some other ground for believing that the challenged behavior could harm competition in the market, such as the inherent anticompetitive nature of the defendant's behavior or the structure of the interbrand market.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Scope, Monopolization Offenses**

Section 2 of the Sherman Act makes it an offense for any person to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states. *15 U.S.C.S. § 2*. Thus, *§ 2* forbids both monopolization and attempted monopolization.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN6[] **Sherman Act, Claims**

To establish a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, for completed monopolization, a plaintiff must produce evidence sufficient to prove the defendant: (1) possessed monopoly power in the relevant market; and (2) willfully acquired or maintained that power. The second element is distinct from business growth or development as a consequence of superior product, business acumen or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power, also referred to as market power, is the power to control prices or exclude competition. It may be proven directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the relevant market.

Antitrust & Trade Law > Regulated Industries > Financial Institutions > Bank Mergers

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN8[] **Financial Institutions, Bank Mergers**

While market share is not the functional equivalent of monopoly power, it nevertheless is highly relevant to the determination of monopoly power. A court may infer monopoly power from a high market share. A court will draw an inference of monopoly power only after full consideration of the relationship between market share and other relevant market characteristics. These characteristics include the strength of the competition, the probable development of the industry, the barriers to entry, the nature of the anticompetitive conduct, and the elasticity of consumer demand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] Monopolies & Monopolization, Actual Monopolization

A market share of over 70 percent is usually strong evidence of monopoly power. Nonetheless, such evidence does not conclusively establish monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] Monopolies & Monopolization, Actual Monopolization

A high market share, though it may ordinarily raise an inference of monopoly power, will not do so in a market with low entry barriers or other evidence of a defendant's inability to control prices or exclude competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN11[] Monopolies & Monopolization, Attempts to Monopolize

To establish a claim for attempted monopolization, a plaintiff must prove: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > General Overview

HN12[] Monopolies & Monopolization, Attempts to Monopolize

Critical to deciding the dangerous probability prong of a plaintiff's attempted monopolization claim is the defendant's economic power in the relevant market. Attempted monopolization requires some degree of market power. In considering the likelihood of achieving monopoly power, the appellate courts employ the same concept of market power as that used in a completed monopolization claim, i.e., one which considers the defendant's relevant market share in light of other market characteristics, including barriers to entry. Despite the similar approaches, a lesser degree of market power may establish an attempted monopolization claim than that necessary to establish a completed monopolization claim.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > General Intent

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN13[] Monopolies & Monopolization, Attempts to Monopolize

Although the completed offense of monopolization requires only a general intent, a specific intent to destroy competition or build monopoly is essential to guilt for the mere attempt.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN14[] **Supporting Materials, Affidavits**

The litigant seeking summary disposition of a case bears the initial burden of demonstrating, through affidavits or otherwise, the absence of genuine factual issues. Although the movant need not support its motion with affidavits or other similar materials negating the opponent's claim, his or her reasons for the motion somehow must be before the district court.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN15[] **Sherman Act, Jurisdiction**

28 U.S.C. § 1367(c)(3) permits a district court, in its discretion, to decline to exercise supplemental jurisdiction over state law claims if it has dismissed all federal claims. Further, when all federal claims are eliminated in the early stages of litigation, the balance of factors generally favors declining to exercise pendent jurisdiction over remaining state law claims and dismissing them without prejudice.

KENNETH N. HART, New York, New York (Vanessa E. Brosgol, Donovan Leisure Newton & Irvine, New York, New York; Charles C. Swanekamp, Saperston & Day, P.C., Buffalo, New York, of counsel), for Defendants-Appellees Quality Markets, Inc., The Penn Traffic Company and Sunrise Properties, Inc.

DAVID J. SEEGER, Buffalo, New York, for Defendant-Appellee James V. Paige, Jr.

Judges: Before: FEINBERG, CARDAMONE, and WALKER, Circuit Judges.

Opinion by: CARDAMONE

Opinion

[*93] CARDAMONE, *Circuit Judge*:

On this appeal from a dismissal of an antitrust complaint, we affirm all but one **[**2]** of the district court's rulings. We conclude that plaintiff's claim of attempted monopolization presents a genuine issue of material fact and should not have been dismissed. In ruling on this sort of cause of action it is important to distinguish aggressive competition from the kind of predatory conduct that tends to destroy competition. A wise insight suggests that a business that attains monopoly power is a business at the end of its journey. While defendants' pilgrimage was far from complete, a reasonable factfinder could believe that, by their words and actions, defendants here demonstrated a specific intent to create a monopoly with a dangerous probability of success. Were such to be found, it would demonstrate a failure of the market at the expense of the public, something the Sherman Act is designed to prevent.

Tops Markets, Inc. (Tops, plaintiff or appellant) appeals from an August 21, 1996 judgment of the United States District Court for the Western District of New York (Elfvin, J.) that: (1) granted summary judgment in favor of defendants Quality Markets, Inc., the Penn Traffic Company and Sunrise Properties, Inc., and defendant James V. Paige, Jr.; (2) dismissed plaintiff's **[**3]** federal antitrust claims; and, (3) declined to exercise pendent jurisdiction over remaining state law claims and counterclaims, dismissing them all without prejudice. Defendant Paige cross-appeals the dismissal without prejudice of plaintiff's state law claims against him, and the dismissal of his state law counterclaims against plaintiff.

FACTS

The corporate parties to this action include: plaintiff Tops Markets, a New York corporation engaged in the retail supermarket business, operating 53 supermarkets and 87 convenience stores in western New York; defendant Penn Traffic Company (Penn), which owns and operates 267 supermarkets and 15 discount department stores throughout New York, Pennsylvania, Ohio and West Virginia; defendant Quality Markets (Quality), a New York corporation that is a division of Penn and competes with Tops by operating supermarkets in western New York and western Pennsylvania; and defendant Sunrise Properties (Sunrise), a Pennsylvania corporation and wholly-owned subsidiary of Penn that owns and develops commercial real estate for Penn and its divisions. Quality, Penn and Sunrise together comprise the "Quality defendants." The remaining party is defendant James **[**4]** V. Paige, Jr., a Jamestown, New York, real estate developer.

A. *The Relevant Market*

For purposes of reviewing the grant of summary judgment in this antitrust appeal, the relevant geographical market is that to **[*94]** which the parties stipulated: an area in the southeastern portion of Chautauqua County, New York, extending approximately seven to ten miles in all directions from the city of Jamestown. The area includes 17 municipalities and is populated by approximately 75,000 people. The parties also stipulated that the relevant product market consists of the retail sale by "supermarkets" of predominantly food items, together with general household merchandise. A "supermarket" is defined as a retail store with at least 7,500 square feet of retail space that sells a full range of perishable and non-perishable food items and general household merchandise.

The Jamestown market recently has undergone dramatic changes. In 1992 Quality owned five of the nine supermarkets in the geographical market. Of the remaining four supermarkets, "Bells" and "Super Duper" each owned and operated two. In January 1993 Quality acquired and within one year closed both "Bells" stores. In April 1995 it purchased **[**5]** both "Super Duper" stores and immediately shut them both as well. In May 1995 Wegmans, a Quality competitor, successfully opened a large 100,000 square foot supermarket in the Jamestown market area.

B. *The Disputed Act: The Washington Street Site*

Tops owned a supermarket in the Jamestown market until 1984 when it voluntarily terminated operations there. Seven years later, in 1991, it resolved to re-enter the Jamestown market and commissioned studies to evaluate the feasibility and profitability of numerous potential sites for a new store location. These studies determined certain property located on Washington Street in Jamestown (the Washington Street site) was the most suitable spot for a supermarket. The Washington Street site consisted of several parcels of land, four of which were owned by defendant Paige.

Paige agreed to sell his four parcels to Tops. Under the terms of a March 13, 1992 contract, Paige undertook to transfer title to Tops for $ 475,000. The parties set December 15, 1992 as the date for closing, subject to change only by their mutual agreement. The contract also called for Paige to obtain options to purchase the remaining parcels he did not own at the Washington **[**6]** Street site, giving him until March 15, 1992 to comply with this requirement. The contract specified that if Paige failed to acquire these additional parcels, Tops could elect unilaterally to terminate the agreement.

When Quality discovered Tops' intention to re-enter the Jamestown market at the Washington Street site, it expressed an interest in acquiring two of Paige's Washington site parcels. Paige and Sunrise subsequently entered into a "Back-Up" agreement on June 30, 1992 under which Sunrise would acquire for $ 225,000 two non-contiguous parcels lacking any frontage on Washington Street. The contract of sale was made expressly contingent upon the termination of Paige's prior contract with Tops.

Sunrise and Paige restructured their contract on November 4, 1992 to grant Sunrise the option to purchase the same two parcels for a total purchase price (i.e., the sum of the option price and the "strike price") of $ 360,000. This arrangement again was amended on January 27, 1993 to increase the total purchase price to $ 765,000. Also included was a right of repurchase by Paige within one year after the deed to the property was conveyed to Sunrise. Any repurchase however, would be subject **[**7]** to a deed restriction limiting the property to uses other than a supermarket. On the same day that the *second amendment* was prepared, Paige notified Sunrise that his contract with Tops had terminated. Sunrise thereafter exercised its option and did acquire title to the two Washington Street parcels in April 1993. This lawsuit followed.

Plaintiff eventually acquired the entire Washington Street site when the Jamestown Urban Renewal Agency, exercising its power of eminent domain, condemned the property and later sold it to Tops. Tops opened a superstore at the site on April 19, 1997.

C. *Prior Proceedings*

Plaintiff filed the present action in the Western District of New York in April 1993 to recover damages from the Quality defendants and Paige for their alleged violations of **[*95]** *§§ 1* and *2* of the Sherman Antitrust Act, *15 U.S.C. §§ 1* & *2*. It also asserted state law claims against the Quality defendants for violations of New York state antitrust laws and tortious interference with a contractual relationship. As against Paige, it further alleged breach of contract, breach of fiduciary duty, and fraud. Maintaining no binding contract existed between him and Tops, Paige counterclaimed **[**8]** against Tops on several state law grounds including fraud, tortious interference with a contractual relationship, wrongfully clouding title, and defamation.

Defendants moved for summary judgment with respect to all of plaintiff's causes of action. In its August 21, 1996 judgment, the trial court ruled that Tops failed to establish facts from which a reasonable jury could find that defendants violated either *§ 1* or *§ 2* of the Sherman Act. It determined, with respect to plaintiff's *§ 1* cause of action, that Tops failed to show either an actual adverse effect on competition in the Jamestown market or Quality's possession of market power. With respect to the *§ 2* cause of action, it further ruled that Tops failed to demonstrate Quality had either the requisite market power or potential market power to sustain a monopolization or attempted monopolization claim respectively.

Plaintiff urges on appeal that dismissing its Sherman Act causes of action was error. Paige cross-appeals, arguing the district court should have entertained his state law counterclaims and dismissed Tops' state law claims against him *with* prejudice. We affirm, in part, reverse, in part, and remand this case **[**9]** to the district court for further proceedings.

DISCUSSION

Standard of Review

This appeal comes before us as a result of a grant of summary judgment. Courts use summary judgment "to isolate and dispose of factually unsupported claims," *Celotex Corp. v. Catrett, 477 U.S. 317, 323-24, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*, particularly in the antitrust context. By avoiding wasteful trials and preventing lengthy litigation that may have a chilling effect on pro-competitive market forces, summary judgment serves a vital function in the area of ***antitrust law***. *See* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 593-94, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*; *Capital Imaging Assocs. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 541 (2d Cir. 1993)*.

HN1[] We review a district court's grant of summary judgment *de novo* to ensure that the substantive ***antitrust law*** was correctly applied. *See* *H.L. Hayden Co. of N.Y., Inc. v. Siemens Med. Sys., Inc., 879 F.2d 1005, 1011 (2d Cir. 1989)*. The summary judgment remedy is appropriate only when there is no genuine issue of material fact. *See* *Fed. R. Civ. P. 56(c)*. In making this determination, a court **[**10]** must consider the evidence in the light most favorable to the non-moving party. *See* *Burtnieks v. City of New York, 716 F.2d 982, 985 (2d Cir. 1983)*. Although all reasonable inferences are drawn in the non-movant's favor, in an antitrust case, those inferences must be reasonable in light of competing inferences of acceptable conduct. *See* *Matsushita, 475 U.S. at 588*. Where the non-moving party, in this instance Tops, carries the burden of proof at trial, it must go beyond the pleadings to demonstrate the existence of some specific facts that create a genuine issue as to those matters for which it has the burden of proof. *See* *Celotex, 477 U.S. at 324*.

Sherman Act Claims

I The Sherman Act, *§ 1*

With these standards in mind, we turn to the substance of the district court's rulings on the antitrust causes of action. ***HN2***[] *Section 1* of the Sherman Act forbids "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1 (1994)*. Tops alleges the defendants violated *§ 1* by conspiring to prevent it from opening a store at the Washington Street site and competing in the supermarket business **[**11]** in the Jamestown market. To establish a *§ 1* violation, a plaintiff must produce evidence sufficient to show: (1) a combination or some form of concerted **[*96]** action between at least two legally distinct economic entities; and (2) such combination or conduct constituted an unreasonable restraint of trade either *per se* or under the rule of reason. *See* *Capital Imaging, 996 F.2d at 542*.

A. *Concerted Action*

Tops avers it produced sufficient evidence to demonstrate that the contract between Paige and Sunrise constituted a concerted action resulting in an unreasonable restraint of trade. Even assuming Tops could establish that an antitrust conspiracy existed among the defendants, it fails to show how defendants' activities comprised an unreasonable restraint of trade. Tops does not contend that defendants' action was illegal *per se*, but instead advances an argument under the rule of reason.

B. *Rule of Reason and the Adverse-Effect Requirement*

HN3[] Under this rule, before a factfinder may consider the harms and benefits of the challenged behavior, a plaintiff initially must show that "the challenged action had an *actual* adverse effect on competition as a whole in the relevant **[**12]** market; to prove it has been harmed as an individual competitor will not suffice." *Capital Imaging, 996 F.2d at 543* (emphasis in original). This requirement ensures that otherwise routine disputes between business competitors do not escalate to the status of an antitrust action. *See* *Oksanen v. Page Mem'l Hosp., 945 F.2d 696, 708 (4th Cir. 1991)*. The Sherman Act protects competition as a whole in the relevant market, not the individual competitors within that market, so that a plaintiff may succeed only when the loss he asserts derives from activities that have a "competition-*reducing*" effect. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342-44, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)* (emphasis in original).

The district court found that Tops failed to produce evidence to sustain this initial burden, despite having two independent means by which to satisfy the adverse-effect requirement. On the one hand, it could have shown an actual adverse effect on competition, such as reduced output. *See F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*; *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., **[**13]** 61 F.3d 123, 128 (2d Cir. 1995)*; *Capital Imaging, 996 F.2d at 546*. Alternatively, if it failed to make such a showing, it could have demonstrated "adverse effect" indirectly by establishing that Quality had sufficient market power to cause an adverse effect on competition. *See K.M.B. Warehouse, 61 F.3d at 128-29*; *Capital Imaging, 996 F.2d at 546*. Market power is but a "surrogate for detrimental effects." *Indiana Fed'n of Dentists, 476 U.S. at 461* (quoting 7 Phillip E. Areeda, ***Antitrust Law*** P 1511, at 429 (1986)).

1. *Actual Adverse Effect*

Plaintiff failed to demonstrate an actual detrimental effect on competition. It relied almost entirely on the affidavit of Robert F. Kennedy (the Kennedy Affidavit), which discussed Quality's high market share and the competitive advantages that could have resulted in *potentially* higher prices, but significantly did not allege that prices were *actually* higher in the Jamestown market. The Kennedy Affidavit further failed to provide sufficient proof that Tops' exclusion from the market had, in fact, resulted in any decrease in the quality of service to Jamestown area shoppers. *See Capital Imaging, 996 F.2d at 546*. **[**14]**

Nor did Tops allege that other supermarkets were excluded from the market. The only clear effect of defendants' alleged conspiracy was to bar plaintiff from opening a store at the Washington Street site. But, the fact that Tops may have been prevented from competing in the Jamestown market does not alone prove an adverse effect on competition as a whole. *See K.M.B. Warehouse, 61 F.3d at 128*. For even if plaintiff were hindered from competing, nothing changed in the relevant product market from the consumer's perspective. *See Balaklaw v. Lovell, 14 F.3d 793, 798-99 (2d Cir. 1994)*.

2. *Market Power*

Tops' showing of Quality's market power was also insufficient to satisfy its burden **[*97]** of demonstrating an adverse effect on the market as a whole. The Kennedy Affidavit asserted that, at all relevant times, Quality's share of the total sales of food items and general household merchandise in the Jamestown area market exceeded 72 percent. Plaintiff asks us to infer that this high market share equates to market power.

Even assuming this market share data implies that Quality possessed market power, Tops still would fail to satisfy its burden under the adverse-effect requirement. ***HN4***[] **[**15]** Market power, while necessary to show adverse effect indirectly, alone is insufficient. *See K.M.B. Warehouse, 61 F.3d at 129*. A plaintiff seeking to use market power as a proxy for adverse effect must show market power, plus some other ground for believing that the challenged behavior could harm competition in the market, such as the inherent anticompetitive nature of the defendant's behavior or the structure of the interbrand market. *See id.*; *see also Graphic Prods. Distribs., Inc. v. Itek Corp., 717 F.2d 1560, 1573 (11th Cir. 1983)* (requiring plaintiff to show high market share and that intrabrand competition was impeded, and that "the interbrand market structure was such that intrabrand competition was a critical source of competitive pressure on price, and hence, of consumer welfare").

Yet, plaintiff provided no evidence other than market share to prove that defendants' action had an adverse effect on competition. The Kennedy Affidavit does not cure this deficiency. It declares that the nature of the interbrand market is such that supermarkets compete for geographic location, seeking a site with close proximity to high concentrations of people, convenience, accessibility, **[**16]** visibility and space. But Quality's purchase of the Washington Street site was not shown either directly or indirectly to have any adverse effect on competition. While Tops may not have readily acquired the location it preferred, Quality's one-time purchase of the site did not foreclose other prospective supermarket competitors from entering the market in desirable locations. We find particularly significant Wegmans' subsequent acquisition of land and construction of a 100,000 square foot store on a different site, which demonstrates the absence of geographic barriers preventing competitors from entering the Jamestown area. Within one year after opening, Wegmans captured approximately 26 percent of the Jamestown market.

Hence, despite Quality's presumed market power, Tops still failed to show any adverse effect on competition as a whole. As such, Judge Elfvin properly dismissed its *§ 1* Sherman Act claim.

II The Sherman Act, *§ 2*

HN5[] *Section 2* of the Sherman Act makes it an offense for any person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2 **[**17]** (1994)*. Thus, *§ 2* forbids both monopolization and attempted monopolization. We address each offense in turn.

A. *Completed Monopolization*

HN6[] To establish a *§ 2* violation for completed monopolization, a plaintiff must produce evidence sufficient to prove the defendant: (1) possessed monopoly power in the relevant market; and (2) willfully acquired or maintained that power. *See* *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *Delaware & Hudson Ry. Co. v. Consolidated Rail Corp., 902 F.2d 174, 178 (2d Cir. 1990)*. The second element is distinct from business growth or development as a consequence of superior product, business acumen or historic accident. *See* *Grinnell Corp., 384 U.S. at 571*.

The district court granted summary judgment in favor of defendants regarding Tops' claim for completed monopolization. It held, as a matter of law, without even addressing the issue of defendants' conduct, that Quality lacked the requisite monopoly power. We must therefore carefully consider whether the relevant evidence created an issue of fact for the jury regarding monopoly power.

HN7[] Monopoly power, also referred to as market power, **[**18]** *see* *International Distrib. Ctrs., Inc. v. Walsh Trucking, 812 F.2d 786, 791 **[*98]** (2d Cir. 1987)*, is "the power to control prices or exclude competition." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. It may be proven directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the relevant market. *See* *K.M.B. Warehouse, 61 F.3d at 129*. Tops sought to prove Quality's monopoly power by proffering evidence on both points.

With respect to direct evidence, plaintiff produced the Kennedy Affidavit, which explained Quality's potential ability to control prices in the following terms:

> Currently, consumers in general must choose between Wegmans and a Quality store which will almost always be closer to their homes than Wegmans' Ellicott facility. Those Jamestown area residents living in outlying areas will most likely find it less convenient and impracticable (especially for purchases of perishable goods) to shop at Wegmans. This scenario would certainly endow Quality with the power to raise prices and limit both selections of grocery items **[**19]** and services *unless the competitive structure of the industry were to change, i.e., unless another competitor were to open a centrally located store which would give the majority of consumers a meaningful choice as to where to fill their weekly grocery list*.

Kennedy Aff. P 19 (emphasis added). Kennedy's conclusion expressly assumes, without offering any support, that no other competitors would enter the market were Quality to raise its prices. This proposition suggesting Quality's purported monopoly power is too speculative to create an issue of fact for the jury. It neither demonstrates Quality's present ability to raise prices, nor evidences the exclusion of competition from the Jamestown market area.

Tops next presented evidence of Quality's high market share in the Jamestown market to establish indirectly Quality's monopoly power. ***HN8***[] While market share is not the functional equivalent of monopoly power, it nevertheless is highly relevant to the determination of monopoly power. *See* *Consolidated Rail, 902 F.2d at 179*. A court may infer monopoly power from a high market share. *See* *Grinnell, 384 U.S. at 571* ("The existence of [monopoly] power ordinarily may be inferred **[**20]** from the predominant share of the market."); *Broadway Delivery Corp. v. United Parcel Serv. of America, Inc., 651 F.2d 122, 129 (2d Cir. 1981)* ("The higher a market share, the stronger is the inference of monopoly power."); *cf.* *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 363, 10*

L. Ed. 2d 915, 83 S. Ct. 1715 (1963) (explaining that where a merger results in one firm controlling a high percentage of the relevant market, it is inherently likely to lessen competition substantially).

A court will draw an inference of monopoly power only after full consideration of the relationship between market share and other relevant market characteristics. *See*, *e.g.*, Walsh Trucking, 812 F.2d at 792 ("Other market characteristics must also be considered in determining whether a given firm has monopoly power . . . ."); Hayden Publ'g Co. v. Cox Broad. Corp., 730 F.2d 64, 68 (2d Cir. 1984) ("[A] number of factors must be considered in determining whether monopoly power exists."); Broadway Delivery, 651 F.2d at 128 ("The true significance of market share data can be determined only after careful analysis of the particular market."). These characteristics include **[**21]** the "strength of the competition, the probable development of the industry, the barriers to entry, the nature of the anticompetitive conduct and the elasticity of consumer demand." Walsh Trucking, 812 F.2d at 792; *see also* Hayden Publ'g Co., 730 F.2d at 68-69 (discussing some of these factors); Broadway Delivery, 651 F.2d at 128 (same).

In the case at hand, Tops presented evidence that Quality's share of the total sales of food items and general household merchandise by Jamestown area supermarkets always exceeded 72 percent. At the time Quality contracted with Paige in 1992 to purchase the Washington Street property, Quality's market share stood at roughly 73 percent. After its acquisition and closing of the "Bells" and "Super Duper" stores and the **[*99]** opening of the Wegmans store, Quality's share steadied at 74 percent in 1995.

Tops asks us to infer Quality's monopoly power from these statistics. We have held that ***HN9***[] a market share of over 70 percent is usually "strong evidence" of monopoly power. *See* Broadway Delivery, 651 F.2d at 129 ("Sometimes, but not inevitably, it will be useful to suggest that a market share below 50% is rarely evidence of monopoly power, a share **[**22]** between 50% and 70% can occasionally show monopoly power, and a share above 70% is usually strong evidence of monopoly power."). Nonetheless, such evidence does not conclusively establish Quality's monopoly power. *See* *id. at 128* ("The trend of guidance from the Supreme Court and the practice of most courts endeavoring to follow that guidance has been to give only weight and not conclusiveness to market share evidence.").

At this juncture, either plaintiff or defendants may introduce evidence regarding these other market factors to determine whether Quality possessed monopoly power. *See* 2A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, P 532a, at 161 (1995) ("The courts generally allow the defendant to rebut inferences of market power by showing easy entry conditions."). The Quality defendants point to several facts in the record suggesting there are no barriers to entry, and Tops failed to produce any further evidence to rebut this assertion. Tops alleges that site availability in the Jamestown market was extremely limited, but offers no proof demonstrating what geographic barriers inhibit a competitor's ability to enter that market. Instead, the record suggests **[**23]** that undeveloped land on which to locate a supermarket has been available at all relevant times throughout the market area. As already noted, Wegmans, a major competitor of Quality, opened a 100,000 square foot store at a different site in 1995 and quickly gained a respectable share of the market. Even Tops' own contemporaneous market studies indicate that Quality did not have such a strong market position as to enable it to exclude competitors. According to these studies, competitors, like Tops and Wegmans, could readily enter the Jamestown market at any number of available sites and successfully compete for supermarket sales.

We agree with Judge Elfvin's conclusion that as a matter of law, despite evidence of Quality's high market share, consideration of other relevant factors does not support a conclusion that Quality did, in fact, possess monopoly power. We cannot be blinded by market share figures and ignore marketplace realities, such as the relative ease of competitive entry. Had Wegmans not gained such a high market share within such a short period, we might recognize at least a *genuine* issue of material fact as to monopoly power, in light of Quality's over-70 percent **[**24]** market share. Wegmans' successful entry, however, itself refutes any inference of the existence of monopoly power that might be drawn from Quality's market share. If Quality were to raise its prices above their competitive level, new competitors could and would enter the market and, by undercutting those prices, quickly erode Quality's market share. *See*, *e.g.*, *Oahu Gas Serv., Inc. v. Pacific Resources Inc., 838 F.2d 360, 366 (9th Cir. 1988)* ***HN10***[] ("A high market share, though it may ordinarily raise an inference of monopoly power, will not do so in a market with low entry barriers or other evidence of a defendant's inability to control prices or exclude competitors.") (citations omitted); *Ball Mem'l Hosp., Inc. v. Mutual Hosp. Ins., Inc., 784 F.2d 1325, 1335 (7th Cir. 1986)* ("The lower the barriers to entry . . . the less power existing firms have.").

On this record we can draw no reasonable inference other than that Quality lacks monopoly power. Despite its high market share, no other evidence -- such as barriers to entry, the elasticity of demand, or the nature of defendant's conduct -supports the conclusion that Quality can control prices or exclude competition and in **[**25]** fact, Wegmans' quick garnishment of such high market share dispositively refutes such a conclusion. Thus, absent a showing of Quality's monopoly power, Tops' claim for completed monopolization was properly dismissed.

B. *Attempted Monopolization*

HN11[] To establish a claim for attempted monopolization, a plaintiff must prove: "(1) **[*100]** that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*; *see also* *Walsh Trucking, 812 F.2d at 790*. In the discussion that follows we deal first with anticompetitive conduct, second with a dangerous probability of achieving monopoly power and, third, with defendants' intent.

1. *Anticompetitive Conduct*

A factfinder could reasonably find that the Quality defendants' and Paige's conduct was anticompetitive. For purposes of this summary judgment motion, we assume that a valid contract existed between Paige and Tops for the sale of the Washington Street site; the Quality defendants interfered with that contract and induced Paige to breach **[**26]** it; and Paige then sold to Sunrise the land targeted by Tops for its store site. The plain effect of this conduct was to prevent Tops, a Quality competitor, from entering the Jamestown market at the Washington site.

2. *Dangerous Probability of Success*

The district court determined, again as a matter of law, that there was no proof of a dangerous probability that Quality would achieve monopoly power and therefore dismissed the attempted monopolization claim. We think, to the contrary, that a factfinder could reasonably find that Quality was close to achieving monopoly power. ***HN12***[] Critical to deciding the dangerous probability prong of plaintiff's attempted monopolization claim is defendant's economic power in the relevant market. *See* *Spectrum Sports, 506 U.S. at 458-59*. Attempted monopolization requires some degree of market power. *See* *Walsh Trucking, 812 F.2d at 791*. In considering the likelihood of achieving monopoly power, we employ the same concept of market power as that used in a completed monopolization claim, *i.e.*, one which considers the defendant's relevant market share in light of other market characteristics, including barriers to entry. *See* *H.L. Hayden Co., **[**27]** 879 F.2d at 1017*; *Walsh Trucking, 812 F.2d at 791*.

Despite the similar approaches, a lesser degree of market power may establish an attempted monopolization claim than that necessary to establish a completed monopolization claim. *See id*. (noting that the offense of attempted monopolization reaches further than the offense of completed monopolization); *Northeastern Tel., 651 F.2d 76 at 85* (explaining that the offense of attempted monopolization encompasses conduct by firms lacking monopoly power). That Tops failed to demonstrate the monopoly power required to prove the offense of completed monopolization therefore does not, *a fortiori*, lead to the conclusion that it failed to make a sufficient showing with respect to its attempted monopolization cause of action.

In view of the lowered quantum of proof requirement, the minimum threshold of evidence Tops must adduce to survive summary judgment on its attempted monopolization claim is reduced. While concededly, Tops proffered only Quality's market share figures as evidence of a dangerous probability of success, those figures demonstrate that Quality possessed a market share exceeding 72 percent when it purchased the Washington **[**28]** Street parcels. Holding such a large market share percentage at the time when defendants took other anticompetitive actions is sufficient, in our mind, to create a genuine factual issue as to whether there was a dangerous probability that Quality would achieve monopoly power. *See* *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 999 (11th*

Cir. 1993) (finding that a 60 or 65 percent market share is sufficiently large to create a genuine issue of material fact as to whether there was a dangerous probability of success); *see also* H.L. Hayden Co., 879 F.2d at 1017 (holding a dangerous probability of monopoly may exist where a party possesses a significant market share at the time it undertakes the challenged anticompetitive conduct); Walsh Trucking, 812 F.2d at 791 (same); 3A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, P 801a, at 301 (1996) (suggesting it is reasonable to presume substantial market **[*101]** power when defendant's share of relevant market exceeds 70-75 percent for the five years preceding the complaint).

We recognize that the Quality defendants point to the lack of barriers to entry, and that we found such evidence dispositive in our previous discussion **[**29]** of market power regarding a completed monopolization claim. Yet, with respect to an attempted monopolization claim, such evidence is insufficient to support summary judgment in defendants' favor. Because plaintiff's quantum of proof is lower in this context, defendants' evidence serves only to raise questions of fact for trial. Whereas Tops' proof of market share alone -- even when countered with evidence of easy market access -- failed to show as a matter of law that Quality *actually* possessed market power, it could nevertheless support a finding that Quality had a dangerous probability of *achieving* market power. *See* 4 Phillip Areeda & Donald F. Turner, ***Antitrust Law***, P 917a, at 86 (1980) ("Particularly disturbing is a study showing that concentration in food retailing markets, where entry barriers seem to be very low, had large adverse [anticompetitive] price effects."). Plaintiff's attempted monopolization claim therefore survives summary judgment on this point.

Consequently, on remand, the jury should be instructed to consider the impact of other market characteristics, particularly the barriers to entry, on this high market share to determine whether a dangerous **[**30]** probability, in fact, existed. A jury may also properly consider Quality's subsequent decline in market share attributable to the entry and growth of a competitor. *See* 3A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, P 807e1, at 358 (1996).

3. *Specific Intent*

a. *Quality's Intent*. ***HN13***[] Although the completed offense of monopolization requires only a general intent, "a specific intent to destroy competition or build monopoly is essential to guilt for the mere attempt." Times-Picayune Publ'g Co. v. United States, 345 U.S. 594, 626, 97 L. Ed. 1277, 73 S. Ct. 872 (1953). An examination of the record would permit a reasonable factfinder to find that the Quality defendants intended to acquire monopoly power.

To begin with, defendants' intent can be derived from their words. Defendants' officials frequently affirmed their stated goal of preventing Tops from entering the Jamestown market. *See* Kelco Disposal, Inc. v. Browning-Ferris Indus. of Vt., Inc., 845 F.2d 404, 408 (2d Cir. 1988), *aff'd on other grounds*, 492 U.S. 257, 106 L. Ed. 2d 219, 109 S. Ct. 2909 (1989) (finding sufficient evidence of intent where defendants' officials frequently reaffirmed their **[**31]** goal to drive plaintiffs from the Burlington market and engaged in predatory pricing). For example, John Dixon, then-president of Quality and current President and C.E.O. of Penn, stated that one reason why the Quality defendants purchased the Washington Street parcels was to prevent Tops from competing at that site. Gary Hirsh, Chairman of the Board at Penn, echoed this sentiment. After purchasing the disputed parcels, the Quality defendants announced at a press conference they would not allow the property to be used by a competing supermarket company. In fact, the "*Second Amendment* Agreement" between the Quality defendants and Paige is strong evidence of the Quality defendants' aim of preventing a supermarket from opening at the Washington Street site by requiring, if Paige repurchases the property, that he would preclude the development of a supermarket on the transferred parcels.

Second, a factfinder could also reasonably infer a specific intent to destroy competition from the Quality defendants' conduct. *See* Northeastern Tel. Co. v. American Tel. & Tel. Co., 651 F.2d 76, 85 (2d Cir. 1981) (explaining that proof of unlawful conduct may imply specific intent). The Quality defendants **[**32]** purchased for above-market value two non-contiguous land parcels with no street frontage, which are, by themselves, essentially undevelopable. [1] A jury could find this conduct was not motivated by a valid business justification. *See Aspen Skiing Co. v. [*102] Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. The Quality defendants obviously could have chosen a more profitable location for a possible convenience store, but were willing to pay a very substantial premium for land on Washington Street in an attempt to exclude Tops from entering the Jamestown market. *Cf*. *Consolidated Rail, 902 F.2d at 178-79* (finding that defendant monopolist's pursuit of non-profit-maximizing market behavior supports a showing of willful acquisition of monopoly power for a completed monopolization claim); *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 291 (2d Cir. 1979)* (finding that a monopolist's use of monopoly power to act in a manner "that a firm would have found substantially less effective, or even counterproductive, if it lacked market control" demonstrates a willful acquisition of monopoly power for a completed monopolization claim).

[33]** b. *Paige's Intent*. Paige also asserts he lacked the requisite intent to attempt to monopolize in violation of *§ 2* of the Act. He now urges that because he was never personally engaged in the supermarket retail business, he had no motive for influencing that industry within the relevant market. According to Paige, he was simply a local real estate developer innocently seeking the best available deal for property he held for sale.

While this argument may or may not ultimately be persuasive, we are unable to consider it now on appeal because it was not raised below. In seeking summary judgment, Paige bore the initial burden of "informing the district court of the basis for [his] motion." *Celotex, 477 U.S. at 323*; *see also Capital Imaging, 996 F.2d at 542* ***HN14***[] ("The litigant seeking summary disposition of a case bears the initial burden of demonstrating, through affidavits or otherwise, the absence of genuine factual issues."). Although the movant need not support its motion with "affidavits or other similar materials *negating* the opponent's claim," *Celotex, 477 U.S. at 323* (emphasis in original), his or her reasons for the motion somehow must be before the district **[**34]** court. Thus, Paige had the burden of demonstrating there was no factual support for the allegation that he possessed the requisite specific intent.

We find neither evidence of nor even any argument pertaining to Paige's allegedly "innocent" intentions in the record. Apart from his answer to Tops' complaint, in which he asserts a general denial of the Sherman Act antitrust allegations, Paige does not address the issue of his intent. To the contrary, his attorney's affidavit, which was attached to Paige's notice of motion for summary judgment, asserted three grounds for his motion:

> 3. The Defendant's motion is made on the following grounds:
>
> a. The Plaintiff never had a valid or enforceable contract with the Defendant;
>
> b. If the Plaintiff had a "Contract" with the Defendant, the Defendant notified the Plaintiff of the approaching closing date and the Plaintiff determined that it did not wish to close, justifying the Defendant in not closing the "Contract";
>
> c. If the Plaintiff had a "Contract" with the Defendant, the Plaintiff committed an anticipatory breach of that "Contract", justifying the Defendant in not closing the "Contract".

Paige expressly limited **[**35]** the basis for his motion to state contract law grounds. Moreover, neither Paige nor his attorney appeared at oral argument to advance any different grounds for urging summary judgment in Paige's favor. Because the district court was not given the opportunity to consider the issue of Paige's intent, summary judgment in his favor may not now be affirmed on this ground.

State Law Claims and Counterclaims

Paige also cross-appeals on the ground that the district court erroneously dismissed without prejudice Tops' state law claims against him and his state law counterclaims against Tops. When Judge Elfvin granted summary judgment dismissing Tops' Sherman Act claims, the only federal claims, he properly declined to exercise supplemental jurisdiction over the remaining state law claims and dismissed them without prejudice. The governing statute, ***HN15***[] *28 U.S.C. [*103] § 1367(c)(3) (1994)*, permits a district court, in its discretion, to decline to

---

[1] Quality originally agreed to pay $ 225,000 and then later bought the two parcels for a total price of $ 765,000. Tops had been willing to pay $ 475,000 for all four of Paige's Washington site parcels.

exercise supplemental jurisdiction over state law claims if it has dismissed all federal claims. Further, the Supreme Court, in *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350, 98 L. Ed. 2d 720, 108 S. Ct. 614 (1988)*, announced that when all federal **[**36]** claims are eliminated in the early stages of litigation, the balance of factors generally favors declining to exercise pendent jurisdiction over remaining state law claims and dismissing them *without* prejudice. *See also* *Morse v. University of Vt., 973 F.2d 122, 127-28 (2d Cir. 1992)* (same). Hence, contrary to Paige's assertions, the district court was correct not only in dismissing the state law causes of action, but also in dismissing them without prejudice.

Thereafter, pursuant to a stipulation, the district court ordered, on March 4, 1997, that the parties would be granted leave to re-file their state law claims and counterclaims, if we remanded the federal antitrust claims. Since we are remanding this case on the attempted monopolization cause of action, Tops is free to refile its state law claims and Paige may also reassert his state law counterclaims in federal court. Because the district court did not make a final decision on the merits of these causes, we cannot now review their merits. *See* *28 U.S.C. § 1291 (1994)*.

CONCLUSION

Accordingly, for the foregoing reasons, we affirm the district court's dismissal of the Sherman Act *§ 1* claim and the *§ 2* claim for **[**37]** completed monopolization. We vacate the dismissal of the *§ 2* claim for attempted monopolization, and remand that cause of action to the district court for further proceedings consistent with this opinion.

Affirmed, in part, vacated, in part, and remanded.

HN2[] **Purchasers, Direct Purchasers**

Indirect purchasers generally lack standing under the antitrust laws and so cannot bring suits for damages.

Antitrust & Trade Law > Clayton Act > General Overview

HN3[] **Antitrust & Trade Law, Clayton Act**

Section 12 of the Clayton Act, *15 U.S.C.S. § 15*, provides in pertinent part that any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business.

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Preliminary Considerations > Venue > Corporations

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Special Venue

HN4[] **Clayton Act, Jurisdiction**

When venue is asserted over a parent corporation on the basis of a subsidiary's business activities, the question is whether the parent exercises sufficient control over its subsidiary to cause the parent to transact business in the judicial district within the special venue provision of the Clayton Act (Act), *15 U.S.C.S. § 15*. Sufficient control over the operations of a subsidiary renders the subsidiary the instrument, rather than merely the investment, of the parent, and supports the conclusion that the parent is transacting business in a district, despite the formal separation of corporate entities. Sufficient control does not require that the subsidiary be controlled to an ultimate degree by its parent, although something more than mere passive investment by the parent is required. The parent must have and exercise control and direction, over the affairs of its subsidiary in order for venue to be proper under § 12 of the Act.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN5[] **Antitrust & Trade Law, Clayton Act**

Day-to-day control of the activities of the subsidiary is not required in order for a parent to be carrying on business of any substantial character within a judicial district. It is enough if the parent exercises continuing supervision of and intervention in the subsidiaries affairs, especially if the parent exercises its ability to influence major decisions of the subsidiary which lead or could lead to violations of the antitrust laws.

Counsel: Counsel who presented argument on behalf of the appellant was George W. Sampson fo Seattle, WA. Steve W. Berman of Seattle appeared on the brief.

Counsel who presented argument on behalf of the appellee was Phil C. Neal of Chicago, IL. James K. Gardner and Charles Evans Gerber of Chicago, IL appeared on the brief. Francies P. Barron of New York, NY appeared on the brief. David W. Harlan and Michael A. Kahn of St. Louis, MO appeared on the brief.

Judges: Before HANSEN and MORRIS SHEPPARD ARNOLD, Circuit Judges, and MELLOY, [1] Chief District Judge. MORRIS SHEPPARD ARNOLD, Circuit Judge, dissenting.

Opinion by: MELLOY

Opinion

[*1168] MELLOY, Chief District Judge.

The plaintiffs, individually and as a proposed class of popular music fans, sued Ticketmaster Corporation ("Ticketmaster") for damages and injunctive relief. Sixteen cases, originally filed in various districts, were consolidated for pretrial proceedings in the Eastern District of Missouri. Eleven of the cases were dismissed. The plaintiffs in the remaining five cases then filed a consolidated complaint superseding the individual **[**2]** complaints. The consolidated complaint alleged that Ticketmaster violated *§ 1* of the Sherman Act by engaging in price fixing with various concert venues and promoters and by boycotting the band Pearl Jam; that Ticketmaster violated § 2 of the Sherman Act by monopolizing, or attempting to monopolize, the market for ticket distribution services; and that Ticketmaster violated § 7 of the Clayton Act by acquiring its competitors. See *15 U.S.C. § 1 et seq.* The plaintiffs claimed standing to sue based on their payment of monopoly overcharges, in the form of service and handling fees, for Ticketmaster's ticket distribution services.

The district court dismissed the suit, holding that the plaintiffs lacked standing to sue because they were indirect purchasers within the meaning of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)* and its progeny. The district court also held that, even if the plaintiffs were not indirect purchasers, they were nevertheless inappropriate plaintiffs under the standards set forth by the Supreme Court in *Associated General*

[1] The Honorable Michael J. Melloy, Chief Judge, United States District Court for the Northern District of Iowa, sitting by designation.

Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. [**3] 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983). Finally, the district court held that three of the consolidated cases had been improperly venued, and dismissed the cases originally filed in Georgia, Washington, and Michigan.

The plaintiffs contend that the court erred in all of these holdings. We affirm in part, reverse in part, and remand for further proceedings.

I.

Since the case was dismissed on the pleadings, we treat all factual allegations of the complaint as true. See Haberthur v. City of Raymore, 119 F.3d 720 (8th Cir. 1997). **HN1**[] We may affirm a dismissal on the pleadings "only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations." Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984); see also Associated General Contractors, 459 U.S. at 526 ("We must assume that the [plaintiff] can prove the facts alleged in its amended complaint.").

According to the complaint, Ticketmaster is a monopoly supplier of ticket distribution or ticket delivery services to large-scale popular music shows. The complaint alleges that Ticketmaster has long-term exclusive contracts with almost **[**4]** every promoter of concerts in the United States. These exclusive contracts ensure that Ticketmaster will have the right to handle the vast majority of ticket sales for almost every large-scale popular music concert in the United States, regardless of whether or not Ticketmaster has exclusive contracts with the particular venues where those concerts are held.

[*1169] Ticketmaster's exclusive contracts with almost every promoter of concerts in the United States give it the right to distribute tickets over the telephone, at outlets such as retail stores, and at the venue where the promoter is presenting an event. According to plaintiffs, Ticketmaster therefore has ironclad control over ticketing for any large-scale popular music concert at major venues in the United States.

Ticketmaster uses that control, according to the complaint, to extract from the plaintiffs supracompetitive fees for ticket distribution services. Those fees can be as high as twenty dollars per ticket. By paying those fees, the plaintiffs contend that they suffer injury to their property within the meaning of Section 4 of the Clayton Act, 15 U.S.C. § 15, and so have standing to sue. See Reiter v. Sonotone Corp., 442 [**5] U.S. 330, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979). The district court, while not questioning the allegation that the plaintiffs pay some increased price for concert tickets as a result of Ticketmaster's monopoly, nonetheless held that such injury did not give the plaintiffs standing under § 4.

II.

In Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977), the Supreme Court held that only the "direct purchaser" from a monopoly supplier could sue for treble damages under § 4 of the Clayton Act. See 15 U.S.C. § 15; Hovenkamp, The Indirect- Purchaser Rule and Cost-Plus Sales, 103 Harv. L. Rev. 1717 (1990). **HN2**[] "Indirect purchasers" generally lack standing under the antitrust laws and so cannot bring suits for damages. See Sports Racing Services, Inc. v. Sports Car Club of America, Inc., 131 F.3d 874, 883 (10th Cir. 1997)("The Supreme Court has consistently held that only direct purchasers suffer injury within the meaning of § 4 of the Clayton Act.").

The Supreme Court has defined an indirect purchaser as one who is not the "immediate buyer from the alleged antitrust violator[]," Kansas v. Utilicorp United, Inc., 497 U.S. 199, 207, [**6] 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990), or one who "[does] not purchase [the monopolized product] directly from the [antitrust] defendant[.]" California v. ARC America Corp., 490 U.S. 93, 96, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989). Some commentators have offered definitions of their own. See, e.g., Werden & Schwartz, Illinois Brick and the Deterrence of Antitrust Violations -- An Economic Analysis, 35 Hastings L.J. 629, 668 n. 4 (1984)("The term 'indirect purchaser'… means any party that purchases a product from any party in the vertical supply chain other than the party suspected of the antitrust violation, *i.e.*, from a direct purchaser or another indirect purchaser -- with the ultimate consumer being the last indirect purchaser."); Hovenkamp, The Indirect-Purchaser Rule and Cost-Plus Sales, 103 Harv.L.Rev. 1717

(1990)("'Indirect' purchasers [are] those who bought an illegally monopolized or cartelized product or service through the agency of a dealer, distributor, or some other independent reseller who was not a participant in the antitrust violation."). Other courts and commentators have given examples to explain the content of the indirect **[**7]** purchaser concept. See, e.g., *McCarthy v. Recordex Service, Inc., 80 F.3d 842, 852 n. 16* (3rd Cir.)(homeowner an indirect purchaser of paint used by housepainter), *cert. denied*, *136 L. Ed. 2d 42, 117 S. Ct. 86 (1996)*; Landes & Posner, Should Indirect Purchasers Have Standing to Sue Under the Antitrust Laws? An Economic Analysis of the Rule in Illinois Brick, 46 U.Chi.L.Rev. 602 (1979)(bread buyer an indirect purchaser of flour and oven used by bread baker). [2]

A common concept unites **[**8]** these various definitions and examples: An indirect purchaser is one who bears some portion of a monopoly overcharge only by virtue of an antecedent transaction between the monopolist and another, independent purchaser. **[*1170]** Such indirect purchasers may not sue to recover damages for the portion of the overcharge they bear. The right to sue for damages rests with the direct purchasers, who participate in the antecedent transaction with the monopolist.

Some review of the economic assumptions underlying the direct purchaser rule is necessary to understand the justification for the direct purchaser rule. For purposes of antitrust analysis, courts assume that a firm generally wishes to "minimize its input costs[.]" *Olympia Equipment Leasing Co. v. Western Union Telegraph Co., 797 F.2d 370, 374 (7th Cir. 1986)*, *cert. denied*, *480 U.S. 934, 94 L. Ed. 2d 765, 107 S. Ct. 1574 (1987)*; *Stamatakis Industries, Inc. v. King, 965 F.2d 469, 472 (7th Cir. 1992)*. Consequently, when a firm buys its inputs from a monopolist at a monopoly price, we may be fairly certain that it had little choice in the matter. [3] The indirect purchaser, in turn, pays some portion of the monopoly overcharge only **[**9]** because the previous purchaser was unable to avoid that overcharge. The homeowner in the example given by the Third Circuit pays some part of the monopoly overcharge for paint only because the housepainter was unable to obtain his paint at a competitive price, just as the bread buyer in Landes and Posner's example pays some part of the monopoly overcharge for the oven only because the baker was unable to obtain a competitively priced oven. The breakdown in competitive conditions occurs in transactions at least once removed from the indirect purchaser.

The monopoly overcharge exacted by the monopolist generally injures both those who deal directly **[**10]** and those who deal derivatively with the monopolist. As Judge Posner has explained, "The optimal adjustment by an unregulated firm to the increased cost of the input [*i.e.*, the monopoly overcharge] will always be a price increase smaller than the increase in input cost[.]" State of Illinois *ex rel. Hartigan v. Panhandle Eastern Pipe Line Co., 852 F.2d 891, 894 (7th Cir. 1988)*(*en banc*), *cert. denied*, *488 U.S. 986, 102 L. Ed. 2d 573, 109 S. Ct. 543 (1988)*, *overruled on other grounds by* *Illinois v. Panhandle Eastern Pipe Line Co., 935 F.2d 1469 (7th Cir. 1991)*; *Stamatakis, 965 F.2d at 472*. Only rarely will a firm be able to pass on the entire amount of a monopoly overcharge to its customers. See *Panhandle Eastern, supra.* In the usual case, both the firm and its customers will bear some portion of the overcharge, and thus both will suffer injury from the antitrust violation. See *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 489-93, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*; *Illinois Brick, 431 U.S. at 731-33*.

Precisely what part of the overcharge will be borne by the direct purchaser, and what part will be borne **[**11]** by the indirect purchaser, is "an example of what is called 'incidence analysis,' and is famously difficult." *In re Brand*

---

[2] Although direct purchaser issues usually involve a chain of distribution in which a tangible good passes from one purchaser to another, that is not always so. An indirect purchaser can bear some part of the monopoly overcharge for a product even when that product does not pass from the direct to the indirect purchaser. For example, in Landes and Posner's example of the bread buyer, the bread buyer pays a higher price for bread because the baker passes along some part of the monopoly overcharge paid for the oven.

[3] The situation may be different when the firm is party to the antitrust violation. Cf. *In re Midwest Milk Monopolization Litigation, 730 F.2d 528, 529-30 (8th Cir. 1984)*, *cert. denied*, ***469 U.S. 924, 105 S. Ct. 306, 83 L. Ed. 2d 240 (1984)***; *In re Beef Industry Antitrust Litigation, 600 F.2d 1148, 1163 (5th Cir. 1979)*, *cert. denied*, ***449 U.S. 905, 101 S. Ct. 280, 101 S. Ct. 281, 66 L. Ed. 2d 137 (1980)***; *McCarthy, 80 F.3d at 854*.

Name Prescription Drugs Litigation, 123 F.3d 599, 605 (7th Cir. 1997), *cert. denied*, *140 L. Ed. 2d 186, 118 S. Ct. 1178 (1998)*; see also Illinois Brick, 431 U.S. at 740 - 44; Utilicorp United, Inc., 497 U.S. at 206 - 209; Landes & Posner, Economic Analysis of Illinois Brick, 46 U.Chi.L.Rev. at 619 - 20. If both direct and indirect purchasers were allowed to sue for damages, the courts would be faced with the "famously difficult" task of apportioning the payment of overcharges between direct and indirect purchasers. The alternative is to allow duplicative recovery, which the Supreme Court also disapproves of and the avoidance of which constitutes another rationale for the direct purchaser rule. See Utilicorp United, 497 U.S. at 212; Southwestern Bell Telephone Co. v. FCC, 325 U.S. App. D.C. 249, 116 F.3d 593, 597 (D.C.Cir. 1997).

The Supreme Court has declined to involve the federal courts in such an analysis, except in very limited circumstances, explaining that "the direct purchaser rule serves, in part, to eliminate the complications of apportioning **[**12]** overcharges between direct and indirect purchasers." Utilicorp United, 497 U.S. at 208; see also In re Brand **[*1171]** Name Prescription Drugs Litigation, 123 F.3d at 605; In re Midwest Milk Monopolization Litigation, 730 F.2d at 530. While the Supreme Court has recognized that the "economic assumptions underlying the Illinois Brick rule might be disproved in a specific case," 497 U.S. at 217, the Court also has made it plain that it considers it an "unwarranted and counterproductive enterprise to litigate a series of exceptions." 497 U.S. at 217.

None of the limited circumstances that might warrant avoidance of the direct purchaser rule exist here. There is no "cost-plus" contract, see Hanover Shoe, 392 U.S. at 494, no allegation that the indirect purchasers own or control the direct purchasers, see In re Brand Name Prescription Drugs Litigation, 123 F.3d at 605, and no proper allegation that the direct purchasers have conspired with or otherwise been party with Ticketmaster to any antitrust violation. [4] Since the direct purchaser rule applies in this case, the question becomes whether the plaintiffs are direct or indirect purchasers of Ticketmaster's services.

[13]** III.

The plaintiffs contend that they are direct purchasers of "ticket distribution services" from Ticketmaster, primarily because they pay directly to Ticketmaster distinct service and convenience fees. However, like the Third Circuit, we do not find billing practices to be determinative of indirect purchaser status. See McCarthy, 80 F.3d at 853 n. 18 (noting that "even if a separate charge for gasoline were assessed [to a taxi passenger], the taxi passenger still could not be considered a direct purchaser [of gasoline] in any sense."). As the plaintiffs' complaint makes clear, Ticketmaster's exclusive contracts with almost every promoter of concerts in the United States require venues wishing to host concerts to use Ticketmaster for ticket distribution to those concerts. Just like the housepainter and the baker, the complaint alleges that the venues are unable to obtain a necessary input -- ticket delivery services -- in a competitive market. The plaintiffs' inability to obtain ticket delivery services in a competitive market is simply the consequence of the antecedent inability of venues to do so. Cf. *Note*, Beyond Economic Theory: A Model for Analyzing the Antitrust **[**14]** Implications of Exclusive Dealing Arrangements, 45 Duke L.J. 1009,1015 (1996)("Ticketing service companies do not compete directly for consumers' business. Instead, [those companies] compete to secure contracts with venues and event promoters for the right to sell tickets to various entertainment events."). As the plaintiff's complaint makes clear, ticket buyers only buy Ticketmaster's services because concert venues have been required to buy those services first. As we explained above, such derivative dealing is the

[4] The plaintiffs do characterize the venues as beneficiaries of and participants in Ticketmaster's unlawful activity, but the plaintiffs have not joined the venues as defendants. In this circuit, an antitrust plaintiff cannot avoid the Illinois Brick rule by characterizing a direct purchaser as a party to the antitrust violation, unless the direct purchaser is joined as a defendant. See In re Midwest Milk Monopolization Litigation, 730 F.2d at 529 - 31. These consolidated cases are controlled by the law of this circuit, rather than that of the various circuits in which they were first filed. See Temporomandibular Joint (TMJ) Implant Recipients v. E.I. DuPont de Nemours & Co., 97 F.3d 1050, 1055 (8th Cir. 1996)("When analyzing questions of federal law, the transferee court should apply the law of the circuit in which it is located."); see also In re Korean Air Lines Disaster, 265 U.S. App. D.C. 39, 829 F.2d 1171 (D.C.Cir. 1987), *aff'd sub nom* Chan v. Korean Air Lines, Ltd., 490 U.S. 122, 104 L. Ed. 2d 113, 109 S. Ct. 1676 (1989); but see Cooper, The Korean Air Disaster: Choice of Law in Federal Multidistrict Litigation, 57 Geo.Wash.L.Rev. 1145 (1989).

essence of indirect purchaser status, and it constitutes a bar under the antitrust laws to the plaintiffs' suit for damages.

Nor do we agree with the plaintiffs' contention that Ticketmaster's monopoly power is benign, so far as the venues are concerned, simply because Ticketmaster's service fees are collected immediately from ticket buyers. Although the plaintiffs describe these fees as separate from what they call the actual purchase price of concert tickets, it appears clear that the actual purchase price and the cost of the service fees amount to the single cost of attending the concert, regardless of how that cost is divided into actual purchase price and service **[**15]** fees. See *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 495,* ***[*1172]*** *119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*(Scalia, J., dissenting). [5] Since the price of the ticket (that is, the actual purchase price plus the service fees) is obviously a price that the market will bear, see *U.S. Football League v. National Football League, 842 F.2d 1335, 1357-58 n. 19 (2nd Cir. 1988)*, a venue free from Ticketmaster's domination of ticket distribution would be able to charge that price itself, without having to cede to Ticketmaster a portion of that price in the form of supracompetitive service fees. Cf. *Hanover Shoe, 392 U.S. at 492* (noting, in the course of disapproving a passing-on defense to antitrust suits, the "nearly insuperable difficulty of demonstrating that the particular plaintiff could not or would not have raised his prices absent the overcharge or maintained the higher price had the overcharge been discontinued."); *Utilicorp United, 497 U.S. at 209* (same).

[16]** Consequently, we affirm the district court's order dismissing the individual plaintiff's claims for monetary damages under § 4 of the Clayton Act.

IV.

Indirect purchaser status does not bar the plaintiffs from seeking injunctive relief under § 16 of the Clayton Act. The concerns of the direct purchaser rule have mainly to do with the complexities of incidence analysis, complexities that do not arise when the courts must consider the propriety of injunctive relief. As Professors Areeda and Hovenkamp explain, "An equity suit neither threatens duplicative recoveries nor requires complex tracing through the distribution chain. There are no damages to be traced, and a defendant can comply with several identical injunctions as readily as with one. Illinois Brick has not therefore barred an indirect purchaser's suit for an injunction." Phillip E. Areeda and Herbert Hovenkamp, ***Antitrust Law*** P371d, at 259 (1995); see also *McCarthy, 80 F.3d at 856* (holding that "plaintiffs need not satisfy Illinois Brick's "direct purchaser" requirement in order to seek injunctive relief[.]").

The case relied on by Ticketmaster as support for its contention that injunctive relief is **[**17]** unavailable to the plaintiffs, *Cargill, Inc. v. Monfort of Colorado, 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*, does not apply to the facts of this case. The Court denied standing to seek injunctive relief to the plaintiff in Cargill because the injury alleged by the plaintiff was nothing more than a reduction in profit resulting from increased competition. See *479 U.S. at 114* - 15 ("Monfort's [] claim is that … Excel would lower its prices to some level at or slightly above its costs in order to compete with other packers for market share….To remain competitive, Monfort would have to lower its prices; as a result, Monfort would suffer a loss in profitability[.]"). The Cargill decision reflects the principle that ***antitrust law*** provides no remedies for those injured by competition; it does not, as Ticktemaster contends, establish an inflexible rule that no antitrust plaintiff may seek injunctive relief unless he may also seek damages. In fact, footnote six of the Cargill decision explains the different standing requirements under § 16 and § 4 of the Clayton Act, cites to Illinois Brick, and concludes that a party who lacks standing under **[**18]** § 4 may still have standing to seek injunctive relief under § 16. See *479 U.S. at 111 n. 6*.

In this case, the pleadings establish anti-trust standing to seek injunctive relief. All of the plaintiffs claim to have purchased tickets from Ticketmaster and claim to have paid the monopolistic service fees. The payment of those fees establishes standing to pursue a claim for injunctive relief.

---

[5] We note that, unlike in the Eastman Kodak case, there are no information costs here that may prevent the plaintiffs from separating out from the total purchase price the actual purchase price and service fee components. See *Eastman Kodak, 504 U.S. at 473* - 74.

V.

Finally, the plaintiffs appeal the portion of the district court's order that found that Ticketmaster was not transacting business in Georgia, Washington, or Michigan within the meaning of § 12 of the Clayton Act, the Act's venue provision. See *15 U.S.C. § 22*; *U.S. ex rel. Thistlethwaite v. Dowty Woodville* **[*1173]** *Polymer, Ltd., 110 F.3d 861, 865 (2nd Cir. 1997)*. Relying on *O.S.C. Corp. v. Toshiba America, 491 F.2d 1064 (9th Cir. 1974)* and *San Antonio Tel. Co. v. American Tel. & Tel. Co., 499 F.2d 349 (5th Cir. 1974)*, the district court held that Ticketmaster was not transacting business within those judicial districts because it did not exercise "day to day" control over the operations of its subsidiaries located in those districts. We conclude that the district court applied **[**19]** the wrong legal standard for venue under the Clayton Act.

HN3[] Section 12 of the Clayton Act provides in pertinent part that "any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business[.]" *15 U.S.C. § 22*. In *U.S. v. Scophony Corp. of America, 333 U.S. 795, 92 L. Ed. 1091, 68 S. Ct. 855 (1948)*, the Supreme Court held that the "transacts business" language of § 12 was intended to make "the practical, everyday business or commercial concept of doing or carrying on business 'of any substantial character' [] the test of venue." *333 U.S. at 807*. The "highly technical distinctions" that had characterized venue determinations under the previous venue provision, § 7 of the Sherman Act, were to be "sloughed off" by the "practical and broader business conception" embodied in § 12. *333 U.S. at 807*; *Reynolds Metals Co. v. Columbia Gas System, Inc., 669 F. Supp. 744, 747 (E.D.Va. 1987)*("The 'transacts business' language of the Clayton Act enlarged the more limited 'found' standard of the Sherman Act.").

HN4[] When venue is **[**20]** asserted over a parent corporation on the basis of a subsidiary's business activities, the question is whether the parent "exercises sufficient control over its [] subsidiary to cause the parent to 'transact business' [in the judicial district] within the special venue provision of the Clayton Act." *Tiger Trash v. Browning-Ferris Industries, Inc., 560 F.2d 818, 822 (7th Cir. 1977)*, *cert. denied*, *434 U.S. 1034, 98 S. Ct. 768, 54 L. Ed. 2d 782 (1978)*. Sufficient control over the operations of a subsidiary renders the subsidiary the instrument, rather than merely the investment, of the parent, and supports the conclusion that the parent is transacting business in a district, despite the formal separation of corporate entities. See *Lakota Girl Scout Council, Inc. v. Havey Fund-Raising Management, Inc., 519 F.2d 634, 637 (8th Cir. 1975)*. Sufficient control does not require that the subsidiary be controlled to an ultimate degree by its parent, *560 F.2d at 824*, although something more than mere passive investment by the parent is required. *560 F.2d at 823*; see also *Phone Directories Co., Inc. v. Contel Corp., 786 F. Supp. 930, 939 (D. Utah 1992)*; *Reynolds, 669 F. Supp. at 749*. The parent must **[**21]** have and exercise control and direction, *560 F.2d at 823*, over the affairs of its subsidiary in order for venue to be proper under § 12.

HN5[] Day-to-day control of the activities of the subsidiary is not required in order for a parent to be carrying on business of any substantial character within a judicial district. *Scophony, 333 U.S. at 807*. It is enough if the parent exercises continuing supervision of and intervention in the subsidiaries' affairs, see *Chrysler Corp. v. General Motors Corp., 589 F. Supp. 1182, 1200 (D.D.C. 1984)*, especially if the parent exercises its "ability … to influence major decisions of the subsidiary which lead or could lead to violations of the antitrust laws." *Grappone, Inc. v. Subaru of America, Inc., 403 F. Supp. 123, 131 (D.N.H. 1975)*; *Scophony, 333 U.S. at 814* (holding that venue was proper for British corporation in Southern District of New York when British corporation demonstrated a "continuing exercise of supervision over and intervention in [American subsidiary's] affairs.").

In reaching the conclusion that Ticketmaster was not transacting business in Georgia, Washington, or Michigan, the district court relied on the affidavit **[**22]** of Ned Goldstein, Senior Vice President and General Counsel of Ticketmaster, who affirmed that Ticketmaster owns no property and has no bank accounts or offices in Georgia, Washington, or Michigan. Goldstein further affirmed that all the day-to-day operations of the subsidiaries were under the control of the officers of those subsidiaries. While these affirmations may have been enough to resolve the venue issue under the standard **[*1174]** applied by the district court, they do not resolve the question under the standard we have explained here. Accordingly, we vacate the district court's venue ruling so that the district court may allow further discovery on the venue issue, as may be appropriate, and reconsider the issue under the appropriate standard.

VI.

In conclusion, we affirm the district court's judgment that the plaintiffs lack standing to pursue their claims for damages under § 4 of the Clayton Act. We reverse the district court's ruling that the plaintiffs lack standing to seek injunctive relief under § 16, and we vacate and remand for further proceedings on the issue of proper venue.

Dissent by: MORRIS SHEPPARD ARNOLD

Dissent

MORRIS SHEPPARD ARNOLD, Circuit Judge, dissenting.

The **[**23]** court holds that *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, precludes these plaintiffs from bringing an antitrust action against Ticketmaster under Section 4 of the Clayton Act, *see 15 U.S.C. § 15(a)* . I respectfully disagree.

The court begins its opinion by attempting to clarify the meaning of the phrase "indirect purchaser" in the antitrust context. Citing *Illinois Brick* itself, numerous other cases, and several law review articles, the court concludes that "an indirect purchaser is one who bears some portion of a monopoly overcharge only by virtue of an antecedent transaction between the monopolist and [a direct purchaser]." The phrase "antecedent transaction," however, appears nowhere in the authorities relied on, and, in fact, a mere "antecedent transaction" will not turn all purchasers of a monopolized product into indirect purchasers for the purposes of *Illinois Brick*. *Illinois Brick, 431 U.S. at 727*, uses the term "indirect purchaser" to mean someone in a vertical supply chain who purchases a monopolized product from someone other than a monopolist. Both the direct and the indirect purchaser will usually suffer **[**24]** some injury as both ordinarily will have to absorb a portion of the monopolist's overcharge. *See id. at 746*. Because the Supreme Court in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 494, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, had rejected the argument that monopolists could avoid liability to direct purchasers to the extent that those direct purchasers had "passed on" any or all of their markups to indirect purchasers, without *Illinois Brick*, both direct and indirect purchasers would have standing to sue for the same antitrust injury. *Illinois Brick, 431 U.S. at 746*, in the interests of economic and administrative efficiency, holds that only parties who are directly injured may sue for antitrust violations, thus avoiding the need to apportion damages among direct and indirect purchasers, and preventing double recovery (or sextuple recovery under Section 4 of the Clayton Act) when both indirect and direct purchasers sue.

Thus *Illinois Brick* requires more than a mere antecedent transaction for an antitrust defendant to avoid suit from an "indirect purchaser" under Section 4. Instead, the antecedent transaction must have been one in a direct **[**25]** vertical chain of transactions and it must have resulted in the "passing on" of monopoly costs from the direct purchaser to the indirect purchaser. *Illinois Brick, 431 U.S. at 746*. In this case, neither of these conditions is met.

The monopoly product at issue in this case is ticket distribution services, not tickets. Ticketmaster supplies the product directly to concert-goers; it does not supply it first to venue operators who in turn supply it to concert-goers. It is immaterial that Ticketmaster would not be supplying the service but for its antecedent agreement with the venues. But it is quite relevant that the antecedent agreement was not one in which the venues bought some product from Ticketmaster in order to resell it to concert-goers. More important, and more telling, is the fact that the entirety of the monopoly overcharge, if any, is borne by concert-goers. In contrast to the situations described in *Illinois Brick* and the literature that the court cites, the venues do not pay any portion of the alleged monopoly overcharge -- in fact, they receive a portion of that overcharge from Ticketmaster.

[*1175] An unhappy result of the holding in this case is that it is now likely **[**26]** that no one can bring a Section 4 suit against Ticketmaster in this circuit. The plaintiffs in this appeal (and other similarly situated "indirect purchasers") are the only parties who are actually injured by Ticketmaster's alleged illegal price-fixing, if any. The venues themselves, the parties whom the court seems to favor as candidates for bringing this Section 4 suit, are not injured, and therefore cannot bring an action at all.

For the reasons indicated, I dissent from the judgment in this case.

Intergraph Corp. v. Intel Corp.

United States District Court for the Northern District of Alabama, Northeastern Division

April 10, 1998, Decided

CV 97-N-3023-NE

Reporter
3 F. Supp. 2d 1255 *; 1998 U.S. Dist. LEXIS 4820 **; 1998-1 Trade Cas. (CCH) P72,126

INTERGRAPH CORPORATION, Plaintiff, vs. INTEL CORPORATION, Defendant

Disposition: **[**1]** Intel Corporation PRELIMINARY ENJOINED from terminating Intergraph's rights as a "strategic customer in current and future programs," or from otherwise taking any action adversely affecting Intel's business relationship with Intergraph or Intergraph's ability to design, develop, produce, manufacture market or sell products incorporating, or based upon, Intel products or information.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN1[] **Antitrust & Trade Law, Sherman Act**

Under *Fed. R. Civ. P. 65*, in order to prevail on its motion for a preliminary injunction, a party must prove: (1) it has a substantial likelihood of ultimate success on the merits of one or more of its substantive claims; (2) there is a substantial threat that it will suffer irreparable injury in the absence of preliminary relief; (3) the likely injury to itself is greater than that likely to be suffered by the defendant; and (4) entry of the preliminary injunction would not disserve the public interest. Where the plaintiff advances anti-trust claims, preliminary relief is specifically authorized by *15 U.S.C.S. § 26*.

HN4[] **Sherman Act, Claims**

In order to prevail on its § 2 of the Sherman Anti-Trust Act, codified at 15 U.S.C.S. § 2, monopolization claim, a plaintiff only needs to establish that a defendant (1) possesses monopoly power in the relevant market and (2) has willfully acquired or maintained that power.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

A sixty to sixty-five percent market share establishes a prima facie case of market power and creates a genuine issue of dangerous probability of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN6[] **Monopolies & Monopolization, Actual Monopolization**

Strong customer brand loyalty is an impediment to competition and aids the exercise of market power and facilitates monopolization.

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

A rapidly evolving high technology market such as microprocessors provides a market environment favorable to increased concentration of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN8[] Monopolies & Monopolization, Actual Monopolization

The use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor, is unlawful.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] Monopolies & Monopolization, Actual Monopolization

Even conduct by a monopolist that is otherwise lawful may violate the antitrust laws where it has anticompetitive effects. Legal actions, when taken by a monopolist, may give rise to liability, if anticompetitive. Otherwise lawful conduct may be unlawfully exclusionary when practiced by a monopolist. When a monopolist competes by denying a source of supply to his competitors, raises his competitor's price for raw materials without affecting his own costs, lowers his price for finished goods, and threatens his competitors with sustained competition if they do not accede to his anticompetitive designs, then his actions have crossed the shadowy barrier of the Sherman Act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] Monopolies & Monopolization, Actual Monopolization

A refusal to deal may be unlawful because a monopolist's control of an essential facility, sometimes called a "bottleneck" can extend monopoly power from one stage of production to another, and from one market into another. The antitrust laws protect customers and purchasers in cases when a monopolist refuses to deal in order to control a downstream market or to frustrate litigation.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] Monopolies & Monopolization, Actual Monopolization

The antitrust laws impose on firms controlling an essential facility the obligation to make the facility available on non-discriminatory terms.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN12[] Monopolies & Monopolization, Actual Monopolization

Technical information is "essential" if it is vital to competitive viability and competitors cannot effectively compete in the relevant market without access to it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] Monopolies & Monopolization, Actual Monopolization

Reasonable and timely access to critical business information that is necessary to compete is an essential facility.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] Monopolies & Monopolization, Actual Monopolization

Power gained through some natural and legal advantage such as a patent, copyright, or business acumen can give rise to liability if a seller exploits his dominant position in one market to expand his empire into the next. Unlawful monopoly leveraging occurs where a firm uses its market power in one market to gain competitive advantage in another market other than by competitive means. The use of monopoly power attained in one market to gain a competitive advantage in another is a violation of *§ 2* of the Sherman Anti-Trust Act, codified at *15 U.S.C.S. § 2*, even if there has not been an attempt to monopolize the second market.

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] Antitrust & Trade Law, Sherman Act

The requirements for liability under a monopoly leveraging claim include monopoly power in one market; the use of that power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor in another market; and injury caused by the challenged conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Reciprocal Dealing

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] Monopolies & Monopolization, Actual Monopolization

Coercive reciprocity refers to the practice of using economic leverage in one market coercively to secure competitive advantage in another. Coercive reciprocity presupposes the existence of economic leverage in one market to gain an unfair advantage in another. Coercive reciprocity is a per se violation of the antitrust laws because of its pernicious effect and economic similarity to illegal tying cases.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

Antitrust & Trade Law > Sherman Act > General Overview

Patent Law > Infringement Actions > Exclusive Rights > General Overview

HN17[] **Ownership & Transfer of Rights, Licenses**

Patent rights do not confer an absolute immunity from antitrust claims. Unlawful exclusionary conduct can include a monopolist's unilateral refusal to license a patent or copyright or to sell a patented or copyrighted work. A monopolist cannot use the pretext of protecting intellectual property in order to violate the antitrust laws. Neither the aims of intellectual property law nor the antitrust laws justify allowing a monopolist to rely upon a pretextual business justification to mask anticompetitive conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN18[] **Monopolies & Monopolization, Actual Monopolization**

Contracts used as part of an anticompetitive scheme are unlawful under the antitrust laws. The policies expressed in the federal antitrust laws will override any agreement in contravention of those policies, regardless of the agreement's legality under private contract law.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN19[] **Sherman Act, Claims**

Section 1 of the Sherman Anti-Trust Act, codified at *15 U.S.C.S. § 1*, provides that every contract, combination or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal. In order to prevail on a *§ 1* claim a party must prove: (1) an agreement to enter a conspiracy; (2) designed to achieve an unlawful objective; and, (3) actual unlawful effects or facts which radiate a potential for future harm to competition. The plaintiff is not required to show that a defendant's conspiracy under *§ 1* has a dangerous probability of successfully achieving its objectives. It is not necessary for a plaintiff to provide evidence of actual, present competition to show a violation of *§ 1* so long as it shows that the potential for competition exists.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Sherman Act > General Overview

HN20[] **Monopolies & Monopolization, Actual Monopolization**

A plaintiff need not prove an intent on the part of the co-conspirators to restrain trade or to build a monopoly so long as the purported conspiracy has an anticompetitive effect, the plaintiff has made out a case under *§ 1* of the Sherman Anti-Trust Act, codified at *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN21[] **Remedies, Injunctions**

Section 16 of the Clayton Act, codified at *15 U.S.C.S. § 16* specifically provides for preliminary injunctive relief for threatened ***antitrust law*** violations, whereby any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief against threatened loss or damage by a violation of the antitrust laws. *Section 16* requires a showing only of threatened loss or damage. The legislative history of *§ 16* clearly shows a strong congressional policy supporting preliminary injunction because an antitrust plaintiff does not have to wait to be ruined in his business before he has his remedy.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN22[] **Injunctions, Preliminary & Temporary Injunctions**

Courts have granted preliminary injunctions when there is a serious antitrust issue, serious harm to an antitrust plaintiff and little or no harm to defendant.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN23[] **Antitrust & Trade Law, Sherman Act**

Courts often grant mandatory injunctions when necessary to remedy an antitrust violation. District courts are invested with large discretion to model their judgments to fit the exigencies of the particular case.

Contracts Law > Defenses > Unconscionability > General Overview

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > General Overview

HN27[] **Contract Terms, Unconscionable Terms**

While unconscionability is not defined by the code or the comments, the commentary to *Ala. Code § 7-2-302* (1975), describes the basic test as whether, in light of the general commercial background and the commercial needs of the particular trade or the case, the clauses involved are so one-sided as to be unconscionable under the circumstances existing at the time of the making of the contract.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > General Overview

Contracts Law > Defenses > Unconscionability > General Overview

HN28[] **Jury Trials, Province of Court & Jury**

The determination of unconscionability is a question of law, to be determined by the court with each case decided on its own facts. Alabama courts have identified four factors to be considered in determining whether a contract is unconscionable: (1) whether there was an absence of meaningful choice on one party's part, (2) whether the contractual terms unreasonably favor one party, (3) whether there was unequal bargaining power among the parties, and (4) whether there were oppressive, one-sided, or patently unfair terms in the contract. While unconscionability cases most often arise in the consumer context, the principle applies with equal force in the commercial field.

Energy & Utilities Law > Oil, Gas & Mineral Interests > Purchase Contracts > Uniform Commercial Code

HN29[] **Standards of Performance, Discharge & Termination**

The Uniform Commercial Code deals with the subject of unconscionability when one party to a commercial agreement seeks to exercise its claimed rights under an automatic termination clause, and where no advance notice to the other party is required under the clause. *Ala. Code § 7-2-309(3)*, focuses on contract termination, and provides that an agreement dispensing with notification of termination is invalid if its operation would be unconscionable. *Ala. Code § 7-2-309(3)*, *Cal. Com. Code § 2309*. The commentary to this provision directs attention to the "results" of exercising such power: An agreement dispensing with notification or limiting the time for the seeking of a substitute arrangement is, of course, valid under this subsection unless the results of putting it into operation would be the creation of an unconscionable state of affairs.

Commercial Law (UCC) > ... > Contract Terms > Gap Filler Provisions > General Overview
