Because this is not a typical bundling case, Comcast's and the partial dissent's reliance on *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171 (9th Cir. 2016)*, is misplaced. In that case, the plaintiff purchased Honeywell's replacement parts and then "bundle[d] parts and repairs in an effort to woo" the ultimate airline customers, in part reselling defendant's products. *Id. at 1176*. Moreover, Aerotec presented no evidence that Honeywell "explicitly or implicitly" tied or conditioned the sale of the tying product of parts to the ultimate airline customers' purchase of the tied product of maintenance. *Id. at 1179*. The court found compelling that "Honeywell **[**97]** allows airlines to purchase parts and services in separate transactions from whichever supplier they please." *Id.* But Viamedia is not

[17] The partial dissent insists that that there was no conditioning and that "RCN and WOW! maintained the ability to deal directly with Comcast and access the Interconnect without any ad representative should they choose not to employ Comcast." Post at 118-19 This is wrong as a matter of fact. As described above, every party involved—Comcast, RCN, and WOW!—understood that RCN and WOW! would be unable to access the Interconnects unless they hired Comcast to provide ad rep services. Even though its reasoning relies on the possibility that RCN and WOW! could access the Interconnects without Viamedia or Comcast, the partial dissent points to no evidence supporting that possibility. The record contains evidence of the opposite: RCN and WOW! needed to employ an ad rep services provider, and once Comcast refused to deal through their chosen intermediary, they had no practical choice but to obtain ad rep services from Comcast. As described above, substantial evidence shows that both RCN and WOW! understood themselves to be forced by Comcast into purchasing its ad rep services. A215 n.81. We cannot affirm summary judgment by overlooking that evidence about the realities of the parties' dealings and the economic realities of the market.

a bundler. It has presented substantial evidence of an explicit tie, and its former customers could not separately obtain Interconnect access.

There are other fundamental differences between the product offered in *Aerotec* and the one offered here. Honeywell sold airplane parts and repair services. Comcast, by contrast, operates a platform that is necessarily cooperative. RCN and WOW! are not just potential customers of Comcast as the airlines were potential customers of Honeywell. They are also Comcast's rivals in the retail cable market. Because self-providing ad rep services was not a viable option for RCN and WOW!, refusing to deal with their chosen intermediary had the effect of forcing them into much less desirable direct relationships with Comcast, their monopolist-competitor. Viamedia has presented evidence that the **[*472]** MVPDs were reluctant to be forced into their more powerful rivals' arms. A886-87. There was no evidence in *Aerotec* that the airlines felt similarly threatened, that providing repairs in-house was economically infeasible, or that the **[**98]** airlines viewed Honeywell as a necessary intermediary.

Comcast's reliance on *It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676 (4th Cir. 2016)*, is even further off-base. That case involved "a world of robust market competition where [the ultimate customers] were free to take a package deal of promotion and venues, free to purchase those products separately, free to turn down both, and where they in fact exercised all those options to their advantage." *Id. at 687*. That does not bear even a passing resemblance to the markets here.

The district court's holding that Viamedia failed to offer evidence of forcing was premised on three assumptions: first, that the refusal-to-deal claim was correctly dismissed; second, that Viamedia acted as a reseller of Interconnect services rather than as the MVPD's agent for Interconnect access; and third, that RCN and WOW! could have purchased Interconnect-only access separately. Viewing the record as a whole, as we must, we disagree. We address each assumption in turn.

First, the district court acknowledged Viamedia's evidence that Interconnect access was conditioned on the purchase of Comcast's ad rep services. Yet the court discounted this evidence because such a condition could be explained by Comcast's "legal refusal to deal" **[**99]** rather than "an illegal tying." *335 F. Supp. 3d at 1061*. This analysis fails on its own terms. As described above, Viamedia alleged a *prima facie* refusal-to-deal claim. Such potentially illegal conduct cannot justify Comcast's related tying of Interconnect services to ad rep services, and more fundamentally, a tying claim does not fail as a matter of law simply because it was implemented by refusing to deal with an intermediary.

Second, the district court conflated access to the cooperative Interconnects, formerly granted uniformly to competing MVPDs or their ad rep services agents, with the Interconnect services themselves. The district court's conclusion that the MVPDs wanted a single entity to "make available to them both Interconnect Services and Ad Rep Services" is simply wrong as a matter of fact. Before Comcast excluded Viamedia, RCN and WOW! received Interconnect services from Comcast and ad rep services *separately* from Viamedia. The district court misunderstood Viamedia to be a reseller of Interconnect services as part of a bundle that included ad rep services, and concluded there was no impermissible tying simply because Viamedia "could not offer that bundle" any longer due to Comcast's (supposedly) **[**100]** legal refusal to deal with Viamedia. *335 F. Supp. 3d at 1058 n.12*. That characterization does not have a factual basis in the record, and it is certainly not beyond reasonable factual dispute. Even Comcast characterized Viamedia not as a reseller of Interconnect services but as a reseller of MVPD spot avails to the Interconnect operator. DA638. Comcast's characterization of ad rep services—including its own ad rep services provided to customer/competitor MVPDs—as reselling spot avails and disconnected from its MVPDs customers' best interests is troubling in its own right, but we return to that below. Neither the district court's nor Comcast's characterization of Viamedia's role was accurate.

As an ad rep services provider, Viamedia acted in the best interests of its MVPD customers and served as their agent or interface with the Comcast-controlled Interconnects for the one-third of MVPD spot avails that they sold cooperatively— **[*473]** not competitively—on a regional, DMA-wide basis. The district court acknowledged as much elsewhere in its opinion, explaining that MVPDs view "themselves as receiving Interconnect Services from interconnect operators (like Comcast) even when they have hired an unaffiliated Ad Rep (like Viamedia) on **[**101]** a full-turnkey basis." *335 F. Supp. 3d at 1058 n.10*. We agree with the district court's latter characterization.

Third, in considering the summary judgment evidence, the district court drew inferences in favor of Comcast in concluding that RCN's and WOW!'s purchases of Interconnect services and ad rep services from Comcast were not forced. It did not credit RCN's and WOW!'s reasonable understanding that Comcast was tying Interconnect services to ad rep services. The court (1) read Comcast's statements as more ambiguous than they actually were; (2) concluded that, because the MVPDs ultimately purchased Comcast's ad rep services, they must have wanted both services to be provided by Comcast; and (3) pointed to out-of-market evidence to infer that Comcast would have offered an Interconnect-only deal if only RCN and WOW! had asked for one. This analysis departed from summary judgment standards in several respects.

Even if Comcast's statements had been ambiguous, a plaintiff does not need an express, written declaration of a proposed tying arrangement. A sale on the announced or implied condition that the buyer purchase the tied goods from the seller ordinarily satisfies the tying-agreement requirement. Areeda & Hovenkamp ¶ 1754b-c, at 315-20 **[**102]** . Although it is not enough for the services to be merely complementary, a seller is not immunized from a tying claim if there is a factual dispute as to whether the buyer wished to purchase the tied service (here ad rep services) from the defendant with market power in the tying service market (here Interconnect services). The MVPDs' ultimate decisions, after much financial pain, to sign with Comcast for ad rep services do not disprove an illegal tie. (And notably, in Hartford, Frontier has continued to resist signing with Comcast for ad rep services and remains cut off from the Interconnects.) After all, "the great majority of tying and exclusive-dealing provisions that exclude rivals are engaged in by one market-dominating party and one party that is 'innocent' in the sense that it cannot profit from monopoly in the market, but is agreeing to the exclusivity only at the behest of the other party." Areeda & Hovenkamp ¶ 1803a, at 107 n.5.

Finally, the district court incorrectly inferred from the fact that Comcast offers Interconnect-only access in other local markets that RCN and WOW! could have obtained Interconnect-only access if only they had asked. That reasoning **[**103]** denies the non-moving party the benefit of reasonable inferences from the evidence. It also overlooks the evidence showing that in-house provision of ad rep services simply was not a practical option for RCN or WOW! in these markets.

More specifically, the evidence from other markets actually supports Viamedia's case, not Comcast's defense. It is undisputed that competition takes place within metropolitan (DMA) markets. If an advertiser wishes to purchase advertising time in the Chicago DMA, buying a spot avail in New Orleans is not an adequate substitute. Similarly, if Comcast was not permitting RCN an Interconnect-only deal in Chicago, an Interconnect-only deal in Denver was not an adequate substitute. And we summarized above at pages 24-35 the evidence indicating that RCN and WOW! did *not* willingly agree to Comcast's terms.

[*474] The Interconnect-only arrangements that Comcast offered in other DMAs, where it did not have (or exercise) so much market power, help Viamedia. Those arrangements show that Interconnect and ad rep services are indeed separate products. They need not be sold together. At the same time, Comcast's willingness to offer Interconnect-only access in other DMAs may reflect **[**104]** that Comcast does not have an overlapping footprint—i.e., does not compete—in those markets. In contrast, the evidence could support a finding that in Chicago, Detroit, and Hartford, Comcast tied Interconnect services to ad rep services to exclude its competitor in ad rep services and thereby force its MVPD competitors into its not-so-tender arms. ***HN46***[] See Areeda & Hovenkamp ¶ 1744g, at 198-99 (explaining that bundling in non-competitive markets does not necessarily provide insight into whether a tie is efficient rather than reflective of increased market power exploitation, while unbundling in competitive markets likely reflects efficiencies). In drawing inferences in favor of the non-moving party, we must also recognize the possibility that Comcast was testing the waters in Chicago, Detroit, and Hartford with an eye toward expanding its tying demands to other markets if it is not held accountable.[18]

---

[18] The partial dissent incorrectly looks to arrangements in other geographic markets to draw conclusions about forcing in the relevant markets. Post at 132-33. The ad rep services and Interconnect markets are distinct for each DMA. Viamedia's tying

Outside of the district court's inconclusive comparison of other, more competitive markets, there was no basis in the record to support Comcast's speculation that if RCN and WOW! had just asked once more, Comcast would have abandoned its strategic plan and agreed to standalone Chicago and Detroit **[**105]** Interconnect access. To make such an inference, we would have to assume that the MVPDs went several years without access to the Interconnects, lost millions of dollars in advertising revenue, complained to Comcast and federal regulators, and then chose the ad rep services provider that they least preferred, all because of a mere misunderstanding. Comcast is free to offer this misunderstanding theory at trial, but the theory cannot support summary judgment. We reverse summary judgment for Comcast on Viamedia's tying claim.

C. *Section 2 Monopolization: Harms, Efficiencies, & Remedies*

Undisputed geographic markets, service markets, and market power make this case unusual. In addition, Viamedia has offered sufficient evidence to demonstrate *prima facie* claims for monopolization of the ad rep service markets in three DMAs through refusal to deal and tying. Comcast's actions also forced a new, intimate, and unwelcome relationship upon its smaller MVPD competitors. If credited, that evidence will shift to Comcast the burden to prove what would need to be some dazzling procompetitive benefits to justify its conduct. We set out below considerations for the district court to consider in the rule of reason **[**106]** analysis it will have to conduct on remand.

1. *Harm to Competition*

The potential harm in this case from Comcast's refusal to deal and tying **[*475]** ripples outward. Prior to Comcast's conduct, there was competition in three related markets: (1) between Comcast and other MVPDs for subscribers; (2) between Viamedia and Comcast in ad rep services; and (3) between Comcast and other MVPDs for the sale of spot avails in the local DMA market. By forcing out its only competitor in the market for ad rep services and forcing its MVPD competitors to turn over 100% of their spot avails, Comcast eliminated competition in the market for ad rep services and the market for the sale of local spot avails. At the same time, it gained the ability to impair competition in the market for MVPD subscribers. These harms to competition are prototypical antitrust harms.

a. *Ad Rep Services*

The ad rep services market went from two service providers to a single, monopolist provider. With no other ad rep services providers, the elimination of Viamedia unquestionably harmed competition. The harms that typically flow from a competitive market shifting to total control by a monopolist include potentially higher prices, lower output, **[**107]** and reduced innovation. The market at issue here may not have had time to show ultimate effects from total foreclosure. But Comcast is forthright about the fact that it has refused to allow Viamedia entry into other DMAs. Appellees' Br. at 35-36. The DMAs that have never had a competitive ad rep services market may provide useful comparison points to the relevant DMAs here, which are still governed by contracts that were signed while Viamedia was still trying to compete with Comcast.

b. *The MVPD Market: MVPDs, Advertisers, Cable Subscribers*

Recall that the MVPDs faced three possible scenarios when Comcast refused to deal with Viamedia and then conditioned the MVPDs' access to the Interconnects on the MVPDs turning over all of their spot avails to Comcast's ad rep services arm. Above at pages 31-35. Each scenario entailed its own potential harm to competition.

The MVPDs elected the first scenario, giving in to Comcast and signing up for its ad rep services. To summarize, this arrangement has resulted in:

- Comcast's smaller MVPD rivals contributing additional revenue toward their dominant competitor;

---

allegations and evidence focused on Comcast's conduct in Chicago, Detroit, and Hartford. The fact that Comcast did not simultaneously monopolize or attempt to monopolize ad rep services in other geographic markets is not a defense to its monopolization of Chicago, Detroit, and Hartford. The dissent's only support for its novel market-aggregating approach comes from a calculation of profit sacrifice in *Novell, 731 F.3d at 1077*, which has nothing to do with market definition or tying. See post at 133.

• MVPDs turning over to Comcast the majority of spot avails they had formerly kept out of the Interconnects, **[**108]** a large portion of which are allocated to local ads (for which the MVPDs formerly competed against each other);
• RCN and WOW! being forced to trust that their dominant, incumbent cable rival Comcast will make ad sales decisions in the smaller competitors' best interests, despite Comcast's divided loyalties—as it is more profitable for Comcast to place ads in ways that are different from how RCN and WOW! might allocate them;
• Comcast gaining access to its competitor MVPDs' competitively sensitive information, including number and location of subscribers, ad sales, promotional ad materials to current and potential subscribers (including promotions trying to get customers to switch away from Comcast);

• And it is not just the MVPDs that have been harmed. Comcast is now the only seller of spot avails in the local market. As Viamedia's counsel noted at oral argument, local advertisers used to have several outlets to **[*476]** choose among at various price points when buying spot avails. Comcast is now their only-stop-shop, as well.

And recall that this was the MVPDs' *least-bad* choice—the one they chose when Comcast denied them their best option. Comcast and the district court hypothesized that Comcast **[**109]** was not actually barring competing MVPDs completely from Interconnect access. The hypothesis was instead that Comcast would have permitted the MVPDs to have Interconnect-only access without using either Viamedia's or Comcast's ad rep services. In this scenario, Comcast would lose ad rep services revenue, but would not lose millions from forgoing Interconnect access fees and from its own spot avails being less valuable when placed through a degraded Interconnect.

But contrary to what the district court seemed to assume, this result still would have been harmful. Forcing RCN and WOW! to forsake the benefits they had gained by outsourcing ad sales to an independent Viamedia would have dramatically raised their costs. RCN and WOW! would have needed to hire staff, purchase technology, and pay for services that Viamedia had previously provided at lower cost. Those fixed costs would have been difficult for those MVPDs to afford, as shown by the fact that the option was always available in theory, and they never took it, and as shown by RCN's filing with the FCC and WOW!'s internal emails. A215 n.81.

In the other possible scenario, RCN and WOW! could continue working with Viamedia for ad rep **[**110]** services, but Comcast would continue barring them from the cooperative Interconnects. If the MVPD competitors had made that choice, they would have remained cut off from a large percentage of their advertising revenue.

Any loss of revenue or higher costs from these scenarios is not just a loss for competitors. It leads to a negative feedback loop in the market in which the MVPDs compete for cable subscribers, further harming competition. Higher costs and less advertising revenue lead to fewer promotional offers to subscribers and reduced expansion. See *FCC 2007 Report and Order, 22 FCC Rcd 5101 at 5108* ("Revenues from cable services are, in fact, a driver for broadband deployment," i.e., the build-out of additional cable infrastructure). This in turn hampers RCN and WOW! from obtaining new cable subscribers or retaining the subscribers they already have (who may switch to Comcast). With a weakened RCN and WOW!, Comcast benefits further by not needing to offer the promotions it otherwise would have if it faced a more vibrant RCN or WOW!

To the extent that cable subscribers are left with higher priced and lower quality services and competition has been eliminated in the market for the sale of local spot **[**111]** avails, a trier of fact would have to account for that additional anticompetitive harm.

c. *Back to the Interconnects*

Comcast's conduct also turned a previously procompetitive platform into a weapon to decrease competition in related markets. As originally conceived and implemented, the Interconnects appear to have been comfortably on the "reasonable" side of a rule of reason analysis for such cooperative ventures among competitors. See generally *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. Comcast has described the Interconnects in these procompetitive terms, as a "collection of two or more cable TV systems that work together to distribute commercials to a wider geographic area than a single system would otherwise reach, giving advertisers the option to **[*477]** reach all cable households within a market with one buy." First Am. Cplt. ¶ 156. Consistent with that description, Comcast itself has told the FCC that "the revenue share in an interconnect is often the same for all participants, and fairly standardized across interconnects." Opposition to Petitions to Deny and Response to Comments at 279 n.883, *In the Matter of Applications of Comcast Corp., Time Warner Cable Inc., et al. for Consent to Assign or Transfer Control of Licenses and Authorizations*, FCC MB Docket 14-57 (Sept. 23, 2014) (Comcast 2014 FCC Response) **[**112]** . Which is as it should be if this cooperative mechanism is procompetitive rather than a weapon to inflict anticompetitive harm.

In congressional hearings on its proposed merger with TimeWarner Cable, Comcast highlighted the non-exclusionary nature of the Interconnects. A Comcast executive was sent to testify to a congressional committee about the proposed purchase. Much of the concern focused on the potential power of a combined Comcast/TimeWarner Cable to harm other content providers who relied on access to cable companies' "pipes" into the home (e.g., Netflix, YouTube). One Representative, however, asked about Comcast's actions with the Interconnects it controlled.

Comcast executive vice president David Cohen was asked to "provide assurances that Comcast will not exclude competitors or advertising firms from the advertising interconnects that Comcast operates." Cohen replied, "We are not in the business of excluding businesses who want to buy advertising from us." Cohen was again pressed: "So your short answer is that you are not going to exclude competitors or advertising ... [f]rom the interconnects." **[**113]** "Correct." According to Viamedia's evidence, however, Comcast was in the midst of doing just what Cohen was denying.[19]

In this lawsuit, moreover, Comcast now argues that its control over the cooperative Interconnects is the *source* of its competitive advantage. If that were correct, it would call into question the legality of the Interconnects themselves. ***HN47***[] ***Antitrust law*** is rightly skeptical of mechanisms that permit competitors jointly to set prices and other terms of dealing. Collaboration between actual or potential competitors "can be rife with opportunities for anticompetitive activity." *American Society of Mech. Engineers, Inc. v. Hydrolevel Corp., 456 U.S. 556, 571, 102 S. Ct. 1935, 72 L. Ed. 2d 330 (1982)*.

Based on Comcast's portrayal and use of the Interconnects in this suit, such skepticism is now warranted. The government antitrust enforcement agencies provide guidance on competitor collaborations. A number of the factors that show anticompetitive effect appear to be met by the Interconnects *as now portrayed by Comcast*. ***HN48***[] The factors include whether the collaboration may:

- "[L]imit independent decision making or combine the control of or financial **[**114]** interests in production, key assets, or decisions regarding price, **[*478]** output, or other competitively sensitive variables;"
- "[O]therwise reduce the participants' ability or incentive to compete independently;"
- Potentially "facilitate[] explicit or tacit collusion through facilitating practices such as the exchange or disclosure of competitively sensitive information or through increased market concentration;"
- "Successfully eliminate[] procompetitive pre-col-laboration conduct, such as withholding services that were desired by consumers when offered in a competitive market."

Federal Trade Commission and United States Department of Justice, *Antitrust Guidelines for Collaborations Among Competitors* § 2.2, at 6, § 3.31, at 12 (April 2000) (Collaboration Guidelines). Check, check, check, and check.

These red flags were not raised by the truly cooperative original concept of the Interconnects. Having taken control of at least some Interconnects, though, Comcast now has the ability—and now even claims the *right*—to use the mechanism as a *source of its competitive advantage over rivals*, distorting competition in related markets. The use

---

[19] Comcast abandoned the Time/Warner transaction after investigations by federal enforcement and regulatory agencies. The government's "significant concerns" about the merger were focused on the likelihood that it "would make Comcast an unavoidable gatekeeper for Internet-based services that rely on a broadband connection to reach consumers." DOJ Press Release, *Comcast Corporation Abandons Proposed Acquisition of Time Warner Cable After Justice Department and Federal Communications Commission Informed Parties of Concerns* (Apr. 24, 2015), at http://www.justice.gov/opa/pr/comcast-corporation-abandons-proposed-acquisition-time-warner-cable-after-justice-department (last visited on Feb. 21, 2020).

of the Interconnects to take control of and set prices for competitors' **[**115]** local ads does not appear related to accomplishing the Interconnects' procompetitive goals. These facts weigh against Comcast, not for it.

2. *Procompetitive Justifications*?

HN49[] The potential harms stemming from Comcast's conduct will not lead to *Section 2* liability if Comcast proves that its monopoly in ad rep services "is a consequence of a superior product, business acumen, or historic accident," or if its conduct was the result of, or necessary to achieve, much greater procompetitive benefits. *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; see also Areeda & Hovenkamp ¶ 650c, at 94-95. The procompetitive benefits typically recognized in ***antitrust law*** include evidence of "higher output, improved product quality, energetic market penetration, successful research and development, cost-reducing innovations, and the like." Areeda & Hovenkamp ¶ 651d, at 119.[20] As this issue must also be decided by a trier of fact on remand, we offer some observations.

a. *The Interconnects*

We start with Comcast's monopoly control over the Interconnects in Chicago, Detroit, and Hartford, which Comcast has identified as the source of its competitive advantage that permitted it, in turn, to gain monopoly control over ad rep services. It appears that the **[**116]** only skill and foresight demonstrated by Comcast in obtaining monopoly control over the Interconnects was its ability to acquire a multitude of other cable MVPD providers without facing a challenge from government antitrust enforcers. Comcast's acquisitions are not in and of themselves **[*479]** evidence of superior skills, services, or accident.

What Comcast now identifies as a source of competitive advantage was produced by the kind of mergers that the agency Merger Guidelines describe as anticompetitive. ***HN51***[] The Guidelines identify as their "unifying theme" the proposition that "mergers should not be permitted to create, enhance, or entrench market power or facilitate its exercise" by "enhancing [a firm's] market power." § 1, at 2. One example of an anticompetitive merger is directly on point:

> Merging Firms A and B operate in a market in which network effects are significant, implying that any firm's product is significantly more valuable if it commands a large market share or if it is interconnected with others that in aggregate command such a share. Prior to the merger, they and their rivals voluntarily interconnect with one another. The merger would create an entity with a large enough share that **[**117]** *a strategy of ending voluntary interconnection would have a dangerous probability of creating monopoly power in this market*. The interests of rivals and consumers would be broadly aligned in preventing such a merger.

Merger Guidelines § 2, at 6 (emphasis added). Comcast cannot now justify exclusionary conduct by pointing to control over the Interconnects, which was acquired through mergers that themselves may have been anticompetitive *precisely because of the risk that they could enable Comcast's exclusionary conduct*.

b. *The Ad Rep Services Market*

Comcast's new monopoly position in the ad rep services markets in Chicago, Detroit, and Hartford, if we draw reasonable inferences in favor of Viamedia, is a result not of its superior services but of its exclusionary conduct. Any claimed benefits from that conduct must be procompetitive and not simply the result of eliminating competition. For example, if Comcast has reduced advertising, promotions, or other incentives that it previously offered to customers or local retailers when competing with Viamedia, those savings would represent harm to competition. See *Covad Communications Co. v. Bell Atlantic Corp., 398 F.3d 666, 674, 365 U.S. App. D.C. 78 (D.C. Cir. 2005)*, citing Bork, *Antitrust Paradox* at 314. Similarly, any savings gained by forgoing investments in research and **[**118]**

---

[20] ***HN50***[] "As a general matter, the evidence supporting a prima facie case need not be as specific as the evidence supporting a procompetitive justification" because "[i]f the defendants have a procompetitive justification, it must have been a motivating factor for the restraint, and the defendants should be able to establish it rather easily." Herbert J. Hovenkamp, *The Rule of Reason*, *70 Fla. L. Rev. 81, 107 (2018)*; see also *id. at 110* ("To the extent that the defendants' expectation of profit came from something other than a restriction of competition, they should have evidence and are in the best position to provide it.").

development, infrastructure, or sales personnel, that otherwise would have been made under competitive conditions are properly categorized as harm to competition, not benefits. HN52[] Finally, any defense premised upon the proposition that competition itself is inefficient, unreasonable, or confusing is not cognizable. See *National Society of Professional of Engineers v. United States, 435 U.S. 679, 696, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.

Viewing the facts in the light most reasonably favorable to Viamedia, Comcast's procompetitive justifications seem to fall into this latter category. If Comcast could offer improved efficiencies by offering ad rep services and Interconnect services together to MVPDs, it was always free to do so. If this were the case, it could have passed on some of those savings to MVPD customers and possibly outcompeted Viamedia. Refusing to deal with the MVPD's representative of choice appears to be an attempt to avoid competition on the merits in the markets for ad rep services.

On the procompetitive side of the ledger, evidence of reduced pricing could offset harm—although current contracts may not yet reflect ultimate post-competition pricing. They were signed when Comcast was still bidding against Viamedia. HN53[] And while **[*480]** protection against free-riding is generally recognized as a procompetitive **[**119]** goal, "[w]hen payment is possible, free-riding is not a problem because the 'ride' is not free." *Chicago Prof'l Sports Ltd. Partnership v. NBA, 961 F.2d 667, 675 (7th Cir. 1992)*; see also Hovenkamp, *The Rule of Reason*, *70 Fla. L. Rev. at 111, 113* ("Often instances of claimed free riding are really complaints about competition, particularly when there are joint costs," and "complete market exclusion is a suspiciously excessive remedy for claimed free riding, even where a certain amount of free riding actually occurs."). If Comcast has evidence of truly procompetitive benefits, it should submit that evidence to the trier of fact. But the hypotheses it has offered thus far do not entitle it to summary judgment.

3. *Remedies*

Comcast's final defense focuses on the challenge of remedying its conduct. HN54[] After all, Comcast points out, "Courts are ill suited 'to act as central planners, identifying the proper price, quantity, and other terms of dealing.'" *Pacific Bell Telephone Co. v. Linkline Communications, Inc., 555 U.S. 438, 452, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*, quoting *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Call this the "So what?" defense.

HN55[] We agree that a court should not "impose a duty to deal that it cannot explain or adequately and reasonably supervise." *Linkline, 555 U.S. at 452-53*, quoting *Trinko, 540 U.S. at 415*. Yet courts are often called upon to undertake complicated, long-term supervision of complex cases and remedies. The judiciary need not and should not adopt a posture of learned **[**120]** helplessness in the face of proven antitrust violations. For example, courts regularly preside over dozens, if not hundreds or even thousands, of related cases in multidistrict litigation that present complicated questions of liability, not to mention supervising and implementing remedies over years if not decades. See, e.g., *MDL 875 In re: Asbestos Products Liability Litigation* (No. VI) (overseeing thousands of asbestos cases, including class actions, since 1991). Courts oversee the bankruptcy process for companies with complicated corporate structures and far-flung assets, supervising sales of those assets worth hundreds of billions of dollars. See, e.g., *In re Lehman Brothers Holdings, Inc.*, Case No. 08-13555 (Bankr. S.D.N.Y.). And of course federal courts currently supervise at least 115,000 individuals on supervised release, implementing difficult-to-monitor and intrusive conditions limiting those individuals' jobs, the family and friends they can see, their drug and alcohol consumption, and locations to which they can travel, among others—all enforced through routine interviews of family and associates, electronic monitoring, drug tests, and random searches. Administrative Office **[**121]** of the United States Courts, *Overview of Probation and Supervised Release Conditions* 42-93 (Nov. 2016). In this antitrust case, we are not yet ready to cry "uncle" by affirming dismissal based on the unsubstantiated claim that this case poses "insoluble administrability problems."

In any event, this defense puts the cart before the horse. The trier of fact must first evaluate the evidence and determine whether Comcast's procompetitive justifications outweigh the anticompetitive harms from its conduct. If Comcast is found liable, the district court will then face a decision about appropriate remedies. That will be the time to face the practical problems Comcast hypothesizes.

The record thus far offers reasons to think the problems would be manageable. **[*481]** Comcast and Viamedia did business voluntarily, presumably on profitable terms for both. That history may well simplify the problems. ***HN56***[] As then-Judge Gorsuch wrote for the Tenth Circuit in *Novell*, evidence of that earlier course of dealing "helps address, at least to some degree, administrability concerns—presumably profitable terms already agreed to by the parties may suggest terms a court can use to fashion a remedial order without having **[**122]** to cook them up on its own." *731 F.3d at 1075*.

Moreover, Comcast itself told the FCC that this should not be an insoluble problem. It told the FCC that "the revenue share in an interconnect is often the same for all participants, and fairly standardized across interconnects." Comcast 2014 FCC Response at 279 n.883. Such comparison points (both within a given Interconnect and against other Interconnects in which Comcast sells or buys Interconnect-only access) may be used to establish a remedy that addresses pricing.

HN57[] That being said, "Antitrust courts normally avoid direct price administration, relying on rules and remedies ... that are easier to administer." *Linkline, 555 U.S. at 453*, quoting *Concord v. Boston Edison Co., 915 F.2d 17, 25 (1st Cir. 1990)* (Breyer, C.J.). If a pricing remedy proves too complicated, then structural remedies may be preferable. See, e.g., Areeda & Hovenkamp ¶ 600b, at 4 (even "[m]ildly reprehensible behavior might be enough to challenge a firm whose power is significant" and could justify imposing a more substantial remedy (e.g., "divestiture or dissolution" versus "an injunction")).

Comcast knows that courts are capable of overseeing structural and behavioral remedies (including ones that govern pricing disputes) that ameliorate competitive concerns. It agreed **[**123]** to such an arrangement as a condition for court approval of its challenged 2009 merger with NBC Universal. *United States v. Comcast Corp., 808 F. Supp. 2d 145, 147-48 (D.D.C. 2011)* (Comcast agreeing to certain remedies to prevent anticompetitive conduct post-merger). ***HN58***[] Such court-imposed and court-supervised remedies can also be imposed without a defendant's consent after a finding of liability. One obvious possibility would be to prohibit Comcast's control over Interconnects, which, in light of the evidence of misuse of that power to harm competition, raises serious problems under *Section 1* of the Sherman Act.[21]

D. *Antitrust Injury*

HN59[] A private civil plaintiff in an antitrust case must also establish "antitrust injury," which requires proof that its "claimed injuries are of the type the antitrust laws were intended to prevent and reflect the anticompetitive effect of either the violation or of anticompetitive acts made possible by the violation." *Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 716 (7th Cir. 2006)* (internal quotation marks and citations omitted). Viamedia has offered evidence of antitrust injury.

HN60[] When a monopolist creates a monopoly in the tied market, rivals are often excluded from the market, thereby losing market share or sales. "In such cases courts ordinarily grant standing to the excluded **[*482]** or impeded rival." Areeda & Hovenkamp ¶ 1767a, at 449 **[**124]** ; see also *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 490 n.14, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* ("[C]ompetitors may be able to prove injury before they actually are driven from the market and competition is thereby lessened. Of course, the case for relief will be strongest where competition has been diminished."). We have also often recognized that competitors suffer antitrust injury when they are forced from the market by exclusionary conduct. See, e.g., *Tri-Gen Inc. v. Int'l Union of Operating Engineers, Local 150, AFL-CIO, 433 F.3d 1024, 1032 (7th Cir. 2006)* ("[T]his Court has recognized that competitors can bring an antitrust claim when they are excluded from the market and injured by defendants' actions."); *Serfecz v. Jewel Food Stores, 67 F.3d 591, 597 (7th Cir. 1995)* ("When the plaintiff's injury is linked to the injury inflicted upon the market, such as when consumers pay higher prices because of a market monopoly *or*

---

[21] An amicus brief filed in support of Comcast argued that any "relief for arbitrary refusals to deal should be left to the legislature." Brief for the Chamber of Commerce of the United States of America as Amicus Curiae in Support of Appellees at 25 (internal quotation marks omitted). The Chamber's argument that courts should not enforce *Section 2* in refusal-to-deal claims is a policy position—and not one with which we are free to agree.

when a competitor is forced out of the market, the compensation of the injured party promotes the designated purpose of the ***antitrust law***—the preservation of competition.") (emphasis added). This rule is integral to an effective antitrust regime because "the foreclosed rival's injury is entirely independent of the amount or existence of any injury to buyers." Areeda & Hovenkamp ¶ 1767a, at 449.

HN61[] The general rule is that customers and competitors in the affected market have antitrust standing. **[**125]** See *Associated General Contractors, 459 U.S. at 539*; *McGarry & McGarry, LLC v. Bankruptcy Mgmt. Solutions, Inc., 937 F.3d 1056, 1065-66 (7th Cir. 2019)*, citing *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 158 (2d Cir. 2016)*, citing in turn *Serpa Corp. v. McWane, Inc., 199 F.3d 6, 10 (1st Cir. 1999)* ("Competitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs to allege antitrust injury."), and *SAS of P.R., Inc., v. P.R. Tel. Co., 48 F.3d 39, 45 (1st Cir. 1995)* ("competitors and consumers are favored plaintiffs in antitrust cases"). Viamedia is not seeking relief based on a theory that competition should have been *reduced*. Cf. *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. at 488* (rejecting claim for loss of income that would have been earned if other competitors had been forced out of the market and competition had thus been reduced). Instead, Viamedia seeks only an opportunity for fair competition in the ad rep services markets, based on the quality and prices of its services. It is an appropriate plaintiff to seek damages based on exclusionary conduct that forced it out of that market.

Viamedia claims that Comcast's exclusionary conduct drove it from the ad rep services markets in Chicago, Detroit, and Hartford, thus reducing competition. Viamedia has presented evidence indicating that if Comcast not tied its sale of Interconnect services to ad rep services, RCN and WOW! likely would have continued to obtain ad rep services from Viamedia. The harm to competition is particularly pronounced since Viamedia was **[**126]** Comcast's only competitor in in the relevant markets. To the extent that Comcast engaged in exclusionary conduct, the evidence indicates that the exclusionary conduct caused Viamedia's injuries by forcing it from the ad rep services markets.

The partial dissent expresses great skepticism toward rivals' antitrust suits and argues that Viamedia cannot show antitrust injury on its tying claim. As a general matter, caution is appropriate. The partial dissent goes astray, however, by contending it is "uncommon" for a "single **[*483]** foreclosed rival" to have standing in a tying case. Post at 122-23. The leading tying cases and the leading treatise's specific, on-point discussion of antitrust standing in tying cases teach otherwise.

The foundational tying cases of the past 40 years were brought by tied-market rivals. *Eastman Kodak, 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265*; *Jefferson Parish, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2*. The partial dissent cites no case law for its assertion that such cases are "uncommon." It also does not cite any case in which an excluded rival in the tied market was found to lack antitrust injury. In the single tying case cited in the partial dissent's discussion of antitrust injury, the plaintiff lacked antitrust injury precisely because she was *not* participating in the tied market when the **[**127]** tie was allegedly implemented. See *Kochert, 463 F.3d at 716*.

And where Areeda and Hovencamp address antitrust standing in tying cases, they recognize that standing is appropriate in cases like this. Viamedia was competing with Comcast in the tied market for ad rep services. It was forced out of that market in Chicago, Detroit, and Hartford. ***HN62***[] Areeda and Hovencamp explain:

> Rivals in that market [the tied market] may be "foreclosed" when their entry or expansion is impeded or they lose existing market share or sales. Consumers lose the benefits of any entry, expansion, competition, or innovation that independent rivals might have injected into the tied market. *In such cases courts ordinarily grant standing to the excluded or impeded rival*.

¶1767a, at 449-50 (emphasis added); accord, *Eastman Kodak, 504 U.S. at 479* (reversing summary judgment for defendant: market foreclosure in tied market resulting from illegal tying "is facially anticompetitive and exactly the harm that antitrust laws aim to prevent"). To the extent that the partial dissent suggests that the tying conduct at issue is not illegal or exclusionary, that goes to the merits, not to antitrust injury.

The partial dissent also suggests that Viamedia's injuries cannot establish antitrust **[**128]** injury because they are the same as those alleged from the refusal to deal. Post at 125. This point also reflects only disagreement on the merits of the tying claim and the confusion that has stemmed from the different treatment of the two claims in the district court. Because the same general course of conduct supports both the refusal-to-deal and tying claims, the two theories necessarily allege similar injuries and damages.

E. *Role of Expert Witnesses*

HN63[] The final issue is the admissibility of expert testimony. We review the district court's exclusion for an abuse of discretion. *Salgado v. General Motors Corp., 150 F.3d 735, 739 (7th Cir. 1998)*. If a discretionary ruling is based on an error of law, though, it can often be deemed an abuse of discretion. E.g., *Cooter & Gell v. Hartmarx Corp., 496 U.S. 384, 402, 110 S. Ct. 2447, 110 L. Ed. 2d 359 (1990)* (*Rule 11* sanctions); *Ervin v. OS Restaurant Services, Inc., 632 F.3d 971, 976 (7th Cir. 2011)* (class certification).

The district court struck Viamedia's expert testimony largely based on the view that Viamedia's claims should fail as a matter of law. We disagree with the district court's view of the law, so we reverse the court's rulings regarding Viamedia's expert witnesses.[22] We address separately **[*484]** the district court's ruling regarding a portion of Viamedia's expert economic witness, whom the court perceived as merely offering "lay" testimony, as well as an objection Comcast has raised **[**129]** on appeal that Viamedia failed to offer a causation expert, which Comcast believes should be fatal.

1. *Standard*

HN64[] Expert opinion testimony is admissible if "(a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case." *Fed. R. Evid. 702*. An expert's opinion may "overlap[] with the jurors' own experiences" or "cover matters that are within the average juror's comprehension," so long as the expert uses some kind of "specialized knowledge" to place the litigated events "into context." *Lawson v. Trowbridge, 153 F.3d 368, 376 (7th Cir. 1998)* (citations omitted); see also *United States v. Williams, 81 F.3d 1434, 1441 (7th Cir. 1996)* ("All you need to be an expert witness is a body of specialized knowledge that can be helpful to the jury.").

2. *Economic Expert Witness*

Viamedia offered Dr. Furchtgott-Roth as an expert witness on the economic rationales of Comcast's conduct and the competitive ramifications from such conduct. Setting aside the district court's ruling regarding Dr. Furchtgott-Roth's report based on the **[**130]** court's legal holdings, the court also excluded a portion of his testimony as offering only a lay impression of the market and Comcast's conduct.

Viamedia argues that Dr. Furchtgott-Roth's undisputed "specialized knowledge" would be helpful to a jury to place Comcast's conduct into context, and that there are some complex facts in this case, "including the economic incentives faced by a set of interrelated firms in the two-sided market for spot cable advertising," which are not "obvious to the layperson."

Dr. Furchtgott-Roth clearly drew conclusions through "expert assessment," not merely a lay interpretation of the evidence. While he did summarize and repeat some relevant facts, he drew significantly on expertise to "add something"—context and supporting information—to the record. Viamedia contends that its exclusion from the Interconnects furthered Comcast's tying policy. Dr Furchtgott-Roth's opinion that self-provision is not a viable business option for smaller MVPDs is an expert interpretation of evidence on a highly relevant factual point. So too

---

[22] Viamedia offered Dr. Lys as an expert on damages issues. The only basis for excluding his opinion was that he assumed that Comcast's conduct had violated the antitrust laws and thus caused Viamedia cognizable harm, and the court had concluded that Viamedia could not legally prevail on its antitrust claims. As we are reversing the district court's legal rulings, the court's exclusion of Dr. Lys' expert opinion must also be reversed.

is his opinion that Viamedia cannot make a competitive offer for ad rep services if Comcast conditions its competitor MVPDs' Interconnect **[**131]** access on forgoing Viamedia's services. He drew on his expertise to make these two determinations, both of which required analysis of market conditions. These opinions informed his broader opinion that Comcast's exclusion of Viamedia from the Interconnects was integral to its tying conduct. The district court therefore abused its discretion in concluding that Dr. Furchtgott-Roth's testimony was not significantly informed by his expertise. It was, and it therefore meets the requirement of *Federal Rule of Evidence 702(a)*.

3. *Lack of Expert Witness on Causation*

Comcast also argues that Viamedia's case must fail because it has not **[*485]** offered an expert on causation. ***HN65***[] Hiring another expert on causation is not a legal requirement for successfully bringing an antitrust case. Rather than requiring "*§ 2* liability [to] turn on a plaintiff's ability or inability to reconstruct the hypothetical marketplace absent a defendant's anticompetitive conduct," which "would only encourage monopolists to take more and earlier competitive action," courts have inferred causation when a defendant's conduct "reasonably appear[s] capable of making a significant contribution to ... maintaining monopoly power." *United States v. Microsoft Corp., 253 F.3d 34, 78-79, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc) (citation omitted). To the extent **[**132]** there may be an underlying problem of proof, "the defendant is made to suffer the uncertain consequences of its own undesirable conduct," and causation "queries go to questions of remedy, not liability." *Id. at 79-80* (citation omitted).

Conclusion

Viamedia alleged sufficiently, and at summary judgment offered sufficient evidence, that Comcast violated *Section 2* of the Sherman Act. Viewing the allegations and evidence in the light most favorable to Viamedia, Comcast abruptly terminated decade-long, profitable agreements and sacrificed short-term profits to obtain and entrench long-term market power, and used its monopoly power in Interconnect services market to force its MVPD competitors into a relationship that makes Comcast a gatekeeper of its competitors' advertising revenue. This conduct "reveal[s] a distinctly anticompetitive bent." *Trinko, 540 U.S. at 409*, discussing *Aspen Skiing, 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467*. Comcast is free to contest these issues at trial, as well as to try to prove and quantify any procompetitive justifications. The factual disputes in this case are numerous, genuine, and material. The judgment of the district court is REVERSED and the case is REMANDED for further proceedings consistent with this opinion.

Concur by: BRENNAN (In Part)

Dissent by: BRENNAN (In Part)

Dissent

BRENNAN **[**133]** , *Circuit Judge*, concurring in part and dissenting in part. The majority opinion is synoptic in its coverage, deeply researched, and meticulous in its consideration of the antitrust issues this case presents. It deserves much respect. While I agree Viamedia has plausibly alleged an antitrust violation and is entitled to reversal and remand on its refusal-to-deal claim, I would affirm summary judgment on its tying claim because the undisputed facts do not present evidence of an illegal tie. I also respectfully part company with my colleagues on some other issues the majority opinion tackles.

The last several decades have brought a new regime to ***antitrust law*** in the world of exclusionary conduct. Outdated monopolization doctrines have given way to a sharper and narrower understanding of what constitutes exclusionary behavior under *§ 2* of the Sherman Act, *15 U.S.C. § 2*. *See* *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1072 (10th Cir. 2013)*; *United States v. Microsoft Corp., 253 F.3d 34, 49, 346 U.S. App. D.C. 330 (D.C. Cir.*

2001). History teaches this new regime promotes competition and innovation in the marketplace, and it informs the resolution of the claims and defenses before us now.

I. Refusal to Deal

A 2003 agreement between Viamedia and Comcast granted Comcast the exclusive right to sell on its Chicago, Detroit, and Hartford Interconnects advertising **[**134]** availabilities that Viamedia purchased from multichannel video programming distributors ("MVPD") WOW! and RCN. Viamedia understood that, upon the agreement's **[*486]** expiration, Comcast had the right to solicit RCN's and WOW!'s advertising business directly. The agreement between Viamedia and Comcast expired May 31, 2012. The next day Comcast informed Viamedia of its intent not to renew their agreement and to seek RCN's and WOW!'s business directly.

Comcast "prefers to deal directly with MVPDs, rather than with intermediaries such as Viamedia, and has found substantial benefits from direct dealings." Appellee's Br. 11. When their contracts with Viamedia expired in 2015, RCN and WOW! contracted with Comcast to be their ad representative in Chicago and Detroit and sell their availabilities on its Interconnects. Up to that point, Viamedia's agreements with RCN and WOW! prevented them from dealing directly with Comcast.

Cut out of the deal, Viamedia sued Comcast for allegedly violating § 2 of the Sherman Act, claiming Comcast's decision to end Viamedia's access to the Interconnects lacked a valid business reason under *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. Specifically, Viamedia alleged Comcast's decision caused Comcast to forfeit fees **[**135]** upfront and reduced the economic value of the Interconnects. The allegations do not claim that Comcast's sacrificed profits later led to monopoly recoupment.

The district court dismissed Viamedia's refusal-to-deal claim. *Viamedia, Inc. v. Comcast Corp., 218 F. Supp. 3d 674 (N.D. Ill. 2016)*. The court found that Viamedia's own allegations admitted a valid business purpose for Comcast's refusal: removing an intermediary, Viamedia, to deal directly with MVPD customers.[1] *Id. at 698*. The court further found that Viamedia failed to allege or explain how Comcast's refusal to deal with it had "no rational procompetitive purpose." *Id.*

A. *The Refusal-to-Deal Claim Survives a Motion to Dismiss*.

We review the grant of a *Federal Rule of Civil Procedure 12(b)(6)* motion to dismiss de novo and ask whether there is "plausibility in the complaint." *Christy Sports, LLC v. Deer Valley Resort Co., 555 F.3d 1188, 1191 (10th Cir. 2009)* (citing *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 564, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*) (internal citations omitted); *see also* *Deppe v. NCAA, 893 F.3d 498, 500 (7th Cir. 2018)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Plausibility does not ask whether the allegations are likely true; the court must assume they are. Instead, the inquiry is "whether, if the allegations are true, it is plausible and not merely possible that the plaintiff is entitled to **[**136]** relief." *Christy Sports, 555 F.3d at 1191-92*. The plaintiff must plausibly allege more than "wholly conclusory statements" that a defendant violated § 2 of the Sherman Act to advance past the pleadings stage. *Id.*

In considering the alleged violation at the root of Viamedia's refusal-to-deal claim, we must be cognizant that "the antitrust laws rarely impose on firms—even dominant firms—a duty to deal with rivals." *Novell, 731 F.3d at 1066*; *see also* **[*487]** *Verizon Commc'ns v. Law Offices of Curtis V. Trinko, 540 U.S. 398, 411, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (holding even a monopolist has no duty to cooperate with rivals). "As a general rule purely

---

[1] This court has characterized this common business practice of vertical integration or disintermediation as pro-competitive and efficient. *See* *Jack Walters & Sons Corp. v. Morton Bldg., Inc., 737 F.2d 698, 710 (7th Cir. 1984)* (holding "vertical integration usually is procompetitive").

unilateral conduct does not run afoul of section 2—businesses are free to choose whether or not to do business with others and free to assign what prices they hope to secure for their own products." 731 F.3d at 1072. In the past, "some courts suggested that a monopolist must lend smaller rivals a helping hand," but today it is understood that forcing rivals to cooperate "usually leaves consumers paying more for less." *Id.; see also* Frank H. Easterbrook, *The Chicago School & Exclusionary Conduct*, 31 Harv. J.L. & Pub. Pol'y 439, 441-42 (2008) (antitrust themes incentivizing cooperation among firms largely "bit the dust in *Verizon v. Trinko*" and now "the main goal of antitrust is to compel firms to be rivals"); Olympia Equip. Leasing v. Western Union Telegraph, 797 F.2d 370, 375 (7th Cir. 1986) ("Today it is clear that a firm with lawful monopoly power has no general **[**137]** duty to help its competitors, whether by holding a price umbrella over their heads or by otherwise pulling its competitive punches.").

Despite this hesitancy to condemn refusals to deal, a monopolist's behavior violates § 2 if it is "irrational but for its anticompetitive effect." Novell, 731 F.3d at 1075; *see also* 3 Phillip E. Areeda & Herbert Hovenkamp, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION ¶ 651b3, p. 107 (4th ed. 2015) (monopolizing conduct is "irrational" if "only explanation that makes it seem profitable is destruction or discipline of rivals") (hereinafter Areeda & Hovenkamp, ***ANTITRUST LAW***); Trinko, 540 U.S. at 407 (defendant must be seeking "an anticompetitive end"); Aspen Skiing, 472 U.S. at 605 ("If a firm has been attempting to exclude rivals on some basis other than efficiency, it is fair to characterize its behavior as predatory.") (internal citations omitted); Christy Sports, 555 F.3d at 1194 ("in rare circumstances a refusal to cooperate with competitors might constitute a § 2 violation").

It is unclear—particularly on a motion to dismiss when a plausibly alleged violation is all that is required—whether conduct "irrational but for its anticompetitive effect" is to be treated the same as conduct with "no rational procompetitive purpose." *See* 218 F. Supp. 3d at 698. Although **[**138]** slight, there is a difference: the former provides an antitrust plaintiff the opportunity to argue that, despite some efficiency justification proffered by an antitrust defendant, the rational or intended goal of the conduct was its anticompetitive impact. The latter, in contrast, requires the antitrust defendant to put forward any evidence of some business reason for its conduct, regardless of potential anticompetitive effect. The district court applied the latter and found there was a rational procompetitive purpose because Comcast offered evidence of vertical integration and disintermediation—motives that I agree reflect lawful and procompetitive marketplace conduct.[2] But it did so by disregarding the plausibility of Viamedia's allegations of anticompetitive conduct and weighing the evidence in Comcast's favor. This is not the court's role on a Rule 12(b)(6) motion.

Any confusion here may stem from a misunderstanding of how to handle conflicting **[*488]** evidence of conduct in the allegations. If only one party advances evidence showing procompetitive or anticompetitive conduct, the court may find the lack of any opposing evidence shows either rationality or irrationality for § 2 purposes. *See* Novell, 731 F.3d at 1076 (on review **[**139]** of judgment as a matter of law, finding no evidence from which a reasonable jury could conclude monopolist's conduct was irrational); *see also* Aspen Skiing, 472 U.S. at 610 (on review of summary judgment, finding no evidence of efficiency justification for the refusal to deal). But even these instances are post-pleading. What of the parties who, at the pleading stage, proffer allegations of competing economic justifications for behavior? Are we to accept the defendant's proffered justification as conclusive of procompetitive rationality without considering the plaintiff's allegations of anticompetitive conduct? If so, can an antitrust plaintiff ever advance past the pleadings stage when a defendant asserts a procompetitive justification? The district court effectively held the plaintiff cannot, 218 F. Supp. 3d at 698, but this is up for debate. *See* 3 Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 651b3, pp. 106-07 (criticizing approach that relies on facts which "benefit the defendant very slightly while doing considerable harm to the rest of the economy;" "[n]ot all monopolizing conduct that we might wish to condemn is 'irrational'"); Microsoft Corp., 253 F.3d at 59 (defendant bears the burden of presenting a "nonpretextual claim" and proving procompetitive justification **[**140]** on the facts); Illinois ex rel. Burris v. Panhandle Eastern Pipe Line Co., 935 F.2d 1469, 1481-82 (7th Cir. 1991) (finding "the presence of a legitimate business justification *reduces the likelihood* that the conduct will produce undesirable effects on the competitive process"; "[w]hether valid business

[2] The majority opinion reviews vertical integration and disintermediation cases cited by Comcast and concludes they are inapposite here on the question of procompetitive conduct. *See* Majority op. at pp. 63-67. While it does not change my agreement with the majority to remand the refusal-to-deal claim, I do not reach this same conclusion.

reasons motivated a monopolist's conduct is a question of fact" for a fact-finder); Olympia, 797 F.2d at 378 (reasoning the lack of "a clear business justification" among conflicting evidence "*may indicate* probable anticompetitive effect" but is not conclusive). We need not settle this debate, though, as it does not impact the decision to remand.

As the majority opinion recognizes, "the calculation of procompetitive benefits net of anticompetitive harms does not easily lend itself to a *pleading* standard." Majority op. at p. 59. Viamedia alleged Comcast's conduct could achieve "no procompetitive justifications" because there were no "problems in allowing Viamedia to participate in Interconnects" on behalf of its MVPD customers. Viamedia's allegations show more than market power; they allege Comcast's exclusionary conduct was anticompetitive and harmful to the economic purpose of the Interconnects, *see* Christy Sports, 555 F.3d at 1192 (anticompetitive allegation must appear in the pleadings), specifically by denying Viamedia access to the **[**141]** Interconnects. Giving Viamedia the benefit of its allegations, its refusal-to-deal claim clears the Rule 12(b)(6) pleading bar because it plausibly alleges it was "excluded from the market and injured by defendant['s] actions," Tri-Gen Inc. v. Int'l Un. of Op. Eng's Local 150, 433 F.3d 1024, 1032 (7th Cir. 2006)—an alleged injury that "harms both competitors *and* competition," Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 118, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986). Down the road, the facts Viamedia has pleaded or other facts discovered may render its refusal-to-deal claim a candidate for summary disposition. *See* Collins v. Associated Pathologists, Ltd., 844 F.2d 473, 475 (7th Cir. 1988) (considering various antitrust claims: "the very nature of antitrust litigation encourages summary disposition of such cases when permissible"). But viewing the facts **[*489]** in a light favorable to Viamedia, its refusal-to-deal claim has not reached that point.

On a motion to dismiss, an antitrust plaintiff seeking § 2 damages must point to plausible allegations showing its rival's refusal to deal was irrational but for its anticompetitive effect. Regardless of how this court in the future resolves competing justifications at the dismissal stage, Viamedia has plausibly alleged refusal to deal in violation of § 2 and was entitled to advance that claim beyond the pleadings.

B. *The Refusal-to-Deal Claim Is Different than the Claim in* Aspen Skiing.

The majority opinion concludes **[**142]** this case is indistinguishable from Aspen Skiing, 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467. Majority op. at p. 54. I respectfully do not join the majority's conclusion that *Aspen Skiing* "maps onto Comcast's conduct," *id. at 44*, or that on a refusal-to-deal theory this case "appears stronger than *Aspen Skiing*." *Id. at 52*.

The familiar holding of *Aspen Skiing* is that the defendant's "failure to offer any efficiency justification whatever for its pattern of conduct" resulted in a § 2 violation. 472 U.S. at 608; *see also* Christy Sports, 555 F.3d at 1197 (finding the "critical fact in *Aspen Skiing* was that there were no valid business reasons for the refusal" to deal). Its holding is specific: the defendant could not justify either its insistence on breaking up the joint lift pass or its refusal to sell the other owner its passes for the same value just to keep the pass together. 472 U.S. at 603. There was no efficiency reason offered for the defendant's conduct; the only apparent purpose was to eliminate competition. *Id. at 608*. The Supreme Court later explained that this conduct constituted a violation because the "unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." Trinko, 540 U.S. at 409. The defendant's "unwillingness to renew **[**143]** the ticket even if compensated at retail price revealed a distinctly anticompetitive bent." *Id; see also* Goldwasser v. Ameritech Corp., 222 F.3d 390, 398 (7th Cir. 2000) (explaining the decision "to forgo cash revenues and efficient methods of doing business for the sole purpose of driving its rival out of the market" is a § 2 violation).

The application of *Aspen Skiing*'s holding has been the subject of substantial debate. Albeit a seminal antitrust opinion, *Aspen Skiing* is recognized as a factual and legal exception under current ***antitrust law***. *See* Trinko, 540 U.S. at 409 ("*Aspen Skiing* is at or near the outer boundary of § 2 liability."). Today, it fits within the "narrow world of refusal to deal cases."[3] *Novell, 731 F.3d at 1079*; *see* Easterbrook, *The Chicago School & Exclusionary Conduct, at 441-42* (describing the Court's holding in *Aspen Skiing* as "the last gasp of the old school of antitrust").

Not all refusal-to-deal challenges fall within the "limited exception" of *Aspen Skiing*. *Novell, 731 F.3d at 1074-75*. To invoke that exception, there must be a preexisting, voluntary, and presumably profitable course of dealing between a monopolist **[*490]** and a rival, and the discontinuation of that dealing must reveal irrational willingness to forsake short-term profits to achieve an anti-competitive end. *Id.* Evidence of forsaking short-term profits may "isolate conduct that has *no* possible efficiency **[**144]** justification." *Id. at 1077*. When considering sacrificed profits, though, courts should not "disaggregate profits from different lines of business" as "[p]arsing profits" would defeat the purpose of "holding firms liable for making moves that enhance their overall efficiency." *Id.* (disaggregating profits would make it difficult to assess firm's goal of "maximizing overall profits" and is inconsistent with the Court's reasoning in *Aspen Skiing* and *Trinko*); *see also* *Christy Sports, 555 F.3d at 1194* (businesses have ability "to recoup [their] investment[s]" in any number of ways). In finding the *Aspen Skiing* exception applies here, the majority opinion points to three key factors underlying the Supreme Court's decision in that case: (1) an important change in a pattern of distribution that had persisted for years; (2) conduct in the market with arrangements in comparable markets; and (3) forgoing profitable transactions. Majority op. at pp. 49-51. On these factors, I see *Aspen Skiing* and this case as different.

First, in *Aspen Skiing* there was more than an "important change" in the distribution pattern, as in that case the joint pass was terminated altogether. *472 U.S. at 603*. Here, no termination of the Interconnect occurred; instead, Comcast **[**145]** encouraged additional MVPD participation and sought to secure their access to the Interconnects by contracting with them directly. Second, in *Aspen Skiing*, the monopolist's conduct in comparable markets where it lacked dominance included the use of cooperative tickets in areas that apparently were competitive. *Id. at 603-04*. But Comcast participates in Interconnects across other DMAs, and, where it is the largest MVPD in a market, it operates the Interconnect there, too. *335 F. Supp. 3d at 1046*. Third, in *Aspen Skiing* the forgoing of profitable transactions was not alone, but "in exchange for perceived long-run impact on its smaller rival," and referenced in *Aspen Skiing* only in the context of finding no efficiency justification for the refusal to deal. *472 U.S. at 608, 610*. That is not the case here, as Comcast was able to proffer an efficiency justification (disintermediation and vertical integration) for its conduct. *See* Appellee's Br. 3.

Aspen Skiing would be more analogous to this case if a third-party vendor had managed the sales and advertising of the joint pass directly to skiers, and then Aspen Skiing Company (the monopolist) took over that role for vertical integration or other efficiency reasons. Instead, Aspen Skiing Company **[**146]** terminated the joint pass altogether; that would be like Comcast terminating the Interconnects to create a sub-optimal new platform to sell advertising, which of course did not happen here. Rather than terminate the Interconnects, Comcast encouraged MVPD participation and sought to secure MVPDs' access to the Interconnects by contracting directly with them. The record also contains evidence that Comcast acted pursuant to a rational business purpose: Comcast claimed it sought vertical integration and disintermediation, and Viamedia admitted such an efficiency justification in its allegations. *See id.* at 3.

Still, the reinstatement of Viamedia's refusal-to-deal claim does not depend on *Aspen Skiing*. Because that claim survives the plausibility requirement we apply under *Rule 12(b)(6)*, that portion of the judgment should be reversed and remanded.

[*491] C. *Opinion Testimony on the Refusal-to-Deal Claim May Be Allowed*.

---

[3] *See* Gov't's Br. in Supp. of Neither Party at 6, 8-11, ECF No. 33 (arguing only limited circumstances have been recognized in which a monopolist violates *§ 2* by refusing to deal with a rival, and those circumstances are tightly circumscribed due to the negatives of coerced dealing; recommending this court follow *Novell* and its test that a refusal to deal does not violate *§ 2* "unless it would make no economic sense for the defendant but for its tendency to eliminate or lessen competition").

Lastly on the refusal-to-deal claim, the district court's order regarding expert witnesses, which we review for abuse of discretion, is properly vacated. *See* Salgado ex rel. Salgado v. Gen. Motors Corp., 150 F.3d 735, 739 (7th Cir. 1998). On remand, the landscape of this case will have sufficiently changed to allow for this method of proof on the refusal-to-deal claim. This reversal **[**147]** allows for Viamedia to name expert witnesses on this claim, subject to the usual later motion practice to exclude or limit their testimony on this cause of action.

II. Tying

After their agreements with Viamedia expired, RCN and WOW! sought exclusive, full-turnkey relationships with Comcast. Neither RCN nor WOW! ever sought Interconnect-only services. The record contains no evidence that Comcast has ever declined an MVPD's request for Interconnect-only services; in fact, 14 percent of Comcast's agreements with MVPDs across all DMAs since December 2011 were Interconnect-only agreements. Viamedia, Inc. v. Comcast Corp., 335 F. Supp. 3d 1036, 1058 (N.D. Ill. 2018). None of those Interconnect-only agreements prevent an MVPD from hiring another ad representative for local sales or conducting their own ad representation.

Under its tying theory, Viamedia claimed Comcast conditioned access to the Interconnect (the "tying" product) on the purchase of Comcast's ad representation services (the "tied" product). But for whom? Viamedia conceded that both RCN and WOW! maintained the ability to deal directly with Com cast and access the Interconnect without any ad representative should they choose not to employ Comcast at the termination of their agreements with Viamedia.

The **[**148]** district court granted summary judgment on Viamedia's tying claim. 335 F. Supp. 3d at 1074. In so doing the court found there was no evidence that Comcast conditioned access to the Interconnect on the purchase of ad representation services. Id. at 1058 (finding the fact that RCN and WOW! both requested full-turnkey representation and that 14 percent of Comcast's agreements with MVPDs are Interconnect-only "belies any inference that Comcast tied its services."). The court further found there was no triable issue as to antitrust injury or damages, both necessary elements of an actionable claim. Notably, Viamedia admitted its injuries were "fully attributable to Comcast's decision to deny Viamedia Interconnect access," id. at 1070, thereby failing to establish a cognizable antitrust injury separate from the refusal to deal. Viamedia likewise failed to separately prove damages caused by the alleged tying conduct, again collapsing that showing into the refusal-to-deal claim. Id. at 1072-73.

To the district court, the crux of Viamedia's tying claim was that Comcast withheld the alleged tying product from its *rival*, Viamedia, not from its *customers*, WOW! and RCN. As the court found, Viamedia aimed to sell MVPDs a bundle of Comcast's Interconnect services **[**149]** with Viamedia's ad representation services, but "Viamedia has no antitrust right to force Comcast to help it sell such a bundle to their mutual customers." Id. at 1064. Finding the undisputed evidence did not show tying conduct, the district court granted summary judgment. Id. at 1074.

A. *Antitrust Injury and Standing are Lacking on the Tying Claim*.

As a threshold matter, a plaintiff must have antitrust standing to bring an antitrust **[*492]** claim. *See* McGarry & McGarry v. Bankr. Man. Solut., 937 F.3d 1056, 1063 (7th Cir. 2019) (antitrust standing required to identify "which plaintiffs may bring the cause of action"); *see also* Novell, 731 F.3d at 1080 ("[A] private party must establish some link between the defendant's alleged anticompetitive conduct, on the one hand, and its injuries and the consumer's, on the other."). A showing of antitrust standing requires more than the standing inquiry under Article III. *See* McGarry, 937 F.3d at 1063 ("[T]he Sherman Act has additional rules for determining whether the plaintiff is the proper party to bring a private antitrust action.") (citing Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)); *see also* Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 716 (7th Cir. 2006) ("Antitrust standing requires more than the 'injury in fact' and the 'case or controversy' required by Article III of the Constitution.").

To establish antitrust standing, a plaintiff must first show it was injured by anticompetitive conduct. *See* McGarry, 937 F.3d at 1063-64. Antitrust standing is limited **[**150]** to "(1) those who have suffered the type of injury that the antitrust laws were intended to prevent and (2) those whose injuries are a result of the defendant's unlawful conduct." *Id.* (quoting *Serfecz v. Jewel Food Stores, 67 F.3d 591, 595 (7th Cir. 1995))*; *see also* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (antitrust plaintiff must be able to show that its injury is "of the type the antitrust laws were intended to prevent").

Even if a plaintiff can show its injuries are the result of unlawful anticompetitive conduct, it must be able to "efficiently vindicate the purposes of the antitrust laws" to gain antitrust standing. *Kochert, 463 F.3d at 716*; *see also* *Associated Gen. Contractors, 459 U.S. at 537-44* (plaintiff's ability to efficiently vindicate the law's purpose confers antitrust standing if shown antitrust injury); *In re Industrial Gas Antitrust Litigation, 681 F.2d 514, 516 (7th Cir. 1982)* ("not all persons who have suffered an injury flowing from [an] antitrust violation have standing to sue"). Simply, the successful antitrust plaintiff must prove both antitrust injury and antitrust standing. *See* *Kochert, 463 F.3d at 716*.

"We usually presume that competitors and consumers in the relevant market are the only parties who suffer antitrust injuries and are in a position to efficiently vindicate the antitrust laws." *McGarry, 937 F.3d at 1065* (citing *Associated Gen. Contractors, 459 U.S. at 538*; *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 158 (2d Cir. 2016))*. "But 'presumptively' does not mean always," *SAS of Puerto Rico v. Puerto Rico Telephone Co., 48 F.3d 39, 45 (1st Cir. 1995)* (finding third-party suppliers are not "automatically improper antitrust plaintiffs"), **[**151]** and often consumers or competitors are denied antitrust standing.

The majority opinion proffers a bright-line rule "that customers and competitors in the affected market have antitrust standing," Majority op. at p. 99. But in each case cited in the majority opinion the court denied antitrust standing, including to competitors. *See* *Kochert, 463 F.3d at 718*; *Tri-Gen Inc. v. Int'l Union of Operating Engineers, Local 150, AFL-CIO, 433 F.3d 1024, 1031-32 (7th Cir. 2006)*; *Brunswick, 429 U.S. at 477-78, 484, 488* (collectively, competitors); *see also* *McGarry, 937 F.3d at 1063-66*; *In re Aluminum, 833 F.3d at 158*; *Serfecz, 67 F.3d at 597-98*; *Serpa Corp. v. McWane, Inc., 199 F.3d 6, 10 (1st Cir. 1999)*; *SAS of P.R., Inc., 48 F.3d at 44*; *Associated Gen. Contractors,* ***[*493]*** *459 U.S. at 540* (collectively, neither consumers nor competitors).

Instead, on this prerequisite the relevant case law prioritizes the type, directness, and cause of an antitrust injury, rather than applying a bright-line rule for antitrust standing based on the plaintiff's status. *See* *McGarry, 937 F.3d at 1064-65* (examining the "type of injury" alleged, the "remote[ness]" or "direct link" between the alleged antitrust violation and the claimed antitrust injury, and the "causal connection") (citing *Associated Gen. Contractors, 459 U.S. at 537-40* (explaining these factors)); *see, e.g.,* *Blue Shield of Va. v. McCready, 457 U.S. 465, 476-77, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* (plaintiff's status was neither consumer nor competitor, but granted antitrust standing based on type, directness, and cause of antitrust injury suffered).

Even with the presumption favoring consumers and competitors, standing is granted to rivals only when it "serves antitrust policy." 2A Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 348a, p. 232 (4th ed. 2014) **[**152]** (examples include when a rival is in a position to detect a violation earlier than consumers, or the rival's injury is large while consumers' injuries are small or their suits less likely). "[T]he elimination of a single competitor, standing alone, does not prove anticompetitive effect." *Austin v. McNamara, 979 F.2d 728, 739 (9th Cir. 1992)* (quoting *Kaplan v. Burroughs Corp., 611 F.2d 286, 291 (9th Cir. 1979))*. Thus, it is uncommon that a suit by a single foreclosed rival disputing a tying arrangement will have antitrust standing.[4] *See* 2A Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 348a, p. 232 ("courts are properly skeptical of many rivals' suits, particularly when the practices are not obviously 'exclusionary'"). First, the rival must show it suffered the type of injury the antitrust laws intend to prevent. This is consistent with antitrust jurisprudence that looks to market injury, like raised prices and decreased output or quality, to determine a competitor's antitrust injury. *See* *Tri-Gen, 433 F.3d at 1031* ("To have standing as a competitor,

---

[4] The leading treatise acknowledges the possibility that a rival could have standing if an illegal tying arrangement creates, enlarges, or perpetuates a monopoly for a tied product, and that rival may be foreclosed if it loses existing market share or sales. But "[i]njury to the foreclosed rival occurs, of course, only because a tie has forced buyers to purchase the defendant's tied product rather than the rival's." 10 Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1767a, p. 449. This is a high bar: the rival must show (a) a monopoly in the tied-market, (b) the loss of its existing market share or sales (not limited to certain customers), and (c) an injury based only on buyers being forced to purchase defendant's product over their own.

[plaintiff] needed to show that 'its loss comes from acts that reduce output or raise prices to consumers.'") (quoting Stamatakis Industries, Inc. v. King, 965 F.2d 469, 471 (7th Cir. 1992)); *see also* Serfecz, 67 F.3d at 597 (plaintiff's injury was "linked to the injury inflicted upon the market," including consumers paying higher prices); Associated Gen. Contractors, 459 U.S. at 539 n.40 (finding **[**153]** no antitrust injury from alleged predatory behavior because competitor failed to show "that output has been curtailed or prices enhanced throughout an entire competitive market").

Next, the rival must show it is the party "who can most efficiently vindicate the purposes of the antitrust laws" against unlawful ties. Kochert, 463 F.3d at 718 (quoting Serfecz, 67 F.3d at 598). But, having been forced to purchase a product it did not want, the tied consumer is almost always in the superior position to sue the violator. McGarry, 937 F.3d at 1066 (concluding **[*494]** "[t]here is, after all, a more appropriate person to pursue [a] claim" when that person's "self-interest would normally motivate them to vindicate the public interest in antitrust enforcement"); *see also* Kochert, 463 F.3d at 718; 2A Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 348a, p. 232 (recognizing that "consumers almost always have the correct incentives for suit, [but] rivals do not"). The presence of a more appropriate person to bring a claim "diminishes the justification for allowing a more remote party" to step in. McGarry, 937 F.3d at 1066 (quoting Associated Gen. Contractors, 459 U.S. at 542). Whether or not there is a more appropriate plaintiff, a rival may not pursue an antitrust injury that is "entirely derivative" of other injuries. *Id.* And even when standing is recognized, a foreclosed **[**154]** rival cannot oppose efficient, legitimate, or even aggressive lawful competition by its rivals. 2A Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 348a, p. at 231 ("[A] rival may allege an antitrust violation by its rivals not to protect competition but to protect itself from competition. ... Such losses are not antitrust injury, so the rival is [] denied standing.").

Here, Viamedia claims it is a foreclosed rival harmed by Comcast's alleged tying conduct. First, Viamedia must show it suffered an injury the antitrust laws intend to prevent that is directly linked to or caused by Comcast's alleged tying conduct. But Viamedia relies on the injuries and damages it claims from Comcast's refusal to deal rather than any distinct tying injury. *See* 335 F. Supp. 3d at 1069-73 (Viamedia's expert testified that foreclosure from the market and resulting injury or damages "flows directly from Viamedia's inability to access" the Interconnects, not tying); *see also* Novell, 731 F.3d at 1080 (declining to recognize separate, cognizable antitrust injury for other exclusionary conduct that relied on alleged refusal-to-deal injury). Viamedia has conceded that any injury it suffered is derivative of Comcast's refusal to deal, not the alleged tie. So Viamedia lacks **[**155]** an independent basis for advancing a tying claim, and recognizing it as a foreclosed rival with standing to sue under the narrow exception described above would not "serve[] antitrust policy." 2A Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 348a, p. 232. While Comcast offered its customers, RCN and WOW!, access to the Interconnect and exclusive ad representation services, it was not required to make such an offer to its rival, Viamedia. This reveals the fatal flaw in Viamedia's tying theory: even if Comcast acted precisely as Viamedia claims by tying Interconnect access and ad representation services, Viamedia would suffer no separate, cognizable antitrust injury. 335 F. Supp. 3d at 1071; *see* Novell, 731 F.3d at 1080 ("Even if Microsoft had behaved just as Novell says it should have, it would have helped Novell not at all.").

Next, Viamedia must show it is the party "who can most efficiently vindicate the antitrust laws" regarding tying. Kochert, 463 F.3d at 718 (quoting Serfecz, 67 F.3d at 598). While Viamedia enjoys the general presumption of antitrust standing as a competitor, this presumption is limited by the court's determination of whether an antitrust injury occurred. *See* 2A Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 348a, p. 232. Here, RCN and WOW! would have been directly impacted **[**156]** by Comcast's alleged tying conduct and would be in the superior position to pursue a claim against Comcast. Viamedia could not participate directly in this alleged tying arrangement, and it now seems motivated to protect itself from competition rather than enforce the antitrust laws. *See* Majority op. at p. 66 ("Viamedia simply wants to ensure that MVPDs can freely choose Viamedia as **[*495]** their supplier of ad rep services if that is their preferred choice.").[5]

---

[5] Even if somehow Viamedia could be considered a foreclosed rival with antitrust injury and standing, the leading treatise notes the possibility of injunctive relief—which the district court correctly concluded was misplaced on these facts, 335 F. Supp. 3d at 1074—and that treatise observes how difficult it is in such a circumstance to prove damages without speculation. 10 Areeda &

Because Viamedia has not shown a cognizable injury that the antitrust laws intend to prevent or that was directly linked to an antitrust violation caused by Comcast's conduct, it has no antitrust injury. Without an antitrust injury, and not able to efficiently enforce the law against illegal tying, Viamedia lacks antitrust standing to bring this claim.

B. *Summary Judgment Was Properly Granted on the Tying Claim*.

The district court's grant of summary judgment on Viamedia's tying claim, which we review de novo, was proper. We construe all facts and reasonable inferences in favor of the nonmoving party, and we refrain from weighing any evidence. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *see also* *In re High Fructose Corn Syrup Antitrust Litigation, 295 F.3d 651, 655 (7th Cir. 2002)* (describing the weighing of evidence as a "trap" to avoid). But the **[**157]** nonmoving party must "go beyond the pleadings" at summary judgment. *Celotex Corp. v. Catrett, 477 U.S. 317, 324, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. It must affirmatively demonstrate through evidence that there is a genuine issue for trial. *Anderson, 477 U.S. at 249*.

Liability under *§ 2* requires anticompetitive conduct. *Mercatus Grp., 641 F.3d at 854*; *Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000)*. On summary judgment, the *§ 2* plaintiff must present evidence tending to exclude the possibility that the monopolist's conduct is as likely to be procompetitive as anticompetitive. *Matsushita Elec. Indus. Co. v. Zenith Radio, 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* ("conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy"); *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* ("[T]here must be evidence that tends to exclude the possibility of independent [pro-competitive] action by the manufacturer and distributor.").

As noted previously, firms—even monopolies—generally have the right to decide with whom they will do business. In this vein, "***antitrust law*** does not require monopolists to cooperate with rivals by selling them products that would help the rivals to compete." *Schor v. Abbott Labs., 457 F.3d 608, 610 (7th Cir. 2006)*; *see* *Pac. Bell Tel. Co. v. Linkline Commc'ns, 555 U.S. 438, 450, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)* (monopolist may wield "upstream" power "to prevent rival firms from competing effectively" in a downstream market); *see also* *Trinko, 540 U.S. at 409-10* (a monopolist has no duty to deal with a rival, let alone a duty to deal on favorable terms). In presenting its tying **[**158]** claim, though, Viamedia argued that Comcast's conduct constituted more than a "mere" refusal to deal. *335 F. Supp. 3d at 1057*. Viamedia claimed that when Comcast excluded Viamedia from the Interconnects, **[*496]** Comcast engaged in the "distinct" practice of tying, pressing forward with this claim as an "alternative theor[y]" of relief. *Id.* After discovery on Viamedia's tying theory, the district court ruled that "the record leaves no genuine issue of material fact." *Id.* The district court correctly evaluated Viamedia's tying claim and rightly concluded that Viamedia's proffered evidence did not tend to exclude the possibility that Comcast's alleged tying conduct was as likely procompetitive as anticompetitive. *Id. at 1055-64*.

Under the new antitrust regime, "[o]utright condemnation of product tying has been reversed." Hon. Richard D. Cudahy & Alan Devlin, *Anticompetitive Effect*, *95 Minn. L. Rev. 59, 76 (2010)*; *see* *Microsoft Corp., 253 F.3d at 49* ("[N]ot all ties are bad."). The "essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Jefferson Par. Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*. An illegal tie, whether **[**159]** express or as applied, exists only when "the defendant improperly imposes *conditions* that explicitly or practically require buyers to take the second product if they want the first one." 10 Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1752b, p. 291 (4th ed. 2018). The fundamental feature of a tying claim is the conditioned sale, including by force. *See* *Sheridan v. Marathon Petrol. Co. LLC, 530 F.3d 590, 592 (7th Cir. 2008)*. No conditioning occurs if a buyer wants to purchase a

---

Hovenkamp, ***ANTITRUST LAW*** ¶ 1767a, p. 450 ("Even for those established in the market, estimating the number of sales lost as a result of the tying arrangement is elusive at best.").

Viamedia's status as a foreclosed rival, though, would depend on the existence of a tie. I conclude below the undisputed facts show no evidence of tying conduct because there was no conditioned sale of services.

bundle of the tied and tying products from the same seller. *See* *Will v. Comprehensive Acct. Corp., 776 F.2d 665, 669 (7th Cir. 1985)* ("A tie within the meaning of antitrust depends on showing that the buyer did *not* want to take both products from the same vendor."). Without the actual, conditioned sale of the tied product, there is no tie. *See* *It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676, 684 (4th Cir. 2016)* ("If ... the buyer is free to decline the tied product ..., then by definition there is no unlawful tying.").

Other circuits have acknowledged the essential and indispensable role conditioning plays in a tying claim. In *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171 (9th Cir. 2016)*,[6] the Ninth Circuit concluded **[*497]** there was no evidence that Honeywell, a monopolist manufacturer of replacement airplane parts, "explicitly or implicitly tie[d] or condition[ed] the sale" of replacement parts on a requirement that its customers use its in-house repair services. *Id. at 1179*. When Honeywell ceased **[**160]** supplying parts to Aerotec—a third-party repair service provider—for repairs, Aerotec sued Honeywell for alleged unlawful tying. *Id. at 1177*. Honeywell explained it had long preferred the benefits it achieved from internalizing its repair services and working with its affiliated servicers, rather than with independent ones like Aerotec. *Id. at 1176-77*. The court found it did not matter whether Honeywell had refused to deal with Aerotec, even if that made it more difficult for Aerotec to compete. *Id. at 1179-80*. The Ninth Circuit "decline[d] to stretch the tying construct to accommodate the claim that ... conduct toward third party servicers ... acts as an effective, or 'de facto,'" tying condition. *Id. at 1178*.

In *Serv. & Training, Inc. v. Data Gen. Corp., 963 F.2d 680 (4th Cir. 1992)*, the Fourth Circuit reached the same conclusion, finding there was no conditioned sale of a licensed product when customers demanded access to it, even though this hindered the ability of third-party servicers to compete with the company. *Id. at 687-88*. The same is true with the D.C. Circuit, *see* *Microsoft Corp., 253 F.3d at 85* (tying requires consumer to have "no choice but to purchase the tied product"), and this court, *see* *Reifert v. South Cent. Wisconsin MLS Corp., 450 F.3d 312, 318 (7th Cir. 2006)* ("conditioning access" to a service based on the forced purchase of a membership was essential element of **[**161]** tying).

Like these other third-party rivals, Viamedia has offered no evidence of conditioning. Such evidence is simply absent from the undisputed facts on which Viamedia attempted to build its tying claim:

---

[6] The majority opinion relies on certain factual assumptions to attempt to distinguish *Aerotec*.

First, the majority assumes "this is not a typical bundling case," Majority op. at 77, so *Aerotec* should not control. But *Aerotec* provides an instructive framework for determining whether a tie has occurred and illustrates the important role that conditioning plays in an unlawful tying arrangement, *see* *836 F.3d at 1179*.

Second, the majority assumes "self-providing ad rep services was not a viable option for RCN and WOW!," Majority op. at 78, and so they "needed to employ [a third-party] ad rep services provider." *Id.* at 77 n.17. As discussed elsewhere in this opinion, infra at 134, this assumption relies on the majority opinion's conclusion that it must not have been economically feasible for RCN and WOW! to internalize ad representation, either regionally or locally. This is not supported by the record, which contains undisputed evidence of various economically feasible options MVPDs choose in structuring their advertising sales. *See* infra at 25-26. Regardless, this assumption does not prevent Aerotec's application here.

Third, the majority assumes RCN and WOW! had "no choice but to obtain ad rep services from Comcast," Majority op. at 34 n.8, and were "forced by Comcast" to do so. *Id.* at 77 n.17. This in turn assumes that RCN and WOW! did not want ad representation services from Comcast. But the evidence shows the opposite: neither RCN nor WOW! ever requested Interconnect-only services from Comcast, and both sought full-turnkey relationships with Comcast to receive ad representation and Interconnect services together. Ultimately, Comcast's and Viamedia's offers to solicit RCN's and WOW!'s business were "nowhere near equal," and it was "not a very difficult decision" for the MVPDs to make. *335 F. Supp. 3d at 1048*. Comcast was able to offer superior terms and better prices with full Interconnect access and ad representation services. The assumption that any MVPD was forced or threatened to purchase ad representation services to gain access to the Interconnects does not follow from the evidence and is not a distinguishing factor from *Aerotec*.

- An ad representative is responsible for managing and selling an MVPD's avails to advertisers and can represent their MVPD customers: (1) locally, selling only a part of an MVPD's avails in a DMA to local advertisers; (2) regionally, selling all of the MVPD's avails in a DMA; or (3) nationally. *Id. at 1044*.

- The industry standard relationship between an ad representative and an MVPD is exclusive, region-wide, full-turnkey representation. *Id. at 1045*.

- MVPDs in a full-turnkey relationship with an ad representative have an exclusive agreement with that ad representative, which makes Interconnect services available to them without requiring a direct relationship with the Interconnect operator. *Id. at 1063-64*.

- Interconnect operators may pursue a direct relationship with MVPDs to sell a portion of their avails regionally without a third-party ad representative. *Id. at 1046*. This is called an "Interconnect-only" agreement. *Id.*

- Some MVPDs retain a portion of their avails for local advertising and hire an ad representative to represent **[**162]** them locally. *Id. at 1045*.

[*498] • Some MVPDs choose to conduct their own ad representation—regionally, locally, or both. *Id.*

- RCN and WOW! are MVPD customers of Comcast and Viamedia, which compete for MVPDs' business on the relevant Interconnects. *Id. at 1046*.

- Comcast refused to deal with Viamedia by disallowing it access to the relevant Interconnects. *Id. at 1057*.[7]

- No evidence shows that Comcast told MVPDs across all DMAs, expressly or impliedly, that they could only access the Interconnects on the condition that they also purchase ad representative services. *Id. at 1058*.

- Fourteen percent of Comcast's agreements with MVPDs across all DMAs are Interconnect-only. *Id.*

- RCN and WOW! never requested Interconnect-only services from Comcast, and both pursued full-turnkey relationships with Comcast. *Id. at 1059*.

These facts do not show illegal tying conduct. Both parties stipulate that Comcast never denied an MVPD's request to access the Interconnect on a standalone basis. In fact, 14 percent of Comcast's agreements with MVPDs across all DMAs are Interconnect-only. *Id. at 1058*; *see, e.g., It's My Party, 811 F.3d at 685* (14 percent of standalone, non-tied sales "exceed [] sufficiently" the minimum threshold required "to cast doubt on any allegation of tying"); *see also* 10 Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1756b2, p. 334 **[**163]** ("10 percent unbundle[ed]" sales rebuts any "established or presumed inference of a tying condition"); *see also* *Novell, 731 F.3d at 1077* (aggregating sales and profits across entire market to assess firm's "overall efficiency" and not singling out smaller market or product line). And there is no evidence Comcast withheld Interconnect access from MVPDs unless they also purchased ad representative services from Comcast. Instead, the evidence shows that RCN and WOW! sought a full-turnkey relationship with Comcast to receive access to the Interconnects and ad representation services as a bundle. They were neither forced to purchase ad representation services from Comcast nor denied access to the Interconnects unless they purchased ad representation from Comcast. Further, if they wished, they were free to contract with a third-party ad representative for local sales. Even while under exclusive contract with Viamedia, RCN and WOW! were not forced to purchase ad representation services from Comcast. Comcast never poached RCN or WOW!

---

[7] The majority opinion casts Comcast's refusal to deal as a negative fact, noting that Comcast "conceded repeatedly" that it had done so. Majority op. at p. 76. It is undisputed that Comcast refused to deal with Viamedia; the question on remand is whether that refusal was anticompetitive, which Viamedia will have to prove. As discussed, refusals to deal are now not disfavored, and in fact the opposite—cooperation among rivals—is a red flag under ***antitrust law***. *See* Easterbrook, *The Chicago School & Exclusionary Conduct, at 442* ("cooperation is to be feared rather than welcomed").

during that time to capture their business in the ad market, and RCN and WOW! could have chosen to forgo ad representation altogether at the conclusion **[**164]** of those exclusive contracts.

That Comcast did not affirmatively offer RCN or WOW! Interconnect-only access does not alter these facts. Courts need not assume antitrust laws require a business to offer its customer a less profitable or less efficient option than the one the customer seeks. Here, it is undisputed that RCN and WOW! sought Interconnect access and ad representation services as a bundle in a full-turnkey relationship with **[*499]** Comcast. *See* 9 Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1700i, p. 12 (4th ed. 2018) ("[F]inding two products does not mean that they are tied together. The franchisee may have preferred a 'turnkey' franchise and never asked for the" tying product "separately"); *see also* *Will, 776 F.2d at 670* (the "voluntary purchase of two products together" is "not a tie at all"). The district court recognized, and correctly rejected, how broad a view of tying Viamedia attempts to advance. *335 F. Supp. 3d at 1059* ("the constraining of consumer choice is of course a feature of a tying arrangement ... but there must still be an actual 'tie' of products or services").[8] Viewing the record in the light most favorable to Viamedia, the evidence reflects that WOW! and RCN wanted full-turnkey representation, and they were prepared **[**165]** to hire the company with the ability to deliver both Interconnect access and ad representation services. Here, that company was Comcast.

My colleagues in the majority conclude, at various points, that it was not economically feasible for RCN or WOW! to conduct their own ad representation. *See* Majority op. at p. 34 n.8 (finding RCN and WOW! "had always chosen to buy [ad representation] services from outside companies, suggesting that in-house was not an economically viable option"); *id.* at 77 n.17 (concluding sufficient evidence existed of a "forced" sale because "RCN and WOW! needed to employ [a third-party] ad rep services provider"); *id.* at 78 (deciding "self-providing ad rep services was not a viable option for RCN and WOW!"); *id.* at 82 (finding evidence "showing that inhouse provision of ad rep services simply was not a practical option for RCN or WOW! in these markets"). This conclusion assumes that if RCN and WOW! chose to outsource ad representation to a third-party, either locally or regionally, then it must have been economically feasible to do so. It also assumes the inverse: that internalizing these services must be economically *in*feasible. Such assumptions go beyond the court's role and presume underlying **[**166]** facts about the parties' business practices and strategies that we simply do not know and cannot accurately predict. These assumptions are not supported by the record, which instead contains evidence of various economically feasible options MVPDs choose in structuring their advertising sales, including internalizing part of or all ad representation services. *335 F. Supp. 3d at 1044*. I respectfully do not share this economic feasibility conclusion and rely only on the evidence presented.

The majority opinion also references "[a]mple evidence" the jury could have relied upon to "easily find that Comcast improperly forced the smaller MVPDs to buy its ad rep services" through a tying arrangement. Majority op. at pp. 75-76. In particular, the majority points to internal Comcast and WOW! documents, deposition responses, and testimonies before the Federal Communications Commission and the Department of Justice. But the relevant evidence shows Comcast's desire to solicit RCN's and WOW!'s business directly, *not* the forced purchase of a service that neither RCN nor WOW! wanted. For example, the majority references an email from a WOW! employee to his colleagues explaining his understanding that "[WOW!] can be in the **[**167]** [Interconnect] but only if [Comcast] rep[s] us directly." *See* Majority op. at p. 75. The majority opinion reads this as revealing Comcast's "demands" and "threats" with which RCN **[*500]** and WOW! did not "willingly" comply. *Id.* But in context, the email reflects only ongoing business negotiations between WOW! and Comcast, in which Comcast expressed its desire to no longer accommodate third-party ad representatives (its competitors) on the Interconnects it operates. This is consistent with Comcast's position all along—that it wishes to increase efficiency by internalizing services—and does not constitute tying as defined.

Some other examples: in a different email, a Comcast employee expressed to a WOW! employee Comcast's "desire to have a direct relationship" with MVPDs on the Interconnects and noted that "Comcast would be thrilled to do business directly with WOW," reiterating the "tremendous value and benefits [Comcast] can deliver for WOW" in

[8] Further, if tying occurred, one would expect to see higher prices or lower output. *See* Washington Legal Foundation's Br. in Supp. of Def. at 12, ECF No. 45. There is no such evidence here.

a direct relationship. Another Comcast employee noted in a deposition that working "through a middleman" like Viamedia "really brought no value to the table" and the decision not to renew its contract with Viamedia was primarily to "have a direct relationship **[**168]** with WOW and RCN." Explaining RCN's decision to contract directly with Comcast, an RCN executive testified to the superior terms Comcast could provide, noting that Comcast's and Viamedia's offers were "nowhere near equal" and that it was "not a very difficult decision" for RCN to make. *335 F. Supp. 3d at 1048*. WOW!, too, selected Comcast's direct representation based on "better financial terms." *Id.*

These statements are consistent with Comcast's position to directly solicit the business of MVPDs. When questioned by the Department of Justice, a Comcast executive acknowledged it was Comcast's "business practice" to inform MVPDs that want "to get access to a Comcast controlled Interconnect, it has to hire Comcast as its ad sales representative" instead of a third-party rival. *Id. at 1061*. This does not reveal a forced purchase that neither RCN nor WOW! wanted. If anything, such evidence depicts "hard-nosed" business practices like those the Tenth Circuit noted but did not find anticompetitive in *Novell, 731 F.3d at 1078* (finding email evidence may suggest "an uncharitable intent toward rivals" or even an "intent to undo a competitor," but did not show that conduct was "irrational but for its exclusionary tendencies"). None of this evidence "tends **[**169]** to exclude the possibility" that Comcast's conduct "was as consistent" with lawful conduct as with illegal tying conduct. *Mercatus Grp., 641 F.3d at 856*.

Importantly, the internal documents the majority opinion references are dated 2014, when WOW! and RCN were still under exclusive contract with Viamedia but soliciting bids from other representatives to sell advertising avails on the Interconnects. While soliciting bids, RCN and WOW! engaged in back-and-forth negotiations with Comcast and Viamedia, leading ultimately to new contracts with Comcast. The timing of these discussions, as preserved in the record, is key. When reviewing the evidence here, this court is limited by the prospective nature of these then-ongoing negotiations. Our perspective is necessarily predictive not retrospective. These internal documents do not contain evidence of the economic impact *after* the negotiated deals were made, but only *before* when offers were being made, accepted, and rejected. They do not describe the economic results of these then-prospective relationships. Because of their prospective nature, they are not a reliable metric for understanding what has transpired since, but merely what the parties had hoped to achieve. Under **[**170]** our antitrust regime, "[w]hat distinguishes exclusion from efficiency is what happens in the future," Easterbrook, *The Chicago School & Exclusionary Conduct, at 443*, not what the parties want to happen.

[*501] None of this evidence measures whether Comcast's conduct has resulted in a market injury, such as raised prices or decreased output. It does not show that RCN or WOW! understand their contracts with Comcast to be coercive or conditioned, and there is no evidence indicating RCN and WOW! are unhappy with their current relationship with Comcast. While viewing this evidence in Viamedia's favor, it is crucial to acknowledge its limitations in this case.

As the district court noted, the real "gravamen of Viamedia's tying claim [is] that Comcast's refusal to provide [Viamedia] Interconnect access prevents [Viamedia] from selling the kind of full-turnkey Ad Rep Services that WOW! and RCN desire." *Id. at 1063* (internal quotations omitted). That differs from the paradigmatic tying claim, which requires conditioning and a forced sale to a *customer* rather than a withheld advantage from a *rival. See* 9 Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1700a, p. 4. ***Antitrust law*** does not require Comcast to help Viamedia sell the same bundle it offers to their mutual customers. **[**171]** *See* 10 Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1748b, pp. 251-53 (no tied product "when the plaintiff's theory of injury is not that customers of the defendant's [tied] bundle would buy the items unbundled if they could, but rather that a rival could sell the *same bundle* if only the defendant would sell it a particular input").

Finally, even if Viamedia's refusal-to-deal claim had survived a motion to dismiss, summary judgment was appropriate on the tying claim because the undisputed facts do not show Comcast conditioned access to the Interconnects on the purchase of ad representation services. Although acknowledging that "[t]hese related claims are both based on the same course of conduct, resulted in the same anticompetitive harms, and would be subject to the same procompetitive justifications or defenses," Majority op. at p. 38, the majority opinion does not explain how Viamedia has established a distinct tying claim that should have advanced beyond summary judgment on its own merits. In framing its tying analysis, the majority opinion focuses on whether, when viewing Comcast's conduct as a whole, "[Comcast] has unreasonably maintained or enhanced its monopoly position." *Id.* at 73. While this **[**172]** framework would not necessarily reveal anticompetitive conduct in violation of *§ 2*, I hesitate to apply it here for the simpler reason that our antitrust jurisprudence does not instruct us to do so. Instead, looking to the undisputed facts, Viamedia has failed to prove the elements of a tying claim.

To the extent the majority opinion also concludes that the existence of a viable refusal-to-deal claim saves Viamedia's tying claim, I am not convinced of that connection. In comparison to refusal to deal, tying is a form of exclusionary conduct with more specific requirements, which the district court noted. *218 F. Supp. 3d at 698* (a refusal-to-deal claim is different than a tying claim); *accord* *Novell, 731 F.3d at 1072* (distinguishing unilateral refusals to deal from other recognized forms of anticompetitive conduct like tying). Viamedia, seeking an "escape route" and "trying to recast" Comcast's refusal to deal as unlawful tying conduct, *see* *Novell, 731 F.3d at 1078*, has treated these two claims interchangeably. But parties' claims stand and fall on their own merits, so the district court was correct to consider them separately.

Conditioning, an essential element of tying, requires the forced sale of a product the buyer did not want. Based on the record before **[**173]** us, to which we are limited, there was no conditioning. Because the undisputed facts show no evidence of tying conduct separate from Viamedia's refusal-to-deal **[*502]** claim, I would affirm that portion of the district court's judgment.

III.***Section 2*** **Monopolization Analysis**

The majority opinion acknowledges Viamedia raised only two claims on appeal: refusal-to-deal and tying. Majority op. at p. 42 n.11. It also suggests an alternative means of *§ 2* recovery should Viamedia fail on either of its alleged claims. Per the majority opinion, Viamedia has sufficiently pleaded and presented evidence for the court to find an alternative *§ 2* monopolization claim. Such an open-ended approach may place courts in the role of the decision-maker on dense and complex economic issues better left to the free market. *See* Easterbrook, *The Chicago School & Exclusionary Conduct, at 442* ("Markets are much better than judges at sifting efficient from anticompetitive practices."). We are no more skilled at predicting market shifts than anyone else, and courts are very rarely the best forum for discerning between exclusionary and efficient conduct. *See* *id. at 442-45*.

The district court hewed to the particular types of exclusionary conduct Viamedia alleged (tying and refusal to deal; its exclusive dealing **[**174]** claim was abandoned on appeal). The court found Viamedia had "affirmatively disavowed" any "free-standing" *§ 2* monopolization claim. *335 F. Supp. 3d at 1068*. Having failed to plead or preserve an alternative claim before the district court, Viamedia should not be entitled to pursue a vague *§ 2* monopolization theory on appeal. *King v. Kramer, 763 F.3d 635, 641 (7th Cir. 2014)* (this court not in a position to advance claims that party abandons or fails to preserve below); *Geva v. Leo Burnett Co., 931 F.2d 1220, 1225 (7th Cir. 1991)* (an issue not "properly preserved below" in the district court is generally waived). Nor should the court be required to consider the restraint on trade or the impact on monopoly powers generally that may arise from Viamedia's allegations.

This rule is particularly relevant in ***antitrust law***, which is susceptible to high rates of "false positives" that occur when the court confuses real competition with exclusion. *See* Easter-brook, *The Chicago School & Exclusionary Conduct, at 445*; *see also* *Microsoft Corp., 253 F.3d at 87* (discussing false positives). The new antitrust regime identifies problems like false positives, unpredictability, and past court confusion, and it seeks to protect consumers and promote competition in a technologically advancing marketplace. Many cases and authorities point in this direction. An alternative *§ 2* monopolization theory is not consistent with **[**175]** how courts now consider potentially exclusionary conduct. Accordingly, I am unable to join this portion of the majority opinion.

IV. Conclusion

The majority opinion dives deep into this case's complicated facts and thoroughly covers swaths of ***antitrust law*** in an insightful manner. As Viamedia has plausibly alleged an anticompetitive refusal to deal, I join the majority in reversing and remanding on that claim. But the undisputed facts do not show an illegal tie, so summary judgment was proper on that allegation. For the reasons above, I respectfully concur in part and dissent in part.

Texas v. Am. Tobacco Co

United States District Court for the Eastern District of Texas, Texarkana Division

February 25, 2020, Decided; February 25, 2020, Filed

CIVIL ACTION NO. 5:96-CV-00091-JRG

Reporter
441 F. Supp. 3d 397 *; 2020 U.S. Dist. LEXIS 36840 **; 2020 WL 991784

THE STATE OF TEXAS, Plaintiff, v. AMERICAN TOBACCO CO, PHILIP MORRIS USA, IMPERIAL TOBACCO GROUP BRANDS, LLC, R.J. REYNOLDS TOBACCO COMPANY ET AL., Defendants.

Prior History: *Texas v. American Tobacco Co., 14 F. Supp. 2d 956, 1997 U.S. Dist. LEXIS 22580 (E.D. Tex., Sept. 8, 1997)*

Core Terms

Settlement, Brands, settling, assigns, settlement agreement, cigarettes, parties, market share, obligations, manufacturers, Tobacco, successors, motion to enforce, binding, rights, reimbursement, perpetual, terms, join, private counsel, disputes, calculation, argues, settlement payment, transferred, provisions, employees, shipments, sales, audited

LexisNexis® Headnotes

Antitrust & Trade Law > Consumer Protection > Tobacco Products > Federal Cigarette Labeling & Advertising Act

Tax Law > ... > Alcohol & Tobacco Products > Tobacco Products Taxes > Imposition of Tax

Business & Corporate Compliance > ... > Alcohol & Tobacco Products > Tobacco Products Taxes > Failure to Pay

Antitrust & Trade Law > Consumer Protection > Tobacco Products > State Regulation

HN1[] **Tobacco Products, Federal Cigarette Labeling & Advertising Act**

While the Texas Settlement is designed to recover tobacco-related healthcare costs from settling manufacturer defendants, the Tobacco Equity Tax is designed to recover the State's health care costs imposed by non-settling manufacturers' products, by imposing a tax on those manufacturers. The Tobacco Equity Tax applies to all non-settling manufacturers, a class defined as manufacturers of cigarettes or cigarette tobacco products that did not sign either the Liggett Settlement or the Texas Settlement.

Tax Law > ... > Alcohol & Tobacco Products > Tobacco Products Taxes > Imposition of Tax

HN2[] Tobacco Products Taxes, Imposition of Tax

The Texas Tobacco Equity Tax authorizes the Texas Comptroller or the Texas Attorney General, in their discretion, to conduct reasonable periodic audits in order to ensure compliance with *Tex. Health & Safety Code Ann. § 161.605(g)*. §*Tex. Health & Safety Code Ann. § 161.609*.

Civil Procedure > Settlements > Settlement Agreements > Validity of Agreements

HN3[] Settlement Agreements, Validity of Agreements

A party who receives any interest in assets that are subject to a settlement agreement may be joined in settlement enforcement proceedings pursuant to *Fed. R. Civ. P. 25*.

Governments > Courts > Common Law

HN4[] Courts, Common Law

Florida law, which follows the general common law rule governing assignments related to contract obligations, provides that a party may not relieve itself of its liability under a contract via an assignment. A party is not relieved of liability based on an assignment of either a contract itself, or the assets which form the subject matter of the contract.

Torts > ... > Settlements > Settlement Agreements > Enforcement

HN5[] Settlement Agreements, Enforcement

A district court shall treat a motion to enforce a settlement agreement as it would a motion for summary judgment.

Antitrust & Trade Law > Consumer Protection > Tobacco Products > State Regulation

HN6[] Tobacco Products, State Regulation

Under the plain language of the Minnesota Settlement Agreement, a settling defendant is responsible for paying in the current year, for the damage its cigarettes caused in the past.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Creditors & Debtors

HN7[] Standards of Performance, Creditors & Debtors

An asset purchase does not extinguish liabilities associated with that asset.

Civil Procedure > Settlements > Settlement Agreements > Validity of Agreements

HN8[] Settlement Agreements, Validity of Agreements

Market share is defined in the Minnesota Settlement Agreement to include the market share of settling defendants, which includes their successors and assigns.

Contracts Law > Contract Interpretation

HN9[] **Contracts Law, Contract Interpretation**

The courts read contract terms in the context of the entire contract and will not construe the terms so as to lead to a harsh and absurd result.

Governments > Courts > Authority to Adjudicate

HN10[] **Courts, Authority to Adjudicate**

The court has an independent obligation to determine its subject-matter jurisdiction. Federal courts are under an independent obligation to examine whether subject-matter jurisdiction exists.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Civil Procedure > Settlements > Settlement Agreements > Incorporation in Judgment

HN11[] **Types of Contracts, Settlement Agreements**

With consent of the parties, a district court may expressly retain jurisdiction over a settlement agreement in order to enforce the parties' compliance with that agreement and thereafter may assert jurisdiction over breach of settlement claims. A final judgment may make a settlement agreement part of the order of dismissal in one of two ways, either by separate provision, such as a provision retaining jurisdiction over the settlement agreement, or by incorporating the terms of the settlement agreement in the order.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Contracts Law > Contract Interpretation

HN12[] **Types of Contracts, Settlement Agreements**

The Texas Settlement must be interpreted under Texas law. The Texas Settlement Agreement shall be governed by the laws of the State of Texas. It is a well-settled rule that the construction and enforcement of settlement agreements are governed by principles of local law applicable to contracts generally.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Contracts Law > Contract Interpretation

HN13[] **Types of Contracts, Settlement Agreements**

Under Texas law, settlement agreements are interpreted according to the law generally governing contractual agreements. Under Texas law, the courts interpret settlement agreements like other contracts. This is because settlement agreements are contracts, which reflect agreements related to the resolution of legal disputes.

Civil Procedure > ... > Preclusion of Judgments > Full Faith & Credit > Enforcement of Judgments

Constitutional Law > Relations Among Governments > Full Faith & Credit

Civil Procedure > ... > Preclusion of Judgments > Full Faith & Credit > Full Faith & Credit Statutes

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN14[] **Full Faith & Credit, Enforcement of Judgments**

To determine the preclusive effect of a state court judgment, federal courts apply the preclusion rules of the state whose court issued the judgment. The U.S. Supreme Court has held that under the Full Faith and Credit Act a federal court must give the same preclusive effect to a state-court judgment as another court of that State would give.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN15[] **Preclusion of Judgments, Res Judicata**

When multiple courts have previously rendered a judgment addressed to the same issue, a subsequent court may give preclusive effect only to the decision of the final court to render judgment. In such a case, the governing rule to be applied is quite clear. The third court should give res judicata effect to the last previous judgment entered.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN16[] **Preclusion of Judgments, Res Judicata**

The formal rationale behind the rule of last in time is that the implicit or explicit decision of the second court, to the effect that the first court's judgment is not res judicata, is itself res judicata and therefore binding on the third court. The decision is not binding because it is correct; it is binding because it is last. The rule of last in time furthers the purposes of res judicata because it ends the chain of relitigation by stopping it where it stands after entry of the second court's judgment, and thereby discourages relitigation in a third court. If an aggrieved party believes that the second court erred in not giving res judicata effect to the first court's judgment, then the proper avenue of redress is appeal of the second court's judgment, not collateral attack in a third court.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Evidence > Burdens of Proof > Allocation

HN17[] **Estoppel, Collateral Estoppel**

Minnesota squarely assigns the burden to establish that collateral estoppel is applicable to the party asserting collateral estoppel.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN18[] **Estoppel, Collateral Estoppel**

Florida law limits issue preclusion to circumstances where an identical issue was presented in a prior proceeding. Florida law also requires that the parties in the two proceedings must be identical.

Civil Procedure > Parties > Real Party in Interest > Assignees

HN19[] **Real Party in Interest, Assignees**

Texas law recognizes that an assignment does not relieve a party of its obligations under a contract. An assigning party remains liable unless expressly or impliedly released by the other party to a contract.

Contracts Law > Third Parties > Delegation of Performance

HN20[] **Third Parties, Delegation of Performance**

A party cannot escape its obligations under a contract merely by assigning the contract to a third party. As a general rule, a party who assigns its contractual rights and duties to a third party remains liable unless expressly or impliedly released by the other party to the contract.

Business & Corporate Compliance > ... > Negotiable Instruments > Types of Parties > Assignees & Assignors

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Releases

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Releases

HN21[] **Types of Parties, Assignees & Assignors**

Under Texas contract law, an assignor's contractual obligations generally survive assignment unless the contract expressly provides otherwise or the assignor obtains an express release.

Civil Procedure > Parties > Real Party in Interest > Assignees

HN22[] **Real Party in Interest, Assignees**

Even when a contract does not expressly provide for the consequences resulting from the assignment of one's interest, the contract's subject or other circumstances may indicate that obligations were not intended to survive assignment.

Business & Corporate Compliance > ... > Negotiable Instruments > Types of Parties > Assignees & Assignors

Civil Procedure > Settlements > Releases From Liability > General Releases

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Releases

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Releases

HN23[] **Types of Parties, Assignees & Assignors**

Absent a specific release, an assignment, of either a contract or an asset, will not obviate a party's contractual obligations. Under Texas contract law, an assignor's contractual obligations generally survive assignment unless the contract expressly provides otherwise or the assignor obtains an express release.

Contracts Law > Contract Interpretation > Intent

HN24[] **Contract Interpretation, Intent**

In all contract cases, the task of the court is to ascertain the parties' true intentions as expressed in the language they chose. Since parties may make drafting choices in light of the circumstances under which a contract is reached, Texas courts construe contracts from a utilitarian standpoint bearing in mind the particular business activity sought to be served. Texas courts examine the entire agreement and seek to harmonize and give effect to all provisions so that none will be meaningless.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN25[] **Types of Contracts, Settlement Agreements**

Texas law recognizes that the business purpose of a settlement agreement is to resolve disputes with finality. In Texas, a settlement agreement is meant to forever settle the dispute at hand, rather than merely deferring the dispute to a later date.

Contracts Law > Contract Interpretation

HN26[] **Contracts Law, Contract Interpretation**

Under Texas law, courts are expressly permitted to take into account the objectively determinable facts and circumstances surrounding the contract that give context to the parties' transaction.

Contracts Law > Contract Interpretation

HN27[] **Contracts Law, Contract Interpretation**

Contracts must be construed in a manner that will harmonize and give effect to all the provisions of the contract so that none will be rendered meaningless. No single provision taken alone will be given controlling effect; rather, all the provisions must be considered with reference to the whole instrument.

Contracts Law > Contract Interpretation

HN28[] **Contracts Law, Contract Interpretation**

Courts must avoid contract constructions that are unreasonable, inequitable, and oppressive.

Contracts Law > Contract Interpretation > Intent

HN29[] **Contract Interpretation, Intent**

A successors and assigns clause reflects an effort by the parties to ensure that the obligations of the contract could not be defeated by transferring the subject matter of the contract.

Civil Procedure > Parties > Real Party in Interest > Assignees

HN30[] **Real Party in Interest, Assignees**

In the context of interpreting a contract, courts must examine whether either the contract's subject or other circumstances indicates whether or not the obligations are intended to survive assignment.

Business & Corporate Compliance > ... > Assignments > Assignment of Obligations > Consent Requirements

Contracts Law > Third Parties > Delegation of Performance

HN31[] **Assignments, Consent Requirements**

The duties under a contract are not delegable inter vivos in a true sense under any circumstances; that is, one who owes money or is bound to any performance whatsoever cannot by its own act, or by any act in agreement with anyone else, except its creditor, divest itself of the duty and substitute the duty of another. No one can assign his liabilities under a contract without the consent of the party to whom he is liable. While a party to a contract may as a general rule assign all his beneficial rights, except where a personal relation is involved, his liability under the contract is not assignable inter vivos because any one who is bound to any performance whatever or who owes money cannot by any act of his own, or by any act in agreement with any other person than his creditor or the one to whom his performance is due, cast off his own liability and substitute another's liability. The Uniform Commercial Code provides in this regard that a delegation of performance does not relieve the delegating party of the duty to perform or of any liability for breach of contract. A party cannot free itself from its obligations by the simple expedient of assigning them.

Business & Corporate Compliance > ... > Assignments > Assignment of Obligations > Consent Requirements

HN32[] **Assignments, Consent Requirements**

If a settling defendant cannot assign an obligation without the other parties' prior written consent, it follows that the same defendant cannot extinguish an obligation without the other parties' prior written consent.

Contracts Law > Contract Interpretation > Ambiguities & Contra Proferentem

HN33[] **Contract Interpretation, Ambiguities & Contra Proferentem**

Only where a contract is ambiguous may a court consider the parties' interpretation and admit extraneous evidence to determine the true meaning of the instrument.

Governments > State & Territorial Governments > Employees & Officials

HN34[] **State & Territorial Governments, Employees & Officials**

Texas law is replete with restrictions on the ability of officers and agents to modify or limit legal rights to which the State would otherwise be entitled.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Trademark Law > ... > Defenses > Defenses to Incontestability > Laches

Governments > Legislation > Statute of Limitations > Time Limitations

HN35[] **Affirmative Defenses, Laches**

Texas is not subject to the defenses of limitations, laches, or estoppel.

Governments > Local Governments > Claims By & Against

HN36[] **Local Governments, Claims By & Against**

It remains a fundamental principle of Texas law, intended to shield the public from the costs and consequences of improvident actions of their governments.

Contracts Law > Remedies > Ratification

HN37[] **Remedies, Ratification**

Texas' rights are held for the benefit of all the people of the state. If only a subset of employees could strip the public of its rights, such employees, whether through mistake or misconduct, might grievously injure the public. For that reason, the Texas Supreme Court uniformly rejected ratification by estoppel arguments that would limit Texas' entitlement to payments.

Governments > Police Powers

HN38[] **Governments, Police Powers**

Texas courts have also rejected limitations that would obstruct Texas' responsibility and duty to enforce health care rights that are designed to protect its citizens. Texas law is careful to limit any waiver of the State's rights, in order to avoid obstructing predictable payments that are intended for public use. The limitations remain true with respect to binding the State to contractual duties and obligations. Only persons authorized by the Constitution or a statute can make a contract binding on the State. All state officers' powers are fixed by law, and all persons dealing with them are charged with notice of the limitations on those powers. Only persons having actual authority to act on behalf of the State can bind the State in contract.

Governments > Legislation > Statute of Limitations > Time Limitations

HN39[] **Statute of Limitations, Time Limitations**

Litigants may not create a backdoor limitations argument by suggesting that inaction on Texas' part has altered its substantive rights.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Releases

HN40[] **Affirmative Defenses, Releases**

The affirmative defense of release unambiguously falls within the term defenses relating to any transferred asset or assumed liability.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN41[] **Reviewability of Lower Court Decisions, Preservation for Review**

An argument not raised before the district court cannot be asserted the first time on appeal. If a party fails to assert a legal reason why relief should be granted, that ground is waived and cannot be considered or raised on appeal. A party waives his or her constitutional challenge by failing to raise it in the district court in a manner that would allow the district court to rule on it. The raising party must present the issue so that it places the opposing party and the court on notice that a new issue is being raised.

Business & Corporate Compliance > ... > Secured Transactions > Third Party Rights > Assignments of Secured Transactions

HN42[] **Third Party Rights, Assignments of Secured Transactions**

Under Texas law, the term assignment has a comprehensive meaning and in its most general sense means the transfer or setting over of property or some right or interest from one person to another. An assignment is a manifestation by the owner of a right or property of its intention to transfer such right or property to another.

Table of Contents

V. Conclusion

Introduction

In January of 1998, faced with potentially crippling liability and a fellow tobacco manufacturer who had decided to cooperate with the State of Texas ("Texas"), the nation's remaining major tobacco manufacturers agreed to settle all claims with Texas on the eve of a trial set to begin in the United States District Court for the Eastern District of Texas, Texarkana Division. **[**13]** [1] Over twenty years later, this Court now **[*407]** confronts disputes emanating from that settlement.

The Texas Comprehensive Settlement Agreement and Release ("Texas Settlement") provides that each settling defendant would make annual payments to Texas in perpetuity. After being amended twice, the final Texas Settlement provided that payments to Texas **[**14]** would be based on the number of cigarettes sold each year, in order to proportionately compensate Texas for the money it spends providing medical treatment to its citizens suffering from illnesses caused by the accused tobacco products. The Texas Settlement payments were perpetual by design to continually reimburse Texas for the increase in its citizens' healthcare costs. In exchange for these perpetual payments, Texas furnished each settling defendant with an equally perpetual release from liability—Texas forever waived any claims related to the use of or exposure to their tobacco products.

The Texas Settlement framework largely functioned as anticipated for seventeen years. However, in 2015, one of the settling manufacturers—R.J. Reynolds Tobacco Company ("Reynolds")—informed Texas that it no longer intended to make Texas Settlement payments regarding a sizeable number of cigarettes. Reynolds explained that it had sold four of its major brands—Winston, Salem, Kool, and Maverick ("Acquired Brands")—for approximately seven billion dollars, and that it would no longer make payments to Texas for those brands.[2] The purchaser-by-assignment of the Acquired Brands, Imperial Tobacco Group Brands, **[**15]** LLC ("Imperial"), similarly disclaimed any intent to compensate Texas under the Texas Settlement for the sale of cigarettes produced under the Acquired Brands. According to Reynolds and Imperial, liability for the annual sales of those sixteen billion cigarettes had been extinguished by virtue of the contract assigning those brands to Imperial. Reynolds disclaimed liability because it no longer owned the Acquired Brands; Imperial disclaimed liability because it is not a signatory to the Texas Settlement. Instead, Reynolds and Imperial took the position that Texas must file a new lawsuit against Imperial if it wanted to be compensated for sales under the Acquired Brands going forward.

Texas disagreed. After sending a formal demand to Imperial and Reynolds, Texas filed its Motion to Enforce the Texas Settlement ("Texas' Motion to Enforce"). Texas claims that nothing in the Texas Settlement gives settling defendants, such as Reynolds, the power to unilaterally extinguish their liability, and Texas advances theories of contract liability applicable to both Reynolds and Imperial. Texas urges that under well-settled Texas law, a contracting party cannot unilaterally eliminate its obligations **[**16]** under a contract via an assignment to a third party. Texas also emphasizes that the Texas Settlement expressly binds successors and assigns, and Imperial

---

[1] Justice Don Willett, writing for the Texas Supreme Court, subsequently set out the circumstances giving rise to this case:

> This case arises in part from historic litigation that buffeted the tobacco industry in the last decade of the twentieth century. The Lone Star State was a significant player in that litigation. Just over twenty years ago, Texas sued several of the nation's leading tobacco companies, asserting violations of numerous state and federal fraud, racketeering, antitrust, conspiracy, and other laws.
>
> Texas's claims were that these companies knowingly misrepresented their products as safe and targeted minors in their advertisements. More than 40 states filed similar suits against the tobacco industry. The companies' collective defense faltered, however, when one of the companies, Liggett, settled with Texas and several other states (the Liggett Settlement), agreeing in large part to cooperate with the states in their suits against the remaining defendants.

Hegar v. Tex. Small Tobacco Coal., 496 S.W.3d 778, 781 (Tex. 2016) (Willett, J.).

[2] Approximately 16,000,000,000 cigarettes are manufactured and sold every year under these four brands.

acknowledges itself to be an "assign" of the Acquired Brands in the contract by which it purchased those brands. Finally, Texas urges that the central purposes of the Texas Settlement—finality and medical reimbursement—would be undercut if a settling defendant could eliminate its obligations under the Texas Settlement, while still profiting from the sales of those same cigarettes via a sale of the brands themselves.

Philip Morris USA ("PMUSA"), the only remaining settling defendant[3] from the **[*408]** Texas Settlement (besides Reynolds) filed a similar Motion to Enforce the Texas Settlement ("PMUSA's Motion to Enforce") (collectively, "Motions to Enforce"). PMUSA based its motion on injuries it claims arise from Reynolds' wrongful distortion of the relative payment allocation system created within the Texas Settlement. PMUSA asserts that the less Reynolds pays, the more it pays. PMUSA also represents that if this Court recognizes a route for Reynolds to escape the obligations imposed by the Texas Settlement, PMUSA will likely do the same.

The **[**17]** Texas Settlement is a contract, and the role of this Court in interpreting that contract is to ascertain the expressed intent of its parties. As such, the question presented by the Motions to Enforce is whether the signatories to the Texas Settlement expressed an intent to allow the settling tobacco manufacturers to unilaterally extinguish their payment obligations under the Texas Settlement by selling the brands which form the subject matter of the Texas Settlement. For the reasons described herein, the Court concludes they did not.

Accordingly, having considered the Motions to Enforce, and for the reasons set forth herein, Texas' Motion to Enforce (Dkt. No. 2214) is **GRANTED-IN-PART, DENIED-IN-PART**, and **CARRIED-IN-PART** to the extent and as set forth herein. For the same reasons, PMUSA's Motion to Enforce (Dkt. No. 2222) is **GRANTED-IN-PART, DENIED-IN-PART**, and **CARRIED-IN-PART** to the extent and as set forth herein.[4]

I. <u>Factual and Procedural History</u>

A. Original Litigation

Texas filed the litigation which gave rise to the Texas Settlement on March 28, 1996. Texas alleged that medical research increasingly showed that consumption of tobacco products had harmful health **[**18]** consequences and that Texas had spent significant sums of money through its delivery of Medicaid and other state-level healthcare programs to "citizens who suffer, or have suffered, from tobacco related injuries, disease or sickness" resulting from the settling defendants' tobacco sales. *Original Complaint*, Dkt. No. 1 at 5. According to the Complaint, the nation's major tobacco manufacturers had systematically targeted children and youth with cigarette advertisements, in order to produce early-in-life addiction, and had collectively conspired to produce misinformation about the medical effects of cigarette consumption, cumulatively costing Texas billions of dollars in medical expenses. On the basis of these factual allegations, Texas asserted violations of the Federal Racketeer Influenced and Corruption Act, violations of federal and state ***antitrust law***, and a panoply of state-level products liability and tort theories related to Texas' healthcare expenditures related to tobacco-related **[*409]** illnesses. *Fourth Amended Complaint*, Dkt. No. 1328.

---

[3] While PMUSA is formally postured as a defendant to the underlying civil litigation, PMUSA joins Texas' effort to enforce the Texas Settlement. Accordingly, in this Order, the Court will use the designation "Defendants" to refer collectively to only Imperial and Reynolds, who jointly oppose the motions urged by Texas and PMUSA.

[4] At the joint request of the parties, the Court previously issued an order bifurcating the issue of liability under the Texas Settlement from an issue related to the relative allocation of payment obligations between the settling defendants—an issue primarily advanced by PMUSA, as the party whose relative payment obligations have been allegedly distorted as a result of the sale of the Acquired Brands. *See Bifurcation Order*, Dkt. No. 2328. Since this Order determines that Reynolds remains liable under the Texas Settlement for the payments on the Acquired Brands, the remaining issue related to profit adjustment now appears moot. The Court will invite additional briefing on the disposition of the profit adjustment issue in a separate order filed contemporaneously herewith.

Texas named every major domestic tobacco manufacturer as a defendant. The list of such defendants includes: The American Tobacco Company; R.J. Reynolds **[**19]** Tobacco Company; Brown & Williams Tobacco Corporation; B.A.T. Industries P.L.C.; Philip Morris, Inc.; Liggett Group, Inc. ("Liggett"); Lorillard Tobacco Company, Inc. ("Lorillard"); and the United States Tobacco Company.[5]

B. The Texas Settlement, the Master Settlement Agreement, and the Other Previously Settled States ("PSS") Agreements

The negotiations giving rise to the Texas Settlement began in earnest when one of the nation's largest tobacco manufacturers—Liggett—settled with the several states that had brought suit, and "agree[d] in large part to cooperate with the states in their suits against the remaining defendants." *Hegar v. Tex. Small Tobacco Coal., 496 S.W.3d 778, 781 (Tex. 2016)*. The Texas Supreme Court has succinctly summarized the events giving rise to the Texas Settlement after Liggett began cooperating with the several states:[6]

> Shortly thereafter, the states and tobacco defendants executed a Memorandum of Understanding and Proposed Resolution (Proposed Resolution). The Proposed Resolution sought "to forge an unprecedented national resolution of the principal issues and controversies associated with the manufacture, marketing and sale of tobacco products in the United States." According to the Proposed Resolution, federal legislation would **[**20]** provide the vehicle for implementing the solution and ensuring "comprehensive regulation of the tobacco industry while preserving the right of individuals to assert claims for compensation."
> The Proposed Resolution would primarily require the remaining defendants to make annual payments in perpetuity "to fund health benefits program expenditures and to establish and fund a tobacco products liability judgments and settlement fund." Those payments would total approximately $368.5 billion over the first 25 years. The payments would be adjusted for inflation and changes in the defendants' sales. The Proposed Resolution would also impose significant limitations on the defendants' marketing of their products. In return, the states would waive their claims against the defendants as well as future claims arising from the sale or use of tobacco products. The Proposed Resolution never became federal law, but it would serve as the blueprint for several settlements in the following months.
>
> The Master Settlement Agreement (MSA) was the largest of the subsequent settlements, involving 46 states plus American territories and the District of Columbia (collectively, settling states). Under the MSA, the **[**21]** settling states released past, pending, and future claims against the remaining defendants (deemed "participating manufacturers") that sought "recovery for Medicaid and other public health expenses incurred in the treatment of smoking-induced illnesses." Tracking the Proposed Resolution, the MSA required the participating manufacturers to make initial payments followed by perpetual annual payments based on their market share and product **[*410]** sales. The MSA also imposed marketing restrictions on the participating manufacturers, forbidding advertising to minors and requiring initiatives to prevent such advertising. The MSA permits other tobacco manufacturers to join the MSA, generally requiring these "subsequent participating manufacturers" to comply with the MSA's restrictions and ongoing payment scheme to receive the same release of claims that the participating manufacturers received.
>
> Texas was not a party to the MSA. Instead, Texas and three other states—Minnesota, Mississippi, and Florida—reached individual settlements with the remaining tobacco defendants. For purposes of this case, the differences between these settlements are negligible. The Texas Comprehensive Settlement Agreement **[**22]** and Release (Comprehensive Settlement) accomplished much of what the Proposed Resolution would have accomplished, exemplified by the Comprehensive Settlement's constant invocation of the Proposed Resolution and the Proposed Resolution's attachment to the Comprehensive Settlement as an appendix. It stated that

---

[5] As a result of mergers and acquisitions, the majority of these manufacturers no longer exist as they did when this action was commenced. The only remaining settling defendants are PMUSA and Reynolds.

[6] Justice Don Willett, writing for a unanimous Texas Supreme Court.

> Texas and the remaining defendants (settling manufacturers)—Philip Morris, Inc., R.J. Reynolds Tobacco Co., Brown & Williamson Tobacco Co., Lorillard Tobacco Co., and United States Tobacco Co.—desired to settle on terms "comparable to those contained in the Proposed Resolution, which terms will achieve for Texas immediately and with certainty the financial benefits it would receive pursuant to the Proposed Resolution."
>
> The Comprehensive Settlement required the settling manufacturers to make initial payments to Texas of $725 million—Texas's 7.25% share of the $10 billion initial payment to the states set out in the Proposed Resolution. The Comprehensive Settlement also required the settling manufacturers to make annual payments in perpetuity. Adjusted by inflation and the settling manufacturers' market share and product sales, the payments may increase, decrease, and even end if **[**23]** a manufacturer stops selling tobacco products altogether. The Comprehensive Settlement stated that the initial payments "constitute[d] reimbursement for public health expenditures by the State of Texas." It further stated that "[a]ll other payments . . . are in satisfaction of all of the State of Texas's claims for damages incurred by the State in the year of payment or earlier years, including those for reimbursement of Medicaid expenditures and punitive damages." Pursuant to a most-favored-nation provision, the amount of the payments corresponds to the amount required under the Minnesota settlement, which costs settling manufacturers approximately $0.64 per cigarette pack. The parties to this litigation do not dispute that the settling manufacturers' payments to the State result in annual revenue of approximately $500 million.
>
> As in the MSA and Proposed Resolution, the Comprehensive Settlement prohibited the settling manufacturers from marketing to minors and required them to support programs created to reduce underage smoking. Further, the Comprehensive Settlement prevented the settling manufacturers from opposing any legislative or administrative initiatives to strengthen penalties **[**24]** for tobacco-product sales to minors and for minors in possession of those products.
>
> In return, the Settlement secured robust immunity for the settling manufacturers, though they admitted no wrongdoing and disclaimed any liability. Texas released all past claims "that were or could have been made in this action or any comparable federal or state action." And as to future claims, Texas released those claims "directly or indirectly based **[*411]** on . . . the use of or exposure to Tobacco Products manufactured in the ordinary course of business, including without any limitation any future claims for reimbursement for health care costs allegedly associated with use of or exposure to Tobacco Products."

Id. at 781-83. As noted by the Fifth Circuit, after "the parties executed the original [Texas Settlement] they have amended it twice."[7] *Texas v. Am. Tobacco Co., 463 F.3d 399, 401-02 (5th Cir. 2006)*. "On July 24, 1998, the parties entered into the Stipulation of Amendment to Settlement Agreement and for Entry of Consent Decree ('1998 Amendment'), and on June 8, 2001, the parties entered into the Agreement to Amendment to Settlement Agreement ('2001 Amendment')." *Id. at 402*.

> The 1998 Amendment reflects Texas' exercise of its rights under the Original Agreement's "Most Favored Nation" provision to adopt the more favorable terms of the settlement agreement reached between the Settling Defendants and the State of Minnesota on May **[**25]** 8, 1998. The Original Agreement tied the formula for calculating the annual payments to the "respective share of *sales* of cigarettes by unit for consumption in the United States." Apparently, some of the Settling Defendants began marketing cigarettes in "two for one" or "buy two get one free" promotions. "Free" cigarettes given as part of such promotions would likely be excluded from the annual payment calculations of the Original Agreement because they would not have been considered cigarettes "sold." Perhaps recognizing the potential decrease in the amount of the settlement payments presented by these promotions, the settlement agreement reached between the State of Minnesota and the Settling Defendants tied the Settling Defendants' annual payment obligations to *shipped* cigarettes. Texas and the Settling Defendants thereafter entered into the 1998 Amendment, which changed the annual payment

---

[7] As used herein, the Court will refer to the original settlement along with the two amendments collectively as the "Texas Settlement."

> provisions by tying the annual payment calculations to the "number of cigarettes *shipped* for domestic consumption." *See 1998 Am.*, at Appx. A (emphasis added).

Id.

The 1998 Amendment also requires each settling defendant to make payments to the private lawyers hired by Texas to represent it in prosecuting the underlying **[**26]** action ("Private Counsel"). *1998 Amdt.*, Dkt. No. 2222-2 at 24 § 22. Specifically, the 1998 Amendment included a provision incorporating a document entitled the Texas Fee Payment Agreement, which provided that each settling defendant would make payments to Texas' Private Counsel based on each settling defendant's Market Share. *Id.* at 27 § 24 (integrating the Texas Fee Payment Agreement as part of the "entire, complete and integrated statement" of the terms of the Texas Settlement); *see also generally Texas Fee Payment Agreement*, Dkt. No. 2222-11.

The payment to Texas' Private Counsel was made in addition to the payment made by settling defendants to Texas itself. *See Texas Fee Payment Agreement*, Dkt. No. 2222-11 at 2 § 1. The payment to Texas' Private Counsel is calculated using the same definition of Market Share as the payment made to Texas under the Texas Settlement. *Id.* at 16 § 24 ("Terms used herein that are defined in the Settlement Agreement . . . are . . . used in this Agreement as defined in the Settlement Agreement."); *compare id.* at 13 § 15(d) (defining **[*412]** the Texas Fee Payment Agreement obligation as follows: "Each Settling Defendant shall severally pay, ***pro rata in proportion to its respective Market Share***, its share of the **[**27]** amounts" of payment due to Texas' Private Counsel), *with 1998 Amdt.*, Dkt. No. 2222-2 at 11 § 7 (defining the Texas Settlement payment obligation as follows: "Each of the Settling Defendants . . . agrees that, on December 31, 1999 and annually thereafter on December 31st of each year after 1999 . . . it shall severally cause to be paid . . . ***pro rata in proportion to its Market Share***, its share of" the amounts due to Texas under the Texas Settlement).

The 2001 Amendment was also directed towards the specifics of payment calculation and addressed the definition of the term "net operating profits" as used in the 1998 Amendment. *2001 Amdt.*, Dkt. No. 2214-4 at 4 § 5 (clarifying that profit adjustment based on a settling defendant's "net operating profits" shall exclude "investment income" in such calculation). Both amendments agreed that the original agreement remains "in full force" unless a term was expressly revised. *See id.* at 2 § 2 ("The provisions of this Agreement supplement and amend the terms of the Original Agreement and the Stipulation of Amendment, which shall remain in full force and effect except insofar as they are expressly revised by the provisions of this Agreement."); *1998 Amdt.*, Dkt. No. 2222-2 at 3 § 1 (same).

C. The 2004 Motion to Enforce

This dispute is **[**28]** not the only time this Court has addressed a motion to enforce the Texas Settlement. *Texas v. Am. Tobacco Co., 463 F.3d 399 (5th Cir. 2006)*. On May 27, 2004, Texas filed a Motion to Enforce the Texas Settlement against Brown & Williams Tobacco Co. ("B&W"), which had begun to manufacture cigarettes for Star Tobacco & Pharmaceuticals ("Star"), a non-signatory to the Texas Settlement. *Id. at 401*. Under the Texas Settlement, B&W had only reported the cigarettes it directly sold, and had not included the cigarettes which it manufactured for Star. *Id.* "Had B&W reported those cigarettes as its own, Texas claims it would have received an additional $16,420,252 in settlement payments for the years 1999 through 2002." *Id. at 405*.

B&W defended on the ground that the Texas Settlement was ambiguous on this question, and that the parties had engaged in a course of performance suggesting that B&W was not liable for the cigarettes it manufactured for Star. Specifically, the Texas Settlement requires the group of settling defendants to make payments on "the aggregate number of cigarettes shipped for domestic consumption," and calculated each individual defendant's payments based on "such Settling Defendant's audited reports of shipments of Tobacco Products provided to the **[**29]** [Securities and Exchange Commission ('SEC')] (or, in the case of any Settling Defendant that does not provide such reports to the SEC, audited reports of shipments containing the same shipment information as contained in the reports provided to the SEC)." *Id. at 404-05*. Since B&W was "a subsidiary of a British corporation, B&W does not report to the SEC." *Id. at 406*.

B&W argued that "audited reports of shipments" was a term of art given unique meaning by the course of performance of the parties. According to B&W, the reference to "audited reports" was directed to reports made to a private industry organization called Management Science Associates, Inc. ("MSA, Inc."). *Id. at 402*. "MSA, Inc. is an independent third party that has been collecting information related to tobacco companies' shipments to wholesalers for over thirty years. As part of its Cigarette Research Audit ('CRA') program, MSA, Inc. collects and reports information **[*413]** from cigarette manufacturers concerning shipments to their wholesalers and distributors." *Id. at 402-03*. Pursuant to the reporting "agreement between MSA, Inc. and B&W," "B&W only reports the cigarettes it ships through its own distribution system"—not "the contract-manufactured cigarettes" it made for **[**30]** Star. *Id. at 403*. Accordingly, B&W's argument proceeded as follows—"audited reports" is ambiguous; the parties' course of performance suggests "audited reports" was a reference to MSA, Inc. reports; and MSA, Inc. reports only include direct shipments, not the Star shipments. *Id.*

This Court agreed and found that "since its inception, all of the annual payments due under the Texas Settlement Agreement have been based on MSA, Inc.'s 'Shipments to Wholesale' reports." *Id. at 409*. This Court also found that Texas had expressly and intentionally agreed to calculate cigarette shipments by reference to MSA, Inc. reports "in 2002 when the State and the Settling Defendants entered into an engagement letter with PriceWaterhouseCoopers ('PWC')." *Id. at 404*. As the Court explained, "PWC was engaged to collect 'shipment volume data' from each Settling Defendant and, based on that data, to calculate the payments due under the Texas Settlement Agreement." *Id.* Pursuant to the terms of that engagement letter, all parties agreed that "shipment volume data" was to be calculated by reference to reports to MSA, Inc. *Id.* In view of Texas' express prior consent to the use of MSA, Inc. reports, this Court found a course of performance suggesting **[**31]** nonliability for B&W. *Id.*

Texas appealed this Court's judgment, arguing for the first time on appeal that this Court should not have considered parol evidence without expressly finding the Texas Settlement to be ambiguous. *Id. at 406 n.13*. Texas also urged that, in any case, the Texas Settlement was not ambiguous with respect to this question. *Id.*

The Fifth Circuit affirmed this Court's judgment. While noting that this Court did not expressly address whether the Texas Settlement was ambiguous, the Fifth Circuit conducted its own review and found that the Texas Settlement contained a latent ambiguity. *Id. at 409-10*. The Fifth Circuit found the term "audited reports of shipments" to be latently ambiguous since the Texas Settlement was "completely lacking in detail" about the nature of the audited reports. *Id. at 410*. The Texas Settlement does not set out implementation detail regarding "audited reports," such as *who* would implement such audits and *how* specifically such audits were to be conducted. *Id.* Since the Texas Settlement left those implementation matters unspecified, the Fifth Circuit found that the application of that term, in practice, revealed an ambiguity. *Id.* Concluding that the term was latently ambiguous, the **[**32]** Fifth Circuit found no error in this Court's review of course of performance parol evidence as a means to determine what "audited reports" meant. The Fifth Circuit also determined that this Court's "findings of fact [were] supported by the evidence and certainly are not subject to attack under the clear error standard of review." *Id.*

D. Texas Tobacco Equity Tax Statute

It is helpful to briefly describe the Texas Tobacco Equity Tax ("Tobacco Equity Tax"), enacted by the Texas Legislature in 2013. *Tex. Health & Safety Code § 161.603 et seq.* ***HN1***[] While the Texas Settlement is designed to recover tobacco-related healthcare costs from settling manufacturer defendants, the Tobacco Equity Tax is designed "to recover the State's health care costs imposed by non-settling manufacturers' products," by imposing "a tax **[*414]** on those manufacturers." *Tex. Small Tobacco Coal., 496 S.W.3d at 780*. The Tobacco Equity Tax applies to all "non-settling manufacturers," a class "defined as manufacturers of cigarettes or cigarette tobacco products that did not sign either the Liggett Settlement or the [Texas] Settlement." *Id. at 783*.

The Tobacco Equity Tax relies upon a self-reporting regime from non-settling manufacturers who convey information to the Texas Comptroller of Public Accounts ("Texas Comptroller") or **[**33]** the Texas Office of the Attorney General ("Texas Attorney General"). *See Tex. Health & Safety Code § 161.606*. Since the tax is imposed on cigarettes produced by non-settling tobacco manufacturers, but is directly paid by downstream tobacco distributors, the statute directs the Texas Comptroller to maintain a website indicating the identity of non-settling manufacturers. *Id.* *§ 161.605(g)*. ***HN2***[] The statute also authorizes the Texas Comptroller or the Texas Attorney General, in their discretion, to conduct "reasonable periodic audits" in order "to ensure compliance with this subchapter." *Id.* *§ 161.609*.

E. Asset Purchase Agreement to Present

The crux of the dispute presently before the Court is the result of an Asset Purchase Agreement ("APA") executed between Imperial and Reynolds in 2015. As part of a twenty-seven billion dollar transaction whereby Reynolds would acquire one of the only remaining major tobacco companies—Lorillard—Reynolds was compelled by the United States Department of Justice to divest and sell four of its most popular brands: Winston, Kool, Salem, and Maverick.[8] The Acquired Brands comprise approximately eight percent of the total domestic cigarette market in the United States, representing approximately sixteen billion cigarettes **[**34]** produced and sold each year.

The APA is a contract of more than two-hundred pages governed by Delaware law that memorializes the purchase and sale agreement between Imperial and Reynolds. *APA*, Dkt. No. 2222-6. "The aggregate 'Purchase Price'" for the assets being sold to Imperial—including the Acquired Brands[9]—included two elements. *Id.* § 2.04(a). First, Imperial paid Reynolds "an amount in cash equal to $7,056,202,000." *Id.* Second, the "Purchase Price" also included "the assumption of the Assumed Liabilities by [Imperial]."[10] *Id.*

In the APA, Reynolds agreed to "sell, convey, assign, transfer and deliver" to Imperial both its "right, title and interest" in the Acquired Brands and "all benefits and credits under the State Settlements in respect of the Acquired Brands that relate to the period after the Closing Date." *Id.* § 2.01(a), § 2.01(a)(vi). Reynolds also conveyed "all claims, causes of action, defenses and rights of offset or counterclaim against third parties relating to any Transferred Asset or any Assumed Liability." *Id.* § 2.01(a)(v). Imperial further agreed to "purchase, acquire and accept" the same. *Id.*

Imperial also undertook a variety of obligations related to the Acquired Brands. *Id.* § 2.01(c). For example, "[s]ubject to the **[**35]** Agreed Assumption Terms" set out in the APA, Imperial assumed from Reynolds "all Liabilities under the State Settlements **[*415]** in respect of the Acquired Tobacco Cigarette Brands." *Id.* § 2.01(c)(vii). The APA also reflects a specific mechanism for calculating the "amounts payable after the Closing Date by [Imperial] under the State Settlements," including the Texas Settlement. *Id.* at Ex. F, § 4.4. That mechanism provides that Imperial will *only* be liable under the State Settlements for the Acquired Brands, and will not include its other cigarette sales as part of the payments Imperial would make. *Id.*

One of the negotiated terms that Reynolds sought and obtained was that Imperial would undertake "reasonable best efforts" to become a party to the Texas Settlement. *Id.* at Ex. F., § 2.2. Specifically, Imperial agreed to "use its reasonable best efforts to reach agreements with each of the Previously Settled States, by which the [Imperial] will assume, as of the Closing, the obligations of a Settling Defendant under the PSS Agreement with each such State, with respect to the Acquired Tobacco Cigarette Brands, on the same basis as the Settling Defendants prior to the Closing."[11] *Id.*

---

[8] Antitrust clearance from the Department of Justice was conditioned on the sale of the Acquired Brands.

[9] The assignment of the Acquired Brands included transfer of then-existing raw tobacco, tobacco farmland, brand-related intellectual property, existing fabricated cigarettes, and other related assets.

[10] The "Assumed Liabilities" are expressly set forth in the APA.

[11] Imperial failed to undertake "the obligations of a Settling Defendant" by "the Closing" of the APA in 2015. That failure is the subject of a breach of contract action between Reynolds and Imperial, and is presently pending before the Chancery Court of Delaware. See also **[**36]** *ITG Brands, LLC v. Reynolds Am.,Inc., No. CV 2017-0129-AGB, 2017 Del. Ch. LEXIS 819, 2017 WL 5903355, at *9-*12 (Del. Ch. Nov. 30, 2017)* (Bouchard, C.) (rejecting as "absurd" Imperial's contention that its obligations to use

Imperial and Reynolds reached out to Texas during 2015 in an attempt to join the Texas Settlement. Both Defendants had negotiated a joinder letter, suggesting a recalibrated set of payment obligations under the Texas Settlement in addition to the assignment of the Acquired Brands. However, Defendants neither informed PMUSA nor sought its consent to join, as required under the express terms of the Texas Settlement. The Texas Settlement provides: "None of the rights granted or obligations assumed under this Settlement Agreement by the parties hereto may be assigned or otherwise conveyed without the express prior written consent of all of the parties hereto." *Texas Settlement*, Dkt. No. 2222-1 at 4 § 2. Based on the failure to obtain PMUSA's consent, Texas rejected the offer as inconsistent with the express terms of the Texas Settlement.[12]

[*416] After Imperial "continued back and forth with [Texas] in February, March, April of 2015," it was unable to reach an agreement with Texas, because Texas refused to join Imperial to the Texas Settlement in a manner that did not comply with its terms. *Hearing Tr.*, Dkt. No. 2354 at 63:24-64:1. No agreement was reached by the date the APA closed in late 2015.[13]

Having purchased the Acquired Brands, Imperial reported to the Texas **[**38]** Comptroller that it was a non-settling manufacturer. Imperial, in effect, told the Texas Comptroller that it was subject to the Tobacco Equity Tax, but not the Texas Settlement. Without auditing Imperial's report, the Texas Comptroller updated its website to reflect Imperial's submission. This online update listed the Acquired Brands as the brands of a non-settling manufacturer. Imperial also submitted Tobacco Equity Tax payments for the Acquired Brands, which the Texas Comptroller passively accepted. *Hearing Tr.*, Dkt. No. 2354 at 13:15-20 ("[T]he equity tax payments were accepted passively by

---

"reasonable best efforts" terminated as of the date when the APA closed). Reynolds is also seeking indemnity for any judgment against it levied under the PSS Agreements, including the Texas Settlement.

[12] At the hearing before this Court, Reynolds disagreed that Texas had rejected Imperial's offer to join the Texas Settlement. However, in the Chancery Court of Delaware, Imperial described the interaction with Texas as follows:

> [I]n Texas we gave them a draft joinder in January 2015. We had some conversations with it in April 2015 in which it said, you know, essentially you got to go get Philip Morris involved here because we don't think you can join without Philip Morris' consent. And we never heard another word from Texas until a demand letter in August of 2018, this year.

[**37] *Del. 6/4/19 Hearing Tr.* at 37:20-38:3, *ITG Brands, LLC v. Reynolds Am. Inc.*, C.A. No. 2017-0129-AGB (Del. Ch. June 4, 2019). Texas described the interaction similarly before this Court:

> After we met in 2014 with [Imperial] and with Reynolds, you know, the State did have concerns about the method that [Imperial] was proposing to join because it did not comport with the method that is actually contained in the contract itself, in the settlement agreement for that -- you know, to make that change, to insert a new party into the Texas Settlement Agreement.

Hearing Tr., Dkt. No. 2354 at 15:12-18. Counsel for Reynolds, by contrast, told this Court that Texas actually never responded. In the hearing before this Court, Reynolds told the Court that Texas had not responded at all. The following colloquy occurred between counsel for Reynolds and the Court:

> COUNSEL FOR REYNOLDS: The State was put on notice of the pending transaction in 2014 prior to -- put on notice by [Imperial] --
>
> THE COURT: But it's also uncontested that the State did not consent, correct?
>
> COUNSEL FOR REYNOLDS: Your Honor, the State did not consent, and to -- to Reynolds's knowledge, the State did not respond.

Id. at 43:10-17. The Court has no reason to believe counsel for Reynolds was intentionally misspeaking. However, the Court also has no basis to believe that the substantively identical descriptions from Texas and Imperial are incorrect.

[13] One primary reason that the Texas Settlement required the consent of all parties before a joinder could occur is that the payment framework of the Texas Settlement is relative. While Texas receives approximately the same amount of money each year, the distribution of payment burdens among the settling defendants can vary substantially. As detailed later in this Order, the joinder order proposed by Reynolds and Imperial could have distorted their payment obligations in a manner that would proportionately *increase* PMUSA's obligations (and concomitantly decrease Reynolds' obligations).

the comptroller's office, but there was never any agreement that those payments were somehow to be made in lieu of the payments pursuant to the Texas Settlement Agreement.").

F. The Present Motions to Enforce

Texas filed the instant Motion to Enforce the Settlement Agreement ("Texas' Motion to Enforce") on January 28, 2019. Texas primarily argues that Reynolds is liable for breach of the Texas Settlement under a variety of theories, but also argues alternatively that Imperial must make the Texas Settlement payments on the Acquired Brands. Texas also urged that it is a third-party beneficiary of **[**39]** the APA between Reynolds and Imperial, because the APA contemplates Imperial's performance of actions in satisfaction of Reynolds' legal obligations to Texas.

Shortly after Texas filed its Motion to Enforce, PMUSA followed suit and filed its Motion to Enforce the Settlement Agreement ("PMUSA's Motion to Enforce") (collectively, "Motions to Enforce") on January 31, 2019.

In addition to echoing many of Texas' arguments, PMUSA focuses significantly on Reynolds' actions under the Texas Settlement. As described above, the Texas Settlement has two annual payment provisions: a provision requiring settling defendants to pay Texas, and a parallel provision requiring settling defendants to pay Texas' Private Counsel. Both provisions calibrate payments in proportion to each settling defendant's Market Share, using the same definition of Market Share.

Even after the closing of the APA—and continuing through the present—Reynolds has included the Acquired Brands as part of its Market Share, but only when calculating payments made to Texas' Private Counsel. Reynolds does not include the **[*417]** same Acquired Brands as part of its Market Share when making payments to Texas itself. PMUSA argues that Reynolds **[**40]** cannot have it both ways. When pressed at oral argument on the Motions to Enforce, Reynolds indicated that it was willing to concede that the Acquired Brands should be included in the payments under the Texas Settlement to Texas' Private Counsel. Oddly, however, part of Reynolds' reasoning for such concession was because those payments are less expensive than the payments to Texas.[14]

1. Joining Imperial and Extensive Discovery

On May 22, 2019, pursuant to *Federal Rule of Civil Procedure 25*, Imperial was voluntarily joined to the instant litigation by order of this Court. *Joinder Order*, Dkt. No. 2276 ("***HN3***[] A party who receives any interest in assets that are subject to a settlement agreement may be joined in settlement enforcement proceedings pursuant to *Fed. R. Civ. P. 25*.") (citing *Negron-Almeda v. Santiago, 579 F.3d 45, 53 (1st Cir. 2009))*. Imperial agreed to join on the condition that it receive discovery, which the Court subsequently granted.

Though all parties apparently agreed—and still agree—that the Texas Settlement is unambiguous, Reynolds and Imperial both sought extensive discovery from Texas. Out of an abundance of caution, and in view of the truth-seeking purpose of discovery, the Court ordered substantial discovery from Texas.[15]

Over Texas' persistent objections, the Court granted nearly **[**41]** every discovery request sought by either Imperial or Reynolds. *See Discovery Order*, Dkt. No. 2278. The Court required Texas to produce responsive documents not only from the Office of the Texas Attorney General, but also required Texas to canvass "all state agencies" for responsive documents. *Id.* at 5. Though Texas asked the Court to limit discovery to "a date range spanning January 1, 2014 through January 27, 2019," the Court granted the requests for production from Reynolds

---

[14] Though payments to Texas and Texas' Private Counsel are calculated by reference to the same base number of cigarettes, the payments due to Texas are calculated by reference to a higher percentage rate than the payments to Texas' Private Counsel.

[15] PMUSA neither sought nor received discovery, ostensibly because any such documents had already been exchanged twice over in PMUSA's related disputes with Imperial and Reynolds in Florida and Minnesota.

and Imperial based on "a date range spanning March 28, 1996, through June 28, 2019." *Id.* The Court granted all but one of Imperial's requests for production, and granted twelve of Reynolds' nineteen separate requests for production addressed to Texas. *Id.* Finally, the Court ordered Texas to produce a witness pursuant to *Federal Rule of Civil Procedure 30(b)(6)* for seven hours of deposition. *Id.*

In the interest of fairness, the Court also granted Texas' requests for discovery. Texas asked Reynolds and Imperial to produce the document production from the related litigation in Florida and Minnesota, *see infra* Section I.G, which was unopposed by Reynolds and Imperial, as well as all "non-privileged documents relating to the Texas Settlement Agreement, from January **[**42]** 1, 2014, to January 27, 2019" and a 30(b)(6) witness from Imperial and from Reynolds, respectively, for a cumulative total of seven hours.

This Court has gone out of its way to ensure that each party received the broadest proportional discovery which they sought, so that no one would stand before the Court at its hearing on the Motions to Enforce and complain that they had been precluded in any way from being fully knowledgeable and prepared. No such complaints were made.

[*418] *2. Imperial's Failure to Join the Texas Settlement*

The Court held a hearing on the Motions to Enforce on October 29, 2019. Given the sophisticated nature of the parties, and the discovery each had obtained, the Court asked each party: Why have the parties been unable to resolve this issue?

According to Imperial and Reynolds, Imperial stood ready to join the Texas Settlement at the closing of the APA in 2015. With cooperation, Texas could have received the remedy it now asks the Court to order—payment on the Acquired Brands—and PMUSA would not be stuck with a disproportionate part of the Texas Settlement's allocated payments.

So what remains in dispute? As is often the case, the devil is in the details—namely, the details **[**43]** concerning the relative allocation of payments between PMUSA, Imperial, and Reynolds. As noted above, Imperial and Reynolds refused to seek PMUSA's prior written consent before seeking to join the Texas Settlement, and Texas declined to consent to Imperial's joinder in a manner that would violate the consent provisions in the Texas Settlement. When the Court asked whether Imperial ever sought PMUSA's consent, Imperial indicated that it had not. *Hearing Tr.*, Dkt. No. 2354 at 133:14-18. However, Imperial did not explain *why* it had not.

Keeping in mind that these manufacturers exist in a world of constant competition with each other, the answer appears to relate to the commercial advantages and disadvantages between PMUSA and Imperial or Reynolds. Though this issue is set to be more fully explored in the latter portion of the bifurcated briefing schedule,[16] the Texas Settlement makes plain that PMUSA has legitimate interests that may be adversely affected by improper joinder of another settling party. Texas is primarily interested in receipt of the correct ***overall*** amount demanded by the Texas Settlement. The settling defendants, however, are primarily interested in the appropriate allocation **[**44]** of that overall amount among and ***between themselves***. It is reasonable that PMUSA would have legitimate concerns that modifications to the Texas Settlement, negotiated in its absence, may have serious consequences that place a disproportionate liability on PMUSA. Indeed, such a joinder without PMUSA's participation or consent appears to be the cause of significant litigation regarding the Mississippi Settlement. *See infra* Section I.G.3.

This reveals a proverbial chicken-and-egg conundrum where negotiations between the relevant parties—Texas, Imperial, Reynolds, and PMUSA—appeared to break down. Texas refused to negotiate without PMUSA; Imperial and Reynolds refused to negotiate with them.

G. Other PSS Litigation

[16] *See supra* n.4 (describing the bifurcation order and process).

Reynolds, Imperial, and PMUSA have also been embroiled in litigation in the other Previously Settled States ("PSS" and "PSS Agreements")—Mississippi, Florida, and Minnesota. Florida and Minnesota have both entered a judgment finding Reynolds liable (and leaving open the question of Imperial's liability), while the litigation in Mississippi appears to have been partly resolved by a negotiated settlement joining Imperial to the Mississippi Settlement.

While these other actions **[**45]** do not govern this Court's reasoning or result, the Court reviews the disputes in Florida, Minnesota, and Mississippi to fully explain the existing legal landscape over which these parties have traveled to get to this Court. The Court considers the decisions reached in these actions to the extent their reasoning is persuasive.

[*419] *1. Florida*

On December 27, 2017, the Circuit Court for the Fifteenth Judicial Circuit of Florida ("Florida Court") issued its Order Granting-In-Part Settlement-Agreement-Enforcement Motions ("Florida Court's Judgment") brought by Florida and PMUSA. The Florida Court began by reciting the history of Florida's August 25, 1997 settlement, which it referred to as the Florida Agreement. *Fla. Ct. Judgment*, Dkt. No. 2222-7 at 1. The Florida Agreement imposes "payments to Florida every December 31 in perpetuity" based on each settling defendant's "proportionate share" as measured by such defendant's Market Share. *Id.* at 2. In exchange, "Florida executed a release of all its claims for substantial damages, primarily in the form of health-care costs, which it alleged it had incurred and would continue to incur due to the tobacco-parties' alleged predatory and deceptive practices **[**46]** in the marketing of their cigarettes." *Id.*

The annual payments received by the State of Florida ("Florida") are adjusted in several respects, pursuant to an amendment to the Florida Agreement that was executed on September 11, 1998 ("September 1998 Amendment"). *Id.* at 2 nn. 3-4. Those adjustments include adjustments for inflation, for the relative volume sold by the settling defendants, and for the relative profitability of the settling defendants. *Id.* The September 1998 Amendment included a provision entitled the "Florida Fee Payment Agreement," which provides payment to the private counsel hired by Florida to prosecute the underlying action which gave rise to the Florida Agreement. *Id.*

The relevant dispute in the Florida Court arose in much the same manner as the present dispute. Following Reynolds' assignment of the Acquired Brands to Imperial, Reynolds "modified its payments under the Florida Agreement subsequent to the mid-2015 closing and justified the new payments exclusively on the fact that Imperial, not Reynolds, was selling the cigarettes under the four brands Reynolds transferred to Imperial." *Id.* at 2-3. As a result, "Florida filed its motion to enforce the Florida Agreement against Reynolds and Philip Morris filed a similar motion." *Id.* at 3.

On Florida's **[**47]** motion, the Florida Court joined Imperial to that litigation on March 30, 2017, and on June 8, 2017, "set the matter for hearing on 'liability only.'" *Id.* "In the context of this matter, the liability question is whether Reynolds, Imperial, either or both is-or-are obligated to make payments to Florida for cigarettes sold for consumption in the United States under the four brands transferred by Reynolds to Imperial." *Id.*

As an initial matter, the Florida Court found that Imperial had not assumed liability for any payments under the Florida Agreement. Specifically, the Florida Court recognized that Imperial's liability turned on the interpretation of its promise, in the APA, to use "reasonable best efforts" to join the Texas, Mississippi, Minnesota, and Florida Settlements. *Id.* at 7-9. Accordingly, the Florida Court concluded that the "reasonable best efforts" provision "is to be determined by the Delaware Chancery Court," where the interpretation of that provision of the APA is presently being litigated.[17] *Id.* at 9; *see also id.* at 12 **[*420]** ("Once again, it is for the Delaware Court, not this Court, to determine Reynolds' and Imperial's rights and obligations under their asset-purchase agreement.").

---

[17] Indeed, the scope of obligations imposed by the term "reasonable best efforts" is an issue of construction presently pending before the Delaware Chancery Court. Depending on the Delaware Chancery Court's construction of "reasonable best efforts,"

The Florida **[**48]** Court then turned to the issue of whether Reynolds remained liable under the Florida Agreement, and concluded that it did. ***HN4***[] Florida law, which follows the general common law rule governing assignments related to contract obligations, provides that a party may not relieve itself of its liability under a contract via an assignment. *Id.* at 12. Surveying the common law, the Florida Court concluded that a party is not relieved of liability based on an assignment of *either* a contract itself, *or* the assets which form the subject matter of the contract. *Id.* at 12-13. Accordingly, the Florida Court found that Reynolds remained liable under the Florida Agreement.

As an additional basis for its holding, the Florida Court looked to Reynolds' continued payments to Florida's private counsel, pursuant to the 1998 Amendment to the Florida Agreement. Notably, and as is true in the instant case, at the time the Florida Court issued its Order, Reynolds included the Acquired Brands in calculating its payment obligations with respect to Florida's private counsel, but omitted the Acquired Brands from its calculation of the same payment obligations to the State of Florida—even though both payments are calculated based on "the **[**49]** same pro-rata share based on nationwide cigarette sales." *Id.* at 14. The Florida Court diplomatically suggested that it was "not entirely persuasive" for Reynolds to acknowledge an ongoing obligation to pay Florida's private counsel counting cigarettes produced as part of the Acquired Brands, and yet simultaneously omit the same cigarettes from payments to the State of Florida. *Id.* Accordingly, the Florida Court concluded that Reynolds remained liable under the Florida Agreement.

2. Minnesota

On September 24, 2019, the District Court for the Second Judicial District of Minnesota ("Minnesota Court") entered an Order and Memorandum ("Minnesota Court's Judgment") addressed to cross-motions for summary judgment filed by the State of Minnesota ("Minnesota"), Imperial, and PMUSA.[18] The Minnesota Court reached substantially the same result as the Florida Court. With respect to Reynolds, it granted Minnesota's motion for summary judgment and PMUSA's accompanying motion to enforce the 1998 Settlement Agreement and Stipulation for Entry of Consent Judgment ("Minnesota Settlement Agreement"). *Minn. Ct. Judgment*, Dkt. No. 2344-1 at 1-2. However, with respect to Imperial, the Minnesota Court denied both Minnesota's **[**50]** motion for summary judgment and PMUSA's motion to enforce the Minnesota Settlement Agreement, finding that a fact question had been raised as to Imperial's assumption of liability. *Id.* Imperial's cross-motion for summary judgment was denied in all respects. *Id.* It appears that Reynolds did not urge an affirmative request for relief.

The Minnesota Court began by recounting the history of the Previously Settled States, and the respective state settlement agreements. *Id.* at 2-4. In addition to recounting much of the same information addressed by the Florida Court, the Minnesota Court identified portions of the APA that impose obligations and secure **[*421]** rights in the Acquired Brands to Imperial. In quoting the language of the APA, the Minnesota Court set forth as follows:

> Under the APA, Reynolds agreed to "sell, convey, assign, transfer and deliver" to [Imperial] its "right, title and interest" in the Acquired Brands and the benefits and credits under the State Settlements, including Minnesota which relate to the period after the closing date. Specifically, [Imperial] agreed to assume:
>
>> all Liabilities under the State Settlements in respect of the Acquired Tobacco Cigarette Brands that **[**51]** relate to the period after the Closing Date, including (A) any recalculation or redetermination of amounts due in respect of the Acquired Tobacco Cigarette Brands that relate to the period after the Closing Date.
>
> Under the APA, [Imperial] also agreed that with the assistance of Reynolds and Lorillard:

---

such term may furnish an independent basis for Imperial to be liable for payments under the Texas Settlement. *See infra* Section III.F; Part IV.

[18] The Minnesota Court entertained motions for summary judgment under a holding of the Minnesota Supreme Court, which provides that "***HN5***[] [a] district court 'shall treat a motion to enforce a settlement agreement as it would a motion for summary judgment.'" *Minn. Ct. Judgment*, Dkt. No. 2344-1 at 11 (quoting *Voicestream Minneapolis, Inc. v. RPC Props., Inc., 743 N.W.2d 267, 273 (Minn. 2008))*.

> in communications and negotiations as required by the Agreement, shall use its reasonable best efforts to reach agreements with each of the Previously Settled States, by which [Imperial] will assume, as of the Closing, the obligations of a Settling Defendant under the PSS Agreement with each such State, with respect to the Acquired Tobacco Cigarette Brands, on the same basis as the Settling Defendants prior to the Closing.

The APA also included Agreed Assumption terms, which applied before and after the closing:

> As soon as practicable after the date of this Agreement, and both before and after the Closing, each of the Parties shall . . . make all such communications with and provide all such information to . . . the States . . . and take all such other steps . . . as are necessary and/or expedient for the purposes of . . . obtaining the agreement as necessary of the States . . . to the Agreed **[**52]** Assumption Terms.
>
> * * *
>
> . . . each of the Parties undertakes that from and after the date of this Agreement and both before and after the Closing it shall . . . adhere fully to and not deviate in any respect from the Agreed Assumption Terms including in any communications with any of the States . . .
>
> Each of [Imperial] and [Reynolds] further undertakes from and after the Closing, to take . . . all such steps as are necessary or expedient . . . to cause the Agreed Assumption Terms, as applicable, to become fully effective and binding on each of the States.

Id. at 5-6 (omissions in original).

In reaching its conclusions about liability, the Minnesota Court first rejected Reynolds' argument that *no one* was liable for payments under the Minnesota Settlement Agreement. "Reynolds' contention that no one has responsibility for settlement payments for the sales of the Acquired Brands is contrary to the essential purpose of the Minnesota Settlement Agreement," which provides that compensatory payments were to be made to Minnesota in perpetuity. *Id.* at 14.

Second, the Minnesota Court examined the structure of the Minnesota Settlement Agreement, which by its terms provides that each settlement payment is designed "not **[**53]** only to compensate Minnesota for health-care costs relating to cigarettes sold in the year of the settlement payment, but also for 'damages incurred by the State in . . . earlier years related to the subject matter of this action.'" *Id.* at 14-15. ***HN6***[] Under the plain language of the Minnesota Settlement Agreement, a "Settling Defendant is therefore responsible for paying in the current year, for the damage its cigarettes **[*422]** caused in the past." *Id.* at 15. Accordingly, "[i]t would be contrary" to that express purpose "if a Settling Defendant could avoid responsibility for current and future harm to Minnesota" resulting from "the past sales of its cigarettes" by selling those brands, "unilaterally extinguish[ing] any liability for future settlement payments, and walk[ing] away." *Id.* The Minnesota Court noted that continuing liability was textually consistent with the fact that Reynolds and the other Settling Defendants "explicitly agreed to a definition which included their 'successors and assigns' in the obligation to make future settlement payments as well." *Id.*

Finally, as an independent basis for finding liability, the Minnesota Court agreed with the Florida Court's finding that "***HN7***[] an asset purchase does not extinguish **[**54]** liabilities associated with that asset." *Id.* at 16. As the Florida Court did, the Minnesota Court surveyed the common law and relevant treatises and found that such authorities uniformly supported its holding that Reynolds should remain liable for its contractual obligations. *Id.* at 16-17 (collecting cases and treatises).

In holding Reynolds liable, the Minnesota Court rejected Reynolds' contention that its liability was limited by the Market Share provision of the Minnesota Settlement Agreement. As summarized by the Minnesota Court, Reynolds contended "that it should no longer be responsible for settlement payments on cigarettes from the Acquired Brands which it no longer sells because those sales are no longer part of its market share." *Id.* at 15. "While this argument has some superficial appeal," the Minnesota Court explained, Reynolds' argument was ultimately inconsistent with the design of the Minnesota Settlement Agreement and the inclusion of a successors-and-assigns clause. *Id.* at 15-16. "'***HN8***[] Market Share' is defined in the Minnesota Settlement Agreement to include the market share of Settling Defendants, which includes their 'successors and assigns.' Accordingly, absent an agreement otherwise, the market share of its **[**55]** successors or assigns remain the obligation of Reynolds as a Settling Defendant." *Id.*

The Minnesota Court also rejected the absence of an express "brand transfer" provision as a basis for releasing Reynolds and Imperial from liability.[19] The Minnesota Court explained that the absence of an express provision boiled down to a drafting choice, because such a provision was unnecessary in light of settled common law relating to contract assignment. Even in the absence of a brand transfer provision, "Reynolds as obligor under the Minnesota Settlement Agreement, could not divest itself of liability for settlement payments on the Acquired Brands without the consent of Minnesota as the obligee." *Id.* at 17. While it could have been a belt-and-suspenders choice to include an express brand transfer provision in the PSS Agreements, the Minnesota Settlement—when read in light of the established common law governing contract assignments—was enough to create a continuing obligation with respect to Reynolds without an additional brand transfer provision. *Id.*

Further, the Minnesota Court also rejected the brand transfer argument on the **[*423]** grounds that it would produce a contractual absurdity and Minnesota **[**56]** courts attempt to avoid contract interpretations that produce such results. As the Minnesota Court explained:

> [T]he idea that the parties to the Minnesota Lawsuit negotiated a resolution which bound the Settling Defendants and their successors and assigns to making perpetual settlement payments in exchange for a permanent release of all claims, yet allowed for the opportunity for a Settling Defendant to snuff out its liabilities by simply transferring its assets, is absurd. The intent of the parties to the Minnesota Settlement Agreement was to obtain an agreement from the Settling Defendants, including Reynolds, to make payments in perpetuity to offset Minnesota's public health care expenditures associated with the use of their cigarettes. To allow Reynolds to escape its obligation by selling the Acquired Brands to another cigarette manufacturer, resulting in no one making settlement payments, would defeat the purpose of the Minnesota Settlement Agreement.

Id. at 17 (citation omitted) (citing Brookfield Trade Ctr., Inc. v. City of Ramsey, 584 N.W.2d 390, 394 (Minn. 1998) ("**HN9**[] We read contract terms in the context of the entire contract and will not construe the terms so as to lead to a harsh and absurd result.")).

The Minnesota Court then turned to Imperial's liability. Imperial **[**57]** broadly alleged "that Minnesota has no enforceable rights against it, because Minnesota was neither a party to the APA, nor was Minnesota a third-party beneficiary." *Id.* at 19. The Minnesota Court rejected that argument out of hand. First, it found that Imperial was a third-party beneficiary under the APA, because Imperial had made promises which conferred direct benefits on Minnesota. In the Minnesota Court's view, "[b]y promising in the APA to negotiate with Minnesota to assume the benefits, credits and obligations of Reynolds under the Minnesota Settlement Agreement, [Imperial] cannot credibly contend that Minnesota has no direct or third-party interest in the APA." *Id.*

Second, the Minnesota Court determined that there was a dispute of fact as to whether Imperial is liable under the "successors and assigns" clause in the Minnesota Settlement. In the Minnesota Court's view, Imperial's status as a "successor or assign" turned on the interpretation of ambiguous provisions of the APA, including the "reasonable best efforts" clause, which governed the scope of obligations assumed by Imperial. *Id.* at 22-23. Since the procedural posture before the Minnesota Court was a series of motions for summary judgment, **[**58]** the Minnesota Court indicated that it could not conclusively resolve the underlying fact questions related to the interpretation of the APA. *Id.*

3. Mississippi

---

[19] As used here, a "brand transfer" provision refers to an express provision prohibiting a settling defendant from transferring cigarettes or cigarette brands. Reynolds and Imperial contended that since the Master Settlement Agreement contained an explicit "brand transfer" provision, while the Minnesota Settlement Agreement did not contain a "brand transfer" provision, the Court should infer that "the intent of the parties in the resolution of the Minnesota Lawsuit was to allow for the Settling Parties to transfer their brands and extinguish their liability for future settlement payments." *Minn. Ct. Judgment*, Dkt. No. 2344-1 at 17.

The litigation in Mississippi exists in a substantially different posture than the other settlement disputes discussed above. Presently, it remains pending before the Chancery Court of Mississippi ("Mississippi Court"). The Mississippi litigation resolved, in substantial part, when Imperial elected to voluntarily join the Mississippi Settlement.

Despite Imperial's joinder, it appears that there are ongoing disputes as to the manner in which Imperial was joined. Imperial was joined without PMUSA's consent, and in a manner that allegedly damaged PMUSA financially. Specifically, PMUSA alleged that the joinder letter submitted by Imperial and Reynolds (and the Mississippi Court order adopting the same) not only joined Imperial, but altered the relative "allocation of the profit adjustment under the [Mississippi Settlement] **[*424]** agreement, in a way . . . that directly affects [PMUSA] to the tune of many millions of dollars a year . . . without telling [PMUSA]." *Miss. Ct. Oral Arg. Tr.*, Dkt. No. 2357-61 at 8:4-23. PMUSA suggested that Reynolds **[**59]** and Imperial misled the Mississippi Court by presenting Imperial's request for joinder as "agreed," when in fact such request was made "without providing any notice, or opportunity for hearing" to PMUSA.[20] *Id.* at 8:20-23. The litigation appears to be ongoing, subject to an apparently pending motion to stay, which is the most recent docket entry on the public docket for the Mississippi litigation. *See* https://perma.cc/7M2C-AXNY .[21]

II. Threshold Issues and Procedural Approach

Before turning to the merits of the Motions to Enforce, the Court addresses four threshold issues: subject-matter jurisdiction, choice of law, issue preclusion (raised by Imperial), and an allegation that the Texas Settlement precludes review of the Motions to Enforce (raised by Reynolds).

As a matter of procedure, the Court will follow the procedure previously approved by the Fifth Circuit in evaluating motions to enforce the Texas Settlement. When this Court last construed the Texas Settlement, the Court received motions to enforce, took evidentiary submissions, heard arguments related to the same, and issued an order which made subsidiary **[**60]** findings of fact and conclusions of law related to the Texas Settlement. In affirming this Court's prior order, the Fifth Circuit agreed that this Court had appropriately made findings of fact in support of its conclusions of law. Accordingly, in disposing of the instant Motions to Enforce, the Court will follow the same procedural approach as was previously approved by the Fifth Circuit: the Court has received pertinent evidence, heard argument, and accordingly issues this Order setting forth its findings of fact and conclusions of law as a part hereof.

A. Subject-Matter Jurisdiction

HN10[] The Court has an independent obligation to determine its subject-matter jurisdiction. *Lemaire Illumination Techs., LLC v. HTC Corp., No. 2:18-cv-00021-JRG, 2019 U.S. Dist. LEXIS 58108, 2019 WL 1489065, at *2 (E.D. Tex. Apr. 4, 2019)* (citing *McCorvey v. Hill, 385 F.3d 846, 848 (5th Cir. 2004))* ("Federal courts 'are under an independent obligation to examine'" whether subject-matter jurisdiction exists).

HN11[] "With consent of the parties, a district court may expressly retain jurisdiction over a settlement agreement in order to enforce the parties' compliance with that agreement and thereafter may assert jurisdiction over breach of

[20] This issue—the distortion of profit adjustment and payment allocation—is the basis upon which Texas refused to consent to Imperial's attempt to join the Texas Settlement without first securing the consent of PMUSA. The existence of the Mississippi litigation shows that Texas' concerns were real and substantial.

[21] To avoid the issues of link rot and reference rot, the Court uses a persistent identifier link to archive the public docket for the Mississippi litigation, as available at the time this Order is issued. *See, e.g.*, Christine L. Borgman, *Open Data, Grey Data, and Stewardship: Universities at the Privacy Frontier*, *33 Berkeley Tech. L.J. 365, 378 n.34 (2018)* (highlighting the importance of "persistent identifiers" that are able to permanently "'resolve to a location' online," in order "to facilitate access in addition to identification").

settlement claims." Energy Mgmt. Servs., LLC v. City of Alexandria, 739 F.3d 255, 261 n.3 (5th Cir. 2014) (citing Kokkonen v. Guardian Life Ins. Co. of Am., 511 U.S. 375, 380-81, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)). A final judgment may make a settlement **[*425]** agreement "part of the order of dismissal" **[**61]** in one of two ways—"either by separate provision (such as a provision 'retaining jurisdiction' over the settlement agreement) or by incorporating the terms of the settlement agreement in the order." Kokkonen, 511 U.S. at 381.

The Court's final judgment in this case expressly incorporates the Texas Settlement. *Final Judgment*, Dkt. No. 1866. The Court indicated that "pursuant to Fed. R. Civ. P. 58, the Court does hereby ORDER, ADJUDGE, and DECREE as follows: the Comprehensive Settlement Agreement and Release (attached as Exhibit A) is hereby adopted and incorporated herein as an enforceable order of this Court." *Id.* at 1 ¶ 1.

In addition to incorporating the Texas Settlement itself, the Court also independently ordered the parties to comply with the terms of the Texas Settlement. *Id.* at 1 ¶ 4 (ordering that "the parties shall comply with all terms and conditions contained in the Comprehensive Settlement Agreement and Release, Exhibit 1, Costs, Expenses and Fees and other attachments"). Accordingly, this Court has subject-matter jurisdiction to dispose of the present Motions to Enforce.

B. Choice of Law

By its terms, ***HN12***[] the Texas Settlement must be interpreted under Texas law. *Texas Settlement*, Dkt. No. 2222-1 at 28 § 26 ("This Settlement Agreement shall **[**62]** be governed by the laws of the State of Texas."). "It is a 'well-settled rule that the construction and enforcement of settlement agreements are governed by principles of local law applicable to contracts generally.'" In re Deepwater Horizon, 785 F.3d 986, 994 (5th Cir. 2015) (quoting Fla. Educ. Ass'n, Inc. v. Atkinson, 481 F.2d 662, 663 (5th Cir. 1973)); *accord* Erie R. Co. v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938); BNSF Ry. Co. v. Panhandle N. R.R., L.L.C., 946 F.3d 705, 711 (5th Cir. 2020).

HN13[] Under Texas law, settlement agreements are interpreted according to the law generally governing contractual agreements. Sandt v. Energy Maint. Servs. Grp. I, LLC, 534 S.W.3d 626, 642 (Tex. App.—Houston [1st Dist.] 2017, pet. denied) ("Under Texas law, we interpret settlement agreements like other contracts."). This is because settlement agreements *are* contracts, which reflect agreements related to the resolution of legal disputes. McCoy v. Rogers, 240 S.W.3d 267, 275-76 (Tex. App.—Houston [1st Dist.] 2007, pet. denied). Accordingly, the Court will apply Texas contract law to the interpretation of the Texas Settlement.

While a variety of other choice of law issues have arisen, including issues related to the law of Florida, Delaware, and Minnesota, for efficiency's sake, the Court will address each subsidiary choice of law issue in context, rather than addressing all choice-of-law issues here.

C. Issue Preclusion

As an initial matter, the Court must address Imperial's contention that this Court should apply issue preclusion to reject PMUSA's Motion to Enforce. Imperial asserts that the Florida Court's Judgment determined that Imperial was not liable **[**63]** under the Florida Agreement, and argues that PMUSA is precluded from relitigating the issue with respect to the Texas Settlement. *Imperial Resp.*, Dkt. No. 2341 at 12.

In response, PMUSA suggests that Imperial's argument is misplaced. Initially, issue preclusion "does not apply, because, as [Imperial] notes, the issues are 'nearly identical' to Minnesota and Florida, and 'nearly identical' is not identical." *PMUSA Reply*, Dkt. No. 2345 at 12. Further, to the extent the Court should find a preclusive effect, PMUSA argues that the Court should give effect to the decision of the **[*426]** ***Minnesota*** Court—not the Florida Court—because the Minnesota Court's Judgment was later in time. *Id.* And the Minnesota Court recognized that Imperial could be liable "if it is an 'assign'"—a question unresolved by the Minnesota Court. *Id.*

Though Imperial only asks the Court to apply preclusion to PMUSA, Texas argues that issue preclusion cannot apply to Texas because Texas "was not a party in Florida," which is required for any form of preclusion to attach. *Texas Reply*, Dkt. No. 2346 at 7.

HN14[] To determine the preclusive effect of a state court judgment, federal courts apply the preclusion rules of the state whose court **[**64]** issued the judgment. *Shimon v. Sewerage & Water Bd. of New Orleans, 565 F.3d 195, 199 (5th Cir. 2009)*. "The Supreme Court has held that 'under the Full Faith and Credit Act a federal court must give the same preclusive effect to a state-court judgment as another court of that State would give.'" *Id.* (quoting *Parsons Steel, Inc. v. First Ala. Bank, 474 U.S. 518, 523, 106 S. Ct. 768, 88 L. Ed. 2d 877 (1986))*.

HN15[] When multiple courts have previously rendered a judgment addressed to the same issue, a subsequent court may give preclusive effect *only* to the decision of the final court to render judgment. *Americana Fabrics, Inc. v. L & L Textiles, Inc., 754 F.2d 1524, 1529-30 (9th Cir. 1985)*. *Americana Fabrics* addressed a scenario where a third court was required to choose between giving a preclusive effect to the judgment of a first court, or the subsequent judgment of a second court. In such a case, "[t]he governing rule to be applied is quite clear. The third court should give res judicata effect to the last previous judgment entered." *Id.* (citing *Treinies v. Sunshine Mining Co., 308 U.S. 66, 75-78, 60 S. Ct. 44, 84 L. Ed. 85 (1939)*; 18 Charles Wright, Arthur Miller & Edward Cooper, *Federal Practice and Procedure* § 4404 (1981); Hon. Ruth B. Ginsburg, *Judgments in Search of Full Faith and Credit: The Last-in-Time Rule for Conflicting Judgments*, 82 Harv. L. Rev. 798 (1969)).

Americana Fabrics articulates several rationales for the Supreme Court's "rule of 'last in time'":

> ***HN16***[] The formal rationale behind the rule is that the implicit or explicit decision of the second court, **[**65]** to the effect that the first court's judgment is not res judicata, is itself res judicata and therefore binding on the third court. The decision is not binding because it is correct; it is binding because it is last. The rule furthers the purposes of res judicata because it "end[s] the chain of relitigation . . . by stopping it where it [stands]" after entry of the second court's judgment, and thereby discourages relitigation in a third court. If an aggrieved party believes that the second court erred in not giving res judicata effect to the first court's judgment, then the proper avenue of redress is appeal of the second court's judgment, not collateral attack in a third court.

Id. at 1530 (citing *Treinies, 308 U.S. at 77-78*; *Porter v. Wilson, 419 F.2d 254, 258-59 (9th Cir. 1969))* (alterations in original).

Notably, the Minnesota Court expressly found that neither the Florida Court's Judgment nor any decision by the Delaware Chancery Court gave rise to preclusion. *Minn. Ct. Judgment*, Dkt. No. 2344-1 at 21 (recognizing that the Florida Court's Judgment and a decision by the Delaware Chancery court "are informative," but are not "dispositive ***or preclusive*** with regard to any obligations [Imperial] may have under the Minnesota Settlement Agreement"). Accordingly, this Court similarly **[**66]** holds that no previous judicial decision—whether rendered by Minnesota, Delaware, **[*427]** or Florida—gives rise to issue preclusion in this case.

The foregoing makes clear that the Florida Court's Judgment cannot give rise to issue preclusion in this case. As noted above, Imperial claims this litigation and the Florida litigation involve identical issues because both cases ostensibly involved "'identical' claimed breaches of contract, the same facts, the same transaction, 'substantively identical' settlement language, the same APA, the same principles of law, and the same claims." *Imperial Resp.*, Dkt. No. 2341 at 12. Yet every one of those facts applies with equal force to the Minnesota litigation, and the Minnesota Court's Judgment was issued later in time than the Florida Court's Judgment. Thus, under the "last in time" rule, if preclusion should apply at all, it should apply only to the Minnesota Court's Judgment—not the Florida Court's Judgment.[22] Accordingly, the Florida Court's Judgment does not preclude PMUSA in any respect related to this case.

---

[22] Minnesota law does not suggest any preclusive effect is appropriate with respect to the issues raised by enforcement of the Texas Settlement. ***HN17***[] Minnesota squarely assigns "the burden to establish" that collateral estoppel is applicable to "[t]he party asserting collateral estoppel." *Mach v. Wells Concrete Prod. Co., 866 N.W.2d 921, 927 (Minn. 2015)* (quoting *Lange v. City*

In the alternative, even if the Florida Court's Judgment were appropriate to consider as a basis for issue preclusion, ***HN18***[] Florida law limits **[**67]** issue preclusion to circumstances where "an identical issue" was "presented in a prior proceeding." *Lucky Nation, LLC v. Al-Maghazchi, 186 So. 3d 12, 14 (Fla. 4th DCA 2016)*. Florida law also requires that "the parties in the two proceedings must be identical." *Id.* For the latter reason, issue preclusion cannot apply to Texas because Texas was undisputedly not a party to the Florida litigation. That determination appears to be conclusive of the impact of issue preclusion, because both PMUSA and Texas seek substantially and functionally identical relief. Since Texas may appropriately seek the entirety of the relief pending before the Court, it is unclear how a finding of preclusion as to PMUSA would alter the Court's approach to the merits.

Further, the issues presented in this case are different than the issues decided by the Florida Court. This Court must apply a different body of law (Texas law) to a different settlement agreement (Texas Settlement) that was reached under different circumstances to evaluate a different issue of liability (that is, liability for Texas Settlement payments). Both Texas and Florida cases rely on analogous principles of contract interpretation and both ask each respective court to interpret analogous agreements, but merely **[**68]** analogous issues are not "identical issues." *See id.*

On balance, this Court finds that issue preclusion does not apply to this case. Texas is not Florida (or Minnesota) and the Texas Settlement is not the Florida Settlement (or the Minnesota Settlement). Further, in the unlikely event that the Texas Settlement could overlap with another **[*428]** state's settlement to a sufficient degree for preclusion to attach, *only* the Minnesota Court's Judgment could receive preclusive effect in this case under the last-in-time rule. Accordingly, the Court concludes that issue preclusion does not apply to the Motions to Enforce in this case.

D. Contractual Limits on Review

In a single paragraph, Reynolds argues that the court lacks jurisdiction to entertain the Motions to Enforce because the parties have contractually limited this Court's ability to review disputes about Market Share. Reynolds claims that "under the express terms of the Agreement, [PricewaterhouseCoopers' ('PwC')] determination of the parties' Market Share dispute is final and non-appealable." *Reynolds Resp.*, Dkt. No. 2340 at 16-17 (citing *1998 Amdt.* at 12-13 § 8; *In re Deepwater Horizon, 785 F.3d at 995 n.8*). In pertinent part, § 8 of the 1998 Amendment to the Texas Settlement recites the following:

> ***In the event of a disagreement between [**69] or among any Settling Defendants as to their respective shares of any payment due to be paid on a Market Share basis pursuant to the Settlement Agreement and this Stipulation of Amendment, each Settling Defendant shall*** pay its undisputed share of such payment promptly on or before the date on which such payment is due, and shall, within 21 days of such date, ***submit its Shipment Reports for the year in question to a third party to be selected by agreement of Settling Defendants (the "Third Party"), who shall determine the Market Share of each Settling Defendant*** within three business days of receipt of such Shipment Reports. ***The decision of the Third Party shall be final and non-appealable, and shall be communicated by facsimile to each person designated to receive notice hereunder***. . . .

1998 Amdt., Dkt. No. 2222-2 at 12-13 § 8 (emphasis added). According to Reynolds, this is a dispute about Market Share, and such disputes must be submitted to a third-party neutral—in this case, PwC, who Reynolds submits has been appropriately designated under § 8.

---

of Byron, 255 N.W.2d 226, 228 (Minn. 1977)). Imperial has not carried that burden, given that Imperial does not urge that the Minnesota Court's Judgment should be given preclusive effect. Further, Imperial could not carry its burden under Minnesota law for one of the same reasons its claim fails under Florida law—Minnesota limits issue preclusion to circumstances where the "issue was identical to one in a prior adjudication," and the issues before the Minnesota court are merely analogous to the issues before this Court, rather than identical to the issues presented herein. *See id.* (citing ***Nelson v. Am. Family Ins. Grp., 651 N.W.2d 499, 511 (Minn. 2002))***. At issue in the Minnesota Court was the Minnesota Settlement, read in light of Minnesota law; at issue in this Texas federal court is the Texas Settlement, read in light of Texas law. This point is sufficient to reject application of any form of preclusion.

PMUSA responds that Reynolds' argument "fails for numerous, independently sufficient reasons." *PMUSA Reply*, Dkt. No. 2345 at 8. First, by its own terms, § 8 "applies only **[**70]** to 'a disagreement between or among any Settling Defendants,' and so is irrelevant to disputes like this one as to what [Texas] is owed." *Id.* Second, "Reynolds does not point to any evidence the Settling Defendants ever 'selected' PwC to finally resolve this (or any other) dispute." *Id.* Third, § 8 "does not apply in any event, because these motions present the *legal* question whether payment obligations on transferred brands continue; per the Settlement Agreement, *this Court*—not any accountant—is the arbiter of that issue." *Id.* (citing *Texas Settlement*, Dkt. No. 2345-1 at 3-4). Fourth, "although the Florida Agreement has the same provision, Reynolds never made this argument in Florida." *Id.* (citing *Fla. Agreement*, Dkt. No. 2345-13 at 82789-90). Fifth, "following the Florida court's ruling, PwC has included the transferred brands in calculating what Reynolds owes Florida—yet Reynolds is appealing." *Id.* Indeed, PMUSA points out that Reynolds has made directly contradictory representations to other courts. Specifically, Reynolds asserted to the Mississippi Chancery Court: "'the Court decides and PwC implements. That is the way it has always been, Your Honor. The Court decides the legal issues **[**71]** and PwC implements it, not the reverse. PwC is not a lawyer.'" *Id.* (quoting *Miss. Oral Arg. Tr.*, Dkt. No. 2345-61 at 87:19-22).

Texas similarly disputes Reynolds' argument. Initially, Texas echoes PMUSA's **[*429]** textual argument that § 8 does not apply under "the plain language of the contract," because this is a dispute between Texas and Settling Defendants, which falls outside of the carveout for disagreements that are "between or among" the settling defendants. *Texas Reply*, Dkt. No. 2346 at 10. Texas further suggests that Reynolds' description of PwC is inconsistent with the structure of the Texas Settlement and the uniform course of performance of the parties. *Id.* "Reynolds attempts to inflate the role of [PwC] beyond that of an accounting firm into that of a legal tribunal empowered to dictate not only the amounts due under the [Texas Settlement] but to make legal determinations as to its enforcement." *Id.*

At the hearing on the Motions to Enforce set by the Court, the Court pressed Reynolds with respect to its position on the role of PwC in the Texas Settlement, and counsel for Reynolds substantially walked its argument back on this issue.

> COUNSEL FOR REYNOLDS: Reynolds has, from the inception **[**72]** of the Texas Settlement Agreement, paid every dime that PricewaterhouseCoopers has attributed to it. And, ***Your Honor, that's important not because Pricewaterhouse supplants the -- the authority of any Court but because it was the independent third party that all of the parties***, including the State -- the State ***agreed should determine what was owed***, based on the amount of cigarettes shipped for domestic consumption.
>
> THE COURT: ***But their role was to do a calculation based on an existing structure, not to offer legal advice or to construe legal relationships in any kind of binding way, correct***?
>
> COUNSEL FOR REYNOLDS: ***A hundred percent correct, Your Honor***.
> THE COURT: Okay.
>
> COUNSEL FOR REYNOLDS: ***Nor are we arguing that*** -- I'd like to say here we are not arguing that ***PricewaterhouseCoopers has any -- any effect -- any binding effect on this Court. We'd -- we'd be foolish to say so***.

Hearing Tr., Dkt. No. 2354 at 54:24-55:18 (emphasis added). As PMUSA notes in its briefing, Reynolds' representations to this Court were consistent with the representations it has made to other courts, including the Chancery Court of Mississippi.

The Mississippi Court held an evidentiary hearing on December 4, 2015, **[**73]** where PMUSA asked the Mississippi Court to vacate one of its previous orders joining Imperial to the Mississippi Settlement, because the joinder was done without PMUSA's consent and with alterations to the Mississippi Settlement's payment allocation scheme. *Miss. Oral Arg. Tr.*, Dkt. No. 2345-61 at 7:4-8:23. PMUSA alleged that such alterations injured PMUSA's economic interests to the benefit of Reynolds and Imperial.

To resolve the foregoing issue, PMUSA proposed that the parties voluntarily delegate the issue to PwC, which PMUSA suggested could bring its expertise to bear on determining whether Imperial had been joined in a way that would unfairly reallocate payment obligations under the Mississippi Settlement. *Id.* at 35:15-20 ("What Your Honor should do, respectfully, is, if we can't agree as to how things change and how we ought to move things around as a result of the brand transfer to [Imperial], let PwC decide, and, then, if there is a dispute, the parties can come back to Your Honor with a complete record.").

Reynolds rejected PMUSA's proposal, on the grounds it would upset the appropriate allocation of authority between the courts and the accountants set out in the PSS Agreements. **[**74]** [23] *Id.* at 87:14-24. In addressing **[*430]** "PMUSA's proposal," Reynolds argued that asking PwC to resolve the issue "puts the cart before the horse." *Id.* at 87:17-18. Reynolds explained, "the court decides and PwC implements. ***That is the way it has always been***, Your Honor. The court decides the legal issues and PwC implements it, not the reverse. PwC is not a lawyer." *Id.* at 87:19-22 (emphasis added). In Reynolds' view, any preliminary resolution by PwC "would create uncertainty without court guidance, and it would needlessly drag out the issue," because only a court has the authority to actually resolve legal questions related to liability under the state settlements at issue. *Id.* at 87:23-24.

In view of the foregoing admissions in both the Mississippi Court and this Court, it is not clear what remains of Reynolds' argument on this issue. At both colloquies, Reynolds candidly and correctly acknowledged that the PSS Agreements—including the Texas Settlement—distinguish between the legal question of liability for cigarettes that are sold (*i.e.*, the question of "who must pay?"), and the accounting question addressed to quantifying the number of cigarettes that are sold (*i.e.* **[**75]** , the question of "how much must be paid?"). In both Mississippi and this Court, Reynolds recognized that "PwC is not a lawyer" and that it would "be foolish to say" that PwC's determination has "***any*** binding effect on this Court." *Miss. Oral Arg. Tr.*, Dkt. No. 2345-61 at 7:4-8:23; *Hearing Tr.*, Dkt. No. 2354 at 54:24-55:18 (emphasis added). Since Reynolds acknowledges that PwC is tasked only with the accounting question, and Reynolds recognizes that the question of "legal relationships" is reserved for this Court by the express text of the Texas Settlement, Reynolds has substantively conceded that this Court has the authority to evaluate the legal questions presented by the Motions to Enforce. Reynolds' admissions thus constitute a standalone basis to reject this argument.

Since Reynolds has not formally withdrawn this argument, to avoid any doubt, the Court reaches and rejects Reynolds' contention that the Court's ability to evaluate the Motions to Enforce has been contractually limited by the role of PwC in addressing disputes about Market Share.

The Texas Settlement expressly reserves and recognizes this Court's authority to evaluate "any" disputes related to the enforcement or breach of the Texas Settlement. Section 1 of **[**76]** the Texas Settlement provides, in pertinent part, the following fountainhead of jurisdiction for this Court:

> Jurisdiction. Settling Defendants and the State of Texas acknowledge that this Court has jurisdiction over the subject matter of this action and over each of the parties hereto, and that this Court shall retain jurisdiction for the purposes of implementing and enforcing this Settlement Agreement. ***The parties hereto agree to present any disputes under this Settlement Agreement, including without limitation any claims for breach or enforcement of this Settlement Agreement, exclusively to this Court***.

Texas Settlement, Dkt. No. 2222-1 at 3-4 § 1 (emphasis added). Accordingly, the plain text of § 1 broadly delegates resolution **[*431]** of "any disputes under [the Texas Settlement]" to this Court, and enumerates specifically the examples of "any claims for breach or enforcement" as being appropriate for resolution by this Court. *Id.* The Motions to Enforce are literally "claims for . . . enforcement" of the Texas Settlement, and are predicated on

[23] Reynolds' representations to the Mississippi Court about PwC's role are relevant to the Texas Settlement because PwC was engaged with a single engagement letter for all four Previously Settled States, and because each PSS Agreement reflects the same allocation of responsibility between the courts and the accountants. *PwC Engagement Letter*, Dkt. No. 2357-5. Reynolds' description of PwC's role with respect to the Mississippi Settlement is accordingly informative of PwC's role with respect to the Texas Settlement, because PwC plays the same accounting role for both Mississippi and Texas under the terms of the engagement letter and the two respective states' settlement agreements.

allegations of "breach" of the Texas Settlement. *See id.* The Motions to Enforce thus fall within the broad assignment of "any disputes" to this Court for **[**77]** exclusive resolution.

Further, § 8's finality provision does not apply to this dispute because § 8 limits its applicability to payment allocation disputes "between or among Settling Defendants." *See id.* § 8. The finality provision in § 8 arises in a specific context within the Texas Settlement, which suggests that it does not apply to motions to enforce based on allegations of breach. As noted above, the Texas Settlement provides that Texas receives approximately the same amount of money each year. The relative allocation of payments between or among settling defendants, however, is adjusted each year in view of the relative profitability of those defendants, as well as the relative volume of sales from those defendants, compared to the "base year" profitability and cigarette volume set out in the Texas Settlement.[24] Depending on how profitable (or unprofitable) a settling defendant is—or how much (or little) it sells—both its payment obligations and the payment obligations of the other settling defendants may change significantly. Accordingly, the settling defendants may dispute—between or among themselves—the relative allocation of payments, as an accounting matter. That dispute is then submitted **[**78]** to an accounting firm—PwC—whose decision is final.

This context makes clear that the finality mechanism is not applicable to enforcement actions predicated on breach of contract theories. The finality mechanism is *only* applicable to those decisions made by PwC, who in turn *only* takes up that particular class of dispute—accounting disputes over relative allocation of payment.[25] However, the finality mechanism in § 8 is not designed to divest the Court of jurisdiction over legal disputes relating to the allocation of liability under the Texas Settlement.

In sum, the Court concludes that § 8 does not bar this Court's review of the pending Motions to Enforce because § 8 is addressed to a different type of dispute (accounting disputes over relative Market Share) between a different class of parties (settling defendants). Since this dispute involves Texas, and a legal question of enforcement predicated on allegations of breach, the Court finds that the Texas Settlement expressly preserves this Court's ability to hear this dispute. Thus, the Texas Settlement does not prevent this Court from evaluating the Motions to Enforce.

III. Delegation Under Texas Common Law and Breach of Contract

Both the Minnesota **[**79]** Court and the Florida Court found that Reynolds continued to be liable under the common law doctrine **[*432]** that obligations under a contract cannot be destroyed by an assignment of that contract or its subject matter. Both courts found that because Reynolds undertook an obligation to make payments on the Acquired Brands, that obligation continued even after the sale of the Acquired Brands. As explained below, the Texas Supreme Court has announced an analogous doctrine, and that doctrine applies with equal force to Reynolds' conduct in this case. Given that this was the primary basis of decision in both the Florida Court and the Minnesota Court, the Court addresses this issue first.

A. Contentions of the Parties

Texas argues that Reynolds remains bound to the obligations it assumed under the Texas Settlement, including the obligation to make payments on sales of the Acquired Brands. ***HN19***[] Texas law recognizes that an assignment

---

[24] The Texas Settlement establishes certain preset values from the year 1997 as the "base year" for reference and comparison during each year annually thereafter. The sales of the Acquired Brands remain included in the base year for Reynolds.

[25] This does not mean, however, that PwC is responsible for determining the legal issue bifurcated by the Court, which goes to whether—as a legal matter—the Acquired Brands remain proper for inclusion in the reference base year of 1997, if liability for those brands is assigned to Imperial. Though more closely related to the role PwC, that issue too is an issue for the Court, and turns on an interpretation of the Texas Settlement.

does not relieve a party of its obligations under a contract. *Texas Motion to Enforce*, Dkt. No. 2214 at 8. An assigning party "remains liable unless expressly or impliedly released by the other party to a contract." *Id.*

Texas directs the Court's attention to the Texas Supreme **[**80]** Court's decision in *Seagull Energy E&P, Inc. v. Eland Energy, Inc., 207 S.W.3d 342, 346-47 (Tex. 2006)*, and argues that Reynolds remains liable under the Texas Settlement based on a straightforward application of *Seagull*. In exchange for a release from potentially overwhelming liability, Reynolds knowingly undertook the obligation to make payments on the Acquired Brands, as well as its other cigarette brands, when it signed the Texas Settlement. To eliminate those obligations, Texas argues that it "would have to assent to Reynolds no longer being liable under the Texas Settlement." *Id.* at 9. However, Reynolds may not unilaterally "escape its obligations," under the Texas Settlement by virtue of its assignment of the Acquired Brands. *Id.* at 8 (quoting *Seagull, 207 S.W.3d at 346-47*). Further, Texas argues, the Texas Settlement evinces an intent that any potential assignments would not defeat any party's rights, by providing that it "shall be binding upon all Settling Defendants and their successors and assigns in the manner expressly provided for herein." *Id.* at 12 (citing *Texas Settlement*, Dkt. No. 2222-1 at 4 § 2).

The Court notes that the Texas Settlement also imposes a variety of non-monetary restrictions, including limiting advertising to children and certain lobbying activities, which would also be nullified under **[**81]** Reynolds' approach. *Id.* at 9. Indeed, when the Court asked if Imperial was bound by the Texas Settlement's advertising-to-children and lobbying restrictions, at least with respect to the Acquired Brands, Reynolds said ***no***. *Hearing Tr.*, Dkt. No. 2354 at 126:25-128:10.

Reynolds disagrees with Texas' contention and argues that this doctrine only applies when a party assigns the entire contract, or an obligation under the contract. In Reynolds' view, it did not assign any *obligation* to pay for the Acquired Brands—it merely sold *assets*, which Reynolds says were effectively unencumbered. According to Reynolds, it had an obligation to make Texas Settlement payments for the Acquired Brands only ***before*** they were acquired by Imperial, but such obligation as of Imperial's acquisition ceased pursuant to the Market Share provision of the Texas Settlement.[26]

[*433] In response, PMUSA supports the position taken by Texas, saying that "[i]t is hornbook law in Texas that an asset purchase does not extinguish any of the underlying obligations associated with those assets." *PMUSA Motion to Enforce*, Dkt. No. 2222 at 6 (citing *Seagull, 207 S.W.3d at 344*). PMUSA additionally cites a treatise which has been repeatedly relied upon by the **[**82]** Texas Supreme Court for the proposition that "[a]lthough a sale of assets may allow an injured plaintiff to proceed against the successor corporation, it does not vitiate the original company's liability." *Id.* at 7 (citing 15 William Meade Fletcher et al., Fletcher Cyclopedia of the Law of Private Corporations § 7123 (perm. ed., rev. vol. 2017)).

PMUSA also argues that its position is consistent with the explicit purposes of the Texas Settlement. First, the Texas Settlement expressly provides that the obligations contained therein run "in perpetuity" and are intended to be made binding on "successors and assigns." *Id.* at 8. PMUSA contends that these terms, when read together, reveal contractual purposes that are discordant with releasing Reynolds from its obligations. *Id.*

Second, the reimbursement framework created by the Texas Settlement would be undermined if Reynolds' assignment of the Acquired Brands extinguished its obligation to make payments thereupon. Under the Texas

---

[26] Reynolds has gone to great lengths to dispute this characterization, claiming that its argument is not that the obligation to pay disappears, but rather that Reynolds never had an obligation to pay on the Acquired Brands in the first place—its obligations were limited to cigarettes it sold, pursuant to the Market Share provision, and since it no longer sells the Acquired Brands, its obligation no longer extends to those cigarettes. *See Hearing Tr.*, Dkt. No. 2354 at 42:6-10 ("I'd like to frame our argument thusly, which is that Reynolds does not claim that any obligation has been extinguished but rather that liability is calculated on brands -- on cigarettes sold by Reynolds, not brands previously owned by Reynolds."). The Court recognizes why Reynolds seeks to frame its argument in that manner, but concludes that such framing obscures the crux of the issue: according to Reynolds, it was obligated to pay for the Acquired Brands before the assignment but was not obligated to pay after the assignment. In every sense of the term, Reynolds asks the Court to hold that the obligation to pay for the Acquired Brands is extinguished by means of Reynolds' assignment to Imperial. The Court declines to so hold.

Settlement, each year's payment is "in settlement of all of the State of Texas's claims for damages incurred by the State in the year of payment or earlier years." *Id.* at 9 (citing *1998 Amdt.*, Dkt. No. 2222-2 at 7 § 4).

The Texas Settlement includes **[**83]** reimbursement for "earlier years" as part of each year's payment because of the continuous and inseverable nature of the injuries that can result from use of tobacco products. *See id.* As an example: imagine a smoker that started smoking Salem cigarettes on the day after the Texas Settlement went into effect in 1998, and stopped smoking altogether on the day before the APA was consummated in 2015. Then, consider that in 2016, this particular smoker developed lung cancer that was indisputably caused by the previous years of smoking Salem cigarettes while Salem was owned by Reynolds. Under Defendants' theory of the Texas Settlement, Texas would be owed no reimbursement because the smoker's diagnosis (and medical treatment) happened ***after*** the Acquired Brands were assigned to Imperial. That result is simply irreconcilable with the text and business purposes of the Texas Settlement.

PMUSA also argues such result would be unreasonable, inequitable, and oppressive because it "would allow [Reynolds] to reap an immediate profit" of $7,000,000,000.00 "without ensuring that [Texas] receives the corresponding payments that [it] bargained for" in the Texas Settlement. *PMUSA Motion to Enforce*, Dkt. **[**84]** No. 2222 at 10. To allow such asymmetry would "nullify the parties' intent and the contract's purpose in violation of basic canons of Texas contract law." *Id.* at **[*434]** 10-11 (citing *Frost Nat'l Bank v. L & F Distribs., Ltd., 165 S.W.3d 310, 312-13 (Tex. 2005))*. Further, PMUSA argues that adopting Defendants' position "presents a road map for the complete unraveling of the [Texas Settlement]. If the brand transfer here is permitted to extinguish the obligations on the Acquired Brands, nothing prevents the remaining Settling Defendants from repeating this maneuver with their own brands — leaving Texas empty-handed." *Id.* at 9.

With respect to Reynolds' Market Share argument, PMUSA responds in two ways. First, PMUSA argues that the Market Share provision deals with the method for determining the ***number*** of cigarettes sold, rather than allocating ***liability*** for cigarettes that have been assigned. Relying on the maxim that the specific controls over the general, PMUSA notes that the Texas Settlement contains a specific clause that addresses whether liability can be eliminated by an assignment—the successors and assigns clause. As the Texas Supreme Court concluded on similar facts in *Seagull*, an interpretation such as Reynolds'"reads far too much" into the Market Share provision.

Second, PMUSA **[**85]** notes that Reynolds has taken inconsistent positions on whether the Market Share provision embraces the Acquired Brands. At present, Reynolds ***includes*** the Acquired Brands in the Market Share calculation for payments made to Texas' Private Counsel. At the same time, Reynolds ***omits*** the Acquired Brands from its Market Share for the payments it makes to Texas. As noted above, the Texas Settlement provides that both Texas ***and*** its Private Counsel would receive payments that are calculated based on the same definition of Market Share for each Settling Defendant.

The Court pressed both Imperial and Reynolds on this point at the hearing it held. For its part, Imperial's counsel offered no explanation or defense for Reynolds' conduct, and instead suggested that the Court direct the query to Reynolds.

> THE COURT: If Reynolds did not include those Acquired Brands . . . in the calculation of market share for purposes of paying under the Texas Fee Payment Agreement, would [Imperial] otherwise owe payments under the Texas Fee Payment Agreement based on those Acquired Brands?
>
> COUNSEL FOR IMPERIAL: No, Your Honor, because [Imperial] is not a party either to the Texas settlement or to the related fee payment **[**86]** agreement.
>
> THE COURT: ***So are you telling me that Reynolds is paying gratuitously*** to the lawyers?
>
> COUNSEL FOR IMPERIAL: ***I don't know why Reynolds — that's a question for Reynolds's counsel***."

Hearing Tr., Dkt. No. 2354 at 131:19-22 (emphasis added). When the Court asked Reynolds, it offered two explanations: the payments to Texas' Private Counsel were less expensive in view of their limited duration, so

Reynolds was willing to make such payments, and the rights maintained by Texas' Private Counsel had "accrued" previously. *See id.* at 123:13-124:19. Neither is persuasive.[27]

[*435] It is hard for this Court not to speculate that perhaps Reynolds was more concerned about incurring the wrath of Texas' Private Counsel than the wrath of the Texas Attorney General. In any event, and all speculation aside, Reynolds' conduct is inconsistent and at the same time, quite telling. What matters is ***what*** Reynolds has done, rather than any subjective rationale as to ***why*** Reynolds has done it.

B. Legal Standard

The Texas Supreme Court addressed the scope of assignor liability in *Seagull Energy E&P, Inc. v. Eland Energy, Inc., 207 S.W.3d 342 (Tex. 2006)*. *Seagull* involved a contract governing the development of minerals contained beneath two offshore oil and gas blocks. *Id. at 344*. The relevant contract—an **[**87]** operating agreement—provided that one of the lessees, Seagull Energy E&P ("Seagull"), would develop the minerals contained beneath the offshore blocks on behalf of all other parties who had interests in the leases covering the blocks. *Id.*

"In 1994, Eland Energy, Inc. purchased an interest in both leases, acquiring a 1.09375% interest . . . and a 9.41719% interest" respectively in the two offshore blocks. *Id.* "As the new owner, Eland expressly assumed certain rights and responsibilities under two offshore operating agreements, each applicable to its respective block." *Id.* One such obligation applicable to both blocks "provided that Eland and the other lessees were to share the cost of operations in proportion to their respective interests, and that Seagull, as operator," would develop "the minerals and collect the operating costs from the other lessees." *Id.*

Two years later, in 1996, Eland sold its interests in the leases to a third party, and assigned its rights and obligations under the operating agreements to that third party. *Id.* After the third party "failed to reimburse Seagull for its share of operating costs," Seagull brought suit against Eland. *Id.*

Both Eland and Seagull moved **[**88]** for summary judgment. *Id.* Much like Reynolds in the instant case, Eland argued that it was not obligated to pay for post-1996 operating costs because it did not own any interest in the leases during that time period. *Id. at 345*. The contract at issue defined "Participating Interest" as "the respective percentage of participation of each Party . . . based on ownership in the Lease," and required "each Party" to "reimburse [Seagull] in proportion to its Participating Interest."[28] *Id.* Since it had no ownership in the leases after 1996, Eland argued that the "Participating Interest" definition eliminated its liability. *Id.* In contrast, Seagull argued that "Texas contract law generally provides that an assignor's contractual obligations survive assignment unless the contract expressly provides otherwise or the assignor obtains an express release. Because the operating agreements here were silent on the subject and [Seagull] did not expressly release Eland," Seagull claimed that Eland remained liable. *Id.* Eland then argued that the definition of Participating Interest, combined with the provision allocating payments according to Participating Interest, made that general rule inapplicable. *Id.* The trial **[**89]** court agreed with Seagull, and granted summary judgment. *Id. at 344*.

The court of appeals reversed and "concluded that Eland had no continuing liability under the operating agreements after the assignment of its working interest because the agreements did not expressly provide for such a continuing obligation." *Id. at 344-45*. That court agreed that **[*436]** Eland's "obligation to pay expenses under the operating

---

[27] With respect to the former rationale, Reynolds' willingness to meet its less expensive obligations—but not its costlier ones—is no basis to avoid liability. The latter rationale is similarly unavailing, both as a factual and legal matter. Texas' rights (and its performance under the Texas Settlement) had "accrued" with the execution of the Texas Settlement. By the covenants in the Texas Settlement, Texas then and thereby released the settling defendants from liability, in perpetuity. That release *was* Texas' performance, and its rights vested contemporaneously thereto: Texas then became entitled to payments as set out in the Texas Settlement. If the rights of Texas' Private Counsel had already accrued, then so too had the rights of Texas.

[28] Eland's argument with respect to "Participating Interest" is much like Reynolds' argument concerning the Market Share calculations called for in the Texas Settlement.

agreement terminated on the date it sold its interests because the agreement imposed liability for expenses only upon ***current*** working interest owners." *Id. at 345* (emphasis in original).

The Texas Supreme Court granted Seagull's petition for review, and concluded that Eland remained liable. In the court's view, the dispute turned "on whether the parties to the operating agreement expressly agreed upon the consequences that should follow an assignment of one's interest to a third party." *Id.* As an initial matter, the court rejected Eland's argument based on the Participating Interest term and the related payment obligation. While acknowledging both terms, the court concluded that "Eland . . . reads far too much into these provisions. Nowhere do they mention the subject of release or the consequences which are to follow **[**90]** the assignment of a working interest." *Id. at 346*. Indeed, these provisions governed the calculation of the ***amount*** of payment due under the contract—not the allocation of liability for that amount. *Id.* "Thus, we disagree with Eland that the parties expressly agreed that an assignment of a working interest was to operate as a novation, effectively ending any further obligation of the assignor under the operating agreement." *Id.* "The operating agreement simply does not explain the consequences of an assignment of a working interest to a third party." *Id.*

Given that contract's silence on the consequences of an assignment, the Texas Supreme Court looked to the common law for a rule of construction. It concluded that "[g]enerally speaking, ***HN20***[] a party cannot escape its obligations under a contract merely by assigning the contract to a third party." *Id. at 346-47*. "Thus, as a general rule, a party who assigns its contractual rights and duties to a third party remains liable unless expressly or impliedly released by the other party to the contract." *Id. at 347*. Applying this common law rule, the court concluded that Eland remained liable. *Id.* "Because the operating agreement did not expressly provide that Eland's obligations **[**91]** under the operating agreement should terminate upon assignment and Seagull did not expressly release Eland following the assignment of its working interest, we reverse the court of appeals' judgment and render judgment for Seagull as the trial court did." *Id.*

HN21[] In summary, "[u]nder Texas contract law, an assignor's contractual obligations generally 'survive assignment unless the contract expressly provides otherwise or the assignor obtains an express release.'" *Republic Petroleum LLC v. Dynamic Offshore Res. NS LLC, 474 S.W.3d 424, 430 (Tex. App.—Houston [1st Dist.] 2015, pet. denied)* (quoting *Seagull, 207 S.W.3d at 345*).[29]

[*437] C. Reynolds Improperly Narrows *Seagull*

Reynolds contends that *Seagull* only applies to transfers of contracts, and that it does not apply to transfer of the assets that form the subject matter of a contract. Reynolds argues that *Seagull* is an inadequate basis to find Reynolds liable. The Court rejects this argument.

First, Reynolds does not cite a single case or other authority that has narrowed *Seagull* in the manner it proposes. Reynolds has not identified any case distinguishing *Seagull* from applying to asset transfers rather than assignment of contract rights. Likewise, this Court has found none.

---

[29] In addition to its general rule, which the Court relies upon, *Seagull* also recognizes that "[***HN22***[] e]ven when the contract does not expressly provide for the consequences resulting from the assignment of one's interest, the contract's subject or other circumstances may indicate that obligations were not intended to survive assignment." *Seagull, 207 S.W.3d at 347*. Like the defendant in *Seagull*, Reynolds does not argue here that the Texas Settlement's "subject or other circumstances" imply that it should be released of its obligations after assignment. Just as the *Seagull* defendant could have paid money to fulfill its obligations under the applicable operating agreement after it assigned its leasehold interests, Reynolds could pay money after its assignment of the Acquired Brands, in order to fulfill its obligations to Texas. There is nothing about the subject or circumstances of the Texas Settlement that implies, in any way, that Reynolds should be released from obligations upon the transfer of the Acquired Brands. In this regard, and otherwise, *Seagull* is on all fours with the instant case. Without an express release from Texas—and there is none—the assignment by Reynolds does not allow it to escape its existing obligations under the Texas Settlement.

Second, Reynolds' argument is inconsistent with the reasoning in *Seagull*. *Seagull* provides a rule **[**92]** applicable when parties do not expressly specify the consequences of an assignment. Nothing in *Seagull* turns on the nature of the assignment—either assignment of the payment obligations under the operating agreement, or assignment of the underlying working interests in the leases at issue. Instead, *Seagull* provides a framework for determining the consequences of an assignment when a contract does not otherwise expressly provide for the consequences of such assignment, and there is no release given by the obligee. Accordingly, the rule and analysis set out in *Seagull* are directly on point here.

Third, *Seagull* reflects a general rule—continuing liability—that may be informed by the relevant contract's "subject" or "other circumstances." Thus, even if the general rule announced by *Seagull* did not squarely govern this case—and the Court finds that it does—the Court would apply *Seagull* to this contract's "subject" or "other circumstances" pursuant to the ordinary rules of contractual interpretation in Texas. These rules direct that the Court be informed by the text, structure, and business purposes of the Texas Settlement, which reflect the parties' expressed intent. The text, structure, **[**93]** and business purposes support the conclusion that Reynolds' liability continues despite its assignment of the Acquired Brands. *See infra* Section III.D.2. Thus, even if the default rule announced in *Seagull* would not apply to *all* asset sales, it certainly applies to *this* asset sale, in light of the ordinary application of contract law to the Texas Settlement.

Fourth, the guidance of the Fifth Circuit's decision in *Texas Industries* is contrary to Reynolds' position. *See infra* Section III.D.2.b.iii (applying *Tex. Indus. v. Brown, 218 F.2d 510, 512 (5th Cir. 1955))*. As noted above, *Texas Industries* explained that in addition to "an assignment of the contract," "neither a sale nor lease" of the assets at issue would "effectuate a release of [the original contracting party's] obligations under the contract." *Tex. Indus., 218 F.2d at 512*. The rule set out in *Texas Industries* is closely akin to the rule set out in *Seagull*—*i.e.*, ***HN23***[] absent a specific release, an assignment (of either a contract or an asset) will not obviate a party's contractual obligations. *See also* *Republic Petroleum, 474 S.W.3d at 430* ("Under Texas contract law, an assignor's contractual obligations generally 'survive assignment unless the contract expressly provides otherwise or the assignor obtains an express release.'" (quoting *Seagull, 207 S.W.3d at 345*)).

The rule in **[**94]** *Texas Industries* is also consistent with the broader common law rule, which is relied upon in both the decisions of the Minnesota Court and the Florida Court, as well as in the cases cited by those courts. In summarizing the common law on the subject, Williston on Contracts explains that the basis for the doctrine "is sufficiently obvious when attention is called to it, for otherwise obligors would find an easy practical way of escaping their **[*438]** obligations: . . . obligors could free themselves of their obligations by the simple expedient of assigning them . . . ." 29 Samuel Williston & Richard A. Lord, *Williston on Contracts* § 74:27 (4th ed.). The Fletcher Cyclopedia, a leading treatise on the law of corporations,[30] also confirms that Reynolds remains liable under the common law rule. The treatise provides that:

> Although a sale of assets may allow an injured plaintiff to proceed against the successor corporation, it does not vitiate the original company's liability. The right of the injured party to elect to proceed against the [original] corporation, the successor corporation, or both cannot be altered per se by the corporations, although the corporations can regulate how such liability will **[**95]** be allocated among themselves.

Fletcher et al., *supra*, § 7123; *accord* *Golden State Bottling Co. v. N.L.R.B., 414 U.S. 168, 182, 94 S. Ct. 414, 38 L. Ed. 2d 388 (1973)* (citing § 7123 as setting forth "the general rule of corporate liability"). Reynolds seeks to achieve precisely the result prohibited by this doctrine: it attempts to "free [itself] of [its] obligations" under the Texas Settlement "by the simple expedient of assigning" the Acquired Brands. Williston & Lord, *supra*, § 74:27.

---

[30] For over a century, the Supreme Court of Texas, the Fifth Circuit Court of Appeals, and the United States Supreme Court have all repeatedly cited Fletcher's Cyclopedia as an authoritative treatise on the law of corporations and corporate liability. The Texas Supreme Court has even disapproved of Texas intermediate appellate courts on the basis of inconsistency with Fletcher's Cyclopedia. *See* *Texam Oil Corp. v. Poynor, 436 S.W.2d 129, 130 & n.2 (Tex. 1968)* (following "[t]he rule which Fletcher says is 'the better and majority rule,'" and accordingly disapproving a decision from a Texas intermediate appellate court).

Accordingly, Reynolds may not "vitiate" its "liability" to Texas through "a sale of assets." Fletcher et al, *supra*, § 7123.

D. Text and Context Demonstrate Reynolds Remains Liable

HN24[] In all contract cases, the task of the court "is to ascertain the parties' true intentions as expressed in the language they chose." *Plains Expl. & Prod. Co. v. Torch Energy Advisors Inc., 473 S.W.3d 296, 305 (Tex. 2015)* (citing *Moayedi v. Interstate 35/Chisam Rd., L.P., 438 S.W.3d 1, 7 (Tex. 2014))*. Since parties may make drafting choices in light of the circumstances under which a contract is reached, Texas courts "'construe contracts from a utilitarian standpoint bearing in mind the particular business activity sought to be served.'" *Apache Deepwater, LLC v. McDaniel Partners, Ltd., 485 S.W.3d 900, 906-07 (Tex. 2016)* (quoting *Lenape Res. Corp. v. Tenn. Gas Pipeline Co., 925 S.W.2d 565, 574 (Tex. 1996))*. To do so, Texas courts "examine the entire agreement and seek to harmonize and give effect to all provisions so that none will be meaningless." *Nassar v. Liberty Mut. Fire Ins. Co., 508 S.W.3d 254, 258 (Tex. 2017)* (quoting *Gilbert Tex. Constr., L.P. v. Underwriters at Lloyd's London, 327 S.W.3d 118, 126 (Tex. 2010))*.

As noted above, *Seagull* furnishes a rule of contract construction where the contract is silent on the result of an assignment. The Court applies that rule **[**96]** to determine that Reynolds is liable. However, the Court also concludes that even if the rule announced in *Seagull* does not apply to all asset transfers, there are case-specific justifications—based on the ordinary rules of contract interpretation—for applying that rule to the Texas Settlement. Nothing in *Seagull* suggests that it intends to displace the ordinary application of contract law to determine liability based on an assignment. Applying Texas contract law, the Court finds that the text, structure, and **[*439]** "particular business activit[ies] sought to be served" by the Texas Settlement uniformly demonstrate that Reynolds remains liable for the Acquired Brands.

1. Texas Did Not Consent

All parties agree that Texas has not consented, expressly or otherwise, to release Reynolds from its liability under the Texas Settlement.[31] Accordingly, the Court next turns to whether the context or subject matter of the Texas Settlement supports a finding of continued liability for Reynolds.

2. The Text and Business Purposes of the Texas Settlement Demonstrate That Reynolds Remains Liable

Both the text and context of the Texas Settlement demonstrate that Reynolds remains liable **[**97]** for payments under the Texas Settlement. In the following Sections, the Court will first examine each business purpose that is expressly set out in the Texas Settlement, and then will examine specific textual indicators which confirm that Reynolds remains liable for the Acquired Brands.

a. Every Business Purpose of the Texas Settlement Suggests Liability Continues

Since parties negotiate specific terms in light of a specific business context, Texas courts construe contracts from "a utilitarian standpoint" while "bearing in mind the particular business activity sought to be served." *Apache Deepwater, 485 S.W.3d at 906-07*. Accordingly, in construing the Texas Settlement, the Court now turns to the business purposes which the Texas Settlement sought to serve.

[31] The Court does not interpret Reynolds' and Imperial's submission of parol evidence related to the Texas Comptroller to suggest that Texas consented to release Reynolds from its obligations under the Texas Settlement. However, to the extent Reynolds and Imperial ask the Court to draw that inference as a factual matter, the Court finds that the relevant parol evidence does not suggest that Texas consented to release Reynolds. *See infra* Section III.D.2.d. Further, the actions of the Texas Comptroller's employees cannot effectuate a release under the Texas Settlement, because the Texas Settlement provides that any waiver of rights must be made in a writing. *See Texas Settlement*, Dkt. No. 2222-1 at 24 § 23.

i. Finality

The language of the Texas Settlement reflects finality as a business purpose of the settlement agreement.[32] ***HN25***[] Texas law recognizes that the business purpose of a settlement agreement is to resolve disputes with finality. In Texas, a settlement agreement is meant to forever settle the dispute at hand, rather than merely deferring the dispute to a later date.

A recent case illustrates how the Fifth Circuit applies this principle. *In re Pirani, 824 F.3d 483 (5th Cir. 2016)*. The matter before the Fifth Circuit **[**98]** in *In re Pirani* concerned interpretation of a settlement agreement under Texas law. *Id. at 488-89*. A hotel developer, as a debtor in a bankruptcy proceeding, alleged breach of a loan agreement against a number of investors in a hotel development deal that subsequently fell apart. *Id. at 489*. In response, the investors alleged that a settlement executed by the hotel developer released them from any liability under the loan agreement. *Id. at 490*. The hotel developer disputed that the settlement agreement barred his individual claims, because the **[*440]** settlement only included a release from "the Company." *Id. at 492-93*. Accordingly, the developer argued that only his corporate entity was bound by the settlement. *Id.* Since the developer asserted that he was not personally bound to the settlement agreement, he asserted that his personal breach claims in the bankruptcy court could proceed. *Id.*

The phrase "the Company" was defined in multiple ways throughout the settlement agreement. *Id. at 494-95*. The settlement included a definition in the opening paragraph which included the hotel developer in his individual capacity, and a definition in a later provision—§ 3.1(a)—that only included the developer's corporate entity. *Id.* Since the relevant release language was **[**99]** contained in nearby § 3.2, the developer contended that specific-over-general canon of Texas contract interpretation favored using the narrow § 3.1(a) definition of "the Company" rather than the global definition in the opening paragraph. *Id.* The investors urged that the definition in § 3.1(a) applied only to the subsections ***within*** that section—that is, §§ 3.1(a)-(d)—and that the global definition applied to the remainder of the contract, including the release language in § 3.2. *Id.*

The Fifth Circuit agreed with the investors, and applied the broader definition of "the Company" to hold that the settlement agreement bound and barred the hotel developer's individual claims. *Id. at 495-96*. While both sides had advanced plausible arguments for each definition of "the Company," the *Pirani* court selected the construction that effectuated the goal of finality inherent in the settlement agreement. *Id.* Accordingly, this holding instructs courts to prefer constructions which effectuate finality interests over constructions that vitiate finality. *Id.* The Fifth Circuit explained:

> The overall context of the agreement also supports this result. ***HN26***[] Under Texas law, courts are expressly permitted to take into account the "objectively determinable" "facts **[**100]** and circumstances surrounding [the] contract" that "give context to the parties' transaction." *Kachina Pipeline, 471 S.W.3d at 450* (citation omitted). ***Here, the most critical relevant circumstance is that the contract is a settlement agreement, drafted and entered into for the purpose of settling claims between two sides to a dispute***. Those two sides are defined in the opening paragraph, with "the Company" encompassing all parties on the [hotel developer's] side of the dispute. ***In the context of a settlement agreement, section 3.2 makes the most sense if the promise to secure releases for [the investors] is binding all of the parties on the other side of the dispute***.

Id. (emphasis added).

Consistent with *Pirani*, the Texas Settlement evinces the purpose of finally settling disputes related to the sale of tobacco products, including the Acquired Brands. As with the settlement in *Pirani*, the Texas Settlement was

---

[32] To avoid duplication, the Court sets out its analysis of specific textual indicators in the Texas Settlement below, in Section III.D.2.b. For the reasons set out therein, the following textual provisions specifically support the Court's conclusion that finality was an intended business purpose of the Texas Settlement: Section III.D.2.b.ii (discussing payments-in-perpetuity terms); Section III.D.2.b.iii (discussing successors-and-assigns term); Section III.D.2.b.v (discussing prior written consent term).

"drafted and entered into for the purpose of settling claims between two sides to a dispute," and "makes the most sense" if its obligations are "binding on all of the parties on the other side of the dispute," including their successors and assigns—as expressly provided for in the Texas Settlement. *See id.* Accordingly, finding **[**101]** that liability for the Acquired Brands is not extinguished by Reynolds' assignment is consistent with the finality interests manifest in the Texas Settlement.

By contrast, Defendants' position is inconsistent with finality. Both Imperial and Reynolds argue that if Texas wants to receive any payments for the harm caused by public consumption of the Acquired Brands, it must file a new suit and relitigate **[*441]** with Imperial the claims it previously settled with Reynolds.

Defendants' position would not only vitiate the finality of the Texas Settlement with respect to the Acquired Brands, but would do the same to the entire agreement. At the hearing on the instant Motions to Enforce, PMUSA all-but-admitted that it would follow Reynolds' example if the Court permitted Reynolds to escape its obligations under the Texas Settlement by transferring assets. "If the position of Reynolds and [Imperial] were adopted . . . it would be a roadmap—in fact, it would almost be ***imperative*** for the settling Defendants to escape their liability under the settlement agreement" by following the model established by Reynolds. *Hearing Tr.*, Dkt. No. 2354 at 27:3-13 (emphasis added). Accordingly, PMUSA argued that permitting **[**102]** defendants to unilaterally escape their liability would "destroy" the Texas Settlement. *Id.*

The Court does not view PMUSA's statement as a threat. Instead, the Court simply concludes that PMUSA provided a candid description of how it likely would proceed, if Reynolds' example was vindicated. That scenario is not only possible but is likely, given that PMUSA—and Reynolds for that matter—could likely retain all or virtually all of the profit from those cigarettes, while completely avoiding liability therefor.[33]

There is no textual or contextual basis to conclude that the parties to the Texas Settlement intended to permit such a result. As noted above, on the eve of a trial, **[*442]** the parties created a settlement that imposed payments in perpetuity on every major tobacco manufacturer in the nation. It would be unreasonable for a comprehensive settlement to be read as only partial, incomplete, and terminable at the obligated Defendants' unilateral option.

---

[33] Reynolds' interpretation would permit settling defendants to completely avoid all existing obligations under the Texas Settlement while retaining all, or virtually all, of the profit from those cigarette sales. Consider the following scenario: if this Court adopts Reynolds' theory of the Texas Settlement, Reynolds (or PMUSA for that matter) could create a distinct corporate entity ("ReynoldsSub"). Reynolds could assign ownership of all of its cigarettes to ReynoldsSub, while maintaining its status as the sole shareholder in ReynoldsSub. As the sole shareholder, Reynolds would maintain complete control over the issuance of dividends by ReynoldsSub, permitting Reynolds to reap the profit from the sales of its cigarettes. Further, its status as sole shareholder would leave Reynolds in control of the organization and conduct of ReynoldsSub, despite the observation of corporate formalities between the two.

Under Reynolds' theory, ReynoldsSub would not be an "assign" within the meaning of the Texas Settlement, since it only possesses Reynolds' brands, cigarettes, and intellectual property—not any of Reynolds' rights or obligations under the Texas Settlement. If the Court adopted Reynolds' construction of the Texas Settlement, liability for all of those cigarettes simply goes up in smoke, since the Market Share provision applies only to direct sales by Reynolds, and the cigarettes would be sold by ReynoldsSub. If Texas (or Minnesota, Mississippi, and Florida) wished to collect repayment for the damage caused by the sale of those tobacco products sold by ReynoldsSub, the several states would have to file an entirely new lawsuit.

This scenario is neither idle nor hypothetical. As noted above, PMUSA candidly informed the Court that if the Court creates a legitimate path by which it may avoid its Texas Settlement obligations, it will do so. In light of its duties to its shareholders, why wouldn't it? The Texas Settlement imposes sizeable financial obligations on the settling defendants, and Texas would face serious practical obstacles if it was forced to file a new lawsuit and redo the work of the Texas Settlement. *See supra* Section III.D.2.b.ii (describing "problems of proof" related to causation and damages that would arise out of the existence of the Texas Settlement). Forcing Texas into a redo-scenario easily leaves the settling defendants far better off than they are under the yoke of the Texas Settlement. This scenario, or a comparable scenario organized to the same end, is a natural result of adopting the construction urged by Reynolds. To permit such a scenario is to end the Texas Settlement. The Court finds that such a result would be oppressive, inequitable, and unreasonable. According, application of that canon of construction strongly favors continuing liability under the Texas Settlement on this basis.

Defendants' construction of the Texas Settlement is incompatible with the purpose of finality. The Court concludes that the finality-related business purpose and context of the Texas Settlement support a finding that the parties intended **[**103]** liability for Reynolds to continue after assignment of the Acquired Brands.

ii. Reimbursement

a) The Texas Settlement contemplates proportional reimbursement for Texas' healthcare expenditures, including past cigarette consumption

The Texas Settlement sets forth a reimbursement framework that is consistent with Reynolds remaining liable. Specifically, the Texas Settlement includes a separate provision addressing the purpose of the "payments to be made by Settling Defendants." *1998 Amdt.*, Dkt. No. 2222-2 at 7 § 4. Section 4 of the 1998 Amendment provides:

> The payments to be made by Settling Defendants under this Stipulation of Amendment during the year 1998 are in settlement of the State's claims for reimbursement for public health expenditures of the State of Texas incurred in the year of payment or earlier years related to the subject matter of this Action, including without limitation expenditures made by the State's Employees' Health Insurance Program and Charity Care programs. ***All other payments made by Settling Defendants*** pursuant to this Stipulation of Amendment ***are in settlement of all of the State of Texas's claims for damages incurred by the State in the year of payment or earlier years related to the subject matter of this Action, including claims for reimbursement [**104] of Medicaid expenditures*** and punitive damages, except that no part of any payment under the Settlement Agreement or this Stipulation of Amendment is made in settlement of an actual or potential liability for a fine, penalty (civil or criminal) or enhanced damages or as the cost of a tangible or intangible asset or other future benefit.

Id. (emphasis added); *accord* *Texas v. Am. Tobacco Co., 463 F.3d 399, 401 (5th Cir. 2006)* ("On March 28, 1996, the State of Texas sued several major tobacco companies ***seeking reimbursement for various smoking-related health care expenditures***.") (emphasis added). This payment framework is necessary because of the various ways in which tobacco-related illnesses manifest themselves. Tobacco-related injuries frequently accrue over a period of years, only presenting after a substantial period of time. This risk remains even after the use of tobacco products stops. *See supra* Section III.A (giving the example of a Salem smoker with a time-lagged injury).

As a result, the Texas Settlement involves a methodology approximating the amount of damage caused by the tobacco products of each settling defendant for each given year. When more Texans smoke a settling defendant's cigarettes (measured by the volume of cigarettes purchased in a given year), **[**105]** the Texas Settlement assigns proportionally greater liability to that defendant for that year. This design is consistent with the perpetual nature of the payment framework set out by the Texas Settlement. Given that no reimbursement structure would guarantee all the funds needed every year to address that year's treatment demands,[34] the perpetual **[*443]** nature of the agreed-upon reimbursement framework ensures that Texas always has the resources—in any given year—to dedicate towards its citizens' medical care.

Texas argues that this reimbursement framework is only coherent if liability continues for the Acquired Brands. At the Court's hearing on the Motions to Enforce, Texas offered the following example to illustrate its point:

> So just as an example, say you have Jane Smith, she starts to smoke Winston cigarettes in 2001. She smokes for 15 years and unfortunately is diagnosed with cancer from her smoking in 2016. Reynolds stopped paying the State of Texas for the Winston brands in 2015. So when Smith gets cancer, the State has to begin making Medicaid payments for Ms. Smith's healthcare. In that situation, the State has not been paid for any of Ms. Smith's healthcare costs because none of the **[**106]** yearly payments were for future harm. And the Texas

---

[34] This principle follows from the fact that tobacco-related illnesses may manifest at unpredictable times and in unpredictable ways.

> Settlement Agreement required that perpetual payment so that the State would not be in a position where it had to pay for Smith's medical care without reimbursement for those costs.
>
> . . .
>
> [T]he claim language of the agreement demonstrates that this intent was for a payment to be in perpetuity, because if we aren't paid every year, we won't catch people like Ms. Smith. And, unfortunately, the reality is that lots of people get very sick.

Hearing Tr., Dkt. No. 2354 at 17:20-19:16.

Reynolds counters that this result is acceptable under the Texas Settlement, because the same result would occur if Reynolds simply stopped selling cigarettes at all. In Reynolds' view, since Reynolds could unilaterally *stop selling* the Acquired Brands without breaching the Texas Settlement, it can also *assign* the Acquired Brands without breaching the Texas Settlement.

This argument is misplaced. A scenario where the Acquired Brands were *no longer sold at all*—and thus no longer contribute to the harm of Texas citizens—is very different than a situation where the Acquired Brands continue to be sold in Texas, but by someone other than Reynolds. The Court agrees that **[**107]** the Texas Settlement evinces a mutually-agreed business purpose of providing perpetual reimbursement. That business purpose is only consistent with continuing liability for Reynolds with respect to the Acquired Brands.

In sum, the Court finds that reimbursement is an explicit business purpose of the Texas Settlement, and that such purpose would be frustrated without continuing liability for Reynolds.

b) Texas is not judicially estopped from asserting reimbursement as a purpose of the Texas Settlement

Reynolds advances the argument that Texas is judicially estopped from asserting that the Texas Settlement includes "compensation for past acts" based on positions that Texas took in a separate action before the Texas Supreme Court.

Texas had the opportunity to discuss the Texas Settlement in a constitutional challenge brought against the Tobacco Equity Tax statute pursuant to the Equal and Uniform Clause of the Texas Constitution. *See supra* Section I.D (describing the Tobacco Equity Tax). When such challenge reached the Texas Supreme Court, Texas intervened and defended the law. *Tex. Small Tobacco Coal., 496 S.W.3d at 785*. The challengers—a coalition of smaller tobacco manufacturers—asserted that the Tobacco Equity Tax was unconstitutional because it was not "uniform" in its application. **[**108]** The coalition argued that the Texas Settlement payments were really about ***punishment***, not reimbursement, and so **[*444]** the Texas Settlement was not a valid way to distinguish between classes of manufacturer. Texas asserted that Texas Settlement payments were not ***exclusively*** punitive—even if they were designed, in part, to punish, such payments also included an ongoing reimbursement framework designed to reimburse healthcare costs to Texas. Ultimately, the Texas Supreme Court agreed with Texas and upheld the constitutionality of the Tobacco Equity Tax.

Reynolds' argument fails because the position Texas took in the *Texas Small Tobacco Coalition* case is not inconsistent with its position here. Further, there is no judicial reliance—as is required for judicial estoppel—because the Texas Supreme Court explicitly reached its conclusion without relying on a finding related to the underlying purposes of the Texas Settlement. *Cf. Gabarick v. Laurin Mar. (Am.) Inc., 753 F.3d 550, 553 (5th Cir. 2014)* (requiring judicial reliance). In fact, that Court went to great lengths to make its restraint clear. The Texas Supreme Court expressly refused to determine the purpose of the payments made under the Texas Settlement. *Tex. Small Tobacco Coal., 496 S.W.3d at 788-92* ("[A]s a matter of judicial restraint, we *must* not decide **[**109]** the meaning of those payments today.") (emphasis in original). For these reasons, Reynolds' judicial estoppel argument is of no effect.

b. Taken as a Whole, the Texas Settlement Demonstrates Continuing Liability

HN27[] Contracts must be construed in a manner that will "harmonize and give effect to all the provisions of the contract so that none will be rendered meaningless." *J.M. Davidson, Inc. v. Webster, 128 S.W.3d 223, 229 (Tex. 2003)* (citing *Universal C.I.T. Credit Corp. v. Daniel, 150 Tex. 513, 243 S.W.2d 154, 158 (Tex. 1951))*. "No single provision taken alone will be given controlling effect; rather, all the provisions must be considered with reference to the whole instrument." *Id.* The following provisions, when harmonized rationally, support finding Reynolds liable.

i. No Release Provision

The most directly relevant indicator is the absence of a release provision. In *Seagull*, the contract did not include a provision that expressly released the contracting party from its obligations following an assignment, neither did it include a provision that expressly extended the contracting party's obligations after an assignment. *Seagull, 207 S.W.3d at 345*. As here, the contract was "silent on the subject" of post-assignment liability for the assignor. *Id.*

The *Seagull* court concluded that the absence of an express release provision was sufficient to support continuing **[**110]** liability for the assignor. *Id. at 347*. Specifically, *Seagull* explained that the assignor's liability continued "[b]ecause the operating agreement did not expressly provide that [the assignor's] obligations under the operating agreement should terminate upon assignment and [the injured party] did not expressly release [the assignor] following the assignment of its working interest." *Id.*

Here, no one disputes that the Texas Settlement does not contain any provision that could be construed as a release to be effective upon an assignment of the type Reynolds has made. Reynolds could have negotiated for a "release upon assignment" provision. It did not. Accordingly, as in *Seagull*, the absence of an express release provision is sufficient to find that Reynolds remains liable for the Acquired Brands under the Texas Settlement.

ii. Payments in Perpetuity

The Texas Settlement provides that Settling Defendants shall make Texas **[*445]** Settlement payments in perpetuity. The Texas Settlement provides that each Defendant shall make payments "on December 31, 1999 and annually thereafter on December 31st of each year after 1999." *1998 Amdt.*, Dkt. No. 2222-2 at 11 § 7. The phrase "annually thereafter" is unambiguous.[35] It **[**111]** is unqualified, includes no termination condition, and by its plain text literally encompasses every year after the Texas Settlement is executed.[36]

---

[35] As noted above, the Court finds that "annually thereafter" is unambiguous on its face. However, for the purpose of argument, to the extent "annually thereafter" might elsewhere be read as ambiguous, the Court alternatively makes the following factual findings that the phrase "annually thereafter" was understood by the parties to the Texas Settlement as imposing payment obligations in perpetuity.

First, there is a uniform course of performance from the settling defendants which shows that Texas Settlement payments are ongoing. Both Reynolds and PMUSA—the only remaining settling defendants—continue to make Texas Settlement payments for all of their brands (with the obvious exclusion that Reynolds has stopped making payments on the Acquired Brands).

Second, in documents filed with the United States Securities and Exchange Commission, Reynolds documented its understanding that the Texas Settlement "***imposed future payment obligations in perpetuity on RJR Tobacco***, B&W, Lorillard Tobacco and other major U.S. cigarette manufacturers." *Reynolds 2015 Form 10-K*, Dkt. No. 2222-8 at 111 (emphasis added). These statements were made prior to the present litigation, in a context where Reynolds had a legal obligation to make accurate statements. The Court credits them as such.

Those statements are also consistent with the position taken under oath by Reynolds' then-CEO Andrew J. Schindler that payment obligations under the Texas Settlement last "forever." *Schindler Fla. Trial Testimony*, Dkt. No. 2222-9 at 54711:25-54712:4 ("Q. Do Reynolds' obligations stop after 25 years under the MSA and the other four agreements? A. No, they don't. Q. ***How long do they go on***? A. ***Forever***.") (emphasis added). Other Reynolds executives took an identical position under oath. *See, e.g., Orlowsky Fla Trial Testimony*, Dkt. No. 2222-10 at 55899:16-55900:7 ("Q: Let's start with the MSA and other state agreements. . . . Q. Do your financial obligations under those agreements end after 25 years? A. No, they do not. ***They go on***

The interpretation of the Texas Settlement, as presented in this case by Defendants, is irreconcilable with a perpetual payment framework. Reynolds argues, in essence, that it is only liable as long as it produces and sells cigarettes branded under the Acquired Brands. Reynolds seems content to argue that if it were to sell the Acquired Brands for billions of dollars (which it did) Texas has no recourse under the Texas Settlement. This construction contradicts the perpetual payment structure of the Texas Settlement.

Imperial argues that since it disclaims any rights under the Texas Settlement, Texas can simply initiate new litigation against Imperial for the harm caused by the Acquired Brands. The Court rejects this suggestion because it would result in an unreasonable, oppressive, and inequitable construction of the Texas Settlement. *See* *Frost Nat'l Bank, 165 S.W.3d at 313* (explaining **[**112]** that ***HN28***[] courts must avoid contract constructions that are "unreasonable, inequitable, and oppressive"). Indeed, it would vitiate the very purpose of a settlement **[*446]** agreement and subject Texas to a potentially endless stream of litigation.

However, Imperial's suggestion that Texas simply file a new lawsuit reveals more fundamental problems. The compounding nature of tobacco injuries creates a material problem of proof that could bar any effective relief that Texas could seek. In any new action, Imperial would surely argue that Texas cannot prove that its citizens' medical illnesses (and resultant expenses) are caused by *Imperial's* sales of the Acquired Brands. Imperial would be able to claim that it is impossible to disaggregate the post-2015 harm caused by Imperial from the pre-2015 harm caused by Reynolds. Accordingly, absent some reliable measure of disaggregated damages, which may be foreclosed by the very nature of tobacco-related injuries, Imperial would surely assert that it cannot be held liable in any such new litigation. *See, e.g.,* *Bostic v. Ga.-Pac. Corp., 439 S.W.3d 332, 359 (Tex. 2014)* (vacating judgment in favor of asbestos plaintiff because there was no "basis for the jury to apportion liability between these two sources of asbestos"). **[**113]**

Compounding the issue, a follow-on suit would not only involve disaggregating between "two sources" of cigarettes, but would involve resolving the impact of the releases already given by Texas. Notably, Imperial has not disclaimed its right to rely on the Texas Settlement to immunize itself from liability for the cigarettes that were sold by Reynolds under the Acquired Brands. In that sense, Imperial has retained the right to benefit from the releases granted by the Texas Settlement, even if it does not identify as a beneficiary under the contract itself. The practical result of Imperial's retention of its right to rely on the releases in the Texas Settlement is that Imperial could very well receive, as a functional matter, a perpetual release of liability while avoiding making corresponding payments in perpetuity.

iii. Successors and Assigns Clause

The Texas Settlement provides, in pertinent part: "This Settlement Agreement shall be binding upon all Settling Defendants and their successors and assigns in the manner expressly provided for herein." *Texas Settlement*, Dkt. No. 2222-1 at 4 § 2.

The Fifth Circuit relied on a similar clause in *Texas Industries v. Brown* to find that an original contract signatory's liability **[**114]** continued even though the assets which formed the "subject matter" of the contract had been transferred. *218 F.2d 510 (5th Cir. 1955)*. *Texas Industries* dealt with a requirements contract addressed to three lightweight concrete manufacturing plants. *Id. at 511*. The manufacturing plants relied on a material known as "aggregate" to manufacture lightweight concrete, and the requirements contract obligated the concrete manufacturer to purchase all the aggregate that the manufacturer needed from the supplier for a period of sixty months. *Id.* The contract also purported to be binding on the manufacturer's "successors and assigns." *Id.*

---

forever .") (emphasis added). In view of the foregoing, the Court factually finds that the term "annually thereafter" was understood by the parties to impose an obligation to make Texas Settlement payments in perpetuity.

[36] The inclusion of an adjustment for inflation is also additional evidence that the signatories to the Texas Settlement understood that payments would be made in perpetuity—if payments were only intended to be made for a relatively short period of time, there would be a correspondingly lessened need to include an adjustment for inflation. While the inclusion of this term is not determinative of the duration of payments, it remains additional evidence consistent with an ongoing payment arrangement.

After only sixteen of the sixty months, the manufacturer leased the concrete plants to a third party, and thereafter rejected further shipments of aggregate on the basis that ***he*** no longer required any aggregate since ***he*** did not operate the plants. *Id.* The aggregate supplier brought suit against the concrete manufacturer and his third-party lessees, alleging that the manufacturer was liable for breach of contract and the lessees were liable for inducing breach of contract. *Id. at 511-12*. The trial court granted summary judgment to the plant owners "solely upon the contention that their obligation under the contract **[**115]** was extinguished by the leasing arrangement." *Id. at 512*.

The Fifth Circuit reversed. It explained: "In our opinion, neither a sale nor lease of **[*447]** the three block plants, nor an assignment of the contract, by the [concrete manufacturer] could in law effectuate a release of their obligations under the contract without the consent" of the aggregate supplier. *Id.* The Fifth Circuit identified three independent actions—"sale . . . of the three block plants," "lease of the three block plants," and "assignment of the contract"—and held that ***none of them*** could "effectuate a release" of liability under the original contract. *Id.* Specifically, the Fifth Circuit explained to release the manufacturer from liability would defeat the express intent of the parties. "The written agreement shows on its face that the requirements of the three block plants were the subject matter of the sale, and were within the contemplation of the parties." *Id.* Given that "the plants" themselves had "never ceased to operate," it would be inconsistent with the contract to release the concrete manufacturer from its liability under the contract. *Id.*

The Fifth Circuit also directly pointed to the contract's "successors and assigns" **[**116]** clause. *Id. at 513*. The clause provided, in pertinent part, as follows: "the terms and provisions of this contract shall inure to the benefit of and ***be binding upon the parties hereto, and upon the heirs, executors, administrators, successors and assigns of each party hereto***." *Id.* (emphasis added). The court explained that inclusion of a successors and assigns clause was evidence that the parties intended liability to continue for the original contracting party. *Id.* The "provisions" of the successors and assigns clause "strengthen our conclusion that [the manufacturer was] not released from but remained obligated" under the contract, despite the transfer of the plants to the lessees. *Id.* In the Fifth Circuit's view, the successors and assigns clause "makes clear . . . that the contracting parties took pains to anticipate and provide against contingencies such as are now being put forward as reasons for terminating the contract." *Id.* ***HN29***[] In other words, a "successors and assigns" clause reflects an effort by the parties to ensure that the obligations of the contract could not be defeated by transferring the "subject matter" of the contract. *Id.*

The Fifth Circuit surveyed applicable case law reaching **[**117]** back as far as the late 1800s, and found that the authorities reached a uniform outcome: the original contracting party remained liable on a contract when the "subject matter" of the contract was sold, leased, assigned, or otherwise transferred to a third party. *See id. at 512-13*.[37] Not without significance, the language and analysis conducted by the Fifth Circuit in *Texas Industries* is almost identical to the language used by the Texas Supreme Court in *Seagull*. *See Seagull, 207 S.W.3d at 347* (instructing ***HN30***[] courts to examine whether either "the contract's subject" ***or*** "other circumstances" indicated whether or not the obligations were "intended to survive assignment"); *compare id.* (construing contract in light of "the contract's subject"), *with Tex. Indus., 218 F.3d at 512* (construing contract in light of "the subject matter of the contract"). **[*448]** The analytical similarities between the Fifth Circuit's opinion in *Texas Industries* and the Texas Supreme Court's decision in *Seagull* confirm that both decisions are connected links in the same chain of precedent.

A faithful application of *Texas Industries* in combination with *Seagull* directs the Court to conclude that Reynolds remains liable under the Texas **[**118]** Settlement for sales of the Acquired Brands. The "subject matter" rationale,

[37] *See Tex. Indus., 218 F.2d at 512-13* (citing *Kamm v. Pritchard, 296 F. 871, 872 (5th Cir. 1924)* ("[W]here the owners of timberland and lumber mills had contracted with the plaintiffs to sell to them all of their output of lumber, the Fifth Circuit held that, although the contract contained no covenant by defendants not to sell their entire lumber operation, the contract was nevertheless enforceable by the plaintiff, and damages were recoverable.")); *see also, e.g., id.* (citing *Wells v. Alexandre*, 85 Sickels 642, *130 N.Y. 642, 29 N.E. 142, 3 Silv. A. 594 (1891)* ("In *Wells v. Alexandre*, the court held that the sale of steamers after making a contract for the supply of coal to them for one year did not relieve the original owners from the obligation to take the coal that the ordinary and accustomed use of the steamers required." (internal citation omitted))).

the "successors and assigns" rationale, and the uniformity of the common law rationale all indicate that Reynolds should not avoid its liability under the Texas Settlement by means of its assignment of the Acquired Brands.

Notably, the Court is persuaded that the weight of common law authority supports the Court's finding of continuing liability for Reynolds. The purpose of the common law rule that assignments do not extinguish obligations is directly relevant here. Professor Williston's well-regarded treatise on contracts extracts the rationale for this rule from the common law, and summarizes it as follows:

> It has been stated that ***HN31***[] the duties under a contract are not delegable inter vivos in a true sense under any circumstances; that is, ***one who owes money*** or is bound to any performance whatsoever ***cannot by its own act, or by any act in agreement with anyone else, except its creditor, divest itself of the duty and substitute the duty of another***. "No one can assign his liabilities under a contract without the consent of the party to whom he is liable." ***This is sufficiently obvious when attention is called to [**119] it, for otherwise obligors would find an easy practical way of escaping their obligations***: "While a party to a contract may as a general rule assign all his beneficial rights, except where a personal relation is involved, his liability under the contract is not assignable inter vivos because any one who is bound to any performance whatever or who owes money cannot by any act of his own, or by any act in agreement with any other person than his creditor or the one to whom his performance is due, cast off his own liability and substitute another's liability. ***If this were not true, obligors could free themselves of their obligations by the simple expedient of assigning them*** . . . ." The Uniform Commercial Code provides in this regard that a delegation of performance does not relieve the delegating party of the duty to perform or of any liability for breach of contract.

Williston & Lord, *supra*, § 74:27 (emphasis added). From this straightforward rationale, it follows that a party cannot free itself from its "obligations by the simple expedient of assigning them." *Id.* Texas law follows this rule, as must this Court. *See* Capitan Enters., Inc. v. Jackson, 903 S.W.2d 772, 776 (Tex. App.—El Paso 1994, writ denied).

iv. "In the Manner Expressly Provided For Herein"

The Texas Settlement also provides that it shall **[**120]** be binding on successors and assigns "in the manner expressly provided for herein." In pertinent part, § 2 provides:

> This Settlement Agreement shall be binding upon all Settling Defendants and their successors and assigns ***in the manner expressly provided for herein*** and shall inure to their benefit and to that of their respective directors, officers, employees, attorneys, representatives, insurers, suppliers, distributors and agents, and to that of any of their present or former parents, subsidiaries, affiliates, divisions or other organizational units of any kind; and the predecessors, successors and assigns of any of the foregoing.

[*449] *Texas Settlement*, Dkt. No. 2222-1 at 4 § 2 (emphasis added). Imperial puts forward a strained argument as to this phrase. In Imperial's view, the phrase "***expressly*** provided for herein" modifies "successors and assigns" to mean that only the ***releases*** are "binding on successors and assigns," and consequently, the Texas Settlement does not impose continuing payment obligations because "the ***payment*** sections do not mention successors and assigns." *Imperial Resp.*, Dkt. No. 2341 at 16 (emphasis in original). The Court rejects Imperial's interpretation for two reasons. **[**121]**

First, Imperial's argument conflates "benefits" that "inure" with "obligations" that "bind." The releases from liability are ***benefits*** that inure to the benefit of Reynolds' successors and assigns. It is unclear how Reynolds' assigns are ***bound*** by a benefit that inures in their favor. Yet Imperial claims that the only section which "shall be binding" on successors and assigns is the beneficial "waiver and release" provisions, rather than the payment obligations.

Second, Imperial next disclaims those benefits by indicating that it is ***not bound*** to accept the waiver and release from Texas. Such may reflect an effort to avoid liability under the "prior written consent" prong of § 2, which requires such consent whenever a right under the Texas Settlement is assigned. *See Texas Settlement*, Dkt. No. 2222-1 at

4 § 2. Thus, Imperial's argument that it does not benefit from the Texas Settlement's releases is irreconcilable with Imperial's construction suggesting that the releases in the Texas Settling "shall be binding" on Imperial.

The better reading of this phrase is that "in the manner expressly provided for herein" means "on the same terms as are expressly set out herein." PMUSA argues, and the Court **[**122]** agrees, that this term is designed to ensure that any successors and assigns are bound on equal terms as an original settling defendant—that is, bound in the manner expressly provided for in the Texas Settlement. The phrase "expressly" refers to the explicit terms of the Texas Settlement ("herein"), and the obligations of the Texas Settlement constitute "the manner" in which each settling defendant is bound. This interpretation is most consistent with the antecedent phrase "shall be binding." Obligations can be binding, but benefits inure.

This construction is also the most consistent with the stated purposes of the Texas Settlement. By ensuring that the assigns of settling defendants were bound to the same extent as the original settling defendants, this provision of the "successors and assigns" clause was aimed to avoid precisely this type of scenario, where an assignment is alleged to diminish the rights of the other signatories to the Texas Settlement. Instead, this term expresses the intent that successors and assigns must be bound not in some partial or incomplete way, or in some way that lessens the rights secured by the Texas Settlement, but instead must be bound "in the manner **[**123]** expressly provided for" by the Texas Settlement. In that sense, this construction facilitates both the finality interests of the Texas Settlement, as well as the reimbursement framework.

Accordingly, this Court finds that this provision of § 2, which provides that the Texas Settlement "shall be binding upon all settling defendants and their successors and assigns ***in the manner expressly provided for herein***," reflects that successors and assigns would be bound to the same extent as an original settling defendant. This provision is designed to avoid diminishment of Texas' rights as a result of a succession or assignment. As a result, this provision supports a finding that the parties to the Texas Settlement intended that **[*450]** liability for the Acquired Brands should continue even after an assignment.

v. Prior Written Consent

The Texas Settlement includes a provision that prohibits assignment of rights or obligations without the prior written consent of all other signatories to the Texas Settlement. Specifically, the Texas Settlement provides in pertinent part: "None of the rights granted or obligations assumed under this Settlement Agreement by the parties hereto may be assigned or otherwise conveyed **[**124]** without the express prior written consent of all of the parties hereto." *Texas Settlement*, Dkt. No. 2222-1 at 4 § 2.

Since this clause its substantially similar to the "successors and assigns" clause analyzed *supra* in Section III.B.2.b.iii, the Court's analysis materially overlaps with the analysis previously set forth therein. The Court incorporates that analysis by reference. That said, the Court finds there are two additional observations worth noting.

HN32[] First, if a settling defendant cannot *assign* an obligation without the other parties' prior written consent, it follows that the same defendant cannot *extinguish* an obligation without the other parties' prior written consent.

Second, this section limits a party's ability to "assign[] ***or otherwise convey***[]" rights or obligations under the Texas Settlement. Consistent with the reasoning of *Texas Industries*, this clause confirms that the parties did not intend Reynolds to be able to escape its liabilities under the Texas Settlement through ***any*** form of conveyance.

Accordingly, the Court concludes that the "prior written consent" provision supports the conclusion that Reynolds remains liable under the Texas Settlement for the Acquired Brands. **[**125]**

c. The Market Share Provision Supports Liability Rather Than Excusing It

Reynolds argues that its liability is limited—and is now fully excused—by the Market Share provision in the Texas Settlement. Specifically, Reynolds asserts that the quantity of liability is measured by the "Market Share" definition, and that the Market Share definition only imposes liability for cigarettes which it currently sells.

The Texas Settlement defines Market Share as follows:

> (b) "Market Share" means a Settling Defendant's respective share of sales of Cigarettes, by number of individual Cigarettes shipped in the United States for domestic consumption, as measured by such Settling Defendant's audited reports of shipments of Tobacco Products provided to the U.S. Securities and Exchange Commission ("SEC") (or, in the case of any Settling Defendant that does not provide such reports to the SEC, audited reports of shipments containing the same shipment information as contained in the reports provided to the SEC) ("Shipment Reports"), during (i) with respect to payments made pursuant to paragraph 7 of this Stipulation of Amendment, the calendar year ending on the date on which the payment at issue is due (or, in the case of the payment due **[**126]** on November 1, 1998, the calendar year ending December 31, 1998), regardless of when such payment is made, and (ii) with respect to all other payments made pursuant to this Stipulation of Amendment and the Settlement Agreement, the calendar year immediately preceding the year in which the payment at issue is due, regardless of when such payment is made;

1998 Amdt., Dkt. No. 2222-2 at 5-6 § 3(b). Further, the Texas Settlement provides the following payment requirement:

> **[*451]** Each of the Settling Defendants further agrees that, on December 31, 1999 and annually thereafter on December 31st of each year after 1999 (subject to final adjustment within 30 days), it shall severally cause to be paid into the registry of the Court and in accordance with and subject to paragraph 17 of this Stipulation of Amendment, pro rata in proportion to its Market Share, its share of 7.25% of the following amounts (in billions) . . . .

Id. at 10-12 § 7. Based upon a combination of the Market Share provision and the payment provision, Reynolds asks the Court to conclude that its obligations under the Texas Settlement, at least with respect to the Acquired Brands, have now terminated. The Court declines for the following reasons.

First, the Court finds as a matter of law that the Market Share provision does not apply **[**127]** to the legal question of liability following an assignment. Second, to the extent (if any) that the Market Share provision is relevant to the issue of Reynolds' post-assignment liability, Reynolds' continued inclusion of the Acquired Brands in its Market Share payment to Texas' Private Counsel is tantamount to an admission by Reynolds that it remains liable to Texas.

i. Market Share Relates to Payment Quantification, Not the Legal Attribution of Liability for Payment

As an initial matter, the Market Share argument which Reynolds makes is very similar to the Participating Interest argument rejected by the Texas Supreme Court in *Seagull*. The contract in *Seagull* required the defendant to "reimburse [the plaintiff for operating costs] in proportion to its Participating Interest," and it defined "Participating Interest" as the defendant's ownership in the oil and gas leases. *Seagull, 207 S.W.3d at 345*. Since the defendant did not own any participating interest *after* its assignment, the defendant claimed the contract imposed no liability for that period of time. *Id. at 344-45*. Instead, the defendant contended that its "obligation to pay . . . terminated on the date it sold its interests because the agreement imposed liability for **[**128]** expenses only upon ***current*** working interest owners." *Id. at 345* (emphasis in original).

The Texas Supreme Court squarely rejected that argument, concluding instead that the defendant "reads far too much into these provisions." *Id. at 346*. The *Seagull* court found those provisions were addressed to the ***amount*** of payment, not the issue of ***responsibility*** for payment. *Id.* The provisions cited by the *Seagull* defendant simply did not "mention the subject of release or the consequences which are to follow the assignment of a working interest" in the leases. *Id.*

Following *Seagull*, the Market Share provision is inapplicable to the issue of legal liability now before the Court. The Texas Settlement distinguishes between disputes over attribution of ***liability for payments*** (which is an issue reserved for this Court, and which is determined by reference to legal principles) and disputes over ***quantity of payments*** (which is an issue delegated in part to PwC, and determined by reference to the Market Share provision). In the instant case, no party disputes how many cigarettes are being sold or how much would be due; rather, the parties dispute who must pay. Reynolds' attempt to recast the Market Share provision as a provision **[**129]** controlling the consequences of an assignment conflicts with the remaining text and context of the Texas Settlement. *See supra* Sections III.C.2.a—b. As in *Seagull*, the Texas Settlement has a definition quantifying the amount of payments which are due. As in *Seagull*, the Texas Settlement imposes a pro rata obligation to pay based on that payment quantity term. And as in *Seagull*, **[*452]** the Court concludes that the original contracting party—here, Reynolds—remains liable.

By contrast, a finding that the Market Share provision does not control post-assignment liability is consistent with the foregoing textual and contextual indicators. The canon of construction that provisions within a contract be read, wherever feasible, in harmony and not in conflict with one another supports a finding that the Market Share provision does not relieve Reynolds from liability.

Before this Court, Reynolds acknowledged that the Texas Fee Payment Agreement, which is a part of the Texas Settlement, uses the same Market Share definition for both payments to Texas and to Texas' Private Counsel.

> THE COURT: Do you agree that the market share definition in the Texas Fee --Fee Payment Agreement is the same definition of **[**130]** market share that's in the Texas Settlement Agreement?
> COUNSEL FOR REYNOLDS: I do, Your Honor.
> THE COURT: Okay. Do you acknowledge that Reynolds, by including the Acquired Brands and its definition of market share for purposes of the Texas Fee Payment Agreement -- well, first of all, do you agree that Reynolds does that, that they include the Acquired Brands in their definition of market share for purposes of the Texas Fee Payment Agreement?
> COUNSEL FOR REYNOLDS: Your Honor, under the Asset Purchase Agreement, Reynolds did elect to do so, yes.

Hearing Tr., Dkt. No. 2354 at 114:23-115:11. Given those two concessions, the Court pressed Reynolds to explain its inconsistent conduct.

> THE COURT: I don't know how you can say Reynolds continued to make the payments under the attorney's fees agreement because that's the commitment they made, and at the same time say, but notwithstanding the commitment Reynolds made to the State of Texas in the settlement agreement, it's not going to include the Acquired Brands in the market share calculation for paying the State.
> COUNSEL FOR REYNOLDS: Your Honor, one moment because I do need to read what Mr. Leibenstein handed me.
> THE COURT: That's fine.
>
> COUNSEL FOR **[**131]** REYNOLDS: But his handwriting is outside of my grasp. One moment. I apologize. May I speak with him?
> THE COURT: You may consult with co-counsel.
> COUNSEL FOR REYNOLDS: Your Honor, and I think -- I think Mr. Leibenstein and I -- I had the discussion that I attempted to make a point less artfully with the Court. Again, the attorney's fees -- and this goes to the State's shifting position. The attorney's fees were for past conduct. The attorney fees were accrued at the time the settlement agreement was signed.

Id. at 119:1-20.[38]

---

[38] Reynolds also attempted to distinguish the payments to Private Counsel from the payments to Texas, on the basis that the payments to Private Counsel are less expensive because they "do not exist in perpetuity." *Hearing Tr.*, Dkt. No. 2354 at 123:8-124:19; *see also, e.g., id.* at 124:11-14 ("So I understand the inconsistency there, but when we're talking, again, about forward-

This explanation is unpersuasive. Under the Texas Settlement, each settling defendant obtained a full release from liability **[*453]** in perpetuity. At that moment, Texas immediately "accrued" its entitlement to payment (as did Texas' Private Counsel, for legal services).

Further, the ***motivation*** for providing payments—*e.g.*, whether they were "accrued"—is wholly unrelated to the calculation for such payments. The Acquired Brands either are part of Reynolds' Market Share, as that term is defined in the Texas Settlement, or they are not. Reynolds' own conduct in making payments to Texas' Private Counsel recognizes that the Acquired Brands appropriately **[**132]** remain within its Market Share. Reynolds cannot now pretend that its conduct does not exist or fails to have meaning.

ii. Texas Fee Payment Agreement

Reynolds' conduct in paying attorneys' fees to Texas' Private Counsel confirms that its liability to Texas continues, because Reynolds continues to recognize that the Acquired Brands fall within its Market Share.

As described above, the Texas Settlement obligates settling defendants to make two sets of annual payments—one annual payment to the State of Texas, and a separate annual payment to the Private Counsel Texas hired to represent it in prosecuting the 1996 litigation. Both payments are based on a single definition of Market Share. The State of Texas gets a larger percentage of each defendant's Market Share, while Texas' Private Counsel gets a smaller percentage. Since Reynolds sold the Acquired Brands as part of the APA, it has stopped making payments for the Acquired Brands to Texas—***but has continued to make payments for the Acquired Brands to Texas' Private Counsel***. Thus, to the extent that the Market Share provision is relevant, it supports ongoing liability for Reynolds.

d. <u>The Texas Comptroller's Employees</u>

Imperial and Reynolds **[**133]** rely on the conduct of several employees of the Texas Comptroller of Public Accounts to argue that Texas has acquiesced in the exclusion of the Acquired Brands from the Texas Settlement.

In 2015, Imperial submitted paperwork to the Texas Comptroller indicating that the Acquired Brands were subject to the Tobacco Equity Tax, but not the Texas Settlement. Consistent with the ministerial handling of the paperwork submitted by Imperial, the employees of the Texas Comptroller added the Acquired Brands to the Comptroller website, reflecting the information that Imperial submitted: that the Acquired Brands were ***not*** subject to the Texas Settlement. Imperial and Reynolds now argue that Texas itself has conceded that the Acquired Brands are subject only to the Tobacco Equity Tax.

The Court disagrees. As a threshold matter, this is parol evidence. Further, the conduct of employees within the Texas Comptroller's office, administratively processing a unilateral submission from Imperial, does not reflect a knowing concession by Texas. Such conduct is not effective to bind Texas to a particular course of performance.[39] Finally, as a factual matter, the Court does not find that Texas actually engaged **[**134]** in a course of performance conceding nonliability for either Reynolds or Imperial.

i. Course of Performance Evidence Is Inappropriate

As an initial matter, the Court rejects this argument because it is parol **[*454]** evidence which may only be used to shed light on an ambiguous contract. *URI, Inc. v. Kleberg Cty., 543 S.W.3d 755, 764-65 (Tex. 2018)* ("***HN33***[]

looking payments, these -- these in a few years, a relatively few years as -- as against perpetuity, then those obligations will cease."). The Court summarily rejects this argument, which is not an appropriate basis of distinction.

[39] Despite relying on the actions of the Texas Comptroller's employees, Imperial and Reynolds spend no time arguing the antecedent question of whether this evidence is cognizable under Texas law. Despite a need to do so, Imperial and Reynolds simply do not address whether several employees of the Texas Comptroller may bind Texas to a course of performance.

Only where a contract is ambiguous may a court consider the parties' interpretation and 'admit extraneous evidence to determine the true meaning of the instrument.'" (quoting *David J. Sacks, P.C. v. Haden, 266 S.W.3d 447, 450-51 (Tex. 2008))*). All parties to this case agree that the Texas Settlement is unambiguous, and the Court does not find otherwise. Therefore, the Court does not consider this course of performance evidence.

ii. The Conduct of Several of the Comptroller's Employees Is Not Competent Course of Performance Evidence That May Bind Or Limit Texas' Rights

HN34[] Texas law is replete with restrictions on the ability of "officers and agents" to modify or limit legal rights to which the State would otherwise be entitled. *Tex. Co. v. State, 154 Tex. 494, 281 S.W.2d 83, 88 (Tex. 1955)*; *see also* *State v. Durham, 860 S.W.2d 63, 67-68 (Tex. 1993)* (explaining that "[t]he acts and conduct of its officers and agents cannot estop it from recovering" payments which are otherwise due). Texas law would not support a finding of estoppel, laches, or any other limitation based on this conduct. **[**135]** *State v. Emeritus Corp., 466 S.W.3d 233, 250 (Tex. App.—Corpus Christi 2015, pet. denied)* (explaining that ***HN35***[] Texas "is not subject to the defenses of limitations, laches, or estoppel"). The question is thus whether Texas would nonetheless permit a course of performance theory to abrogate rights that Texas would otherwise have under the Texas Settlement. The Court concludes Texas would not so permit.

There are a number of rationales for restricting the ability of random state employees to limit Texas' rights. First, the well-ordered functioning of government "would be undermined if a government agent could—through mistake, neglect, or an intentional act—effectively" nullify Texas' legal rights "by ignoring, misrepresenting, or misinterpreting" its duties. *City of White Settlement v. Super Wash, Inc., 198 S.W.3d 770, 773 (Tex. 2006)*; *see also* *City of San Angelo v. Deutsch, 126 Tex. 532, 91 S.W.2d 308, 309 (Tex. 1936)* ("The decisions in this state have consistently protected the public from liability and loss on account of mistakes, negligence, and unauthorized acts of public officials in the performance of public or governmental duties. Mistakes or unauthorized acts of officials charged with the custody and disposition of public land do not estop the state or deprive it of its property."). In the best-case scenario, Texas would constantly be at the mercy of its least competent employees if such employees could limit Texas' **[**136]** rights—and in the worst case, deliberate misconduct might intentionally strip the state of its rights. *Lubbock Cty. Water Control & Imp. Dist. v. Church & Akin, L.L.C., 442 S.W.3d 297, 300-01 (Tex. 2014)* ("***HN36***[] [I]t remains a fundamental principle of Texas law, intended 'to shield the public from the costs and consequences of improvident actions of their governments.'" (quoting *Tooke v. City of Mexia, 197 S.W.3d 325, 331-32 (Tex. 2006))*).

HN37[] Second, Texas' rights are held "for the benefit of all the people of the state." *Durham, 860 S.W.2d at 68*. If only a subset of employees could strip the public of its rights, such employees—whether through mistake or misconduct—might grievously injure the public. *Id. at 67-68*. For that reason, the Texas Supreme Court has uniformly rejected "ratification by estoppel" arguments that would limit Texas' entitlement to payments. *Id.*; *see also* *Weatherly v. Jackson, 123 Tex. 213, 71 S.W.2d 259, 266 (Tex. 1934)* ("To **[*455]** the authorities ***may be added the rule that the failure of public officers to perform their duties will not work an estoppel against the state***.") (emphasis added). ***HN38***[] Texas courts have also rejected limitations that would obstruct Texas' "responsibility and duty to enforce health care" rights that are designed "to protect its citizens." *Emeritus Corp., 466 S.W.3d at 251*. Indeed, Texas law is careful to limit any waiver of the State's rights, in order to avoid obstructing predictable payments that are intended for public use. *Tex. Nat. Res. Conservation Comm'n v. IT-Davy, 74 S.W.3d 849, 854 (Tex. 2002)*.

These limitations **[**137]** remain true with respect to binding the State to contractual duties and obligations. *State ex rel. Dep't of Criminal Justice v. VitaPro Foods, Inc., 8 S.W.3d 316, 322 (Tex. 1999)*. "[O]nly persons authorized by the Constitution or a statute can make a contract binding on the State. All state officers' powers are fixed by law, and all persons dealing with them are charged with notice of the limitations on those powers. Only persons having actual authority to act on behalf of the State can bind the State in contract." *Id.* (citing *State v. Ragland Clinic—Hosp., 159 S.W.2d 105, 106 (Tex. 1942))*.

Adopting the approach advocated by Reynolds and Imperial would circumvent the well-settled Texas principle of law that limitations do not run against the State, and that Texas' agents and officers may not deprive the State of rights. The Texas Supreme Court has long recognized that ***HN39***[] litigants may not create a backdoor limitations argument by suggesting that inaction on Texas' part had altered its substantive rights. *See Truehart & Andrews v. Babcock, 49 Tex. 249, 258-59 (1878)*.

Notably, Reynolds expressly recognized before this Court that the employees of the Texas Comptroller were not capable of binding Texas to a course of performance.

> COUNSEL FOR REYNOLDS: The State, likewise, required [Imperial] to make equity fee payments as a non-settling manufacturer, quote, because they were non-settlement **[**138]** cigarettes. And here you see a tax policy representative from the comptroller's office. This is in 2016, following the acquisition, saying: Ms. Wright is correct, Winston, Salem, Kool, and Maverick are now under SPM. Now they're subsequent participating manufacturers, and they -- so it's not as though this was not being discussed --
>
> THE COURT: ***Can the comptroller bind the State of Texas through an email like that***?
>
> COUNSEL FOR REYNOLDS: ***No, Your Honor***, the comptroller can't bind the State of Texas, ***but it does tell the State — it does tell us how the State of Texas viewed [Imperial]***, just as PM did, as an entity that had not yet joined the settlement agreement and thus was not subject.
>
> THE COURT: ***It tells us how one person in the comptroller's office viewed it***.
>
> COUNSEL FOR REYNOLDS: ***It -- it does, Your Honor. It does -- that's -- that's completely fair***.
>
> THE COURT: ***It doesn't purport to speak for the State, and it doesn't purport to speak for the comptroller of public accounts, correct***?
>
> COUNSEL FOR REYNOLDS: ***It does not, Your Honor***. Only insofar as those --those individuals are confirming the basis by which the State is collecting payments.

Hearing Tr., Dkt. No. 2354 at 57:20-58:20 (emphasis **[**139]** added).

iii. Conduct Was Passive

As noted above, the Texas Comptroller's employees are not automatically tasked **[*456]** with auditing a manufacturer's self-reporting. Imperial provided un-audited information to state employees, who then performed what is clearly a ministerial task. This cannot be recast as knowing decision-making. Nothing in the record before the Court suggests that these employees understood the relationship between the Acquired Brands and the Texas Settlement, let alone that their conduct might be imputed to Texas as a course of performance.

Indeed, Imperial recognized that the conduct of the Texas Comptroller employees was only reactive. While displaying a demonstrative image of the Texas Comptroller's website during the hearing before this Court, Imperial engaged in the following colloquy.

> COUNSEL FOR IMPERIAL: This is the version of the website they put up when they were treating us as a non-settling manufacturer, which is an SPM.
> THE COURT: In response to the form that you submitted?
> COUNSEL FOR IMPERIAL: In response to the form that we submitted.

Hearing Tr., Dkt. No. 2354 at 66:23-67:4. The Court factually concludes that the Texas Comptroller's employees were behaving in **[**140]** a reactive and passive manner, rather than affirmatively engaging in a course of performance under the Texas Settlement.

In sum, the Court concludes that the Texas Comptroller's employees could not legally create a course of conduct as described by Imperial and binding on Texas. Further, in the alternative, the Court makes the finding of fact that the conduct of such employees does not demonstrate a course of performance suggesting that the Acquired Brands fall outside the Texas Settlement.

E. Reynolds Is Liable For Breach of the Prior Written Consent Clause in Texas Settlement § 2

Reynolds breached the Texas Settlement by transferring the releases included in the Texas Settlement to Imperial without the prior written consent of the Texas Settlement signatories. As noted above, the Texas Settlement provides "[n]one of the rights granted or obligations assumed under this Settlement Agreement by the parties hereto may be assigned or otherwise conveyed without the express prior written consent of all of the parties hereto." *Texas Settlement*, Dkt. No. 2222-1 at 4 § 2. One of the rights under the Texas Settlement is the right to a release with respect to the Acquired Brands. *See, e.g., id.* at 15-16 § 13 (stipulating to dismissal of the underlying action with prejudice); § 14 (providing a perpetual release). **[**141]**

Reynolds transferred that release to Imperial as part of the APA. Article II of the APA provides that Reynolds and Lorillard shall "sell, convey, assign, transfer and deliver," a series of assets, including the Acquired Brands (which are defined as part of the "Transferred Assets"), and the following:

> (v) ***all*** claims, causes of action, ***defenses*** and rights of offset or counterclaim against third parties ***relating to any Transferred Asset or any Assumed Liability***, including unliquidated rights under manufacturers' or vendors' warranties, except for claims for refunds of any Taxes paid prior to the Closing Date;

APA, Dkt. No. 2222-6 at 5 art. II § 2.01(a)(v) (emphasis added). ***HN40***[] The affirmative defense of "release" unambiguously falls within the term "defenses . . . relating to ***any*** Transferred Asset or Assumed Liability." *Seven Invs., LLC v. AD Capital, LLC, 32 A.3d 391, 396 (Del. Ch. 2011)* (recognizing that "release" is a defense).[40] **[*457]** The Transferred Assets include the Acquired Brands, and Texas' release of liability is a complete defense to any claim of liability for the Acquired Brands. Accordingly, the APA expressly includes a transfer of a right under the Texas Settlement to Imperial.[41] Since the Texas Settlement expressly prohibits such an assignment, Reynolds

---

[40] The APA is construed pursuant to Delaware law. *See infra* Part IV. Accordingly, the Court relies on a Delaware Chancery Court opinion in setting out the plain textual meaning of "defense." Further, while the Court defers to the Delaware Chancery Court for all fact-bound interpretation of any ambiguous provisions of the APA, the Court finds that § 2.01(a)(v) is unambiguous in transferring the "defense" of release for the Acquired Brands to Imperial. Accordingly, the Court reaches the meaning of § 2.01(a)(v).

[41] The APA includes a provision which states:

> "Notwithstanding any other provision of this Agreement to the contrary, this Agreement shall not constitute an agreement to assign, directly or indirectly, any Transferred Asset or any claim or right or any benefit arising thereunder or resulting therefrom if an attempted direct or indirect assignment or transfer thereof, without the consent of a third party, would constitute a breach, default, violation or other contravention thereof, would be ineffective with respect to any party to an agreement concerning such Transferred Asset, claim or right or would in any way adversely affect the rights of the Acquiror or the Sellers (as applicable) thereto or thereunder, and such consent has not been obtained on or prior to the Closing Date."

APA, Dkt. No. 2222-6 at 5 art. II § 2.02(a). While inartfully drafted, the import of this provision is to disclaim any assignment of any right or asset if such assignment would be a breach of any contract or "would in any way adversely affect the rights" of Reynolds or Imperial. While this might hypothetically have limited the transfer of any defenses, Reynolds and Imperial do not press the applicability of this provision. Indeed, given that two courts have found Reynolds liable for breach of contract based on the transfer of the Acquired Brands, a faithful application of this provision would suggest that the assignment of the Acquired Brands was itself ineffective. Since neither Reynolds nor Imperial appear to desire that result, it appears they have made the strategic choice not to assert this provision as a limitation that the Court should consider when construing the APA, despite spending considerable time discussing whether various assignments under the APA constitute a breach of contract. To the extent Reynolds and Imperial wished to press the position that § 2.02(a) limited transfers, it would necessarily require both parties to argue that the transfers of the Acquired Brands and related assets were not actually effective. Imperial and Reynolds had ample opportunity to argue that § 2.02(a) limited their liability and declined to do so. Accordingly, given the apparently breached the Texas Settlement. However, **[**142]** this assumption does not cause Imperial to be liable under the Texas Settlement, given that the releases are a right—not an obligation—which is expressly assumed. Since Texas law appears to require ***obligations*** to be expressly assumed for liability under a contract to attach, and this provision deals with rights, it does not create direct liability for Imperial.

***

For all the reasons set forth above, the Court holds that Reynolds remains liable **[*458]** for the Acquired Brands under the Texas Settlement.

F. Imperial

Imperial asserts that it is not liable under the Texas Settlement, despite the existence of a clause therein which purports to bind successors and assigns. Imperial points to *Texas Business Organizations Code § 10.254*, which altered the common law rule for binding successors and assigns in the context of a sale of assets. *Section 10.254* recites in pertinent part: "Except as otherwise expressly provided by another statute, a person acquiring property described by this section may not be held responsible or liable for a liability or obligation of the transferring domestic entity that is not expressly assumed by the person." *Tex. Bus. Org. Code § 10.254(b)*. At least one Texas intermediate appellate court has held that a "successors and assigns" clause is no longer self-executing, because a contract purporting to bind successors and assigns cannot ***actually*** bind successors and assigns unless the successor or assign also expressly consents to be bound. *See C.M. Asfahl Agency v. Tensor, Inc., 135 S.W.3d 768, 775 (Tex. App.—Houston [1st Dist.] 2004, no pet.)*.

Asfahl involved an assign that had only purchased assets, and had not expressly consented **[**144]** to be bound. *Id. at 780-81*. That court held that the assign could not be liable under the original contract between the parties. *Id.* "[E]ven if the 'continuity provisions' of the . . . sales and marketing agreements . . . purported to bind their 'successors and assigns,' those agreements could not contravene the protections that *article 5.10(B)(2)* afforded [to the assign] in acquiring the assets of the [the assignor] entities unless [the assign] expressly agreed to be bound by the . . . agreements." *Id. at 791*.[42] Thus, according to *Asfahl*, a successors-and-assigns clause is not self-executing to bind an assignee without the assignee's express consent. *Id.*

The Court finds Imperial is not directly liable under the Texas Settlement pursuant to the successors and assigns clause. As noted below, Imperial may be liable pursuant to its undertakings in the APA, depending on the Delaware Court's construction of the obligations undertaken by Imperial. However, Imperial is not liable under the Texas Settlement merely by virtue of the "successors and assign" clause, in light of *§ 10.254* and *Asfahl*. The Court does not ultimately pass on whether Imperial has expressly assumed obligations under the Texas Settlement by virtue **[**145]** of its promises in the APA, in view of the Court's decision to defer construction of the APA to the Delaware Court.

---

strategic choice made by Reynolds and Imperial not to discuss this issue, the Court finds any argument based on this provision waived. *See Firefighters' Ret. Sys. v. Grant Thornton, LLP, 894 F.3d 665, 670 n.18 (5th Cir. 2018)* ("[***HN41***[] A]n argument not raised before the district court cannot be asserted the first time on appeal"); *Dallas Gas Partners, L.P. v. Prospect Energy Corp., 733 F.3d 148, 156-57 (5th Cir. 2013)* ("If a party fails to assert a legal reason why [relief] should . . . be granted, that ground is waived and cannot be considered or raised on appeal."); *Maverick Recording Co. v. Harper, 598 F.3d 193, 197 (5th Cir. 2010)* (holding that a party "waived her constitutional challenge ***by failing to raise it [in the district court] in a manner that would allow the [**143] district court to rule on it***"); *Kelly v. Foti, 77 F.3d 819, 823 (5th Cir. 1996)* ("[The] raising party must present the issue ***so that it places the opposing party and the court on notice*** that a new issue is being raised").

[42] *Texas Business Corporations Act article 5.10(B)* is the predecessor statute to *Texas Business Organizations Code § 10.254*. Despite stylistic wording differences between the two statutes, Texas courts have interpreted *article 5.10(B)* and *§ 10.254* identically. *In re 1701 Commerce, LLC, 511 B.R. 812, 823 (Bankr. N.D. Tex. 2014)* (citing *E-Quest Mgmt., LLC v. Shaw, 433 S.W.3d 18, 23-24 (Tex. App.—Houston [1st Dist.] 2013, pet. denied)*); *see also Ford, Bacon & Davis, L.L.C. v. Travelers Ins. Co., 635 F.3d 734, 737 (5th Cir. 2011)*.

Though Imperial's liability is limited by Texas statutory law, Imperial is still an assign within the meaning of the Texas Settlement. ***HN42***[] Under Texas law, "[t]he term 'assignment' has a comprehensive meaning and in its most general sense means the transfer or setting over of property or some right or interest from one person to another." *Epstein v. Wendy's Int'l, Inc., No. 14-04-00704-CV, 2006 WL 535759, at *2 (Tex. App.—Houston [14th Dist.] 2006, pet. denied)* (citing *Twelve Oaks Tower I, Ltd. v. Premier Allergy, Inc., 938 S.W.2d 102, 113 (Tex. App.—Houston [14th Dist.] 1996, no writ)*; *Univ.* ***[*459]*** *of Tex. Med. Branch at Galveston v. Allan, 777 S.W.2d 450, 452 (Tex. App.—Houston [14th Dist.] 1989, no writ))*. An assignment "is a manifestation by the owner of a right or property of [its] intention to transfer such right or property to another." *Twelve Oaks, 938 S.W.2d at 113*; *Pape Equip. Co. v. I.C.S., Inc., 737 S.W.2d 397, 399 (Tex. App.—Houston [14th Dist.] 1987, writ ref'd n.r.e.)*.

The APA unambiguously and expressly provides that Imperial is an assign of Reynolds. Under the APA, Reynolds promised to "sell, convey, ***assign***, transfer and deliver" a variety of assets, including the Acquired Brands which form the subject matter of the Texas Settlement. *APA*, Dkt. No. 2222-6 at 5 art. II § 2.01(a). The APA unambiguously involves "the transfer . . . of property or some right or interest" from Reynolds to Imperial. *See Epstein, 2006 Tex. App. LEXIS 1734, 2006 WL 535759, at *2*.

Despite the finding that Imperial is an assign, and considering the totality of the existing circumstances, this Court elects to defer ultimate resolution of the Motions **[**146]** to Enforce, as they relate to Imperial and the issue of its liability to Texas, to the pending litigation in the Delaware Chancery Court between Imperial and Reynolds. The Court is persuaded that judicial restraint in this regard is the better course. The legal obligations, if any, between Texas and Imperial are largely informed by the APA, which is subject to Delaware law and best determined there. For these reasons, and mindful of comity between Texas and Delaware, this Court exercises judicial restraint to leave the issues between Reynolds and Imperial within the capable hands of the Delaware Court. Such issues include the scope and nature of the obligations undertaken by Imperial pursuant to the APA, and whether Imperial expressly assumed liability under the Texas Settlement by virtue of the APA.

Both the Florida Court and Minnesota Court recognized that it was possible that the Delaware Court would construe the APA to find that Imperial expressly assumed the PSS Agreement obligations. For example, if Imperial's covenant to use "reasonable best efforts" to join the PSS Agreements requires the actual assumption of PSS obligations, then the "reasonable best efforts" term ***is*** an express **[**147]** assumption of liability. However, the parties have not asked this Court to construe "reasonable best efforts," nor have they briefed the question. Instead, the parties note that the appropriate construction of "reasonable best efforts" is presently before the Delaware Chancery Court. Based upon recognized notions of comity and judicial efficiency, this Court defers the construction of "reasonable best efforts," with full knowledge that such represents a separate theory by which Imperial might find itself liable under the Texas Settlement.

IV. Texas' Third-Party Beneficiary Status

Texas also advances the argument that it is a third-party beneficiary of the APA and urges this Court to follow the decision of the Minnesota Court, which found that Texas was unambiguously a third-party beneficiary of the APA because the APA expressly contracts for providing Texas Settlement payments to Texas. *See Texas Reply*, Dkt. No. 2346 at 7 (quoting *Minn. Ct. Judgment*, Dkt. No. 2346-6 at 19 ("[Imperial] cannot credibly contend that Minnesota has no direct or third-party interest in the APA.")).

This Court also defers this issue to be taken up as part of the Delaware action, to the extent Texas is inclined **[**148]** to intervene therein. The parties do not dispute that Delaware law generally governs the formation and interpretation of the APA. The plain text of the APA confirms that Delaware law governs its interpretation. *APA*, **[*460]** Dkt. No. 2222-6 at 82 § 12.12(a); *Coca-Cola Bottling Co. of Elizabethtown v. Coca-Cola Co., 98 F.R.D. 254, 264 (D. Del. 1983)*. Accordingly, the Court instead defers to the Delaware Court the issue of whether Texas is a third-party beneficiary under the APA. In this too, the Court is informed by accepted notions of comity and judicial efficiency.

V. Conclusion

The text, structure, and purpose of the Texas Settlement clearly establish that Reynolds remains liable for the Acquired Brands under the Texas Settlement, and this Court so holds.

Both *Seagull* and *Texas Industries* make clear that Reynolds cannot eliminate its obligations under the Texas Settlement by assigning the Acquired Brands. As in *Seagull*, the Texas Settlement has no express provision addressing the consequences of a subsequent assignment. As in *Texas Industries*, both the contract itself ***and*** the "subject matter" of the contract are subject to the rule regarding continuing post-assignment liability. Accordingly, as in both cases, the original contracting party—here, Reynolds—remains liable. Additionally, the consensus **[**149]** of the common law authorities, as interpreted by preeminent treatises, the other PSS courts, and the Fifth Circuit, confirms that Reynolds remains liable.

The ordinary rules of contract interpretation independently demonstrate the propriety of Reynolds' continued liability. The text, structure, and business purposes of the Texas Settlement uniformly reflect the parties' intention not to permit an assignment to extinguish liability thereunder. Accordingly, the Court finds that Reynolds remains liable under the Texas Settlement for the full amount of any and all payments due regarding the Acquired Brands.

Reynolds also remains liable under the clause requiring Texas' written consent prior to the assignment of any rights. Reynolds promised not to assign any rights under the Texas Settlement without the prior written consent of the other parties thereto. When Reynolds assigned all defenses related to the Acquired Brands to Imperial, including the defense of "release" arising from the Texas Settlement, Reynolds breached that promise.

Finally, Imperial is unambiguously an assign within the meaning of the Texas Settlement. However, a final determination of the scope of the obligations undertaken **[**150]** by Imperial under the APA is a matter more properly presented to the Delaware Court. To the extent that court determines that Imperial expressly assumed obligations which require Imperial to join the Texas Settlement, Imperial may be directly liable to Texas or it may be indirectly liable via a potential right held by Reynolds to seek reimbursement from Imperial. Those issues are left to the Delaware Court. The Court similarly defers the issue of Texas' status as a third-party beneficiary under the APA to the Delaware Court. To the extent Texas seeks to vindicate any rights under the APA, it must intervene to do so in that forum.

* * *

In writing *The Common Law*, Justice Holmes observed:

> The very office of construction is to work out, from what is expressly said and done, what would have been said with regard to events not definitely before the minds of the parties, if those events had been considered.

Hon. Oliver Wendell Holmes, *The Common Law* 303 (1881). It is unclear whether the parties in 1998 envisioned the unprecedented consolidation that would occur within the domestic tobacco industry during the intervening two decades. However, it is certainly clear that no one considered—in **[*461]** light **[**151]** of Reynolds' perpetual promise to pay Texas regarding the Acquired Brands—that Reynolds would sell those brands for seven billion dollars and at the same time maintain that its responsibility to continue its payments to address the misery and costs visited upon the people of Texas by those brands had been snuffed out. Reynolds accepted a perpetual release in return for agreeing to make perpetual payments. Nothing that has intervened since then has lessened that obligation. Reynolds remains as liable today as it was when it entered into the Texas Settlement in 1998.

So ORDERED and SIGNED this 25th day of February, 2020.

RODNEY GILSTRAP

UNITED STATES DISTRICT JUDGE

ORDER

The Court issues this Order in light of the Memorandum Opinion and Order filed contemporaneously herewith, addressed to the State of Texas's Motion to Enforce Settlement Agreement (Dkt. No. 2214) and Philip Morris USA's Motion to Enforce Settlement Agreement (Dkt. No. 2222) (collectively, "the Motions to Enforce").

The Court previously bifurcated the issue of whether Reynolds or Imperial were liable under the Texas Settlement from the issue of whether Reynolds had appropriately calculated its profit adjustment, **[**152]** by including the Acquired Brands from its base year while excluding the Acquired Brands from its Texas Settlement payments. (Dkt. No. 2328). In light of the Court's order that Reynolds remains liable to the State of Texas ("Texas") for sales of the Acquired Brands, such issue now appears to be moot.

Accordingly, the Court **ORDERS** that Texas, Philip Morris USA ("PMUSA"), Imperial Tobacco Brands Group, LLC ("Imperial") and R.J. Reynolds ("Reynolds") (collectively, "the Parties") shall meet and confer to address whether any issue remains live in light of the Court's Memorandum Opinion and Order. Subsequently, the Parties shall file a joint status report, not to exceed five pages,[1] indicating each Party's position as to whether any such issue remains live before the Court, and if so, the nature of such issue. Texas and PMUSA shall also indicate whether they intend to file motions pursuant to *Texas Civil Practice and Remedies Code § 38.001*.

If any party believes any issue remains live with respect to the Motions to Enforce or *§ 38.001*, such party shall meet-and-confer with the remaining parties and jointly propose an applicable docket control order. Any such proposed docket control order shall be filed as an attachment to the joint status report **[**153]** and is not subject to the five page limit. To the extent the Parties disagree on a proposed docket control order, each Party shall include its alternative proposal within the join submission.

Finally, in view of this Order, the Joint Motion for Entry of Order Governing Schedule for Expert Discovery (Dkt. No. 2351) filed by PMUSA is **DENIED WITHOUT PREJUDICE** subject to the meet and confer efforts set forth herein.

So ORDERED and SIGNED this 25th day of February, 2020.

/s/ Rodney Gilstrap

RODNEY GILSTRAP

UNITED STATES DISTRICT JUDGE

End of Document

[1] The Parties may agree to divide the five pages in any manner they choose. Absent an agreement, the five pages shall be equally divided among the Parties.

Opinion by: MICHAEL L. BROWN

Opinion

ORDER

Plaintiff American Contractors Supply, LLC ("ACS") claims Defendant HD Supply Construction Supply, Ltd. ("White Cap")[1] conspired with another company to freeze it out of the Florida market for tilt construction. ACS sued White Cap for violating federal antitrust laws and tortious interference under Georgia law. White Cap moved for summary judgment on all counts.

I. Factual Background

[1] Plaintiff first named White Cap Construction Supply, Inc. as the defendant in this matter but then filed an amended complaint to correct the name to HD Supply Construction, Ltd., d/b/a HD Supply Construction & Industrial—White Cap. The Court refers to Defendant as White Cap throughout this order.

This case arises from Plaintiff ACS's contention that it was pushed out of the Florida market for tilt-up construction when manufacturer Meadow Burke refused to support it and instead chose to maintain its otherwise exclusive relationship with Defendant White Cap. Despite alleging concerted action to restrain trade, ACS sued only White Cap (its direct competitor) without including Meadow Burke (the company that decided not to do business with it).

Tilt-wall construction, allows contractors to cast wall panels at **[*2]** the jobsite, leading to the use of fewer panels, less equipment, and cheaper, larger, and more rapidly erected buildings. (Dkts. 55-2 ¶ 1; 73-1 ¶ 1.) Tilt-wall buildings insulate more easily, better resist normal wear-and-tear, and endure extreme weather. (Dkts. 55-2 ¶ 2; 73-1 ¶ 2.) The Florida geographic market, the construction market at issue, offers a healthy growth trajectory for tilt-wall construction. (Dkts. 55-2 ¶ 3; 73-1 ¶ 3.) Three manufacturers supply tilt-wall-specific equipment in Florida: Meadow Burke, Dayton Superior, and SureBuilT. (Dkts. 55-2 ¶ 4; 73-1 ¶ 4.) Each manufacturer works with specific distributors in the state. Meadow Burke, for example, distributes only through White Cap — the business relationship prompting this antitrust lawsuit; Dayton Superior distributes mainly through Construction Materials, Inc.; and SureBuilT distributes through ACS[2] and Construction Materials. (Dkts. 55-2 ¶ 5; 73-1 ¶ 5.) ACS alleges these manufacturers typically require a distributor to have a physical office in Florida before selling to customers in that state. ACS also alleges they closely control entry into the Florida market by limiting distributors to which they will sell. **[*3]** (Dkt. 73-1 ¶ 6.)

Meadow Burke and Dayton Superior are the most established manufacturers. (Dkts. 73-3 ¶ 2; 78-1 ¶ 2.) Meadow Burke is the manufacturer with a "position of power" in the tilt-up industry, because of its superior engineering department and industry veterans. (Dkts. 55-2 ¶¶ 9-10; 73-1 ¶¶ 9-10; 78-1 ¶ 23.) It controls much of the market through its partnership with White Cap, which has "invested heavily in the Meadow Burke brand" according to Meadow Burke's Vice President for Sales and Marketing. (Dkts. 55-2 ¶ 14; 73-1 ¶ 14.)

White Cap has a substantial presence in Florida. It maintains fourteen locations, operates three rental yards, employs twenty-nine tilt-specialist account managers, and employs over one hundred people with extensive experience in Meadow Burke tilt-up construction. (Dkts. 55-2 ¶ 15; 73-1 ¶ 15.) White Cap also keeps working to develop its relationship with Meadow Burke, including cosponsoring events with Meadow Burke and working with the manufacturer to identify new business opportunities. (Dkts. 55-2 ¶ 16; 73-1 ¶ 16.)

ACS, in contrast, conducts most of its business from its office in Atlanta, Georgia. (Dkts. 73-3 ¶ 1; 78-1 ¶ 1.) It has limited **[*4]** presence in Florida. (Dkts. 73-1 ¶ 17; 73-3 ¶ 10; 78-1 ¶ 10.) ACS and Meadow Burke had discussed ACS opening a location in Florida. (Dkts. 73-3 ¶ 28; 78-1 ¶ 28.) ACS claims that, during a meeting in April 2016, its main contact at Meadow Burke, Mike Wolstenholme, committed to supplying ACS with Meadow Burke-branded tilt products in Florida. (Dkts. 73-3 ¶ 27; 78-1 ¶ 27.) The record contains no definitive evidence memorializing this meeting or the agreement, however. ACS and Meadow Burke never had a written distributor agreement. (Dkts. 73-3 ¶ 5; 78-1 ¶ 5.) Meadow Burke likewise had no written agreement to distribute exclusively with White Cap in Florida. (Dkts. 73-3 ¶ 19; 78-1 ¶ 19.)

At some point after this meeting, ACS sent Meadow Burke's engineering department drawings for a Florida project. (Dkts. 55-2 ¶ 21; 73-1 ¶ 21.) White Cap claims this was a "backdoor submission" by ACS because ACS did not properly inform its contacts at Meadow Burke about the project before submitting the drawings directly to the engineering department. (Dkt. 55-2 ¶ 21.) As a result of how ACS submitted its drawings, they were given priority in Meadow Burke's engineering department over projects that White **[*5]** Cap and other distributors had already submitted. White Cap refers to this as ACS appearing to have jumped the line. (Dkts. 55-2 ¶ 23; 67-1 at 31:11-14, 33:20-24.)

---

[2] In September 2018, well after the filing of this lawsuit, ACS closed its Florida location because of poor sales performance with SureBuilT. (Dkts. 73-1 ¶ 5; 78-1 ¶ 93.) Many customers chose not to use SureBuilT, a less well-established tilt construction manufacturer. (Dkts. 73-3 ¶ 86; 78-1 ¶ 86.) In its statement of facts, ACS also includes various facts about its unsuccessful performance in Florida, but those facts are immaterial to the Court's determination. (*See, e.g.*, Dkt. 73-3 ¶¶ 79-92.)

Meadow Burke's Sales Manager for Florida then inadvertently sent White Cap paperwork related to ACS project, alerting White Cap to ACS's work with Meadow Burke. (Dkts. 55-2 ¶ 22; 73-1 ¶ 22.) Doug Bartle, White Cap's Director of Tilt Sales, saw the ACS documents and called Meadow Burke. He was "very upset" and "totally disappointed" that Meadow Burke had decided to sell to ACS. (Dkt. 78-1 ¶ 52.) He placed a Meadow Burke order on hold and said he would be meeting with Dayton Superior the next day. ACS says this was a threat by White Cap to switch suppliers away from Meadow Burke. (Dkts. 55-2 ¶ 23; 73-1 ¶ 23.)

About a week later, Meadow Burke decided it would not supply ACS on future tilt projects in Florida. (Dkts. 55-2 ¶ 25; 73-1 ¶ 25.) The parties dispute who at Meadow Burke made that decision. ACS claims Mike Wolstenholme (its contact) made the decision because of pressure from White Cap. (Dkt. 73-1 ¶¶ 25-26.) But ACS cites no admissible evidence to support its contention.[3] White Cap says Doug Crawford, Meadow Burke's Vice **[*6]** President of Sales and Marketing, made the decision. (Dkt. 55-2 ¶ 25.) Crawford testified that he recalled "no pressure" from White Cap to stop dealing with ACS. (Dkts. 55-2 ¶ 26; 73-1 ¶ 26.) Crawford testified that he decided not to add ACS as another distributor in Florida because:

- White Cap had "performed well" for Meadow Burke in Florida;
- White Cap had "bought a lot of equipment" and invested in its relationship with Meadow Burke in other ways, so it would not be "fair" to allow ACS to "piggyback" on White Cap's efforts;
- Meadow Burke was "satisfied with the amount of business it was getting" in Florida; and
- Meadow Burke had a backlog in its engineering department and feared additional orders from ACS would exacerbate that backlog for current customers, like White Cap.

(Dkts. 55-2 ¶ 27; 73-1 ¶ 27; 78-1 ¶ 110.)[4]

ACS claims that there are "no internal records of why Meadow Burke cut off ACS." (Dkt. 73-1 ¶ 27.) The Court, however, has Crawford's testimony about his decision. Again, ACS does not dispute Crawford's testimony or directly refute that he was the decisionmaker.

Instead, ACS focuses on the specific timing of communications between Doug Bartle of White Cap and various Meadow **[*7]** Burke salespeople. For instance, ACS asserts that "Mr. Bartle left a voice mail with Ms. Dykes [Meadow Burke's sales manager who mistakenly sent the email] on July 13, 2016 at 9:53 a.m." (Dkts. 73-3 ¶ 48; 78-1 ¶ 48.) "Ms. Dykes called Mr. Bartle back by cell phone at 2:04 p.m." (Dkts. 73-3 ¶ 49; 78-1 ¶ 49.) "Mr. Bartle and Ms. Dykes were on the call for 13 minutes." (Dkts. 73-3 ¶ 50; 78-1 ¶ 50.) And then "[l]ess than an hour later, Ms. Dykes sent an email to Mr. Wolstenholme and Mr. Arnett reporting her telephone conversation with Mr. Bartle." (Dkts. 73-3 ¶ 51; 78-1 ¶ 51.)

In the email, Ms. Dykes explained that White Cap was very upset about Meadow Burke's decision to "let someone else into Florida," that White Cap had cancelled an order, and that she wanted Mr. Wolstenholme and Mr. Arnett to "confirm [Meadow Burke] will NO longer allow anyone other than [White Cap] to sell Tilt in Florida." (Dkts. 73-3 ¶¶ 51-55; 73-4 at 245.) Mr. Bartle admitted he was trying to get Meadow Burke to reconsider its decision to supply ACS in Florida. (Dkt. 73-3 ¶ 56.) Mr. Arnett then called Mr. Crawford after receiving the email from Ms. Dykes and "told him about 'what had taken place.' " (Dkts. 73-3 **[*8]** ¶ 58; 78-1 ¶ 58.)

As discussed below, these facts do not suggest any unlawful agreement in violation of the antitrust laws. Instead, they point to essentially a game of telephone up the chain of command that one of Meadow Burke's major customers was unhappy. They point to an unhappy customer and its attempt to pressure its supplier. But again, ACS presents nothing to dispute Mr. Crawford's testimony that he decided to stop doing business with ACS and was not influenced by improper pressure from White Cap to do so.

---

[3] ACS often cites deposition testimony and declarations from two of its employees to support its statement of facts. Much of this hearsay support comes from what ACS's employees claim another person told them, however. The Court disregards these unsupported hearsay statements. In any case, "self-serving hearsay . . . has no probative value on summary judgment." *Kirkland v. Tamplin, 285 Ga. App. 241, 645 S.E.2d 653, 656 (Ga. Ct. App. 2007)*.

[4] Because ACS claims (without record evidence) Wolstenholme made the decision, it does not directly address White Cap's facts about Crawford's reasons for ending the relationship.

After Meadow Burke informed ACS of its decision not to supply further projects, Meadow Burke fulfilled its commitment on the existing project. (Dkts. 55-2 ¶ 28; 73-1 ¶ 28.) ACS then partnered with SureBuilT to sell tilt supplies for projects in Florida, which supplied ACS on at least nine tilt projects there. (Dkt. 55-2 ¶ 30.) It is undisputed that White Cap did nothing to interfere with that business relationship. (Dkts. 55-2 ¶ 31; 73-1 ¶ 31.) After these events transpired — with ACS partnering with SureBuilT — the Florida market included three tilt-wall manufacturers rather than two, and three statewide distributors rather than two.[5] (Dkts. 55-2 ¶ 33; 73-1 ¶ 33.)

In September **[*9]** 2016, however, ACS sued White Cap, alleging claims of unlawful restraint on trade and monopolization in violation of the Sherman Act and tortious interference under Georgia law. (Dkt. 7 at 14-16.) White Cap moved for summary judgment on all of ACS's claims while ACS moved for partial summary judgment as to the relevant market. (Dkts. 55; 56.) Also pending are ACS's motions to exclude and to seal. (Dkts. 57; 69; 75.)

II. Legal Standard

A. Summary Judgment

Rule 56 of the Federal Rules of Civil Procedure provides that a court "shall grant summary judgment if the movant shows there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A factual dispute is genuine if the evidence would allow a reasonable jury to find for the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A fact is "material" if it is "a legal element of the claim under the applicable substantive law which might affect the outcome of the case." *Allen v. Tyson Foods, Inc., 121 F.3d 642, 646 (11th Cir. 1997)*.

The party moving for summary judgment bears the initial burden of showing a court, by reference to materials in the record, that there is no genuine dispute as to any material fact that should be decided at trial. *Hickson Corp. v. N. Crossarm Co., 357 F.3d 1256, 1260 (11th Cir. 2004)* (citing *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*). A moving party meets this burden merely by " 'showing'—that is, pointing out to **[*10]** the district court—that there is an absence of evidence to support the nonmoving party's case." *Celotex, 477 U.S. at 325*. The movant, however, need not negate the other party's claim. *Id. at 323*. In determining whether the moving party has met this burden, a court must view the evidence and all factual inferences in the light most favorable to the party opposing the motion. *Johnson v. Clifton, 74 F.3d 1087, 1090 (11th Cir. 1996)*.

Once the movant has adequately supported its motion, the nonmoving party then has the burden of showing that summary judgment is improper by coming forward with specific facts showing a genuine dispute. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Ultimately, there is no "genuine [dispute] for trial" when the record as a whole could not lead a rational trier of fact to find for the nonmoving party. *Id.* But "the mere existence of *some* alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no *genuine* issue of *material* fact." *Anderson, 477 U.S. at 247-48*. The court, however, resolves all reasonable doubts in favor of the non-movant. *Fitzpatrick v. City of Atlanta, 2 F.3d 1112, 1115 (11th Cir. 1993)*.

B. Motions to Seal

Federal Rule of Civil Procedure 26(c) provides that a court, for good cause, may issue an order to protect a party from annoyance, embarrassment, oppression, or undue burden or expense, including requiring that **[*11]** a trade secret or other confidential research, development, or commercial information not be revealed or be revealed only in a specified way. *Fed. R. Civ. P. 26(c)(1)(H)*. Courts determine whether there is good cause to seal by balancing

---

[5] Since the filing of the complaint, ACS has "quietly" shuttered its Florida office. The Florida market now includes two statewide tilt distributors, White Cap and Construction Materials. (Dkt. 73-1 ¶ 33.)

the public's "interest in obtaining access" against the "party's interest in keeping the information confidential." *Chi. Tribune Co. v. Bridgestone/Firestone, Inc., 263 F.3d 1304, 1313 (11th Cir. 2001)*. "[D]iscovery material filed in connection with pretrial motions that require judicial resolution of the merits" is subject to the common-law right of access to judicial proceedings, which includes the right to inspect and copy public records and documents. *Id. at 1311-12*. The common-law right of access "requires the court to balance the respective interests of the parties." *Id. at 1313*.

C. Motions to Exclude under *Rule 702*

Trial courts serve a critical gate-keeping function concerning the admissibility of expert testimony. *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 589, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. Expert testimony can be particularly persuasive, and as such, the role of the trial court is to keep speculative and unreliable testimony from reaching the jury. *Id. at 595*; *see* *McCorvey v. Baxter Healthcare Corp., 298 F.3d 1253, 1256 (11th Cir. 2002)*.

Federal Rule of Evidence 702 allows a qualified expert to give opinion testimony when it is necessary to help the trier of fact understand the issues, the opinion is based on sufficient facts or data, the expert produced it using reliable **[*12]** principles and methods, and those principles and methods were reliably applied to the facts of the case. *Fed. R. Evid. 702*. The Eleventh Circuit employs a "rigorous" three-part inquiry to determine whether these admissibility criteria are met. *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548, 562 (11th Cir. 1998)*. Expert testimony is admissible when

> (1) the expert is qualified to testify competently regarding the matters he intends to address; (2) the methodology by which the expert reaches his conclusions is sufficiently reliable as determined by the sort of inquiry mandated in *Daubert*; and (3) the testimony assists the trier of fact, through the application of scientific, technical, or specialized expertise, to understand the evidence or to determine a fact in issue.

Id. (internal footnote omitted). Thus, the admissibility of an expert's opinion turns on three things: qualifications, reliability, and helpfulness. *See* *United States v. Frazier, 387 F.3d 1244, 1260-62 (11th Cir. 2004)*.

While the trial court's role is critical, it "is not intended to supplant the adversary system or the role of the jury." *Allison v. McGhan Med. Corp., 184 F.3d 1300, 1311 (11th Cir. 1999)*. When the accuracy of evidence is the issue — as opposed to its admissibility — the trial court should allow the judicial process to resolve the matter. *Daubert, 509 U.S. at 596* ("Vigorous cross-examination, presentation of contrary evidence, and careful instruction **[*13]** on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence.").

III. Analysis & Discussion

A. Defendant White Cap's Motion for Summary Judgment (Dkt. 55)

ACS asserts claims for restraint of trade, monopolization, and attempted monopolization, under *Sections 1* and *2* of the Sherman Act. *15 U.S.C. §§ 1-2*. (Dkt. 7 ¶¶ 48-53.) It also asserts a claim against White Cap under Georgia law for tortious interference with its business relationship with Meadow Burke. (*Id.* ¶¶ 57-65.) White Cap moves for summary judgment on all counts.

1. Count One - Monopolization

Section 2 of the Sherman Act provides that "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, . . . shall be deemed guilty of a felony." *15 U.S.C. § 2*. As an offense then, monopolization requires two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992) (internal quotation marks omitted).

The first element, **[*14]** monopoly power, is the power to control prices in or to exclude competition from the relevant market. Morris Commc'ns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1294 (11th Cir. 2004). The second element requires predatory or exclusionary acts or practices that have the effect of preventing or excluding competition. *Id.* For a practice to be unlawfully exclusionary, however, "a defendant must harm the competitive *process*, and thereby harm consumers. In contrast, harm to one or more *competitors* will not suffice" under Section 2. McWane, Inc. v. F.T.C., 783 F.3d 814, 835-36 (11th Cir. 2015) (internal quotation marks omitted). This is because the Sherman Act does not require a company with monopoly power to alter its way of doing business in order to promote competition. Section 2 of the Sherman Act merely prohibits the unlawful monopolization and the unlawful refusal to deal. *See* Morris Commc'ns, 364 F.3d at 1295 (internal quotation marks omitted). "Unlawful monopoly power requires anticompetitive conduct, which is conduct without a legitimate business purpose that makes sense only because it eliminates competition." *Id.* (internal quotation marks omitted).

ACS alleges that White Cap "acquired and maintained" its monopoly power causing Meadow Burke to stop doing business with ACS. (Dkt. 7 ¶ 49.) ACS's alleged exclusion from the market and resulting injury thus arose, if at all, **[*15]** from Meadow Burke's decision to stop doing business with it and to continue its (functionally) exclusive relationship with White Cap. But, ACS chose to sue only White Cap while leaving Meadow Burke, the company that refused to deal with it, out of the litigation. By doing so, ACS seeks to divorce the alleged anticompetitive decision from the bedrock principle that "[i]n the absence of any purpose to create or maintain a monopoly . . . a company may deal or refuse to deal with whomever it pleases." Morris Commc'ns, 364 F.3d at 1294-95 (quoting Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601-02, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)).

ACS cannot plead around this legitimate business practice. A company's refusal to deal with another company in order to protect or further its own ***legitimate*** business purposes does not violate the antitrust laws, even if its refusal to deal injures competition or a competitor. Id. at 1295 ("Likewise, refusal to deal that is designed to protect or further the legitimate business purposes of a defendant does not violate the antitrust laws, even if that refusal injures competition."). Ordinarily, once a defendant establishes its valid business justification for its conduct, the burden shifts to the plaintiff to show that the proffered business justification is pretextual. *Id.* A defendant in **[*16]** the position of White Cap — that is, a company who receives the benefit of another company's legitimate decision not to deal with a plaintiff — should be permitted the benefit of this same principal. That company does not violate the Sherman Act simply by being the beneficiary of another company's legitimate decision to refuse to deal with a competitor.

And the undisputed evidence in the record shows that is exactly what happened here. The employees of Meadow Burke testified as to their legitimate decision to stop doing business with ACS. They said White Cap had "performed well" for Meadow Burke in Florida. (Dkts. 55-2 ¶ 27; 73-1 ¶ 27; 78-1 ¶ 110.) It had "bought a lot of equipment" and invested in its relationship with Meadow Burke in other ways, so it would not be "fair" to allow ACS to "piggyback" on White Cap's efforts. (Dkts. 55-2 ¶ 27; 73-1 ¶ 27; 78-1 ¶ 110.) Meadow Burke was thus "satisfied with the amount of business it was getting" in Florida and did not feel the need to expand. (Dkts. 55-2 ¶ 27; 73-1 ¶ 27; 78-1 ¶ 110.) Meadow Burke also had a backlog in its engineering department and feared that additional orders from ACS could further lengthen the backlog, upsetting and alienating **[*17]** current customers, like White Cap. (Dkts. 55-2 ¶ 27; 73-1 ¶ 27; 78-1 ¶ 110.) Again, White Cap presented evidence that Meadow Burke had "long lead times for engineering," was at full capacity, and "already maxed out with what [its engineers] could handle." (Dkt. 62-1 at 27:15-28:2.) It was taking Meadow Burke too long to do the work it already had. It feared that, if it added another supplier, their lead times would get even longer, causing it to lose business. (*Id.*; Dkt. 67-1 at 34:11-17.) There is evidence in the record that White Cap was also concerned about delivery times from Meadow Burke's engineering department and complained to Meadow Burke about it. For instance, Meadow Burke employees testified that they had heard "consistently throughout [the] year . . . concern over lead times" and had reached capacity in their engineering department. (Dkt. 66-1 at 19:17-19, 32:19-20 ("Typically, the lead time that we shoot for is about two weeks and at that time we were at about four weeks.").)

White Cap also presented evidence that, when ACS submitted plans directly to Meadow Burke's engineering department rather than following proper channels, ACS "jumped the line," thus getting its plans **[*18]** in front of plans that White Cap and other distributors had previously submitted. (Dkt. 67-1 at 31:5-14.) White Cap was understandably upset and concerned that the backlog in the engineering department would get worse. (*See id.* at 34:11-19.)

White Cap has met its burden of showing that Meadow Burke had a valid business justification for its decision to stop doing business with White Cap. The burden thus shifts to ACS to allege facts to support an inference that the proffered justification is merely pretextual, thereby establishing a genuine issue of material fact. *Morris Commc'ns, 364 F.3d at 1296*. ACS has not done that. Instead, ACS argues that Meadow Burke could have and should have increased its engineering capacity in order to support both ACS and White Cap. It says Meadow Burke should have added more engineers or outsourced engineering. (Dkt. 73 at 22 n.8.) That is not how the antitrust laws work. That ACS can imagine steps Meadow Burke could have taken to change its business and work with ACS does not suggest its business justification for deciding to stop doing business with ACS was pretextual. Because ACS has not raised any issue of material fact challenging Meadow Burke's valid business justification, White **[*19]** Cap is entitled to summary judgment.[6]

Implicit in Meadow Burke's "freedom to deal exclusively" with White Cap "is the freedom to refuse to deal with" ACS. *See* *Dunnivant v. Bi-State Auto Parts, 851 F.2d 1575, 1581 (11th Cir. 1988)*. The virtually exclusive dealing between White Cap and Meadow Burke is thus "free from scrutiny in the absence of proof of competitive harm, or other underlying illegal behavior." *See* *Constr. Aggregate Transp., Inc. v. Fla. Rock Indus., Inc., 710 F.2d 752, 773 (11th Cir. 1983)*. Exclusive distributorships are common and are pro-competitive because they can foster competition, not because they guarantee the success of competitors. *See* *McWane, Inc., 783 F.3d at 827*.

Even putting aside Meadow Burke's legitimate reason for refusing to supply ACS on future projects in Florida, ACS's monopolization claim fails because it has presented no evidence from which a jury could conclude that White Cap's (or Meadow Burke's) actions had the effect of preventing or excluding competition. It might have excluded ACS from Meadow Burke products but it did not prevent, harm, or even lessen competition. Indeed, the fact that ACS introduced SureBuilT products into Florida shows the pro-competitive effect of White Cap's actions, not an anticompetitive effect. White Cap's conduct caused an *increase* in the number of tilt-equipment brands from which Florida contractors could **[*20]** choose. (*See* Dkts. 55-2 ¶ 33; 73-1 ¶ 33.)

The record contains ample evidence that interbrand competition in tilt construction increased following White Cap's conduct in May 2016. For instance, "[o]ver the last two years, Construction Materials, Dayton Superior's exclusive tilt-supplies distributor in Florida, has increased its investment in Florida in competition with White Cap and Meadow Burke" by: (a) hiring a former White Cap tilt specialist to reach new customers in Florida and elsewhere in the Southeast; (b) spending about a million dollars on tilt braces for use in Florida and the Southeast; (c) employing a full-time estimator who works out of Construction Materials' Tampa office; and (d) replacing or adding three or four trucks in Florida. (Dkt. 73-1 ¶ 34.)

That ACS could not successfully maintain its business in Florida is immaterial.[7] Likewise, the fact that SureBuilT was not ACS's first-choice partner is immaterial. The antitrust laws do not ensure that every competitor receives its first choice and gets what it wants. "The purpose of the [Sherman] Act is not to protect businesses from the working of the market; it is to protect the public from the failure of market." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458-59, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. The **[*21]** antitrust laws were intended to protect

---

[6] A court assessing a claim under *§ 2* of the Sherman Act must first determine the relevant market and whether the defendant possessed monopoly power in that market. The Court has not done so here because, even assuming White Cap possessed that power in the relevant market, ACS cannot prevail on its claim because White Cap (and Meadow Burke) have proffered a valid business justification for their actions and ACS has not shown that reason to be a pretext for illegal activity.

[7] ACS does not blame White Cap for its decision to close its Florida office and concedes that White Cap has done nothing to prevent ACS from selling the SureBuilT brand in Florida. (Dkts. 55-2 ¶ 31; 73-1 ¶ 31.)

competition for the benefit of *consumers*, not the preferences of competitors. *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*; *see* *Burdett Sound, Inc. v. Altec Corp., 515 F.2d 1245, 1249 (5th Cir. 1979)* ("Lest any other former distributors succumb to the temptation of treble damages, we reiterate that it is simply not an antitrust violation for a manufacturer to . . . terminate his relationship with a former distributor, even if the effect of the new contract is to seriously damage the former distributor's business.").[8]

Much of what the parties present as evidence of an adverse or beneficial effect on competition is pure speculation. For instance, White Cap claims that, if Meadow Burke had continued to supply ACS, Meadow Burke's share of the market would have increased even more. But ACS counters that, had Meadow Burke continued their business relationship, White Cap instead would have taken its business elsewhere and thus Meadow Burke's share would not have increased. But each of these proffered outcomes are speculative. The Court considers the facts in front of it, as the parties have presented them, and as they have actually transpired. *See* *K.M.B Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 128 (2d Cir. 1995)* (granting summary judgment because rejected distributor "continued to compete" by selling alternative brand and "offering **[*22]** superior pricing and service to counteract what it considers the higher quality" of the incumbent brand).

In antitrust cases such as this one, the chilling effect on procompetitive behavior and the extraordinary incentives to sue — automatic treble damages and "the cost of suit, including a reasonable attorney's fee" — "endorse[ ] the use of summary judgment." *15 U.S.C. § 15(a)*; *see* *Tidmore Oil Co., Inc. v. BP Oil Co., 932 F.2d 1384, 1388 (11th Cir. 1991)* (affirming award of summary judgment to the defendant). And the Court finds summary judgment warranted, concluding that ACS has failed to point to evidence creating a genuine issue of material fact about the crucial prerequisite of harm to competition in general, as opposed to harm to a particular competitor. *See* *Star Discount Pharmacy, Inc. v. MedImpact Healthcare Sys., Inc., 614 F. App'x 988, 990 (11th Cir. 2015)* (per curiam) ("[T]his indication of harm is harm only to a single competitor (i.e., plaintiffs) and not harm to competition in general.") As the Supreme Court has explained, "[e]ven an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws." *Brooke Grp. Ltd., 509 U.S. at 225*. Because ACS has failed to show that Meadow Burke's conduct prevented or excluded competition (other than preventing it from using its preferred manufacturer), the Court grants summary judgment **[*23]** to White Cap on ACS's *Section 2* monopolization claim.

2. Count Two - Attempted Monopolization

Attempt to monopolize requires specific intent to achieve monopoly power. *See* *Spectrum Sports, Inc., 506 U.S. at 456*. "[T]o demonstrate attempted monopolization a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Id.* The attempted monopolization claim is thus harder to maintain and prove that the monopolization claim.

The Court has already determined that neither White Cap nor Meadow Burke engaged in predatory or anticompetitive conduct, "which is conduct without a legitimate business purpose that makes sense only because it eliminates competition." *See* *Morris Commc'ns, 364 F.3d at 1295*. Meadow Burke and White Cap have both presented legitimate, non-pretextual reasons for their conduct. Meadow Burke was concerned that it was "maxed out" in its engineering department and could not effectively increase its capacities without lengthening its already "backlogged" turnaround times. White Cap was concerned that its wait-times would increase even further. Without a showing of predatory or anticompetitive conduct, ACS thus cannot succeed **[*24]** on an attempted monopolization claim, which requires the same elements of a monopolization claim plus a specific intent. Further still, ACS has presented nothing — either direct evidence or circumstantial evidence — demonstrating a "specific intent to

---

[8] In *Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir.1981)* (en banc), the Eleventh Circuit adopted as binding precedent all decisions of the former Fifth Circuit handed down before October 1, 1981.

monopolize" on the part of White Cap or Meadow Burke. The Court thus grants summary judgment to White Cap on ACS's attempted monopolization claim in Count Two.

3. Count Three - Restraint of Trade

Section 1 of the Sherman Act "does not prohibit *every* act that has the effect of restraining trade . . . [it] prohibits only a 'contract, combination[,] . . . or conspiracy in restraint of trade.' " *Tidmore Oil Co., 932 F.2d at 1388* (affirming grant of summary judgment to defendant because no identifiable agreement to restrain trade). Whether the challenged anticompetitive conduct "stem[s] from independent decision or from an agreement, tacit or express" forms the "critical question" in *Section 1* cases. *Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*; *see also* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (reversing circuit court and remanding for dismissal because pleading alleged "merely parallel conduct that could just as well be independent action"); *Tidmore Oil Co., 932 F.2d at 1388* (reversing circuit court's denial of summary judgment because "the first inquiry . . . is to locate the agreement that restrains trade"). **[*25]**

ACS thus must provide either direct or circumstantial evidence of an unlawful agreement. ACS has failed to do so. The record contains no direct evidence of an agreement. Indeed, ACS admits this. (*See* Dkt. 73-1 ¶ 27 (admitting that there are "no internal records of why Meadow Burke cut off ACS").)

ACS has also pointed to no circumstantial evidence, which "is by its nature ambiguous, and necessarily requires the drawing of one or more inferences in order to substantiate claims of illegal conspiracy." *Williamson Oil Co., Inc. v. Philip Morris USA, 346 F.3d 1287, 1300 (11th Cir. 2003)*. To be sure, the evidence shows that White Cap complained to Meadow Burke about Meadow Burke's decision to supply ACS. And, further, the evidence shows Meadow Burke thereafter decided to stop supplying ACS. From this, a jury could infer that Meadow Burke did so in response to White Cap's complaint about ACS. But that is not enough. The Supreme Court has explained that permitting an illegal agreement to be inferred "merely from the existence of complaints, or even from the fact that termination came about 'in response to' complaints, could deter or penalize perfectly legitimate conduct." *See* *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 763-64, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Something more is needed. "There must be evidence that tends to exclude the possibility that the **[*26]** manufacturer and nonterminated distributors were acting independently." *Id.; see also* *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 1001-02 (11th Cir. 1993)* ("Federal ***antitrust law*** requires a plaintiff to introduce evidence that tends to exclude the possibility that the defendants acted independently or legitimately.").

ACS claims it has "abundant evidence of concerted action," "overwhelming direct and circumstantial evidence," and "extensive evidence showing a genuine issue of material fact that Meadow Burke did not act independently in cutting off ACS in Florida." (Dkt. 73 at 2, 12, 15.) ACS argues in a brief: "White Cap threatened Meadow Burke. Meadow Burke acquiesced to the threats from White Cap. Furthermore, Meadow Burke and White Cap both admitted that ACS was terminated in response to the pressure from White Cap." (Dkt. 73 at 16.) These conclusory assertions are not enough to withstand summary judgment. This is precisely the evidence the Supreme Court found lacking in *Monsanto. See also* *Procaps S.A. v. Patheon, Inc., 845 F.3d 1072, 1080 (11th Cir. 2016)* (holding argument unavailing when plaintiff "wholly failed to establish concerted action"); *cf.* *City of Tuscaloosa v. Harcos Chemicals, Inc., 158 F.3d 548, 570 (11th Cir. 1998)* (finding "no shortage of evidence" of concerted action and denying summary judgment).

ACS's brief in opposition to White Cap's motion for summary judgment is untethered **[*27]** from the law. It admonishes the Court to "look beyond a bald denial of concerted action and analyze the substance of the evidence." (Dkt. 73 at 15.) The Court has done so and found ACS's evidence lacking. As explained above, the record shows that White Cap had a legitimate reason to complain to Meadow Burke about its decision to supply ACS — specifically, its frustration with already long lead times within Meadow Burke's engineering department, its fear that adding ACS would exacerbate the situation, and its further irritation that ACS jumped the line on its Florida project. (Dkts. 55-2 ¶ 21; 78-1 ¶ 52.) And the undisputed record evidence also shows that Meadow Burke had a legitimate reason for deciding not to add ACS as a competitor — specifically, its loyalty to White Cap for the investment it had made in Florida, its concern about the capacity of its engineering department, and its overall satisfaction with its level of business.

This evidence does not provide the "something more" the Supreme Court said was required in *Monsanto*. The Supreme Court recognized that manufacturers often obtain information from distributors about the market and use that information to guide their actions. **[*28]** The Supreme Court focused on information about the manufacturer's "prices and the reception of their products in the market" — often arising from a distributor's complaints about prices. *Monsanto, 465 U.S. at 726*. The Supreme Court further noted that, to prevent manufacturers from reacting to these complaints (or to attach antitrust liability from its decision to do so) would inhibit a company's ability to respond to market conditions. *See id. at 764* ("To bar a manufacturer from acting solely because the information upon which it acts originated as a price complaint would create an irrational dislocation in the market.").

The same is true here. The evidence shows that Meadow Burke came to realize — from White Cap's complaint about ACS's "jumping in line" with engineering — that it did not have enough production capacity to meet those expanded needs. (Dkt. 67-1 at 34:11-19.) Crawford testified that at the time, Meadow Burke had "quite a bit of backlog" in their engineering department and "were behind where [they] wanted to be." (Dkt. 66-1 at 19:14-17.) He also testified that White Cap had "invested heavily" in the Meadow Burke brand and they had "collectively enjoyed a strong business in Florida," which was a "strong **[*29]** stable market." (*Id.* at 18:25-19:6.) Because Meadow Burke was already behind on their lead times at this point, Crawford testified that "[t]here was no compelling reason to make an adjustment to" what was otherwise a "strong stable market." (*Id.* at 19:6-8.) To prevent Meadow Burke from taking this action (or to attach antitrust liability to it) simply because the analysis arose from White Cap's complaint would upset natural market conditions and prevent Meadow Burke from independently acting in its own best interests. That is exactly why the Supreme Court held "there must be evidence that tends to exclude the possibility that the manufacturer [Meadow Burke] and nonterminated distributors [White Cap] were acting independently." *Monsanto, 465 U.S. at 764*.

There is no such evidence of "a conscious commitment to a common scheme designed to achieve an unlawful objective" here. *Id.* "[C]onclusory statement[s] by [ACS] that a conspiracy existed, without more, do[ ] not support 'even an inference of conspiracy' and cannot survive a motion for summary judgment." *Baker's Carpet Gallery, Inc. v. Mohawk Indus., Inc., 942 F. Supp. 1464, 1476 (N.D. Ga. 1996)* (quoting *Dunnivant, 851 F.2d at 1579*). The Court grants summary judgment to White Cap on ACS's *Section 1* restraint of trade claim.

4. Count Four - Claim for Tortious Interference

ACS asserts a claim **[*30]** against White Cap that it improperly interfered with ACS's business relationship with Meadow Burke. (Dkt. 7 ¶¶ 57-65.) White Cap moves for summary judgment, arguing that ACS cannot satisfy the necessary elements. Under Georgia law, to avoid summary judgment on its tortious-interference claim, ACS must provide evidence that

1) White Cap was a stranger to the business relations between Meadow Burke and ACS;
2) White Cap acted improperly or without privilege;

3) White Cap acted purposefully with malice and with the intent to injure the business relationship between ACS and Meadow Burke;

4) White Cap caused Meadow Burke to discontinue or fail to enter into an anticipated business relationship with ACS.

See Barnwell v. Barnette & Co., 476 S.E.2d 1, 2 (Ga. Ct. App. 1996) (holding defendant entitled to summary judgment on the plaintiff's claim for tortious interference); *Servicetrends, Inc. v. Siemens Med. Sys., Inc., 870 F. Supp. 1042, 1068-69 (N.D. Ga. 1994)* (granting summary judgment to defendant after plaintiff's failure to show element of tortious interference claim). ACS has failed to provide evidence every element.

First, acting "improperly or without privilege" requires behavior wrongful by itself, such as "physical violence, fraud or misrepresentation, defamation, use of confidential information, abusive civil suits, and unwarranted criminal **[*31]** prosecutions." *Kirkland, 645 S.E.2d at 656* (affirming summary judgment when plaintiff could not show defendant acted "improperly or without privilege"). There is none of that here. Competitive business practices, including advocating and persuading a supplier not to do business with a rival, cannot satisfy this requirement. *See id. at 656* (finding insufficient to show tortious interference "bare evidence" that one party persuaded another to breach a contract); *Elder v. Cardoso, 205 Ga. App. 144, 421 S.E.2d 753, 757 (Ga. Ct. App. 1992)* (reversing trial court and granting summary judgment because "dissuad[ing]" or "discourage[ing]" statements could not support tortious interference claim).

So, White Cap's complaint to Meadow Burke (based on its belief that it would be hurt by Meadow Burke's decision to supply ACS) is insufficient to state a claim.[9] Even viewing the evidence in the light most favorable to ACS, as the Court must, it can offer no evidence that White Cap acted improperly and without privilege. As stated above, there is also no evidence in the record to suggest that White Cap in fact caused Meadow Burke to stop working with ACS. The undisputed evidence shows that

- Made aware of an unauthorized future shipment of supplies by Meadow Burke to ACS, Doug Crawford, Meadow Burke's Vice President **[*32]** for Sales and Marketing, considered whether Meadow Burke would support ACS in Florida;
- Mr. Crawford decided not to supply ACS for reasons having to do with Meadow Burke's "best interests"; and
- Mr. Crawford was unaware of or uninfluenced by any "pressure" from White Cap to decide as he did.

ACS points to no evidence that White Cap's supposed "pressure" caused Mr. Crawford to act as he did, particularly when Mr. Crawford testified it did not. (Dkt. 73-1 ¶¶ 25, 27.)

To demonstrate causation, ACS must provide affirmative evidence that tends to exclude the possibility of Meadow Burke's independent action. *See Smith v. Morris, Manning & Martin, LLP, 293 Ga. App. 153, 666 S.E.2d 683, 694-95 (Ga. Ct. App. 2008)* (affirming summary judgment where decisionmaker asserted that defendant's actions did not affect his decision to terminate the contract). And ACS has not done so. The Court grants summary judgment to White Cap on Count Four of ACS's complaint for tortious interference.

B. Plaintiff ACS's Motion for Partial Summary Judgment (Dkt. 56)

Plaintiff ACS moves for partial summary judgment on the relevant market for its *Section 2* antitrust claims. Because the Court decides the monopolization claims on other grounds in White Cap's favor, the Court denies as moot Plaintiff ACS's motion for partial summary **[*33]** judgment. (Dkt. 56.)

C. Plaintiff ACS's Motion to Exclude White Cap's Experts' Regression Analysis (Dkt. 57)

ACS moves to exclude the regression analysis offered by Dr. Kristin Terris, White Cap's expert, under *Rules 702* and *403 of the Federal Rules of Evidence.* (Dkt. 57.) The Court agrees with White Cap, however, that the role of the Court is to serve as gatekeeper, not as an arbiter of probative value. (Dkt. 71 at 10.)

ACS takes issue with Dr. Terris's choice of variable in her regression analyses. (Dkt. 57 at 2.) But the Court finds that this dispute goes to the probative nature of the expert's report, not its admissibility. As a gatekeeper, the Court does not make ultimate conclusions about the persuasiveness of the proffered evidence. An expert's selection of independent variables "affect[s] the analysis' probativeness, not its admissibility." *Bazemore v. Friday, 478 U.S. 385, 400, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)*.

---

[9] The record also contains no evidence sufficient to survive summary judgment. Interestingly, the Court notes that White Cap did not file a dispositive motion to dismiss before the start of discovery.

The Court notes that ACS's reply brief highlights the correctness of this conclusion. Its reply brief essentially amasses what would be a proper cross-examination. The Court thus denies ACS's motion to exclude Dr. Terris's regressions. (Dkt. 57.)

D. Plaintiff ACS's Motions to Seal (Dkts. 69; 75)

Plaintiff ACS has moved to retain under seal certain documents marked as confidential by Defendant **[*34]** White Cap. The documents contain White Cap's proprietary and competitively sensitive pricing information and detailed customer information. (Dkt. 74-1 at 1.) Given the narrow scope of the information sought to be kept under seal, the Court finds good cause to seal the documents under *Federal Rule of Civil Procedure 26*. *FED. R. CIV. P. 26(c)*. The Court grants ACS's motions for leave to file under seal. (Dkts. 69; 75.)

IV. Conclusion

The Court **GRANTS** Defendant White Cap's Motion for Summary Judgment (Dkt. 55) on all counts of Plaintiff ACS's amended complaint and **DENIES** Plaintiff ACS's motion for partial summary judgment (Dkt. 56).

The Court **DENIES** Plaintiff ACS's Motion to Exclude (Dkt. 57).

The Court **GRANTS** Plaintiff ACS's motions for leave to file under seal (Dkts. 69; 75) and **DIRECTS** the Clerk to **SEAL** Plaintiff ACS's filings at Docket numbers 63 and 74.

SO ORDERED this 26th day of February, 2020.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

For purposes of the joint motion to dismiss, a court accepts as true all the factual allegations in the complaint and construes all reasonable inferences in favor of plaintiff.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Evidence > Judicial Notice

HN2[] **Defenses, Demurrers & Objections, Motions to Dismiss**

At the motion to dismiss stage, a court may take judicial notice of the fact that press coverage, prior lawsuits or regulatory filings contained certain information, without regard to the truth of the contents.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Motions to Dismiss, Failure to State Claim**

When considering a motion to dismiss for failure to state a claim upon which relief can be granted, *Fed. R. Civ. P. 12(b)(6)*, a court analyzes the complaint in a two-step process under the context-based plausibility standard established by the United States Supreme Court. First, a court must isolate and ignore statements in the complaint that simply offer legal labels and conclusions or merely rehash cause-of-action elements. A complaint does not need detailed factual allegations, but threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. Second, the court must then take the complaint's well-pleaded, i.e., non-conclusory, non-speculative, facts as true, drawing all reasonable inferences in the pleader's favor, and see if they plausibly narrate a claim for relief. Plausible, means something more than merely possible, and gauging a pleaded situation's plausibility is a context-specific job that compels the court to draw on its judicial experience and common sense. That simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of the necessary element.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] **Motions to Dismiss, Failure to State Claim**

Where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged--but it has not shown--that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. If, however, the factual content, so taken, allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged, the claim has facial plausibility.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[] **Motions to Dismiss, Failure to State Claim**

In the early stage of the proceedings, the plausibility standard requires a court to consider if the allegations set forth in the complaint are more than merely possible. As it is well-known that simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence concerning the necessary elements to prove the relief plaintiff seeks. For a plaintiff to show an entitlement to relief a complaint must contain enough factual material to raise a right to relief above the speculative level. A well-plead complaint may proceed even if a recovery is very remote and unlikely yet it may not, if the remedy sought is not available.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Motions to Dismiss, Failure to State Claim**

At the *Fed. R. Civ. P. 12(b)(6)* motion to dismiss stage of the proceedings, a court's task requires analyzing if the pleadings in the complaint can plausibly establish this cause of action upon which relief may be granted.

Antitrust & Trade Law > Clayton Act > Remedies

Evidence > Burdens of Proof > Allocation

Constitutional Law > The Judiciary > Case or Controversy

Antitrust & Trade Law > Clayton Act > Scope

HN7[] Clayton Act, Remedies

Section 16 of the Clayton Act which provides that any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief against threatened loss or damage by a violation of the antitrust laws. 15 U.S.C.S. § 16. To meet that burden, a plaintiff must demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur. The threatened injury must be one for which plaintiff would be entitled to compensation if the injury actually occurred. The United States Court of Appeals for the First Circuit, when analyzing the elements for an antitrust injunction and its standing requirements, have held that: Section 16's requirement of threatened injury dovetails with Article III's requirement that in order to obtain forward-looking relief, a plaintiff must face a threat of injury that is both real and immediate, not conjectural or hypothetical. Past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief if unaccompanied by any continuing, present adverse effects.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Defenses

HN8[] Remedies, Damages

When entertaining a suit under the Clayton Act's Section 4 (damages), a court shall determine if it was filed within the four-year statute of limitations. 15 U.S.C.S. § 15b. Those claims accrue when a defendant commits an act that injures a plaintiff's business. The United States Supreme Court has delineated at least two distinct exceptions to the four-year statute of limitations in antitrust actions: (1) the continuing violation and (2) the speculative damages exception.

Antitrust & Trade Law > Clayton Act

Governments > Legislation > Statute of Limitations > Extensions & Revivals

HN9[] Antitrust & Trade Law, Clayton Act

Where the Clayton Act claim is a continuing conspiracy violation, each time a plaintiff is injured by an act of the defendants, a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act. In the context of price-fixing allegations, that implies that each time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act. However, the commission of a separate new overt act generally does not permit the plaintiff to recover for the injury caused by old overt acts outside the limitations period.

Antitrust & Trade Law > Clayton Act > Defenses

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

HN10[] **Clayton Act, Defenses**

In applying laches, a court looks to the same legal rules that animate the four-year statute of limitations for damages under the Clayton Act.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

HN11[] **Affirmative Defenses, Laches**

The doctrine of laches, which penalizes a litigant for negligent or wilful failure to assert his rights, requires proving (1) lack of diligence by the party against whom the defense is asserted and (2) prejudice to the party asserting the defense. Nevertheless, the laches doctrine applies only where the plaintiff knew or should have known of the infringing conduct.

Civil Procedure > Preliminary Considerations > Justiciability > Case & Controversy Requirements

Civil Procedure > Remedies > Injunctions

HN12[] **Justiciability, Case & Controversy Requirements**

As the United States Court of Appeals for the First Circuit has held, past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief if unaccompanied by any continuing, present adverse effects.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Laches

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Statute of Limitations

HN13[] **Affirmative Defenses, Laches**

When considering statute of limitations and laches defenses, the United States Court of Appeals for the Ninth Circuit has held that to re-start a statute of limitations, there must be a new overt act which: (1) is new and independent and not merely a reaffirmation of a previous act and (2) inflicts new and accumulating injury on the plaintiff.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Remedies > Injunctions

HN14[] **Motions to Dismiss, Failure to State Claim**

An injunctive relief claim that relies on general and vague descriptions of an ongoing conspiracy without a new and independent act, fails to overcome the Fed. R. Civ. P. 12(b)(6) standard.

Antitrust & Trade Law > Business & Corporate Compliance > Antitrust

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Remedies > Injunctions

HN15[] **Antitrust & Trade Law**

Although district courts are reluctant to dismiss antitrust injunction claims based on ongoing conspiracies, proceeding to antitrust discovery can be expensive and thus retains the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed. In the Twombly decision, the United States Supreme Court cautioned about the costs of modern federal antitrust litigation and the increasing caseload of the federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN16[] **Regulated Practices, Price Fixing & Restraints of Trade**

The United States Supreme Court held that indirect purchasers may not recover damages in price-fixing cases and even if direct purchasers have passed on some or all the overcharges to indirect purchasers.

Civil Procedure > Preliminary Considerations > Equity > Relief

HN17[] **Equity, Relief**

The Puerto Rico Supreme Court has recognized a cause of action under the unjust or undue enrichment doctrine. That civil law equity doctrine can be invoked when the laws have not foreseen a situation where a patrimonial shift occurs and which shift cannot be rationally explained by the prevalent body of laws. There are five elements to an unjust enrichment action: (1) existence of enrichment; (2) a correlative loss; (3) nexus between loss and enrichment; (4) lack of cause for enrichment, and (5) absence of a legal precept excluding application of enrichment without cause.

Antitrust & Trade Law > Clayton Act

Civil Procedure > Preliminary Considerations > Equity > Relief

HN18[] **Antitrust & Trade Law, Clayton Act**

Federal ***antitrust law***, specifically *Section 16* of the Clayton Act, provides statutory authorization for claims brought by a state or territory in its capacity as parens patriae. *15 U.S.C.S. §§ 15g-15h*; However, no Commonwealth statute nor Puerto Rico Supreme Court precedent explicitly provides for parens patriae standing to present unjust enrichment claims.

Antitrust & Trade Law > Business & Corporate Compliance > Antitrust

HN19[] **Antitrust & Trade Law**

The costs of complex antitrust lawsuits require diligence and timeliness.

Opinion

[*466] **OPINION AND ORDER**

On December 20, 2018, the Government for the Commonwealth of Puerto Rico ("Government" or "Commonwealth"), in its *parens patriae* capacity and on behalf of the people of the Puerto Rico, filed suit against several companies and private individuals ("Defendants")[1] involved in the flexible polyurethane foam's industry[2] for allegedly conspiring to price-fix products from January 1, 1999 up to the present. (Docket No. 1). Plaintiff seeks injunctive **[*467]** relief, pursuant to the *Clayton Act*, *15 U.S.C. § 26*, requesting this Court to enjoin Defendants from continuing its ongoing price-fixing conspiracy **[**3]** and demands damages in no less than $50,000,000.00, under the unjust enrichment equity doctrine. Id.

Pending before the Court are Defendants' motions to dismiss for failure to state a claim upon which relief can be granted (Docket No. 34), for lack of standing (Docket No. 39) and for lack of personal jurisdiction (Docket Nos. 35; 37). After reviewing the parties' submissions, record and applicable law, this Court **GRANTS** the joint motion to

---

[1] Not all Defendants named in the Complaint have appeared before this Court. Each defendant is specifically named in section I.A.

[2] Flexible polyurethane foam is defined in the Complaint as "a commodity widely used for cushioning and insulation in a variety of goods, including but not limited to furniture, bedding, packaging, and flooring." (Docket No. 1 ¶ 3).

dismiss for failure to state a claim at Docket No. 34 and, consequently, finds that the motions to dismiss at Docket Nos. 35, 37, 39 are **MOOT**.

I. Relevant Factual and Procedural Background

HN1[] For purposes of the joint motion to dismiss, the Court accepts as true all the factual allegations in the Complaint and construes all reasonable inferences in favor of Plaintiff. See *Beddall v. State St. Bank & Trust Co., 137 F.3d 12, 16 (1st Cir. 1998)*.

A. Defendants

The companies, and or affiliates, that sold flexible polyurethane foam throughout the United States, including the Commonwealth of Puerto Rico, during the period of the alleged price-fixing conspiracy are: (1) The Carpenter Company (or Carpenter Co.);[3] (2) Flexible Foam Products, Inc. (Flexible Foam Products);[4] (3) FXI Holdings, Inc., Foamex Innovations, Inc., or Foamex International, **[**4]** Inc. (Foamex or FXI);[5] (4) Future Foam, Inc. (Future Foam);[6] (5) Hickory Springs Manufacturing Company (Hickory Springs);[7] (6) Leggett & Platt Inc. (Leggett);[8] (7) Mohawk Industries Inc. (Mohawk);[9] (8) Otto Bock Polyurethane Technologies, Inc. (Otto **[*468]** Bock);[10] (9) Scottdel Inc. (Scottdel);[11] (10) Woodbridge Foam Corporation, Woodbridge Sales & Engineering, Inc., (collectively "Woodbridge"),[12] and (11) Corporation ABC.[13] The claims against Defendants Vitafoam Products Canada Limited

---

[3] Carpenter Co. is a company that manufacture and distribute flexible polyurethane foam for bedding, including cushioning, foam mattresses, and fibers, carpet cushion products, and flexible foam packaging. (Docket No. 1 ¶¶ 13-16). Defendant Carpenter Co. clarifies in its joint motion to dismiss that Plaintiff incorrectly identified it as "The Carpenter Company," when the corporation's name is Carpenter Co. Id. at 1.

[4] Flexible Foam Products is a company that manufactures flexible polyurethane foam and re-bond products serving customers in the bedding, flooring, furniture, packaging, and transportation industries. Id. ¶¶ 17-20. Defendant Flexible Foam Products has yet to appear in this case.

[5] FXI is a company with its principal place of business in Pennsylvania that provides flexible polyurethane foam for the home, healthcare, electronics, industrial, personal care and transportation markets. (Docket No. 1 ¶¶ 21-25). Defendant FXI clarifies that "Foamex Innovations, Inc." or "Foamex International, Inc." no longer exist and that FXI Holdings, Inc. is the entity appearing to move to dismiss the present case. (Docket No. 34 at 1).

[6] Future Foam is a company with its principal place of business in Iowa that produces flexible polyurethane foam products for the bedding, flooring, furniture, and packaging industries. (Docket No. 1 ¶¶ 26-28).

[7] Hickory Springs is one of the nation's largest integrated components manufacturers and suppliers for the furniture and bedding industries, with more than sixty operating facilities in the United States and throughout the world. Id. ¶¶ 29-33.

[8] Leggett is a company that manufactures flexible polyurethane foam and other components for the bedding and furniture industries. Id. ¶¶ 34-36.

[9] Mohawk is a company that manufactures flexible polyurethane foam and other components for the flooring industry. (Docket No. 1 ¶ 37).

[10] Otto Bock is a subsidiary of Otto Bock Holding GmbH & Co. KG, a German company. Id. ¶¶ 38-40. Defendant Otto Bock has yet to appear in this case.

[11] Scottdel is a company that manufactures bonded urethane carpet cushions since 1961 and now operates complete line of commercial and residential cushions ranging in density from 3.5 pounds to 10 pounds per cubic foot. Id. ¶¶ 41-44. Defendant Scottdel has yet to appear in this case.

[12] Woodbridge are companies whose primary focus involves supplying flexible polyurethane foam for automotive components, but it also supplies flexible polyurethane foam for commercial and recreational transportation, building products, construction, packaging, and several consumer and industrial products. Id. ¶¶ 53-59.

(Vitafoam Canada) and Vitafoam Inc. (collectively with Vitafoam Canada, "Vitafoam") were *dismissed with prejudice* pursuant to Plaintiff's notice of voluntary dismissal. (Docket Nos. 58; 59).

Similarly, according to the Complaint, the private individuals responsible for heading the alleged price-fixing conspiracy throughout the United States, including the Commonwealth of Puerto Rico, during the period in question are: (1) Louis Carson, former President of Scottdel; (2) David Carson, former Vice President, Manufacturing of Scottdel,[14] (3) John Doe, (4) Jane Doe, (5) and their conjugal partnership, whose identity is currently unknown yet may be responsible for the allegations set forth in Plaintiff's complaint. **[**5]** Id. ¶¶ 61-65. Lastly, Plaintiff mentions possible agents and co-conspirators that may have participated as co-conspirators in the violations alleged in the Complaint. (Docket No. 1 ¶¶ 66-69).

B. The flexible polyurethane foam market

In 2008, over 590,000 metric tons of slabstock flexible polyurethane foam were produced in the United States. (Docket No. 1 ¶ 74). Flexible polyurethane foam has a wide-range of uses, yet it is most used in bedding and upholstery, while the more rigid variety is used for products, thermal insulation and in automobile dashboards. Id. ¶ 77. The American Chemistry Council estimated that the domestic revenue for polyurethane foam industry for 2015 was $28.2 billion. Id. ¶ 91. The Polyurethane Foam Association, a trade association in which the non-private-individual Defendants are members, advances that, compared to polyurethane foam, other alternative materials in the areas of economics, comfort potential, ease of use, and durability, cannot be deemed as acceptable a substitute. Id. ¶ 98. Finally, according to Plaintiff, there has been a recent trend towards consolidation in this industry where major players within the industry have been active in acquiring smaller **[**6]** companies and other competitors over the course of the last ten years. Id. ¶¶ 99-100.

C. The alleged conspiracy

The unraveling of the alleged conspiracy occurred in February 2010 when Vitafoam voluntarily contacted the U.S. Department of Justice's (DOJ) Antitrust Division to self-report evidence of misconduct amongst itself, other companies and individuals in the industry. (Docket No. 1 **[*469]** ¶ 105). Vitafoam sought, and eventually received, acceptance into the DOJ's Corporate Leniency Program. Id. Since that date, Vitafoam and its employees have been cooperating with the DOJ's criminal investigation into illegal anticompetitive conduct in the flexible polyurethane foam market. (Docket No. 1 ¶ 106). While seeking the corporate leniency letter, and in connection with a Canadian government antitrust investigation, several current and former Vitafoam employees agreed to be interviewed regarding the alleged price-fixing conspiracy. (Docket No. 1 ¶ 108). These interviews revealed the mechanisms, participants, duration, and impact of the conspiracy. Id.

According to these interviews, Defendants established a practice where they would communicate and reach an agreement or understanding as to the percentage **[**7]** amount and timing of price increases and market allocation in the sale and supply of polyurethane foam. Id. at ¶ 109. The price increase discussions occurred approximately two to three times per-year and often coincided with the bi-annual meetings held by the Polyurethane Foam Association (PFA). Id. The general pretext used to explain the price increases was through an increase in raw material costs. Id. at ¶ 110. When Defendants' raw material suppliers announced price increases for chemical ingredients of foam, they contacted each other to provide an opportunity to raise prices. Id. Defendants viewed price fixing as necessary because if they did not increase their foam prices by the same percentage amount, and at around the same period, then the attempted price increase would fail. Id.

During the period of the alleged conspiracy there has been an understanding among Defendants and their co-conspirators to collectively support supra-competitive prices; specifically, the percentage of price increases, the dates of the increases and how the conspirators would announce the increases with nearly the same effective dates. Id. at ¶ 112. Subsequently, price increase announcement letters were **[**8]** then mailed to customers,

---

[13] Corporation ABC is a corporate entity and who's the identity is currently unknown that may be responsible for the allegations set forth in Plaintiff's complaint. Id. ¶ 60.

[14] These individual defendants have yet to appear in this case.

reflecting the prices determined. Id. Defendants policed these increases to ensure they were implemented amongst themselves and did not permit price reductions without consent of the overall group. (Docket No. 1 ¶ 112).

In the Complaint, Plaintiff explains in great length how former Vitafoam executives, particularly its former President and Vice President, coordinated and executed this price-fixing conspiracy. (Docket No. 1 ¶¶ 113-153). The allegations described include discussions and transcripts of conversations that occurred by means of telephone, e-mails and in-person meetings. Id. at ¶ 117. These top executives, as detailed in the Complaint, participated in a conspiratorial conduct during this period alongside individuals employed by numerous competitors, including co-Defendants Carpenter, Otto Bock, Woodbridge, Flexible Foam, Hickory Springs, Scottdel, and Foamex. Id. at ¶ 120. Notably, an unnamed witness that participated in an investigation held by Canada's Commissioner of Competition confirmed the involvements of most Defendants in these price-fixing schemes. Id. at ¶¶ 130-139. It is alleged that Defendants also undertook substantial efforts to police **[**9]** the conspiracy and keep it secret. Id. at ¶¶ 154-207. In this regard, they took advantage of attending trade association meetings along with their competitors and met to discuss coordinating price increases outside of the formal meetings. Id. at ¶ 199. The Complaint also lays out various market factors that made the market for flexible polyurethane foam highly susceptible to anticompetitive practices and unlawful collusion. Id. at ¶ 208. These were: (1) limited competition; (2) inelastic demand due to lack of substitutes; **[*470]** (3) standardized commodity product with high degree of interchangeability; (4) opportunities to conspire. Id. at ¶¶ 209-221.

The Commonwealth puts forward that it did not discover nor could have discovered, through the exercise of reasonable diligence, the existence of the conspiracy alleged prior to disclosure in 2010 of federal agencies' raids of certain Defendants' facilities. Id. at ¶ 222. Plaintiff stresses that, except for Vitafoam which sought leniency from the DOJ and Scottdel that filed for bankruptcy and went into liquidation, there was no indication that any of the other Defendants has taken affirmative action to leave the conspiracy. (Docket No. 1 ¶ 207). **[**10]**

Finally, the Commonwealth pleads that the unlawful conspiracy had the effect of: (1) maintaining prices charged by Defendants at an artificially high and supra-competitive levels; (2) having them pay more for products manufactured with polyurethane foam than they would have paid in a competitive marketplace, and (3) depriving them of the benefits of free, open and unrestricted competition in the market for polyurethane foam. (Docket No. 1 ¶¶ 299-232). All of these occurred, during and throughout the period in question, as the Government indirectly purchased Defendants' polyurethane foam in Puerto Rico. Id. ¶ 230.

D. Multi-District Antitrust Litigation, Settlements and Fines

The Court takes judicial notice, pursuant to *FED. R. EVID. 201*,[15] of the following facts: After Vitafoam voluntarily approached the DOJ's antitrust division in early 2010, lawsuits were filed in several district courts seeking class action status and alleging a price-fixing conspiracy in the foam industry. See Peter Reap, Antitrust News: Companies Which Purchased Flexible Polyurethane Foam Allege Price Fixing Conspiracy, Wolters Kluwer ***Antitrust Law*** Daily, 2013 WL 5861997. Most of these actions were consolidated in the Northern District of Ohio. See *In re: Polyurethane Foam Antitrust Litig., 753 F. Supp. 2d 1376 (U.S. Jud. Pan. Mult. Lit. 2010)*. Many of these lawsuits concluded with million-dollar settlements that led to the dissolution or bankruptcy of some companies.[16]

---

[15] ***HN2***[] At the motion to dismiss stage, a Court may take judicial notice of the fact that press coverage, prior lawsuits or regulatory filings contained certain information, without regard to the truth of the contents. See *Rodi v. S. New England Sch. Of Law, 389 F.3d 5, 12-19 (1st Cir. 2004)*. See also *Staehr v. Hartford Fin. Servs. Grp., Inc., 547 F.3d 406, 425 (2d Cir. 2008)*.

[16] See Polyurethane foam makers in $128.5 mln US price-fixing accords, Reuters (June 22, 2015), https://www.reuters.com/article/polyurethane-settlement/polyurethane-foam-makers-in-128-5-mln-us-price-fixing-accords-idUKL1N0Z829 M20150622; Jonathan Stempel, Polyurethane foam makers pay $275.5 million to end price-fixing cases, Reuters (May 19 2015), https://www.reuters.com/article/us-polyurethane-settlement/polyurethane-foam-makers-pay-275-5-million-to-end-price-fixing-cases-idUSKBN0O42K8201 50519. See also *In re Polyurethane Foam Antitrust Litig., 135 F. Supp. 3d 679 (N.D. Ohio 2015)*; *In re Polyurethane Foam Antitrust Litig., Civil Case No. 10-MD-2196, 2015 U.S. Dist. LEXIS 23482, 2015 WL 1639269 (N.D. Ohio 2015)*.

Similarly, **[**11]** various companies in the industry faced criminal prosecution for the price-fixing scheme and were fined by countries in North America and Europe.[17]

[*471] E. Defendants' Motions to Dismiss

Defendants Carpenter, FXI, Future Foam, Hickory Springs, Mohawk, Leggett, and Woodbridge filed a joint motion to dismiss for failure to state a claim, under *FED. R. CIV. P. 12(b)(6)*, arguing that the allegations contained in the Complaint offer no sufficient legal basis to issue an injunction that would stop the alleged anticompetitive conduct that has not occurred since 2010. (Docket No. 34). Similarly, they posit that the Commonwealth may not sue for unjust enrichment to revive a time-barred antitrust damages claim because the *Puerto Rico Antitrust Act ("PRAA"), P.R. LAWS ANN. tit. 10, §§ 257 et seq.*, provides an adequate legal remedy to their alleged injuries. Id. Finally, Defendants contend that **[**12]** Plaintiff cannot sue in *parens patriae* capacity because it lacks statutory standing to litigate the individual claims of Puerto Rico residents. Id.

Defendants Woodbridge, Hickory Springs and FXI filed additional motions to dismiss against Plaintiff on different grounds to those articulated in the joint motion. (Docket Nos. 35, 37, 39). Woodbridge mainly argues that the Government's conspiracy allegations cannot be related to its business activities in the Commonwealth; thus, under *FED. R. CIV. P. 12(b)(2)*, the Court lacks personal jurisdiction over the company. (Docket No. 35). Likewise, it also pleads that both federal and Commonwealth ***antitrust law*** claims should be dismissed for lack of proper venue, pursuant to *FED. R. CIV. P. 12(b)(3)*. (Docket No. 35). Similarly, Hickory Springs posits that the Court lacks specific jurisdiction, under *FED. R. CIV. P. 12(b)(2)*, because Plaintiff's claims are not related to any activity carried out by Hickory Springs in Puerto Rico. (Docket No. 37). Notably, Hickory Springs puts forward that the polyurethane foam products at issue were sold into the Commonwealth by third parties; hence, there is no nexus between Plaintiff and Hickory Springs. Id. Lastly, FXI argues that Plaintiff cannot identify facts that would establish **[**13]** Article III standing against it given that Plaintiff fails to sue an existing corporate entity, Foamex. (Docket No. 39). Specifically, FXI details Foamex's bankruptcy procedures that ended up in its dissolution and avers that Plaintiff never mentions FXI in the Complaint neither does it allege a real, immediate, and significant threat of injury. Id.

The Government filed responses in opposition to all motions to dismiss (Docket Nos. 60, 61) and Defendants replied thereafter. (Docket Nos. 68, 69, 70, 71).

II. Standard of Review

HN3[] When considering a motion to dismiss for failure to state a claim upon which relief can be granted, *Fed. R. Civ. P. 12(b)(6)*, the Court analyzes the complaint in a two-step process under the context-based "plausibility" standard established by the Supreme Court. See *Schatz v. Republican State Leadership Comm., 669 F.3d 50, 55 (1st Cir. 2012)*; see also *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. First, the Court must "isolate and ignore statements in the complaint that simply offer legal labels and conclusions or merely rehash cause-of-action elements." *Schatz, 669 F.3d 50 at 55*. A complaint does not need detailed factual allegations, but "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678-79*. Second, the court must then "take the complaint's well-[pleaded] (i.e., **[**14]** **[*472]** non-conclusory, non-speculative) facts as true, drawing all reasonable inferences in the pleader's favor, and see if they plausibly narrate a claim for relief." *Schatz, 669 F.3d at 55*. Plausible, means something more than merely possible, and gauging a pleaded situation's plausibility is a context-specific job that compels the court to draw on its judicial

[17] See Three Foam Manufacturers Plead Guilty in Price Fixing Scheme, Department of Justice (June 27, 2014), https://www.justice.gov/opa/pr/three-foam-manufacturers-plead-guilty-price-fixing-scheme; European Commission, Antitrust: Commission fines producers of foam for mattresses, sofas and car seats € 114 million in cartel settlement (Jan. 29, 2014), https://ec.europa.eu/commission/presscorner/detail/en/IP_14_88; Polyurethane foam, Government of Canada (Jan. 6, 2012), https://www.competitionbureau.gc.ca/eic/site/cb-bc.nsf/eng/02585.html.

experience and common sense. Id. (citing *Iqbal, 556 U.S. at 678-79*). This "simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of" the necessary element. *Twombly, 550 U.S. at 556*. ***HN4***[] "[W]here the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged—but it has not 'show[n]'—'that the pleader is entitled to relief.'" *Iqbal, 556 U.S. at 679* (quoting *FED. R. CIV. P. 8(a)(2)*). If, however, the "factual content, so taken, 'allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged,' the claim has facial plausibility." *Ocasio-Hernández v. Fortuño-Burset, 640 F.3d 1, 12 (1st Cir. 2011)* (quoting *Iqbal, 556 U.S. at 678*).

III. Discussion

Defendants primarily argue that Plaintiff cannot show imminent harm and rely on the analysis set forth in different complex litigation antitrust cases. (Docket No. 34 at 5-6). See *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6 (1st Cir. 2008)*; *In re Relafen Antitrust Litig., 221 F.R.D. 260 (D. Mass. 2004)*; *Petrolera Caribe, Inc. v. Arco Caribbean, Inc., 754 F.2d 404 (1st Cir. 1985)*. They assert that Plaintiff's theory of an ongoing industry-wide **[**15]** conspiracy requires an overt act sufficient to toll and restart the statute of limitations. (Docket No. 34-1 at 5-6). They argue that this has yet to occur. Id. Moreover, Defendants contend that the doctrine of laches bars the Government's claims because it had knowledge about the alleged conspiracy as early as 2010 meaning that the Clayton Act *Section 4* (Damages)'s four-year statute of limitations, *15 U.S.C. § 15b*, expired prior to filing this lawsuit on December 20, 2018. Id. at 7.

Plaintiff holds, in opposition, that in the context of antitrust litigation the requirements for standing to pursue an injunctive relief are "less stringent" than those for standing to claim damages. (Docket No. 61 at 4). At this early litigation stage, the Government avers that it describes a plausible set of facts about the conspiracy: how it worked and the active policing that each Defendant engaged in to ensure everybody involved complied with the agreement. Id. Plaintiff also puts forward that not issuing an injunction may result in a recurring incident that could evade judicial review. Id. at 5. Lastly, the Government holds that it plausibly suffers an imminent threat of injury. Id.

In their reply, Defendants posit that the Government offers **[**16]** a legal conclusion about a continuing conspiracy without supporting factual allegations from the past nine years. (Docket No. 69). They insist that the Court should not enjoin all potential and future ***antitrust law*** violations. Id. As to the evading judicial review argument, Defendants assert that the mootness doctrine exception explained in the opposition is irrelevant to the case at hand. Id. Finally, Defendants aver that Plaintiff failed to oppose their laches argument, and have thus, waived its right to contest it. Id.

HN5[] Given the early stage of the proceedings, the plausibility standard requires the Court to consider if the allegations set forth in the Complaint are "more than merely possible." *Schatz, 669 F.3d at 55*. As it is well-known this "simply calls for enough facts to raise a reasonable expectation **[*473]** that discovery will reveal evidence" concerning the necessary elements to prove the relief plaintiff seeks. *Twombly, 550 U.S. at 556*. For a plaintiff to show an entitlement to relief "a complaint must contain enough factual material to raise a right to relief above the speculative level." *Ocasio-Hernández, 640 F.3d at 12* (citation omitted); see also *Twombly, 550 U.S. at 555*. A well-plead complaint "may proceed even if . . . a recovery is very remote and unlikely" yet it may not, **[**17]** *if the remedy sought is not available*. *Ocasio-Hernández, 640 F.3d at 12-13*. Bearing this in mind, in this case, Plaintiff seeks an injunctive relief in the context of an antitrust case. ***HN6***[] The Court's task requires analyzing if the pleadings in the Complaint can plausibly establish this cause of action upon which relief may be granted.

A. Injunctive Relief

Plaintiff invokes ***HN7***[] *Section 16* of the Clayton Act which provides that "[a]ny person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. To meet this burden Plaintiff must "demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* (citations omitted). The threatened injury must be one for which plaintiff would be entitled to compensation if the injury actually occurred. *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 111-13, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. The First Circuit, when analyzing the elements for an antitrust injunction and its standing requirements, held that:

> *Section 16*'s requirement of "threatened injury" dovetails with Article III's requirement that in order to obtain forward-looking relief, a plaintiff must face a threat of injury that is both real **[**18]** and immediate, not conjectural or hypothetical. Past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief . . . if unaccompanied by any continuing, present adverse effects.

In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 14 (1st Cir. 2008) (citations and internal quotation marks omitted); see also *In re Nexium (Esomeprazole) Antitrust Litig., 845 F.3d 470, 474-75 (1st Cir. 2017)*; *O'Shea v. Littleton, 414 U.S. 488, 494-95, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)*.

Plaintiff avers that it meets these requirements as it detailed Defendants' alleged conspiracy scheme and its ongoing presence in the Commonwealth. (Docket No. 61 at 4). Defendants, on the other hand, argue that the Government fails to plead the necessary element of imminent harm and that this claim is time-barred, or alternatively, the laches doctrine should be applied because there is no allegation in the Complaint dating subsequent to 2010, when Plaintiff learned about the alleged conspiracy. (Docket No. 69 at 2).

HN8[] When entertaining a suit under the Clayton Act's *Section 4* (damages), a Court shall determine if it was filed within the four-year statute of limitations. *15 U.S.C. § 15b*. These claims accrue "when a defendant commits an act that injures a plaintiff's business." *Zenith Radio Corp., 401 U.S. at 338*. The Supreme Court has delineated at least two distinct exceptions to the four-year statute of limitations in antitrust actions: (1) the continuing **[**19]** violation and (2) the speculative damages exception. *Id. at 338-342*. **[*474]** While Plaintiff fails to invoke either exception, the Court will consider whether the continuing conspiracy violation exception applies.

HN9[] Where the claim is a continuing conspiracy violation, "each time a plaintiff is injured by an act of the defendants [,] a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act." Id. In the context of price-fixing allegations, this implies that each time a defendant sells its price-fixed product, the sale constitutes a new overt act causing injury to the purchaser and the statute of limitations runs from the date of the act. However, "the commission of a separate new overt act generally does not permit the plaintiff to recover for the injury caused by old overt acts outside the limitations period." See *Klehr v. A.O. Smith Corp., 521 U.S. 179, 188, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)*. See also Pan-Am. Tel. Co. v. Municipality of San Juan, Civil Case No. 09-1256 (ADC/BJM), 2012 WL 13027982 at *4 (D.P.R. 2012).

Notwithstanding this analysis, several District and other Circuit courts have held that there is no statute of limitations for injunctive relief claims under *Section 16* of the Clayton Act and that rather, the equitable defense of laches applies. See e.g. *Midwestern Machinery Co., Inc. v. Northwest Airlines, Inc., 392 F.3d 265 (8th Cir. 2004)*; *Duty Free Americas, Inc. v. Estee Lauder Companies, Inc., 2014-1 Trade Cas. (CCH) ¶ 78771, 2014 WL 1329359 (S.D. Fla. 2014)* aff'd, *797 F.3d 1248 (11th Cir. 2015)*; *Oliver v. SD-3C LLC, 751 F.3d 1081 (9th Cir. 2014)*. **[**20]** When computing the laches period, the four-year statute of limitation is used as a "guideline." *Oliver 751 F.3d at 1086*. Therefore, ***HN10***[] in applying laches, the Court looks to the same legal rules that animate the four-year statute of limitations. Id.

HN11[] The doctrine of laches, "which penalizes a litigant for negligent or wilful failure to assert his rights," *Valmor Prods. Co. v. Standard Prods. Corp., 464 F.2d 200, 204 (1st Cir. 1972)*, requires proving "(1) lack of diligence by the party against whom the defense is asserted and (2) prejudice to the party asserting the defense." *Museum of Fine Arts, Bos. v. Seger-Thomschitz, 623 F.3d 1, 10 n. 9 (1st Cir. 2010)*. Nevertheless, the laches doctrine applies only where the plaintiff knew or should have known of the infringing conduct. *Valmor Prods., 464 F.2d at 204*.

In light of the above, the Court agrees with Defendants' position that Plaintiff has failed to present a cogent argument for establishing an impeding, contemporary and threatened harm. Although an alleged price-fixing conspiracy could have possibly occurred throughout the Nation, as the multi-district antitrust lawsuits, settlement agreements and monetary fines reveal, it is apparent from the face of the Complaint that the last injurious act in this entire scheme befell *almost* ten years ago; specifically, in the Summer of 2010 (Docket No. 1 at 136-188). Not a single pleading references a recent **[**21]** act (from 2011 to 2018), nor does it relate to the Defendants' businesses in the Commonwealth of Puerto Rico. Simply adding the phrase, "including Puerto Rico" at the end of every other allegation in the Complaint is not specific enough to survive the burden at this stage. (Docket No. 1). ***HN12***[] As the First Circuit has held, in similar antitrust cases, "[p]ast exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief . . . if unaccompanied by any continuing, present adverse effects." *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d at 14*. Consequently, Plaintiff has **[*475]** failed to plausibly establish that injunctive relief should be granted. The Court will not proceed with almost decade-old allegations, as Defendants correctly point out. (Docket No. 34 at 5-8).

Plaintiff's request for injunctive relief is time-barred and the laches doctrines applies. There is *no doubt* that more than four years have elapsed since the factual allegations detailed in the Complaint. Under the conspiracy exception, there has not been an overt act since the Summer of 2010 that would have tolled this cause of action. ***HN13***[] When considering theses defenses, the Ninth Circuit has held that to re-start a statute of limitations, **[**22]** there must be a new overt act which: (1) is "new and independent . . . [and] not merely a reaffirmation of a previous act and (2) inflict[s] new and accumulating injury on the plaintiff." *Oliver, 751 F.3d at 1086*. None of these has occurred in the present case.

Additionally, under the First Circuit's laches analysis, the Commonwealth must or should have known of the infringing conduct, given the allegations in the Complaint date back to at least four years prior to its filling. In the Complaint, Plaintiff contradicts itself when it alleges that: "Plaintiff did not discover and could not have discovered through the exercise of reasonable diligence the existence of the conspiracy alleged herein *prior to disclosure in 2010 of the raids by government agencies of certain Defendants' facilities*." (Docket No. 1 ¶ 222) (emphasis added). It admits that it learned about the alleged conspiracy in 2010 yet did not file suit until December 20, 2018. Once again, ***HN14***[] an injunctive relief claim that relies on general and vague descriptions of an "ongoing conspiracy" without a new and independent act, fails to overcome the *Rule 12(b)(6)* standard.

HN15[] Although district courts are reluctant to dismiss antitrust injunction claims based on ongoing **[**23]** conspiracies, this Court is mindful "that proceeding to antitrust discovery can be expensive" and thus "retain[s] the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed." *Twombly, 550 U.S. at 558* (citations and internal quotations marks omitted); see also *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528, n. 17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. In Twombly, the Supreme Court cautioned about "the costs of modern federal antitrust litigation and the increasing caseload of the federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint." *Twombly, 550 U.S. at 558* (citing *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106 (C.A.7 1984))*. The present case would likely involve a lengthy and costly discovery as in the consolidated cases on the same alleged price-fixing conspiracy held before the Northern District of Ohio. After four years of litigation, the District Court for the Northern District of Ohio highlighted the fact that "[m]illions of pages of discovery, hundreds of fact and expert witness depositions, and extensive motion practice [had] ensued." *In re Polyurethane Foam Antitrust Litig., 152 F. Supp. 3d 968, 974 (N.D. Ohio 2015)*. The same would occur here.

Finally, the Court is concerned that the present case could be a needless fishing expedition. See *In re Carbon Black Antitrust Litig., Case No. 03-10191 (DPW), 2005 U.S. Dist. LEXIS 660, 2005 WL 102966 at *5 (D. Mass. 2005)*; see also *Eastern Food Services, Inc. v. Pontifical Catholic Univ. Services Assoc., Inc., 357 F.3d 1, 9 (1st Cir. 2004)* ("[T]he **[**24]** cases . . . say that it is not enough merely **[*476]** to allege a violation in conclusory terms, that the complaint must make out the rudiments of a valid claim, and that discovery is not for fishing expeditions."). In fact, how does Plaintiff plan to carry-out an effective and complete discovery if it voluntarily dismissed all claims against Vitafoam, the alleged mastermind in this ongoing price-fixing conspiracy and the Defendant most mentioned in the Complaint? (Docket No. 58; 59). It simply would not be able.

For the all foregoing reasons, this Court **GRANTS** Defendants joint motion to dismiss at Docket No. 34 as to Plaintiff's request for injunctive relief.

B. Unjust or Undue Enrichment Doctrine and Indirect Purchaser Claims

Given the subsidiary nature of the unjust enrichment doctrine, Defendants aver that the Government may not pursue this claim because the Puerto Rico Antitrust Act ("PRAA"), *P.R. LAWS ANN. tit. 10, § 268*, provides a legal remedy. It further puts forward that the Court has previously dismissed an antitrust claim "cloaked as unjust enrichment" in *Rivera-Muñiz v. Horizon Lines Inc., 737 F. Supp. 2d 57 (D.P.R. 2010)*. (Docket No. 34-1 at 9).

Plaintiff opposed this argument asserting that an indirect purchaser antitrust claim is not available under Puerto Rico law and hence **[**25]** it can only sue pursuant to the unjust enrichment doctrine. (Docket No. 61 at 6-7). The Government posits that Defendants rely on Rivera-Muñiz's analysis on this issue, while other federal courts have held that Puerto Rico has not rejected *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*.[18] (Docket No. 61 at 6-9). Plaintiff posits that without an express repeal of Illinois Brick, indirect purchaser antitrust claims are not available in this jurisdiction. Id. Defendants stress in their reply that Plaintiff offers no analysis grounded on Commonwealth law that departs from the Court's prior decision in Rivera-Muñiz, which held that liberally construing antitrust claims is inconsistent with limiting indirect purchaser standing. (Docket No. 69 at 5).

HN17[] The Puerto Rico Supreme Court recognized a cause of action under the unjust or undue enrichment doctrine in *Ortiz-Andújar v. Commonwealth of Puerto Rico, 22 P.R. Offic. Trans. 774, 122 D.P.R. 817, 1988 Juris P.R. 147 (P.R. 1988)*. This civil law equity doctrine can be invoked "when the laws have not foreseen a situation where a patrimonial shift occurs [and] which shift cannot be rationally explained by the prevalent body of laws." Id. (internal **[**26]** quotation marks omitted). There are five elements to an unjust enrichment action: "(1) existence of enrichment; (2) a correlative loss; (3) nexus between loss and enrichment; (4) lack of cause for enrichment, and (5) absence of a **[*477]** legal precept excluding application of enrichment without cause." See *Hatton v. Mun. de Ponce, 1994 P.R.-Eng. 909, 605, 134 P.R. Dec. 1001, 1010, 1994 Juris P.R. 2 (P.R. 1994)*; see also *Puerto Rico Tel. Co. v. SprintCom, Inc., 662 F.3d 74, 97 (1st Cir. 2011)*.

Defendants focus primarily on the doctrine's fifth element, or the absence of thereof, arguing that the Government had a legal remedy under PRAA's *Section 268*. Specifically, this section provides that "[a]ny person who shall be injured in his business or property by any other person, by reason of acts or intended acts, forbidden or declared to be unlawful by the provisions of this chapter . . . may sue therefor . . . and shall recover threefold the damages by him sustained." *P.R. LAWS ANN. tit. 10, § 268(a)*.[19] Furthermore, it provides that "[t]he judicial action to recover damages . . . [the action] shall be commenced within four (4) years after the cause of action accrued." Id. Under Defendants' theory, Plaintiff had a remedy under PRAA yet failed to file suit within the four-year statute of limitations and cannot now disguise its time-barred action using the unjust enrichment **[**27]** doctrine. (Docket No. 34-1 at 9-10). The Government opposes this argument and posits that an indirect purchaser antitrust claim is not available under Puerto Rico law and thus the only remedy available is unjust enrichment. (Docket No. 61 at 6-9).

---

[18] In Illinois Brick, several brick companies allegedly conspired to raise prices to masons who in turn passed the inflated prices along to the subcontractors on public works projects; ultimately harming the indirect purchasers: the state and its taxpayers. *Illinois Brick Co., 431 U.S. at 726-27*. ***HN16***[] The Supreme Court held that indirect purchasers may not recover damages in price-fixing cases and even if direct purchasers have "passed on" some or all the overcharges to indirect purchasers. *Id. at 744-46*. As a policy matter, the Court found it necessary to restrict the remedy to direct purchasers. Id. In response to the Court's decision, several states enacted laws permitting indirect purchasers to sue under state antitrust laws. See Daniel R. Karon, "Your Honor, Tear Down That Illinois Brick Wall!" the National Movement Toward Indirect Purchaser Antitrust Standing and Consumer Justice, *30 Wm. Mitchell L. Rev. 1351, 1360-63 (2004)* (explaining different states Illinois Brick "repealer statutes"); *California v. ARC Am. Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*.

[19] It is worth noting that this statute's language is practically identical to the Clayton Act's *Section 4* (damages), *15 U.S.C. § 15*.

The Court disagrees with Plaintiff's arguments on indirect purchaser standing. As a threshold matter, in Rivera-Muñiz the undersigned explicitly addressed the issue of direct and indirect purchaser antitrust standing under Commonwealth law and held that "although federal jurisprudence has implied special standing requirements into private antitrust actions, Puerto Rico explicitly rejects any such limitations." *Rivera-Muñiz, 737 F. Supp. 2d at 61 (D.P.R. 2010)* (citations and internal quotation marks omitted). Relying on *Pressure Vessels of P.R., Inc. v. Empire Gas de P.R., 1994 P.R.-Eng. 909, 547, 137 P.R. Dec. 497, 1994 Juris P.R. 144 (P.R. 1994)*, the Court held that "because Puerto Rico liberally construes its standing requirements in private antitrust cases, it is immaterial whether Plaintiffs are direct or indirect purchasers." Id. After the Court's ruling in Rivera-Muñiz, Defendants in that case moved to certify a question to the Puerto Rico Supreme Court as to whether indirect purchasers have standing to sue under PRAA. This Court **[**28]** denied that request:

> The Puerto Rico legislature enacted PRAA in 1964. *Pressure Vessels of P.R., Inc. v. Empire Gas de P.R., 137 P.R. Dec. 497, 519, 1994 Juris P.R. 144 (1994)*. Since then, federal precedents have limited standing in private antitrust actions under federal law to direct purchasers. See *Ill. Brick Co. v. Illinois, 431 U.S. 720, 746, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Without citing Illinois Brick explicitly, the Puerto Rico Supreme Court rejected such limitations on standing for the purpose of private antitrust actions under PRAA. See *Pressure Vessels, 137 P.R. Dec. at 519* (citing federal precedents limiting antitrust standing that postdate enactment of PRAA in 1964). According to the Commonwealth court, the legislative intent under PRAA must be inferred from the state of federal case law in 1964 - when federal precedents tended to favor liberal standing requirements in private antitrust actions. Id. Because the Puerto Rico Supreme Court has unequivocally rejected limitations to private antitrust standing under PRAA, this court must **[*478]** deny Defendants' motion for certification. See *Romero, 204 F.3d at 305-06*.

*Rivera-Muñiz v. Horizon Lines Inc., Civil No. Case 09-2081 (GAG), 2010 U.S. Dist. LEXIS 95495, 2010 WL 3703737 at *1 (D.P.R. 2010)* (footnotes omitted). Additionally, the Court advanced that if defendants "wish[ed] to amend the standing requirements under PRAA, they must appeal to the Puerto Rico legislature or present their arguments in a proper judicial venue in the Commonwealth." *2010 U.S. Dist. LEXIS 95495, [WL] at 1, n. 2*.

Following this decision, as Plaintiff points out, several **[**29]** district courts have rejected the Court's Pressure Vessels of P.R., Inc. reading. See e.g. *In re Opana Er Antritrust Litig., 162 F. Supp. 3d 704 (N.D. Ill. 2016)*; *United Food & Commercial Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052 (N.D. Cal. 2014)*; *In re TFT-LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179 (N.D. Cal. 2009)*. While other jurisdictions, and rather *recently*, have agreed with it. See e.g. *In re Zetia (Ezetimibe) Antitrust Litig., Civil Case No. 18-MD-2836, 2019 U.S. Dist. LEXIS 59469, 2019 WL 1397228 (E.D. Va. 2019)*, report and recommendation adopted as modified, *400 F. Supp. 3d 418 (E.D. Va. 2019)*; *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, plc, Civil Case No. 15-6549 (CM), 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233 (S.D.N.Y. 2018)*. Nevertheless, these decisions are not binding, nor do they persuade the undersigned to reconsider its holding in *Rivera-Muñiz*. More so, following the decision in Rivera-Muñiz, the Puerto Rico Supreme Court has not ruled upon a similar issue, nor has the Commonwealth's Legislature amended the PRAA to restrict indirect purchaser standing.

Accordingly, under the current state of Commonwealth law, there exists a liberal construction of who and whom possess standing to bring to court an antitrust case. If there is no distinction between direct or indirect purchaser, then the Government should have sought damages pursuant to PRAA for the alleged price-fixing conspiracy and not under the unjust enrichment doctrine. In Rivera-Muñiz, the Court also decided that the unjust enrichment **[**30]** doctrine is "subsidiary to other remedies provided by law and is unavailable if the plaintiff may seek other forms of relief. Because PRAA affords a remedy to private litigants who are injured by antitrust violations, Plaintiff[] may not simultaneously seek relief under the theory of unjust enrichment." *Rivera-Muñiz, 737 F. Supp. 2d 57, 65-66*. The Court stands by this reasoning.

Consequently, the Court **GRANTS** Defendants motion to dismiss as to their request for damages under the unjust enrichment doctrine.

C. *Parens patriae* standing

Finally, Defendants argue that the Government lacks *parens patriae* standing to sue because there is no express statute granting it and neither can it satisfy the Supreme Court's test set forth in *Alfred L. Snapp & Son, Inc. v. P.R., ex rel., Barez, 458 U.S. 592, 102 S. Ct. 3260, 73 L. Ed. 2d 995 (1982)*. (Docket No. 34 at 10-12). Plaintiff opposes contending that it has a legitimate state interest in recovering for the economic harm that Defendants have caused through their price-fixing conspiracy and that it meets all requirements set under Snapp. (Docket No. 61 at 9-11). In its reply, Defendants advances that Plaintiff lacks a quasi-sovereign interest. (Docket No. 69 at 8-10).

HN18[] Federal ***antitrust law***, specifically *Section 16* of the Clayton Act, provides statutory authorization for claims brought **[*479]** by a state or territory **[**31]** in its capacity as *parens patriae*. *15 U.S.C. §§ 15g-15h*; *Georgia v. Pennsylvania R.R., 324 U.S. 439, 447, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)*; see also *California v. American Stores Co., 495 U.S. 271, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*; *Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 258-66, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*. However, no Commonwealth statute nor Puerto Rico Supreme Court precedent explicitly provides for *parens patriae* standing to present unjust enrichment claims. Had the Government timely filed this suit and would have sought damages under PRAA, then it may have had *parens patriae* standing. However, like an unjust enrichment claim, the Puerto Rico Supreme Court has not addressed this issue and no Commonwealth statues directly allows *parens patriae* standing for antitrust claims, as it does for other civil claims. See e.g. *Class Suit for Consumers of Goods and Services Act, P.R. LAWS ANN. tit., 32 § 3341* ("There is recognized the right to consumers of goods and services and/[or] [] the Commonwealth of Puerto Rico, through their agencies, dependencies and instrumentalities in their capacity of '*parens patriae*' to file a class suit on behalf of said consumers by reason of damages.").

D. Motions to Dismiss for Lack of Personal Jurisdiction and Proper Venue (Docket Nos. 35 and 37) and Motion to Dismiss for Lack of Standing (Docket No. 39)

The Court need not address these motions as Plaintiff's claims have been dismissed on other grounds. For the foregoing reasons, the Court **[**32]** finds the motions to dismiss at Docket Nos. 35, 37, 39 are **MOOT**.

IV. Conclusion

As explained above, ***HN19***[] the costs of complex antitrust lawsuits require diligence and timeliness. Plaintiff lacked both and, thus, failed to plausibly state a claim upon which relief may be granted. Consequently, the Court **GRANTS** the joint motion to dismiss for failure to state a claim at Docket No. 34.

According to the case' record, remaining Defendants Flexible Foam Products, Otto Bock, Scottdel, Louis Carson and David Carson have not been served with process. Plaintiff shall inform the Court, **on or before March 5, 2020**, any action it has taken to pursue its claims against them. Otherwise, the Court will proceed to enter judgment accordingly.

SO ORDERED.

In San Juan, Puerto Rico this 27th of February, 2020.

Judges: Daniel D. Crabtree, United States District Judge.

Opinion by: Daniel D. Crabtree

Opinion

MEMORANDUM AND ORDER

This multi-district litigation ("MDL") involves antitrust, civil RICO, consumer protection, and unjust **[*34]** enrichment claims asserted by a putative class of plaintiffs. The putative class members assert these claims against suppliers and manufacturers of the EpiPen ("the Mylan and Pfizer defendants"). The EpiPen is an epinephrine auto-injector ("EAI") that delivers epinephrine to treat severe allergic reactions known as anaphylaxis. The putative class members—*i.e.*, end-payors who purchased the EpiPen—have filed a motion seeking class certification under Fed.

R. Civ. P. 23. Doc. 1353. Contemporaneously, the parties have filed motions seeking to exclude certain expert testimony offered either to support or oppose the putative class members' Motion for Class Certification. This Order rules those *Daubert* motions.

As explained more fully below, the court rules the parties' motions as follows:

The putative class plaintiffs' motions:

- Motion to Strike the Partial Testimony of Dr. Michael Blaiss (Doc. 1584) is denied.
- Motion to Strike the Testimony of Professor James Hughes (Doc. 1852) is denied.

The Mylan and Pfizer defendants' motions:

- Motion to Exclude Expert Opinions of Professor Meredith Rosenthal (Doc. 1602) is denied.
- Motion to Exclude Expert Opinions of Professor Einer Elhauge (Doc. 1604) is granted in part **[*35]** and denied in part. The court grants the motion to exclude Professor Elhauge's opinions about Auvi-Q market foreclosure based on Mylan's EpiPens4Schools program because plaintiffs since have abandoned this theory. The court denies the motion in all other respects.
- Motion to Exclude Opinions and Proposed Testimony of Andrew K. Torrance (Doc. 1847) is denied.

I. Legal Standard

The court has a "gatekeeping obligation" to determine whether expert testimony is admissible. Kumho Tire Co. v. Carmichael, 526 U.S. 137, 147, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999) (citing Daubert v. Merrell Dow Pharm., Inc., 1993 U.S. LEXIS 4408, 509 U.S. 579, 589 (1993)). When performing this gatekeeping role, the court has broad discretion. Kieffer v. Weston Land, Inc., 90 F.3d 1496, 1499 (10th Cir. 1996) (citing Orth v. Emerson Elec. Co., 980 F.2d 632, 637 (10th Cir. 1992)). Courts exercise this discretion under Federal Rule of Evidence 702. It provides:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if:
>
> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
>
> (b) the testimony is based on sufficient facts or data;
>
> (c) the testimony is the product of reliable principles and methods; and
>
> (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702.

The Tenth Circuit has not yet ruled whether a court must conduct **[*36]** a full *Daubert* analysis at the class certification stage. One federal court has noted that "[t]he issue of how to evaluate expert testimony at the class-certification stage 'ha[s] beguiled the federal courts.'" Campbell v. Nat'l R.R. Passenger Corp., 311 F. Supp. 3d 281, 294 (D.D.C. 2018) (quoting 3 William B. Rubenstein, *Newberg on Class Actions* § 7:24 (5th ed. 2014)). In dictum, the Supreme Court has expressed "doubt" about the notion that "*Daubert* [does] not apply to expert testimony at the certification stage of class-action proceedings." Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 354, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011). But the Court has not yet ruled the question definitively.

Previously, this court recognized that "the case law contains some dissonance about the proper breadth of *Daubert*-style challenges at the class certification stage." Doc. 1532 at 4. As one leading treatise has explained, "two approaches . . . have emerged in the case law." 3 William B. Rubenstein, *Newberg on Class Actions* § 7:24 (5th ed. 2013). Some Circuits have held that a court must perform a "full *Daubert* analysis" before certifying a class. *See* Am. Honda Motor Co. v. Allen, 600 F.3d 813, 815-16 (7th Cir. 2010) (per curiam) ("We hold that when an expert's report or testimony is critical to class certification, . . . the district court must perform a full *Daubert* analysis before certifying the class . . . ."); *see also* In re Carpenter Co., No. 14-0302, 2014 U.S. App. LEXIS 24707, 2014 WL 12809636, at *3 (6th Cir. Sept. 29, 2014) (holding district **[*37]** court did not abuse its discretion by applying *Daubert* to determine admissibility of expert testimony offered to support class certification); Sher v. Raytheon Co., 419 F. App'x 887, 890-91 (11th Cir. 2011) ("Here the district court refused to conduct a *Daubert*-like critique of the proffered experts' qualifications. This was error.").[1] The Eighth Circuit has adopted a different approach. It directs trial courts to apply a "focused *Daubert* analysis" instead of a "full and conclusive *Daubert* inquiry before certification." *In re Zurn Pex Plumbing Prods. Liab. Litig., 644 F.3d 604, 610-11 (8th Cir. 2011)*. The Third Circuit has considered both approaches and recognized that some differences might exist between these two approaches. Nonetheless, the Third Circuit has declined "to examine whether there might be some variation between the Seventh and Eighth Circuit formulations" because "both courts limit the *Daubert* inquiry to expert testimony offered to prove satisfaction of *Rule 23*'s requirements." *In re Blood Reagents Antitrust Litig., 783 F.3d 183, 187, 188 n.8 (3d Cir. 2015)* (joining with "sister courts to hold that a plaintiff cannot rely on challenged expert testimony, when critical to class certification, to demonstrate conformity with *Rule 23* unless the plaintiff also demonstrates, and the trial court finds, that the expert testimony satisfies the standard set out in *Daubert*").

Here, the court likewise declines to decide whether the two approaches differ in a material fashion. Instead, because the parties' motions seek to exclude expert opinions used to support or oppose *Rule 23*'s class certification requirements, the court applies the *Daubert* standard to those proffered opinions to determine whether the court should consider them at the class certification stage.

Outside the class certification phase, our Circuit has directed trial judges to apply a two-part test when determining the admissibility of expert testimony under *Daubert* and *Rule 702*. *Conroy v. Vilsack, 707 F.3d 1163, 1168 (10th Cir. 2013)*. First, the court must determine "whether the expert is qualified 'by knowledge, skill, experience, training, or education' to render an opinion." *United States v. Nacchio, 555 F.3d 1234, 1241 (10th Cir. 2009)* (quoting *Fed. R. Evid. 702*). Second, the court "'must satisfy itself that the proposed expert testimony is both reliable and relevant, in that it will assist the trier of fact, before permitting a jury to assess such testimony.'" *Id.* (quoting *United States v. Rodriguez-Felix, 450 F.3d 1117, 1122 (10th Cir. 2006)* (further citations omitted)).

To qualify as an expert witness, the witness must possess "such skill, experience or knowledge in that particular field as to make it appear that his opinion would rest on substantial foundation and would tend to aid the trier of fact **[*39]** in his search for truth." *LifeWise Master Funding v. Telebank, 374 F.3d 917, 928 (10th Cir. 2004)* (citation and internal quotation marks omitted). To determine whether the expert's testimony is reliable, the court must assess "whether the reasoning or methodology underlying the testimony is scientifically valid and . . . whether that reasoning or methodology properly can be applied to the facts in issue." *Daubert, 509 U.S. at 592-93*.

In *Daubert*, the Supreme Court identified four factors that—though not exhaustive—trial courts should consider when determining the reliability of proffered expert testimony under *Fed. R. Evid. 702*. They are: (1) whether the theory used can be and has been tested; (2) whether it has been subjected to peer review and publication; (3) the known or potential rate of error; and (4) general acceptance in the scientific community. *Id. at 593-94*. The Supreme Court has emphasized, however, that these four factors are not a "definitive checklist or test," and that a court's gatekeeping inquiry about reliability "must be tied to the facts of a particular case." *Kumho Tire, 526 U.S. at 150* (citations and internal quotation marks omitted).

But in some cases, "the relevant reliability concerns may focus upon personal knowledge or experience," rather than the *Daubert* factors and scientific foundation. *Id.* For such testimony **[*40]** to satisfy the reliability standard, it

---

[1] Several district court decisions from the District of Columbia have adopted the view that a court must perform a full *Daubert* analysis before certifying a class. *See, e.g., Campbell v. Nat'l R.R. Passenger Corp., 2018 U.S. Dist. LEXIS 70667, 311 F. Supp. 3d 281, 296 (D.D.C. 2018)* (agreeing "with the heavy weight of authority that, when a party moves to exclude expert testimony proffered in support of a motion for class certification, the district court must perform a full *Daubert* analysis before certifying a class); *In re Rail Freight Fuel Surcharge Antitrust Litig., No. 07-0489(PLF), 2016 U.S. Dist. LEXIS 66526, 2016 WL 2962186, at *2 (D.D.C. May 20, 2016)* (holding that the court "will first address the relevance of all expert opinions and the reliability of the experts' methodology under *Daubert* and *Rule 702*, and then conduct the 'rigorous analysis' of all of the relevant evidence—including expert testimony that meets the *Daubert* ***[*38]*** and *Rule 702* standards—that is critical to proving the class certification requirements" under *Rule 23*); *Kottaras v. Whole Foods Mkt., Inc., 281 F.R.D. 16, 26 (D.D.C. 2012)* (agreeing "with other courts that the Rule calls for careful and searching analysis of all evidence with respect to whether *Rule 23*'s certification requirements have been met, including expert opinions").

"must be 'based on actual knowledge, and not mere "subjective belief or unsupported speculation."'" Pioneer Ctrs. Holding Co. Emp. Stock Ownership Plan & Tr. v. Alerus Fin., N.A., 858 F.3d 1324, 1341-42 (10th Cir. 2017) (quoting Mitchell v. Gencorp, Inc., 165 F.3d 778, 780 (10th Cir. 1999) (quoting Daubert, 509 U.S. at 590)). "When expert opinion 'is not supported by sufficient facts to validate it in the eyes of the law, or when indisputable record facts contradict or otherwise render the opinion unreasonable, it cannot support a jury's verdict' and will be excluded." Id. at 1342 (quoting Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)).

"The proponent of expert testimony bears the burden of showing that the testimony is admissible." Conroy, 707 F.3d at 1168 (citing Nacchio, 555 F.3d at 1241). "[R]ejection of expert testimony is the exception rather than the rule." Fed. R. Evid. 702 advisory committee's notes to 2000 amendments. While *Daubert* makes the court the gatekeeper for expert testimony, "[v]igorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof" remain "the traditional and appropriate means of attacking shaky but admissible evidence." Daubert, 509 U.S. at 596 (citation omitted).

The court has discretion to determine how to perform its gatekeeping function under *Daubert*. Bill Barrett Corp. v. YMC Royalty Co., LP, 918 F.3d 760, 770 (10th Cir. 2019). "The most common method for fulfilling this function is a *Daubert* hearing, although such a process is not specifically mandated." Goebel v. Denver & Rio Grande W. R.R., 215 F.3d 1083, 1087 (10th Cir. 2000) (citations omitted); *see also* United States v. Charley, 189 F.3d 1251, 1266 (10th Cir. 1999) ("The **[*41]** trial judge is granted great latitude . . . in deciding whether to hold a formal [*Daubert*] hearing."). Alternatively, the district court may satisfy its gatekeeping role without a formal *Daubert* hearing "so long as the court has sufficient evidence to perform 'the task of ensuring that an expert's testimony both rests on a reliable foundation and is relevant to the task at hand.'" Goebel, 215 F.3d at 1087 (quoting Daubert, 509 U.S. at 597). Here, exercising its discretion, the court concludes that it need not conduct a separate *Daubert* hearing to rule the parties' motions to exclude. The court has reviewed the parties' filings and attached exhibits carefully. And the court finds that the parties have provided a sufficient record to render a decision without a hearing.

II. Discussion

A. The Putative Class Plaintiffs' Motions to Exclude

The putative class plaintiffs have filed two motions seeking to exclude expert testimony: (1) Motion to Strike the Partial Testimony of Dr. Michael Blaiss (Doc. 1584); and (2) Motion to Strike the Testimony of Professor James Hughes (Doc. 1852). The court addresses each motion, in turn, below.

1. Motion to Strike the Partial Testimony of Dr. Michael Blaiss

The putative class plaintiffs seek to exclude just **[*42]** one aspect of Dr. Michael Blaiss's testimony. Their motion asks the court to strike Dr. Blaiss's proffered opinions expressed in Section 6.0 of his expert report. Dr. Blaiss is a medical doctor with training in allergy and immunology. Section 6.0 of Dr. Blaiss's expert report opines about the likelihood that existing EpiPen users would have switched to the generic EAI product of Teva Parenteral Medicines Inc. ("Teva") had the Teva generic launched in the market at an earlier date. Dr. Blaiss concludes EpiPen users may not readily have switched to the Teva generic because: (1) EAI products are unique, (2) the Teva product is not identical to the EpiPen EAI, and (3) the Teva generic is not widely available. Doc. 1585-1 at 18-19 (Blaiss Expert Report ¶ 6.0).

Plaintiffs assert that the court should exclude Dr. Blaiss's opinions because his conclusions in Section 6.0 are unsupported by data or analysis. Thus, plaintiffs argue, Dr. Blaiss's opinions are: (1) unreliable, and (2) not relevant because they do not fit with the facts of the case.[2] The court rejects both of plaintiffs' arguments.

First, the court finds Dr. Blaiss's opinions sufficiently reliable. Dr. Blaiss explains that he bases his opinions about patients' **[*43]** reluctance to switch from the EpiPen to the Teva generic on more than 30 years of clinical experience treating patients who present a risk of anaphylaxis and prescribing EAI products to those patients. Also, Dr. Blaiss has reviewed the Teva generic product information and determined that it is "not identical to the EpiPen Auto-Injector." *Id.* at 19 (Blaiss Expert Report ¶ 6.0); *see also id.* at 12-13 (Blaiss Expert Report ¶ 5.1.6). Thus, Dr. Blaiss concludes, patients are likely to stick with EpiPen products instead of having to learn how to use another product with different instructions. *Id.* at 19 (Blaiss Expert Report ¶ 6.0).

Plaintiffs characterize Dr. Blaiss's opinions as ones based on anecdotal evidence drawn from his clinical experience. Plaintiffs assert that opinions about patient conversion present economic questions, but, plaintiffs argue, Dr. Blaiss has no training or education in the law, finance, business, marketing, consumer behavior, pharmacy, or economics. Also, plaintiffs criticize Dr. Blaiss's opinions because he never used any economic methodologies to reach his conclusions about the likelihood that patients would switch products. Thus, plaintiffs argue, Dr. Blaiss's opinions are not reliable because **[*44]** he can't ground them in the study of economics. The court disagrees.

Dr. Blaiss has grounded his opinions using his observations and experiences as a medical doctor. Plaintiffs' criticisms about the absence of economic methodologies used to support Dr. Blaiss's opinions go to their weight. But, the court declines to find Dr. Blaiss's opinions inadmissible under *Daubert* at the class certification stage. *See In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *10 (D. Kan. Sept. 26, 2016)* (holding criticisms about reliability of plaintiffs' experts' opinions "go to the weight of those opinions and not . . . their admissibility" and concluding "the experts' methodologies [weren't] so unreliable as to preclude certification"); *see also Bell v. 3M Co., No. 16-cv-02351-RBJ, 2018 U.S. Dist. LEXIS 163610, 2018 WL 4599689, at *3 (D. Colo. Sept. 25, 2018)* (concluding "defendant's challenges go to the weight of the evidence, not whether the Court can consider the opinions in its analysis of the class certification issues"); *Campbell v. Nat'l R.R. Passenger Corp., 311 F. Supp. 3d 281, 304 (D.D.C. 2018)* (holding expert's opinions were sufficiently reliable for court to consider at class certification and challenges to the opinions went to "what weight to afford [the] opinions as part of [the court's] class-certification analysis").

Second, Dr. Blaiss's opinions are relevant to the **[*45]** class certification issues. Specifically, plaintiffs allege that defendants engaged in unlawful conduct that delayed Teva's entry of a generic product into the EAI market. Plaintiffs assert that the delay prevented generic competition, protected the EpiPen monopoly, and allowed defendants to continue raising the EpiPen's prices. Plaintiffs rely on their own expert testimony to demonstrate the classwide impact of the delay. Prof. Meredith Rosenthal opines that almost 95% of EpiPen users would have switched to a Teva generic within one year of its launch. And, using that figure, she provides an opinion about the damages sustained classwide from the delayed entry of a generic competitor. Dr. Blaiss's opinions—based on his own observations and experience—are relevant to the generic-delay theory and, specifically, the question whether

---

[2] Plaintiffs don't challenge Dr. Blaiss's qualifications to provide expert testimony. Dr. Blaiss serves as the Executive Medical Director of the American College of Allergy, Asthma, and Immunology, and he is a Clinical Professor of Pediatrics at the Medical College of Georgia at Augusta University in Augusta, Georgia. Doc. 1585-1 at 2 (Blaiss Expert Report ¶ 1.1). Dr. Blaiss currently practices as an allergist at Good Samaritan Health Center of Gwinnett in Norcross, Georgia. *Id.* He is the former President of the American College of Allergy, Asthma and Immunology, and he has served as an officer or board member of several other allergy-related organizations. *Id.* He is certified in Allergy & Immunology by the American Board of Allergy and Immunology and certified in Pediatrics by the American Board of Pediatrics. *Id.* at 3 (Blaiss Expert Report ¶ 1.2). He has published more than 120 scientific peer-reviewed articles and presented at more than 500 meetings and seminars throughout the world, including presentations about anaphylaxis. *Id.* (Blaiss Expert Report ¶ 1.3). The court finds that Dr. Blaiss is sufficiently qualified to render the opinions he offers in his Expert Report.

plaintiffs sustained damages classwide from that delay. Thus, the court rejects plaintiffs' argument that Dr. Blaiss's opinions don't fit within the facts of the case.

For the above reasons, the court denies the putative class plaintiffs' Motion to Strike the Partial Testimony of Dr. Michael Blaiss.

2. Motion to Strike the Testimony of Professor James Hughes [*46]

The putative class plaintiffs also move to strike the testimony of Prof. James Hughes. Prof. Hughes is a college professor who specializes in "the fields of health economics, industrial organization, law and economics, and labor economics." Doc. 1852-4 at 3 (Hughes Expert Report ¶ 1). In this MDL, Prof. Hughes generally provides expert testimony on two subjects.

First, Prof. Hughes provides an overview of "the economic and commercial context surrounding the distribution of and payment for prescription drugs in the United States." *Id.* at 8 (Hughes Expert Report ¶ 12). More specifically, he explains "the flow of products and payments in the prescription drug space and the roles that various actors, including third-party payors, pharmacy benefit managers ("PBMs"), and consumers, play in the pharmaceutical supply and payment chain." *Id.* at 5 (Hughes Expert Report ¶ 7).

Second, Prof. Hughes opines about the ascertainability of the putative class in this lawsuit. *Id.* (Hughes Expert Report ¶ 8). He concludes that the putative class plaintiffs cannot ascertain with sufficient certainty who qualifies as a member of the putative class. This is so, Prof. Hughes asserts, because plaintiffs rely on data that is insufficient **[*47]** to: (1) identify and include the individuals who fit within the class definition, and (2) identify and exclude individuals who never actually paid for an EpiPen device. *Id.* at 8-9 (Hughes Expert Report ¶¶ 13-14).

The putative class plaintiffs argue that the court should strike Prof. Hughes's testimony on both subjects because, they contend, it is neither relevant nor reliable.[3]

a. Testimony about the Pharmaceutical Industry

The putative class plaintiffs contend that Prof. Hughes's testimony about the pharmaceutical industry is not reliable because it consists of generalized opinions about the industry as a whole—and not a particular drug. Plaintiffs' attack disregards the advisory committee's note to *Rule 702*. It recognizes that:

> [I]t might also be important in some cases for an expert to educate the factfinder about general principles, without ever attempting to apply these principles to the specific facts of the case. . . . For this kind of generalized testimony, *Rule 702* simply requires that: (1) the expert be qualified; (2) the testimony address a subject matter on which the factfinder can be assisted by an expert; (3) the testimony be reliable; and (4) the testimony "fit" the facts of the case.

Fed. R. Evid. 702 advisory committee's **[*48]** note to 2000 amendments; *see also* *United States v. Brinson, 772 F.3d 1314, 1320 (10th Cir. 2014)* (holding that district court did not abuse its discretion by allowing a detective to testify as an expert about the general characteristics of the prostitution trade).

[3] The putative class plaintiffs assert that Prof. Hughes is not a health economist. Doc. 1852 at 6. They contend that his current teaching and recent publications involve subjects other than the pharmaceutical industry. And, they allege, other courts have rejected some of Prof. Hughes's opinions. *Id.* at 8. But plaintiffs never argue that Prof. Hughes isn't qualified to provide expert testimony. Defendants respond that plaintiffs have mischaracterized Prof. Hughes's resume and the way courts have considered his expert opinions in other cases. The court finds that plaintiffs' criticisms of Prof. Hughes's academic work and other expert testimony go to the weight his opinions should receive, and not their admissibility. The court finds that Prof. Hughes, who is a Professor of Economics at Bates College specializing in the fields of health economics, industrial organization, law and economics, and labor economics, is qualified to render the expert opinions he provides.

Consistent with the guidance from the advisory committee's note, defendants assert that they offer Prof. Hughes's expert testimony to provide important and relevant background information to help the court understand the highly technical operation of a complex industry. And, they contend, the court can consider Prof. Hughes's opinion about the industry because *Rule 702* allows the "venerable practice of using expert testimony to educate the factfinder on general principles." *Fed. R. Evid. 702* advisory committee's note to 2000 amendments.

In response, plaintiffs assert that Prof. Hughes's generalized testimony here just doesn't apply to the facts of the EpiPen market. Thus, plaintiffs contend, the court should exclude the testimony because it is unhelpful and irrelevant. For support, plaintiffs cite a portion of Prof. Hughes's deposition transcript where he opines he wouldn't expect to see a positive correlation between the drug price set by the manufacturer (the Wholesale Acquisition Cost, "WAC") and the pharmacy's **[*49]** price for cash paying customers (the Usual and Customary Price, "U&C price") for a given drug. The putative class plaintiffs argue that Prof. Hughes performed no analysis to reach this conclusion. And, they contend, his testimony directly conflicts with the analysis that plaintiffs' expert performed on EpiPen price trends. According to plaintiffs, their expert—Prof. Meredith Rosenthal—analyzed the actual correlation between EpiPen WAC and U&C price and concluded it is "near-perfect." Doc. 1852 at 16-17.

Defendants respond that Prof. Hughes never opines about the relationship between WAC and U&C price in the pharmaceutical industry. Also, he offers no opinions about the correlation between these prices specifically for EpiPen products. Instead, he just offers generalized background information about the industry. The court agrees with defendants. Plaintiffs rely on just this one example—Prof. Hughes's response to a deposition question—to argue that his opinions don't fit the facts of the case. But Prof. Hughes never opines specifically about price correlation. Instead, his expert opinions consist of general background information about the pharmaceutical industry. And *Rule 702* allows this kind **[*50]** of generalized expert testimony.

Next, the putative class plaintiffs argue, Prof. Hughes's opinion that one of the members of the putative class—*i.e.*, Local 282 Welfare Trust Fund ("Local 282")—bears no financial responsibility for drugs dispensed to its insured members is unreliable because the evidence in the case contradicts his conclusion. Prof. Hughes opines that it's the employers paying into Local 282—not Local 282 itself—who pay the costs in full for drugs dispensed to Local 282's insured members. Doc. 1852-4 at 24 (Hughes Expert Report ¶ 48). Plaintiffs argue that Local 282's *Fed. R. Civ. P. 30(b)(6)* witness's testimony establishes that Prof. Hughes is incorrect. This 30(b)(6) witness testified that Local 282 "pays for every prescription drug covered under its plans," and does not "see[k] reimbursement for any part of that cost from any other entity." Doc. 1852-9 at 4 (Bulding Dep. 198:14-22). But the 30(b)(6) witness also testified that when Local 282's costs increase, it "potentially [has] to go back . . . and negotiate higher contribution rates to the welfare trust fund." Doc. 1873-4 at 3 (Bulding Dep. 59:3-25). So, Prof. Hughes opines, it's the employer-sponsors who ultimately bear the financial **[*51]** responsibility for drug costs. But, plaintiffs argue, Prof. Hughes conceded in his deposition that the 30(b)(6) witness's testimony "says nothing about the employer sponsor being obligated to make up a shortfall when it occurs," and he doesn't know whether Local 282's employer sponsors actually are obligated to make up a shortfall if one occurs. Doc. 1852-2 at 104-05 (Hughes Dep. 102:19-103:2).

Based on this competing testimony, plaintiffs argue that the evidence in the case contradicts Prof. Hughes's opinion that Local 282 bears no financial responsibility for drugs dispensed to its insured members. Also, plaintiffs challenge the methodology Prof. Hughes used to reach his conclusions because he supposedly relied on testimony that—plaintiffs contend—doesn't support his conclusions. But, as summarized above, the parties offer competing evidence that either supports or refutes Prof. Hughes's opinion about Local 282's financial responsibility. These arguments go to the weight that the court should give his opinion, not its admissibility.

Also, plaintiffs argue that Prof. Hughes's opinions aren't supported by the evidence because he conceded that asking an employer sponsor to make more contributions **[*52]** to the fund is "similar" to "a commercial insurer who has to go back and increase premiums" when faced with cost increases. *Id. at 102-03* (Hughes Dep. 100:20-101:11). And, plaintiffs argue, courts are clear that antitrust defendants may not avoid liability for overcharges simply because the plaintiff was able to pass any additional costs on to someone else. Doc. 1852 at 17 (citing *In re Lidoderm Antitrust Litig., No. 14-md-02521-WHO, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *22 (N.D. Cal. Feb. 21, 2017)*); *see also* *In re Nexium Antitrust Litig., 777 F.3d 9, 27 (1st Cir. 2015)* ("[D]efendants incorrectly assume that if a class member offsets an overcharge through later savings attributable to the same or related transaction, there is no injury. But antitrust injury occurs the moment the purchaser incurs an overcharge, whether that injury is later offset or not. Here, if a class member is overcharged, there is an injury, even if that class member suffers no damages." (internal citations omitted)).

This argument challenges Prof. Hughes's opinion using a legal argument—that is, plaintiffs contend that Prof. Hughes's opinion does not preclude defendants' liability for antitrust claims under well-settled law. But plaintiffs' legal argument provides no reason to exclude his testimony. This legal argument does not challenge the reliability **[*53]** of Prof. Hughes's reasoning or the methodology used to form his opinions. Thus, the court denies the putative class plaintiffs' motion to exclude Prof. Hughes's opinions on this basis.

Finally, the putative class plaintiffs assert that the court should exclude Prof. Hughes's expert testimony about the pharmaceutical industry because, they contend, he reached his conclusions before he reviewed the relevant literature and without reviewing the entire contents of the sources he relies on to support his opinions. Thus, plaintiffs argue, Prof. Hughes's opinions are the product of an unreliable and unscientific methodology. The court disagrees.

Plaintiffs take issue with part of Prof. Hughes's deposition testimony where he described the information he reviewed to prepare his expert report. Prof. Hughes testified that he "looked at fact depositions from PBM people, from Local 2[8]2" and he wrote part of his report "based largely on [his] 20 years of experience in examining the pharmaceutical market." Doc. 1852-2 at 48 (Hughes Dep. 46:7-21). Then, Prof. Hughes described that "afterwards [he] went back to look for secondary sources that were consistent with what [he] knew about the industry so **[*54]** that [he] could [c]ite an outside source for [his] outside authority for the fact that [he] was presenting in the report." *Id.* Plaintiffs contend that this testimony shows that Prof. Hughes "cherry-picked" evidence to support his opinions—something an expert may not do. Doc. 1852 at 18 n.79 (citing *Fish v. Kobach, 309 F. Supp. 3d 1048, 1102 (D. Kan. 2018))*.

The court doesn't read Prof. Hughes's testimony the way plaintiffs describe it. Instead, Prof. Hughes testified that he drafted the report based on his 20 years of experience in the field, and then he found secondary sources to support his knowledge. *Daubert* requires an expert to base his testimony either "upon professional studies or personal experience." *Kumho Tire, 526 U.S. at 152*. As defendants assert, Prof. Hughes did both here. He relied on his personal knowledge—drawn, he says, from his 20 years of experience studying the pharmaceutical industry—to draft the portions of his report describing that industry. And he verified that knowledge by finding and citing secondary sources that substantiated his assertions. In short, Prof. Hughes didn't "cherry pick evidence in support of his opinion" like the expert did in *Fish v. Kobach. 309 F. Supp. 3d at 1102*. Instead, Prof. Hughes backed up his knowledge by citing other authorities to support it. The court **[*55]** finds no reason to exclude Prof. Hughes's opinions under *Daubert* based on the methodology he used to cite secondary sources when preparing his expert report.

Also, the court doesn't agree with plaintiffs' assertions that Prof. Hughes's opinions are unreliable because he performed an incomplete or cursory review of the materials. Plaintiffs contend that Prof. Hughes testified that he relied on deposition testimony to form his opinions. But Prof. Hughes also conceded that he didn't read the full deposition transcript of any of the named plaintiffs or Local 282's 30(b)(6) witness. Doc. 1852-2 at 48, 104 (Hughes Dep. 46:7-16, 102:9-10). Plaintiffs argue that Prof. Hughes's limited review has caused him to mischaracterize deposition testimony, thus making his opinions unreliable.

Defendants respond that *Daubert* does not require an expert to review every line of every deposition where the case involves hundreds of pages of deposition testimony. Instead, an expert need only review the relevant parts of the record to form a reliable opinion. *See, e.g., Milam v. Ranger Ins. Co., No. CIV-04-1749-HE, 2006 U.S. Dist. LEXIS 97320, 2006 WL 5347771, at *3 n.9 (W.D. Okla. June 13, 2006)* ("Contrary to defendants' suggestion, it is not necessary that an expert witness 'read all the depositions' **[*56]** and turn himself into some sort of 'super juror' in order to offer expert testimony on an issue, assuming other prerequisites to admissibility are met."). And, defendants contend, Prof. Hughes has characterized the deposition testimony properly based on its context.

The court finds that the parties' dispute about Prof. Hughes's characterization of the evidence goes to the weight his opinions deserve, but does not undermine their admissibility. Plaintiffs properly have challenged the way Prof. Hughes interpreted the evidence to argue that his opinions don't preclude the court from certifying a class action in this MDL. *See* Doc. 1837 at 47, 49 (Pls.' Reply Mem. in Further Supp. of Mot. for Class Certification). The court will consider these arguments on class certification, but the court refuses to exclude Prof. Hughes's opinions under *Daubert*.[4]

b. Opinions about Ascertainability

Next, the putative class plaintiffs argue that the court should exclude Prof. Hughes's opinions about ascertainability of the putative class because, plaintiffs contend, they are unreliable. Plaintiffs advance three arguments to support this request.

First, plaintiffs assert, Prof. Hughes's ascertainability opinion **[*57]** is an impermissible legal conclusion. Our Circuit recognizes that "testimony on *ultimate facts* is authorized under [*Federal Rule of Evidence] 704*," but an expert "may not give an opinion on *ultimate issues of law*." *Specht v. Jensen, 853 F.2d 805, 808 (10th Cir. 1988)* (emphasis added). But here, the court concludes that Prof. Hughes is not offering opinions about ultimate issues of law.

As Prof. Hughes explained in both his expert report and his deposition, he provides an expert opinion about whether plaintiffs have proposed a methodology for analyzing data so that one can identify which consumers qualify as members of the class under the class definition. Doc. 1852-4 at 5 (Hughes Expert Report ¶ 8); Doc. 1852-2 at 111 (Hughes Dep. 109:3-14 ("[M]y assignment is very narrow, is that can you tell who is in—is there a methodology to tell who is in the class and who is not in the class.")). Prof. Hughes concludes that "based on the data and other materials [he has] reviewed, the Plaintiffs do not provide data or a methodology for identifying which individuals should be excluded and included in the class." Doc. 1852-4 at 9 (Hughes Expert Report ¶ 16). Prof. Hughes thus bases his opinion on facts he has reviewed in this case. He never opines that plaintiffs fail to satisfy **[*58]** a legal burden to establish ascertainability. To the contrary, Prof. Hughes testified he was not "applying any court's test because it's a legal standard" and "[t]hat would be outside [his] expertise." Doc. 1852-2 at 111 (Hughes Dep. 109:3-14). The court thus concludes that Prof. Hughes isn't offering an impermissible legal opinion.

Second, plaintiffs argue that Prof. Hughes bases his ascertainability opinions on a legal standard that simply doesn't apply in our Circuit. Thus, plaintiffs contend, his opinions aren't relevant to this case. To support this argument, plaintiffs cite Prof. Hughes's deposition transcript. Prof. Hughes testified that ascertainability requires "a methodology upfront that can be used to identify who is in the class and who is not in the class." Doc. 1852-2 at 111-12 (Hughes Dep. 109:14-110:4). And, according to Prof. Hughes, one performs that methodology by "using data that is produced in discovery . . . ." *Id.* at 117-18 (Hughes Dep. 115:22-116:6). So, as Prof. Hughes testified, he reached his conclusions about ascertainability by reviewing the data that insurers and PBMs had produced in discovery. Doc. 1852-2 at 118 (Hughes Dep. 116:11-22).

Plaintiffs assert that Prof. **[*59]** Hughes's testimony shows that he bases his opinions on the Third Circuit's standard used to determine ascertainability, as defined in *Carrera v. Bayer Corp., 727 F.3d 300 (3d Cir. 2013)*. *See id. at 307* (holding the "method of determining whether someone is in the class must be 'administratively feasible'" and a plaintiff cannot "satisfy the ascertainability requirement if individualized fact-finding or mini-trials will be required to prove class membership"). Indeed, defendants argue that plaintiffs bear the burden to demonstrate ascertainability before the court can certify a class. Doc. 1873 at 18. But, plaintiffs respond that defendants are citing a legal standard that doesn't apply in our Circuit.

The Tenth Circuit hasn't imposed a requirement that a putative class must demonstrative an "administratively feasible method" for determining whether putative class members fall within the class definition. And this court has

[4] The court addresses Prof. Hughes's opinions in its Order on the class certification motion at Parts IV.C.1. & IV.D.3.a.

refused to apply "the Third Circuit's stricter standard from *Carrera* that requires an administratively feasible mechanism for identifying class members . . . ." *In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *2-3 (D. Kan. Sept. 26, 2016)* (declining "invitation to apply a standard—one not adopted by the Tenth Circuit—that would preclude certification **[*60]** without a showing that class members may be determined in an administratively feasible manner"). For this reason, plaintiffs ask the court to exclude Prof. Hughes's opinions as irrelevant.

Daubert does not require the court to exclude Prof. Hughes's testimony for this reason. As already discussed, Prof. Hughes isn't offering a legal conclusion. Instead, Prof. Hughes bases his ascertainability opinions on data produced in the case that he used to determine whether one can identify who qualifies as a class member (and who doesn't) under the proposed class definition.[5] Whether the law requires this kind of methodology to prove ascertainability at the class certification stage is a question of law for the court to decide. And the court can determine whether Prof. Hughes's ascertainability opinions are relevant under the applicable legal standard when it decides the class certification motion.[6] The court thus declines to exclude Prof. Hughes's opinions under *Daubert* because it relies on a legal standard from another Circuit.

Finally, plaintiffs contend that Prof. Hughes did not perform an appropriate analysis before reaching his ascertainability opinions. Thus, plaintiffs argue, Prof. Hughes's **[*61]** opinions are unreliable because he bases them on speculation. Plaintiffs criticize Prof. Hughes for failing to review plaintiffs' expert reports. Doc. 1852-2 at 51 (Hughes Dep. 49:11-15). But, Prof. Hughes explained, he didn't read those reports because plaintiffs' experts had not included any opinions about ascertainability in their reports. *Id.* (explaining that he reviewed none of plaintiffs' expert reports because "they were not on the topic [he] was opining on"). Plaintiffs don't refute the proposition that their expert reports had not proposed a methodology for identifying class members when Prof. Hughes submitted his expert report. But, they contend, Prof. Hughes's methodology is flawed because he relied on a consultant to provide the information about plaintiffs' expert reports but he never verified independently that the expert reports included no opinions about ascertainability. Plaintiffs' argument here asks too much. The court declines to find Prof. Hughes's opinions unreliable simply because he relied on information from a consultant—information that indeed was accurate—when he formed his opinions.

Also, plaintiffs argue that Prof. Hughes's opinions are flawed because he **[*62]** didn't use the data produced in the case to determine whether a consumer paid with a fully-funded HSA, a Mylan coupon, or a flat co-pay. But, Prof. Hughes testified that he doesn't believe it's possible to determine whether a consumer paid for the EpiPen in one of those three ways based on the data produced in the case. Doc. 1852-2 at 113-14, 145-46, 150 (Hughes Dep. 111:16-112:15, 143:25-144:6, 148:15-20). Prof. Hughes's report identifies the data he reviewed and analyzed when forming his opinions. Doc. 1852-4 at 8, 30-40 (Hughes Expert Report ¶¶ 13, 63-84). And, the court finds, Prof. Hughes's methodology for using that data is sufficiently reliable for the court to consider his ascertainability opinions on class certification. Plaintiffs' criticisms about how Prof. Hughes interpreted the data—and what he concluded the data shows and does not show—go to the weight of his opinions, not their admissibility. The court declines to exclude Prof. Hughes's opinions from the court's consideration of the class certification motion.

For all these reasons, the court denies the putative class plaintiffs' Motion to Strike the Testimony of Prof. James Hughes.

B. Defendants' Motions to Exclude

The **[*63]** Mylan and Pfizer defendants have filed three motions seeking to exclude expert testimony: (1) Motion to Exclude Expert Opinions of Professor Meredith Rosenthal (Doc. 1602); (2) Motion to Exclude Expert Opinions of

---

[5] Plaintiffs also argue that Prof. Hughes's opinions are not reliable because he limited his analysis just to the data produced in the case but did not consider other data from PBMs that they could provide and Prof. Hughes could use to determine ascertainability. These arguments go to the weight the court should give Prof. Hughes's opinions but not their admissibility.

[6] The court addresses this question in its Order on the class certification motion at Part IV.C.1.

Professor Einer Elhauge (Doc. 1604); and (3) Motion to Exclude Opinions and Proposed Testimony of Andrew K. Torrance (Doc. 1847). The court addresses each motion, in turn, below.

1. Motion to Exclude Expert Opinions of Professor Meredith Rosenthal

Defendants move the court to exclude the expert opinions expressed by the putative class plaintiffs' expert, Prof. Meredith Rosenthal. Prof. Rosenthal opines about the damages purportedly sustained by the putative class plaintiffs. *See generally* Doc. 1500-3 (Rosenthal Expert Report). She has identified certain categories of damages that, she contends, the putative class plaintiffs have sustained on a classwide basis. *Id.* And, she has applied certain methodologies to calculate those purported damages. *Id.*

Defendants argue that the court should exclude some of Prof. Rosenthal's opinions because, they contend, her opinions are unreliable and thus inadmissible under *Daubert*.[7] Defendants assert four arguments supporting this request. *First* ***[*64]*** , defendants contend that Prof. Rosenthal's damages methodology for the 2-Pak theory is an unreliable model for measuring classwide injury. *Second*, defendants contend that Prof. Rosenthal's ascertainability opinion is flawed and improper rebuttal testimony. *Third*, defendants argue that Prof. Rosenthal's probability analysis cannot estimate or identify uninjured class members in a reliable fashion. Defendants also assert that her probability analysis constitutes improper rebuttal testimony. *Finally*, defendants argue that the methodologies Prof. Rosenthal used to determine generic delay and Auvi-Q foreclosure damages rely on Prof. Einer Elhauge's unreliable opinions. So, defendants contend, if the court excludes Prof. Elhauge's opinions under *Daubert*, it also must exclude Prof. Rosenthal's opinions that rely on Prof. Elhauge's opinions. The court addresses all four arguments, below.

a. Methodology for 2-Pak Damages

First, defendants seek a *Daubert* ruling excluding Prof. Rosenthal's opinion about the damages allegedly sustained by the putative class members from purchasing the EpiPen in the 2-Pak. In August 2011, Mylan stopped selling EpiPen products in single packages. **[*65]** And instead, it began offering the EpiPen exclusively in the 2-Pak (*i.e.*, two EpiPen devices in one package). Mylan asserts that it switched to the 2-Pak in response to medical guidance recommending that patients always carry two EAI devices in case the patient requires more than one dose of epinephrine to treat an anaphylactic reaction. The putative class plaintiffs allege that Mylan's switch to the 2-Pak was not clinically necessary, but instead, Mylan implemented the change to force consumers to purchase two EpiPens instead of one. And they have retained Prof. Rosenthal to provide a methodology for calculating the classwide damages sustained because Mylan allegedly forced EpiPen customers to buy at least two EpiPens at a time.

Prof. Rosenthal's report explains that she calculated the "overcharge damages" allegedly sustained from Mylan's switch to the 2-Pak using "the difference between expenditures resulting from the average number of pens per prescription before vs. after the withdrawal." Doc. 1500-3 at 24 (Rosenthal Expert Report ¶ 54). Specifically, Prof.

---

[7] Defendants don't challenge Prof. Rosenthal's qualifications. *See* Doc. 1850 at 10 (explaining that the "focus" of defendants' motion is challenging the methodologies that Prof. Rosenthal used to form her opinions but not her knowledge, training, experience, and qualifications). But, as *Fed. R. Evid. 702* and *Daubert* require, the court finds that Prof. Rosenthal is qualified to render the opinions she has offered at this stage. Prof. Rosenthal is the C. Boyden Gray Professor of Health Economics and Policy at the Harvard T.H. Chan School of Public Health. Doc. 1500-3 at 4 (Rosenthal Expert Report ¶ 3). Her field of research is the economics of the health care industry. *Id.* And, at Harvard, she has taught undergraduate, Masters-level, and Ph.D.-level health economics and health policy courses. *Id.* (Rosenthal Expert Report ¶ 4). Prof. Rosenthal earned an A.B. in International Relations from Brown University and a Ph.D. in Health Policy (Economics Track) from Harvard University. *Id.* (Rosenthal Expert Report ¶ 6). Prof. Rosenthal has testified as an expert witness in several cases involving alleged anticompetitive conduct in the pharmaceutical industry. *Id.* at 4, 52-53 (Rosenthal Expert Report ¶ 4, Attach. A). And, she has published more than 100 peer-reviewed journal articles, essays, and book chapters. *Id.* (Rosenthal Expert Report ¶ 5). Her experience and credentials qualify Prof. Rosenthal to provide expert testimony.

Rosenthal compared "the average pen per prescription from the first two quarters of 2011 with the average pen per prescription **[*66]** in the years following that point in time." *Id.* at 30 (Rosenthal Expert Report ¶ 69). Prof. Rosenthal asserts that—in a but-for world—consumers would have continued to purchase single pens at the same rate they had manifested in the first two quarters of 2011 for the next seven years, but-for Mylan's switch to selling the EpiPen exclusively in the 2-Pak. *Id.* at 30-31, 33 (Rosenthal Expert Report ¶¶ 69-73, 77-78); *see also* Doc. 1497-3 at 84-90, 101-104 (Sealed Rosenthal Expert Report Attach. D.1—D.4, Attach. E.3.a—E.3.c). But, Prof. Rosenthal opines that, in the actual world, Mylan forced an increase in EpiPen consumption by requiring consumers to buy EpiPens in the 2-Pak. *Id.* Thus, Prof. Rosenthal concludes, consumers overpaid for the EpiPen after August 2011 because EpiPen purchasers had to buy two EpiPens instead of just one. *Id.* And then, Prof. Rosenthal calculates the alleged overcharge damages sustained by EpiPen consumers from the forced increase in their consumption of EpiPens after the switch to the 2-Pak. *Id.*

In her Reply Report, Prof. Rosenthal explains that her 2-Pak damages methodology "uses an event study approach." Doc. 1711-1 at 12-13 (Rosenthal Reply Report ¶ 15). Prof. Rosenthal explains how **[*67]** event studies are "widely employed in economic analysis." *Id.* And, she describes how, "[i]n each case, the event study relies on the timing of an event of interest to identify its effects." *Id.* According to Professor Rosenthal, "[t]he power of the event study is the ability to abstract from complex phenomena that are not changing over the short time window of the study—in this case, factors such as patient and physician preferences, comorbidities, and product attributes." *Id.*

Defendants argue that Prof. Rosenthal's analysis here isn't an event study at all. Instead, they say, Prof. Rosenthal has used an unreliable methodology that she invented just to support the putative class plaintiffs' class certification motion. Defendants contend that real event studies are used in securities and finance litigation—not consumer class actions like this one—to show how stock prices have reacted to announcements about economic events. Prof. Rosenthal responds, explaining, "[e]vent studies have also been used in health policy and pharmaceutical economics." Doc. 1711-1 at 13 (Rosenthal Reply Report ¶ 15). And, to support this rebuttal, she cites several peer-reviewed articles from economic publications **[*68]** where, she asserts, event studies were used in pharmaceutical economic analysis. *Id.* (Rosenthal Reply Report ¶ 15 n.18). Defendants respond that each of Prof. Rosenthal's cited articles aren't helpful to her point because each one used event studies to examine the effect on stock prices. Doc. 1884 at 7 n.2.

The court finds that defendants' distinction doesn't preclude the court from considering Prof. Rosenthal's opinion at the class certification stage. The fact that event studies typically are used in securities and finance litigation doesn't undermine the reliability Prof. Rosenthal's methodology. And defendants don't explain why it is improper to use an event study in a consumer class action case like this one. To satisfy *Daubert*'s reliability requirement, the party offering the expert opinion "'need not prove that the expert is undisputably correct or that the expert's theory is "generally accepted" in the scientific community.'" *Bitler v. A.O Smith Corp., 400 F.3d 1227, 1233 (10th Cir. 2005)* (quoting *Mitchell v. Gencorp Inc., 165 F.3d 778, 781 (10th Cir. 1999))*. Instead, the expert testimony's proponent "'must show that the method employed by the expert in reaching the conclusion is scientifically sound and that the opinion is based on facts which sufficiently satisfy *Rule 702*'s reliability requirements.'" **[*69]** *Id.* (quoting *Mitchell, 165 F.3d at 781*). Here, plaintiffs sufficiently have established that Prof. Rosenthal used a reliable method to reach her conclusions about the 2-Pak. At best, defendants' attacks on the appropriateness of an event study in a consumer class action go to the weight of her opinion, not its admissibility.

Defendants also contend that a valid event study must consider the potential effect of competing factors that may influence the outcome. Defendants argue that Prof. Rosenthal failed to consider such other factors here. Specifically, defendants assert that Prof. Rosenthal's model studies the potential effect of just one factor—the switch to the 2-Pak. But, defendants contend, Prof. Rosenthal failed to consider other factors that could influence consumers' purchases, such as widespread medical guidance issued after 2011 recommending that patients purchase two EAI devices. Defendants argue that the medical guidance could have caused consumers to purchase the 2-Pak after August 2011. And thus, consumers would have based their decisions to purchase in packs of two on a reason entirely independent of Mylan's decision to withdraw the single-pack from the market. But, they assert, Prof. Rosenthal **[*70]** didn't account for other factors like this one. As a result, defendants contend, her study fails to demonstrate that the switch to the 2-Pak was the sole reason why the putative class members bought more EpiPens than they otherwise would have. According to defendants, this omission makes her analysis unreliable. *See* *Bricklayers & Trowel Trades Int'l Pension Fund v. Credit Suisse Sec. (USA) LLC, 752 F.3d 82, 95-97 (1st Cir. 2014)* (affirming district court's decision to exclude expert opinion in form of event study that didn't appropriately account for other confounding factors that may have affected company's stock price); *see also* *Sergeants Benevolent Ass'n Health & Welfare Fund v. Sanofi-Aventis U.S. LLP, 806 F.3d 71, 95 (2d Cir. 2015)* (affirming district court's denial of a class certification motion and holding Dr. Rosenthal's regression analysis didn't support plaintiffs' RICO causation theory because she "conceded that she had not been asked by Plaintiffs' counsel to perform the kind of regression analysis that might have isolated the relative causal effect of the numerous variables [other than defendant's alleged withholding of safety information] bearing on the decline in [an antibiotic drug's] sales").

But, Prof. Rosenthal explains why she didn't need to consider whether medical guidance recommending patients carry two EAI devices would have influenced the outcome of her study. She opines that **[*71]** the medical guidance "did not change coincident with the removal of the single injector packaging." Doc. 1711-1 at 13 (Rosenthal Reply Report ¶ 16). Instead, she explains, "[t]he effects of clinical recommendations are constant before and after the event [she] stud[ies] and so do not need to be separately accounted for." *Id.* As support, she cites deposition testimony by the putative class plaintiffs' medical expert, Dr. Jay Portney, who testified that the medical guidance recommending two EAI devices wasn't a landmark document because it only published what allergists already knew. *Id.* (Rosenthal Reply Report ¶ 16 n.20). Also, Prof. Rosenthal explains, her event study "assess[es] the impact of the withdrawal of the single injector EpiPen using a narrow time window (two quarters pre-withdrawal) to avoid picking up the effects of other influences," and it "strongly support[s] the casual inference" that withdrawing "the single injector EpiPen forced the Class to purchase more pens than it would have [purchased] otherwise." *Id.* at 13-14 (Rosenthal Reply Report ¶ 17).

Plaintiffs argue that the cases defendants cite to support excluding Prof. Rosenthal's opinion involve a failure to consider competing **[*72]** factors that could have influenced the study's outcome. In contrast, here, plaintiffs contend, Prof. Rosenthal didn't have to consider other factors because any such factors—like the prevalence of medical guidance—remained constant before, during, and after Mylan switched to selling the EpiPen exclusively in the 2-Pak.

Defendants argue that the only support for Prof. Rosenthal's conclusion that the other factors remained constant is her own subjective analysis. Defendants criticize Prof. Rosenthal's reliance on plaintiffs' medical expert's testimony. Instead, defendants argue, Prof. Rosenthal should have performed an empirical analysis to determine whether the medical guidance, in fact, influenced customers' purchasing decisions. These arguments go to the weight of Prof. Rosenthal's opinion, but they don't preclude its admissibility. Certainly, "[v]igorous cross-examination" and "presentation of contrary evidence" are "the traditional and appropriate means of attacking shaky but admissible evidence." *Daubert, 509 U.S. at 596* (citation omitted). And defendants appropriately can challenge (and have challenged) Prof. Rosenthal's opinions on class certification in this fashion. *See* Doc. 1636 at 41-45 (Mylan Defs.' **[*73]** Opp'n to Class Pls.' Mot. for Class Certification).[8] But, exercising its discretion, the court concludes that defendants' arguments don't warrant a *Daubert* order excluding Prof. Rosenthal's opinions about the alleged damages the putative class members sustained from Mylan's switch to the 2-Pak.

b. Ascertainability Opinion

Second, defendants ask the court to exclude Prof. Rosenthal's opinion about ascertainability of the class for two reasons: (1) her ascertainability opinion is unreliable because she can't identify the customers who actually qualify as class members under the class definition, and (2) her ascertainability opinion is improper rebuttal testimony.

---

[8] The court addresses defendants' challenges to Professor Rosenthal's damages opinion in its Order on the class certification motion at Part IV.E.2.a.

The court addresses the second argument first. This argument contends that the putative class plaintiffs bear the burden to prove that their proposed class is ascertainable. Thus, defendants contend, plaintiffs should have offered any expert opinion about ascertainability in their experts' opening reports. Prof. Rosenthal didn't do so. Instead, Prof. Rosenthal first offered her ascertainability opinion in her Reply Report. Thus, defendants argue, the court should exclude this opinion as improper rebuttal testimony.

Plaintiffs respond **[*74]** that Prof. Rosenthal's Reply provides proper rebuttal testimony in response to criticisms levied by expert opinions that defendants presented in their Opposition to the class certification motion. Specifically, defendants' experts opine that large numbers of proposed class members are uninjured because they never paid for their EpiPens. And, defendants argue, plaintiffs cannot ascertain from the data produced during discovery who actually paid for their EpiPens, and thus who qualifies as a member of the proposed class. Defendants' expert, Prof. James Hughes, asserts that he has reviewed the data and documents produced in discovery and he has concluded they are "insufficient to . . . exclude individuals from the class who did not actually pay for an EpiPen device." Doc. 1852-4 at 9 (Hughes Expert Report ¶ 14). Plaintiffs argue that Prof. Rosenthal's Reply Report merely responds to Prof. Hughes's criticisms about her analysis. *See* Doc. 1711-1 at 3 (Rosenthal Reply Report) (explaining that she is "respond[ing] to the expert report[ ] of . . . Dr. Hughes as [it] pertain[s] to [her] affirmative report on class certification submitted in this matter," and specifically, she "disagree[s] with **[*75]** Dr. Hughes and provide[s] documentation that contradicts his conclusions regarding the so-called 'ascertainability' of Class members"). And thus, plaintiffs contend, Prof. Rosenthal's ascertainability opinion is proper rebuttal testimony.

Our Circuit has explained that "[r]ebuttal evidence is evidence which attempts to 'disprove or contradict' the evidence to which it is contrasted." *Tanberg v. Sholtis, 401 F.3d 1151, 1166 (10th Cir. 2005)* (quoting *Black's Law Dictionary* 579 (7th ed. 1999)). The Federal Rules specifically limit rebuttal expert testimony to evidence that is "intended solely to contradict or rebut evidence *on the same subject matter* identified by another party" in its expert disclosures. *Fed. R. Civ. P. 26(a)(2)(D)(ii)* (emphasis added). A court properly may admit rebuttal evidence on a topic when "a party opens the door to [that] topic." *Tanberg, 401 F.3d at 1166*. But generally, courts will exclude "use of a rebuttal expert to introduce evidence more properly a part of a party's case-in-chief, especially if the alleged rebuttal expert is used to introduce new legal theories." *Foster v. USIC Locating Servs., LLC, No. 16-2174-CM, 2018 U.S. Dist. LEXIS 139648, 2018 WL 4003354, at *2 (D. Kan. Aug. 17, 2018)* (citations and internal quotation marks omitted); *see also* *Koch v. Koch Indus., 203 F.3d 1202, 1224 (10th Cir. 2000)* ("When plaintiffs, however, seek to rebut defense theories which they knew about or reasonably could have anticipated, the district court is within **[*76]** its discretion in disallowing rebuttal testimony."). In short, the decision to admit or exclude rebuttal testimony is within the trial court's discretion. *Tanberg, 401 F.3d at 1166*.

Here, plaintiffs assert that they couldn't have anticipated Prof. Hughes's criticisms about identifying the individuals who qualify as class members because, they contend, Prof. Hughes relies on an "administrative feasibility" standard for identifying class members and that standard doesn't apply in our Circuit. As with the discussion about the putative class plaintiffs' motion to exclude the opinions of Prof. James Hughes, the parties sharply disagree about the legal requirements for showing ascertainability at class certification. With this motion, seeking to exclude Prof. Rosenthal's opinions, defendants cite a Pennsylvania case where the court defined the "ascertainability requirement" as "show[ing] that there is a reliable, administratively feasible mechanism that can identify which potential class members fall within the class definition." *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 137 (E.D. Pa. 2015)* (citing *Byrd v. Aaron's Inc., 784 F.3d 154, 163 (3d Cir. 2015))*. In contrast, plaintiffs argue the Tenth Circuit has no "administrative feasibility" requirement to prove ascertainability on class certification. And, they argue, our court explicitly **[*77]** has rejected such a requirement. *See* *In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *2-3 (D. Kan. Sept. 26, 2016)* (declining an "invitation to apply a standard—one not adopted by the Tenth Circuit—that would preclude certification without a showing that class members may be determined in an administratively feasible manner"). Instead, plaintiffs assert, this court has adopted an ascertainability standard that requires that "the class definition must not be too vague, the class must not be defined by subjective criteria, and the class must not be defined in terms of success on the merits." *Id. 2016 U.S. Dist. LEXIS 132549, [WL] at *2* (citing *Mullins v. Direct Digital, LLC, 795 F.3d 654, 659-60 (7th Cir. 2015))*.

On this *Daubert* motion, the court declines to decide what standard to apply when determining whether the putative class presently is ascertainable. That is a question the court will decide in its class certification analysis.[9] Here, the court exercises its discretion and refuses to exclude Prof. Rosenthal's opinion as improper rebuttal testimony on this *Daubert* motion. Prof. Rosenthal's Reply Report explicitly recites that she offers her rebuttal opinions in response to Prof. Hughes's criticisms about her analysis. *See* Doc. 1711-1 at 3. The Reply Report cites specific portions of Prof. Hughes's report and explains **[*78]** why Prof. Rosenthal disagrees with his analysis of the ascertainability question. *See id.* at 27-28 (Rosenthal Reply Report ¶¶ 44, 46-49). The court finds that Prof. Rosenthal's ascertainability opinion is proper rebuttal testimony.

Now, the court turns back to defendants' first argument supporting their request that the court exclude Prof. Rosenthal's opinion about the ascertainability of the class. Defendants contend that Prof. Rosenthal doesn't have a reliable methodology for ascertaining three types of EpiPen consumers to determine whether these consumers qualify as members of the class under the class definition. The three types of consumers are: (1) consumers who paid nothing, (2) consumers who had flat co-pays for the EpiPen, and (3) consumers who paid cash for their EpiPen products.[10]

Defendants assert that the law in our Circuit requires the putative class plaintiffs to define the class using a definition that is ""precise, objective, and presently ascertainable."" *See* *In re Syngenta AG MIR 162 Corn Litig., 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *1* (quoting *In re Urethane Antitrust Litig., 237 F.R.D. 440, 444 (D. Kan. 2006)* (quoting *Manual for Complex Litig*. § 221.222, at 270 (4th ed. 2005))); *see also* *Shook v. El Paso Cty., 386 F.3d 963, 972 (10th Cir. 2004)* (recognizing that "the lack of identifiability is a factor that may defeat *Rule 23(b)(3)* class **[*79]** certification"). And, defendants contend, Prof. Rosenthal hasn't used a reliable methodology to ascertain who qualifies (and does not qualify) as a member of the class under the Tenth Circuit's standard for any of the three categories of consumers. The court addresses each argument for each type of consumer, below.

i. Consumers Who Paid Nothing

In the first category of consumers, defendants explain that Mylan issued coupons to consumers who, in many instances, used the coupons to pay nothing for their EpiPens. And, if the consumer paid nothing to purchase an EpiPen, that consumer doesn't qualify as a member of the class under the class definition.

Prof. Rosenthal offers a methodology for identifying this first category of consumers so that they aren't included in the class. Doc. 1711-1 at 21-22 (Rosenthal Reply Report ¶ 33). She asserts, "[t]here are individual identifiers, provider identifiers, and dates in the Mylan coupon data that will permit matching with paid pharmacy claims." *Id.* To illustrate, Prof. Rosenthal used CVS/Caremark pharmacy claims data to "cross reference with the Mylan coupon data and identify the prescriptions where copay coupons were used." *Id.* By "[m]atching on **[*80]** exact combinations of fill date, physician identification number, [National Drug Code] and/or Rx number," Prof. Rosenthal was able to "link the copay coupon information with the CVS/Caremark pharmacy claims . . . ." *Id.* Prof. Rosenthal opines that "[m]any examples like this can be observed in the merged data," and thus, "data exists such that—at the appropriate time—we can link coupons with pharmacy records and determine their effect on whether an individual Class member was injured." *Id.*

Defendants say Prof. Rosenthal's methodology is wrong. For support, they rely on their own expert's analysis. Defendants' expert, Prof. Hughes, asserts that he tried to match all the transactions listed in the produced PBM claims data with Mylan's coupon data using Prof. Rosenthal's proposed methodology. Doc. 1850-1 at 10-11 (Hughes Decl. ¶ 20). And, according to Prof. Hughes, he was able to match fewer than 16% of the transactions

---

[9] The court addresses this question in its Order on the class certification motion at Part IV.C.1.

[10] As discussed below, only the third category of consumers qualify for class membership. Consumers in the first and second categories would not qualify if they never paid for their EpiPens.

listed in the Mylan coupon data with the PBM claims data. *Id.* Thus, defendants assert, Prof. Rosenthal's methodology fails to account for a large number of consumers who paid nothing for the EpiPen using a coupon.

Defendants' criticisms about Prof. Rosenthal's methodology **[*81]** go to the weight of her opinion but not its admissibility. With his analysis, Prof. Hughes recognizes that the methodology allows for some identification of coupon users—even if less than 16%. And, plaintiffs assert, discovery is continuing. So, to the extent discovery produces additional identifying information, Prof. Rosenthal may be able to use her methodology to identify more coupon users. As our Circuit has recognized, *Daubert* doesn't require the court to decide whether Prof. Rosenthal's opinions are "undisputably correct." *Etherton v. Owners Ins. Co., 829 F.3d 1209, 1217 (10th Cir. 2016)* (citation and internal quotation marks omitted). Instead, the court must determine whether "the method employed by the expert in reaching the conclusion is scientifically sound and that the opinion is based on facts which sufficiently satisfy *Rule 702*'s reliability requirements." *Id. at 1217-18* (citations and internal quotation marks omitted). So, the court's *Daubert* inquiry should "'focus . . . solely on [the expert's] principles and methodology, not on the conclusions that they generate.'" *Id. at 1217* (quoting *Daubert, 509 U.S. at 595*). On that issue, the court finds that Prof. Rosenthal's methodology for identifying EpiPen coupon users sufficiently is reliable that the court properly may consider her opinions **[*82]** on class certification.

ii. Consumers Who Had Flat Co-Pays

For the second type of consumers—*i.e.*, ones who had flat co-pays—defendants assert that Prof. Rosenthal's methodology cannot determine reliably who falls into this category. Consumers who paid a single, flat co-pay for their EpiPens fall outside the class definition because they would have made the same copayment whether they purchased a branded EpiPen or a generic product. Thus, defendants contend, plaintiffs must show a reliable method for identifying these consumers and excluding them from the class.

Prof. Rosenthal opines that she can identify co-pay consumers reliably using data maintained by PBMs. She explains that, in two other pharmaceutical cases, "[d]eclarations submitted by PBMs . . . specifically identified and confirmed that data are available through the PBMs sufficient not only to identify class members but also to determine whether or not they had a fixed copay or other coinsurance arrangements." Doc. 1711-1 at 15-16 (Rosenthal Reply Report ¶ 20). Prof. Rosenthal suggests that "[t]hese data must be available in order to allow insurers and their PBMs the ability to process prescription claims at the retail level." **[*83]** *Id.* And, "[t]hese PBM declarations confirm the obvious that these data can be provided if requested." *Id.* Specifically, Prof. Rosenthal cites one PBM declaration that identifies the types of data "generally maintained in an industry standard format created by the National Council for Prescription Drug Programs [("NCPDP")] . . . ." *Id.* Prof. Rosenthal also opines that the PBM declarations from these other cases "are entirely consistent with the data produced by multiple PBMs in this matter." *Id.* at 16 (Rosenthal Reply Report ¶ 21).

Defendants contend, in response, that the *Wellbutrin* court rejected a similar opinion by Prof. Rosenthal. *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 150-51 (E.D. Pa. 2015)*. In that case, the court found that the class "ha[d] not carried its burden of affirmatively demonstrating by a preponderance of the evidence that there is a reliable, administratively feasible method of ascertaining the class" because its "evidence in support of ascertainability consist[ed] mainly of conclusory statements by its experts that records exist that could be used to ascertain the class and the existence of NCPDP standards." *Id. at 151* (citations and internal quotation marks omitted). *Wellbutrin* held that "[t]his evidence is not enough to show by a preponderance **[*84]** of the evidence that the class is ascertainable." *Id.* Importantly, the court reached this decision when it decided whether the *Wellbutrin* plaintiffs had shouldered their burden to establish that class certification was warranted under *Fed. R. Civ. P. 23(b)(3)*.[11] *Id.* But the court didn't exclude Prof. Rosenthal's opinions as unreliable under *Daubert*.[12]

---

[11] The court recognizes that the *Wellbutrin* court also applied the Third Circuit's "administrative feasibility" standard for determining the class's ascertainability. *308 F.R.D. at 151*. Plaintiffs assert that this is not the appropriate standard for determining ascertainability under our court's governing law. As already discussed, this Order doesn't decide that issue.

In short, *Wellbutrin's* conclusion doesn't apply here because plaintiffs have made a stronger showing than plaintiffs did there. Prof. Rosenthal's report provides a direct, specific, and principled explanation how she can avoid the *Wellbutrin* problem. Prof. Rosenthal's opinion here doesn't rely on conclusory statements. Instead, she has offered a reliable method for identifying these consumers using PBM data. Defendants' challenges about whether the PBM data actually is available in this case—as opposed to other cases—go to the weight of her opinions. The court declines to exclude her opinions for this reason.

iii. Consumers Who Paid Cash

Finally, defendants assert that Prof. Rosenthal offers no reliable methodology for identifying the EpiPen consumers who paid cash for their EpiPen purchases. In her Reply Report, Prof. Rosenthal responds **[*85]** to the concerns described in Prof. Hughes's Expert Report about the availability of data for cash payers. Doc. 1711-1 at 29 (Rosenthal Reply Report ¶ 48). Prof. Rosenthal identifies two means to gather information about cash-paying EpiPen consumers. "First, the individuals will have records on the transactions." *Id.* "Second, pharmacy records will contain information on these transactions . . . ." *Id.* She points out that "Plaintiffs have in fact produced a large sample of pharmacy records for cash payers in the form of the IQVIA Xponent data." *Id.* But, she concedes that the IQVIA Xponent data "used in [her] report do not have patient identifiers (IQVIA protects these for good reason)." *Id.* Nevertheless, Prof. Rosenthal opines that "such identifiers do in fact exist at the dispensing pharmacies and presumably the Court could compel their production if it were deemed necessary." *Id.*

Again, defendants cite the *Wellbutrin* case as support for excluding Prof. Rosenthal's methodology for identifying consumers who paid cash for EpiPens. Defendants assert that the *Wellbutrin* court was "not persuaded by [Prof. Rosenthal's] conclusory statements" that "records at the retail pharmacy and PBM level **[*86]** . . . can be used to identify class members" when she had not "examined or analyzed these pharmaceutical records." *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. at 150*. But, as already discussed, the *Wellbutrin* court considered Prof. Rosenthal's opinions in the context of determining whether class certification was appropriate. *Id. at 150-51*. It didn't exclude her opinion about identifying consumers with pharmaceutical records under *Daubert* as unreliable. Instead, it found that her opinions didn't support class certification under *Rule 23(b)(3)*.

The court is persuaded that defendants have come forward with legitimate and even substantiated questions about Prof. Rosenthal's opinions for cash payers. But the governing law doesn't use that threshold as the standard for excluding an expert's opinion. Instead, the standard inquires whether Prof. Rosenthal has marshaled "sufficient facts to validate [her opinions] in the eyes of the law . . . ." *Pioneer Ctrs., 858 F.3d at 1342* (citation and internal quotation marks omitted). Mindful that "rejection of expert testimony is the exception rather than the rule," *Fed. R. Evid. 702* advisory committee's notes to 2000 amendments, the court exercises its discretion and declines to exclude Prof. Rosenthal's methodology for identifying consumers who paid cash for EpiPens. On **[*87]** balance, Prof. Rosenthal offers a reasonably reliable method for identifying these consumers using either their own or pharmacy records. In the end, merits discovery may substantiate Prof. Hughes's view. The task of gathering pharmacy records may prove overwhelming because it requires collecting data from about 65,000 pharmacies, more than 23,000 of which are independent. Doc. 1850 at 16. Also, defendants question whether class members will have records showing both that they purchased an EpiPen and that they paid more than nothing for their purchase (meaning that insurance, coupons, or patient assistance didn't cover the entire price of the products). Doc. 1884 at 11. These arguments test the weight of Prof. Rosenthal's opinion, but they don't preclude its admission from the court's consideration of the class certification motion.[13]

The court declines to exclude Prof. Rosenthal's ascertainability opinion under *Daubert*.[14]

---

[12] The *Wellbutrin* court did exclude another of Prof. Rosenthal's opinions under *Daubert*—but the excluded opinion is not relevant here. *308 F.R.D. at 146-47*.

[13] The court addresses the weight to give Prof. Rosenthal's opinion about the ascertainability of the putative class members in the Order on the class certification motion at Part IV.C.1.

c. Probability Opinion

Next, defendants argue that the court should exclude Prof. Rosenthal's probability opinion. This opinion "estimate[s] the percentage" of putative class members "who might not have suffered an overcharge from the particular misconduct alleged **[*88]** by Plaintiffs." Doc. 1711-1 at 29-30 (Rosenthal Reply Report ¶ 50). Defendants give four reasons for excluding Prof. Rosenthal's probability opinion: (1) the opinion depends on unreasonable assumptions that the record doesn't support; (2) the opinion lacks support in the relevant field and case law; (3) the opinion is incapable of measuring classwide injury; and (4) it is improper rebuttal testimony. The court addresses each of defendants' arguments, in turn, below.

i. Unsupported Assumptions

Defendants argue the court must exclude Prof. Rosenthal's probability opinion as unreliable because it is not "based upon conclusions from established evidentiary facts." *United States v. Rice, 52 F.3d 843, 847 (10th Cir. 1995)*; *see also* *Cochrane v. Schneider Nat'l Carriers, Inc., 980 F. Supp. 374, 378 (D. Kan. 1997)* (excluding expert opinion that was "based on unjustified assumptions" and "therefore will not assist the trier of fact"). To support this argument, defendants direct the court to three assumptions that Prof. Rosenthal makes in her analysis.

First, defendants assert that Prof. Rosenthal wrongly assumes the same probability for the rate that each third party payor ("TPP") will reimburse the purchase of a branded EpiPen or 2-Pak. *See* Doc. 1711-1 at 31-33 (Rosenthal Reply Report ¶¶ 54, 56). Defendants contend her assumption **[*89]** is not supported by the record. For support, they cite portions of Mylan's expert's report that identify differences among TPPs that, the competing expert contends, Prof. Rosenthal failed to consider when forming her opinions. Doc. 1850 at 19. These differences include variations in formularies, benefit design, negotiating power, and rebate payment. *Id.*

Second, defendants contend that Prof. Rosenthal uses an arbitrary and unfounded estimate of 95% to calculate the rate consumers would have switched from the EpiPen to a generic EAI device. Doc. 1850 at 20; *see also* Doc. 1711-1 at 30-31 (Rosenthal Reply Report ¶ 53, n.59). Again relying on Mylan's expert's opinion, defendants argue Prof. Rosenthal's generic conversion assumption is just wrong. Doc. 1850 at 20. They assert her assumption is flawed because she didn't consider other evidence of lower generic switching rates, including evidence of the Teva generic's performance and forecasts. *Id.* Defendants also refute Prof. Rosenthal's assertion that her methodology "can accommodate a range of yardsticks." Doc. 1711-1 at 19 (Rosenthal Reply Report ¶ 27). They contend that any reduction in her generic conversion assumption still doesn't account **[*90]** for the probability that the consumers are brand loyalists who would have continued purchasing the EpiPen even if a generic EAI was available. Doc. 1850 at 21.

Third, defendants assert that Prof. Rosenthal's 2-Pak probability calculations are unreliable. Using a Mylan slide deck from May 2010, Prof. Rosenthal estimates that 65% of patients would have preferred to purchase a 2-Pak instead of a single EpiPen. Doc. 1711-1 at 32-33 (Rosenthal Reply Report ¶ 55, n.61). Defendants argue that her assumption is flawed because it ignores evidence showing that, after May 2010, doctors were recommending and patients were preferring to purchase EpiPens in packages of two.

---

[14] Defendants ask that, if the court declines to exclude Prof. Rosenthal's ascertainability opinion as unreliable under *Rule 702* or improper rebuttal testimony, the court give defendants an opportunity to depose Prof. Rosenthal about the ascertainability opinion in her Reply Report, introduce additional expert rebuttal testimony, and submit supplemental briefing in opposition to plaintiffs' Motion for Class Certification. The court denies this request. Prof. Rosenthal submitted her Reply Report on April 26, 2019. Defendants had plenty of time to review and respond to this Reply Report before the court held its June 11-12, 2019 hearing on the Motion for Class Certification. Also, Prof. Hughes has had the chance to review and comment on Prof. Rosenthal's Reply Report. *See, e.g.*, Doc. 1850-1 (May 21, 2019 Decl. of Dr. James W. Hughes in Supp. of Defs.' Mot. to Exclude Expert Opinions of Professor Meredith Rosenthal). For all these reasons, the court denies defendants' request.

All of defendants' criticisms about the assumptions Prof. Rosenthal uses to support her probability opinion go to the weight of her opinion testimony, but not its admissibility. Prof. Rosenthal's Reply Report adequately explains why she made the assumptions her probability analysis made and why, she contends, those assumptions are proper under the facts of the case. Doc. 1711-1 at 30-33 (Rosenthal Reply Report ¶¶ 53-56). And, her Reply Report rebuts the criticisms that Mylan's expert makes about those assumptions. *Id.* at 19-20, 24-25 (Rosenthal Reply **[*91]** Report ¶¶ 27-29, 37-39). Defendants' challenges to those assumptions don't show that Prof. Rosenthal's probability opinion is so unreliable that the court must exclude it. *See, e.g., In re Lidoderm Antitrust Litig., No. 14-md-02521-WHO, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *28 (N.D. Cal. Feb. 21, 2017)* (denying motion to exclude expert opinion because it was based on "reasonable assumptions and evidence, and supported by reasoned principles as well as academic scholarship" and while "some of those assumptions [were] disputed," those disputes did not "make [the expert's] reliance on them improper").

Instead, defendants' challenges more properly are presented through the "presentation of contrary evidence" on class certification because these are "the traditional and appropriate means of attacking shaky but admissible evidence." *Daubert, 509 U.S. at 596* (citation omitted). And, indeed, defendants have asserted these challenges in their Opposition to the class certification motion. *See, e.g.*, Doc. 1636 at 41-43 (criticizing Prof. Rosenthal's failure to account for consumers who would have purchased a 2-Pak even if a single pack was available), 53-55 (challenging Prof. Rosenthal's assumption that 95% of consumers would have switched to a generic), 60-61 (explaining how brand loyalty **[*92]** and rebates may result in no injury to a consumer).[15] The court declines to exclude Prof. Rosenthal's probability opinion based on the assumptions she made to support it.

ii. Unsupported in the Field or Case Law

Next, defendants assert that Prof. Rosenthal's probability opinion is unreliable because her methodology has no support in the field or the case law. Defendants concede that Prof. Rosenthal's Reply Report opines that "health economists routinely use probabilities to estimate the distribution of harms and benefits to populations from a range of policy and clinical interventions." Doc. 1711-1 at 30 (Rosenthal Reply Report ¶ 51). And she cites two articles as support for this assertion. *Id.* (Rosenthal Reply Report ¶ 51, n.57). Relying on an opinion from Mylan's expert, defendants argue that these two articles don't use the same methodology that Prof. Rosenthal has used. Doc. 1850 at 22. And thus, they contend, plaintiffs can't show that her methodology has support in the field. Plaintiffs respond that Mylan's expert merely tries to distinguish Prof. Rosenthal's methodology from the ones discussed in the two cited articles. But, they contend, Mylan's expert doesn't refute Prof. Rosenthal's **[*93]** basic premise that health economists routinely use probabilities to analyze the distribution of harms and benefits to a population.

Also, defendants assert that no court ever has accepted Prof. Rosenthal's probability analysis. For support, defendants assert that "plaintiffs in one recent case submitted Prof. Rosenthal's probability analysis as the leading piece of evidence that they argued warranted consideration of the First Circuit's denial of class certification. But the district court rejected the analysis and plaintiffs' motion." Doc. 1850 at 23 n.8 (citing Electronic Order, *In re Asacol Antitrust Litig.*, No. 15-cv-12730-DJC (D. Mass. Apr. 11, 2019), ECF No. 772). As plaintiffs correctly point out, the Massachusetts order defendants cite is a three-paragraph text order denying a motion for leave to file a renewed motion for class certification because it "would be futile" and "would involve re-litigation of matters previously decided." Electronic Order, *In re Asacol Antitrust Litig.*, No. 15-cv-12730-DJC (D. Mass. Apr. 11, 2019), ECF No. 772. The text order says nothing about Prof. Rosenthal or that the court is rejecting her analysis. *Id.*

In contrast, plaintiffs assert that the **[*94]** First Circuit considered a probability analysis "similar" to the one offered here by Prof. Rosenthal, along with other summary judgment evidence, and concluded that a TPP plaintiff had submitted sufficient causation proof to survive summary judgment. Doc. 1860 at 23 (citing *In re Celexa & Lexapro Mktg. & Sales Practices Litig., 915 F.3d 1, 13-14 (1st Cir. 2019)* (holding district court erred by granting defendant's summary judgment motion)). Specifically, Prof. Rosenthal had opined in *Celexa & Lexapro* that a defendant pharmaceutical company's "spending on promotions in general correlated positively with sales." *In re Celexa &*

[15] The court addresses Prof. Rosenthal's probability opinions in its Order on the class certification motion at Part IV.E.2.b.ii.

Lexapro Mktg. & Sales Practices Litig., 915 F.3d at 12. She concluded that the defendant's off-label promotions had produced 76% of Celexa prescriptions and 54% of Lexapro prescriptions. *Id. at 13*. And "Dr. Rosenthal estimated that if [the TPP plaintiff] paid for as few as five independent prescriptions, there would be a 98% chance that at least one was the result of off-label marketing." *Id.* The First Circuit noted that the record showed the TPP plaintiff likely paid for more than five prescriptions, and "[s]o the odds that [the TPP plaintiff] was not harmed if the drugs were, indeed, ineffective was likely infinitesimal (assuming the prescriptions were independent of one another)." *Id.* Thus, the First Circuit concluded, the **[*95]** TPP plaintiff "could establish causation and injury at least for any TPP who paid for more than a handful of different patients' prescriptions." *Id. at 14*.

The First Circuit also recognized that "there is room for reasonable disagreement on the merits of Dr. Rosenthal['s]" assumptions, but it recognized that a jury could accept them "as reasonable." *Id. at 13*. And while the court noted that the district court had not yet conducted a *Daubert* analysis of the experts' opinions, *id.*, the Circuit nevertheless didn't find any flaws with Dr. Rosenthal's analysis. To the contrary, the court considered her opinion when reversing the summary judgment order. *Id. at 13-14*.

After examining the parties' competing arguments, the court is unpersuaded by defendants' argument that Prof. Rosenthal's methodology lacks sufficient support in the field to require excluding her opinions on class certification. Defendants' disagreements about her methodology go to the weight of her opinion, which the court can consider when deciding the class certification motion.[16]

iii. Incapable of Measuring Classwide Injury

Defendants next argue that Prof. Rosenthal's probability opinion is unreliable because it is not capable of measuring classwide injury. **[*96]** Defendants assert that plaintiffs have the burden to establish classwide injury which, they contend, requires a showing of actual injury to all or substantially all class members. Instead, defendants assert, Prof. Rosenthal's probability opinion simply estimates the percentage of putative class members "who *might not* have suffered an overcharge from the particular misconduct alleged by Plaintiffs." Doc. 1711-1 at 29-30 (Rosenthal Reply Report ¶ 50) (emphasis added). Thus, defendants contend, Prof. Rosenthal's opinion is not reliable because it doesn't establish the actual percentage of consumers who, in fact, sustained an injury.

Plaintiffs respond that they aren't required to establish the percentage of consumers who actually sustained injuries to prevail on class certification. Instead, they contend, class certification just requires that plaintiffs show "there is no basis to conclude that a 'great number' of members could not have been harmed as alleged by plaintiffs." *In re Syngenta AG MIR 162 Corn Litig., 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *4* (quoting *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 824 (7th Cir. 2012))*. And, plaintiffs argue, Prof. Rosenthal's analysis sufficiently demonstrates that few consumers could not have sustained harm from defendants' **[*97]** alleged misconduct. Doc. 1711-1 at 29-33 (Rosenthal Reply Report ¶¶ 50-56). In their Reply, defendants argue that this isn't the correct standard for determining predominance on a *Rule 23* motion. And, even if it were, Prof. Rosenthal's opinion doesn't satisfy that standard.

These arguments go to the merits of the class certification motion. The court will decide when ruling the class certification motion whether plaintiffs have shouldered their burden to establish classwide injury sufficient to certify a class under *Rule 23*. And it will consider whether Prof. Rosenthal's expert opinions constitute sufficient evidence to support class certification under the governing case law.[17] But defendants' arguments here don't establish that Prof. Rosenthal's opinion about the percentage of uninjured class members is so unreliable that the court must exclude it under *Daubert*.

---

[16] The court addresses Prof. Rosenthal's probability opinions in its Order on the class certification motion at Part IV.E.2.b.ii.

[17] As previously mentioned, the court addresses Prof. Rosenthal's probability opinions in its Order on the class certification motion at Part IV.E.2.b.ii.

Also, defendants argue, Prof. Rosenthal's model cannot assess which class members, if any, were harmed by each individual theory of liability. Defendants assert that plaintiffs are required to "tie each theory of antitrust impact to an exact calculation of damages." *Comcast Corp. v. Behrend, 569 U.S. 27, 37, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. Defendants assert that Prof. Rosenthal's analysis flunks this test because **[*98]** she shows "how combining multiple sources of impact reduces the probability of a class member remaining uninjured." Doc. 1711-1 at 34 (Rosenthal Reply Report ¶ 58). Plaintiffs respond that Prof. Rosenthal properly considered multiple theories of harm in her analysis because class plaintiffs have proposed certifying a class that includes multiple theories of liability, including the alleged generic delay and improper switch to the 2-Pak.

The court recognizes that *Comcast* differs from this case. In *Comcast*, plaintiffs alleged four different theories of antitrust impact, but the district court "accepted [just one of the theories] of antitrust impact as capable of classwide proof and rejected the rest." *569 U.S. at 31*. The Supreme Court held that the district court erred by certifying a class based on an expert's regression model that "assumed the validity of all four theories of antitrust impact initially advanced" by plaintiffs, even though the district court had rejected three of those theories. *Id. at 36*. Thus, the Court found that the model "falls far short of establishing that damages are capable of measurement on a classwide basis," and "[w]ithout presenting another methodology," plaintiffs could not prove **[*99]** "*Rule 23(b)(3)* predominance." *Id. at 34*. Instead, the Court reasoned that "[q]uestions of individual damage calculations will inevitability overwhelm questions common to the class." *Id.*

That's not the posture of this case. Plaintiffs have asserted several theories of liability. And, at this stage, the court hasn't excluded any of the theories that Prof. Rosenthal uses in her analysis. Plaintiffs assert that Prof. Rosenthal's theory is consistent with *Comcast* because, in that case, the Supreme Court explained that "a model purporting to serve as evidence of damages in this class action must measure only those damages attributable to that theory." *Id. at 35*. And, because plaintiffs have identified several theories that purportedly injured the putative class members—thus producing damages—it was proper for Prof. Rosenthal to combine the theories in her analysis. *See* *Butler v. Sears, Roebuck & Co., 727 F.3d 796, 800 (7th Cir. 2013)* (recognizing that "it was not the existence of multiple theories in [*Comcast*] that precluded class certification; it was the plaintiffs' failure to base all the damages they sought on the antitrust impact—the injury—of which the plaintiffs were complaining"). Also, plaintiffs distinguish Prof. Rosenthal's probability opinion from the model excluded in ***[*100]*** *Comcast* because her probability opinion isn't a damages measurement. Prof. Rosenthal provided her damages opinions elsewhere in her expert report, and there, she separated her damage opinions among the various theories.

The court agrees that defendants' arguments about *Comcast* don't preclude the court from considering Prof. Rosenthal's probability opinion on class certification.

iv. Improper Rebuttal Testimony

Last, defendants assert that Prof. Rosenthal's probability methodology is improper rebuttal testimony. Similar to their arguments directed at the ascertainability opinion, above, defendants argue that Prof. Rosenthal should have offered a model to assess the possibility of uninjured class members in her opening report. Thus, defendants contend, the probability opinion she offers in her Reply Report constitutes improper rebuttal testimony.

Plaintiffs respond that, after Prof. Rosenthal submitted her initial report, defendants filed their Opposition to the class certification motion. It argued that plaintiffs' proposed class definitions contain too many uninjured class members. And one of Mylan's experts (Dr. John H. Johnson, IV) issued a report criticizing the conclusions announced **[*101]** in Prof. Rosenthal's initial report. Plaintiffs assert that Prof. Rosenthal's Reply Report properly responds to the arguments raised by defendants' Opposition and Mylan's expert. The court agrees with them.

Prof. Rosenthal's Reply Report explicitly recites that she offers her rebuttal opinions in response to Dr. Johnson's criticisms about her analysis, including his assertions that Prof. Rosenthal's analysis fails to account for uninjured class members. *See* Doc. 1711-1 at 3; *see also id.* at 29-37 (Rosenthal Reply Report ¶¶ 50-60). Also, the Reply Report cites specific portions of Dr. Johnson's report and gives Prof. Rosenthal's reasons for disagreeing with his conclusions. *See id.* at 20-24 (Rosenthal Reply Report ¶¶ 30-36). Exercising its discretion, the court declines to exclude Prof. Rosenthal's probability opinion as improper rebuttal testimony.

For all these reasons, the court rejects defendants' request that the court exclude Prof. Rosenthal's probability opinion under *Daubert*.[18]

d. Professor Rosenthal's Opinions that Rely On Professor Elhauge's Opinions

Finally, defendants assert that the court should exclude Prof. Rosenthal's opinions that rely on the opinions of another one of the putative **[*102]** class plaintiffs' experts. Prof. Rosenthal reaches some of her conclusions by relying on opinions offered by Professor Einer Elhauge. *See, e.g.*, Doc. 1500-3 at 33 (Rosenthal Expert Report ¶ 79), Doc. 1711-1 at 18-19, 37 (Rosenthal Reply Report ¶¶ 26, 61). Defendants contend that Prof. Elhauge's opinions are unreliable and inadmissible under *Daubert*. And, by separate motion, they ask the court to exclude his opinions from the court's consideration of the class certification motion. *See* Doc. 1604.

The court addresses defendants' motion to exclude Prof. Elhauge's opinions in the next section of this Order. As discussed below, the court rejects defendants' premise—that the court should exclude any of Prof. Elhauge's opinions that Prof. Rosenthal has relied on when forming her opinions. Consequently, the court rejects defendants' final argument for excluding Prof. Rosenthal's opinions.

For the reasons explained, the court denies defendants' motion to exclude Prof. Rosenthal's expert opinions.

2. Motion to Exclude Expert Opinions of Professor Einer Elhauge

Defendants next ask the court to exclude the expert opinions of Prof. Einer Elhauge. Prof. Elhauge opines that Mylan entered into exclusionary **[*103]** contracts with PBMs and its EpiPens4Schools program which harmed the entire putative class by foreclosing a part of the market to Auvi-Q (a rival EAI device manufactured and sold by Sanofi-Aventis U.S. LLC ("Sanofi")). Doc. 1500-2 at 6 (Elhauge Expert Report ¶ 3). According to Prof. Elhauge, Mylan's market foreclosure, in turn, decreased Auvi-Q sales and prevented Auvi-Q from competing with Mylan, thereby reducing Mylan's incentives to lower its prices across the market and across the putative class.[19] *Id.*

Defendants assert three arguments to support their request that the court exclude Prof. Elhauge's opinions. First, defendants contend that Prof. Elhauge is not qualified to render opinions based on econometric models. Second, defendants argue that Prof. Elhauge's econometric analyses are either unreliable or no longer relevant to the case. And finally, defendants assert that Prof. Elhauge's opinions rely on improper and unreliable rebuttal testimony that doesn't suffice to cure the defects in his initial analysis. The court addresses each argument, below.

a. Professor Elhauge's Qualifications

---

[18] Similar to the request above about Prof. Rosenthal's ascertainability opinion, defendants ask that, if the court declines to exclude Prof. Rosenthal's probability opinion, the court allow defendants to depose Prof. Rosenthal about the probability opinion in her Reply Report, introduce additional expert rebuttal testimony, and submit supplemental briefing opposing plaintiffs' Motion for Class Certification. The court denies this request for the same reasons discussed above. *See supra* note 14. Also, the court recognizes that Mylan's expert, Dr. Johnson, has had the chance to review and comment on Prof. Rosenthal's Reply Report. *See, e.g.*, Doc. 1850-2 (May 21, 2019 Decl. of Dr. John H. Johnson, IV in Supp. of Defs.' Mot. to Exclude Expert Opinions of Professor Meredith Rosenthal).

[19] Prof. Elhauge also offers opinions about market definition and market power. Doc. 1500-2 at 1 (Elhauge Expert Report ¶ 1). Defendants don't challenge the admissibility of these opinions on class certification. But defendants reserve their right to challenge these opinions at a later stage. Doc. 1886 at 9 n.1.

Defendants assert that Prof. Elhauge is not qualified to render his opinions because he is neither **[*104]** an economist nor an econometrician (an economist with highly specialized training in mathematics and statistics who builds economic models). Plaintiffs recognize that Prof. Elhauge is not an economist or an econometrician, but, they argue, Prof. Elhauge is well-qualified to testify as an expert in antitrust economics. Also, plaintiffs assert, Prof. Elhauge has extensive expertise applying economics and econometrics to antitrust issues. Thus, they argue, he is qualified to render the opinions he offers in this case. The court agrees with plaintiffs. Prof. Elhauge is qualified to opine on the topics that he offers here.

Prof. Elhauge is the Petrie Professor of Law at Harvard Law School, where he teaches ***antitrust law***, health policy, and other subjects. Doc. 1500-2 at 6-7 (Elhauge Expert Report ¶ 4). Prof. Elhauge has authored or coauthored several books about ***antitrust law*** and economics. *Id.* Also, he has authored many articles involving economic analysis of antitrust and other legal issues, including articles on monopolization, bundled discounts, loyalty discounts, and reverse payment settlements. *Id.* Since 1991, Prof. Elhauge has written more than 40 legal articles that leading law reviews **[*105]** and bar journals have published. *Id.* at 81-85. Also, Prof. Elhauge has testified as an expert witness on antitrust economics in dozens of federal cases, as well as before Congress, arbitration panels, and international competition agencies. *Id.* at 7 (Elhauge Expert Report ¶ 5). His expert testimony has included testimony about reverse payment settlements, other horizontal agreements, vertical agreements, mergers, monopolization and exclusionary conduct, price discrimination, health economics, patent economics, and contract economics. *Id.* Courts have referred to Prof. Elhauge as a ""highly qualified antitrust titan."" *See, e.g., Castro v. Sanofi Pasteur Inc., 134 F. Supp. 3d 820, 830 (D.N.J. 2015)* (quoting *In re Mushroom Direct Purchaser Antitrust Litig., No. 06-0620, 2015 U.S. Dist. LEXIS 120892, 2015 WL 5767415, at *4 (E.D. Pa. July 29, 2015)* (quoting *Natchitoches Par. Hosp. Serv. Dist. v. Tyco Int'l, Ltd., 247 F.R.D. 253, 273 (D. Mass. 2008)))*.

In his deposition testimony, Prof. Elhauge conceded that he is "not an expert in econometrics . . . ." Doc. 1861-2 at 12 (Elhauge Dep. 29:8-23). Also, he testified that he doesn't come up with "new, novel econometric methods." *Id.* But, Prof. Elhauge testified that he has "expertise . . . applying econometrics to antitrust issues." *Id.* And he considers himself an expert in "the application of econometrics to antitrust issues." *Id.* at 11-12 (Elhauge Dep. 28:25-29:3). That's what Prof. Elhauge says he did in this case—*i.e.*, apply econometric methods to antitrust issues **[*106]** by performing regression analyses to estimate the effects of Mylan's exclusionary contracts with PBMs.[20]

At least two courts have found that Prof. Elhauge is qualified to perform this type of expert analysis, even though he is not an econometrician. *See, e.g., In re Mushroom Direct Purchaser Antitrust Litig., No. 06-0620, 2015 U.S. Dist. LEXIS 120892, 2015 WL 5767415, at *5 (E.D. Pa. July 29, 2015)* (rejecting argument that Prof. Elhauge was not qualified to provide expert testimony, recognizing that "[t]here is no serious question that Prof. Elhauge possess[es] skill or knowledge in conducting regression analysis in antitrust cases that is greater than the average layman even if it were conceded that his expertise with multiple regression analysis as an econometric tool in general is not as deep as that of an econometrician," and concluding that his "lack of econometric/economic credentials" affected the weight but not the admissibility of his testimony (citations and internal quotation marks omitted)); *see also Natchitoches Par. Hosp. Serv. Dist. v. Tyco Int'l, Ltd., No. 05-12024 PBS, 2009 U.S. Dist. LEXIS 86435, 2009 WL 3053855, at *3 (D. Mass. Sept. 21, 2009)* (finding that Prof. Elhauge was qualified to provide expert testimony because the court-appointed expert in econometrics "pinpointed no methodological flaws or technical errors in the econometric analysis that Professor Elhauge presented" and concluding **[*107]** that his "lack of econometric/economic credentials affects the weight, not the admissibility, of Professor Elhauge's testimony").

And, in a third case, the court found Prof. Elhauge's econometric analysis sufficiently reliable to deny the defendant's motion to exclude under *Daubert*. *Castro v. Sanofi Pasteur Inc., 134 F. Supp. 3d 820, 831-42 (D.N.J.*

[20] Defendants argue that Prof. Elhauge isn't just applying econometrics to antitrust issues here. Instead, they contend, he's "attempted" to "com[e] up with a new econometric method"—something he's not qualified to do. Doc. 1886 at 8. But defendants don't explain how Prof. Elhauge's analysis invokes an entirely new econometric method. Instead, as Prof. Elhauge testified, he applies *proven* econometric methods in his analysis to determine the effects of Mylan's exclusionary contracts with PBMs. Doc. 1861-2 at 13 (Elhauge Dep. 31:5-8).

2015). Although the defendant there never challenged Prof. Elhauge's qualifications, the court summarized Prof. Elhauge's educational background, professional experience, publications, and expert testimony; and the court concluded that he is "eminently qualified" to provide expert opinions in the form of econometric analysis. *Id. at 830*.

For the same reasons, the court finds that Prof. Elhauge is qualified to render his expert opinions in this case.

b. The Reliability and Relevancy of Professor Elhauge's Econometric Analyses

Next, defendants argue that the court should exclude Prof. Elhauge's opinions about Auvi-Q market foreclosure and delayed generic entry because, defendants contend, Prof. Elhauge used flawed econometric analyses to support his opinions.

i. Auvi-Q Foreclosure Analysis

Prof. Elhauge opines that "Mylan's exclusionary contracts with PBMs . . . foreclose[ed] a part of the market to Auvi-Q . . . ." Doc. 1500-2 at 6 (Elhauge **[*108]** Expert Report ¶ 3). Defendants assert that this opinion is unreliable because Prof. Elhauge bases his conclusion on a flawed regression analysis that failed to account for "serial correlation." Doc. 1854 at 8, 14-16.

"Multiple-regression analysis is a statistical tool used to determine the relationship between an unknown variable (the 'dependent' variable) and one or more 'independent' variables that are thought to impact the dependent variable." *In re Urethane Antitrust Litig., 768 F.3d 1245, 1260 (10th Cir. 2014)* (citing Saks, Michael J., et al., *Reference Manual on Scientific Evidence* 179, 181 (2d ed. 2000)); *see also* Daniel L. Rubinfeld, "Reference Guide on Multiple Regression," in *Reference Manual on Scientific Evidence* 303, 305 (3d ed. 2011), https://www.fjc.gov/sites/default/files/2015/SciMan3D01.pdf (hereinafter "Reference Guide on Multiple Regression") (explaining that regression analysis "involves a variable to be explained—called the dependent variable—and additional explanatory variables that are thought to produce or be associated with changes in the dependent variable").

In Prof. Elhauge's regression model, the dependent variable is Auvi-Q's market share, and the two independent variables are: (1) the percentage of lives subject to PBM coverage **[*109]** restrictions on Auvi-Q, and (2) the price ratio of Auvi-Q and EpiPen. Doc. 1500-2 at 57-58 (Elhauge Expert Report ¶ 112). Thus, Prof. Elhauge's model tests whether either of the two independent variables affects the size of Auvi-Q's market share (the dependent variable).

Defendants contend, however, Prof. Elhauge's model is unreliable because it relies on underlying data that is "serially correlated." Specifically, Prof. Elhauge relied on Auvi-Q market share data for six PBMs over a 34-month period, thus producing 204 data points for Prof. Elhauge's regression analysis. Doc. 1500-2 at 56-57 (Elhauge Expert Report ¶ 110). But, defendants contend, these data points are not independent sample results. Instead, defendants argue, the data points are "serially correlated" because PBMs generally decide formulary placement on an annual basis. So, if a PBM had chosen to restrict Auvi-Q in January, it generally would restrict Auvi-Q in every month for the rest of the year. Defendants argue that Prof. Elhauge's regression model fails to control for the fact that PBMs generally don't adjust their formularies one month at time. Thus, defendants contend, his data points are "serially correlated," **[*110]** meaning that they aren't independent and thus make the variables appear far more correlated than they actually are. *See* Reference Guide on Multiple Regression, at 355 (defining "serial correlation" as "[t]he correlation of the values of regression errors of time"). And, according to Mylan's expert, when one controls for this serial correlation embedded in Prof. Elhauge's model, the model isn't capable of generating a statistically significant result. Thus, defendants contend, Prof. Elhauge's model is unreliable.

Plaintiffs respond by citing Prof. Elhauge's Expert Reply Report. In that Report, Prof. Elhauge recognizes that serial correlation is present in his foreclosure regression but, he explains, serial correlation "does not make the regression biased in favor of finding a significant foreclosing effect." Doc. 1711-2 at 40 (Elhauge Expert Reply Report ¶ 81). Instead, Prof. Elhauge asserts, the presence of serial correlation only affects the statistical significance of the results. *Id.* And, Prof. Elhauge explains his regression model does produce statistically significant results when one uses "clustered standard errors" to control for serial correlation. *Id.*; *see also id.* at 40-42 (Elhauge Expert Reply Report ¶¶ 80-84). Although "using clustered **[*111]** standard errors reduces the statistical power of the regression by effectively grouping all observations at the same PBM," one can "obtain statistical significance" by "includ[ing] more PBMs." *Id.* at 40 (Elhauge Expert Reply Report ¶ 81). Also, one can reduce serial correlation significantly by "adding PBM fixed effects to the regression." *Id.* at 40-41 (Elhauge Expert Reply Report ¶ 82).

The court finds that Prof. Elhauge's Reply Report sufficiently explains how to account for serial correlation in his model. Defendants' criticisms about his regression analysis—particularly the criticism asserted by Mylan's expert—go to the weight of Prof. Elhauge's opinions, but not their admissibility. *See, e.g., Southwire Co. v. J.P. Morgan Chase & Co., 528 F. Supp. 2d 908, 929 (W.D. Wis. 2007)* (refusing to exclude expert opinion based on an econometric model because the expert "accounted for the existence of serial correlation and the need to correct for it" and thus "his method is not so inherently flawed as to preclude him from establishing whether defendants' alleged wrongdoing had any effect on the price of copper" and whether the expert "erred in applying his model and whether he failed to properly correct for serial correlation are jury questions not amenable to resolution on summary judgment"). **[*112]** Defendants can challenge—and have challenged—Prof. Elhauge's opinions about class certification by offering competing expert opinions.[21] *See* Doc. 1636 at 49, 49 n.43 (Mylan Defs.' Opp'n to Class Pls.' Mot. for Class Certification). But the court declines to find that Prof. Elhauge's analysis is inherently unreliable such that the court should exclude it. The court thus denies defendants' Motion to Exclude Prof. Elhauge's opinions about Auvi-Q market foreclosure based on PBM exclusionary contracts.

ii. EpiPens4Schools Program Analysis

Prof. Elhauge also opines that "Mylan's exclusionary contracts with . . . its EpiPens4Schools program . . . foreclose[ed] a part of the market to Auvi-Q . . . ." Doc. 1500-2 at 6 (Elhauge Expert Report ¶ 3). Defendants assert that the court should exclude Prof. Elhauge's opinions for two reasons. *First*, defendants argue that Prof. Elhauge bases his opinion on an inaccurate assumption—*i.e.*, that Mylan imposed exclusivity requirements in exchange for free EpiPens for schools through its EpiPens4Schools program. Defendants assert that the factual record doesn't support this assumption because, from 2013 to 2015, 96% of schools participating in the EpiPens4Schools **[*113]** Program were not subject to any exclusivity requirements. Defendants contend that plaintiffs' discovery of these facts has compelled them to abandon "any independent causally related damages based on the EpiPen4Schools program." Doc. 1590-3 at 2 (May 14, 2019 email from plaintiffs' liaison counsel).

Second, defendants contend, the court should exclude Prof. Elhauge's opinions because they are no longer relevant now that plaintiffs have abandoned this theory in their case. Plaintiffs concede that Prof. Elhauge's opinions about the EpiPens4Schools program no longer matter because plaintiffs aren't pursuing this theory. Doc. 1861 at 26. And, they explain, Prof. Elhauge's Expert Reply Report makes clear that he already has withdrawn his opinion about the EpiPens4Schools program. Doc. 1711-2 at 46 (Elhauge Expert Reply Report ¶ 90) (assuming "no foreclosing impact from the EpiPens4Schools program because [Prof. Elhauge] understand[s] that plaintiffs have abandoned that claim"). Thus, plaintiffs assert, the court shouldn't exclude an already-withdrawn opinion, but instead, the court should find that defendants' arguments are moot.

Defendants disagree that the issue is moot. Prof. Elhauge offered **[*114]** an opinion about the EpiPens4Schools program in his initial report. And, defendants contend, the correct procedural device is for the court to grant defendants' motion to exclude the opinion as uncontested so that no question exists about the status of this theory in further proceedings before this court or on appeal. The court agrees with defendants. Because plaintiffs concede that they have abandoned an independent claim for damages based on the EpiPen4Schools program, the court excludes Prof. Elhauge's opinions on this subject from its consideration at the certification stage because they no

---

21 The court addresses defendants' challenges to Professor Elhauge's opinion in its Order on the class certification motion at Parts IV.E.2.a. & IV.E.2.d.

longer are relevant to this case. *See* *Fertik v. Stevenson, No. 12-10795-PBS, 2016 U.S. Dist. LEXIS 102543, 2016 WL 4148193, at *3 (D. Mass. Aug. 4, 2016)* (prohibiting an expert from testifying about a "now-abandoned theory").

iii. Delayed Generic Entry Analysis

Finally, defendants seek to exclude Prof. Elhauge's opinions about delayed generic entry because, they contend, his opinions aren't reliable and have no probative value. Prof. Elhauge opines that "reverse payments in patent settlements . . . injure competition across the market (and thus across the class) when they result in generic entry dates that are later than the entry date that would have occurred without that **[*115]** payment in a no-payment settlement." Doc. 1500-2 at 5 (Elhauge Expert Report ¶ 2). Using various data points, Prof. Elhauge has developed a model that, he opines, can "determine the generic entry date in a no-payment settlement that would have been economically rational given [the parties'] actual bargaining power." *Id.* Specifically, Prof. Elhauge "illustrate[s] this classwide methodology, showing that with a $100 million reverse payment amount, the no-payment settlement entry date that would have been economically rational given their actual bargaining power would have been March 13, 2014, some 15.3 months earlier than the entry date in the actual settlement." *Id.* Defendants contend that Prof. Elhauge's opinions about delayed generic entry are unreliable for several reasons.

First, defendants argue, Prof. Elhauge's opinions are flawed because he predicts an entry date for a Teva generic EAI occurring before Teva even had secured FDA approval for its generic product. The FDA didn't approve the Teva generic until August 16, 2018. Doc. 1854 at 18 n.11 (citing FDA, *FDA Approves First Generic Version of EpiPen* (Aug. 16, 2018), https://www.fda.gov/news-events/press-announcements/fda-approves-first-generic-version-epipen). **[*116]** Defendants thus contend that no settlement could have prevented Teva from entering the market before the date when the FDA approved Teva's introduction of its EAI device.

The putative class plaintiffs respond that Teva's actual market entry date is irrelevant to Prof. Elhauge's analysis. Prof. Elhauge explained how he used factual data from the record to determine Teva's expectations for a generic entry date. Doc. 1500-2 at 39-40, 43 (Elhauge Expert Report ¶¶ 71, 78). And, Prof. Elhauge described how his analysis "addressed only the economically rational ***entry date in a but-for settlement agreement***" and "expressly disclaimed offering any opinion on whether Teva would have ***actually*** been able to enter on that settlement entry date given any obstacles, such as the need for FDA approval." Doc. 1711-2 at 23 (Elhauge Reply Report ¶ 45) (emphasis in original). Prof. Elhauge further explained "the fact that after the settlement Teva may have actually struggled to obtain FDA approval does not bear on what the entry date would have been in the but-for settlement, which can only be affected by expectations at the time of settlement." *Id. at 24* (Elhauge Reply Report ¶ 47). Prof. Elhauge recognized that **[*117]** FDA approval may affect plaintiffs' ability to prove "actual causation" if Teva struggled to secure FDA approval for reasons not caused by anticompetitive conduct. *Id.* But, Prof. Elhauge "simply stayed within [his] assignment of analyzing the entry date in a but-for settlement that the parties would have rationally agreed to," and he "[left] it to plaintiffs to establish through other evidence whether in the but-for world Teva would have actually obtained FDA approval and been able to enter by that but-for settlement date." *Id.* Prof. Elhauge asserts that "[s]taying within [his] assignment does nothing to undermine the reliability or classwide nature of the methodology [he] used to determine the economically rational entry date in the but-for settlement." *Id.* The court agrees.

Defendants also contend that Prof. Elhauge's model is flawed because he testified that the actual entry day and actual alleged payment don't matter, but instead, they are "illustrative" placeholders to show that one can apply this model to any set of facts. Doc. 1605-1 at 10 (Elhauge Dep. 64:16-25). But, defendants argue, the model can't demonstrate classwide harm unless it calculates an entry date before June **[*118]** 22, 2015—the date of the Teva settlement agreement. Defendants contend that, if Teva wasn't entering the market until after June 22, 2015 anyway, then defendants couldn't have caused any delay in Teva's generic entry because it entered the settlement before then. For this reason, defendants contend that Prof. Elhauge's model is flawed.

The putative class plaintiffs expose the weakness of this argument. As plaintiffs explain, to prove causation—*i.e.*, that defendants' conduct delayed the entry of a Teva generic—plaintiffs just need to show that Teva would have entered the market sooner than it did but for the reverse payment settlement. For example, if plaintiffs prove that, but for a reverse payment settlement, Teva would have entered the market on June 23, 2015—the day after the settlement—plaintiffs still will have shown that the reverse payment settlement delayed generic entry by more than three years. Thus, defendants' argument on this front doesn't persuade the court that Prof. Elhauge's model is unreliable simply because it may calculate an entry date following the date of the settlement agreement.

Second, defendants assert that Prof. Elhauge's opinions are unreliable because his **[*119]** analysis simply assumes that defendants made a $100 million reverse payment settlement to Teva, but he has no factual basis for this assumption. The court disagrees. Prof. Elhauge has explained why he used the $100 million reverse payment settlement in his calculation. Prof. Elhauge says that he used a 15% patent strength estimate and the parties' profit projections to calculate "that reverse payment must have been at least $47.8 million to get Teva to agree to the actual settlement." Doc. 1711-2 at 19 (Elhauge Reply Report ¶ 37); *see also* Doc. 1500-2 at 43-44 (Elhauge Expert Report ¶ 80); Doc. 1497-2 at 43-44 (Sealed Elhauge Expert Report ¶ 80). Prof. Elhauge then "used a hypothetical reverse payment amount of $100 million to illustrate how [his] methodology would apply and produce a predicted but-for settlement entry date using classwide evidence and a classwide method." Doc. 1711-2 at 19 (Elhauge Reply Report ¶ 37). Prof. Elhauge explained that he did so "because there is still a significant amount of non-coordinated discovery remaining and because the point at this stage was simply to show a reliable classwide methodology, which can be illustrated by a reverse payment amount of **[*120]** $100 million as well as any other." *Id.* And, he explained, his model can estimate the but-for entry date for any given settlement amount ranging from $47.8 to $446 million. Doc. 1500-2 at 45-46 (Elhauge Expert Report ¶ 85, fig.12). Prof. Elhauge sufficiently has explained why he used the $100 million reverse payment settlement in his model. Defendants' argument on this point doesn't show that Prof. Elhauge's use of this data point at this stage for illustrative purposes renders his opinions unreliable.

Third, defendants argue Prof. Elhauge's analysis is flawed because he assumed a patent strength of 15% (meaning that Teva had a 85% chance of prevailing in its lawsuit challenging the EpiPen patent). Defendants assert that this assumption conflicts with the opinion of plaintiffs' patent litigation expert (Prof. Andrew Torrance) who opines that the EpiPen patent strength was as high as 30%. But, Prof. Elhauge explains why he chose 15% patent strength for his model. Prof. Elhauge recognized that "any patent strength from 0-30% was equally possible given Professor Torrance's opinion." Doc. 1711-2 at 19 (Elhauge Reply Report ¶ 36). "But if any patent strength from 0-30% is equally possible," **[*121]** Prof. Elhauge concluded "that means that the ***expected*** patent strength was 15%, and it is the overall expectation that drives the settlement analysis." *Id.* (emphasis in original). Thus, Prof. Elhauge asserts "15% is the appropriate estimate to use for an expected patent strength." *Id.* Prof. Elhauge also explains that his model can estimate delay across a range of assumed patent strengths. Doc. 1500-2 at 46-47 (Elhauge Expert Report ¶ 86). And, his Report includes a Figure showing "the effect of varying the patent strength up to as high as it could possibly have been while still being consistent with Mylan having rationally accepted the actual settlement and paid the illustrative $100 million reverse payment amount." *Id.*; *see also id.* (Elhauge Expert Report fig.13). Defendants criticize this model because, they contend, it ignores "the other equally likely values—including values that result in no generic delay." Doc. 1886 at 11 (citation and internal quotation marks omitted). But the court finds that this argument goes to the weight of Prof. Elhauge's opinion, not its admissibility.

Finally, defendants assert that Prof. Elhauge's analysis is based on an unproven model, never accepted **[*122]** by any court as reliable. But, as plaintiffs point out, at least three courts have approved Prof. Elhauge's methodology in pay-for-delay cases. *See, e.g.,* *In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d 152, 174 (S.D.N.Y. 2018)* (denying motion to exclude Prof. Elhauge's opinion that "it would have been economically rational for both parties to enter into a no-payment settlement in a but-for world by specific dates" and rejecting defendants' arguments that his opinions "are speculative, internally inconsistent, and contradicted by the evidence" because "Defendants' disagreements with Plaintiffs' expert are appropriate subjects for cross-examination"); *In re Androgel Antitrust Litig. (No. II), No. 1:09-MD-2084-TWT, 2018 U.S. Dist. LEXIS 99716, 2018 WL 2984873, at *17 (N.D. Ga. June 14, 2018)* (concluding that Prof. Elhauge's reverse payment settlement opinion, as well as other evidence, sufficiently supported plaintiffs' alternative settlement theory to survive defendants' summary judgment motion and noting that "[a]ny criticism the Defendants have of the experts' methodologies or conclusions are best handled through cross-examination and the production of contrary evidence"); *United Food & Commercial Workers Local 1776 &* *Participating Emp'rs Health & Welfare Fund v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1186-88 (N.D. Cal. 2017)* (denying motion to exclude Prof. Elhauge's opinions in an antitrust lawsuit involving Lidoderm patches because, though **[*123]** "defendants [were] correct that Elhauge could point to no other case where an expert has employed the exact model he employs here, both the components of his model (estimating parties' bargaining strengths and expectations of patent strength) and the assumptions that go with it (the parties' own pre-settlement forecasts) are consistent with accepted economic theory and well-established principles"). *See also* Doc. 1648-1 at 8 (Elhauge Dep. 167:4 - 19) (explaining that Prof. Elhauge has used the same methodology in other cases to evaluate a but-for settlement date, including the *Namenda, Lidoderm*, and *Androgel* cases).

Defendants also contend that Prof. Elhauge's model is unreliable because it "would render class certification essentially 'automatic' in every 'pay for delay' case, regardless of the actual facts." Doc. 1854 at 9. At least two courts have rejected this very argument. *See, e.g., In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d at 173* (rejecting defendants' argument that "Professor Elhauge presumes that *any* payment from a patentee to a prospective generic, regardless of its size or the reasons for making it, causes anticompetitive delay" because it was "a mischaracterization of [his] analysis"); *In re Androgel Antitrust Litig., 2018 U.S. Dist. LEXIS 99716, 2018 WL 2984873, at *17* (rejecting defendants' argument **[*124]** that Prof. Elhauge's "model[ ] assume[s] that a reverse payment always causes delay" and concluding that his "model[ ] assume[s] nothing of the sort" but, instead, Prof. Elhauge "use[d] [his] experience and knowledge in the field to conclude that reverse payments cause delay, and [he] confirm[ed] that conclusion in [his] model[ ] addressing the specific settlement at issue in this case").

Similarly here, Prof. Elhauge has used his experience and knowledge in the field to conclude that reverse payments cause generic delay. Doc. 1500-2 at 5 (Elhauge Expert Report ¶ 2). Then, using "the parties' actual settlement, profit projections, and estimates about the patent litigation and reverse payment value," Prof. Elhauge "calculate[d] their actual bargaining strength and then use[d] that information to determine the generic entry date in a no-payment settlement that would have been economically rational given their actual bargaining power." *Id.* Defendants' criticisms of his methodology go to the weight the court should give his opinions, but they don't undermine the reliability of his opinions sufficient to exclude them. The court thus declines to exclude Prof. Elhauge's opinions about delayed **[*125]** generic entry as unreliable.

c. The Reliability of Professor Elhauge's Rebuttal Testimony

Last, defendants' motion argues that the court should exclude analyses that Prof. Elhauge presented in his Reply Report for two reasons. *First*, defendants argue, Prof. Elhauge's Reply Report contains improper rebuttal testimony. *And second*, defendants assert that the analyses in the Reply Report are unreliable.

i. Rebuttal Testimony

Defendants assert that Prof. Elhauge's Reply Report contains two "new" analyses that he should have disclosed in his initial report. Doc. 1854 at 20. According to defendants, these analyses are improper rebuttal testimony. Plaintiffs respond that Prof. Elhauge doesn't offer any new analyses in his Reply Report. Instead, plaintiffs contend, his Reply Report properly responds to the criticisms that Mylan's expert made about Prof. Elhauge's regression analyses. Thus, plaintiffs argue, the analyses in his Reply Report are proper rebuttal testimony.

As already discussed, "[r]ebuttal evidence is evidence which attempts to 'disprove or contradict' the evidence to which it is contrasted." *Tanberg v. Sholtis, 401 F.3d 1151, 1166 (10th Cir. 2005)* (quoting *Black's Law Dictionary* 579 (7th ed. 1999)). "When a party opens the door to a topic, **[*126]** the admission of rebuttal evidence on that topic becomes permissible." *Id.* (citation omitted). "Permissible does not mean mandatory, however; the decision to admit or exclude rebuttal testimony remains within the trial court's sound discretion." *Id.* (citation omitted).

Defendants take issue with various modifications that Prof. Elhauge made to his regression analysis. Doc. 1711-2 at 36 (Elhauge Reply Report ¶ 70). Defendants assert that these modifications are substantive changes that produce entirely new damage figures, as depicted in a series of 24 new tables. *Id. at 45-64*. But, as Prof. Elhauge's Reply Report makes clear, he made the modifications to his regression analysis specifically in response to Mylan's expert's critiques. *See id. at 36* (Elhauge Reply Report ¶ 70) (summarizing the criticisms made by Mylan's expert about Prof. Elhauge's model and explaining that "[n]one of these critiques are valid, but the results of the regression are similar even if one modifies the regression to address his critiques."). Prof. Elhauge's modifications thus rebut Mylan's expert's testimony on the same subject matter. So, the court finds, this modified regression is proper rebuttal testimony.

Also, defendants object **[*127]** to the analysis in Prof. Elhauge's Reply Report that purports to separate damages calculations for third party payors ("TPPs") and cash end-payors. Again, Prof. Elhauge offers this opinion in his Reply Report to rebut Mylan's expert's opinion that his method "cannot determine how overcharges differ between third party payors (TPPs) and cash end-payors." Doc. 1711-2 at 69 (Elhauge Reply Report ¶ 103). And, Prof. Elhauge explains, he calculated separate damages using Mylan's rebate data. *Id.* (Elhauge Reply Report ¶ 105). Plaintiffs assert that defendants did not produce this rebate data until after Prof. Elhauge completed his initial Report and his deposition. Defendants concede that "Plaintiffs used data that Mylan produced after Prof. Elhauge's initial Report was submitted" but, defendants contend, "those data were not required to perform Prof. Elhauge's analyses." Doc. 1886 at 12 n.11. Defendants assert that "Mylan had already produced the bulk of its data well in advance of Prof. Elhauge's initial Report, and those data were equally amenable to use in his analysis." *Id.* The court declines to accept defendants' conclusory assertion that Prof. Elhauge could have performed his regression **[*128]** with data Mylan already had produced. Because the parties agree that Prof. Elhauge relied on data that Mylan produced after he completed his initial Report and sat for his deposition,[22] the court refuses to find that Prof. Elhauge's analysis is improper rebuttal testimony.

In sum, the court rejects defendants' arguments that Prof. Elhauge's Reply Report offers improper rebuttal testimony.[23]

ii. Reliability of Reply Report's Analyses

Next, defendants assert, the analyses in Prof. Elhauge's Reply Report are unreliable. They assert three reasons why the court should exclude them.

First, defendants assert that the Reply Report's analysis is unreliable because Prof. Elhauge omits the relative price of EpiPen and Auvi-Q from his regression model. Defendants assert that price is a "major factor" that influences Auvi-Q sales—the dependent variable in the regression analysis. Doc. 1854 at 22. And, "to be admissible, a regression analysis must control for the 'major factors' that might influence the dependent variable." *Reed Constr. Data Inc. v. McGraw-Hill Cos., 49 F. Supp. 3d 385, 400 (S.D.N.Y. 2014)* (citation omitted). By excluding price from his regression model, defendants argue, Prof. Elhauge has no way to determine whether the effect he observes in his regression **[*129]** results from Mylan's PBM contracts or, instead, the higher price of Auvi-Q.

Plaintiffs respond that one of Prof. Elhauge's rebuttal analyses simply added PBM fixed effects to the regression analysis in response to criticism by Mylan's expert. *See* Doc. 1711-2 at 40-41 (Elhauge Reply Report ¶ 82). But the

---

[22] Defendants assert that Prof. Elhauge described "some version" of this analysis at his deposition but plaintiffs refused to produce the analysis when defendant requested it. Doc. 1854 at 21. Plaintiffs assert that defendants wrongly equate the "rough estimate" that Prof. Elhauge testified about at his deposition with the analysis he provided in his Reply Report. Doc. 1861 at 24. As discussed, Prof. Elhauge performed the analysis using Mylan rebate data produced *after* his deposition. So the court agrees with plaintiffs that the analysis described in his deposition differs from the analysis found in the Reply Report.

[23] Defendants ask that, if the court declines to exclude Prof. Elhauge's testimony, the court give defendants an opportunity to depose Prof. Elhauge about the analysis in his Reply Report, introduce additional expert rebuttal testimony, and submit supplemental briefing in opposition to plaintiffs' Motion for Class Certification. The court denies this request. As plaintiffs correctly explain, defendants had ample opportunity to review and respond to Prof. Elhauge's Report (issued on April 29, 2019) before the court held its June 11-12, 2019 hearing on the Motion for Class Certification. Also, this case is a long way from trial, and Mylan's expert has had the chance to review and comment on Prof. Elhauge's rebuttal opinions. *See, e.g.*, Doc. 1605-7 (May 21, 2019 Decl. of Dr. John H. Johnson, IV in Supp. of Defs.' Mot. to Exclude Expert Opinions of Professor Einer Elhauge). The court thus denies defendants' request.

regression never eliminated the price variable, and thus, the analysis still controlled for price. *Id.* Plaintiffs concede that another one of Prof. Elhauge's rebuttal analyses did drop the price variable, but, plaintiffs explain, the analysis continues to use time and PBM fixed effects to control for any differences in price across time or between PBMs. *Id.* at 35 (Elhauge Reply Report ¶ 68). Also, Prof. Elhauge specifically excluded the price variable in response to the criticisms lodged by Mylan's expert. *Id.* at 36 (Elhauge Reply Report ¶ 70).

The parties' competing arguments about Prof. Elhauge's exclusion of the price variable and whether he properly controlled for this factor in his regression go to the probative value of his analysis. *See, e.g., Bazemore v. Friday, 478 U.S. 385, 400, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)* ("Normally, failure to include variables will affect the analysis' probativeness, not its admissibility."); *In re Urethane Antitrust Litig., 768 F.3d 1245, 1260-61 (10th Cir. 2014)* ("Consequently, the exclusion of major variables **[*130]** or the inclusion of improper variables may diminish the probative value of a regression model. But such defects do not generally preclude admissibility, and courts allow use of a regression model as long as it includes the variables accounting for the major factors." (citing *Bazemore, 478 U.S. at 400*)). But defendants' attacks don't establish that Prof. Elhauge's analysis is inadmissible under *Daubert.*

Second, defendants argue that Prof. Elhauge's rebuttal analysis employs the wrong standard for statistical significance. More specifically, Prof. Elhauge uses a 0.10 threshold for statistical significance. But, defendants contend, the conventional level of statistical significance used by both the scientific community and the courts is 0.05. *See Apsley v. Boeing Co., 691 F.3d 1184, 1198 (10th Cir. 2012)* ("The significance level is typically placed at 5%."); *see also* Reference Guide on Multiple Regression, at 320 ("In most scientific work, the level of statistical significance required to reject the null hypothesis (i.e., to obtain a statistically significant result) is set conventionally at 0.05, or 5%.").

Plaintiffs respond that Prof. Elhauge used the 0.10 threshold in just one of his regressions—one that he offered to respond to Mylan's expert's criticisms about his failure to account for serial correlation. ***[*131]*** *See* Doc. 1711-2 at 40-41 (Elhauge Reply Report ¶ 82). And, while defendants assert that 0.05 is the accepted threshold, they don't cite any authority *requiring* an expert to use this standard. Indeed, the Reference Guide on Multiple Regression—the authority defendants cite in their motion—recognizes that:

> The use of 1%, 5%, and, sometimes, 10% levels for determining statistical significance remains a subject of debate. One might argue, for example, that when regression analysis is used in a price-fixing antitrust case to test a relatively specific alternative to the null hypothesis (e.g., price fixing), a somewhat lower level of confidence (a higher level of significance, such as 10%) might be appropriate.

Reference Guide on Multiple Regression, at 321 n.48.

Also, courts generally have found that challenges to statistical significance go to the weight, but not the admissibility, of a regression model. *See, e.g., Kadas v. MCI Systemhouse Corp., 255 F.3d 359, 362-63 (7th Cir. 2001)* (explaining that "[t]he 5 percent test is arbitrary" and "[t]he question whether a study is responsible and therefore admissible under the *Daubert* standard is different from the weight to be accorded to the significance of a particular correlation found by the study. It is for the judge to say, on the basis of the evidence of **[*132]** a trained statistician, whether a particular significance level, in the context of a particular study in a particular case, is too low to make the study worth the consideration of judge or jury."); *Kurtz v. Kimberly-Clark Corp., 414 F. Supp. 3d 317, 331 (E.D.N.Y. 2019)* ("Regressions should not be excluded on the ground that they fail to meet arbitrary thresholds of statistical significance."); *In re High-Tech Emp. Antitrust Litig., No. 11-CV-02509-LHK, 2014 U.S. Dist. LEXIS 47181, 2014 WL 1351040, at *15 (N.D. Cal. Apr. 4, 2014)* ("The Court finds that the fact that these two variables are not statistically significant at the 1%, 5%, and 10% levels goes to the weight, not the admissibility of [the] model."). Similarly, here, the court finds that defendants' arguments about the statistical significance of Prof. Elhauge's analysis go to the weight the court should give his opinions when deciding the class certification motion. But, they do not preclude the court from considering it on class certification.

Finally, defendants assert that one of Prof. Elhauge's rebuttal analyses uses the wrong test for statistical significance. Defendants explain that there are two tests for statistical significance: a two tailed test and a one-tailed test. A two-tailed test allows for "the effect [on the dependent variable] to be either positive or negative." **[*133]** Reference Guide on Multiple Regression, at 321. And a one-tailed test is used "when the expert believes, perhaps on the basis of other direct evidence presented at trial, that the alternative hypothesis is either positive or negative, but not both." *Id.*

Prof. Elhauge's Reply Report explains that he used a one-tailed test in his regression. He also explains why. Doc. 1711-2 at 41 (Elhauge Reply Report ¶ 82 n.146) ("A one-sided test is appropriate here because we are only interested in whether the regression shows a significant negative (foreclosing) effect of the formulary restrictions, and because there is no plausible theory under which the formulary restrictions would increase Auvi-Q's share."). Stated another way, Prof. Elhauge assumed that the formulary restrictions only could produce a negative effect on Auvi-Q's market share (*i.e.*, the dependent variable). And thus, he used a one-tailed test for this regression.

Defendants assert that Prof. Elhauge's use of the one-tailed test makes his analysis unreliable because both the scientific community and the courts prefer the two-tailed test. *See, e.g., Palmer v. Shultz, 815 F.2d 84, 95-96, 259 U.S. App. D.C. 246 (D.C. Cir. 1987)* (concluding that "generally two-tailed tests are more appropriate in Title VII cases"); *Smith v. City of Bos., 144 F. Supp. 3d 177, 196 (D. Mass. 2015)* (observing in a Title VII case, "[t]he **[*134]** weight of the case law appears to favor two-tailed tests."). *See also* Reference Guide on Multiple Regression, at 321 (explaining that use of the two-tailed test "is usually appropriate"). But, as plaintiffs note, defendants cite no authority that requires an expert to use a two-tailed test as a condition for finding the expert's opinions admissible under *Daubert*. And, plaintiffs contend, the expert should have discretion to decide whether to use a one-tailed or two-tailed test based on the regression that he is testing. Indeed, the Reference Guide on Multiple Regression explains:

> [A]n expert might use a one-tailed test in a patent infringement case if he or she strongly believes that the effect of the alleged infringement on the price of the infringed product was either zero or negative. (The sales of the infringing product competed with the sales of the infringed product, thereby lowering the price.) By using a one-tailed test, the expert is in effect stating that prior to looking at the data it would be very surprising if the data pointed in the direct opposite to the one posited by the expert.

Reference Guide on Multiple Regression, at 321. And the Guide cautions: "Because there is some arbitrariness involved in the choice of an alternative hypothesis, courts should avoid **[*135]** relying solely on sharply defined statistical tests." *Id.*

Plaintiffs assert that it was proper for Prof. Elhauge to use a one-tailed test in this particular regression because, he determined, it's not realistic to expect that defendants' exclusionary contracts ever would cause Auvi-Q's market share to increase. Defendants respond with the conclusion of Mylan's expert. He opines that—for at least two major PBMs—Prof. Elhauge's regression actually shows that formulary restrictions caused Auvi-Q's market share to increase. Thus, defendants assert, the data is capable of producing either a positive or negative effect. And, they contend, Prof. Elhauge should have used a two-tailed test in his regression.

The court refuses to exclude Prof. Elhauge's opinion simply because Mylan's expert disagrees with it. Prof. Elhauge has explained his reasons for using the one-tailed test. And even if a factfinder ultimately would reject his reasoning, his reasoning is, at worst, plausible. Defendants' attacks against Prof. Elhauge's decision don't show that his opinions are unreliable or preclude their admissibility. The court thus declines to exclude Prof. Elhauge's opinions based on his use of the one-tailed **[*136]** test for one of his regressions.

In sum, the court grants defendants' Motion to Exclude Prof. Elhauge's opinions in part and denies it in part. The court grants the motion to exclude his opinions about Auvi-Q market foreclosure based on Mylan's EpiPens4Schools program because plaintiffs since have abandoned this theory. And, the court denies defendants' motion in all other respects.

3. Motion to Exclude Opinions and Proposed Testimony of Professor Andrew K. Torrance

Finally, defendants ask the court to exclude opinions and proposed testimony of Prof. Andrew K. Torrance. Prof. Torrance offers opinions about the patent lawsuit that King Pharmaceuticals (a Pfizer subsidiary) filed against Teva alleging that Teva's generic version of the EpiPen infringed two of King's EpiPen patents ("Teva patent litigation").

Prof. Torrance opines about Teva's likelihood of success in the Teva patent litigation had the parties not settled the lawsuit. Also, Prof. Torrance opines about the costs and duration of the Teva patent litigation had the parties not settled.

Defendants base their motion to exclude on three arguments. *First*, defendants contend that Prof. Torrance fails to explain how he reached his **[*137]** conclusion that Teva had a greater than 70% chance of prevailing in the Teva patent litigation. *Second*, defendants assert that Prof. Torrance's opinions don't fit with the factual record. *Third*, defendants argue that Prof. Torrance didn't apply accepted methods and principles for analyzing patent invalidity. All these reasons, defendants assert, render Prof. Torrance's opinions unreliable. And thus, defendants assert, the court should exclude them. The court addresses each of the three arguments, separately, below.

a. Professor Torrance Adequately Explained How He Reached His Conclusions.

First, defendants argue that Prof. Torrance doesn't explain how he determined Teva's likelihood of success in the Teva patent litigation. Defendants assert that Prof. Torrance offers nothing but baseless speculation to support his conclusions. Thus, defendants contend, Prof. Torrance's opinions will not help decide whether it was reasonable for Teva to settle the Teva patent litigation.

Plaintiffs respond that Prof. Torrance bases his opinions on both: (1) his experience as a patent attorney, legal scholar, and law professor,[24] and (2) his review of materials that he considered when forming his opinions. **[*138]** Doc. 1849-1 at 19, 21 (Torrance Dep. 240:8-16, 257:8-258:18). As plaintiffs explain in response, other courts have found similar expert testimony admissible under *Daubert* when the expert bases his opinions about the likelihood of success in litigation on his experience and his review of the relevant litigation materials. *See, e.g., In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d 152, 187-88 (S.D.N.Y. 2018)* (denying motion to exclude opinions of a "patent attorney with extensive experience in the area of patent law" about "the likelihood [of success] in [a patent] lawsuit" because the expert "unquestionably has the expertise to evaluate the things he assessed—from expert reports to patent file folders—and to draw conclusions about who is more likely to win a patent lawsuit"); *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-md-02503, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *16 (D. Mass. Jan. 25, 2018)* (refusing to exclude opinion of patent law expert who opined about the likelihood of success in patent litigation "based upon his own expertise and experience in the field of patent law"); *United Food & Commercial Workers Local 1776 & Participating Emp'rs Health & Welfare Fund v. Teikoku Pharma USA, 2017 U.S. Dist. LEXIS 182940, 296 F. Supp. 3d 1142, 1186-87 (N.D. Cal. 2017)* (denying motion seeking to exclude expert testimony about likely outcome of patent litigation when the expert had reached his conclusions by "applying his scientific background **[*139]** and knowledge to his review of the trial record"); *In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d 734, 765-67 (E.D. Pa. 2015)* (denying motion to exclude expert's opinion about the chances of prevailing in underlying patent litigation because the expert—a patent law professor—was "a qualified expert offering appropriate expert testimony" and had reached his conclusions after "review of the briefs, pleadings, [Abbreviated New Drug Application], and underlying patent at issue in the . . . litigation").

For the same reasons, the court refuses to exclude Prof. Torrance's opinions here. Prof. Torrance sufficiently explained how he reached his conclusions—using his experience in the field of patent law and his review of the relevant materials. *See, e.g., F & H Coatings, LLC v. Acosta, 900 F.3d 1214, 1224 (10th Cir. 2018)* (finding no error

---

[24] Defendants' motion never asserts directly that Prof. Torrance's opinions are inadmissible under *Daubert* because he isn't qualified to provide expert testimony. But, in a footnote, defendants suggest that Prof. Torrance doesn't have sufficient patent litigation experience "that would qualify him to opine on the likely outcome of the underlying patent litigation." Doc. 1848 at 8 n.10. Plaintiffs respond that Prof. Torrance is well-qualified to provide expert testimony based on his experience as a patent attorney, his education, his extensive scholarship and publication in the patent field, and his teaching experience. Doc. 1862 at 8-11. The court agrees. Prof. Torrance's experience and education qualify him to opine about Teva's likelihood of success in the Teva patent litigation. Defendants' criticisms about Prof. Torrance's experience in patent litigation trials, and the role he played in those trials, go to the weight of his opinions, not their admissibility.

in admission of expert testimony because the expert's "experience and industry knowledge were sufficient . . . to find that his expert conclusions . . . were reliable").

Defendants also attack Prof. Torrance's conclusions by citing their own expert's critique of Prof. Torrance's report. Doc. 1848 at 9-10. Defendants' expert believes that Prof. Torrance's opinions are flawed because he failed to consider the trial court's decision denying Teva's pretrial motion for judgment as a matter of **[*140]** law. *Id.* Also, defendants' expert asserts that Prof. Torrance's conclusion that Teva had a relatively large probability of infringing one of the EpiPen patents doesn't comport with his opinion that Teva also had an above 70% chance of success in the Teva patent litigation. *Id. at 10*. These arguments go to the weight the court should give Prof. Torrance's opinion on class certification—not whether the court should exclude them altogether as unreliable.

The court rejects defendants' first argument supporting their motion to exclude Prof. Torrance's opinions under *Daubert*.

b. Professor Torrance's Opinions Sufficiently Fit with the Facts of the Case to Allow their Admission.

Second, defendants argue that Prof. Torrance's opinions about Teva's likelihood of success in the Teva patent litigation are untethered to the factual record because he relies on arguments that the parties never raised at trial in the Teva patent litigation, or ones that the parties waived during the course of the litigation. More specifically, defendants assert that Prof. Torrance's opinions are unreliable because he bases them on: (1) the patent prosecution history, even though the parties never raised this subject at trial **[*141]** in the Teva patent litigation; (2) an "unenforceability" defense based on inequitable conduct, even though Teva never raised this defense in the Teva patent litigation; and (3) an "obviousness" defense to patent infringement, even though Teva never asserted this defense in the Teva patent litigation.

Plaintiffs respond that Prof. Torrance doesn't offer opinions about Teva's likelihood of success *at trial*. Instead, Prof. Torrance opines about Teva's likelihood of prevailing "in any final adjudication by the Court of Appeals for the Federal Circuit." Doc. 1500-4 at 4-5 (Torrance Expert Report ¶ 3.a.). Thus, plaintiffs contend, defendants' criticisms that Prof. Torrance's opinions aren't tethered to the *trial* record don't matter for purposes of determining their reliability. And, even so, plaintiffs assert that the trial record supports Prof. Torrance's opinions.

The parties to the Teva patent litigation settled their dispute after they had tried their case to a district judge in a bench trial—but before the district judge had issued a decision. So, defendants argue, the trial record that the Federal Circuit would consider on appeal was complete. And, according to defendants, Prof. Torrance's **[*142]** opinions rely on arguments that Teva never asserted at trial or ones that it had waived at trial. Plaintiffs disagree.

First, plaintiffs explain that the patent's prosecution history is relevant because the Federal Circuit applies a two-step process when deciding patent infringement claims. *Vitronics Corp. v. Conceptronic, Inc., 90 F.3d 1576, 1581 (Fed. Cir. 1996)* (citing *Markman v. Westview Instruments, Inc., 52 F.3d 967, 976 (Fed. Cir. 1995))*. In the first step, the court determines "the proper construction of the asserted claim." *Id. at 1581-82* (citing *Markman, 52 F.3d at 976*). In the second step, the court determines "whether the accused method or product infringes the asserted claim as properly construed." *Id.*

The Federal Circuit has explained that "[t]he first step, claim construction, is a matter of law, which [the Federal Circuit] review[s] de novo." *Id. at 1582* (citing *Markman, 52 F.3d at 979*). And, when conducting this de novo review, the Federal Circuit looks "first to the intrinsic evidence of record, *i.e.*, the patent itself, including the claims, the specification and, if in evidence, *the prosecution history*." *Id.* (emphasis added). So, plaintiffs assert, Prof. Torrance properly relied on the prosecution history when forming his opinions about Teva's likelihood of success in the Teva patent litigation because, even though the parties may not have cited the prosecution history during trial, **[*143]** the Federal Circuit still could rely on the prosecution history during its de novo review of claim construction on appeal. The court agrees with plaintiffs. Prof. Torrance's reliance on the prosecution history does not render his opinions unreliable.

Next, plaintiffs argue that the unenforceability defense based on inequitable conduct could apply in the Teva patent litigation because the parties had identified it as a contested issue of fact and law in the Intelliject litigation (a lawsuit related to the Teva patent litigation). Doc. 1837-8 at 3 (Pls.' Statement of Contested Issues of Fact and Law ¶ 13 ("Whether Intelliject has proven by clear and convincing evidence that the '432 Patent is unenforceable due to patent misuse?")). Plaintiffs explain that a finding of unenforceability for the '432 Patent in the related Intelliject litigation would operate as *res judicata* in the Teva patent litigation, if the cases hadn't ended with the parties' settlements—ones that plaintiffs describe as "anticompetitive pay-for-delay settlement[s]." Doc. 1862 at 18.

Defendants counter that the defense asserted in the Intelliject litigation (and cited by plaintiffs) was unenforceability based on *patent misuse*—not unenforceability **[*144]** based on inequitable conduct. Indeed, the issue recited in the Statement of Contested Issues of Fact and Law reads: "Whether Intelliject has proven by clear and convincing evidence that the '432 Patent is unenforceable *due to patent misuse*?" Doc. 1837-8 at 3 (Pls.' Statement of Contested Issues of Fact and Law ¶ 13) (emphasis added). And, the court agrees with defendants that an inequitable conduct defense differs from a patent misuse defense. *See Resqnet.Com, Inc. v. Lansa, Inc., No. 01 Civ.3578(RWS), 2004 U.S. Dist. LEXIS 13579, 2004 WL 1627170, at *4 (S.D.N.Y. July 21, 2004)* ("Patent misuse and inequitable conduct are different defenses. Misuse is a defense based upon the idea that a patent properly procured has been broadened in scope impermissibly so as to be used to impose an unreasonable restraint in competition . . . [i]nequitable conduct, on the other hand, renders the patent unenforceable permanently, and involves concealing facts or being dishonest in the procurement of the patent"); *see also Electro Source, LLC v. Nyko Techs., Inc., Nos. CV 01-10825 DT (BQRx), CV 02-520 DT (BQRx), 2002 U.S. Dist. LEXIS 28436, 2002 WL 34536682, at *12 (C.D. Cal. Apr. 15, 2002)* (explaining that "patent misuse [claims] differ from . . . inequitable conduct claims" because "[i]nequitable conduct relates to the *means of obtaining* a patent, and deems any patent obtained by such means unenforceable" while "[p]atent misuse relates **[*145]** to the enforcement of a patent after it has been obtained").

Prof. Torrance's report suggests that certain actions taken by the patent inventors before the United States Patent and Trademark Office ("USPTO") could amount to inequitable conduct. *See* Doc. 1500-4 at 21 (Torrance Expert Report ¶ 49 (opining that the inventor's failure to file timely an Information Disclosure Statement "[a]t best . . . suggests carelessness, and, at worst, a desire to postpone consideration by the examiner of potentially damaging prior art")); *see also* Doc. 1497-4 at 30 (Sealed Torrance Expert Report ¶ 72 (explaining that, based on Prof. Torrance's review of the patent application history, it suggests that the inventors did not submit some potentially relevant prior art to the USPTO during prosecution)). But neither Teva nor Intelliject raised inequitable conduct as an affirmative defense in the underlying patent litigation. Thus, defendants argue, the inequitable conduct defense was waived. So, according to defendants, the trial court never would have considered the inequitable conduct defense in rendering its decision in the Teva patent litigation. And, Teva never could assert this defense in an appeal **[*146]** to the Federal Circuit because it had waived the defense.

The court agrees with defendants that it is unlikely that the Federal Circuit would consider an inequitable conduct defense based on the Teva patent litigation record. But it's not impossible. Generally, "'a federal appellate court does not consider an issue not passed upon below.'" *Golden Bridge Tech., Inc. v. Nokia, Inc., 527 F.3d 1318, 1322 (Fed. Cir. 2008)* (quoting *Singleton v. Wulff, 428 U.S. 106, 120, 96 S. Ct. 2868, 49 L. Ed. 2d 826 (1976))*. However, appellate courts also have "the discretion to decide when to deviate from this general rule of waiver . . . ." *Id.* (citing *Singleton, 428 U.S. at 121*); *see also Celgene Corp. v. Peter, 931 F.3d 1342, 1356 (Fed. Cir. 2019)* (recognizing that the Federal Circuit has "discretion to reach issues raised for the first time on appeal"). Although "[d]eparting from the general rule of waiver is appropriate only in limited circumstances," the Federal Circuit may consider an issue not presented to the lower tribunal when there is "an intervening change in the law" or when "the 'interest of justice' guides [the Federal Circuit] to consider the issue despite the fact that it was not raised below." *Celegene, 931 F.3d at 1356* (citations omitted).

When considering whether to exclude Prof. Torrance's opinion, the court is guided by *Rule 702*'s advisory committee's notes. They recognize that "rejection of expert testimony is the exception rather than the rule." *Fed. R. Evid. 702* advisory **[*147]** committee's notes to 2000 amendments; *see also In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2017 U.S. Dist. LEXIS 68501, 2017 WL 1738014, at *2 (D. Kan. May 4, 2017)*. While

Daubert requires the court to serve as a gatekeeper for expert testimony, "[v]igorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof" remain "the traditional and appropriate means of attacking shaky but admissible evidence." *Daubert, 509 U.S. at 596* (citation omitted). Ultimately, the "district court has 'considerable leeway in deciding in a particular case how to go about determining whether particular expert testimony is reliable.'" *In re Syngenta AG MIR 162 Corn Litig., 2017 U.S. Dist. LEXIS 68501, 2017 WL 1738014, at *2* (quoting *Kumho Tire, 526 U.S. at 152*); *see also Vining v. Enter. Fin. Grp., 148 F.3d 1206, 1218 (10th Cir. 1998)* ("The admission of expert testimony is left to the sound discretion of the trial court.").

Also, *Daubert* doesn't require the court to decide whether Prof. Torrance's opinions are "undisputably correct." *Etherton v. Owners Ins. Co., 829 F.3d 1209, 1217 (10th Cir. 2016)* (citation and internal quotation marks omitted). Instead, the court must determine whether "the method employed by the expert to reach his conclusion is scientifically sound and that the opinion is based on facts which sufficiently satisfy *Rule 702*'s reliability requirements." *Id. at 1217-18* (citations and internal quotation marks omitted). Thus, when performing **[*148]** the *Daubert* inquiry, the court should "'focus . . . solely on [the expert's] principles and methodology, not on the conclusions that they generate.'" *Id. at 1217* (quoting *Daubert, 509 U.S. at 595*).

The court is satisfied here that Prof. Torrance has used a reliable methodology to reach his opinions about Teva's likely success in the Teva patent litigation. Defendants' criticisms about his opinions—*i.e.*, that Prof. Torrance relied on defenses that Teva never asserted in the Teva patent litigation—go to the weight the court should give them on class certification. But, the court refuses to exclude his opinions from consideration.

Finally, plaintiffs assert that the "obviousness" defense to the validity of the '432 patent was at issue in both the Teva patent litigation and the Intelliject litigation. *See* Doc. 1837-8 at 2-3 (Pls.' Statement of Contested Issues of Fact and Law ¶¶ 7-9, 11, 12); *see also* Doc. 1837-9 at 2-3 (Teva's Statement of Contested Issues of Fact and Law ¶¶ C.—E.). Defendants concede that Teva asserted the obviousness defense in the Statement of Contested Issues of Fact and Law. Doc. 1888 at 12. But, they argue, Teva did not pursue this defense at trial. Defendants contend that Teva based its invalidity defense at **[*149]** trial on "the legal doctrine of anticipation"—and not that "the '432 patent was invalid for obviousness." *Id.* For support, defendants cite a single passage from the trial transcript where counsel clarified that Teva was "asserting an anticipation defense based on the *'429 patent*," but "not asserting derivation" or "prior invention." Doc. 1888-5 at 4 (Tr. 403:6-13) (emphasis added). With this statement, counsel may have limited Teva's use of the invalidity defense to anticipation based on the '429 patent, but it didn't waive the other obviousness defenses that Teva asserted based on the '316 and '686 patents. *Compare* Doc. 1837-9 at 2 (Teva's Statement of Contested Issues of Fact and Law ¶ C. ("Whether one or more of the asserted claims . . . of the '432 patent, are invalid as anticipated or obvious . . . by . . . the '429 patent")) *with id. at 2-3* (Teva's Statement of Contested Issues of Fact and Law ¶¶ D.—E. (asserting an invalid as obvious defense based on the '316 and '686 patents)). Based on this record, the court can't conclude that Teva waived its obviousness defense at trial such that the Federal Circuit would refuse to consider this defense on appeal. And, the court declines to find Prof. Torrance's opinions unreliable because he considered an obviousness defense **[*150]** when forming his conclusions about Teva's likelihood of success in a final adjudication before the Federal Circuit.

In sum, the court agrees with plaintiffs that the way in which Prof. Torrance considered the trial record and what the Federal Circuit could consider on appeal does not render his opinions unreliable or require their exclusion under *Daubert*. The court thus denies this aspect of defendants' Motion to Exclude Prof. Torrance's opinions.

c. Professor Torrance Adequately Applied Accepted Methods and Principles for Analyzing Patent Invalidity.

Last, defendants argue that Prof. Torrance's opinions are inadmissible because he did not analyze the validity of the '432 patent consistent with the governing law. Prof. Torrance opines that the '432 patent claims are "quite weak, and likely invalid" due to obviousness. Doc. 1500-4 at 31 (Torrance Expert Report ¶ 74); *see also 35 U.S.C. § 103* ("A patent for a claimed invention may not be obtained . . . if the differences between the claimed invention and the prior art are such that the claimed invention as a whole would have been obvious before the effective filing date of the claimed invention to a person having ordinary skill in the art to which the claimed invention pertains."). **[*151]** The Supreme Court has established a framework for analyzing whether a patent is invalid for obviousness under *35 U.S.C. § 103*. *KSR Int'l Co. v. Teleflex Inc., 550 U.S. 398, 406, 127 S. Ct. 1727, 167 L. Ed. 2d 705 (2007)*. Under that framework, "'the scope and content of the prior art are to be determined; differences between the prior art and the claims at issue are to be ascertained; and the level of ordinary skill in the pertinent art resolved.'" *Id.* (quoting *Graham v. John Deere Co., 383 U.S. 1, 17, 86 S. Ct. 684, 15 L. Ed. 2d 545 (1966))*.

Defendants assert that Prof. Torrance failed to apply this legal framework because his report neither (1) explains how he construed the claims of the '432 patent, nor (2) analyzes the prior art. Defendants thus contend that Prof. Torrance's opinions are unreliable because the expert never applied the accepted standard for analyzing patent invalidity due to obviousness.

Plaintiffs respond that Prof. Torrance's report both construes the claims and analyzes the prior art. Also, plaintiffs assert that Prof. Torrance confirmed that he performed this work in his deposition. For support, plaintiffs cite Prof. Torrance's report where he recited: "To form my opinion, I analyzed a variety of information, materials, and documents, the most relevant of which are the litigated patents themselves, the prosecution histories of those patents, and the materials **[*152]** and records related to the litigations." Doc. 1500-4 at 13 (Torrance Expert Report ¶ 27).

With respect to the patent itself, Prof. Torrance described how he reviewed the patent and explained how one must interpret the claims of the patent to understand the invention it protects. *Id. at 14* (Torrance Expert Report ¶¶ 29-30). Prof. Torrance also reviewed the patent's litigation history, including the trial court's *Markman* rulings. *Id. at 16, 29* (Torrance Expert Report ¶¶ 37, 71). And, he concluded that "the claim constructions adopted by the judge would have disadvantaged King and Meridian more than [Teva and Intelliject]." *Id. at 30* (Torrance Expert Report ¶ 71). Defendants respond that none of these passages explain *how* Prof. Torrance construed the claims. In his deposition, Prof. Torrance conceded that he included no "particular section on claim construction" in his report. Doc. 1849-1 at 17 (Torrance Dep. 231:24-232:16). But, Prof. Torrance explained, claim construction was something that he considered when forming his opinions and is found "throughout the report." *Id.* Plaintiffs don't provide any specific citations showing where Prof. Torrance construed the claims in the report.

With respect to the prior art, Prof. **[*153]** Torrance explains that he "reviewed the available prosecution histories of each of the patents at issue," taking a "particular interest [in] the variety of prior art references and legal grounds for rejection the examiners identified . . . ." Doc. 1500-4 at 15 (Torrance Expert Report ¶ 34); *see also id.* at 18 (Torrance Expert Report ¶ 42 (explaining that Prof. Torrance considered a number of factors when forming his conclusions including "the number and complexity of asserted patent claims in each patent" and "the volume of relevant prior art")). Based on his review, Prof. Torrance concluded the '432 patent's claimed invention included "key elements" such as "a lack of kickback and a second locked extended position of the needle cover" that make it "highly likely that there exists prior art relevant to auto-injectors that discloses these simple elements." *Id.* at 30-31 (Torrance Expert Report ¶ 74). Plaintiffs don't provide any specific citations showing exactly which prior art Prof. Torrance considered when forming his opinions. As Prof. Torrance testified, he "refer[s] to the prior art usually as a group" in his report. Doc. 1849-1 at 27 (Torrance Dep. 346:9-25). But also, Prof. Torrance testified about specific **[*154]** prior art that he considered in his report. *Id.* (Torrance Dep. 347:5-348:22 (referring to his discussion of the '686, '458, and '336 patents in ¶¶ 48.a., 51, 60, and 62 of his expert report)).

The court agrees with defendants. Prof. Torrance's report never explains how he construed the claims or how he compared those construed claims to the prior art before reaching his conclusion that the '432 patent is likely invalid due to obviousness. Instead, the report contains general references about his analysis of the claims and prior art. *See, e.g.*, 1500-4 at 27, 29, 30-31, 36 (Torrance Expert Report ¶¶ 65, 66, 70, 74-76, 92). And, plaintiffs' only response to defendants' argument on this point is Prof. Torrance's vague explanation that the claim construction analysis is found "throughout the report." Doc. 1862 at 15 (citing Doc. 1849-1 at 27 (Torrance Dep. 232:15)).

Nevertheless, the court declines to exclude Prof. Torrance's opinion on this basis. Prof. Torrance correctly cites the law governing patent validity. *See, e.g.*, Doc. 1500-4 at 12-13 (Torrance Expert Report ¶ 26 (citing *KSR Int'l Co., 550 U.S. 398, 127 S. Ct. 1727, 167 L. Ed. 2d 705*)). And, Prof. Torrance says he applied this law to reach his conclusions. *See id.* at 23-24, 27, 30-31, 36 (Torrance Expert Report ¶¶ 56, 57, 65, 74, 92). Defendants **[*155]** have the better end of the criticisms that the report lacks an explanation *how* Prof. Torrance reached his conclusions after applying the appropriate governing standard. But that doesn't mean the court should exclude his opinions. While closer than other decisions, these criticisms, the court finds, go to the weight of his opinions, not their admissibility. The court thus denies defendant's Motion to Exclude Prof. Torrance's opinions on this ground.

For all these reasons, the court denies defendants' Motion to Exclude Opinions and Proposed Testimony of Andrew K. Torrance.

III. Conclusion

This Order has ruled the five pending motions seeking to exclude certain experts' opinions from the court's consideration of the putative class members' Motion for Class Certification.

For reasons explained above, the court denies the two motions filed by the putative class plaintiffs—*i.e.*, their (1) Motion to Strike the Partial Testimony of Dr. Michael Blaiss (Doc. 1584), and (2) Motion to Strike the Testimony of Prof. James Hughes (Doc. 1852).

The court grants in part and denies in part defendants' Motion to Exclude Expert Opinions of Professor Einer Elhauge (Doc. 1604). The court grants the motion to **[*156]** exclude his opinions about Auvi-Q market foreclosure based on Mylan's EpiPens4Schools program because plaintiffs since have abandoned this theory. In all other respects, the court denies defendants' Motion to Exclude Expert Opinions of Professor Einer Elhauge.

And, the court denies the other two motions filed by defendants—*i.e.*, their (1) Motion to Exclude Opinions and Proposed Testimony of Andrew K. Torrance (Doc. 1847), and (2) Motion to Exclude Expert Opinions of Professor Meredith Rosenthal (Doc. 1602).

IT IS THEREFORE ORDERED BY THE COURT THAT the putative class plaintiffs' Motion to Strike the Partial Testimony of Dr. Michael Blaiss (Doc. 1584) is denied.

IT IS FURTHER ORDERED THAT defendants' Motion to Exclude Expert Opinions of Professor Meredith Rosenthal (Doc. 1602) is denied.

IT IS FURTHER ORDERED THAT defendants' Motion to Exclude Expert Opinions of Professor Einer Elhauge (Doc. 1604) is granted in part and denied in part, as specified in this Order.

IT IS FURTHER ORDERED THAT defendants' Motion to Exclude Opinions and Proposed Testimony of Andrew K. Torrance (Doc. 1847) is denied.

IT IS FURTHER ORDERED THAT the putative class plaintiffs' Motion to Strike the Testimony of Professor **[*157]** James Hughes (Doc. 1852) is denied.

IT IS SO ORDERED.

Dated this 27th day of February, 2020, at Kansas City, Kansas.

LexisNexis® Headnotes

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

Civil Procedure > Pleading & Practice > Motion Practice > Supporting Memoranda

HN1[] **Motion Practice, Content & Form**

The court's local rules limit briefing on motions to the motion, a memorandum in support, a response, and a reply. D. Kan. R. 7.1(a) & (c). Surreplies are typically not allowed. On other grounds, Instead, sur-replies are permitted only with leave of court under rare circumstances. For example, when a moving party raises new material for the first time in a reply, the district court has discretion to grant leave to file a sur-reply to afford the opposing party an opportunity to respond to the new material. The rules limiting sur-replies are not only fair and reasonable, but they assist the court in defining when briefed matters are finally submitted and in minimizing the battles over which side should have the last word.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN2[] Class Actions, Certification of Classes

The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only. The court has considerable discretion when deciding whether to certify a class action. But when exercising this discretion, district courts must conduct a rigorous analysis and decide whether the putative class satisfies the requirements of *Fed. R. Civ. P. 23*.

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN3[] Class Actions, Prerequisites for Class Action

The elements of the class certification standard are (1) numerosity, (2) commonality, (3) typicality, and (4) adequate representation, plus one of the requirements established by *Fed. R. Civ. P. 23(b)(1)*, *(b)(2)*, or *(b)(3)*. *Fed. R. Civ. P. 23(a)-(b)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > Remedies > Injunctions

Civil Procedure > Judgments > Declaratory Judgments > Federal Declaratory Judgments

HN4[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23(b)(2) applies when final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole. *Rule 23(b)(3)*-based motions require plaintiffs to demonstrate that questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN5[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23 does not set forth a mere pleading standard. As the party requesting class certification, plaintiffs bear the burden of affirmatively demonstrating compliance with the rule's requirements. Plaintiffs must be prepared to prove that there are in fact sufficiently numerous parties, common questions of law or fact, etc. When deciding whether plaintiffs have met their burden, the court must accept the substantive allegations of the complaint as true, but it cannot blindly rely on conclusory allegations which parrot *Rule 23*. The court is not limited to the pleadings but may probe behind the pleadings' and examine the facts and evidence in the case. Actual, not presumed, conformance with Rule 23(a) is required.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN6[] Class Actions, Certification of Classes

The court's rigorous analysis frequently will entail some overlap with the merits of the plaintiff's underlying claim. But the careful examination and rigorous analysis requirements do not authorize mini-trials to determine whether the class, if certified, actually could prevail on the merits of their claims. Fed. R. Civ. P. 23 grants courts no license to engage in free-ranging merits inquiries at the certification stage. Rather, merits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the Fed. R. Civ. P. 23 prerequisites for class certification are satisfied.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN7[] Class Actions, Certification of Classes

Defining the class is of critical importance because it identifies the persons (1) entitled to relief, (2) bound by a final judgment, and (3) entitled under Fed. R. Civ. P. 23(c)(2) to the best notice practicable in a Rule 23(b)(3) action. Thus, the class definition must be precise, objective and presently ascertainable.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN8[] Class Actions, Certification of Classes

Case authorities permit the court to refine the class definitions. A court is not bound by the class definition proposed in the complaint and should not dismiss the action simply because the complaint seeks to define the class too broadly. Holding plaintiffs to the plain language of their definition would ignore the ongoing refinement and give-and-take inherent in class action litigation, particularly in the formation of a workable class definition. If the class definition should require tailoring as the litigation progresses, the Court and parties are authorized to do so. Fed. R. Civ. P. 23(c)(1), (d).

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN9[] Class Actions, Prerequisites for Class Action

Plaintiffs seeking to certify a class under Fed. R. Civ. P. 23 must first satisfy Rule 23(a)'s prerequisites of numerosity, commonality, typicality, and adequacy of representation, along with the elements for one of the three types of class actions described in Rule 23(b).

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

HN10[] Class Actions, Certification of Classes

It is unsettled whether ascertainability is a separate and distinct requirement for class certification under *Fed. R. Civ. P. 23(b)(3)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN11[] Class Actions, Certification of Classes

The Seventh Circuit's "weak" version of ascertainability requires that the class definition must not be too vague, the class must not be defined by subjective criteria, and the class must not be defined in terms of success on the merits. The court predicts that the Tenth Circuit, if confronted with this question, would decline to recognize ascertainability as a separate, unstated requirement of *Fed. R. Civ. P. 23* requiring certification movants to satisfy the more stringent ascertainability standard adopted by the Third Circuit. Instead, the court predicts that the Tenth Circuit would follow the Seventh Circuit's approach, applying the less restrictive ascertainability test on certification.

Civil Procedure > Special Proceedings > Class Actions > Class Members

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN12[] Class Actions, Class Members

As long as at least one plaintiff has standing with respect to each claim alleged, it will satisfy the injury requirement of standing.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN13[] Prerequisites for Class Action, Numerosity

To be certified, a proposed class must be so numerous that joinder of all members is impracticable. *Fed. R. Civ. P. 23(a)(1)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN14[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23 requires a court to find that there are questions of law or fact common to the class. *Fed. R. Civ. P. 23(a)(2)*. Commonality requires the plaintiff to demonstrate that the class members have suffered the same injury. This same injury requirement does not mean merely that they have all suffered a violation of the same provision of law. Instead, the claims of the putative class plaintiffs must depend upon a common contention that is of such a nature that it is capable of classwide resolution. This requirement means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke. Although even a single common question will do, the focus is not on common questions but on the capacity of a class-wide proceeding to generate common answers apt to drive the resolution of the litigation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN15[] **Prerequisites for Class Action, Commonality**

Plaintiffs satisfy the commonality requirement where numerous class-wide questions of law and fact may be resolved with common answers drawn from common proof. As the Tenth Circuit has recognized, any one of these questions alone would satisfy the commonality requirement. A finding of commonality requires only a single question of law or fact common to the entire class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN16[] **Prerequisites for Class Action, Typicality**

The typicality element requires a finding that the claims of representative plaintiffs are typical of the claims of the proposed class. *Fed. R. Civ. P. 23(a)(3)*. But, the named plaintiffs' interests and claims need not be identical to those of the putative class members. As long as the claims of the named plaintiff and class members are based on the same legal or remedial theory, differing fact situations of the class members do not defeat typicality.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN17[] **Prerequisites for Class Action, Typicality**

The typicality requirement asks whether a sufficient relationship exists between the injury to the named plaintiff and the conduct affecting the class, so that the court may properly attribute a collective nature to the challenged conduct. In other words, when such a relationship is shown, a plaintiff's injury arises from or is directly related to a wrong to a class, and that wrong includes the wrong to the plaintiff. Thus, a plaintiff's claim is typical if it arises from the same event or practice or course of conduct that gives rise to the claims of other class members, and if his or her claims are based on the same legal theory.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN18[] **Prerequisites for Class Action, Commonality**

The typicality and commonality requirements are similar because both serve as guideposts for determining whether the named plaintiff's claim and the class claims are so interrelated that the interests of the class members will be fairly and adequately protected. The typicality requirement has been liberally construed by courts, and in the antitrust context, typicality will be established by plaintiffs and all class members alleging the same antitrust violations by defendants. If the claims of the named plaintiffs and putative class members involve the same conduct by the defendant, typicality is established regardless of factual differences.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN19[] **Claims, Fraud**

First-party reliance is not required to establish a RICO claim premised on the predicate act of mail fraud. The U.S. Supreme Court has recognized that RICO provides a cause of action for any person injured in his business or property by reason of a violation of the statute. *18 U.S.C.S. § 1964(c)*. And, the Court has found it "difficult to derive a first-party reliance requirement" from the words of the statute. Thus, the Supreme Court refused to read a first-party reliance requirement into a statute that by its terms suggests none.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN20[] **Prerequisites for Class Action, Adequacy of Representation**

A certified class must have representative parties who will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)(4)*. The adequacy requirement asks whether the named plaintiffs and counsel (a) have any conflicts of interest with other class members and (b) will prosecute the action vigorously on behalf of the class. Minor conflicts among class members do not defeat certification. Only a fundamental conflict about the specific issues in controversy will prevent a named plaintiff from representing the interests of the class adequately. A fundamental conflict exists where some class members claim an injury resulting from conduct that benefited other class members. Defeating the adequacy requirement of *Rule 23* requires a conflict that is more than merely speculative or hypothetical.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN21[] **Prerequisites for Class Action, Adequacy of Representation**

In the context of the class action adequacy requirement, binding authority from the Tenth Circuit recognizes that defendants can claim no interest in the method of distributing the aggregate damages award among the class members.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN22[] **Prerequisites for Class Action, Superiority**

To certify a class under *Fed. R. Civ. P. 23(b)(3)*, a class action proceeding must be superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*. It is enough that class treatment is superior because it will achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN23[] **Prerequisites for Class Action, Predominance**

Fed. R. Civ. P. 23(b)(3) also requires a plaintiff to show that common questions subject to generalized, class-wide proof predominate over individual questions. This requirement does not mean a plaintiff must show that all of the elements of the claim entail questions of fact and law that are common to the class or that the answers to those common questions are dispositive of the claim. Instead, the predominance inquiry asks whether the common, aggregation-enabling issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues. To decide whether a plaintiff can satisfy the predominance requirement, a court must first characterize the issues in the case as common or not, and then weigh which issues predominate. Critically, so long as at least one common issue predominates, a plaintiff can satisfy *Rule 23(b)(3)*—even if individual issues (such as damages) remain and require the court to try them separately. The determination whether questions of law or fact common to class members predominate begins, of course, with the elements of the underlying cause of action. Fed. R. Civ. P. 23(b)(3).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN24[] Prerequisites for Class Action, Predominance

The fact that damages may have to be ascertained on an individual basis is not, standing alone, sufficient to defeat class certification. Instead, the Tenth Circuit has explained, material differences in damages determinations will destroy predominance only if those individualized issues will overwhelm questions common to the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN25[] Prerequisites for Class Action, Predominance

In the context of predominance, the court has concluded that the U.S. Supreme Court does not require a class-wide damages model for certification under Fed. R. Civ. P. 23(b)(3).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN26[] Prerequisites for Class Action, Predominance

The court can not decide the issue of whether plaintiffs' expert reports actually prove classwide damages—on a certification motion. At the class certification stage, plaintiffs need not prove that the predominating question will be answered in their favor; ultimate failure of proof on essential element dooms claim, but does not mean individualized claims predominate. The issue at class certification is not which expert is the most credible, or the most accurate modeler, but rather have the plaintiffs demonstrated that there is a way to prove a class-wide measure of damages through generalized proof. To determine predominance, a court need not plunge into the weeds of an expert dispute about potential technical flaws in an expert methodology.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN27[] Prerequisites for Class Action, Predominance

At class certification, plaintiffs need not prove that a proposed method for determining damages is valid; instead, the proper inquiry at this stage asks whether damages are capable of proof on a classwide basis. And, if each expert's approach is plausible based on classwide proof and does not rely on or implicate individualized questions that will predominate over common ones, it is sufficient at the class certification stage to note that both sides' expert methods are plausible approaches.

Torts > Remedies > Damages > Collateral Source Rule

HN28[] Damages, Collateral Source Rule

The Tenth Circuit has explained that the collateral source rule is derived from the common law and posits that payments made to or benefits conferred on the injured party from other sources are not credited against the tortfeasor's liability, although they cover all or a part of the harm for which the tortfeasor is liable. This rule thus permits an injured plaintiff to recover more than the damages he has suffered as the result of an injury. The Circuit has explained the rationale for applying the rule: Public policy favors giving the plaintiff a double recovery rather than allowing a wrongdoer to enjoy reduced liability simply because the plaintiff received compensation from an independent source. Thus, courts have applied the rule when the injured plaintiff has been compensated by, for example, the plaintiff's own insurance.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN29[] **Class Actions, Certification of Classes**

The court and parties are authorized to narrow the class definitions if the class definition should require tailoring as the litigation progresses.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN30[] **Class Actions, Certification of Classes**

The Tenth Circuit explained that *Fed. R. Civ. P. 23*'s certification requirements neither require all class members to suffer harm or threat of immediate harm nor Named Plaintiffs to prove class members have suffered such harm. The Circuit recognized: A class will often include persons who have not been injured by the defendant's conduct. Such a possibility or indeed inevitability does not preclude class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN31[] **Class Actions, Certification of Classes**

A class will almost inevitably include persons who have not been injured by the defendant's conduct, and that fact (or even inevitability) does not preclude certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Evidence > Burdens of Proof > Initial Burden of Persuasion

HN32[] **Prerequisites for Class Action, Predominance**

Plaintiffs' burden at certification is to show predominance; they need not convince the court that their evidence will prevail at trial.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN33[] Class Actions, Certification of Classes

The court has followed Seventh Circuit precedent when analyzing whether the presence of uninjured class members defeats certification. As the Seventh Circuit has held, a class should not be certified if it is apparent that it contains a great many persons who have suffered no injury at the hands of the defendant. If the definition is so broad that it sweeps within it persons who could not have been injured by the defendant's conduct, it is too broad. But this is distinguishable from a proposed class consisting largely (or entirely, for that matter) of members who are ultimately shown to have suffered no harm, as that may not mean that the class was improperly certified but only that the class failed to meet its burden of proof on the merits. There is no precise measure for a "great" many. How many is too many is a matter of degree, and will turn on the facts as they appear from case to case.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN34[] Class Actions, Certification of Classes

The Seventh Circuit has not provided a formula for determining how many uninjured class members is a great many that would preclude certification. The Seventh Circuit says too many is a matter of degree, and will turn on the facts as they appear from case to case.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN35[] Prerequisites for Class Action, Predominance

In the context of predominance, depending on the ultimate size of the class at issue, the factual record eventually may develop more fully and show that the number of uninjured class members is "more significant" than it initially appears. As the Seventh Circuit recognizes, the court is free to revisit this issue if that, in fact, occurs.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Evidence > Burdens of Proof > Burdens of Production

HN36[] Prerequisites for Class Action, Predominance

As the Tenth Circuit has recognized, class-wide proof is not required for all issues on certification. Instead, *Fed. R. Civ. P. 23(b)(3)* simply requires a showing that the questions common to the class predominate over individualized questions. So long as at least one common issue predominates, a plaintiff can satisfy *Rule 23(b)(3)*—even if there remain individual issues, such as damages, that must be tried separately.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN37[] Grounds for Injunctions, Irreparable Harm

The Tenth Circuit has held, in the *Fed. R. Civ. P. 23(b)(2)* context, that only named plaintiffs in a class action seeking prospective injunctive relief must demonstrate standing by establishing they are suffering a continuing injury or are under an imminent threat of being injured in the future.

Civil Procedure > ... > Justiciability > Standing > Personal Stake

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN38[] Standing, Personal Stake

U.S. Const. art. III standing does not require that each member of a class submit evidence of personal standing.

Civil Procedure > Special Proceedings > Class Actions > Class Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN39[] Class Actions, Class Members

Unnamed plaintiffs need not make any individual showing of standing in order to obtain relief. Whether or not the named plaintiff who meets individual standing requirements may assert the rights of absent class members is neither a standing issue nor a U.S. Const. art. III case or controversy issue but depends rather on meeting the prerequisites of *Fed. R. Civ. P. 23* governing class actions.

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN40[] Class Actions, Class Members

The court has refused to apply a standard—one not adopted by the Tenth Circuit—that would preclude certification without a showing that class members may be determined in an administratively feasible manner. When a class action involves an aggregate damage calculation, the identity of particular class members does not implicate the defendant's due process interest at all because the addition or subtraction of individual class members affects neither the defendant's liability nor the total amount of damages it owes to the class.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN41[] Racketeer Influenced & Corrupt Organizations, Claims

When considering whether the *Fed R. Civ. P. 23* predominance requirement is satisfied in a RICO action, the court must survey the elements of the class's RICO claims to consider (1) which of those elements are susceptible to generalized proof, and (2) whether those that are so susceptible predominate over those that are not. So, the analysis whether questions of law or fact common to class members predominate begins, of course, with the elements of the underlying cause of action. *Fed. R. Civ. P. 23*. Or, more simply, deciding whether a class can rely on classwide proof starts with what the law requires the class to prove.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN42[] Racketeer Influenced & Corrupt Organizations, Claims

RICO establishes a civil cause of action for persons injured as a result of a prohibited racketeering activity. *18 U.S.C.S. § 1962(c)*. A RICO violation has four elements: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity. To prove a RICO violation, a plaintiff must show that the defendant violated the RICO statute, and the plaintiff was injured by reason of that violation. *18 U.S.C.S. § 1962*; *18 U.S.C.S. § 1964(c)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN43[] Racketeer Influenced & Corrupt Organizations, Claims

The Tenth Circuit has explained that RICO's by reason of requirement requires a plaintiff to show a RICO predicate offense not only was a but for cause of his injury, but was the proximate cause as well. Sufficiently establishing the element of causation—both actual and proximate—is crucial to proving any violation of RICO.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN44[] Racketeer Influenced & Corrupt Organizations, Claims

The U.S. Supreme Court has defined RICO proximate causation as a flexible concept that does not lend itself to a black-letter rule that will dictate the result in every case. Proximate cause provides a label generically for the judicial tools used to limit a person's responsibility for the consequences of that person's own acts. And, it includes a particular emphasis on the demand for some direct relation between the injury asserted and the injurious conduct alleged. Thus, when a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries. The Supreme Court has instructed that no need exists to broaden the universe of actionable harms to permit RICO suits by parties who have been injured only indirectly.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN45[] Racketeer Influenced & Corrupt Organizations, Claims

In the context of RICO claims premised on predicate acts of mail fraud, the U.S. Supreme Court has held that a plaintiff is not required to plead that he is a victim of the defendant's underlying crime (e.g., that he relied on the fraudulent mailings) to establish a direct injury. Rather, a plaintiff may establish proximate causation by plausibly pleading that his business or property has been directly injured as a result of the defendants' *18 U.S.C.S. § 1962* violation.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN46[] Racketeer Influenced & Corrupt Organizations, Claims

When a federal court decides whether issues of RICO causation satisfy the *Fed. R. Civ. P. 23* predominance inquiry, the question is whether the link between defendants' actions and the class's injuries can be adduced through common evidence. The Tenth Circuit has explained that, in RICO actions, individualized issues of reliance often preclude a finding of predominance. Since reliance is often a highly idiosyncratic issue that might require unique evidence from individual plaintiffs, it may present an impediment to the economies of time and scale that encourage class actions as an alternative to traditional litigation.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN47[] **Racketeer Influenced & Corrupt Organizations, Claims**

Class certification of a RICO claim is proper when causation can be established through an inference of reliance where the behavior of plaintiffs and the members of the class cannot be explained in any way other than reliance upon the defendant's conduct. In such a situation, where circumstantial evidence of reliance can be found through generalized, classwide proof, then common questions will predominate and class treatment is valuable in order to take advantage of the efficiencies essential to class actions. The causation element is susceptible to generalized proof and thus cannot defeat class certification under *Fed. R. Civ. P. 23(b)(3)*'s predominance requirement. when class allegations are based on a single, common scheme, class members share the relevant circumstantial evidence in common, thus making class-wide proof possible.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Types of Evidence > Testimony > Expert Witnesses

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN48[] **Class Actions, Certification of Classes**

Persuasiveness of an expert's opinion showing classwide liability is, in general, a matter for the jury.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN49[] **Prerequisites for Class Action, Predominance**

When addressing the issue of uninjured class members—the court has recognized that a class will almost inevitably include persons who have not been injured by the defendant's conduct, and that fact (or even inevitability) does not preclude certification. Instead, a class is too broad to permit certification only if it includes a great number of members who could not have been harmed by the defendant's conduct (as opposed to a great number who ultimately are shown to have suffered no harm).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > Special Proceedings > Class Actions > Class Members

HN50[] **Racketeer Influenced & Corrupt Organizations, Claims**

The court can revise its certification decision or even limit plaintiffs' use of certain factual theories to support their RICO class claim. *Fed. R. Civ. P. 23(d)(1)(A)* provides that in conducting an action under this rule, the court may issue orders that determine the course of proceedings or prescribe measures to prevent undue repetition or complication in presenting evidence or argument. A district court may create subclasses sua sponte as a way to segregate plaintiffs with different factual and individual circumstances used to support their claim. Certifying subclass serves several purposes including an ability to conduct the trial in a more orderly manner, by tying the order of proof to particular claims raised by the individual subclasses and one possible method of developing proper subclasses would divide the present class based on the commonality of the class members' particular circumstances or the type of harm the class members allegedly have suffered.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN51[] Racketeer Influenced & Corrupt Organizations, Claims

First-party reliance is not required to establish a RICO claim that relies on the predicate act of mail fraud. Instead, RICO provides a cause of action for any person injured in his business or property by reason of a violation of the statute. *18 U.S.C.S. § 1964(c)*. The U.S. Supreme Court has reasoned that this statutory language suggests a breadth of coverage not easily reconciled with an implicit requirement that the plaintiff show reliance in addition to injury in his business or property.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN52[] Racketeer Influenced & Corrupt Organizations, Claims

Issues of reliance can be disposed of on a classwide basis without individualized attention at trial. For example, where circumstantial evidence of reliance can be found through generalized, classwide proof, then common questions will predominate and class treatment is valuable in order to take advantage of the efficiencies essential to class actions.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN53[] Racketeer Influenced & Corrupt Organizations, Claims

In certain circumstances it is beneficial to permit a commonsense inference of reliance applicable to the entire class to answer a predominating question as required by *Fed. R. Civ. P. 23*. And, in the RICO context, class certification is proper when causation can be established through an inference of reliance where the behavior of plaintiffs and the members of the class cannot be explained in any way other than reliance upon the defendant's conduct.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > Weight & Sufficiency

HN54[] Jury Trials, Province of Court & Jury

Ultimately, it is a jury's task to weigh the individual testimony presented by a defendant against the aggregate and circumstantial evidence presented by plaintiffs.

Antitrust & Trade Law > Regulated Practices > Private Actions

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN55[] **Regulated Practices, Private Actions**

At the class certification stage, any model supporting a plaintiff's damages case must be consistent with its liability case. Plaintiffs must tie each theory of antitrust impact to an exact calculation of damages.

Antitrust & Trade Law > Regulated Practices > Private Actions

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN56[] **Regulated Practices, Private Actions**

The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. At the certification stage, plaintiffs do not have to prove impact; instead, they need only to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members.

Torts > ... > Multiple Defendants > Concerted Action > Civil Conspiracy

HN57[] **Concerted Action, Civil Conspiracy**

Members of a conspiracy are liable for acts committed by their co-conspirators in furtherance of the conspiracy. The law on civil conspiracy imposes liability on co-conspirators for acts that are a reasonably foreseeable consequence of the scheme.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Torts > ... > Multiple Defendants > Concerted Action > Civil Conspiracy

HN58[] **Prerequisites for Class Action, Predominance**

Proof of a conspiracy is a common question that may predominate over the other issues in the case and has the effect of satisfying the first prerequisite in *Fed. R. Civ. P. 23(b)(3)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN59[] **Deceptive & Unfair Trade Practices, State Regulation**

States apply different tests when determining what qualifies as unfair conduct prohibited by a particular consumer protection statute.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN60[] Deceptive & Unfair Trade Practices, State Regulation

The state laws use a variety of tests to define the form of conduct that will qualify as anticompetitive or unfair conduct prohibited under the consumer statutes. Some states consider the following factors: (1) whether the practice offends public policy, the common law, or otherwise; (2) whether it is immoral, unethical, oppressive, or unscrupulous; or (3) whether it causes substantial injury to consumers. Other states examine whether the act or practice: (1) causes or is likely to cause substantial injury to consumers; (2) which is not reasonably avoidable by the consumer; and (3) not outweighed by countervailing benefits to consumers or to competition.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN61[] Deceptive & Unfair Trade Practices, State Regulation

Differences in state laws do not always preclude class certification under *Fed. R. Civ. P. 23(b)(3)*'s predominance requirement. Courts have found class certification warranted when the idiosyncratic differences between state consumer protection laws are not sufficiently substantive to predominate over the shared claims. But varying state laws may defeat predominance in other situations. (In a multi-state class action, variations in state law may swamp any common issues and defeat predominance.). Indeed, the Supreme Court has observed that differences in state law can compound the disparities among the factual questions, thus undermining class cohesion.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN62[] Prerequisites for Class Action, Commonality

Courts have declined to certify class actions when the legal differences among varying state laws dominate the common questions.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN63[] Equitable Relief, Quantum Meruit

Unjust enrichment claims generally require plaintiffs to prove three things: (a) defendant received a benefit; (b) at plaintiff's expense; and (c) retention of the benefit would be unjust without compensation. The basic elements of a claim based on a theory of unjust enrichment are threefold: (1) a benefit conferred upon the defendant by the plaintiff; (2) an appreciation or knowledge of the benefit by the defendant; and (3) the acceptance or retention by the defendant of the benefit under such circumstances as to make it inequitable for the defendant to retain the benefit without payment of its value.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN64[] Class Actions, Certification of Classes

The court has noted that differences among state law definitions of unjust enrichment and its availability as a remedy make federal courts, in general, reluctant to certify a nationwide class on this theory. Because of such variations among state laws, federal courts have generally refused to certify a nationwide class based upon a theory of unjust enrichment.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Prerequisites for Class Action

Civil Procedure > Remedies > Injunctions > Grounds for Injunctions

HN65[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(b)(2) allows a court to certify a class action if the requirements of *Rule 23(a)* are satisfied and if the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole. *Fed. R. Civ. P. 23(b)(2)*. The Tenth Circuit has explained that *Rule 23(b)(2)* demands at the class certification stage plaintiffs describe in reasonably particular detail the injunctive relief they seek such that the district court can at least conceive of an injunction that would satisfy *Rule 65(d)*'s requirements, as well as the requirements of *Rule 23(b)(2)*.

Civil Procedure > Remedies > Injunctions

HN66[] Remedies, Injunctions

Fed. R. Civ. P. 65(d) requires that injunctions be specific in terms and describe in reasonable detail, and not by reference to the complaint or other document, the act or acts sought to be restrained. *Fed. R. Civ. P. 65(d)*.

Civil Procedure > ... > Class Actions > Class Attorneys > Appointments

HN67[] Class Attorneys, Appointments

Fed. R. Civ. P. 23(g)(1) requires that a court certifying a class must appoint class counsel. When making this appointment, the court must consider: (i) the work counsel has done in identifying or investigating potential claims in the action; (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action; (iii) counsel's knowledge of the applicable law; and (iv) the resources that counsel will commit to representing the class. *Fed. R. Civ. P. 23(g)(1)(A)*. The court may appoint an applicant as class counsel only if the applicant is adequate under *Rule 23(g)(1)*'s criteria and if the applicant will adhere to *Rule 23(g)(4)*'s requirement that the applicant fairly and adequately represent the interests of the class. *Fed. R. Civ. P. 23(g)(2)*.

Civil Procedure > Special Proceedings > Class Actions > Notice of Class Action

HN68[] Class Actions, Notice of Class Action

When a court certifies a *Fed. R. Civ. P. 23(b)(3)* class, *Rule 23(c)(2)(B)* provides the court must direct to class members the best notice practicable under the circumstances, including individual notice to all members who can be identified through reasonable effort.

Judges: Daniel D. Crabtree, United States District Judge.

Opinion by: Daniel D. Crabtree

Opinion

MEMORANDUM AND ORDER

Class plaintiffs filed a motion for class certification (Doc. 1353), seeking to represent five classes of end-payors in the United States who paid or reimbursed others for some or all of the purchase price of branded or authorized generic EpiPens. Plaintiffs allege that the Mylan defendants (composed of Mylan N.V., Mylan Specialty, L.P., Mylan Pharmaceuticals, Inc., and Mylan's CEO Heather Bresch) as distributors of the EpiPen, and the Pfizer defendants (composed of Pfizer, Inc., King Pharmaceuticals, Inc., and Meridian Medical Technologies, Inc.) as manufacturers of the EpiPen, have maintained a monopoly over the epinephrine auto-injector ("EAI") market and its profitable revenues by devising an illegal scheme to monopolize the market for EAI devices. For the reasons explained below, the court grants the motion in part and denies it in part.

The Consolidated Class Action Complaint ("Class Complaint") (Doc. 60) asserts the collective **[*28]** claims of five consumer class cases transferred by the Judicial Panel on Multidistrict Litigation.[1] The Class Complaint asserts federal and state antitrust claims, federal RICO Act violations, various state consumer protection law violations, and unjust enrichment claims. The Class Complaint asserts its claims against the two groups of defendants who either sell or manufacture the EpiPen, the Mylan defendants and the Pfizer defendants. When referring to both sets of defendants, this Order calls them, collectively, "defendants."

TABLE OF CONTENTS

[1] The JMPL also transferred a case filed by Sanofi-Aventis U.S. LLC ("Sanofi") as part of this Multidistrict Litigation. It proceeds on a separate track, and this certification motion does not affect the claims or defenses in Sanofi's case.

I. Factual Background[2]

The EpiPen is a portable EAI device used to administer epinephrine to treat an anaphylactic reaction to an allergen. In 2007, Mylan acquired the right to market and distribute the EpiPen. Pfizer supplies Mylan with 100% of its EpiPen supply through two wholly-owned subsidiaries—King Pharmaceuticals, Inc., and Meridian Medical Technologies, Inc.—who manufacture the epinephrine and hold the EpiPen patents. Since at least 2009, Mylan's market share of EAI devices in the United States EAI market has remained above 80%. And, since 2009, Mylan's market share consistently has exceeded 90%, and, in 2012, its share was almost 100%. During the same time—and while the cost of the EpiPen's dose of epinephrine has remained about $1—Mylan has raised the EpiPen's price by more than 600%. In 2007, Mylan priced the EpiPen at $100. By 2016, **[*30]** Mylan was charging more than $600. In 2015, Mylan announced that the EpiPen had reached $1 billion in annual sales for the second consecutive year—up from $200 million in 2007.

Mylan's Dealings with Pharmacy Benefit Managers (PBMs)

Pharmacy Benefit Managers ("PBMs") are third-party administrators of prescription drug programs for commercial health plans, self-insured employer plans, Medicare Part D plans, the Federal Employees Health Benefits Program, and state government employee plans. More specifically, PBMs administer a health coverage provider's prescription benefit program by developing the coverage provider's formulary (the list of prescription benefits included in the coverage at various pricing "tiers"), processing claims, creating a network of retail pharmacies who provide discounts in exchange for access to a provider's plan participants, and negotiating with drug manufacturers. A significant majority of patients with prescription drug insurance coverage receive their benefits through a third-party payor whose drug formulary is determined by a PBM. From 2013 to 2015, commercial third-party payors accounted for about 71% of the EAI drug device market in the United States. So, **[*31]** for a competitor to enter and compete vigorously in the EAI drug device market, it is imperative that the competitor access these third-party payors' drug formularies.

Between 2013 and 2015, Mylan significantly increased the EpiPen's price. Plaintiffs allege Mylan then used the additional profit margins to offer PBMs significantly higher rebates and percentage discounts if the PBM would provide exclusive or preferred placement for EpiPen on the PBM's drug formulary. In 2013, when Sanofi launched a

---

[2] To determine whether plaintiffs have met their burden of affirmatively demonstrating compliance with *Rule 23*'s requirements, the court "must accept the substantive allegations of the complaint as true." *Shook v. El Paso Cty., 386 F.3d 963, 968 (10th Cir. 2004)* (citing *J.B. ex rel. Hart v. Valdez, 186 F.3d 1280, 1290 n.7 (10th Cir. 1999))*.

rival EAI device—Auvi-Q—Mylan began taking steps to block Auvi-Q from drug formularies, plaintiffs contend. It did so by offering large rebates—30% or higher—to PBMs who controlled formularies for third-party payors and expressly conditioning those rebates on the PBMs: (a) granting the EpiPen exclusive position on the formulary; and (b) removing or severely restricting access to Auvi-Q. Adrenaclick, another rival EAI device, achieved a market share that ranged from 2% in 2013 to 8% in 2016. In 2014, CVS Caremark added Adrenaclick to its Formulary Drug Removals List, effectively eliminating a consumer or other end-payor's opportunity to purchase Adrenaclick as an alternative to the EpiPen. **[*32]** Plaintiffs contend Mylan knew that neither Adrenaclick nor Auvi-Q could raise prices to inflate their margins sufficiently to offer rebates or discounts similar to those Mylan was offering to PBMs.

Defendants' Pricing Scheme

Plaintiffs allege defendants implemented a pricing scheme that defrauded U.S. consumers into paying an inflated price for the EpiPen—one that climbed by more than 500%, in nine years. Plaintiffs assert that defendants' exclusionary pricing scheme deprives patients of a fair price for EAI devices—the price that would result from normal market forces. They describe the pricing scheme this way: Mylan, instead of lowering its prices to gain market share, bargains for market share by providing ever-larger rebates and other kickbacks to PBMs, conditioned on exclusive relationships with those PBMs. Mylan can place itself on the drug formularies by using its monopoly power to charge consumers higher prices for its product. It then can share these revenues with the PBMs (the ones who create the formularies) through substantially enhanced rebates conditioned on excluding insurance coverage for rival products. This conduct, in turn, inflates the prices that consumers pay for **[*33]** the EpiPen so that Mylan can preserve its net realized price and sales volumes. Plaintiffs contend that the net effect of this scheme harms both consumers and competitors alike.

Mylan primarily is a generics pharmaceutical company that makes low margins on drug sales. But the EpiPen, a specialty branded drug, represented a unique and highly profitable revenue stream for Mylan. Plaintiffs assert that Mylan CEO Heather Bresch and other executives recognized this opportunity and decided to exploit the EpiPen to generate billions of dollars in revenue. One of the ways defendants allegedly implemented their pricing scheme was to change the way Mylan sold the EpiPen.

On August 24, 2011, Mylan announced that it no longer would sell individual EpiPens in the United States. Instead, Mylan began selling EpiPens in just one kind of packaging—the EpiPen 2-Pak. This configuration forced U.S. consumers to purchase EpiPens in pairs. Plaintiffs refer to this change as the "hard switch," and allege that it forced consumers and third-party payors to overpay for the EpiPen 2-Pak because the switch effectively doubled the EpiPen's price. While Mylan asserts a medical necessity supported the switch, plaintiffs **[*34]** contend nothing changed in 2011 that required Mylan to sell the EpiPen in a 2-Pak. Moreover, Mylan continued selling EpiPens individually in every other country where Mylan markets the product.[3]

Beginning in 2011, Mylan began raising the EpiPen's price while forcing customers to buy EpiPens in the 2-Pak. In October 2011, Mylan increased the price of an EpiPen 2-Pak to $181. And by May 2016, the price of an EpiPen 2-Pak had jumped to $608.

According to plaintiffs, Mylan developed and implemented a pricing scheme to monopolize the EAI market. This scheme, plaintiffs allege, used a variety of tactics. They included spreading false and misleading information and omitting material information. Plaintiffs contend defendants and the PBMs distracted consumers and regulators from the reality that Mylan was raising the price of the EpiPen from $100 to $600 by launching a campaign of false and misleading statements and actions. These statements and actions include: (a) distributing misinformation about Auvi-Q intended to undermine the FDA's conclusion that Auvi-Q had demonstrated bioequivalence to the epinephrine in the EpiPen; (b) paying formularies to exclude Auvi-Q from coverage, while telling **[*35]** physicians about the exclusion and suggesting the decision was based on clinical recommendations, rather than large, conditional rebate offers; and (c) issuing a fraudulent and misleading press release about the "hard switch" to the 2-

[3] The lone exception is France, where Mylan also sells the EpiPen in just one packaging format: the 2-Pak.

Pak that included erroneous medical claims. Plaintiffs also contend that Mylan CEO Heather Bresch testified untruthfully in a Congressional hearing on September 21, 2016. Specifically, they assert, Ms. Bresch misrepresented that: (a) Mylan's profit on the EpiPen as $50 per device when its profits were reportedly 60% higher than that amount; (b) the investment Mylan had made in EpiPen as $1 billion (when Mylan, in fact, had acquired the EpiPen in 2007 without incurring any research and development expenses); (c) Mylan had reduced U.S. healthcare costs by about $180 billion; and (d) 85% of EpiPen patients pay less than $100 for a 2-Pak and a majority pay less than $50.

Patent Infringement Lawsuits

The Pfizer defendants own the patents protecting the EpiPen and serve as contract supplier of the product. The Mylan defendants own the trademarked brand names and control the worldwide marketing and sale of the product. Together, plaintiffs assert, defendants have **[*36]** a unified interest in protecting the EpiPen's alleged monopoly. To that end, defendants allegedly added patents to the already-patented EpiPen to stop generic competitors. For instance, on September 14, 2010, Meridian (a Pfizer subsidiary) secured U.S. Patent No. 7,794,432, just three weeks before Intelliject submitted a New Drug Application ("NDA") to the FDA for Auvi-Q.

Defendants also filed patent infringement lawsuits against two generic EpiPen rivals—Teva and Intelliject—and then entered into settlements with these impending generic manufacturers which, plaintiffs assert, were anticompetitive.[4] In December 2008, Teva filed an Abbreviated New Drug Application ("ANDA") seeking FDA approval to market a generic EpiPen. In August 2009, Pfizer's subsidiaries, King and Meridian, sued Teva for infringing U.S. Patent No. 7,449,012 ("the Teva patent litigation"). In November 2010, King and Meridian filed a First Amended Complaint that included a claim for infringing the newly secured '432 patent. Later, King and Meridian dropped their claims based on the '012 patent, leaving only the infringement claims for the '432 patent. On April 27, 2012, the parties settled the Teva patent litigation. According to plaintiffs, defendants and Teva entered into an unlawful settlement **[*37]** agreement requiring Teva to delay launching its generic EAI for three years—until June 22, 2015—in exchange for defendants providing significant consideration, incentives, and benefits to Teva. Plaintiffs allege the settlement included a substantial "reverse payment" from defendants to Teva to convince Teva to delay bringing its competing product to market. Plaintiffs offer expert testimony from Prof. Andrew K. Torrance about (a) Teva's likelihood of success in the Teva patent litigation, and (b) the costs and duration of that litigation had the parties not settled it.

Defendants also initiated another patent lawsuit against Intelliject, the inventor of Auvi-Q, when Intelliject sought FDA approval for its competing EAI. On January 11, 2011, King filed suit against Intelliject seeking to block FDA approval of Intelliject's NDA for the product that later became known as Auvi-Q. On August 1, 2011, the FDA announced that it was giving Intelliject's EAI "tentative final approval," pending resolution of the patent litigation King had filed. Doc. 1500 at 33. Six months later, the parties announced that they had settled the Intelliject litigation, with Mylan making the announcement jointly **[*38]** for itself and Pfizer. The settlement included an agreement by Intelliject and Sanofi not to enter the EAI market until November 15, 2012, in exchange for valuable consideration. Plaintiffs allege that defendants, through the Intelliject patent litigation, forestalled competition that Intelliject's competing device would have presented for nearly two years.

II. Procedural History

On August 20, 2018, the court granted in part and denied in part defendants' motions to dismiss the Class Complaint (Doc. 896). The court directed the parties to conduct coordinated discovery for both the consumer class cases and the Sanofi case, followed by dispositive motions in the Sanofi case and a motion for class certification in the consumer class cases. Class plaintiffs now have moved for class certification (Doc. 1353). In response, the

---

[4] The Class Complaint also describes patent litigation with Sandoz, but plaintiffs do not include any allegations about that litigation in their certification motion.

Mylan defendants filed an opposition to class plaintiffs' motion (Doc. 1636, Doc. 1834 (sealed)), as did the Pfizer defendants (Doc. 1841).[5] Class plaintiffs filed a reply memorandum supporting their motion for class certification (Doc. 1837, Doc. 1839 (sealed)). On June 11 and 12, 2019, the court conducted a hearing on the class certification motion and took it under **[*39]** advisement.

After briefing on plaintiff's Motion for Class Certification had closed, defendants filed a Motion for Leave to File a Sur-reply. Doc. 1574. Defendants assert that plaintiffs improperly presented two new arguments in their Reply to the Motion for Class Certification. Specifically, defendants assert that the Reply raised new arguments about Prof. Rosenthal's probability analysis and the collateral source rule. Defendants thus ask the court for leave to file a Sur-reply to address these two arguments. Defendants have attached their purposed Sur-reply to their motion (Doc. 1574-1).

Plaintiffs respond that defendants' Motion for Leave to File a Sur-reply is baseless. Plaintiffs contend they properly offered their arguments about the collateral source rule and Prof. Rosenthal's probability analysis to respond to arguments defendants had raised in their response brief opposing class certification. Hedging their bets, plaintiffs say they don't oppose defendants' Motion for Leave to File a Sur-reply, so long as the court allows them to file a short response to defendants' arguments in the Sur-reply. Plaintiffs have submitted their proposed response to defendants' Sur-reply as an **[*40]** attachment to their Response (Doc. 1579-1). And, plaintiffs contend, they should have the last word on their Motion for Class Certification because they are the moving party.

HN1[] The court's local rules limit briefing on motions to the motion, a memorandum in support, a response, and a reply. D. Kan. Rule 7.1(a) & (c). "Surreplies are typically not allowed." *Taylor v. Sebelius, 350 F. Supp. 2d 888, 900 (D. Kan. 2004)*, *aff'd on other grounds*, *189 F. App'x 752 (10th Cir. 2006)*. Instead, sur-replies are permitted only with leave of court under "rare circumstances." *Humphries v. Williams Nat. Gas Co., No. 96-4196-SAC, 1998 U.S. Dist. LEXIS 21196, 1998 WL 982903, at *1 (D. Kan. Sept. 23, 1998)* (citations omitted). For example, when a moving party raises new material for the first time in a reply, the district court has discretion to grant leave to file a sur-reply to afford the opposing party an opportunity to respond to the new material. *Green v. New Mexico, 420 F.3d 1189, 1196 (10th Cir. 2005)*; *Doebele v. Sprint/United Mgmt. Co., 342 F.3d 1117, 1139 n.13 (10th Cir. 2003)*. The rules limiting sur-replies "are not only fair and reasonable, but they assist the court in defining when briefed matters are finally submitted and in minimizing the battles over which side should have the last word." *Humphries, 1998 U.S. Dist. LEXIS 21196, 1998 WL 982903, at *1*.

Here, the court concludes that plaintiffs' Reply didn't improperly assert new arguments. As plaintiffs explain, they presented arguments about the collateral source rule and Prof. Rosenthal's probability analysis in direct response to defendants' arguments opposing **[*41]** class certification. Specifically, defendants' Opposition to class certification argued that the court should not certify plaintiffs' putative classes because the proposed definitions include uninjured class members—for example, consumers who used a co-pay to purchase their EpiPens. In their Reply, plaintiffs responded that the collateral source rule bars this argument because that rule requires the court to exclude evidence of payments from a third-party (such as an insurer) that would reduce a tortfeasor's liability. Doc. 1837 at 14. Also, plaintiffs cited a probability analysis that Prof. Rosenthal presented in her rebuttal report to show that the number of uninjured class plaintiffs in each class is *de minimis. Id.* at 19-22. It was proper for plaintiffs to assert these arguments in their Reply because they responded directly to assertions in defendants' Opposition claiming that the proposed classes include uninjured class members.

---

[5] In their brief, the Pfizer defendants join the arguments in the Mylan defendants' brief, but they also separately argue two other issues. So, arguments made by the Mylan defendants are also attributable to the Pfizer defendants. For ease, the court refers to arguments asserted by the Mylan defendants as ones asserted by Mylan. And it refers to arguments asserted separately by the Pfizer defendants as ones asserted by Pfizer. Also, this Order generally identifies which party made an argument or asserted a position. If neither defendant has addressed an issue that applies to both Mylan and Pfizer, the court notes that defendants have not addressed the issue.

Yet, it is equally true that these two arguments are "new" in the sense they don't appear in the class certification briefing until the Reply. And, the court finds the parties' additional submissions helpful to the court's consideration of the difficult issues raised **[*42]** in the class certification briefing.

While this court limits sur-replies and such to "rare circumstances," *Humphries, 1998 U.S. Dist. LEXIS 21196, 1998 WL 982903, at *1*, there's nothing ordinary about this case or this certification motion. The rare circumstances presented in this case warrant granting leave for a sur-reply. Exercising its discretion, the court grants defendants' Motion for Leave to File a Sur-reply (Doc. 1574). Also, the court grants plaintiffs' request to file a response to defendants' Sur-reply. The court will consider the arguments presented by defendants' Sur-reply (Doc. 1574-1) and plaintiffs' Response (Doc. 1579-1) in its analysis, below.

III. Legal Standard

HN2[] "The class action is 'an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only.'" *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (quoting *Califano v. Yamasaki, 442 U.S. 682, 700-01, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979))*. The court has considerable discretion when deciding whether to certify a class action. *Tabor v. Hilti, Inc., 703 F.3d 1206, 1227 (10th Cir. 2013)* (because class certification involves "intensely practical considerations," decision rests within trial court's discretion (citation and internal quotation marks omitted)). But when exercising this discretion, district courts must conduct a "rigorous analysis" and decide whether the putative class satisfies the requirements of *Federal Rule of Civil Procedure 23*. *Comcast, 569 U.S. at 33* (citation **[*43]** and internal quotation marks omitted); *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350-51, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*.

HN3[] The elements of the class certification standard are (1) numerosity, (2) commonality, (3) typicality, and (4) adequate representation, plus one of the requirements established by *Rule 23(b)(1)*, *(b)(2)*, or *(b)(3)*. *See* *Fed. R. Civ. P. 23(a)-(b)*. Here, plaintiffs seek certification under *Rules 23(b)(2)* and *(3)*. ***HN4***[] *Rule 23(b)(2)* applies when "final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole." *Rule 23(b)(3)*-based motions require plaintiffs to demonstrate that "questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy."

HN5[] *Rule 23* "'does not set forth a mere pleading standard.'" *Comcast, 569 U.S. at 33* (quoting *Dukes, 564 U.S. at 350*). As the party requesting class certification, plaintiffs bear the burden of "'affirmatively demonstrat[ing]'" compliance with the rule's requirements. *Id.* (quoting *Dukes, 564 U.S. at 350*). Plaintiffs "must be prepared to prove that there are *in fact* sufficiently numerous parties, common questions of law or fact, etc." *Dukes, 564 U.S. at 350*. When deciding whether plaintiffs have met their burden, the court "must accept the substantive allegations of the complaint as true," but it **[*44]** cannot "'blindly rely on conclusory allegations which parrot *Rule 23*.'" *Shook v. El Paso Cty., 386 F.3d 963, 968 (10th Cir. 2004)* (quoting *J.B. ex rel. Hart v. Valdez, 186 F.3d 1280, 1290 n.7 (10th Cir. 1999))*. The court "is not limited to the pleadings but may 'probe behind the pleadings' and examine the facts and evidence in the case." *Tabor, 703 F.3d at 1227-28* (quoting *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982))*; *see also* *Ellis v. Costco Wholesale Corp., 657 F.3d 970, 982 (9th Cir. 2011)* (rigorous analysis requires evaluations about persuasiveness of evidence). "[A]ctual, not presumed, conformance with *Rule 23(a)*" is required. *Falcon, 457 U.S. at 160*.

HN6[] The court's "rigorous analysis" "[f]requently . . . will entail some overlap with the merits of the plaintiff's underlying claim." *Dukes, 564 U.S. at 351*. But the careful examination and rigorous analysis requirements do not authorize mini-trials to determinine whether the class, if certified, actually could prevail on the merits of their claims. *See* *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 465-66, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*; *Dukes, 564 U.S. at 351 n.6*. "*Rule 23* grants courts no license to engage in free-ranging merits inquiries at the certification stage." *Amgen, 568 U.S. at 466*. Rather, "[m]erits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Id.*

IV. Discussion

A. Proposed Class Definitions

HN7[] "Defining the class is of critical importance because it identifies the persons (1) entitled to relief, (2) bound by a final judgment, and (3) entitled under *Rule 23(c)(2)* to the 'best **[*45]** notice practicable' in a *Rule 23(b)(3)* action." *Sibley v. Sprint Nextel Corp., 254 F.R.D. 662, 670 (D. Kan. 2008)* (quoting *Manual for Complex Litigation* § 21.222 (4th ed. 2004)). Thus, "[t]he [class] definition must be precise, objective and presently ascertainable." *Id.*

Class plaintiffs ask the court to certify five classes. They are:

> **1. Nationwide Injunctive Relief Class ("Injunctive Class")**. All persons and entities in the United States who paid or provided reimbursement for some or all of the purchase price of Branded or authorized generic[6] EpiPens for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries, at any time from August 24, 2011, until the effects of defendants' unlawful conduct cease.[7]
>
> **2. Nationwide RICO Damages Class ("RICO Class")**. The proposed nationwide RICO Class is coterminous with the Injunctive Class.
>
> **3. State Antitrust Damages Class ("State Antitrust Class")**. All persons and entities in the Antitrust States[8] who paid or provided reimbursement for some or all of the purchase price of Branded EpiPens at any time from January 28, 2013, until the effects of defendants' unlawful conduct cease, for the purpose of consumption, and not resale, by themselves, their **[*46]** family member(s), insureds, plan participants, employees, or beneficiaries.

---

[6] Class plaintiffs' original definition for classes 1, 2, and 5 contained the phrase "Branded or AB-rated" EpiPens instead of "Branded or authorized generic EpiPens." An AB-rated device is one the U.S. Food and Drug Administration (FDA) rates as therapeutically equivalent to the brand device. U.S. FOOD & DRUG ADMIN., APPROVED DRUG PRODUCTS WITH THERAPEUTIC EQUIVALENCE EVALUATIONS xvi (2019), https://www.fda.gov/media/71474/download. An authorized generic is an approved brand-name drug that is marketed without the brand name on its label, either by the brand name drug company or another company with the brand company's permission. *FDA List of Authorized Generic Drugs*, U.S. Food & Drug Admin., https://www.fda.gov/drugs/abbreviated-new-drug-application-anda/fda-list-authorized-generic-drugs (last updated Dec. 19, 2019). Plaintiffs' first version of the proposed definitions seemed to include a mistake because the only AB-rated product available during the defined period is one manufactured by Teva Pharmaceuticals. Plaintiffs report they never intended purchasers of that product to qualify as members of any putative class. And, in their Reply, plaintiffs explain that "reference in the class definitions to 'AB-rated generic EpiPens' should be changed to 'authorized generic EpiPens.'" Doc. 1837 at 13 n.6. Consistent with plaintiffs' request, the court makes this change to the class definitions.

[7] During the hearing on class certification, class plaintiffs' counsel suggested that "until the effects of Defendants' unlawful conduct cease" should refer to the date when class notice is given. Doc. 1789 at 133 (Tr. of Mot. Hr'g Class Certification — Phase II 133:17-18).

[8] Plaintiffs define the "Antitrust States" as: Alabama, Arizona, California, the District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. As discussed below, even if class certification is warranted under *Rule 23*, plaintiffs cannot assert class action claims under some of these state laws because no named plaintiff resides in the particular state.

4. Consumer Protection Damages Class ("CP Class"). All persons and entities in the Consumer Protection States[9] who paid or provided reimbursement for some or all of the purchase price of Branded EpiPens at any time from August 24, 2011, until the effects of defendants' unlawful conduct cease, for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries.

5. Unjust Enrichment Class ("UE Class"). All persons and entities in the Unjust Enrichment States[10] who paid or provided reimbursement for some or all of the purchase price of Branded or authorized generic EpiPens for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries, at any time from August 24, 2011, until the effects of defendants' unlawful conduct cease.

1. Nationwide Injunctive Relief Class ("Injunctive Class"). All persons and entities in the United States who paid or provided reimbursement for some or all of the purchase price of Branded or authorized generic[6] EpiPens for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries, at any time from August 24, 2011, until the effects of defendants' unlawful conduct cease.[7]

2. Nationwide RICO Damages Class ("RICO Class"). The proposed nationwide RICO Class is coterminous with the Injunctive Class.

3. State Antitrust Damages Class ("State Antitrust Class"). All persons and entities in the Antitrust States[8] who paid or provided reimbursement for some or all of the purchase price of Branded EpiPens at any time from

---

[9] Plaintiffs define the "Consumer Protection States" as: Alaska, California, Connecticut, the District of Columbia, Florida, Hawaii, Illinois, Maine, Maryland, Massachusetts, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, Oklahoma, Rhode Island, Vermont, Washington, and West Virginia. As discussed below, even if class certification is warranted under *Rule 23*, plaintiffs cannot assert class action claims under some of these state laws because no named plaintiff resides in the particular state.

[10] Class plaintiffs assert all 50 states are "Unjust Enrichment States." If one of the other remedies eventually provides a remedy at law, class plaintiffs intend to exclude Arizona, Delaware, Louisiana, and North Dakota from this class.

[6] Class plaintiffs' original definition for classes 1, 2, and 5 contained the phrase "Branded or AB-rated" EpiPens instead of "Branded or authorized generic EpiPens." An AB-rated device is one the U.S. Food and Drug Administration (FDA) rates as therapeutically equivalent to the brand device. U.S. FOOD & DRUG ADMIN., APPROVED DRUG PRODUCTS WITH THERAPEUTIC EQUIVALENCE EVALUATIONS xvi (2019), https://www.fda.gov/media/71474/download. An authorized generic is an approved brand-name drug that is marketed without the brand name on its label, either by the brand name drug company or another company with the brand company's permission. *FDA List of Authorized Generic Drugs*, U.S. Food & Drug Admin., https://www.fda.gov/drugs/abbreviated-new-drug-application-anda/fda-list-authorized-generic-drugs (last updated Dec. 19, 2019). Plaintiffs' first version of the proposed definitions seemed to include a mistake because the only AB-rated product available during the defined period is one manufactured by Teva Pharmaceuticals. Plaintiffs report they never intended purchasers of that product to qualify as members of any putative class. And, in their Reply, plaintiffs explain that "reference in the class definitions to 'AB-rated generic EpiPens' should be changed to 'authorized generic EpiPens.'" Doc. 1837 at 13 n.6. Consistent with plaintiffs' request, the court makes this change to the class definitions.

[7] During the hearing on class certification, class plaintiffs' counsel suggested that "until the effects of Defendants' unlawful conduct cease" should refer to the date when class notice is given. Doc. 1789 at 133 (Tr. of Mot. Hr'g Class Certification — Phase II 133:17-18).

[8] Plaintiffs define the "Antitrust States" as: Alabama, Arizona, California, the District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. As discussed below, even if class certification is warranted under *Rule 23*, plaintiffs cannot assert class action claims under some of these state laws because no named plaintiff resides in the particular state.

January 28, 2013, until the effects of defendants' unlawful conduct cease, for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries.

4. Consumer Protection Damages Class ("CP Class"). All persons and entities in the Consumer Protection States[9] who paid or provided reimbursement for some or all of the purchase price of Branded EpiPens at any time from August 24, 2011, until the effects of defendants' unlawful conduct cease, for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries.

5. Unjust Enrichment Class ("UE Class"). All persons and entities in the Unjust Enrichment States[10] who paid or provided reimbursement for some or all of the purchase price of Branded or authorized generic EpiPens for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries, at any time from August 24, 2011, until the effects of defendants' unlawful conduct cease.

B. Proposed Class Exclusions

Plaintiffs' motion lists the following groups as ones who are excluded from each of the classes:

(a) Defendants and their officers, directors, management, employees, subsidiaries, and affiliates;

(b) Government entities, **[*47]** other than government-funded employee benefit plans;

(c) Fully insured health plans (*i.e.*, plans that purchased insurance that covered 100% of the plan's reimbursement obligations to its members);

(d) "Single flat co-pay" consumers who purchased EpiPens or generic EpiPens only via a fixed dollar co-payment that is the same for all covered devices, whether branded or generic (*e.g.*, $20 for all branded and generic devices);

(e) Consumers who purchased or received EpiPens or authorized generic equivalents only through a Medicaid program;

(f) All persons or entities who purchased branded or generic EpiPens directly from defendants; and

(g) The judges in this case and members of their immediate families.

Also, at oral argument on the certification motion, plaintiffs conceded that the classes should exclude another group of entities. Specifically, the court raised concern about including "third-party payors who in effect run their own PBMs." Doc. 1789 at 27 (Tr. of Mot. Hr'g Class Certification — Phase II 27:13-16). Plaintiffs conceded that these "separate entities [who] fill the PBM role . . . should still be excluded from the class[es]." *Id. at 27-28* (Tr. of Mot. Hr'g Class Certification — Phase II 27:17-28:4). **[*48]** To the extent plaintiffs seek to limit this exclusion to the PBMs themselves,[11] the court broadens the exclusion to include third-party payors who own or otherwise function

---

[9] Plaintiffs define the "Consumer Protection States" as: Alaska, California, Connecticut, the District of Columbia, Florida, Hawaii, Illinois, Maine, Maryland, Massachusetts, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, Oklahoma, Rhode Island, Vermont, Washington, and West Virginia. As discussed below, even if class certification is warranted under *Rule 23*, plaintiffs cannot assert class action claims under some of these state laws because no named plaintiff resides in the particular state.

[10] Class plaintiffs assert all 50 states are "Unjust Enrichment States." If one of the other remedies eventually provides a remedy at law, class plaintiffs intend to exclude Arizona, Delaware, Louisiana, and North Dakota from this class.

[11] The following exchange between the court and plaintiffs' counsel occurred at oral argument:

as a PBM or control an entity who functions as a PBM. This exclusion is needed to avoid the potential conflict that otherwise could arise by including entities in the classes who allegedly sustained harm from defendants' conduct but who also, allegedly, benefited from defendants' exclusive dealing arrangements.

In their reply brief, plaintiffs offer another exclusion to the class definitions, if necessary. Doc. 1837 at 23. Plaintiffs assert that this exclusion would address the issue of including potential "uninjured class members" in the classes. The proposed exclusion excludes from each class definition individual consumers whose only purchases of an EpiPen occurred before March 13, 2014 (the "Generic Start Date").[12] To avoid the potential that a class would include **[*49]** a great number of members who sustained no injury, the court adds this exclusion to the class definitions. The court more fully explains the reasons for this additional exclusion to the class definitions in Part IV.E.2.b.i., below.

The case authorities permit the court to refine the class definitions. ***HN8***[] "A court is not bound by the class definition proposed in the complaint and should not dismiss the action simply because the complaint seeks to define the class too broadly." *Robidoux v. Celani, 987 F.2d 931, 937 (2d Cir. 1993)*; *see also* *In re Monumental Life Ins. Co., 365 F.3d 408, 414 (5th Cir. 2004)* ("[H]olding plaintiffs to the plain language of their definition would ignore the ongoing refinement and give-and-take inherent in class action litigation, particularly in the formation of a workable class definition."); *Sibley v. Sprint Nextel Corp., 254 F.R.D. 662, 671 (D. Kan. 2008)* ("If the class definition should require tailoring as the litigation progresses, the Court and parties are authorized to do so." (citing *Fed. R. Civ. P. 23(c)(1)*, *(d)*)).

Plaintiffs also ask the court to select the named plaintiffs as class representatives. For the damages classes, Mylan opposes this request to an extent. It argues certain named plaintiffs are uninjured and are, therefore, inadequate class representatives. The court will address this issue in its analysis of *Rule 23(b)(3)*'s requirement of typicality, below. **[*50]** *See infra* Part IV.D.3.b.

Finally, plaintiffs ask the court to appoint Warren T. Burns, Paul J. Geller, Lynn Lincoln Sarko, and Rex Sharp as co-class counsel for class plaintiffs. Mylan does not question the experience of plaintiffs' counsel. But asserts, albeit in conclusory fashion, that it is inappropriate to have the same counsel represent plaintiffs with different theories of injury and competing damages claims. The court will address the request to appoint class counsel at the conclusion of this Order, in Part VI.

C. Class Certification under *Rule 23*

HN9[] Plaintiffs seeking to certify a class under *Rule 23* must first satisfy *Rule 23(a)*'s prerequisites of numerosity, commonality, typicality, and adequacy of representation, along with the elements for one of the three types of class actions described in *Rule 23(b)*. As referenced above, class plaintiffs here seek to certify four classes under *Rule 23(b)(3)* and one class for injunctive relief under *Rule 23(b)(2)*. Mylan argues, that in addition to these explicit requirements, *Rule 23* also requires ascertainable classes. In other words, Mylan contends, class plaintiffs must demonstrate the definition of each putative class is sufficiently definite to allow the court to ascertain class

> THE COURT: You lost me. Those—you're talking about now CVS and—what was the other one—Humana? They should be excluded?
>
> MR. BURNS: Their PBMs should be.
>
> THE COURT: They should be but third-party payors should not?
>
> MR. BURNS: Right. Third-party payors should not.

Doc. 1789 at 28 (Tr. of Mot. Hr'g Class Certification — Phase II 28:11-18).

[12] March 13, 2014 is the date class plaintiffs refer to as the "Generic Start Date," arrived at by their experts as the date when a generic device would have entered the EAI market but for defendants' allegedly anticompetitive behavior. Plaintiffs concede that subsequent discovery may shift this date forward in time, *i.e.* later than March 2014.

membership. Mylan also **[*51]** argues that plaintiffs have ignored the ascertainability requirement. And, their failure to address ascertainability, Mylan contends, requires the court to reject plaintiffs' motion altogether. The court thus begins its analysis of the certification motion by considering whether plaintiffs must satisfy an ascertainability requirement as a prerequisite to certification.

1. Ascertainability

It is unsettled whether ascertainability is a separate and distinct requirement for class certification under *Rule 23(b)(3)*. ***HN10***[] Some courts, including the Third Circuit, have held that "[t]he predominance and ascertainability inquiries are distinct[.]" *Byrd v. Aaron's Inc., 784 F.3d 154, 164 (3d Cir. 2015)*; *see also* *Brecher v. Republic of Argentina, 806 F.3d 22, 24 (2d Cir. 2015)* (recognizing an implied requirement of ascertainability that is "distinct from predominance"). The Third Circuit has explained how the two inquires differ: "'[T]he ascertainability requirement focuses on whether individuals fitting the class definition may be identified without resort to mini-trials, whereas the predominance requirement focuses on whether essential elements of the class's claims can be proven at trial with common, as opposed to individualized, evidence.'" *Id.* (quoting *Grandalski v. Quest Diagnostics Inc., 767 F.3d 175, 184 (3d Cir. 2014))*. Thus, courts in the Third Circuit have concluded that "[a]scertainability **[*52]** should not be conflated with other *Rule 23* requirements, such as the predominance requirement of *Rule 23(b)(3)*." *In re Wellbutrin XL Antitrust Litig., 308 F.R.D. 134, 147 (E.D. Pa. 2015)*; *see also* *In re Thalomid and Revlimid Antitrust Litig., No. 14-6997, 2018 U.S. Dist. LEXIS 186457, 2018 WL 6573118, at *18 (D.N.J. Oct. 30, 2018)* ("Ascertainability should not be conflated with the predominance requirement.").

The Third Circuit requires a class movant to demonstrate ascertainability by: (1) showing the class is "defined with reference to objective criteria," and (2) providing "some assurance that there can be a reliable and administratively feasible mechanism for determining whether putative class members fall within the class definition." *Byrd, 784 F.3d at 164-65* (citation and internal quotation marks omitted); *see also* *Brecher, 806 F.3d at 24* (clarifying that the Second Circuit's test for ascertainability asks "whether the class is sufficiently definite so that it is administratively feasible for the court to determine whether a particular individual is a member" (citation and internal quotation marks omitted)).

In contrast, other Circuits conclude that *Rule 23(b)(3)* includes an implied requirement of ascertainability, but they have rejected the Third Circuit's "administrative feasibility" standard for determining ascertainability. These Circuits apply a less stringent test. *See* *Mullins v. Direct Dig., LLC, 795 F.3d 654, 657, 662-72 (7th Cir. 2015)* (recognizing "an implicit requirement under *Rule 23*" to establish ascertainability but rejecting **[*53]** the "heightened ascertainability requirement" imposed by the Third Circuit); *see also* *Sandusky Wellness Ctr., LLC v. Medtox Sci., Inc., 821 F.3d 992, 996 (8th Cir. 2016)* (discussing criticism of the Third Circuit's standard and refusing to install "a separate, preliminary [ascertainability] requirement"); *Rikos v. Procter & Gamble Co., 799 F.3d 497, 525 (6th Cir. 2015)* ("We see no reason to follow [the Third Circuit's ascertainability standard], particularly given the strong criticism it has attracted from other courts.").

Here, Mylan begins its ascertainability argument by contending the class definitions for the injunction, RICO, and unjust enrichment classes are defective because they include consumers and entities who purchased or reimbursed Teva's generic EAI. Recognizing this error, plaintiffs have suggested the substitution of "AB-rated" with "authorized generic" in those class definitions, as discussed *supra* in footnote 6. The court is satisfied that the substituted language cures Mylan's threshold issue.

Returning to the broader ascertainability debate, the court has found no Tenth Circuit case that specifically addresses whether ascertainability is a separate requirement under *Rule 23(b)(3)*.[13] But the most recent class

---

[13] The court recognizes that the Tenth Circuit has held that an ascertainability requirement does not apply to certification under *Rule 23(b)(2)*. *See* *Shook v. El Paso Cty., 386 F.3d 963, (10th Cir. 2004)* (noting the *Rule 23(b)(2)* is "well suited for cases where the composition of a class is *not* readily ascertainable (emphasis added)). But the court has found no case discussing whether an ascertainability requirement applies to *Rule 23(b)(3)* cases.

action case from our Circuit includes a footnote acknowledging that the defendant there had asserted Rule 23 includes an implied **[*54]** requirement of ascertainability. *See* Naylor Farms, Inc. v. Chaparral Energy, LLC, 923 F.3d 779, 788 n.9 (10th Cir. 2019) ("[Defendant] asserts that Rule 23 includes an implied requirement of ascertainability and that [plaintiff] cannot satisfy this implied requirement here." (citations and internal quotation marks omitted)). The Circuit did not address this argument though, because defendant could not show it had raised the issue to the district court. *Id.* (declining to address the ascertainability argument because defendant "fails to 'cite the precise references in the record where' this ascertainability argument 'was raised and ruled on' below" and "also fails to make a case for plain error on appeal" (quoting *10th Cir. Rule 28.1(A)*)).

In contrast, this court explicitly considered whether ascertainability is an independent requisite for class certification. *See*,In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *2-3 (D. Kan. Sept. 26, 2016). The defendants in that case argued that the putative class proposed by plaintiffs was not sufficiently ascertainable. 2016 U.S. Dist. LEXIS 132549, [WL] at *2. Finding no answer in Tenth Circuit decisions, Judge Lungstrum summarized the holdings from other circuits, most of which have imposed a requirement that the proposed class be readily identifiable. *Id.* (citing Sandusky Wellness Ctr., 821 F.3d at 995 (collecting cases)). Also, Judge **[*55]** Lungstrum recognized that "[a] few circuit courts have applied a stricter standard of ascertainability, by which the plaintiff must show not only that the class is defined by reference to objective criteria, but also that class members may be determined in an economical and 'administratively feasible manner,' such that 'class members can be identified without extensive and individualized fact-finding or mini-trials.'" *Id.* (first quoting Carrera v. Bayer Corp., 727 F.3d 300, 307 (3d Cir. 2013); then citing Brecher v. Republic of Argentina, 806 F.3d 22, 24 (2d Cir. 2015); and then citing Karhu v. Vital Pharms., Inc., 621 F. App'x 945, 947 (11th Cir. 2015)). But, Judge Lungstrum also noted, "[o]ther courts have criticized and rejected such a heightened standard for ascertainability." *Id.* (first citing Mullins v. Direct Dig., LLC, 795 F.3d 654, 659-72 (7th Cir. 2015); then citing Sandusky Wellness Ctr., LLC v. Medtox Sci., Inc., 821 F.3d 992, 996 (8th Cir. 2016); and then citing Rikos v. Procter & Gamble Co., 799 F.3d 497, 525 (6th Cir. 2015)).

In the end, Judge Lungstrum was persuaded by the Seventh Circuit's "thorough and well-reasoned analysis" in *Mullins*. 2016 U.S. Dist. LEXIS 132549, [WL] at *3. *Mullins* had rejected a strict standard requiring an administratively feasible mechanism for identifying class members. 2016 U.S. Dist. LEXIS 132549, [WL] at *2 (citing *Mullin*s, 795 F.3d at 662). Specifically, Judge Lungstrum was persuaded that a stricter view of ascertainability furthers no interest not already protected by Rule 23's explicit requirements, nor is it necessary to prevent unfairness to absent class members. *Id.* (citing Mullins, 795 F.3d at 662-72). Moreover, Judge Lungstrum recognized that the Seventh Circuit **[*56]** had concluded that the risk of fraudulent claims is low, and applying a lower standard does not deny the defendant due process. *Id.* (citing Mullins, 795 F.3d at 665-72).

After coming to this conclusion, Judge Lungstrum applied the Seventh Circuit's "'weak' version of ascertainability." 2016 U.S. Dist. LEXIS 132549, [WL] at *2-3. ***HN11***[] This test requires that "the class definition must not be too vague, the class must not be defined by subjective criteria, and the class must not be defined in terms of success on the merits." 2016 U.S. Dist. LEXIS 132549, [WL] at *2 (citing Mullins, 795 F.3d at 659-60). And, he concluded, the proposed class definitions in *Syngenta* satisfied the ascertainability requirement because they were "sufficiently definite and objective." 2016 U.S. Dist. LEXIS 132549, [WL] at *3-4.

The court concurs with Judge Lungstrum's conclusions. It thus predicts that the Tenth Circuit, if confronted with this question, would decline to recognize ascertainability as a separate, unstated requirement of Rule 23 requiring certification movants to satisfy the more stringent ascertainability standard adopted by the Third Circuit. Instead, the

---

Quoting four words from In re Cox Enterprises, Inc. Set-top Cable Television Box Antitrust Litig., 790 F.3d 1112, 1118 (10th Cir. 2015), Mylan suggests they demonstrate that the Tenth Circuit requires ascertainability. Doc. 1636 at 63. But the phrase "establishing an ascertainable class" appears in a sentence where the court is criticizing plaintiffs for belatedly moving to compel arbitration until after the class was certified. Whether the class should have been certified, and whether it was sufficiently ascertainable, was not at issue in that case. So, the court doesn't view *Cox Enterprises* the same way Mylan does.

court predicts that our Circuit would follow the Seventh Circuit's approach, applying the less restrictive ascertainability test on certification.[14]

Applying that standard to the class definitions here, the court concludes **[*57]** that they satisfy the *Mullins* criteria. Specifically, the class definitions are based on objective criteria—*i.e.*, each one defines a class member as a person or entity who paid part of the purchase price for an EpiPen during a specific date range. Also, the definitions aren't impermissibly vague, and they are not defined in terms of success on the merits.

Relying on the opinions of their expert, defendants assert that Prof. James Hughes concluded that none of the data found in the record allows plaintiffs to identify who meets the class definitions and exclusions. *See* Doc. 1636-4 at 30-40 (Hughes Expert Report ¶¶ 63-84). Thus, defendants argue, plaintiffs can't satisfy the ascertainability standard. But Prof. Hughes's opinions don't identify any ascertainability issues with third-party payors. Doc. 1837-12 at 9 (Hughes Dep. 113:7-114:1). And, as Prof. Hughes testified, to ascertain whether a person or entity qualifies as a class member, he must "demonstrate that [he] paid or provided reimbursement for some or all of the purchase price" of an EpiPen. *Id.* at 8 (Hughes Dep. 111:16-23). This criteria is sufficiently precise and objective to satisfy the Seventh Circuit's version of the ascertainability **[*58]** standard and, by extension, the standard the court predicts our Circuit would adopt.[15] Thus, the court finds that the proposed class definitions are sufficiently ascertainable.

2. Standing

For the most part, defendants concede that plaintiffs have standing. ***HN12***[] As our court has recognized, "as long as at least one plaintiff has standing with respect to each claim alleged . . . , it will satisfy the injury requirement of standing." *Roco, Inc. v. EOG Res., Inc., No. 14-1065-JAR-KMH, 2014 U.S. Dist. LEXIS 152203, 2014 WL 5430251,*

---

[14] *But cf. Cline v. Sunoco, Inc. (R&M), 333 F.R.D. 676, 2019 WL 4879187, at *8-9 (E.D. Okla. Oct. 3, 2019)* (recognizing Tenth Circuit does not consider ascertainability a separate *Rule 23* factor but concluding that class definition must make class membership determination administratively feasible (citing *Carrera, 727 F.3d at 306-07*)).

[15] The court recognizes that Prof. Hughes's Report focuses on the data produced in the case and concludes that "[p]laintiffs have not provided a reliable methodology for identifying who is included or excluded from the class." Doc. 1636-4 at 30-31 (Hughes Expert Report ¶ 63). As discussed above, the court rejects defendants' assertion that plaintiffs must satisfy this heightened standard of ascertainability at certification. But, even if the court applied this heightened standard, plaintiffs assert that they can identify such class members using pharmacy and medical records. Indeed, plaintiffs' expert, Prof. Meredith Rosenthal, has identified various data that, she says, will allow plaintiffs to ascertain who qualifies as a class member. This information includes data from PBMs, pharmacy records, and individuals' own records documenting EpiPen purchases. Doc. 1711-1 at 15-16, 28-29 (Rosenthal Reply Report ¶¶ 20-21, 46-49). Other courts have noted that, in prescription medication cases, this kind of information makes it "fairly easy to identify potential class members through pharmacy and medical records." *Krueger v. Wyeth, Inc., No. 03CV2496 JAH (AJB), 2011 U.S. Dist. LEXIS 154478, 2011 WL 8984448, at *2-3 (S.D. Cal. July 13, 2011)*; *see also In re Phenylpropanolamine (PPA) Prods. Liab. Litig., 214 F.R.D. 614, 619 (W.D. Wash. 2003)* (contrasting cases "involving . . . prescription medication verifiable by medical and pharmacy records" from the current case involving over-the-counter medication where "the process of simply identifying who rightfully belongs within the proposed class would entail a host of mini-trials"). Thus, even under a heightened ascertainability standard, plaintiffs have identified a viable method for identifying members of the classes.

In reaching this conclusion, the court recognizes that defendants have challenged Prof. Rosenthal's ascertainability opinions with a *Daubert* motion. By separate Order, the court denies defendants' motion, concluding that Prof. Rosenthal's opinions are sufficiently reliable for the court to consider on class certification. As discussed in that Order, defendants question whether the data identified by Prof. Rosenthal is capable of identifying class members or even if it still exists. The court recognizes that merits discovery may establish that these records can't discharge the task Prof. Rosenthal assigns to them (specifically, identifying consumers who paid nothing for EpiPens, those who used a flat co-pay, or individuals who paid cash for their EpiPens). But, for now, and on the current record, Prof. Rosenthal supplies a reasonably reliable and plausible method for identifying putative class members sufficient to respond to Prof. Hughes's criticisms.

at *3 (D. Kan. Oct. 24, 2014). But Mylan does challenge plaintiffs' standing in one important respect. It contends plaintiffs lack standing to assert state law claims for states where no named plaintiff resides.[16]

Plaintiffs respond, contending they have standing to bring 33 state-law claims because at least one named plaintiff lives in those 33 states. For the other states, plaintiffs cite *Roco*, and argue they are entitled to amend to add additional plaintiffs to cure standing issues for specific states where, currently, no named plaintiff reside. *See* 2014 U.S. Dist. LEXIS 152203, [WL] at *4, 6 (granting leave to amend to add additional plaintiff to fix standing issues). Mylan has the better of this issue. The court declines to certify a class claim for states **[*59]** lacking a named plaintiff to represent the classes. And, the court revises the class definitions to make appropriate exclusions for states where no named plaintiff resides.

Defendants also assert that plaintiffs have a standing problem because many named plaintiffs are uninjured under the legal theories at issue in the certification motion. And, defendants argue, the court cannot certify state law claims for states where th2014 U.S. Dist. LEXIS 152203, [WL] at *4, 6 (granting leave to amend to add additional plaintiff to fix standing issues). Mylan has the better of this issue. The court declines to certify a class claime only named representative is an uninjured plaintiff. The court addresses this argument in the typicality section below. *See infra* Part IV.D.3.b. As that section explains, the current record doesn't establish a standing problem for the named plaintiffs.

In sum, the court finds that plaintiffs have standing to assert their class action claims for states where at least one named plaintiff resides in the state. The court now turns to the Rule 23 requirements.

D. *Rule 23(a)* Requirements

The universal prerequisites for class certification are (1) numerosity, (2) commonality, (3) typicality, and (4) adequate representation. Fed. R. Civ. P. 23(a). They apply to every certification request made under Rule 23. *See* Fed. R. Civ. P. 23(b) ("A class action may be maintained if Rule 23(a) is satisfied *and* if" one of the requirements in Rule 23(b)(1), (b)(2), or (b)(3) is met (emphasis **[*60]** added)). The next four subsections consider these four requirements.

1. Numerosity

HN13[] To be certified, a proposed class must be so "numerous that joinder of all members is impracticable." Fed. R. Civ. P. 23(a)(1). Defendants do not contest this element, and for good reason. Plaintiffs assert there are hundreds of thousands of EpiPen users and millions of EpiPen devices are sold every year in the United States. Those numbers easily satisfy the numerosity requirement.[17]

2. Commonality

HN14[] Next, Rule 23 requires a court to find that "there are questions of law or fact common to the class." Fed. R. Civ. P. 23(a)(2). "Commonality requires the plaintiff to demonstrate that the class members 'have suffered the same injury.'" Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 349-50, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011) (quoting Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 157, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)).

---

[16] The "reside there" requirement is likely imprecise. The court can imagine a named plaintiff who may have purchased EpiPens in a nearby state where the plaintiff doesn't reside. Such a named plaintiff could have standing to bring a state law claim under the laws of the place of purchase even though the plaintiff doesn't reside in that state. But plaintiffs never argue this nuance and nothing suggests the court needs to consider it here.

[17] *See* 1 William B. Rubenstein, *Newberg on Class Actions* § 3:12 (5th ed. 2013) (suggesting that a class of 40 or more members should presumptively satisfy numerosity).

As the Supreme Court has explained, this "same injury" requirement "does not mean merely that they have all suffered a violation of the same provision of law." *Id. at 350*. Instead, the claims of the putative class plaintiffs "must depend upon a common contention" that is "of such a nature that it is capable of classwide resolution." *Id.* This requirement "means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Id.* Although **[*61]** "[e]ven a single [common] question will do," *id. at 359* (citation and internal quotation marks omitted), the focus is not on common questions but on "the capacity of a class-wide proceeding to generate common *answers* apt to drive the resolution of the litigation." *Id. at 350* (citation and internal quotation marks omitted).

Defendants do not address commonality as a separate requirement. Instead, Mylan argues that plaintiffs have not met their burden to prove that common questions predominate, nor have they demonstrated commonality for each factual theory of harm plaintiffs assert. Mylan also argues that each of the *Rule 23(b)(3)* classes fails the commonality and predominance requirements. In other words, Mylan does not make any commonality arguments that are independent of the predominance analysis.

The court find that plaintiffs have satisfied the commonality requirement for each of the five classes they ask the court to certify. They have identified a number of questions with common answers that "would 'resolve an issue that is central to the validity of each one of the claims in one stroke.'" *Menocal v. GEO Grp., Inc., 882 F.3d 905, 916 (10th Cir. 2018)* (quoting *Dukes, 564 U.S. at 350*). The questions include: (1) whether defendants used anticompetitive pay-for-delay settlements that delayed generic **[*62]** entry into the EAI market, (2) whether defendants entered unlawful exclusive dealing agreements with PBMs in an effort to protect their monopoly and drive up the price of the EpiPen, and (3) whether defendants unlawfully forced consumers to purchase the EpiPen exclusively in a 2-Pak based on a purported medical necessity when defendants' true motive for removing single EpiPens from the market was to increase profit. Each of these questions involves common factual and legal issues about the existence, scope, and legality of defendants' conduct. *See, e.g., Beltran v. InterExchange, Inc., No. 14-CV-03074-CMA-CBS, 2018 U.S. Dist. LEXIS 23940, 2018 WL 1948687, at *4 (D. Colo. Feb. 2, 2018)* ("Numerous courts have determined that the commonality prerequisite of *Rule 23(a)* was satisfied in antitrust and RICO class actions" because they involve common factual and legal questions about defendants' conduct). To resolve these questions, plaintiffs will rely on common evidence to generate common answers. *Id.* (concluding that plaintiffs satisfied the commonality requirement where "numerous class-wide questions of law and fact may be resolved with common answers drawn from common proof"). ***HN15***[] Also, as our Circuit has recognized, "any one of these questions alone would satisfy the commonality **[*63]** requirement . . . ." *Menocal, 882 F.3d at 916-17*; *see also id. at 914* ("A finding of commonality requires only a single question of law or fact common to the entire class." (citation and internal quotation marks omitted)).

In sum, each of the putative classes satisfies the commonality requirement of *Rule 23(a)(2)*.

3. Typicality

HN16[] The typicality element requires a finding that the claims of representative plaintiffs are typical of the claims of the proposed class. *Fed. R. Civ. P. 23(a)(3)*. But, the named plaintiffs' interests and claims "need not be identical" to those of the putative class members. *DG ex rel. Stricklin v. Devaughn, 594 F.3d 1188, 1198 (10th Cir. 2010)*. As long as the claims of the named plaintiff and class members "are based on the same legal or remedial theory, differing fact situations of the class members do not defeat typicality." *Id. at 1198-99*; *see also Menocal v. GEO Grp., Inc., 882 F.3d 905, 914 (10th Cir. 2018)* (same).

HN17[] The typicality requirement asks:

> whether a sufficient relationship exists between the injury to the named plaintiff and the conduct affecting the class, so that the court may properly attribute a collective nature to the challenged conduct. In other words, when such a relationship is shown, a plaintiff's injury arises from or is directly related to a wrong to a class, and that wrong includes the wrong to the plaintiff. Thus, a plaintiff's claim is typical if it arises **[*64]** from the same

> event or practice or course of conduct that gives rise to the claims of other class members, and if his or her claims are based on the same legal theory.

In re Pharm. Indus. Average Wholesale Price Litig., 230 F.R.D. 61, 78 (D. Mass. 2005) (quoting *In re Am. Med. Sys., Inc., 75 F.3d 1069, 1082 (6th Cir. 1996)* (quoting 1 Herbert B. Newberg & Alba Conte, *Newberg on Class Actions* § 3.13 (3d ed. 1992))).

HN18[] The typicality and commonality requirements are similar because "'[b]oth serve as guideposts for determining . . . whether the named plaintiff's claim and the class claims are so interrelated that the interests of the class members will be fairly and adequately protected . . . .'" *Dukes, 564 U.S. at 349 n.5* (quoting *Falcon, 457 U.S. at 157 n.13*). The typicality "requirement has been liberally construed by courts[,]" and "in the antitrust context, typicality 'will be established by plaintiffs and all class members alleging the same antitrust violations by defendants.'" *In re Vitamins Antitrust Litig., 209 F.R.D. 251, 260 (D.D.C. 2002)* (quoting *In re Playmobil Antitrust Litig., 35 F. Supp. 2d 231, 241 (E.D.N.Y. 1998))*. "If the claims of the named plaintiffs and putative class members involve the same conduct by the defendant, typicality is established regardless of factual differences." *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 183-84 (3d Cir. 2001)*.

Plaintiffs assert every class member here relies on the same legal theory—they all paid artificially elevated prices for or were oversold EpiPens—and the claims of the named plaintiffs are typical of the claims of the proposed classes. **[*65]** Mylan disagrees, arguing (1) named plaintiff Local 282 Welfare Trust Fund ("Local 282") is not a typical payor, and (2) many of the named plaintiffs are not typical because they are uninjured.[18] The court examines Mylan's two arguments, below.

a. Local 282

Local 282 is an employee health and welfare benefit plan, and it is a named plaintiff in this lawsuit. Mylan argues Local 282 is atypical and its interests actually conflict with other third-party payors because it does not bear the price risk of increased drug costs. According to Mylan, Local 282's costs are fully reimbursed by the employers who fund it. In other words, if costs increase, Local 282 simply goes back to the union and negotiates higher contribution rates for union contributions to the Welfare Trust Fund.

To support its argument, Mylan cites the deposition testimony of a Local 282 representative. The representative was asked what it would mean for an insured member of Local 282's health plan if Local 282 prevails in this lawsuit. The representative answered by explaining that members of the plan are not insured. Instead, he testified, plan members are owners of self-insured trust funds. If the plan were to receive reimbursement **[*66]** funds by prevailing in this action, it would:

> stem[] the tide of potentially having to go back—for the union to have to go back and negotiate higher contribution rates to the welfare trust fund. If those rates do not have to go up, then the members in a roundabout way can then receive higher wages. . . . They will not be reimbursed with a check per se after settlement if one does occur.

Doc. 1636-34 at 4-5 (Bulding Dep. 59:21-60:7).

Citing the testimony of the same union representative, plaintiffs dispute the proposition that Local 282 bears no price risk. Asked who pays the remaining cost of an EAI for a member who pays a co-pay for the device, the witness answered that the Local 282 Welfare Trust Fund pays the cost. Doc. 1839-10 at 4-5 (Bulding Dep. 197:10-198:18). No insurance company pays any portion of the remaining cost, nor does the Welfare Trust Fund seek reimbursement for any part of that cost from any other person or entity. *Id.*

---

[18] Mylan makes these same arguments to assert that the named plaintiffs are inadequate class representatives. Thus, Mylan also contends that plaintiffs can't satisfy *Rule 23(a)*'s fourth requirement—adequacy. The court addresses the adequacy argument below, *infra* note 24.

Plaintiffs also note that Dr. Johnson's[19] report concedes that self-insured plans—such as Local 282's plan—pay for claims using their own funds, including premiums collected from employees, and assume all insurance risk. Dr. Johnson acknowledges that these **[*67]** self-insured plans are responsible for a portion (or even all) of the cost of covered drugs. Doc. 1636-2 at 39-40 (Johnson Expert Report ¶ 41).

The court rejects Mylan's assertion that Local 282 bears no price risk for increased drug costs. The record simply won't support that conclusion. Even if a union whose members participate in Local 282 negotiated higher contributions from employers sufficient to offset increased costs caused by EpiPen overcharges, that is a forward-looking exercise. Local 282 still has sustained injury when the benefit plan was overcharged (if it was). *See* *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-md-02503, 017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *18 (D. Mass. Oct. 16, 2017)* (explaining that even when institutional payors can offset overcharges by increasing premiums after the fact, the institutional payors "experience[ ] antitrust impact at the time of the initial overcharge"). Mylan's argument does not persuade the court that Local 282's injuries are atypical of the classes it seeks to represent.

Mylan next asserts that Local 282, because it is a small not-for-profit trust who does not own its own PBM or negotiate directly with Mylan, does not have the same bargaining power as large payors with millions **[*68]** of members. As a consequence, Mylan argues, the court shouldn't let Local 282 represent the interests of other payors who have not sought to participate in this case and who have different interests. Mylan cites third-party payors such as Anthem, Express Scripts, Inc., Caremark, Change Healthcare, and Humana as companies with a significantly greater number of members and larger revenues. Describing the differences between Local 282 and large third-party payors as a fundamental and uncontroverted conflict, Mylan cites deposition testimony from Humana, Anthem, Cigna Presbyterian, Magellan, MedImpact, Aetna, and United showing each one favors rebates because they produce lower costs. Doc. 1636 at 87-88. It's no surprise those third-party payors would favor higher rebates and the profits they capture from the current pricing regime. But, Mylan offers no evidence tending to establish a "fundamental and uncontroverted conflict" between larger third-party payors and Local 282, *id.* at 87, nor does it make a convincing argument that the number of members in larger third-party payors affects Local 282's typicality. Our court's precedent is more forgiving than Mylan suggests.

For instance, Mylan quotes **[*69]** *Nieberding v. Barrette Outdoor Living, Inc., 302 F.R.D. 600, 610 (D. Kan. 2014)* as recognizing that typicality requires all class members to be "at risk of being subjected to the same harmful practices." But this characterization of *Nieberding*, while accurate, stops too soon. The court's observation about typicality continued beyond the words quoted by Mylan: "The interests and claims of the named plaintiff and class members need not be identical to satisfy typicality; so long as the claims of the named plaintiff and class members are based on the same legal or remedial theory, differing fact situations of the class members do not defeat typicality." *Id.* (citing *Devaughn, 594 F.3d at 1198-99*). Under this standard, it is possible for Local 282 to serve as a class representative of third-party payors even if some of them were harmed by defendants' alleged efforts to prevent competitors from entering the market but also benefited from rebates Mylan paid them. Also, the court already has addressed Mylan's concerns. As discussed above, and during oral argument, *see* Doc. 1789 at 27-28 (Tr. of Mot. Hr'g Class Certification — Phase II 27:13-28:18), the court will exclude from the class definitions third-party payors who own or otherwise function as a PBM (or control any entity that functions as **[*70]** a PBM). Mylan's argument that Local 282 cannot represent the interests of payors who benefit from owning or controlling their own PBM is unpersuasive.

Finally, Mylan contends Local 282 is an atypical representative because it lacks familiarity with how rebating works. Mylan cites testimony by a representative of Local 282 but it does not support the conclusion Mylan attributes to it.

---

[19] John Johnson, Ph.D. is an antitrust economist and statistician, retained by defendants, to evaluate the damage models prepared by plaintiffs' experts, Professors Rosenthal and Elhauge. Defendants did not ask Dr. Johnson to prepare an affirmative methodology for assessing impact or damages, and he did not offer such an assessment. *See* Doc. 1724 at 91-92 (Tr. of Mot. Hr'g Class Certification — Phase I 91:25-92:5 ("Q: Were you asked to offer any affirmative assessment of a classwide method for assessing impact or damages in this case? A: No. My assignment was not to put forward an affirmative methodology, it was to assess the work of Professor Rosenthal and Professor Elhauge.").

See Doc. 1636 at 85 n.120, 88 n.126. The witness was never asked to explain how rebating works. Instead, the submitted transcript pages show that Local 282 used the services of The Segal Group to negotiate with PBMs on its behalf, and that it joined other benefit trust funds as a member of the National Alliance of Labor Health Care Organizations to negotiate collectively with PBMs for a better deal. Doc. 1636-34 at 7, 8 (Bulding Dep. 98:5-14, 103:4-18). Moreover, Mylan never explains why it matters whether Local 282 negotiates its own rebates or, instead, hires The Segal Group to negotiate on its behalf. Indeed, it appears common for third-party payors to employ services of a consultant like The Segal Group. *See* *In re Pharm. Indus. Average Wholesale Price Litig., 230 F.R.D. 61, 72 (D. Mass. 2005)* ("A TPP considering the use of a PBM will typically send out a request for proposals, describing **[*71]** its goals. . . . Throughout the process, TPPs are commonly advised by benefits consulting companies like Segal Company . . . In virtually all instances, self-insured employers and union benefit funds retain consultants to represent them in negotiations with PBMs . . . .").

The court is not persuaded that Local 282 is atypical, nor is the court convinced that it should reject Local 282 as a class representative because its interests conflict with the classes it is nominated to represent. Defendants have failed to support their claim that any particular number of third-party payors are potentially adverse, nor have they demonstrated that any third-party payors (other than those with their own PBMs) are indeed adverse.[20] The court has excluded from the class definitions any third-party payors who have separate entities filling the PBM role. In short, the injury claimed by Local 282 "arises from or is directly related to the wrong" claimed by the classes. *In re Pharm. Indus. Average Wholesale Price Litig., 230 F.R.D. at 78* (citations and internal quotation marks omitted). Plaintiffs have discharged their burden to demonstrate that Local 282's claims typify those that the classes seek to assert.

b. Named Plaintiffs

Next, Mylan argues that most of the other named **[*72]** plaintiffs are atypical of the classes they seek to represent because they are uninjured. By Mylan's count, nine named plaintiffs cannot establish injury under any of plaintiffs' legal theories; more than 75% are uninjured under the 2-Pak theory based on their reported purchases; at least 50% are uninjured under the Auvi-Q foreclosure theory based on their reported purchases (or lack of them) during the relevant period; and at least 50% are uninjured under the generic delay theory based on their preferences. Mylan also asserts no named plaintiff can represent the RICO class because every named plaintiff either acknowledged that they did not rely on an alleged misrepresentation or their testimony requires additional inquiry to determine whether they relied on a misrepresentation.

HN19[] Mylan's RICO argument is unpersuasive. The Supreme Court has held—explicitly—that first-party reliance is not required to establish a RICO claim premised on the predicate act of mail fraud. *Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 649, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)*. The Supreme Court recognized that RICO provides a cause of action for "'[a]ny person injured in his business or property by reason of a violation of'" the statute. *Id.* (quoting *18 U.S.C. § 1964(c)*). And, the Court found it "difficult to derive **[*73]** a first-party reliance requirement" from the words of the statute. *Id.* Thus, the Supreme Court refused to "read a first-party reliance requirement into a statute that by its terms suggests none." *Id. at 650*.

Applied here, *Bridge* means the named plaintiffs need not establish first-party reliance to assert their fraud-based RICO claim. Instead, the named plaintiffs just need to establish an injury to business or property "by reason of" defendants' RICO violations. Plaintiffs assert that the named plaintiffs satisfy this requirement for their RICO

[20] Although not highlighted in Mylan's brief, Dr. Hughes's Expert Report notes: "Of the 50,216 group health plans of all types in the US in 2009, only 1,801, or less than 4 percent, are multiemployer, collectively bargained plans like Local 282." Doc. 1636-4 at 24 n.58 (Hughes Expert Report ¶ 47 n.58) (citing U.S. DEPT. OF LABOR, EMP. BENEFITS SEC. ADMIN., GROUP HEALTH PLANS REPORT: ABSTRACT OF 2009 FORM 550 ANNUAL REPORTS REFLECTING STATISTICAL YEAR FILINGS 6, tbl.A2 (2012), https://www.dol.gov/sites/dolgov/files/EBSA/researchers/statistics/retirement-bulletins/annual-report-on-self-insured-group-health-plans-2012-appendix-a.pdf.). While multiemployer, collectively-bargained plans may represent a relatively small proportion of group plans, the raw number of plans similar to Local 282 is nonetheless a significant number of similar plans.

claim—and all other claims—because, they allege, all named plaintiffs have sustained injury from defendants' conduct. Specifically, plaintiffs assert that each named plaintiff sustained injury under at least one of their theories—the generic delay theory. And, they argue, this showing suffices to establish that each named plaintiff sustained an injury from defendants' conduct.

But Mylan argues that many named plaintiffs aren't injured under this theory. According to Mylan, seven named plaintiffs preferred the branded EpiPen or purchased a branded EpiPen after the launch of the EpiPen AG (an authorized generic of the EpiPen, made by Pfizer and sold by Mylan); **[*74]** at least six named plaintiffs paid less for their EpiPens than plaintiff's expert, Prof. Rosenthal, calculates they would have paid in the but-for world; and at least one named plaintiff concedes that it is his own fault that he never researched whether alternative generic EAIs were available for him to purchase. Plaintiffs respond with three reasons supporting their argument that all named plaintiffs sustained injury under the generic delay theory.

First, plaintiffs argue that a consumer's preference for or purchase of a branded EpiPen instead of the EpiPen AG is not an appropriate proxy to demonstrate the absence of injury. Plaintiffs cite Prof. Rosenthal's opinions and argue that each named plaintiff sustained injury from the delayed generic entry because the delay affected consumer switching patterns.[21] Prof. Rosenthal calculates plaintiffs' alleged damages using "various but-for entry scenarios," using an assumed generic entry date of March 13, 2014. Doc. 1711-1 at 5, 36-37 (Rosenthal Reply Report ¶¶ 4.e, 60). And, in the but-for world, Prof. Rosenthal calculates a generic penetration rate, recognizing several factors that would drive consumers to switch from a branded EpiPen to **[*75]** a generic. *See id.* at 19-20 (Rosenthal Reply Report ¶ 28 (explaining that consumers are likely to switch to a generic because the EpiPen is more expensive and because it is a product that consumers don't use regularly, thus they aren't likely to develop brand affinity)). As Prof. Rosenthal explained, her opinions take into account consumer switching patterns in a but-for world, which she explained, would have begun once the authorized generic becomes available. *See* Doc. 1711-5 at 7-8 (Rosenthal Dep. 145:15-146:23). And, she didn't use market share data from the EpiPen AG's entry to form her opinions because the entry of an authorized generic sold by Mylan wasn't a competitive situation and not the same as an independent generic device entering the market. *Id.* at 9-10 (Rosenthal Dep. 156:2-160:18). Based on Prof. Rosenthal's opinions, plaintiffs have made a plausible showing that each named plaintiff—even if he or she purchased the branded EpiPen in the real world after the launch of the EpiPen AG—sustained injury from the delayed generic entry.[22]

Second, plaintiffs refute defendants' argument that some named plaintiffs aren't injured because they paid less for their EpiPens than Prof. Rosenthal **[*76]** calculates they would have paid in the but-for world. Plaintiffs argue that comparing an insured's actual co-pay amount to a but-for co-pay amount improperly equates real-world transactions with hypothetical averages used as input for a damages calculation. As Prof. Rosenthal explains, her hypothetical average is just that—an average of aggregate damages. Doc. 1711-1 at 21 (Rosenthal Reply Report ¶ 32). Prof. Rosenthal asserts that when the time comes to determine individual damages for a named plaintiff, "the relevant question will be what the Class member's generic copayments would have been at the same point in time

---

[21] Defendants have sought to exclude Prof. Rosenthal's opinions about injured class members by *Daubert* motion. By separate Order, the court denies defendants' motion, concluding the opinions are sufficiently reliable for the court to consider at class certification. The court concludes in this Order that Prof. Rosenthal's opinions support plaintiffs' assertion that each named class member sustained injury. The court recognizes that defendants' expert has criticized Prof. Rosenthal's assumptions and attacked her calculated generic penetration rate as flawed. But, the court finds that Prof. Rosenthal has shown she used a reasonable method to reach her opinions, and her opinions plausibly establish that each named class member sustained an injury.

[22] Also, plaintiffs' expert, Prof. Elhauge, opines that brand loyalists sustained harm under the PBM foreclosure theory because "[t]he foreclosure of brand-brand competition between EpiPen and Auvi-Q would predictably have an additional adverse price effect not only on customers who would have continued to buy branded EpiPens but paid a lower price in the but-for world for it, but also on customers who would have bought a generic at a discount from what would have been a lower branded EpiPen price." Doc. 1711-2 at 89-90 (Elhauge Reply Report ¶ 123). So, Prof. Elhauge opines, "during the overlap period [*i.e.*, months when there is an overlap between the foreclosure of Auvi-Q and the exclusion of the generic], all customers would suffer one harm or the other, whether or not they were brand loyalists." *Id.*

as the brand purchase they made." *Id.* So, Prof. Rosenthal credibly explains, her calculations don't suggest that any named plaintiffs escaped injury because of what they paid for their EpiPens. *Id.* The court finds this explanation sufficient to establish that each named plaintiff has a colorable claim of injury under the generic delay theory.

Finally, plaintiffs contend, because generic delay involves a but-for world, whether a consumer actually knew about EpiPen alternatives is a meaningless point. As Prof. Rosenthal opines, in the but-for world, the rates at which consumers **[*77]** would switch from the branded EpiPen to a generic differ from what actually happened in the real world where, plaintiffs allege, defendants prevented a generic product from entering the market at an earlier date. *Id.* at 19-20 (Rosenthal Reply Report ¶ 28); Doc. 1711-5 at 7-8, 9-10 (Rosenthal Dep. 145:15-146:23, 156:2-160:18).

In sum, the court concludes plaintiffs have presented plausible evidence sufficient to establish that each named plaintiff has sustained an injury under at least one of plaintiffs' theories—*i.e.*, the generic delay theory.[23] Prof. Rosenthal's opinions sufficiently support plaintiffs' assertions that each named plaintiff sustained injury sufficient to make their legal theories typical of the other class members they seek to represent. *See* *Menocal v. GEO Grp., Inc., 882 F.3d 905, 914 (10th Cir. 2018)* (holding that plaintiffs satisfied the typicality requirement where "the claims of all the class members—including the representatives—share the same theory" and "present no circumstances that would give rise to a different theory of liability"). The court concludes plaintiffs have satisfied *Rule 23*'s typicality requirement.

4. Adequacy

HN20[] A certified class must have representative parties who will fairly and adequately protect the interests of the **[*78]** class. *Fed. R. Civ. P. 23(a)(4)*. The adequacy requirement asks whether the named plaintiffs and counsel (a) "have any conflicts of interest with other class members" and (b) will prosecute the action vigorously on behalf of the class. *In re Motor Fuel Temperature Sales Practices Litig., 292 F.R.D. 652, 671 (D. Kan. 2013)* (citing *E. Tex. Motor Freight Sys., Inc. v. Rodriguez, 431 U.S. 395, 403, 97 S. Ct. 1891, 52 L. Ed. 2d 453 (1977)* (further citations omitted)). "Minor conflicts among class members do not defeat certification[.]" *Id.* Only a "fundamental conflict" about the specific issues in controversy will prevent a named plaintiff from representing the interests of the class adequately. *Id.* A fundamental conflict exists where some class members claim an injury resulting from conduct that benefited other class members. *Id.* Defeating "[the] adequacy requirement of *Rule 23*" requires a conflict that is "more than merely speculative or hypothetical." *Gunnells v. Healthplan Servs., Inc., 348 F.3d 417, 430 (4th Cir. 2003)* (citation and internal quotation marks omitted).

Mylan submits that significant intra-class conflicts exist, making the named plaintiffs inadequate class representatives and thus precluding certification.[24] Mylan described the first such conflict by arguing that Local 282

---

[23] Because each named plaintiff has sustained injury under one of plaintiffs' theories, the named plaintiffs are typical representatives of the classes they seek to represent. To the extent named plaintiffs were injured by plaintiffs' other two theories (*i.e.*, the 2-Pak and PBM foreclosure theories), those plaintiffs are typical of class members who also allegedly sustained injury under the other two theories. The court recognizes that if plaintiffs' generic delay theory fails on its merits, the court may have to revisit the typicality requirement to determine whether the named plaintiffs are typical of the classes they seek to represent.

[24] As discussed above, *supra* note 18, Mylan also asserts that Local 282 is an inadequate class representative because it differs from other payors in the classes. Also, Mylan asserts that many named plaintiffs are inadequate class representatives because they are uninjured. The court rejected Mylan's arguments in the preceding section, finding that these arguments don't establish that the named plaintiffs are atypical of the classes they seek to represent. *See supra* Part IV.D.3. For the same reasons, the court concludes that defendants' arguments don't prevent the named plaintiffs from fairly and adequately representing the classes.

is not typical of other payors who benefit from Mylan's rebating practices that plaintiffs challenge.[25] The court already has addressed this challenge, *see supra* Part IV.D.3.a., and explained **[*79]** why it is unpersuasive.

Mylan also contends a conflict exists between consumers and payors within the proposed classes because plaintiffs have not tried to apportion among themselves the alleged overcharge for each EpiPen purchase. Delving into what it perceives as plaintiffs' strategy, Mylan describes how plaintiffs could have avoided an alleged conflict by proposing a class consisting solely of consumers, thereby avoiding prejudice to the legal arguments and damage recovery for both consumers and payors. Plaintiffs respond, saying the allocation between consumers and third-party payors will be governed by factors such as the proportion each of them paid toward the cost of the EpiPen in a given transaction. At this point, however, the issue is merely speculative. Mylan has not shown that the composition of any class will create internal competition for damages shares. ***HN21***[] Moreover, binding authority from the Circuit recognizes that defendants can claim "no interest in the method of distributing the aggregate damages award among the class members." *In re Urethane Antitrust Litig., 768 F.3d 1245, 1269 (10th Cir. 2014)*.

Also, other courts have considered objections similar to Mylan's argument here and have rejected the challenges. For **[*80]** example, in *In re Lidoderm Antitrust Litigation, No. 14-md-2521-WHO, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367 (N.D. Cal. Feb. 21, 2017)*, defendants asserted that conflicts between consumers and third-party payors precluded certification. *2017 U.S. Dist. LEXIS 24097, [WL] at *26*. Specifically, defendants in that case asserted (a) the amount of overcharge damages would need to be assigned between third-party payors and consumers, "putting the parties into conflict over who gets what recovery," and (b) some third-party payors "would prefer different legal theories about what would have happened in the but-for world, creating conflicts." *Id.* The court rejected both challenges. *First*, the court found defendants had not shown the alleged conflict "would permeate the aggregate damages calculation." *Id.* Instead, the court reasoned, the conflict would arise when damages are allocated. *Id.* And, at that point, claims mechanisms may be used to resolve any conflict "between, for example, an end payor consumer and her health insurance plan over how their overcharge damages should be split." *Id.* Thus, the court concluded the purported conflict "[did] not create a type of conflict that precludes certification." *Id. Second*, the court found the mere possibility of differing opinions over damage theories might **[*81]** arise among third-party payors did not create a conflict preventing certification. *Id.* The court noted that, if such a situation arose, then third-party payors who wanted to pursue different damage theories simply could opt out of the class. *Id.*

Likewise, in *In re Solodyn (Minocycline Hydrochloride) Antitrust Litigation, No. 14-md-02503, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777 (D. Mass. Oct. 16, 2017)*, defendants challenged the end payors' showing of adequacy of representation because third-party insurers and consumers are fundamentally different groups. *2017 U.S. Dist. LEXIS 170676, [WL] at *12*. The court rejected this argument, finding those parties shared a common goal. Each wanted to show they all were injured in the same way by overcharges, and through the same illegal conduct by defendants. *Id.* This, the court ruled, created an "alignment of incentives" sufficient to overcome the conflict challenge. *Id.* Also, defendants argued that class members would compete with one another for damage shares. *2017 U.S. Dist. LEXIS 170676, [WL] at *13*. Citing *Lidoderm*, the court concluded it could address this issue, if necessary, when damages were allocated. *2017 U.S. Dist. LEXIS 170676, [WL] at *13* (citing *In re Lidoderm Antitrust Litig., 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *26-27)*.

Likewise, here, defendants don't persuade the court that the alleged conflict between consumers and third-party payors precludes class certification. To the contrary, the **[*82]** current record shows that consumers and third-party payors share an "alignment of incentives" because they both seek to prove that defendants' illegal conduct caused them to sustain injuries in the form of overpaying for the EpiPen. *In re Solodyn (Minocycline Hydrochloride) Antitrust*

---

[25] Mylan also asserts that PBMs likely are class members, and that conflicts exist between plaintiffs and PBMs because plaintiffs allege the PBMs are RICO co-conspirators. As plaintiffs point out, however, no PBM can qualify as a class member under the class definitions. The proposed definition requires that the entity must have (a) paid or provided reimbursement for an EpiPen; (b) for the purpose of consumption, not resale; and (c) that purchase was intended for consumption by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries. Also, the court has added an exclusion to the class definitions, excluding all third-party payors who own, operate, or control their own PBM. *See supra* Part IV.B. So, nothing suggests a PBM will qualify under the class definitions. Mylan certainly hasn't identified any PBMs who would qualify.

Litig., 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *12. Defendants haven't shown that the alleged conflict in apportioning damages among consumers and third-party payors "would permeate the aggregate *damages calculation*." In re Lidoderm Antitrust Litig., 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *26 (emphasis added). As other courts have recognized, the court can address this issue, if a conflict actually emerges, when damages are allocated. In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *13 ("Defendants have not shown that alleged conflicts among putative class members would 'permeate the aggregate damages calculation' and not merely arise at the time damages are allocated, which can be addressed then." (quoting In re Lidoderm Antitrust Litig., 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *26)). For these reasons, the court doesn't find an intra-conflict exists that precludes certification.

Instead, the court concludes that plaintiffs have established that the named plaintiffs can fairly and adequately represent the interests of the classes. As discussed above, the named plaintiffs' claims are typical of the classes they seek to represent because they allege they sustained the same injuries as a result of defendants' **[*83]** illegal conduct. And, based on the history of the case to date, the named plaintiffs have prosecuted the action vigorously on behalf of the classes through discovery and the class certification proceedings. *See* Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *5 (finding the adequacy requirement was met where "[t]he class representatives' claims are typical" and defendant hasn't "suggested any reason why the class representatives lack sufficient incentive to prosecute fully the claims on the behalf of the classes"). The court thus concludes that plaintiffs satisfy Rule 23's adequacy requirement.

In sum, the court finds plaintiffs satisfy each prerequisite for class certification under Rule 23(a). Accordingly, the analysis now turns to the elements of Rule 23(b)(3) in the context of the proposed RICO, state antitrust, consumer protection, unjust enrichment, and injunctive classes.

E. Rule 23(b)(3) Requirements

1. Superiority

HN22[] To certify a class under Rule 23(b)(3), a class action proceeding must be "superior to other available methods for fairly and efficiently adjudicating the controversy." Fed. R. Civ. P. 23(b)(3). "It is enough that class treatment is superior because it will 'achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural **[*84]** fairness or bringing about other undesirable results.'" CGC Holding Co. v. Broad & Cassel, 773 F.3d 1076, 1096 (10th Cir. 2014) (quoting Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 615, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)).

Mylan contests superiority. It asserts that differently situated plaintiffs with divergent claims, many of whom are uninjured, will require extended, individualized examination and cross-examination. So, Mylan contends, plaintiffs have not shown a class action is the most efficient way to litigate the claims at issue.

Plaintiffs assert the individual claims are negative value claims: they would cost far more to litigate than they are worth. They also assert that most of the class members are geographically dispersed. So, plaintiffs say, the claims of individual class members will be doomed if individual members are forced to take on defendants alone.

The scale of this case, the desirability for uniformity of decision, and the continued economies of time, effort, and expense all support a finding that class treatment is the superior method to decide this dispute fairly and efficiently. Defendants identify no better alternative method, and a class action will protect defendants from multiple or inconsistent verdicts. The court thus finds that the Rule 23(b)(3) superiority requirement is satisfied here.

2. Predominance

HN23[] *Rule 23(b)(3)* also requires a **[*85]** plaintiff to "show that common questions subject to generalized, classwide proof *predominate* over individual questions." *CGC Holding Co. v. Broad & Cassel, 773 F.3d 1076, 1087 (10th Cir. 2014)*. This requirement does not mean a plaintiff must show "that all of the elements of the claim entail questions of fact and law that are common to the class" or "that the answers to those common questions [are] dispositive" of the claim. *Id.* (citation omitted). Instead, the predominance inquiry "'asks whether the common, aggregation-enabling issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues.'" *Id.* (quoting 2 William B. Rubenstein, *Newberg on Class Actions* *§ 4:40* (5th ed. 2012)). To decide whether a plaintiff can satisfy the predominance requirement, a court must first "*characterize* the issues in the case as common or not, and then *weigh* which issues predominate." *Id.* Critically, so long as at least one common issue predominates, a plaintiff can satisfy *Rule 23(b)(3)*—even if individual issues (such as damages) remain and require the court to try them separately. *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016)*.

The determination "'whether "questions of law or fact common to class members predominate" begins, of course, with the elements of the underlying cause of action.'" **[*86]** *CGC Holding Co., 773 F.3d at 1088* (quoting *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)* (quoting *Fed. R. Civ. P. 23(b)(3)*)). Here, plaintiffs argue, common issues predominate each of their asserted legal claims because they intend to prove the elements of their RICO, antitrust, state consumer protection, and unjust enrichment claims using common, classwide evidence. Mylan disagrees. Mylan argues that plaintiffs have not met their burden to show common issues predominate over individual questions. Generally, Mylan asserts three arguments to support its position that individual issues overwhelm the common questions here, thus precluding certification.

First, Mylan argues, the damage calculations for each plaintiff require individualized inquiries that will overwhelm the common questions for all of their legal claims. *Second*, Mylan asserts, plaintiffs cannot prove through common evidence that all class plaintiffs sustained injury. *Finally*, Mylan argues, individual questions predominate over the common issues presented by each of plaintiffs' five proposed classes: the RICO class, the state antitrust class, the state consumer protection class, the unjust enrichment class, and the injunctive class. The court addresses each argument, in turn, below.

a. Individual Damages Issues

Mylan argues **[*87]** plaintiffs have not met their burden to show common issues predominate because, according to Mylan, individual questions about each plaintiff's damages calculation overwhelm the common issues. More specifically, Mylan asserts that plaintiffs haven't provided a common method for measuring damages for each class member. Mylan contends that the damage calculation for each plaintiff requires an individual inquiry about the dates and amounts of each EpiPen purchase, the specifics of the individual's health plan and rebate arrangements, and the action that defendants took to cause that particular plaintiff to sustain harm (*i.e.*, a plaintiff claiming generic delay could not recover damages before the Generic Start Date or after generic delay ended).

Plaintiffs respond that the Tenth Circuit has rejected the argument that individual damages issues preclude certification. **HN24**[] Indeed, the Tenth Circuit recently held: "'The fact that damages may have to be ascertained on an individual basis is not, standing alone, sufficient to defeat class certification.'" *Naylor Farms, Inc. v. Chaparral Energy, LLC, 923 F.3d 779, 798 (10th Cir. 2019)* (quoting *Menocal v. GEO Group, Inc., 882 F.3d 905, 922 (10th Cir. 2018))*. Instead, the Circuit explained, "'material differences in damages determinations'" will destroy predominance only "if those 'individualized **[*88]** issues will overwhelm . . . questions common to the class.'" *Id.* (quoting *Wallace B. Roderick Revocable Living Tr. v. XTO Energy, Inc., 725 F.3d 1213, 1220 (10th Cir. 2013))*. In *Naylor Farms*, the Tenth Circuit concluded that plaintiffs' expert report provided evidence that the expert could determine damages on a classwide basis through use of a specified model. *Id.* And, the court noted, defendant had failed to explain why the expert's model was inaccurate or unworkable. *Id.* The Circuit thus affirmed the district court's conclusion that individual questions about damages did not defeat predominance. *Id.*

HN25[] This court has concluded that the Supreme Court's *Comcast* opinion does not require a classwide damages model for certification under *Rule 23(b)(3)*. In *Syngenta*, Judge Lungstrum rejected defendant's argument that plaintiffs "must provide a damages model that 'establish[es] that damages are susceptible of measurement across the entire class for purposes of *Rule 23(b)(3)*.'" *2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *9* (citing *Comcast Corp. v. Behrend, 569 U.S. 27, 35, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013))*. Judge Lungstrum explained: "Multiple circuit courts . . . including the Tenth Circuit, have rejected such a reading of *Comcast*, which did not create a broadly applicable rule as suggested by [defendant]." *Id.* (first citing *XTO, 725 F.3d at 1220*; then citing *Neale v. Volvo Cars of N. Am., LLC, 794 F.3d 353, 374-75, 75 n.10 (3d Cir. 2015)*; then citing *In re Deepwater Horizon, 739 F.3d 790, 815 (5th Cir. 2014)*; then citing *In re Urethane Antitrust Litig., 768 F.3d 1245, 1258 (10th Cir. 2014))*; *see also* *In re Urethane Antitrust Litig., 768 F.3d at 1258* (refusing to apply *Comcast* because, "unlike the claimants **[*89]** in *Comcast*, our plaintiffs did not concede that class certification required a method to prove class-wide damages through a common methodology")); *XTO, 725 F.3d at 1220* (explaining that, after *Comcast*, still "there are ways to preserve the class action model in the face of individualized damages").

Even so, Judge Lungstrum then recognized that "plaintiffs here *do* rely on a class-wide method to show damages", using their experts' models to calculate aggregate damages. *Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *9-10*; *see also* *In re Urethane Antitrust Litig., 768 F.3d at 1268-69* (affirming jury's damage award calculated on an aggregate basis and, after trial, was distributed among the class members using an expert's damages model). And, Judge Lungstrum concluded, this method sufficed to establish "that common questions predominate here despite any possible individual questions" about damages. *Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *10*.

Applying the Tenth Circuit's holdings in *Naylor Farms* and *Urethane* and Judge Lungstrum's reasoning in *Syngenta* to the facts here, the court concludes that the individual damages questions that defendants have identified don't preclude class certification. Like the plaintiffs in *Syngenta* and *Urethane*, plaintiffs here have proposed a common methodology for calculating damages on an aggregate basis through opinions by **[*90]** their experts, Profs. Rosenthal and Elhauge. Specifically, Prof. Rosenthal has proposed a methodology for calculating damages classwide resulting from defendants' alleged anticompetitive conduct in delaying generic entry and forcing customers to purchase the EpiPen exclusively in a 2-Pak. *See* Doc. 1500-3 at 21-35 (Rosenthal Expert Report ¶¶ 47-82) (describing her methodology for calculating: (1) damages caused by generic delay for plaintiffs' RICO, antitrust, and consumer protection claims; (2) damages caused by the forced purchase of 2-Paks for plaintiffs' RICO and consumer protection claims; (3) damages based on unjust profits realized as a result of defendants' alleged misconduct for plaintiffs' unjust enrichment claims; and (4) an alternative damages theory for defendants' alleged pricing scheme to support plaintiffs' RICO claim); *see also* Doc. 1497-3 at 21-35 (Rosenthal Expert Report ¶¶ 47-82) (sealed version). And, Prof. Elhauge has proposed a methodology for calculating aggregate damages in the form of alleged EpiPen overcharges arising from defendants' foreclosure of brand competition through use of exclusionary contracts with PBMs. *See* Doc. 1500-2 at 56-64, 66 (Elhauge Expert **[*91]** Report ¶¶ 110-120, Table 4) (providing a classwide methodology for calculating share and price impacts of PBM coverage restrictions); *see also* Doc. 1497-2 at 56-64, 66 (Elhauge Expert Report ¶¶ 110-120, Table 4) (sealed version).[26]

Mylan criticizes Profs. Rosenthal and Elhauge's methodologies for calculating classwide damages.[27] This criticism relies on defendants' expert's report that identifies purported flaws in: (1) Prof. Rosenthal's method for calculating classwide damages resulting from defendants' switch to the 2-Pak and generic delay, *see, e.g.*, Doc. 1636-2 at 47-58, 133-34 (Johnson Expert Report ¶¶ 54-72, 166-67), *see also* Doc. 1503-4 at 47-58, 133-34 (Johnson Expert Report ¶¶ 54-72, 166-67) (sealed version); and (2) Prof. Elhauge's method for determining classwide damages

---

[26] Mylan asserts that Profs. Rosenthal and Elhauge's models contradict each other, and they criticize plaintiffs for not providing a method to determine which model applies to any particular plaintiff. Plaintiffs respond that Mylan's argument presents no problem on class certification. Instead, plaintiffs argue, Mylan's argument goes to the issue of damage allocation, and damage allocation will occur at a later stage of the proceeding, based on a jury's findings. Plaintiffs also explain, at that stage, the court can allocate the damage award based on a jury's findings in a way that prevents double recovery. The court agrees that Mylan's argument goes to damage allocation, not to the question whether plaintiffs can prove damages on a classwide basis.

[27] Also, by separate motions, defendants ask the court to exclude Profs. Rosenthal and Elhauge's opinions under *Daubert*. By separate Order, the court denies those motions.

caused by defendants' alleged use of exclusionary contracts with PBMs, *see, e.g.*, Doc. 1636-2 at 62-71, 74-81 (Johnson Expert Report ¶¶ 78-89, 92-99), *see also* Doc. 1503-4 at 62-71, 74-81 (Johnson Expert Report ¶¶ 78-89, 92-99) (sealed version).

HN26[] But the court can't decide this issue—*i.e.*, whether plaintiffs' expert reports actually prove classwide damages—on a certification motion. *See* Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 468-69, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013) (at class certification **[*92]** stage, plaintiffs "need not . . . prove that the predominating question will be answered in their favor"; ultimate failure of proof on essential element dooms claim, but does not mean individualized claims predominate); *see also* In re Ethylene Propylene Diene Monomer (EPDM) Antitrust Litig., 256 F.R.D. 82, 100 (D. Conn. 2009) ("[T]he issue at class certification is not which expert is the most credible, or the most accurate modeler, but rather have the plaintiffs demonstrated that there is a way to prove a class-wide measure of damages through generalized proof."); Natchitoches Parish Hosp. Serv. Dist. v. Tyco Int'l, Ltd., 247 F.R.D. 253, 270 (D. Mass. 2008) ("To determine predominance, a court need not plunge into the weeds of an expert dispute about potential technical flaws in an expert methodology.").

HN27[] At class certification, plaintiffs need not prove that a proposed method for determining damages is valid; instead, the proper inquiry at this stage asks whether damages are capable of proof on a classwide basis. *See* Comcast Corp. v. Behrend, 569 U.S. 27, 34, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013) (holding that plaintiffs failed to establish predominance because their damages model "falls far short of establishing that damages are capable of measurement on a classwide basis"); *see also* In re Wellbutrin XL Antitrust Litig., 282 F.R.D. 126, 144 (E.D. Pa. 2011) ("At the class certification stage, the plaintiffs are not required to prove damages by calculating specific damages figures for each member of the class, but rather **[*93]** they must show that a reliable method is available to prove damages on a class-wide basis." (first citing In re Neurontin Antitrust Litig., No. 02-1390, 2011 U.S. Dist. LEXIS 7453, 2011 WL 286118, at *9 (D.N.J. Jan. 25, 2011); then citing Bell Atl. Corp. v. AT&T Corp., 339 F.3d 294, 303 (5th Cir. 2003))). And, if each expert's approach is plausible based on classwide proof and does not rely on or implicate individualized questions that will predominate over common ones, "[i]t is sufficient at [the class certification stage] to note that both [experts'] methods . . . are plausible approaches . . . ." In re Lidoderm Antitrust Litig., No. 14-md-02521-WHO, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *18 (N.D. Cal. Feb. 21, 2017) (recognizing that, "in the end," deciding which expert opinion accurately estimates the but-for prices of generic and branded drugs "is subject to further merits-based determinations and findings by the trier of fact"). *Cf.* Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, No. 04-5898, 2010 U.S. Dist. LEXIS 105646, 2010 WL 3855552, at *6 (E.D. Pa. Sept. 30, 2010) (explaining that "resolving expert disputes in order to determine whether a class certification requirement has been met is always a task for the court" and "[w]eighing expert opinions is not only permissible; it may be integral to the rigorous analysis Rule 23 demands" if the expert opinion is necessary to determine whether plaintiff satisfies the certification requirement (citations and internal quotations omitted)).

Here, plaintiffs have come forward with a plausible method for **[*94]** determining classwide damages through the opinions of Profs. Rosenthal and Elhauge.[28] Mylan's attacks against these experts' methodologies don't undermine their plausibility for establishing classwide damages; instead, they go to the weight the trier of fact should give them when it decides whether the methodologies, in fact, establish that the classes—as a whole—have sustained damage. *See* Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *10 (concluding that defendants' criticisms about plaintiffs' experts' methodologies failed to show that they "are so unreliable as to preclude certification" but instead, "[m]ore importantly for purposes of certification, these criticisms present common questions that do not undermine a finding of predominance"); *see also* In re Solodyn (Minocycline Hydrochloride)

[28] The court recognizes that this case involves no competing expert methodologies for calculating damages. Defendants' expert, Dr. Johnson, explicitly states that his opinions, to date, advance no methodology for calculating damages. Doc. 1724 at 91-92 (Tr. of Mot. Hr'g Class Certification — Phase I 91:25-92:5 ("Q: Were you asked to offer any affirmative assessment of a classwide method for assessing impact or damages in this case? A: No. My assignment was not to put forward an affirmative methodology, it was to assess the work of Professor Rosenthal and Professor Elhauge.")). And, even if the certification decision required the court to weigh opposing expert opinions, which it does not, *see* In re Lidoderm Antitrust Litig., 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *18, that exercise would not apply to damage calculations.

Antitrust Litig., No. 14-md-02503, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *10 (D. Mass. Oct. 16, 2017) (concluding, at the class certification stage, "any disagreement [about expert's method of calculating damages] does not overcome the Plaintiff's showing that damages will be substantially shown by common proof"). Plaintiffs here have shouldered their burden to establish that common issues predominate the damages inquiry by presenting a common method for calculating classwide damages on an aggregate basis. **[*95]** This showing satisfies Rule 23's predominance requirement.

b. Uninjured Class Members

Next, Mylan argues that plaintiffs cannot shoulder their burden to establish predominance because they cannot show that all putative class members sustained injury. Instead, Mylan argues, plaintiffs' proposed class definitions contain too many uninjured class members for the court to certify a class action under Rule 23. According to Mylan, predominance fails for each of plaintiffs' liability theories—*i.e.*, the 2-Pak theory, the Auvi-Q foreclosure theory, and the generic delay theory—across all proposed classes because there are uninjured class members who cannot be identified without mini-trials. Mylan criticizes the alleged absence of or flawed analyses by plaintiffs' expert witnesses which, it contends, accounts for plaintiffs' failure to carry their burden to show all class members were injured under any of plaintiffs' legal theories. For these reasons, Mylan urges the court to deny certification for lack of predominance.

Plaintiffs respond with two arguments. First, plaintiffs argue that the collateral source doctrine bars Mylan's argument that the proposed class definitions contain class members who are **[*96]** uninjured because they used a co-pay, coinsurance, or deductible to pay for their EpiPens, and thus had their EpiPens paid for by insurance companies. Second, plaintiffs argue that they have established, through common evidence, that the proposed classes have sustained injury classwide sufficient to satisfy the Tenth Circuit's requirements for certification. According to plaintiffs, Mylan demands a standard of proof that the law in our Circuit does not require. And, plaintiffs assert, their experts provide ample support to show an injury sustained across the classes. Also, plaintiffs argue, all class members have sustained injury because defendants' conduct deprived them of a choice in the market, whether that loss of choice involved the absence of a less expensive generic, foreclosed access to competing brands, or a preference for a single purchase EpiPen. The court addresses each argument, separately, below.

i. Collateral Source Doctrine

Plaintiffs assert that the collateral source doctrine bars Mylan's arguments that certain class plaintiffs—ones who used insurance to pay for their EpiPens—are not injured. ***HN28***[] The Tenth Circuit has explained that the collateral source rule is "[d]erived **[*97]** from the common law [and] posits that '[p]ayments made to or benefits conferred on the injured party from other sources are not credited against the tortfeasor's liability, although they cover all or a part of the harm for which the tortfeasor is liable.'" Friedland v. TIC-The Indus. Co., 566 F.3d 1203, 1205-06 (10th Cir. 2009) (quoting Restatement (Second) of Torts § 920A(2) & cmt. d (1979)). "Th[is] rule thus permits an injured plaintiff to recover more than the damages he has suffered as the result of an injury." Id. at 1206. The Circuit has explained the rationale for applying the rule: "'[P]ublic policy favors giving the plaintiff a double recovery rather than allowing a wrongdoer to enjoy reduced liability simply because the plaintiff received compensation from an independent source.'" Prager v. Campbell Cty. Mem'l Hosp., 731 F.3d 1046, 1059 (10th Cir. 2013) (quoting Green v. Denver & Rio Grande W. R.R. Co., 59 F.3d 1029, 1032 (10th Cir. 1995)). "Thus, courts have applied the rule when the injured plaintiff has been compensated by, for example, . . . the plaintiff's [own] insurance." Friedland, 566 F.3d at 1206 (citation omitted).

Defendants argue that the collateral source rule doesn't apply here. Specifically, they argue that the collateral source rule contradicts the way plaintiffs have litigated the case to date—*i.e.*, choosing to include both consumers and third-party payors as class members in the proposed class definitions. Defendants argue there is no need to include payors **[*98]** in the classes if consumers can assert injuries for the amounts paid by those payors. Also, defendants assert that applying the collateral source doctrine would raise conflicts between class members over who can recover for what payments.

Defendants also emphasize that plaintiffs repeatedly have described their EpiPen expenses as payments made "out of pocket, after insurance." *See, e.g.*, Doc. 60 at 11, 23-24 (Class Compl. ¶¶ 11, 13, 62-64). Plaintiffs' expert has calculated damages separately for consumers and third-party payors. *See, e.g.*, Doc. 1500-3 at 29 (Rosenthal Expert Report ¶ 67) (separating damages for third-party payors, insured consumers, and cash payers). And, importantly, plaintiffs expressly have excluded from the class definitions: "Single flat co-pay" consumers who purchased EpiPens or generic EpiPens only via a fixed dollar co-payment that is the same for all covered devices, whether branded or generic (*e.g.*, $20 for all branded and generic devices).[29] Defendants suggest that plaintiffs excluded this group because they recognize that a consumer who paid a single, flat co-pay didn't sustain any damage. For all these reasons, defendants argue the collateral source doctrine **[*99]** shouldn't apply to a case where plaintiffs have chosen to bring a class action on behalf of consumers and third-party payors collectively.

The court concludes that it need not decide—as a matter of law—whether the collateral source rule applies to plaintiffs' claims here on this certification motion. As Judge Lungstrum found in *Syngenta*, the court didn't need to decide on certification the "legal issue" whether the collateral source doctrine barred defendants from offsetting benefits realized by certain putative class members. 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *9. Instead, the question was whether "the necessary individual inquiries [to determine whether a class member sustained injury] would be so overwhelming as to defeat predominance . . . ." *Id.* Judge Lungstrum concluded that they weren't. *Id.* Judge Lungstrum also found it was "worth noting that the availability of such offsets presents a common question." *Id.*

Similarly, here, the court must decide whether individual questions about the putative class members' injuries overwhelm the common issues. As discussed below, even without considering or applying the collateral source doctrine, plaintiffs have presented **[*100]** sufficient classwide evidence in their expert reports that the amount of potentially uninjured class members in the putative classes isn't so large that it precludes class certification under Tenth Circuit case law. Also, as Judge Lungstrum recognized in *Syngenta*, the question whether the collateral source doctrine applies to plaintiffs who used insurance to pay for their EpiPen purchases is a legal issue that presents a common question that applies classwide.

Defendants disagree. They argue that applying the collateral source rule raises even more individual questions because the collateral source rule is a creature of state law, at least when it is applied to plaintiffs' state law claims. *See* Blanke v. Alexander, 152 F.3d 1224, 1231 (10th Cir. 1998) (identifying the collateral source rule as a "substantive state rule[ ] of evidence" (citation and internal quotation marks omitted)). And, defendants contend, many states have abolished or limited the collateral source rule in recent years. Thus, they argue, differences in

---

[29] At oral argument on the certification motion, plaintiffs' counsel suggested that this exclusion isn't necessary if the court applies the collateral source doctrine to plaintiffs' claims. Doc. 1789 at 26 (Tr. of Mot. Hr'g Class Certification — Phase II 26:9-20). Regardless whether the collateral source doctrine applies to plaintiffs' claims, the court refuses to remove this exclusion from the proposed class definition. As defendants asserted at oral argument, plaintiffs included this proposed exclusion in their original motion. Defendants have litigated the certification motion on the understanding that plaintiffs' class definition excluded single, flat co-pay consumers. Id. at 94 (Tr. of Mot. Hr'g Class Certification — Phase II 94:4-95:11). And defendants' expert prepared his report based on his assumption that this exclusion was part of the class definitions. Thus, defendants argue, the court shouldn't permit plaintiffs to remove the exclusion at this late stage.

The court agrees with defendants. The court will not expand the class definitions from the ones plaintiffs previously proposed. *See* In re Wholesale Grocery Prods. Antitrust Litig., No. 09-MD-2090 ADM/TNL, 2016 U.S. Dist. LEXIS 121006, 2016 WL 4697338, at *5-6 (D. Minn. Sept. 7, 2016) (rejecting plaintiffs' revised class definition that included more putative plaintiffs on certification motion because "[p]laintiffs [had] impermissibly expanded the class definition"); *see also* Costelo v. Chertoff, 258 F.R.D. 600, 604-05 (C.D. Cal. 2009) ("The Court is bound to class definitions provided in the complaint and, absent an amended complaint, will not consider certification beyond it."). And, the court finds no reason to remove the exclusion based on an assertion made by plaintiffs at oral argument.

state laws will require individual inquiries to determine whether and how to apply a particular state's collateral source rule to specific class members.

Plaintiffs respond, arguing that recent modifications to state rules **[*101]** governing the collateral source doctrine apply to cases involving medical malpractice, personal injury, or wrongful death. *See* Bryce Benjet, *A Review of State Law Modifying the Collateral Source Rule: Seeking Greater Fairness in Economic Damages Awards*, 76 Def. Counsel. J. 210, 211 (Apr. 2009) (explaining that "collateral source damages are often limited in health care liability cases as part of broader tort-reform legislation"); *see also generally id.* (describing the differences among the states' collateral source rules). But, plaintiffs contend, defendants haven't identified any state law departures from the collateral source rule under the federal common law that would apply to the claims asserted here. The court agrees that—to the extent the collateral source doctrine applies to plaintiffs' claims here—any variations in the state laws governing the collateral source rule don't raise individual issues that will overwhelm the common questions.

Finally, in both their Reply and their Response to Defendants' Surreply, plaintiffs offer to exclude another group of individuals from the class definitions.[30] Doc. 1837 at 23; Doc. 1579-1 at 7. Plaintiffs suggest that the class definitions could exclude individual consumers who did **[*102]** not purchase an EpiPen after the Generic Start Date. Plaintiffs question whether more than a *de minimis* number of such consumers exist when most EAI consumers make repeat purchases every year so that they have an EAI device on hand to treat anaphylaxis. In any event, plaintiffs concede that removing these individuals from the class definitions would reduce the number of purportedly uninjured class members. And, plaintiffs explain, their expert has provided damages calculations that segregate these consumers from her aggregate damage calculations. Doc. 1711-1 at 23-24 (Rosenthal Reply Report ¶ 36, Tables 6-7). Defendants never argue that the court should reject plaintiffs' proposed exclusion. After considering plaintiffs' proposal, the court agrees that this exclusion further protects against including uninjured class members in the classes. ***HN29***[] And, as our court has recognized, "the [c]ourt and parties are authorized" to narrow the class definitions "[i]f the class definition should require tailoring as the litigation progresses[.]" *Sibley v. Sprint Nextel Corp., 254 F.R.D. 662, 671 (2008)*; *see also* *McCurley v. Royal Seas Cruises, Inc., 331 F.R.D. 142, 162 (S.D. Cal. 2019)* ("A plaintiff may properly narrow the class for which it seeks class certification even in a reply brief."); *Abraham v. WPX Energy Prod., LLC, 322 F.R.D. 592, 611 (D.N.M. 2017)* (holding that "a plaintiff is not **[*103]** bound to the class definition in the operative complaint" and concluding that "[s]ome flexibility . . . is needed in crafting a class action where one is warranted"). So, the court will add this exclusion to the class definitions.

ii. The Presence of Uninjured Class Members

Next, Mylan asserts that plaintiffs fail to shoulder their burden to establish predominance because they cannot prove that all putative class members sustained injury. Relying on cases from other Circuits, Mylan argues that the law requires plaintiffs to "show that they can prove, through common evidence, that all class members were in fact injured by" defendants' conduct. *In re Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d 244, 252, 406 U.S. App. D.C. 371 (D.C. Cir. 2013)*; *see also* *In re Rail Freight Fuel Surcharge Antitrust Litig., 934 F.3d 619, 623-24 (D.C. Cir. 2019)* [hereinafter "*Rail Freight II*"] (affirming district court's denial of class certification because plaintiffs had failed to establish classwide injury; instead, the evidence showed that 2,037 putative class members sustained no injury, and that finding established a need for individual inquiries that defeated predominance);[31] *In re Asacol Antitrust*

[30] Plaintiffs propose this exclusion as an "alternative to applying the collateral source rule." Doc. 1579-1 at 7. Although the court doesn't decide whether to apply the collateral source rule now, it concludes that this exclusion is warranted because it removes from the class definitions individual consumers who could not have sustained injury because their only EpiPen purchases occurred before the Generic Start Date.

[31] After oral argument, defendants submitted a letter to the court citing as supplemental authority the *Rail Freight II* opinion and another case from the District of Massachusetts. Doc. 1859 (first citing *Rail Freight II, 934 F.3d 619*; then citing **[*104]** *In re Intuniv Antitrust Litig., No. 1:16-cv-12396-ADB, 2019 U.S. Dist. LEXIS 141643, 2019 WL 3947262 (D. Mass. Aug. 21, 2019)*). Plaintiffs responded to defendants' submission, arguing that the supplement authority doesn't apply to this case because it is

Litig., 907 F.3d 42, 57-58 (1st Cir. 2018) (reversing district court's grant of certification because Rule 23 does not permit "a trial in which thousands of class members [must] testify" to establish that they sustained injury).

Mylan's position relies heavily on the First Circuit's opinion in *Asacol*. The Tenth Circuit has not examined *Asacol* or otherwise indicated if it would follow the case. The analysis that follows is, therefore, an assessment of *Asacol*, relevant Tenth Circuit law, and a prediction whether the Tenth Circuit would adopt *Asacol*.

(a) Legal Standard

In *Asacol*, union-sponsored benefit plans sued drug manufacturer Warner Chilcott Limited on behalf of a class of similarly situated indirect purchasers, including individual consumers. 907 F.3d at 45. The plaintiffs alleged that Warner had suppressed entry of a generic drug by removing it from the market at the same time a new drug was introduced. *Id.* The district court had estimated that 10% of class members had not been injured by defendants' alleged anticompetitive conduct. *Id. at 46-47*. The court based its finding on conclusions drawn by both sides' experts who inferred the 10% figure from the number of brand loyalists who had purchased similar pharmaceutical products. *Id. at 47*. In other words, the 10% figure measured the percentage of brand-loyal customers would not have switched to the generic alternative, even if a lower-priced generic alternative were available, had **[*105]** it entered the market. *Id.* Nevertheless, the district court found that the number of uninjured class members—*i.e.*, 10%—was *de minimis*, and thus did not preclude class certification. *Id.* The First Circuit accepted the district court's estimate and found it necessary to consider how to treat these uninjured class members in the face of the principle requiring plaintiffs to show proof of injury. *Id. at 51*. The First Circuit framed the question as one asking whether a class can be certified "even though the injury-in-fact will be an individual issue, the resolution of which will vary among class members." *Id.*

In its order granting class certification, the *Asacol* district court had approved plaintiffs' proposal for a process to cull out uninjured class members before judgment. *Id. at 52*. Under the process approved by the district court, class members would receive notice asking them to submit a claim form, along with data and documentation. *Id.* A claims administrator then would evaluate each claim under a court-approved formula, individuals could contest the calculations, and the court would review the administrator's report and make any necessary changes. *Id.*

On appeal, the First Circuit concluded that review **[*106]** by a claims administrator of defendants' already-announced intention to challenge any affidavits would deprive defendants of their Seventh Amendment right to a jury trial and their due process rights. *Id. at 53* ("Plaintiffs' proposed claims process provides defendants no meaningful opportunity to contest whether an individual would have, in fact, purchased a generic drug had one been available."). Also, the First Circuit found, plaintiffs hadn't established that the number of affidavits to which defendants could raise a legitimate challenge "is so small that it will be administratively feasible to require those challenged affiants to testify at trial." *Id. at 53*. The First Circuit concluded the need to identify thousands of uninjured individuals would predominate over common questions and "render an adjudication unmanageable absent evidence such as . . . unrebutted affidavits . . . or some other mechanism that can manageably remove uninjured persons from the class in a manner that protects the parties' rights." *Id. at 53-54*.

The First Circuit also rejected plaintiffs' fallback position. This alternative argued that plaintiffs could prove classwide impact through testimony by their expert, who calculated that "a generic substitute **[*107]** drug would have achieved approximately ninety percent market penetration in a but-for world, from which, in part, the district court estimated that about ten percent of the class was likely brand loyal and thus uninjured." *Id. at 54*. The First Circuit held that where the aggregate damage amount is the sum of damages sustained by a number of individuals and determining whether any individual was injured "turns on an assessment of the individual facts concerning that person," the defendant must receive the opportunity to "challenge each class member's proof that the defendant is liable to that class member." *Id. at 55*. And whether that inquiry precludes class certification because it threatens predominance "turns on whether such challenges are reasonably plausible in a given case and whether the plaintiff

authority from outside the Tenth Circuit and factually different from the class certification record here. Doc. 1881. The court addresses these arguments more fully in the analysis below.

cannot demonstrate that allowing for such challenges in a manner that protects the defendant's rights will be manageable and superior to the alternatives." *Id.*

No Tenth Circuit case has addressed the First Circuit's *Asacol* opinion. And Mylan's brief appears to concede that the Tenth Circuit has not embraced *Asacol*. But during oral argument at the class certification hearing, Mylan tried to distinguish **[*108]** *DG ex rel. Stricklin v. Devaughn, 594 F.3d 1188 (10th Cir. 2010)*, and two cases from this District that appear to conflict with *Asacol*. Mylan urged the court to adopt *Asacol*. In sum, Mylan's view is that, as counsel argued, *Asacol* is "a better read of the law." Doc. 1789 at 64 (Tr. of Mot. Hr'g Class Certification — Phase II 64:17-20).

The court agrees with Mylan on some fronts. *DeVaughn* doesn't provide direct Tenth Circuit authority on this issue. ***HN30***[] In *Devaughn*, the Tenth Circuit explained that "*Rule 23*'s certification requirements neither require all class members to suffer harm or threat of immediate harm nor Named Plaintiffs to prove class members have suffered such harm." *594 F.3d at 1198*. The Circuit recognized: "'[A] class will often include persons who have not been injured by the defendant's conduct. . . . Such a possibility or indeed inevitability does not preclude class certification.'" *Id.* (quoting *Kohen v. Pac. Inv. Mgmt. Co., 571 F.3d 672, 677 (7th Cir. 2009))*. But, as Mylan posits, *Devaughn* is different because it was an injunction class case under *Rule 23(b)(2)*, and thus the Tenth Circuit never has discussed whether *Rule 23* permits certification of a class with uninjured class members in the context of a class seeking money damages under *Rule 23(b)(3)*.

But, the court disagrees with Mylan on other fronts. For example, Mylan asserts that the two cases **[*109]** from this District—*Syngenta* and *Urethane*—differ from the question presented here. To the contrary, the court finds these two cases—both decided by Judge Lungstrum—highly persuasive on the question of what standard the Tenth Circuit would apply when deciding whether plaintiffs have made a sufficient showing of classwide injury for certification under *Rule 23*.

First, in *Urethane*, Judge Lungstrum denied a motion to decertify the class he previously had certified. *In re Urethane Antitrust Litig., No. 14-1616-JWL, 2013 U.S. Dist. LEXIS 69784, 2013 WL 2097346, at *1 (D. Kan. May 15, 2013)*. Defendant argued that events after certification confirmed some class members sustained no damages, thereby making certification inappropriate. *2013 U.S. Dist. LEXIS 69784, [WL] at *2*. Plaintiffs conceded the premise of the argument—that not every class member had sustained compensable damage. *Id.* Plaintiffs argued, instead, that all class members had been affected by a conspiracy to elevate prices, even if some may have mitigated their damages or otherwise did not sustain damages that could be quantified. *Id.* Judge Lungstrum found that these facts didn't prevent class certification. *Id.* He noted that defendant "has not cited any authority supporting the argument that the presence of a few 'zero-damages' class members necessarily **[*110]** defeats certification." *Id.* ***HN31***[] And, citing Seventh Circuit case law, Judge Lungstrum recognized that "a class will almost inevitably include persons who have not been injured by the defendant's conduct, and that fact (or even inevitability) does not preclude certification." *Id.* (citing *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 823 (7th Cir. 2012))*. Judge Lungstrum wrote that the Seventh Circuit's opinion in *Messner* also "noted that a class is too broad to permit certification only if it includes a great number of members who *could* not have been harmed by the defendant's conduct (as opposed to a great number who *ultimately* are shown to have suffered no harm)." *In re Urethane Antitrust Litig., 2013 U.S. Dist. LEXIS 69784, 2013 WL 2097346, at *2* (citing *Messner, 669 F.3d at 824*).

Judge Lungstrum's opinion in *Urethane* doesn't quantify what number would amount to a "great number" of members who sustained no harm. But, Judge Lungstrum denied the motion to decertify, finding that "plaintiffs have shown persuasively that only a very small percentage of class members suffered no damages." *Id.* And, Judge Lungstrum signaled his agreement with the Seventh Circuit's analysis by concluding, "the presence of those few members does not compel decertification." *Id.*

The Tenth Circuit affirmed Judge Lungstrum's certification order. *In re Urethane Antitrust Litig., 768 F.3d 1245 (10th Cir. 2014)*, *cert. denied 137 S. Ct. 291 (2016)*. Although the Tenth Circuit **[*111]** never addressed explicitly whether Judge Lungstrum correctly applied the Seventh Circuit's test for determining when certification of a class containing uninjured class members is appropriate, the Circuit affirmed Judge Lungstrum's certification decision, noting that the "presence of individualized damages issues" did not preclude certification because "[c]lass-wide proof is not required for all issues" as long as plaintiffs made "a showing that the questions common to the class predominate over individualized questions." *Id. at 1255*.

In the second case in this District—*Syngenta*—Judge Lungstrum again relied on the Seventh Circuit's standard for determining whether the presence of uninjured putative class members defeats certification. *Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *4*. Judge Lungstrum held that "the possibility or even inevitability that the class will include members not injured by the defendant's conduct does not preclude class certification." *Id.* (citing *Kohen v.. Pac. Inv. Mgmt. Co., 571 F.3d 672, 677 (7th Cir. 2009))*. Instead, again applying *Messner*, Judge Lungstrum recited the Seventh Circuit's test from that case: "[I]f 'a class is defined so broadly as to include a great number of members who for some reason could not have been harmed by the defendant's allegedly unlawful conduct, **[*112]** the class is defined too broadly to permit certification.'" *Id.* (quoting *Messner, 669 F.3d at 824*). Judge Lungstrum then considered defendants' arguments that some plaintiff corn producers may not have sustained injury based on a drop in central market corn prices because that price decrease didn't affect local pricing, or because some plaintiffs sold specialty corn, or because some plaintiffs benefitted by selling other crops or feeding livestock. *Id.* Judge Lungstrum concluded that the arguments were "merits-based defenses" and provided "no basis to conclude that a 'great number' of members *could not have been harmed* as alleged by plaintiffs." *Id.* (citing *Messner, 669 F.3d at 824*); *see also* *Messner, 669 F.3d at 824* (noting the "critical" distinction between a "fatally overbroad" class and one that "consists largely (or entirely, for that matter) of members who are ultimately shown to have suffered no harm" because "that may not mean that the class was improperly certified but only that the class failed to meet its burden of proof on the merits")).

In *Syngenta*'s predominance analysis, Judge Lungstrum noted several commonalities among the putative class members, including that plaintiffs' expert opinions would show both the fact of damage and the amount **[*113]** using classwide proof. *Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *5*. Judge Lungstrum rejected defendants' argument that the fact and amount of damages presented individual issues "that are so important [they] defeat predominance." *2016 U.S. Dist. LEXIS 132549, [WL] at *6*. Defendants based their argument on the parties' competing expert opinions, which they urged Judge Lungstrum to weigh and to declare defendants the winner. *Id.* But Judge Lungstrum declined to perform that weighing function at certification, concluding that "the persuasiveness of such evidence [was a question] for the jury at trial." *2016 U.S. Dist. LEXIS 132549, [WL] at *7*. ***HN32***[] Plaintiffs' burden at certification is to show predominance; they need not convince the court that their evidence will prevail at trial. *Id.* And, Judge Lungstrum concluded, "a reasonable juror could believe that" all class members sustained injury from a decrease in "local corn prices [that] reflect[ed] changes in the [Chicago Board of Trade] futures price, as opined by plaintiffs' experts." *Id.* Because the Supreme Court has allowed the use of such representative evidence to show classwide liability in a class action, Judge Lungstrum concluded that certification was warranted. *Id.* (citing *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016))*. As Judge Lungstrum noted, "[p]laintiffs are required to offer evidence to show **[*114]** predominance," and, he concluded, "they have done so here." *Id.* [32]

As Judge Lungstrum's two opinions show, our court has followed Seventh Circuit precedent when analyzing whether the presence of uninjured class members defeats certification. ***HN33***[] That is, as the Seventh Circuit has held, "a class should not be certified if it is apparent that it contains a great many persons who have suffered no injury at the hands of the defendant . . . ." *Kohen, 571 F.3d at 677-78* (citations omitted). *Kohen* determined that this issue is best averted by focusing on the class definition. *Id. at 677*. "[I]f the definition is so broad that it sweeps within it persons who could not have been injured by the defendant's conduct, it is too broad." *Id.*[33] The Seventh

[32] Defendants filed an interlocutory *Rule 23(f)* Petition for Permission to Appeal Class Certification Order. The Tenth Circuit denied the request, noting that the decision to grant a *Rule 23(f)* petition is purely discretionary and finding that defendants had not established a reason warranting appellate review such as manifest error or an unresolved legal issue. Order, *In re Syngenta AG MIR 162 Corn Litig.*, No. 16-607 (10th Cir. Dec. 7, 2016), ECF No. 01019731851. The Circuit also described Judge Lungstrum's certification decision as "well-researched and reasoned, and if any rulings are error, those errors can be addressed on appeal, if necessary." *Id.* at 3.

Circuit repeated this observation in *Messner* and distinguished it from a proposed class consisting "largely (or entirely, for that matter) of members who are ultimately shown to have suffered no harm, [as] that may not mean that the class was improperly certified but only that the class failed to meet its burden of proof on the merits." *Messner, 669 F.3d at 824* (citing *Schleicher v. Wendt, 618 F.3d 679, 686 (7th Cir. 2010))*; *see also* *Schleicher, 618 F.3d at 686* ("*Rule 23* allows certification of classes that are fated to lose as well as classes that are sure to win."). **[*115]** But neither *Messner* nor *Kohen* provides a formula for determining when a class includes too many uninjured members. *See* *Messner, 669 F.3d at 825* ("There is no precise measure for 'a great many.'"). How many is "too many" is "a matter of degree, and will turn on the facts as they appear from case to case." *Id. at 825*.[34]

Given the certification motion plaintiffs make here, the court finds persuasive the approach used by the Seventh Circuit and Judge Lungstrum.[35] And, the court predicts the Tenth Circuit would follow those cases if presented with the issue. The court also concludes that the Tenth Circuit wouldn't follow *Asacol*.[36]

Thus, the court applies the standard articled by the Seventh Circuit and applied by Judge Lungstrum, below. And so, the court must answer the following question: Is class certification precluded here because the putative class definitions "'contain[ ] a great many persons who have suffered no injury at the hands of the defendant[?]'" *Messner, 669 F.3d at 825* (quoting *Kohen, 571 F.3d at 677*).

(b) Prof. Rosenthal's Probability Analysis

Plaintiffs rely on a probability analysis **[*116]** conducted by Prof. Rosenthal to assert that the proposed classes do not contain great numbers of class members who didn't sustain harm. To the contrary, plaintiffs contend that the number of uninjured class plaintiffs in each class, if any, is *de minimis*. First, Prof. Rosenthal estimates that the

---

[33] On the other hand, the definition cannot narrow the class so much that it becomes an inappropriate fail-safe class, *i.e.*, one where the court has to decide the merits of each prospective individual class members' claims to determine class membership, thereby defining the class in terms of the legal injury. *See* *Messner, 669 F.3d at 825*.

[34] In *Asacol*, the district court found 10% a *de minimis* number of uninjured class members. *907 F.3d at 47*. When reversing the district court's certification decision, the First Circuit did not specify the percentage of uninjured plaintiffs that are "too many" to permit certification. Though later cases cite *Asacol* to find that 10% is not *de minimis*, this finding—if indeed *Asacol* made it—is an implicit conclusion.

[35] Our court also cited *Urethane* approvingly in another case. *See* *Sibley v. Sprint Nextel Corp., 315 F.R.D. 642, 664 (D. Kan. 2016)* ("[G]iven that so many cases and treatises agree that the need for individualized damage determinations does *not* defeat commonality or predominance, it follows that the fact that some class members suffered no damages *also* does not defeat commonality or predominance." (citing *In re Urethane Antitrust Litig., 2013 U.S. Dist. LEXIS 69784, 2013 WL 2097346, at *2* (other citations omitted))).

[36] Two district courts have issued recent orders that sharply criticize *Asacol* and its effect on consumers' ability to bring class actions. *See In re Loestrin* *24 FE Antitrust Litig., 410 F. Supp. 3d 352, 404 (D.R.I. 2019)* (denying motion to certify a class of end-payor plaintiffs ("EPP") because *Asacol* left the court "no room to rewrite what the First Circuit has clearly scripted" but still the court was "troubled that over ninety percent of consumers in the proposed EPP class may have been injured by Defendants' alleged unlawful conduct, but now have no practical recourse under ***antitrust law***"); *see also* *In re Intuniv Antitrust Litig., No. 1:16-cv-12396-ADB, 2019 U.S. Dist. LEXIS 141643, 2019 WL 3947262, at *7 n.8, *8 (D. Mass. Aug. 21, 2019)* (denying motion to certify class because "*In re Asacol* dictates the outcome here" but also recognizing "*In re Asacol* is likely a death knell for pharmaceutical, antitrust class actions brought by indirect purchasers [because] [g]iven the myriad ways in which consumers could theoretically be uninjured, once a defendant asserts an intent to challenge each claim to have been affected by their conduct, it becomes nearly impossible for indirect purchasers to show that common issues will predominate under *In re Asacol*," so "[a]bsent class certification, it is likely that most putative class members' claims will go unremedied," and "assuming that Defendants engaged in anticompetitive conduct, although *In re Asacol* eliminates the possibility that some consumers might obtain a recovery for damages they did not suffer, it also ensures that a much larger number of Intuniv consumers will receive no remedy for harm [they] actually suffered").

likelihood that a third-party payor who covered as few as five prescriptions sustained injury from generic delay is 99.999% or better. Doc. 1711-1 at 30-32 (Rosenthal Reply Report ¶¶ 53, 54, Table 8).[37] Second, Prof. Rosenthal opines the likelihood that a third-party payor who reimbursed at least 10 patients for EpiPens was injured by Mylan's switch to the 2-Pak is 99%. *Id. at 32-33* (Rosenthal Reply Report ¶¶ 55-56). Third, Prof. Rosenthal estimates that the likelihood that individual consumers sustained injury from generic delay or Mylan's switch to the 2-Pak is about 95%. *Id. at 34-37* (Rosenthal Reply Report ¶¶ 58-60). Finally, Prof. Rosenthal opines that all third-party payors and all cash payor consumers sustained injury from brand foreclosure. *Id. at 33-34* (Rosenthal Reply Report ¶ 57).[38]

Defendants criticize Prof. Rosenthal's probability analysis and urge the court to disregard it as unreliable. By separate **[*117]** Order, the court denies defendants' motion to exclude Prof. Rosenthal's probability analysis under *Daubert*. Also, the court finds that defendants' criticisms of the probability analysis don't undermine its usefulness to the court's certification decision. The court already has addressed many of these criticisms in the *Daubert* Order[39] and in this Order, *see supra* Part IV.D.3.b.

For example, defendants assert that Prof. Rosenthal's analysis fails to account properly for "brand loyalists," *i.e.*, consumers who would continue purchasing the EpiPen even when a generic is available. Prof. Rosenthal's analysis uses a 95% estimate to calculate the rate consumers would have switched from the EpiPen to a generic EAI device. But, defendants' expert provides his own opinion about the proper switching rate to show that Prof. Rosenthal's estimate is wrong. Doc. 1503-4 at 145-46 (Johnson Expert Report ¶ 180) (sealed version). Prof. Rosenthal responds that defendants' expert has used the wrong metric: He estimates brand loyalty by using the switching rates from the EpiPen to Mylan's own authorized generic. As Prof. Rosenthal explains, those switching rates aren't an accurate indicator of brand **[*118]** loyalty because they aren't drawn from a competitive market. Instead, Prof. Rosenthal has explained how her analysis more accurately reflects a 95% switching rate in a but-for world where a generic is available in a competitive market.

Also, defendants argue that some consumers aren't injured because they paid less for their EpiPens than the but-for price calculated by Prof. Rosenthal. But, as plaintiffs argue, comparing the actual price a consumer paid with a but-for price used to calculate aggregate damages is like comparing apples to oranges. As discussed above, *supra* Part IV.D.3.b., Prof. Rosenthal's average but-for price is an average used to calculate aggregate damages. And, that average isn't relevant to determining an individual class member's damages. Instead, individual damages are assessed by determining the but-for generic price that an individual class member would have paid at the point in

---

[37] Defendants assert that plaintiffs don't define the classes to include third-party payors who have covered *five or more* prescriptions. So, defendants contend, Prof. Rosenthal's conclusion shouldn't apply here. But, as plaintiffs argue, Prof. Rosenthal's probability analysis estimates that the likelihood that a third-party payor who covered just two prescriptions sustained injury is between 98.9% and 99.3%. Plaintiffs assert that these figures for just two purchases also demonstrate a very low probability that the putative classes include uninjured class members. Also, as plaintiffs have demonstrated, most third-party payor plans involve thousands of consumers. And, given the prevalence of anaphylaxis, it seems unlikely that a third-party payor would have covered just two, three, four, or even five EpiPen prescriptions during the class period.

[38] Prof. Rosenthal recognizes that "[c]onsumers with copayments that would not have varied for Auvi-Q vs. EpiPen would not have paid this overcharge directly." Doc. 1711-1 at 33-34 (Rosenthal Reply Report ¶ 57). She estimates that such consumers represent between 41% and 71% of consumers, depending on a consumer's plan structure and EpiPen tier placement. *Id.* Plaintiffs assert that these consumers still sustained injury because the collateral source doctrine bars defendants from using insurance payments as an offset. As discussed above, the court need not decide whether the collateral source doctrine applies on class certification. But still, it presents another issue common to the classes. And, if the collateral source doctrine doesn't apply and excludes evidence of such plaintiffs, the presence of these consumers doesn't present individual questions that overwhelm the common questions because Prof. Rosenthal has provided a method for identifying these consumers. *See supra* Part IV.C.1 & n.15. Using that method, plaintiffs can remove those uninjured consumers from the classes, if a merits determination finds that these consumers sustained no injury.

[39] *See* pages 37-45 of the court's Memorandum and Order ruling the *Daubert* motions.

time when the class member made a branded purchase. Also, to the extent defendants' arguments about but-for prices are merit-based arguments, the court can't decide them now.

In sum, none of defendants' criticisms convince the court to disregard Prof. Rosenthal's probability analysis **[*119]** on class certification. Instead, the court agrees with plaintiffs: Prof. Rosenthal's probability analysis provides a plausible method for determining—across the classes—the number of class members who may not have sustained injury from defendants' purported conduct. Indeed, the First Circuit recently considered a similar analysis conducted by Prof. Rosenthal, albeit in the summary judgment context. *See In re Celexa & Lexapro Mktg. & Sales Practices Litig., 915 F.3d 1, 12-13 (1st Cir. 2019)*. Decided after *Asacol, Celexa & Lexapro* reversed the district court's summary judgment ruling against a third-party payor plaintiff's RICO claim, finding that plaintiff's causation evidence "does not seem clearly insufficient" to survive summary judgment. *Id. at 12*. In particular, the court recognized that Prof. Rosenthal "estimated that if [the third-party payor plaintiff] paid for as few as five independent prescriptions, there would be a 98% chance that at least one was the result of off-label marketing." *Id. at 13*. Because the record showed that plaintiff "likely paid for the Celexa or Lexapro prescriptions of more than five different patients[,]" the court found that "the odds that [plaintiff] was not harmed if the drugs were, indeed, ineffective was likely *infinitesimal* (assuming the prescriptions **[*120]** were independent of one another)." *Id.* (emphasis added).

Here, plaintiffs argue that Prof. Rosenthal performed a similar analysis and with more compelling results. And, they urge the court to accept her findings as classwide evidence of an "infinitesimal" number of uninjured class members that doesn't preclude certification. Doc. 1837 at 19 (citing *Celexa & Lexapro, 915 F.3d at 13*). Although *Celexa & Lexapro* affirmed the district court's decision to deny class certification on statute of limitations grounds, the First Circuit, in *dicta*, disagreed with the district court's conclusion that causation and injury issues defeated predominance. *Celexa & Lexapro, 915 F.3d at 14*. Instead, the First Circuit found, the third-party payor's "clinical and statistical evidence, if believed, could establish causation and injury at least for any TPP who paid for more than a handful of different patients' prescriptions." *Id.* Indeed, the First Circuit criticized the district court for "gaug[ing] the substantiality or merit of plaintiffs' proof [of causation] in the context of a *Rule 23* motion." *Id. at 12*. The First Circuit recognized that "[c]ertainly there is room for reasonable disagreement on the merits of Dr. Rosenthal['s] assumption[,]" but, the First Circuit emphasized that **[*121]** "[t]he central issue [on certification] is not whether the method of proof would or could prevail" but "whether the method of proof would apply in common to all class members." *Id.* (citing *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1047, 194 L. Ed. 2d 124 (2016))*.

Here, the court also recognizes the possibility for reasonable disagreement with Prof. Rosenthal's probability opinion. But, the court cannot decide the merits of those disagreements at the class certification stage. Instead, the court considers whether Prof Rosenthal has provided a plausible method for proving injury among the classes sufficient for the court to consider her opinion on certification. She has. So, the court accepts Prof. Rosenthal's analysis on this motion.

(c) Number of Uninjured Class Members

Now, the court must decide, based on the data produced by Prof. Rosenthal, if her numbers estimating the likelihood of uninjured class members preclude class certification because they show that the putative class definitions "contain[ ] a great many persons who have suffered no injury at the hands of the defendant." *Messner, 669 F.3d at 825*. As recited above, plaintiffs assert that Prof. Rosenthal's calculations establish that the number of uninjured class members in each putative class is *de minimis*. Thus, plaintiffs **[*122]** argue, Prof. Rosenthal's analysis supports class certification.[40]

---

[40] Briefly, in their Reply, plaintiffs assert that "[a]ll individual class members were injured by the loss of choice in the market . . . ." Doc. 1837 at 23. At oral argument, plaintiffs again asserted this argument and cited a Sixth Circuit case to support it. *See Energy Conversion Devices Liquidation Tr. v. Trina Solar Ltd., 833 F.3d 680, 690 (6th Cir. 2016)* (noting "caselaw saying that a reduction in consumer choice can show anti-competitive harm" (first citing *Blue Shield of Va. v. McCready, 457 U.S. 465, 481-84, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*; then citing *Conwood Co. v. U.S. Tobacco Co., 290 F.3d 768, 789-90 (6th Cir. 2002))*. The court recognizes some courts have applied such a rule in antitrust cases. *See Ross v. Bank of Am., N.A., 524 F.3d*

Mylan disagrees. It asserts that, even accepting Prof. Rosenthal's calculations, the number of uninjured class members in this putative class action simply is too great to permit certification.[41] For support, Mylan relies on cases from outside our Circuit denying class certification because the proposed classes contained too many uninjured class members. *See, e.g.,* Rail Freight II, 934 F.3d at 623, 625 (affirming the district court's denial of class certification because plaintiffs' damages model showed "that 2,037 members of the proposed class—or 12.7 percent—suffered 'only negative overcharges' and thus *no* injury" and, as a consequence, the "need [for] individualized adjudications of causation and injury" to determine which class members sustained no injury defeated predominance); Asacol, 907 F.3d at 53-54 (reversing district court's certification order where about 10% of the class was uninjured because, the court found, "there are apparently thousands who in fact suffered no injury" and "[t]he need to identify those individuals will predominate and render an adjudication unmanageable absent . . . [a] mechanism that can manageably remove uninjured persons from the class in **[*123]** a manner that protects the parties' rights"); In re Intuniv Antitrust Litig., No. 1:16-cv-12396-ADB, 2019 U.S. Dist. LEXIS 141643, 2019 WL 3947262, at *8 (D. Mass. Aug. 21, 2019) (concluding that where one putative class contained some 25,000 uninjured class members and another class exceeded 10,000 uninjured members and plaintiffs had "failed to put forth a reasonable and workable plan to weed out the . . . uninjured class members in each putative class[,]" plaintiffs couldn't establish that common issues "'[will] predominate over any questions affecting only individual members'" (quoting Fed. R. Civ. P. 23(b)(3))).

Plaintiffs respond that the court need not follow these cases because they aren't binding precedent in this Circuit. And, plaintiffs assert, they contradict the case law from our court applying the Seventh Circuit's standard. For example, in *Urethane*, Judge Lungstrum refused to decertify a class where "plaintiffs [had] shown persuasively that only a very small percentage of class members suffered no damages . . . ." In re Urethane Antitrust Litig., 2013 U.S. Dist. LEXIS 69784, 2013 WL 2097346, at *2. Plaintiffs argue, like the percentage at issue in *Urethane*, the percentage here is very small—less than 5% for individual consumers and less than .001% for third-party payors.

HN34[] As discussed above, the Seventh Circuit hasn't provided a formula for determining how **[*124]** many uninjured class members is a "great many" that would preclude certification. The Seventh Circuit says "too many" is "a matter of degree, and will turn on the facts as they appear from case to case." Messner, 669 F.3d at 825. In *Messner*, the defendant had conceded that "only about 2.4 percent of the putative class members" did not sustain injury. Id. at 826. The Seventh Circuit recognized the percentage "may prove, depending on the ultimate size of the class at issue here, to be a significant number of additional plaintiffs," but, it concluded, "a 2.4 percent decrease in the size of the class is certainly not significant enough to justify denial of certification." *Id.* Also, the Seventh Circuit noted, "the district court is free to revisit this issue at a later time if discovery shows that the number of members who could not have been harmed . . . was more significant than it appears at this time." *Id.* (citing Kohen, 571 F.3d at 679).

Other courts have reached similar conclusions based on the percentage of uninjured class members. *See, e.g.,* Brown v. Hain Celestial Grp. Inc., No. C 11-03082 LB, 2014 U.S. Dist. LEXIS 162038, 2014 WL 6483216, at *8 (N.D. Cal. Nov. 18, 2014) (granting certification under Rule 23(b)(3) and recognizing that "a small percentage of uninjured persons does not defeat" certification); **[*125]** Mayo v. UBS Real Estate Sec., Inc., No. 08-00568-CV-W-DGK, 2012 U.S. Dist. LEXIS 135454, 2012 WL 4361571, at *3 (W.D. Mo. Sept. 21, 2012) (holding that a putative

---

217, 226 (2d Cir. 2008) (holding that plaintiffs sufficiently alleged antitrust injuries in the form of reductions in "consumer choice" and the "quality of [ ] services offered"); Laumann v. Nat'l Hockey League, 105 F. Supp. 3d 384, 397 (S.D.N.Y. 2015) ("[A]nticompetitive conduct is injurious if it limits consumer options."). But the court doesn't address plaintiffs' argument here for two reasons. One, plaintiffs didn't develop this argument until the hearing on the certification motion. And two, the court finds that plaintiffs have shown plausibly that they can prove classwide injury using classwide evidence and the presence of uninjured class members doesn't defeat predominance.

[41] At oral argument, Mylan's counsel provided an estimate of the number of uninjured class members using Prof. Rosenthal's analysis: "If you have a class of 2 million plaintiffs, . . . if you even have just 5 percent of the class that is uninjured, you're talking about 100,000 people who will be getting damages under the plaintiffs' models that we know are not [ ]injured and that the plaintiffs have no way to identify without individualized inquiries and many trials." Doc. 1789 at 73 (Tr. of Mot. Hr'g Class Certification — Phase II 73:13-20).

class definition was not overbroad when "at least 94%" of its members sustained harm from defendants' purported conduct but denying class certification for other reasons). *Cf.* *Koss v. Norwood, 305 F. Supp. 3d 897, 916 (N.D. Ill. 2018)* ("While it is possible that some class members will turn out not to have good claims, that possibility does not defeat certification, and nothing in the definition or evidence tells the court how many, and so it is not 'apparent that it contains a great many persons who have suffered no injury at the hands of the defendant.'" (quoting *Messner, 669 F.3d at 825*)).

Similarly here, the court finds that plaintiffs have shown, at least at the class certification stage, that the percentages of uninjured class members are small enough that they don't preclude class certification. Still, the court recognizes that "depending on the ultimate size of the class at issue here," the factual record eventually may develop more fully and show that the number of uninjured class members is "more significant" than it now appears. *Messner, 669 F.3d at 826*. ***HN35***[] As the Seventh Circuit recognizes, the court "is free to revisit this issue" if that, in fact, occurs. *Id.* For now, the court finds that the current record doesn't defeat the predominance **[*126]** requirement simply because the putative class definitions contain a percentage of uninjured class members.

Also, as plaintiffs argue, even if the existence of uninjured class members presents an individual issue, it doesn't predominate over the common questions that plaintiffs say they will prove using class wide evidence. ***HN36***[] As the Tenth Circuit has recognized, "[c]lass-wide proof is not required for all issues" on certification. *In re Urethane Antitrust Litig., 768 F.3d 1245, 1255 (10th Cir. 2014)*. "Instead, *Rule 23(b)(3)* simply requires a showing that the questions common to the class predominate over individualized questions." *Id.* (citing *Amgen v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 468, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*). Just this past year, our Circuit held, "so long as at least one common issue predominates, a plaintiff can satisfy *Rule 23(b)(3)*—even if there remain individual issues, such as damages, that must be tried separately." *Naylor Farms, Inc. v. Chaparral Energy, LLC, 923 F.3d 779, 789 (10th Cir. 2019)* (citing *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016)*); *see also* *In re Urethane Antitrust Litig., 768 F.3d at 1254* (affirming certification and noting that "some of the plaintiffs may have successfully avoided damages" but defendant "has not shown that the district court abused its discretion in finding that class-wide issues predominated over individualized issues" such as the existence and impact of an alleged price-fixing conspiracy that "raised common questions that were capable of class-wide proof").

Here, plaintiffs **[*127]** have presented common questions that are capable of resolution through classwide proof through use of expert opinions and aggregate data. Specifically, those questions are whether defendants committed the alleged unlawful conduct and whether that alleged unlawful conduct affected consumers adversely. The court agrees that these common issues predominate. And, any questions about the absence of injury for some class members don't overwhelm the common issues and defeat predominance on class certification.

(d) Constitutional Considerations

Mylan also argues that the court shouldn't certify classes with uninjured class members because it would violate Article III standing and defendants' constitutional right of due process. Tenth Circuit precedent rejects Mylan's standing argument. ***HN37***[] The Tenth Circuit has held, in the *Rule 23(b)(2)* context, that "only named plaintiffs in a class action seeking prospective injunctive relief must demonstrate standing by establishing they are suffering a continuing injury or are under an imminent threat of being injured in the future." *Colo. Cross Disability Coal. v. Abercrombie & Fitch Co., 765 F.3d 1205, 1214 (10th Cir. 2014)* (citation and internal quotation marks omitted). Although a *Rule 23(b)(2)* case, *Colorado Cross Disability Coalition* approvingly cited another case "support[ing] **[*128]** the notion that class 'standing' does not require individualized proof from class members" in the *Rule 23(b)(3)* context. *Id.* (citing *Denney v. Deutsche Bank AG, 443 F.3d 253, 263 (2d Cir. 2006)* (other citation omitted)). ***HN38***[] *Denney* held that Article III standing does "not require that each member of a class submit evidence of personal standing." *443 F.3d at 263*.

Also, *Colorado Cross Disability Coalition* cited the concurring opinion in [Lewis v. Casey, 518 U.S. 343, 116 S. Ct. 2174, 135 L. Ed. 2d 606 (1996)], where "[t]hree Justices of the Supreme Court favorably quoted this principle from a leading class action treatise." *Id.* They said:

> "'[Unnamed plaintiffs] need not make any individual showing of standing [in order to obtain relief]. . . . **HN39**[] Whether or not the named plaintiff who meets individual standing requirements may assert the rights of absent class members is neither a standing issue nor an Article III case or controversy issue but depends rather on meeting the prerequisites of Rule 23 governing class actions.'"

Id. (quoting Lewis, 518 U.S. at 395-96 (Souter, J., concurring) (quoting 1 Herbert B. Newberg & Alba Conte, *Newberg on Class Actions* § 2.07 (3d ed. 1992))). The Tenth Circuit noted that the majority "seemed to agree" with the concurring opinion's conclusion because it "point[ed] out that its holding did 'not rest upon the application of standing rules.'" *Id.* (quoting Lewis, 518 U.S. at 360 n.7 **[*129]**). Thus, the Tenth Circuit framed the certification question as one "not answered by demanding proof of standing from each class member but by application of Rule 23." *Id.*

Applying the Tenth Circuit's holding in *Colorado Cross Disability Coalition* and the authorities that it cites favorably, the court finds that the Article III standing requirement does not demand that plaintiffs establish each putative class member has sustained injury. Instead, here, plaintiffs have satisfied Article III standing by showing that each named plaintiff has sustained injury sufficient to confer standing. *See supra* Part IV.D.3.b. And, as the Tenth Circuit directs, the court has answered the question whether plaintiffs can represent a class that includes uninjured class members by applying Rule 23. *See supra* Part IV.E.2.b.ii.(c).

The court also rejects Mylan's due process argument. To support this argument, Mylan again invokes *Asacol*. As discussed above, *Asacol* held that plaintiffs' proposed claims process—which involved a claims administrator reviewing contested claim forms—failed to protect defendants' Seventh Amendment and due process rights because the process "provides defendants no meaningful opportunity to contest whether an individual **[*130]** would have, in fact, purchased a generic drug had one been available." Asacol, 907 F.3d at 53. The First Circuit criticized plaintiffs for failing to establish that the number of affidavits to which defendants could raise a legitimate challenge "is so small that it will be administratively feasible to require those challenged affiants to testify at trial." *Id.* And, because plaintiffs had failed to make the "administratively feasible" showing, the First Circuit held that plaintiffs failed the predominance requirement. Id. at 53-54. But *Asacol* isn't the governing law in our Circuit. And for reasons already explained, the court declines to apply *Asacol*.

HN40[] Instead, as discussed above, our court has refused "to apply a standard—one not adopted by the Tenth Circuit—that would preclude certification without a showing that class members may be determined in an administratively feasible manner." Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *3. In reaching this conclusion, Judge Lungstrum was persuaded by "the thorough and well-reasoned analysis of the Seventh Circuit" in Mullins v. Direct Digital, LLC, 795 F.3d 654 (7th Cir. 2015). Syngenta, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *3. *Mullins* explained that, when a class action involves an aggregate damage calculation, "the identity of particular class members does not implicate the defendant's due process interest at all" because "[t]he **[*131]** addition or subtraction of individual class members affects neither the defendant's liability nor the total amount of damages it owes to the class." Mullins, 795 F.3d at 670 (citations omitted). In reaching this conclusion, *Mullins* cited the Tenth Circuit's opinion in *Urethane* as support because, there, the Tenth Circuit had rejected a "Seventh Amendment challenge to allocation of damages award among class members because defendant 'has no interest in the method of distributing the aggregate damages award among the class members[.]'" *Id.* (quoting In re Urethane Antitrust Litig., 768 F.3d 1245, 1269 (10th Cir. 2014)).

For the same reasons, the court finds that Mylan's due process rights aren't implicated here. Plaintiffs have made a plausible showing that they can prove damages on a classwide basis using an aggregate calculation based on their experts' opinions. And, using the Seventh Circuit's reasoning in *Mullins*, the court concludes that Mylan's constitutional arguments don't preclude certification here.

c. RICO

Plaintiffs premise their RICO claim on defendants' alleged EpiPen pricing scheme. Plaintiffs describe this scheme as a national, unified scheme to defraud. And, plaintiffs contend, the scheme did not vary among individual plaintiffs because defendants generally deployed it across the **[*132]** entire U.S. market. Thus, plaintiffs contend, the issues presented by the RICO claim are inherently classwide and subject to classwide proof because all of the claim's elements turn on defendants' conduct. Specifically, plaintiffs identify defendants' conduct susceptible to classwide proof as "the RICO enterprise involving the Mylan Defendants, the Pfizer Defendants, and the co-conspirator PBMs; the pattern of racketeering committed by the Mylan and Pfizer Defendants so that they could raise the price of the EpiPen without any fear of competition, consumer backlash, or regulatory oversight from Congress; the elimination of the EpiPen single pack; and causation and damages stemming from this misconduct." Doc. 1500 at 59-60.

HN41[] When considering whether the *Rule 23* predominance requirement is satisfied in a RICO action, the court must "survey the elements of the class's RICO claims to consider (1) which of those elements are susceptible to generalized proof, and (2) whether those that are so susceptible predominate over those that are not." *CGC Holding Co., LLC v. Broad & Cassel, 773 F.3d 1076, 1087 (10th Cir. 2014)* (citations omitted). So, the analysis "'whether "questions of law or fact common to class members predominate" begins, of course, with the elements of the underlying **[*133]** cause of action.'" *Id. at 1088* (quoting *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)* (quoting *Fed. R. Civ. P. 23*)). Or, more simply, deciding whether a class can rely on classwide proof starts with what the law requires the class to prove.

HN42[] RICO "establishes a civil cause of action for persons injured as a result of a prohibited racketeering activity." *Id.* (citing *18 U.S.C. § 1962(c)*). A RICO violation has "four elements: '(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.'" *Robbins v. Wilkie, 300 F.3d 1208, 1210 (10th Cir. 2002)* (first quoting *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*; then citing *BancOklahoma Mortg. Corp. v. Capital Title Co., Inc., 194 F.3d 1089, 1100 (10th Cir.1999))*. And, "[t]o prove a RICO violation, a plaintiff must show that the defendant violated the RICO statute, and the plaintiff was injured 'by reason of' that violation." *CGC Holding, 773 F.3d at 1088* (first citing *18 U.S.C. § 1962*; then quoting *§ 1964(c)*).

Here, plaintiffs' RICO claim alleges an illegal scheme conducted by an "association-in-fact enterprise," consisting of the RICO Defendants (Mylan N.V., Mylan Specialty, LP, Heather Bresch, Pfizer, King Pharmaceuticals, and Meridian) and the PBM Conspirators (defined as at least four PBMs: CVS Health Corporation, Express Scripts Inc., Optum Rx Inc., and Prime Therapeutics LLC), "whose purpose was to fraudulently mislead and deceive American consumers to purchase the EpiPen at an inflated price, to purchase the EpiPen as a 2-Pak only, and to cause **[*134]** consumers to pay an artificially inflated price for EpiPens" from 2011[42] to the present. Class Compl. ¶¶ 600, 604.

Plaintiffs claim they will prove each element of their RICO claim using classwide evidence. Thus, they contend, the common issues of the RICO claim "predominate over any questions affecting only individual members." *Fed. R. Civ. P. 23(b)(3)*. Specifically, plaintiffs assert that they will prove the first and second elements of their RICO claim with common evidence showing that the RICO Defendants formed an enterprise with the PBM Conspirators and, together, they committed various acts as part of an effort to raise the price of EpiPens. Plaintiffs contend that they will prove the third and fourth elements of their RICO claim with common evidence of a pattern of racketeering activity that includes: (1) removing single EpiPens from the market and forcing consumers to buy EpiPens in the 2-Pak; (2) paying kickbacks to PBMs in exchange for exclusive formulary status; (3) adding patents to the EpiPen to prevent generic competition, filing patent infringement lawsuits against generic rivals, and issuing fraudulent press releases suggesting that settlements of patent lawsuits were legitimate; and (4) making **[*135]** false and misleading

---

[42] Mylan launched the EpiPen 2-Pak on August 24, 2011. Plaintiffs use this date as the earliest date when the putative class sustained damages.

statements (a) about rival product, Auvi-Q, (b) about the reasons for the switch to the 2-Pak, (c) about coupons and rebates, and (d) during Heather Bresch's testimony under oath to Congress on September 21, 2016.

Plaintiffs also claim they will prove causation and damages on a classwide basis. Specifically, plaintiffs contend that they will offer generalized proof of RICO causation because their RICO claim is based on a single, common scheme, and thus, class members share common relevant circumstantial evidence showing causation. And, plaintiffs argue, they can prove on a classwide basis that defendants' RICO violations caused plaintiffs to sustain common damages in the form of overpayments for EpiPens. In short, plaintiffs predict their RICO evidence will focus on defendants' conduct.

Defendants respond, arguing the court should not certify the proposed RICO class because individual issues of causation and damages will overwhelm the common issues.[43] Thus, defendants argue, plaintiffs' RICO claim cannot satisfy *Rule 23(b)(3)*'s predominance requirement. The court addresses each of defendants' predominance arguments separately, below.

i. RICO Causation

HN43[] The Tenth Circuit has explained **[*136]** that RICO's "'by reason of'" requirement requires a plaintiff to show "'a RICO predicate offense "not only was a 'but for' cause of his injury, but was the proximate cause as well."'" *CGC Holding, 773 F.3d at 1088* (quoting *Hemi Grp., LLC v. City of N.Y.C., 559 U.S. 1, 9, 130 S. Ct. 983, 175 L. Ed. 2d 943 (2010)* (quoting *Holmes v. Sec. Inv'r Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992))*). "Sufficiently establishing the element of causation—both actual and proximate—is crucial to proving any violation of RICO." *Id.* (citing *Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 656-60, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008))*.

HN44[] The Supreme Court has defined RICO proximate causation as "a flexible concept that does not lend itself to 'a black-letter rule that will dictate the result in every case.'" *Bridge, 553 U.S. at 654* (quoting *Holmes, 503 U.S. at 272 n.20*). Proximate cause provides a "'label generically [for] the judicial tools used to limit a person's responsibility for the consequences of that person's own acts . . . .'" *Id.* (quoting *Holmes, 503 U.S. at 268*). And, it includes "a particular emphasis on the 'demand for some direct relation between the injury asserted and the injurious conduct alleged.'" *Id.* (quoting *Holmes, 503 U.S. at 268*).

Thus, "'[w]hen a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries.'" *Safe Streets All. v. Hickenlooper, 859 F.3d 865, 889 (10th Cir. 2017)* (quoting *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 461, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006))*. The Supreme Court has instructed that "'no need [exists] to broaden the universe of actionable harms to permit RICO suits by parties **[*137]** who have been injured only indirectly.'" *Id.* (quoting *Anza, 547 U.S. at 460*).

HN45[] But, in the context of RICO claims premised on predicate acts of mail fraud, the Supreme Court has held that "a plaintiff is not required to plead that he is a victim of the defendant's underlying crime (*e.g.*, that he relied on the fraudulent mailings) to establish a direct injury." *Id.* (citing *Bridge, 553 U.S. at 649-50*). "Rather, a plaintiff may establish proximate causation by plausibly pleading that his business or property has been directly injured as a result of the defendants' *§ 1962* violation." *Id.* (citing *Bridge, 553 U.S. at 649-50*).

HN46[] When a federal court decides whether issues of RICO causation satisfy the *Rule 23* predominance inquiry, "the question is whether the link between defendants' actions and the class's injuries can be adduced through common evidence." *GCG Holding, 773 F.3d at 1088*. Our Circuit has explained that, in RICO actions, "individualized issues of reliance often preclude a finding of predominance." *Id.* "Since reliance is often a highly idiosyncratic issue that might require unique evidence from individual plaintiffs, it may present an impediment to the

[43] Defendants don't argue that the other elements of plaintiffs' RICO claim involve individual issues that defeat predominance.

economies of time and scale that encourage class actions as an alternative to traditional litigation." *Id.* But, the Circuit found, this isn't always **[*138]** the case. *Id.*

HN47[] In *GCG Holding*, the Circuit explained that certification of a RICO claim is proper when "'causation can be established through an inference of reliance where the behavior of plaintiffs and the members of the class cannot be explained in any way other than reliance upon the defendant's conduct.'" *Id. at 1089-90* (quoting *In re Countrywide Fin. Corp. Mortg. Mktg. & Sales Practices Litig., 277 F.R.D. 586, 603 (S.D. Cal. 2011))*. In such a situation, "where circumstantial evidence of reliance can be found through generalized, classwide proof, then common questions will predominate and class treatment is valuable in order to take advantage of the efficiencies essential to class actions." *Id.; see also* *Menocal v. GEO Grp., Inc., 882 F.3d 905, 918 (10th Cir. 2018)* (holding that the "causation element is susceptible to generalized proof and thus cannot defeat class certification under Rule 23(b)(3)'s predominance requirement"); *see also* *id. at 20* (explaining that when "class allegations are based on a single, common scheme, class members share the relevant circumstantial evidence in common, thus making class-wide proof possible").

Defendants argue that plaintiffs have not shouldered their burden to show how they can prove RICO causation on a classwide basis. More specifically, defendants assert, plaintiffs cannot show a "causal chain between any specific [RICO predicate] act and **[*139]** the amount paid by each plaintiff" for an EpiPen, much less that they can demonstrate the necessary causal chain through classwide proof. Doc. 1636 at 69. Plaintiffs respond, explaining how they will use classwide evidence to prove three components of the EpiPen pricing scheme using: (1) the "hard switch" to the 2-Pak and the elimination of single EpiPens from the market; (2) the delay of generic competition to the market; and (3) the elimination of branded competition by entering into exclusive dealing contracts with PBMs. The court addresses these three components, below.

(a) Switch to 2-Pak

Plaintiffs contend they will prove that defendants engaged in a pattern of racketeering activity that included removing single EpiPens from the market and forcing consumers to buy EpiPens two at a time in the 2-Pak. And, plaintiffs argue, they will establish RICO causation using generalized proof that defendants' actions caused plaintiffs to pay more for EpiPens because defendants' actions forced them to buy two EpiPens.

To support this argument, plaintiffs rely on the Reports of their expert, Prof. Meredith Rosenthal. Prof. Rosenthal opines that Mylan's switch to the 2-Pak "led to an immediate **[*140]** and permanent increase in the number of [EpiPens] per prescription of approximately 0.5." Doc. 1497-3 at 24 (Rosenthal Expert Report ¶ 54). Prof. Rosenthal opines that this increase "represents the amount by which Class members were required to increase their consumption of EpiPens when they were constrained by the 2-Pak." *Id.; see also* Doc. 1711-1 at 13-14 (Rosenthal Reply Report ¶ 17) (explaining that her study supports a "causal inference" that "[t]he withdrawal of the single injector EpiPen forced the Class to purchase more pens than it would have [purchased] otherwise," and observing that "Mylan's own analysis makes the same causal inference: An EpiPen market review from 2012 cites a 0.23 pen per prescription increase from the end of 2011 compared to the 2012 average, noting 'Much of this growth was driven by elimination of Single Pack.'").[44]

---

[44] Defendants have challenged the reliability of Prof. Rosenthal's event study in a *Daubert* motion. The court's Order deciding that motion explains that defendants' challenges to Prof. Rosenthal's opinions go to the weight of her opinions but they don't preclude admissibility. The court thus considers her event study when deciding plaintiffs' Motion for Class Certification. And, the court finds, her opinions support class certification at this stage of the litigation.

At this stage, plaintiffs don't need to establish that Prof. Rosenthal's opinions are indisputably correct. Instead, they merely must demonstrate that her opinions are capable of showing RICO causation on a classwide basis. The court finds they do. The persuasiveness of Prof. Rosenthal's opinions for proving classwide liability is a matter for the factfinder to consider at a later stage in the case. ***HN48***[] *See* *In re Syngenta AG MIR 162 Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *6 (D. Kan. Sept. 26, 2016)* (explaining that "'persuasiveness [of an expert's opinion showing classwide liability]

After the switch to the 2-Pak, Prof. Rosenthal calculates that the ratio of EpiPens sold per prescription was more than 2.0. Doc. 1497-3 at 24 (Rosenthal Expert Report ¶ 54). By comparison, in Canada, where consumers still can buy EpiPens in a single pack, the average number of EAIs dispensed per prescription **[*141]** is about 1.5 or 1.48. Doc. 1499-5 at 4 (Rocheleau Dep. 176:3-25).

This evidence, plaintiffs assert, shows defendants' conduct involved "group coercion." *See Menocal v. GEO Grp., Inc., 882 F.3d 905, 922 n.13 (10th Cir. 2018)* (recognizing that alleged group coercion can support an inference of reliance). Plaintiffs describe defendants' coercion as having forced all consumers—as a group—to purchase EpiPens in sets of two. And, plaintiffs assert, our Circuit has held that allegations of "group coercion rather than individual arm's length transacting . . . not only allows for a class-wide inference of causation . . . but arguably supports an even stronger inference." *Id.* (affirming certification of a class of immigration detainees who alleged a private detention facility's sanitation policy violated the Trafficking Victim Protection Act's ("TVPA") prohibition against forced labor, and specifically holding that "a reasonable factfinder [could] conclude by a preponderance of the evidence that each TVPA class member would not have performed his or her assigned cleaning duties without being subject to the Sanitation Policy," and thus "a factfinder could—but need to—accept a class-wide inference of causation," *id. at 922*).

Plaintiffs also assert that Mylan's internal **[*142]** documents contradict its justification for switching to the 2-Pak. Mylan asserts that it made the switch based on medical guidance recommending that patients carry more than one EpiPen with them at all times. But, plaintiffs argue, Mylan's internal documents confirm that profit was the real reason for imposing the switch to the 2-Pak. *See, e.g.*, Doc. 1499-8 at 4 (Mylan slide deck explaining two reasons for eliminating the single EpiPen: (1) "Double the revenue per RX of 2 pack vs single" and (2) "Strong potential generic defense"); Doc. 1499-22 at 10 (Mylan slide deck projecting the "Impact of Eliminating Single Dose" included "Increase revenue by $81 million and gross profit by $41 million annually"). Plaintiffs argue that this evidence reveals Mylan's true motive for switching to the 2-Pak, and this evidence applies across the board, showing defendants' conduct injured the putative class plaintiffs by requiring them to pay more for EpiPens.

In response, defendants argue that RICO causation is not susceptible to classwide proof because not all plaintiffs would have purchased a single EpiPen instead of the 2-Pak—had the single EpiPen remained available for purchase.[45] Indeed, defendants **[*143]** cite deposition testimony by some named plaintiffs who testified that they preferred to purchase a 2-Pak even if they had the choice to buy one EpiPen at a time, in a single dose. Doc. 1835-2 at 2-10. Thus, defendants argue, the alleged RICO violations did not coerce these plaintiffs into paying more for the EpiPen. And, defendants contend, individualized issues like this one—*i.e.*, identifying which class member would have purchased a 2-Pak even if a single dose was available—outweigh common issues embedded in the causation element. The court disagrees.

HN49[] As discussed above—when addressing the issue of uninjured class members—this court has recognized that "a class will almost inevitably include persons who have not been injured by the defendant's conduct, and that fact (or even inevitability) does not preclude certification." *In re Urethane Antitrust Litig., No. 04-1616-JWL, 2013 U.S. Dist. LEXIS 69784, 2013 WL 2097346, at *2 (D. Kan. May 15, 2013)* (citing *Messner v. Northshore Univ.*

---

is, in general, a matter for the jury'" (quoting *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1049, 194 L. Ed. 2d 124 (2016))*.

[45] Defendants also argue that a RICO plaintiff must show that "commission of the predicate acts" caused plaintiff's injuries. *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*. Here, defendants contend plaintiffs can't show that any specific RICO predicate act caused plaintiffs' injuries as opposed to Mylan's decision to stop selling the EpiPen in single doses. Doc. 1636 at 72. This argument misses the mark. The predicate acts plaintiffs rely on to support their RICO claims are the false and misleading statements that defendants made about the medical justification for the switch to the 2-Pak. *See, e.g.*, Doc. 60 at 172 (Class Compl. ¶ 655.b.). Plaintiffs assert that they will show that defendants committed these predicate acts as part of a pattern of racketeering activity that included removing single doses of the EpiPen from the market and forcing consumers to buy the EpiPen in a 2-Pak. And, plaintiffs assert, they will show that defendants' conduct caused classwide injury because it forced consumers to buy more EpiPens. These allegations suffice to establish that plaintiffs will rely on classwide evidence to support their RICO theory that defendants' alleged commission of predicate acts caused plaintiffs' injuries.

HealthSystem, 669 F.3d 802, 823 (7th Cir. 2012)). Instead, "a class is too broad to permit certification only if it includes a great number of members who could not have been harmed by the defendant's conduct (as opposed to a great number who ultimately are shown to have suffered no harm)." *Id.* (citing Messner, 669 F.3d at 824).

Here, defendants rely on evidence that, ultimately, **[*144]** may show certain putative class members sustained no harm because they would have purchased the 2-Pak, even if a single dose product was available for purchase. But, at this stage of the litigation, the court is unpersuaded that the putative class includes "great numbers" of class members who *could not have been harmed* by defendants' switch to the 2-Pak. *See supra* Part IV.E.2.b. Plaintiffs have presented sufficient evidence that defendants' switch to the 2-Pak caused injury to the putative class on a classwide basis in the form of overpayment for the EpiPen. And thus, plaintiffs have shown that common issues of RICO causation predominate. *Cf.* In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *7 (D. Kan. Sept. 26, 2016) (rejecting defendant's argument that "the fact and amount of injury present individual issues because the [Chicago Board of Trade ("CBOT")] price is not sufficiently tied to local corn prices," and explaining that the court would not "weigh the class-wide evidence concerning the relationship between CBOT and local prices" because "the persuasiveness of such evidence is for the jury at trial," and concluding that "a reasonable juror could believe that local corn prices do reflect changes in **[*145]** the CBOT futures price, as opined by plaintiffs' experts.").

In reaching this conclusion, the court recognizes that plaintiffs' 2-Pak theory is but one of the factual theories plaintiffs rely on to support their RICO claim. And, after ruling the class certification motion, the court still retains jurisdiction to refine and limit the scope of the class RICO claims. At this stage of the proceeding, defendants haven't convinced the court that the putative class includes "great numbers" of class members uninjured by the switch to the 2-Pak. But, the court is mindful that defendants have presented evidence in the form of deposition testimony showing that the 2-Pak switch may not have injured some named plaintiffs. If the evidence develops to show that "great numbers" of putative class plaintiffs were unharmed by the 2-Pak switch, the court retains the flexibility to modify its class certification decision and preclude plaintiffs from using the 2-Pak theory to support the RICO class claims. *See, e.g.,* Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 823 (7th Cir. 2012) (recognizing that "depending on the ultimate size of the class at issue here," the estimated percentage of uninjured class members "may prove . . . to be a significant number of additional **[*146]** plaintiffs" but noting, "the district court is free to revisit this issue at a later time if discovery shows that the number of members . . . was more significant than it appears at this time"). ***HN50***[] The court can revise its certification decision or even limit plaintiffs' use of certain factual theories to support their RICO class claim. *See* Fed. R. Civ. P. 23(d)(1)(A) ("In conducting an action under this rule, the court may issue orders that . . . determine the course of proceedings or prescribe measures to prevent undue repetition or complication in presenting evidence or argument."). *Cf.* Shook v. Bd. of Cty. Comm'rs, 543 F.3d 597, 606-07 (10th Cir. 2008) (recognizing that a district court may create subclasses *sua sponte* as a way to segregate plaintiffs with different factual and individual circumstances used to support their claim); Marisol A. v. Giuliani, 126 F.3d 372, 379 (2d Cir. 1997) (recognizing that certifying subclass serves several purposes including an ability "to conduct the trial in a more orderly manner, by tying the order of proof to particular claims raised by the individual subclasses" and noting that "[o]ne possible method of developing proper subclasses would divide the present class based on the commonality of the [class members'] particular circumstances [or] the type of harm the [class members] allegedly have **[*147]** suffered . . . .")

Should defendants convince the court that "great numbers" of putative class members never could have been harmed by the switch to the 2-Pak because they would have purchased two EpiPens even if defendants had continued to make the single dose available in the market, the court has authority and discretion to modify its ruling.

(b) Delay of Generic Competition Through "Pay For Delay" Settlements

Plaintiffs also assert that their generic delay theory uses classwide proof to establish RICO causation. Plaintiffs allege that one component of the EpiPen pricing scheme was defendants' use of reverse payment settlements to resolve EpiPen patent litigation. Plaintiffs describe the reverse payment settlements as anticompetitive "pay for delay" settlements that effectively delayed generic competition from entering the EAI market for more than three years. Doc. 60 at 172 (Compl. ¶ 655.c.). To support their RICO claim, plaintiffs allege that defendants committed predicate RICO acts by making false statements in press releases about the settlements, describing them as a legitimate means to resolve patent litigation and concealing the true, anti-competitive reasons for the agreements. **[*148]** *Id.; see also id. at 176* (Compl. ¶ 659.e.). And, plaintiffs allege, defendants' RICO violations succeeded in delaying generic competition which, in turn, protected Mylan's monopoly in the EAI market and allowed defendants to continue to raise the EpiPen's price.

Through expert testimony by Profs. Einer Elhauge and Andrew Torrance, plaintiffs offer evidence that the patent settlements were not legitimate settlements. Instead, the two professors opine the settlements really were unlawful reverse payment settlements contrived to delay generic competition. Plaintiffs assert that their evidence supporting this theory is common to all class members. The court agrees with them. The evidence focuses entirely on defendants' conduct and motivations. It thus applies to each putative class plaintiffs' claims and either fails or succeeds "in one stroke." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*.

Also, through Prof. Rosenthal's testimony, plaintiffs offer evidence that defendants' misconduct delaying generic competition caused the RICO class—as a whole—to overpay for the EpiPen.[46] Specifically, Prof. Rosenthal calculated overcharges from delayed generic entry on a classwide basis using classwide data and information (calculated separately for TPPs, **[*149]** insured consumers, and cash payors). Doc. 1497-3 at 30, 77-82 (Rosenthal Expert Report ¶ 68, Attach. C.7.a—C.7.e).

Defendants respond that plaintiffs can't rely on their generic delay theory to establish RICO causation on a classwide basis because they can't show that all plaintiffs knew about, much less relied on, defendants' misrepresentations about the legitimacy of the patent litigation settlements. Doc. 1636 at 72-73. Thus, defendants contend, plaintiffs can't connect the specific RICO predicate acts to any overpayment by any particular plaintiff. *Id.* Plaintiffs disagree. They contend that defendants' argument improperly assumes plaintiffs must show evidence of first-party reliance to prevail on a RICO claim. Plaintiffs have the better end of this dispute.

HN51[] The Supreme Court has held—explicitly—that first-party reliance is not required to establish a RICO claim that relies on the predicate act of mail fraud. *Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 649, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008)*. Instead, RICO provides a cause of action for "[a]ny person injured in his business or property by reason of a violation of" the statute. *18 U.S.C. § 1964(c)*. The Supreme Court reasoned that this statutory language "suggest[s] a breadth of coverage not easily reconciled with an implicit **[*150]** requirement that the plaintiff show reliance in addition to injury in his business or property." *Bridge, 553 U.S. at 649*. So, plaintiffs argue, RICO doesn't require them to show classwide evidence of first-party reliance on defendants' misrepresentations. Instead, plaintiffs assert, they just need to show classwide evidence of injury to business of property "by reason of" defendants' RICO violations.

Bridge illustrates this principle. In that case, the Supreme Court held that a plaintiff could allege a RICO injury "'by reason of' a pattern of mail fraud even if he has not relied on any misrepresentations." *Id. at 649*. The Court found that plaintiffs' allegations "clearly" established that they "were injured by [defendants'] scheme." *Id.* Plaintiffs had alleged: "As a result of [defendants'] fraud, [plaintiffs] lost valuable liens they otherwise would have been awarded."

[46] Defendants separately filed *Daubert* motions challenging the reliability of Profs. Torrance, Elhauge, and Rosenthal's opinions. The court's Order denying those motions explains that defendants' challenges go to the weight of expert opinions but don't preclude the court from "admitting them," *i.e.*, considering them when deciding the class certification motion. Thus, on the class certification motion, the court considers these expert opinions. And, the court concludes that they support class certification because they plausibly offer a classwide method for proving RICO liability.

Defendants' challenges to the persuasiveness of these experts' opinions is a different matter. The factfinder can decide how persuasive these opinions are when deciding the merits of the case—*i.e.*, whether the opinions prove that defendants entered unlawful reverse payment settlements that violated RICO. But for current purposes, the opinions present sufficient evidence of classwide causation to support plaintiffs' class certification motion.

Id. This was "true even though [plaintiffs] did not rely on [defendants'] false attestations of compliance with the county's rules." *Id.*

Likewise here, plaintiffs offer classwide evidence that one component of defendants' EpiPen pricing scheme—reverse payment settlements that delayed generic competition—injured plaintiffs by forcing them to overpay for **[*151]** the EpiPen. Like *Bridge*, plaintiffs have asserted an actionable RICO claim even if they didn't rely on defendants' alleged misrepresentations about the settlements' legitimacy.

But, defendants assert, *Bridge* still requires plaintiffs to support their RICO claim with evidence that "*someone* relied on the defendant's misrepresentations." *Id. at 658*. Whether plaintiffs can marshal evidence to make that showing is a merits-based determination that the court cannot make now. Instead, what matters now is whether plaintiffs can prove this requirement of their RICO claim with common evidence.

Plaintiffs assert that they can make this showing on class certification through an classwide inference of reliance. That is, according to plaintiffs, each plaintiff's payment for an EpiPen gives rise to an inference that he relied on defendants' fraudulent statements—or more specifically, defendants' fraudulent omissions[47]—about the EpiPen pricing scheme. ***HN52***[] Indeed, the Tenth Circuit has recognized that "issues of reliance can be disposed of on a classwide basis without individualized attention at trial." *CGC Holding Co., LLC v. Broad & Cassel, 773 F.3d 1076, 1089 (10th Cir. 2014)* (citations omitted). "For example, where circumstantial evidence of reliance can be found through generalized, classwide **[*152]** proof, then common questions will predominate and class treatment is valuable in order to take advantage of the efficiencies essential to class actions." *Id.*

HN53[] Also, in "certain circumstances . . . it is beneficial to permit a commonsense inference of reliance applicable to the entire class to answer a predominating question as required by *Rule 23*." *Id.* (citations omitted). And, "[i]n the RICO context, class certification is proper when 'causation can be established through an inference of reliance where the behavior of plaintiffs and the members of the class cannot be explained in any way other than reliance upon the defendant's conduct.'" *Id. at 1089-90* (quoting *In re Countrywide Fin. Corp. Mortg. Mktg. & Sales Practices Litig., 277 F.R.D. 586, 603 (S.D. Cal. 2011))*.

In *CGC Holding*, the Circuit held that "evidence of payment for [a] loan commitment—more specifically, the inference that arises from it—is sufficient to present a predominating question related to class member reliance that can resolve a central issue of this litigation in one swoop." *Id. at 1091*. "More specifically the fact that a class member paid [a] nonrefundable up-front fee in exchange for the loan commitment constitutes circumstantial proof of reliance on the misrepresentations and omissions regarding [one of the defendant's] past and the defendant **[*153]** entities' ability or intent to actually fund the promised loan." *Id. at 1091-92*.

Similarly, here, plaintiffs argue that the court can infer that the putative plaintiffs relied on defendants' misrepresentations or omissions about the EpiPen pricing scheme when purchasing their EpiPens. Defendants disagree. They assert that the Tenth Circuit has cautioned that an inference of RICO causation "would not be appropriate in most RICO class actions." *Id. at 1091 n.9*. But, in that same footnote, the Tenth Circuit said: "[T]he inference of reliance here is limited to transactional situations—almost always financial transactions—where it is sensible to assume that rational economic actors would not make a payment unless they assumed that they were receiving some form of the promised benefit in return." *Id.* That's the scenario we have in this case. It is "sensible to assume" that the putative plaintiffs "would not [have made] a payment for" their EpiPens had they known—as plaintiffs allege—that they were paying an inflated price for that product due to defendants' misconduct in delaying generic competition. *Id.* But, defendants argue, "the record is replete with examples of named plaintiffs who bought EpiPen products for rational **[*154]** reasons that had nothing to do with Mylan's alleged misconduct." Doc. 1636 at 71 n.79. These are merits-based defenses. Defendants assert they can rebut the classwide presumption of reliance

[47] The court recognizes that "deceitful concealment of material facts may constitute actual fraud" sufficient to support a wire fraud claim. *United States v. Cochran, 109 F.3d 660, 665 (10th Cir. 1997)*. "[A] misleading omission is actionable as fraud . . . if it is intended to induce a false belief and resulting action to the advantage of the misleader and the disadvantage of the misled." *Id.* (citation, internal quotation marks, and internal alternations omitted).

with evidence that some plaintiffs would have purchased their EpiPens even if they had known about defendants' alleged misconduct. But, here, the question on class certification is whether plaintiffs can prove reliance using classwide evidence. The court determines that they can—by using a classwide inference, as approved by our Circuit in *CGC Holding*. And this showing suffices to establish that common issues of RICO causation predominate under plaintiffs' generic delay theory.

(c) Exclusive Dealing Contracts with PBMs

Last, plaintiffs assert they will rely on common evidence to prove a third component of the EpiPen pricing scheme—*i.e.*, defendants' use of exclusive dealing contracts with PBMs. Plaintiffs assert that defendants' exclusionary contracts blocked branded competition from the market and allowed Mylan to raise the EpiPen's price which, in turn, caused plaintiffs to sustain injury in the form of overpaying for the EpiPen. To support this argument, plaintiffs rely on Prof. Elhauge's Expert **[*155]** Report.[48]

Prof. Elhauge opines that Mylan's exclusive dealing contracts successfully foreclosed rival product Auvi-Q from accessing a percentage of the EAI market. Doc. 1497-2 at 52-53 (Elhauge Expert Report ¶ 101). Using classwide methodology, Prof. Elhauge has calculated the effects of this foreclosure on EpiPen sales and its price. *Id. at 56-66* (Elhauge Expert Report ¶¶ 110-20). He then used those calculations to quantify overcharges incurred by EpiPen consumers. *Id. at 64-66* (Elhauge Expert Report ¶ 120, Table 3-4). As Prof. Elhauge explains, his method of calculating the overcharges caused by defendants' exclusive dealing contracts with PBMs "is common to the class, based on classwide evidence, and produces a conclusion about the foreclosure share that is common to the class." *Id. at 52-53* (Elhauge Expert Report ¶ 101); *see also* *id. at 54-55* (Elhauge Expert Report ¶ 104) (describing his "method of calculating" the foreclosing effects on Auvi-Q sales and EpiPen's market price inflation as "common to the class, based on classwide evidence, and [one that] produces conclusions about the foreclosing effect and market price inflation that are common to the class").

Defendants respond that too many individual issues exist for the **[*156]** court to conclude that plaintiffs can satisfy the predominance requirement. Defendants argue that the drug supply chain is complex, and it involves too many participants who ultimately affect drug prices. As an example, defendants direct the court to Local 282's experience. Local 282, a named plaintiff and a putative class representative, hired The Segal Group to negotiate drug prices with Local 282's PBM, which, in turn, negotiated with Mylan. Defendants argue that Local 282's experience shows there is an immutable impediment to class certification. And, defendants contend, Local 282's experience is similar to other putative class members' purchasing experiences. According to defendants, Local 282's experience shows there simply are too many intervening and individualized issues in the causal chain between the alleged predicate acts and each plaintiff's ultimate purchase of an EpiPen at a price negotiated by other parties. Thus, defendants argue, common causation issues don't predominate over individuals ones.

Plaintiffs urge the court to find their method of proving causation is sound under the approach approved by the First Circuit in three RICO cases collectively known as *In re* ***[*157]*** *Neurontin Marketing & Sales Practices Litigation*.[49] Drug manufacturer Pfizer, the defendant in each case, asserted that intervening causes—in particular, actions of prescribing doctors—broke the chain of RICO causation between Pfizer's alleged misrepresentations when marketing the drug Neurontin and plaintiffs' injury. The First Circuit rejected Pfizer's argument for several reasons.

First, the First Circuit recognized that the Supreme Court had held in *Bridge* that first-party reliance on a defendant's misrepresentations is not required. *Kaiser, 712 F.3d at 36* (citing *Bridge, 553 U.S. at 642*); *Aetna, 712*

---

[48] For the same reasons discussed above, *supra* note 46, the court finds Prof. Elhauge's opinions sufficient to establish that plaintiffs will offer classwide evidence of causation to support their RICO claims.

[49] The three cases are *Kaiser Foundation Health Plan v. Pfizer, Inc., 712 F.3d 21 (1st Cir. 2013)*, *Aetna, Inc. v. Pfizer, Inc., 712 F.3d 51 (1st Cir. 2013)*, and *Harden Manufacturing Co. v. Pfizer, Inc., 712 F.3d 60 (1st Cir. 2013)*. *Harden* was a class action of third-party payors; the other two cases were individual cases pursued by third-party payors.

F.3d at 58 (citing Bridge, 553 U.S. at 642); Harden, 712 F.3d at 66-67 (citing Bridge, 553 U.S. at 642). Thus, the First Circuit concluded, *Bridge* foreclosed Pfizer's argument that any alleged misrepresentations it had made were made to the prescribing doctors—and not to the doctors' patients or others—and broke the causal link for third-party payors. Kaiser, 712 F.3d at 36-37; *see also* Harden, 712 F.3d at 67; Aetna, 712 F.3d at 58.

Second, the First Circuit found that plaintiffs could prove a "'direct relationship between the injury asserted and the injurious conduct alleged.'" Harden, 712 F.3d at 67 (quoting Holmes, 503 U.S. at 268). The First Circuit noted that plaintiffs in all three cases were the "primary and intended" victims of Pfizer's scheme to defraud. Kaiser, 712 F.3d at 37; *see also* Harden, 712 F.3d at 67; Aetna, 712 F.3d at 58. Thus, plaintiffs' injuries were "a 'foreseeable **[*158]** and natural consequence' of Pfizer's scheme—a scheme that was designed to fraudulently inflate the number of Neurontin prescriptions for which TPPs paid." Kaiser, 712 F.3d at 37 (quoting Bridge, 553 U.S. at 658); *see also* Harden, 712 F.3d at 67; Aetna, 712 F.3d at 58.

The First Circuit's conclusion in the *Neurontin* cases applies with equal force here. Plaintiffs allege that the RICO defendants implemented an EpiPen pricing scheme designed to foreclose competition in the EAI market, protect the EpiPen monopoly, and allow defendants to raise the EpiPen's price. Here, the putative plaintiffs—consumers who paid for the EpiPen—were the primary and intended victims of the alleged pricing scheme. Thus, plaintiffs' alleged injuries—overpayments for the EpiPen—were a foreseeable consequence of defendants' alleged scheme. Defendants' arguments about the complexity of the drug supply chain and the involvement of other actors in that chain "does not add such attenuation to the casual chain as to eliminate proximate cause" but, instead, these arguments "present[ ] a question of proof, to be resolved at trial, regarding the total number of prescriptions (if any) that were attributable to [defendants'] actions." Harden, 712 F.3d at 67; *see also* Kaiser, 712 F.3d at 39; Aetna, 712 F.3d at 59. And, to prove their allegations, plaintiffs will rely on **[*159]** common evidence about defendants' conduct in the EpiPen pricing scheme, the intended targets of that scheme, and how that scheme injured the plaintiff class as a whole.

Also, the *Neurontin* cases held that aggregate statistical evidence presented by Professor Meredith Rosenthal—the same expert plaintiffs rely on here—and other circumstantial evidence provided strong evidence of but-for causation. Harden, 712 F.3d at 68; *see also* Kaiser, 712 F.3d at 45-46; Aetna, 712 F.3d at 57-58. This meant, the First Circuit held, that plaintiffs could show Pfizer's fraud had caused plaintiffs to pay more for Neurontin than they otherwise would have paid. Harden, 712 F.3d at 68; *see also* Kaiser, 712 F.3d at 45-46; Aetna, 712 F.3d at 57-58. The Circuit recognized that some prescribing doctors had testified that they decided to prescribe Neurontin without relying on Pfizer's alleged misrepresentations. Harden, 712 F.3d at 68; *see also* Kaiser, 712 F.3d at 45; Aetna, 712 F.3d at 57-58. But, *Neurontin* also held, such evidence did not preclude plaintiffs from proving but-for causation. Harden, 712 F.3d at 68-69; *see also* Kaiser, 712 F.3d at 45; Aetna, 712 F.3d at 57-58. ***HN54***[] Instead, this case explained: "Ultimately, it is a jury's task to weigh the individual testimony presented by Pfizer against the aggregate and circumstantial evidence presented by . . . plaintiffs." Harden, 712 F.3d at 69; *see also* Kaiser, 712 F.3d at 45; Aetna, 712 F.3d at 57-58. The same is true here. The court finds that a factfinder can weigh any individual issues of causation **[*160]** against plaintiffs' projected common evidence to attempt to prove classwide RICO causation.

Defendants discredit plaintiffs' reliance on the *Neurontin* decisions, noting that the cases didn't decide class certification. Defendants are right. Defendants also correctly note that other Circuits have refused to apply *Neurontin* in the class certification context. *See* Sergeants Benevolent Ass'n Health & Welfare Fund v. Sanofi-Aventis U.S. LLP, 806 F.3d 71, 95-97 (2d Cir. 2015) (affirming district court's decision denying class certification and holding Prof. Rosenthal's regression analysis didn't support plaintiffs' classwide RICO causation theory because plaintiffs hadn't offered "anything beyond mere correlation that might support a reasonable inference that a [drug company's] alleged withholding of safety information played a legally sufficient causal role in the number of . . . prescriptions written"); *see also* Sidney Hillman Health Ctr. of Rochester v. Abbott Labs., 873 F.3d 574, 578 (7th Cir. 2017) (affirming dismissal of RICO class action claims after concluding that "improper representations made to physicians do not support a RICO claim by Payors" because they are "several levels removed in the causal sequence"). *But see* Painters & Allied Trades Dist. Council 82 Health Care Fund v. Takeda Pharms. Co. Ltd., 943 F.3d 1243, 1257-58 (9th Cir. 2019) (holding that plaintiffs sufficiently alleged proximate causation because their RICO claims sought "to hold Defendants liable for the consequences of their own **[*161]** acts and omissions toward

Plaintiffs: the money spent by Plaintiffs to purchase" a pharmaceutical product and rejecting defendants' argument that "prescribing physicians' and pharmacy benefit managers' decisions constitute an intervening cause to sever the chain of proximate cause" because such a result "would . . . insulate [drug manufacturers] from liability for their fraudulent marketing schemes, as they could continuously hide behind prescribing physicians and pharmacy benefit managers" which is "not the purpose the requirement of proximate cause is intended to serve").

Indeed, the Ninth Circuit has recognized that an "inter-circuit split" exists over the question "whether patients and TPPs suing pharmaceutical companies for concealing an allegedly known safety risk about a drug can satisfy RICO's proximate cause requirement." *Painters & Allied Trades, 943 F.3d at 1253*. The Ninth Circuit elected to join the First and Third Circuits and concluded that "prescribing physicians do not constitute an intervening cause to cut off the chain of proximate cause" needed to support a RICO claim. *Id. at 1257*; *see also id.* (holding that the First and Third Circuits "have it right because their reasoning is more consistent with the Supreme Court's **[*162]** direct relation requirement"). The Ninth Circuit recognized that "prescribing physicians serve as intermediaries between Defendants' fraudulent omission . . . and Plaintiffs' payments for [the drug]," but that "prescribing physicians do not constitute an intervening cause to cut off the chain of proximate cause" because their involvement in defendants' alleged scheme was foreseeable. *Id.* (concluding that "it was perfectly foreseeable that physicians who *prescribed* [the drug] would play a causative role in Defendants' alleged fraudulent scheme to increase [the drug's] revenue"). Also, the Ninth Circuit found that defendants "have always known that 'physicians would not be the ones paying for the drugs they prescribed,'" but instead, defendants "are well aware that TPPs and individual patients pay for the drugs." *Id.* (quoting *Neurontin, 712 F.3d at 38-39*). And, it recognized that "[d]efendants' alleged fraudulent marketing scheme, which was intended to increase [the drug's] sales, 'only became successful once [they] received payments for the additional [drug] prescriptions [they] induced'—the very injury for which Plaintiffs seek recovery." *Id.* (quoting *Neurontin*, 712 F.3d at 39). In sum, the Ninth Circuit held, plaintiffs had satisfied **[*163]** "the Supreme Court's requirement that the proximate cause inquiry focus on the direct relation between the alleged violation and alleged injury." *Id.* (citing *Hemi Grp., 559 U.S. at 12*).

While the facts alleged here don't present the exact same issue decided by *Painters & Allied Trades* or *Neurontin*, the court still finds the reasoning of these Circuit decisions persuasive. And, the court predicts, the Tenth Circuit would follow their lead and apply their principles to this case. Thus, the court concludes that the presence of intermediary players in the drug supply chain don't present individual causation issues that overwhelm common questions of RICO causation. Instead, the court holds, putative class plaintiffs have shown how they could prove RICO causation from classwide proof that could persuade the factfinder that the purpose of defendants' EpiPen pricing scheme was to raise the price of the EpiPen. In turn, plaintiffs also have shown how classwide proof could provide a basis to conclude that defendants' alleged scheme caused plaintiffs—the ones ultimately paying for the EpiPen—to pay more for the product than they otherwise would have paid without defendants' unlawful acts. This is the very injury that **[*164]** plaintiffs seek to redress.

Plaintiffs have discharged their burden to demonstrate that they can prove RICO causation with classwide evidence. Here, Prof. Elhauge's analysis of the effect of defendants' exclusionary contracts on the price of the EpiPen plausibly demonstrates classwide causation.[50] As his Report explains, Prof. Elhauge used a regression

---

[50] The court recognizes that, in *Sergeants Benevolent*, the Second Circuit held that plaintiffs failed their burden to show they could prove RICO causation with classwide evidence because their expert (Prof. Rosenthal) provided "mere correlation evidence" that didn't suffice to prove classwide causation. *806 F.3d at 96*. But, the Second Circuit contrasted Prof. Rosenthal's analysis there with her analysis in *Neurontin* that involved an aggregate regression analysis. *Id.* The Second Circuit recognized: "*Neurontin* does indicate that where individual physicians' reliance on a pharmaceutical company's misrepresentations forms a necessary link in the causal chain between those misrepresentations and the plaintiffs' injury, such reliance can be proved to a jury with sufficiently powerful aggregate evidence, as opposed to individualized inquiries as to each prescribing physician's actual decisionmaking." *Id. at 97*. Nevertheless, the Second Circuit concluded, it "need not (and do[es] not intend to) express any view here on whether or when an aggregate regression analysis similar to the one deployed in *Neurontin* might be sufficient to prove causation on a class-wide basis in other pharmaceutical-marketing cases alleging a pattern of mail fraud actionable under RICO" because plaintiffs' causation evidence there was too "simplistic" to support classwide evidence of causation. *Id.* In contrast, as discussed above, plaintiffs here have offered classwide evidence of causation through Prof. Elhauge's regression

model to "estimate the total impact of the restrictive PBM formulary positions on the quantity of [rival product Auvi-Q] pens Sanofi was able to sell each month that it was on the market." Doc. 1497-2 at 58 (Elhauge Expert Report ¶ 113). Next, Prof. Elhauge estimated Mylan's price elasticity when Auvi-Q was on the market. *Id. at 62* (Elhauge Expert Report ¶ 119). Then, using his estimates about the impact of PBM restrictions on quantity and Mylan's price elasticity, Prof. Elhauge calculated the price of the EpiPen caused by PBM foreclosure, multiplied that foreclosure by the quantity of Mylan's actual sales, and determined the total amount of overcharge caused by PBM foreclosure. *Id. at 64-66* (Elhauge Expert Report ¶ 120, Table 3-4). Plaintiffs here have come forward with far more than "mere correlation evidence." *Cf. Sergeants Benevolent, 806 F.3d at 96* (holding that expert's analysis provided **[*165]** only "mere correlation evidence" that didn't support RICO causation). The court thus finds that Prof. Elhauge's expert opinion suffices to establish how plaintiffs will rely on classwide evidence to show RICO causation. And, the court concludes that the common causation issues predominate over individual ones on plaintiffs' RICO claim premised on the theory that defendants' use of exclusive dealing contracts with PBMs caused plaintiffs to pay more for the EpiPen.

For all these reasons, the court finds that plaintiffs have established that common issues of RICO causation predominate over individual issues sufficient to satisfy the *Rule 23(b)(3)* requirement.

ii. RICO Damages

Next, when it comes to RICO damages, defendants argue that plaintiffs cannot satisfy *Rule 23*'s predominance requirement. Plaintiffs respond, arguing that the Expert Reports for Profs. Elhauge and Rosenthal sufficiently demonstrate how plaintiffs can prove their RICO damages on a classwide basis. Defendants dispute this proposition, contending plaintiffs' RICO damage calculations run afoul of *Comcast Corp. v. Behrend, 569 U.S. 27, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*.

HN55[] In *Comcast*, the Supreme Court determined that at the class certification stage, "any model supporting **[*166]** a 'plaintiff's damages case must be consistent with its liability case.'" *569 U.S. at 35* (quoting ABA Section of ***Antitrust Law***, Proving Antitrust Damages: Legal and Economic Issues 57, 62 (2d ed. 2010)). Thus, in that antitrust case, *Comcast* held that plaintiffs must "tie each theory of antitrust impact to an exact calculation of damages." *Id. at 37*. The *Comcast* plaintiffs had alleged four different theories of antitrust impact, but the district court "accepted [just one of those theories] of antitrust impact as capable of classwide proof and rejected the rest." *Id. at 31*. Nevertheless, the district court certified a class based on an expert's regression model that "assumed the validity of all four theories of antitrust impact initially advanced" by plaintiffs. *Id. at 36*. On defendant's *Rule 23(f)* petition for interlocutory appeal, the Third Circuit affirmed the certification order. *Behrend v. Comcast Corp., 655 F.3d 182 (3d Cir. 2011)*. The Supreme Court reversed, holding the district court had erred when it accepted plaintiffs' regression model because it "falls far short of establishing that damages are capable of measurement on a classwide basis." *Comcast, 569 U.S. at 35*. And, "[w]ithout presenting another methodology," plaintiffs could not prove "*Rule 23(b)(3)* predominance." *Id.* Instead, the Court reasoned, "[q]uestions **[*167]** of individual damage calculations will inevitability overwhelm questions common to the class." *Id.*

Here, defendants argue Prof. Rosenthal's alternative RICO damages model contravenes *Comcast*'s requirement that class plaintiffs must connect each theory of liability to an exact calculation of damages. They assert that Prof. Rosenthal's calculation would require every class member to have sustained injury under every allegation in the Complaint for every transaction. The court rejects defendants' argument for two reasons.

First, defendants' argument ignores Prof. Rosenthal's actual estimate of RICO damages. In her analysis, she provided separate RICO damage estimates for plaintiffs' generic delay and single pack withdrawal theories and disaggregated each estimate among the affected group, *e.g.*, TPPs, insured consumers, and cash payors. *See*

model. And, as the court concludes above, this showing suffices to establish that common issues predominate the RICO causation analysis.

Doc. 1500-3 at 29, 31 (Rosenthal Expert Report ¶¶ 67, 72). Simply put, defendants' characterization of Prof. Rosenthal's work contradicts the content of the certification record.[51]

Second, as Prof. Rosenthal has explained, her alternative RICO damages calculation merely represents how plaintiffs' allegations—collectively—show that defendants' **[*168]** conduct permitted Mylan to raise prices on the EpiPen. It presents a summary of aggregate damages caused by defendants' alleged RICO violations, calculated by comparing the actual price per pen to the but-for price that, in her opinion, would have existed absent the EpiPen pricing scheme. Unlike the problematic damages evidence in *Comcast*, Prof. Rosenthal's alternative theory doesn't include a theory of liability that the court has excluded. Thus, Prof. Rosenthal's theory is consistent with *Comcast* because her work honors the Supreme Court's rule that "a model purporting to serve as evidence of damages in [a] class action must measure only those damages attributable to that theory." *Id. at 35*. Plaintiffs here have identified several theories that purportedly injured the putative class members and thus produced damages. Prof. Rosenthal's alternative RICO damages calculation properly combines plaintiffs' theories of liability. And, at the same time, her other analyses disaggregate plaintiffs' damages based on plaintiffs' legal theories.

As the Seventh Circuit has recognized, "it was not the existence of multiple theories in [*Comcast*] that precluded class certification; it was the plaintiffs' failure **[*169]** to base all the damages they sought on the antitrust impact—the injury—of which the plaintiffs were complaining." *Butler v. Sears, Roebuck & Co., 727 F.3d 796, 800 (7th Cir. 2013)*. The *Comcast* scenario is not present here. Plaintiffs have presented a damages model that is consistent with their liability theories. It does not contravene *Comcast*. And, it doesn't matter that they also have presented an alternative model.

Last, defendants assert that plaintiffs can't show classwide proof of damages because "some plaintiffs purchased EpiPen devices prior to events alleged in the Complaint." Doc. 1636 at 73. But, as plaintiffs explain, their class definitions dispense with this argument. The class definitions only include persons and entities who purchased the EpiPen after August 24, 2011—the date when Mylan launched the 2-Pak. Doc. 1353 at 2. Thus, the class definitions only include persons injured during the time defendants allegedly were executing the EpiPen pricing scheme. The court thus rejects defendants' argument that individual issues overwhelm the common issues of RICO damages.

For all these reasons, the court concludes that plaintiffs have demonstrated that common issues predominate the elements of their RICO claim sufficient to satisfy the class **[*170]** certification requirement of *Rule 23(b)(3)*.

d. Antitrust

Plaintiffs ask the court to certify as a class action their state antitrust claims under the laws of 27 states and the District of Columbia.[52] Plaintiffs assert that their theories of antitrust liability involve common questions because they focus squarely on defendants' allegedly unlawful conduct: (a) exclusive dealing arrangements where Mylan

---

[51] Also, Prof. Elhauge provided a separate damage calculation for plaintiffs' other theory—exclusive dealing through defendants' use of exclusionary PBM contract. *See* Doc. 1500-2 at 56-66 (Elhauge Expert Report ¶¶ 110-120); *see also* Doc. 1497-2 at 56-66 (Elhauge Expert Report ¶¶ 110-120) (sealed version).

[52] The 27 states are: Alabama, Arizona, California, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. And, as noted above, plaintiffs also ask the court to certify a class under the laws of the District of Columbia.

But the court already has dismissed the state law antitrust claims brought under the laws of Arizona, the District of Columbia, Iowa, New Mexico, North and South Dakota, Oregon, Rhode Island, Vermont, West Virginia, and Wisconsin because the Class Complaint includes no named plaintiff residing in any of these states. *See* Doc. 896 at 127; Doc. 1292 at 3. So, the court cannot certify a class action asserting antitrust violations under the laws of these states. That leaves 17 states subject to this portion of the certification motion.

gave discounts to certain PBMs who drove and kept EpiPen prices above competitive levels; and (b) reverse payment patent litigation settlements where, plaintiffs allege, the EpiPen patent holder provided consideration to the alleged generic competitor/infringer in exchange for the generic competitor agreeing to delay entry of its generic product into the EAI market, thereby producing inflated EpiPen prices. Defendants argue that plaintiffs cannot prove either antitrust theory on a classwide basis because they can't use common evidence to prove the required element of market power. Also, defendants argue that plaintiffs cannot prove other elements of either one of their antitrust theories using classwide evidence. Instead, defendants contend, individual issues predominate the analysis, thus precluding certification. **[*171]** The court addresses defendants' arguments separately, below.[53]

i. Market Power

Defendants assert that plaintiffs can't show market power in the EAI market with common evidence. Plaintiffs respond, relying on Prof. Elhauge's report and his opinions about market power. He opines that market power can be established through common proof, including proof sufficient to establish the relevant product and geographic markets, and Mylan's dominant position in that market. According to Prof. Elhauge, Mylan held—at least—an 80% market share throughout the class period. Doc. 1500-2 at 11, 15 (Elhauge Expert Report fig.1, ¶ 22); *see also* Doc. 1497-2 at 11, 15 (Elhauge Expert Report fig.1, ¶ 22) (sealed version). And, according to Prof. Elhauge's calculations, Mylan's market power was even greater than 80% for much of the relevant period. *Id.*

Mylan asserts, in response, that Prof. Elhauge's opinions don't establish marker power for at least two reasons.[54] *First*, Mylan asserts that Prof. Elhauge's calculations used incorrect data. According to Mylan's expert, Dr. Johnson, plaintiffs' entire model is flawed and Prof. Elhauge's conclusions about market power **[*172]** are unreliable. *Second*, Mylan argues, when PBMs shift to the lowest current formulary bid, it quickly changes the market share calculation. Mylan contends that its market share and ability to change prices vary dramatically across PBMs and formularies. Mylan asserts that Prof. Elhauge's failure to account for these variances undermines his conclusions. These showings, Mylan asserts, demonstrate that plaintiffs can't establish market power with evidence common to the entire class.

Mylan's arguments are not persuasive. As already discussed, on class certification, the court need not determine that Prof. Elhauge's calculations are right. Plaintiffs only need to demonstrate that his analysis applies to the claims for all class members and the issue does not affect class members differently. Plaintiffs have shouldered that responsibility. The court thus finds plaintiffs have made a plausible showing that they can establish market power in a relevant market with common evidence.

ii. Exclusive Dealing Arrangements

---

[53] Plaintiffs' opening brief acknowledges they must use common evidence to show that defendants inflicted antitrust impact, or injury, on the class. Doc. 1500 at 73-74. ***HN56***[] The antitrust injury requirement "'ensures that a plaintiff can recover only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior.'" *Elliott Indus. Ltd. P'ship v. BP Am. Prod. Co., 407 F.3d 1091, 1124-25 (10th Cir. 2005)* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. At the certification stage, plaintiffs do not have to prove impact; instead, they need "only to demonstrate that the element of antitrust impact *is capable of proof at trial* through evidence that is common to the class rather than individual to its members." *Messner v. Northshore Univ. Healthsystem, 669 F.3d 802, 818 (7th Cir. 2012)* (citation and internal quotation marks omitted). As discussed above, plaintiffs have provided a common methodology for calculating aggregate damages stemming from defendants' alleged antitrust violations through Profs. Elhauge and Rosenthal's expert opinions, and these calculations apply classwide for each of plaintiffs' antitrust theories. *See supra* Part IV.E.2.b. The court finds that this showing suffices to establish that plaintiffs are capable of presenting common evidence of antitrust impact.

[54] Defendants haven't asserted a *Daubert* challenge to Prof. Elhauge's opinions about market definition and market power. But defendants assert that they are reserving their right to challenge these opinions at a later stage. Doc. 1886 at 9 n.1.

Next, defendants deny that plaintiffs can show "exclusive dealing" through common evidence. They argue that the alleged exclusionary contracts that plaintiffs rely on to support **[*173]** their antitrust claims are with different PBMs across different formularies at different times. Consequently, defendants assert, determining whether each consumer or payor's formula constitutes an "exclusive agreement" requires individualized inquiry.

In response, plaintiffs assert that Prof. Elhauge's PBM foreclosure analysis is common to all class members because Mylan's complete foreclosure across the EAI market increased prices for all payors, not just those foreclosed. Prof. Elhauge explained that Mylan, through rebates it offered to PBMs—conditioned on exclusionary terms requiring Auvi-Q to be placed in a less favorable formulary position than EpiPen—gave PBMs the highest rebates and significantly affected the share of EAI doses that EpiPen and Auvi-Q sold within each PBM. Stated differently, Prof. Elhauge opined that Mylan's conditional rebating strategy managed to restrict a substantial portion of the market. According to his calculations, based on Mylan, IQVIA Xponent,[55] and Sanofi's data, Mylan's exclusionary PBM contracts, once fully implemented, consistently foreclosed more than 30% of all formulary lives—and, they typically foreclosed 40%-60% of them. *See* Doc. 1500-2 at 52-53 **[*174]** (Elhauge Expert Report ¶¶ 99-101) (providing a classwide methodology for calculating share and price impacts of PBM coverage restrictions); *see also* Doc. 1497-2 at 52-53 (Elhauge Expert Report ¶¶ 99-101) (sealed version). Prof. Elhauge then analyzed the price impact of defendants' exclusionary conduct to estimate prices but for defendants' alleged misconduct. *See* Doc. 1500-2 at 56-64, 66 (Elhauge Expert Report ¶¶ 110-120, Table 4) (providing a classwide methodology for calculating share and price impacts of PBM coverage restrictions); *see also* Doc. 1497-2 at 56-64, 66 (Elhauge Expert Report ¶¶ 110-120, Table 4) (sealed version).

To Mylan's argument that the numerous and varying agreements between Mylan and PBMs preclude predominance, plaintiffs rely on Prof. Rosenthal's findings. She opines that the prices paid by third-party payors and cash payors directly correlated to the EpiPen's WAC price[56] (a 99.9% and 99.8% correlation, respectively). Doc. 1711-1 at 8-9 (Rosenthal Reply Report ¶ 7, n.11, fig.2). Combining this correlation evidence with Prof. Elhauge's analysis, plaintiffs contend, shows that Mylan's actions raised baseline prices for all payors, even those on non-foreclosed formularies **[*175]** and despite the presence of prices negotiated from that baseline. Such common evidence supports a finding of predominance. *See* *In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *6-7 (D. Kan. Sept. 26, 2016)* (holding plaintiffs satisfied the predominance requirement by showing that they would prove, through expert opinion, that defendants' actions caused a "general market price decrease" that applied across the board to each class member's corn sales); *see also* *In re Urethane Antitrust Litig., 768 F.3d 1245, 1254 (10th Cir. 2014)* (holding district court did not abuse its discretion by determining that the antitrust impact of defendants' alleged conduct "involved a common question that would override other individualized issues" because defendants' alleged price-fixing "creat[ed] an inference of class-wide impact even when prices are individually negotiated[,]" especially when the evidence showed that defendants' "conspiracy artificially inflated the baseline for price negotiations"); *see also* *In re Lidoderm Antitrust Litigation, No. 14-md-2521-WHO, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *20-21 (N.D. Cal. Feb. 21, 2017)* (rejecting defendants' argument that "the terms of the rebates [for third-party payors ("TPPs")] vary across the board and require individualized review depending on the size of the TPP, the type of TPP . . . , and the TPP plan" because **[*176]** plaintiffs had provided a "common method of proof by [their] expert, who determined the existence of overcharges on all purchases after determining a but-for price and after taking into account rebates[,]" and thus differences in TPP rebates didn't defeat predominance requirement).

The court has found Profs. Elhauge and Rosenthal's methodologies sufficiently sound to withstand defendants' *Daubert* challenges. On certification, Mylan criticizes Prof. Elhauge's opinion as flawed because, defendants

---

[55] The IQVIA Xponent data consists of pharmacy records that plaintiffs produced. Doc. 1711-1 at 29 (Rosenthal Reply Report ¶ 48).

[56] As Prof. Rosenthal explained, the WAC price is the wholesale acquisition cost. Doc. 1724 at 15 (Tr. of Mot. Hr'g Class Certification — Phase I 15:12-22). It is the list price set by the manufacturer. *Id.* Once a manufacturer has determined a drug's WAC price, that price is typically used in transactions between the manufacturer and wholesaler. *Id.* It is essentially the benchmark the wholesaler uses for many of its sales to pharmacies. *Id.*

contend, he improperly defined "foreclosure." But, for purposes of the certification motion, the court need not determine whether Prof. Elhauge's opinion is correct. Instead, the court must decide whether plaintiffs have presented a plausible method for proving their antitrust claim using classwide evidence. *See* *In re Lidoderm Antitrust Litigation, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *23* ("A rigorous review of [the experts'] opinions and their reasoning, as required under recent Supreme Court precedent, establishes that the concepts and designs of their models are solid. What facts and assumptions are appropriate to include in those models (and which model is preferred) are not issues [the court] can or should resolve on *this* [certification] motion."). The **[*177]** court concludes that plaintiffs have satisfied this burden with their experts' opinions. They explain how aggregate foreclosure and price increases applied classwide, even if a particular class member wasn't subject to a foreclosed PBM formulary. The court thus finds that plaintiffs have satisfied the predominance requirement, as used to support their exclusive dealing claim. Some individual questions likely remain, but the common questions dominate the analysis.

iii. Generic Delay

Defendants sharply contest plaintiffs' theory that defendants used a reverse payment settlement to delay entry of a generic EAI competitor. Defendants argue that plaintiffs can't show predominance of common issues for this theory. Plaintiffs respond, arguing that their expert opinions provide common evidence to support their generic delay claim, thus satisfying the predominance requirement.

Specifically, plaintiffs rely on Prof. Elhauge to (a) explain how reverse payment settlements can divide markets over time by delaying generic entry beyond what one otherwise would expect in a way that creates anticompetitive profits split among the settling parties; and (b) describe a methodology to calculate the economically **[*178]** rational entry date for the parties to have accepted in a no-payment settlement (had they been prevented from reaching a reverse payment settlement). Doc. 1500-2 at 17, 33-38 (Elhauge Expert Report ¶¶ 26, 56-66); *see also* Doc. 1497-2 at 17, 33-38 (Elhauge Expert Report ¶¶ ¶¶ 26, 56-66) (sealed version). Prof. Elhauge, in turn, employs Prof. Torrance's analysis of the EpiPen patents and related litigation to derive a generic entry date. Doc. 1500-2 at 39, 42 (Elhauge Expert Report ¶¶ 70, 75).

Using Prof. Elhauge's calculated generic entry date, Prof. Rosenthal analyzes how the reverse payment settlement produced supra-competitive prices for the EpiPen, thus forcing consumers to pay inflated EpiPen prices. Doc. 1500-3 at 22-23 (Rosenthal Expert Report ¶¶ 48-53); *see also* Doc. 1497-3 at 22-23 (Rosenthal Expert Report ¶¶ 48-53) (sealed version). Prof. Rosenthal has calculated the classwide overcharges paid by EpiPen consumers, and she also has provided an aggregate damage calculation for the antitrust class based on defendants' alleged use of an unlawful reverse payment settlement. Doc. 1500-3 at 27-30 (Rosenthal Expert Report ¶¶ 58-68); *see also* Doc. 1497-3 at 27-30 (Rosenthal Expert **[*179]** Report ¶¶ 58-68) (sealed version).

Defendants take issue with each of these expert opinions. Defendants try to undermine both Profs. Elhauge's and Torrance's opinions by citing the opinion of their own expert, Mr. Folsom, to demonstrate that Teva's chances for success at trial were much lower than Prof. Torrance opines. Also, Mylan criticizes Prof. Rosenthal's opinion about the number of class members who would have switched to a generic product had one been available in the market (*i.e.*, the inverse of the proportion of "brand loyalists"), and her calculation of the average price consumers would have paid in the but-for world where Teva's generic entered the market.

Separately, Pfizer attacks Prof. Elhauge's analysis on two grounds. *First*, Pfizer contends that Prof. Elhauge's analysis fails to consider (a) Pfizer's economic incentives for settling the patent litigation (and also incorrectly calculates Teva's economic incentives), and (b) the merits of the patent claims in the litigation.[57] Plaintiffs respond,

[57] Plaintiffs don't respond specifically to Pfizer's arguments about the merits of the patent claims. Defendants criticize Prof. Elhauge's reliance on Prof. Torrance's opinion that Teva had more than a 70% chance of prevailing in the patent litigation. Defendants levied the same attacks against Prof. Torrance's opinion in the *Daubert* motion. As the court discussed in its Order denying that motion, defendants' arguments go to the weight of Prof. Torrance's opinions but don't preclude their admissibility.

citing Prof. Elhauge's Reply Report. He opines that Pfizer and its subsidiaries—as the sole manufacturer and supplier of the EpiPen—"would benefit from any entry delay caused by **[*180]** the reverse payment, since that would give them more profits under their agreement to supply Mylan." Doc. 1711-2 at 18 (Elhauge Reply Report ¶ 34). Thus, Prof. Elhauge concludes, "Pfizer and its subsidiaries, regardless of their settlement or litigation payoffs, would have found it economically rational to agree to any reverse-payment settlement that was expected to delay Teva's entry." *Id.* And, Prof. Elhauge correctly notes, "any disputes about the extent to which Mylan drove bargaining about the delay in settlement entry date obtained for the reverse payment would be resolvable based on classwide evidence and any resolution of that issue would be common to the class." *Id.*

Second, Pfizer contends that plaintiffs cannot hold it liable under the generic delay theory because the record contains no evidence that Pfizer induced any generic delay for the EpiPen. Plaintiffs premise their generic delay theory on an allegation that the "reverse payment" that purportedly induced Teva to delay its generic EpiPen was an agreement by Mylan to delay entry of a Nuvigil generic—the product that was the subject of a separate lawsuit between Mylan and a Teva affiliate. Pfizer argues that plaintiffs **[*181]** have adduced no evidence connecting Pfizer to the Nuvigil litigation when it settled the EpiPen patent litigation with Teva. These arguments appear to address the merits of plaintiffs' antitrust claim against Pfizer—*i.e.*, whether plaintiffs can marshal evidence showing that Pfizer participated in the alleged unlawful reverse payment settlement. The court need not—indeed, cannot decide the merits of that issue on certification. In any event, as plaintiffs argue, they allege an antitrust conspiracy in this case. ***HN57***[] Members of a conspiracy are liable for acts committed by their co-conspirators in furtherance of the conspiracy. *Pinkerton v. United States, 328 U.S. 640, 646-48, 66 S. Ct. 1180, 90 L. Ed. 1489 (1946)*; *see also* *Halberstam v. Welch, 705 F.2d 472, 487, 227 U.S. App. D.C. 167 (D.C. Cir. 1983)* (holding "the law on civil conspiracy" imposes liability on co-conspirators for acts that are "a reasonably foreseeable consequence of the scheme"). So, if plaintiffs can prove that defendants engaged in a conspiracy, the law will hold Pfizer liable for the acts of Mylan as its co-conspirator. ***HN58***[] Also, as one leading treatise has noted, proof of a conspiracy "is a common question that is thought to predominate over the other issues in the case and has the effect of satisfying the first prerequisite in *Rule 23(b)(3)*." 7AA Charles Alan Wright, *et al., Federal Practice &* ***[*182]*** *Procedure* § 1781 (3d ed. 2005). The court rejects Pfizer's argument that its purported lack of participation in a reverse payment settlement precludes certification.

The court already has addressed many of defendants' other criticisms about plaintiffs' experts' methodologies and the accuracy of their calculations. By separate Order, the court has found these experts have substantiated their conclusions sufficient to survive *Daubert* challenges at this stage. Whether these expert opinions ultimately will persuade a factfinder that defendants violated the antitrust laws by delaying generic entry is not something the court can decide at certification. Nor do plaintiffs need to prove that these experts' opinions and calculations are accurate. Instead, to shoulder their certification burden, plaintiffs must show that common issues subject to classwide evidence predominate over individual questions. The court finds that plaintiffs have satisfied that burden. Plaintiffs' experts have presented a plausible method for proving their antitrust claims under a generic delay theory with evidence that applies on a classwide basis. This suffices to establish predominance to support plaintiffs' generic delay **[*183]** theory.

For the above reasons, the court finds that that plaintiffs have shouldered their burden to establish that common issues predominate their antitrust claim sufficient to satisfy the class certification requirement of *Rule 23(b)(3)*.

e. Consumer Protection

And, here, on certification, the court need not weigh whether Prof. Torrance accurately opines about Teva's chances of success in the patent litigation. Instead, the court must determine whether Prof. Elhauge's opinions, relying on Prof. Torrance's opinions, provide a plausible method for proving plaintiffs' generic delay theory on a classwide basis. The court finds that they do.

Plaintiffs ask the court to certify as a class action their state consumer protection law claims under the laws of 20 states and the District of Columbia[58] that prohibit anticompetitive conduct or unfair practices. Defendants oppose certification of any state consumer protection class action. They contend that variations among the states' laws preclude certification because states use different tests to determine what is unfair conduct violating consumer protection statutes.[59] The court agrees with defendants. The differences among state consumer protection statutes are significant, they present individual issues, and they overwhelm the common questions. As a consequence, plaintiffs fail to establish predominance, and thus, these individual issues defeat class certification of the state consumer protection class under *Rule 23(b)(3)*.

HN59[] As plaintiffs concede, states apply different tests when determining what qualifies as unfair conduct prohibited by a **[*184]** particular consumer protection statute. Doc. 1500 at 89; Doc. 1837 at 39-40. But, plaintiffs dismiss these differences, arguing they are just "[m]inor variations" in the laws. Doc. 1837 at 40. And, plaintiffs assert, the court can manage the differences by submitting special verdict forms or using other "mechanisms." *Id.*[60] The court disagrees.

HN60[] The state laws at issue here use a variety of tests to define the form of conduct that will qualify as anticompetitive or unfair conduct prohibited under the consumer statutes. For example, some states consider the following factors: (1) whether the practice offends public policy, the common law, or otherwise; (2) whether it is immoral, unethical, oppressive, or unscrupulous; or (3) whether it causes substantial injury to consumers.[61] Other

---

[58] The 20 states are: Alaska, California, Connecticut, Florida, Hawaii, Illinois, Maine, Maryland, Massachusetts, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, Oklahoma, Rhode Island, Vermont, Washington, and West Virginia. Doc. 1500 at 86, 88. And, as noted, plaintiffs also seek certification under the laws of the District of Columbia.

The court notes that the Consolidated Class Action Complaint doesn't plead a violation of the state consumer protection laws in Alaska, the District of Columbia, or Rhode Island. *See* Doc. 60 at 182-394. It only alleges violation of those three jurisdictions' antitrust laws. *See* *id. at 145-47, 149-50, 152-54, 157-59*. But the court has dismissed those three state law antitrust claims because the Class Complaint includes no named plaintiff residing in any of the three. *See* Doc. 896 at 127 (dismissing "the class plaintiffs' state law antitrust claims asserted against both sets of defendants under the laws of Alaska, . . . the District of Columbia, [and] Rhode Island . . . because the Class Complaint includes no named plaintiff who resides in any of these states"). Also, the court has dismissed the state consumer protection law claims brought under the laws of New Mexico, Vermont, Washington, and West Virginia because the Class Complaint includes no named plaintiff residing in those states. Doc. 896 at 127, Doc. 1292 at 3.

[59] Defendants also make three other arguments. They contend that the state consumer protection statutes at issue here award different types of damages, use varying rules for eligibility to sue, and impose differing statutes of limitations. And, defendants argue, these differences in state laws present individual issues that overwhelm the common questions. Because the court agrees with defendants' argument that differences in how the state laws define unfair conduct prevent certification, the court does not need to reach defendants' other arguments against certification.

[60] Plaintiffs don't identify the other mechanisms the court could employ. But, they cite *In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856 (D. Kan. Sept. 26, 2016)*, where our court certified eight, separate statewide class actions. *2016 U.S. Dist. LEXIS 132549, [WL] at *12-15* (certifying separate statewide classes consisting of corn producers in Arkansas, Illinois, Iowa, Kansas, Missouri, Nebraska, Ohio, and South Dakota). But this comparison isn't an apt one. Here, plaintiffs don't ask the court to certify separate statewide classes. Instead, they ask the court to certify one "Consumer Protection Damages Class" consisting of all persons and entities in the "Consumer Protection States" who purchased or paid for EpiPens. Doc. 1353 at 3.

[61] These states include: ***Connecticut*** *(Cenatiempo v. Bank of Am., N.A., 333 Conn. 769, 219 A.3d 767, 790 (Conn. 2019)* (discussing requirements of Connecticut Unfair Trade Practices Act)); ***Florida*** *(PNR, Inc. v. Beacon Prop. Mgmt., Inc., 842 So.2d 773, 777 (Fla. 2003)* (discussing requirements of the Florida Deceptive and Unfair Trade Practices Act)); ***Hawaii*** *(Hungate v. Law Office of David B. Rosen, 139 Haw. 394, 391 P.3d 1, 18 (Haw. 2017)* (discussing requirements of *Haw. Rev. Stat. § 480-2*)); ***Illinois*** *(Robinson v. Toyota Motor Credit Corp., 201 Ill. 2d 403, 775 N.E.2d 951, 961, 266 Ill. Attorney Gen., 380 Mass. 762, 407 N.E.2d 297, 307 (Mass. 1980)* (discussing requirements of *Mass. Gen. Laws ch. 93A, § 2*)); ***Missouri*** *(Chochorowski v. Home Depot U.S.A., 404 S.W.3d 220, 226 (Mo. 2013)* (en banc) (discussing requirements of the

states examine whether the act or practice: (1) causes or is likely to cause substantial injury to consumers; (2) which is not reasonably avoidable by the consumer; and (3) not outweighed by countervailing benefits to consumers or to competition.[62] Nebraska, New Hampshire, and New Mexico apply their own standards to define unfair conduct under their state consumer protection statutes. **[*185]** [63] Nevada's statute only prohibits deceptive conduct, not unfair conduct.[64] And, in California, there is internal dissonance about the test courts should use under California's act. Courts there have applied two different tests to determine what is an unfair practice under the California Unfair Competition Law.[65]

Missouri Merchandising Practices Act)); ***North Carolina** (Bumpers v. Cmty. Bank of N. Va., 367 N.C. 81, 747 S.E.2d 220, 228 (N.C. 2013)* (discussing requirements of North Carolina's Unfair and Deceptive Practices Act)); **Oklahoma** (*Okla. Stat. tit. 15, § 752(14)* (Oklahoma Consumer Protection Act)); and ***Vermont** (Christie v. Dalmig, Inc., 136 Vt. 597, 396 A.2d 1385, 1388 (Vt. 1979)* (discussing requirements of Vermont Consumer Fraud Act)).

[62] These states include: ***Maine** (Searles v. Fleetwood Homes of Pa., Inc., 2005 ME 94, 878 A.2d 509, 519 n.10 (Me. 2005)* (discussing requirements of the Maine Unfair Trade Practices Act)); and ***Maryland** (Sager v. Hous. Comm'n of Anne Arundel Cty., 957 F. Supp. 2d 627, 642 (D. Md. 2013)* (discussing the requirements of the Maryland Consumer Protection Act and citing *Legg v. Castruccio, 100 Md. App. 748, 642 A.2d 906, 916 (Md. Ct. Spec. App. 1994))*. Also, **West Virginia** has not adopted this test explicitly, but the West Virginia Consumer Credit and Protection Act instructs courts construing that act to "be guided by the policies of the Federal Trade Commission and interpretations given by the Federal Trade Commission and the federal courts to Section 5(a)(1) of the Federal Trade Commission Act . . . ." *W.Va. Code § 46A-6-101(1)*. *Section 45(a)(1)* of Title 15 to the United States Code declares unlawful "[u]nfair methods of competition in or affecting commerce" and "unfair or deceptive acts or practices in or affecting commerce." *Section 45(n)* prohibits the FTC from declaring an act unlawful on the ground that it is "unfair unless the act or practice causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighed by countervailing benefits to consumers or to competition." The court predicts that West Virginia would apply this test when determining whether an act is an unfair act prohibited by the West Virginia Consumer Credit and Protection Act.

[63] **Nebraska** requires the plaintiff asserting a Nebraska Consumer Protection Act claim to "prove that the practice either '(1) fell within some common-law, statutory, or other established concept of unfairness or (2) was immoral, unethical, oppressive, or unscrupulous.'" *State ex rel. Stenberg v. Consumer's Choice Foods, Inc., 276 Neb. 481, 755 N.W. 2d 583, 591 (Neb. 2008)* (quoting *Raad v. Wal-Mart Stores, Inc., 13 F. Supp. 2d 1003, 1014 (D. Neb. 1998)* and noting that the Nebraska Supreme Court has not defined unfair practices under the state consumer protection act but recognizing that the Nebraska federal court defined the term in *Raad*). **New Hampshire** applies "the rascality test" to determine whether an act is an unfair or deceptive act prohibited by the New Hampshire Consumer Protection Act. *Axenics, Inc. v. Turner Constr. Co., 164 N.H. 659, 675-76, 62 A.3d 754 (N.H. 2013)*. The rascality test requires that "the objectionable conduct . . . attain a level of rascality that would raise an eyebrow of someone inured to the rough and tumble of the world of commerce." *Id.* (citation and internal quotation marks omitted). **New Mexico**'s Unfair Trade Practices Act specifically defines the conduct prohibited by the statute. *See* *N.M. Stat. Ann. § 57-12-2(E)* (defining an "unconscionable trade practice" as "an act or practice . . . that to a person's detriment: (1) takes advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree; or (2) results in a gross disparity between the value received by a person and the price paid"). And New Mexico courts apply the statute's definition when determining whether conduct violates the statute. *See, e.g.,* *State ex rel. King v. B & B Inv. Grp., Inc., 2014-NMSC 024, 329 P.3d 658, 665 (N.M. 2014)* (applying *N.M. Stat. Ann. § 57-12-2(E)*'s definition of "unconscionable trade practice").

[64] The Nevada Deceptive Trade Practices Act allows "any person who is a victim of consumer fraud" to bring an action under the statute. *Nev. Rev. Stat. § 41.600(1)*. "Consumer fraud" includes "deceptive trade practices" as defined in *§§ 598.0915 to 597.0925*. *Nev. Rev. Stat. § 41.600(2)(e)*. The Nevada federal district court has interpreted the statute's plain language to require a plaintiff to "show a defendant engaged in a consumer fraud of which the plaintiff was a victim." *Picus v. Wal-Mart Stores, Inc., 256 F.R.D. 651, 657 (D. Nev. 2009)*.

[65] The Ninth Circuit has recognized that the California Unfair Competition Law ("UCL") "does not define the term unfair" and "the proper definition of unfair conduct against consumers is currently in flux among California courts." *Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1169 (9th Cir. 2012)* (citation and internal quotation marks omitted). The Ninth Circuit has cited two tests that the California courts have used to determine whether alleged conduct violates the UCL. *Id.* at 1169-70.

HN61[] The court recognizes that differences in state laws don't always preclude class certification under Rule 23(b)(3)'s predominance requirement. Courts have found class certification warranted when "the idiosyncratic differences between state consumer protection laws are not sufficiently substantive to predominate over the shared claims." Hanlon v. Chrysler Corp., 150 F.3d 1011, 1022-23 (9th Cir. 1998), *overruled on other grounds by* Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011); *see also* Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 296 (1st Cir. 2000) ("As long as a sufficient constellation of common issues binds class members together, variations in the sources and application of [state law] will not automatically foreclose class certification under Rule 23(b)(3).").

But "varying state laws may defeat predominance" in other situations. Senne v. Kan. City Royals Baseball Corp., 934 F.3d 918, 928 (9th Cir. 2019); *see also* Castano v. Am. Tobacco Co., 84 F.3d 734, 741 (5th Cir. 1996) ("In a multi-state class action, variations in state law may swamp any common **[*186]** issues and defeat predominance."). Indeed, the Supreme Court has observed that "[d]ifferences in state law [can] compound . . . the disparities" among the factual questions, thus "undermining class cohesion." Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 624, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997).

HN62[] Courts have declined to certify class actions when the legal differences among varying state laws dominate the common questions. *See, e.g.,* Pilgrim v. Universal Health Card, LLC, 660 F.3d 943, 944 (6th Cir. 2011) (holding that "[t]he consumer-protection laws of many States . . . govern these claims and factual variations among the claims abound, making a class action in this setting neither efficient nor workable nor above all consistent with the requirements of Rule 23"); Zinser v. Accufix Research Inst., Inc., 253 F.3d 1180, 1189-90 (9th Cir. 2001) (affirming denial of class certification of a products liability action because "variances in state laws overwhelm common issues of fact"); In re Rhone-Poulenc Rorer, Inc., 51 F.3d 1293, 1300-02 (7th Cir. 1995) (decertifying class action and recognizing that negligence laws may vary among states "only in nuance" but "nuance can be important" and a review of differing state pattern instructions and judicial viewpoints about the meaning of negligence show that "the states of the United States sing negligence with a different pitch," thus the district court erred by finding that it could give a single instruction on negligence—one that "merg[ed] the negligence **[*187]** standards of the 50 states and the District of Columbia"); Commander Props. Corp. v. Beech Aircraft Corp., 164 F.R.D. 529, 541 (D. Kan. 1995) (O'Connor, J.) (denying class certification when "the significant number of individual inquiries required by the various state law claims make them ill-suited for class action treatment"); Aks v. Bennett, 150 F.R.D. 187, 192 (D. Kan. 1993) (Lungstrum, J.) (denying class certification because "common questions of law and fact [did] not predominate" when the claims were "subject to various state trust laws" and thus required analysis on a "state by state basis"). *Cf.* Doll v. Chi. Title Ins. Co., 246 F.R.D 683, 689 (D. Kan. 2007) (Lungstrum, J.) (refusing to certify a class action that involved "varying limitations laws for tort claims in the 18 jurisdictions in which the class members resided" because "[t]he complexity of these analyses of differing states' laws makes the class action proposed by plaintiffs unmanageable and weighs against a finding that a class action would be superior").

This case presents the same situation. The disparity of standards the states use to define unfair conduct under various consumer protection statutes present individual issues, and they overwhelm the common issues. As

---

First, under the *South Bay* test, "'unfair' conduct occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" Id. at 1169 (quoting S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 316 (Cal. Ct. App. 1999)). *Second*, under the *Cel-Tech* test, a finding of "unfairness" under the UCL "'[must] be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition.'" *Id.* at 1700 (quoting Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 544 (Cal. 1999)). In *Davis*, the Ninth Circuit did not decide which of the two tests defines unfair conduct under the UCL because, it determined, plaintiff had failed "to state a claim under either definition." *Id.* The Ninth Circuit and California federal courts have followed *Davis*'s guidance and have applied both tests when determining whether alleged conduct qualifies as "unfair" conduct prohibited by the UCL. *See, e.g.,* Hodsdon v. Mars, Inc., 891 F.3d 857, 866-67 (9th Cir. 2018); Rhodeman v. Ocwen Loan Servicing, LLC, No. EDCV 18-2363 JGB(KKx), 2019 U.S. Dist. LEXIS 197944, 2019 WL 5955368, at *17 (C.D. Cal. Nov. 12, 2019); In re Apple Inc. Device Performance Litig., 347 F. Supp. 3d 434, 463-64 (N.D. Cal. 2018).

defendants argue, a factfinder would have to apply each state's law to determine whether the conduct violates a specific state consumer **[*188]** protection statute. And, the factfinder properly could reach different conclusions about the legality of the same conduct based on the varying state law tests it must apply. It is difficult to imagine instructions that could fairly guide a jury to make classwide findings on varying state consumer protection laws and their many standards for defining prohibited conduct. Defendants have persuaded the court that this complexity would confuse the jury or prejudice defendants. The court finds that the variations among state consumer protection laws preclude predominance and thus make it inappropriate to certify the state consumer protection claims as a class action under *Rule 23(b)(3)*.

f. Unjust Enrichment

HN63[] Unjust enrichment claims generally require plaintiffs to prove three things: (a) defendant received a benefit; (b) at plaintiff's expense; and (c) retention of the benefit would be unjust without compensation. *See, e.g., Haz-Mat Response v. Certified Waste Serv. Ltd., 910 P.2d 839, 847 (Kan. 1996)* ("The basic elements of a claim based on a theory of unjust enrichment are threefold: (1) a benefit conferred upon the defendant by the plaintiff; (2) an appreciation or knowledge of the benefit by the defendant; and (3) the acceptance or retention by the defendant of the benefit under **[*189]** such circumstances as to make it inequitable for the defendant to retain the benefit without payment of its value." (citation and internal quotation mark omitted)).

Plaintiffs contend defendants received increased profits at plaintiffs' expense, which they acquired unjustly and as a result of their own allegedly unlawful conduct. Plaintiffs assert their unjust enrichment claims satisfy the predominance requirement because they premise their claims on many of the same alleged facts and will prove them using much of the same evidence as their other claims—*i.e.*, evidence focused on defendants' conduct as applied to the entire class. While plaintiffs acknowledge some variations among the states' unjust enrichment laws, they dismiss those differences as minor or idiosyncratic and assert they do not significantly alter the central issue or manner or proof. Mylan disagrees, arguing that the elements of an unjust enrichment claim are not uniform across all the states and the District of Columbia, which could produce different outcomes for different plaintiffs in different states. These differences, Mylan argues, mandate individualized inquiry and preclude certification of an unjust enrichment **[*190]** class.

Plaintiffs urge the court to follow *Menocal v. GEO Group, Inc., 882 F.3d 905 (10th Cir. 2018)*, where the Tenth Circuit affirmed class certification of an unjust enrichment class. But the class claim there was brought under the law of a single state (Colorado), and defendant only challenged the predominance element, as it applied to the unjustness element and damages. *Id. at 925-27*. The Tenth Circuit concluded that even though unjustness requires a "fact-intensive inquiry," it presented a common question in that case because the theory depended on shared facts focusing on defendant's pay policy that applied uniformly to all class members. *Id. at 925*. On damages, the Tenth Circuit acknowledged damages would have to be ascertained on an individual basis, but agreed with the district court's finding that they should be easily calculable using a simple formula. *Id. at 27*.

This case is significantly different than *Menocal*, where plaintiffs asserted an unjust enrichment claim under the laws of just one state—Colorado. Here, plaintiffs want to certify a nationwide class to assert unjust enrichment claims. ***HN64***[] Our court has noted that differences among state law definitions of unjust enrichment and its availability as a remedy make federal courts, in general, reluctant to certify **[*191]** a nationwide class on this theory. *Thompson v. Jiffy Lube Int'l, Inc., 250 F.R.D. 607, 626 (D. Kan. 2008)* ("Because of such variations [among state laws], federal courts have generally refused to certify a nationwide class based upon a theory of unjust enrichment.").

For the same reasons, the court finds here that the individualized inquiries required to determine claims from plaintiffs in 50 states plus the District of Columbia—such as whether a plaintiff conferred a benefit *directly* on defendants,[66] or whether the type of alleged misconduct satisfies a particular state's law,[67] or assessing compliance with different statutes of limitations[68]—would present significant manageability issues. Also, as plaintiffs concede, certain states preclude plaintiffs from maintaining an unjust enrichment claim if they have another available remedy at law.[69] These questions demand an individualized inquiry that will swamp the common questions. Because these variations exist and pose troubling case management obstacles, the court follows the rule recognized in *Thompson*. Exercising its discretion, the court denies plaintiffs' request to certify a nationwide class based on an unjust enrichment theory.

F. *Rule 23(b)(2)* Injunction Class

Plaintiffs also seek to certify an injunctive relief class under *Rule 23(b)(2)*. They make this request in addition to their requests that the court certify several *Rule 23(b)(3)* plaintiff classes to seek monetary damages. *See, e.g.*, Doc. 1353 at 2-3. Plaintiffs explain that the putative *Rule 23(b)(2)* plaintiff class seeks injunctive relief sufficient to restore consumer choice to the market and the natural competitive equilibrium that would exist but-for Mylan's decision to sell the EpiPen exclusively in the 2-Pak. Plaintiffs allege that selling the EpiPen exclusively in a 2-Pak has caused consumers to pay more to purchase EpiPens than they would have paid if they could have purchased EpiPens in a single dose. And, plaintiffs assert, they will continue to sustain injury as long as defendants continue to sell the EpiPen exclusively in the 2-Pak under the false pretext of medical necessity. In simple terms, plaintiffs ask the court to enjoin Mylan from selling the Epi-Pen exclusively in the 2-Pak.

HN65[] *Rule 23(b)(2)* allows a court to certify a class action if the requirements of *Rule 23(a)* are satisfied and "if the party **[*193]** opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole." *Fed. R. Civ. P. 23(b)(2)*.[70] The Tenth Circuit has explained that *Rule 23(b)(2)* "demands at the class certification stage plaintiffs

---

[66] *See, e.g.,* **[*192]** *Danny Lynn Elec. & Plumbing, LLC v. Veolia ES Solid Waste Se., Inc., No. 2:09cv192-MHT, 2011 U.S. Dist. LEXIS 78557, 2011 WL 2893629, at *6 (M.D. Ala. July 19, 2011)* (dismissing Alabama unjust enrichment claim because "the individual defendants enjoyed no *direct* benefit") (emphasis added)); *Mandarin Trading Ltd. v. Wildenstein, 16 N.Y.3d 173, 944 N.E.2d 1104, 1111, 919 N.Y.S.2d 465 (N.Y. 2011)* (holding that New York unjust enrichment claim failed because "the connection between the parties is too attenuated" and "the pleadings failed to indicate a relationship between the parties that could have caused reliance or inducement").

[67] *See, e.g., Bland v. Abbott Labs., Inc., No. 3:11-CV-430-H, 2012 U.S. Dist. LEXIS 1732, 2012 WL 32577, at *2 (W.D. Ky. Jan. 6, 2012)* (noting that a Kentucky unjust enrichment claim requires proof of defendants' bad faith and dismissing unjust enrichment claim for failing to allege bad faith); *Bimbo Bakeries USA, Inc. v. Pinckney Molded Plastics, Inc., No. 4:06-CV-180-A, 2007 U.S. Dist. LEXIS 19578, 2007 WL 836874, at *6 (N.D. Tex. Mar. 20, 2007)* (dismissing Texas unjust enrichment claim because a viable claim requires "some type of unlawful behavior" and there was no "evidence of fraud, duress, or undue advantage" to support the claim).

[68] An unjust enrichment claim in Kansas has a three year statute of limitations, *Kan. Stat. Ann. § 60-512*, and begins to run "when the enrichment becomes unjust[,]" ***Estate of Draper v. Bank of Am., N.A., 288 Kan. 510, 205 P.3d 698, 715 (Kan. 2009)*** (internal citation and quotation marks omitted). In contrast, an unjust enrichment claim in Michigan "accrues at the time the wrong upon which the claim is based was done regardless of the time when damage results," *Mich. Comp. Laws § 600.5827*, and the statute of limitations is six years, *Williams v. Chase Bank, No. 15-10565, 2015 U.S. Dist. LEXIS 98587, 2015 WL 4600067, at *4 (E.D. Mich. July 29, 2015)* (citing *Mich. Comp. Laws § 600.5813*)).

[69] *See, e.g., KLE Constr., LLC v. Twalker Dev., LLC, 2016 ND 229, 887 N.W.2d 536, 538 (N.D. 2016)* (including as one of the elements of a North Dakota unjust enrichment claim "the absence of a remedy provided by law"); *Freeman v. Sorchych, 226 Ariz. 242, 245 P.3d 927, 936 (Ariz. Ct. App. 2011)* (listing one of the elements of an Arizona unjust enrichment claims as "the absence of a remedy provided by law"); *Cantor Fitzgerald, L.P. v. Cantor, 724 A.2d 571, 585 (Del. Ch. 1998)* (reciting the elements of a Delaware unjust enrichment claim as including "the absence of a remedy provided by law").

describe in reasonably particular detail the injunctive relief they seek 'such that the district court can at least "conceive of an injunction that would satisfy [Rule 65(d)'s] requirements," as well as the requirements of Rule 23(b)(2).'" D.G. ex rel. Stricklin v. Devaughn, 594 F.3d 1188, 1200 (10th Cir. 2010) (quoting Shook v. Bd. of Cty. Comm'rs, 543 F.3d 597, 605 (10th Cir. 2008) (quoting Monreal v. Potter, 367 F.3d 1224, 1236 (10th Cir. 2004))).

Plaintiffs' Rule 23(b)(2) certification request here doesn't satisfy this requirement. Indeed, defendants oppose plaintiffs' request for certification of a Rule 23(b)(2) class for this very reason. They argue that plaintiffs never identify the specific declaratory or injunctive relief they seek or the legal authority under which they seek it.

Plaintiffs respond to defendants' argument by explaining that "the precise form of this injunctive relief will take shape as the Court rules on the Parties' forthcoming dispositive motions and at trial." Doc. 1837 at 54. As one example, plaintiffs suggest that the court **[*194]** could order defendants to add a label to the EpiPen that recites no medical necessity exists to sell the device in a 2-Pak. *Id.* at 54 n.228. This vague, partially formulated request for injunctive relief doesn't meet the standard for certification under Rule 23(b)(2).

HN66[] As our Circuit has explained, "*Federal Rule of Civil Procedure 65(d)* requires that injunctions be 'specific in terms' and 'describe in reasonable detail, and not by reference to the complaint or other document, the act or acts sought to be restrained.'" *Monreal, 367 F.3d at 1236* (quoting *Fed. R. Civ. P. 65(d)*). Here, plaintiffs' Rule 23(b)(2) certification request fails to describe the injunctive relief they seek with sufficient detail and, as a consequence, the court cannot determine whether classwide injunctive relief is appropriate under Rule 23(b)(2). *See id. at 1236* (affirming district court's refusal to certify at Rule 23(b)(2) class because plaintiffs didn't specify the type of injunctive relief they sought and the Circuit couldn't "conceive of an injunction that would satisfy [Rule 65(d)'s] requirements"); *see also In re YRC Worldwide, Inc. ERISA Litig., No. 09-2593-JWL, 2011 U.S. Dist. LEXIS 37270, 2011 WL 1303367, at *14 (D. Kan. Apr. 6, 2011)* (denying certification under Rule 23(b)(2) when plaintiffs didn't "identify any particular injunctive relief with sufficient specificity to enable the court to 'see how it might satisfy Rule 65(d)'s constraints and thus conform with Rule 23(b)(2)'s requirement'" **[*195]** (quoting *Shook, 543 F.3d at 605 n.4*)).

In short, plaintiffs have failed to shoulder their burden to show that Rule 23(b)(2) class certification is warranted. They haven't provided sufficient information for the court to conclude that "final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole." *Fed. R. Civ. P. 23(b)(2)*. The court thus exercises its discretion and denies plaintiffs' request to certify a Rule 23(b)(2) class.

V. Class Definitions

Consistent with its analysis above, the court certifies the two following classes under Rule 23(b)(3):

> **1. Nationwide RICO Damages Class ("RICO Class")**. All persons and entities in the United States who paid or provided reimbursement for some or all of the purchase price of Branded or authorized generic EpiPens for

---

[70] The Supreme Court has explained that "Rule 23(b)(2) applies only when a single injunction or declaratory judgment would provide relief to each member of the class." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 360, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. But Rule 23(b)(2) "does not authorize class certification when each individual class member would be entitled to a *different* injunction or declaratory judgment against the defendant," or "when each class member would be entitled to an individualized award of monetary damages." *Id. at 360-61*.

After *Dukes*, a "sort of hybrid certification" has "gain[ed] ground in class actions suits." *Ebert v. Gen. Mills, Inc., 823 F.3d 472, 480 (8th Cir. 2016)* (citing 2 William B. Rubenstein, *Newberg on Class Actions* § 4:38 (5th ed. 2019)); *see also West v. Cal. Servs. Bureau, Inc., 323 F.R.D. 295, 307 (N.D. Cal. 2017)* ("District courts may certify both a 23(b)(2) class for the portion of the case concerning injunctive and declaratory relief and a 23(b)(3) class for the portion of the case requesting monetary damages." (citing *Newberg on Class Actions* § 4:38)). Plaintiffs don't refer to this aspect of their certification motion as a request for a "hybrid" or "dual" class action under both Rule 23(b)(2) and 23(b)(3). But the court assumes that's what plaintiffs intended to do because they ask the court to certify several different classes under either Rule 23(b)(2) or 23(b)(3).

the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries, at any time between August 24, 2011, and [specific date to be inserted when class notice is finalized].[71]

2. State Antitrust Damages Class ("State Antitrust Class"). All persons and entities in the Antitrust States[72] who paid or provided reimbursement for some or all of the purchase price of Branded EpiPens at any time between January 28, 2013, **[*196]** and [specific date to be inserted when class notice is finalized], for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries.

The court excludes the following groups from each of the classes:

(a) Defendants and their officers, directors, management, employees, subsidiaries, and affiliates;

(b) Government entities, other than government-funded employee benefit plans;

(c) Fully insured health plans (*i.e.*, plans that purchased insurance that covered 100% of the plan's reimbursement obligations to its members);

(d) "Single flat co-pay" consumers who purchased EpiPens or generic EpiPens only via a fixed dollar co-payment that is the same for all covered devices, whether branded or generic (*e.g.*, $20 for all branded and generic devices);

(e) Consumers who purchased or received EpiPens or authorized generic equivalents only through a Medicaid program;

(f) All persons or entities who purchased branded or generic EpiPens directly from defendants;

(g) The judges in this case and members of their immediate families;

(h) All third-party payors who own or otherwise function as a Pharmacy Benefit Manager **[*197]** or control an entity who functions as a Pharmacy Benefit Manager; and

(i) Individual consumers whose only purchases of an EpiPen occurred before March 13, 2014 (the Generic Start Date).

The court appoints the named plaintiffs proposed as representatives in plaintiffs' Consolidated Class Action Complaint as class representatives for these two classes.

VI. Appointment of Class Counsel

HN67[] *Rule 23(g)(1)* requires that a court certifying a class must appoint class counsel. When making this appointment, the court "must consider: (i) the work counsel has done in identifying or investigating potential claims in the action; (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims

---

[71] As described above, *supra* Part IV.A. & n.7, plaintiffs' original certification motion proposed that the class period would run "until the effects of Defendants' unlawful conduct cease." *See, e.g.*, Doc. 1353 at 2-3. At oral argument, plaintiffs proposed to change this part of the class definitions to define the class period as ending on the date when class notice is given. The court adopts that change in the certified class definitions.

[72] As discussed above, *supra* note 52, the court cannot certify a class asserting antitrust violations under the laws of states where no plaintiff resides. So, the court redefines the "Antitrust States" from the definition proposed by plaintiffs to remove those states that have no named plaintiff. The court thus defines the "Antitrust States" to include: Alabama, California, Florida, Hawaii, Illinois, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New York, North Carolina, Tennessee, and Utah.

asserted in the action; (iii) counsel's knowledge of the applicable law; and (iv) the resources that counsel will commit to representing the class[.]" *Fed. R. Civ. P. 23(g)(1)(A)*. The court may appoint an applicant as class counsel "only if the applicant is adequate" under *Rule 23(g)(1)*'s criteria and if the applicant will adhere to *Rule 23(g)(4)*'s requirement that the applicant "fairly and adequately represent the interests of the class." *Fed. R. Civ. P. 23(g)(2)*.

Plaintiffs ask the court to appoint Warren T. Burns, Paul J. Geller, Lynn Lincoln Sarko, and Rex Sharp **[*198]** as class counsel. The court finds these attorneys have adequately prosecuted the interests of the classes since the court appointed them as co-lead counsel.[73] Aside from Mylan's conclusory statement that it is inappropriate to have the same counsel represent plaintiffs with different theories of injury and competing damage claims, defendants do not challenge their appointment as class counsel. After considering *Rule 23(g)*'s factors, the court finds that appointing these attorneys as co-lead counsel is warranted here. Also, the court appoints one more lawyer to the group representing plaintiffs as class counsel—Elizabeth C. Pritzker. Ms. Pritzker has served as Chair of plaintiffs' Steering Committee since the court appointed her in that role. The court thus appoints Warren T. Burns, Paul J. Geller, Lynn Lincoln Sarko, Rex Sharp, and Elizabeth C. Pritzker as co-lead counsel for the class plaintiffs.

VII. Notice

HN68[] When a court certifies a *Rule 23(b)(3)* class, *Rule 23(c)(2)(B)* provides "the court must direct to class members the best notice practicable under the circumstances, including individual notice to all members who can be identified through reasonable effort." Because plaintiffs have not proposed a form or manner of notice **[*199]** under this rule, the court defers its direction of notice to the certified classes. The court orders plaintiffs to submit to the court a proposed plan for notice to the class members consistent with *Rule 23(c)(2)(B)* **on or before March 31, 2020**. The plan must include a proposed form of notice.

IT IS THEREFORE ORDERED BY THE COURT THAT the plaintiffs' Motion for Class Certification (Doc. 1353) is granted in part and denied in part. The court certifies a nationwide RICO damages class and a state antitrust damages class under *Rule 23(b)(3)*, as set forth in this Order. The court denies the motion in all other respects.

IT IS FURTHER ORDERED THAT defendants' Motion for Leave to File a Sur-reply (Doc. 1574) is granted. The court orders defendants to file their proposed Sur-reply (Doc. 1574-1) as a separate docket entry. Also, the court orders plaintiffs to file their proposed Response to Defendants' Sur-reply (Doc. 1579-1) as a separate docket entry.

IT IS FURTHERED ORDERED THAT plaintiffs must submit a proposed plan for notice to the class members consistent with *Rule 23(c)(2)(B)* **on or before March 31, 2020. IT IS SO ORDERED**.

Dated this 27th day of February, 2020, at Kansas City, Kansas.

Opinion

REPORT AND RECOMMENDATION

TO THE HONORABLE PAUL G. GARDEPHE, U.S.D.J.:

In this *pro se* action, plaintiff Matthew Hannan ("Plaintiff") invokes federal, state, and local law to challenge his eviction from the New York City apartment where he had been residing. Specifically, in his Complaint, Plaintiff invokes *42 U.S.C. § 1983* ("*Section 1983*"); the *Federal Trade Commission Act*, *15 U.S.C. § 41, et seq.* (the "FTCA"); the *Fair Housing Act*, *42 U.S.C. § 3601, et seq.*, (the "FHA"); the *Rehabilitation Act of 1973*, *29 U.S.C. § 701 et seq.* (the "Rehab Act"); the New York State Constitution; *New York Real Property Actions Law § 713* ("*Section 713*"), and the New York City Administrative Code *§ 26-521* ("*Section 26-521*"). Currently before the Court is a motion by three of the named defendants, Amy Rose ("Rose"), Kevin Rodrigues ("Rodrigues"), and Yamile Zarzuela ("Zarzuela") (all associated **[*2]** with Rose Associates, Inc. ("Rose Associates") and, collectively, for purposes of this Report and Recommendation, the "Moving Defendants" or "Defendants"),[1] to dismiss all of Plaintiff's claims against them pursuant to *Rules 12(b)(1)* or *12(b)(6) of the Federal Rules of Civil Procedure*. (Dkt. 31.) Also before the Court is a submission filed by Plaintiff as a "Motion for Summary Judgment" (Dkt. 42) which, for reasons discussed below, will be treated as an opposition to Defendants' motion to dismiss.

Based on its review of the parties' submissions, this Court first concludes, with respect to the arguments raised by Defendants related to subject matter jurisdiction, that the Court is not barred by the *Rooker-Feldman* doctrine from reviewing Plaintiff's claims. This Court does find, however, that Plaintiff lacks standing to assert his claim under the FTCA, requiring the dismissal of that claim with prejudice. This Court also understands Defendants to be challenging Plaintiff's FHA claim for lack of standing, but recommends that Plaintiff be allowed to proceed on that claim.

With respect to the Moving Defendants' alternative argument that Plaintiff has failed to state claims against them upon which relief may be granted, this Court finds that **[*3]** some, but not all, of Plaintiff's remaining claims are defectively pleaded, and that, as to the pleading defects, some, but not all, could potentially be cured by amendment. Specifically, for the reasons discussed below, I recommend (1) that Plaintiff's *Section 713* claim be dismissed for failure to state a claim, and, further, that this claim be dismissed with prejudice, as amendment would be futile; (2) that Plaintiff's *Section 1983* and state constitutional claims also be dismissed, either as non-cognizable or as insufficiently pleaded, but that Plaintiff be afforded an opportunity to replead certain of those claims, if facts exist that would enable him to remedy their deficiencies; and (3) that Defendants' motion to dismiss Plaintiff's claims under the Rehab Act and *Section 26-521* be denied.

BACKGROUND

A. **Factual Background**

The following facts are taken from the Complaint and are presumed to be true for purposes of this motion:

Plaintiff is "a homosexual male [] who suffers from HIV and has a disability." (Complaint, dated Oct. 25, 2018 ("Compl.") (Dkt. 2) ¶ 4.) On February 1, 2018, Plaintiff moved into an apartment in Henry Hall, on West 38th Street in Manhattan, with his friend Jimmie Orr ("Orr"), who was the "tenant **[*4]** of record" for the apartment. (*Id.* ¶¶ 6, 20.) Henry Hall was managed by Rose Associates, which provided leasing, building management, security, and eviction services for the building. (*Id.* ¶ 15.) During the relevant time period, Henry Hall received certain government funding for providing low-income housing. (*See id.* ¶¶ 5, 12.) As noted above, the Moving Defendants are each affiliated with Rose Associates: according to Plaintiff, Rose is its CEO; Rodrigues serves as one of its "security guards," and Zarzuela acts as its Senior Low-Income Housing Tax Credit Compliance Administrator. (Compl. ¶¶ 12-13, 17.)

During his time at Henry Hall, Plaintiff had his own keys to the apartment he shared with Orr, and he paid Orr rent in the amount of $700 per month. (Compl. ¶ 21; Plaintiff's Declaration [titled by Plaintiff as an "Affidavit," even though

---

[1] In his original Complaint, Plaintiff named a number of other defendants, including Maria Torres-Springer ("Torres-Springer"), in her official capacity as the Commissioner of the New York City Department of Housing Preservation and Development. (*See* Dkt. 2.) By Order dated November 13, 2018, the Court dismissed Plaintiffs claims against Torres-Springer and certain of the other originally named defendants and directed that the City of New York (the "City") be substituted as a defendant for the City agency. (*See* Dkt. 13.) The Court also directed Rose Associates, which it understood to have been the employer of certain security guards listed by Plaintiff as "Doe" defendants, to identify those security guards, so that their full names could be included in the caption. (*See id.*) Neither Plaintiff's claims against the City, nor his potential claims against the security guards, are directly implicated in the motion to dismiss that is currently pending before the Court.

unsworn] in Support of Complaint, dated Nov. 2, 2018 ("Pl. Decl.") (Dkt. 9) ¶ 2.)[2] On the date of his move-in or shortly thereafter, Plaintiff, along with Orr, registered with the "security guards" at Henry Hall by "presenting an ID, taking a photo and signing his name." (Compl. ¶ 22.) Plaintiff asserts that this process accorded him status "as a legal **[*5]** resident of the building." (*Id.*) Plaintiff also moved in his own furniture, with help from building maintenance personnel. (*Id.* ¶ 23.)

Plaintiff alleges that, "[t]owards the end of February, 2018," the "security guards" of Henry Hall began to "harass" him, by barring him from facilities like the gym, rejecting his mail, and "screen[ing]" him as a guest, only allowing him entrance with Orr's permission. (*Id.* ¶¶ 26-27.) Around this same time, Plaintiff alleges that "the Landlord started to have talks with [] Orr to add [Plaintiff] to the lease." (Pl. Decl. ¶ 12.) Thereafter, on March 7, 2018, Zarzuela sent a letter to Orr, stating that it had come to Rose Associates' attention that, "[s]ince the time [Orr] ha[d] moved in to Henry Hall, [Plaintiff] ha[d] been residing in [Orr's] unit"; that, "[a]s a participant in the Low Income Housing program, it [was] a requirement under [Orr's] lease that all adult household members be certified"; that, for his "initial certification," Orr had "signed documentation indicating that [he was] the only household member"; that the provision of "false information" was considered a breach of the lease; that Plaintiff was required to "vacate **[*6]** immediately"; and that, if Plaintiff failed to vacate the apartment, this would also be considered a breach of the lease. (*See* Compl. ¶ 28 (quoting letter in part); *see also* Plaintiff's Memorandum of Laws in Support of Motion for Summary Judgme[n]t Against Rose Associates Defendants, dated Mar. 25, 2019 ("Pl. Mem.") (Dkt. 43) (attaching copy of letter[3]).)

It is not clear from the Complaint what, if anything, transpired in the 10 days between March 7, 2018 and March 17, 2018, but, on the latter date, Plaintiff alleges that he received a phone message from Orr stating that Rose Associates "didn't want [Plaintiff] back in [the apartment]." (Pl. Decl. ¶ 23.) Plaintiff went to the building to retrieve his belongings, but he was "kept from entering the building by the security guards" and was "escorted out of the building," with a security guard allegedly stating that, if Plaintiff did not leave, he would "drag [Plaintiff] out . . . and get [him] arrested." (Compl. ¶¶ 30-31.) Orr permitted Plaintiff to pick up some items from the apartment on the morning of March 18, 2018 (*id.* ¶ 33), and Plaintiff has been out of the apartment since that time (*id.* ¶ 34), except that he was **[*7]** permitted to retrieve his remaining belongings "almost seven months later" (*id.* ¶ 44). Plaintiff alleges that he "tried to come back to the building several times after the lockout[,] but was not allowed entry by the security guards." (*Id.* ¶ 57.)

B. Procedural History

1. Plaintiff's Housing Court Action

After Plaintiff was prohibited from occupying the apartment at Henry Hall, he commenced an action in the Housing Part of the New York City Civil Court, New York County (the "Housing Court Action"), where he asserted a claim to possession of the apartment and of the right to enter to retrieve his belongings. (*Id.* ¶ 60.) On July 26, 2018, Plaintiff attended a hearing on his claims, but, according to him, he "didn't have key evidence to prove his residence for the

---

[2] Consistent with its obligation to construe *pro se* pleadings liberally (*see* Discussion, *infra*, at Section I(B)), this Court will consider as true, for purposes of the pending motion to dismiss, the factual allegations contained in submissions that Plaintiff apparently intended to augment or clarify his Complaint.

[3] After Defendants submitted a purportedly true and correct copy of this letter in support of their motion to dismiss (*see* Declaration of Yamile Zarzuela in Support of Rose Associates Defendants' Motion To Dismiss Plaintiff's Complaint, dated Mar. 6, 2019 ("Zarzuela Decl.") ¶ 7 and Ex. B thereto), Plaintiff submitted a different version of the same letter (Pl. Mem., at the page numbered "15" by the Court's Electronic Case Filing ("ECF") system (*i.e.*, "ECF 15")), and argued that Defendants' submitted version was "false and forged" (*id.*, at 2). The distinction between the two versions of this letter is that the one submitted by Defendants refers to Plaintiff only as Orr's "guest," while the one submitted by Plaintiff refers to him by name. (*Compare* Zarzuela Decl, Ex. B., *with* Pl. Mem., at ECF 15.)

period required for statutory rights under State and City laws." (*Id.* ¶¶ 60-61.) At some point thereafter, Housing Court Judge Anne Katz issued an undated Decision and Order rejecting Plaintiff's request for possession of the apartment, noting that Plaintiff had not properly served Orr with process and that "the landlord . . . had nothing to do w[ith] either the letting or the alleged lockout." (*Id.; see also* Declaration of Felice **[*8]** B. Ekelman, Esq., in Support of Rose Associates Defendants' Motion To Dismiss Plaintiff's Complaint, dated Mar. 11, 2019 ("Ekelman Decl.") (Dkt. 33), Ex. E (the "Housing Court Order") (Dkt. 33-5).) While Plaintiff apparently took steps to appeal that Order prior to commencing this suit (*see* Compl. ¶ 63), he now asserts that he "procedurally abandoned [his] appeal by purposely failing to perfect it by the deadline" (Letter to the Court from Plaintiff, dated May 6, 2019 ("Plaintiff's 5/6/19 Ltr.") (Dkt. 62) at 2).

2. The Current Action and Motions Before the Court

On October 25, 2018, Plaintiff filed the Complaint in this action. (Compl.) Although Plaintiff's Complaint is not entirely clear as to which claims Plaintiff is asserting against which defendants, it appears that, with respect to the Moving Defendants, Plaintiff is alleging (1) that Defendants' conduct in evicting him from Henry Hall and not permitting him to regain occupancy of the apartment there, or to recover his belongings, violated a number of his federal constitutional rights, giving him a right of action against them under *Section 1983* (*see id.* ¶¶ 74-75 (alleging that Defendants' conduct "amounted to malicious abuse of process, failure **[*9]** to intervene, unreasonable search and seizure, abuse of authority, unlawful taking of private property, pattern of harassment, conspiracy, discrimination, selective enforcement, fabrication of evidence, denial of equal protection of the laws, denial of right to a fair trial, denial of due process rights [] and malicious prosecution," in "violat[ion] [of] [P]laintiff's rights under *42 U.S.C. § 1983* and the *First*, *Fourth* and *Fourteenth Amendments*")); (2) that, in evicting him from Henry Hall, Defendants discriminated against him based on family size, gender, and disability, in violation of the Rehab Act and the FHA (*id.* ¶ 81); (3) that he was subjected to violations of certain provisions of *Article 1 of the New York State constitution*, including the sections "prohibiting cruel and unusual punishment[]," "providing for due process," "guaranteeing freedom of speech," "prohibiting discrimination in civil rights and providing for equal protection of laws," and "prohibiting unreasonable searches [and] seizures" (*id.* ¶ 83); (4) that he was evicted without a court order after occupying a dwelling unit for more than 30 days, in violation of *Section 26-521* (*id.* ¶ 87); (5) that Defendants failed to provide him with "a 10-day Notice to Quit," in violation of *Section 713* (*id.*); and (6) that Defendants falsely **[*10]** advertised that their business "generously contribut[es] to society . . . [but] in all actuality injures its residents," in violation of *Section 45 of the FTCA* (*id.* ¶ 92).[4]

On November 2, 2018, Plaintiff filed a so-called "Related Case Statement" (Dkt. 10), apparently to inform the Court that this case is "related" to the action he had previously filed in the Housing Court (*see id.*, at 2 (identifying the Housing Court Action as "the illegal lockout case that is being discussed in the Complaint and the basis for this new case")).

On March 11, 2019, the Moving Defendants timely filed a motion to dismiss Plaintiff's claims against them pursuant to *Rules 12(b)(1)* or *12(b)(6) of the Federal Rules of Civil Procedure*. (*See* Memorandum of Law in Support of Defendants' Motion To Dismiss Plaintiff's Complaint, dated Mar. 11, 2019 ("Def. Mem.") (Dkt. 32).) Defendants argued in their motion that (1) the Court should dismiss Plaintiff's claims pursuant to the *Rooker-Feldman* doctrine, as the Housing Court had determined that Plaintiff was not a tenant; and (2) in any event, Plaintiff's allegations against them fail to state a plausible claim for relief because he was not a tenant, and because the FTCA does not afford Plaintiff a private right of action. (*Id.*) In support of their motion, **[*11]** Defendants submitted, *inter alia*, a copy of the Order to Show Cause filed by Plaintiff in the Housing Court Action and a copy of the Order entered by Judge Katz in that action. (*See* Ekelman Decl., Ex. D; Housing Court Order.) Defendants also submitted a Declaration from Zarzuela, attaching a copy of Orr's lease for the apartment, as well as an unsigned copy of the letter purportedly sent by Defendants to Orr on March 7, 2018, informing Orr that Plaintiff would have to vacate the

[4] On the same day that he filed his Complaint, Plaintiff also filed a "Motion for Emergency Preliminary Monetary Substitution Injunction," seeking payment of $45,000, purportedly to finance this litigation. (Dkts. 3-4, 7-8.) That motion was denied by the Court on November 20, 2018. (*See* Dkt. 15.)

apartment. (*See* Zarzuela Decl., Exs. A-B; *see also supra*, at n.3.) Defendants also duly filed proof that they had served Plaintiff with the Notice required under *Local Civil Rule 12.1*, to advise him that, as they had submitted evidence outside the pleadings in connection with their motion, the Court could convert the motion to one for summary judgment, under *Rule 56 of the Federal Rules of Civil Procedure*. (*See* Dkt. 35.)

On March 25, 2019, Plaintiff responded to Defendants' motion by making certain submissions that he characterized as a motion for summary judgment against Defendants. (*See* Plaintiff's Notice and Affirmation in Support of Motion for Summary Judgme[n]t Against Rose Associates Defendants, dated Mar. 25, 2019 ("Pl. Notice") (Dkt. 42); Pl. Mem. (Dkt. 43); Witness **[*12]** Affidavit [of Mickey Barreto] in Support of Motions, sworn to Mar. 26, 2019 (Dkt. 47).) In those submissions, Plaintiff argued, *inter alia*, that (1) he was a tenant because he had resided in the apartment at Henry Hall for more than 30 days, and therefore could not be evicted without due process; and (2) that Defendants had acted under color of law when they barred him from returning to Henry Hall. (*See generally id.*)

Treating Plaintiff's submissions as an opposition to their motion to dismiss, Defendants filed a reply on May 3, 2019, noting that Plaintiff had not contested application of the *Rooker-Feldman* doctrine, or that he lacked a private right of action to bring a claim under the FTCA, and reiterating their arguments regarding Plaintiff's status as a non-tenant. (*See* Reply Memorandum of Law in Further Support of Defendants' Motion To Dismiss Plaintiff's Complaint, dated May 3, 2019 ("Def. Reply") (Dkt. 60).) Defendants also stated that they presumed the Court would treat Plaintiff's "motion" as an opposition to their motion to dismiss. (*Id.*)

On May 6, 2019, Plaintiff filed a letter requesting an opportunity to submit a response to Defendants' reply brief and insisting that his **[*13]** motion be treated as one for summary judgment. (Plaintiff's 5/6/19 Ltr., at 1-2.) In that letter, Plaintiff also asserted that the *Rooker-Feldman* doctrine does not apply because the Housing Court "[didn't] even have the jurisdiction for the relief I am asking in this Court," and he had abandoned his appeal of the Housing Court Action. (*Id.*, at 2.) Plaintiff also asserted that he had not raised constitutional claims in the Housing Court Action. (*Id.*) On May 9, 2019, Defendants filed a response to Plaintiff's letter, asserting that, if Plaintiff's opposition were treated as a motion for summary judgment, then it should be denied for certain procedural deficiencies, and that Defendants' motion to dismiss should be granted as unopposed. (Letter to the Court from Felice B. Ekelman, Esq., dated May 9, 2019 (Dkt. 63).)

On June 5, 2019, this Court held a conference with Plaintiff and counsel for all parties present, in order to clarify the various filings on the Docket. (*See* Transcript of June 5, 2019 conference (Dkt. 68).) During that conference, this Court explained to Plaintiff the distinction between a motion to dismiss and a motion for summary judgment (*id.*, at 3-6), and, in light of that explanation, **[*14]** asked Plaintiff if he wished for his briefing to be treated as responsive to the motion to dismiss (*id.*, at 10-11). Plaintiff said that he did (*id.*), and this Court informed the parties that it would recommend to Judge Gardephe that he treat the submissions at Dockets 31-35, 42-43, 47, and 60-63 as constituting a fully-briefed motion to dismiss (*see id.* at 14-15).

On July 9, 2019, Plaintiff filed a document that was titled a "reply" in support of Plaintiff's "motion for summary judgment" (Dkt. 67), but that appears to be an unsigned, undated version of the same memorandum of law that Plaintiff had filed in March (*compare id.* with Pl. Mem.). Thereafter, Defendants' motion to dismiss, together with Plaintiff's submissions, were referred to this Court by Judge Gardephe for a report and recommendation. (Dkt. 67.)

DISCUSSION

I. APPLICABLE LEGAL STANDARDS

A. *Rule 12(b)(1)*

1. Subject Matter Jurisdiction

An action should be dismissed pursuant to *Rule 12(b)(1)* where it is apparent that the court lacks subject matter jurisdiction to hear the case. *See* *Fed. R. Civ. P. 12(b)(1)*; *Thomas v. Metro. Correction Ctr., No. 09cv1769 (PGG), 2010 U.S. Dist. LEXIS 61457, 2010 WL 2507041, at *1 (S.D.N.Y. June 21, 2010)* ("A claim is properly dismissed for lack of subject matter jurisdiction under *Rule 12(b)(1)* when the district court lacks the statutory or constitutional power to **[*15]** adjudicate it." (citation omitted)). "A plaintiff asserting subject matter jurisdiction has the burden of proving by a preponderance of the evidence that it exists." *Makarova v. United States, 201 F.3d 110, 113 (2d Cir. 2000)*. A district court must consider a challenge to subject matter jurisdiction before addressing other grounds for dismissal. *Rhulen Agency, Inc. v. Alabama Ins. Guaranty Ass'n, 896 F.2d 674, 678 (2d Cir. 1990)*.

While, on a *Rule 12(b)(1)* motion, a court should accept all material factual allegations in the complaint as true, the court is "not to draw inferences from the complaint favorable to plaintiffs" on such a motion. *J.S. ex rel. N.S. v. Attica Cent. Sch., 386 F.3d 107, 110 (2d Cir. 2004)*. Further, in reviewing a motion under *Rule 12(b)(1)*, a court may consider evidence outside of the pleadings to resolve disputed factual issues relating to jurisdiction. *See* *Malik v. Meissner, 82 F.3d 560, 562 (2d Cir. 1996)* (citing *Zappia Middle E. Constr. Co. Ltd. v. Emirate of Abu Dhabi, 215 F.3d 247, 253 (2d Cir. 2000))*; *see also* *Martinez v. Riverbay Corp., No. 16cv547 (KPF), 2016 U.S. Dist. LEXIS 138411, 2016 WL 5818594, at *3 (S.D.N.Y. Oct. 4, 2016)* ("where subject matter jurisdiction is contested, a district court is permitted to consider evidence outside the pleadings, such as affidavits and exhibits").

2. The *Rooker-Feldman* Doctrine

Under the *Rooker-Feldman* doctrine, which is based on Supreme Court holdings in *Rooker v. Fidelity Trust Co., 263 U.S. 413, 44 S. Ct. 149, 68 L. Ed. 362 (1923)* and *District of Columbia Court of Appeals v. Feldman, 460 U.S. 462, 103 S. Ct. 1303, 75 L. Ed. 2d 206 (1983)*, federal district courts lack subject matter jurisdiction over cases "brought by state-court losers complaining of injuries caused by state-court judgments rendered before the district court proceedings commenced and **[*16]** inviting district court review and rejection of those judgments." *Exxon Mobil Corp. v. Saudi Basic Indus. Corp., 544 U.S. 280, 284, 125 S. Ct. 1517, 161 L. Ed. 2d 454 (2005)*. In contrast, the *Rooker-Feldman* doctrine does not deprive a federal court of jurisdiction where the plaintiff "present[s] some independent claim, albeit one that denies a legal conclusion that a state court has reached in a case to which he was a party." *Id. at 293* (citation omitted). In such a case, jurisdiction exists, and "state law determines whether the defendant prevails under principles of preclusion." *Id.*

Thus, "the applicability of the *Rooker-Feldman* doctrine turns not on the *similarity* between a party's state-court and federal-court claims . . . but rather on the *causal relationship* between the state-court judgment and the injury of which the party complains in federal court." *McKithen v. Brown, 481 F.3d 89, 97-98 (2d Cir. 2007)* (emphasis in original). "[A] federal suit complains of injury from a state-court judgment," and thus falls within the *Rooker-Feldman* doctrine, even where the federal suit "appears to complain only of a third party's actions," as long as "the third party's actions are produced by [the] state-court judgment and not simply ratified, acquiesced in, or left unpunished by it." *Hoblock v. Albany Cty. Bd. of Elections, 422 F.3d 77, 88 (2d Cir. 2005)*; *see* *Gabriele v. Am. Home Mortg. Servicing, Inc., 503 F. App'x 89, 92 (2d Cir. 2012)* (Summary Order) (citing *Hoblock*).

3. Standing

"The doctrine of standing **[*17]** asks whether a litigant is entitled to have a federal court resolve his grievance. This inquiry involves both constitutional limitations on federal-court jurisdiction and prudential limits on its exercise." *United States v. Suarez, 791 F.3d 363, 366 (2d Cir. 2015)* (internal quotation marks and citation). To establish constitutional standing, a plaintiff must show that he has (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision. *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)* (citing *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*. The requisite "injury in fact" is "an invasion of a legally protected interest which is (a) concrete and particularized[;] . . . and (b) actual or imminent, not conjectural or hypothetical." *Lujan, 504 U.S. at 560* (internal quotation marks and citations omitted). Where a statute creates private rights, the violation of those rights may constitute an injury in fact sufficient to confer standing. *See* [Spokeo, 136 S. Ct. at 1549](). Conversely, a plaintiff lacks standing to assert a claim under a statute that does not afford a private right of action. *See* [Naylor v. Case & McGrath, Inc., 585 F.2d 557, 561 (2d Cir. 1978)]().

The plaintiff bears the burden of establishing the elements of standing, [Spokeo, 136 S. Ct. at 1547]() (citation omitted), and, "at the pleading stage, the plaintiff must 'clearly . . . allege facts demonstrating' **[*18]** each element," *id.* (quoting [Warth v. Seldin, 422 U.S. 490, 518, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)]()). "A motion to dismiss a complaint for lack of standing is properly brought pursuant to [Rule 12(b)(1)]() . . . because it relates to the court's subject matter jurisdiction." [ED Capital, LLC v. Bloomfield Inv. Res. Corp., 155 F. Supp. 3d 434, 446 (S.D.N.Y. 2016)](), *aff'd in part, vacated in part*, [660 F. App'x 27 (2d Cir. 2016)]().

B. *Rule 12(b)(6)*

A complaint may be dismissed pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* where it fails to state a claim upon which relief can be granted. *Fed. R. Civ. P. (12)(b)(6)*. In deciding a motion to dismiss, the Court must "accept as true all factual statements alleged in the complaint and draw all reasonable inferences in favor of the non-moving party." *McCarthy v. Dun & Bradstreet Corp., 482 F.3d 184, 191 (2d Cir. 2007)*; *accord* *Jaghory v. New York State Dep't of Ed., 131 F.3d 326, 329 (2d Cir. 1997)*. The issue is not whether the plaintiff will ultimately prevail, but whether his claim, as pleaded, is sufficient to afford him the opportunity to proceed on the evidence. *See* *Chance v. Armstrong, 143 F.3d 698, 701 (2d Cir. 1998)*.

Thus, the court's function on a motion to dismiss is "not to weigh the evidence that might be presented at trial but merely to determine whether the complaint itself is legally sufficient." *Kopec v. Coughlin, 922 F.2d 152, 155 (2d Cir. 1991)* (citation omitted). At the same time, "conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to defeat a motion to dismiss." *Achtman v. Kirby, McInerney, & Squire, LLP, 464 F.3d 328, 337 (2d Cir. 2006)* (citation omitted). To survive a motion to dismiss, a complaint "must contain sufficient factual matter, accepted **[*19]** as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Starr v. Sony BMG Music Entm't, 592 F.3d 314, 321 (2d Cir. 2010)* (quoting *Iqbal, 556 U.S. at 666*), *cert. denied*, *562 U.S. 1168, 131 S. Ct. 901, 178 L. Ed. 2d 803 (2011)*.

Additionally, "[i]t is well established that the submissions of a *pro se* litigant must be construed liberally and interpreted 'to raise the strongest arguments that they suggest.'" *Triestman v. Fed. Bureau of Prisons, 470 F.3d 471, 474 (2d Cir. 2006)* (collecting cases); *see also* *Hughes v. Rowe, 449 U.S. 5, 9-10, 101 S. Ct. 173, 66 L. Ed. 2d 163 (1980)* (noting that a *pro se* party's pleadings must be liberally construed in his favor and are held to a less stringent standard than the pleadings drafted by lawyers); *Harris v. Mills, 572 F.3d 66, 72 (2d Cir. 2009)* ("Even after *Twombly*, . . . we remain obligated to construe a *pro se* complaint liberally."); *Lerman v. Board of Elections, 232 F.3d 135, 139-40 (2d Cir. 2000)* ("Since most *pro se* plaintiffs lack familiarity with the formalities of pleading requirements, [a court] must construe *pro se* complaints liberally, applying a more flexible standard to evaluate their sufficiency."). This is especially true in the context of civil rights complaints. *See* *Weinstein v. Albright, 261 F.3d 127, 132 (2d Cir. 2001)*; *see also* *Gregory v. Daly, 243 F.3d 687, 691 (2d Cir. 2001)* (noting that a court must be "mindful of the care exercised in this Circuit to avoid hastily dismissing complaints of civil rights violations"). **[*20]**

On a motion to dismiss a complaint, while a court is generally constrained to look only to the pleadings, *see* *Fed. R. Civ. P. 12(b)*; *Calcutti v. SBU, Inc., 273 F. Supp. 2d 488, 492 (S.D.N.Y. 2003)*, "the mandate to read the papers of *pro se* litigants generously makes it appropriate to consider plaintiff's additional materials, such as his opposition memorandum" to supplement the allegations in the complaint, *Burgess v. Goord, No. 98cv2077 (SAS), 1999 U.S. Dist. LEXIS 611, 1999 WL 33458, at *1 n.1 (S.D.N.Y. Jan 26, 1999)* (internal quotation marks and citations omitted); *see also, e.g.,* *Samuels v. Fischer, 168 F. Supp. 3d 625, 645 n.11 (S.D.N.Y. 2016)* (finding, in resolving motion to dismiss, that it was "appropriate to consider allegations contained in [p]laintiff's [o]pposition"); *Goldson v. Kral,* Clerkin, Redmond, Ryan, Perry, & Van Etten, LLP, No. 13cv2737 (GBD) (FM), 2014 U.S. Dist. LEXIS 95668, 2014 WL 4061157, at *3 (S.D.N.Y. July 11, 2014) (amended report and recommendation) ("When a plaintiff is proceeding *pro se*, the Court also may rely on any opposition papers in assessing the legal sufficiency of the plaintiff's claims"), *adopted by*, 2014 U.S. Dist. LEXIS 112291, 2014 WL 3974584 (Aug. 13, 2014); Sommersett v. City of New York, No. 09cv5916 (LTS), 2011 U.S. Dist. LEXIS 71357, 2011 WL 2565301, at *3 (S.D.N.Y. June 28, 2011) ("[W]here a *pro se* plaintiff has submitted other papers to the [c]ourt, such as legal memoranda, the [c]ourt may consider statements in such papers to supplement or clarify the plaintiff's pleaded allegations.").

Although courts have not followed this approach in every case, *see, e.g.,* Brunson v. Duffy, No. 12cv9465 (KBF), 2015 U.S. Dist. LEXIS 29015, at *4 (S.D.N.Y. Mar. 6, 2015) **[*21]** (citing *pro se* cases where courts declined to consider new facts included in opposition), it is certainly true that the papers submitted by a *pro se* plaintiff in opposition to a Rule 12(b)(6) motion may offer clarification or context that can aid the Court in understanding the plaintiff's pleading and in affording it a liberal construction, *see id.*, at n.4 (noting that "a district court needs to assess each case on an individual basis"). Especially in the civil rights context, where courts should act with particular care before dismissing a plaintiff's complaint, taking the step of examining a *pro se* plaintiff's opposition papers to see if they shed light on his initial allegations "is consistent with the principle that a court may not dismiss a *pro se* complaint unless it is beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief," Johnson v. Wright, 234 F. Supp. 2d 352, 356 (S.D.N.Y. 2002) (internal quotation marks and citation omitted).

Rule 12(d) of the Federal Rules of Civil Procedure governs situations in which "matters outside the pleadings" are presented to the court on a motion to dismiss pursuant to Rule 12(b)(6). Fed. R. Civ. P. 12(d). "Pursuant to Rule 12(d), the Court must determine whether the newly presented documents are (1) part of the pleadings such that the Court may **[*22]** consider them as part of the instant motion; (2) not part of the pleadings such that the documents should be excluded in deciding [the] motion to dismiss; or (3) not part of the pleadings but should be considered by converting the instant motion to dismiss to one for summary judgment." Madu, Edozie & Madu, P.C. v. SocketWorks Ltd. Nig., No. 07cv11028 (PKL), 265 F.R.D. 106, 122 (S.D.N.Y. 2010). Where a party presents materials outside the pleadings, "it is within the Court's "discretion . . . to convert a motion filed under Fed. R. Civ. P. 12(b)(6) into one seeking summary judgment," or to disregard the outside material and treat the motion as one under Rule 12(b)(6). Aetna Cas. & Surety Co. v. Aniero Concrete Co., 404 F.3d 566, 573 (2d Cir. 2005) (internal quotation marks and citation omitted).

C. Amendment of Pleadings

Under Rule 15 of the Federal Rules of Civil Procedure, a district court should "freely give leave to amend when justice so requires." Fed. R. Civ. P. 15(a)(2). Further, as a general matter, a court should not dismiss claims asserted by a *pro se* plaintiff for failure to state a claim without granting at least one opportunity for the plaintiff to amend the complaint to cure any pleading defects. Cuoco v. Moritsugu, 222 F.3d 99, 112 (2d Cir. 2000) (holding that district courts "should not dismiss [a *pro se* complaint] without granting leave to amend at least once when a liberal reading of the complaint gives any indication that a valid claim might **[*23]** be stated." (quoting Gomez v. USAA Fed. Sav. Bank, 171 F.3d 794, 795 (2d Cir. 1999))). "Where an amendment would be futile, however, leave to amend is not required." Brodsky v. Carter, No. 15cv3469 (GBD) (DF), 2015 U.S. Dist. LEXIS 169104, 2015 WL 13746671, at *13 (S.D.N.Y. Dec. 15, 2015) (citing Hill v. Curcione, 657 F.3d 116, 123-24 (2d Cir. 2011)), *report and recommendation adopted sub nom*. Brodsky v. New York City Campaign Fin. Bd., No. 15cv03469 (GBD) (DF), 2016 U.S. Dist. LEXIS 40461, 2016 WL 1258986 (Mar. 28, 2016), *aff'd sub nom.* Brodsky v. Carter, 673 F. App'x 42 (2d Cir. 2016). An amendment or supplement to a pleading is considered futile when the proposed new claim "could not withstand a motion to dismiss pursuant to Rule 12(b)(6)" of the Federal Rules of Civil Procedure. Dougherty v. Town of N. Hempstead Bd. of Zoning Appeals, 282 F.3d 83, 88 (2d Cir. 2002).

II. DEFENDANTS' MOTION TO DISMISS

A. *Rule 12(b)(1)*

1. The *Rooker-Feldman* Doctrine Does Not Deprive This Court of Jurisdiction Over Plaintiff's Claims.

The Moving Defendants' principal argument in support of their assertion that the Court lacks subject matter jurisdiction over Plaintiff's claims is that the claims are barred by the *Rooker-Feldman* doctrine. (Def. Mem., at 8-9.) The Second Circuit has articulated four requirements which must be met for that doctrine to apply: (1) the plaintiff must have lost in state court; (2) the plaintiff must complain of injuries caused by the state court's judgment; (3) the plaintiff must "invite district court review and rejection of that judgment"; and (4) the state court judgment must have been rendered before **[*24]** plaintiff brought suit in district court. *Hoblock, 422 F.3d at 85* (citing *Exxon Mobil*).

In support of their argument that *Rooker-Feldman* applies here, Defendants have attached the Housing Court Order, which the Court may consider in determining whether it has jurisdiction over the claims in this case. *Martinez, 2016 U.S. Dist. LEXIS 138411, 2016 WL 5818594, at *3*. Plaintiff acknowledges that he lost his Housing Court case (*see* Compl. ¶¶ 60-63), and he effectively concedes that the judgment entered against him by that court occurred prior to the commencement of this action (*see id.* ¶ 63). The question remains, however, whether Plaintiff is "complain[ing] of injuries caused by" the state court judgment and is "invit[ing] district court review and rejection of th[at] judgment." *Hoblock, 422 F.3d at 85*.

Defendants argue that the Housing Court Action and this action are "inextricably intertwined," such that this Court's consideration of the claims that Plaintiff has asserted here would constitute an improper review (and possible rejection) of a state court judgment. (Def. Mem., at 8.) This argument is unpersuasive, as it misapprehends the current state of the law and ignores the import of *Exxon Mobil*. Specifically, the Court notes that Defendants principally rely on *Moccio v. New York State Office of Court Admin., 95 F.3d 195, 199 (2d Cir. 1996)*, in which the Second Circuit **[*25]** held that "at a minimum, where a federal plaintiff had an opportunity to litigate a claim in a state proceeding . . . subsequent litigation of the claim will be barred under the *Rooker-Feldman* doctrine if it would be barred under the principles of preclusion," *id. at 199-200* (quoted in Def. Mem., at 8). What Defendants fail to recognize is that this holding was expressly abrogated by the Supreme Court's ruling in *Exxon Mobil. See id. at 283* (citing *Moccio* as an example of a case which overextended the application of *Rooker-Feldman*); *see Hoblock v. Albany Cty. Bd. of Elections, 422 F.3d 77, 85 (2d Cir. 2005)* ("The Supreme Court has now told us that *Moccio* . . . was incorrect."). In their *Rooker-Feldman* analysis, Defendants do not grapple with, or indeed even mention, this more recent and controlling case law. Instead, Defendants rely on an overly broad interpretation of *Rooker-Feldman* that does not comport with either *Exxon Mobil* or the subsequent decisions in this Circuit that have applied the principles of *Exxon Mobil*.

To be sure, there are several indicators in the parties' submissions suggesting that the state court action and the action currently before this court are substantially similar. In both cases, it would appear that Plaintiff's complained-of injury is his eviction **[*26]** from the apartment at Henry Hall. (*Compare* Housing Court Order *with* Compl.) Plaintiff himself has acknowledged this similarity, given that he filed a so-called "Related Case Statement" in this matter, referring to the Housing Court Action as the purported "basis for this new case." (*See* Dkt. 10.) The Housing Court Action was brought against Rose Associates, the entity with which each of the Moving Defendants is affiliated. (*Id.*) Further, it appears that the remedies sought by Plaintiff in the Housing Court Action and in this action, for his allegedly wrongful eviction, are essentially identical: restoration to an apartment in Henry Hall, and money damages. (*Id.*)

Nonetheless, as the Second Circuit has explained, post-*Exxon Mobil*, mere similarity of issues between a state court action or judgment and a subsequent federal court action is not sufficient for application of the *Rooker-Feldman* doctrine. *McKithen, 481 F.3d 89, 97-98*. Instead, the Court looks to whether there is a "causal relationship" between the state court judgment and the alleged injury. *Id. at 98*. Put another way, the court must ask whether the injury was "produced by a state-court judgment," or if, to the contrary, the injury was "simply ratified, acquiesced **[*27]** in, or left unpunished by [the state court]." *Hoblock, 422 F.3d at 88*. Here, the specific injury alleged by Plaintiff — his removal from Henry Hall — was not *caused* by the Housing Court judgment. Rather, Plaintiff's eviction was a "preexisting injury" that "existed in its exact form prior to the state-court judgment." McKithen, 481 F.3d at 98. In light of that clear and uncontested fact, this Court cannot conclude that Plaintiff is "inviting District Court review and rejection" of the Housing Court's decision, Exxon Mobil, 544 U.S. at 284, rather than raising an independent federal claim that "denies a legal conclusion that a state court has reached in a case to which he was a party," id. at 293.[5]

This Court therefore concludes that the Rooker-Feldman doctrine does not deprive this Court of jurisdiction over Plaintiff's claims, and that his claims should not be dismissed on that ground.

2. Plaintiff Lacks Standing To Assert His Claim Under the FTCA.

Defendants also argue that Plaintiff's claim of "false advertisement and unfair and deceptive actions," which he purports to raise pursuant to 15 U.S.C. § 45 (a section of the FTCA), must be dismissed because that statute provides no private right of action. (Compl. ¶¶ 89-93; Def. Mem., at 14-15.) Defendants raise this issue last in their **[*28]** brief, and separately from their discussion of subject matter jurisdiction (Def. Mem., at 14-15), but, as the issue is appropriately analyzed as a question of standing, this Court will address it as a threshold jurisdictional issue, under Rule 12(b)(1) (*see* Discussion, *supra*, at Section I(A)(3)).

Defendants correctly note that there is no private right of action under 15 U.S.C. § 45, and courts in this District have routinely dismissed claims by private plaintiffs brought pursuant to that section. *See* Naylor, 585 F.2d at 561 ("it is clear that no private right of action arises under [15 U.S.C. § 45]") (collecting cases); Shostack v. Diller, No. 15cv2255 (GBD) (JLC), 2015 U.S. Dist. LEXIS 123777, 2015 WL 5535808, at *9 (S.D.N.Y. Sept. 16, 2015) (recommending dismissal of claim under 15 U.S.C. § 45 for lack of a private right of action), *report and recommendation adopted*, 2016 U.S. Dist. LEXIS 30354, 2016 WL 958687 (S.D.N.Y. Mar. 8, 2016); Oliver v. U.S. Bancorp, No. 14cv8948 (PKC), 2015 U.S. Dist. LEXIS 88713, 2015 WL 4111908, at *6 (S.D.N.Y. July 8, 2015) (same); Rotblut v. Ben Hur Moving & Storage, Inc., 585 F. Supp. 2d 557, 560 (S.D.N.Y. 2008) ("the [FTCA], which prohibits unfair or deceptive practices, does not provide for a private cause of action"); *see also* Yerushalayim v. Liecthung, No. 19CV4101 (AMD) (LB), 2019 U.S. Dist. LEXIS 136800, 2019 WL 3817125, at *3 (E.D.N.Y. Aug. 13, 2019) (same).

Plaintiff cites to 15 U.S.C. Section 26 as support for the proposition that he can personally bring suit for an alleged violation of the Act. (Compl. ¶ 93.) While Section 26 provides for a private right of action for injunctive relief for certain ***antitrust-law*** violations (none of which are alleged in the Complaint), **[*29]** it does not confer a private right of action for unfair or deceptive practices prohibited by Section 45. (*Compare* 15 U.S.C. §§ 26, 45.) As Plaintiff lacks standing to enforce the provisions of Section 45 through this private suit, I recommend that Plaintiff's claim pursuant to that statute be dismissed.

Although a *pro se* Plaintiff should generally be granted at least one opportunity to amend, Cuoco, 222 F.3d at 112, leave to amend need not be granted where amendment would be futile, Brodsky, 2015 U.S. Dist. LEXIS 169104, 2015 WL 13746671, at *13. Plaintiff's claim for "false advertising" and "unfair and deceptive practices" pursuant to the FTCA should be dismissed with prejudice because Plaintiff's lack of standing to assert a claim pursuant to 15 U.S.C. § 45 is a legal flaw that cannot be cured through amendment. *See* Cain v. Christine Valmy Int'l Sch. of Esthetics, Skin Care, & Makeup, 216 F. Supp. 3d 328, 336 (S.D.N.Y. 2016) (amendment futile for claim based on statute without a private right of action).

3. Plaintiff's Allegations Are Sufficient, at the Pleading Stage, to Demonstrate Standing Under the FHA.

---

[5] In this regard, the Court also notes that Defendants characterize the Decision and Order of the Housing Court as containing a finding that Plaintiff was not a tenant. (Def. Mem., at 5, 9.) The actual language of the Decision and Order, however, is not so clear. (Housing Court Order (finding that "the landlord had nothing to do w[ith] either the letting or the alleged lockout").)

The FHA makes it unlawful to "refuse to sell or rent . . . or otherwise make unavailable or deny, a dwelling to any person because of," *inter alia*, their sex, familial status, and/or a handicap, or to discriminate "in the provision of services or facilities in connection [with a sale or rental]" based on any of those protected **[*30]** characteristics. *42 U.S.C. § 3604(a)*, *(b)*, *(f)*. The FHA permits any "aggrieved person" to bring suit to remedy a violation of the Act. *42 U.S.C. § 3613(a)*. In their motion, Defendants do not argue that Plaintiff has failed to allege that he falls within one of the protected categories; nor do they argue that he has failed to plead sufficient facts to raise a plausible inference that Defendants' actions were taken because of his membership in a protected class; nor do they argue that their alleged conduct towards Plaintiff was not the type of conduct contemplated by the statute. (*See generally* Def. Mem.; Def. Reply.) This Court therefore focuses on the sole argument made by Defendants that Plaintiff was not an "aggrieved person" under the FHA. As the question of whether a party is an "aggrieved person" under the Act is a question of standing, *Bank of Am. Corp. v. City of Miami, Fla., 137 S. Ct. 1296, 1303, 197 L. Ed. 2d 678 (2017)*, this Court addresses Defendants' argument in connection with their *Rule 12(b)(1)* motion, despite Defendants' having raised the issue in connection with their motion under *Rule 12(b)(6)*.

The Moving Defendants rely on *Walker v. Cox, No. 95 CV 1219 (EHN), 1999 U.S. Dist. LEXIS 5620, 1999 WL 294723 (E.D.N.Y. Mar. 17, 1999)*, for the proposition that "'aggrieved parties' . . . do not include unlawful tenants" (Def. Mem., at 12). The FHA, however, merely defines an "aggrieved person" as "any **[*31]** person who (1) claims to have been injured by a discriminatory housing practice; or (2) believes that such person will be injured by a discriminatory housing practice that is about to occur." *42 U.S.C. §§ 3602(i)(1)*, *(2)*. Nowhere does the text of the statute limit standing only to "lawful tenants." *See id.* To the contrary, the Supreme Court "has repeatedly written that the FHA's definition of person 'aggrieved' reflects a congressional intent to confer standing broadly," *Bank of Am. Corp., 137 S. Ct. at 1303*, and indeed, "[s]tanding under the Fair Housing Act is as broad as Article III permits." *Fair Hous. Justice Ctr., Inc. v. Cuomo, No. 18cv3196 (VSB), 2019 U.S. Dist. LEXIS 170119, 2019 WL 4805550, at *6 (S.D.N.Y. Sept. 30, 2019)* (quoting *Mhany Mgmt., Inc. v. Cty. of Nassau, 819 F.3d 581, 600 (2d Cir. 2016))*.

Moreover, the Supreme Court has recognized that standing under the FHA exists in a variety of contexts, including instances where the plaintiffs are not "tenants." *Bank of Am. Corp., 137 S. Ct. at 1303* (collecting cases). Under circumstances similar to those alleged in this case, this Court has recognized that even residents who are not "tenants of record" for a dwelling may nonetheless be able to challenge their eviction for discriminatory reasons. *Andujar v. Hewitt, No. 02cv2223 (SAS), 2002 U.S. Dist. LEXIS 14294, 2002 WL 1792065, at *9 (S.D.N.Y. Aug. 2, 2002)* (goddaughter of leaseholder had standing under the FHA to challenge eviction based on assertion of familial status). Defendants' conclusory argument **[*32]** that the protections of the FHA are limited only to "lawful tenants" fails to address or even acknowledge the broad scope of the statute.

Finally, even if this Court were to adopt the reasoning of the Eastern District in *Walker*, which found that an "unauthorized" resident who would, in any event, be subject to eviction, lacked standing to sue under the FHA, Defendants — for reasons discussed below (*see* Discussion, *infra*, at Section II(B)) — have failed to support their argument that they are entitled, at this stage of these proceedings, to a judicial finding that, despite his allegations, Plaintiff was not, as a matter of law, "authorized" to reside in Orr's apartment. For these reasons, I recommend that the Court decline to dismiss Plaintiff's FHA claim.

B. *Rule 12(b)(6)*

This Court turns next to Defendants' contentions that Plaintiff's remaining claims should be dismissed pursuant to *Rule 12(b)(6)* for failure to state a claim. Defendants argue that Plaintiff has failed to state *any* claim upon which relief may be granted because, as a factual matter, Plaintiff was not a lawful tenant of Henry Hall. (*See generally* Def. Mem.; Def. Reply.) Plaintiff, for his part, insists that he was. (*See generally* Compl.; Pl. Decl.; **[*33]** Pl. Notice; Pl. Mem.) In support of their argument, Defendants repeatedly point to the conceded fact that Orr, not Plaintiff, was the "tenant of record" for the apartment (*see* Def. Mem., at 3 (citing Compl. ¶ 20)) and that Plaintiff paid rent to Orr, not to Defendants (*see id.*, at 4; Compl. ¶ 21; Pl. Decl. ¶ 2). Plaintiff, however, has alleged that, regardless of whether he was named on the lease for the apartment, he had permission to live there, as indicated by (1) the fact that he had "registered with the security guards" by producing a valid form of government identification, having his photograph taken, and signing his name (Compl. ¶ 22; Pl. Decl. ¶ 4); (2) the fact that this registration was recorded in the landlord's computer system, such that, whenever he arrived at the building (at least until late February 2018), security staff would see that he was a resident and allow him in without asking Orr for permission (Pl. Decl. ¶ 7; *see also* Compl. ¶ 26); (3) the fact that, when he once locked himself out of the apartment, the landlord gave him a spare key to let him in (Pl. Decl. ¶ 9); (4) the fact that building staff helped him move his furniture into the apartment (Compl. ¶ 23); and (5) **[*34]** the fact that the landlord knowingly allowed him to reside in the apartment for over 30 days (Pl. Decl. ¶¶ 5, 11). Plaintiff also suggests, although without further explanation, that he met an applicable definition for being a member of Orr's "household," perhaps because he and Orr were financially interdependent. (*See* Pl. Mem., at 4.)

In their briefing, Defendants do not even attempt to explain the circumstances under which a landlord-tenant relationship may, and may not, be created under New York law, and, more specifically, they do not cite authority for the proposition that, as they suggest, only an individual who is the "tenant of record" and signatory to the prime lease may be considered a lawful tenant or otherwise have legal rights that are capable of being violated by forceable eviction. On this point, Defendants fail to address how any financial relationship between Plaintiff and Orr, or Defendants' alleged notice of and acquiescence in Plaintiff's shared occupancy of the apartment (*see* Compl. ¶ 22; Pl. Decl. ¶¶ 4-11), may have affected Plaintiff's status or his rights. Further, Defendants fail to explain what Plaintiff's status *was*, if not that of a "lawful tenant" — for **[*35]** instance, whether he could have been considered a licensee — and how such status would affect his ability to assert claims under the various laws he invokes. (*See generally* Def. Mem.; Def. Reply.) Absent briefing on these subjects, this Court cannot conclude, at the pleading stage, that Defendants have adequately demonstrated that Plaintiff's purported lack of "lawful tenancy" status precludes him, as a matter of law, from proceeding with any and all of his asserted claims.

Moreover, while, on Defendants' *Rule 12(b)(6)* motion, the Court may take judicial notice of documents integral to and incorporated in the Complaint by reference, *see* *Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002)*, and while this may include the letter sent by Zarzuela to Orr on March 7, 2018, directing Orr to have Plaintiff vacate the apartment (*see* Compl. ¶ 28 (quoting letter)), Plaintiff has, as noted above, submitted a version of that letter that is different from the version submitted by Defendants, raising a question as to the authenticity of the version on which Defendants rely (*see supra*, at n.3). If there is a legitimate dispute regarding the authenticity of a document, then it may not serve as the basis for dismissal. *MMA Consultants 1, Inc. v. Republic of Peru, 245 F. Supp. 3d 486, 498-99 (S.D.N.Y. 2017)* ("a document outside the complaint may not **[*36]** serve as the basis for a dismissal unless it is clear on the record that no dispute exists regarding the authenticity or accuracy of the document" (internal quotation marks and citation omitted)), *aff'd*, *719 F. App'x 47 (2d Cir. 2017)* (Summary Order). Further, even if the core contents of that letter are not disputed, Defendants' assertion that Plaintiff was not a lawful tenant largely relies on the substance of Orr's lease (*see* Def. Mem., at 3-4 (quoting extensively from lease, attached as Exhibit A to the Zazuela Decl.)), and it is not clear that Plaintiff's mere allegation that Orr was the "tenant of record" (Compl. ¶ 20) would be sufficient to allow the Court to consider the full terms of the lease without converting Defendants' *Rule 12(b)(6)* motion to one for summary judgment. Absent a discovery record that develops the facts relevant to Plaintiff's occupancy status, this Court does not recommend conversion of the motion. *See, e.g.,* *Speedmark Transp., Inc. v. Mui, 778 F. Supp. 2d 439, 441 n.1 (S.D.N.Y. 2011)* (collecting cases declining to convert a motion to dismiss to one for summary judgment where relevant discovery had not been completed).

It may well be that, under the applicable law, the evidence will eventually demonstrate that Plaintiff was neither a lawful tenant of Henry Hall, nor otherwise **[*37]** a person whose status entitled him to challenge Defendants' conduct in evicting him from the premises or denying him access to his property. For the reasons discussed below, however, these issues should not be resolved at this juncture. For other reasons, discussed below, certain of Plaintiff's remaining claims are defective on their face and should be dismissed. It is premature, though, for the Court to accept the limited evidence that Defendants have proffered; to accept their blanket assertions that, based on that limited evidence, Plaintiff was not a "lawful tenant" and thus had no legal rights to occupy the apartment, to be free from forceable removal from the premises, or to recover his personal property; and to determine that all of Plaintiff's claims should be dismissed on that basis.

1. Plaintiff's *Section 713* Claim Should Be Dismissed as Noncognizable.

Plaintiff's claim that the Moving Defendants violated *Section 713* by failing to provide him with "a 10-day Notice to Quit" (Compl. ¶ 87) is defective. The purported notice requirement cited by Plaintiff relates to special proceedings that, under *Section 713*, "may be maintained" to remove individuals from occupancy "where no landlord-tenant relationship exists." **[*38]** *N.Y. Real Prop. Actions L. § 713*. Such proceedings may be commenced when, *inter alia*, an individual "is a licensee of the person entitled to possession of the property . . . [and] his license has been revoked by the licensor." *Id.* *§ 713(7)(b)*.

Construing Plaintiff's Complaint to suggest that he may have been "a licensee of the person entitled to possession" of the apartment at Henry Hall, this Court finds it plausible that Defendants could have commenced a *Section 713* special proceeding to evict Plaintiff, thereby entitling him to statutory notice. There is no indication in Plaintiff's Complaint, however, that Defendants ever *did* start such a proceeding; to the contrary, Plaintiff asserts that he was forced out of the apartment through an "illegal self-help eviction." (Pl. Decl. ¶ 29.) Nor does *Section 713* make it mandatory for a landlord to use the procedures set out in that statute to effectuate an eviction of a licensee. Instead, the statute expressly provides for an *optional* method of removing a licensee whose license to occupy real property has been revoked. *See* *N.Y. Real Prop. Actions L. § 713* (providing that a special proceeding under the statute "may" be maintained); *see also* Def. Mem., at 13 (citing *Pelt v. City of New York, No. 11-CV-5633 KAM CLP, 2013 U.S. Dist. LEXIS 122848, 2013 WL 4647500, at *9 (E.D.N.Y. Aug. 28, 2013)* ("New York state courts have repeatedly **[*39]** clarified that *§ 713* does not replace an owner's common-law right to oust an interloper without legal process." (internal quotation marks omitted; collecting cases))); *De Villar v. City of New York, 628 F. Supp. 80, 84 (S.D.N.Y. 1986)* ("The fact that a court will not issue a judgment of eviction without ten days notice [pursuant to *Section 713*] in no way implies that an owner is barred by law from removing a trespasser or illegal occupant.").

As Defendants allegedly did not commence — and, under the law, were not required to commence — a special proceeding under *Section 713*, they were also not bound by the obligation imposed by that Section to provide Plaintiff with 10 days' notice of his removal from occupancy. For this reason, Plaintiff has no cognizable claim pursuant to *Section 713*. Moreover, as Plaintiff cannot claim entitlement to the procedures outlined in the statute as a matter of law, granting him leave to amend his *Section 713* claim would be futile, and, for this reason, this claim should be dismissed with prejudice.

2. Plaintiff's *Section 1983* and State Constitutional Claims Are Defective as Pleaded, But Plaintiff Should Be Granted Leave To Amend Certain of These Claims.

Although Defendants spend the majority of their analysis of Plaintiff's constitutional claims on the issue of whether Plaintiff **[*40]** may assert those claims absent status as a lawful tenant (Def. Mem., at 9-11),[6] Defendants also raise, albeit in a footnote, the argument that they were not state actors, and therefore cannot be said to have violated Plaintiff's rights "under color of state law," as would be required for Plaintiff to state a viable claim for federal or state constitutional violations (*id., at 11 n.4* (citing, *inter alia,* *Murray v. N.Y.C. Dep't of Corr., No. 13 CV 7090, 2016 U.S. Dist. LEXIS 110982, at *28, 2016 WL 11395007, at *11 (E.D.N.Y. Aug. 18, 2016))*; *see also* Def. Reply, at 8 n.8). This Court agrees that Plaintiff has not adequately pleaded that Defendants were state actors, and that dismissal of Plaintiff's constitutional claims is therefore warranted.

Pleading standards under both *Section 1983* and the New York State Constitution require that a plaintiff plead plausible factual allegations that the defendant against whom the claims are asserted was a "state actor." *Aponte v. Diego Beekman M.H.A. HDFC, No. 16cv8479 (JPO), 2019 U.S. Dist. LEXIS 12367, 2019 WL 316003, at *11-13 (S.D.N.Y. Jan. 24, 2019)* (dismissing *Section 1983* claims where plaintiff failed to allege defendants were state

[6] The Court notes that while Defendants assert that Plaintiff's purported lack of status as a lawful tenant is fatal to all of his numerous constitutional claims, Defendants only substantively address Plaintiff's due-process claim related to the alleged lockout.

actors); *Algarin v. New York City Dep't of Corr., No. 06cv508 (JSR), 2006 U.S. Dist. LEXIS 31375, 2006 WL 1379605, at *2 (S.D.N.Y. May 19, 2006)* (dismissing claims under *Section 1983* and the New York State Constitution where plaintiff failed to allege that defendant was a state actor); *see also* *Rendell-Baker v. Kohn, 457 U.S. 830, 842, 102 S. Ct. 2764, 73 L. Ed. 2d 418 (1982)*. In this case, the Defendants are private individuals who have been **[*41]** sued by Plaintiff in their capacity as employees of a private corporation that managed Henry Hall during the relevant time period. (Compl. ¶¶ 12, 13, 15, 17.) Under only certain limited circumstances may "the actions of a "nominally private entity" be "attributable to the state." *Aponte, 2019 U.S. Dist. LEXIS 12367, 2019 WL 316003, at *12*. Such circumstances include where (1) the nominally private entity acts "pursuant to the 'coercive power' of the state or is 'controlled' by the state"; (2) the state encourages, or the entity willfully participates, in a joint activity with the state, or "the entity's functions are 'entwined' with state policies"; or (3) the entity "has been delegated a public function by the state." *Sybalski v. Indep. Grp. Home Living Program, Inc., 546 F.3d 255, 257 (2d Cir. 2008)*. Plaintiff has not plausibly alleged the existence of any of those circumstances here.

The Complaint does plead that the Moving Defendants received certain financing from the state in order to provide low-income housing to residents. (Compl. ¶¶ 14, 16-18.) Plaintiff also alleges (in connection with his claim against the City (*see id.* (Second Cause of Action)) that the City's Department of Housing Preservation and Development acted through Defendants to evict Plaintiff unlawfully and by force and to deprive him of his property **[*42]** illegally (*id.* ¶ 78). Further, in opposition to Defendants' argument that they are not state actors, Plaintiff contends that Defendants were "doing the government's job of deciding who receives rental assistance" (Pl. Notice ¶ 5); and that Defendants "abide[d] by and answer[ed] to the Federal Government" (Pl. Mem. ¶ 12). Liberally construing Plaintiff's factual allegations to raise the strongest arguments they suggest, this Court interprets Plaintiff's pleading and other submissions to assert that (1) Rose Associates' receipt of government funding for low-income housing rendered it, and its principals, so "entwined" with the state that the Moving Defendants were essentially state actors, *see* *Aponte, 2019 U.S. Dist. LEXIS 12367, 2019 WL 316003, at *12*; (2) that the Moving Defendants, in providing low-income housing, were performing a "public function, or, in other words, wield[ing] a power traditionally exclusively reserved to the State," *2019 U.S. Dist. LEXIS 12367, [WL] at *12-13* (internal quotation marks and citation omitted); and (3) that the Moving Defendants were "joint participants" with the City in evicting him from Henry Hall, *see* *2019 U.S. Dist. LEXIS 12367, [WL] at *12*. None of these assertions, however, are sufficient to render plausible Plaintiff's claims, as currently pleaded, that the Moving Defendants deprived **[*43]** him of his federal and state constitutional rights under color of state law.

First, it is well established that receipt of government funding, "no matter how extensive, is insufficient to transform otherwise private conduct into state action." *Young v. Halle Hous. Assocs., L.P., 152 F. Supp. 2d 355, 362 (S.D.N.Y. 2001)*; *Aponte, 2019 U.S. Dist. LEXIS 12367, 2019 WL 316003, at *12* (dismissing *Section 1983* claims based on "entwinement" theory where plaintiffs alleged that landlord "receive[d] public funds and tax exemptions in exchange for providing low-income housing," and holding that entities do not become state actors "simply because those entities receive state funding for providing a public service" (citing *Rendell-Baker, 457 U.S. at 841*)); *Holden v. E. Hampton Town, No. 15-CV-4478, 2017 U.S. Dist. LEXIS 53135, 2017 WL 1317825, at *5-6 (E.D.N.Y. Mar. 31, 2017)* (landlord was not a state actor despite its "accept[ance of] subsidized rental payments from the Town[] . . . for qualified low-income tenants"). Therefore, Plaintiff's allegation that the Moving Defendants, in their capacity as officers or employees of a private entity, accepted government financing for the provision of low-income housing is insufficient to raise a plausible inference that Defendants were state actors.

Second, it is equally settled law that the provision of housing, even so-called low-income housing, is not a function that is "traditionally exclusively reserved to the State." *Aponte, 2019 U.S. Dist. LEXIS 12367, 2019 WL 316003, at *13* ("the provision of housing, **[*44]** for the poor or for anyone else, has never been the exclusive preserve for the state, but has been left to a regulated, and occasionally subsidized, private marketplace" (citing *Young, 152 F. Supp. 2d at 365*)); *Holden, 2017 U.S. Dist. LEXIS 53135, 2017 WL 1317825, at *5* ("Providing low-cost housing does not constitute a 'public function' within the meaning of *Section 1983* because it is not an activity or function exclusively reserved by the state." (citing *Young, 152 F. Supp. 2d at 365*)). Further, Plaintiff's allegation that Defendants assumed a public function by "deciding who receives rental assistance" (Pl. Notice ¶ 5) is purely conclusory and, in any event, unsupported by any factual allegations that any government delegated such a power to Defendants — indeed, Plaintiff's claims essentially allege that it was contrary to state and local law for

Defendants to assume that authority (*see id.*; *see also* *Aponte, 2019 U.S. Dist. LEXIS 12367, 2019 WL 316003 at *13* (rejecting theory that defendant was a state actor when he assumed "[the] power to make 'decisions regarding eligibility for public benefits,'" where plaintiffs' claims were based on laws which, "in [p]laintiffs' view, *require*[*d*] [defendant] to provide them with the benefit they seek")).

Third, Plaintiff's Complaint contains no factual allegations regarding any actual joint conduct between the Moving Defendants **[*45]** and City agents that could be viewed as giving rise to Plaintiff's constitutional claims. The Complaint does not allege, for example, facts that would raise a plausible inference that the City coerced Defendants into removing him from Henry Hall, *Sybalski, 546 F.3d at 257*, that the City or City agents "reached an understanding" with Defendants to evict Plaintiff from Henry Hall and deny him access to his possessions, *Adickes v. S. H. Kress & Co., 398 U.S. 144, 152, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*; *see also* *Mercer v. Schriro, 337 F. Supp. 3d 109, 146 (D. Conn. 2018)*, or that the City was involved in implementing or enforcing the terms of Orr's lease, *see* *Young, 152 F. Supp. 2d at 365*. Standing alone, Plaintiff's bare allegation that the City, by its Department of Housing Preservation and Development, "act[ed] through" the Moving Defendants to violate his rights (Compl. ¶ 78) cannot render his constitutional claims against the Moving Defendants plausible.

For these reasons, Plaintiff's constitutional claims against the Moving Defendants, as pleaded, are subject to dismissal. Moreover, it would be futile for the Court to permit Plaintiff to amend certain of those claims, as Plaintiff has given absolutely no indication that, in connection with his eviction, he was criminally charged, detained, prosecuted, tried, convicted, or incarcerated. In these circumstances, Plaintiff can **[*46]** have no cognizable claims — against any defendant — for malicious prosecution, denial of the right to a fair trial, cruel and unusual punishment, or any other abuses of criminal process. *See, e.g.,* *Willey v. Kirkpatrick, 801 F.3d 51, 70 (2d Cir. 2015)* (malicious prosecution claim requires, *inter alia*, that a plaintiff plead he was subject to "the initiation or continuation of a criminal proceeding"); *Cuffee v. City of New York, No. 15cv8916 (PGG) (DF), 2017 U.S. Dist. LEXIS 31604, 2017 WL 1232737, at *6 (S.D.N.Y. Mar. 3, 2017)*, *report and recommendation adopted*, *2017 U.S. Dist. LEXIS 44552, 2017 WL 1134768 (S.D.N.Y. Mar. 27, 2017)* (*Eighth Amendment* applies only to individuals who have been "incarcerated pursuant to a conviction").

It is possible, however, that Plaintiff may be able to allege facts giving rise to an inference that the Moving Defendants acted jointly with City officials to effect his removal from the apartment at Henry Hall and to deny him later access to retrieve his property, such that any potential liability of the City for violating Plaintiff's civil rights (such as his rights to due process and equal protection) could extend to the Moving Defendants as well. Given that a *pro se* plaintiff should generally be afforded at least one chance to amend, *Cuoco, 222 F.3d at 112*, and that an amendment of Plaintiff's constitutional claims (with the exception of claims that would relate to criminal process and incarceration) **[*47]** would not obviously be futile, I recommend that Plaintiff's *Section 1983* and state constitutional claims be dismissed without prejudice to replead any such claims that relate to civil process.

3. Defendants' Motion To Dismiss Plaintiff's Claims Under the Rehab Act and *Section 26-521* Should Be Denied.

This Court turns finally to Plaintiffs' claims under the Rehab Act and *Section 26-521* of the New York City Administrative Code. As to each of these claims, the law cited by the Moving Defendants does not actually support their arguments that the claims are inadequately pleaded, and, accordingly, this Court recommends that Defendants' motion to dismiss these claims be denied.

a. Plaintiff's Rehab Act Claim

The Rehab Act provides that "[n]o otherwise qualified individual with a disability in the United States . . . shall, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." *29 U.S.C. § 794(a)*. To establish a claim under the Rehab Act, a plaintiff must allege the following elements: (1) that he is a "qualified individual" with a disability; (2) that the defendants receive federal financial assistance; **[*48]** and (3) that he was denied the participation in defendants' services, programs, or activities, or otherwise discriminated against by defendants, because of his disability. *See* *Powell v. Nat'l Bd. of Med. Examiners, 511 F.3d 238 (2d Cir. 2004)*; *Burris v. Hous. & Servs. Inc., No. 17cv9289 (JGK), 2019 U.S. Dist. LEXIS 43972, 2019 WL 1244494, at *5 (S.D.N.Y. Mar. 18, 2019)*. A "qualified individual" is defined as "an individual with a disability who . . . meets the essential eligibility requirements for the receipt of services or the participation in programs or activities" provided by an entity that receives federal funding. *Fulton v. Goord, 591 F.3d 37, 43 (2d Cir. 2009)* (quoting *42 U.S.C. § 12131(2)*).

The Moving Defendants argue that any claim Petitioner is attempting to assert under *Section 504* of the Rehab Act should be dismissed because "[t]o establish a *Section 504* claim, a plaintiff must receive federal funding that is tied to defendant's purported discriminatory action." (Def. Mem., at 12 (citing *O'Neill v. Hernandez, No. 08cv1689 (KMW), 2010 U.S. Dist. LEXIS 33262, 2010 WL 1257512, at *1 (S.D.N.Y. Mar. 25, 2010))*. Defendants' argument has no merit, as the Rehab Act has no requirement that a plaintiff "receive federal funding." Indeed, the one case that Defendants cite in support of their argument, *O'Neill*, holds no such thing. Rather, upon addressing a plaintiff's Rehab Act claim in a summary-judgment context, the court, in *O'Neill*, noted that one of the elements that the plaintiff would need **[*49]** to establish to prevail on his claim was that the *defendant* received federal funding. *2010 U.S. Dist. LEXIS 33262, [WL] at *7*; *see also* *Burris, 2019 U.S. Dist. LEXIS 43972, 2019 WL 1244494, at *5*. This, of course, accords with the purpose of *Section 504* of the Rehab Act, which prohibits individuals with disabilities from, *inter alia*, being discriminated against by "any program or activity *receiving Federal financial assistance."* *29 U.S.C. § 794(a)* (emphasis added).

To the extent Defendants may be trying to argue that Plaintiff was not a "qualified individual" because he was not eligible for the low-income housing benefits provided by Defendants, through the federal funding that *Defendants* received (*see* Def. Mem., at 13 (arguing that "Plaintiff does not — and cannot — allege that he received . . . federal funding . . . because Mr. Orr was the sole individual who was the beneficiary of this subsidy")), Defendants have failed to explain that argument. The words "qualified" or "eligible" do not appear anywhere in Defendants' briefing, and Defendants certainly have not undertaken to explain the "essential eligibility requirements" that Plaintiff would have needed to meet to state a Rehab Act claim. (*See generally* Def. Mem.) Furthermore, *O'Neill*, on which Defendants purport to rely, does not address issues of eligibility **[*50]** or contain any discussion as to whether the plaintiff in that case was a "qualified individual." *See generally* *O'Neill, 2010 U.S. Dist. LEXIS 33262, 2010 WL 1257512*.

This Court also notes that Defendants' single-sentence argument that only "lawful tenants" may bring a claim under the Rehab Act (Def. Mem., at 13) is wholly conclusory and unsupported by any citation to law. As discussed above, neither the Rehab Act nor the definition of "qualified individual" indicates, on its face, that only a "lawful tenant" may assert a claim under the Act, and Defendants have wholly failed to address whether the particular facts alleged by Plaintiff could be sufficient to afford Plaintiff coverage by the Act's anti-discrimination requirements. As this Court cannot conclude, on the briefing submitted by Defendants, that Plaintiff was not a "qualified individual" under the Rehab Act, and as Defendants have advanced no other argument as to why Plaintiff should not be permitted to proceed on his Rehab Act claim, I recommend that Defendants' motion to dismiss that claim be denied.

b. Plaintiff's *Section 26-521(a)* Claim

Plaintiff also asserts a claim under *Section 26-521(a)*, which, *inter alia*, makes it

> unlawful for any person to evict . . . an occupant of a dwelling unit who has lawfully occupied **[*51]** the dwelling unit for thirty consecutive days or longer . . ., except to the extent permitted by law pursuant to a warrant of eviction or other order of a court of competent jurisdiction or a governmental vacate order by . . . using or threatening the use of force to induce the occupant to vacate the dwelling unit.

N.Y.C. Admin. Code *§ 26-521(a)(1)*; *see* Compl. ¶ 87. Similar to the arguments that they raise in opposition to Plaintiff's other claims, the Moving Defendants' sole *Rule 12(b)(6)* argument for dismissal of Plaintiff's *Section 26-*

521(a) claim is that the law invoked by Plaintiff applies only to "legitimate tenants." (Def. Mem., at 13 (quoting Section 26-521(a) as providing that "[i]t shall be unlawful for any person to evict or attempt to evict an occupant of a dwelling unit who has *lawfully* occupied the dwelling unit" (emphasis added by Defendants)).) Once again, however, Defendants entirely fail to recognize that the law invoked by Plaintiff does not only serve to protect lawful "tenants" (*i.e.*, leaseholders). In fact, on its face, Section 26-521(a) extends its protections to any "occupant" of a dwelling unit who has "lawfully occupied" that unit for the specified period of time "*or* who has entered into a lease with respect to such dwelling . . ." N.Y.C. **[*52]** Admin. Code § 26-521(a).

Furthermore, the only case cited by Defendants to support their position as to the meaning of this Administrative Code provision is *Sasmor v. Powell, No. 11-CV-4645 KAM JO, 2015 U.S. Dist. LEXIS 124461, 2015 WL 5458020 (E.D.N.Y. Sept. 17, 2015)*, *aff'd*, *699 F. App'x 65 (2d Cir. 2017)* (Summary Order) (cited in Def. Mem., at 13), where the issue for the court was only whether, in the context of a Section 1983 claim, Section 26-521(a) could be found to have created any property rights in the plaintiff's favor, *see 2015 U.S. Dist. LEXIS 124461, [WL] at *3*. The court adopted a magistrate judge's recommendation that the relevant Section 1983 claims be dismissed because Section 26-521 created no "independent rights of possession." *See id.* (*adopting report and recommendation, separately published at 2015 U.S. Dist. LEXIS 124907, 2015 WL 5458009, at *4 (E.D.N.Y. July 20, 2015))*. This does not address the question of whether Plaintiff could have a viable claim against Defendants under Section 26-521, separate from any constitutional claim alleging interference with property interests.

If Plaintiff had been residing in the apartment for more than 30 days as a lawful licensee, then Plaintiff may potentially have a viable argument that Defendants violated his rights under Section 26-521(a) by removing him from the apartment by force or threatened force, without a court order. *See Andrews v. Acacia Network, 59 Misc. 3d 10, 70 N.Y.S.3d 744, 746 (N.Y. App. Term. 2018)* (suggesting that violation of Section 26-521 as to a licensee may "subject a violator to criminal liability and civil penalties"); **[*53]** *Chow v. 86 Bay LLC, 59 Misc. 3d 1229(A), 108 N.Y.S.3d 688 (Civ. Ct. N.Y. Cty. 2018)* (same); *but see Tantaro v. Common Ground Community Hous. Dev. Fund, Inc., No. 152701/2103, 2015 N.Y. Misc. LEXIS 824, 2015 WL 1227944, at *7 (S. Ct. N.Y. Cty. 2015)* (dismissing Section 26-521 claim where plaintiff was a "mere licensee" and was therefore "not entitled to legal process prior to being restricted from the Building"). Further, while Section 26-521(a) would not entitle an evicted person to repossession of his former dwelling, *see Andrews, 70 N.Y.S.3d at 746*; *Chow, 108 N.Y.S.3d at 688*, *Clarke v. Copenhagen Leasing, L.P., 48 Misc. 3d 27, 12 N.Y.S.3d 489, 490 (N.Y. App. Term. 2015)*, nor directly entitle him to monetary relief, *see Truglio v. VNO 11 E. 68th St. LLC, 35 Misc. 3d 1227[A], 953 N.Y.S.2d 554 [Civ. Ct. N.Y. Cty. 2012]* (noting that the Section "adds civil penalties and criminal penalties . . . which can only be enforced by the Corporation Counsel on behalf of the City of New York"), violations of the Section have nonetheless been held to be remediable under other provisions of the Administrative Code, *see SITC Inc. v. Riverplace I Holding LLC, 23 Misc. 3d 219, 870 N.Y.S.2d 879, 885 (Civ. Ct. N.Y. Cty. 2008)* (noting, *inter alia*, the potential for a person who was unlawfully evicted under Section 26-521(a) to recover treble damages under N.Y. R.P.A. § 853).

Under the circumstances, Defendants have not shown a basis for dismissing Plaintiff's Section 26-521(a) claim as insufficiently pleaded under Rule 12(b)(6).

CONCLUSION

For all of the foregoing reasons, I respectfully recommend that Defendants' motion to dismiss (Dkt. 31) be granted in part and denied in part, as follows:

(1) As to Plaintiff's claim against the Moving Defendants under the Federal **[*54]** Trade Commission Act, the motion to dismiss should be granted under Rule 12(b)(1) with prejudice, as amendment would be futile;

(2) As to Plaintiff's claim against the Moving Defendants under Section 713 of the New York Real Property Actions Law, the motion to dismiss should be granted under Rule 12(b)(6) with prejudice, as amendment would be futile;

(3) As to Plaintiff's claims against the Moving Defendants under *42 U.S.C. § 1983* and the New York State Constitution, the motion (a) should be granted under *Rule 12(b)(6)* with prejudice to the extent such claims are grounded in constitutional protections related to criminal process or incarceration (as Plaintiff does not assert that he was criminally prosecuted), but (b) otherwise should be granted under *Rule 12(b)(6)* without prejudice to replead; and

(4) As to Plaintiff's claims against the Moving Defendants under (a) the Rehabilitation Act of 1973, (b) the Fair Housing Act, and (c) *Section 26-521* of the New York City Administrative Code, the motion to dismiss should be denied.

I further recommend that the Moving Defendants' motion under *Rule 12(b)(6)* not be converted to one for summary judgment, as to do so would be premature, and that Plaintiff's so-called "summary judgment motion" (Dkt. 42) be construed as his opposition to the motion to **[*55]** dismiss and terminated on the Docket to the extent it is reflected there as a separate motion.

Pursuant to *28 U.S.C. § 636(b)(1)* and *Rule 72(b) of the Federal Rules of Civil Procedure*, the parties shall have fourteen (14) days from service of this Report to file written objections. *See also* *Fed. R. Civ. P. 6* (allowing three (3) additional days for service by mail). Such objections, and any responses to objections, shall be filed with the Clerk of Court, with courtesy copies delivered to the chambers of the Honorable Paul G. Gardephe, United States Courthouse, 500 Pearl Street, Room 2204, New York, New York 10007, and to the chambers of the undersigned, United States Courthouse, 500 Pearl Street, Room 1660, New York, New York 10007. Any requests for an extension of time for filing objections must be directed to Judge Gardephe. FAILURE TO FILE OBJECTIONS WITHIN FOURTEEN (14) DAYS WILL RESULT IN A WAIVER OF OBJECTIONS AND WILL PRECLUDE APPELLATE REVIEW. *See* *Thomas v. Arn, 474 U.S. 140, 155, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *IUE AFL-CIO Pension Fund v. Herrmann, 9 F.3d 1049, 1054 (2d Cir. 1993)*; *Frank v. Johnson, 968 F.2d 298, 300 (2d Cir. 1992)*; *Wesolek v. Canadair Ltd., 838 F.2d 55, 58 (2d Cir. 1988)*; *McCarthy v. Manson, 714 F.2d 234, 237-38 (2d Cir. 1983)*.

If Plaintiff does not have access to cases cited herein that are reported only on Westlaw or LexisNexis, he may request copies from Defendants' counsel. *See* *Local Civ. R. 7.2* ("Upon request, counsel shall provide the *pro se* litigant with copies of [cases and other authorities that are unpublished or reported exclusively on computerized **[*56]** databases that are] cited in a decision of the Court and were not previously cited by any party").

Opinion

MEMORANDUM

Before the Court is Defendants' Motion to Dismiss. (Doc. No. 23). Plaintiff filed a Response (Doc. No. 28), Defendants filed a Reply (Doc. No. 31), and Plaintiff filed a Sur-Reply (Doc. No. 37-1). Also pending before the Court is Plaintiff's Motion for Temporary Restraining Order and/or Preliminary Injunction. (Doc. No. 44). Defendants filed **[*2]** a Response (Doc. No. 49) and Plaintiff filed a Reply (Doc. No. 56). The Court previously denied Plaintiff's motion for a temporary restraining order (Doc. No. 47) and now considers the Motion for Preliminary Injunction.

Plaintiff Brian Manookian is an attorney whose license to practice law in Tennessee was temporarily suspended on September 21, 2018, by the Supreme Court of Tennessee. The Tennessee Supreme Court found that Plaintiff represented a "substantial threat to the public." Order of Temp. Suspension, *In re: Brian Phillip Manookian, BPR #026455, No. M2018-01711-SC-BAR-BP, 2018 Tenn. LEXIS 780 (Tenn. Sept. 21, 2018)* (Doc. No. 24-1).

Plaintiff's claims the Board of Professional Responsibility of the Supreme Court of Tennessee ("BPR") filed the petition for temporary suspension in retaliation for Plaintiff's suit against a state court judge filed one day earlier. In addition, he claims the temporary suspension is a conspiracy by Defendants, who are individual members of the BPR, to restrain trade and exclude Plaintiff from the legal market in Tennessee. Plaintiff filed this case on April 29, 2019, asserting claims under *42 U.S.C. § 1983* for violation of his rights to free speech, due process, and equal protection, and **[*3]** a claim for conspiracy to restrain trade under the *Sherman Act*, *15 U.S.C. § 1*.

I. PROCEDURAL BACKGROUND

After filing this case, the disciplinary proceedings at the Tennessee Supreme Court and before the BPR have proceeded.[1] After the September 21, 2018 Order of Temporary Suspension, Plaintiff sought dissolution of the temporary suspension three times—on November 21, 2018, February 27, 2019, and April 9, 2019. At the direction of the Tennessee Supreme Court, a panel held hearings on Plaintiff's petitions for dissolution and issued reports and recommendations. The Tennessee Supreme Court adopted the recommendations of the panels, denying the first two petitions, and granting the third petition on May 17, 2019, subject to Plaintiff's "ongoing compliance with conditions set forth in the panel's Report and Recommendation." Shortly after the initial order of temporary suspension was dissolved, on June 24, 2019, the BPR filed a petition for reinstatement of the temporary suspension. The Tennessee Supreme Court referred the matter for a hearing to the panel that had heard Plaintiff's second and third petitions for dissolution and ordered the panel to submit a report and recommendation on the petition for **[*4]** reinstatement of the temporary suspension. The BPR filed a supplemental petition on August 6, 2019. This petition was referred for hearing and report and recommendation to the same panel. After several delays, the panel conducted a hearing on September 26, 2019, and filed its report and recommendation on October 7, 2019. Plaintiff filed a "Motion to Dismiss Supplemental Petition to Reinstate Temporary Suspension and Objection to the Report and Recommendation" and a supplement to the motion to dismiss. In these motions he argued that the petition does not provide a sufficient basis to reinstate the temporary suspension, that two members of the panel should have recused themselves because they are defendants in this action, and that Tennessee Supreme Court Rule 9, section 12.3, governing attorney disciplinary enforcement, is unconstitutional. The Tennessee Supreme Court denied Plaintiff's motion to dismiss and adopted the panel's finding that Plaintiff "violated a condition of the Order Granting Petition for Dissolution of Order of Temporary Suspension." The court also found Plaintiff "poses a threat of substantial harm to the public" and determined that it "should reinstate the temporary suspension of [Plaintiff's] law license." **[*5]**

The same day the Tennessee Supreme Court issued the Order reinstating Plaintiff's temporary suspension, Plaintiff again petitioned that Court for dissolution of the temporary suspension, which the Court denied on October 17, 2019. In the October 17, 2019 Order, the Tennessee Supreme Court stated, "The most recent hearing demonstrated ample basis for determining that Mr. Manookian poses a threat of substantial harm to the public and for the reinstatement of his temporary suspension." The Court acknowledged pending disciplinary charges and

---

[1] The procedural background of the underlying disciplinary proceeding is summarized from the Tennessee Supreme Court's October 11, 2019 Order Reinstating Temporary Suspension. *In re Brian Phillip Manookian, BPR #026455*, No. M2019-00630-SC-BAR-BP (Tenn. Oct. 11, 2019) (recounting procedural history) and from the Order Denying Petition for Dissolution of Order of Temporary Suspension, *In re Brian Phillip Manookian, BPR #026455*, No. M2019-00630-SC-BAR-BP (Tenn. Oct. 17, 2019). The details of the complaints in the disciplinary proceeding are not relevant to the Court's opinion.

directed that "Mr. Manookian and the Board shall proceed with all due speed toward ultimate resolution of the petition for discipline currently pending before the Board." *Id.*

On October 26, 2019, Plaintiff filed with this Court a Motion for Temporary Restraining Order and/or Preliminary Injunction. (Doc. No. 44). Through that motion, Plaintiff asked the Court to restrain Defendants from "again 'temporarily' suspending Mr. Manookian's law license without due process" and enjoin Defendants from "further retaliating against him for his protected *First Amendment* activity." (*Id.*) The Court **[*6]** denied Plaintiff's motion for a temporary restraining order on grounds that Plaintiff did not show immediate irreparable harm. (Doc. No. 47).

Plaintiff filed this case against the attorney members of the BPR in their official and individual capacities. He alleges the actions of the BPR constitute a violation of federal antitrust regulations, and violations of his rights to free speech, due process and equal protection. He alleges that the temporary suspension mechanism in Tennessee Supreme Court Rule 9, section 12.3 is unconstitutional on its face and as applied to him. Defendants' moved to dismiss the complaint on grounds of sovereign immunity, *Parker* immunity, and quasi-judicial immunity, and argue that the *Younger* abstention doctrine bars involvement in ongoing attorney disciplinary proceedings.

II. STANDARD OF REVIEW[2]

In deciding a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, a court must take all the factual allegations in the complaint as true. *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. To survive a motion to dismiss, a complaint must contain sufficient factual allegations, accepted as true, to state a claim for relief that is plausible on its face. *Id.* A claim has facial plausibility when the plaintiff pleads facts that allow the court to draw the reasonable inference that the defendant **[*7]** is liable for the misconduct alleged. *Id.* In reviewing a motion to dismiss, the Court construes the complaint in the light most favorable to the plaintiff, accepts its allegations as true, and draws all reasonable inferences in favor of the plaintiff. *Directv, Inc. v. Treesh, 487 F.3d 471, 476 (6th Cir. 2007)*.

In considering a *Rule 12(b)(6)* motion, the Court may consider the complaint and any exhibits attached thereto, public records, items appearing in the record of the case and exhibits attached to Defendant's motion to dismiss so long as they are referred to in the Complaint and are central to the claims. *Bassett v. National Collegiate Athletic Assn., 528 F.3d 426, 430 (6th Cir. 2008)*; *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)* (on a motion to dismiss the Court may consider documents referenced in a plaintiff's complaint that are central to plaintiff's claims, matters of which a court may take judicial notice, documents that are a matter of public record, and letters that constitute decisions of a government agency). The Court has considered the record of the disciplinary proceedings before the Supreme Court of Tennessee as referred to in the Complaint and as public records.

III. ANALYSIS

Defendants assert a variety of abstention and immunity defense as a bar to Plaintiff's claims. Defendants argue: (1) the *Younger v. Harris* abstention doctrine bars claims arising out of **[*8]** the ongoing state disciplinary proceeding; (2) claims for damages in their official capacity are barred by sovereign immunity; (3) claims for damages in their individual capacity are barred by quasi-judicial immunity; and (4) antitrust claims are barred by *Parker* immunity.[3]

---

[2] Defendants' Motion to Dismiss is filed pursuant to both *Rule 12(b)(1)* and *12(b)(6)*. The Court did not reach the sovereign immunity defense and accordingly decided the Motion under the standard prescribed by *Rule 12(b)(6)*.

[3] Defendants also raise the *Rooker-Feldman* Doctrine as a bar to review of state court decisions "[t]o the extent the state disciplinary proceedings have been concluded." As the state disciplinary proceedings have not concluded and the Court finds Plaintiff's claims are otherwise barred, the Court does not reach the *Rooker-Feldman* issue.

A. *Parker* Immunity Bars Plaintiff's Antitrust Claim

Plaintiff claims "the BPR, along with individual market-participant defendants, entered into an agreement to exclude one of the state's most competitively successful medical malpractice lawyers, Mr. Manookian, from the market." (Comp., Doc. No. 1, ¶ 132). Plaintiff claims the alleged agreement was the decision to "punish" Plaintiff with a temporary suspension of his law license, to publicize the suspension to the media, and to "resist all efforts by Mr. Manookian to petition for dissolution of the suspension." (*Id.*, ¶ 134). Plaintiff seeks treble damages under *15 U.S.C. § 15* and injunctive relief under *15 U.S.C. § 26*. (*Id.*, ¶ 145).

Defendants urge dismissal of Plaintiff's Sherman Act claims on the ground that the action complained of—the temporary suspension—was an act of the Tennessee Supreme Court and entitled to sovereign immunity under the *Eleventh Amendment* and state-action immunity **[*9]** under *Parker*. Plaintiff argues that the BPR is not entitled to state-action immunity because it did not act pursuant to clearly articulated state policy and was not actively supervised by the Supreme Court.

In *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, the Supreme Court, relying on principles of federalism and state sovereignty, interpreted the antitrust laws to confer immunity on anticompetitive conduct by the States when acting in their sovereign capacity. *N.C. State Bd. of Dental Examiners, 574 U.S. 494, 135 S. Ct. 1101, 1110, 191 L. Ed. 2d 35 (2015)*. Without *Parker* immunity, "federal ***antitrust law*** would impose an impermissible burden on the States' power" to subordinate market competition to "other values a State may deem fundamental." *Id. at 1109*. "[A] decision of a state supreme court, acting legislatively rather than judicially, is exempt from Sherman Act liability as state action." *Hoover v. Ronwin, 466 U.S. 558, 568, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984)* (citing *Goldfarb v. Virginia State Bar, 421 U.S. 773, 790, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975))*; *see also*, N.C. State Bd. *135 S. Ct. at 1110* ("State legislation and 'decision[s] of a state supreme court, acting legislatively rather than judicially,' ... '*ipso facto* are exempt from the operation of the antitrust laws' because they are an undoubted exercise of state sovereign authority.").

If the action is not "an exercise of state sovereign authority," but is instead a non-sovereign state agency controlled by active market participants, state-action immunity applies **[*10]** only if the actions meets the two-part *Midcal*[4] test as articulated by the Supreme Court in *N.C. State Board. 135 S. Ct. at 1112*. Under *Midcal*, "[a] state law or regulatory scheme cannot be the basis for antitrust immunity unless, first, the State has articulated a clear ... policy to allow the anticompetitive conduct, and second, the State provides active supervision of [the] anticompetitive conduct." *Id.* (quoting *F.T.C. v. Ticor Title Ins. Co., 504 U.S. 621, 634, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992))*.

Here, the conduct complained of is that of the Tennessee Supreme Court. The Tennessee Supreme Court issued the Order of Temporary Suspension. "Where the conduct is that of the sovereign itself, ... the danger of unauthorized restraint of trade does not arise." *Hoover, 466 U.S. at 569*. The Tennessee Supreme Court Rules specify that the Disciplinary Counsel may petition the court for an order of temporary suspension, but only the Tennessee Supreme Court can temporarily suspend an attorney. Tenn.Sup. Ct. R. 9, § 12.3. At best, Defendants' authority under the Rules was limited to petitioning for an order of temporary suspension and filing reports and recommendations with the Tennessee Supreme Court.[5] Ultimate action on the petition or report and recommendation is vested solely with the Tennessee Supreme Court.

The Supreme Court considered a similar circumstance **[*11]** in *Hoover v. Ronwin, 466 U.S. 558, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984)*. In *Hoover*, the plaintiff alleged anticompetitive conduct with regard to bar admission on the

---

[4] *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*.

[5] The Rules do not even appear to confer this much authority on the members of the BPR. The Rules provide that a petition for temporary suspension may be made by Disciplinary Counsel, who reports to the BPR. *Tenn. Ct. App. R. 9*, §§ 7.1, 12.3. The Board or a panel conducts hearings on a petition for dissolution of temporary suspension and files a report and recommendation with the Tennessee Supreme Court. Id. at § 12.3(d).

part of individual members of Arizona Supreme Court's Committee on Examinations and Admission. The Supreme Court found that although the Arizona Supreme Court had "necessarily delegated the administration of the admissions process to the Committee," because the court itself had made the final decision to admit or deny admission to practice, the "conduct [the plaintiff] challenges was in reality that of the Arizona Supreme Court" and "is therefore exempt from Sherman Act liability under the state-action doctrine of *Parker v. Brown." Id. at 573*. In *Hoover*, the Supreme Court stated that it did not need to address issues of "clear articulation" and "active supervision" when the conduct at issue was in fact that of the Supreme Court. *Id. at 569*.

The Court finds that the *Midcal* test does not apply because the anticompetitive activity complained of was that of the Tennessee Supreme Court which is *ipso facto* exempt from the antitrust laws. Plaintiff cannot evade state-action immunity by suing only the members of the BPR and not the sovereign entity. "If a government actor is independently responsible for causing the **[*12]** alleged antitrust injury, 'once [it] is determined to be immune ..., the immunity should be extended to include private parties acting under [its] direction." *Edinboro College Park Apartments v. Edinboro Univ., 850 F.3d 567, 574 (3d Cir. 2017)* (quoting *Zimomra v. Alamo Rent-A-Car, Inc. 111 F.3d 1495, 1500 (10th Cir. 1997))*. "Otherwise, plaintiffs could sue only the private parties and by winning antitrust judgments against then, could thwart state policies as if there were no state [i]mmunity." *Id.* (quoting *A.D. Bedell Wholesale Co., Inc. v. Philip Morris Inc., 263 F.3d 239, 256 (3d Cir. 2001))*; *see also, Hoover, 466 U.S. 569* (alleged anticompetitive conduct by individual members of the bar admissions committee was subject to Parker immunity because the actions complained of were taken by the state supreme court, a sovereign entity).

Although Plaintiff has brought suit against the individual members of the BPR, the anticompetitive action complained of—temporary suspension and dissolution of temporary suspension—was that of the Tennessee Supreme Court, which is immune from antitrust laws under the claims presented in this case.

B. Absolute Quasi-Judicial Immunity Bars Claims Against Defendants

Defendants assert they are absolutely immune to suits for damages under the doctrine of quasi-judicial immunity. The Court agrees.[6]

Judges are entitled to absolute judicial immunity from suits for money damages for all actions taken in the judge's official **[*13]** capacity, unless they were taken in the complete absence of jurisdiction. *Bush v. Rauch, 38 F.3d 842, 847 (6th Cir. 1994)*. "[S]uch immunity has also been extended to non-judicial officers performing 'quasi-judicial' duties." *Quatkemeyer v. Kentucky Bd. of Med. Licensure, 506 F. App'x 342, 345 (6th Cir. 2012)*. "Quasi-judicial immunity extends to those persons performing tasks so integral or intertwined with the judicial process that these persons are considered an arm of the judicial officer who is immune." *Bush, 38 F.3d at 847*. Quasi-judicial immunity has been extended to members of professional licensing or disciplinary boards that perform investigatory, prosecutorial or judicial functions. *See Moncier v. Jones, 557 F. App'x 407, 409 (6th Cir. 2014)* (holding that Chief Disciplinary Counsel for the Board was entitled to quasi-judicial immunity); *Quatkemeyer, 506 F. App'x at 345-49* (members of the Board of Medical Licensure, an agency of the state, were entitled to quasi-judicial immunity); *Watts v. Burkhart, 978 F.2d 269, 276 (6th Cir. 1992)* (members of state medical licensing board entitled to absolute immunity).

In *Moncier v. Jones*, the Sixth Circuit affirmed dismissal of claims for damages against the Chief Disciplinary Counsel of the Tennessee Board of Professional Responsibility, when the conduct alleged to have violated the plaintiff's civil rights occurred when the defendant was performing her official role as Chief Disciplinary Counsel. *557 Fed. Appx. 407, 409 (6th Cir. 2014)*. The same conclusion is warranted here. The conduct **[*14]** alleged to have

[6] Plaintiff only seeks damages against Defendants in their individual capacities for the *Section 1983* claims. However, to the extent damages are sought against Defendants in their official capacities, such claims are barred by the *Eleventh Amendment*. *See Moncier v. Jones, 557 F. App'x 407, 409 (6th Cir. 2014)* ("[T]he *Eleventh Amendment* bars official-capacity claims for damages against state officials") (citing *Will v. Mich. Dept. of State Police, 491 U.S. 58, 71, 109 S. Ct. 2304, 105 L. Ed. 2d 45 (1989))*.

violated Defendant's civil rights—petitioning the Tennessee Supreme Court for temporary suspension of Plaintiff's law license, conducting hearings at the direction of the Court, and drafting reports and recommendations—falls squarely within the duties and obligations delegated by the Tennessee Supreme Court. *See* *Tenn. Sup. Ct. R. 9*, *§ 4*. Accordingly, Defendants are entitled to absolute quasi-judicial immunity from Plaintiff's claims for damages against them personally.

C. The *Younger v. Harris* Abstention Doctrine Bars Involvement in the Ongoing State Disciplinary Proceedings

Defendants argue the Court should abstain from review of the merits of this case pursuant to *Younger v. Harris, 401 U.S. 37, 91 S. Ct. 746, 27 L. Ed. 2d 669 (1971)*. "In *Younger*, the United States Supreme Court counseled federal courts to abstain from enjoining certain pending state court criminal proceedings." *Danner v. Bd of Prof'l Responsibility of the Tenn. Sup. Ct, 277 F. App'x 575, 577 (6th Cir. 2008)*. "This doctrine is borne out of a 'proper respect for state functions, a recognition of the fact that the entire country is made up of a Union of separate state governments, and a continuance of the belief that the National Government will fare best if the States and their institutions are left free to perform their separate functions in their separate ways." *Id.* (quoting *Younger, 401 U.S. at 44*). The doctrine **[*15]** has been extended to ongoing civil proceedings and ongoing state administrative proceedings. *Id.* (citing *Huffman v. Pursue, Ltd., 420 U.S. 592, 95 S. Ct. 1200, 43 L. Ed. 2d 482 (1975)*; *Middlesex Cty Ethics Comm. v. Garden State Bar Ass'n, 457 U.S. 423, 102 S. Ct. 2515, 73 L. Ed. 2d 116 (1982))*. *Younger* counsels that a federal district court should abstain when: "(1) the underlying proceedings constitute an ongoing state judicial proceeding; (2) the proceedings implicate important state interests; and (3) there is an adequate opportunity to raise constitutional challenges in the course of the underlying proceeding." *Danner, 277 F. App'x at 578*.

Plaintiff does not challenge that the State has an important interest in regulating the practice of law or that there is adequate opportunity to raise constitutional challenges in the courts of the underlying proceeding.[7] Instead, Plaintiff argues that *Younger* abstention does not apply because the underlying proceedings are not "ongoing judicial proceedings," and that the claims at issue fall within an exception to the application of *Younger* because the members of the BPR are biased.

State bar disciplinary proceedings are "judicial proceedings." *See* *Danner, 277 F. App'x at 578-79*; *Fieger v. Thomas, 74 F.3d 740 (6th Cir. 1996)* (holding a board was enforcing rules of professional conduct was performing an adjudicative function and thus satisfied the first requirement for *Younger*); *Berger v. Cuyahoga Bar Ass'n., 983 F.2d 718 (6th Cir. 1993)* (ruling that when **[*16]** a state supreme court is the ultimate decision maker in attorney discipline proceedings, those proceedings are judicial in nature for *Younger* purposes); *Squire v. Coughlan, 469 F.3d 551 (6th Cir. 2006)* (investigations into judicial misconduct are an adjudicative function for *Younger* purposes). In *Danner*, the Sixth Circuit specifically considered disciplinary proceedings of the Tennessee Board of Professional Responsibility and held that "the Tennessee disciplinary proceedings at issue are judicial in nature." *277 F. App'x at 579*.

If the state proceeding was pending at the time of the filing, the matter is considered "ongoing." *Id. at 579*. The action "remains pending until the litigant has exhausted his state appellate remedies." *Id.* (quoting *Huffman, 420 U.S. at 609*). Plaintiff argues that the proceedings are not "ongoing" because the Order of Temporary Suspension has already been entered and that because the temporary suspension was "not brought in conjunction with any underlying disciplinary action, the proceedings regarding the now-dissolved suspension are not ongoing now." (Pl. Resp., Doc. No. 28 at 23). This argument is flatly contradicted by the long procedural history in the disciplinary proceeding recounted by the Tennessee Supreme Court. *See In re Manookian*, BPR #026455, No. **[*17]** M2019-00630-SC-BAR-BP (Tenn. Oct. 11, 2019). This history shows that not only was the disciplinary proceeding pending

[7] During the course of the underlying disciplinary proceedings before the Tennessee Supreme Court, Plaintiff raised and the Tennessee Supreme Court rejected the constitutional challenge to Rule 9, § 12.3. *See* Order Reinstating Temp. Suspension, *In re Brian Phillip Manookian*, BPR #026455, No. M2019-00630-SC-BAR-BP (Tenn. Oct. 11, 2019).

at the time the complaint was filed, it is still pending. Moreover, the October 17, 2019 Order Denying Petition for Dissolution of Order of Temporary Suspension clearly indicates that the temporary suspension is part of an underlying disciplinary complaint that is unresolved. *In re Manookian*, BPR #026455, No. M2019-00630-SCBAR-BP (Tenn. Oct. 17, 2019) (ordering the parties to "proceed with all due speed toward ultimate resolution of the petition for discipline currently pending before the Board").

Even Plaintiff recognizes, in the context of a claim preclusion, that the proceedings are not yet final, arguing that "there has simply not been a final state-court judgment for preclusion purposes because the underlying disciplinary charges—including those from the original suspension have not been heard." (Pl. Reply, Doc. No. 56 at 1). The Court does not suggest Plaintiff is disingenuous in his arguments. Rather, the evolution of Plaintiff's argument reflects the ongoing nature of the disciplinary proceedings at issue and underscores the rationale for abstention from those **[*18]** proceedings.

Plaintiff maintains that even if the prerequisites for *Younger* abstention have been met, the following exceptions to the doctrine allow the case to proceed: bad faith, harassment, and bias. Plaintiff alleges the initial temporary suspension was initiated in retaliation for Plaintiff's filing a lawsuit against a state court judge and issuing a subpoena to the BPR and that thereafter "Defendants and their agents have engaged in an unprecedented, aggressive pursuit of [Plaintiff] since he first sued a state court judge and served a subpoena on the board in the fall of 2018. Specifically they have: (i) pursued a temporary suspension based on protected out-of-court speech; (ii) failed to bring or adjudicate underlying disciplinary charges for months, asserted that [Plaintiff] had the burden of proof to dissolve the suspension; (iii) engaged in extensive gamesmanship to prevent hearings that would actually put them to their proof; (iv) brought new disciplinary petitions immediately after a suspension was dissolved; (v) filed a new petition to reinstate the temporary suspension based on flagrantly baseless allegations of noncompliance and fabricated misconduct complaints; (vi) **[*19]** refused to recuse themselves; and (vii) disregarded evidence that contradicted their preordained result." (Pl. Br. on Mot. for Prelim. Inj., Doc. No. 43 at 13). The allegations of bias are directed at the alleged financial incentive for the Board Members to remove Plaintiff as competition in the legal market, and the three-member panel that held a hearing on the petition to reinstate temporary suspension when two of the members of the panel are defendants in this case.

"While bias is an exception to *Younger* abstention, it is an extraordinary one, and the petitioner alleging such must offer 'actual evidence to overcome the presumption of honesty and integrity in those serving as adjudicators.'" *Danner, 277 F. App'x at 580*. *Younger* "requires more than mere allegation and more than a conclusory finding to bring a case within the harassment exception. It appears that such a finding must be supported by specific evidence from which it can be inferred that state officials have been enforcing the statute against the plaintiffs in bad faith for purposes of harassment." *Grandco Corp. v. Rochford, 536 F.2d 197, 203 (7th Cir. 1976))*. Exceptions to *Younger* abstention have been interpreted narrowly. *Zalman v. Armstrong, 802 F.2d 199, 205 (6th Cir. 1986)*.

Importantly, the body that effected the temporary suspension was not the BPR, but **[*20]** the Tennessee Supreme Court. The Rules provide that a petition for temporary suspension is made by Disciplinary Counsel to the Tennessee Supreme Court and that "the Court may issue an order ... temporarily suspending said attorney." Tenn. Sup. Ct. R. 9, § 12.3. As the temporary suspension was not ultimately carried out by the BPR, any alleged bias imputed to the BPR is irrelevant, or, at a minimum, would be cured when the Tennessee Supreme Court reviews the petition. Here, the Tennessee Supreme Court specifically found on more than one occasion that Plaintiff posed a threat of substantial harm to the public that justified the temporary suspension of his law license. There is no allegation that the Tennessee Supreme Court reached this conclusion because of its bias against Plaintiff.

The case cited by Plaintiff, *Gibson v. Berryhill, 411 U.S. 564, 93 S. Ct. 1689, 36 L. Ed. 2d 488 (1973)*, involved a level of institutional bias not established by Plaintiff's conclusory allegations against individual BPR members. *Gibson* involved a state optometry board on which only independent optometrists were eligible to serve. Plaintiffs were licensed optometrists employed by corporations (i.e. not independent optometrists) who sought to enjoin license revocation hearings before the state optometry **[*21]** board on charges of unprofessional conduct. The alleged unprofessional conduct was employment by a corporation. At the time, almost half of the state's optometrists were employed by corporations. The Supreme Court noted that *Younger* "presupposes the opportunity to raise and have timely decided by a competent state tribunal the federal issues involved" and that the state board was "incompetent by reason of bias to adjudicate the issues pending before it." *Id. at 577-78*. The board, which was composed entirely of independent optometrists, sought to revoke the licenses of "all optometrists in the State who were employed by business corporations ..., and that these optometrists accounted for nearly half of all the optometrists practicing in Alabama." *Id. at 578*. The Supreme Court affirmed that "the pecuniary interest of the members of the Board of Optometry had sufficient substance to disqualify them, given the context in which the case arose." *Id. at 579*.

The facts alleged here do not present such an extreme circumstance. First, unlike in the *Gibson* where the Board of Optometry had the authority to suspend licenses, the temporary suspensions at issue are made by the Tennessee Supreme Court in the first instance on petition **[*22]** by the Disciplinary Counsel and later on report and recommendation by a three-member panel. At no point in the proceedings to date did the BPR temporarily suspend Plaintiff's law license, nor could it. More importantly, however, the pecuniary interest of the board in *Gibson* is not present here. In *Gibson*, the board effectively sought to revoke licenses of half of the optometrists in the state when those to be excluded from practice were also categorically excluded from participation on the board.

The BPR does not have a pecuniary interest comparable to that of the board in *Gibson* that would disqualify them from hearing the disciplinary charges. The temporary suspension is directed at a single attorney, not an entire category of practitioners; nor is the Rule of Professional Conduct on which Plaintiff's suspension was based a rule that affects Plaintiff but not any of the members of the BPR. Nor is there any indication that the members of the BPR have a pecuniary interest in Plaintiff's suspension sufficient to render the BPR incompetent to adjudicate complaints against Plaintiff. There are over 18,000 licensed attorneys in Tennessee.[8] It strains credulity to conclude that the individual **[*23]** member of the BPR would benefit substantially from the removal of a single attorney, no matter how successful he is.

Moreover, it appears from the record in the disciplinary proceedings before the Tennessee Supreme Court, that Plaintiff is able to raise complaints of bias before the Tennessee Supreme Court. Indeed, in his objections to the report and recommendation of the panel recommending reimposition of the temporary suspension, Plaintiff objected to the alleged bias of members of the panel. The Tennessee Supreme Court considered and overruled the objection.

Finally, Plaintiff argues that *Younger* abstention does not apply to claims for prospective equitable relief. Plaintiff claims he "specifically seeks prospective relief unrelated to the proceedings that have already occurred." (Pl. Resp., Doc. No. 28 at 22). He requests: (1) that the Court "enjoin defendants from utilizing the 'good cause' standard of § 12.3 or otherwise placing the burden of proof on Mr. Manookian or others"; (2) "enjoin defendants from violating their own procedural rules"; and (3) "enjoin defendants from suspending Mr. Manookian's law license based upon any evidence that it not admissible under the rules of evidence." **[*24]** Although in some circumstances, *Younger* does not preclude prospective equitable relief, the injunctive relief sought here directly and unequivocally applies to the ongoing disciplinary proceedings and is precisely the sort of interference in ongoing state proceedings *Younger* seeks to avoid.

The case cited by Plaintiff, *Wooley v. Maynard, 430 U.S. 705, 710, 97 S. Ct. 1428, 51 L. Ed. 2d 752 (1977)*, involved an entirely different procedural posture. In *Wooley*, the Plaintiff did not seek prospective relief regarding an ongoing case, but to enjoin future prosecution under a state statute he argued was unconstitutional. The *Wooley* plaintiff had been convicted of violating the state statute multiple times and served time in jail rather than pay a fine, but he did not seek to overturn his previous convictions or expunge his criminal record or any other action that would touch upon the concluded criminal proceedings. Instead, the plaintiff sought to enjoin the state from prosecuting him again. In contrast, the underlying proceeding Plaintiff seeks to affect is still ongoing. As Plaintiff stated, "[T]he Rule contemplates that further proceedings should be adjudicated ... the charges underlying the original suspension have not yet been decided." (Pl. Reply, Doc. No. 56 **[*25]** at 1).

---

[8] *See* American Bar Association National Lawyer Population Survey (2019), available at https://www.americanbar.org/content/dam/aba/administrative/market_research/national-lawyer-population-by-state-2019.pdf

Based on the foregoing, the Court finds that abstention pursuant to *Younger v. Harris* is warranted.

IV. CONCLUSION

For the reasons stated, Defendants' Motion to Dismiss (Doc. No. 23) is **GRANTED, in part**. Plaintiff's antitrust claim in Court IV is subject to *Parker* immunity and is **DISMISSED WITH PREJUDICE**. The claims for damages against Defendants under *42 U.S.C. § 1983* in Counts I, II, and III are barred by quasi-judicial immunity and are **DISMISSED WITH PREJUDICE**. The remaining claims for injunctive and declaratory relief are **STAYED** pursuant to *Younger v. Harris. See Quackenbush, 517 U.S. at 721* (recognizing the court's power to stay cases based on abstention principles where the relief sought is equitable in nature). In light of the ruling on Defendants' Motion to Dismiss, Plaintiff's Motion for Preliminary Injunction (Doc. No. 44) is **MOOT**.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8(a)(2) requires a complaint to include a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. A complaint that fails to meet this standard may be dismissed pursuant to *Fed. R. Civ. P. 12(b)(6)*. *Fed. R. Civ. P. 12(b)(6)*. To overcome a *Rule 12(b)(6)* motion to dismiss, a plaintiff's factual allegations in the complaint must suggest that the claim has at least a plausible chance of success. The court accepts factual allegations in the complaint as true and construes the pleadings in the light most favorable to the nonmoving party. But allegations in a complaint may not simply recite the elements of a cause of action and must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal

HN2[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

As a general matter, agreements between competitors — what are known as horizontal agreements — are suspect from an antitrust perspective. That being said, not all horizontal agreements are antitrust violations. Joint ventures or other business collaborations between competitors can actually be procompetitive — offering to the market a product that could not otherwise be offered in the absence of the joint undertaking.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The creation of a joint venture is not deemed invalid per se but rather is evaluated under the rule of reason. In contrast, where there is, in fact, a legitimate joint venture, and the only issue is whether specific conduct of the joint venture violates ***antitrust law***, then a court must decide what mode of analysis to apply: the rule of per se illegality or the rule of reason.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] **Sherman Act, Claims**

Cases often address joint ventures in the context of § 1 of the Sherman Act since § 1 covers agreements to restrain trade. There is no reason not to apply a similar analysis to § 2 claims for conspiracy to monopolize as such claims require a showing of anticompetitive conduct.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN5[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In addressing whether restraints are valid or invalid under ***antitrust law***, a court is ordinarily confronted with the question of whether to apply the rule of per se illegality or instead the rule of reason. The decision of what mode of analysis to apply is entirely a question of law for the court, although that legal question might involve factual disputes.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

When restraints on competition are essential if the product is to be available at all, per se rules of illegality are inapplicable, and instead the restraint must be judged according to the flexible Rule of Reason.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN7[] Regulated Practices, Price Fixing & Restraints of Trade

Where a core restraint is at issue, the ancillary restraints doctrine is entirely inapplicable. The U.S. Court of Appeals for the Sixth Circuit has indicated that core restraints are those that are integral to the running of the joint venture whereas a restraint is ancillary if it bears a reasonable relationship to the joint venture's success.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN8[] Regulated Practices, Price Fixing & Restraints of Trade

The ancillary restraints doctrine governs the validity of restrictions imposed by a legitimate business collaboration, such as a business association or joint venture, on nonventure activities — activities outside of the joint venture.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN9[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

Agreements between competitors to allocate territories to minimize competition are illegal.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

HN10[] Ownership & Transfer of Rights, Licenses

What patent law permits (i.e., exclusive licenses) is not dispositive of legality for antitrust purposes. A patent license may be impermissibly anti-competitive.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN11[] Regulated Practices, Price Fixing & Restraints of Trade

In the antitrust context, Twombly and Iqbal require specific allegations plausibly suggesting a conspiracy (or anti-competitive agreement). Without more, parallel conduct does not suggest conspiracy; at the pleading stage, there must be allegations plausibly suggesting (not merely consistent with) agreement.

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN12[] Private Actions, Remedies

Antitrust injury consists of four elements: (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN13[] **Actual Monopolization, Claims**

Sherman Act § 2 law does not condemn the success of a monopolist where it is based on invention and innovation. Thus, as a general rule, courts are properly very skeptical about claims that competition has been harmed by a dominant firm's product design changes. But changes in product design are not immune from antitrust scrutiny and in certain cases may constitute an unlawful means of maintaining a monopoly under § 2.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] **Actual Monopolization, Claims**

Where a design change does improve a product by providing a new benefit to consumers, it does not violate Sherman Act § 2 absent some associated anticompetitive conduct.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN15[] **Sherman Act, Claims**

Antitrust claims (whether based on an unreasonable restraint of trade under Sherman Act § 1 or monopolization under § 2, and whether based on federal or state law) require the definition of a product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN16[] **Relevant Market, Product Market Definition**

A product market encompasses the product at issue as well as all economic substitutes for the product. The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Elasticity of demand is a concept used to signify the relationship between changes in price and responsive changes in demand.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN17[] **Relevant Market, Product Market Definition**

What the appropriate product market is depends on what anticompetitive harm is being claimed. Defining a product market is simply a way to determine whether a defendant has market power. Market power, in turn, is simply a way to assess whether the defendant's conduct has anticompetitive effects.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

Civil Procedure > Special Proceedings > Class Actions

HN18[] **Federal & State Interrelationships, Choice of Law**

The law of any particular state may not be applied to a nationwide class unless (1) the chosen state's law does not conflict with the law of another jurisdiction that has an interest in the case, and (2) the chosen state has a significant contact or significant aggregation of contacts to claims asserted by each member of the plaintiff class such that the choice of that state's law is not arbitrary or unfair.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN19[] **Purchasers, Indirect Purchasers**

There is no dispute that, under federal ***antitrust law***, indirect purchasers are not entitled to damages.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN20[] **Regulated Practices, Price Fixing & Restraints of Trade**

Anticompetitive conduct by a defendant within a state that is related to a plaintiff's alleged injuries and is not slight and casual establishes a significant aggregation of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair. Specifically, California's Cartwright Act can be lawfully applied without violating a defendant's due process rights when more than a de minimis amount of that defendant's alleged conspiratorial activity leading to the sale of price-fixed goods to plaintiffs took place in California. Such a defendant cannot reasonably complain that the application of California law is arbitrary or unfair when its alleged conspiracy took place, at least in part, in California.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

Constitutional Law > Bill of Rights > Fundamental Rights > Procedural Due Process

HN21[] **Choice of Law, Governmental Interests**

The Due Process Clause does nothing but circumscribe the universe of state laws that can be constitutionally applied to a given case, and objections based on the interests of other states are more properly raised under a choice of law analysis.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN22[] **Class Members, Named Members**

Once a named plaintiff demonstrates individual standing for a claim, the standing inquiry is satisfied and any issue regarding the relationship between the named plaintiff and the members of the putative class is relevant only to class certification, not standing.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN23[] **Purchasers, Indirect Purchasers**

As reflected by the language of *740 ILCS 10/7*, an indirect purchaser may sue for damages for a violation of the Illinois Antitrust Act — thus making Illinois an Illinois Brick repealer state for purposes of state ***antitrust law*** — except that no person shall be authorized to maintain a class action in any court of the State for indirect purchasers asserting claims under the Act. *740 ILCS 10/7*.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Civil Procedure > Special Proceedings > Class Actions

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN24[] **Purchasers, Indirect Purchasers**

Because the indirect purchaser restrictions of the Illinois Antitrust Act are intertwined with the underlying substantive right, application of *Fed. R. Civ. P. 23* would abridge, enlarge or modify Illinois' substantive rights, and therefore Illinois' restrictions on indirect purchaser actions must be applied in federal court.

Civil Procedure > Special Proceedings > Class Actions

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN25[] **Special Proceedings, Class Actions**

There are some state procedural rules that federal courts must apply in diversity cases because they function as part of the state's definition of the substantive rights and remedies. *Fed. R. Civ. P. 23* will not govern here if the state statutes are procedural in the ordinary use of the term but are so intertwined with a state right or remedy that it functions to define the scope of the state-created right.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN26[] **Purchasers, Indirect Purchasers**

Puerto Rico ***antitrust law*** has been interpreted in accordance with federal ***antitrust law***, which does not allow claims from indirect purchasers following Illinois Brick.

Governments > Legislation > Effect & Operation > Prospective Operation

Governments > Legislation > Effect & Operation > Retrospective Operation

HN27[] **Effect & Operation, Prospective Operation**

Generally, it is presumed that statutes and their amendments are to operate prospectively unless it appears by clear, strong language or by necessary implication that the Legislature intended to give the statute retroactive effect. If a statute lacks clear direction or necessary implication concerning its retroactive application, the difference between a substantive statute and a remedial or procedural statute becomes relevant. Substantive statutes, which create, define, or regulate substantive legal rights, must be applied prospectively. In contrast, remedial and procedural statutes, which do not impair or increase substantive rights but rather prescribe methods for enforcing such rights, may be construed to operate retroactively.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Governments > Legislation > Effect & Operation > Retrospective Operation

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN28[] **Purchasers, Indirect Purchasers**

Because there is no clear and strong language directing that the Rhode Island repealer statute be given retroactive effort, there is no retroactive application for the Rhode Island Illinois Brick repealer statute.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN29[] **Private Actions, State Regulation**

Massachusetts courts have indicated that the difference between *Mass. Gen. Laws ch. 93A, §§ 9* and *§ 11* is that *§ 9* makes consumer claims actionable while *§ 11* makes business claims actionable. Although the dividing line between a consumer claim and a business claim for purposes of *§§ 9* and *11* is not always clear, the choice appears to turn on whether a given party has undertaken the transaction in question for business reasons, or has engaged in it for purely personal reasons Any transaction in which the plaintiff is motivated by business considerations gives rise to claims under the statute's business section, and the fact that a transaction may be an isolated one not in the normal course of business does not insulate it from the reach of *§ 11*.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN30[] Purchasers, Indirect Purchasers

Under *Mass. Gen. Laws ch. 93A, § 11*, claims by indirect purchasers are not permissible — in contrast to *Mass. Gen. Laws ch. 93A, § 9* consumer claims which do allow for claims by indirect purchasers.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN31[] Private Actions, State Regulation

There is case law indicating that a party's status as a non-profit influences the analysis as to whether it has a *Mass. Gen. Laws ch. 93A, §§ 9* or *11*; in most circumstances, a charitable institution will not be engaged in trade or commerce when it undertakes activities in furtherance of its core mission.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN32[] Deceptive & Unfair Trade Practices, State Regulation

Although an insurer who purchases a pharmaceutical product does not make that purchase for its own use, its role is located on the retail side of the transaction given that it is essentially acting as a proxy for its insured. Absent legislative history indicating that "consumer" as used in consumer protection statutes means an individual or business purchasing for his, her, or its use only, the court does not limit application of the statutes in such way.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN33[] Deceptive & Unfair Trade Practices, State Regulation

Unlike other consumer protection statutes, the Utah Consumer Sales Practices Act contemplates sales made both "to" and "apparently to" a person for personal, family, or household purposes.

Opinion

[*584] ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTIONS TO DISMISS

Docket Nos. 143, 149, 158, 159

Plaintiffs in this putative class action are:

(1) individuals who purchased and/or paid for some or all of the purchase price for certain HIV medications and

(2) health and welfare trust funds/plans that purchased or provided reimbursement for **[**8]** some or all of the purchase price for certain HIV medications.

Plaintiffs have filed suit against companies that are the new drug application holders[1] for, or otherwise manufacture, sell, and/or distribute, those HIV medications, namely:

(1) Gilead[2];
(2) Bristol-Myers Squibb ("BMS")[3];
(3) Japan Tobacco; and
(4) Janssen.[4]

---

[1] Before a drug manufacturer can sell a drug on the market, it must get approval from the Food and Drug Administration ("FDA"). It does so by submitting a new drug application. *See* *FTC v. Actavis, Inc., 570 U.S. 136, 142, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

[2] Plaintiffs have formally sued multiple Gilead entities: Gilead Sciences, Inc.; Gilead Holdings, LLC; Gilead Sciences, LLC; and Gilead Sciences Ireland UC.

[3] Plaintiffs have formally sued multiple BMS entities: Bristol-Myers Squibb Company and E.R. Squibb & Sons, L.L.C.

[4] Plaintiffs have formally sued multiple Janssen entities: Johnson & Johnson and Janssen R&D Ireland.

The bulk of Plaintiffs' claims against Defendants are antitrust claims, both federal and state (Counts 1-6 and 8-13). Plaintiffs have also asserted a claim based on violation of state consumer protection laws (Count 7). Currently pending before the Court are four motions to dismiss, one filed by each defendant named above. Two amicus briefs have also been submitted: one from the Federal Trade Commission ("FTC") and one from a group of nonprofit organizations that do HIV-related work.

Having considered the parties' briefs and accompanying submissions, as well as the oral argument of counsel, the Court hereby **GRANTS** in part and **DENIES** in part the motions to dismiss.

I. FACTUAL & PROCEDURAL BACKGROUND

The operative complaint is the corrected consolidated class action complaint ("CAC"). In that pleading, Plaintiffs allege as follows.

A. Regulatory Background

1. New Drugs and Generic **[**9]** Drugs

Drug manufacturers must obtain approval from the Food and Drug Administration ("FDA") before they can market and sell their drugs. If a drug manufacturer wants to sell a new drug, it must file a New Drug Application ("NDA") with the FDA. *See* CAC ¶ 68. Another process applies to generic drugs.

> [O]nce the FDA has approved a brand-name drug for marketing, a manufacturer of a generic drug can obtain similar marketing approval through use of abbreviated procedures. The *Hatch-Waxman Act* permits a generic manufacturer to file an Abbreviated New Drug Application ["ANDA"] specifying that the generic **[*585]** has the "same active ingredients as," and is "biologically equivalent" to the already-approved brand-name drug." In this way the generic manufacturer can obtain approval while avoiding the "costly and time-consuming studies" needed to obtain approval "for a pioneer drug." The Hatch-Waxman process, by allowing the generic to piggyback on the pioneer's approval efforts, "speed[s] the introduction of low-cost generic drugs to market."

FTC v. Actavis, Inc., 570 U.S. 136, 142, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013).

"The FDA assigns generic drugs that are pharmaceutical equivalents of branded drugs an 'AB' rating." CAC ¶ 71. State laws "either require or permit pharmacies to **[**10]** substitute AB-rated generic equivalents for branded prescriptions (unless the prescribing doctor has specifically ordered otherwise)." CAC ¶ 91.

2. Generic Manufacturers and Paragraph IV Certifications

New drugs, of course, are often protected by patents which, in theory, prevent the sale of generic versions of the new drugs — at least until the patents expire. Those patents, however, like any patents, may be challenged before their expiration dates.

A generic manufacturer may effectively raise a challenge to a patent by including in its ANDA what is known as a Paragraph IV certification — *i.e.*, a statement that the brand drug is covered by a patent but that the patent is invalid or will not be infringed by the generic drug. *See* CAC ¶ 75. A generic manufacturer has an incentive to include a Paragraph IV certification so that it can sell the generic drug before the patent on the brand drug expires on its own terms.

In addition, the *first* generic manufacturer to file an ANDA with a Paragraph IV certification gets an added benefit: it is "entitled to 180 days of ANDA Exclusivity," meaning that the FDA cannot approve any other generic version of the drug "until 180 days after the first-filer **[**11]** enters the market." CAC ¶ 77 (emphasis added). As the Supreme Court has noted, ANDA Exclusivity "can prove valuable, possibly worth several hundred million dollars. Indeed, the Generic Pharmaceutical Association said in 2006 that the vast majority of potential profits for a generic drug manufacturer materialize during the 180-day exclusivity period." *Actavis, 570 U.S. at 144*. (ANDA Exclusivity can be forfeited under certain circumstances.[5]) "The first-filing generic manufacturer is guaranteed [the] exclusivity period even if it settles litigation with a patent owner without resolving the invalidity or noninfringement issues." *AIDS Healthcare Foundation, Inc. v. Gilead Sciences, Inc., No. C 16-00443 WHA, 2016 U.S. Dist. LEXIS 87578, at *4-5 (N.D. Cal. July 6, 2016)*.

In turn, when a Paragraph IV certification is made, a brand manufacturer has an incentive to sue the generic manufacturer for patent infringement because, if it does so within 45 days of receiving the Paragraph IV certification, it may delay approval of the ANDA. More specifically, if the brand manufacturer files suit within 45 days, then the FDA is automatically barred from granting approval to the generic manufacturer's ANDA "until the earlier of (a) the passage of 30 months, or (b) the issuance of a decision by **[**12]** a court that the patent is invalid or not infringed." CAC ¶ 76.

[*586] Notably, even if a generic manufacturer wants to file an ANDA with a Paragraph IV certification as soon as possible (given the above), it cannot do so in all circumstances. In particular, "where the FDA has approved a new chemical entity ['NCE'] (a drug substance that the FDA has not previously approved), no other manufacturer may seek FDA approval for a product containing that drug substance until five years after the FDA first approved it." CAC ¶ 86. Thus, the FDA cannot accept an ANDA from a generic manufacturer if the generic drug contains a NCE until the five-year "NCE Exclusivity" period has expired. *See* CAC ¶ 87. NCE Exclusivity thus "operates independent of any patent protection." *AIDS Healthcare, 2016 U.S. Dist. LEXIS 87578, at *7*.

B. Science Background

1. cART Regimen

The modern HIV treatment regimen is known as cART, which stands for combination antiretroviral therapy. *See* CAC ¶ 1. A combination — or "cocktail" — is usually made up of:

(1) Two NRTIs (nucleotide/nucleoside analogue reverse transcriptase inhibitors); and
(2) A third agent (also known as a core agent).

See CAC ¶¶ 2, 56. A cocktail may also include a third class of drug — namely, a booster. Boosters not **[**13]** taken for any anti-HIV property in the drug but rather for their ability to inhibit the breakdown of some third agents. *See* CAC ¶¶ 64-65.

"The need to use multiple drugs in cART regimens can be a barrier to patient compliance." CAC ¶ 63. Thus, to reduce the burden on the patient, multiple drugs are often coformulated together into a single pill known as an FDC, which stands for fixed-dose combination. *See* CAC ¶ 63. An FDC can be made up of drugs made by one manufacturer or by more than one manufacturer, if the manufacturers can reach agreement.

2. Gilead's Drugs

Gilead makes various drugs that are used in cART regimens. The main ones at issue in the instant case are as follows:

• TDF and TAF (NRTIs). Tenofovir is one of the principal NRTIs used in cART regimens. It is one of the principal NRTIs because it has medical benefits over other NRTIs. *See* CAC ¶¶ 58, 382 (alleging that other NRTIs need to be triple phosphorylated for the drug to be activated, but Tenofovir only needs to be phosphorylated twice); CAC ¶¶ 383-90 (discussing additional problems with other NRTIs, *e.g.*, side effects). Because Tenofovir cannot be administered orally by itself, Gilead developed two different "prodrugs" **[**14]** of Tenofovir that allow it to be swallowed: TDF and TAF. *See* CAC ¶¶ 57, 59 (alleging that "[p]rodrugs are pharmacologically inactive compounds that can be more efficiently absorbed and then converted into the active form of the drug within the body"). TAF is essentially the successor drug to TDF and is superior to TDF (*e.g.*,

[5] For example, if the first filer does not get tentative approval of the generic drug within 30 months, the ANDA Exclusivity is forfeited. *See* CAC ¶ 78. The first filer also forfeits if "it fails to market its generic drug within 75 days after another manufacturer obtains a final decision that the brand manufacturer's patents are invalid or not infringed." CAC ¶ 78.

fewer side effects). A generic version of TDF became available in December 2017. *See* CAC ¶ 98. There is no generic TAF available yet. "Tenofovir is almost always used alongside another NRTI" because, when an HIV virus becomes resistant to the other NRTI, "the virus's susceptibility to Tenofovir increases." CAC ¶ 60 (emphasis omitted).

• FTC (an NRTI). FTC is one of the NRTIs commonly used with Tenofovir in cART regimens. *See* CAC ¶ 60. **[*587]** Generic FTC will become available in September 2020. *See* Opp'n at 9; CAC ¶ 357.

○ Even though there is no generic FTC available yet, there is another drug — 3TC — that Gilead does not manufacture and that may be used as a substitute for FTC. *See* CAC ¶ 61 (alleging that "[b]oth the United States Department of Health and Human Services . . . and the World Health Organization . . . guidelines stipulate that the drugs, when used for HIV **[**15]** treatment, can be used interchangeably"). Generic 3TC has been available since 2012. *See* CAC ¶¶ 62, 97-98.

• TDF/FTC (an FDC). Gilead makes an FDC made up of two of the above NRTIs — *i.e.*, TDF/FTC. It appears that generic TDF/FTC will become available in September 2020. *See* Opp'n at 9, 51; CAC ¶ 357.

• COBI (a booster). There is no generic COBI available yet. *See* CAC ¶¶ 64-65.

○ Even though there is no generic COBI available yet, there is another drug — RTV — that Gilead does not manufacture and that may be used as a substitute for COBI. Generic RTV has been available since March 2018. *See* CAC ¶¶ 65, 112.

C. Anticompetitive Conduct

The anticompetitive conduct identified in Plaintiffs' CAC falls into the following three categories:

(1) Agreements between Gilead and one of the other defendants that contain "No-Generics Restraints."

(2) Patent settlement agreements between Gilead and a generic manufacturer, Teva, under which Teva agreed to delay entry into the market in exchange for certain benefits.

(3) Gilead's commercialization of one of its drugs known as TAF.

1. Agreements with No-Generics Restraints

TDF, FTC, and TDF/FTC were critical drugs for Gilead's business because of the medical benefits **[**16]** of Tenofovir over other NRTIs. By their terms, the patents protecting TDF were not due to expire until January 2018. As for the patents protecting FTC and TDF/FTC, they were not due to expire until September 2021 and January 2024, respectively. *See* CAC ¶ 96. However, Gilead expected to face generic competition for TDF, FTC, and TDF/FTC far earlier — *i.e.*, in 2009, 2011, and 2011 — because the patents protecting the drugs were weak and thus generic manufacturers would challenge the patents. *See, e.g.*, CAC ¶ 96 (indicating, *e.g.*, that the NCE Exclusivity for TDF expired in October 2006, so if a generic manufacturer thereafter filed an ANDA with a Paragraph IV certification, then Gilead would bring a patent infringement suit which would delay the ANDA process for about 30 months — *i.e.*, until 2009).

To protect its vulnerable NRTIs, Gilead began — starting in December 2004 — to enter into agreements with other drug manufacturers, in particular, those who made third agents (instead of NRTIs).[6] **[*588]** Under a typical

---

[6] The rough timeline is as follows:

• December 2004: Gilead entered into an agreement with BMS (the Atripla Agreement).

• March 2005: Gilead entered into an agreement with Japan Tobacco.

• July 2009: Gilead entered into an agreement with Janssen (the Complera Agreement).

• June 2011: Gilead entered into another agreement with Janssen (the Prezcobix Agreement). This agreement allegedly protected one of Janssen's vulnerable drugs, not Gilead's.

agreement, Gilead and the other drug manufacturer would agree to coformulate a FDC made up of (1) Gilead's vulnerable NRTIs and (2) the other drug manufacturer's third agent, which had **[**17]** a longer patent life (assuming that Gilead's NRTIs would face generic competition in 2009, 2011, and 2011, respectively). The agreement would also contain a provision that, even when generic versions of Gilead's NRTIs became available (*e.g.*, if the patents were successfully challenged), the other drug manufacturer would not, on its own, offer a competing FDC made of (1) generic versions of Gilead's NRTIs and (2) the other drug manufacturer's third agent. Plaintiffs call this provision a "No-Generics Restraint" and, for ease of reference, the Court shall do the same.

According to Plaintiffs, they are not claiming as anticompetitive conduct any agreement to coformulate a FDC. Indeed, they concede that the FDCs benefit people with HIV, making available to them products that would not otherwise exist.[7] What Plaintiffs do contest are the No-Generics Restraints in the agreements because, as alleged, the restraints effectively protect Gilead's NRTIs by precluding the other drug manufacturer from selling FDCs that incorporate generic versions of Gilead's NRTIs *even after the patents protecting the NRTIs expire*. (According to Plaintiffs, Gilead entered into "reciprocal" agreements with BMS and Janssen wherein Gilead and the other company agreed to pair in a FDC one of Gilead's drugs (the booster known as COBI) with one of the other company's vulnerable drugs.)

The agreements with the No-Generics Restraints — by themselves — only provided limited protection for Gilead's NRTIs. When generic versions of the NRTIs became available, individuals with HIV could, at least in theory, buy generic TDF, generic FTC, **[**19]** and/or generic TDF/FTC as "standalones" — *i.e.*, instead of as part of a FDC. But, as Plaintiffs allege, there are benefits to purchasing and using a FDC over purchasing and using standalone components to that FDC. *See* CAC ¶ 63 (alleging that "[t]he need to use multiple drugs in cART regimens can be a barrier to patient compliance"). Moreover, according to Plaintiffs, Gilead also took affirmative steps to move its customer base from standalone TDF, FTC, and/or TDF/FTC to the FDCs, as the FDCs would be protected by the No-Generics Restraints.[8] *See, e.g.*, CAC ¶ 4 (alleging that the No-Generics Restraints "gave Gilead an enormous financial incentive to move prescriptions from its standalone version of TDF to the FDCs, which would be insulated from generic competition even after the TDF[] patents expired"). According to Plaintiffs, once individuals with HIV have moved over to the FDCs, they are not likely to move back "to the original product or regimen, even if a generic version of the original product becomes available at a much **[*589]** lower price" for various reasons — *e.g.*, "[d]octors who have switched patients from one HIV product or HIV drug regimen to another are very reluctant to switch **[**20]** patients back." CAC ¶ 181. Also, "[s]witching costs (e.g., the need for another visit to the doctor for a new prescription) impair a move back," and "pharmaceuticals are 'experience' goods that consumers and physicians are hesitant to change if they are working."[9] CAC ¶ 181.

Plaintiffs further note that, once a person is prescribed an FDC, it is not possible for the pharmacist to fill the prescription with standalone components for the FDC (*i.e.*, standalone generic TDF, FTC, and/or TDF/FTC along with standalone of the other company's drug). This is because standalone components of an FDC are not AB-rated to the FDC. *See* CAC ¶ 183 (alleging that "[g]eneric versions of TDF and/or FTC are not AB-rated to, and therefore not automatically substitutable for, the TDF-based FDCs"); *see also* Opp'n at 3(asserting that, "[u]nder state drug-

---

- October 2011: Gilead entered into a second agreement with BMS (the Evotaz Agreement). This agreement allegedly protected one of BMS's vulnerable drugs, not Gilead's.

- December 2014: Gilead entered into more agreements with **[**18]** Janssen (the Odefsey Agreement and the Symtuza Agreements). The Symtuza Agreement allegedly protected one of Janssen's vulnerable drug, not Gilead's.

[7] And Defendants point out that the federal government has applauded some of the business collaborations. *See* Gilead Mot. at 9 (citing to comments made by the Secretary of Health & Human Services with respect to business collaboration between Gilead and BMS on a FDC commercially known as Atripla).

[8] Plaintiffs suggest that Gilead was able to do this through use of "large sales forces that visit doctors' offices and persuade them to prescribe" certain products. *See* CAC ¶ 368.

[9] Plaintiffs also allege that "doctors typically are not aware of the relative costs of brand pharmaceuticals and, even when they are aware of costs, are largely insensitive to price differences because they do not pay for the products." CAC ¶ 368.

substitution laws, pharmacists receiving a prescription for the FDC cannot dispense generic versions of the standalone components").

According to Plaintiffs, one effect of the No-Generics Restraints was that Gilead decided to shelve further development of TAF (the superior successor drug to TDF) — *i.e.*, Gilead no longer had to roll out TAF in order to be competitive **[**21]** in the market but rather could "make more profits by defeating generic competition to TDF and then rolling out TAF much later as part of a line extension." CAC ¶ 214; *see also* CAC ¶ 202 *et seq.* (explaining that TAF is a superior product compared to TDF because the former has significantly less risk of side effects).

Plaintiffs add that, although Gilead has now rolled out TAF, it has done so in an anticompetitive way, including, *e.g.*, by making agreements with the other defendants to protect TAF, *even after the patents on that drug expire*, through No-Generics Restraints. *See* CAC ¶ 192 (alleging that "Defendants are *repeating this anticompetitive cycle again* with respect to the TAF-based FDCs") (emphasis added); CAC ¶ 428 (alleging that, "[u]nless enjoined by this Court, Defendants' unlawful conduct will have additional and intensified anticompetitive effects once generic versions of [*inter alia*] TAF . . . become available").

2. Patent Settlement Agreements with Teva

The prospect of generic competition for Gilead's vulnerable NRTIs (*i.e.*, TDF, FTC, and/or TDF/FTC) became a concrete reality by 2008 when Teva began to challenge the patents protecting the drugs through Paragraph IV certifications. **[**22]** Other generic manufacturers followed suit. *See* CAC ¶ 313. According to Plaintiffs, these challenges to TDF, FTC, and/or TDF/FTC prompted Gilead to get moving with TAF — in particular, moving its customer base over from TDF-based FDCs to TAF-based FDCs, which would also be protected by No-Generics Restraints. *See* CAC ¶ 314.

Gilead was able to settle its patent infringement lawsuits with Teva and get Teva to agree to delay entry into the market for the above drugs (a benefit for Gilead); in exchange, Gilead gave Teva Most-Favored Entry ("MFE") and Most-Favored Entry Plus ("MFEP") clauses in the settlement agreements, a benefit over **[*590]** *other* generic manufacturers. As described in the complaint:

> An agreement with an MFE clause arises when the brand manufacturer and the "first-filer" — the generic manufacturer that filed the first ANDA with a Paragraph IV certification — settle the patent litigation, with the generic manufacturer agreeing to delay entering the market until a specified date. The MFE clause provides that if any other generic manufacturer (a "second-filer") succeeds in entering the market before that date, the first-filer may enter at the same time.

CAC ¶ 317. According to Plaintiffs, **[**23]** a MFE is anticompetitive in nature not only because it delays the first filer's entry into the market but also because it "delay[s] generic entry by reducing a second-filer's incentive to try to enter the market before the first-filer." CAC ¶ 317; *see also* CAC ¶ 319 (alleging that a MFE eliminates the possibility that a second filer could enter the market before the first filer).

As for a MFEP clause, it

> provides that the brand manufacturer will not grant a license to any second-filer to enter the market until a defined period of time after the first-filer enters. The clause might provide, for example, that the brand manufacturer will not grant a license to any second-filer to enter the market until 180 days after the first-filer enters.

CAC ¶ 320 (emphasis in original). It thus affirmatively favors the first filer with whom the manufacturer has negotiated. According to Plaintiffs, a MFEP delays generic entry both by delaying the entry of the first filer and "dramatically reduc[ing] a second-filer's incentive to try to enter the market before the first-filer." CAC ¶ 320.

Gilead ultimately entered into two different settlement agreements with Teva.

- The first agreement (dated April 2013) **[**24]** applied to TDF. *See* CAC ¶ 340. Gilead's patents protecting TDF were to expire, by their own terms, in January 2018. *See* CAC ¶ 96. "Under the agreement, Teva agreed to delay marketing its generic [TDF] and any TDF-containing product until December 15, 2017" — *i.e.*, just a few weeks before the TDF patents were due to expire. CAC ¶ 342. Teva was willing to put off its entry date until such a late date because it received, in exchange, the MFE and MFEP clauses in the settlement agreement. The MFEP clause "provided that Gilead would not grant any other manufacturer a license to enter the market with generic [TDF] until at least *six weeks* after Teva's agreed entry date." CAC ¶ 343 (emphasis added).

• The second agreement (dated February 2014) applied to TDF/FTC and a drug that Gilead coformulated with BMS that contains TDF/FTC. (The commercial name for that drug is Atripla.) The agreement was reached after the parties had tried the patent infringement case and were awaiting certain decisions from the trial court. *See* CAC ¶ 354. Under the agreement, Teva agreed not to launch generics for TDF/FTC and the other drug until September 2020 — "just one year before the end of the patent term" for **[**25]** FTC. CAC ¶ 357. In exchange, Teva was given MFE and MFEP clauses in the settlement agreement. "The MFEP provided that Gilead would not grant a license to any other manufacturer to enter the market . . . until at least *six months* after Teva's agreed entry date." CAC ¶ 357 (emphasis in original).

[*591] 3. Commercialization of TAF

As noted above, Plaintiffs maintain that one effect of the No-Generics Restraints was that Gilead could shelve TAF (the successor drug to TDF) — *i.e.*, Gilead no longer had to roll out TAF in order to be competitive in the market but rather could "make more profits by defeating generic competition to TDF and then rolling out TAF much later as part of a line extension." CAC ¶ 214; *see also* CAC ¶ 202 *et seq.* (explaining that TAF is a superior product compared to TDF because the former has significantly less risk of side effects). Plaintiffs also maintain that, although Gilead has now rolled out TAF, it has done so in an anticompetitive way — for instance, by making agreements with the other defendants to protect TAF, even after the patents on the drug expire, through No-Generics Restraints.

According to Plaintiffs, however, this was not the only way that Gilead commercialized **[**26]** TAF in an anticompetitive way. Plaintiffs assert that Gilead had the goal of moving over prescriptions from TDF-based FDCs to TAF-based FDCs precisely because the FDCs (unlike any standalone drugs) would be protected by the No-Generics Restraints. To move over to TAF-based FDCs, Gilead took steps to: (1) make the TDF-based FDCs less desirable, and (2) ensure that TAF standalone could or would not be used in conjunction with other standalone drugs in place of a TAF-based FDC. For example:

• Gilead intentionally degraded the safety of one of its TDF-based FDCs, commercially known as Stribild (*i.e.*, by keeping the strength of TDF at a certain level when a lower level would produce fewer side effects), and further artificially raised the price of the drug. *See generally* CAC ¶ 242 *et seq.*

• When Gilead released TAF standalone (after withholding it from the market from about 2015-2016), Gilead labeled the drug as a treatment for chronic Hepatitis B only (and not HIV as well)[10] and further intentionally degraded the drug (*i.e.*, by selling it at a strength that produced more side effects instead of a lower strength). *See generally* CAC ¶ 250 *et seq.*

II. PLAINTIFFS' CAUSES OF ACTION

Based on, **[**27]** *inter alia*, the above allegations, Plaintiffs have asserted the following causes of action:

(1) Conspiracy to monopolize in violation of *§§ 1* and *2 of the Sherman Act* (against all Defendants and implicating all three categories of anticompetitive conduct). *See* *15 U.S.C. §§ 1-2*.

---

[10] According to Plaintiffs, theoretically, doctors could prescribe TAF for an off-label use — *i.e.*, to treat HIV. "But, in fact, substantial numbers of doctors will not do so. And federal law (*21 C.F.R. § 202.1*) makes it unlawful for a pharmaceutical manufacturer to actively encourage doctors to prescribe the product for off-label use." CAC ¶ 307.

(2) Conspiracy to monopolize in violation of state antitrust laws (against all Defendants and implicating all three categories of anticompetitive conduct).

(3) Monopolization in violation of *§ 2 of the Sherman Act* (against Gilead only and implicating all three categories of anticompetitive conduct). *See id. § 2*.
(4) Monopolization in violation of state antitrust laws (against Gilead only and implicating all three categories of anticompetitive conduct).

(5) Attempted monopolization in violation of *§ 2 of the Sherman Act* **[*592]** (against Gilead only and implicating all three categories of anticompetitive conduct). *See id.*
(6) Attempted monopolization in violation of state antitrust laws (against Gilead only and implicating all three categories of anticompetitive conduct).
(7) Violation of state consumer protection laws (against all Defendants and implicating all three categories of anticompetitive conduct).

(8) Conspiracy in violation of *§ 1 of the Sherman Act* **[**28]** (against Gilead and Janssen only and implicating the No-Generics Restraints only). *See id. § 1*.
(9) Conspiracy in violation of state antitrust laws (against Gilead and Janssen only and implicating the No-Generics Restraints only).

(10) Conspiracy in violation of *§ 1 of the Sherman Act* (against Gilead and Japan Tobacco only and implicating the No-Generics Restraints only). *See id.*
(11) Conspiracy in violation of state antitrust laws (against Gilead and Japan Tobacco only and implicating the No-Generics Restraints only).

(12) Conspiracy in violation of *§ 1 of the Sherman Act* (against Gilead and BMS only and implicating the No-Generics Restraints only).
(13) Conspiracy in violation of state antitrust laws (against Gilead and BMS only and implicating the No-Generics Restraints only).

II. LEGAL STANDARD

HN1[] *Federal Rule of Civil Procedure 8(a)(2)* requires a complaint to include "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. A complaint that fails to meet this standard may be dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. *See Fed. R. Civ. P. 12(b)(6)*. To overcome a *Rule 12(b)(6)* motion to dismiss after the Supreme Court's decisions in *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, and *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, a plaintiff's "factual allegations [in the complaint] 'must . . . suggest that the claim has at least a plausible chance **[**29]** of success.'" *Levitt v. Yelp! Inc., 765 F.3d 1123, 1135 (9th Cir. 2014)*. The court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. But "allegations in a complaint . . . may not simply recite the elements of a cause of action [and] must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively." *Levitt, 765 F.3d at 1135* (internal quotation marks omitted). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (internal quotation marks omitted).

III. ANTITRUST CLAIMS BASED ON OVERARCHING CONSPIRACY — COUNTS ONE AND TWO

In Counts One and Two of the CAC, Plaintiffs allege an overarching conspiracy involving all Defendants and implicating all three categories of anticompetitive conduct. Defendants move to dismiss the causes of action on the basis that Plaintiffs have failed to adequately allege all Defendants **[*593]** were **[**30]** involved in one overarching conspiracy. Defendants underscore that nowhere in the CAC do Plaintiffs suggest that there was any collective agreement among BMS, Japan Tobacco, and Janssen to assist Gilead. *See, e.g.*, BMS Mot. at 12-13 (asserting that "[n]ot a single factual allegation supports the theory that all defendants knowingly and willfully joined together" to assist Gilead in protecting its drugs from competition; adding that "Plaintiffs here allege only that Gilead over the course of a decade, entered into separate, bilateral agreements with BMS, Janssen, and Japan Tobacco").

In response, Plaintiffs admit that BMS, Japan Tobacco, and Janssen were each acting separately, and not acting collectively, with Gilead. *See, e.g.*, Opp'n at 44 (asserting that "[e]ach of BMS, Janssen, and Japan Tobacco separately, not acting collectively, conspired with Gilead"). And consistent with this admission, Plaintiffs do not make any claim that, *e.g.*, BMS or Japan Tobacco could be held liable for the alleged conspiracy between Janssen and Gilead to restrain trade in or monopolize the market for the Janssen/Gilead coformulated FDCs and their generic equivalents.

Plaintiffs, however, do argue that **[**31]** there is a viable overarching conspiracy claim based on a broader product market — *i.e.*, the market for cART drugs. *See* Opp'n at 42 (arguing that each non-Gilead defendant conspired with Gilead to maintain its cART monopoly); *see also* CAC ¶¶ 442, 451 (for Counts One and Two, referring to "monopoly power in the cART Market"). That is, Plaintiffs contend that there was a conspiracy to restrain trade in or monopolize the market for cART drugs; that each non-Gilead defendant knew of and contributed to that conspiracy by separately conspiring with Gilead; and that each non-Gilead defendant is therefore liable for the conspiracy "even if the defendant did not know all the conspirators [*i.e.*, the other non-Gilead defendants], did not participate in the conspiracy from its beginning or participate in all its enterprises, or otherwise know all its details." *United States v. Grasso, 724 F.3d 1077, 1086 (9th Cir. 2013)* (addressing criminal case involving conspiracy to defraud); *cf. United States v. Friedman, 593 F.2d 109, 117 (9th Cir. 1979)* (in criminal case involving drug conspiracy, stating that "[t]he standard for determining the existence of a single conspiracy is whether there was a single overall agreement among the co-conspirators to perform various functions to carry out the objectives of the conspiracy"; **[**32]** "the performance by a conspirator of separate and independent acts in furtherance of the conspiracy is not inconsistent with the existence of a single overall agreement").

The Court dismisses Plaintiffs' overarching conspiracy claim because, as discussed below, Plaintiffs have not adequately alleged a cART product market. *See* Part VIII, *infra*. In addition, Plaintiffs have failed to adequately allege that each non-Gilead defendant knew of its connection to a conspiracy to restrain trade in or monopolize that broader product market (as opposed to the narrower product markets consisting of each FDC coformulated by a non-Gilead defendant and Gilead, and its generic equivalent).[11] *Cf. Grasso, 724 F.3d at 1086 (9th Cir. 2013)* (stating that, "[w]here the defendant has a connection (even if slight) to the conspiracy, the government must also show that the defendant's connection to the conspiracy is knowledgeable; 'that is, the government **[*594]** must prove beyond a reasonable doubt that the defendant knew of his connection to the charged conspiracy'" — *i.e.*, that "the defendant was aware of 'the unlawful object toward which the agreement [was] directed'"). Plaintiffs have leave to amend.

IV. ANTITRUST CLAIMS BASED ON NO-GENERICS RESTRAINTS [**33] — COUNTS THREE THROUGH SIX AND COUNTS EIGHT THROUGH THIRTEEN

In the remaining antitrust claims — Counts Three through Six and Counts Eight through Thirteen — Plaintiffs claim anticompetitive conduct based on one or more of the three categories identified above. Here, the Court addresses the first category of anticompetitive conduct, *i.e.*, the No-Generics Restraints contained in the agreements that Gilead entered into with the other defendants. As noted above, Plaintiffs maintain that they are not challenging

[11] Notably, Plaintiffs do not allege that a non-Gilead defendant got any benefit out of the agreements that Gilead had with the other non-Gilead defendants. It is not obvious why knowledge of a conspiracy should be inferred under these circumstances absent specific supporting facts.

Defendants' agreements to create FDCs (which are beneficial to individuals with HIV). Rather, Plaintiffs contest only the No-Generics Restraints in the agreements.

A. Ancillary Restraints Doctrine

According to Defendants, even if the agreements did contain No-Generics Restraints (as discussed below, not all defendants agree that there are, in fact, such restraints in the contracts at issue), the No-Generics Restraints are, effectively, per se valid under the ancillary restraints doctrine. The gist of Defendants' ancillary restraints argument is that, where competitors enter into a joint venture (or other business collaboration), it is reasonable to have a provision barring members **[**34]** of the joint venture from competing with the joint venture — or else there would be no incentive to enter into the joint venture in the first place. In other words, here, where Gilead and another defendant entered into agreement to create an FDC made up of Gilead's drugs and the other defendant's drug, it was reasonable to include a provision that would keep the contracting parties from creating a competing FDC using generic versions of those drugs. Defendants underscore that this prevented competition only with respect to the *specific* FDC at issue; it would not bar the contracting parties from using their drugs in other ways, including as standalones or in combination with different drugs to create different FDCs.

HN2[] In evaluating this argument, the Court begins with the principle that, as a general matter, agreements between competitors — what are known as "horizontal agreements" — are suspect from an antitrust perspective. *See* Betkerur v. Aultman Hosp. Ass'n, 78 F.3d 1079, 1092 (6th Cir. 1996) (stating that "'horizontal' restraints — that is, agreements among competitors at the same level of the market structure — are particularly suspect because they typically serve no purpose other than to stifle competition"); *cf.* Republic Tobacco Co. v. N. Atl. Trading Co., 381 F.3d 717, 737 (7th Cir. 2004) (noting that "horizontal agreements **[**35]** are generally more suspect than vertical agreements"). That being said, not all horizontal agreements are antitrust violations. Joint ventures or other business collaborations between competitors can actually be procompetitive — offering to the market a product that could not otherwise be offered in the absence of the joint undertaking.[12] *Cf.* **[*595]** NCAA v. Board of Regents, 468 U.S. 85, 102, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) (noting that "the NCAA plays a vital role in enabling college football to preserve its character, and as a result enables a product to be marketed which might otherwise be unavailable[;] [i]n performing this role, its actions widen consumer choice — not only the choices available to sports fans but also those available to athletes — and hence can be viewed as procompetitive"); Addamax Corp. v. Open Software Found, Inc., 152 F.3d 48, 52 (1st Cir. 1998) (noting that "[j]oint venture enterprises . . . , unless they amount to complete shams, are rarely susceptible to per se treatment"; in fact, "[w]here the venture is producing a new product . . . there is patently a potential for a productive contribution to the economy").

HN3[] Consistent with the above, the Supreme Court has held that the creation of a joint venture is not deemed invalid per se but rather is evaluated under the rule of reason.[13] *See* Texaco Inc. v. Dagher, 547 U.S. 1, 6 n.1, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006) (indicating that the **[**36]** creation of a joint venture can be anticompetitive; whether it is anticompetitive must be assessed "under the rule of reason"); *see also* Leegin Creative Leather Prods. v. PSKS, Inc., 551 U.S. 877, 885-86, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007) (stating that, under the rule of reason, "'the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition'"; in contrast, where the per se illegality rule applies, there is no "need to study the reasonableness of an individual restraint in light of the real market forces at

[12] Although the Court shall hereinafter refer to "joint ventures" only, it notes that it is not limiting its discussion to joint ventures alone — *i.e.*, the ancillary restraints doctrine also has application to other business forms or structures such as business collaborations. *See* Texaco Inc. v. Dagher, 547 U.S. 1, 7, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006) (noting that the ancillary restraints doctrine "governs the validity of restrictions imposed by a legitimate business collaboration, such as a business association or joint venture, on nonventure activities").

[13] **HN4**[] Cases often address joint ventures in the context of § 1 of the Sherman Act since § 1 covers agreements to restrain trade. There is no reason not to apply a similar analysis to § 2 claims for conspiracy to monopolize as such claims require a showing of anticompetitive conduct. Furthermore, the parties have not made any argument that the § 1 and § 2 conspiracy claims should be treated differently in this regard.

work"). In contrast, where there is, in fact, a legitimate joint venture, and the only issue is whether specific conduct of the joint venture violates ***antitrust law***, then a court must decide what mode of analysis to apply: the rule of per se illegality or the rule of reason. *See* *In re ATM Fee Antitrust Litig., 554 F. Supp. 2d 1003, 1012 (N.D. Cal. 2008)*.

In their opposition, Plaintiffs contend that they are challenging to whether joint ventures were, in fact, created. That is, Plaintiffs assert that, as a factual matter, not all of the agreements at issue actually create joint ventures, and, at the very least, it is a factual question whether the joint ventures are legitimate — both of which thereby make dismissal at the 12(b)(6) phase of proceedings **[**37]** improper. For purposes of this order, the Court assumes the agreements constituted joint ventures and that the only issue for the Court to resolve is whether the specific conduct of the joint ventures — *i.e.*, the No-Generics Restraints — plausibly constitutes anticompetitive conduct.

Here, there is no dispute that Plaintiffs have adequately alleged that the No-Generics Restraints are *some* kind of restraint on trade. Plaintiffs have alleged that the non-Gilead defendants are not able to offer certain FDCs that compete with the joint venture FDCs — *i.e.*, the same FDCs except using generic versions of Gilead's drugs after the patents on Gilead's drugs expire. The only question is, as noted above, whether the restraints are valid or invalid under ***antitrust law***.

[*596] ***HN5***[] In addressing this specific issue, the Court would ordinarily be confronted with the question of whether to apply the rule of per se illegality or instead the rule of reason. *See* *ATM Fee, 554 F. Supp. 2d at 1010* (noting that "the decision of what mode of analysis to apply . . . is entirely a question of law for the Court," although that legal question "might involve factual disputes"); *accord* *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 61 (1st Cir. 2004)*. Defendants argue, however, that the Court need not apply even the rule **[**38]** of reason because the No-Generics Restraints may, in effect, be deemed per se *valid* under the ancillary restraints doctrine. According to Defendants, under this doctrine, so long as a restraint supports or benefits the (legitimate) joint venture,[14] then it is deemed per se valid under the Supreme Court's decision in *Dagher*; the restraint is not even subject to a rule-of-reason analysis. Defendants rely on the following language from *Dagher*: "Under the [ancillary restraints] doctrine, courts must determine whether the nonventure restriction is a naked restraint on trade, and thus invalid, or one that is ancillary to the legitimate and competitive purposes of the business association, and thus valid." *Dagher, 547 U.S. at 7*.

The Court rejects Defendants' argument. The above language, taken in isolation, might suggest that once a restriction supports or benefits the joint venture, it is deemed per se valid. However, as Plaintiffs point out, the context of *Dagher* must be taken into account. In *Dagher*, the plaintiffs simply claimed that a pricing policy of a joint

---

[14] Lower courts have varied somewhat as to how they define "ancillary restraint." *See, e.g.,* *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 345-46 (3d Cir. 2010)* ("Ancillary restraints are 'those that are part of a larger endeavor whose success they promote.'"); *Schering-Plough Corp. v. FTC, 402 F.3d 1056, 1072 (11th Cir. 2005)* ("Ancillary restraints are generally permitted if they are 'reasonably necessary' toward the contract's objective of utility and efficiency."); *Sullivan v. NFL, 34 F.3d 1091, 1102 (1st Cir. 1994)* ("[A] 'restraint' that is ancillary to the functioning of . . . a joint activity [is] one that is required to make the joint activity more efficient . . . ."); *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 224, 253 U.S. App. D.C. 142 (D.C. Cir. 1986)* ("To be ancillary, . . . an agreement eliminating competition must be subordinate and collateral to a separate, legitimate transaction. The ancillary restraint is subordinate and collateral in the sense that it serves to make the main transaction more effective in accomplishing its purpose."); *Polk Bros., Inc. v. Forest City Enters., Inc., 776 F.2d 185, 188-89 (7th Cir. 1985)* ("'[A]ncillary restraints . . . are part of a larger endeavor whose success they promote.'"); *L.A. Mem'l Coliseum Comm'n v. Nat'l Football League, 726 F.2d 1381, 1395 (9th Cir. 1984)* ("[T]he ancillary restraints doctrine teaches that some agreements which restrain competition may be valid if they are 'subordinate and collateral to another legitimate transaction and necessary to make that transaction effective.'"); *see also* *Major League Baseball Props., Inc. v. Salvino, 542 F.3d 290, 339 (2d Cir. 2008)* (Sotomayor, J., concurring) ("The [ancillary restraints] doctrine recognizes that a restraint that is unnecessary to achieve a joint venture's efficiency-enhancing benefits may not be justified based on those benefits. Accordingly, a challenged restraint must have a reasonable procompetitive justification, related to the efficiency-enhancing purposes of the joint venture, before that restraint will be analyzed as part of the venture.").

The Supreme Court has noted that "[t]he classic 'ancillary' restraint is an agreement by the seller of a business not to compete within the market." *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 729 n.3, 08 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*.

venture was per se illegal; they did *not* "put forth a rule of reason claim." *Id. at 7 n.2*. Because they did not assert a rule-of-reason claim, **[**39]** a conclusion that the pricing policy was not per se illegal meant, by default, that it was valid. *See also* *id. at 7* ("If [the joint venture's] price **[*597]** unification policy is anticompetitive, then respondents should have challenged it pursuant to the rule of reason. But it would be inconsistent with this Court's antitrust precedents to condemn the internal pricing decisions of a legitimate joint venture as *per se* unlawful.").

Moreover, the Court does not view *Dagher* as some kind of sea change that displaced the prior law — as articulated by both the Supreme Court and the lower courts — that the rule of reason applies to ancillary restraints. *See, e.g., Nat'l Soc'y of Prof. Eng'rs v. United States, 435 U.S. 679, 689, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)* (stating that the rule of reason "has been regarded as a standard for testing the enforceability of covenants in restraint of trade which are ancillary to a legitimate transaction, such as an employment contract or the sale of a going business"); *Addamax, 152 F.3d at 52* (in a pre-*Dagher* case, stating that "conduct that is strictly ancillary to [the joint venture's] productive effort . . . is evaluated under the rule of reason"); *Polk Bros., 776 F.2d at 188-89* (in a pre-*Dagher* case, stating that "[a] court must distinguish between 'naked' restraints, those in which the restriction on competition is **[**40]** unaccompanied by new production or products, and 'ancillary' restraints, those that are part of a larger endeavor whose success they promote"; ancillary restraints are evaluated under the rule of reason); *L.A. Mem'l, 726 F.2d at 1395* (in a pre-*Dagher* case, stating that "[t]he ancillary restraint must . . . be tested under the rule of reason, the relevance of ancillarity being it 'increases the probability that the restraint will be found reasonable'"); *Aydin Corp. v. Loral Corp., 718 F.2d 897, 901 (9th Cir. 1983)* (in a pre-*Dagher* case, stating that "[t]he proper function of ancillarity in antitrust analysis 'is to remove [in some instances] the per se label from restraints otherwise falling within the category'[;] [w]hether a restraint that does not fall within a per se category is ancillary to a valid agreement is relevant only in the sense that ancillarity increases the probability that the restraint will be found reasonable"). If the Supreme Court had intended to overturn both its and the lower courts' approach to the ancillary restraints doctrine, *i.e.*, replacing the rule of reason with a per se valid rule, it would have made that ruling more clearly. ***HN6***[] Furthermore, post-*Dagher*, the Supreme Court has indicated that the rule of reason continues to apply to ancillary restraints. **[**41]** *See* *Am. Needle v. NFL, 560 U.S. 183, 203, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (stating that, "[w]hen 'restraints on competition are essential if the product is to be available at all,' *per se* rules of illegality are inapplicable, and instead the restraint must be judged according to the flexible Rule of Reason"); Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1906 (noting that, in *American Needle, Inc.*, the Supreme Court applied the rule of reason in assessing a restraint in a license agreement that restricted NFL team members' ability to license their own individually owned intellectual property separately). Similarly, lower courts have continued to apply the rule of reason to such restraints. This includes the Federal Circuit as reflected in its decision *Princo Corp. v. ITC, 616 F.3d 1318 (Fed. Cir. 2010)*, a case on which Defendants heavily rely. *See* *id. at 1336* (stating that "[t]he 'ancillary restraints' that are often important to collaborative ventures, such as agreements between the collaborators not to compete against their joint venture, are also assessed under the rule of reason). *See also* *Major League Baseball, 542 F.3d at 339 n.7* (Sotomayor, J., concurring) (stating that "an ancillary restraint is not necessarily lawful[;] [i]ts competitive benefits and harms must still be weighed, as part of the joint venture, under a rule-of-reason analysis").

[*598] Ultimately, **[**42]** the Court understands *Dagher* as the Sixth Circuit has — *i.e.*, with pre-*Dagher* law distinguishing between "naked" and "ancillary" restraints, and with *Dagher* adding a third category of restraint to the mix, namely, "restraints that are *core* to the joint venture's efficiency enhancing purpose." *Med. Ctr. at Elizabeth Place, LLC v. Atrium Health Sys., 922 F.3d 713, 724-25 (6th Cir. 2019)* (emphasis added). ***HN7***[] Per *Dagher*, where a core restraint is at issue, the ancillary restraints doctrine is entirely inapplicable. *See* *Dagher, 547 U.S. at 7-8* ("agree[ing] . . . that the ancillary restraints doctrine *has no application here*, where the business practice being challenged involves the core activity of the joint venture itself — namely, the pricing of the very goods produced and sold by [the joint venture]") (emphasis added). The Sixth Circuit has indicated that core restraints are those that are "'integral to the running of the joint venture'" whereas "[a] restraint is ancillary if it bears a reasonable relationship to the joint venture's success." *Med. Ctr., 922 F.3d at 725*. Defendants do not, in their papers, claim that the No-Generics Restraints are core restraints that fall outside the application of the ancillary restraints doctrine. Furthermore, even if they had, the Court concludes that that position lacks merit.

In *Dagher*, the **[**43]** challenged pricing policy was a core restraint because it was required "in order to make the venture work" and the restraint "did not impose any limitations on nonventure activities" — *i.e.*, "setting a common price for commonly produced gasoline placed no limits on the *separate* activities of the joint venturers." ***HN8***[] Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1906 (emphasis added); *see also* *Dagher, 547 U.S. at 7 (2006)* (noting that the ancillary restraints doctrine "governs the validity of restrictions imposed by a legitimate business collaboration, such as a business association or joint venture, *on nonventure activities*" — activities outside of the joint venture) (emphasis added).

The situation in the instant case is different. Plaintiffs have put at issue a restraint on nonventure activities of the non-Gilead defendants — activities outside the joint production of their FDCs. Furthermore, it is far from clear that the No-Generics Restraints were required to make the joint ventures between Gilead and the non-Gilead defendants work. Whereas the pricing policy in *Dagher* "was very likely unavoidable" because "once the [joint venture] was found to be lawful, common pricing of a commonly produced product followed as a matter **[**44]** of course," Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1906, the same cannot be said for the No-Generics Restraints because they prevented the non-Gilead defendants from using generic versions of Gilead's drugs *even after the patents protecting those drugs expired*.

Accordingly, the Court denies Defendants' motions to dismiss the antitrust claims based on the ancillary restraints doctrine. The No-Generics Restraints are not *per se* legal. They are subject to review under, at the very least, the rule of reason.

Because the Court rejects Defendants' ancillary restraints *per se* argument, it now turns to the specific agreements that Gilead entered into with BMS, Japan Tobacco, and Janssen.

B. Agreements with BMS

The Court first addresses the agreements between Gilead and BMS.

There are two agreements between Gilead and BMS:

> (1) The Atripla Agreement (December 2004). Atripla is the commercial name for the FDC that Gilead and BMS coformulated. Atripla is made **[*599]** of (1) TDF/FTC (Gilead's drugs) and (2) EFV (BMS's drug).
>
> (2) The Evotaz Agreement (October 2011). Evotaz is the commercial name for another FDC that Gilead and BMS coformulated. Evotaz is made up of (1) COBI (Gilead's drug) and (2) ATV (BMS's drug). **[**45]**

1. Atripla Agreement

The Atripla Agreement was purportedly for the benefit of Gilead — *i.e.*, to protect its vulnerable NRTIs. Gilead and BMS make several arguments as to why the Atripla Agreement cannot plausibly be seen as anticompetitive.

First, Gilead and BMS assert that it makes no sense that they entered into the agreement to protect Gilead's drugs (TDF, FTC, and TDF/FTC), because Gilead's drugs actually had longer patent lives compared to BMS's drug (EFV). *See* BMS Reply at 1 (noting that "[t]he patents covering the BMS components for Atripla expired before Gilead's, not after") (emphasis omitted); *see also* CAC ¶ 127 (alleging that "[t]he principal patents that protected BMS's EFV . . . were not scheduled to expire until 2018"); CAC ¶ 96 (alleging that the patents for TDF would expire "by their own terms" in January 2018; the patents for FTC in January 2021; and the patents for the combination drug TDF/FTC in January 2024). Although this is technically true (at least for FTC and TDF/FTC), Plaintiffs have alleged that Gilead expected to encounter generic competition to TDF, FTC, and TDF/FTC "as early as 2009, 2011, and 2011, respectively, if generic manufacturers successfully challenged **[**46]** the patents." CAC ¶ 96.

Second, Gilead and BMS seem to argue that the Atripla Agreement does not actually contain a No-Generics Restraint. But Plaintiffs have pointed to a provision in the agreement that is plausibly a No-Generics Restraint. That provision is § 2.9(a) of the Atripla Agreement. It provides in relevant part as follows:

> For the avoidance of doubt, nothing in this Agreement . . . shall be deemed to restrict or prohibit either Member Party or any of its Affiliates from . . . developing, manufacturing and commercializing combination products (**other than the Combination Product**) for the treatment of HIV infection or otherwise, including, without limitation, any product containing such Party's Single Agent Product(s) and/or Double Agent Product.

Ostrander Decl., Ex. A (Atripla Agreement § 2.9(a)) (emphasis added). In other words, under § 2.9(a), both Gilead and BMS were free to make FDCs "other than the Combination Product," and, according to Plaintiffs, "[t]he 'Combination Product' that the conspirators are prohibited from making outside their collaboration is a product comprising the pharmaceutical ingredients (brand *or generic*) TDF/FTC/EFV." Opp'n at 30 (emphasis in original). "Combination Product" **[**47]** is not clearly defined in the agreement as brand or generic TDF/FTC/EFV. *See* Ostrander Decl., Ex. A (Atripla Agreement § 1.50) (emphasis added) (defining "Combination Product" as "the fixed-dose co-formulated product developed pursuant to this Agreement containing, as its only active pharmaceutical ingredients per single daily dose, 300 mg TDF, 200 mg FTC and 600 mg EFV"). However, to the extent "Combination Product" has any ambiguity, that ambiguity cannot be resolved at the 12(b)(6) phase of proceedings.

Third, Gilead and BMS argue that, even if § 2.9(a) is considered some kind of No-Generics Restraint, there are additional provisions in the Atripla Agreement that effectively temper the restraint and render it valid from an antitrust perspective. *See* **[*600]** BMS Reply at 2. In particular, Gilead and BMS point out:

> • That the Atripla Agreement expressly contemplates that generic versions of the parties' drugs will become available and that either party is allowed to terminate because of the availability of a generic version of the other party's drug(s). *See, e.g.*, Ostrander Decl., Ex. A (Atripla Agreement § 14.5) (providing that "[e]ither Member Party (the 'Continuing Member Party') may terminate this Agreement **[**48]** by notice to the other member Party (the 'Terminated Member Party') in the event that there is the Launch in the Territory of at least one (1) Generic Version of all of the Single Agent Products (or the Double Agent Product[15]) of the Terminated Member Party (a 'Generic Version Launch') and the Continuing Member Party delivers notice of termination within thirty (30) days after the Generic Version Launch").
>
> • That, even if the No-Generics Restraint does not allow a party to create a competing FDC using generic versions of the other party's drugs, a party is still allowed to create a competing FDC that is *comparable* in nature. *See* CAC ¶ 140 (alleging that the Atripla Agreement "prohibited BMS from making a *generic* version of Atripla when generic TDF and generic FTC became available, but did *not* prohibit BMS from making a *comparable* version comprising generic TDF, 3TC (instead of Gilead's FTC), and EFV") (emphasis in original).

While Gilead and BMS's first point above is fair, the Court finds that there is nevertheless a factual question as to whether the specific No-Generics Restraint is anticompetitive under, at the very least, the rule of reason. As Plaintiffs point out, even though the **[**49]** Atripla Agreement has a termination provision, arguably, there was an incentive *not* to terminate because the terminating party would have to pay the terminated party royalty payments for three years. *See* CAC ¶ 124 (alleging that, "if BMS elected to terminate Gilead's interest [because generic versions of both TDF and FTC were available], BMS would be required to pay a substantial penalty to Gilead, comprising three years of additional royalty payments, at declining percentages over the three years[;] [t]he purpose and effect of the penalty provision was to dissuade BMS from terminating Gilead's participation in the joint venture even after its patents on TDF and/or FTC expired"); *see also* Ostrander Decl., Ex. A (Atripla Agreement § 14.6(b)(i)-(ii)) (providing, *inter alia*, that "[t]he Continuing Member Party shall pay or cause the JV to pay to the Terminated Party" royalty payments).

Gilead and BMS question how much of an incentive there actually was because the termination provision in the Atripla Agreement was actually invoked — and by Gilead, not BMS (even though the agreement was supposedly to protect Gilead's vulnerable drugs). *See* CAC ¶ 141 (alleging that "Gilead recently terminated BMS's participation **[**50]** in the Atripla joint venture, triggering Gilead's obligation to make the penalty payments

---

[15] "'Single Agent Product' shall mean each of Viread [TDF], Emtriva [FTC], and Sustiva [EFV]." Ostrander Decl., Ex. A (Atripla Agreement § 1.196). "'Double Agent Product' shall mean Truvada, the co-formulated product developed by Gilead containing, as its only active pharmaceutical ingredients, TDF and FTC." Ostrander Decl., Ex. A (Atripla Agreement § 1.77).

described above"). Although this is a fair point, the Court still cannot say, at this early juncture in proceedings, **[*601]** that the No-Generics Restraint, as tempered by the termination provision, is valid as a matter of law. As alleged by Plaintiffs, the point of the Atripla Agreement was to protect Gilead's drugs; thus, even if Gilead ultimately decided to terminate because of a turn of events (*i.e.*, the TDF patents having longer lives than anticipated such that the EFV patents would expire first), that does not mean that there was not a substantial incentive on the part of BMS not to terminate.

As for the second point made by Gilead and BMS, here, it is a closer call. Plausibly, the No-Generics Restraint in the Atripla Agreement provided that the parties could not offer any FDC made up of brand or generic TDF, FTC, and EFV specifically. But the restraint did not prevent the parties from offering a *comparable* FDC. Accordingly, once the TDF patents were to expire (whether by their own terms or based on a successful challenge to them), BMS could sell an FDC made up of generic TDF, 3TC (a comparable to **[**51]** FTC), and EFV. And that is what seems to have happened. As Plaintiffs allege in the CAC, when generic TDF became available (in December 2017), BMS licensed Mylan Pharmaceuticals to produce a comparable FDC that competed with Atripla — formulated with generic TDF, 3TC, and EFV. *See* CAC ¶ 140. Thus, the No-Generics Restraint did not restrict all competition after the patents on TDF expired. Nonetheless, it still is a factual question as to whether the restriction on generics alone (as opposed to comparables) had enough anticompetitive effects to be deemed an antitrust violation.

2. <u>Evotaz Agreement</u>

Gilead and BMS entered into the Evotaz Agreement some seven years after the Atripla Agreement. Plaintiffs maintain that, while the Atripla Agreement was designed to protect Gilead's vulnerable drugs (TDF, FTC, and TDF/FTC), the Evotaz Agreement was designed to protect BMS's vulnerable drug (ATV).[16] Plaintiffs cite to the following provision as the No-Generics Restraint: "During the Term, without the prior written consent of BMS, (i) Gilead shall not . . . make, use, sell, [etc.] . . . in the Field in the Territory, the Combination Product (including any Generic Combination Product)."[17] Ostrander **[**52]** Decl., Ex. C (Evotaz Agreement § 14.2(a)).[18]

Unlike the Atripla Agreement, which the parties expressly labeled a "Collaboration Agreement," the Evotaz Agreement was expressly characterized as a "License Agreement." According to Gilead and BMS, the Evotaz Agreement is, as a matter of law, a lawful agreement because (1) **[*602]** a patent is a lawful monopoly and (2) the Evotaz Agreement simply reflects Gilead's right to grant to BMS an exclusive license to use the COBI patents in certain ways. *See* Ostrander Decl., Ex. C (Evotaz Agreement § 8.1(a)) (providing that "Gilead hereby grants to BMS an exclusive (even as to Gilead and its Affiliates and except as provided in Section 8.4), royalty-bearing license . . . under the Gilead Technology" to develop and commercialize the Licensed Combination Product (*i.e.*, COBI + ATV) and "not to Exploit the COBI API individually or in combination with any other API other than in the Licensed Combination Product"). The defendants cite to *Rail-Trailer Co. v. ACF Industries, Inc., 358 F.2d 15, 16-17 (7th Cir. 1966)*, where the court stated:

> [A] patentee may . . . grant an exclusive license for the manufacture of the patented device, which license serves to exclude the patentee himself from engaging in the manufacture of the device, and which action,

---

[16] As alleged by Plaintiffs, BMS expected generic competition for ATV as early as 2012, if generic manufacturers were successful in challenging the patents protecting the drug. *See* CAC ¶ 132. This date was earlier than the date that Gilead's patents protecting COBI would expire (*i.e.*, 2029). *See* CAC ¶ 133.

[17] "'Combination Product' shall mean a fixed-dose co-formulated product in oral dosage form containing, as its only APIs, [ATV] and COBI . . . ." Ex. C (Evotaz Agreement § 1.48). "'Generic Combination Product' shall mean a generic version of the Combination Product that is approved for marketing in the Field under an [ANDA] . . . ." Ex. C (Evotaz Agreement § 1.90).

[18] The Evotaz Agreement also contains a similar No-Generics Restraint that restricts BMS: "During the Term, without the prior written consent of Gilead (i) BMS shall not . . . make, use, sell, [etc.] . . . in the Field in the Territory, the Combination Product (including any Generic Combination Product)." Ostrander Decl., Ex. C (Evotaz Agreement § 14.3(a)). However, for purposes of the instant case, the relevant No-Generics Restraint is § 14.2(a) given Plaintiffs' theory that the Evotaz Agreement was designed to protect BMS's vulnerable drug.

> *without* ***[**53]*** *more*, does not constitute an illegal restraint of trade or violation of the anti-trust laws. This is so because the restraint arises from the patent grant and a lawful transfer of a part of the rights to which that grant attached.

Id. at 16-17 (emphasis added).

Plaintiffs argue that the "without more" language is significant and that "exclusive licenses cannot avoid antitrust scrutiny where they are used in anticompetitive ways." *King Drug Co. of Florence, Inc. v. SmithKline Beecham Corp., 791 F.3d 388, 393, 407 (3d Cir. 2015)*; *cf.* *35 U.S.C. § 209(a)(4)* (providing that "[a] Federal agency may grant an exclusive or partially exclusive license on a federally owned invention . . . only if . . . granting the license will not tend to substantially lessen competition or create or maintain a violation of the Federal antitrust laws").

For example, in *Palmer v. BRG of Georgia, Inc., 498 U.S. 46, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)*, two companies that offered bar review courses were in competition with each other in Georgia.

> In early 1980, they entered into an agreement that gave [the Georgia company] an exclusive license to market [the Delaware company's] material in Georgia and to use its trade name . . . . The parties agreed that [the Delaware company] would not compete with [the Georgia company] in Georgia and that [the Georgia company] would not compete with [the Delaware company] outside of Georgia. **[**54]**

Id. at 47. ***HN9***[] The Supreme Court held that "agreements between competitors to allocate territories to minimize competition are illegal." *Id. at 49* (further stating that agreements "not to compete in the other's territories . . . are anticompetitive regardless of whether the parties split a market within which both do business or whether they merely reserve one market for one and another for the other").

According to Plaintiffs, here, the exclusive license in the Evotaz Agreement has been also been used in an anticompetitive way — *i.e.*, through the No-Generics Restraint that is contained in the agreement. As noted above, the relevant No-Generics Restraint in the Evotaz Agreement prohibited Gilead from making, using or selling the "Combination Product (including any Generic Combination Product)." Ostrander Decl., Ex. C (Evotaz Agreement § 14.2(a)). In effect, Gilead promised not to sell a competing FDC using generics even after the vulnerable ATV patents expired. This would give BMS's ATV extended protection even after the patents on the drug would have expired.

Gilead and BMS suggest that this is necessarily a consequence of an exclusive **[*603]** license — *i.e.*, with an *exclusive* license, the patent holder is not just giving **[**55]** someone else the right to use the patent but also giving up the patent holder's own right to use the patent (in effect, not to "compete"). *Cf.* *35 U.S.C. § 271(d)(4)* (providing that a patent owner is not guilty of patent misuse because it has, *e.g.*, "refused to . . . use any rights to the patent"). ***HN10***[] But what patent law permits (*i.e.*, exclusive licenses) is not dispositive of legality for antitrust purposes.[19] A patent license may be impermissibly anti-competitive.

For example, in *Actavis, 570 U.S. at 136*, the Supreme Court was asked to consider a settlement in a patent infringement case where the patentee paid the alleged infringer instead of the other way around — what is known as a reverse payment settlement agreement. More specifically, the Supreme Court had to determine whether a reverse payment settlement agreement "can sometimes unreasonably diminish competition in violation of antitrust laws." *Id. at 141*. During proceedings below, the Eleventh Circuit had held that

> a reverse payment settlement agreement generally is "immune from antitrust attack so long as its anticompetitive effects fall *within the scope* of the exclusionary potential of the patent." And since the alleged infringer's promise not to enter the patentee's market expired **[**56]** before the patent's term ended, the Circuit found the agreement legal and dismissed the FTC complaint.

---

[19] Indeed, as noted above, Defendants have taken the position that what constitutes patent misuse under patent law does not establish what is per se illegal under ***antitrust law***.

Id. The Supreme Court rejected the proposition that, so long as the anticompetitive effects were within the scope of the exclusionary potential of the patent, there could be no antitrust violation. *See* id. at 147 (stating that, just because anticompetitive effects fall within the scope of the exclusionary potential of the patent, that does not "immunize the agreement from antitrust attack"); *see also* King Drug, 791 F.3d at 399 (noting that, "in *Actavis*, the Supreme Court rejected the 'scope of the patent' test, a categorical rule that reverse payment patent settlements in the Hatch-Waxman context were immune from antitrust scrutiny so long as the asserted anticompetitive effects fell within the scope of the patent"). "[T]his Court has indicated that patent and antitrust policies are *both* relevant in determining the 'scope of the patent monopoly' — and consequently antitrust immunity — that is conferred by a patent." Actavis, 570 U.S. at 147 (emphasis added); *see also* id. at 151 (discussing precedent and holding that these cases "seek to accommodate patent and antitrust policies, finding challenged terms and conditions unlawful unless patent law policy **[**57]** offsets the ***antitrust law*** policy strongly favoring competition").

The Third Circuit's decision in *King Drug* also illustrates that an exclusive license permissible under patent law is not necessarily immune from scrutiny under ***antitrust law***. In *King Drug*, defendants were (1) GSK, the manufacturer of a brand drug (Lamictal), and (2) Teva, the manufacturer of a generic version of that drug.

> In earlier litigation, Teva had challenged the validity and enforceability of GSK's patents on lamotrigine, Lamictal's active ingredient. Teva was also the first to file an application with the FDA alleging patent invalidity or nonenforceability and seeking approval to produce generic lamotrigine tablets and chewable tablets for markets alleged to be annually worth $2 billion and $50 million, respectively. If the patent suit resulted in a judicial determination of invalidity or nonenforceability — or **[*604]** a settlement incorporating such terms — Teva would be statutorily entitled to a valuable 180-day period of market exclusivity, during which time only it and GSK could produce generic lamotrigine tablets. (The relevant statute permits the brand to produce an "authorized generic" during the exclusivity period.) **[**58]**
> After the judge presiding over the patent litigation ruled the patent's main claim invalid, GSK and Teva settled. They agreed Teva would end its challenge to GSK's patent in exchange for early entry into the $50 million annual lamotrigine chewables market and GSK's commitment not to produce its own, "authorized generic" version of Lamictal tablets for the market alleged to be worth $2 billion annually.

King Drug, 791 F.3d at 393-94.[20] The plaintiffs in *King Drug* filed suit against both GSK and Teva, asserting that the no authorized generics agreement ("no-AG agreement") violated ***antitrust law***.

In response, GSK and Teva argued, *inter alia*, that the no-AG agreements "are in essence 'exclusive licenses' and patent law expressly contemplates exclusive licenses." Id. at 406. The Third Circuit rejected the companies' position, stating as follows:

> [T]he "right" defendants seek is not in fact a patentee's right to grant licenses, exclusive or otherwise. Instead, it is a right to use valuable licensing in such a way as to induce a patent challenger's delay. . . . [In *Actavis*, where the Supreme Court held that reverse-payment settlements can sometimes violate ***antitrust law***], the patentee gave the challenger a license to enter **[**59]** 65 months before patent expiration, *plus* a reverse payment of "millions of dollars." This reverse payment was not immunized, of course, simply because of that early-entry "license." Similarly, the fact that a patent holder may generally have the right to grant licenses, exclusive or not, does not mean it also has the right to give a challenger a license along with a promise not to produce an authorized generic — i.e., a promise not to compete — *in order to induce the challenger "to respect its patent and quit [the competitor's] patent invalidity or noninfringement claim without any antitrust scrutiny*." In the *Actavis* Court's review, the question is not one of patent law, but of ***antitrust law***, the latter of which invalidates "the improper use of [a patent] monopoly." And as we read the Court's opinion, even exclusive license cannot avoid antitrust scrutiny where they are used in anticompetitive ways.

King Drug, 791 F.3d at 406-07 (emphasis in original and added).

---

[20] *See also* In re Actos End Payor Antitrust Litig., No. 13-CV-9244 (RA), 2015 U.S. Dist. LEXIS 127748, at *15 (S.D.N.Y. Sept. 22, 2015) (noting that an authorized generic is one sold by the brand or through a licensed third-party generic manufacturer).

To be sure, *Actavis* and *King Drug* are not on all fours with the instant case. For example, in both *Actavis* and *King Drug*, the patent holder gave a license (on certain terms) to protect its own patents; here, Gilead (the patent holder) allegedly gave BMS **[**60]** a license to protect BMS (not Gilead itself) after the patent protections for the BMS drug expired. But there is no material distinction. In both situations, a patent right (*i.e.*, to give an exclusive license) has been used to restrain competition in an allegedly anticompetitive way. That is, Gilead agreed not to sell a competing FDC *even after the patents on BMS's drugs expired*. The alleged restraint on trade is not Gilead's giving BMS an exclusive license to make and use COBI + ATV; **[*605]** it is that Gilead is giving up the right to make COBI + ATV generic *even after the patents on ATV expire*. Such a restraint is not *per se* immune from review under rule of reason analysis simply because it is framed as an exclusive license.[21]

3. Summary

For the foregoing reasons, the Court denies Gilead and BMS's motions to dismiss the antitrust claims based on the Atripla and Evotaz Agreements.

C. Agreement with Japan Tobacco

Gilead and Japan Tobacco entered into one agreement only. That agreement, dated March 2015, is titled a "License Agreement" and concerns one of Japan Tobacco's drugs, EVG (also referred to as JTK-303 in the agreement). Gilead and Japan Tobacco entered into the agreement because "JT **[**61]** [had] developed a proprietary anti-viral compound designated as JTK-303 [*i.e.*, EVG], to be used in a product or products for the treatment of HIV" and "Gilead desire[d] to obtain the exclusive right to develop and commercialize, for itself and its Affiliates such formulations and dosages of [EVG] outside of Japan, and JT desire[d] to grant Gilead such rights." Ostrander Decl., Ex. D (EVG Agreement, Recitals). Gilead eventually developed and commercialized two drugs containing EVG: (1) Stribild (combining EVG with Gilead's drugs TDF, FTC, and COBI) and (2) Genvoya (combining EVG with Gilead's drugs TAF, FTC, and COBI). As noted above, Gilead expected to face generic competition for TDF, FTC, and TDF/FTC in 2009, 2011, and 2011, respectively. The main patents protecting Japan Tobacco's drug EVG are not scheduled to expire until 2026.[22] *See* CAC ¶ 108.

Similar to above, Gilead and Japan Tobacco argue that the antitrust claims predicated on this agreement should be dismissed because the agreement simply conveys an exclusive license, which is permissible under patent law. Gilead and Japan Tobacco add that Plaintiffs have not even been able to point to any actual provision in the **[**62]** license agreement that is a No-Generics Restraint.[23]

As discussed above, an exclusive license without more is not an antitrust violation, but an exclusive license may be used in anticompetitive ways. Here, the problem for Plaintiffs is that there is no indication that Gilead and Japan Tobacco agreed that the exclusive license would be used in an anticompetitive way. As Gilead and Japan Tobacco point out, the agreement between the companies did not contain an express provision containing a No-Generics Restraint. Plaintiffs contend that there is no dispute that the agreement implicitly barred Japan Tobacco from selling competing FDCs using generics. ***HN11***[] But **[*606]** *Twombly* and *Iqbal* require specific allegations plausibly suggesting a conspiracy (or anti-competitive agreement). *See* Twombly, 550 U.S. at 556-57 (stating that, "[w]ithout

---

[21] This is not to say that every exclusive license may be subject to antitrust scrutiny. In many cases, such as where a manufacturer grants an exclusive license to one distributor, the licensor does not ordinarily compete with the licensee. The license in that context facilitates competition. In contrast, here, the licensor would ordinarily compete in the same market as the licensee but agrees as part of the license to withdraw from competition; thus, arguably there is at least an cognizable restraint of trade. Such a restraint may nonetheless be lawful under, *e.g.*, rule of reason, but it is not automatically immune from scrutiny.

[22] Although Gilead's COBI patents have a longer maximum patent life — until 2029 — Plaintiffs indicate that the inclusion of COBI in Stribild and Genvoya was not that significant because Japan Tobacco could have used an available substitute for COBI (*i.e.*, RTV or generic RTV) in a competing FDC. *See, e.g.*, CAC ¶ 112 (noting that generic RTV became available in March 2018).

[23] Gilead and Japan Tobacco raise additional arguments in their papers but, for the reasons discussed below, it is not necessary to address them.

more, parallel conduct does not suggest conspiracy"; at the pleading stage, there must be "allegations plausibly suggesting (not merely consistent with) agreement"); *Iqbal, 556 U.S. at 678* (stating that, "[w]here a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of "entitlement to relief"'"). Plaintiffs have failed to do **[**63]** so here.

Accordingly, the Court grants Gilead and Japan Tobacco's motions to dismiss the antitrust claims based on the agreement between the two companies. The dismissal is with prejudice because Plaintiffs have not suggested that they could amend to cure this deficiency.

D. Agreements with Janssen

There are four agreements between Gilead and Janssen:

(1) The Complera Agreement (July 2009). Complera is the commercial name for the FDC that Gilead and Janssen coformulated. Complera is made of (1) TDF/FTC (Gilead's drugs) and (2) RPV (Janssen's drug).

(2) The Odefsey Agreement (December 2014). Odefsey is the commercial name for another FDC that Gilead and Janssen coformulated — essentially the successor FDC to Complera. Odefsey is made up of (1) *TAF* and FTC (Gilead's drugs) and (2) RPV (Janssen's drug).

(3) The Prezcobix Agreement (June 2011). Prezcobix is the commercial name for an FDC that Gilead and Janssen coformulated. Prezcobix is made up of: (1) COBI (Gilead's drug) and (2) DRV (Janssen's drug).

(4) The Symtuza Agreement (December 2014). Symtuza is the commercial name for another FDC that Gilead and Janssen coformulated — essentially the successor FDC to Prezcobix. Symtuza is made up **[**64]** of (1) *TAF*, FTC, and COBI (Gilead's drugs) and (2) DRV (Janssen's drug).

The No-Generics Restraints for the above agreements are found at: § 17.2 in the Complera Agreement and § 17.2.1 in the Odefsey Agreement, and § 14.2(a) in the Prezcobix Agreement and § 14.3.2 in the Symtuza Agreement. At least some of the No-Generics Restraints seem to bar not only competing FDCs using generics but also comparable FDCs.[24]

24

• Ostrander Decl., Ex. E (Complera Agreement § 17.2(a)) ("During the term of this Agreement, without the prior written consent of Gilead (i) [Janssen] will not import, sell or offer to sell . . . (A) the Combination Product other than pursuant to this Agreement, or (B) any other combination product that is a Derivative Combination Product . . . .").

• Ostrander Decl., Ex. G (Odefsey Agreement § 17.2.1) ("Without the prior written consent of Gilead: (i) Janssen shall not . . . make, have made, use, sell, have sold, offer for sale, or import . . . (A) a Combination Product other than pursuant to this Agreement or (B) any Other Combination Product . . . ."); Ostrander Decl., Ex. G (Odefsey Agreement § 1.265) ("'Other Combination Product' shall mean any fixed-dose, co-formulated combination product (other than a Combination Product) in oral **[**65]** dosage form that contains, as its sole APIs, all three (3) of (a) TAF or TDF, (b) FTC or 3TC, and (c) RPV.").

• Ostrander Decl., Ex. F (Prezcobix Agreement § 14.2(a)) ("During the term of this Agreement, without the prior written consent of [Janssen]: (i) Gilead shall not . . . make, use, sell, have sold, offer for sale, or import . . . (A) the Combination Product, or (B) any Other Combination Product . . . .").

• Ostrander Decl., Ex. H (Symtuza Agreement § 14.3.2) ("Without the prior written consent of Janssen, . . . Gilead shall not . . . make, have made, use, sell, have sold, offer for sale, or import . . . (A) the STR other than pursuant to this Agreement, (B) any Other STR, or (C) any Other Restricted Product . . . ."); Ostrander Decl., Ex. H (Symtuza Agreement § 1.299) ("'Other STR' shall mean any fixed-dose, co-formulated combination product in oral dosage form (other than the STR) that contains, as its only four (4) APIs, (a) COBI or RTV, (b) TAF or TDF, (c) FTC or 3TC and (d) DRV or a version of ATV sold by a Person other than BMS or any of its Affiliates or third party distributors."); Ostrander Decl., Ex. H (Symutza Agreement § 1.298) ("'Other Restricted Product' shall mean any fixed-dose, co-formulated **[**66]** combination product in oral dosage form that contains, as its only three (3) APIs, (a) DRV or a generic version of ATV and (b) any two of the following: (i) COBI or RTV and (b) any two of the following: (i) COBI or RTV, (ii) TAF or TDF or (iii) FTC or 3TC.").

[*607] Plaintiffs have characterized the Complera and Odefsey Agreements as agreements intended to protect Gilead's vulnerable drugs (TDF and FTC), *see* CAC ¶¶ 96, 150 (alleging that Janssen's RPV patents are not scheduled to expire until 2019 to 2025 whereas the Gilead expected to face generic competition for TDF and FTC in 2009 and 2011 if generic manufacturers successfully challenged the patents protecting the drugs), whereas the Prezcobix and Symtuza Agreements were agreements intended to protect Janssen's vulnerable drug (DRV). *See* CAC ¶¶ 133, 163 (alleging that Janssen expected generic competition for DRV as early as 2013, if generic manufacturers were successful in challenging the patents protecting the drug; in contrast, Gilead's patents protecting COBI would not expire until 2029).

With respect to the above agreements, Gilead and Janssen have essentially made only the ancillary restraints argument discussed above. Janssen also **[**67]** makes one additional argument — namely, that Plaintiffs have improperly named as a defendant one of the Janssen entities, Johnson & Johnson ("J&J"). According to Janssen, Plaintiffs have not adequately alleged that J&J was involved in any conspiracy — indeed, J&J was not a party to any of the collaboration agreements identified above. Although J&J is Janssen's corporate parent, Janssen maintains that "a corporate parent cannot be held liable merely because a *Sherman Act* claim has been asserted against its subsidiary." Janssen Mot. at 13.

In response, Plaintiffs argue that Janssen has glossed over the fact that Plaintiff has used the term "Janssen" in the CAC to refer to both the parent and the subsidiary — thus, "both defendants [parent J&J included] negotiated and abided by the No-Generics Restraints; both defendants encouraged doctors to switch prescriptions to the FDCs insulated form generic competition; and both defendants shared in the monopoly profits that the unlawful agreements generated." Opp'n at 35. Plaintiffs add that they have a factual basis for asserting that J&J was involved in the conspiracy:

> [First,] the Complera/Odefsey Agreement indicates that a Johnson & Johnson **[**68]** "Executive" has a significant management and oversight role with respect to Janssen and Gilead's collaboration, including patent matters and the development of marketing materials [citing, *inter alia*, the Odefsey Agreement §§ 1.103 and 6.7.1.2]. [Second,] [t]he agreement also requires the parties to send copies of all collaboration-related reports and communications to Johnson & Johnson's General Counsel [citing the Odefsey Agreement § 20.2]. Finally, in a **[*608]** press release attached to the agreement, Johnson & Johnson's Worldwide Chairman for Pharmaceuticals extols the company's agreement with Gilead.

Opp'n at 36.

The Court agrees that Plaintiffs have a factual basis for alleging that J&J was involved. In particular, § 6.7.1.2 of the Odefsey Agreement addresses marketing materials that Gilead shall develop and propose to Janssen (the subsidiary). If the parties are unable to reach agreement, they "may refer any disputed issues to the Executives for resolution pursuant to Section 20.6. If the Executives are unable to reach agreement with respect thereto within the Executives Review Period, Gilead shall have final decision-making authority with respect to such matter." Ostrander Decl., Ex. G (Odefsey Agreement § 6.7.1.2). "Executives" is defined **[**69]** in the agreement as follows: "(a) in the case of Gilead, the President and Chief Operating Officer of Gilead Parent, and (b) in the case of Janssen, a Worldwide Chairman of Janssen Parent's pharmaceutical group." Ostrander Decl., Ex. G (Odefsey Agreement § 1.103). Given the factual basis articulated by Plaintiffs, the Court does not dismiss at this time J&J from the proceedings. The Court cannot say, as a matter of law, that J&J did not play a role in the No-Generics Restraint scheme.

Accordingly, the Court denies Gilead and Janssen's motions to dismiss the antitrust claims based on the No-Generics Restraints in the Complera, Odefsey, Prezcobix, and Symtuza Agreements.

With respect to the antitrust claims based on the No-Generics Restraints, the Court rejects Defendants' ancillary restraints argument. However, the Court grants Gilead and Japan Tobacco's motions to dismiss the antitrust claims based on the specific agreement entered into by these two companies.

E. <u>Antitrust Injury</u>

The final issue for the Court to address is whether the remaining claims against Gilead, BMS, and Janssen should be dismissed for failure to allege antitrust injury. ***HN12***[] "[A]ntitrust injury consists of four elements: '(1) **[**70]** unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent.'" *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*. The main antitrust injury arguments are addressed below.

1. Standalone Components of FDC

Defendants argue first that Plaintiffs have failed to adequately allege any anticompetitive injury because, even if the joint venture members could not make a competing FDC using generics, nothing prevented patients from buying the standalone components to the FDCs (*i.e.*, a patient could buy generic TDF and/or FTC and then, separately, the other defendant's drug). *See, e.g.*, Gilead Mot. at 21; BMS Mot. at 11-12. But even if a patient could buy the standalone components of the joint venture FDC, that does not necessarily mean that the No-Generics Restraint did or does not have any anticompetitive effects. Plaintiffs have alleged that doctors were likely to prescribe brand FDCs[25] and that individuals who were prescribed such FDCs could not get their prescriptions filled with generic standalone components: "[u]nder state drug-substitution laws, pharmacists receiving a prescription for [an] FDC cannot dispense [in **[**71]** its place] generic versions of the standalone **[*609]** component[]" drugs, Opp'n at 3, because "[g]eneric versions of TDF and/or FTC are not AB-rated to, and therefore not automatically substitutable for, the TDF-based FDCs." CAC ¶ 183. Furthermore, getting standalone components would be contrary to the whole point of an FDC — *i.e.*, to get better patient compliance. *See* CAC ¶ 63 (alleging that "[t]he need to use multiple drugs in cART regimens can be a barrier to patient compliance" and "[t]o reduce this possible burden, multiple antiretroviral drugs are often coformulated together into a single pill," *i.e.*, FDC").[26]

2. Untainted Competitor

Second, Defendants argue that the antitrust injury claimed by Plaintiffs is too speculative. But a reasonable jury could infer that, absent the No-Generics Restraints, the other defendants would want to make competing FDCs once the generic versions of Gilead's vulnerable drugs became available (*i.e.*, once the patents protecting the drugs expired); that would be in their own self-interest. *Cf. King Drug, 791 F.3d at 405* (noting that, "[a]bsent a no-AG [authorized generics] promise, launching an authorized generic would seem to be economically rational for the brand [manufacturer]"). **[**72]** In this regard, it is notable that, when generic TDF became available in December 2017 (generic FTC will not become available until September 2020), BMS *did* come up with a competing FDC because its No-Generics Restraint with Gilead did not bar it from making a competing FDC that was *comparable* to the FDC covered by the joint venture agreement. *See* CAC ¶ 140 (alleging that, "[w]hen generic TDF became available, BMS licensed Mylan Pharmaceuticals to product [the] comparable version [to Atripla]" — *i.e.*, generic TDF, 3TC (instead of FTC), and EFV). Furthermore, Plaintiffs fairly make the point that, "if the conspirators were not likely to have marketed competing versions of the products, Defendants would have had no reason to include the No-Generics Restraint." Opp'n at 36.

Defendants make one additional argument on antitrust injury — *i.e.*, that it is speculative for Plaintiffs to assert that untainted competitors in BMS, Japan Tobacco, and Janssen's positions would actually have challenged Gilead's patents prior to their expiration dates (*e.g.*, instead of waiting for the TDF patents to expire in December 2017). *See, e.g.*, CAC ¶¶ 114, 130, 158. Defendants' contention is not without force. **[**73]** However, that asserted injury appears to be Plaintiffs' alternative position on antitrust injury and thus, even if credited, would not result in dismissal. Plaintiffs, however, have leave to provide a more definite statement regarding this antitrust injury theory.

---

[25] As noted above, Plaintiffs suggest that Gilead was able to do this through use of "large sales forces that visit doctors' offices and persuade them to prescribe" certain products. *See* CAC ¶ 368.

[26] In its motion, BMS argues that "having to take two pills a day instead of one is not the type of interest protected by the antitrust laws, which concern quantifiable *economic* injury." BMS Mot. at 12 (emphasis in original). But Plaintiffs are claiming an economic injury — the inability to purchase a competing FDC made up (at least in part) of generics. The reason why Plaintiffs want to buy the competing FDC (*e.g.*, for convenience) should not mean there is not an economic injury.

V. ANTITRUST CLAIMS BASED ON TEVA PATENT SETTLEMENT AGREEMENTS — COUNTS THREE THROUGH SIX AND COUNTS EIGHT THROUGH THIRTEEN

In Counts Three through Six and Counts Eight through Thirteen, Plaintiffs also claim anticompetitive conduct based on patent settlement agreements between Gilead and Teva. As noted above, the agreements contained MFE and MFEP clauses, which are what allegedly induced Teva to delay its entry into the market.

> **[*610]** The MFE provided that, if any second filer entered the market before the agreed-upon date, Teva's entry date would be moved up accordingly. . . . The MFEP provided that Gilead would not grant a license for a second filer to enter the market any earlier than six weeks [in one case or six months in another] after Teva entered.

Opp'n at 8. Thus, according to Plaintiffs, the two clauses "insulated Teva from the . . . risk that one or more of the several subsequent filers lined up behind it would enter on **[**74]** or before the agreed-upon entry dates, either by succeeding in their own lawsuits or by using the leverage of their patent challenges to negotiate an entry date equal to or earlier than Teva's licensed entry date." Opp'n at 51.

As indicated above, Plaintiffs assert that the agreements are anticompetitive because (1) Teva agreed to delay its entry into the market in exchange for being given MFE and MFEP provisions and (2) the MFE and MFEP provisions also served as a "disincentive" for second filers to try to enter the market before Teva.

In its motion to dismiss, Gilead argues first that MFEs and MFEPs are basically most-favored nation ("MFN") clauses, and it is not uncommon to find MFN clauses in settlement agreements. While this may be true, it that does not mean MFN clauses are automatically free from antitrust scrutiny, and Gilead concedes as much. *See* Gilead Mot. at 10 (arguing that, "at most, . . . MFNs can be anticompetitive in rare circumstances") (emphasis omitted). That a MFE and/or MFEP is deserving of antitrust scrutiny — especially compared to other kinds of MFN clauses — is underscored by the fact that the whole point of a MFE and/or MFEP is about *entry, i.e.*, when competition **[**75]** is allowed into a market.

Gilead argues next that the MFE and MFEP at issue here are not enough to constitute anticompetitive conduct because they are actually procompetitive in nature. Gilead focuses on the MFE in particular: under the MFE, if a generic manufacturer obtains an earlier entry date than Teva does (*e.g.*, by prevailing in a patent infringement lawsuit initiated by Gilead), then Teva gets its entry date advanced; thus, that means *more* competition — *i.e.*, from both the generic manufacturer and Teva. This argument is problematic for at least three reasons: (1) it addresses only the MFE, and not the MFEP (which gives Teva a preferential entry date compared to other generic manufacturers); (2) it ignores Plaintiffs' theory that Teva agreed to a delayed entry date — *i.e.*, a later date than it otherwise would have — because it was given, in exchange, the benefits afforded by both the MFE and MFEP; and (3) it ignores Plaintiffs' theory that the MFE/MFEP combination deterred second filers from trying to get an earlier entry date.

To the extent Gilead relies on the Supreme Court's *Actavis* decision, *Actavis* does not hold that an early entry date (relative to the patent expiration date) **[**76]** is *automatically* procompetitive. In *Actavis*, the Supreme Court simply acknowledged that, as a general matter, "settlement on terms permitting the patent challenger to enter the market before the patent expires would also bring about competition, again to the consumer's benefit." *Actavis, 570 U.S. at 154*.[27] To the extent **[*611]** the New York district court in *Actos* suggested otherwise, *see* *Actos, 2015 U.S. Dist.*

---

[27] As noted above, the *Actavis* Court ultimately held that a reverse payment settlement agreement could be anticompetitive in nature, even if the alleged infringer simply made the promise not to enter the patentee's market before the patent term ended. *See* *Actavis, 570 U.S. at 141*.

LEXIS 127748, at *45 (addressing a MFE which the court denominated an "acceleration clause"; stating that, "[a]t their core, the settlements at issue simply granted the Generic Defendants a compromise date of generic entry — the very type of settlement sanctioned by the *Actavis* Court"), the Court is not persuaded. Furthermore, the *Actos* court acknowledged that "another case may present circumstances" where it would be plausible that a MFE could deter a second filer from challenging a patent because, even if the second filer won, "it would be deprived of any period of market exclusivity" because the first filer could "also enter the market immediately thereafter." *Id. at *48-49*. The *Actos* court simply held that, in the case before it, a deterrent effect was not plausible. *See id. at *49* (noting, *inter alia*, that, even after the patent holder and certain generic manufacturers **[**77]** settled, another generic manufacturer continued to challenge the patent at issue). Finally, the court in *In re Loestrin 24 Fe Antitrust Litigation, 261 F. Supp. 3d 307 (D.R.I. 2017)*, did in fact hold that a plaintiff had plausibly alleged anticompetitive effects from a MFE. *See id. at 333-34* (taking note of plaintiff's allegations that, "with the acceleration clause in place, other generics did not have the opportunity, and thus the incentive to try, to enter the market before Watson's scheduled entry"; adding that "[i]t may be that with more factual and expert discovery, the . . . Defendants can establish that there were no anticompetitive effects, or that . . . the 'challenged payment was justified by some precompetitive objective[,]' [b]ut at this juncture, the Court is not prepared to hold that an acceleration clause like the one [here] may never be cognizable as a component of a complex settlement agreement amounting to a large and unjustified reverse payment").

Gilead protests still that the MFE and/or MFEP cannot be deemed anticompetitive when they do not represent "reverse payments" (from Gilead to Teva) in the first place; more specifically, they do not represent payments at all because "[Teva] received no compensation from **[**78]** [Gilead], but rather, [was] compensated only through the market when [it] began selling [its] generic product." *Actos, 2015 U.S. Dist. LEXIS 127748, at *48*. It is true that the MFE and/or MFEP may not be a "payment" from Gilead to Teva in the sense that cash was not being taken out of Gilead's pocket and being given to Teva — or even in the sense that Gilead was giving up a benefit that it otherwise would have had for Teva's benefit. *See, e.g., King Drug, 791 F.3d at 404-05* (stating that "no-AG [authorized generic] agreements are likely to present the same types of problems as reverse payments of cash" — *e.g.*, they "may be of great monetary value [to] the first-filing generic [manufacturer]" and "a brand[] [manufacturer's] commitment not to produce an authorized generic means that it must give up the valuable right to capture profits").

But *Actavis* did not preclude a patent settlement agreement from being anticompetitive in the absence of a reverse payment *if there were other circumstances* that posed potential anti-competitive concern. *See Actavis, 570 U.S. at 158* (suggesting that patent litigation **[*612]** could be settled "by allowing the generic manufacturer to enter the patentee's market prior to the patent expiration, without the patentee paying the challenger to stay out prior to **[**79]** that point"). In the instant case, Plaintiffs have pointed to indicators of anti-competitiveness. For instance, even though Teva was allowed to enter the market prior to the patent expiration dates, the entry date was, relatively speaking, quite late — *i.e.*, close in time to the patent expiration dates (in one case, only six weeks before the patent expiration date and, in the other case, only a year before the patent expiration date). Thus, this gives rise to a concern that Teva was induced to accept a late entry date (*i.e.*, giving up the right to pursue its challenge to the patent and earlier entry) in return for a significant benefit — even if that benefit did not come at Gilead's expense.

Another yellow flag is with respect to the MFEP clause specifically. The MFEP clause, in effect, gave Teva exclusivity for a period time (six weeks in one case and six months in another), but Plaintiffs have alleged that, "in the case of Truvada [TDF/FTC] (and possibly Atripla as well), . . . Teva had [already] forfeited" the 180-day ANDA Exclusivity "by filing to gain timely tentative approval from the FDA." Opp'n at 51. Thus, the MFEP clause was essentially "resurrect[ing]" ANDA Exclusivity or **[**80]** at least some kind of exclusivity where it no longer applied. Opp'n at 51. Resurrection of exclusivity could arguably be a significant deterrent to second filers.[28]

The Court notes that, although there appears to have been a MFE in *Actavis*, the MFE was not substantively discussed in the opinion. *See id. at 145* (noting that "Actavis [the generic manufacturer] agreed that it would not bring its generic to market until August 31, 65 months [more than 5 years] before Solvay's patent expired (unless someone else marketed a generic sooner)").

[28] As noted above, a "first-filing generic manufacturer is guaranteed [the ANDA] exclusivity period [of 180 days] even if it settles litigation with a patent owner without resolving the invalidity or noninfringement issues" — which serves as a disincentive for a

The Court acknowledges that the antitrust claims here would arguably be a closer call if the Court was dealing with just a MFE clause and not, in addition, a MFEP clause. A MFE clause is not as clear a deterrent to a second filer (as compared to a first filer) because a second filer is simply prevented from doing better than the first filer but is nevertheless guaranteed *equality* (although Plaintiffs argue that it is a factual question as to whether a MFE is enough of a deterrent). *See, e.g.*, Opp'n at 52 (noting that a former executive of Apotex, "one of the largest generic manufacturers in the world," testified before Congress that MFEs are "'poison pill' provisions" and "represent 'the primary anticompetitive aspects of settlements' insofar as they 'eliminate any incentive for a subsequent filer to continue to litigate for earlier market entry'"). In contrast, a MFEP clause guarantees a second filer that it will be in a *worse* position compared to the first filer even where there is no ANDA Exclusivity. Since **[**81]** the instant case presents a situation where there is both a MFE and a MFEP, it is different from those cited by Gilead, and the Court need not address the question of whether a MFE by itself can constitute anticompetitive conduct.

Accordingly, for the antitrust claims based on the MFE and MFEP clauses, Gilead's motion to dismiss is denied.[29]

[*613] VII. ANTITRUST CLAIMS BASED ON GILEAD'S COMMERCIALIZATION OF TAF — COUNTS THREE THROUGH SIX AND COUNTS EIGHT THROUGH THIRTEEN

Finally, in Counts Three through Six and Counts Eight through Thirteen, Plaintiffs claim anticompetitive conduct based on the way that Gilead commercialized TAF. As indicated above, Plaintiffs assert that Gilead commercialized TAF in a particular manner with the goal of moving over prescriptions from TDF-based FDCs to TAF-based FDCs because the FDCs (unlike any standalone drugs) would be protected by the No-Generics Restraints. According to Plaintiffs, to move over to TAF-based FDCs, Gilead took steps to make the TDF-based FDCs less desirable and further took purposeful steps to ensure that TAF standalone could or would not be used in conjunction with other standalone drugs in place of a TAF-based FDC. For example:

- Gilead **[**82]** intentionally degraded the safety of one of its TDF-based FDCs, commercially known as Stribild (*i.e.*, by keeping the strength of TDF at a certain level when a lower level would produce fewer side effects), and further artificially raised the price of the drug. *See generally* CAC ¶ 242 *et seq.*

- Gilead withheld standalone TAF from the market in or about the time period from 2015-2016 and then, when it released TAF standalone, labeled the drug as a treatment for chronic Hepatitis B only (and not HIV as well) and further intentionally degraded the drug (*i.e.*, by selling it at a strength that produced more side effects instead of a lower strength). *See generally* Opp'n at 47; CAC ¶ 250 *et seq.*

Gilead argues that the antitrust claims based on the commercialization of TAF should be dismissed because the same or similar types of claims were already dismissed in a case before Judge Alsup, *i.e., AIDS Healthcare, 2016 U.S. Dist. LEXIS 87578*. Because Gilead's argument largely depends on *AIDS Healthcare*, the Court briefly discusses the case below.

In *AIDS Healthcare*, the plaintiff brought a *§ 1* tying claim and a *§ 2* monopolization claim, both related to TAF. In the tying claim, the plaintiff alleged that "Gilead entered into agreements with Janssen **[**83]** and Japan Tobacco to tie sales of TAF to sales of [the other companies'] respective drugs by combining them into [FDCs]." *Id. at *19*. Judge Alsup noted that one element of a tying claim is that there be "'two distinct products . . . in different markets whose sales are tied together.'" *Id.* But here, TAF was not available as a standalone product as the FDA had not yet

---

second filer to press a patent challenge — *AIDS Healthcare*, 2016 U.S. Dist. LEXIS 87578, at *4-5, but resurrection of ANDA Exclusivity is a different matter.

[29] Gilead suggests that the antitrust claims are predicated on Plaintiffs' position that the patents protecting TDF, FTC, and/or TDF/FTC are weak, but there are no factual allegations to explain why the patents are weak. *See* Gilead Mot. at 30-31. While this argument is not without some merit, it is reasonable to infer that there were problems with the patents as Teva and the multiple other generic manufacturers levied patent challenges. This is not a matter that can be determined as a matter of law at this juncture.

approved it. *See id. at *20* (stating that "[t]he extent of consumer demand for standalone TAF is irrelevant because TAF *cannot* be sold as a standalone product as a matter of law"). Judge Alsup added that Gilead "had no duty to pursue FDA approval of the standalone version. To hold otherwise would require manufacturers to seek approval of each component of the drug before seeking approval of the combination drug. This could entirely undermine the FDA's policy of encouraging the development of combination drugs." *Id. at *21*.

As for the § 2 claim, there, the plaintiff alleged that "Gilead improperly bundled TAF" with Janssen and Japan Tobacco's drugs to make certain FDCs

> as a means of maintaining its dominance in the TAF market. Specifically, it alleges that by bundling TAF with the other ingredients, it insulated the allegedly **[*614]** weak patents covering TAF from **[**84]** challenges, because any generic manufacturer seeking to produce a TAF product would need to invalidate all the patents [for the drugs making up the FDCs] before it could win FDA approval, rather than just the TAF patents.

*Id. at *22-23*. Judge Alsup dismissed the § 2 claim for several reasons. One of the reasons was that the plaintiff had failed to allege any anticompetitive conduct. Judge Alsup acknowledged that Gilead had chosen to release TAF as part of a FDC before seeking approval for TAF as a standalone; but,

> "[a]s a general rule, any firm, even a monopolist . . . [,] may bring its products to market whenever and however it chooses." *Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 545 (9th Cir. 1983)*. There is no legal basis for concluding that Gilead had a *duty* to release TAF as a standalone product. *See Allied Orthopedic, 592 F.3d at 1002* ("[A] monopolist has no duty to help its competitors survive or expand when introducing an improved product design.").

*Id. at *23-24* (emphasis added).

The above language from *AIDS Healthcare* lends some support to Gilead's position that it was free to withhold TAF as well as free to shape the product as it saw fit. But, as indicated above, Plaintiffs' antitrust claims here are not based on what Gilead did with TAF *alone*; they are also based on what Gilead did with TDF (*i.e.* ***[**85]*** , intentionally degrading Stribild and artificially raising its price).

Putting aside that point, Judge Alsup's concern in *AIDS Healthcare* seemed to be that Gilead should have been free to decide how to market TAF — *i.e.*, it was not unreasonable for Gilead to market the drug as part of a FDC first and put off selling the drug as a standalone. But here Plaintiffs are not just alleging that TAF standalone was put off for some time; rather, Plaintiffs are alleging that there was a deliberate choice to withhold TAF in order to get consumers to move over from TDF-based products to TAF-based products and to do so in a particular manner. Plaintiffs allege that, when TAF standalone was eventually released, it was in too high a strength, and it was not given with an indication that it could be used for treatment of HIV.

Finally, the Court notes that the following language from *AIDS Healthcare* — "'[a]s a general rule, any firm, even a monopolist . . . [,] may bring its products to market whenever and however it chooses,'" *id.* — comes from a Ninth Circuit opinion *Foremost*. *Foremost*, in turn, took this language from another Ninth Circuit case, *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)*. In *Berkey*, the court immediately followed the statement **[**86]** above with the following footnote:

> This is not to say, of course, that new product introductions are Ipso facto immune from antitrust scrutiny, and we do not agree with Kodak's argument that they are, *See, e. g., Sargent-Welch Scientific Co. v. Ventron Corp., 567 F.2d 701 (7th Cir. 1977)*, *Cert. denied*, *439 U.S. 822, 99 S. Ct. 87, 58 L. Ed. 2d 113 (1978)* (use of power over old product to promote sale of new); in all such cases, however, *it is not the product introduction itself, but some associated conduct, that supplies the violation*.

Id. at 286 n.30 (emphasis added).

That statement in *Berkey* is consistent with later Ninth Circuit law, including *Allied Orthopedic Appliances Inc. v. Tyco Health Care Group LP, 592 F.3d 991 (9th Cir. 2010)*. ***HN13***[] In *Allied*, the Ninth Circuit noted that *§ 2* law does not condemn the **[*615]** success of a monopolist where it is based on invention and innovation. *See id. at 998*. Thus, "'[a]s a general rule, courts are properly very skeptical about claims that competition has been harmed by a dominant firm's product design changes.'" *Id.* But, the court added, "changes in product design are not immune from antitrust scrutiny and in certain cases may constitute an unlawful means of maintaining a monopoly under *Section 2*." *Id.* Thus, for example, when Microsoft integrated its web browser into its operating system, an antitrust violation was found, particularly as Microsoft gave no procompetitive justification for that conduct. **[**87]** *See id.* ***HN14***[] The *Allied Orthopedic* court added that, where a design change does "improve[] a product by providing a new benefit to consumers," it "does not violate *Section 2* *absent* some associated anticompetitive conduct." *Id. at 998-99* (emphasis added); *see also id. at 999-1000* (noting that "*CalComp* and *Foremost* . . . stand for the uncontroversial proposition that product improvement *by itself* does not violate *Section 2*, even if it is performed by a monopolist and harms competitors as a result") (emphasis added).

With respect to the instant case, Plaintiffs are not contesting per se Gilead's introduction of the TAF-based FDCs — *i.e.*, the product introduction, improvement, and/or innovation. Rather, Plaintiffs are challenging Gilead's purposeful conduct — namely, moving consumers over to the TAF-based FDC (instead of letting the superiority of the products drive that change). For this conduct, Plaintiffs have a plausible argument that there is no procompetitive justification for the action. For instance, what purpose is served by Gilead degrading Stribild and/or standalone TAF? What purpose is served by Gilead not putting a HIV indication on TAF? Whether this was an unlawful restraint cannot be determined on this motion to dismiss.

[88]** The Court therefore denies Gilead's motion to dismiss the antitrust claims based on the commercialization of TAF.

VII. ALL ANTITRUST CLAIMS — RELEVANT MARKET AND MARKET POWER

Generally speaking, all of Plaintiffs' ***HN15***[] antitrust claims (whether based on an unreasonable restraint of trade under *§ 1* or monopolization under *§ 2*, and whether based on federal or state law) require the definition of a product market. *See, e.g., Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1104-05 (9th Cir. 1999)* ("Except when alleging a *per se* antitrust violation, Plaintiffs must identify the relevant geographic and product markets in which Plaintiffs and Defendants compete and allege facts demonstrating that Defendants' conduct has an anticompetitive effect on those markets. Market definition is also essential to establish a monopolization claim.").[30]

HN16[] A product market "encompass[es] the product at issue as well as all economic substitutes for the product." *Newcal Indus. v. Ikon Office Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)*. "'The outer boundaries of a product market are determined by the reasonable interchangeability of use *or* the cross-elasticity of demand between the product itself and substitutes for it.'" *Id.* (emphasis added). "Elasticity of demand is a concept used to signify the relationship between changes in price and responsive changes in demand." **[**89]** *United States v. LSL Biotechnologies, 379 F.3d 672, 697 **[*616]** (9th Cir. 2004)*; *see also Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 469, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (indicating that cross-elasticity of demand refers to "the extent to which consumers will change their consumption of one product in response to a price change in another."). In the instant case, Plaintiffs have pointed to two product markets: (1) the broader market for cART drugs generally and (2) the narrower market for each brand drug (standalone or FDC) and its AB-rated generic equivalent. *See* CAC ¶ 376.

---

[30] As indicated above, if the Court were to find per se illegality under *§ 1*, then Plaintiffs would not need to worry about market definition. But at this juncture of the proceedings, the Court has not made any conclusion as to whether the per se illegal rule applies.

To the extent Defendants suggest it is not permissible for Plaintiffs to base their antitrust claims on two different product markets, the Court does not agree. ***HN17***[] As both Plaintiffs and the FTC explain in their respective briefs, what the appropriate product market is depends on what anticompetitive harm is being claimed. *Cf.* *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 598 (1st Cir. 1993)* (indicating that one must "remember[] to ask, in defining the market, *why* we are doing so: that is, what is the antitrust question in this case that market definition aims to answer?"; adding that "the nature of the claim can affect the proper market definition") (emphasis added). Defining a product market is simply a way to determine whether a defendant has market power. *See, e.g., Todd v. Exxon Corp., 275 F.3d 191, 199 (2d Cir. 2001)* (stating that "[o]ne traditional way to demonstrate market power **[**90]** is by defining the relevant product market and showing defendants' percentage share of that market"); *Bhan v. NME Hosps., Inc., 669 F. Supp. 998, 1018 (E.D. Cal. 1987)* (noting that, "[s]ince market power can only be measured in relationship to a particular product market, the market definition bears directly upon the degree of market power a firm has[;] [t]hus, to prove that a defendant has market power, the first crucial step is to establish the bounds of the relevant market"). Market power, in turn, is simply a way to assess whether the defendant's conduct has anticompetitive effects. *See, e.g., Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 496 (2d Cir. 2004)* (in discussing *§ 2* claim, stating that "[e]valuating market power begins with defining the relevant market[;] [t]his inquiry will also prove useful for analyzing the *§ 1* allegations because a market definition provides the context against which to measure the competitive effects of an agreement"); *In re Aggrenox Antitrust Litig., 199 F. Supp. 3d 662, 668 (D. Conn. 2016)* (stating that "articulating a relevant market definition is not an end in itself, but is in the service of answering the question of market power, which in turn 'is but a surrogate for detrimental effects'").

In the instant case, it is not unreasonable for Plaintiffs to have identified two different product markets because they have claimed harm to competition in **[**91]** two different ways. More specifically, Plaintiffs allege that (1) one "purpose and effect of Defendants' unlawful conduct was to impair competition among drugs used in the cART regimen," Opp'n at 65, and (2) another "purpose and effect of Defendants' . . . unlawful conduct was to impair competition from generic versions of each of the brand name drugs at issue." Opp'n at 63.

Defendants contend still that there are insufficient factual allegations to support each asserted product market. For the narrower market, the Court disagrees. For example, it is plausible each brand drug and its AB-rated generic version is not reasonably interchangeable with other drugs because, as Plaintiffs allege, "once the physician and patient find that one of these drugs is well tolerated, at competitive prices the doctor and patient are very unlikely to switch to a different HIV drug based on variations of price of 10% or less." CAC ¶ 364; *see also* CAC ¶ 181 (alleging that "pharmaceuticals are 'experience' **[*617]** goods that consumers and physicians are hesitant to change if they are working"). Plaintiffs also suggest that there is not reasonable interchangeability because each brand drug (and its AB-rated generic **[**92]** version), compared to other drugs, has "varying ability to treat the conditions for which it is prescribed" and a different "side-effects profile." CAC ¶ 363.

However, Defendants' position has merit on the broader market. That is, it is not clear from the CAC what exactly the cART product market is. Although the Court understands from the CAC that cART stands for combination antiretroviral therapy, that it is the modern means of treating HIV, and that it often consists of two NRTIs and a third agent, Plaintiffs have not explained, *e.g.*, how there is reasonable interchangeability of use with respect to different cART drugs.[31]

Because the Court concludes that Plaintiffs have not adequately alleged a cART market, it does not address Defendants' contention that the broader and narrower product markets contradict one another. However, the Court does note that, under Ninth Circuit law, "it is legally permissible to premise antitrust allegations on a submarket." *Newcal, 513 F.3d at 1045*.

In sum, because Plaintiffs have not adequately alleged a cART market, its antitrust claims based on that market (as opposed to the narrower market for each brand drug) are dismissed but with leave to amend.

---

[31] For instance, which cART drugs are included and which are not? Is that market limited to those which contain a Gilead product or does it extend to all cART drugs?

VIII. STATE LAW CLAIMS — ANTITRUST [93] AND CONSUMER PROTECTION — COUNTS TWO, FOUR, SIX, SEVEN, NINE, ELEVEN, AND THIRTEEN**

As noted above, Plaintiffs bring two kinds of state law claims: state antitrust claims and state consumer protection claims. With respect to the state antitrust claims, Defendants argue that their arguments on the federal antitrust claims are also applicable. Defendants also make several other independent arguments in favor of dismissal of the state law claims, whether based on ***antitrust law*** or consumer protection law. Because most of these independent arguments are expressly made by Gilead, the Court largely refers to Gilead hereinafter.

A. Antitrust and Consumer Protection Claims: Application of California Law to Nationwide Purchases

For the most part, Plaintiffs claim violation of a particular state's law (whether antitrust or consumer protection) based on a purchase made in that state. The one exception is with respect to California law. Plaintiffs maintain that California law can apply to purchases made anywhere in the nation because Gilead is based in California. In its motion to dismiss, Gilead argues that it is a violation of due process to apply California law (antitrust or consumer protection) **[**94]** nationwide.

As an initial matter, Plaintiffs suggest that the Court should not rule on this issue in the context of a 12(b)(6) motion; rather, Plaintiffs assert, the issue should be reserved for class certification. *See, e.g., Bias v. Wells Fargo & Co., 942 F. Supp. 2d 915, 928 (N.D. Cal. 2013)* (Gonzalez-Rogers, J.) ("find[ing] that the choice of law determination in this case is better suited for the class certification stage because the record with respect to balancing the competing states' interests is not sufficiently developed"); *Khoa Nguyen v. Barnes & Noble, Inc., No. SACV 12-812-JLS (RNBx), 2015 U.S. Dist. LEXIS 187099, at *11 (C.D. Cal. Nov. 23, 2015)* **[*618]** (noting that, "[a]lthough there is some disagreement, most courts in this circuit hold that a claim should not be dismissed on a conflict of law analysis at the pleading stage, especially 'when dealing with a potential nationwide class action'"; therefore, "declin[ing] to engage in a choice of law analysis based solely on the pleadings"); *Andriesian v. Cosmetic Dermatology, Inc., No. 3:14-cv-01600-ST, 2015 U.S. Dist. LEXIS 50502, at *28 (D. Or. Mar. 3, 2015)* (citing cases in support of the proposition that "a case should not be dismissed based on a conflict of law analysis prior to class certification" — *i.e.*, a choice-of-law analysis at the pleading phase is "'premature'"). But Plaintiffs' position seems problematic, especially **[**95]** as the cases on which they rely hold that it is premature to make a choice-of-law decision prior to class certification. Here, Gilead is not really asking the Court to make a choice-of-law decision per se. Rather, Gilead is asking the Court to make a due process determination — *i.e.*, even though Plaintiffs claim that California law can be applied to purchases made outside the state ("extraterritorial" purchases), would application of California law violate Gilead's due process rights?[32]

The Court therefore addresses the due process argument now, leaving for another day the issue of whether California law is the correct choice of law. As to the due process argument, the parties essentially agree that the governing authority is *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985)*. There, the defendant was an oil company that produced or purchased natural gas from leased land located in eleven different states, and that sold most of the gas in interstate commerce. The plaintiffs were the royalty owners possessing rights to the leases from which the defendant produced gas. *See id. at 799*. The plaintiffs brought a class action against the defendant in Kansas state court, "seeking to recover interest on royalty payments which had been delayed by [the **[**96]** defendant." *Id.* The trial court certified a class action under Kansas law. *See id. at 801*. The final certified class "contained 28,100 members" of which "[l]ess than 1,000 . . . resided in Kansas. [In addition,] [o]nly a miniscule amount, approximately one quarter of one percent, of the gas leases involved in the lawsuit were on Kansas land." *Id. at 801*.

One of the issues before the Supreme Court was whether it was appropriate to apply Kansas law to all of the class members' claims. *See id. at 802* (noting argument that "Kansas courts could not apply Kansas law to every claim in

---

[32] To be sure, it may be argued that Gilead is asserting choice of law dressed up as a due process claim. But as noted herein, case law has established a distinct due process analytical framework.

the dispute"); *see also* *id. at 814-15* (noting that "[t]he Kansas courts applied Kansas contract law and Kansas equity law to every claim in this case, notwithstanding that over 99% of the gas leases and some 97% of the plaintiffs in the case had no apparent connection to the State of Kansas except for this lawsuit"). According to the defendant, "total application of Kansas substantive law violated the constitutional limitations on choice of law mandated by the *Due Process Clause of the Fourteenth Amendment* and the *Full Faith and Credit Clause of Article IV, § 1*." *Id. at 816*.

The Supreme Court noted that it first had to "determine whether Kansas law conflicts in any material way with any other law which could apply. There can be no injury in applying **[**97]** Kansas law if it is not in conflict with that of any other jurisdiction **[*619]** connected to this suit." *Id.* Because there were at least some conflicts, the Court then asked whether Kansas had "'a significant contact or significant aggregation of contacts' to the claims asserted by each member of the plaintiff class, contacts 'creating state interests,' in order to ensure that the choice of Kansas law is not arbitrary or unfair.'" *Id. at 821-22*. It concluded that, "[g]iven Kansas' lack of 'interest' in claims unrelated to that State, and the substantive conflict with jurisdictions such as Texas, we conclude that application of Kansas law to every claim in this case is sufficiently arbitrary and unfair as to exceed constitutional limits." *Id. at 822*.

HN18[] Accordingly, under *Phillips*,

> the law of any particular state may not be applied to a nationwide class unless (1) the chosen state's law does not conflict with the law of another jurisdiction that has an interest in the case, and (2) the chosen state has a significant contact or significant aggregation of contacts to claims asserted by each member of the plaintiff class such that the choice of that state's law is not arbitrary or unfair.

In re Capacitors Antitrust Litig., 106 F. Supp. 3d 1051, 1073 (N.D. Cal. 2015) (Donato, J.).

1. Conflict Between **[**98]** California Law and Law of Other States

According to Gilead, there is, in fact, a conflict between California law and the laws of other states. More specifically, Gilead argues that, under California ***antitrust law***, indirect purchasers may obtain damages but, under the laws of at least five states/jurisdictions whose laws have been implicated by the CAC, the opposite is true. *See* Gilead Mot. at 47-48 (citing Illinois, Puerto Rico, Rhode Island, Utah, and Maryland ***antitrust law***[33]); *see also* *Capacitors Antitrust, 106 F. Supp. 3d at 1073-74* ("find[ing] [a] potential conflict" because "'some states allow their citizens to sue for antitrust injuries as indirect purchasers (like California) and some do not'").[34]

Whether the ***antitrust law*** of the five states/jurisdictions at issue bar indirect purchasers from getting damages is addressed below. *See* Part IX.D, *infra*.

For the time being, however, the Court notes that Gilead has pointed to a conflict in ***antitrust law*** only, and not to any conflict in *consumer protection* law. In its motion to dismiss, Gilead does suggest that Plaintiffs cannot avoid the rule of no damages for indirect purchasers by recasting their state antitrust claims as state consumer protection claims. *See* Gilead Mot. **[**99]** at 37. However, in making this argument, Gilead addresses the laws of nine states/jurisdictions — of which only four overlap with the states/jurisdictions identified above (*i.e.*, Illinois, Puerto Rico, Rhode Island, and Utah).

Accordingly, at most, Gilead has pointed to a conflict with the antitrust laws of five states/jurisdictions and a conflict with the consumer protection laws of four states/jurisdictions.

2. Significant Contacts with California

---

[33] Gilead also discusses Massachusetts law but based on a consumer protection statute, not ***antitrust law***.

[34] ***HN19***[] There is no dispute that, under federal ***antitrust law***, indirect purchasers are not entitled to damages. *See generally* *Ill. Brick Co. v. Ill., 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*.

If there are no conflicts between California antitrust or consumer protection law and the laws of other states/jurisdictions, then California law can be applied on a nationwide scale — *i.e.*, to purchases made **[*620]** in other states — without there being a due process problem.

If, however, there are conflicts, that does not mean that California law cannot apply. Rather, under *Phillips*, the question is whether California has a significant contact, or significant aggregation of contacts, to the claims asserted by each member of the plaintiff class; if so, there is no due process concern. In the instant case, Plaintiffs argue that there are significant contacts with California because Gilead is "headquartered in-state and the challenged conduct occurred **[**100]** within the state." *In re Charles Schwab Corp. Sec. Litig., 264 F.R.D. 531, 538 (N.D. Cal. 2009)* (Alsup, J.). That is, at least a part of the challenged conduct (whether based on the No-Generics Restraints, the Teva patent settlement agreements, or the commercialization of TAF) occurred within the state because Gilead's decisionmaking emanated from California.

Plaintiffs' position has merit. And although Gilead does have arguments to the contrary, they are not convincing. For example, Gilead argues that "the focus of the analysis is on the nexus between plaintiffs' claims and California, *not* defendants' contacts." Gilead Reply at 17 (emphasis in original). This is only partly true. It is correct that the Court must evaluate whether Plaintiffs' claims have a significant contact with California, but that does not mean that Gilead's contacts are thereby irrelevant. Plaintiffs' claims are based on wrongdoing committed by Gilead. Thus, where Gilead committed the wrongdoing is clearly significant. This case differs from *Phillips*.

The Ninth Circuit confirmed as much in *AT&T Mobility LLC v. AU Optronics Corp., 707 F.3d 1106 (9th Cir. 2013)*. ***HN20***[] There, the court held that

> anticompetitive conduct by a defendant within a state that is related to a plaintiff's alleged injuries and is not "slight and casual" establishes a "significant aggregation **[**101]** of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair." Specifically, we hold in this case that *[California's] Cartwright Act* can be lawfully applied without violating a defendant's due process rights when more than a *de minimis* amount of that defendant's alleged conspiratorial activity leading to the sale of price-fixed goods to plaintiffs took place in California. Such a defendant cannot reasonably complain that the application of California law is arbitrary or unfair when its alleged conspiracy took place, at least in part, in California.

Id. at 1113; *see also* *id. at 1111-12* (criticizing the district court for "mak[ing] a single contact — the location of Plaintiffs' injury — dispositive"; "the relevant 'occurrence or transaction' in this case includes not only the sale of price-fixed goods, but Defendants' alleged agreements and conspiracies to fix LCD prices").

Admittedly, Gilead has cited some authority in support of its position, but that authority was issued before *AT&T*, is not binding, and is not persuasive. For instance, in *In re Relafen Antitrust Litigation, 221 F.R.D. 260 (D. Mass. 2004)*, the district court declined to apply Pennsylvania law to a nationwide class even though the company producing the drug **[**102]** was headquartered in the state and the product was sold and distributed from the state. Its rationale was that

> the primary aim of antitrust and consumer protection laws generally — and those of indirect purchaser states particularly — is compensating consumers, not policing corporate conduct. Accordingly, the Court considers the more significant contact in this context to be the location of the injury — that is, the location of the sales to the end payor plaintiffs.

[*621] *Id. at 277*. But even if the district court was correct in elevating injury to the end payor over the policing of corporate conduct, that does not mean that the policing of corporate conduct is not an important part of antitrust and consumer protection law — such that the location of the corporate conduct could not be a significant contact for purposes of due process analysis.

Gilead also relies on *In re Graphics Processing Units Antitrust Litigation, 527 F. Supp. 2d 1011 (N.D. Cal. 2007)* (hereinafter "*GPU*"), another decision that pre-dates *AT&T*. There, Judge Alsup held that there was no significant contact with California based on the specific allegations in the complaint. The plaintiffs in *GPU* had alleged that "secret meetings between defendants' representatives took place in California," that one defendant is "headquartered **[**103]** in California," and that another defendant had "at least some business operations . . . in California." *Id. at 1028*. According to Judge Alsup, these allegations were insufficient to establish significant contacts because "plaintiffs have never alleged the specific locations of any of the meetings between defendants" and one of the defendants "is organized in Canada and has its headquarters there." *Id.* Arguably, Judge Alsup's conclusion is problematic; it seems a fair inference that at least a fair amount of the alleged conspiracy between the defendants (*e.g.*, to fix prices) took place in California given that one defendant was based in the state and thus decisionmaking emanated from there. But, in any event, *GPU* is distinguishable from the instant case because, even if two of Plaintiffs' theories turn on Gilead's actions with other companies (*i.e.*, the claims based on the No-Generics Restraints and the Teva patent settlement agreements), one theory (*i.e.*, the claims based on the commercialization of TAF) does not.

Accordingly, the Court holds that it would not be a due process violation for California law to apply nationwide, *i.e.*, to purchases made outside the state. This ruling, however, is **[**104]** not dispositive of whether California law should in fact be the choice of law. ***HN21***[] The Court leaves that decision for another day, *see AT&T, 707 F.3d at 1113* (noting that "the *Due Process Clause* does nothing but circumscribe the universe of state laws that can be constitutionally applied to a given case, [and so] we 'need not . . . balance the competing interests of California and [other states]'[;] [o]bjections based on the interests of other states are more properly raised under a choice of law analysis") — especially since the main authority on which Plaintiffs rely, *In re Qualcomm Antitrust Litig., 328 F.R.D. 280 (N.D. Cal. 2018)* (Koh, J.), is currently on appeal. *See id. at 312* (conducting a choice-of-law analysis and concluding that California law — which permits damages for indirect purchasers — could apply to a nationwide class of consumers "because other states do not have an interest in barring their own citizens from recovering damages for a California-based corporation's anticompetitive conduct that took place almost entirely in California").

B. Antitrust and Consumer Protection Claims: Standing for 25 States/Jurisdictions

According to Gilead, Plaintiffs' state law claims implicate the laws of 36 different states; however, they have alleged that purchases were made in only 11 of those 36 **[**105]** states. "No purchase by any Plaintiff is alleged in the other 25 states." Gilead Mot. at 35. Gilead contends that, because Plaintiffs have not alleged purchases made in those 25 states, they lack standing to bring state law claims based on the laws of those 25 states. In response, Plaintiffs argue that any standing issue is, in effect, more appropriately addressed at the class certification **[*622]** stage, rather than the 12(b)(6) stage.

Plaintiffs have the better argument. This Court recently addressed the same basic issue in *In re Chrysler-Dodge-Jeep EcoDiesel Mktg., Sales Practices & Products Liability Litigation, 295 F. Supp. 3d 927 (N.D. Cal. 2018)* (hereinafter, "*FCA*"). In *FCA*, the Court explained that, in 2015, it held in a different case (*In re Carrier IQ, Inc. Consumer Privacy Litigation, 78 F. Supp. 3d 1051 (N.D. Cal. 2015))*, that it had discretion as to whether to defer questions of standing until class certification; however, just a few months later, the Ninth Circuit decided *Melendres v. Arpaio, 784 F.3d 1254 (9th Cir. 2015)*, holding that, ***HN22***[] once a named plaintiff demonstrates individual standing for a claim, the standing inquiry is satisfied and any issue regarding the relationship between the named plaintiff and the members of the putative class is relevant only to class certification, not standing. *See FCA, 295 F. Supp. 3d at 954-55*. This Court expressly found that *Melendres* was controlling, establishing a per se rule.

Gilead points out that the Court made an alternative **[**106]** holding in *FCA* — *i.e.*, "[e]ven if *Melendres* does not sweep so broadly as to impose a per se rule," a court should exercise its discretion to address standing *before* class certification where the named plaintiffs have ties to only a limited number of states on whose laws they have sued. *Id. at 956* (noting that, in *Carrier IQ*, "[t]he named plaintiffs came from 13 states, and there were no named plaintiffs from 35 other states," whereas, in *FCA*, "the named Plaintiffs reside in or purchased or leased Class Vehicles in 43 states, and there are no named Plaintiffs for only seven states and the District of Columbia"). However, this Court still found as an initial matter that *Melendres* was dispositive.

C. Antitrust and Consumer Protection Claims: Pre-Filing Requirement

Gilead argues that (1) the antitrust laws of Arizona, Hawaii, Nevada, and Utah and (2) the consumer protection laws of Alabama, Massachusetts, and West Virginia have pre-filing notice requirements that have not been met. *See* Gilead Mot. at 40.

- *Ariz. Rev. Stat. § 44-1415(A)*: "A person filing a complaint . . . for any violation of the provisions of this article [the *Antitrust Act*] shall simultaneously with the filing of the pleading in the superior court or, in the **[**107]** case of pendent state law claims in the federal court, serve a copy of the complaint . . . on the attorney general."

- *Haw. Rev. Stat. § 480-13.3(a)(1)*: "A class action for claims for a violation of this chapter [monopolies and restraint of trade] other than claims for unfair or deceptive acts or practices may be filed, and may be prosecuted on behalf of indirect purchasers by a person other than the attorney general as follows: (1) A filed copy of the complaint . . . shall be served on the attorney general not later than seven days after filing of the complaint." *See also id. § 480.13.3(a)(5)(B)* ("If the State files its own action involving the same or similar claim or claims set forth in the complaint filed by the proposed class representative, then the complaint filed by the proposed class representative shall be dismissed.").

- *Nev. Rev. Stat. § 598A.210(3)*: "Any person commencing an action for any violation of the provisions of this chapter shall, simultaneously with the filing of the complaint with the court, mail a copy of the complaint to the Attorney General."

[*623] • *Utah Code Ann. § 76-10-3109(9)*: "The attorney general shall be notified by the plaintiff about the filing of any class action involving antitrust violations that includes plaintiffs from this state."

- *Ala. Code § 8-19-10(e)*: "At least 15 days prior **[**108]** to the filing of any action under this section [deceptive trade practices], a written demand for relief, identifying the claimant and reasonably describing the unfair or deceptive act or practice relied upon and the injury suffered, shall be communicated to any prospective respondent by placing in the United States mail or otherwise. Any person receiving such a demand for relief who, within 15 days of the delivering of the demand for relief, makes a written tender of settlement which is rejected by the claimant may, in any subsequent action, file the written tender and an affidavit concerning this rejection. If the court finds that the relief tendered was sufficient to compensate the petitioner for his or her actual damages, the court shall not award any additional damages or attorney's fees or costs to the petitioner."

- *Mass. G.L. ch. 93A, § 9(3)*: "At least thirty days prior to the filing of any such action, a written demand for relief, identifying the claimant and reasonably describing the unfair or deceptive act or practice relied upon and the injury suffered, shall be mailed or delivered to any prospective respondent. Any person receiving such a demand for relief who, within thirty days of the mailing or **[**109]** delivery of the demand for relief, makes a written tender of settlement which is rejected by the claimant may, in any subsequent action, file the written tender and an affidavit concerning its rejection and thereby limit any recovery to the relief tendered if the court finds that the relief tendered was reasonable in relation to the injury actually suffered by the petitioner."

- *W. Va. Code § 46A-6-106(c)*: "[N]o action . . . may be brought pursuant to the provisions of this section [consumer protection] until the person has informed the seller or lessor in writing and by certified mail, return receipt requested, of the alleged violation and provided the seller or lessor twenty days from receipt of the notice of violation but ten days in the case a cause of action has already been filed to make a cure offer: Provided, That the person shall have ten days from receipt of the cure offer to accept the cure offer or it is deemed refused and withdrawn."

In response, Plaintiffs maintain that they "are not required to plead compliance with [the notice] requirements to state a claim under the relevant statutes." Opp'n at 80. Plaintiffs add that, in any event, "on May 14, 2019, Plaintiffs notified the attorneys general **[**110]** of Arizona, Hawaii, Nevada, and Utah regarding the Complaint and the claims pursuant to the respective state antitrust statutes." Opp'n at 80; *see also* Goldstein Decl., Exs. P, Q, U, and W (letters to attorneys general of Nevada, Hawaii, Arizona, and Utah). In addition, on May 14, 2019, "Plaintiffs notified Defendants that the filed Complaint contained claims brought pursuant to the *Massachusetts Consumer Protection Act* and the *West Virginia Consumer Credit and Protection Act*." Opp'n at 80; Goldstein Decl., Exs. A-O (letters to

Defendants). As for the only remaining state, Alabama, Plaintiffs assert that no demand letter on Defendants was necessary because "that provision 'shall not apply if the prospective respondent does not maintain a place of **[*624]** business or does not keep assets within the state.'" Opp'n at 80 (quoting *Ala. Code § 8-19-10(e)*).

Gilead does not challenge the above in its reply brief. Accordingly, the Court rejects Gilead's argument for dismissal based on the pre-filing notice requirements.

D. Antitrust and Consumer Protection Claims: *Illinois Brick* Rule

As indicated above, there is no dispute that, under federal ***antitrust law***, indirect purchasers are not entitled to damages. *See generally* *Ill. Brick Co., 431 U.S. at 720* (decided **[**111]** in 1977). According to Gilead, several states/jurisdictions have the same or similar *Illinois Brick* rule, barring indirect purchasers from getting damages.

1. Illinois Antitrust Act

Illinois's Antitrust Act contains the following provision:

> No provision of this Act shall deny any person who is an indirect purchaser the right to sue for damages. Provided, however, that in any case in which claims are asserted against a defendant by both direct and indirect purchasers, the court shall take all steps necessary to avoid duplicate liability for the same injury including transfer and consolidation of all actions. *Provided further* that no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act, with the sole exception of this State's Attorney General, who may maintain an action parens patriae as provided in this subsection.

740 Ill. Comp. Stat. § 10/7 (emphasis added).

HN23[] As reflected the language of the statute, an indirect purchaser *may* sue for damages for a violation of the Illinois Antitrust Act — thus making Illinois an "*Illinois Brick* repealer state" for purposes of state ***antitrust law*** — *except* that "no person shall be authorized to maintain **[**112]** a class action in any court of this State for indirect purchasers asserting claims under this Act." *Id.* Here, Plaintiffs have brought a class action. Thus, Gilead argues that Plaintiffs — as indirect purchasers — cannot assert any claim for damages.

"District courts are divided on whether the Illinois Antitrust Act precludes indirect purchasers from filing class actions [in federal court]." *In re Effexor Antitrust Litig., 357 F. Supp. 3d 363, 391 (D.N.J. 2018)*. *Compare, e.g.,* *In re Opana Er Antritrust Litigation, 162 F. Supp. 3d 704, 723 (N.D. Ill. 2016)* ("dismiss[ing] with prejudice [the] indirect purchaser antitrust claim brought under Illinois law"), *with* *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 817-18 (N.D. Ill. 2017)* (refusing to dismiss "the Illinois antitrust claim on the basis of the Illinois[] class action bar").

It appears that the majority of cases are in line with *Opana. See* *Effexor, 357 F. Supp. 3d at 391*. Representative of these cases is a decision issued by Judge Orrick in 2014.

> The EPPs [end purchaser plaintiffs] contend that the Supreme Court decision in *Shady Grove Orthopedic Assocs., P.A. v. Allstate Ins. Co., 559 U.S. 393, 396, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010)*, holding that a New York law prohibiting class actions in suits seeking penalties or statutory minimum damages did not prevent a federal district court sitting in diversity from entertaining a class action under *Rule 23*, allows the Illinois claim here. Oppo. 31-32. The *In re Wellbutrin XL Antitrust Litig.* Court [from the Eastern District of Pennsylvania], in a very **[**113]** detailed analysis, rejected that very argument explaining "The Illinois restrictions on indirect **[*625]** purchaser actions are intertwined with Illinois substantive rights and remedies because (1) the restrictions apply only to the IAA [Illinois Antitrust Act], (2) they are incorporated in the same statutory provision as the underlying right, not a separate procedural rule, and (3) the restrictions appear to reflect a policy judgment about managing the danger of duplicative recoveries. ***HN24***[] Because the indirect purchaser restrictions of the IAA are 'intertwined' with the underlying substantive right, application of *Rule 23* would 'abridge, enlarge or modify' Illinois' substantive rights, and therefore Illinois' restrictions on indirect purchaser actions must be applied in federal court." *In re Wellbutrin XL Antitrust Litig., 756 F. Supp. 2d at 677*. I

> agree with Judge McLaughlin's analysis, *especially as the no indirect purchaser class action rule was expressly adopted as an integral part of the Illinois Antitrust Act's repeal of* Illinois Brick. As such, I conclude that the Illinois antitrust claims must be DISMISSED with prejudice.

United Food & Commer. Workers Local 1776 & Participating Emp'rs Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052, 1084 (N.D. Cal. 2014) (emphasis added).

The rationale provided by courts who have reached the opposite conclusion **[**114]** is typically as follows:

> The Court finds that *Shady Grove*'s reasoning with respect to New York's class action ban is equally applicable to Illinois's requirement that class actions be brought by the Attorney General. It is true that the Seventh Circuit has noted that Illinois's decision to repeal *Illinois Brick* and allow indirect purchaser lawsuits "reflects different judgments about the feasibility of trying such claims and the potential danger of duplicative recoveries." *Ill., ex rel. Burris v. Panhandle E. Pipe Line Co., 935 F.2d 1469, 1480 (7th Cir.1991)*. And some district courts have identified this statement as an indication that the Seventh Circuit considers decisions about the "feasibility" of indirect purchaser suits to be a substantive, not procedural, issue. *See In re Opana ER Antitrust Litig., 162 F. Supp. 3d at 723* (citing *In re Wellbutrin XL Antitrust Litig., 756 F. Supp. 2d 670, 677 (E.D. Pa. 2010))*. Moreover, the *Illinois Brick* issue — whether indirect purchasers can bring suit at all, even individually — is certainly substantive in that it affects the "rights and remedies" of indirect purchasers. But whether such plaintiffs may bring a class action does not affect their substantive rights. The availability of the class action procedure does not change the substantive rights or remedies available to them under Illinois law. *See In re Lithium Ion Batteries Antitrust Litig., 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *21 (N.D. Cal. Oct. 2, 2014)* [Gonzalez-Rogers, J.]; *In re Aggrenox Antitrust Litig., 2016 U.S. Dist. LEXIS 104647, 2016 WL 4204478, at *6 (D. Conn. Aug. 9, 2016)*.

Broiler Chicken Antitrust, 290 F. Supp. 3d at 817-18.

The Court finds Judge Orrick's **[**115]** analysis in *United Food* more persuasive than the analysis in *Broiled Chicken Antitrust*. This is especially true given this Court's take on *Shady Grove* as articulated in *In re MyFord Touch Consumer Litigation, No. 13-cv-03072-EMC, 2016 U.S. Dist. LEXIS 179487 (N.D. Cal. Sep. 14, 2016)*. The Court noted as follows:

> While the Ninth Circuit has not expressly recognized this, it has relied on Justice Stevens's concurrence for the proposition that ***HN25***[↑] "there are some state procedural rules that federal courts must apply in diversity cases because they function as part of the State's definition of the substantive rights and remedies." **[*626]** *Makaeff v. Trump Univ., LLC, 736 F.3d 1180, 1187 (9th Cir. 2013)*. Under Justice Stevens's analysis, *Rule 23* will not govern here if the Colorado and Virginia statutes are "procedural in the ordinary use of the term but [are] so intertwined with a state right or remedy that it functions to define the scope of the state-created right." *Shady Grove, 559 U.S. 393, 423, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010)* (Stevens, J., concurring)."

*Id. at *77-78*. Here, the Illinois prohibition on class actions is deeply intertwined with the rights under the *Illinois Brick* repealer.

Accordingly, the Court grants Gilead's motion to dismiss on the Illinois Antitrust Act — more specifically, to the extent Plaintiffs seek damages as indirect purchasers for a violation of the state statute, such is **[**116]** not permissible.

2. Puerto Rico Antitrust Act

Title 10 of the Puerto Rico code deals with commerce, and Chapter 13 within that title deals with monopolies and restraint of trade. *See generally 10 L.P.R.A. §§ 251-276*. Unlike Illinois, Puerto Rico does not have an *Illinois Brick* repealer statute. *Section 268* of the code simply provides: "Any person who shall be injured in his business or property by any other person, by reason of acts or intended acts, forbidden or declared to be unlawful by the provisions of this chapter, except *§ 259* and *261* of this title, may sue therefor . . . ." *Id. § 268*.

Similar to above, there is conflicting authority as to whether Puerto Rico allows for damages for indirect purchasers under Puerto Rico law.

For example, in *United Food*, Judge Orrick took note that, in *Rivera-Muniz v. Horizon Lines Inc., 737 F. Supp. 2d 57, 61 (D.P.R. 2010)*, a district court from Puerto Rico held that, "'[b]ecause Puerto Rico liberally construes its standing requirements in private antitrust cases . . . it is immaterial whether Plaintiffs are direct or indirect purchasers of cabotage services.'" *United Food, 74 F. Supp. 3d at 1086* (quoting *Rivera-Muniz*). On the other hand, there were two decisions from the Northern District of California that favored the antitrust defendants.

> In the first, **[**117]** *In re TFT-LCD Antitrust Litig., 599 F. Supp. 2d 1179 (N.D. Cal. 2009)* the court dismissed the claims under Puerto Rico law because it was "reluctant to find standing in the absence of an explicit *Illinois Brick* repealer, either by statute or case law." *Id. at 1188*. . . . In the second, *In re Static Random Access Memory Antitrust Litig., Case No. 07-mdl-01819 CW, 2010 U.S. Dist. LEXIS 131002, (N.D. Cal. Dec. 8, 2010)*, the court dismissed the indirect purchaser claims because "IP Plaintiffs point to no authority that suggests that *Illinois Brick*'s interpretation of federal ***antitrust law*** would not be applied to Puerto Rico law" and because of the ruling in *In re TFT-LCD Antitrust Litig., 2010 U.S. Dist. LEXIS 131002*.

United Food, 74 F. Supp. 3d at 1086-87. Finally, Judge Orrick acknowledged that, in a district court case from Massachusetts, the court considered each of the three cases identified above and held that "'in light of the fact that ***HN26***[] Puerto Rico ***antitrust law*** has been interpreted in accordance with federal ***antitrust law***, which does not allow claims from indirect purchasers following *Illinois Brick* — this Court dismisses the claims arising under the Puerto Rico law.'" *Id. at 1087* (quoting *In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367, 410 (D. Mass. 2013))*.

After surveying this authority, Judge Orrick ultimately came down on the side of the antitrust defendant, particularly because **[*627]** he did not find *Rivera-Muniz* persuasive.

> I realize that the court in *Rivera-Muniz* first noted that the "[Puerto **[**118]** Rico Antitrust Act] is modeled after federal antitrust statutes" and then relied solely on *Pressure Vessels of P.R., Inc. v. Empire Gas de P.R., 137 P.R. Dec. 497, 509-18, 1994 Juris P.R. 144 (1994)* as authority that Puerto Rico nevertheless "explicitly rejects" the indirect purchaser standing limitations imposed under the federal statutes. *Id. at 737 F. Supp. 2d at 61*. However, the *Pressure Vehicles* court did not address the standing of indirect purchasers under the PRAA and did not discuss *Illinois Brick* or whether it had been repealed by Puerto Rico. Instead, the *Pressure Vehicles* court relied on cases recognizing the "liberal standing theory under *Clayton Act sec. 4*" and concluded that "plaintiff need not establish anything beyond a factual causal relation between the injury and the violation to meet the" pleading requirements under the PRAA; "it suffices that the plaintiff has been injured as a result of the statutory violation." *Pressure Vessels of Puerto v. Empire Gas P.R., 137 D.P.R. 497, 1994 Juris P.R. 144, 1994 WL 909547 (P.R. 1994)*.
>
> Because neither *Rivera-Muniz* nor *Pressure Vehicles* addressed *Illinois Brick*, I agree with the weight of authority and find that the claims under Puerto Rico's statute must be DISMISSED with prejudice.

Id. at 1087; *see also* *In re Loestrin 24 FE Antitrust Litig., 410 F. Supp. 3d 352, 2019 WL 5406077, at *7 (D.R.I. 2019)* ("join[ing] the majority of courts in concluding that the EPPs do not have standing to bring antitrust **[**119]** claims under Puerto Rico law"); *Opana, 162 F. Supp. 3d at 723* (finding *Rivera-Muniz* unpersuasive for similar reasons; stating that "[a]bsent an interpretation by the courts of Puerto Rico allowing antitrust recovery by indirect purchasers or an express *Illinois Brick* repealer statute enacted by the legislature, the Court concludes that EPPs' indirect purchaser antitrust claim is barred in Puerto Rico and must be dismissed with prejudice"); *In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 251 (D. Conn. 2015)* (noting that "*Pressure Vessels* did not address indirect-purchaser standing or the rule of *Illinois Brick*[,] [a]nd though I agree with the indirect purchasers' contention that the courts of a particular jurisdiction can authoritatively interpret their laws as allowing antitrust recovery by indirect purchasers even in the absence of an express *Illinois Brick* repealer by the legislature, I cannot conclude that *Pressure Vessels* is such an authoritative statement").

In contrast, a New York district court has found in favor of the antitrust plaintiff.

> The Court recognizes that many district courts in the continental United States have dismissed indirect purchaser claims under the PRAA for lack of standing, based on the idea that the PRAA is modeled on federal statutes that do not extend **[**120]** standing to indirect purchasers. *See, e.g.*, *Opana ER, 162 F.Supp.3d at 723* (collecting cases); *In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 413 (S.D.N.Y. 2011)*.
>
> Nonetheless, this Court finds that the U.S. District Court for the District of Puerto Rico has more faithfully interpreted the standing requirements of the PRAA, in light of how the Supreme Court of Puerto Rico reads that statute. *Rivera-Muniz, 737 F. Supp. 2d at 61* (citing *Pressure Vessels P.R. v. Empire Gas P.R., 137 D.P.R. 497, 520, 1994 Juris P.R. 144 (P.R. 1994))*.
>
> In *Pressure Vessels*, the Supreme Court of Puerto Rico interpreted the private damages section of the PRAA to hold that private remedies were available to any plaintiff who met the following conditions: **[*628]** (1) the person was harmed in his business or property (2) by reason of (3) actions prohibited by law. *137 D.P.R. at 518*. The Supreme Court of Puerto Rico reasoned that, in order to satisfy this second prong, a plaintiff need only allege that "as a consequence of the legal violation, he has been injured." *Id. at 520*. Based on this interpretation of the PRAA in *Pressure Vessels*, the Court in *Rivera-Muniz* held, "Because Puerto Rico liberally construes its standing requirements in private antitrust cases, it is immaterial whether Plaintiffs are direct or indirect purchasers." *Rivera-Muniz, 737 F. Supp. 2d at 61* (internal citation omitted).
>
> Defendants' motion to dismiss this claim is, therefore, DENIED.

[121]** *Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, plc, No. 15 CIV. 6549 (CM), 2018 U.S. Dist. LEXIS 220574, 2018 WL 7197233, at *23 (S.D.N.Y. Dec. 26, 2018)*.

As above, the Court finds Judge Orrick's *United Food* decision more persuasive. The Court therefore grants Gilead's motion to dismiss on the Puerto Rico Act, in particular, to the extent Plaintiffs seek damages as indirect purchasers.

3. Rhode Island Antitrust Act

For the Rhode Island Antitrust Act, Gilead argues that Rhode Island did not adopt an *Illinois Brick* repealer statute until July 15, 2013, *see* *R.I. Gen. Laws § 6-36-7(d)* (providing that, "[i]n any action under this chapter, the fact that a person or public body has not dealt directly with the defendant shall not bar or otherwise limit recovery[,] [p]rovided, however, that courts shall exclude from the amount of monetary relief awarded in the action any amount of monetary relief which duplicates amounts which have been awarded for the same injury"); 2013 R.I. SB 840 (July 15, 2013) (adding *§ 6-36-7(d)*); "[t]hus, any Rhode Island Antitrust Act claim for damages based on conduct prior to July 15, 2013 must be dismissed." Gilead Mot. at 36.

In response, Plaintiffs argue that "[t]he repealer provision should be applied retroactively." Opp'n at 72. But the cases on which Plaintiffs rely are not persuasive. For example, in *Landgraf v. Usi Film Products, 511 U.S. 244, 114 S. Ct. 1483, 128 L. Ed. 2d 229 (1994)*, the Supreme Court stated that **[**122]** there is a "traditional presumption against truly 'retrospective' application of a statute." *Id. at 279*. And with respect to *Pion v. Bess Eaton Donuts Flour Co., 637 A.2d 367 (R.I. 1994)*, Plaintiffs have taken a select quotation. ***HN27***[↑] The full context for the quotation is as follows:

> Generally, it is presumed that statutes and their amendments are "to operate prospectively unless it appears by clear, strong language or by necessary implication that the Legislature intended to give the statute retroactive effect." *VanMarter v. Royal Indemnity Co., 556 A.2d 41, 44 (R.I. 1989)*. If a statute lacks clear direction or necessary implication concerning its retroactive application, the difference between a substantive statute and a remedial or procedural statute becomes relevant. *See* *Lawrence v. Anheuser-Busch, Inc., 523 A.2d 864, 869 (R.I. 1987)*. Substantive statutes, which create, define, or regulate substantive legal rights, must be applied prospectively. *See id.* In contrast, remedial and procedural statutes, which do not impair or increase

> substantive rights but rather prescribe methods for enforcing such rights, may be construed to operate retroactively. *See id.*

Id. at 371.

HN28[] There is no clear and strong language directing that the Rhode Island repealer statute be given retroactive effort. Accordingly, the Court concludes that **[*629]** there is no retroactive application for the Rhode Island *Illinois Brick* ***[**123]*** repealer statute and, to that extent, Gilead's motion to dismiss is granted.

4. Utah Antitrust Act

The Utah code provides in relevant part that "[a] person who is a citizen of this state or a resident of this state and who is injured or is threatened with injury in his business or property by a violation of the Utah Antitrust Act may bring an action for injunctive relief and damages, regardless of whether the person dealt directly or indirectly with the defendant." *Utah Code Ann. § 76-10-3109(1)(a)*. Gilead underscores that "[t]he Utah Antitrust Act permits damages claims by indirect purchasers only if they are citizens or residents of the state," but here "[n]o Plaintiffs are alleged to meet this description." Gilead Mot. at 36. Gilead adds that "Plaintiffs cannot rely on absent class members to meet the . . . citizenship/residence requirement." Gilead Reply at 18.

The Court rejects Gilead's argument. This is essentially the *Melendres* issue discussed above. *See also* *In re Generic Pharms. Pricing Antitrust Litig., 368 F. Supp. 3d 814, 838 (E.D. Pa. 2019)* (noting that "'[a]llegations that members of the putative class presumably include Utah . . . citizens and residents are sufficient to overcome a motion to dismiss'"). Therefore, the motion to dismiss the damages claim under the Utah statute is denied without **[**124]** prejudice. The remedy is, however, restricted to citizens and residents of Utah.

5. Maryland Antitrust Act

In 1993, the Maryland code was amended to include the following provision: "A person whose business or property has been injured or threatened with injury by a violation of *§ 11-204* may maintain an action for damages or for an injunction or both against any person who has committed the violation." *Md. Code Ann. § 11-209(b)(2)(i)* (1993); *see also* 1993 MD. SB 196 (May 27, 1993). In 2002, a state appellate court held that *§ 11-209(b)(2)(i)* follows the *Illinois Brick* rule, particularly because "*section 11-202(a)(1)*[] states the purpose of [the Maryland Antitrust Act] is 'to complement the body of federal law governing restraints of trade, unfair competition, and unfair, deceptive, and fraudulent acts or practices.'" *Davidson v. Microsoft Corp., 143 Md. App. 43, 50, 792 A.2d 336 (2002)*. The appellate court also cited legislative history in support. *See* *id. at 51* (noting, *inter alia*, that a bill from 2001 which "would have amended 11-209(b) to permit suits by private parties who dealt indirectly with the violator . . . was defeated in committee").

In 2017, however, *§ 11-209(b)(2)(i)* was amended and now reads as follows: "A person whose business or property has been injured or threatened with injury by a violation of *Section 11-204* of this subtitle may maintain **[**125]** an action for damages or for an injunction or both against any person who has committed the violation *regardless of whether the person maintaining the action dealt directly or indirectly with the person who has committed the violation*." *Md. Code Ann. § 11-209(b)(2)(i)* (2017) (emphasis added); *see also* 2017 Md. HB 1415 (May 27, 2017); 2017 Md. SB 858 (May 27, 2017).

Based on the above, Gilead argues that, up until the 2017 *Illinois Brick* repealer statute, indirect purchasers could not get damages under Maryland law. *See* Gilead Reply at 18. ("Maryland's 2017 *Illinois Brick* repealer does not apply retroactively."). Plaintiffs do not appear to substantively dispute such — they do not, *e.g.*, argue for retroactive application. Hence, the antitrust claim based on Maryland law is dismissed to the extent damages to indirect **[*630]** purchasers are claimed prior to May 27, 2017.

6. Massachusetts Consumer Protection Act

Title XV of the Massachusetts code concerns the regulation of trade. The antitrust provisions in the Massachusetts code can be found in chapter 93. In turn, the regulation of business practices for the protection of consumers can be found in chapter 93A.

In chapter 93A, governing consumer protection, there **[**126]** are two different provisions giving rise to a private right of action for unfair methods of competition or deceptive acts or practices.

- *Section 9 of chapter 93A* provides: "Any person, other than a person entitled to bring action under *section 11* of this chapter, who has been injured by another person's use or employment of any method, act or practice declared to be unlawful by section two or any rule or regulation issued thereunder . . . may bring an action in the superior court . . . for damages and such equitable relief, including an injunction, as the court deems to be necessary and proper." *Mass. G.L. ch. 93A, § 9*.

- *Section 11 of chapter 93A* in turn provides: "Any person who engages in the conduct of any trade or commerce and who suffers any loss of money or property, real or personal, as a result of the use or employment by another person who engaged in any trade or commerce of any unfair method of competition or an unfair or deceptive act or practice declared unlawful by section two or by any rule or regulation issued under *paragraph (c)* of section two may, as hereinafter provided, bring an action in the superior court . . . for damages and such equitable relief, including an injunction, as the court deems to be proper and necessary." *Mass. G.L. ch. 93A, § 11*.

HN29[] Massachusetts **[**127]** courts have indicated that the difference between *§ 9* and *§ 11* is that *§ 9* makes "consumer claims" actionable while *§ 11* makes "business claims" actionable. *See* *Lantner v. Carson, 374 Mass. 606, 610, 373 N.E.2d 973 (1978)* (noting that, "where *§ 9* affords a private remedy to the individual consumer . . . , an entirely different section, *§ 11*, extends the same remedy to 'any person who engages in the conduct of any trade or commerce'"); *Frullo v. Landenberger, 61 Mass. App. Ct. 814, 821, 814 N.E.2d 1105 (2004)* (stating that "General Laws c. 93A distinguishes between 'consumer' and 'business' claims, the former actionable under *§ 9*, the latter actionable under *§ 11*"); *see also* *Continental Ins. Co. v. Bahnan, 216 F.3d 150, 156 (1st Cir. 2000)* (noting that "*section 11* affords no relief to consumers and, conversely, *section 9* affords no relief to persons engaged in trade or commerce"). Although "[t]he dividing line between a consumer claim and a business claim for purposes of *G.L. c. 93A, §§ 9* and *11*[] is not always clear," "the choice appears to turn on whether a given party has undertaken the transaction in question for business reasons, or has engaged in it for purely personal reasons (such as the purchase of an item for personal use)." *Id.* "[A]ny transaction in which the plaintiff is motivated by business considerations gives rise to claims under the statute's business section," and the fact "[t]hat a transaction may be an isolated **[**128]** one not in the normal course of business does not insulate it from the reach of . . . *§ 11*." *Id.*

In the instant case, Gilead contends that "five of the Plaintiffs . . . are union insurers, not consumers," Gilead Mot. at 36, and thus they can only bring *§ 11* claims. ***HN30***[] The Massachusetts Supreme Court has held **[*631]** that, under *§ 11*, claims by indirect purchasers are not permissible — in contrast to *§ 9* consumer claims which do allow for claims by indirect purchasers. This issue was addressed by the Massachusetts Supreme Court in *Ciardi v. F. Hoffman La Roche, Ltd., 436 Mass. 53, 762 N.E.2d 303 (2002)*.

There, the state Supreme Court began by noting that the Massachusetts Antitrust Act — covered by chapter 93 of the code as opposed to chapter 93A — was to be construed in harmony with federal ***antitrust law***. "Because the [Massachusetts] Antitrust Act is to be construed in harmony with judicial interpretations of comparable Federal antitrust statutes, the rule of law established in *Illinois Brick* . . . would apply with equal force to preclude claims brought under G.L. c. 93 by indirect purchasers in Massachusetts. *Id. at 57-58*. The plaintiff in *Ciardi*, however, was not bringing a claim under chapter 93 but rather under chapter 93A. "In analyzing what constitutes unfair methods of competition and **[**129]** unfair or deceptive acts or practices, which are not defined in G. L. c. 93A, this court looks to interpretations by the Federal Trade Commission and Federal courts of *§ 45(a)(1) of the Federal Trade Commission Act (FTC Act)*." *Id. at 59*. The FTC "may . . . enforce the antitrust laws." *Id.* Moreover,

> [t]he plain and unambiguous language of G.L. c. 93A reveals no legislative intent to limit lawsuits for price-fixing to direct purchasers. To the contrary, because the language of *G.L. c 93A, §§ 1*, *9(1)*, allows *any* person who has been injured by trade or commerce *indirectly* affecting the people of this Commonwealth to bring a cause of action, the plaintiff is the type of consumer the Legislature intended to protect.

Id. (emphasis in original). Finally, the state Supreme Court pointed out that "the language of the [Massachusetts] Antitrust Act unambiguously states that 'it shall have no effect upon the provisions of [c. 9A], except as *explicitly provided in said* [c. 93A].'" *Id. at 62* (emphasis in original). In contrast to *§ 9*, *§ 11* — *i.e.*, the provision giving rise to business claims instead of consumer claims — "*includes a specific provision that in any action brought under that section, the court shall be guided in its interpretation* ***[**130]*** *of unfair methods of competition by the provisions of the [Massachusetts] Antitrust Act. [Section] 9*[] contains no such explicit provision." *Id. at 62-63* (emphasis added); *see also United Food, 74 F. Supp. 3d at 1086* (noting that "indirect purchaser claims cannot be asserted under *Section 11*"); *In re Cathode Ray Tube (CRT) Antitrust Litig., No. C 07-5944 SC, 2014 U.S. Dist. LEXIS 35387, at *66 (N.D. Cal. Mar. 13, 2014)* (stating that, "while corporations engaged in commerce can bring suits under *Section 11* and potentially win them, a corporation engaged in commerce whose suit is based on indirect purchases will not have standing under *Section 11*"). Accordingly, as a general matter, *§ 9* consumer claims may be brought by indirect purchasers, but not *§ 11* business claims.

In the instant case, Gilead asserts that the union plaintiffs can bring only *§ 11* claims. As Gilead points out, two district courts have held that health and welfare funds have only *§ 11* claims when they purchase products not for their own personal use but rather for the use of their members. *See United Food, 74 F. Supp. 3d at 1085* (noting that, "according to their own complaint, the EPPs did not purchase the products (and/or provide reimbursement for those products) for their personal use, but for the use of their members[;] [t]he Plan and the City appear to be engaged in the 'trade or commerce' of providing health and welfare **[**131]** benefits"); *In re Asacol Antitrust Litig., No. 15-cv-12730-DJC,* ***[*632]*** *2016 U.S. Dist. LEXIS 94605, at *43-44 (D. Mass. July 20, 2016)* (stating that health fund plaintiffs — *i.e.*, organizations — "cannot bring a claim under *§ 9* as they cannot show that they undertook the relevant transactions 'for purely personal reasons (such as the purchase of an item for personal use)'").

HN31[] On the other hand, as Plaintiffs note, the union insurers are nonprofit entities, and there is case law indicating that "a party's status as a non-profit influences [the] analysis"; "'[i]n most circumstances, a charitable institution will not be engaged in trade or commerce *when it undertakes activities in furtherance of its core mission*.'" *In re Pharm. Indus. Avg. Wholesale Price Litig., 491 F. Supp. 2d 20, 81 (D. Mass. 2007)* (emphasis added; quoting *Linkage Corp. v. Trs. of Bos. Univ., 425 Mass. 1, 26, 679 N.E.2d 191 (1997))*. For example, in *In re Lorazepam & Clorazepate Antitrust Litigation, 295 F. Supp. 2d 30 (D.D.C. 2003)*, the plaintiff was Blue Cross Blue Shield of Massachusetts ("BCBS"). It brought an unfair competition claim against several pharmaceutical companies on its own behalf as a third-party payor of prescription drugs for its insureds. The court held that BCBS's claim fell under *§ 9* (instead of *§ 11*), explaining as follows:

> BCBS Massachusetts's charitable mission is set forth in its enabling statute, Mass. Gen Laws ch. 176B ("ch. 176B"). Further, BCBS Massachusetts has alleged that it is a medical service corporation under **[**132]** ch. 176B, and operates as a "nonprofit medical service plan" pursuant to which it provides "health services," including prescription drug benefits, to its members. *See* Complaint ¶ 14; *see also* generally ch. 176B. BCBS Massachusetts's core mission has been recognized by the First Circuit as well:
>
>> Blue Shield of Massachusetts, Inc. and Blue Cross of Massachusetts, Inc. are nonprofit, tax exempt medical service and hospital service corporations, organized to provide "for the preservation of the public health by furnishing medical services at low cost to members of the public who become subscribers. . . ." 1941 Mass. Acts c. 306, preamble. Mass. G.L. c. 176B (Blue Shield); c. 176A (Blue Cross).
>
> *Kartell v. Blue Shield of Massachusetts, Inc., 592 F.2d 1191, 1191 (1st Cir. 1979)*. The transactions identified by Plaintiff here — payment for members' prescription drug claims, *see, e.g.*, Complaint ¶¶ 1-8 — are clearly at the core of BCBS Massachusetts's charitable mission. Further, while the Court has not found cause to review any of Plaintiff's financial statements, the Court must construe the complaint in the light most favorable to the Plaintiff and accepts as true for purposes of the instant motion BCBS Massachusetts's allegation that it does not "profit" under the specific **[**133]** transactions at issue (i.e., payment for its members' prescription drug claims).

Id. at 45-46. The court added that "an absence of legislative mandate tend[s] to indicate the presence of *Section 11* 'trade or commerce,'" but here "BCBS Massachusetts is a creation of statutory law that [is] subject to both legislative mandate and constraint. For example, pursuant to *Mass. Gen. Laws ch. 176, § 23* and *ch. 176B, § 13*, the state commissioner of the Division of Insurance is responsible for ascertaining, *inter alia*, that BCBS Massachusetts is 'not being operated for profit' and is maintaining sufficient reserves." *Id. at 46*. *Compare S. Shore Hellenic Church, Inc. v. Artech Church Interiors, Inc., 183 F. Supp. 3d 197, 202 (D. Mass. 2016)* (noting that, *in Linkage* — where the plaintiff-company sued Boston University, a nonprofit entity, for unlawfully terminating an agreement under which the plaintiff provided educational, training, and other programs of a technical nature at a satellite **[*633]** facility owned by the university — the court held that the university had engaged in trade or commerce because "it [had] cut a private company out of a lucrative market").

Because a party's status as a nonprofit affects the analysis as to whether it has a *§ 9* or *§ 11* claim, the Court shall allow the union insurers' claims based on the Massachusetts Consumer Protection Act to proceed. **[**134]** The union insurers' role arguably is akin to that of consumers; the factual record must be developed in order for the Court or the trier of fact to make an informed determination as to whether the union insurers profit from paying its insureds' prescription drug claims.

7. Summary

Gilead's motion to dismiss the indirect purchaser claims for damages is granted as to the Illinois Antitrust Act and the *Puerto Rico Antitrust Act*. On the *Rhode Island Antitrust Act* and the *Maryland Antitrust Act*, Rhode Island and Maryland each has an *Illinois Brick* repealer statute but indirect purchaser claims for damages prior to the effective date of that statute are not viable. The motion to dismiss the indirect purchaser claims for damages under the *Utah Antitrust Act* and the Massachusetts Consumer Protection Act is denied without prejudice.

E. Consumer Protection Claims: Circumvention of the *Illinois Brick* Rule

Gilead notes that Plaintiffs have brought not only antitrust claims under state law but also state law consumer protection claims. According to Gilead, certain states have an *Illinois Brick* rule for their antitrust laws; to the extent they do, Plaintiffs cannot try to "end run" the *Illinois Brick* ***[**135]*** rule by recasting the antitrust claims as consumer protection claims. *See* Gilead Mot. at 37 (arguing that the "consumer-protection claims under the laws of Arkansas, Connecticut, Illinois, Idaho, Missouri, Montana, Puerto Rico, Rhode Island, and Utah must fail").

Gilead's argument is problematic. In support, Gilead cites *In re DDAVP Indirect Purchaser Antitrust Litig. v. Ferring Pharms. Inc., 903 F. Supp. 2d 198 (S.D.N.Y. 2012)*. But there the court simply agreed with other courts holding that, "'where the applicable state law bars antitrust actions for damages by indirect purchasers . . . a plaintiff cannot circumvent the statutory framework by recasting an antitrust claim as *one for unjust enrichment*.'" *Id. at 232*. Here, Plaintiffs are not bringing a claim for unjust enrichment but rather a statutory claim for consumer protection. Furthermore, as Plaintiffs note in their papers, "[m]any of the [the] statutes . . . contain 'harmonization' provisions providing a legislative mandate that the statutes be interpreted in accordance with the *Federal Trade Commission ('FTC') Act*." Opp'n at 75. Finally, the consumer protection statutes cover more than just anticompetitive conduct — typically covering unfair, unconscionable, or deceptive conduct. *See* Opp'n at 75.

Accordingly, the Court denies Gilead's motion **[**136]** to dismiss based on the "end run" argument (as applied to state consumer protection laws).

F. Consumer Protection Claims: Conclusorily Pled

Gilead argues, in effect, that the consumer protection claims have been conclusorily pled — "providing no information on how the claims at issue satisfy the particular requirements of each state's individual consumer-protection statutes." Gilead Mot. at 37; *see also* Gilead Reply at 19 (arguing that Plaintiffs "ignore the differences among state consumer-protection laws").

This argument has no merit. Plaintiffs have been clear about what wrongdoing has allegedly been committed by Gilead. If **[*634]** Gilead believes that specific elements of consumer protection claims have not been met, that is their obligation to identify those specific elements.

G. Consumer Protection Claims: Deceptive Conduct

According to Gilead, fifteen states require deceptive conduct, or at least conduct directed to and relied upon by a consumer, in order to state a consumer protection claim, but, here, "the Complaint alleges no such conduct." Gilead Mot. at 15. Gilead cites to the laws of Arizona, California, District of Columbia, Idaho, Illinois, Kansas, Maine, Michigan, New York, Nevada, **[**137]** New Mexico, Rhode Island, Tennessee, Utah, and West Virginia. Following are the specific state laws identified by Gilead:

• Arizona. "The act, use or employment by any person of any deception, deceptive or unfair act or practice, fraud, false pretense, false promise, misrepresentation, or concealment, suppression or omission of any material fact with intent that others rely on such concealment, suppression or omission, in connection with the sale or advertisement of any merchandise whether or not any person has in fact been misled, deceived or damaged thereby, is declared to be an unlawful practice." *Ariz. Rev. Stat. § 44-1522(A)*; *see also id.* *§ 44-1522(C)* (providing that "[i]t is the intent of the legislature, in construing subsection A, that the courts may use as a guide interpretations given by the federal trade commission and the federal courts to *15 United States Code sections 45*, *52* and *55(a)(1)*").

• California. "[U]nfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising and any act prohibited by Chapter 1 (commencing with *Section 17500*) of Part 3 of Division 7 of the Business and Professions Code." *Cal. Bus. & Prof. Code § 17200*.

• District of Columbia. "It shall be a violation of this chapter for any person **[**138]** to engage in an unfair or deceptive trade practice, whether or not any consumer is in fact misled, deceived, or damaged thereby, including to: [*inter alia*] (f) fail to state a material fact is such failure tends to mislead." *D.C. Code § 28-3904(f)*; *see also id.* *§ 28-3901(d)* (providing that, "[i]n construing the term 'unfair or deceptive trade practice' due consideration and weight shall be given to the interpretation by the Federal Trade Commission and the federal courts of the term 'unfair or deceptive act or practice,' as employed in *section 5(a)* of An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes, approved September 26, 1914").

• Idaho. "The following unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared to be unlawful, whether a person knows, or in the exercise of due care should know, that he has in the past, or is: [*inter alia*] (17) Engaging in any act or practice which is otherwise misleading, false, or deceptive to the consumer." *Idaho Code § 48-603(17)*.

• Illinois. "Unfair methods of competition and unfair or deceptive acts or practices, including but not limited to the use or employment of any deception, fraud, false **[**139]** pretense, false promise, misrepresentation or the concealment, suppression or omission **[*635]** of any material fact, with intent that others rely upon the concealment, suppression or omission of such material fact, or the use or employment of any practice described in *Section 2 of the 'Uniform Deceptive Trade Practices Act' [815 ILCS 510/2*], approved August 5, 1965, in the conduct of any trade or commerce are hereby declared unlawful whether any person has in fact been misled, deceived or damaged thereby." *815 Ill. Comp. Stat. § 505/2*.[35]

• Kansas. "No supplier shall engage in any deceptive act or practice in connection with a consumer transaction." *Kan. Ann. Stat. § 50-626(a)*. "Deceptive acts and practices include, but are not limited to the following, each of which is hereby declared to be a violation of this act, whether or not any consumer has in fact been misled: [*inter alia*] (3) the willful failure to state a material fact, or the willful concealment, suppression or omission of a material fact." *Id.* *§ 50-626(b)(3)*.

---

[35] Regarding a claim of deception based on concealment or suppression, an Illinois state court has noted that "sellers have a duty not to conceal or suppress known material facts regarding products from potential buyers" and that, for liability to attach, "a plaintiff must establish that defendants intended that [the consumers] rely on the suppression in making their choice to buy." *Jensen v. Bayer AG, 371 Ill. App. 3d 682, 689, 862 N.E.2d 1091, 308 Ill. Dec. 888 (2007)*.

• Maine. "Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are declared unlawful." *5 Me. Rev. Stat. § 207*; *see also id. § 207(1)* (providing that "[i]t is the intent of the Legislature that in construing this section the **[**140]** courts will be guided by the interpretations given by the Federal Trade Commission and the Federal Courts to *Section 45(a)(1) of the Federal Trade Commission Act* (*15 United States Code 45(a)(1)*), as from time to time amended").

• Michigan. "Unfair, unconscionable, or deceptive methods, acts, or practices in the conduct of trade or commerce are unlawful and are defined as follows: [*inter alia*] (s) Failing to reveal a material fact, the omission of which tends to mislead or deceive the consumer, and which fact could not reasonably be known by the consumer." *Mich. Comp. Laws § 445.903(1)(s)*.

• New York. "Deceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in this state are hereby declared unlawful." *N.Y. Gen. Bus. Law § 349(a)*.

• Nevada. "A person engages in a 'deceptive trade practice' if, in the course of his or her business or occupation, he or she: [*inter alia*] (15) Knowingly makes any other false representation in a transaction." *Nev. Rev. Stat. § 598.0915(15)*.

• New Mexico. "Unfair or deceptive trade practices and unconscionable trade practices in the conduct of any trade or commerce are unlawful." *N.M. Stat. Ann. § 57-12-3*. "'[U]nfair or deceptive trade practice' means an act specifically declared unlawful pursuant to the *Unfair Practices Act*, a false or misleading oral or written **[**141]** statement, visual description or other representation of any kind knowingly made in connection with the sale, lease, rental or loan of goods or services . . . that may, tends to or does **[*636]** deceive or mislead any person . . . ." *Id. § 57-12-2(D)*.

• Rhode Island. "Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are declared unlawful." *R.I. Gen. Laws § 6-13.1-2*. "'Unfair methods of competition and unfair or deceptive acts or practices' means any one or more of the following: [*inter alia*] (xiii) Engaging in any act or practice that is unfair or deceptive to the consumer." *Id. § 6-13.1-1(6)(xiii)*:

• Tennessee. "Unfair or deceptive acts or practices affecting the conduct of any trade or commerce constitute unlawful acts or practices . . . ." *Tenn. Code § 47-18-104(a)*. "The following unfair or deceptive acts or practices affecting the conduct of any trade or commerce are declared to be unlawful and in violation of this part . . . ." *Id.* at *47-18-104(b)*; *see also id. § 47-18-115* (providing that "[i]t is the intent of the general assembly that this part shall be interpreted and construed consistently with the interpretations given by the federal trade commission and the federal courts pursuant to *§ 5(a)(1) of the Federal Trade Commission Act*, **[**142]** codified in *15 U.S.C. § 45(a)(1)*").[36]

• Utah. "A deceptive act or practice by a supplier in connection with a consumer transaction violates this chapter . . . ." *Utah Code § 13-11-4(1)*. In addition, "[a]n unconscionable act or practice by a supplier in connection with a consumer transaction violates this act . . . ." *Id. § 13-11-5(1)*.

• West Virginia. "Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful." *W. Va. Code § 46A-6-104*. "'Unfair methods of competition and unfair or deceptive acts or practices' means and includes, but is not limited to, any one or more of the following: [*inter alia*] (M) The act, use or employment by any person of any deception, fraud, false pretense, false promise or misrepresentation, or the concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale or

---

[36] *See also In re New Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160, 203 (D. Me. 2004)* (acknowledging that the Tennessee statute directs a court to look to federal interpretation of the FTC Act for guidance but nevertheless "follow[ing] the narrower interpretation of the Tennessee courts" — *i.e.*, "deception is required for a *TCPA* claim").

advertisement of any goods or services, whether or not any person has in fact been misled, deceived or damaged thereby." *Id.* § 46A-6-102(7)(M).[37]

As an initial matter, Gilead's position is questionable because it is not clear that all of the states identified condemn deceptive conduct only — *e.g.*, on their **[**143]** face, some of the statutes seem to implicate unfair conduct as well. *Compare* In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 516 F. Supp. 2d 1072, 1117 (N.D. Cal. 2007) (Hamilton, J.) (noting that **[*637]** the Utah statute — unlike the FTC Act — does *not* refer to unfair competition, and therefore "the FTCA's prohibition on antitrust price-fixing should not be read into the CSPA here") (emphasis omitted).

But putting aside that point, Plaintiffs fairly point out that they have claimed deception, more specifically in the form of concealment: "Plaintiffs have . . . alleg[ed] a conspiracy between Gilead and its coconspirators to monopolize the cART market and maintain artificially high prices, a fact that Defendants *concealed* from Plaintiffs." Opp'n at 77 (emphasis added). At least some courts have found this a plausible claim of deception. *See, e.g.,* GPU, 527 F. Supp. 2d at 1030 (Alsup, J.) (concluding that plaintiffs made sufficient allegations to state a claim under state consumer protection law because plaintiffs "contend that defendants have engaged in deceptive acts to conceal the alleged agreement to fix prices" — *i.e.*, "[d]efendants hid the alleged conspiracy from plaintiffs, resulting in plaintiffs paying higher prices"); *see also* In re Lamictal Indirect Purchaser & Antitrust Consumer Litig., 172 F. Supp. 3d 724, 752-53 (D.N.J. 2016) (stating that "anticompetitive conduct can violate § 349 [of New York law] if it is deceptive **[**144]** in nature" — *e.g.*, if defendants made efforts to conceal an anticompetitive agreement, if defendants secretly agreed to raise prices, or if defendants entered into secret anticompetitive agreements). *Compare* Leider v. Ralfe, 387 F. Supp. 2d 283, 295-97 (S.D.N.Y. 2005) (noting that § 349 refers to deceptive, but not unfair, practices; manipulation of a market is a generic antitrust scheme and not deception).

However, if the claim is based on such deception, it is not clear what relief Plaintiffs seek as a result of Defendants' deception. Arguably, Plaintiffs' cannot conflate harm from Defendants' deception with harm from Defendants' anticompetitive conduct. *Cf.* Motor Vehicles Canadian, 350 F. Supp. 2d at 176-77, 189 (rejecting argument that there was actionable deception under, *inter alia*, Michigan law, because defendants failed to inform consumers about conspiracy to keep out Canadian cars, which inflated new car prices in the United States; price differential was not hidden from or unknown to consumers — thus, "if United States consumers failed to acquire the cheaper Canadian vehicles, it was because they did not care to, or because the alleged conspiracy prevented Canadian dealers from selling to them . . . , not because the conspiracy was unknown"). The Court therefore orders Plaintiffs to provide **[**145]** a more definite statement as to what relief is sought for any deceptive conduct.

H. Consumer Protection Claims: Consumer Requirement

Gilead argues that ten states/jurisdictions "allow a plaintiff to sue only in its capacity' as a consumer," and, here, five of the plaintiffs are union insurers — who are not consumers but rather third-party payors. Gilead Mot. at 38 (citing to the laws of the District of Columbia, Hawaii, Kansas, Maine, Missouri, Montana, North Carolina, Rhode Island, Utah, and Vermont).

In response, Plaintiffs argue that the union insurers do constitute "consumers" because "third-party payor Plaintiffs participate in consumer transactions by paying some or all of the prices charged to individual consumers and, as a result, pay a portion of any overcharges. These purchases are made for the personal purposes of the patient." Opp'n at 77. Plaintiffs admit that the union insurers "do not personally use the products, [but] they nonetheless purchase them for others' personal use." Opp'n at 78.

The states at issue are addressed below.

---

[37] Regarding a claim of deception based on concealment or suppression, a West Virginia state court has noted as follows: "Where concealment, suppression or omission is alleged, and proving reliance is an impossibility, the causal connection between the deceptive act and the ascertainable loss is established by presentation of facts showing that the deceptive conduct was the proximate cause of the loss." White v. Wyeth, 227 W. Va. 131, 140, 705 S.E.2d 828 (2010).

[*638] 1. District of Columbia

Under D.C. law, "[i]t shall be a violation of this chapter for any person to engage in an unfair or deceptive trade practice, **[**146]** whether or not any consumer is in fact misled, deceived or damaged thereby . . . ." *D.C. Code § 28-3904*. "A consumer may bring an action seeking relief from the use of a trade practice in violation of a law of the District." *Id. § 28-3905(k)(1)*. When used as a noun, "consumer" means "a person who, other than for purposes of resale, does or would purchase, lease (as lessee), or receive consumer goods or services, including as a co-obligor or surety, or does or would otherwise provide the economic demand for a trade practice." *Id. § 28-3901(a)(2)(A)*. When used as an adjective, "consumer" "describes anything, without exception, that: (i) A person does or would purchase, lease (as lessee), or receive and normally use for personal, household, or family purposes."

In *Lidoderm*, Judge Orrick evaluated the above statutes and found in favor of the defendants. *See Lidoderm, 103 F. Supp. 3d 1155* (Orrick, J.). His reasoning was as follows:

> As explained by the District of Columbia Court of Appeals, "the relevant distinction is one between retail and wholesale transactions. Transactions along the distribution chain that do not involve the ultimate retail consumer are not 'consumer transactions' that the Act seeks to reach. Rather, it is the ultimate retail transaction between the final distributor **[**147]** and the individual member of the consuming public that the Act covers. Accordingly, it is not the use to which the purchaser ultimately puts the goods or services, but rather the nature of the purchaser that determines the nature of the transaction."
>
> Here the purchase at issue — the one trying to secure a recovery for its indirect purchase — is GEHA [Government Employees Health Organization]. It is true that GEHA has pled it is a joint "end payor" for the Lidoderm patches, and that it has paid retail and mail order pharmacies in the District of Columbia $13,432.85 for Lidoderm patches during the relevant period. However, GEHA was not part of the "retail" transaction, in terms of deciding to purchase the product or actually purchasing it. It, instead, was required to pay the pharmacies for a portion of the expenses for the patches because its members filled personal prescriptions for Lidoderm patches. Although GEHA played a role in the retail transaction, its own transactions with the pharmacies were more akin to "wholesale" than retail transactions.

Id.

Respectfully, the Court disagrees with Judge Orrick's analysis. ***HN32***[] Although an insurer who purchases a pharmaceutical product does not make **[**148]** that purchase for its own use, its role is located on the retail side of the transaction given that it is essentially acting as a proxy for its insured. Absent legislative history indicating that "consumer" as used in the statutes means an individual or business purchasing for his, her, or its use only, the Court does not limit application of the statutes as argued by Gilead.

2. Hawaii

Under Hawaii law, "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are unlawful." *Haw. Rev. Stat. § 480-2(a)*. "No person other than a consumer, the attorney general or the director of the office of consumer protection may bring an action based upon unfair or deceptive acts or practices declared unlawful by this section." *Id. § 480-2(d)*. "'Consumer' means a natural person who, primarily **[*639]** for personal, family, or household purposes, purchases, attempts to purchase, or is solicited to purchase goods or services or who commits money, property, or services in a personal investment." *Id. § 480-1*.

Because the Hawaii code refers specifically to a suit being brought by a consumer and then defines consumer as a "natural person," Gilead has the better position. *See also Sergeants Benevolent Ass'n Health & Welfare Fund v. Actavis, PLC, No. 15 Civ. 6549, 2018 U.S. Dist. LEXIS 220574, at *109-10 (S.D.N.Y. Dec. 26, 2018)* (holding in favor of **[**149]** defendants on Hawaii code).

3. Kansas

Under Kansas law, "[n]o supplier shall engage in any deceptive act or practice in connection with a consumer transaction." *Kan. Stat. Ann. § 50-626(a)*. "'Consumer transaction' means a sale, lease, assignment or other disposition for value of property or services within this state . . . to a consumer." *Id.* *§ 50-624(c)*. "'Consumer' means an individual, husband and wife, sole proprietor, or family partnership who seeks or acquires property or services for personal, family, household, business or agricultural purposes." *Id.* *§ 50-624(b)*. "Whether a consumer seeks or is entitled to damages or otherwise has an adequate remedy at law or in equity, a consumer aggrieved by an alleged violation of this act may bring an action . . . ." *Id.* *§ 50-634(a)*.

Because the Kansas code specifically refers to a consumer bringing suit and defines "consumer" as it does above (excluding, *e.g.*, entities such as insurers), Gilead has the better position.

4. Maine

Under Maine law, "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are declared unlawful." *5 Me. Rev. Stat. § 207*.

> Any person who purchases or leases goods, services or property, real or personal, primarily for personal, family, or household **[**150]** purposes and thereby suffers any loss of money or property, real or personal, as a result of the use or employment by another person of a method, act or practice declared unlawful by *section 207* . . . may bring an action . . . .

Id. *§ 213(1)*.

Although arguably a close call, the Court finds in Plaintiffs' favor. Defendants have not cited any legislative history or case law indicating that a person must purchase a good for his, her, or its *own* personal, family, or household purpose. As discussed above in conjunction with D.C. law, an insurer who purchases a pharmaceutical product essentially acts as a proxy for its insured, who clearly falls within the common understanding of a "consumer."

5. Missouri

Under Missouri law,

> [t]he act, use or employment by any person of any deception, fraud, false pretense, false promise, misrepresentation, unfair practice or the concealment, suppression, or omission of any material fact in connection with the sale or advertisement of any merchandise in trade or commerce or the solicitation of any funds for any charitable purpose, as defined in *section 407.453*, in or from the state of Missouri, is declared to be an unlawful practice.

Mo. Rev. Stat. § 407.020(1). Furthermore,

> [a]ny person who purchases or leases merchandise **[**151]** primarily for personal, family or household purposes and thereby suffers an ascertainable loss of money or property, real or personal, as a result of the use or employment by another **[*640]** person of a method, act or practice declared unlawful by *section 407.020*, may bring a private civil action . . . .

Id. *§ 407.025(1)*.

As above, although arguably a close call, Plaintiffs have the better position, particularly in the absence of legislative history indicating that a consumer is restricted to one who purchases for his, her, or its own use. *But see* *In re Actimmune Mktg. Litig., No. C 08-02376 MHP, 2010 U.S. Dist. LEXIS 90480, at *37 (N.D. Cal. Aug. 31, 2010)* (in discussing Missouri law, stating that, "[a]lthough the term 'person' explicitly includes corporations like GEHA, the statute has been interpreted as requiring that a person purchase the property for his, her or its own 'personal, family or household purposes'" and, "[a]ccordingly, the claims of health care plans and third-party payors have been dismissed for lack of standing").

6. Montana

Under Montana law, "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are unlawful." *Mont. Code § 30-14-103*. "A consumer who suffers any ascertainable loss of money or property, real or personal, as a result **[**152]** of the use or employment by another person of a method, act, or practice declared unlawful by 30-14-103 may bring an individual but not a class action." *Id. § 30-14-133(1)*. "'Consumer' means a person who purchases or leases goods, services, real property, or information primarily for personal, family, or household purposes." *Id. § 30-14-102(1)*.

As above, although arguably a close call, Plaintiffs have the better position, particularly in the absence of legislative history indicating otherwise. *But see Lidoderm, 103 F. Supp. 3d at 1165* (Orrick, J.) (dismissing the Montana claim because the statute "defines a 'consumer' as 'a person who purchases or leases goods, services, real property, or information primarily for personal, family, or household purposes'" and "[t]he statute excludes persons who buy goods for resale").

7. North Carolina

Under North Carolina law, "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce, are declared unlawful." *N.C. Gen. Stat. § 75-1.1(a)*.

> If any person shall be injured or the business of any person, firm or corporation shall be broken up, destroyed, or injured by reason of any act or thing done by any other person, firm or corporation in violation of the provisions of this Chapter, such **[**153]** person, firm or corporation so injured shall have a right of action on account of such injury done . . . .

Id. § 75-16. Given the broad language used in the statutes, the Court finds in favor of Plaintiffs. Gilead relies on *Food Lion, Inc. v. Capital Cities/ABC, Inc., 194 F.3d 505 (4th Cir. 1999)*, presumably because, there, the court noted that North Carolina "gives a private cause of action to consumers aggrieved by unfair or deceptive business practices." *Id. at 519*; *see also id. at 519-20* (adding that "businesses are sometimes allowed to assert claims against other businesses because 'unfair trade practices involving only businesses' can 'affect the consumer as well'"; however, "one business is permitted to assert an *UTPA* claim against another business only when the businesses are competitors (or potential competitors) or are engaged in commercial dealings with each other"). But the Fourth Circuit did not foreclose the possibility that a party involved in a consumer transaction, other than the consumer him/herself — such **[*641]** as a union insurer — could bring suit under the state consumer protection law.

8. Rhode Island UTPA

Under Rhode Island law, "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are declared unlawful." *R.I. Gen. Laws § 6-13.1-2*.

> Any **[**154]** person who purchases or leases goods or services primarily for personal, family, or household purposes and thereby suffers any ascertainable loss of money or property, real or personal, as a result of the use or employment by another person of a method, act, or practice declared unlawful by *Section 6-13.1-2*, may bring an action . . . .

Id. § 6-13.1-5.2(a). As above, although arguably a close call, Plaintiffs have the stronger position, particularly in the absence of any legislative history to the contrary.

9. Utah

Under Utah law, "[a] deceptive act or practice by a supplier in connection with a consumer transaction violates this chapter whether it occurs before, during, or after the transaction." *Utah. Code Ann. § 13-11-4(1)*. "'Consumer transaction' means a sale, lease, assignment, award by chance, or other written or oral transfer or disposition of goods, services, or other property, both tangible and intangible (except securities and insurance) to, or apparently to, a person for: (i) primarily personal, family, or household purposes." *Id.* § 13-11-3(2)(a). "Whether he seeks or is entitled to damages or otherwise has an adequate remedy at law, a consumer may bring an action" for certain relief. *Id.* § 13-11-19(1).

Whether a union insurer could be a "consumer" under Utah law **[**155]** is a close call. In Sergeants Benevolent, 2018 U.S. Dist. LEXIS 220574, at *135-38, the court found in favor of the plaintiffs and against the defendants. The court noted first that the Utah code does not define "consumer" but does define "consumer transaction" — covering not just a sale to a person for, *e.g.*, personal purposes but also *apparently to* a person for personal purposes. The court found that "apparently to" language critical. *See* id. at *137 **HN33**[] ("[U]nlike other consumer protection statutes reviewed by this Court, the UCSPA contemplates sales made both 'to' and 'apparently to' a person for personal, family, or household purposes."). "Construing the allegations in the Complaint in the light most favorable to the IPP [indirect purchaser plaintiff], . . . the Court finds that sales of Namenda were made either to or 'apparently to' consumers primarily for their personal, family, or household purposes. Therefore, the Complaint states a claim." Id. at *138. Because of the unique language in the Utah statute, the Court denies the motion to dismiss the union insurers' claims based on Utah law.

10. Vermont

Under Vermont law, "[u]nfair methods of competition in commerce and unfair or deceptive acts or practices in commerce are hereby declared unlawful." 9 Vt. Stat. Ann. § 2453(a).

> Any consumer who **[**156]** contracts for goods or services in reliance upon false or fraudulent representations or practices prohibited by section 2453 of this title, or who sustains damages or injury as a result of any false or fraudulent representations or practices prohibited by section 2453 of this title, or prohibited by any rule or regulation made pursuant to section 2453 of this title may sue . . . .

Id. § 2461(b)(1).

> "Consumer" means any person who purchases, leases, contracts for, or otherwise **[*642]** agrees to pay consideration for goods or services not for resale in the ordinary course of his or her trade or business but for his or her use or benefit or the use or benefit of a member of his or her household . . . or a person who purchases, leases, contracts for, or otherwise agrees to pay consideration for goods or services not for resale in the ordinary course of his or her trade or business but for the use or benefit of his or her business or in connection with the operation of his or her business.

Id. § 2451a(a). Given that the Vermont code specifies that it is only a consumer who may bring suit and the specific definition of "consumer" above, Gilead has the better position.

11. Summary

In summary, the Court grants the motion to dismiss the union insurers' claims **[**157]** based on the consumer protection laws of the following states/jurisdictions: Hawaii, Kansas, and Vermont.

I. Antitrust Claims: Concerted Action Requirement

Counts 4 and 6 of the CAC are the state law causes of action for monopolization and attempted monopolization (as opposed to, *e.g.*, conspiracy to monopolize or conspiracy to restrain trade). These claims are pled against Gilead only. Gilead argues that certain states — namely, Kansas, New York, and Tennessee — only allow for antitrust claims where there is concerted action, *see* Gilead Mot. at 37 (arguing that "[t]he antitrust laws of Kansas, New York, and Tennessee apply only to agreements between two or more parties"),[38] and therefore Counts 4 and 6

[38] *See also* Kan. Stat. § 50-101 (providing that "a trust is a combination of capital, skill, or acts, by two or more persons" for the purpose of, *e.g.*, creating or carrying out restrictions in trade or commerce); N.Y. Gen. Bus. Law § 340(1) (declaring as illegal and void contracts, agreements, arrangements, or combinations for monopoly or in restraint of trade); Tenn. Code §§ 47-25-101 to -112 (addressing arrangements, contracts, agreements, trusts, or combinations between persons or corporations).

based on these states' laws must be dismissed. In response, Plaintiffs do not dispute that the above states' laws require concerted action. They point out, however, that Counts 4 and 6 are still based — at least in part — on concerted action, namely, the No-Generics Restraints and the Teva patent settlement agreements. In reply, Gilead asserts: "Counts 4 and 6 should be dismissed *to the extent* they claim unilateral conduct." Gilead Reply at 19 (emphasis omitted). Implicitly, Gilead is referring **[**158]** to the antitrust claims based on its commercialization of TAF. Because this appears to be unilateral action on the part of Gilead, the Court dismisses the above state law claims to this extent.

IX. CONCLUSION

For the foregoing reasons, Defendants' motions to dismiss are granted in part and denied in part.

- The overarching conspiracy claims are dismissed with leave to amend.
- The motions to dismiss the antitrust claims based on the No-Generics Restraints are granted in part and denied in part. The claims based on the No-Generics Restraints in the Gilead/Japan Tobacco agreement are dismissed with prejudice. The claims based on the No-Generics Restraints in the Gilead/BMS agreements and the Gilead/Janssen agreements are allowed to proceed. Plaintiffs have leave to provide a more definite statement regarding their antitrust injury theory that untainted competitors in BMS, Japan Tobacco, and Janssen's positions would actually **[*643]** have challenged Gilead's patents prior to their expiration dates (*e.g.*, instead of waiting for the TDF patents to expire in December 2017).
- The motion to dismiss the antitrust claims based on the Teva settlement agreements is denied.
- The motion to dismiss **[**159]** the antitrust claims based on Gilead's commercialization of TAF is denied.
- The motion to dismiss based on a failure to adequately plead the relevant market is granted in part and denied in part. The motion is granted to the extent Plaintiffs have not adequately alleged a cART market. Plaintiffs have leave to amend.
- The motion to dismiss the state law claims (antitrust and consumer) is granted in part and denied in part.
    - ○ Applying California law to nationwide purchases is not a due process violation.
    - ○ The Court shall address at the class certification stage Gilead's argument that Plaintiffs cannot proceed with their state law claims for 25 states (*i.e.*, because "[n]o purchase by any Plaintiff is alleged in the . . . 25 states"). Gilead Mot. at 35.
    - ○ The motion to dismiss based on failure to satisfy pre-filing requirements is denied.
    - ○ The motion to dismiss the indirect purchaser claims for damages is granted as to the Illinois Antitrust Act and the Puerto Rico Antitrust Act. On the Rhode Island Antitrust Act and the Maryland Antitrust Act, Rhode Island and Maryland each has an *Illinois Brick* repealer statute but indirect purchaser claims for damages prior to the effective date of that **[**160]** statute are not viable. The motion to dismiss the indirect purchaser claims for damages under the Utah Antitrust Act and the Massachusetts Consumer Protection Act is denied without prejudice.
    - ○ The motion to dismiss certain consumer protection claims based on an "end run" argument (*i.e.*, around *Illinois Brick*) is denied.
    - ○ The motion to dismiss the consumer protection claims as conclusorily pled is denied.
    - ○ The motion to dismiss the consumer protection claims to the extent based on deceptive conduct is denied. However, the Court orders Plaintiffs to provide a more definite statement as to what relief is sought for any deceptive conduct.
    - ○ The motion to dismiss is granted with respect to the union insurers' claims based on the consumer protection laws of the following states/jurisdictions: Hawaii, Kansas, and Vermont.
    - ○ The motion to dismiss the monopolization and attempted monopolization claims under Kansas, New York, and Tennessee law is granted in part — *i.e.*, to the extent the claims are based on the unilateral conduct of Gilead in commercializing TAF.

To the extent the Court has allows Plaintiffs leave to amend, Plaintiffs' amended complaint shall be filed within 30 days from the date **[**161]** of this order. Thereafter, Defendants shall have 30 days to respond. If Defendants respond with another motion to dismiss, the Court strongly encourages Defendants (as before) to coordinate. Ideally, Defendants would be able to file a joint motion to dismiss, and the Court would extend page limitations to reflect the joint nature of the motion.

[*644] This order disposes of Docket Nos. 143, 149, 158, and 159.

IT IS SO ORDERED.

Judges: MATTHEW F. KENNELLY, United States District Judge.

Opinion by: MATTHEW F. KENNELLY

Opinion

CORRECTED MEMORANDUM OPINION AND ORDER

MATTHEW F. KENNELLY, District Judge:

Chicago Mercantile Exchange Inc. (CME) has sued ICE Clear US, Inc., ICE Clear Europe, Limited, and Intercontinental Exchange, Inc. (ICE) for trademark violations, unfair competition, breach of contract, and deceptive practices. ICE Clear US and ICE Clear Europe (collectively, the ICE Licensees) have asserted counterclaims for breach of contract; ICE has asserted counterclaims alleging the invalidity of CME's mark due to genericness and abandonment **[*6]** by naked licensing; and the defendants all have asserted defenses to CME's claims. Each side has moved for partial summary judgment.

Background

A. Factual background

The following facts are undisputed except where otherwise noted. CME is a corporation that operates a clearinghouse and provides financial and risk management services to commodity traders. The ICE Licensees are corporations that are indirect subsidiaries of ICE and also operate clearinghouses. Clearinghouses act as intermediaries between buyers and sellers of commodities, thereby reducing the risk that parties will default on a trade and providing stability to markets. One way that clearinghouses ensure against default is by setting requirements for initial margins, which are upfront payments that the clearinghouses' members must make to use their services.

In the 1980s, CME developed a method, called the SPAN framework, for financial institutions to assess the risk of portfolios. The term SPAN is an acronym for standard portfolio analysis of risk. One aspect of the SPAN framework enables clearinghouses to set initial margins by determining how various scenarios or market conditions might affect an individual portfolio's **[*7]** profits or losses. CME owns four incontestable trademarks related to the SPAN framework. It licenses the use of its marks to third parties and makes available the licensees' daily risk array files, which contain data relating to their calculations of initial margins, on its FTP (file sharing) site.

In June and July 2007, CME entered into license agreements with ICE Clear Europe and ICE Clear US that permitted them to use for ten years "the name and mark SPAN® . . . in connection with a risk evaluation and margin framework." Pls.' *L.R. 56.1* Stmt., Ex.1, dkt. no. 165-3, at 2.[1] The license agreements stated that they were governed by Illinois law. They prohibited the ICE Licensees from using any mark that was "confusingly similar" to the SPAN mark during the terms of the agreements. *Id.* ¶ 7(f). They required the ICE Licensees to include statements on all their materials relating to the SPAN framework to disclose that the SPAN mark was a registered trademark of CME being used pursuant to a license. And they set out the parties' obligations with respect to the daily publication of the ICE Licensees' risk array files on CME's FTP site.

The agreements also required CME to "control the nature **[*8]** and quality of all goods and services identified by" the SPAN mark. *Id.* ¶ 1(c). They required the ICE Licensees to permit CME to review and inspect their goods and services that used the SPAN mark. They obligated the ICE Licensees to modify to their "SPAN-related performance bond calculation systems" when CME required them to do so in order to "conform" their calculations with CME's technical specifications. *Id.* ¶ 7(b). The agreements stated that they could be amended or modified only in writing. And they provided that upon their termination, the ICE Licensees agreed "not to use any mark that is confusingly similar to the SPAN Mark in connection with any other margining system or similar risk calculation." *Id.* ¶ 5(a).

In 2009, CME contacted ICE regarding ICE Clear Europe's use of the phrase "ICE SPAN" in relation to its risk management products and services. The parties dispute whether CME's license agreement with ICE Clear Europe permitted it to use that phrase. Nonetheless, ICE Clear Europe eliminated the phrase from its website, software,

---

[1] The relevant portions of CME's license agreements with ICE Clear US and ICE Clear Europe are identical. When quoting from the agreements, Court cites to only the agreement with ICE Clear US, but the quoted language is also in CME's agreement with ICE Clear Europe under the same pincite. *See, e.g.*, Pls.' *L.R. 56.1* Stmt., Ex. 3, dkt. no. 165-5, at 2.

and other materials. The parties dispute whether ICE Clear Europe resumed using the phrase in 2015, but they do not dispute that ICE Clear US used **[*9]** it in 2015.

In 2014, CME had internal discussions regarding the ICE Licensees' SPAN implementations and those of another licensee, the London Clearing House. A CME employee involved in product management wrote in an e-mail that CME chose to "ignore" unilateral changes that the ICE Licensees made to the SPAN algorithm, which caused their calculations to "deviate." Defs.' *L.R. 56.1* Stmt., Ex. 73, dkt. no. 181-6, at 131-32. Another CME employee wrote that London Clearing House "changed the methodology that is native to SPAN." *Id.* at 131. In a subsequent e-mail, the first employee responded by saying that it appeared as though the London Clearing House may not have made "any actual changes" to SPAN and that "the issues could be with . . . functionality" and might be "easily" fixed. *Id.* at 130.

The license agreements expired in June and July 2017, but the ICE Licensees continued to use the term SPAN in reference to their risk management systems. Specifically, ICE Clear US continued to use the phrase "SPAN® Margin Model" in connection with its risk management services, ICE Clear Europe continued to use the word "SPAN" in connection with its services, and both ICE Licensees continued to include in their materials disclosures **[*10]** stating that the SPAN mark was a registered trademark of CME being used pursuant to a license. Pl.'s *L.R. 56.1* Stmt., dkt. no. 188, ¶¶ 59-62, 92, 193. In at least some instances, the ICE Licensees used the phrase "SPAN for ICE" in connection with their services.

There is evidence suggesting that, at first, none of the defendants were aware that the license agreements had terminated and that CME upheld at least some of its obligations under the agreements after their termination. According to CME's *Rule 30(b)(6)* witness, upon the termination of a license agreement, CME will stop publishing the licensee's data, and CME's software will no longer support the licensee's product. Despite this, the ICE Licensees' daily risk array files continued to be published on CME's FTP site. The parties dispute whether the ICE Licensees sent the files to CME to publish or whether the ICE Licensees themselves posted the files to the site.

On August 10, 2017, an in-house attorney for CME, Matthew Kelly, sent to ICE's general counsel, Jonathan Short, a letter stating that the ten-year term of the license agreements had run and that the ICE Licensees had no license to use the SPAN mark or framework. Kelly wrote that Short should **[*11]** contact him if ICE was "interested in discussing new licensing agreements with CME" and that, before entering into "new" agreements, "ICE must demonstrate its good faith efforts to cease the misuse of CME's SPAN® brand." Pls.' *L.R. 56.1* Stmt., Ex. 16, dkt. no. 165-18, at 3. Kelly also wrote that if ICE did not enter into an agreement with CME, then it must stop using CME's mark. In the letter, he identified several areas of alleged noncompliance by the ICE Licensees, including their alleged misuse of the SPAN mark in combination with ICE's marks and their failure to properly attribute the mark to CME. Near the conclusion of the letter, Kelly wrote, "We look forward to receiving confirmation that ICE is taking all necessary steps to comply with its obligations under the License Agreement." *Id.* at 5.

As general counsel for ICE, Short had the authority to enter into agreements valued at up to two or five million dollars on behalf of the company's subsidiaries, including the ICE licensees. The ICE Licensees also had their own general counsels, who reported directly to their presidents and indirectly to Short. A few days after Short received Kelly's letter, he called Kelly, and they discussed possible changes **[*12]** to CME's licensing model. Short has testified that he understood from the conversation that Kelly would follow up with him to provide a proposal for new license agreements after CME determined the financial terms of those agreements. They spoke again about a month later, when, according to Short, Kelly said that CME still was determining new license fees and that the parties also would need to agree on new disclaimers regarding the ICE Licensees' uses of the mark. There is no evidence suggesting that Kelly told Short the proposed terms of the new fees, including whether the fees would exceed two million dollars, or that Short agreed to those terms.

On September 15, Short sent an e-mail to Kelly with proposed disclaimers. A few days later, Kelly responded that the "disclaimers look good." Defs.' *L.R. 56.1* Stmt., dkt. no. 188, ¶ 340. The next day, ICE's associate general counsel sent to Kelly an e-mail stating that ICE would "start the process to update the website." *Id.* ¶ 341. According to Short, ICE then updated its website and other materials to include the new disclaimers. No one from CME contacted Short or ICE's associate general again until after CME filed this lawsuit in February 2018.

[*13] In the meantime, the ICE Licensees' risk array files continued to be published on CME's FTP site, and CME issued a notice to its clearing members that it planned to migrate the site, including data for ICE's exchanges, to a new host. According to testimony from some representatives of the ICE Licensees, they were still not aware that the licenses had terminated, that Kelly had sent a cease-and-desist letter, or that ICE and CME had been discussing the possibility of entering into new license agreements.

The defendants continued to use the SPAN mark and/or the phrase "SPAN for ICE" after CME filed suit. They contend that they removed references to SPAN on their online materials in May 2018, but CME contends that they continued to use the mark after that date. The parties do not dispute, however, that CME updated the functionality of a SPAN-related software program for certain risk array files, including those from the ICE Licensees, after the filing of the present suit. Nor do the parties dispute that the ICE Licensees' risk array files stopped being posted to CME's FTP site in August 2018.

B. Procedural background

As indicated, CME filed this lawsuit in February 2018. In counts 1 and 2 **[*14]** of the amended complaint, it alleges that the defendants violated *15 U.S.C. § 1114(1)* by counterfeiting and infringing its registered marks. In count 3, CME alleges that the defendants violated *15 U.S.C. § 1125(a)* by engaging in unfair competition. In count 4, it alleges that the ICE Licensees breached contracts. In counts 5 and 6, it alleges that the defendants violated the *Illinois Uniform Deceptive Trade Practices Act*, *815 Ill. Comp. Stat. 510/1*, and that they violated Illinois common law by engaging in unfair competition. The defendants raised numerous affirmative defenses, including, as relevant to this opinion, invalidity of marks due to genericness and abandonment through naked licensing (defenses raised only by ICE), trademark misuse, fair use, and a defense the defendants have framed as permission to use a mark under express or implied licenses. ICE asserted two counterclaims in which it alleges that the marks are invalid due to their genericness and abandonment by naked licensing. The ICE Licensees each have asserted a counterclaim for breach of contract.

The ICE Licensees previously moved to dismiss part of CME's breach of contract claim as it related to provisions requiring them to use their best efforts to protect the goodwill and reputation **[*15]** of CME and to provide notice of any infringement of the SPAN mark to CME in writing, and to strike allegations in the first amended complaint related those alleged breaches. The Court granted their motion. *Chicago Mercantile Exch. Inc. v. ICE Clear US, Inc., No. 18 C 1376, 2019 U.S. Dist. LEXIS 15958, 2019 WL 414663, at *3 (N.D. Ill. Feb. 1, 2019)*.

The parties have now filed motions for partial summary judgment.

Discussion

A party is entitled to summary judgment only if it demonstrates that "there is no genuine dispute as to any material fact and [it] is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A genuine dispute about a material fact exists "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. On cross-motions for summary judgment, the Court draws inferences "in favor of the party against whom the motion under consideration is made." *Cremation Soc'y of Ill., Inc. v. Int'l Bhd. of Teamsters Local 727, 869 F.3d 610, 616 (7th Cir. 2017)* (citation omitted).[2]

---

[2] CME asks the Court to deny the defendants' motions on the ground that their *Local Rule 56.1* statement of facts contain errors and misrepresentations. *See* *N.D. Ill. LR 56.1(b)(3)(A)* & *(B)*; *Malec v. Sanford, 191 F.R.D. 581, 584 (N.D. Ill. 2000)*. The Court declines this request but has not considered any assertions or denials that contain facts that misrepresent the cited portion of the record or improper legal conclusions.

A. Affirmative defenses

Each of the parties has moved for summary judgment on the defendants' affirmative defenses of trademark misuse; fair use; and implied consent, acquiescence, and/or estoppel by implied license.[3] No party has moved for summary judgment on the defendants' affirmative defense relating to an express license, but they all discuss it in their reply briefs. The Court begins its discussion of the summary judgment **[*16]** motions with the affirmative defenses because they present several threshold issues.

1. Trademark misuse

The defendants assert that CME engaged in trademark misuse by enforcing invalid trademark claims in an attempt to monopolize the market and eliminate competition. CME has moved for summary judgment against all of the defendants on this defense, and the defendants have filed a cross-motion for summary judgment.[4]

Although "courts have recognized the theoretical possibility of the antitrust misuse-unclean hands defense, in no final reported decision involving trademark infringement has a court actually refused to enforce a trademark because it was used in violation of ***antitrust law***." 2 McCarthy on Trademarks and Unfair Competition § 31:91 (5th ed. 2019); *see also Helene Curtis Indus., Inc. v. Church & Dwight Co., 560 F.2d 1325, 1337 (7th Cir. 1977)* (antitrust misuse defenses have limited viability). For such a defense, "it is not enough merely to prove that merchandise bearing a trademark . . . has been used in furtherance of antitrust violations." *Carl Zeiss Stiftung v. V. E. B. Carl Zeiss, Jena, 298 F. Supp. 1309, 1315 (S.D.N.Y. 1969)*, *aff'd in relevant part*, *433 F.2d 686 (2d Cir. 1970)*. Rather, an "essential element of the antitrust misuse defense in a trademark case is proof that the mark itself has been the basic and fundamental vehicle required and used to accomplish the violation." **[*17]** *Id.; see also Helene Curtis, 560 F.2d at 1337*.

The defendants point to no evidence of antitrust violations by CME, let alone evidence that the SPAN mark was "the basic and fundamental vehicle required and used" to accomplish such violations. *See Carl Zeiss Stiftung, 298 F. Supp. at 1315*. Accordingly, Court grants summary judgment in favor of CME on the misuse defense and denies the defendants' cross-motion for summary judgment.

2. Fair use

CME has moved for summary judgment on the ICE Licensees' affirmative defense of fair use. The ICE Licensees do not contest the motion, so the Court grants it. *See, e.g., Nichols v. Michigan City Plant Planning Dep't, 755 F.3d 594, 600 (7th Cir. 2014)* ("The non-moving party waives any arguments that were not raised in its response to the moving party's motion for summary judgment.").

3. Acquiescence or implied licenses

The defendants asserted as an affirmative defense that CME permitted, pursuant to implied licenses, any infringing uses of the SPAN mark by the defendants that occurred after the termination of the license agreements. CME has moved for summary judgment on this defense with respect to the ICE Licensees by arguing that CME did not acquiesce to their uses of the mark. Without citing to authority, CME contends that courts apply to a defense

[3] The parties disagree whether the standards for implied consent, acquiescence, and/or estoppel by implied license are the same, an issue the Court addresses below.

[4] The defendants have indicated in their memorandum in support of their motion for summary judgment, but not in the motion itself, that they seek judgment on their misuse defense. The Court takes this as a cross-motion. This does not change the outcome of this decision.

involving implied licenses the same standard that they **[*18]** apply to a defense of acquiescence. The defendants also seek summary judgment on this defense, but they contend that a defense of estoppel by implied licenses is distinct from a defense of acquiescence.[5] To the extent the standard for acquiescence applies, the defendants suggest that CME acquiesced in their use of the SPAN mark until the parties had finalized new license agreements.

Regardless of how it is framed, the application of this defense is an issue for the Court; it is not an issue for the jury. *See* Sarkis' Cafe, Inc. v. Sarks in the Park, LLC, No. 12 C 9686, 2016 U.S. Dist. LEXIS 22566, 2016 WL 723135, at *2 (N.D. Ill. Feb. 24, 2016); *see* Federal Civil Jury Instructions of the Seventh Circuit 13.5.3 (2017) ("laches, acquiescence, and other equitable defenses to trademark infringement actions" are issues for the court, not the jury).

a. Standard

The Court begins by considering the proper standard for this defense. The Seventh Circuit applies the same three-part test to determine whether a trademark owner impliedly consented to or acquiesced in another party's use of its mark. *See* Hyson USA, Inc. v. Hyson 2U, Ltd., 821 F.3d 935, 941 (7th Cir. 2016) (stating the test for acquiescence); Wine & Canvas Dev., LLC v. Muylle, 868 F.3d 534, 539-40 (7th Cir. 2017) (indicating that the test for acquiescence applies to implied consent and treating the defenses as identical). To prove acquiescence, the ICE Licensees must show that **[*19]** (1) CME "actively represented that it would not assert a right or claim," (2) CME's "delay between the active representation and assertion of the right or claim was not excusable," and (3) "the delay caused the defendant[s] undue prejudice." Hyson USA, 821 F.3d at 941 (citation omitted). A trademark owner can convey an active representation through its "words or conduct." *Id. at 940*.[6] The parties dispute only the active representation element.

Citing *All Star Championship Racing, Inc. v. O'Reilly Automotive Stores, Inc., 940 F. Supp. 2d 850 (C.D. Ill. 2013)*, the ICE Licensees argue that they need not prove active representation. The court in *All Star* stated that "the entire course of conduct between a patent or trademark owner and an accused infringer may create an implied license." *Id. at 863* (quoting *McCoy v. Mitsuboshi Cutlery, Inc., 67 F.3d 917, 920 (Fed. Cir. 1995))*. In *All Star*, the plaintiff brought a breach of contract action against a trademark owner, who counterclaimed for trademark infringement and other claims. *All Star Championship Racing, 940 F. Supp. 2d at 856, 858*. The parties had entered into agreements that set out the plaintiff's obligations in using the defendant's marks but did not expressly license the marks to the plaintiff. *Id. at 863*. During the contested time period, the parties entered into subsequent agreements that included additional, express licensing terms, but those agreements were not binding because the defendant had not signed **[*20]** them. *Id. at 857, 863*. The plaintiff contended that it had the defendant's implied consent to use the marks and that, during part of the contested period, the defendant had provided the plaintiff with promotional items and approved all its promotions and advertisements. *Id. at 864*. In denying summary judgment with respect to the plaintiff's infringement claim for that time period, the court found that the plaintiff had an implied license to use the marks and that there was a genuine factual dispute regarding whether that implied license continued until the date on which the defendant sent the plaintiff a cease-and-desist letter. *See id. at 864-65*.

---

[5] As with their trademark misuse defense, the defendants have indicated in their memorandum in support of their motion for summary judgment, though not in the motion itself, that they seek summary judgment on the defense they frame as estoppel by implied licenses. The Court assumes for purposes of discussion that they have cross-moved for summary judgment, but this does not change the outcome.

[6] The Court notes that the affirmative defense of laches is similar to that of acquiescence, but "acquiescence implies active consent," whereas "laches denotes a merely passive consent." Hyson USA, 821 F.3d at 940. Because neither party addressed the laches defense with respect to the defendants' conduct after the termination of the agreements, and because the defendants cite no case law relating to laches or suggesting that they have invoked the defense of laches in their contention there was an implied license, the Court need not address it. *See id.* ("[A]lthough our cases sometimes blend the doctrines of acquiescence and laches, they are formally distinct and should be analyzed separately.").

All Star does not support the ICE Licensees' contention that courts analyze the use of a trademark through an implied license differently from the way in which they analyze acquiescence. Although the court in *All Star* found the existence of an implied license, it did not indicate that it based that finding on a doctrine distinct from acquiescence (or, for that matter, implied consent). Indeed, the court entitled the section where it discussed the issue of an implied license "Consent and authorization," *id. at 862*, which suggests that it considered the issue as involving implied consent. **[*21]** And it discussed aspects of the trademark owner's actions—its provision of promotional materials to, and approval of promotions and advertisements by, the plaintiff—that appear analogous to active representations, as they indicated to the plaintiff that it could use the marks. *See id. at 864*. The fact that the court did not call these "active representations" does not matter; the Seventh Circuit had not yet articulated the standard for acquiescence or implied consent. *See Hyson USA, 821 F.3d at 941* (adopting the three-factor test for acquiescence and stating that the Circuit's prior cases "engage in essentially the same analysis (though without listing elements)"). Further, the other case to which the ICE Licensees cite to suggest that the standard for implied licenses is distinct from that of acquiescence is inapposite because it involved patents, not trademarks. *See Wang Labs., Inc. v. Mitsubishi Elecs. Am., Inc., 103 F.3d 1571, 1580 (Fed. Cir. 1997)*.

The Court concludes that the standard that applies to the defenses of implied consent and acquiescence is the one that governs the defense that the ICE Licensees frame as estoppel by implied license. Regardless, in order to fully address the ICE Licensees' arguments, the Court will also discuss the standard they propose. The Court considers the application **[*22]** of the defenses (to the extent they constitute separate defenses) for three separate time periods.

b. June and July 2017 to August 10, 2017

The Court first considers whether CME acquiesced in the ICE Licensees' uses of the SPAN marks from June and July 2017, when the license agreements expired, through August 10, 2017, when CME sent to ICE the cease-and-desist letter. The ICE Licensees argue that CME acquiesced in their uses of the mark or gave them an implied license to use the mark because it continued to perform its obligations under the license agreements and did not indicate that the ICE Licensees lacked its consent to uses the marks. Specifically, they point to testimony from CME's *Rule 30(b)(6)* witness that, upon the termination of a license agreement, CME would stop publishing the licensee's data, and its software would no longer support the licensee's product. It is undisputed that, during this timeframe, CME continued to make available to third parties the ICE Licensees' risk array files on its FTP site (although the parties dispute whether CME or the ICE Licensees published the files) and its software continued to support the ICE Licensees' services. It is further undisputed that CME did **[*23]** not notify the ICE Licensees regarding the termination of their agreements until August 10, 2017. The ICE Licensees contend that CME's conduct is indicative that it considered the licenses to remain operative.

CME contends that there can be no acquiescence or grant of an implied license during this timeframe because the parties had always governed their relationship through written agreements. It points to the provision in the license agreements stating that the agreements may be amended only in writing. Without citing to authority, CME also contends that the ICE Licensees could not have understood CME's actions to constitute the conveyance of implied licenses or acquiescence because they were unaware that the licenses had terminated in the first place.

The Court concludes that there is a genuine factual dispute regarding whether CME acquiesced to the ICE Licensees' uses of the SPAN mark (or, as the defendants put it, granted the ICE Licensees implied licenses) from the time of termination of the agreements in June and July 2017 until August 10, 2017. The Court therefore denies both sides' motions for summary judgment on this defense with respect to that time period.[7]

---

[7] Even if the defendants ultimately establish their acquiescence defense, CME's claim could "be revived" if it "can show that 'inevitable confusion' would result from dual use of the marks." *Hyson USA, 821 F.3d at 941* (citation omitted). Because neither party raises this issue, the Court need not address it here.

c. August 10, 2017 [*24] to February 23, 2018

The Court next considers whether CME acquiesced in the ICE Licensees' uses of the SPAN mark from August 10, 2017, when CME sent to ICE the cease-and-desist letter, until February 23, 2018, when CME filed this lawsuit. The defendants argue that, during this time period, CME actively represented to them that it would not assert a right or claim. Specifically, they contend that the letter from CME's in-house counsel Kelly indicated that CME required them to cease using the SPAN mark only if they did not enter into new license agreements; Kelly promised to send to ICE new license agreements; and he approved of their uses of the mark until they entered into the new agreements. CME contends that the ICE Licensees cannot claim CME acquiesced because they did not know that Kelly had sent the letter to ICE or even that the agreements had ended. CME also contends that it provided no active representations that the ICE Licensees or ICE could continue to use its mark and, to the contrary, indicated that the defendants could use the mark only if the parties signed new, written license agreements.

As an initial matter, the ICE Licensees may be able to sustain an acquiescence defense **[*25]** despite their claimed lack of knowledge of the cease-and-desist letter or the termination of the agreements. Notice to a parent company is generally imputed to its subsidiaries, particularly where there is some interrelationship between the entities. *See* *Woods v. Indiana Univ.-Purdue Univ. at Indianapolis, 996 F.2d 880, 894 n. 9 (7th Cir.1993)* (Rovner, J., concurring); *Norton v. Int'l Harvester Co., 627 F.2d 18, 21 (7th Cir.1980)*. Here, ICE is the parent company, and the ICE Licensees are among its subsidiaries. ICE's general counsel, Short, had authority to enter into agreements on behalf its subsidiaries. He responded to Kelly's letter on the ICE Licensees' behalf and negotiated terms, such as disclosures, for their potential new license agreements. The ICE Licensees had their own general counsels, but they indirectly reported to Short. This is sufficient evidence of an interrelationship between the parent and its subsidiaries such that ICE's notice of the cease-and-desist letter and the agreements' termination can be imputed to the ICE Licensees.

Kelly's letter, however, did not constitute an active representation giving the defendants the rights to use the SPAN mark. Kelly wrote that ICE's general counsel should contact him if ICE was "interested in discussing new licensing agreements with CME" and that, before entering into a **[*26]** "new" agreement, "ICE must demonstrate its good faith efforts to cease the misuse of CME's SPAN® brand." Pls.' *L.R. 56.1* Stmt., Ex. 16, dkt. no. 165-18, at 3. Those statements do not suggest that the defendants could continue using the SPAN mark while the parties negotiated new agreements, as the defendants contend. To be sure, a couple of sentences in the letter described, in the present tense, CME's expectation that the defendants comply with their obligations under the agreements—phrasing that, if considered by itself, might imply that the parties' obligations were ongoing. But these sentences did not stand alone; they were part of a larger communication. Considering the entire letter, and particularly its statements that the license agreements had terminated and that the defendants must cease all uses of the SPAN mark unless the parties entered into new agreements, it is clear that no reasonable finding could be made that Kelly was indicating that the defendants had rights to use the mark in the interim.

Another case from this district, *Sarkis' Cafe*, is instructive regarding whether CME actively represented that the defendants had rights to use its mark. In *Sarkis' Cafe*, the court denied **[*27]** the plaintiff's acquiescence defense where the parties had taken "many steps . . . to formalize a franchising agreement" but "the negotiations came to a halt." *Sarkis' Cafe, 2016 U.S. Dist. LEXIS 22566, 2016 WL 723135, at *4-5*. The parties had never had a previous agreement. *See* *2016 U.S. Dist. LEXIS 22566, [WL] at *1*. The plaintiff operated a restaurant, andneeded to agree on new disclaimers regarding the defendants' uses of the mark. Although Kelly stated that ICE's proposed disclaimers "look[ed] good," there was evidence that its manager had trained the defendant's employees and acknowledged the defendant's restaurant as a franchisee in a media interview while they negotiated an agreement. *2016 U.S. Dist. LEXIS 22566, [WL] at *4*. The court found that "the negotiations cast a shadow over all of [the plaintiff's] actions" and thus none of those actions could "be taken as an affirmative word or deed conveying to [the defendant] a right to use the trademarks." *2016 U.S. Dist. LEXIS 22566, [WL] at *5*.

None of CME's communications with ICE affirmatively indicated that the ICE Licensees could continue using its mark. Specifically, Kelly never stated that the defendants could continue using CME's mark or approved of their continued uses of it. Rather, he repeatedly indicated that CME would propose (and the defendants would need to accept) new financial terms before they could enter into new agreements. But he never got to the point of providing new proposed terms. And he told ICE's general counsel that the parties **[*28]** needed to agree on new disclaimers regarding the defendants' uses of the mark. Although Kelly stated that ICE's proposed disclaimers "look[ed] good," Defs.' *L.R. 56.1* Stmt., dkt. no. 188, ¶ 340, he never told ICE that it could implement those disclaimers and use the mark.

There is, however, a genuine factual dispute regarding whether CME's conduct during the negotiations served as an active representation that the defendants could use the licenses. Specifically, the defendants contend that CME's continued performance of its obligations under the license agreements showed that the ICE Licensees had CME's permission to use the SPAN marks. As indicated, a trademark holder can convey an affirmative representation through its conduct, not just its words. *Hyson USA, 821 F.3d at 941*. Unlike the parties in *Sarkis' Cafe*, who previously had never entered into license agreements, CME and the ICE Licensees had had ten-year license agreements. Thus the lens through which the defendants would see CME's conduct differs from the negotiation for an initial license involved in *Sarkis' Cafe*. After the terminations of the ICE Licensees' agreements, while CME and ICE were negotiating over new agreements, CME continued to make available on **[*29]** its FTP site the ICE Licenses' risk array files and issued a notice to its clearing members that it planned to migrate the site, including data for ICE's clearinghouses, to a new host. (The parties dispute whether CME or the ICE Licensees posted the files to the FTP site.) The Court cannot determine without hearing testimony whether CME's conduct amounted to an active representation that the defendants could use the SPAN mark. Accordingly, CME is not entitled to summary judgment on the defense for the period from August 10, 2017 through February 23, 2018.

Turning to the defendants' motion, CME's claimed silence during the negotiations does not entitle defendants to summary judgment on their defense, as the defendants contend. In certain situations, a trademark owner's continued silence may constitute an active representation indicating its acquiescence in another party's use of its mark. *ProFitness Physical Therapy Ctr. v. Pro-Fit Orthopedic & Sports Physical Therapy P.C., 314 F.3d 62, 68 (2d Cir. 2002)*. In *ProFitness*, a trademark holder sent a cease-and-desist letter to its competitor, with whom it had never entered a license agreement. *Id. at 65*. The competitor ameliorated the effect of the letter by making a good faith proposal to change its allegedly infringing use and expressly requesting that the trademark **[*30]** holder respond to its proposal, with the caveat that the failure to respond would be construed as assent. *Id. at 65-66*. The trademark holder never responded. *Id. at 66*. The court found that, under the circumstances, the trademark holder's silence amounted to an active representation, and the competitor reasonably believed the holder had acquiesced in its use of the mark. *See id. at 68-69*. This case, however, is distinguishable from *ProFitness* because the defendants never requested CME's consent to continue their uses of its mark or told CME that they would interpret its silence as consent. The existence of the parties' prior written licensing arrangement further serves to distinguish this case from *Pro Fitness*. Accordingly, to the extent the defendants contend that the doctrine of estoppel by an implied license is distinct from the doctrines of acquiescence or implied consent, there is evidence that would permit a finding that they had implied licenses during this timeframe and evidence that would permit the opposite finding.

d. After February 23, 2018

CME argues that the ICE Licensees can point to no evidence showing acquiescence and/or grants of implied license after CME filed this lawsuit on February 23, 2018. The **[*31]** defendants argue that the parties' conduct after CME filed the lawsuit indicated that CME gave implied licenses or acquiesced in their use of the mark. That argument makes no sense. A trademark owner cannot be considered to have actively represented that it will not assert a claim against former licensees and their parent company for their uses of its mark—as required for the defense of acquiescence—when it already has asserted exactly such a claim. *See Restatement (Third) of Unfair Competition § 29 cmt. d* (Am. Law. Inst. 1995) (the commencement of an infringement action indicates that a trademark owner does not consent to the allegedly infringing party's use of its mark). The Court need not address the other two elements of an acquiescence because they "cannot alone support a finding of acquiescence." *Hyson USA, 821 F.3d at 941*. And even if, as the ICE Licensees contend, the active representation requirement does not apply, no jury could find that the defendants reasonably believed that CME had given them an implied license to use the mark once it had already sued them for use of the mark. Therefore, the Court grants CME's motion for summary judgment, and denies the defendants' cross-motion, on the defenses of acquiescence and/or estoppel by implied license **[*32]** as they pertain to the ICE Licensees' uses of the mark after February 23, 2018.

e. Summary

In sum, the Court grants CME's motion for summary judgment on the defenses of acquiescence and/or estoppel by implied license for trademark violations occurring after February 23, 2018 but declines to enter summary judgment in CME's favor on these defenses for the periods before that date. The Court denies the defendants' cross-motion for summary judgment on these defenses.

4. Express license

The defendants frame their fourth affirmative defense as a defense that any infringement was permitted under express or implied licenses. CME stated in its opening brief that it presumed that the defense related only to the existence of implied licenses through acquiescence. It thus moved for summary judgment on that defense as to the ICE Licensees based only on the issue of acquiescence, as the Court just addressed. In its reply brief, however, CME sought summary judgment on the express license defense. The defendants contend that CME waived that argument by failing to make it in its opening brief and, regardless, that its express license defense applies only to ICE.

A court is entitled to find that an argument **[*33]** raised for the first time in a reply brief is forfeited. *See, e.g., Narducci v. Moore, 572 F.3d 313, 324 (7th Cir. 2009)*. CME waived its argument for summary judgment on an express license defense by failing to make that argument. That said, the ICE Licensees conceded their express license defense by arguing that they had no express license. Accordingly, the Court finds that an express license defense is still at issue in this case only as it pertains to ICE, and neither party has moved for summary judgment on that issue.

B. Trademark-related claims

CME asserts claims against all of the defendants for trademark counterfeiting and infringement under *15 U.S.C. § 1114* and unfair competition under *15 U.S.C. § 1125(a)*, as well as parallel state law claims.[8] ICE has raised counterclaims challenging the protectability of the SPAN mark, as indicated. CME has moved for summary judgment on its claims against the ICE Licensees but not against ICE. The defendants have all cross-moved for summary judgment on CME's claims and certain counterclaims. Specifically, ICE seeks summary judgment on its counterclaims, and, with respect to CME's claims, all of the defendants argue that CME alleged no facts relating to trademark violations during the terms of the agreements and failed to prove **[*34]** violations after the agreements' termination.

The Court first addresses the issue of protectability. After that, the Court will turn to whether CME alleged facts relating to trademark violations during the terms of the license agreements. Next, the Court will discuss most of the trademark claims relating to the defendants' uses of the SPAN mark after the agreements' terminations, and, finally, the Court will discuss the counterfeiting claim, which entails a separate analysis.

---

[8] CME alleges deceptive trade practices in violation of *815 Ill. Comp. Stat. 510/1* and unfair competition in violation of Illinois common law. Both claims are subject to the same standards as the federal infringement claims. *AHP Subsidiary Holding Co. v. Stuart Hale Co., 1 F.3d 611, 619 (7th Cir. 1993)*; *McGraw-Edison Co. v. Walt Disney Prods., 787 F.2d 1163, 1173 n.9, 1174 (7th Cir. 1986)*. Thus the Court need not engage in a separate analysis of these claims.

1. Protectability

A plaintiff may sue for trademark violations only if its mark is protectable. *See CAE, Inc. v. Clean Air Eng'g, Inc., 267 F.3d 660, 673 (7th Cir. 2001)*. ICE has moved for summary judgment on its counterclaims, which challenge the SPAN mark's protectability on the grounds that the mark is generic and that CME has abandoned it through naked licensing.[9] CME has not cross-moved for summary judgment on either counterclaim. The ICE Licensees have not challenged the mark's validity in the present motion; the doctrine of licensee estoppel precludes them from doing that.[10] *See Donald F. Duncan, Inc. v. Royal Tops Mfg. Co., 343 F.2d 655, 657 (7th Cir.1965)* (trademark licensees are estopped from disputing protectability); *Chrysler Motors Corp. v. Alloy Auto. Co., 661 F. Supp. 191, 193 (N.D. Ill. 1987)* (former licensees are estopped from challenging protectability except based on facts arising after the licenses' terminations). The Court **[*35]** addresses genericness first and then discusses abandonment.

a. Genericness

ICE has moved for summary judgment on its counterclaim alleging that SPAN has become a generic term referring to the calculation of initial margin and thus CME's mark is not legally protectable. "The term 'trademark' includes any word, name, symbol, or device . . . used by a person . . . to identify and distinguish his or her goods . . . from those manufactured or sold by others and to indicate the source of the goods." *15 U.S.C. § 1127*. "Marks are classified into five categories of increasing distinctiveness: 1) generic, 2) descriptive, 3) suggestive, 4) arbitrary, and 5) fanciful." *Mil-Mar Shoe Co. v. Shonac Corp., 75 F.3d 1153, 1156 (7th Cir. 1996)*. "[G]eneric terms receive no trademark protection." *Id.*

A generic term is one that is "commonly used to name or designate a kind of goods," whereas a trademark "identifies the source of a product." *Id. at 1157* (citation omitted). A determination that a trademark is generic is a "fateful step" that "penalizes the trademark's owner" for successfully "making the trademark a household name" and that "may confuse consumers who continue to associate the trademark with the owner's brand." *Ty Inc. v. Softbelly's Inc., 353 F.3d 528, 531 (7th Cir. 2003)*. Courts thus generally find that a trademark has become generic only where **[*36]** "the trademark has gone so far toward becoming the exclusive descriptor of [a] product that sellers of competing brands cannot compete effectively without using the name to designate the product they are selling." *Id.* Otherwise, if such words were considered protectable trademarks, sellers would be in a "pickle," as the Seventh Circuit has stated, because they would be "forbidden to use 'brassiere,' 'cellophane,' 'escalator,' 'thermos,' 'yo-yo,' or 'dry ice' to denote products—all being former trademarks that have become generic terms." *Id. at 531-32*.

Genericness is a question of fact. *See, e.g., id. at 530-31*. The registration of a trademark under the *Lanham Act* affords the registrant a rebuttable presumption of validity. *See 15 U.S.C. § 1115(a)*; *CAE, 267 F.3d at 673*. The Seventh Circuit has not directly addressed which party bears the burden of persuasion regarding the genericness of an incontestable mark. *Compare Te-Ta-Ma Truth Found. - Family of URI, Inc. v. World Church of the Creator, 297 F.3d 662, 665 (7th Cir. 2002)* (stating, without discussing which party bears the ultimate burden of persuasion, that "an incontestable registration is more like a bursting-bubble presumption of non-genericness than like [an] indomitable presumption") *with Reno Air Racing Ass'n., Inc. v. McCord, 452 F.3d 1126, 1135 (9th Cir. 2006)*

---

[9] ICE also asserts affirmative defenses relating to these counterclaims. The Court need not address those defenses separately because the analysis is the same regardless of whether they are framed as counterclaims or defenses.

[10] The ICE Licensees challenged the mark's validity in their initial counterclaims and CME moved to dismiss those counterclaims due to licensee estoppel. CME contends in its opening brief that the Court granted that motion and dismissed the ICE Licensee's counterclaims due to licensee estoppel, but that does not appear to be correct. The Court did not grant that motion to dismiss. Rather, at a hearing on May 17, 2018, the Court instructed the defendants to file a response to the motion to dismiss addressing the issue of licensee estoppel, and the defendants indicated that they instead would amend their answer and counterclaims. The defendants amended the counterclaim so that only ICE raised the validity counterclaims, dkt. no. 41, and the Court terminated CME's motion to dismiss after CME filed an amended complaint, *see* dkts. no. 69, 74.

(defendant has the burden of showing the genericness of an incontestable mark). As previously explained in **[*37]** *Hickory Farms, Inc. v. Snackmasters, Inc., 500 F. Supp. 2d 789 (N.D. Ill. 2007)* (Kennelly, J.), this Court assumes the defendant bears the burden of persuasion on an incontestable trademark's genericness. *See* *id. at 793*; *see also* *Illinois Tamale Co. v. El-Greg, Inc., No. 16 C 5387, 2018 WL 1534971, at *3 (N.D. Ill. Mar. 29, 2018)* (Kennelly, J.).

The types of evidence relevant to a determination of genericness include consumer surveys, dictionary definitions, and the uses of the term by the trademark owner, its competitors, and the media. *See, e.g.*, McCarthy, *supra*, § 12:13. ICE contends that SPAN is generic based on survey results, a financial dictionary's definition, and uses of the term by CME, its competitors, the media, and academics. Viewing the evidence in the light most favorable to CME, the nonmoving party, there is a genuine factual dispute regarding whether the term is generic. For each category of evidence, the Court first addresses issues of admissibility and then describes the admissible evidence put forth by the parties. Finally, the Court explains why, considering all of the evidence, there is a genuine factual dispute.

i. Survey results

Surveys can provide evidence of genericness, but a party is not required to conduct a survey to establish that a disputed term is or is not generic. *See id.* § 12:14. ICE has presented a survey conducted by its retained expert witness, Phillip Johnson. **[*38]** CME has presented no survey of its own and challenges the admissibility and results of ICE's survey.

The admissibility of expert testimony is governed by *Federal Rule of Evidence 702* and *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. *See* *Gopalratnam v. Hewlett-Packard Co., 877 F.3d 771, 778 (7th Cir. 2017)*. The party "seeking to introduce the expert witness testimony bears the burden of demonstrating," by a preponderance of the evidence, that the testimony is admissible. *Id. at 782*. Expert testimony is admissible if the witness is qualified, applies reliable methodology, and renders testimony that will assist the trier of fact. *Id. at 779*. In considering the question of methodological reliability, the Court must take a "flexible" approach based on "the precise sort of testimony at issue and not any fixed evaluative factors." *Id. at 780*.

CME challenges the reliability of Johnson's survey on several grounds. First, CME argues that Johnson employed an unreliable methodology because, it contends, he surveyed an over- and underinclusive universe of respondents. The proper universe for a consumer survey on genericness is "the segment of the population whose perceptions and state of mind are relevant to the issues in [the] case." McCarthy, *supra*, § 32:159. If a survey's universe is "sufficiently precise," it is admissible, and any inadequacies in the scope of its universe go to the **[*39]** weight to be given to its results. *Piper Aircraft Corp. v. Wag-Aero, Inc., 741 F.2d 925, 930 (7th Cir. 1984)*. In *Piper Aircraft*, the Seventh Circuit found that a survey about the genericness of airplane parts was admissible where it included all owners of private airplanes, rather than only airplane owners likely to buy parts because they "work on, restore, or build their own aircraft." *Id.* Although the court found that the survey was somewhat overinclusive, it found that the views of all private airplane owners nonetheless were relevant because they had a "substantial interest in the quality of parts used in their planes." *Id.* The court found that the lesser probative value of the views of airplane owners who do not work on their own planes would affect only the weight to be given the survey, not its admissibility. *Id. at 930-31*.

CME contends that the survey's universe was underinclusive because it did not include all people who purchase financial risk management services or use those services to calculate initial margins and overinclusive because it included people who do not purchase or use those services. ICE's expert surveyed finance professionals who have Series 3 licenses (which qualifies them to trade commodities) and who are involved in commodity futures trading. **[*40]** Johnson testified that he selected this universe because people with such licenses are the "end users" of SPAN and are "subject to the SPAN calculation for the margin requirements on the trades that they make." Defs.' Add'l *L.R. 56.1* Stmt., dkt. no. 181-6, ¶¶ 111-12. CME contends that, although traders may be subject to margin requirements, those who are tasked with purchasing risk management services or calculating initial margins may not engage in trading and thus may not have Series 3 licenses. In support of this contention, CME's rebuttal expert reviewed job descriptions for risk management positions on job-search websites and the parties' websites and concluded that they generally do not require applicants to hold Series 3 licenses. He also examined the profiles of SPAN licensees' employees on a brokerage website and found that the profiles did not indicate that they held Series 3 licenses.

Johnson's survey was underinclusive to the extent that it may have excluded people who buy risk management services or calculate initial margins. The survey also was somewhat overinclusive. Although the views of people with Series 3 licenses are relevant regarding whether SPAN is a generic term because **[*41]** traders have a "substantial interest" in initial margins calculated through the SPAN framework, the views of people who buy or use risk management services but do not hold Series 3 licenses are also relevant. *See* *Piper Aircraft, 741 F.2d at 930*; *see also* *Black & Decker Corp. v. Positec USA Inc., No. 11-CV-5426, 2015 U.S. Dist. LEXIS 127193, 2015 WL 5612340, at *18 (N.D. Ill. Sept. 22, 2015)* (survey was overinclusive where it did not specify whether respondents who used a product were likely to purchase it). The universe, however, is not so "significantly skewed away from the proper group of people whose perception is at issue" as to render it unreliable and thus inadmissible. McCarthy, *supra*, § 32:159. Therefore, the survey is admissible; the objection affects only its weight.

CME contends that other aspects of Johnson's survey make its results unreliable. Specifically, because the survey defined brand names as names that can be used by only one company, CME argues that the survey could have caused respondents to misunderstand that trademarks can be used by multiple companies due to licensing arrangements. Citing *Sheetz of Delaware, Inc. v. Doctors Associates Inc., 108 U.S.P.Q.2d 1341 (T.T.A.B. 2013)*, ICE responds that courts have approved of similar definitions of brand names in other cases. But *Sheetz* is not on point; the administrative agency in that case did not address whether the definition at issue sufficed to distinguish between brand names used by **[*42]** multiple companies under license agreements. *See id.* at 1365. ICE also asserts that respondents took screening questions to ensure they could differentiate between brand names and generic terms, but there is no evidence indicating whether the screening questions involved terms used by multiple companies through license agreements.

A survey's questions and instructions "should not be slanted or leading so as to lead the respondent to a desired response." McCarthy, *supra*, § 32:172. In this case, the survey's definition of brand names could be confusing or slanted in that it suggested that only one company can use the term SPAN. This issue is somewhat mitigated, however, because respondents who were confused by the definition could indicate that they did not know whether SPAN was generic or not. *See* *Black & Decker, 2015 U.S. Dist. LEXIS 127193, 2015 WL 5612340, at *19* (the leading nature of a survey question can be somewhat mitigated where respondents can answer that they do not know the answer to a question). Accordingly, the Court again finds that CME's objection affects only the weight to be given to the survey, not its admissibility.

Additionally, CME argues that Johnson improperly excluded respondents because they had never heard of the term SPAN. CME contends that respondents' unawareness **[*43]** of a term is an indication that the term is not generic. This argument misses the mark. The relevant question for genericness is not whether respondents are aware of the term but, rather, whether people who are aware of a product commonly use the term to "name or designate" it. *See* *Mil-Mar Shoe, 75 F.3d at 1157*.

CME also argues that the survey's results are unreliable because Johnson did not include all respondents in his conclusions but rather included only the respondents who had heard of the term SPAN. But this argument effectively challenges how Johnson framed the results, not the reliability of his methodology. *Gopalratnam, 877 F.3d at 781* (*Rule 702* requires only an that an expert correctly apply "a reliable *methodology*," not that his conclusions are reliable). To the extent CME challenges Johnson's results or ICE's framing of the results, that goes to the survey's weight and is not grounds for excluding the survey. *See id.*

Accordingly, the Court concludes that Johnson's survey is admissible. Johnson found that sixty-nine percent of the respondents who had seen or heard of the term SPAN believed it to be a common name, twenty-nine percent believed it to be a brand name, and two percent did not know whether it was a common or brand name.

Defs.' **[*44]** *L.R. 56.1* Stmt., Ex. 87, dkt. no. 181-6, at 233. But around twenty-seven percent of the respondents had never heard of the term SPAN. *See* Pls.' Add'l *L.R. 56.1* Stmt., Ex. 18, dkt. no. 195-4, at 36. Although Johnson's survey provides support for ICE's claim of genericness, a jury might discount it for the reasons the Court has discussed. It is not conclusive evidence of genericness.

ii. Dictionary definition

Courts often look to dictionaries as a source of evidence on genericness because "generic use implies use consistent with common understanding." *Mil-Mar Shoe, 75 F.3d at 1158*. The term SPAN is not included in standard dictionaries. Investopedia, a website with an online financial dictionary, defines SPAN without referencing CME. ICE contends Investopedia's definition supports summary judgment on the issue of genericness. But another article on Investopedia attributes to SPAN methodology to CME. Again, the defendants' dictionary citation does not amount to conclusive evidence of genericness.

iii. Uses of the term

ICE also argues that usage of the term SPAN by CME, its competitors, the media, and academics indicate that the term is generic. Specifically, ICE points to evidence that CME recently started using the phrase "CME SPAN" **[*45]** to distinguish itself from other common references to the term. It also contends that CME uses SPAN as a noun, in the possessive form, and without the trademark symbol—uses that ICE contends show that the term is generic. It offers evidence from an expert, Robert Frank, who examined the uses of SPAN in media and Internet sources and concluded that the majority of those sources used the term SPAN as a noun, did not identify it as a trademark, and mentioned CME only to indicate that it invented the term. And it argues that CME failed to police third parties' uses of its mark, which it contends indicates that the mark has become generic.

As an initial matter, CME challenges the admissibility of Frank's expert report. As indicated, expert testimony is admissible if the witness is qualified, applies reliable methodology, and renders testimony that will assist the trier of fact. *Gopalratnam, 877 F.3d at 779*. CME challenges only the reliability of Frank's methodology. Because the Court serves a gatekeeping role rather than a factfinding one, its inquiry into the question of methodological reliability inquiry is limited to an expert's "principles and methodology, not the conclusions that [he] generate[s]." *Id. at 781* (quoting *Daubert, 509 U.S. at 595* **[*46]**).

CME contends that Frank's testimony is not reliable because, according to its two rebuttal experts, Frank overcounted the number of references to SPAN, ignored the context in which the mark was used, and improperly included references that are inapplicable to this case. Notably, CME does not object to the design of Frank's searches for articles referencing the term SPAN or to the nature of the news and academic articles on which he based his analysis. Instead, CME's objections relate to the conclusions that Frank drew and how he reached those conclusions, which go to only the weight to be given to his testimony, not to its reliability or admissibility. *See id.* The Court denies CME's request to bar Frank's testimony.

ICE, in turn, challenges the admissibility of CME's expert testimony as improper rebuttal evidence. According to ICE, CME's experts, David Gooder and Dr. Robert Leonard, responded to Frank's testimony by offering express opinions about the genericness of the SPAN mark, even though Frank never provided a conclusion on the mark's genericness. ICE further challenges the reliability of Gooder's expert opinion because, it contends, he provided improper legal analysis. The Court **[*47]** need not address the admissibility of Gooder's or Dr. Leonard's testimony, however, because their opinions do not affect the outcome of this decision. In particular, as the Court explains momentarily, even without these expert opinions, there is not enough evidence for summary judgment in favor of ICE.

Through its expert, ICE has offered evidence that CME, the media, and academics used the SPAN mark as a noun, without a trademark symbol, and in contexts indicating it was generic. But ICE's expert also identified the existence of instances where CME, the media, and academics used the SPAN mark as a trademark. And although ICE contends that CME failed to police the uses of its mark, ICE does not point to conclusive proof that they never policed the mark and, regardless, a trademark holder's failure to police the uses of its mark can, but does not always, indicate genericness. *See* McCarthy, *supra*, § 17:8.

iv. Conclusion

In sum, viewing the evidence, taken as a whole, in the light most favorable to CME, there is a genuine factual dispute regarding the genericness of the SPAN mark. Specifically, a reasonable jury could find that Johnson's survey provides support for ICE's claim of genericness, as the Court has discussed, but **[*48]** a reasonable jury could also reach the opposite conclusion. And to the extent Investopedia is considered an authoritative dictionary (an issue the Court need not decide), a reasonable jury could take its definition of SPAN as evidence of genericness or, considering Investopedia's article attributing the SPAN methodology to CME, as just the opposite. Nor does ICE's evidence of uses of the term SPAN provide conclusive evidence of genericness, as just discussed. In short, the evidence is not "so one-sided that there can be no doubt about how" a jury would answer the question of genericness, and thus summary judgment on that issue is inappropriate. *Door Sys., Inc. v. Pro-Line Door Sys., Inc., 83 F.3d 169, 171 (7th Cir. 1996)*. The Court therefore denies ICE's motion for summary judgment on the counterclaim relating to genericness.

b. Abandonment through naked licensing

ICE has also moved for summary judgment on its counterclaim that CME's trademark is invalid because it abandoned its rights in the mark through naked licensing. Abandonment through naked licensing occurs when a trademark owner allows "others to use the mark without exercising 'reasonable control over the nature and quality of the goods, services, or business on which the [mark] is used by the licensee.'" **[*49]** *Eva's Bridal Ltd. v. Halanick Enters., Inc., 639 F.3d 788, 789 (7th Cir. 2011)* (alteration in original) (quoting *Restatement (Third) of Unfair Competition § 33*). A party contending that a trademark owner engaged in naked licensing bears a "heavy burden." *TMT N. Am., Inc. v. Magic Touch GmbH, 124 F.3d 876, 885 (7th Cir. 1997)* (quoting *Restatement (Third) of Unfair Competition § 33 cmt. c*).

In making naked licensing determinations, the Seventh Circuit "tend[s] towards the view taken by the Restatement (Third) of Unfair Competition, which advocates a flexible approach but allows licensors to rely at least somewhat on the reputation and expertise of licensees." *Id.* Under that approach, if the trademark owner has a justification for relying on the licensee's reputation and expertise, "the existence of contractual obligations undertaken by the licensee may be sufficient in itself to constitute reasonable quality control . . . at least in the absence of evidence indicating significant deviations from the agreed standards or procedures." *Restatement (Third) of Unfair Competition § 33 cmt. c*. But more quality control may be necessary "if the licensee is inexperienced, or if the goods or services are particularly complex or otherwise require careful supervision, or if the risk to the public from inadequate supervision is substantial." *Id. See also Bodum USA, Inc. v. A Top New Casting, Inc., No. 16 C 2916, 2017 U.S. Dist. LEXIS 71108, 2017 WL 1927701, at *3 (N.D. Ill. May 10, 2017)* (Kennelly, J.) (declining to grant summary judgment on the issue of naked licensing where there was no evidence that a trademark owner was unjustified **[*50]** in relying on a licensee's expertise and fulfillment of its contractual obligations and no evidence of a deviation in the licensed products' quality).

ICE argues that CME failed to exercise reasonable quality control because it never exercised its contractual rights to control the goods or services related to its licenses. Specifically, ICE contends that CME provided licensees with few guidelines apart from the obligations set forth in license agreements regarding its standards for their services; had no approval or product accreditation process for licensees' services; would review licensees' services only at the start or end of their licenses' terms; never terminated a license agreement due to a licensee's quality of services; and never audited any licensee's services, advertisements, or software codes relating to the SPAN framework. CME contends that it exercised quality control through a six-month onboarding process for licensees (a process ICE contends is optional) and its role in helping to implement and validate licensees' software (another matter that ICE disputes). CME also points to the enforcement actions it took against ICE and the ICE Licensees in 2009 and 2017, but those **[*51]** actions are irrelevant regarding the issue of quality control because, in taking them, CME sought to address the ICE Licensees' uses of the mark, not to control the quality of their services. *See Slep-Tone Entm't Corp. v. Coyne, 141 F. Supp. 3d 813, 824 (N.D. Ill. 2015)* ("The 'control' required . . . is not control over the mark, but rather control over the *service* that the mark identifies.").

A reasonable jury, however, could find that CME did not need to exercise its contractual rights to exercise reasonable quality control. ICE compares this case to *Eva's Bridal*, an "extreme case" in which the Seventh Circuit found that a trademark holder had abandoned its license because neither its license agreement nor its "course of performance" indicated that it held or exercised any authority over its licensee. *Eva's Bridal, 639 F.3d at 790-91*. But unlike in *Eva's Bridal*, the license agreements granted CME the right to control the nature and quality of the ICE Licensees' services, perform inspections, and require the ICE Licensees to modify their SPAN-related systems in order to conform with its specifications. Because CME's licensees include sophisticated financial institutions such as clearinghouses and exchanges that are subject to federal regulation and have significant incentives to maintain **[*52]** the quality of CME's SPAN framework, a reasonable jury could find that CME was justified in relying on its licensees' reputations and expertise, absent a "significant deviation from" CME's quality standards. *See TMT N. Am., 124 F.3d at 886*. If the licensees' services significantly deviated from the quality of the SPAN framework, they could have faced regulatory, financial, and reputational consequences.

That said, there is a genuine factual dispute regarding whether licensees' uses of SPAN involved significant deviation from CME's quality standards. CME permitted licensees to develop their own implementations of the SPAN framework, which a reasonable jury could find entailed significant deviations from CME's standards. For example, as indicated, a CME employee involved in product management wrote in an e-mail that CME chose to "ignore" unilateral changes that the ICE Licensees made to the SPAN algorithm, which caused their calculations to "deviate." Defs.' *L.R. 56.1* Stmt., Ex. 73, dkt. no. 181-6, at 131-32. And an employee wrote that London Clearing House, another licensee of the SPAN mark, "changed the methodology that is native to SPAN." *Id.* at 131. But a reasonable jury also could find that the implementations did not constitute **[*53]** significant deviations. In a subsequent e-mail, an employee stated that the London Clearing House "might not have made any actual changes" to the algorithm for SPAN; he appeared to indicate that the changes could have been related to the functionality of software and may not have a major impact on the underlying methodology. *Id.* at 130.

The Court concludes that there is a genuine factual dispute regarding whether CME failed to exercise adequate quality control and thereby engaged in naked licensing. Therefore, the Court denies ICE's motion for summary judgment on its counterclaim of abandonment through naked licensing.

Because the Court denies ICE's motion for summary judgment with respect to both validity counterclaims, it need not address ICE's request for cancellation of CME's four trademark registrations relating to the SPAN framework.

2. Trademark violations during the terms of the license agreements

Assuming CME can prove at trial that its mark was protectable, it must also prove the other elements of its claims for trademark counterfeiting and infringement under *15 U.S.C. § 1114*, unfair competition under *15 U.S.C. § 1125(a)*, and parallel state law violations. As indicated, CME has moved for summary judgment against the ICE **[*54]** Licensees on these claims as they pertain to CME's liability, and the defendants have cross-moved for summary judgment.

CME argues that the ICE Licensees infringed the SPAN mark during the terms of the license agreements by using the phrase "ICE SPAN," a use of the SPAN mark it contends that the agreements did not permit. The defendants contend that they cannot be liable for trademark violations during the terms of the agreements because CME did not plead any facts to support this theory.

At the summary judgment stage, a plaintiff typically can assert new legal theories, but it cannot change the factual basis of its complaint. *BRC Rubber & Plastics, Inc. v. Cont'l Carbon Co., 900 F.3d 529, 541 (7th Cir. 2018)*. "Such an alteration would be an unacceptable attempt to amend the pleadings through summary judgment argument." *Id.* (internal quotation marks and citation omitted). Where a party raises a new argument in the course of summary judgment briefing that changes the factual theory set forth in the complaint, a "district court has discretion to deny the *de facto* amendment and to refuse to consider the new factual claims." *Id. at 540* (citation omitted). In exercising that discretion, "the court should consider the consequences of allowing the plaintiff's new theory"; where the **[*55]** amendment would "cause unreasonable delay, or make it more costly or difficult to defend the suit, the district court can and should hold the plaintiff to [its] original theory." *Id.* (internal quotation marks and citation omitted).

CME contends that two sentences in the complaint sufficiently allege that the ICE Licensees infringed the SPAN mark during the term of the license agreements. In those sentences, CME alleges that it determined that the defendants infringed upon its trademark rights, Am. Compl., dkt. no. 69, ¶ 39, and that it had previously contacted or communicated with the ICE Licensees regarding their allegedly infringing uses of the SPAN mark, *id.* ¶ 88. Neither of these allegations nor, for that matter, any other portion of the complaint, contains well-pleaded facts supporting a claim of infringement by ICE Licensees during the terms of the license agreements.

CME also contends that two exhibits attached to its complaint—printouts from the ICE Licensees' websites, totaling over 130 pages, that mention "ICE SPAN" about a dozen times—make clear that CME was alleging infringement by the ICE Licensees during the terms of the license agreements. *See* Am. Compl., Ex. C, dkt. no. **[*56]** 69-2, at 59; *id.*, Ex. D, at 80, 82, 84, 89, 92, 95. The contents of documents attached to a complaint "become part of the complaint" when the plaintiff "references and relies upon" those documents to support its claim. *Williamson v. Curran, 714 F.3d 432, 436 (7th Cir. 2013)*. CME's exhibits do not support allegations of infringement during the terms of the license agreements. *See* Am. Compl., Ex. C, at 59; *id.*, Ex. D, at 80, 82, 84, 89, 92, 95. Rather, CME's complaint references the exhibits to support facts regarding the ICE Licensees' allegedly infringement uses of the SPAN mark *after* the termination of the license agreements, not before it. *See* Am. Compl. ¶¶ 45-60, 62. And the contents of the exhibits do not clearly relate to allegations of trademark violations during the license agreements' terms. Accordingly, CME's allegations that the ICE Licensees infringed the SPAN mark during the terms of the ICE License agreements constitute a *de facto* amendment to its complaint.

The Court concludes that amendment of CME's complaint to include a claim regarding infringement during the terms of the license agreements factual allegations would cause unreasonable delay and unreasonably increase this lawsuit's costs for the defendants, particularly **[*57]** in light of the substantial discovery the parties have completed (the Court notes that discovery relating to liability is closed). CME's arguments to the contrary fall flat. It contends that the new allegations would not cause an unreasonable delay or additional expenses because the ICE Licensees were aware of these allegations. Many of CME's citations in support of this proposition relate to the relevant time period addressed in discovery requests, which included periods during and before the parties signed the license agreements, as set out in various reports and motions the parties filed before the Court. *See, e.g.*, Joint Stipulation, dkt. no. 75, ¶ 5; Parties' Joint Report on Discovery, dkt. no. 76, at 3.[11] But the proposition that the relevant time period of discovery put the defendants on notice that CME was asserting a claim involving trademark violations during the term of the license agreements is too much of a stretch. Furthermore, other issues in the case, such as whether CME abandoned the trademark through naked licensing, involve facts from that same timeframe.

As further support for its contention that the defendants were aware of these allegations, CME cites motions, reports, **[*58]** and the defendants' statement of facts regarding the ICE Licensees' uses of the phrase "ICE SPAN" during the term of the agreements. *See, e.g.*, Defs.' *L.R. 56.1* Stmt., dkt. no. 188, ¶¶ 145-48, 193-94.[12] But again,

---

[11] CME has cited to six items on the docket in support of this proposition (as well as to six paragraphs in the defendants' *Local Rule 56.1* Statement of Facts that appear to provide support for a different proposition). The Court has cited to the only two relevant items that included pincites. CME also has cited to a nineteen-page motion for a protective order, dkt. no. 51, a five-page motion to compel a deposition, dkt. no. 101, an eleven-page memorandum in support of that motion, dkt. no. 104, and a six-page joint report on discovery, dkt. no. 170—all without pincites. None of the cited documents show that the defendants had notice of the new allegations.

because use of that phrase also relates to other issues in this case—such as whether CME engaged in naked licensing—these documents in no way suggest that the ICE Licensees had notice of these new claims.

For these reasons, the Court declines to approve CME's *de facto* amendment to the complaint. The Court therefore denies CME's motion for summary judgment. The Court disregards defendants' cross-motion for summary judgment regarding the trademark counterfeiting, trademark infringement, unfair competition, and parallel state law violations that CME alleges occurred during the term of the license agreements because "a party cannot obtain summary judgment on a matter not raised by the pleadings." *Roby v. Greenlee Textron, Inc., No. 94 C 50294, 1995 U.S. Dist. LEXIS 19234, 1995 WL 767819, at *5 (N.D. Ill. 1995)*; *see also* *Burks v. Wisconsin Dep't of Transp., 464 F.3d 744, 758 n.15 (7th Cir. 2006)*.[13]

3. Trademark infringement, unfair competition, and parallel state law after the termination of the license agreements

CME next argues that the ICE Licensees committed trademark violations after the termination of the license agreements. A licensee violates trademark law if it continues to use a trademark after the termination of a license agreement. *See* *Gorenstein Enters., Inc. v. Quality Care-USA, Inc., 874 F.2d 431, 435 (7th Cir. 1989)*. In their cross-motion for summary judgment, **[*59]** the defendants argue that CME has not met its burden to establish that any post-termination uses by the ICE Licensees created a likelihood of confusion. That is incorrect as a matter of law; the use of a trademark after a license agreement's termination by itself establishes a likelihood of confusion, subject to any applicable defenses. *See* *Burger King Corp. v. Mason, 710 F.2d 1480, 1493 (11th Cir. 1983)* ("[M]any courts have held that continued trademark use by one whose trademark license has been cancelled satisfies the likelihood of confusion test and constitutes trademark infringement."); *Ramada Franchise Sys., Inc. v. Royal Vale Hosp. of Cincinnati, Inc., No. 02 C 1941, 2005 U.S. Dist. LEXIS 8367, 2005 WL 435263, at *15 (N.D. Ill. Feb. 16, 2005)* (collecting cases).

It is undisputed that the ICE Licensees used the SPAN mark after the termination of the license agreements. Specifically, as indicated, ICE Clear US continued to use the phrase "SPAN® Margin Model" in connection with its risk management services, ICE Clear Europe continued to use the word "SPAN" in connection with its services, and both ICE Licensees continued to place disclosures on their materials stating that the SPAN mark was a registered trademark of CME being used pursuant to a license. Pl.'s *L.R. 56.1* Stmt., dkt. no. 188, ¶¶ 59-62, 92, 193.

To the extent the defendants suggest that there is no likelihood of confusion between their uses of the **[*60]** phrase "SPAN for ICE" and the SPAN mark, that argument is unavailing. A viewer of the "SPAN for ICE" phrase "would be likely to associate" SPAN's risk management services with CME's risk management services; no reasonable jury could find otherwise. *See* *AutoZone, Inc. v. Strick, 543 F.3d 923, 930 (7th Cir. 2008)* (explaining factors courts consider in addressing the likelihood of confusion); *see* *CAE, 267 F.3d at 678, 682* (finding that marks were indistinguishable where both parties used them in combination with the names of the their departments).[14] In particular, a reasonable jury would be required to find that participants in the financial risk services markets likely would confuse the phrase "SPAN for ICE" with the SPAN mark when the ICE Licensees used the phrase in connection with their risk management services, especially because they indicated that they had licenses from CME to use the mark, had held such licenses in the past, and offered similar products to the same market. *See* *id. at 677-87* (analyzing likelihood of confusion between two similar marks and affirming district court's grant of summary

---

[12] In support of this proposition, the defendants also have cited to six documents described in the previous footnote. Again, none of these documents supports the defendants' contention that the ICE Licensees had notice of the new claims.

[13] Accordingly, the Court need not address the argument (raised only in the defendants' reply brief) that these claims are barred by the doctrine of laches.

[14] Courts generally consider seven factors in addressing a likelihood of confusion. *AutoZone, 543 F.3d at 929*. Because the parties do not address the seven factors, the Court need not address each factor in detail. Regardless, a discussion of all of the factors would lead to the same outcome.

judgment on that point). And, regardless, as indicated, there is evidence that the ICE Licensees used the SPAN mark in contexts separate from their uses of the phrase "SPAN for ICE." **[*61]**

Therefore, the Court grants CME's motion for summary judgment, and denies the defendants' cross-motion, on the question of liability on CME's claims of trademark infringement, unfair competition, and parallel state law violations relating to defendants' continued use of the marks following termination of the licenses.

4. Counterfeiting after the termination of the license agreements

The Court turns next to CME's trademark counterfeiting claim as it relates to the post-termination period. Though CME has asserted this claim against all of the defendants, it has moved for summary judgment only against the ICE Licensees. The defendants have all cross-moved for summary judgment on this claim.

The Lanham Act forbids the use of "any reproduction, counterfeit, copy, or colorable imitation of a registered mark in connection with the sale . . . of any goods or services [where] such use is likely to cause confusion . . . or to deceive." *15 U.S.C. § 1114(1)(a)*. It defines a counterfeit mark as "a spurious mark which is identical with, or substantially indistinguishable from, a registered mark." *Id.* *§ 1127*; *see also* McCarthy, *supra*, § 25:10 ("Counterfeiting is the act of producing or selling a product with a sham trademark that is an intentional and **[*62]** calculated reproduction of the genuine trademark.").

CME argues that the ICE Licensees engaged in counterfeiting by using the SPAN mark after the license agreements' termination for services that were identical to those covered by the trademark. The defendants contend that they did not engage in counterfeiting because the ICE Licensees identified themselves as the originators of the initial margin services they offered and because they did not use marks that were identical to or substantially indistinguishable from the SPAN mark.

Courts disagree on whether the continued use of a mark by a holdover licensee constitutes counterfeiting. *Id.; compare* *U.S. Structures, Inc. v. J.P. Structures, Inc., 130 F.3d 1185, 1192 (6th Cir. 1997)* (holdover franchisee's continued use of a trademark is not counterfeiting) *with* *State of Idaho Potato Comm'n v. G & T Terminal Packaging, Inc., 425 F.3d 708, 722 (9th Cir. 2005)* (holdover licensee's continued use of a certification mark constitutes counterfeiting where there is a likelihood of confusion and the mark owner cannot exercise quality control). The Seventh Circuit has not directly addressed the issue, but it has stated that the aim of the Lanham Act's counterfeiting provision is to prohibit the use of a trademark on an unauthorized product, not merely to prohibit literal counterfeiting through reproductions or imitations that **[*63]** deceive customers about the source of a product. *See* *Gen. Elec. Co. v. Speicher, 877 F.2d 531, 534 (7th Cir. 1989)*; *see also* *Century 21 Real Estate, LLC v. Destiny Real Estate Props., No. 4:11-CV-38 JD, 2011 U.S. Dist. LEXIS 147075, 2011 WL 6736060, at *5 (N.D. Ind. Dec. 19, 2011)* (finding that the Seventh Circuit's reasoning in *Speicher* suggests that ex-franchisee's continued use of a mark constitutes counterfeiting). The district court in *Century 21* reasoned that an ex-franchisee's continued use of a mark implicates the purposes underlying the counterfeiting provision—avoiding public confusion and safeguarding the value of trademark—because it increases the likelihood that customers will be confused regarding the genuineness of a product. *See* *id.*

The Court finds the reasoning in *Century 21* persuasive. A reasonable jury could find that that the defendants' continued use of the SPAN mark indicated that the ICE Licensees used the SPAN framework to calculate initial margins, which constitutes counterfeiting because it entails the unauthorized use of CME's mark.

But a reasonable jury would not be *required* to reach that conclusion. Marks may not be identical with or substantially distinguishable from each other, as necessary for counterfeiting, where they have general similarities **[*64]** but also have "minor differences that would not be apparent to the typical consumer." *AstraZeneca AB v. Dr. Reddy's Labs., Inc., 209 F. Supp. 3d 744, 755 (D. Del. 2016)* (denying motion for judgment on the pleadings regarding whether a pill was a counterfeit because there was a disputed question of fact regarding whether an average consumer would distinguish the defendant's generic two-toned purple pills from the plaintiff's single-tone purple pills); *see also* *Coach, Inc. v. Citi Trends, Inc., No. CV 17-4775-DMG (KSX), 2019 U.S. Dist.*

LEXIS 76417, 2019 WL 1940622, at *4 (C.D. Cal. Apr. 5, 2019) ("The fact that the designs [of the allegedly counterfeiting goods and the trademark holder's goods] are similar in a general sense, but different in several respects, prevents the Court from determining at [the summary judgment] stage that they are substantially indistinguishable."). And where the use of a mark does not deceive customers about its origin, even a mark that is identical or substantially indistinguishable from a trademark may not be a counterfeit. *See* GMA Accessories, Inc. v. BOP, LLC, 765 F. Supp. 2d 457, 472 (S.D.N.Y. 2011), *aff'd sub nom.* GMA Accessories, Inc. v. Elec. Wonderland, Inc., 558 F. App'x 116 (2d Cir. 2014) (granting summary judgment for defendants on a counterfeiting claim where there was no evidence that they deceptively suggested their products came from "an erroneous origin").

In this case, at least some of the defendants' allegedly counterfeiting uses of the SPAN mark entailed **[*65]** non-identical marks such as the phrase "SPAN for ICE." A reasonable jury could find that, due to these differences, the defendants' allegedly counterfeiting uses were not identical to or substantially indistinguishable from the SPAN mark. And the defendants used the allegedly counterfeiting mark in connection with their own clearinghouses. Given that context, a reasonable jury could find that traders or other relevant actors in the financial risk services market would not have been deceived about the mark's origin. Accordingly, there is a genuine factual dispute regarding whether the defendants engaged in counterfeiting. Therefore, the Court denies CME's motion and the defendants' cross-motion for summary judgment on the counterfeiting claim.

C. Breach of contract

Both sides have moved for summary judgment on CME's breach of contract claim, which CME has asserted against only the ICE Licensees.[15] Under Illinois law, which governs the license agreements, a plaintiff asserting a breach of contract claim must prove four elements: (1) the existence of a valid and enforceable contract; (2) performance by the plaintiff; (3) breach by the defendant; and (4) injury to the plaintiff. Hess v. Bresney, 784 F.3d 1154, 1158-59 (7th Cir. 2015) (Illinois **[*66]** law). The parties dispute only the third element.

The parties' arguments regarding breach of contract mirror their arguments with respect to the trademark claims. CME argues that the ICE Licensees breached the license agreements by using "ICE SPAN" during the term of the agreements and by continuing to use the SPAN mark after their termination. The ICE Licensees argue that CME has not properly asserted a claim for breach of contract during the term of the agreements and that CME has not established that any post-termination uses constituted a breach.

As indicated, CME's assertion in its summary judgment motion that the ICE Licensees breached the license agreements by using "ICE SPAN" during the term of the agreements amounts to a *de facto* amendment to the complaint. For the reasons previously stated, the Court declines to permit the amendment, denies CME's motion for summary judgment on the breach of contract claim as it pertains to claimed breaches during the agreements' terms, and declines to address the ICE Licensees' cross-motion for summary judgment on that issue.

The Court also concludes that CME is not entitled to summary judgment on its claim that the ICE Licensees breached the license agreements following their termination. The ICE Licensees agreed that **[*67]** following termination, they would "not . . . use any mark that is confusingly similar to the SPAN Mark in connection with any other margining system or similar risk calculation." Pls.' L.R. 56.1 Stmt., Ex. 1, dkt. no. 165-3, ¶ 5(a). The agreements do not define "confusingly similar." In its briefs, CME makes a summary argument that the phrase "SPAN for ICE" is confusingly similar to the SPAN mark, but it offers no definition of "confusingly similar" and points to no evidence showing why the phrase "SPAN for ICE" is confusingly similar to the SPAN mark. This is insufficient to "demonstrate the absence of a genuine issue of material fact," as CME must do to prevail on its motion for summary judgment. *See* Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986).

---

[15] Although ICE has moved for summary judgment on the breach of contract claim, the motion is misplaced because CME did not allege in its complaint that ICE breached a contract.

Nor are the ICE Licensees entitled to summary judgment on the breach of contract issue for breaches following the licenses' terminations. In arguing that they did not breach the license agreements post-termination, the ICE Licensees contend that CME has put forth no evidence of actual or likely confusion by market participants. But they have made no effort to show or explain why that is the appropriate standard for breach of the contract. Nor have they pointed to evidence showing why its marks **[*68]** are not confusingly similar to the SPAN mark. Thus the ICE Licensees are not entitled to summary judgment on the breach of contract claim either.

Conclusion

For the foregoing reasons, the Court grants CME's motion for summary judgment [dkt. no. 165] on counts 2, 3, 5, and 6 against the ICE Licensees on the question of liability, to the extent those claims concern violations that occurred after the termination of the license agreements. The Court also grants summary judgment for CME on the defendants' trademark misuse defense, the ICE Licensees' fair use defense, and the ICE Licensees' defenses of acquiescence for trademark violations occurring after February 23, 2018. The Court denies CME's motion for summary judgment on counts 1 and 4; on counts 2, 3, 5, and 6 to the extent those claims concern violations that occurred during the term of the licenses; and against the ICE Licensees' defense of acquiescence for violations occurring before February 23, 2018.

The Court denies the defendants' cross-motion for summary judgment [dkt. no. 179] on their counterclaims relating to genericness and abandonment through naked licensing. The Court also denies the defendants' cross-motion on counts 2, 3, **[*69]** 5, and 6 against the ICE Licensees to the extent those claims concern violations that occurred after the termination of the license agreements and on counts 1 and 4. The Court denies the defendants' motion for summary judgment on their trademark misuse defense and their defense of estoppel by implied licenses. The Court disregards the defendants' cross-motion for summary judgment on counts 2 through 6 to the extent those claims concern violations that occurred during the term of the licenses, based on the Court's finding that CME did not plead facts supporting violations during that timeframe.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] **Entitlement as Matter of Law, Appropriateness**

A motion for summary judgment is a procedural device used when there is no genuine issue of material fact for all or part of the relief prayed for by a litigant. A summary judgment is reviewed on appeal de novo, with the appellate court using the same criteria that govern the trial court's determination of whether summary judgment is appropriate; i.e., whether there is any genuine issue of material fact, and whether the movant is entitled to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN2[] Burdens of Proof, Movant Persuasion & Proof

On summary judgment. the burden of proof rests with the mover. *La. Code Civ. Proc. Ann. art. 966(D)(1)*. When the mover will bear the burden of proof at trial, the mover has the burden of showing that no genuine issue of material fact remains. Only when the mover makes this showing does the burden shift to the opposing party to present evidence demonstrating a material factual issue remains. If, however, the mover does not resolve all material issues of fact, the burden never shifts to the opposing party. In that situation, the opposing party has nothing to prove in response to the motion for summary judgment, and summary judgment should be denied.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN3[] Burdens of Proof, Movant Persuasion & Proof

If the mover will not bear the burden of proof at trial on the issue raised in the motion, the mover's burden on the motion does not require it to negate all essential elements of the adverse party's claim, action, or defense, but rather to point out to the court the absence of factual support for one or more elements essential to the adverse party's claim, action, or defense. Thereafter, the burden is on the adverse party to produce factual support sufficient to establish the existence of a genuine issue of material fact or that the mover is not entitled to judgment as a matter of law. *La. Code Civ. Proc. Ann. art. 966(D)(1)*. Because it is the applicable substantive law that determines materiality, whether a particular fact in dispute is material can only be seen in light of the substantive law applicable to the case.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Antitrust & Trade Law > Sherman Act

HN4[] Regulated Practices, Price Fixing & Restraints of Trade

La. Rev. Stat. Ann. § 51:122(A) provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce in this state is illegal. This statute is virtually identical to *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1 et seq.*, and federal analysis of the Sherman Antitrust Act is persuasive, though not controlling. The Louisiana statute applies to intrastate commerce, whereas the Sherman Antitrust Act applies to interstate commerce and foreign trade. *La. Rev. Stat. Ann. §§ 51:121*, *51:122*. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN5[] Regulated Practices, Price Fixing & Restraints of Trade

The federal and state antitrust laws were intended to be sweeping in breadth, encompassing every conspiracy, contract, or combination that restrains trade. Not every business arrangement that restrains trade in some manner is illegal, however. Rather, *La. Rev. Stat. Ann. § 51:122* has been interpreted to prohibit only those agreements or conspiracies that unreasonably restrain trade. Thus, to establish an antitrust violation, a plaintiff must show both the existence of a conspiracy to restrain trade and that the intended restraint on trade is unreasonable.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

As to the existence of an agreement to restrain trade, the plain language of *La. Rev. Stat. Ann. § 51:122* requires a plurality of actors. A contract, a combination, and a conspiracy each suggests the participation of more than one person or entity. In determining whether the restraint of trade is unreasonable, three methods or modes of analysis have been developed for evaluating the reasonableness of a restraint on trade: the rule-of-reason analysis, the per se analysis, and the quick look analysis.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN7[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The rule-of-reason analysis, which is used to analyze the reasonableness of most trade-restraining agreements, requires the factfinder to determine whether the questioned practice imposes an unreasonable restraint on competition by considering a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Unlike the rule-of-reason analysis, the per se analysis does not allow inquiry into the intent behind the restraint, its procompetitive justifications, or its actual effect on competition. Instead, where a restraint is deemed per se unreasonable, a conclusive presumption of illegality applies.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Evidence > Burdens of Proof > Burden Shifting

HN9[] **Regulated Practices, Price Fixing & Restraints of Trade**

A third method of analyzing whether a conspiracy is unreasonable is the abbreviated quick look analysis under the rule of reason, which is applied when an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets. The quick-look approach does not require an elaborate industry analysis. Rather, when the restraint is not per se unreasonable, but the likelihood of anticompetitive effects is obvious, the proponent of the restraint must show some competitive justification for it. Thus, once the restraint is deemed facially anticompetitive, the burden shifts to its proponent for justification on procompetitive grounds.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN10[] **Regulated Practices, Price Fixing & Restraints of Trade**

As a general rule, horizontal agreements, those involving coordination between competitors at the same level of a market structure, are considered to be per se unreasonable, whereas vertical agreements, created between parties at different levels of a market structure, are analyzed under the rule-of-reason analysis.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > State Regulation

HN11[] Actual Monopolization, Monopoly Power

La. Rev. Stat. Ann. § 51:123 provides, in part, that no person shall monopolize, or attempt to monopolize, or combine, or conspire with any other person to monopolize any part of the trade or commerce within this state. As an economic matter, monopoly power exists where prices can be raised above the levels that would be charged in a competitive market. To establish a claim for monopoly, a plaintiff must establish that: (1) the defendant possessed monopoly power in a clearly defined economic and geographic region (the relevant market); and (2) the defendant had the specific purpose or intent to exercise or maintain that power, as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN12[] Actual Monopolization, Monopoly Power

Monopoly power is defined as the ability to control prices or to exclude competition from the market, and the relevant market is the area of effective competition within which the defendant operates. It includes a geographic market, which is the section of the country in which sellers of a particular product operate, as well as a product market, which encompasses the differences among various commodities and the willingness of buyers to substitute one product for another. Failure to define the market in which the monopoly is allegedly exercised is fatal to a monopolization claim.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judgments > Summary Judgment > Motions for Summary Judgment

Civil Procedure > Discovery & Disclosure > Discovery

HN13[] Standards of Review, Abuse of Discretion

The requirement in *La. Code Civ. Proc. Ann. art. 966(A)(3)* that a summary judgment should be considered only after "an opportunity for adequate discovery" has been construed to mean that there is no absolute right to delay action on a motion for summary judgment until discovery is complete; rather, the requirement is only that the parties have a fair opportunity to carry out discovery and to present their claim. Additionally, trial courts in Louisiana have broad discretion when regulating pre-trial discovery, which discretion will not be disturbed on appeal absent a clear showing of abuse.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN14[] Regulated Practices, Price Fixing & Restraints of Trade

To satisfy the elements of conspiracy, a plaintiff must show that the defendants engaged in concerted action, meaning a conscious commitment to a common scheme designed to achieve an unlawful objective. Moreover, to establish a per se unreasonable horizontal conspiracy, a plaintiff must establish that the conspiracy involved coordination between competitors at the same level of a market structure. Independent parallel conduct, or even conduct among competitors that is consciously parallel, does not alone establish the contract, combination, or conspiracy.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN15[] **Appellate Review, Standards of Review**

Because the court reviews summary judgments de novo, the court afford no deference to the trial court's underlying reasoning for its judgment.

Business & Corporate Law > Joint Ventures

HN16[] **Business & Corporate Law, Joint Ventures**

A joint venture has been defined as a special combination of two or more persons, where in some specific venture a profit is jointly sought without any actual partnership or corporate designation. Generally, the essential elements of a joint venture are the same as those of partnership, i.e., two or more parties combining their property, labor, skill, etc. In the conduct of a venture for joint profit, with each having some right of control. Thus, joint ventures are governed by the law of partnership and share the same requisites as follows: (1) a contract between two or more persons; (2) the establishment of a juridical entity or person; (3) contribution by all parties of either efforts or resources; (4) contribution in determinate proportions; (5) joint effort; (6) mutual risk vis-à-vis losses; and (7) a sharing of profits.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN17[] **Regulated Practices, Price Fixing & Restraints of Trade**

Not all common selling agency agreements violate antitrust laws. However, such an agreement does violate antitrust laws where it is used as a concerted action by two or more horizontal competitors to accomplish a purpose that could not be lawfully accomplished by a direct agreement among the participating producers.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

A hub-and-spoke conspiracy is one in which an entity at one level of the market structure, the hub, coordinates an agreement among competitors at a different level, the spokes. A traditional hub-and-spoke conspiracy has three elements: (1) a hub, such as a dominant purchaser; (2) spokes, such as competing manufacturers or distributors that enter into vertical agreements with the hub; and (3) the rim of the wheel, which consists of horizontal agreements among the spokes.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Evidence > Inferences & Presumptions > Inferences

HN19[] Regulated Practices, Price Fixing & Restraints of Trade

Where no direct evidence exists for the third element, a horizontal agreement among the spokes (or competitors), courts evaluate circumstantial evidence, called plus factors, to determine whether a plaintiff's evidence is more probative of conspiracy than of conscious parallel behavior. Plus factors are economic actions and outcomes that are largely inconsistent with unilateral conduct, but largely consistent with explicitly coordinated action. Accordingly, they may raise an inference of conspiracy. These plus factors include: (1) a common motive to conspire, (2) evidence showing that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, (3) evidence of a high level of interfirm communications, and (4) historically unprecedented changes in pricing structure made at the very same time by multiple competitors for no other discernible reason.

Antitrust & Trade Law > Regulated Practices

HN20[] Antitrust & Trade Law, Regulated Practices

With regard to antitrust injury, a plaintiff suffers an antitrust injury only if its loss is the type of loss that the claimed antitrust violation is likely to cause. Antitrust injury is defined as the type of injury that the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The requirement of an antitrust injury ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendants' behavior. A plaintiff must allege a causal connection between its alleged injury and the anticipated anticompetitive effect of the specific practice that allegedly violates ***antitrust law***.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal

HN21[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

A unilateral refusal to deal generally is not unlawful. However, a monopolist's refusal to deal becomes actionable under the antitrust laws where the refusal is designed to have an anticompetitive effect, whether to gain market share, to drive up prices, or to obtain some other illegal goal. Thus, monopolistic or other anticompetitive intent is the key factor in determining whether an antitrust violation has occurred.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN22[] Relevant Market, Geographic Market Definition

With regard to the relevant geographic market, the geographic element of the relevant market consists of the area in which sellers of the defendants' product operate and to which buyers can practicably turn to obtain that product. Thus, the issue of geographic market is also a fact-intensive inquiry.

Opinion by: CHUTZ

Opinion

[*443] [Pg 3] **CHUTZ, J**.

In this antitrust litigation, all parties appeal the trial court's judgment, which granted defendants' motions for partial summary judgment on the issue of plaintiff's *per se* antitrust claims under *La. R.S. 51:122* and dismissed those claims with prejudice, denied defendants' motions for partial summary judgment as to plaintiff's **[**2]** antitrust monopoly claim under *La. R.S. 51:123* and plaintiff's conversion claims, and denied plaintiff's motion for partial summary judgment on the issues of the antitrust mode of analysis and joint venture. For the following reasons, we affirm.

FACTUAL BACKGROUND

In Louisiana, there are three primary power companies operating coal-burning power plants: Entergy Gulf States, Inc. (Entergy), which operates the Nelson Power Station in Westlake, Louisiana; Cleco Power, LLC (Cleco), which owns and operates the Rodemacher Power Station **[*444]** near Boyce, Louisiana, Dolet Hills Power Station near Mansfield, Louisiana, and the Madison 3 Unit in Lena, Louisiana; and Louisiana Generating, LLC (LaGen), a subsidiary of NRG Energy, Inc. (NRG) and the majority owner and operator of the Big Cajun II fossil fuel steam-generating plant in New Roads, Louisiana.

As a result of burning coal, these plants produce byproducts called coal combustion products (CCPs). These CCPs include fly ash, bottom ash, and economizer ash. These CCPs are marketable for different uses depending on their characteristics. C-618 fly ash, a powdered fly ash that has never been hydrated, can be used in the concrete industry as a replacement for cement. **[**3]** When fly ash is exposed to water (hydrated), it hardens, and the resulting hydrated fly ash can be used as an aggregate in applications such as soil stabilization and the formation of roadbeds.

[Pg 4] The Nelson, Rodemacher, and Dolet Hills Power Stations and Big Cajun II produce C-618 fly ash. The Madison 3 Unit, which is a circulating fluidized bed (CFB) plant, produces a different type of ash other than that used in the concrete industry.

The normal coal-burning process used to generate electricity requires that CCPs be removed as they accumulate. Thus, coal-burning plants will contract with third parties for the removal and marketing, or, if not sold, the storage, of the CCPs they produce. As such, Entergy, Cleco, and LaGen have entered into marketing agreements for the removal, marketing, sale, and storage if necessary of CCPs on their plant sites.

With regard to Big Cajun II, Big River Industries, Inc. (Big River) held an exclusive marketing agreement for the removal, marketing, sale, and, if not sold, storage of CCPs produced at Big Cajun II for many years when Big Cajun II was owned and operated by Cajun Electric Power Cooperative, Inc. (Cajun Electric). Similarly, after LaGen **[**4]** became the owner and operator of Big Cajun II in 2000, LaGen entered into an Exclusive Marketing Agreement with Big River.

The agreement between LaGen and Big River was amended several times over the years. The last contract executed between LaGen and Big River, a January 29, 2009 Exclusive Marketing Agreement, provided that Big River was granted the "total responsibility for identification of uses, promotion, sales and delivery of Fly Ash, Bottom Ash, and other CCPs" produced at Big Cajun II (the LaGen/Big River Agreement). Moreover, Big River was also responsible for transporting all non-marketed CCPs from the area where they were temporarily placed by LaGen to LaGen's onsite ash storage pond and to manage those stockpiled CCPs. Big River was compensated based on a contractually established percentage of gross sales less transportation costs for the various forms of CCPs, with Big River guaranteeing the sale of a certain quantity of CCPs each year. Pursuant to the [Pg 5] LaGen/Big River Agreement, Big River was required to make a guaranteed per-ton payment for any shortfall in the guaranteed sales quantities of CCPs.

Meanwhile, at the time when Big Cajun II was still owned and operated **[**5]** by Cajun Electric, Big River began to experience a problem with an overabundance of hydrated ash on the Big Cajun II premises. Thus, on August 1, 1998, Big River entered into an agreement, the term of which was extended over the years, with plaintiff, John River Cartage, Inc. (JRC) to address the excess ash not sold to the outside market (the JRC/Big River Agreement).

Pursuant to the JRC/Big River Agreement, JRC agreed to purchase and to remove **[*445]** a specified minimum tonnage of hydrated fly ash and bottom ash at a price set forth therein. JRC was responsible for all costs associated with the recovery, loading, processing, and transportation of the hydrated fly ash and bottom ash from the ash disposal ponds onsite. JRC also agreed to purchase excess powdered fly ash at a higher set price.

The JRC/Big River Agreement further acknowledged that Big River held the exclusive marketing agreement for the marketing and sale of all fly ash and bottom ash produced from the Big Cajun II operations and that the JRC/Big River Agreement was made "expressly subject to the terms and conditions" of the LaGen/Big River Agreement. Further, JRC acknowledged that the LaGen/Big River Agreement could be amended **[**6]** "without prior notice or the consent of" JRC.

As a result of the JRC/Big River Agreement, JRC set up equipment on the Big Cajun II plant site and began the removal of the hydrated fly ash and bottom ash, which it processed into its product called "Grey Stone." Grey Stone is an aggregate material, manufactured with fly ash, black bottom ash, brown bottom ash, and water, which JRC marketed and sold for use in roadbeds and erosion control projects. As JRC produced its Grey Stone product, it stockpiled the product on the Big Cajun II site until such time that the material was sold and [Pg 6] transported off the premises. Pursuant to the JRC/Big River Agreement, JRC made payment of the contractual sum for the CCPs utilized when the product left the Big Cajun II premises. JRC also on occasion sold excess powdered fly ash within the state of Louisiana, but could do so only with Big River's express permission.

On January 20, 2011, LaGen entered into an Exclusive Marketing Agreement with Headwaters Resources, Inc. (HRI) for the marketing, sale, and delivery of CCPs produced at Big Cajun II (the LaGen/HRI Agreement). LaGen and Big River then agreed that the LaGen/Big River Agreement terminated **[**7]** effective January 21, 2011, and LaGen gave Big River thirty days from that date to remove its property and equipment from the site.

Big River then notified JRC that Big River had lost its contract with LaGen and, thus, JRC needed to remove all of its equipment from the Big Cajun II site. JRC removed its equipment but was not able to remove the stockpiled Grey Stone.

At the time LaGen awarded HRI the LaGen/HRI Agreement for Big Cajun II in 2011, HRI also held exclusive marketing agreements with Entergy for the Nelson Power Station and with Cleco for the Rodemacher and Dolet Hills Power Stations, and the Madison 3 Unit. Thus, HRI was the exclusive marketing agent of all sources of C-618 fly ash produced in Louisiana from 2011 until 2014.[1] Once HRI took over the exclusive marketing agreement for Big Cajun II in 2011, there was an initiative by HRI to increase fly ash prices previously paid by former Big River customers to a level HRI considered to be the "competitive price."

Following the termination of the LaGen/Big River Agreement and the resulting termination of the JRC/Big River Agreement, JRC could not sustain its business and eventually ceased all business operations.

[Pg 7] **PROCEDURAL [**8] HISTORY**

---

[1] In 2014, HRI's competitor, Charah, became the exclusive marketing agent for the Rodemacher Power Station and Madison 3 Unit.

On January 26, 2012, JRC filed a petition seeking damages from HRI and NRG **[*446]** and LaGen (hereinafter collectively referred to as NRG/LaGen).[2] JRC filed several amending petitions, ultimately filing a First Amended Master Petition for Damages, wherein JRC sought compensatory and treble damages from HRI and NRG/LaGen due to their alleged: (1) wrongful conversion and conspiracy to commit conversion of JRC's stockpiled inventory of Grey Stone; (2) violations of the *Louisiana Unfair Trade Practices and Consumer Protection Law ("LUTPA"), La. R.S. 51:1401, et seq.*; and (3) violations of Louisiana's ***antitrust law***, including a conspiracy to restrain trade by fixing prices of C-618 fly ash marketed in Louisiana in violation of *La. R.S. 51:122*, and a conspiracy to monopolize the C-618 fly ash market in Louisiana in violation of *La. R.S. 51:123*.[3]

With regard to its antitrust claims, JRC alleged that HRI and Cleco, Entergy, and NRG/LaGen had entered into a horizontal conspiracy in restraint of trade. First, it alleged that HRI, as the common and exclusive marketing agent for Cleco, Entergy, and NRG/LaGen, operated a hub-and-spoke conspiracy on behalf of these power companies by setting uniform prices, taking orders, and allocating customers and **[**9]** production territory for coal ash they produced. Additionally, JRC averred that Cleco, Entergy, and NRG/LaGen knew or should have known that HRI was simultaneously representing their collective competitive business interests from 2011 through 2014. Thus, JRC alleged that a *per se* illegal [Pg 8] horizontal price-fixing agreement could be inferred from the parallel behavior of these various entities.[4]

Alternatively, JRC alleged that HRI and NRG/LaGen entered into a vertical price-fixing conspiracy when they executed the LaGen/HRI Agreement. With regard to this alleged conspiracy, JRC alternatively alleged that this vertical price-fixing conspiracy was subject to the *per se* mode of analysis, the "quick look" approach, or the full rule-of-reason analysis.

With regard to its monopoly claims, JRC averred that HRI and NRG officials conspired to create the monopoly that HRI ultimately exerted following the LaGen/HRI Agreement and that they conspired to monopolize and did monopolize the C-618 fly ash market in violation of *La. R.S. 51:123*.

JRC further alleged that HRI and NRG/LaGen were solidarily liable for JRC's damages resulting from their concerted and collective actions, which constituted intentional and **[**10]** willful acts.

JRC filed a motion for partial summary judgment on the issues of *per se* antitrust mode of analysis and joint venture, seeking a declaration that: (1) I-MI had entered into joint venture agreements with Cleco, Entergy, and NRG/LaGen; and/or (2) the *per se* antitrust mode of analysis was applicable to this matter.[5]

---

[2] JRC referred to NRG and LaGen collectively in its First Amended Master Petition, and NRG and LaGen together filed pleadings below and in this appeal.

[3] In previous petitions, JRC had contended that HRI and NRG/LaGen had attempted to restrain trade and monopolize "the CCP market" or the market for "CCPs and related products." However, in its First Amended Master Petition for Damages, it more narrowly contended that these defendants had engaged in antitrust violations with regard to "Louisiana's C-618 fly ash industry."

[4] As noted by the trial court in its written reasons for judgment, neither Cleco nor Entergy are parties to this litigation.

[5] JRC's motion for partial summary judgment was actually filed prior to the filing of its First Amended Master Petition for Damages. The motion was scheduled for hearing together with exceptions of no cause of action filed by HRI and NRG/LaGen with regard to JRC's previous "Master Petition for Damages." Following that hearing, the trial court sustained the exceptions of no cause of action related to all of JRC's antitrust claims under *La. R.S. 51:122* and *51:123*, dismissing those claims without prejudice, subject to JRC's right to amend within thirty days. Accordingly, it also denied as moot JRC's motion for partial summary judgment. JRC then filed its First Amended Master Petition for Damages, and HRI and NRG/LaGen again filed exceptions of no cause of action.

However, on appeal of the trial court's subsequent judgment sustaining those exceptions of no cause of action and dismissing JRC's antitrust claims with prejudice, this court reversed the judgment sustaining the exceptions of no cause of action and also vacated the earlier judgment denying JRC's motion for partial summary judgment as moot. In doing so, this court noted that because the trial court's rulings with respect to the exceptions of no cause of action had been reversed, JRC's motion for partial summary judgment on the issues of *per se* antitrust mode of analysis and joint venture was "ripe for judicial determination."

[*447] [Pg 9] Defendant HRI also filed a motion for partial summary judgment, seeking dismissal of JRC's antitrust claims under both *La. R.S. 51:122* and *51:123*.[6] In support of its motion, HRI contended that it was entitled to dismissal of JRC's antitrust claims against it as follows: (1) JRC could not establish antitrust injury because its alleged injuries did not flow from the claimed anticompetitive conduct; (2) Hill's alleged conduct was subject to the rule of reason because JRC has identified nothing more than a series of vertical agreements; and (3) JRC's rule of reason and monopoly claims fail because the market alleged by JRC—the 50-mile radius extending from Big Cajun II—was not the relevant market.

Likewise, NRG/LaGen filed a motion for partial summary judgment, seeking dismissal of JRC's antitrust claims, averring that those claims should be dismissed because: (1) **[**11]** JRC had not suffered an antitrust injury; and (2) even if JRC could establish an antitrust injury, it had not alleged and could not prove a horizontal conspiracy between NRG, LaGen, and HRI or any agreement among those parties to restrain trade.[7]

Following a hearing on the motions, the trial court, by judgment dated December 4, 2019, denied JRC's motion for partial summary judgment; granted in part HRI's and NRG/LaGen's motions for summary judgment as to JRC's *per se* antitrust claims under *La. R.S. 51:122*; and denied in part those motions as to [Pg 10] JRC's monopoly claim under *La. R.S. 51:123*.[8]

JRC appealed the trial court's December 4, 2019 judgment, challenging, through **[*448]** six assignments of error, those portions of the judgment denying its motion for partial summary judgment and granting HRI's and NRG/LaGen's motions for partial summary judgment as to JRC's *per se* antitrust claims, dismissing those claims with prejudice.[9] HRI and NRG/LaGen also appealed the trial court's December 4, 2019 judgment, each contending through two assignments of error that the trial court erred in denying their motions for partial summary judgment as to JRC's monopoly claims.

LEGAL PRECEPTS

Summary Judgment

HN1[] A motion for summary judgment **[**12]** is a procedural device used when there is no genuine issue of material fact for all or part of the relief prayed for by a litigant. A summary judgment is reviewed on appeal *de novo*, with the appellate court using the same criteria that govern the trial court's determination of whether summary

---

Thus, this court remanded the matter with instructions that the trial court "consider and rule on JRC's motion for partial summary judgment." ***John River Cartage, Inc. v. Louisiana Generating, LLC****, 2018-1611 (La. App. 1st Cir. 12/19/18), 2018 La. App. Unpub. LEXIS 381, 2018 WL 6629472 *6* (unpublished), writs denied, ***2019-0122, 2019-0111 (La. 4/15/19), 267 So. 3d 1122***, ***267 So. 3d 1129***.

On remand, JRC moved to reset its motion for partial summary judgment.

[6] Defendants HRI and NRG/LaGen also filed motions for partial summary judgment, seeking dismissal of JRC's conversion and conspiracy to commit conversion claims, contending that JRC could not establish that it owned the Grey Stone product it accused them of converting.

[7] In its memorandum in support of its motion, NRG/LaGen further stated that it joined in HRI's motion for partial summary judgment as to JRC's antitrust claims and adopted HRI's arguments.

[8] As to HRI's and NRG/LaGen's motions for partial summary judgment seeking dismissal of JRC's conversion claims, in its written reasons, the trial court found that genuine issues of material fact remained as to those claims. Accordingly, in its December 4, 2019 judgment, the trial court also denied those motions. Neither HRI nor NRG/LaGen has appealed that portion of the judgment, and, thus, the conversion claims are not before us.

[9] As set forth in *La. R.S. 51:135*, all interlocutory judgments in cases involving antitrust claims shall be appealable within five days and shall be heard and determined within twenty days after the appeal is lodged.

judgment is appropriate; i.e., whether there is any genuine issue of material fact, and whether the movant is entitled to judgment as a matter of law. ***Beer Indus. League of Louisiana v. City of New Orleans**, 2018-0280 (La. 6/27/18), 251 So. 3d 380, 385-86*.

HN2[] The burden of proof rests with the mover. *La. C.C.P. art. 966(D)(1)*. When the mover will bear the burden of proof at trial, the mover has the burden of showing that no genuine issue of material fact remains. Only when the mover makes this showing does the burden shift to the opposing party to present evidence [Pg 11] demonstrating a material factual issue remains. ***Action Oilfield Services, Inc. v. Energy Management Company**, 2018-1146 (La. App. 1st Cir. 4/17/19), 276 So. 3d 538, 541-542*. If, however, the mover does not resolve all material issues of fact, the burden never shifts to the opposing party. In that situation, the opposing party has nothing to prove in response to the motion for summary judgment, and summary judgment should be denied. See ***Hat's Equipment, Inc. v. WHM, L.L.C.**, 2011-1982 (La. App. 1st Cir. 5/4/12), 92 So. 3d 1072, 1076*.

HN3[] Nevertheless, if the mover will not bear the burden of proof at trial on the issue raised in the motion, the mover's burden on the motion does **[**13]** not require it to negate all essential elements of the adverse party's claim, action, or defense, but rather to point out to the court the absence of factual support for one or more elements essential to the adverse party's claim, action, or defense. Thereafter, the burden is on the adverse party to produce factual support sufficient to establish the existence of a genuine issue of material fact or that the mover is not entitled to judgment as a matter of law. *La. C.C.P. art. 966(D)(1)*. Because it is the applicable substantive law that determines materiality, whether a particular fact in dispute is material can only be seen in light of the substantive law applicable to the case. ***Pumphrey v. Harris**, 2012-0405 (La. App. 1st Cir. 11/2/12), 111 So. 3d 86, 89*.

Conspiracy in Restraint of Trade Pursuant to *La. R.S. 51:122*

HN4[] *Louisiana Revised Statutes 51:122(A)* provides, "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce in this state is illegal." This statute is virtually identical to *Section 1 of the Sherman Antitrust Act*, *15 U.S.C. § 1, et seq.*, **[*449]** and federal analysis of the Sherman Antitrust Act is persuasive, though not controlling.[10] ***HPC Biologicals, [Pg 12] Inc. v. UnitedHealthcare of Louisiana, Inc.**, 2016-0585 (La. App. 1st Cir. 5/26/16), 194 So. 3d 784, 792-93*.

HN5[] The federal and state antitrust laws were intended to be sweeping in breadth, encompassing every conspiracy, contract, or combination that restrains **[**14]** trade. ***Louisiana Power & Light Co. v. United Gas Pipe Line Co.**, 493 So. 2d 1149, 1154-55 & n.12 (La. 1986)*. Not every business arrangement that restrains trade in some manner is illegal, however. Rather, *La. R.S. 51:122* has been interpreted to prohibit only those agreements or conspiracies that unreasonably restrain trade. See ***Reppond v. City of Denham Springs**, 572 So. 2d 224, 230 (La. App. 1st Cir. 1990)*, and ***Clary v. State Farm Mutual Automobile Ins. Co.**, 2016-168 (La. App. 3rd Cir. 11/23/16), 204 So. 3d 1102, 1113*, writs denied, *2017-0209, 2017-0197 (La. 2/15/17), 215 So. 3d 702*, *215 So. 3d 703*. Thus, to establish an antitrust violation, a plaintiff must show both the existence of a conspiracy to restrain trade *and* that the intended restraint on trade is unreasonable. See ***Nafrawi v. Hendrick Medical Center**, 676 F. Supp. 770, 774 (N.D. Tex. 1987)*.

HN6[] As to the existence of an agreement to restrain trade, the plain language of *La. R.S. 51:122* requires a plurality of actors. A "contract," a "combination," and a "conspiracy" each suggests the participation of more than one person or entity. ***Louisiana Power & Light Co.**, 493 So. 2d at 1155*. In determining whether the restraint of trade is unreasonable, three methods or modes of analysis have been developed for evaluating the reasonableness of a restraint on trade: the rule-of-reason analysis, the *per se* analysis, and the "quick look" analysis. ***Craftsmen Limousine, Inc. v. Ford Motor Co.**, 363 F.3d 761, 772 (8th Cir. 2004)*.

[10] The Louisiana statute applies to intrastate commerce, whereas the Sherman Antitrust Act applies to interstate commerce and foreign trade. See *La. R.S. 51:121*, *La. R.S. 51:122*, & *15 U.S.C. § 1*.

HN7[] The rule-of-reason analysis, which is used to analyze the reasonableness of most trade-restraining agreements, requires the factfinder to determine whether the questioned practice imposes an unreasonable restraint on competition by considering a variety of factors, including specific **[**15]** information about the relevant [Pg 13] business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect. ***State Oil Co. v. Khan****, 522 U.S. 3, 10, 118 S. Ct. 275, 279, 139 L. Ed. 2d 199 (1997)*.

HN8[] Unlike the rule-of-reason analysis, the *per se* analysis does not allow inquiry into the intent behind the restraint, its procompetitive justifications, or its actual effect on competition. Instead, where a restraint is deemed *per se* unreasonable, a conclusive presumption of illegality applies.[11] ***Craftsmen Limousine, Inc.****, 363 F.3d at 773*.

[*450] ***HN10***[] As a general rule, horizontal agreements, those involving coordination between competitors at the same level of a market structure, are considered to be *per se* unreasonable, whereas vertical agreements, created between parties at different levels of a market structure, are analyzed under the rule-of-reason analysis. ***Van Hoose v. Gravois****, 2011-0976 (La. App. 1st Cir. 7/7/11), 70 So. 3d 1017, 1022*.

Monopoly Pursuant to *La. R.S. 51:123*

HN11[] *Louisiana Revised Statutes 51:123* provides, in part, that "[n]o person shall monopolize, or attempt to monopolize, or combine, or conspire with any other person to monopolize any part of the trade or commerce within this state." As an economic matter, monopoly power exists where prices can be raised above the levels that would be charged in a competitive market. To establish a claim for monopoly, a plaintiff must establish **[**16]** that: (1) the defendant possessed monopoly [Pg 14] power in a clearly defined economic and geographic region (the relevant market); and (2) the defendant had the specific purpose or intent to exercise or maintain that power, as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. ***Plaquemine Marine, Inc. v. Mercury Marine****, 2003-1036 (La. App. 1st Cir. 7/25/03), 859 So. 2d 110, 119-20*.

HN12[] Monopoly power is defined as the ability to control prices or to exclude competition from the market, and the relevant market is the area of effective competition within which the defendant operates. ***Id.*** It includes a geographic market, which is the section of the country in which sellers of a particular product operate, as well as a product market, which encompasses the differences among various commodities and the willingness of buyers to substitute one product for another. Failure to define the market in which the monopoly is allegedly exercised is fatal to a monopolization claim. ***Id.**** at 120*.

DISCUSSION

From a review of the pleadings and memoranda filed herein, JRC's basic theories of antitrust violations can be summarized as follows. HRI, operating at the marketing and sales level of the Louisiana CCPs market, facilitated a scheme among Cleco, Entergy, **[**17]** and NRG/LaGen, competing producers of CCPs at the production level of the Louisiana CCPs market, to restrain trade within that market. This scheme was accomplished by first eliminating competition in the Louisiana CCPs market by replacing Big River, NRG/LaGen's prior exclusive marketing agent, with HRI, which already operated as the exclusive marketing agency for Cleco and Entergy. Thereafter, HRI,

---

[11] ***HN9***[] A third method of analyzing whether a conspiracy is unreasonable is the abbreviated "quick look" analysis under the rule of reason, which is applied when "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." ***California Dental Ass'n v. Fed. Trade Comm'n****, 526 U.S. 756, 770, 119 S. Ct. 1604, 1612, 143 L. Ed. 2d 935 (1999)*. The quick-look approach does not require an elaborate industry analysis. Rather, when the restraint is not *per se* unreasonable, but the likelihood of anticompetitive effects is obvious, the proponent of the restraint must show some competitive justification for it. Thus, once the restraint is deemed facially anticompetitive, the burden shifts to its proponent for justification on procompetitive grounds. ***Realcomp II, Ltd. v. Fed. Trade Comm'n****, 635 F.3d 815, 825 (6th Cir.)*, cert. denied, ***565 U.S. 942, 132 S. Ct. 400, 181 L. Ed. 2d 257 (2011)***.

operating as the common and exclusive sales agency for all three of these competing power companies, refused to deal with JRC by refusing to sell hydrated fly ash or excess powdered fly ash to JRC, thereby preventing JRC from continuing its production and sale of Grey [Pg 15] Stone in the secondary CCPs market. With Big River and JRC effectively removed from the Louisiana CCPs market, HRI, as the common and exclusive sales agency for Cleco, Entergy, and NRG/LaGen, and representing their collective business interests, stabilized Louisiana's CCPs market by imposing uniform price increases and controlling output.

JRC contends that this alleged conspiracy among HRI, Cleco, Entergy, and **[*451]** NRG/LaGen constitutes a horizontal restraint on trade that, under the *per se* antitrust mode of analysis, is **[**18]** deemed *per se* unreasonable in violation of *La. R.S. 51:122*. Alternatively, JRC alleges that the conspiracy in restraint of trade was a vertical price-fixing conspiracy between HRI and NRG/LaGen. Finally, JRC alleges that these actions constituted a conspiracy to monopolize in violation of *La. R.S. 51:123*.

The various motions for partial summary judgment addressed in the trial court's December 4, 2019 judgment focus on different aspects of these claims.

Denial of JRC's Motion for Partial Summary Judgment on the Issues of *Per Se* Antitrust Mode of Analysis and Joint Venture (JRC's Assignments of Error Nos. 1 and 6)

While JRC alternatively alleged in its First Amended Master Petition for Damages both a horizontal conspiracy and a vertical conspiracy in restraint of trade, in its motion for partial summary judgment, JRC focused on the horizontal conspiracy, seeking judgment declaring: (1) that MI had entered into joint venture agreements with Cleco, Entergy, and NRG/LaGen; and/or (2) that, given the law affecting joint venture, common and exclusive sales agency, or hub-and-spoke conspiracies, the *per se* antitrust mode of analysis was applicable to this matter.

In support of its motion, JRC alleged that when HRI entered **[**19]** into exclusive marketing agreements with Cleco, Entergy, and NRG/LaGen, MI entered into separate joint ventures for the sales of CCPs with each of these power companies. Additionally, it contended that the *per se* antitrust analysis applied to the alleged [Pg 16] conspiracy herein under three alternative theories: (1) HRI, as a common member of separate horizontally competing joint ventures with NRG/LaGen, Entergy, and Cleco, engaged in prohibited antitrust violations by fixing prices, allocating market territory, and refusing to deal with JRC on behalf of the three horizontal joint ventures; or (2) NRG/LaGen, Entergy, and Cleco delegated pricing, ordering, and production/market allocation to HRI as their common and exclusive sales agency, with the known and express purpose of fixing and stabilizing CCP commodity prices; or (3) HRI and NRG/LaGen, Entergy, and Cleco entered into a hub-and-spoke conspiracy by use of a common sales agency to carry out the unlawful scheme of fixing and stabilizing CCPs prices. JRC further averred that each of the three alternatively alleged arrangements between HRI and the power companies resulted in a horizontal restraint of trade, thus requiring application **[**20]** of the *per se* antitrust mode of analysis.

In denying JRC's motion, the trial court concluded in written reasons for judgment that JRC had failed to submit any factual support of a joint venture between HRI and Cleco, Entergy, or NRG/LaGen or of a horizontal conspiracy to restrain trade among these various entities. Thus, the court further reasoned that because JRC had failed to set forth facts to establish the existence of a conspiracy, there was no need to address the various theories alleged by JRC as requiring application of the *per se* antitrust mode of analysis.

On appeal, JRC contends in its sixth assignment of error that the trial court legally erred when it "defied" this court's instruction in the prior appeal in ***John River Cartage, Inc. v. Louisiana Generating, LLC****, 2018-1611 (La. App. 1st Cir. 12/19/18), 2018 La. App. Unpub. LEXIS 381, 2018 WL 6629472 at *6* (unpublished), writs denied, *2019-0122, 2019-0111 (La. 4/15/19), 267 So. 3d 1122*, *267 So. 3d 1129*, "by refusing to categorize the unlawful common selling **[*452]** agency alleged herein as a jurisprudentially recognized form of *per se* illegal horizontal agreement." However, as set forth in footnote 5 above, in [Pg 17] the prior appeal in this matter, this court, having reversed and vacated the trial court's rulings on defendants' exceptions of no cause of action, noted that JRC's motion for partial summary judgment, which the trial **[**21]** court had denied as moot, was "ripe for judicial determination." Thus, this court remanded the matter for the trial court to "consider and rule on JRC's motion for partial summary judgment,"

***John River Cartage, Inc.**, 2018 La. App. Unpub. LEXIS 381, 2018 WL 6629472 at *6*, which is precisely what the trial court did when it denied JRC's motion, finding that JRC had not proved its entitlement to summary judgment in its favor. Thus, we reject JRC's contention that the trial court defied any prior instruction in our prior decision.

Moreover, in light of our conclusion, as more fully discussed below, that the trial court properly dismissed JRC's *per se* antitrust claims on HRI's and NRG/LaGen's motions for partial summary judgment, we find it unnecessary to address JRC's contention in assignment of error number one that the trial court erred in failing to categorize the alleged unlawful common selling agency as a *per se* illegal horizontal agreement. Accordingly, we decline to address this issue and affirm the portion of the trial court's December 4, 2019 judgment denying JRC's motion for partial summary judgment.

Trial Court's Partial Grant of HRI's and NRG/LaGen's Motions for Partial Summary Judgment and Resulting Dismissal of JRC's *Per Se* Antitrust Claims under *La. R.S. 51:122* (JRC's [22] Assignments of Error Nos. 2, 3, 4 & 5)**

Next we turn to JRC's challenge to the portion of the trial court's judgment granting in part FIRI's and La/Gen's motions for partial summary judgment and dismissing JRC's *per se* antitrust claims. At the outset, we address JRC's contention that the trial court erred in deciding the issue of conspiracy on partial summary judgment where JRC had not been given a fair opportunity for discovery on this issue. ***HN13***[] The requirement in *La. C.C.P. art. 966(A)(3)* that a summary judgment should be considered only after "an opportunity for adequate discovery" [Pg 18] has been construed to mean that there is no absolute right to delay action on a motion for summary judgment until discovery is complete; rather, the requirement is only that the parties have a fair opportunity to carry out discovery and to present their claim. ***Primeaux v. Best Western Plus Houma Inn**, 2018-0841 (La. App. 1st Cir. 2/28/19), 274 So. 3d 20, 32*. Additionally, trial courts in Louisiana have broad discretion when regulating pre-trial discovery, which discretion will not be disturbed on appeal absent a clear showing of abuse. ***Id.***

We note that JRC's action has been pending since January of 2012. As early as September of 2015, JRC amended its petition to assert antitrust violations involving an alleged conspiracy **[**23]** in restraint of trade, again amending its petition in August of 2017, to allege that the horizontal conspiracy involved HRI, Cleco, Entergy, and NRG/LaGen. Moreover, HRI first sought dismissal of these antitrust claims in a motion for summary judgment it filed in February of 2017, thus affording JRC ample notice that this issue would be before the trial court. Accordingly, we find no clear abuse of the trial court's discretion in declining to delay ruling on this issue.

HN14[] Turning to the merits of this claim, to satisfy the elements of conspiracy, a plaintiff must show that the defendants engaged in concerted action, meaning **[*453]** a conscious commitment to a common scheme designed to achieve an unlawful objective. See ***HPC Biologicals, Inc.**, 194 So. 3d at 793*. Moreover, to establish a *per se* unreasonable horizontal conspiracy, a plaintiff must establish that the conspiracy involved coordination between competitors at the same level of a market structure. See ***Van Hoose**, 70 So. 3d at 1022*. Independent parallel conduct, or even conduct among competitors that is consciously parallel, does not alone establish the contract, combination, or conspiracy. ***Camsoft Data Systems, Inc. v. Southern Electronics Supply, Inc.**, 2018-1609 (La. App. 1st Cir. 12/3/18), [Pg 19] 276 So. 3d 1053, 1059*, writs denied, *2018-02088, 2018-02018 (La. 2/11/19), 263 So. 3d 1151*, *263 So. 3d 1153*.

Because JRC would have the burden of proof at trial to establish the existence of a horizontal **[**24]** conspiracy, HRI and NRG/LaGen only had to point to the absence of factual support for one element of that claim. In support of their motions, they asserted in part that there was an absence of factual support for an essential element of a *per se* antitrust violation under any of the theories JRC alleged, because there is no evidence of the existence of any agreement or conspiracy among Cleco, Entergy, and NRG/LaGen. We find that HRI and NRG/LaGen met that initial burden.

Thus, once HRI and NRG/LaGen successfully pointed to the lack of evidence of Cleco or Entergy engaging in any concerted actions with NRG/LaGen in furtherance of an alleged horizontal scheme in restraint of trade or of any knowledge or acquiescence by Cleco or Entergy to such a scheme, the burden shifted to JRC. JRC then had to produce factual support sufficient to establish the existence of a genuine issue of material fact as to a horizontal conspiracy in restraint of trade or that HRI and NRG/LaGen were not entitled to judgment as a matter of law. *La. C.C.P. art. 966(D)(1)*.

On appeal, JRC contends in its second and fifth assignments of error that it did produce factual support to establish the existence of genuine issues of material fact regarding: **[**25]** (1) an unlawful horizontal conspiracy among the power companies through either: (a) direct evidence of an unlawful common sales agency conspiracy, or (b) circumstantial evidence of a hub-and-spoke conspiracy coordinated by their common sales agency; or (2) a horizontal conspiracy by virtue [Pg 20] of a joint venture between HRI and Entergy and between HRI and Cleco, respectively.[12]

A. Joint Venture

Addressing JRC's joint venture claim first, JRC avers that the trial court erred in dismissing its *per se* antitrust claims where it demonstrated the existence of genuine issues of material fact as to the existence of joint ventures between HRI and Cleco, HRI and Entergy, and HRI and NRG/LaGen. Under this theory, JRC posits that because HRI was a common member of individual joint-venture partnerships with Cleco and Entergy, HRI's actions in inviting NRG/LaGen to join in a price-fixing and market-territory-allocation scheme were taken in the capacity of a pure, non-vertical, direct competitor, thus **[*454]** constituting horizontal action in restraint of trade.

HN16[] A joint venture has been defined as a special combination of two or more persons, where in some specific venture a profit is jointly **[**26]** sought without any actual partnership or corporate designation. ***Coffee Bay Investors, L.L.C. v. W.O.G.C. Company**, 2003-0406 (La. App. 1st Cir. 4/2/04), 878 So. 2d 665, 670*, writ denied, *2004-1084 (La. 6/25/04), 876 So. 2d 838*. Generally, the essential elements of a joint venture are the same as those of partnership, i.e., two or more parties combining their property, labor, skill, etc. in the conduct of a venture for joint profit, with each having some right of control. ***Cajun Electric Power Cooperative, Inc. v. McNamara**, 452 So. 2d 212, 215 (La. App. 1st Cir.)*, writ denied, *458 So. 2d 123 (La. 1984)*. Thus, joint ventures are governed by the law of partnership and share the same requisites as follows: (1) a contract between two or more persons; (2) the establishment of a juridical entity or person; (3) contribution [Pg 21] by all parties of either efforts or resources; (4) contribution in determinate proportions; (5) joint effort; (6) mutual risk vis-à-vis losses; and (7) a sharing of profits. ***Cajun Electric Power Cooperative, Inc.**, 452 So. 2d at 215*.

Based on our *de novo* review of the evidence, we conclude that JRC has failed to demonstrate a genuine issue of material fact as to several of these elements. Regarding joint effort, the power companies produce energy, and CCPs are merely a byproduct of that energy production. Because the accumulation of these CCPs can impede the energy-production process, these power companies contracted with HRI to manage these byproducts by transporting them out of **[**27]** the production and surrounding areas either for marketing and sale or alternatively for relocation to designated sites on the various plant premises. HRI alone was responsible for the efforts in transporting the CCPs from the production areas for sale or placement in other designated areas.

With regard to the element of the sharing of profits, while JRC contends that Entergy and Cleco shared. "net profits". with HRI, a review of the marketing agreements of record does not support that contention. Rather, HRI was *compensated* for the sale of fly ash and other CCPs under various formulas: a percentage of gross sales; a fixed per-ton price for CCPs sold; or a combination of a fixed component, a variable component and a percentage of net proceeds (sales revenues minus third-party transportation and handling costs for delivery to customer only).

---

[12] We note that JRC contends in its fourth assignment of error that the trial court erred in concluding in its reasons for judgment that JRC could not establish a horizontal agreement absent first establishing a joint venture. ***HN15***[] Because this court reviews summary judgments *de novo*, we afford no deference to the trial court's underlying reasoning for its judgment. ***King v. Allen Court Apartments**, 2015-0858 (La. App. 1st Cir. 12/23/15), 185 So. 3d 835, 839*, writ denied, ***2016-0148 (La. 3/14/16), 189 So. 3d 1069***. Accordingly, we need not address this argument.

Additionally, regarding mutual risk vis-à-vis losses, HRI bore the risk of any losses it suffered in fulfilling these contractual duties. While HRI was allowed to account for some of its costs in the calculation of its compensation under the various agreements, it bore the responsibility of many of the costs associated with its contractual duties. **[**28]** HRI also bore the additional risk in some situations of required shortfall payments for its failure to sell designated tonnage amounts of [Pg 22] CCPs. Thus, the risk of whether its ultimate calculated compensation under the various marketing agreements covered or exceeded all of its other costs and resulted in profits was borne solely by HRI, such that JRC cannot demonstrate a genuine issue of material fact as to this element either.

Accordingly, JRC is unable to carry its burden of demonstrating the existence of an issue of material fact as to whether the marketing agreements MU entered into with Cleco or Entergy, or NRG/LaGen, constituted joint ventures or, consequently, whether a horizontal conspiracy in restraint of trade existed by virtue of HRI's **[*455]** actions as a pure, non-vertical, direct competitor of NRG/LaGen.

B. Unlawful Common Sales Agency Agreement

Turning next to JRC's claim of a horizontal conspiracy through the use of a common sales agency, we note that ***HN17***[] not all common selling agency agreements violate antitrust laws. See ***Virginia Excelsior Mills, Inc. v. Federal Trade Commission****, 256 F.2d 538, 541 (4th Cir. 1958)*. However, such an agreement does violate antitrust laws where it is used as a concerted action by two or more horizontal competitors to accomplish a purpose **[**29]** that could not be lawfully accomplished "by a direct agreement among the participating producers." ***Id.***

In ***Virginia Excelsior Mills, Inc.***, the United States Fourth Circuit Court of Appeals held that an agreement among competing producers to eliminate competition among themselves was a *per se* violation of *Section 1* of the Sherman Antitrust Act. The competing producers organized a new corporation, the stock of which the competing producers owned and the board of directors for which was selected from among the competing producers. The new corporation then entered into **identical** contracts with each producer-stockholder appointing the new corporation as each producer's exclusive sales agent. Moreover, by agreement of the producers, orders were to be allocated among them on the basis of their relative productive capacities, and no producer would increase its productive capacity. [Pg 23] ***Virginia Excelsior Mills, Inc.****, 256 F.2d at 539-540*. As such, the underlying agreement of these competitors to use a common selling agency to achieve their unlawful purpose was well established by evidence of a direct agreement or conspiracy among all of these competitors through the use of a separately created entity, owned and controlled by the horizontal competitors. **[**30]**

Nonetheless, given the absence of any evidence herein of such direct agreement among the power companies to use their common sales agency HRI for an unlawful purpose, JRC contends that it was never obligated to prove the horizontal agreement by direct communications among the power companies. Rather, citing ***United States v. Masonite Corporation****, 316 U.S. 265, 275, 62 S. Ct. 1070, 1075-1076, 86 L. Ed. 1461, 1942 Dec. Comm'r Pat. 777 (1942)*, JRC asserts that a plaintiff may establish the existence of a horizontal agreement by offering direct evidence of a common agent engaging in prohibited conduct for the group of horizontal competitors pursuant to the "express delegation, acquiescence, or understanding" of the competing horizontal members. See ***Masonite****, 316 U.S. at 276, 62 S. Ct. at 1076*. Moreover, JRC argues that it presented a genuine issue of fact of a horizontal conspiracy by offering direct evidence of HRI setting uniform market prices and controlling output pursuant to contractual delegation and/or acquiescence of Cleco, Entergy, and NRG/LaGen.

However, based on our *de novo* review of the evidence submitted, there is no evidence that HRI controlled output of fly ash or any other CCPs produced by Cleco, Entergy, or NRG/LaGen. To the contrary, a review of the marketing agreements of record demonstrates that the power companies controlled their own energy **[**31]** production levels and their own internal use of CCPs they produced, which, in turn, determined the quantity of CCPs made available for marketing. The Entergy marketing agreements for the Nelson Power Station indicate that the amount of ash available under the marketing agreement would be determined by [Pg 24] the operation of Nelson Unit 6, which operation **[*456]** would be controlled by Entergy "in its absolute discretion." Entergy further reserved the right to use any part of the CCPs produced by Nelson Unit 6. Similarly, the Cleco marketing agreements contained provisions indicating either that the quantity of ash produced would vary depending on many factors involved in plant operations, that Cleco made no guarantee as to quantity of ash that would be made available, or that Cleco would not alter its power supply to ensure a volume of ash. Cleco also reserved the right to use CCPs for its own benefit and even reserved the right to donate fly ash produced at the Dolet Hills Power Station for various purposes. Finally, the LaGen/HRI Agreement also provided that LaGen expressly made no warranties as to the quantity of CCPs and reserved the right to use CCPs produced at Big Cajun II for its **[**32]** own purposes.

Moreover, JRC failed to demonstrate the existence of a genuine issue of material fact as to the alleged acquiescence by Cleco or Entergy in any such scheme in a concerted effort to restrain trade. The record demonstrates that HRI contracted with these power companies years or even decades apart. HRI (or its predecessors) first contracted with Cleco (and its predecessors) in 1981 with regard to fly ash and other CCPs produced at the Rodemacher Power Station and thereafter in 2003 for fly ash produced at the Dolet Hills Power Station. HRI (or its predecessors) first contracted with Entergy (and its predecessors) in 1986 for ash marketing services at the Nelson Power Station. By contrast, it did not contract with NRG/LaGen until 2011.

Further, there is no evidence that either Cleco or Entergy had any knowledge of HRI's marketing agreements with each other or with NRG/LaGen, or of HRI's marketing efforts on behalf of those other entities. Nor is there any evidence that, in executing these marketing contracts years apart, the power companies agreed to, or even later acquiesced in, a scheme to fix market prices and control output. [Pg 25] Accordingly, we conclude that JRC failed **[**33]** to demonstrate the existence of a genuine issue of material fact as to an alleged horizontal conspiracy by Cleco, Entergy, and NRG/LaGen, implemented by HRI as their common sales agency, by either contractual delegation or acquiescence.

C. Hub-and-Spoke Conspiracy

JRC next contends that it demonstrated a genuine issue of material fact of a horizontal agreement in restraint of trade by offering circumstantial evidence of a "hub-and-spoke" conspiracy. ***HN18***[] A hub-and-spoke conspiracy is one in which an entity at one level of the market structure, the "hub," coordinates an agreement among competitors at a different level, the "spokes." ***U.S.v. Apple, Inc.****, 791 F.3d 290, 314 (2nd Cir. 2015)*, cert. denied sub nom., *__ U.S. __, 136 S. Ct. 1376, 194 L. Ed. 2d 360 (2016)*. A traditional hub-and-spoke conspiracy has three elements: (1) a hub, such as a dominant purchaser; (2) spokes, such as competing manufacturers or distributors that enter into vertical agreements with the hub; and (3) the rim of the wheel, which consists of horizontal agreements among the spokes. ***In re Musical Instruments and Equipment Antitrust Litigation****, 798 F.3d 1186, 1192*.

HN19[] Where no direct evidence exists for the third element, a horizontal agreement among the spokes (or competitors), courts evaluate circumstantial evidence, called "plus factors," to determine whether a plaintiff's evidence is more probative of **[**34]** conspiracy than of conscious parallel behavior. ***In re Disposable contact Lens Antitrust****, 215 F. Supp. 3d 1272, 1294* ***[*457]*** *(M.D. Fl. 2016)*. Plus factors are economic actions and outcomes that are largely inconsistent with unilateral conduct, but largely consistent with explicitly coordinated action. Accordingly, they may raise an inference of conspiracy. ***Id.*** *at 1294-1295*. These plus factors include: (1) a common motive to conspire, (2) evidence showing that the parallel acts were against the apparent individual economic self-interest of the alleged [Pg 26] conspirators, (3) evidence of a high level of interfirm communications, and (4) historically unprecedented changes in pricing structure made at the very same time by multiple competitors for no other discernible reason. ***Id.*** *at 1295*; ***Apple, Inc.****, 791 F.3d at 315*. JRC contends on appeal that it presented factual support demonstrating issues of material fact as to these plus factors and, thus, that summary judgment dismissing its *per se* antitrust claims was inappropriate.

First, regarding a common motive to conspire, JRC contends that there was a common motive to conspire because of excess supply of CCPs and Big River and HRI's "historical pricing competition," which "tended to" drive prices of CCPs downward or neutral. Based upon our *de novo* review of **[**35]** the summary judgment evidence, JRC did present some evidence from its economist that the price of CCPs was generally trending downward from 2008 through 2010.

Secondly, JRC contends that the each power company's separate marketing agreement with HRI was not in the individual company's economic self-interest where each "contractually relinquished [its] right to individually compete for CCPs sales" by authorizing HRI to centrally manage and control prices and output. However, JRC presented no evidence that the marketing agreements, entered into by the power companies years and even decades apart, were against their individual self-interests. Regarding controlling output, as discussed above, output of CCPs is determined by energy production levels, which are controlled by the individual power companies, and the quantity of CCPs made available for marketing is further dependent upon the power companies' discretionary use of the CCPs they produce. Additionally, the Cleco contracts of record for the Dolet Hills Power Station required minimum sales levels of CCPs with penalty payments for failure to meet those minimums, and the Entergy marketing agreement for the Nelson Power Station specifically **[**36]** provided that the marketing contractor would "use its best efforts to market **all ash"** delivered under the agreement. (Emphasis [Pg 27] added). These contractual provisions demonstrate that the power companies' overall objective was simply to remove CCPs from their premises — not, as JRC suggests, that they conspired through the use of marketing agreements to authorize HRI to control prices against their individual self-interests.

As to interfirm communications, JRC points to a letter from HRI to NRG/LaGen evidencing a possible scheme to raise prices. In the letter, HRI, in an attempt to gain the NRG/LaGen marketing contract, indicated that HRI managed "all other sources of C-618 fly ash produced in the State of Louisiana" and that HRI's involvement with Big Cajun II "could present significant opportunities for both companies to increase sales and to maximize pricing of the products."

Regarding the fourth plus factor, JRC did present evidence that the price of CCPs in Louisiana, while generally trending downward from 2008 through 2010, leveled off in 2011, just as the LaGen/HRI Agreement was executed, and then began to rise. Additionally, JRC offered evidence that once HRI entered into **[**37]** the LaGen/HRI **[*458]** Agreement, HRI instituted an initiative to raise prices for CCPs produced by Big Cajun II because HRI believed that the prices previously charged by Big River were below the "competitive rate." This initiative was further evidenced by HRI's email communication to one customer, identified as a former Big River customer, incrementally raising prices to that customer for an unidentified product over a seven-month period from February to September of 2011, shortly after HRI became the marketing agency for NRG/LaGen.

Nonetheless, based on our *de novo* review of the limited evidence upon which JRC relies to support the plus factors, we conclude that JRC did not demonstrate a genuine issue of fact as to whether a horizontal agreement among the power companies should be inferred. Specifically, while the evidence offered suggests that CCPs prices were generally trending downward from 2008 to 2010 and thereafter stabilized and began increasing, the graph presented by JRC's [Pg 28] economist is not broken down by prices charged individually by Cleco, Entergy, and NRG/LaGen. Thus, it is impossible to discern from the graph which of the power companies may have experienced decreasing **[**38]** prices or whether the upward trend in prices was a result of an increase in prices "by multiple competitors." See ***In re Disposable Contact Lens Antitrust**, 215 F. Supp. 3d at 1295*.

Additionally, as discussed above, the language of the various marketing agreements does not suggest that they were against the individual economic self-interests of the power companies. And the written communications from HRI to NRG/LaGen represent **vertical** communications between a marketing agency and one producer, wherein HRI suggested that HRI and NRG/LaGen could maximize pricing. JRC offered no evidence of any interfirm communications among or between the horizontal power companies Cleco, Entergy, or NRG/LaGen to suggest a conspiracy among them, and no communications between HRI and Cleco or Entergy, much less a high level of such communications. Moreover, the written communication from HRI to NRG/LaGen and the evidence of HRI's initiative to raise prices for CCPs produced by Big Cajun II indicates price changes for that one CCPs producer alone. ***Id.***

Accordingly, JRC failed to carry its burden of demonstrating a genuine issue of material fact as to whether a horizontal agreement among the power companies should be inferred. As such, there is likewise no genuine issue **[**39]** of fact as to whether HRI, Cleco, Entergy, and NRG/LaGen entered into a hub-and-spoke conspiracy. Having failed to demonstrate an issue of fact as to a horizontal conspiracy under any of the theories it has advanced, JRC has failed to establish that HRI and NRG/LaGen are not entitled to summary judgment dismissing

JRC's *per se* antitrust claims. Thus, the portion of the trial court's December 4, 2019 judgment dismissing JRC's *per se* antitrust claims is likewise affirmed.

[Pg 29] **Trial Court's Denial in Part of HRI's and NRG/LaGen's Motions for Partial Summary Judgment Seeking Dismissal of JRC's *La. R.S. 51:123* Monopoly Claim (HRI's and NRG/LaGen's Assignments of Error Nos. 1 & 2)**

In their appeals of the trial court's December 4, 2019 judgment, HRI and NRG/LaGen both contend that the trial court erred in denying in part their motions for partial summary judgment and refusing to dismiss JRC's monopoly claims under *La. R.S. 51:123*. HRI and NRG/LaGen each assert that the trial court erred in failing to grant its motion for summary **[*459]** judgment on the monopoly claims: (1) where JRC did not suffer antitrust injury; and (2) where JRC failed to define a geographic market.

HN20[] With regard to antitrust injury, a plaintiff suffers **[**40]** an antitrust injury only if its loss is the type of loss that the claimed antitrust violation is likely to cause. ***HPC Biologicals, Inc.****, 194 So. 3d at 797*. "Antitrust injury" is defined as the type of injury that the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The requirement of an antitrust injury ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendants' behavior. ***Id.*** A plaintiff must allege a causal connection between its alleged injury and the anticipated anticompetitive effect of the specific practice that allegedly violates ***antitrust law***. ***BRFHH Shreveport, LLC v. Willis Knighton Medical Center****, 176 F. Supp. 3d 606, 626 (W.D. La. 2016)*.

HRI and NRG/LaGen assert that JRC did not suffer antitrust injury because it did not pay increased prices and, thus, did not suffer the "anticipated anticompetitive effect" of an alleged monopoly. According to HRI and NRG/LaGen, the causal connection here is lacking. They contend that the anticipated anticompetitive effect of an alleged monopoly is that the monopolist will raise prices to anticompetitive levels. Asserting that JRC never bought C-618 [Pg 30] fly ash directly from LaGen, NRG or HRI and, thus, never paid increased prices, defendants claim **[**41]** that JRC did not suffer the harm a monopoly is likely to cause.

However, the antitrust injury claimed by JRC is not that it was forced to pay higher prices for CCPs, but rather that it suffered antitrust injury from HRI's refusal to deal with JRC ***HN21***[] A unilateral refusal to deal generally is not unlawful. However, a monopolist's refusal to deal becomes actionable under the antitrust laws where the refusal is designed to have an anticompetitive effect, whether to gain market share, to drive up prices, or to obtain some other illegal goal. ***Mr. Furniture Warehouse, Inc. v. Barclays American/Commercial, Inc.****, 919 F.2d 1517, 1522 (11th Cir. 1990)*, cert. denied sub nom., *502 U.S. 815, 112 S. Ct. 68, 116 L. Ed. 2d 43 (1991)*. Thus, monopolistic or other anticompetitive intent is the key factor in determining whether an antitrust violation has occurred. See ***Id.***

In the instant case, JRC presented evidence suggesting that HRI refused to deal with JRC once HRI became the marketing agency for NRG/LaGen. However, questions of material fact remain as to this issue. HRI and NRG/LaGen contend, nonetheless, that the sole exception to a company's lawful right to refuse to deal with its competitors is where a monopolist seeks to terminate a prior voluntary course of dealing with a competitor. See ***In re Elevator Antitrust Litigation****, 502 F.3d 47, 52 (2nd Cir. 2007)*. According to HRI and NRG/LaGen, JRC cannot establish a refusal-to-deal **[**42]** claim because JRC had no preexisting relationship with HRI or NRG/LaGen.

However, JRC notes that HRI was representing Cleco, Entergy, and NRG/LaGen as their exclusive marketing agency for CCPs sales at the time HRI allegedly refused to deal with JRC. Accordingly, JRC asserts that HRI's actions on behalf of all of the power companies would have effectively prevented JRC from dealing with any of these power companies. Additionally, JRC contends that a genuine issue of fact remains as to whether it had a prior legally enforceable [Pg 31] relationship with NRG/LaGen. Considering the foregoing and based on our review of the summary **[*460]** judgment evidence, we conclude that disputed issues of fact remain as to whether JRC suffered antitrust injury because of a refusal to deal.

HN22[] With regard to the relevant geographic market, the geographic element of the relevant market consists of the area in which sellers of the defendants' product operate and to which buyers can practicably turn to obtain that product. ***State ex rel. Ieyoub v. Racetrac Petroleum, Inc.****, 2001-0458 (La. App. 3rd Cir. 6/20/01), 790 So. 2d 673, 679*. Thus, the issue of geographic market is also a fact-intensive inquiry. Based on our *de novo* review of the evidence submitted, we likewise conclude that issues of fact remain as to the relevant **[**43]** geographic market. Accordingly, FRI and NRG/LaGen were not entitled to dismissal of JRC's monopoly claims on summary judgment. As such, the portion of the trial court's December 4, 2019 judgment denying in part HRI's and NRG/LaGen's motions for partial summary judgment as to JRC's monopoly claims is affirmed.

CONCLUSION

For the above and foregoing reasons, the trial court's December 4, 2019 judgment, denying the motion for partial summary judgment of plaintiff, John River Cartage, Inc., and granting in part and denying in part the motions for partial summary judgment filed by defendants, Headwaters Resources, Inc. and Louisiana Generating, LLC and NRG Energy, Inc., is affirmed. Costs of this appeal are assessed one-third to John River Cartage, Inc., one-third to Headwaters Resources, Inc., and one-third to Louisiana Generating, LLC and NRG Energy, Inc.

AFFIRMED.

In re Glumetza Antitrust Litig.

United States District Court for the Northern District of California

March 5, 2020, Decided; March 5, 2020, Filed

LexisNexis® Headnotes

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Military & Veterans Law > Military Offenses > Controlled Substances

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

HN1[] **Defenses, Experimental Use & Testing**

All pharmaceutical drugs require FDA approval to enter the market and undergo a long and costly testing process. Only approved drugs reach the market. 21 U.S.C.S. § 355(a), (b)(1). To encourage generic pharmaceutical drugs, the Hatch-Waxman Act eases the approval process. A proposed generic manufacturer may submit an Abbreviated New Drug Application (ANDA), rely on testing data for the corresponding, already-approved brand-name drug, and avoid the costly and time-consuming studies needed for approval. 21 U.S.C.S. §§ 355(j)(2)(A)(ii), (iv).

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Patent Law > ... > Defenses > Patent Invalidity > Notice

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN2[] **Defenses, Experimental Use & Testing**

In the context of an Abbreviated New Drug Application (ANDA), a certification of invalidity or noninfringement — usually called the Paragraph IV certification — is deemed a statutory act of patent infringement. And, if the brand manufacturer sues within 45 days, the FDA must stay the generic's approval for thirty months (or until the end of the suit, whichever comes first). 21 U.S.C.S. §§ 355(j)(2)(A)(vii)(I)-(IV), (5)(B)(iii); 35 U.S.C.S. § 271(e)(2)(A).

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Motions to Dismiss, Failure to State Claim**

To survive a Fed. R. Civ. P. 12(b)(6) motion to dismiss, a complaint must allege sufficient factual matter, accepted as true, to state a facially plausible claim for relief. Such a facially plausible claim requires sufficient factual allegations to draw a reasonable inference that defendants are liable for the misconduct alleged. A court must take all of the factual allegations in the complaint as true, but need not accept as true legal conclusions merely styled as facts. The factual allegations must raise a plaintiff's right to relief above the speculative level.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Defenses

HN4[] **Sherman Act, Defenses**

Private plaintiffs must file an antitrust action within four years. *15 U.S.C.S. § 15b*. A claim may be dismissed as untimely pursuant to a *Fed. R. Civ. P. 12(b)(6)* motion only when the running of the statute of limitations is apparent on the face of the complaint.

Governments > Legislation > Statute of Limitations > Time Limitations

HN5[] **Statute of Limitations, Time Limitations**

An antitrust claim accrues when a defendant commits an unlawful act and injures a plaintiff.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] **Sherman Act, Defenses**

In a conspiracy to violate antitrust laws, each time a plaintiff is injured by an act of the defendant, a cause of action accrues to him to recover the damages caused by that act. A continuing violation: (1) must be a new and independent act that is not merely a reaffirmation of a previous act; and (2) must inflict new and accumulating injury on the plaintiff.

Antitrust & Trade Law > Clayton Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] **Clayton Act, Defenses**

Generally, the passive receipt of profits from an illegal contract by an antitrust defendant is not an overt act of enforcement which will restart the statute of limitations. After all, the mere possession of monopoly power, and charging of monopoly prices is not unlawful. Thus, the unabated inertial consequences of some pre-limitations action that are irrevocable, immutable, permanent, and final are not continuing violations.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Clayton Act > Defenses

HN8[] **Remedies, Damages**

The continuing violation standard is meant to differentiate those cases where a continuing violation is ongoing — and an antitrust suit can therefore be maintained — from those where all of the harm occurred at the time of the initial violation. So, action taken under a pre-limitation contract can be sufficient to restart the statute of limitations so long as the defendant had the ability not to take the challenged action, even if that would have required breaching the allegedly anti-competitive contract.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN9[] **Tolling of Statute of Limitations, Fraudulent Concealment**

A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence. Plaintiffs must plead facts showing that defendants affirmatively misled them, and that plaintiffs had neither actual nor constructive knowledge of the facts giving rise to their claim despite their diligence in trying to uncover those facts. Diligent inquiry is required where facts exist that would excite the inquiry of a reasonable person. The circumstances of concealment and plaintiffs' diligent search must be plead with particularity.

Governments > Courts > Creation & Organization

HN10[] **Courts, Creation & Organization**

As the Supreme Court recognized in Actavis, the pay-for-delay scheme is unique to pharmaceutical patents.

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN11[] **Nondisclosure, Elements**

Failure to disclose information does not constitute affirmative concealment absent a duty to disclose. However, half-truths — representations that state the truth only so far as it goes, while omitting critical qualifying information — can be actionable misrepresentations. One who chooses to speak has a duty to include as much information as necessary to prevent misleading others.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN12[] **Motions to Dismiss, Failure to State Claim**

Generally, a motion to dismiss turns on, and only on, the complaint. The judicial notice exception under *Fed. R. Evid. 201* permits district courts to consider a fact not subject to reasonable dispute because it is generally known or can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN13[] **Inequitable Conduct, Anticompetitive Conduct**

Reverse payment settlements can sometimes violate the antitrust laws. But the Supreme Court has declined to find reverse payment settlement agreements presumptively unlawful. Instead, courts should apply the rule of reason to evaluate the agreements.

Antitrust & Trade Law > Sherman Act > Claims

Torts > ... > Concerted Action > Civil Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN14[] **Sherman Act, Claims**

The character and effect of an antitrust conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole. It is well settled that acts which are in themselves legal lose that character when they become constituent elements of an unlawful scheme.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN15[] **Complaints, Requirements for Complaint**

A complaint plausibly alleges a conspiracy where it pleads enough factual matter (taken as true) to suggest the parties had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.

Evidence > Burdens of Proof > Allocation

HN16[] **Burdens of Proof, Allocation**

Once a conspiracy is formed, it remains actionable until its purpose has been achieved or abandoned and an overt act of one partner may be the act of all without any new agreement specifically directed to that act. Thus, a plaintiff need not show that each defendant or all defendants have participated in each act or transaction. Involvement in but two of ten allegedly conspirational situations does not absolve a defendant from participation in the entire conspiracy if its involvement in the two was unlawful and knowingly and purposely performed.

Constitutional Law > ... > Case or Controversy > Standing > Elements

Constitutional Law > ... > Case or Controversy > Constitutionality of Legislation > Standing

HN17[] Standing, Elements

Article III's irreducible constitutional minimum of standing to sue requires a plaintiff to have suffered: (1) an injury-in-fact; (2) that is fairly traceable to the defendant's conduct; and (3) is redressable by a favorable court decision. A plaintiff must demonstrate standing for each claim he seeks to press and separately for each form of relief sought. Just because a suit derives from a common nucleus of operative fact does not mean federal jurisdiction extends to all claims sufficiently related to a claim within Article III to be part of the same case.

Civil Procedure > ... > Justiciability > Standing > Personal Stake

HN18[] Standing, Personal Stake

At bottom, the injury a plaintiff suffers defines the scope of the controversy he or she is entitled to litigate.

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN19[] Standing, Particular Parties

Claims for relief under the laws of the several states are separate claims for relief and, per Daimler Chrysler, require separate proof of standing. Standing does not arise simply because illegality is in the air.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Antitrust & Trade Law > Clayton Act > Defenses

HN20[] Sherman Act, Defenses

California permits antitrust recovery for actions that take place outside the limitations period if these actions are sufficiently linked to unlawful conduct within the limitations period, and recognizes fraudulent concealment.

Governments > Legislation > Interpretation

HN21[] Legislation, Interpretation

New York's ***antitrust law*** should generally be construed in light of Federal antitrust precedent and given a different interpretation only where State policy, differences in the statutory language, or the legislative history justify such a result.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Interpretation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN22[] **Public Enforcement, State Civil Actions**

The Rhode Island Supreme Court has explained that the Rhode Island Antitrust Act must be construed in harmony with judicial interpretations of comparable federal antitrust statutes insofar as practicable, except where provisions of this chapter are expressly contrary to applicable federal provisions as construed.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Contracts Law > Remedies > Restitution

HN23[] **Equitable Relief, Quantum Meruit**

When a plaintiff alleges unjust enrichment, a court may construe the cause of action as a quasi-contract claim seeking restitution.

Estate, Gift & Trust Law > Estate Administration > Intestate Succession > Escheat

Governments > Legislation > Statute of Limitations > Time Limitations

HN24[] **Intestate Succession, Escheat**

Unjust enrichment has a three-year statute of limitations. *Cal. Civ. Proc. Code § 338(d)*.

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN25[] **Nondisclosure, Elements**

California recognizes fraudulent concealment.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > ... > Statute of Limitations > Begins to Run > Continuing Violations

HN26[] **Statute of Limitations, Time Limitations**

The consumer protection law has a three-year statute of limitations. And in New York, a continuing violation may only be predicated on continuing unlawful acts and not on continuing effects of earlier unlawful conduct.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN27[] Deceptive & Unfair Trade Practices, State Regulation

N.Y. Bus. Law § 349 requires an act or practice that was misleading in a material way. But reliance is not an element — a plaintiff need only show the defendant's material deceptive act caused the injury. Section 349 has continually been interpreted to cover antitrust violations.

Opinion

[*855] ORDER RE MOTIONS TO DISMISS

INTRODUCTION

In this antitrust action arising from an alleged reverse-payment settlement of a patent infringement suit between brand and generic marketers of the diabetes drug Glumetza, defendants move to dismiss the complaints as untimely. Because defendants actively continued and fraudulently concealed their conspiracy, plaintiffs' complaints are timely, at least at the pleading stage. Defendants' remaining standing, merits, and joinder arguments **[*856]** partially succeed. Thus, the motions are **GRANTED IN PART AND DENIED IN PART**.

STATEMENT

1. THE REGULATORY FRAMEWORK.

This case arises from the combined patent and pharmaceutical-regulatory framework established by the *Drug Price Competition and Patent Term Restoration Act of 1984, 98 Stat. 1585*, *21 U.S.C. § 301 et seq.*, *35 U.S.C § 156 et seq.* More commonly known as the "Hatch-Waxman Act," it implements a scheme **[**12]** of interlocking incentives to encourage timely introduction of low-cost generics into the pharmaceutical market yet still drive new drug development. Several prior cases summarize the Hatch-Waxman scheme. *See, e.g., FTC v. Actavis, 570 U.S. 136, 142-144, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *In re Aggrenox Antitrust Litigation, 94 F. Supp. 3d 224, 233-34 (D. Conn. 2015)* (Judge Stefan R. Underhill); *In re Niaspan Antitrust Litigation, 42 F. Supp. 3d 735, 740-41 (E.D. Pa. 2014)* (Judge Jan. E. DuBois). A few elements become relevant here.

To start, all pharmaceutical drugs require FDA approval to enter the market and undergo a long and costly testing process. Only approved drugs reach the market. *See 21 U.S.C. § 355(a)*, *(b)(1)*. To encourage *generic* pharmaceutical drugs, the Hatch-Waxman Act eases the approval process. ***HN1***[] A proposed generic manufacturer may submit an Abbreviated New Drug Application (ANDA), rely on testing data for the corresponding, already-approved brand-name drug, and avoid "the costly and time-consuming studies" needed for approval. *See Actavis, 570 U.S. at 142* (quotation omitted); *21 U.S.C. §§ 355(j)(2)(A)(ii)*, *(iv)*.

But piggybacking on a brand drug's testing removes only one barrier to entry, the FDA, for the patent barrier remains. New brand-drug applicants must list the patents (if any) covering the new drug, and generic applicants must certify to the FDA either that no patents cover the brand drug, that the relevant patents have expired, or that such patents are invalid or **[**13]** will not be infringed by the new drug. ***HN2***[] A certification of invalidity or noninfringement — usually called the "Paragraph IV certification" — is deemed a statutory act of patent infringement. And, if the brand manufacturer sues within 45 days, the FDA must stay the generic's approval for thirty months (or until the end of the suit, whichever comes first). *Actavis, 570 U.S. at 143*; *21 U.S.C. §§ 355(j)(2)(A)(vii)(I)-(IV)*, *(5)(B)(iii)*; *35 U.S.C. § 271(e)(2)(A)*; *see also In re Aggrenox, 94 F. Supp. 3d at 233-34*.

To encourage patent-challenging ANDAs with Paragraph IV certifications, the Hatch-Waxman Act grants the "first filer" 180 days of generic exclusivity, *i.e.* the first generic gets six months as the only generic to compete against the brand. This can be "worth several hundred million dollars" to the generic manufacturer, thus outweighing the risk of infringement suit. *Actavis, 570 U.S. at 143-44*; *21 U.S.C. § 355(j)(5)(B)(iv)*. Significantly, however, the 180-day exclusivity does not bar the brand manufacturer itself from marketing an "authorized generic" to recoup some of those millions. *See* *Teva Pharm. v. Crawford, 410 F.3d 51, 55, 366 U.S. App. D.C. 203 (D.C. Cir. 2005)*. And, the first filer can forfeit the 180-day exclusivity if it fails to market its generic within 75 days of *another* generic successfully challenging the brand's patents — but in that case, the 180-day exclusivity period vanishes; it does not transfer to any other manufacturer. *21 U.S.C. § 355(j)(5)(D)(i)(I)(aa)*, *(iii)*.

[**14] 2. FTC V. ACTAVIS.

So, the Hatch-Waxman scheme aims to bring generic drugs to market sooner. But, **[*857]** as the Supreme Court recognized in *Actavis*, sometimes that scheme can backfire. There, Solvay Pharmaceuticals marketed the brand-drug, AndroGel, and held a patent covering the drug. When Actavis filed a Paragraph IV certification of noninfringement and invalidity along with an ANDA to market a generic AndroGel, Solvay sued. When the thirty-month stay expired, the FDA approved Actavis' first-filer ANDA. But then the parties settled. Solvay would pay millions of dollars to Actavis, who would delay its generic market entry for several years, but still enter before the patent expired. *570 U.S. at 144-45*.

The Federal Trade Commission then sued everyone involved, arguing the settlement unlawfully shared in a monopoly. But the district court and the Court of Appeals for the Eleventh Circuit, following the weight of decision from other circuits, rejected the suit. Up to that point, the Courts of Appeals for the Second and Federal Circuits had held such patent settlements generally immune from antitrust attack. Only the Court of Appeals for the Third Circuit had held the reverse-payment settlement presumptively unlawful. **[**15]** *Id. at 145-47*.

The Supreme Court reversed, ruling largely for the FTC. To start, the Supreme Court held that patent settlements were *not*, and never had been, beyond the reach of antitrust scrutiny. Then, for several reasons, the Supreme Court found a reverse-payment settlement *could* violate ***antitrust law***. Of particular note, Justice Stephen Breyer explained for the Court that buying off patent challengers could be tantamount to simply buying a patentee's right to exclude, instead of earning that right from the Patent and Trademark Office and maintaining it against challenge on the merits. And, the reverse payment might indicate skewed interests, *i.e.* the brand manufacturer wasn't just fending off a patent challenge, but instead ushering the challenger *into the monopoly* by dangling a share of the profits. Last, the Court noted that "where only one party owns a patent, it is virtually unheard of outside of pharmaceuticals for [the patentee] to pay an accused infringer to settle a lawsuit." *See* *id. at 147-53, 153-58*.

But the Supreme Court did not go so far (as had the Third Circuit) as to hold reverse-payment settlements presumptively unlawful. Rather, the Court said such a settlement should be evaluated under the antitrust **[**16]** rule of reason. *Id. at 158-60*.

3. THE CHALLENGED CONSPIRACY.

Our complaint alleges a variation of the *Actavis* scheme. Instead of a cash payment, however, the patent owner gave something else of great value, a promise not to compete. Here are our facts, as alleged.

In 2002, one of defendant Bausch Health Companies Inc.'s predecessors, Depomed, Inc. (later Assertio Therapeutics, Inc.), developed a new controlled-release version of the classic diabetes medication, metformin. The FDA approved Assertio's NDA for 500 mg and 1000 mg formulations of Glumetza in June 2005. Assertio held several patents on their new drug (Consolid. Amd. Compl., Dkt. No. 53 at ¶¶ 77, 79, 81).

In July 2009, defendants Lupin Pharmaceuticals, Inc. and Lupin Ltd. (Lupin) filed an ANDA seeking approval to market generic versions of Glumetza. Lupin filed a Paragraph IV certification of noninfringement or invalidity against the four relevant patents: U.S. Patent Nos. 6,340,475; 6,635,280; 6,488,962; and 6,723,340. Lupin had successfully designed around the patents, which had claimed only a subset of the controlled-release technology that Glumetza employed. Assertio used, and had **[*858]** claimed, a polymeric "matrix" system, wherein the active drug was distributed throughout a polymer and formulated **[**17]** into a pill to time the release. Lupin, however, employed a "reservoir" system, wherein the active drug core was coated in an acrylic polymer to extend the drug's release (Consolid. Amd. Compl. at ¶¶ 82-99, 107-08, 113-14).

Assertio (the brand) sued Lupin (the proposed generic) in November 2009, triggering the thirty-month stay against FDA final approval. In January 2012, with the suit still going, the FDA tentatively approved the ANDA, meaning Lupin's generic had passed the review process and was finally approvable *but for* the thirty-month stay. One month later, Assertio and defendant Santarus, Inc., who now owned the commercialization rights to Glumetza (though Assertio retained the patents), settled with Lupin (Consolid. Amd. Compl. at ¶¶ 103-04, 110-11, 116-17, 121).

Lupin promised to walk away from the lawsuit, to no longer challenge the patents' validity, and to not market a generic version of Glumetza for four years. As payment for Lupin's delay, Assertio and Santarus promised to not market or permit another to market an authorized generic for at least 180 days following Lupin's generic market entry in 2016 (Consolid. Amd. Compl. at ¶¶ 121-24). *See Depomed, Inc. v. Lupin Pharms., Inc.*, No. C 09-05587 PJH, Dkt. No. 152 (N.D. Cal. Mar. 27, 2012) **[**18]** .

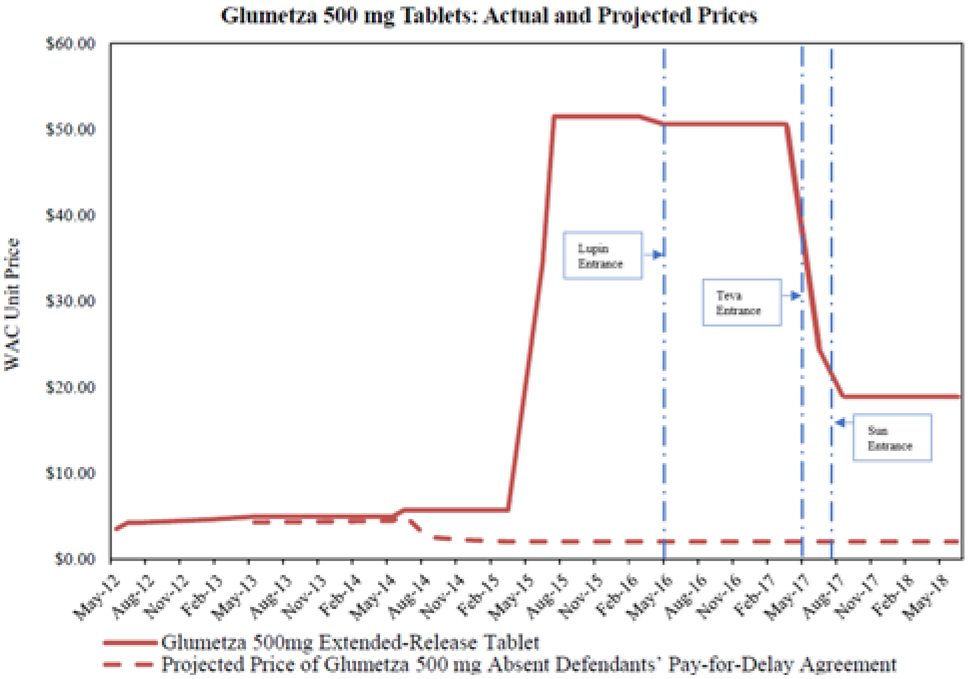
A distinction must be made. Two *separate* "180 day" periods hovered over Lupin's market entry: (1) the FDA-granted 180-day period during which the FDA would not permit any other generics to market (which, by statute, would run from Lupin's market entry); and (2) the settlement agreement 180-day period during which Assertio and Santarus would not market an authorized generic (which, by contract, would also run from Lupin's market entry) (Consolid. Amd. Compl. at ¶ 123). *See* *21 U.S.C. § 355(j)(5)(B)(iv)*. Lupin presumably gave up its statutory 180-day exclusivity period in favor of a contractual 180-day exclusivity period, enforced by Assertio and Santarus's assertion of patent rights against other generics (as detailed below).

To protect Lupin, the "no-authorized generic" clause allegedly included two more provisions. The "most-favored-entry" subclause expressly provided that if any other generic succeeded in marketing a generic Glumetza before February 2016, Lupin could market immediately. In addition, the "most-favored-entry-plus" subclause stated that Assertio and Santarus would not license any other generic Glumetza manufacturers until 180 days **[**19]** following Lupin's market entry (Consolid. Amd. Compl. at ¶¶ 151-52).

Defendants allegedly designed these provisions (collectively the "no-AG" provision) to undercut any incentive for other manufacturers to file a Paragraph IV certification, litigate an infringement suit to final decision, and (if successful) beat Lupin to market. If defendants' scheme worked, Lupin could keep *both* the FDA-granted exclusivity against other generics and Assertio and Santarus's promise to not market an authorized generic and, thus, be the *only* competitor to brand Glumetza for at least 180 days. The complaint calculates the added value of this provision to Lupin, looking prospectively from February 2012, at over fifty million dollars (Consolid. Amd. Compl. at ¶¶ 126-37, 148, 153-56).

The scheme worked. No generic manufacturers marketed a version of Glumetza before Lupin. Sun Pharmaceuticals filed an ANDA for generic Glumetza around May 2011. In June, Assertio and Santarus sued Sun, and by January 2013 those parties settled. Allegedly informed of Assertio, **[*859]** Santarus, and Lupin's no-AG scheme, Sun agreed not to market a generic Glumetza until August 2016. And when Watson Pharmaceuticals filed its ANDA for generic **[**20]** Glumetza in March 2012, Assertio and Santarus again sued in April, then settled in November 2013. Also allegedly informed of the no-AG scheme, Watson agreed to delay its market entry until August 2016. Ultimately, Sun and Watson (by then Teva Pharmaceutical Industries Ltd.) did not market any generic Glumetza until mid-2017 (Consolid. Amd. Compl. at ¶¶ 157-72, 192-94).

Assertio and Santarus milked their four-year preserved monopoly. In 2012, Glumetza sales yielded about $150 million. In November 2013, defendant Salix Pharmaceuticals bought Santarus for $2.6 billion and Bausch paid $14.5 billion for Salix (and the Glumetza machine) in April 2015 (Consolid. Amd. Compl. at ¶¶ 129, 176-79). Then Glumetza prices to diabetes patients skyrocketed, as shown in the figure below.



(Consolid. Amd. Compl. at ¶ 10).

In February 2015, a 500 mg Glumetza tablet cost $5.72 — by July, purchasers paid more than $51. The 1000 mg tablet jumped the same 800% from $12 to $111 in the same time period. Glumetza is one of the primary glucose regulation drugs for the more than thirty million diabetes patients in the United States, and it appears the ill had little choice but to pay the new prices. Glumetza produced **[**21]** $145 million in the first two quarters of 2015. In the latter two, Bausch reaped $818 million (Consolid. Amd. Compl. at ¶¶ 75-77, 184).

In February 2016, Lupin joined in the bonanza, charging $44 for a single 500 mg tablet of Glumetza. When Teva's generic Glumetza entered the market in May 2017, the price of a 500 mg tablet dropped to $23, and when Sun's generic entered in July the price dropped to $16, still approximately *three times* the early-2015 cost (Consolid. Amd. Compl. at ¶¶ 186-88, 192-94).

Beginning on August 29, 2019, plaintiffs began suing. As of now, ten suits have been filed in this District. Following a case management conference, nine remain active. **[*860]** The first, *FWK Holdings, LLC v. Bausch Health Companies Inc. et al.*, No. C 19-05426 WHA, was dismissed without prejudice (Dkt. No. 68 at ¶ 3). Plaintiffs divided into three groups: (1) the direct-purchaser plaintiffs and putative class (Consolid. Amd. Compl., Dkt. No. 53); (2) the end-payor plaintiffs and putative class (EPP Consolid. Amd. Compl., Dkt. No. 164); and (3) the retailer plaintiffs, who sue as the assignees of absent direct purchasers (Walgreen Compl., Dkt. No. 162; Rite Aid Compl., Dkt. No. 163). One defendant, **[**22]** PDL Biopharma left the case by voluntary dismissal in January (Dkt. No. 116). The remaining defendants have moved to dismiss all the complaints (Dkt. Nos. 76, 79, 80, 98). This order follows full briefing and oral argument. This order does not address the latest two additions, Nos. C 20-01196 WHA and C 20-01198 WHA, as they were filed after the present briefing completed.

ANALYSIS

HN3[] To survive a *Rule 12(b)(6)* motion to dismiss, a complaint must allege sufficient factual matter, accepted as true, to state a facially plausible claim for relief. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Such a facially plausible claim requires sufficient factual allegations to draw a reasonable inference that defendants are liable for the misconduct alleged. A court must take all of the factual allegations in the complaint as true, but need not accept as true legal conclusions merely styled as facts. The factual allegations must raise a plaintiff's right to relief above the speculative level. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

1. THE SHERMAN ACT AND THE STATUTE OF LIMITATIONS.

HN4[] Private plaintiffs must file an antitrust action within four years. *15 U.S.C. § 15b*; *Samsung Elecs. v. Panasonic Corp., 747 F.3d 1199, 1202 (9th Cir. 2014)*. "A claim may be dismissed as untimely pursuant to a 12(b)(6) motion only when the running of the statute [of limitations] is apparent on the face **[**23]** of the complaint." *United States ex rel. Air Ctrl. Techs. v. Pre Con Indus., 720 F.3d 1174, 1178 (9th Cir. 2010)* (alteration in original) (quotation omitted).

HN5[] An antitrust claim accrues when a defendant commits an unlawful act and injures a plaintiff. *Zenith Radio Corp. v. Hazeltine Res., 401 U.S. 321, 337-38, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. In this context, the injury accrues "on the date that the generic firm would have entered the market but for the unlawful settlement." *See* II AREEDA & HOVENKAMP, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES & THEIR APPLICATION ¶ 320b (2014).

Plaintiffs allege that absent the unlawful agreement, Lupin would have marketed generic Glumetza: (1) "at risk" following the expiration of the thirty-month stay (May 6, 2012); (2) following Lupin's victory in the patent suit; or (3) earlier than February 1, 2016, on a date to be determined by the jury (Consolid. Amd. Compl. at ¶ 143).

The consolidated complaint plausibly alleges that Lupin did not infringe the patents because it designed around the patents using a "reservoir system" to "extend the drug's release" rather than use Assertio's "claimed polymeric matrix system" (Consolid. Amd. Compl. at ¶¶ 82-99, 112-13). So, at this stage, the complaint plausibly alleges Lupin would have won the patent suit and would have launched generic Glumetza in the summer or fall of 2012 after FDA **[**24]** final approval following the expiration of the thirty-month stay.

[*861] The problem is that this action commenced on August 29, 2019, so the limitations period only reaches back to August 29, 2015. Plaintiffs offer two counterarguments: (1) that defendants' continuing violations reset the statute of limitations; and (2) defendants' fraudulent concealment tolled the statute of limitations, both considered now.

A. THE COMPLAINT PLAUSIBLY ALLEGES CONTINUING VIOLATIONS.

To start, in play are all sales made by any defendant of Glumetza after August 29, 2015. Though the original sin occurred back in 2012, these later sales are continuing violations, not barred by the statute of limitations, because of both the defendants' maintenance of the Glumetza monopoly following the February 2012 settlement agreement and their careful February 2016 partition of the Glumetza market, between the brand drug and Lupin's sole generic.

HN6[] In a conspiracy to violate antitrust laws, "each time a plaintiff is injured by an act of the defendant[,] a cause of action accrues to him to recover the damages caused by that act." *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)*. A continuing violation: (1) "must be a new and independent act that is not merely **[**25]** a reaffirmation of a previous act;" and (2) "must inflict new and accumulating injury on the plaintiff." *Samsung, 747 F.3d at 1202*; *Oliver, 751 F.3d at 1086*.

HN7[] Generally, "the passive receipt of profits from an illegal contract by an antitrust defendant is not an overt act of enforcement which will restart the statute of limitations." *Eichman v. Fotomat, 880 F.2d 149, 160 (9th Cir. 1989)*. After all, "[t]he mere possession of monopoly power, and . . . charging of monopoly prices" is not unlawful. *Verizon Commc'ns v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Thus, the "unabated inertial consequences of some pre-limitations action" that are "irrevocable, immutable, permanent[,] and final" are not continuing violations. *In re Multidistrict Vehicle Air Pollution, 591 F.2d 68, 72 (9th Cir. 1979)*.

HN8[] But the continuing violation "standard is meant to differentiate those cases where a continuing *violation is ongoing* — and an antitrust suit can therefore be maintained — from those where all of the harm occurred *at the time of the initial violation*." So, "action taken under a pre-limitation contract [can be] sufficient to restart the statute of limitations so long as the defendant had the ability not to take the challenged action, even if that would have required breaching the allegedly anti-competitive contract." *Samsung, 747 F.3d at 1202-03* (emphasis added).

First, it is true that the sulphorous agreement occurred in 2012, but the *conduct taken* to cause competitive **[**26]** harm continued well into the later four-year period. *See Oliver, 751 F.3d at 1086*; *Samsung, 747 F.3d at 1202*. This order notes most other cases to address this question have concluded that continued overcharges constitute a continuing violation. *See In re Aggrenox, 94 F. Supp. 3d at 239*; *In re Niaspan, 42 F. Supp. 3d at 747*; *In re Nexium (Esomeprazole) Antitrust Litigation, 984 F. Supp. 2d 6, 9 (D. Mass. 2013)* (Judge William G. Young); *In re Skelaxin (Metaxalone) Antitrust Litigation, No. C 12-02343, 2013 U.S. Dist. LEXIS 70968, 2013 WL 2181185 at *6 (E.D. Tenn. May 20, 2013)* (Judge Curtis L. Collier); *In re K-Dur Antitrust Litigation, 338 F. Supp. 2d 517, 551 (D.N.J. 2004)* ((now Circuit) Judge Joseph A. Greenaway, Jr.); *In re Buspirone Patent Litigation, 185 F. Supp. 2d 363, 378 (S.D.N.Y. 2002)* (Judge John G. Koeltl).

Second, in February 2016, defendants carefully converted the Glumetza monopoly **[*862]** into a brand-versus-generic duopoly with a new round of conduct, a new form of antitrust violation, and *new harm to plaintiffs*. Plaintiffs may recover for overcharges flowing from defendants' split of the market. Assertio and Santarus describe their February 2016 conduct not as overt, but instead as inaction reflecting continued adherence to the 2012 settlement. Yes, they *defined* their duties in the 2012 settlement, but the price gouging anticipated by the agreement extended for years, well into the later four-year period. *See Multidistrict Vehicle, 591 F.2d at 72*; *Samsung, 747 F.3d at 1202*.

That said, a continuing violation did not, by itself, reset the statute of limitations for prior acts. Rather, each continuing violation (*i.e.*, each new sale) merely triggered the statute of limitations anew for *that act. See Oliver, 751 F.3d at 1086*. Thus, while plaintiffs' **[**27]** challenge to the Glumetza sales since August 29, 2015 — including the February 2016 conduct and its results — are timely, all earlier conduct and sales can only be reached via fraudulent concealment.*

B. The Complaint Plausibly Alleges Fraudulent Concealment.

Plaintiffs contend defendants' fraudulent concealment of their settlement agreement, specifically the no-AG provision, tolled the statute of limitations. This order agrees.

HN9[] "A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence." Plaintiffs "must plead facts showing that [defendants] affirmatively misled [them], and that [plaintiffs] had *neither actual nor constructive knowledge* of the facts giving rise to [their] claim despite [their] diligence in trying to uncover those facts." *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)*. Diligent inquiry is required where "facts exist that would excite the inquiry of a reasonable person." The circumstances of concealment and plaintiffs' diligent search must be plead with particularity. *Conmar Corp. v. Mitsui & Co. (U.S.A.), 858 F.2d 499, 502, 504 (9th Cir. 1988)*.

The thrust of the complaint is that Assertio and Santarus paid Lupin to end its patent challenge and **[**28]** grant them four more years of Glumetza monopoly, during which enormous price gouging occurred (Consolid. Amd. Compl. at ¶¶ 121-24, 184). HN10[] As the Supreme Court recognized in *Actavis*, the pay-for-delay scheme is unique to pharmaceutical patents. *570 U.S. at 155*. And, Lupin's *delay* of a generic Glumetza was public knowledge by March 2012 (Consolid. Amd. Compl. at ¶¶ 121, 248.b, fn. 11). *See Depomed*, No. C 09-05587 PJH, Dkt. No.

* Defendants concede direct-purchaser plaintiffs' first operative complaint was filed August 29, 2019, but contest whether that date should apply for the later filed end-payor plaintiffs. This issue need not be resolved here.

152. So, by then, plaintiffs were on notice of *two* key aspects of the pharmaceutical pay-for-delay scheme: a pharmaceutical patent case; and a settlement delaying generic market entry.

But they had no knowledge of the no-AG provision, Assertio and Santarus's promise to not market an authorized generic for 180 days after Lupin's market entry, to not license any other generics in that time, and that Lupin could market immediately if another generic succeeded in marketing. So the questions here are: (1) whether knowledge of this further no-AG scheme was required to excite the reasonable plaintiffs' curiosity; (2) whether defendants actually and improperly concealed the no-AG **[*863]** provision; and (3) whether the no-AG provision remained concealed until the current limitations period. *Cf.* ***[**29]*** *Conmar, 858 F.2d at 503*.

First, at least at this stage, the complaint plausibly shows that knowledge of the no-AG provision was necessary to excite the curiosity of the reasonable person. Though two of the relevant Glumetza patents expired in 2016, one allegedly did not expire until June 2020. And only one valid claim of one patent was necessary to block generic Lupin from the market. So viewed in February 2012, a proposed February 2016 market entry for Lupin meant halving the remaining patent term. This 50-50 compromise plausibly conveyed no impropriety to the reasonable observer (Consolid. Amd. Compl. at ¶¶ 81, 121).

Second, the complaint plausibly alleges defendants improperly concealed the existence and details of the no-AG provision. ***HN11***[] Failure to disclose information does not constitute affirmative concealment absent a duty to disclose. *Conmar, 858 F.2d at 505*. But defendants *were* under a duty to disclose. "[H]alf-truths — representations that state the truth only so far as it goes, while omitting critical qualifying information — can be actionable misrepresentations." One who *chooses* to speak has a duty to include as much information as necessary to prevent misleading others. *See* *Univ. Health Servs. v. United States, 579 U.S. __, 136 S. Ct. 1989, 2000, 195 L. Ed. 2d 348 (2016)*. Defendants sought the district court's blessing **[**30]** of their settlement agreement, yet deliberately failed to disclose a key term (Consolid. Amd. Compl. at ¶ 248). *See, Depomed*, No. C 09-05587 PJH, Dkt. No. 152. The alleged no-AG provision transformed the settlement from an apparent even split of the remaining patent term between defendants into the challenged conspiracy. And defendants' continued concealment of the no-AG provision strengthens the inference that the original omission was deliberate. Such deliberate, material omission supports an inference of fraudulent concealment.

Third, the complaint plausibly alleges defendants concealed the no-AG provision until within four years of this suit. Specifically, the complaint alleges Lupin did not reveal the no-AG provision until an earnings call on February 5, 2016 (Consolid. Amd. Compl. at ¶ 249). Defendants contend that plaintiffs were on notice of the no-AG provision months earlier, citing (and requesting judicial notice of) an earnings call on July 25, 2015, in which Lupin disclosed "Glumetza launches in February [2016] and we have an exclusivity for six months, *sole exclusivity* on Glumetza" (Dkt. No. 79 at 7, Ex. A) (emphasis added). ***HN12***[] Generally, however, a motion to dismiss turns **[**31]** on, and *only* on, the complaint. The judicial notice exception under *Federal Rule of Evidence 201* permits district courts to consider a fact "not subject to reasonable dispute" because it is "generally known" or "can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Khoja v. Orexigen Therapeutics, 899 F.3d 988, 999 (9th Cir. 2018)*.

Defendants contend "sole exclusivity" obviously meant that Lupin's 180 days of exclusivity would not be compromised by an AG launch (*id.* at 7). But, recall, two 180-day exclusivity periods hover over Lupin's market entry: (1) the FDA-granted 180 days of exclusivity against *other* generics; and (2) the settlement-granted 180 days without an authorized generic. So facially, the subject of "sole exclusivity" is open to reasonable dispute.

It is undisputed that before Lupin uttered "sole exclusivity," the public had no knowledge of the no-AG provision. Perhaps, enjoying the facts *now known*, "sole exclusivity" clearly refers to the no-AG **[*864]** provision. But defendants' suggestion must be that the reasonable observer on *July 25, 2015*, would have construed the language as disclosing the *then-unknown* settlement provision, rather than the *known* FDA-granted exclusivity — an improper attribution of hindsight. Because the language **[**32]** was subject to reasonable dispute *when uttered*, judicial notice is improper. The concealment continued into the statutory four-year period, or so a reasonable jury could find.

In sum, plaintiffs' claims are timely. Their complaint plausibly alleges defendants' continuing conspiracy to suppress competition, first by propping up the Glumetza monopoly, then by carefully splitting the market between Assertio and Santarus's brand and Lupin's generic. This certainly permits plaintiffs to recover all sales since August 29, 2015. Yet the complaint also plausibly alleges defendants' fraudulent concealment of the conspiracy to undermine competition in the Glumetza market. The concealment started when defendants concealed key portions of their settlement from the district court and it continued until within the four-year limitations period. At this stage, at least, plaintiffs may pursue recovery back to the date our jury finds Lupin would have first marketed its generic Glumetza.

2. ASSERTIO SHOULD ANSWER ALONGSIDE ITS CO-DEFENDANTS.

Assertio attempts to disclaim liability in Santarus and Lupin's scheme. It notes that settlements, and accompanying payments, are usually encouraged and that a compromise **[**33]** entry date for the generic drug in pharmaceutical patent settlement is generally lawful. Assertio reads *Actavis* to hold that the "reverse payment" is the *only* unlawful aspect of a patent settlement and proclaims its only part in this story is as the patent holder and as a signatory to the settlement agreement. And, Assertio proclaims that it had already handed Glumetza commercialization over to Santarus by then, so it couldn't have monopolized a market it left, nor did it convey any value to Lupin via the no-AG provision.

These arguments misread *Actavis* and ignore ***antitrust law***. Assertio, Santarus, and Lupin's conduct cannot be so sequestered. *Their conspiracy to maintain a monopoly and then split the Glumetza market means each is liable for the entire course of conspiratorial conduct*. Assertio cannot lay the plans, reap its bargain, and then disclaim responsibility.

First, though Assertio is correct that *Actavis* did focus on the "reverse payment" as the primary indicator of an unlawful agreement, *Actavis* did *not* hold that a "reverse payment" is the *only* way to concoct a Sherman Act violation. Indeed, *Actavis* explicitly stated the question it answered: "whether such [a reverse payment **[**34]** settlement] agreement can sometimes unreasonably diminish competition in violation of the antitrust laws." *Actavis* answered clearly. "[R]everse payment settlements such as the agreement alleged in the complaint before us can sometimes violate the antitrust laws." But the Supreme Court declined to find reverse payment settlement agreements presumptively unlawful. ***HN13***[] Instead, courts should apply the rule of reason to evaluate the agreements. *570 U.S. at 141, 157-160*. So (despite Assertio's protestations) the settlement agreement here needs to go through that evaluation.

Second, Assertio may not split off its own allegedly lawful conduct. ***HN14***[] "The character and effect of a[n antitrust] conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." "[I]t is well settled that acts which are in themselves legal lose that character when they **[*865]** become constituent elements of an unlawful scheme." *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 707, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*. Assertio's otherwise legal conduct, if part of an unlawful scheme, became unlawful.

Third, here, the complaint alleges not just an unlawful scheme, but an unlawful conspiracy. ***HN15***[] A complaint plausibly alleges a conspiracy where it pleads "enough factual matter (taken as true) **[**35]** to suggest" the parties "had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." *See Twombly, 550 U.S. at 556*; *Am. Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*. Here, the complaint doesn't just allege parallel conduct — it alleges the actual *agreement*. In February 2012, defendants laid their plan. They would walk away from the patent suit, Lupin would stop challenging the patent, and Lupin would not market a generic, thus maintaining the brand monopoly. Then, in February 2016, Lupin would market a generic, Assertio and Santarus would not market an authorized generic, and the Glumetza market would be carefully split in two (Consolid. Amd. Compl. at ¶¶ 121-24).

Fourth, Assertio, Santarus, and Lupin's performance of the scheme applies to them all. ***HN16***[] Once a conspiracy is formed, "it remains actionable until its purpose has been achieved or abandoned" and "an overt act of one partner may be the act of all without any new agreement specifically directed to that act." *United States v.*

Inryco, Inc., 642 F.2d 290, 293 fn. 6 (9th Cir. 1981). Thus, a plaintiff need not "show that each defendant or all defendants . . . have participated in each act or transaction. Involvement in but two of ten allegedly conspirational [sic] situations does not absolve [a defendant] from participation **[**36]** in the entire conspiracy if its involvement in the two was unlawful and knowingly and purposely performed." Arandell v. Centerpoint Energy Services, 900 F.3d 623, 634 (9th Cir. 2018) (additions in original) (quotation omitted).

Assertio protests repeatedly that it left the Glumetza market months before the conspiracy, having turned over the drug's commercialization to Santarus. Thus, it had no ability to restrict competition in or monopolize the relevant market. *See* Mercy-Peninsula Ambulance v. Cty. of San Mateo, 791 F.2d 755, 759 (9th Cir. 1986). But as holder of the asserted patents, Assertio was an important signatory to and co-architect of the challenged conspiracy (Consolid. Amd. Compl. at ¶¶ 121-24). Along with Santarus and Lupin, Assertio knew the scheme's purpose and intended the subsequent performance. And, because "a Sherman Act conspiracy is . . . ripe when the agreement to restrain competition is formed," Assertio's part in designing the alleged scheme is enough to hold it liable alongside the more direct market actors, Santarus and Lupin. Inryco, 642 F.2d at 293.

Assertio finally appears to contend that criminal and civil antitrust conspiracies are governed by different rules but cites no law for this proposition. Regardless, this argument lacks merit. When our court of appeals evaluated an antitrust conspiracy in the civil context in Arandell, **[**37]** it turned to a *criminal* antitrust conspiracy case, Esco Corporation v. United States, 340 F.2d 1000 (9th Cir. 1965), and to a *criminal* drug and firearm conspiracy case, United States v. Reese, 775 F.2d 1066 (9th Cir. 1985). *See* Arandell, 900 F.3d at 634.

In sum, Assertio's argument that it just stood in the background while Santarus and Lupin did all the wrongs is unavailing. Assertio signed on to the conspiracy, even **[*866]** if its co-conspirators did the heavy lifting, and remains liable for every penny, if liability is established.

3. End-Payor Plaintiffs.

This order now turns to the state law claims and the question of standing.

A. End-Payor Plaintiffs Lack Standing Outside of California, New York, and Rhode Island.

The end-purchaser plaintiffs reside only in California, New York, and Rhode Island (not counting the new plaintiffs), yet they assert claims in nearly all fifty states, and the District of Columbia and Puerto Rico. Defendants contend the end-purchaser plaintiffs lack standing to assert claims in states where they do not reside (EPP Consolid. Amd. Compl. ¶¶ 19-21; Dkt. No. 80 at 4-6). This order agrees.

HN17[] Article III's "irreducible constitutional minimum of standing" to sue requires a plaintiff to have suffered: (1) an injury-in-fact; (2) that is fairly traceable to the defendant's conduct; and (3) is redressable by a favorable **[**38]** court decision. Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992). "[A] plaintiff must demonstrate standing for each claim he seeks to press" and "separately for each form of relief sought." Just because a suit "derive[s] from a common nucleus of operative fact" does not mean "federal jurisdiction extends to all claims sufficiently related to a claim within Article III to be part of the same case." *See* DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 351-52, 126 S. Ct. 1854, 164 L. Ed. 2d 589 (2006).

HN18[] At bottom, "the injury a plaintiff suffers defines the scope of the controversy he or she is entitled to litigate." Melendres v. Arpaio, 784 F.3d 1254, 1261 (9th Cir. 2015). Here, the injury alleged is the overcharge at each purchase of Glumetza (EPP Consolid. Amd. Compl. at ¶ 224(o)). So, the scope of standing is limited to the locations of the purchases. Though it appears clear end-purchaser plaintiffs purchased Glumetza in their states of residence, there are no allegations that they suffered overcharges anywhere else (EPP Consolid. Amd. Compl. ¶¶ 19-21). **HN19**[] Claims for relief under the laws of the several states are *separate* claims for relief and, per DaimlerChrysler, require separate proof of standing. "Standing does not arise simply because illegality is in the air." In re Capacitors Antitrust Litigation, 154 F. Supp. 3d 918, 927 (N.D. Cal. 2015) (Judge James Donato). End-purchaser plaintiffs did not purchase, lack injury, and therefore lack standing in states other **[**39]** than California, New York, and Rhode Island.

Plaintiffs respond that this reasoning "conflates standing and class certification" and contravenes *Melendres*. Not so. There, plaintiffs all raised federal constitutional claims against the Maricopa County Sherriff's Department for conduct all within the District of Arizona. The short distinction is that *Melendres* did not address the circumstance here, where plaintiffs raise claims under several jurisdictions where they were not harmed. The legal distinction, though, is that the named plaintiffs in *Melendres* asserted the *same* constitutional injury as the class; they just alleged different circumstances. But the dissimilarity of circumstances raised *within the same claim* was "relevant only to class certification, not to standing." So, the question whether the named plaintiffs — who defendants conceded had standing — could present the *same* claim "on behalf of others who ha[d] similar, but not identical, interests" was one of "typicality and adequacy." *See* *Melendres, 784 F.3d at 1257-58, 1261-62*. Here, where plaintiffs raise *separate* claims under the laws of several states, the general requirement of standing **[*867]** for *each* claim and mode of relief articulated in *DaimlerChrysler* remains **[**40]** unsatisfied.

Plaintiffs remaining prudential arguments about the scope of discovery are unavailing because standing is a jurisdictional requirement.

B. END-PAYOR PLAINTIFFS' STATE ANTITRUST CLAIMS ARE TIMELY.

As above, end-payor plaintiffs may proceed only under California, New York, and Rhode Island law. State substantive law applies, including to statutes of limitations. *Erie R. Co. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*; *Guaranty Trust Co. of New York v. York, 326 U.S. 99, 110, 65 S. Ct. 1464, 89 L. Ed. 2079 (1945)*.

California, New York, and Rhode Island impose four-year antitrust statutes of limitations. *Cal. Bus. & Prof. Code §§ 16750.1*; *N.Y. Gen. Bus. Law § 340*; *R.I. Gen. Laws § 6-36-23*. ***HN20***[] California permits antitrust recovery "for actions that take place outside the limitations period if these actions are sufficiently linked to unlawful conduct within the limitations period," and recognizes fraudulent concealment. *See* *Richards v. CH2M Hill, 26 Cal. 4th 798, 111 Cal. Rptr. 2d 87, 29 P.3d 175, 183, 186 (Cal. 2001)*; *Fuller v. First Franklin Fin. Corp., 216 Cal. App. 4th 955, 962, 163 Cal. Rptr. 3d 44 (2013)*; *Grisham v. Philip Morris U.S.A., 40 Cal. 4th 623, 54 Cal. Rptr. 3d 735, 151 P.3d 1151, 1159 (Cal. 2007)*.

The New York Court of Appeals "has not determined if the continuing violations doctrine applies to claims brought under the Donnelly Act." *In re Pre-Filled Propane Tank Antitrust Litigation, No. 14-02567-MD-W-GAF, 2019 U.S. Dist. LEXIS 161394, 2019 WL 4796528 at *14 (W.D. Mo. 2019)* (Judge Gary A. Fenner). ***HN21***[] But, New York's ***antitrust law*** "should generally be construed in light of Federal [antitrust] precedent and given a different interpretation only where State policy, differences in the statutory language[,] or the legislative history justify such **[**41]** a result." *X.L.O. Concrete Corp. v. Rivergate Corp., 83 N.Y.2d 513, 634 N.E.2d 158, 161, 611 N.Y.S.2d 786 (N.Y. 1994)*. Here, defendants point to no distinctions in either the continuing violation or fraudulent concealment doctrines. Thus, the timeliness of end-payor plaintiffs' California and New York antitrust claims merges with the federal-claim analysis above.

The Rhode Island Antitrust Act also appears to contemplate continuing violations and tolling for fraudulent concealment. *See* *R.I. Gen. Laws § 6-36-23*. ***HN22***[] Regardless, the Rhode Island Supreme Court has explained that "the Rhode Island Antitrust Act must be construed in harmony with judicial interpretations of comparable federal antitrust statutes insofar as practicable, except where provisions of this chapter are expressly contrary to applicable federal provisions as construed." *ERI Max Entm't v. Streisand, 690 A.2d 1351, 1353 (R.I. 1997)* (quotation omitted).

Defendants contend Rhode Island law did not permit indirect purchaser antitrust claims until July 2013. Because the challenged conduct was in early 2012, and Rhode Island's new claim is not retroactive, plaintiffs' claims are barred (Dkt. No. 80 at 7).

Defendants are partially correct. According to the only case out of Rhode Island or the District of Rhode Island applying the new statute:

> [T]he [Rhode Island] General Assembly passed an Illinois Brick-repealer statute, **[**42]** effective July 15, 2013, which expressly conveys standing to indirect purchasers. *R.I. Gen. Laws § 6-36-7(d)*. The . . . statute is presumed to apply only prospectively, **[*868]** absent evidence of legislative intent to the contrary. Therefore, the [end-payor plaintiffs'] recovery under the Rhode Island Antitrust Act is limited to damages incurred after July 15, 2013.

In re Loestrin 24 FE Antitrust Litigation, 410 F. Supp. 3d 352, 374 (D.R.I. 2019) (Judge William E. Smith) (citation and quotation omitted). But defendants apply this law too far. Rhode Island recognized the claim by 2013 and thus recognized plaintiffs' timely challenge to late 2015 Glumetza monopoly-sales and defendants' February 2016 conduct.

Plaintiffs contend that Rhode Island's new grant of indirect purchaser standing is merely a procedural rule which applies retroactively to permit end-purchasers to challenge the original 2012 conduct (Dkt. No. 118 at 5). While it is true the amendment does not impose new standards of conduct on defendants, it *redefines who was injured* by defendants' conduct. This order will not depart from *Loestrin* — Rhode Island's grant of end-purchaser standing is prospective only. Thus, the timeliness of end-payors' Rhode Island antitrust claim merges with the federal-claim analysis above, but **[**43]** with the caveat that no recovery will be permitted before July 15, 2013, when Rhode Island first recognized the indirect antitrust claim.

C. End-Payor Plaintiffs' Other State Claims.

End-payor plaintiffs also raise state consumer protection and unjust enrichment claims. Defendants challenge the timeliness and plausibility of each.

(i) California Claims.

End-payor plaintiffs invoke *California Business and Professions Code § 17200* in both their antitrust and consumer protection claims, but the consumer protection arm fails because the complaint does not plausibly allege consumer reliance — the crux of the claim — on any deceptive conduct by defendants. *See* *Kwikset v. Sup. Ct., 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877, 890 (Cal. 2011)* ("would not have bought the product but for the misrepresentation"). The complaint admits that diabetic patients had little choice but to buy Glumetza, even with the existence of competing medications, because "Glumetza was . . . uniquely positioned in the market to offer patients with Type 2 diabetes an ability to reach their optimal dose of metformin with fewer GI side effects" (*see, e.g.*, EPP Consolid. Amd. Compl. at ¶¶ 90, 198). So, while end-payors' *§ 17200* antitrust prong proceeds, the consumer protection prong fails.

But plaintiffs' unjust enrichment claim may proceed. Defendants contend **[**44]** California does not recognize unjust enrichment as a distinct claim (Dkt. No. 118 at 23). Yes, it does. ***HN23***[] "When a plaintiff alleges unjust enrichment, a court may construe the cause of action as a quasi-contract claim seeking restitution." *See* *Astiana v. Hain Celestial Grp., 783 F.3d 753, 762 (9th Cir. 2015)* (quotation omitted).

HN24[] Unjust enrichment has a three-year statute of limitations. *Cal. Civ. Proc. Code § 338(d)*. This claim is timely as to conduct after August 29, 2016. Absent binding precedent to the contrary, this order will apply the continuing violations doctrine to this claim. Bausch did not market an authorized generic, and thus the scheme plausibly continued, until February 2017. For the reasons stated above, plaintiffs may recover for unjust enrichment upon Glumetza overcharges beginning on August 29, 2016.

HN25[] California also recognizes fraudulent concealment. *Fuller v. First Franklin Fin.* ***[*869]*** *Corp., 216 Cal. App. 4th 955, 962, 163 Cal. Rptr. 3d 44 (2013)*; *Grisham v. Philip Morris U.S.A., 40 Cal. 4th 623, 54 Cal. Rptr. 3d*

735, 151 P.3d 1151, 1159 (Cal. 2007); Cmm'ty Cause v. Boatwright, 124 Cal. App. 3d 888, 900, 177 Cal. Rptr. 657 (1981). But plaintiffs concede notice of the no-AG provision by February 2016, so the chain of concealment was broken (EPP Consolid. Amd. Compl. at ¶ 211). This doctrine does not permit earlier recovery.

(ii) New York Claims.

HN26[] The consumer protection law has a three-year statute of limitations. Morelli v. Weider Nutr. Grp., 275 A.D.2d 607, 608, 712 N.Y.S.2d 551 (2000). And in New York, a continuing violation "may only be predicated on continuing unlawful acts and not on continuing effects of **[**45]** earlier unlawful conduct." Selkirk v. State, 249 A.D.2d 818, 671 N.Y.S.2d 824, 825 (1998). But, as above, the continuing violation here is based upon defendants' *maintenance* of the precarious Glumetza monopoly, not the lingering effects of a final decision. On these grounds, plaintiffs' consumer protection claim remains timely as to overcharges since August 29, 2016. But, as above, because plaintiffs learned of the no-AG provision by February 2016, fraudulent concealment does not enable earlier recovery.

Moreover, the claim is plausibly alleged. Defendants contend the complaint does not allege any deceptive act or practice within the state of New York (Dkt. No. 80 at 10). **HN27**[] New York's § 349 requires an "act or practice" that was "misleading in a material way." But "reliance is not an element" — a plaintiff need only show the "defendant's material deceptive act caused the injury." Stutman v. Chem. Bank, 95 N.Y.2d 24, 731 N.E.2d 608, 611, 709 N.Y.S.2d 892 (N.Y. 2000) (quotation omitted). Section 349 has continually been interpreted to cover antitrust violations. *See, e.g.,* Loestrin, 410 F. Supp. 3d at 378; In re Effexor Antitrust Litigation, 337 F. Supp. 3d 435, 466 (D.N.J. 2018) (Judge Peter G. Sheridan); Macquarie Grp. v. Pac. Corp. Grp., No. C 08-02113-IEG-WMC, 2009 U.S. Dist. LEXIS 16554, 2009 WL 539928 at *9 (S.D. Cal. Mar. 2, 2009) (Judge Irma E. Gonzalez); New York v. Feldman, 210 F. Supp. 2d 294, 300-02 (S.D.N.Y. 2002) (Judge Shira A. Scheindlin). And the allegation that one end-payor plaintiff is the largest grocery union in New York with 23,000 plan participants leads to the plausible **[**46]** conclusion that a substantial number of Glumetza purchases "occur[ed] in New York." *See* Goshen v. Mutual Life Ins. Co. of New York, 98 N.Y.2d 314, 774 N.E.2d 1190, 1195, 746 N.Y.S.2d 858 (N.Y. 2002). Thus, plaintiffs' New York consumer protection claim stands.

But plaintiffs' unjust enrichment claim fails. Defendants correctly note New York's unjust enrichment claim requires that: (1) plaintiff conferred the benefit *directly* on defendant; and (2) plaintiff and defendant have a direct relationship (Dkt. No. 80 at 17, 19). In *Georgia Malone & Co. v. Rieder*, the New York Court of Appeals dismissed an unjust enrichment claim where the parties "simply had no dealings with each other" and did not have "any contact regarding the purchase transaction." 19 N.Y.3d 511, 973 N.E.2d 743, 747, 950 N.Y.S.2d 333 (N.Y. 2012). So too here. The end-payor plaintiffs, by definition, do not have direct relationships with defendants. Nor do they point to binding precedent tempering the requirement.

(iii) Rhode Island Claims.

Plaintiffs' consumer protection claim fails. Defendants contend it fails because: (1) defendants caused no confusion or misunderstanding among consumers; (2) because the end-payor plaintiffs are not "purchasers of products for household or **[*870]** personal purposes" (Dkt. No. 80 at 11-12). Plaintiffs misapprehend the second argument, responding that end-payor plaintiffs **[**47]** are "persons" under Rhode Island's broad definition. R.I. Gen. Laws § 6-13.1-1 ("any other legal entity"). But defendants actually point to § 6-13.1-5.2, which limits the class of private plaintiffs to "[a]ny person who purchases . . . goods or services primarily for personal, family, or household purposes . . . ." Under the plain text, end-payor plaintiffs (not being human) were not using Glumetza for "personal, family, or household purposes" but rather to provide Glumetza to subsequent consumers. As plaintiffs fail to respond to this argument, their Rhode Island deceptive trade practices claim fails.

But plaintiffs' unjust enrichment claim survives. Defendants contend Rhode Island's unjust enrichment claim requires: (1) plaintiff to directly confer the benefit on defendant; and (2) defendant to appreciate the benefit (Dkt.

Nos. 80 at 17; 146 at 12). Defendants cite no binding authority — and there appears to be none, at least since *Bailey v. West, 105 R.I. 61, 249 A.2d 414, 417 (R.I. 1969)* articulated the elements of quasi-contract — for their narrow view of the relationship between a plaintiff and defendant under Rhode Island unjust enrichment law. Moreover, defendants' assertion that "EPPs do not allege an appreciation by the defendant of the benefit conferred" is perplexing **[**48]** (Dkt. No. 146 at 12). End-payor plaintiffs allege Assertio and Santarus (later Salix, then Bausch) surely appreciated the over one billion dollars in Glumetza sales by 2016 and Lupin surely appreciated the nearly three hundred million dollars in generic sales during the first six months of 2016 (EPP Consolid. Amd. Compl. at ¶ 140(h)-(i)). If, however, defendants' argument is that each sale of Glumetza was, alone, too small to "appreciat[e]," the undersigned looks forward to the jury's reaction. Last, defendants do not contest the timeliness of the Rhode Island unjust enrichment claim (Dkt. No. 80 at 20 fn. 4). The claim stands.

The final question is whether plaintiffs may recover for unjust enrichment before July 15, 2013, when Rhode Island first recognized the indirect antitrust claim. Defendants contend permitting such recovery would circumvent *Illinois Brick*'s holding absent explicit direction to do so (Dkt. No. 146 at 9). This argument is an abbreviated preemption analysis. If defendants wish to argue the Sherman Act so preempts state common law, they may do so. But on the arguments presented, this order will not dismiss the Rhode Island unjust enrichment claim before July 15, 2013. **[**49]**

4. RETAILER PLAINTIFFS.

A. RETAILER PLAINTIFFS' OWN SHERMAN ACT CLAIMS FAIL.

Defendants challenge retailer plaintiffs' standing to sue on their own behalf under *Illinois Brick*, which bars federal antitrust damages claims by indirect purchasers. *See* *In re ATM Fee Antitrust Litigation, 686 F.3d 741, 748 (9th Cir. 2012)*. Retailer plaintiffs respond, and defendants do not contest, that *Illinois Brick* does not bar indirect purchasers' claims for injunctive relief (Dkt. No. 119 at 14-15). *See* *In re NFL's Sunday Ticket Antitrust Litigation, 933 F.3d 1136, 1156 fn. 6 (9th Cir. 2019)* (citing *Lucas Auto. Eng'g, Inc. v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1235 (9th Cir. 1998)* (Judge Wallace Tashima, concurring)). Retailer plaintiffs also contend in their brief that certain of them *did* directly purchase Glumetza or generic Glumetza from defendants (Dkt. No. 119 at 14-15). But retailers' complaints neither allege direct purchase nor pray for injunctive relief. To the extent retailer plaintiffs seek relief *on their own behalf* **[*871]** under the Sherman Act, these claims are either barred or not alleged.

B. THE PARTIAL ASSIGNMENTS DO NOT YET WARRANT INTERVENTION OR JOINDER.

Retailer plaintiffs sue as assignees of various direct purchasers, including McKesson Corporation (CVS Compl. at ¶¶ 19-20; Walgreen Compl. at ¶¶ 19-22). Another assignee of McKesson, KPH Healthcare, is currently part of the putative direct-purchaser plaintiff class (Consolid. **[**50]** Amd. Compl. at ¶ 16). Defendants contend these split claims raise the specter of a "multiplicity of suits" and "duplicative recovery" and request dismissal or stay of the separate retailer complaints (Dkt. Nos. 98 at 8-10, 145 at 13).

Defendants do not challenge retailer plaintiffs' rights to opt-out of the direct-purchaser class, rather they argue *Rule 19* requires partial claim assignments to be raised in the assignor's complaint (Dkt. No. 145 at 11). They rely on *In re Fine Paper Litigation State of Washington* and *Bailey Lumber & Supply Co. v. Georgia-Pacific Corporation*, where the United States Court of Appeals for the Third Circuit and District Court for the Southern District of Mississippi (respectively) expressed concern that split partial claims would undermine the certainty of judgment or settlement, contravening *Rule 19*. *See* *632 F.2d 1081, 1091 (3rd Cir. 1980)*; *No. C 08-01394 LG-JMR, 2009 U.S. Dist. LEXIS 131486, 2009 WL 2872307, *6-7 (S.D. Miss. Aug. 10, 2009)* (Judge Louis Guirola, Jr.).

The circumstances here have already been persuasively addressed in this District:

> *Bailey Lumber* and *Fine Paper* stand for the principle that antitrust plaintiffs with partially assigned claims may not opt [out] of a class due to concerns that they will circumvent joinder rules or interfere with the rights of the defendant to be free **[**51]** of excessive and repeated suits growing out of same basic facts. They do not stand for the proposition that partially assigned claims must be dismissed or stayed in actions such as this, where there is no "prior history" of litigation of these claims in a different court.

*United Food & Comm. Workers Local 1776 & Part. Empls. Health & Welfare Fund v. Teikoku Pharma USA, Inc., No. MD 14-02521 WHO, 2015 U.S. Dist. LEXIS 94220, 2015 WL 4397396, at *6-7 (N.D. Cal. July 17, 2015)* (Judge William H. Orrick). Indeed, as Judge Orrick noted in *United Food*, both *Fine Paper* and *Bailey Lumber* addressed the scenario where classes had already been certified. And in *Bailey Lumber*, the plaintiff *had* filed a new case in a new venue. *See ibid.*; *Fine Paper, 632 F.2d at 1091*; *Bailey Lumber, 2009 U.S. Dist. LEXIS 131486, 2009 WL 2872307 at *1*.

Defendants' concerns are not ripe. As to defendants' complaint of the uncertainty from multiple suits — regardless of whether some partial assignees filed as direct-purchaser or retailer plaintiffs, all suits arising out of the challenged conduct are consolidated here. This order will not speculate about whether other complaints may be filed elsewhere. And as to defendants' fears of duplicative recovery, the Court is confident that the high-end lawyers in this case, following discovery, will obtain all the information necessary to ensure damages are **[**52]** tailored to each partial assignment. Again, this order will not speculate about harm that has not yet, and may never, occur.

CONCLUSION

At the pleading stage, plaintiffs' antitrust claims are timely and they may recover on Glumetza sales by any defendant beginning from the date when Lupin otherwise would have entered the market.

[*872] But, end-payor plaintiffs lack standing to pursue claims anywhere but California, New York, and Rhode Island. Their consumer protection claims fail in California and Rhode Island, but may proceed under New York law. And their unjust enrichment claims fail in New York, but may proceed under California and Rhode Island law. End-payors' claims raised under the laws of other states or territories are dismissed.

Then, to the extent retailer plaintiffs seek to sue under the Sherman Act on their *own* behalf, these claims are dismissed as not plead. But, at this stage, retailer plaintiffs' separate complaints will not be dismissed as improper partial-claim assignments.

Given the substantial time plaintiffs have had to amend and coordinate complaints since these cases were first filed, leave to further amend will not lightly be granted. Nevertheless, should plaintiffs wish **[**53]** to seek leave to file further amended complaints, they may do so by **MARCH 26 AT NOON**. Any such motions must include as an exhibit a redlined version of the proposed amendment that clearly identifies all changes from the amended complaint. This order highlighted certain deficiencies in the consolidated, amended complaints, but it will not necessarily be enough to add sentences parroting each missing item identified herein. If plaintiffs move for leave to file yet more consolidated amended complaints, they should be sure to plead their best case and consider all criticisms made by defendants, including those not reached by this order.

This order does not address the two latest complaints, Nos. C 20-01196 WHA and C 20-01198 WHA. Defendants may move to dismiss these two complaints by **MARCH 26 AT NOON** in a single, consolidated motion — addressing only issues not resolved herein — no longer than **15 PAGES**. Plaintiffs may respond in a single brief no more than **15 PAGES** by **APRIL 2 AT NOON**. Defendants may reply in a single brief no more than **5 PAGES** by **APRIL 9 AT NOON**. A hearing will take place on **APRIL 16 AT 8:00 A.M.**

IT IS SO ORDERED.

Dated: March 5, 2020.

Counsel: [*1] For Comprehensive Security, Inc., Associated Protective Service, Inc., OnTrac Security, LLC, Plaintiffs: Bryant B. Kroll, W. Gary Blackburn, The Blackburn Firm, PLLC, Nashville, TN USA.

For Metropolitan Government of Nashville and Davidson County, Defendant: J. Brooks Fox, Metropolitan Legal Department, Nashville, TN USA.

Judges: WAVERLY D. CRENSHAW, JR., CHIEF UNITED STATES DISTRICT JUDGE.

Opinion by: WAVERLY D. CRENSHAW, JR.

Opinion

MEMORANDUM OPINION

Comprehensive Security, Inc., Associated Protective Service, Inc., and OnTrac Security, LLC ("Plaintiffs") allege that the Metropolitan Government of Nashville and Davidson County ("Metro") has engaged in anti-competitive conduct in the private security services market in Davidson County, Tennessee. Metro seeks summary judgment (Doc. Nos. 73, 89, 90, 92-1 to 92-15, 93, 94), presenting the narrow question of whether there are "genuine issues as to any material fact and [whether] the moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. Summary judgment is not appropriate if after all inferences made in the light most favorable to Plaintiffs, it is clear that a "rational trier of fact" could find for Plaintiffs because there are genuine issues for trial. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587 (1986)*. Applying **[*2]** that standard here, Metro's motion will be denied in part and granted in part.

I. The Summary Judgment Record in Plaintiffs Most Favorable Light[1]

A. Predatory pricing

Plaintiffs allege that Metro[2] engages in predatory pricing. In approximately 2013-14, Metro's price for private security services went from $66—$70 per hour to $40 per hour, and in 2017 increase to $44.50 per hour. (Doc. Nos. 90 at ¶¶ 1-4; 94 at ¶¶ 51, 56, 134.) Metro's lower price not only did not produce a profit, but was in fact below Metro's actual operating cost. (Doc. Nos. 90 at ¶ 2; 94 at ¶ 134.) This change was surprising according to MNPD Officer Kim Forsyth, who manages MNPD's security services contracts with private vendors. (Doc. No. 92-4 at 40.)

Her reaction arose from her personal knowledge that "all these vendors and companies [were] so comfortable paying $66 an hour for . . . probably 10, 20 years—for it to drop that low, . . . I didn't understand it." (Id. at 41.) Forsyth understood that the lower price would "undercut the private security agency rate." (Id.)

As a result, Plaintiffs began losing business to Metro. (Doc. No. 92-3 at 4.) At the same time, however, Metro continued to bill its departments (e.g., **[*3]** Metro Schools, Nashville Electric Service, Metro Water) $70.00 per hour for the same services. (Doc. No. 94 at ¶¶ 72-77.)

Plaintiff's expert Dr. Gilbert L. Mathis, Professor Emeritus of Economics at Murray State University, offers his expert opinion supporting Plaintiffs' pricing claim. Dr. Mathis explains that "the practice of pricing below the cost of production in the short run, to drive competitors out of business and to discourage new entrants into a market so that the firm can enjoy higher future prices and profits is considered predatory pricing. Offering a product or providing a service at zero cost would, more likely than not, be below the cost of production." (Doc. No. 92-8 at p. 10.) In Dr. Mathis's opinion, "MNPD's practice of providing a service below cost in the short run will, more likely than not, drive competitors out of business and discourage new entrants into the market and will enable MNPD to enjoy higher future prices and profits," and is therefore considered predatory pricing. (Id. at ¶ 15.)

B. Form 150

Plaintiffs allege that Metro uses Form 150 to deter Metro officers from seeking secondary security services employment in the private security market through Plaintiffs **[*4]** and other security firms. MNPD officers must submit Form 150 to get approval for secondary security services employment. (Doc. Nos. 94 at ¶ 24; 92-3 at ¶ 25.) Notwithstanding Metro's explanation that Form 150 ensures that supervisors can review where and when MNPD officers work (Doc. No. 90 ¶ 5; Doc. No. 73-2 at 100-01), Plaintiffs say that Form 150 is "a weapon" of deterrence. (Doc. No. 92-2 ¶ 2). According to Plaintiffs, Form 150 dissuades MNPD officers from working for secondary employers, because there are multiple and unnecessary levels of approval. (Doc. Nos. 90 ¶ 5; 94 at 24; 92-3 ¶ 25; 92-2 ¶¶ 1-3; 92-1 ¶¶ 1-2.) For example, Form 150 requires multiple "job letters" for each MNPD officer (Doc. No. 92-3 ¶ 25), requires daily lists of officers' locations (id.), and the approval process is delayed by Metro and sometimes is rejected. (Id. ¶¶ 29-30).

C. Requiring Special Event Coordinators to Use MNPD Officers

Plaintiffs also allege that Metro pushes them out of the private security market by requiring special event coordinators to use MNPD officers. Plaintiffs have evidence that MNPD has engaged in a concerted campaign to require special events coordinators to hire MNPD officers. **[*5]** Further, MNPD selectively provides free services to event coordinators to "take over" special events. (Doc. No. 90 at ¶¶ 13-14, 23-24.) As one example, Loyd Poteete, the owner of Comprehensive Security, says that his company lost numerous contracts because Metro required event coordinators to use the MNPD. (Doc. No. 92-3 at ¶¶ 14 16.) Of course, Metro disagrees and contends that Metro does not require special events coordinators to hire only MNPD officers. (Doc. Nos. 73-1 at ¶¶ 7-9; 90 at ¶¶

[1] The Court relies upon the parties competing responses to the statements of undisputed facts construed in the light most favorable to Plaintiffs. (Doc. Nos. 90 and 94).

[2] Metro engages in the security services market through Metro's Police Department ("MNPD") that will be referred to interchangeably in this Memorandum Opinion.

13-15.) Metro relies on a MNPD Captain who avers that MNPD has only offered free services for events determined to be potential terrorist targets or to have a major public safety impact on the public. (Doc. No. 90 at ¶¶ 23-24.)

D. Prohibiting MNPD Officers from Working at Special Events

Plaintiffs further allege that Metro restricts competition by prohibiting its officers from working for Plaintiffs at special events. Plaintiffs rely on the March 1, 2018 Memorandum of MNPD Chief that prohibits MNPD officers from being employed by private security companies at special events. (Doc. No. 73-4 at 46.) Metro suggests that this policy change ensures that MNPD "had proper oversight of all of [the] officers **[*6]** performing police duties." (Id. at 46-48; Doc. No. 90 at ¶ 26.) But Plaintiffs assert this is all a pretext. They offer contrary evidence that "98 or 99% of the time" private security companies were already required to hire a MNPD supervisor to supervise officers during private security events (Doc. Nos. 90 at ¶ 26; 92-3 at ¶ 7), and that all officers must undergo the same training with their own department. (Doc. Nos. 90 at ¶ 27; 92-3 at ¶¶ 9-10).

The Plaintiffs' claims regarding Form 150, requiring event coordinators to use MNPD and requiring MNPD at special events is again supported by Dr. Mathis. Dr. Mathis has opined on Metro's ability to increase its market power and reduce competition in the industry. Based on empirical data, there are 3,615 certified officers in Davidson County and the six adjacent counties. (Doc. No. 92-8 at ¶ 7.) The distribution of officers by county is:

Davidson — 1,488 officers (78 officers are other than MNPD)
Rutherford — 619 officers
Williamson — 456 officers
Sumner — 455 officers
Wilson — 318 officers
Robertson — 172 officers
Cheatham — 107 officers

(Id. at ¶ 8.) The distribution in terms of the market share is:

MNPD — 39%
Rutherford — 17%
Williamson — 13%

Sumner **[*7]** — 12%
Wilson - 9%
Robertson — 5%
Cheatham — 3%
Davidson County (other) — 2%

(Id. at ¶ 9.) Dr. Mathis concludes that "[w]ith 39% of the available pool of POST-certified officers, MNPD has considerable market power." (Id. at ¶ 10.) Dr. Mathis further explains that "if a firm reduces or limits the resources available and needed by rival firms in an industry, to produce a product or provide a service, it effectively makes the industry more concentrated, increases the market power of the dominant firm and reduces competition in the industry." (Id. at p. 10.) As a result, "when MNPD effectively reduced the pool of available officers" . . . it would make [Plaintiffs] less competitive because the officers they could employ would have to travel further which would be more costly and time consuming. (Doc. No. 92-8 at ¶ 11.) In Dr. Mathis's opinion, "MNPD's reduction or limitation of the resources available and needed by private security companies to provide a service — POST[-certified] police officers performing security — effectively makes the industry more concentrated, increases the market power of MNPD, which is the dominant firm, and reduces competition in the industry." (Id. at ¶ 13.) Mathis **[*8]** concludes that "MNPD's ban on allowing MNPD officers from working part time for private security effectively reduces the pool of available workers to private security firms by 39 percent and constitutes a partial barrier to entry for the private security firms resulting in lesser competition in the market." (Id. at ¶ 14.)

II. Analysis

Section 2 of the Sherman Act punishes any "person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize" commerce. *15 U.S.C. § 2*. "Under this statute, the defendant must 'use . . . monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor.'" *Spirit Airlines, Inc. v. Nw. Airlines, Inc., 431 F.3d 917, 931 (6th Cir. 2005)* (alterations in original) (quoting *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 482-83 (1992)*. A Sherman Act monopolization claim has two elements: "(1) the possession of monopoly power in a relevant market; and (2) the willful acquisition, maintenance, or use of that power by anti-competitive or exclusionary means as opposed to 'growth or development resulting from a superior product, business acumen, or historic accident.'" *Conwood Co., L.P. v. U.S. Tobacco Co., 290 F.3d 768, 782 (6th Cir. 2002)*(quoting *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 595-96 (1985)*). "An attempted monopolization [under Section 2] occurs when a competitor, with a dangerous probability of success, engages in anti-competitive practices the specific design of which **[*9]** are to build a monopoly or exclude or destroy competition." Id. (internal quotations omitted).

Metro seeks summary judgment because (1) Plaintiffs lack evidence of monopolization based on theory of predatory pricing; (2) Plaintiffs do not have antitrust standing for a monopolization claim based upon Form 150; (3) Plaintiffs' monopolization claim based on Metro requiring the use of its own officers by special events coordinators fails on the law and evidence presented; and (4) Plaintiffs' monopolization claim based on Metro's refusal to allow officers to work for private security companies at special events must be dismissed as a matter of law.

1. Predatory Pricing

Plaintiffs' first avenue to Section 2 liability is monopolization or attempted monopolization by means of predatory pricing. They claim that MNPD attempts to "monopolize and eliminate competition from private security companies" by "undercut[ting] prices and operat[ing] at a loss." (Doc. No. 60 ¶¶ 18-25.) Metro contends that this claim is barred by the statute of limitations, and that Plaintiffs have not adduced any evidence of recoupment of losses, one of the two required elements of a predatory pricing claim. (Doc. No. 74 at 5-6.)

[*10] a. Statute of Limitations

Predatory pricing claims have a four-year statute of limitations. *Peck v. Gen. Motors Corp., 894 F.2d 844, 848-49 (6th Cir. 1990)*. "The cause of action accrues and the limitations period commences each time a defendant commits an act which injures the plaintiff's business." *Id. at 849* (citing *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338 (1971)*). This action was filed on April 16, 2018. There is a dispute of material facts over when MNPD lowered its rates—MNPD Captain Corman maintains it happened in 2013, but a July 2017 letter from Captain Corman states that it occurred in 2014. The jury will need to determine this disputed material fact.

The Court notes that Plaintiffs also assert that their predatory pricing claim is timely under a continuing violations theory. The Court need not resolve this question. However, the Court has substantial concerns about application of the continuing violations theory if the date of the price decrease is outside of the four-year limitations period. As this Court explained in *Hosp. Auth. of Metro Gov't of Nashville v. Momenta Pharm., Inc., 353 F. Supp. 3d 678 (M.D. Tenn. 2018)*:

> In an antitrust lawsuit, the cause of action accrues and the accompanying limitations period commences "each time a defendant commits an act that injures the plaintiff's business." *In re Se. Milk Antitrust Litig., 555 F. Supp. 2d 934, 946-47 (E.D. Tenn. 2008)* (citation omitted). "For statute of limitations purposes . . . the focus is on the timing **[*11]** of the causes of injury, i.e. the defendant's overt acts, as opposed to the effects of the overt acts." *DXS, Inc. v. Siemens Med. Sys. Inc., 100 F.3d 462, 467 (6th Cir. 1996)* (citing *Peck [], 894 F.2d [at] 849 []*). A continuing antitrust violation is one in which the plaintiff's interests are repeatedly invaded. *Peck, 894 F.2d at 849* (quoting *Pace Indus., Inc. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir.1987)*). When a plaintiff alleges a continuing antitrust violation, the cause of action "accrues each time a plaintiff is injured by an act of defendants." *Barnosky Oils, Inc. v. Union Oil Co. of Cal., 665 F.2d 74, 81 (6th Cir. 1981)*. However, even in the event of an alleged continuing violation, "an overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act." *Peck, 894 F.2d at 849*. Such an overt act involves: (1) a

> new and independent act that is not merely a reaffirmation of a previous act; (2) that inflicts new and accumulating injury on the plaintiff. *In re Se. Milk Antitrust Litig., 555 F. Supp. 2d at 947*.

353 F. Supp. 3d at 693.

The Sixth Circuit has "repeatedly rejected invocations of the continuing-violations defense that are mere reaffirmations of a previous act." *Z Techs. Corp. v. Lubrizol Corp., 753 F.3d 594, 600 (6th Cir. 2014)* (in the context of a price increase following a merger). This authority suggests that competitors are injured immediately by predatory pricing, as opposed to being injured anew by ongoing use of a low price or later when prices are eventually raised. See *Berkley Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 295 (2d Cir. 1979)* ("As soon as the dominant firm commences [a predatory **[*12]** pricing] policy, other producers, who may be driven out of the market, are injured."); *In re Wholesale Grocery Prod., 722 F. Supp. 2d 1079, 1088 (D. Minn. 2010)* (in predatory pricing, distinguishing between immediate injury to competitors and later injury to customers) (quoting 2 PHILIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** ¶ 320 (3d ed. 2007) ("[C]ompetitors are injured immediately by predatory pricing, but customers would not be injured until much later, when the predation has done its work and the monopolist raises its price.")); Meijer, Inc. v. 3M, No. Civ. A. 04-5871, 2005 WL 1660188, *4 (E.D. Pa. July 13, 2005) ("As soon as the dominant firm commences [ ] a [predatory pricing] policy, other producers, who may be driven out of the market, are injured.")

b. Elements of Monopoly Claim

A monopolization claim can be based upon predatory pricing. *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222 (1993)*. "It is not anticompetitive for a company to reduce prices to meet lower prices already being charged by competitors." *D.E. Rogers v. Gardner-Denver Co., 718 F.2d 1431, 1435 (6th Cir. 1983)* (citations omitted). Rather, the "essence" of predatory pricing is that "[a] business rival has priced its products in an unfair manner with an object to eliminate or retard competition and thereby gain and exercise control over prices in the relevant market." *Brooke Grp., 509 U.S. at 222*. "What makes pricing a form of predation is not the downswing in prices but the gouging upswing in prices after **[*13]** the competition has been eliminated or disciplined." *Energy Conversion Devices Liquidation Tr. v. Trina Solar Ltd., 833 F.3d 680, 689 (6th Cir. 2016)* (en banc).

Accordingly, a predatory-pricing claim under Section 2 requires the plaintiff to plead and prove (1) that the defendants charged below-cost prices, and (2) that they "had a dangerous probability[] of recouping its investment in below-cost prices." *Brooke Grp., 509 U.S. at 222, 224*; see *Weyerhauser Co. v. Ross-Simmons Hardwood Lumber Co., Inc., 549 U.S. 312, 318-19 (2007)*; *Energy Conversion, 833 F.3d at 685*. The recoupment element requires two showings: first, "below-cost pricing must be capable . . . of producing the intended effects on the firm's rivals, whether driving them from the market, or . . . causing them to raise their prices to supracompetitive levels within a disciplined oligopoly," and, second, "[d]etermining whether recoupment of predatory losses is likely requires an estimate of the cost of the alleged predation and a close analysis of both the scheme . . . and the structure and conditions of the relevant market." *Superior Prod. P'ship v. Gordon Auto Body Parts Co., Ltd., 784 F.3d 311, 319 (6th Cir. 2015)* (alterations in original) (quoting *Brooke Grp., 509 U.S. at 225-26*).

Here, Plaintiffs have established that MNPD significantly lowered its rates for private security services. They have also presented evidence that MNPD's reduced rate adjustment is (1) at or below cost, (2) results in either no profit or a loss, and (3) makes MNPD more competitive. Metro debates whether MNPD's rates **[*14]** are "below any appropriate measure of its costs." (Doc. No. 93 at 1.) At minimum, there are clearly triable disputed issues of fact regarding the first prong—i.e., "charging below-cost prices"—of Plaintiffs' predatory pricing claim, making summary judgment inappropriate.

Plaintiffs have also raised a question of fact regarding the second prong—i.e., the dangerous probability of recoupment of MNPD's losses. Plaintiffs' expert, Dr. Mathis, believes that "MNPD's practice of providing a service below cost in the short run will, more likely than not, drive competitors out of business and discourage new entrants into the market and will enable MNPD to enjoy higher future prices and profits." (Doc. No. 92-8 ¶ 15.) Plaintiffs have also offered evidence that MNPD has systematically used below-cost pricing to garner additional private security services contracts (and thus market share) that will be profitable for MNPD in the future. Together, this evidence is sufficient to raise the question of fact regarding whether there is a dangerous probability MNPD will recoup its losses.

Plaintiffs are entitled to a trial on the Section 2 predatory pricing theory.

2. Form 150 Process

Plaintiffs also contend that Form **[*15]** 150 process is anti-competitive. Metro contends that Plaintiffs lack antitrust standing to rely upon Form 150. (Doc. No. 74 at 7-8.) The Court must, as a matter of law, "reject claims . . . when antitrust standing is missing." *NicSand, Inc. v. 3M Co., 507 F.3d 442, 449-50 (6th Cir. 2007)* (en banc). In short, antitrust injury requires more than "allegations of consequential harm" even when a complaint is "buttressed by an allegation of intent to harm the [plaintiff]." *Id. at 449* (quoting *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 545 (1983)*; see also *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 338, 344 (1990)*. Even though a plaintiff may allege that an injury is "causally related to an antitrust violation," it "will not qualify as 'antitrust injury' unless it is attributable to an anticompetitive aspect of the practice under scrutiny." *NicSand, 507 F.3d at 450* (quoting *Atl. Richfield, 495 U.S. at 334*).

Plaintiffs have evidence raising a dispute question of material fact concerning whether MNPD's administration of the Form 150 process causes more than a tenuous or "consequential harm" to Plaintiffs. *Associated Gen. Contractors, 459 U.S. at 545*. The record is replete with disagreements about the Form 150 requirements and process, including why they were implemented and what competitive impact they have actually had on Plaintiffs. Plaintiffs offer evidence that the Form 150 process creates unnecessary hurdles for MNPD officers seeking secondary employment and for **[*16]** private security companies seeking special events contracts. Metro attempts to explain that its use of Form 150 is not anti-competitive because Plaintiffs concede they hire from officers available from neighboring counties and other police departments. But which version to believe is the role of the jury not the Court on Metro's summary judgment.

Plaintiffs' expert Dr. Mathis reinforces the factual dispute of the parties. He believes that "MNPD's reduction or limitation of the resources available and needed by private security companies to provide a service—POST[-certified] police officers performing security—effectively makes the industry more concentrated, increases the market power of MNPD, which is the dominant firm, and reduces competition in the industry." (Id. ¶ 13.) Viewing the summary judgment record as a whole, summary judgment must be denied.

3. Requiring the Use of MNPD Officers by Special Event Coordinators

Plaintiffs allege that MNPD is monopolizing or attempting to monopolize the private security services market by requiring special events coordinators to use MNPD officers. Metro argues this claim must be dismissed for several reasons.

Metro first contends Plaintiffs do **[*17]** not identify the "relevant market." (Doc. No. 74 at 9-12); see *NHL Players' Assoc. v. Plymouth Whalers Hockey Club, 325 F.3d 712, 719-20 (6th Cir. 2003)*. The relevant market consists of the product or service market and the geographic market. *Brown Shoe Co., Inc. v. United States, 370 U.S. 294, 324 (1962)*. "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." Id.; see *White & White, Inc. v. Am. Hosp. Supply Corp., 723 F.2d 495, 500 (6th Cir. 1983)*. "A geographic market is defined as an area of effective competition" or "the locale in which consumers of a product or service can turn for alternative sources of supply." *Conwood Co., 290 F.3d at 782* (internal quotations omitted).

Metro argues that actual geographic market is too broad. (Doc. No. 74 at 11-12.) The Court does not agree. While the Complaint states that Plaintiffs operate in "Davidson County and surrounding areas" (Doc. No. 60 ¶ 4), it specifies that "[t]he acts and omissions of [Metro] complained of . . . arise from the MNPD's efforts to drive the Plaintiffs out of the relevant market for providing private security at venues *within Davidson County, Tennessee*" (Id. ¶ 6 (emphasis added)). In response to the motion, Plaintiffs have expressly limited their Section 2 claims to the private security services market in Davidson County. (Doc. Nos. 89 at 16; 90 ¶ 11.) **[*18]** This case is simply not analogous to *Blue Ribbon Properties, Inc. v. Hardin Cty. Fiscal Court, 50 F. App'x 671 (6th Cir. 2002)*, relied upon by Metro. (Doc. No. 93 at 4-5.) There, the plaintiff's presented varying explanations of the relevant market. Here, Plaintiffs are only concerned with the market for private security services in Davidson County, where MNPD operates.

Metro suggests that the service market is too broad or vague because Plaintiffs discuss three kinds of private security services—traffic control, static security, and mobile security.[3] (Doc. No. 74 at 10-11.) However, these merely "refer to the job duties of an officer and involve[] the same type of service." (Doc. No. 92-3 ¶ 31.) Indeed, the summary judgment record reflects that multiple security services are often called for and provided by officers for each vendor and at any given event. For example, MNPD Officer Kim Forsyth explained that MNPD has a "few hundred" private security services contracts that are "general in nature" under which the MNPD provides "different kinds of services" including security "manpower" and "traffic direction and control," depending on the needs of the vendor and the event. (Doc. No. 92-15 at 20-24.)

Second, Metro contends that MNPD, through its police powers, exercises control **[*19]** over public safety in Davidson County as a matter of historic development as opposed to a matter of willful acquisition and maintenance of monopolistic power. (Doc. No. 74 at 12-13.) This, however, is belied by Plaintiffs' evidence. Plaintiffs have evidence that MNPD's public safety reasons may be a pretext. Metro's witnesses, of course, disagree and maintain that MNPD acts with proper civic purpose. Monopolistic power attained through "historic accident" may not necessarily be improper, *Conwood, 290 F.3d at 782*, however, Metro has not established as a matter of *undisputed* fact that its actions in requiring use of its officers by special events coordinators are the result of historic development as opposed to intentional anticompetitive activity.

Third, Metro argues that there is no evidence that Metro requires event coordinators to hire MNPD officers. (Doc. No. 74 at 13-16.) All this argument does, however, is highlight the disputed factual issues in this record. Plaintiffs have evidence that MNPD requires special events coordinators to hire MNPD officers and selectively provide free services to "take over" special events based on the inconsistent pretext of terrorism threats or public safety. As just one **[*20]** example, Comprehensive Security owner Loyd Poteete has averred that his company has lost numerous contracts due to MNPD's requiring event coordinators to use the MNPD and to make events prohibitively expensive for private security companies.

The Court will deny Metro's motion on this basis.

4. Refusal to Deal

Plaintiffs' final path to Section 2 liability is that MNPD is illegally refusing to deal by prohibiting its officers from working for them at special events. Metro argues that, as a matter of law, the competitive relationship of the parties precludes this legal theory. (Doc. No. 74 at 17-19.) The Court agrees.

The Sherman Act generally "does not restrict the long recognized right" of a business enterprise "freely to exercise [its] own independent discretion as to parties with whom [it] will deal." *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407-08 (2004)* (quoting *United States v. Colgate & Co., 250 U.S. 300, 307 (1919)*). In *Aspen Skiing*, the Supreme Court set a high standard for refusal to deal liability. There, a defendant owned three of four ski areas, and plaintiff owned the fourth. Each cooperated for years in the economic venture of a joint ski ticket for all four ski areas. After demanding increased proceeds, the defendant canceled the joint ticket. The plaintiff, concerned that skiers would bypass its mountain without **[*21]** the joint ticket, tried everything possible to recreate the cooperative effort, including offering to buy the defendant's tickets at retail price. The defendant refused. The Supreme Court affirmed a verdict for the plaintiff on a refusal to deal theory. *Aspen Skiing, 472 U.S. at 608*.

The Supreme Court affirmed *Aspen Skiing*'s "outer boundary" and further clarified the elements of a refusal to deal claim in Verizon v. Trinko. There, the court stressed the defendant's decision in *Aspen Skiing* "to cease participation

[3] Metro also attempts to differentiate between security services provided for public versus private vendors. However, it is not the identity of the vendor but services provided that are relevant for these purposes.

in a cooperative venture," and it highlighted that the "unilateral termination of a voluntary *(and thus presumably profitable)* course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." *Verizon Commc'ns, 540 U.S. at 409* (emphasis in original). In finding for the defendant, the Verizon Court found outcome determinative that the plaintiff had "not allege[d] that [the defendant had] voluntarily engaged in a course of dealing with its rivals." Id.

So too here. The record reflects that MNPD prevents its officers from working for private security companies at special events per the 2018 Memorandum. However, Plaintiffs do *not* claim, nor have they offered *any* evidence to support a claim that MNPD ceased participation in **[*22]** a cooperative venture with Plaintiffs, or terminated a voluntary and presumably profitable course of dealing with them. Plaintiffs have not offered any evidence that they had a cooperative economic venture with the MNPD for special event security services. Neither do Plaintiffs present evidence of an economic partnership with MNPD in a manner analogous to the parties in *Aspen Skiing*. To the contrary, Plaintiffs and Metro have been *competitors* in the security services market who have *never* been involved in a cooperative economic venture or course of dealing. This is illustrated by the testimony of MNPD Officer Kim Forsyth, who explained that Captain Corman had always viewed MNPD as *hypercompetitive* with Plaintiffs in the market for private security services. Specifically, Forsyth described Corman as "obsessed with the amount of money that was available out there to earn in police services, especially traffic control. He actually discussed it as pots of gold that people can just pluck, and that there were contract security companies basically taking these pots of gold but using Metro property." (Doc. No. 92-4 at 11.)

There is no evidence in the summary judgment record to support a refusal to deal **[*23]** under Section 2. MNPD retains its right to "freely to exercise [its] own independent discretion as to parties with whom [it] will deal." *Verizon Commc'ns, 540 U.S. at 407-08* (internal quotations omitted). Metro is entitled to summary judgment on Plaintiffs' refusal to deal claim.

III. Metro's Motion in Limine

Metro has separately filed a Motion in Limine seeking to exclude Plaintiffs evidence of the service market and geographic market. (Doc. No. 95 at 1-3.) Metro argues that Plaintiffs have not established the service market as security generally, as opposed to static security, mobile security, and traffic control individually; that Mr. Poteete should not be admitted to offer expert testimony about the service market; and that Plaintiffs have failed to define the relevant geographic market. (Id.) This resembles Metro's arguments on summary judgment. For the same reasons that the Court rejected Metro's arguments in the summary judgment motion, the arguments in limine will be denied as moot.

IV. Conclusion

Metro's Motion for Summary Judgment will be granted in part and denied in part. The motion will be granted on Plaintiffs' refusal to deal claim and denied in all other respects. Additionally, Metro's Motion in Limine will be denied. **[*24]**

An appropriate order will enter.

/s/ Waverly D. Crenshaw, Jr.

WAVERLY D. CRENSHAW, JR.

CHIEF UNITED STATES DISTRICT JUDGE

ORDER

For the reasons in the accompanying Memorandum Opinion, Defendant's Motion for Summary Judgment (Doc. No. 73) is **DENIED IN PART** and **GRANTED IN PART**. It is **GRANTED** on the refusal to deal claim, but **DENIED** in all other respects. Additionally, Defendant's Motion in Limine (Doc. No. 95) is **DENIED AS MOOT**.

This case is returned to the Magistrate Judge for case management including settlement of this case.

IT IS SO ORDERED.

/s/ Waverly D. Crenshaw, Jr.

WAVERLY D. CRENSHAW, JR.

CHIEF UNITED STATES DISTRICT JUDGE

Krommenhock v. Post Foods, LLC

Opinion

[*560] ORDER ON PENDING MOTIONS

Re: Dkt. Nos. 141, 151, 152, 153, 154, 155, 163, 164, 172, 173, 174, 175, 178, 184, 190, 191, 192, 207, 220, 224, 225

Plaintiffs Debbie Krommenhock and Stephen Hadley bring this class action case on behalf of a putative class of California consumers who purchased 31 varieties of Post Food, LLC's cereal (Products) whose boxes contained a mix of **[**2]** 45 statements that plaintiffs assert are rendered false and misleading given the amount of added sugar included in Post's Products. The essence of plaintiffs' claims under three California consumer protection statutes (the *Unfair Competition Law (UCL)*, *False Advertising Law (FAL)*, and *Consumers Legal Remedies Act (CLRA)*) is that it is false or misleading for Post to make health and wellness claims on their cereals (the 45 "Challenged Statements") given the high level of added sugar in each of those cereals.[1]

Currently before me is plaintiffs' motion for class certification, seeking to certify sub-classes of consumers who purchased the 31 identified varieties of cereals whose boxes contained one or more of the 45 Challenged Statements. Post opposes class certification and moves for summary judgment, arguing that plaintiffs' theory of liability is blocked by the *First Amendment*, that some of the Challenged Statements are preempted nutrient content or protected health claims, and that plaintiffs have no evidence supporting their claims for injunctive or monetary relief. Finally, both sides raise motions to exclude some or all of the opinions of experts offered by the other side.

As explained below, plaintiffs **[**3]** have met the requirements of *Rule 23(a)* and *(b)* and their motion to class certification is GRANTED. Post's motion for summary judgment is DENIED, except to the extent that certain of the Challenged Statements identified below are preempted and are not actionable in this case. The motions to exclude experts are DENIED, except to the limited extent that plaintiffs' Advantage Realized Model, as developed by Gaskin and Weir, cannot be used as a basis for damages under the California consumer protection statutes at issue.

A further Case Management Conference is set for April 28, 2020 at 2:00 p.m. At that Conference, the Court will resolve any disputes over the form or manner of class notice and set this matter for trial.

DISCUSSION

I. PLAINTIFFS' MOTION FOR CLASS CERTIFICATION

A. Legal Standard

"Before certifying a class, the trial court must conduct a rigorous analysis to **[*561]** determine whether the party seeking certification has met the prerequisites of *Rule 23*." *Mazza v. Am. Honda Motor Co., Inc., 666 F.3d 581, 588 (9th Cir. 2012)* (internal quotation marks omitted). The party seeking certification has the burden to show, by a preponderance of the evidence, that certain prerequisites have been met. *See Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 348-50, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*; *Conn. Ret. Plans & Trust Funds v. Amgen Inc., 660 F.3d 1170, 1175 (9th Cir. 2011)*.

Certification under *Rule 23* is a two-step process. The party seeking certification must **[**4]** first satisfy the four threshold requirements of *Rule 23(a)*. Specifically, *Rule 23(a)* requires a showing that: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*.

Next the party seeking certification must establish that one of the three grounds for certification applies. *See Fed. R. Civ. P. 23(b)*. Plaintiffs seek certification under *Rule 23(b)(3)*, which requires them to establish that "the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. They also seek certification under *Rule 23(b)(2)* for injunctive relief.

In the process of class-certification analysis, there "may entail some overlap with the merits of the plaintiff's underlying claim." *Amgen Inc. v. Connecticut Ret. Plans & Trust Funds, 568 U.S. 455, 465 - 66, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)* (internal quotation marks omitted). However, "*Rule 23* grants courts no license to engage

---

[1] UCL, *Cal. Bus. & Prof. Code § 17200 et seq.*; FAL, *Cal. Bus. & Prof. Code § 17500 et seq.*; and CLRA, *Cal. Civ. Code § 1750 et seq.*

in free-ranging merits inquiries at the certification **[**5]** stage." *Id. at 466*. "Merits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Id.*

B. Proposed Classes

Plaintiffs seek to certify the following subclasses:

> All persons who, on or after August 29, 2012 (the "Class Period"), purchased in California, for household use and not for resale or distribution, one or more of the following Post cereal varieties:
>
> **Great Grains Subclass**: Raisins, Dates, and Pecans (16 or 40.5 oz. package); Crunchy Pecan (16 oz.); Cranberry Almond Crunch (14 oz.); Blueberry Pomegranate (15.9 oz.); Banana Nut Crunch (15.5 oz.); Protein Blend: Honey, Oats, and Seeds (14.75 or 13.5 oz.); and Protein Blend: Cinnamon Hazelnut (14.75 or 13.5 oz.).
>
> **Honey Bunches of Oats Subclass**: Honey Roasted (14.5, 18, 23, 24.5, 27, 28, 36, or 48 oz.); Almonds (14.5, 18, 23, 24.5, 27, 28, 36, or 48 oz.); Raisin Medley (17 oz.); Pecan Bunches (14.5 oz.); Cinnamon Bunches (14.5 or 18 oz.); Vanilla Bunches (18 oz.) Apple & Cinnamon Bunches (14.5 oz.); Real Strawberries (13, 16.5, or 20 oz.); Fruit Blends: Banana Blueberry (14.5 or 18 oz.); Fruit Blends: Peach Raspberry (14.5 or 18 oz.); **[**6]** Tropical Blends: Mango Coconut (14.5 or 18 oz.); Greek Honey Crunch (12.5 or 15.5 oz.); and Greek Mixed Berry (12.5 or 15.5 oz.).
>
> **Honey Bunches of Oats Whole Grain Subclass**: Vanilla Bunches (18 oz.); Honey Crunch (18 oz).
>
> **Honey Bunches of Oats Granola Subclass**: Honey Roasted (11 or 20 oz.); Cinnamon (11 oz.); Raspberry (11 oz.).
>
> **Raisin Bran Subclass**: Raisin Bran (20 or 25 oz.).
>
> **Bran Flakes Subclass**: Bran Flakes (16 oz.).
>
> **Alpha-Bits Subclass**: Alpha-Bits (11.5 or 12 oz.).
>
> **Honeycomb Subclass**: Honeycomb (12.5, 16, 33, or 35 oz.).
>
> **[*562]** **Waffle Crisp Subclass**: Waffle Crisp (11.5 oz.).

Class Cert. Mot. at 1.

C. *Rule 23(a)* Requirements

Plaintiffs have made a showing satisfying *Rule 23(a)*'s requirements of numerosity, commonality, typicality, and adequacy.

1. Numerosity

Plaintiffs submit evidence of unit and dollar sales demonstrating that each of the proposed subclasses contain thousands of putative Class Members.[2] Declaration of Colin B. Weir [Dkt. No. 155-12] at 21-22, Table 1.[3] The proposed subclasses are numerous.

---

[2] Courts generally find numerosity satisfied if the class includes forty or more members. *See Villalpando v. Exel Direct Inc., 303 F.R.D. 588, 605-06 (N.D. Cal. 2014)*; *In re Facebook, Inc., PPC Adver. Litig., 282 F.R.D. 446, 452 (N.D. Cal. 2012)*.

2. Typicality

Plaintiffs contend typicality exists across each subclass based on plaintiffs' alleged common injury; each class member paid a premium for the Products due to their "misleading health and wellness **[**7]** claims demanded in the market," and that they were "influenced to purchase and consume the products with greater frequency than they would have, had they known the true facts concerning the Products' added sugar content." Class Cert. Mot. at 19.[4] Post does not challenge that the named plaintiffs have claims that are typical of the class claims. Instead, as discussed below, Post challenges whether plaintiffs have admissible, classwide proof of their injury. Plaintiffs claims are typical of the class claims.

3. Adequacy

Plaintiffs argue they are adequate class representatives because they are purchasers with standing, have no conflicts, are aware of their obligations, will continue to vigorously prosecute the case for the Class, and have retained adequate counsel (The Law Office of Jack Fitzgerald, PC). Class Cert. Mot. at 19.[5] Post does not contest adequacy and I find Krommenhock and Hadley satisfy the adequacy requirement.[6]

4. Commonality

Plaintiffs identify the following facts supporting commonality: (i) the Product packaging within each subclass was consistent throughout the Class Period, exposing every purchaser to at least one of the Challenged Statements; (ii) the amounts of added **[**8]** sugar in the Products within each subclass were also similar throughout the Class Period; and (iii) across the subclasses, "the added sugar, comprising 13.33% to 40% of calories, falls well above the 5% and 10% daily limits endorsed by authoritative sources and supported in the scientific literature." Class Cert. Mot. at 18. Following from these common facts, plaintiffs identify common legal questions subject to common proof, including whether the Challenged Statements were material and misleading.[7] *Id.*

---

[3] Post seeks to exclude various opinions of Weir, *see* below, but does not contest Weir's testimony regarding sales and does not contest that plaintiffs have satisfied numerosity.

[4] The test for typicality is "whether other members have the same or similar injury, whether the action is based on conduct which is not unique to the named plaintiffs, and whether other class members have been injured by the same course of conduct." *Ellis v. Costco Wholesale Corp., 657 F.3d 970, 984 (9th Cir. 2011)* (internal quotation marks and citation omitted).

[5] Named plaintiffs will adequately represent a class where: (1) neither named plaintiffs nor their counsel have any conflicts of interest with other class members; and (2) the named plaintiffs and their counsel will prosecute the action vigorously on behalf of the class. *Ellis, 657 F.3d at 985*.

[6] After the close of briefing, plaintiffs filed a motion to support appointment of additional class counsel, Sidney W. Jackson, III, of Jackson & Foster, LLC. Dkt. No. 220. Post opposes that motion. Dkt. No. 221. The motion is DENIED without prejudice. If plaintiffs want to have counsel in addition to The Law Office of Jack Fitzgerald, PC formally appointed as class counsel they should refile their request as a motion for administrative relief and defendant may respond if it chooses to within four days. *See* Civ. *L.R. 7-11*. The matter will then be taken under submission.

[7] To satisfy the commonality element, plaintiffs must show that the class members have suffered "the same injury" — which means that the class members' claims must "depend upon a common contention" such that "determination of its truth or falsity will resolve an issue that is central to the validity of each [claim] in one stroke." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)* (internal quotation marks and citation omitted). The plaintiff must demonstrate not merely the existence of a common question, but rather "the capacity of classwide proceedings to generate common answers apt to drive the resolution of the litigation." *Id.* (internal quotation marks and emphasis omitted). For purposes of *Rule 23(a)(2)*, "even a single common question will do." *Id. at 359* (internal quotation marks and modifications omitted).

[*563] Post does not challenge the common facts or legal issues identified by plaintiffs. Instead, Post argues that because there are 45 Challenged Statements that were made in varying combinations for 31 varieties of cereal, the *impact* of the Challenged Statements is highly individualized. Post's actual contention, therefore, is that the common issues identified by plaintiffs will not predominate over individualized issues. That predominance argument will be addressed below with respect to *Rule 23(b)(3)*. Plaintiffs have satisfied the commonality requirement.

In sum, plaintiffs have shown that each of the *Rule 23(a)* factors is satisfied.

D. *Rule 23(b)(3)* Requirements

1. Predominance

Plaintiffs rely on the following evidence, adduced **[**9]** through their experts, to show that common issues predominate.[8] First, they provide the opinions of their advertising expert Bruce G. Silverman (contested on its merits and countered by Post and its experts) of how Post used the Challenged Statements to drive sales and market shares and that consumer interest in "better-for-you" foods is extremely relevant in the cold cereal category. *See generally* Expert Report of Bruce G. Silverman [Dkt. No. 155-4]. Second, they submit evidence regarding the significant health impacts of sugar consumption through experts Dr. Robert Lustig and Dr. Michael Greger (similarly contested and countered by Post and its experts). *See generally* Expert Report & Declaration of Robert Lustig [Dkt. No. 155-6]; Expert Report & Declaration of Dr. Michael Greger [Dkt. No. 155-8].

Third, plaintiffs submit damages evidence through two economic models created and applied by Steven P. Gaskin and Colin B. Weir (also contested and countered by Post) meant to assess two things. They offer a "Consumer Impact/Price Premia Model" to establish the price premia class members paid as a result of the Challenged Statements based on conjoint studies designed by Gaskin with assistance **[**10]** from Weir and an "Advantage Realized/Consumer Demand Model" meant to measure the change in demand associated with Post's omission of material information about sugar. *See generally* Expert Report of Steven P. Gaskin [Dkt. No. 155-10]; Declaration of Colin G. Weir [Dkt. No. 155-12]. These models are Post's primary target in opposition to certification. Post contends that the models are faulty in numerous respects and do not sufficiently "fit" plaintiffs' liability theories. Absent those models, which Post asserts should be excluded from the case, Post claims that individualized causation and damage issues predominate over common ones and certification should be denied.

a. Objective Standards and Common Evidence

Post argues that plaintiffs have failed to show that any misleading representations were communicated classwide and that any particular Challenged Statement can be considered material for all class members. Accordingly, it contends that there are predominant individualized issues regarding class member injury and causation. It also asserts that consideration of each combination of labels and recipes with respect to each Challenged Statement likewise makes individual issues of liability **[**11]** predominate.

Post mischaracterizes the pertinent, predominant questions that arise under the California consumer protection statutes. The relevant analysis under California law does not consider whether each class member saw and **[*564]** relied on each of the Challenged Statements and in what combination, but instead whether the Challenged Statements were used consistently through the Class Period, supporting an inference of classwide exposure, and whether the Challenged Statements would be material to a reasonable consumer. *Hadley v. Kellogg Sales Co., 324 F. Supp. 3d 1084, 1095 (N.D. Cal. 2018)* (*Hadley I*) (the question is how an objective "reasonable consumer" would

---

[8] In numerous, separate motions, Post objects and moves to exclude many of plaintiffs' experts' opinions and plaintiffs object and move to exclude many of Post's experts' opinions. Dkt. Nos. 164, 175-1, 175-3, 184, 190, 191, 192. These motions will be discussed below.

react to a statement, and not whether individual class members saw or were deceived by statements). Those are common questions, supported at this juncture by plaintiffs' experts and subject to attack at trial by defendant's experts.

As a fallback position, Post argues that I should consider whether certain of the Challenged Statements are prominent enough on the Products' packages to support classwide inferences as a matter of law. Oppo. to Class Cert. Mot. at 9-12. It points out that in the *Kellogg* class certification order, the Hon. Lucy Koh concluded that "an inference of class-wide exposure to an **[**12]** alleged misrepresentation affixed to a product's packaging might not be warranted if the alleged misrepresentation is not sufficiently prominently displayed on the packaging." *Hadley I, 324 F. Supp. 3d at 1099*. Judge Koh then determined as a matter of law that one statement ("wholesome goodness") was not prominent enough to be certified because it "only appeared (1) on the back panel of the Nutri-Grain packaging; (2) 'in small font'; and (3) in the middle of a block of text." *Id. at 1100*.

In reaching this issue on class certification, Judge Koh relied on *Zakaria v. Gerber Products Co., LACV1500200JAKEX, 2016 U.S. Dist. LEXIS 184861, 2016 WL 6662723 (C.D. Cal. Mar. 23, 2016)*. There, the challenged representations on the products were "accompanied by other information, in small font, and sometimes located on the back or inside cover" of the product. *2016 U.S. Dist. LEXIS 184861, [WL] at *8*. Based on that record, the court concluded as a matter of law that the "alleged misrepresentations were not prominently displayed. For this reason, it cannot be inferred that there is a 'high likelihood that in the process of buying the product, the consumer would have seen the misleading statement on the product and thus been exposed to it.'" *2016 U.S. Dist. LEXIS 184861, [WL] at *8* (quoting *Ehret v. Uber Techs., Inc., 148 F. Supp. 3d 884, 895 (N.D. Cal. 2015))*. The issue in *Ehret*, which was also relied on by Judge Koh and is not a labelling case, was "whether **[**13]** class-wide exposure can be inferred where Uber's alleged misrepresentations regarding the 20% gratuity were primarily on its website, blog, and e-mail messages, rather than on the Uber app itself." *Id. at 895-96*. In that case, the court denied class certification where "although there may have been a consistent misrepresentation, there is insufficient evidence that all customers during the class period were likely exposed to the misrepresentation" given that many customers only interacted with the app. *Id. at 900*.

In support of its argument that I should follow Judge Koh and determine prominence now (and conclude there can be no classwide inference of exposure for the Challenged Statements that are not prominent), Post also relies on *In re Clorox Consumer Litig., 301 F.R.D. 436 (N.D. Cal. 2014)*. In that case, the challenged statements were prominent in television advertisements, but only on a small subset of the products' labels. Accordingly, in light of "powerful evidence that most members of the proposed classes probably never saw the allegedly misleading statements" as the "television commercials ran for only a small part of the class period, and the superiority claims appeared in small print on the back of a minority of Fresh Step packages," there was no demonstration **[**14]** "that the proposed classes were uniformly exposed to the allegedly misleading messages." *Id., 301 F.R.D. at 445*.

The evidence and Post's defense in this case are starkly different than in *Clorox* and *Ehret*. Here, there is no dispute that the majority of Challenged Statements were made consistently (or consistently enough) throughout the relevant timeframes on the Products' packages.[9] As to the prominence of **[*565]** statements on the Products' packages, plaintiffs argue that Judge Koh's approach — deciding the issue as a matter of law on class certification — was unnecessary because under California law prominence goes only to the inapposite question of whether significant numbers of prospective class members saw or interacted with the statement. According to plaintiffs, California law does not ask whether class members actually saw or relied on representations, but simply whether the representations were consistently made and were material to a reasonable consumer.

I agree with plaintiffs. Where, as here, there is evidence that the representation was consistently made on a product's label, the only question is whether it was objectively material to a reasonable consumer. *Bradach v.*

---

[9] Post argues — without citation to any evidence — that one Statement only appeared on a few packages for a brief time and that another Statement moved from the front to the side of the box during the relevant period. Oppo. to Class Cert. Mot. at 11 fns. 13, 14. Absent evidence, I will not follow the *Clorox* or *Ehret* courts in determining that an inference of classwide exposure to a particular Challenged Statement is unreasonable as a matter of law.

Pharmavite, LLC, 735 Fed. Appx. 251, 254 (9th Cir. 2018) (unpublished), *cert. denied*, *139 S. Ct. 491, 202 L. Ed. 2d 379 (2018)* ("Under **[**15]** California law, class members in CLRA and UCL actions are not required to prove their individual reliance on the allegedly misleading statements. Instead, the standard in actions under both the CLRA and UCL is whether 'members of the public are likely to be deceived.'"); *see also* Kumar v. Salov N.A. Corp., 14-CV-2411-YGR, 2016 U.S. Dist. LEXIS 92374, 2016 WL 3844334, at *4 (N.D. Cal. July 15, 2016) ("The statement appeared on the front of the bottle. Salov's arguments—that the font size and color were too small to make the statement stand out; that consumers would not misunderstand the language the way Kumar alleges; and the presence of a hang-tag on the bottle neck or a statement on the back of the bottle would have blocked consumers' view of the statement—all go to the proof of whether a reasonable consumer would have been misled, not to determining who meets the class definition."); *see* 2016 U.S. Dist. LEXIS 92374, [WL] at *7 ("To state a claim based on false labeling, "it is necessary only to show that 'members of the public are likely to be deceived.'" [] Thus the answer to the reasonable consumer question based on common facts, that is, identical statements on the labels of the products at issue."); Martin v. Monsanto Co., EDCV 162168-JFWSPX, 2017 U.S. Dist. LEXIS 135351, 2017 WL 1115167, at *7 (C.D. Cal. Mar. 24, 2017) ("Monsanto has 'failed to present any evidence that class members **[**16]** were able to purchase [the] products without being exposed to the alleged misrepresentations,' so predominance is satisfied."). When relevant, prominence goes to the materiality and misleading questions to be resolved by the jury.

Post's related arguments regarding materiality are also unpersuasive. First, Post faults plaintiffs for failing to conduct consumer surveys showing that each discrete Challenged Statement (*e.g.*, nutritious blueberries) conveyed that the Product was healthy as a whole. Oppo. Class Cert. Mot. at 13. Similarly, it complains that plaintiffs' evidentiary showing is fatally deficient because they have no stand-alone survey or expert evidence to show that the truthful and *unchallenged statements* (the ones I have found are preempted and not-actionable or otherwise unchallenged) are seen by class members as less material than the Challenged Statements.

Post's arguments rest on a mischaracterization of the operative questions at issue. As Judge Koh explained in Hadley I, "California courts have explicitly 'reject[ed] [the] view that a plaintiff must produce' extrinsic evidence 'such as expert testimony or consumer surveys' in order 'to prevail on a claim that the public **[**17]** is likely to be misled by a representation' under the FAL, CLRA, or UCL." Hadley I, 324 F. Supp. 3d at 1115 (internal citations omitted). Instead, testimony from plaintiffs' marketing expert Bruce G. Silverman — relying on his extensive experience in the industry, including marketing of cereal products, and Post's own documents — as well as the models developed by Gaskin and Weir, support that the Challenged Statements could have been material to the reasonable consumer. *See* Expert Report of Bruce G. Silverman [Dkt. No. 155-4] pgs. 45-124; *see also* Expert Report of Steven P. Gaskin [Dkt. No. 155-10]; Declaration of Colin G. Weir [Dkt. No. 155-12]. Post's experts Hanssens and Van Liere dispute Silverman's materiality **[*566]** conclusions, but those are issues to be ultimately resolved by the jury.

As to the unchallenged statements (preempted statements or otherwise unchallenged statements), their truthfulness and potential impact on the materiality of the Challenged Statements are questions to be resolved by the jury under the reasonable consumer standard. The jury will weigh the context of the Challenged Statements on the Products' labels, as well evidence of why Post decided to use the statements and how to place them on the **[**18]** Products, in order to determine whether "a reasonable consumer would attach importance to it or if 'the maker of the representation knows or has reason to know that its recipient regards or is likely to regard the matter as important in determining his choice of action.'" Hinojos v. Kohl's Corp., 718 F.3d 1098, 1107 (9th Cir. 2013), *as amended on denial of reh'g and reh'g en banc* (July 8, 2013) (*quoting* Kwikset Corp. v. Super. Ct., 51 Cal. 4th 310, 333, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)). Despite Post's repeated arguments to the contrary, that a truthful or unchallenged statement might be material to a reasonable consumer (an issue which Post repeatedly chides plaintiffs and their experts for allegedly "ignoring") does not mean that a Challenged Statement cannot *also* be material and, therefore, actionable. A statement need not be the "'the sole or even the predominant or decisive factor influencing'" the class members' decisions to buy the challenged products. In re Tobacco II Cases, 46 Cal. 4th 298, 326, 93 Cal. Rptr. 3d 559, 207 P.3d 20 (2009) (quoting Engalla v. Permanente Med. Grp., Inc., 15 Cal. 4th 951, 977, 64 Cal.Rptr.2d 843, 938 P.2d 903 (1997)).

Post's contention that some of the Challenged Statements may not actually be material to some putative class members because some of them may have healthier lifestyles and can afford to eat higher levels of sugar is not relevant under plaintiffs' theory and claims. *See Hadley I, 324 F. Supp. 3d at 1101* ("Kellogg's unpersuasive argument appears to stem from a mistaken assumption that the injury **[**19]** that Plaintiff is seeking to redress in the instant case is physical in nature.").

Finally, plaintiffs' challenge to so many Challenged Statements across so many Product lines *does* make litigation of this case — and plaintiffs' burden of proof at trial — complex. But that complexity does not mean predominance is undermined. The materiality of each set of claims, divided as necessary for each label used for each Product, can be determined on a classwide basis. Post points out that some of the labels for Products at issue were redesigned during the class period and that raises additional predominance issues. These arguments, however, show only that plaintiffs have a complex case to prove given its breadth and scope. They will need to prove that reasonable consumers would be misled by each particular label used for each Product during the class period (unless the parties can stipulate to a smaller subset of challenges to present to the jury). This reality, however, does not mean that individualized issues predominate over the complex but common ones.[10]

b. Damages Models and Consistency with Liability Theories

Post next contends that **[**20]** plaintiffs' damages models do not match their liability theory **[*567]** and, therefore, must be excluded. Without those models, Post notes, individualized damages issues would predominate. As discussed in depth below in connection with Post's motion to exclude the expert opinions (and damages models) proffered by Gaskin and Weir, plaintiffs' Consumer Impact/Price Premia Model "fits" plaintiffs' theory of liability and is reliable and admissible for purposes of proving classwide damages. Plaintiffs' second model, the Advantage Realized Model does not fit (as it does not accurately measure the restitution available to class members under the California consumer protection statutes at issue), but that does not undermine predominance because the first model is admissible.

Plaintiffs have satisfied the predominance requirement.

2. Superiority

Post contends that a class action is not superior to resolve the claims at issue here because of the impossibility of identifying class members. However, "plaintiffs' class definitions provide objective criteria that allow class members to determine whether they are included in the proposed class," and that is sufficient. *Farar v. Bayer AG, 14-CV-04601-WHO, 2017 U.S. Dist. LEXIS 193729, 2017 WL 5952876, at *14 (N.D. Cal. Nov. 15, 2017)*. Moreover, **[**21]** as affirmed by the Ninth Circuit in *Briseno v. ConAgra Foods, Inc., 844 F.3d 1121, 1129 (9th Cir. 2017)*, *cert. denied sub nom. ConAgra Brands, Inc. v. Briseno, 138 S. Ct. 313, 199 L. Ed. 2d 206 (2017)*, it is not a barrier to class certification that consumers may be required to self-identify to attest to purchasing the Products at issue. *Id. at 1132*; *see also id. at 1129* ("The notion that an inability to identify all class members precludes class certification

---

[10] In support of this argument, Post relies on *Reitman v. Champion Petfoods USA, Inc., CV181736DOCJPRX, 2019 U.S. Dist. LEXIS 221941, 2019 WL 7169792, at *9 (C.D. Cal. Oct. 30, 2019)*. There, the court determined that individualized issues predominated where plaintiffs sought certification of one class of purchasers of 23 different formulas of dog food whose packaging contained some of four sets of challenged statements. Specifically, the court found individualized issues predominated because whether the challenged phrases ("biologically appropriate," "fresh," "regional" or "local") were false or misleading would require individualized analysis of the ingredients and production location of each different variety of dog food sold with those statements. *Reitman* is not persuasive for a number of reasons. First, plaintiffs here propose subclasses for purchasers of each Product, as opposed to seeking one broadly defined class as in *Reitman*. Second, in this case plaintiffs have produced sufficient evidence of materiality each of the Challenged Statements. That plaintiffs will have to prove that materiality for each Challenged Statement on each different Product for each subclass means this case is complex. But those issues are common and predominate across each subclass. There are no truly "individualized" issues given the way these claims are assessed under California's consumer protection statutes. Defendant's motion and stipulation to address the *Reitman* case (Dkt. Nos. 224, 225) are GRANTED.

cannot be reconciled with our court's longstanding *cy pres* jurisprudence."). Plaintiffs have satisfied the superiority requirement.

For the foregoing reasons, plaintiffs' motion for class certification is GRANTED. The following subclasses are hereby certified:

> All persons who, on or after August 29, 2012 (the "Class Period"), purchased in California, for household use and not for resale or distribution, one or more of the following Post cereal varieties:
>
> **Great Grains Subclass**: Raisins, Dates, and Pecans (16 or 40.5 oz. package); Crunchy Pecan (16 oz.); Cranberry Almond Crunch (14 oz.); Blueberry Pomegranate (15.9 oz.); Banana Nut Crunch (15.5 oz.); Protein Blend: Honey, Oats, and Seeds (14.75 or 13.5 oz.); and Protein Blend: Cinnamon Hazelnut (14.75 or 13.5 oz.).
>
> **Honey Bunches of Oats Subclass**: Honey Roasted (14.5, 18, 23, 24.5, 27, 28, 36, or 48 oz.); Almonds (14.5, 18, 23, 24.5, 27, 28, **[**22]** 36, or 48 oz.); Raisin Medley (17 oz.); Pecan Bunches (14.5 oz.); Cinnamon Bunches (14.5 or 18 oz.); Vanilla Bunches (18 oz.) Apple & Cinnamon Bunches (14.5 oz.); Real Strawberries (13, 16.5, or 20 oz.); Fruit Blends: Banana Blueberry (14.5 or 18 oz.); Fruit Blends: Peach Raspberry (14.5 or 18 oz.); Tropical Blends: Mango Coconut (14.5 or 18 oz.); Greek Honey Crunch (12.5 or 15.5 oz.); and Greek Mixed Berry (12.5 or 15.5 oz.).
>
> **Honey Bunches of Oats Whole Grain Subclass**: Vanilla Bunches (18 oz.); Honey Crunch (18 oz).
>
> **Honey Bunches of Oats Granola Subclass**: Honey Roasted (11 or 20 oz.); Cinnamon (11 oz.); Raspberry (11 oz.).
>
> **Raisin Bran Subclass**: Raisin Bran (20 or 25 oz.).
>
> **Bran Flakes Subclass**: Bran Flakes (16 oz.).
>
> **Alpha-Bits Subclass**: Alpha-Bits (11.5 or 12 oz.).
>
> **Honeycomb Subclass**: Honeycomb (12.5, 16, 33, or 35 oz.).
>
> **Waffle Crisp Subclass**: Waffle Crisp (11.5 oz.).[11]

Plaintiffs Krommenhock and Hadley are appointed as Class Representatives and the Law Office of Jack Fitzgerald, PC is appointed as Class Counsel. Counsel shall meet and confer promptly with respect to the form and dissemination of Class Notice. Any disputes **[*568]** regarding the same shall be raised so that they can be addressed at the **[**23]** next Case Management Conference.

II. POST'S MOTION FOR SUMMARY JUDGMENT

Post moves for summary judgment against all of plaintiffs' claims. Its main argument is that because plaintiffs admit the Challenged Statements — standing alone — are true and because the health impacts of added sugar are subject to ongoing disputes in the scientific and public health communities, the Statements are immune from attack under the *First Amendment*. It also asserts that seven of the Challenged Statements are implied nutrient or health claims that are protected under the federal *Nutrition Labeling and Education Act (NELA)*, which preempts the state law claims. Finally, it contends that plaintiffs' request for injunctive relief and punitive damages should be rejected because they have not shown disputes of material fact potentially entitling them to any remedy.

A. Legal Standard

[11] To the extent the scope or definition of the certified Subclasses needs to be amended in light of my rulings below with respect to preemption, the parties shall meet and confer and submit an agreed-to revised definition of the certified Subclasses.

Summary judgment on a claim or defense is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. In order to prevail, a party moving for summary judgment must show the absence of a genuine issue of material fact with respect to an essential element of **[**24]** the non-moving party's claim, or to a defense on which the non-moving party will bear the burden of persuasion at trial. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Once the movant has made this showing, the burden then shifts to the party opposing summary judgment to identify "specific facts showing there is a genuine issue for trial." *Id.* The party opposing summary judgment must present affirmative evidence from which a jury could return a verdict in that party's favor. *Anderson v. Liberty Lobby, 477 U.S. 242, 257, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

On summary judgment, the court draws all reasonable factual inferences in favor of the non-movant. *Id. at 255*. In deciding the motion, "[c]redibility determinations, the weighing of the evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge." *Id.* However, conclusory and speculative testimony does not raise genuine issues of fact and is insufficient to defeat summary judgment. *See* *Thornhill Publ'g Co., Inc. v. GTE Corp., 594 F.2d 730, 738 (9th Cir. 1979)*.

B. Truthful, Non-Misleading Speech

Post argues that it is undisputed that the majority of the Challenged Statements — standing alone and not considering the level of added sugar in the Products — are true because they disclose that "healthy ingredients" that are in the Products. Post next argues that the Challenged Statements "are not **[**25]** even arguably misleading because they cannot be read to convey any message about the healthiness of added sugar," but even "if the statements could be found to speak indirectly about the healthiness of added sugar by speaking indirectly about the healthiness of Post's cereals, they communicated a constitutionally protected viewpoint based on mainstream science—namely, that nutrient-dense cereal containing some added sugar can be part of a healthy diet." Post MSJ [Dkt. No. 163] at 11. Acknowledging both that the *First Amendment* does not protect misleading advertisements and that whether speech is misleading is generally a question of fact, Post nevertheless contends that whether the Challenged Statements "fall[] beyond the protection of the *First Amendment*" is a legal question I should address at this juncture. *Id.* at 12.

At base, Post contends that the Challenged Statements cannot be considered misleading and are constitutionally protected because they conveyed "important, truthful information about specific ingredients and nutritional attributes that consumers had a compelling interest in receiving and did not," standing alone, "make a claim about the healthiness of the cereal as a whole." *Id.* at 13. It argues that such truthful **[**26]** statements are protected even if they could be considered misleading by a jury when considered with other information disclosed or not disclosed about **[*569]** the Products. But its position rests only on inapposite, out-of-circuit authority addressing government restrictions on speech, *not* generally applicable consumer protection statutes.[12] In the Ninth Circuit, and as

[12] The focus of each of the cases is the application of the Supreme Court's *Central Hudson* test for regulations on commercial speech. In *Ocheesee Creamery LLC v. Putnam, 851 F.3d 1228 (11th Cir. 2017)*, the court addressed whether the state could prohibit a dairy from advertising its "skim milk products" because they did not contain vitamin A. Applying the *Central Hudson* test, the Eleventh Circuit rejected the idea that misleading speech, subject to regulation under *Central Hudson*, could be defined as anything "inconsistent with the state's preferred definition." *Id. at 1238*. The case here does not address any state action other than the general application of California's consumer protection statutes to allegedly misleading speech. Similarly, in *Dunagin v. City of Oxford, Miss., 718 F.2d 738 (5th Cir. 1983)*, the Fifth Circuit rejected the idea that a state can outright ban commercial speech that may not "tell the whole truth" about a product in light of the "policy" to generally "leave it to the public to cope for themselves with Madison Avenue panache and hard sells." *Id. at 750*. The Fifth Circuit, nonetheless, concluded that the state's ban on billboard's advertising alcohol satisfied the *Central Hudson* test and passed constitutional muster. *Id.*; *see also* *Int'l Dairy Foods Ass'n v. Boggs, 622 F.3d 628, 637 (6th Cir. 2010)* (where science was unsettled, a proposed label statement could not be considered "inherently misleading" as a matter of law and, therefore, application of remaining *Central Hudson* factors was necessary). Post implicitly concedes that these cases are inapposite by never discussing the *Central Hudson* factors, so central to the cases discussed above, in the case at bar.

recognized by the California Supreme Court, California's consumer protection statutes "prohibit 'not only advertising which is false, but also advertising which [,] although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public.'" *Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir. 2008)* (quoting *Kasky v. Nike, Inc., 27 Cal.4th 939, 951, 119 Cal. Rptr. 2d 296, 45 P.3d 243 (2002))*.

Post also argues that its truthful statements cannot be challenged on the basis that the added sugar in the Products makes those statements misleading because "mainstream science supports" its view that Post's cereals are "healthy" despite the added sugar. Post MSJ at 17-18. However, plaintiffs have ample, albeit disputed, evidence that the Products are not "healthy" given the amounts of added sugar in them and considering consumer habits regarding **[**27]** serving size and frequency of consumption.[13]

Post's position that to survive summary judgment plaintiffs need to establish that Post's cereals are unhealthy due to their sugar content based on "undisputed and settled science" is without support. The Ninth Circuit has been quite clear that plaintiffs need not do more than what they have here in opposing summary judgment, creating a material issue of fact that the Products are unhealthy given the amount of added sugar. *Sonner v. Schwabe N.A., Inc., 911 F.3d 989, 992-93 (9th Cir. 2018)*. It reversed a district court that had required "not only producing affirmative expert evidence" but also evidence "foreclos[ing] any possibility" that defendant's products "provided the labeled benefits." *Id. at 992*. By doing so, the district court "elevated [plaintiffs'] burden well beyond what is usually required to defeat summary judgment." *Id.* The Ninth Circuit emphasized:

> [a]gain, a plaintiff need only show a triable issue of material fact to proceed to trial, [] not foreclose any possibility of the defendant's success on the claims. At trial, undoubtedly each party will seek to undermine the scientific bases underlying the opinion of the opposing party's expert. Those arguments, however, **[**28]** go to the weight that the fact-finder should give to the evidence, an inquiry that is not proper at the summary judgment stage.

[*570] *Id. at 992-93*. Neither the *First Amendment* nor *Article I of the California Constitution* require plaintiffs to do more at this juncture to survive summary judgment on their consumer protection claims. *See also* *Korolshteyn v. Costco Wholesale Corp., 755 Fed. Appx. 725, 726 (9th Cir. 2019)* (unpublished) (rejecting district court's "tougher, conclusive standard, holding that the existence of scientific studies supporting the alleged benefits of the product precluded the appellants from conclusively proving falsity in the appellees' product labeling").

C. Preemption

As both parties know, on extensive and highly contested briefing over two rounds of motions to dismiss, I accepted some of Post's preemption arguments agreeing that *some* of plaintiffs' claims as to specific Challenged Statements were preempted under the Nutrition Labeling and Education Act (NLEA), *21 U.S.C. § 343-1(a)(4)-(5)*. Dkt. 88 at 12-22; Dkt. 116 at 10-16. Re-raising a defense Post asserted and argued in both of its motions to dismiss, Post argues on summary judgment that seven of the Challenged Statements are preempted by federal law.

Plaintiffs note that I considered and rejected a preemption defense with respect to three of the re-challenged statements at the motion **[**29]** to dismiss stage and contend that holding should be considered law of the case. They also argue, with respect to each of the seven statements identified in Post's motion for summary judgment, that Post should not be able to re-raise the preemption defense because it has not shown that reconsideration is

---

[13] Post's reliance on cases challenging FDA attempts to ban or rewrite labels is similarly unhelpful. Those cases apply the *Central Hudson* test and District of Columbia circuit authority balancing restrictions on commercial speech with compelled speech concerns. The analyses in those cases are not helpful to my resolution of the questions before me. *See, e.g.,* *All. for Nat. Health U.S. v. Sebelius, 786 F. Supp. 2d 1, 24 (D.D.C. 2011)* (applying *Central Hudson* and rejecting FDA's attempted rewrite of a label disclaimer, because "[w]here the evidence supporting a claim is inconclusive, the *First Amendment* permits the claim to be made; the FDA cannot require a disclaimer that simply swallows the claim."); *Whitaker v. Thompson, 248 F. Supp. 2d 1, 11 (D.D.C. 2002)* (addressing FDA prohibitions on label claims).

appropriate under Civil *Local Rule 7-9*. Oppo. MSJ at 16-17. Given plaintiffs' broad attack on 45 different Challenged Statements on 31 different varieties of Products, and recognizing that Post had limited space to raise and discuss every meritorious preemption challenge at the motion to dismiss stage, I will consider each of the preemption challenges raised in its motion for summary judgment.

1. Implied Nutrient Claims

Post argues that the following Challenged Statements are preempted, FDA-authorized implied nutrient content claims:

- **Bran Flakes**: "CONTAINS DIETARY FIBER to Help Maintain Digestive Health."

- **Bran Flakes**: "Whole grains provide fiber and other important ingredients to help keep you healthy. Diets rich in whole grain foods and other plant foods, and low in total fat, saturated fat and cholesterol, may help reduce the risk of heart disease and some cancers. Post Bran Flakes provides 21g whole grain per serving, **[**30]** that's 44% of your day's whole grains!"

- **Raisin Bran**: "Post Raisin Bran has 8g of natural fiber, making it an Excellent Source. Fiber is good for digestive health."

- **Honey Bunches of Oats Greek**: "WHOLESOME NUTRITION: 5g of protein and 33g of whole grain perserving, that's over 2/3 of your day's whole grain "

- **Honey Bunches of Oats Granola** (Honey Roasted, Cinnamon, and Raspberry varieties): "With 3g of fiber and 34g of whole grain per serving, it's the perfect combination of wholesome goodness and honey-sweet crunch that everyone in your entire family will love."

- **Alpha-Bits**: "ALPHA-BITS IS A GOOD SOURCE OF NUTRIENTS THAT ARE BUILDING BLOCKS FOR YOUR CHILD'S DEVELOPING BRAIN: -IRON helps deliver oxygen to the brain & body -ZINC helps brain & body cells grow and develop -B VITAMINS B1, B2, B6, & B12 help support a healthy nervous system"

MSJ at 19-20. Post points out that for each Challenged Statement, plaintiffs omitted the underlined language that demonstrates these statements are protected implied nutrient claims.

As explained in my June 2017 Order on the first motion to dismiss, an implied nutrient content claim "[d]escribes the food or an ingredient therein in a manner that suggests that a nutrient **[**31]** is absent or present in a certain amount (*e.g.*, 'high in oat bran')" and might also suggest that the food is compatible with a healthy or nutritional diet because of its nutrient content. Dkt. No. at 88 at 14-15; *see also* March 2018 Order [Dkt. No. 116] at 8; *21 C.F.R. § 101.13(b)(2)(i)-(ii)*. In my **[*571]** March 15, 2018 Order on the second motion to dismiss, I noted in determining whether an implied nutrient claim has been made, the court must consider the context of where the challenged claim is made; while the "magic words" that might create an implied nutrient claims do not "need to be directly adjacent to the discussion of a nutrient to create an implied nutrient content claim, [] there must be connection given the words, their placement, and their context," analyzing whether the nutrient statement is "connected by context to the other representations." March 2018 Order [Dkt. 116] at 12. For example, I rejected plaintiffs' attempt to excise "excellent source of fiber" from a paragraph that was wholly "focused on 'fiber' and that the product is an 'excellent source' of that fiber. Plaintiffs cannot excise the 'excellent source' of fiber, which is integral to the whole paragraph about fiber, to avoid preemption as an implied nutrient content **[**32]** statement." *Id.*

I rejected Post's argument that the two Bran Flakes statements above, as well as the Raisin Bran statement, were implied nutrient content claims because those statements did not (upon my initial review) appear to be connected to "statements about the contents of the products at issue, much less an implication that the products at issue contain specific levels (or healthful levels of specific nutrients)." *Id.* at 16. I was wrong because I failed to consider the underlined text excised by plaintiffs. Viewing the language above, including the underlined language that plaintiffs do not dispute appears as part of the same phrase or in the same clause as the Challenged Statements, each of the three statements implies something specific about the levels or healthfulness of the nutrients identified (fiber and whole grains). They are, therefore, protected implied nutrient claims and subject to preemption under NELA.

Turning to the phrases that I have not already considered on the Honey Bunches of Oats (HBO) and Alpha-Bits Products, plaintiffs do not dispute that the underlined language establishes implied nutrient claims because each of them discloses the actual content of nutrients in **[**33]** the Products. Instead, plaintiffs complain that Post originally challenged these statements as mere puffery and asked me not to consider the surrounding, factual context. Perhaps. But looking to the question before me now, "Wholesome Nutrition" on the HBO Products is clearly followed by relevant and connected text identifying the amounts of protein and whole grains per serving. Oppo. to MSJ at 19. Wholesome Nutrition, as used in this context, is an implied nutrient content claim.

Similarly, the phrase "[w]ith 3g of fiber and 34g of whole grain per serving, it's the perfect combination of wholesome goodness and honey-sweet crunch that everyone in your entire family will love" on the HBO Products is the explicit disclosure of specific amounts of nutrients that turns "wholesome goodness" into part of the implied nutrient content claim. The Alpha-Bits Challenged Statement, when read in full and in context, discloses the basis for the "good source" of nutrients claims because the iron, zinc, and B vitamins are identified immediately following the good source claim. *Id.*[14]

These six Challenged Statements are implied nutrient claims that are protected by NELA and its regulations and are not actionable as part of **[**34]** plaintiffs' false or misleading claims.

2. Health Claim

Post also argues that the claim on a number of Honey Bunches of Oats products is a preempted health claim: "Heart Healthy **-** Diets low in saturated fat and cholesterol, and as low as possible in trans fat, may reduce the risk of heart disease." Plaintiffs admit that the underlined language is a health claim, that was considered and approved by the FDA under the *FDA Modernization Act (FDAMA), 21 U.S.C. § 343(r)(3)(C)*. Oppo. at MSJ at 20. But they omitted the underlined text from the Challenged Statement and want to challenge *only* **[*572]** the use of "Heart Healthy" and the heart image on the Product's package.

Post contends that the Heart Healthy statement must be considered along with the remaining language and should be considered part of the authorized health claim. Plaintiffs counter that because the words "Heart Healthy" were not approved by the FDA, those words cannot be considered an authorized claim under FDAMA but instead is an unauthorized health claim under *21 C.F.R. § 101.14(e)*.

I agree with Post that simply leading with "heart healthy" as a summary but then directing the reader to the express language approved by the FDA for a permissible health claim is a preempted health claim. The same conclusion **[**35]** was reached where a court considered packaging that combined "'heart healthy' statements and images of hearts with the claim that 'diets rich in whole grain foods and other plant foods and low in saturated fat and cholesterol may help reduce the risk of heart disease.'" *In re Quaker Oats Labeling Litig., C 10-0502 RS, 2012 U.S. Dist. LEXIS 42777, 2012 WL 1034532, at *3 (N.D. Cal. Mar. 28, 2012)*. In *Quaker Oats*, the Hon. Richard Seeborg considered FDA approved language with the use of "heart healthy" or a heart graphic. He explained that the FDA regulation (*21 C.F.R. § 101.14(d)(2)(iv)*) expressly provides for a reference statement directing the consumer to further information located elsewhere on the packaging. Accordingly, he found that while "heart

[14] Plaintiffs' attempt to characterize this Challenged Statement as a structure function claim — a differently regulated claim that must be truthful and not misleading, Oppo. to MSJ at 19 — does not help them. Plaintiffs do not contest that "good source of nutrients that are building blocks for your child's developing brain," specifically identifying iron, zinc, and B vitamins, is itself or in conjunction with other unidentified statements false or misleading.

healthy" was not shown directly next to the FDA approved health claim language, that was not a problem and claims using all of the relevant language were preempted. *2012 U.S. Dist. LEXIS 42777, [WL] at *3*.[15]

The Challenged Statements identified by Post, when read in context with the language that directly surrounds them, are preempted and may not form the basis of plaintiffs' false and misleading claims in this case.

D. Lack of Evidence Supporting Any Remedy

Separately, Post argues that plaintiffs "lack evidence" **[**36]** that would entitle them to injunctive or monetary relief and, therefore, summary judgment should be granted in its favor.

1. Injunctive Relief

Post argues, first, that plaintiffs lack standing to seek injunctive relief because there is no likelihood that either plaintiff will be in danger of buying Post's Products in the future as a result of false or misleading statements that these plaintiffs now realize are allegedly false or misleading. The Ninth Circuit has identified two circumstances where plaintiffs in false or misleading labeling cases may seek injunctive relief: (i) where plaintiffs "would like to" buy the product again but "will not" because they "will be unable to rely on the product's advertising or labeling" without an injunction; or (ii) where the consumer "might purchase the product in the future" because they "may reasonably, but incorrectly, assume the product was improved." See *Davidson v. Kimberly-Clark Corp., 889 F.3d 956, 970 (9th Cir. 2018)*.

Post characterizes the deposition testimony from plaintiffs Krommenhock and Hadley as falling outside *Davidson*, because both admitted that they would never buy Post cereal again given the Products' high added sugar content. MSJ at 22-23. Plaintiffs respond that while Hadley testified in his deposition **[**37]** in this case that he "didn't know" if he would purchase the cereals again given their high sugar content (MSJ Ex., 18 at 344), in the case he filed against Kellogg Hadley indicated it was "possible" he'd purchase high sugar content cereals again. Oppo. to MSJ, Ex. 17 at 217.[16] Plaintiffs also rely on the assertion in their Second Amended Complaint that if they could be assured the cereals were properly labelled, plaintiffs would consider purchasing Post cereals again. SAC **[*573]** ¶ 120. Given these two sources, plaintiffs argue that Hadley's intent to purchase Post's products in the future creates a question of fact and provides the minimal showing to demonstrate standing under *Davidson*.

Considering Hadley's ambiguous testimony, his future intent can be explored at trial. Post-trial, on a full record, I can determine what injunctive relief might be appropriate and whether Hadley has standing to seek that relief.[17]

2. Monetary Relief

Post also argues that plaintiffs "lack evidence to support money relief" and summary judgment should, therefore, be granted in their favor. This argument, however, hinges entirely on Post's challenges to plaintiffs' proposed classwide

---

[15] In *Hadley v. Kellogg Sales Co., 16-CV-04955-LHK, 2019 U.S. Dist. LEXIS 136791, 2019 WL 3804661 (N.D. Cal. Aug. 13, 2019)*, the court declined to find health claims preempted as approved FDAMA claims where the language on the packing was missing significant, materials words from the exact language approved by the FDA. *2019 U.S. Dist. LEXIS 136791, [WL] at *21*. Plaintiffs do not argue that is the case here and admit the underlined language is an approved FDAMA claim.

[16] Plaintiffs do not rebut or otherwise address Post's characterizations regarding Krommenhock's deposition testimony that she does not intend to purchase Post cereals in the future.

[17] Post's argument that injunctive relief is unnecessary because it adequately discloses its added sugar content (or will disclose it adequately in the future) will not be considered at this juncture. Whether past or current disclosures suffice to negate what may otherwise be false or misleading statements regarding the healthiness of Post's cereals should be determined, if necessary, following the jury's verdict.

damages models and application of **[**38]** those models by plaintiffs' experts Steven Gaskin and Colin Weir. Dkt. No. 175-1. For the reasons discussed below, plaintiffs' Consumer Impact Model adequately fits their theory of the case and is an acceptable method of proving classwide damages or restitution. Therefore, Post's argument fails.

E. Punitive Damages

Finally, Post argues it is entitled to judgment on plaintiffs' claim for punitive damages under plaintiffs' CLRA claim. California allows punitive damages only for wrongdoing that is shown by clear and convincing evidence to be fraudulent or "despicable." *Cal. Civ. Code § 3294(a)*, *(c)*. Post contends that because of the debate in the scientific community concerning whether nutrient-rich but sugar-heavy products like Post's are nonetheless "healthy," plaintiffs will not be able to make their heightened showing that Post's conduct in marketing its Products was intentionally wrong or despicable. Post notes that in the case against Kellogg, Judge Koh reached this issue on summary judgment and concluded that plaintiffs in her case did not raise an issue of material fact on punitive damages under the CLRA where their expert (Dr. Robert Lustig, one of plaintiffs' experts here) admitted that: (1) he could not **[**39]** identify one study finding that cereal consumption increases the risk of coronary heart disease, diabetes, or obesity; (2) his view on the dangers of consuming added sugar to heart health (referring to heart disease) is a minority view; and (3) his opinion about the dangers of consuming added sugar to heart health "is not the majority view of researchers." *Hadley v. Kellogg Sales Co., 16-CV-04955-LHK, 2019 U.S. Dist. LEXIS 136791, 2019 WL 3804661, at *16 (N.D. Cal. Aug. 13, 2019)* (*Hadley II*).

I will not reach this issue now. Given the dispute between the experts about the state of the science, the question of Post's own knowledge of and reaction to the science at different points in time, and Post's reasons for using the amounts of sugar it does in its Products, I conclude that whether plaintiffs can satisfy the heightened fraud or malice standard for punitive damages under the CLRA should be determined by the jury.

Post's motion for summary judgment is GRANTED to the limited extent that the seven preempted implied nutrient and health claims identified above are not independently actionable as Challenged Statements. The motion is DENIED in all other respects.

III. POST'S MOTION TO EXCLUDE GASKIN AND WEIR

As noted above, a significant argument in support of Post's opposition **[**40]** to class certification as well as its motion for summary judgment is that the economic models proposed by two of plaintiffs' experts, Stephen P. Gaskin and Colin B. Weir, are inherently faulty, do not "fit" plaintiffs' theory of the case, and do not capture on a classwide basis plaintiffs' potentially recoverable damages or restitution. Post does not challenge the qualifications of either expert but attacks the design of the conjoint and demand surveys they utilized and argues that the results either are unreliable or measure unrecoverable damages/restitution.

[*574] A. Gaskin

Steven P. Gaskin is a principal with Applied Marketing Science, Inc. ("AMS"), a market research and consulting firm. Gaskin Expert Report (Dkt. No. 155-10) ¶ 1. He developed two survey-based models to assess classwide impact and damages/restitution.

Consumer Impact Model/Price Premia — Conjoint Analyses. Gaskin was asked by counsel for plaintiffs to design, conduct, and analyze market research surveys and analyses that would enable him to assess the price premia resulting from the Challenged Statements on specific boxes of Post cereals and granola. *Id.* ¶ 8. To do that, Gaskin conducted nine conjoint surveys to estimate **[**41]** "the price premia (measured in dollars and/or percentage terms) caused by the presence of the affirmative misrepresentations on boxes of Post Great Grains, Honey Bunches of Oats Regular, Whole Grain, and Granola, Raisin Bran, Bran Flakes, Honeycomb, Alpha-Bits, and Waffle Crisp, meaning the difference in the value of these cereals or granola with the affirmative misrepresentations compared to the value of these cereals or granola without the affirmative misrepresentations." *Id.* ¶ 50. The resulting price premia, for each alleged misrepresentation, on each of the Products tested by Gaskin, ranged from $0.00 to $0.51. *Id.* ¶ 48.

Advantage Realized Model/Change in Demand — Demand Modeling Surveys. Gaskin also designed, conducted, and analyzed two market research surveys to enable him to test the effect of omission of information regarding the dangers of added sugar consumption on the Great Grains and Honey Bunches of Oats Products, and, thereby, on consumers' purchases during the relevant period. He concludes, as to the Demand Modeling Surveys and omitted information, that:

> The survey results indicated that Great Grains customers would have consumed, on average, 26.3% less Great Grains and **[**42]** Honey Bunches of Oats customers would have consumed, on average, 28.1% less Honey Bunches of Oats had they been aware of the omitted information. The percentage I calculated is applicable across all varieties of Great Grains and Honey Bunches of Oats cereal at issue in the class. Moreover, given the similarity of the results, and their high statistical significance, I believe it is reasonable to assume that a similar change **[*575]** in demand would apply to the remaining Class products. To be conservative, I would estimate the demand change for the remaining products as the lower of the two survey results, i.e., the 26.3% observed with respect to Great Grains.

Gaskin Report ¶72.

B. Weir

Colin B. Weir is Vice President at Economics and Technology, Inc. ("ETI"), a research and consulting firm specializing in economics, statistics, regulation and public policy. Weir Expert Report (Dkt. No. 155-12) at 1. Weir was retained to "ascertain whether it would be possible to determine damages on a class-wide basis using evidence common to Class members, and, if so, to provide a framework for the calculation of damages suffered by the class as a result of the allegedly false and misleading Claims." *Id.* ¶ 5. **[**43]**

Weir worked with Gaskin to develop both sets of Gaskin's surveys. Relying on the survey results, he then calculated total price premium damages. He concluded:

> If Plaintiffs successfully establish liability for all claims and all products during the time periods shown above in Table 2, total price premium damages would be $69,316,353.92.

Weir Report ¶ 65.

Weir also estimated the reduction in demand if certain alleged misrepresentations had not been made:

> The Gaskin Declaration sets forth the results of the demand model performed by Gaskin. Gaskin has identified that consumers would have consumed at least 26.3% less Great Grains and 28.1% less Honey Bunches of Oats had a disclaimer been made.54,55 Gaskin has affirmed that these factors "appl[y] across all varieties of Great Grains and Honey Bunches of Oats cereal at issue in the class. Moreover, given the similarity of the results, and their high statistical significance, I believe it is reasonable to assume that a similar change in demand would apply to the remaining Class products. To be conservative, I would estimate the demand change for the remaining products as the lower of the two survey results, i.e., the 26.3% observed with respect **[**44]** to Great Grains."

Id., ¶ 69. Using the most conservative percentage figure, and Post's sales data, Weir determined that the Change in Demand Damages if plaintiffs are successful on their claims is $140,417,315.41. *Id.* ¶ 73.

C. Gaskin's Conjoint Survey and Weir's Calculations to Establish Price Premia and Classwide Damages/Restitution

Post moves to exclude the Gaskin conjoint study, price premia determinations, and Weir's resulting calculations because: (i) the conjoint surveys and model do not "fit" plaintiffs' theory of liability; (ii) the surveys make no attempt to prove classwide impact, they just assume it; (iii) Weir's damages calculations are unreliable; and (iv) the surveys measure consumers' willingness to pay, not market price which are distinct concepts.

1. Fit

Both sides recognize that, as part of the predominance inquiry under *Rule 23*, plaintiffs must demonstrate that "damages are capable of measurement on a classwide basis." *Comcast Corp. v. Behrend, 569 U.S. 27, 34, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*.[18] Plaintiffs must present a damages model consistent with their theory of liability — that is, a damages model measuring "only those damages attributable to that theory." *Id. at 35*. "Calculations, need not be exact," but "at the class-certification stage (as at trial), **[**45]** any model supporting a 'plaintiff's damages case must be consistent with its liability case.'" *Id.* (quoting ABA Section of ***Antitrust Law***, Proving Antitrust Damages: Legal and Economic Issues 57, 62 (2d ed. 2010)). Significant to the claims asserted here, "[r]estitution under the UCL and FAL 'must be of a measurable amount to restore to the plaintiff what has been acquired by violations of the statutes, and that measurable amount must be supported by evidence.'" *Pulaski & Middleman, LLC v. Google, Inc., 802 F.3d 979, 988 (9th Cir. 2015)*.

Post argues that there is no *Comcast* fit here. It contends that because plaintiffs challenge only the implication of healthiness from the Challenged Statements, plaintiffs cannot challenge the many other truthful or non-actionable statements on the Products. It also asserts that the model fails because plaintiffs' experts did not try and isolate and test the Challenged Statements separate and apart from the value of the unchallenged or truthful statements. But its argument overreaches. The question under California law is whether the Challenged Statements are false or misleading to an objective reasonable consumer. *See, e.g., Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir. 2008)*. Plaintiffs' Consumer Impact Model assumes that is true, **[**46]** which is an appropriate starting point for a damages model (especially one in support of class certification). *See, e.g., Hadley I., 324 F. Supp. 3d at 1106* (accepting Gaskin's similarly-designed conjoint analyses model as sufficiently fitting plaintiffs' theory).

2. Methodology Challenges

The design, structure, and methodology Gaskin used to conduct the analysis in support of the Consumer Impact Model also fits plaintiffs' theory of damages. Similar conjoint surveys and analyses have been accepted against *Comcast* and *Daubert* challenges by numerous courts in consumer protection cases challenging false or misleading labels. ***[*576]*** *See, e.g., Hadley I, 324 F. Supp. 3d at 1107* (collecting cases).[19]

---

[18] The questions of whether there is the required fit under *Comcast* and whether an expert's opinion should be excluded under *Daubert* are distinct. *See Hadley I, 324 F. Supp. 3d at 1106* ("whether Gaskin's proposed conjoint analysis is sufficiently reliable from a methodological standpoint—and therefore admissible under *Daubert*—is a different issue from whether the conjoint analysis satisfies *Comcast*."). Post challenges the fit of Gaskin's model and Weir's calculations as part of its opposition to Class Certification and as a separate ground in support of its motion for summary judgment; I will consider both the *Comcast* challenge and the more typical *Daubert*/reliability challenges on Post's motion to exclude.

[19] Despite relying heavily on Judge Koh's opinion in *Hadley I* excluding Gaskin's "demand realized model," Post never addresses why Gaskin's consumer impact model/conjoint survey analysis here differs from the one accepted by Judge Koh in *Hadley I*. Instead, it relies on inapposite cases. *See, e.g., Townsend v. Monster Bev. Corp., 303 F. Supp. 3d 1010, 1049 (C.D. Cal. 2018)* (rejecting survey that did not suggest materiality for challenged statements and suffered from focalism bias among other defects); *In re 5-Hour Energy Mktg. and Sales Practices Litig., 2017 U.S. Dist. LEXIS 220969, 2017 WL 2559615, at *10 (C.D. Cal. June 7, 2017)* (rejecting damages model that used improper proxy for consumer value or restitution with respect to misrepresented feature and failed to account for value of other features); *In re ConAgra Foods, Inc., 90 F. Supp. 3d 919, 1031 (C.D. Cal. 2015)* (questioning design of conjoint analysis where survey did not adequately connect "100% Natural" claim to no-GMO theory, but nonetheless accepting the damages model that utilized the conjoint surveys plus a hedonic regression

Post's many arguments regarding Gaskin's methodology go to weight and not admissibility. For example, it alleges that Gaskin failed to account for the placement of the Challenged Statements surveyed on the actual labels and failed to account for or otherwise test unchallenged or truthful statements. It argues that the reasonable consumer would not have been misled by Challenged Statement X because the reasonable consumer would have relied on Unchallenged Statement Y instead and that the reasonable **[**47]** consumer would not have been influenced by the fact the Product contains a significant amount of sugar because the reasonable consumer values "whole grains". Its challenges go to the weight, not admissibility, of the Consumer Impact Model. Post can argue these points at trial as a method of defeating an award or reducing the amount of damages/restitution awarded. *See, e.g., Hadley I, 324 F. Supp. 3d at 1108* (rejecting challenge that conjoint analysis failed to use actual labels or adequately identify actual ingredients, as in the Ninth Circuit, such criticisms about methodology, including a survey's "fail[ure] to replicate real world conditions," "go to the weight of the survey rather than its admissibility."). Its arguments that Gaskin's conjoint surveys and Weir's analysis fail to prove classwide impact because they did not take into account changes in pricing or consumers' willingness to pay price premia over time or location similarly go to the weight not admissibility of the Consumer Impact Model.

Post separately challenges Weir's calculations as unreliable because Weir did not match "sales to labels," as he did not independently verify which labels were on which Products at which times.[20] That may provide a basis **[**48]** for Post to argue to the trier of fact that damages or restitution should be reduced or rejected, but it does not undermine the fit or admissibility of the damages model.

Finally, Post argues that Gaskin's analysis and Weir's dependent conclusions suffer from two significant defects related to market pricing. First, Gaskin's methodology was incapable of measuring a change in market price because he failed to account for how a drop in demand, once Challenged Statements were removed, would result in a drop in price and/or quantity of Product sold. Second, Gaskin and Weir made no attempt to account for competitors' actions in the market, which also impacts Product pricing. *But see Hadley I, 324 F. Supp. 3d at 1106* (concluding Gaskin's "conjoint analysis adequately accounts for supply-side factors and does not merely measure demand-side willingness-to-pay," because the model utilized prices that "mirror" those actually observed in the market and based on actual sales data, and also holds quantity constant). Post cites no cases rejecting conjoint analyses for failures to account for these particular issues. While these attacks might be fodder for cross-examination, they are not grounds for exclusion.

Post's motion to exclude **[**49]** Gaskin and Weir's price premia damages model is DENIED.

[*577] D. Gaskin's Demand Surveys and Weir's Calculations to Establish Advantage Realized

Plaintiffs propose a second damages model, the "Advantage Realized Model," to capture the impacts that flow from Post's failure to disclose the sugar levels and related unhealthiness of its Products. This omissions-based model rests on two "demand surveys" designed by Gaskin to measure the effect of a "disclosure" to consumers of the Products' high sugar content and, according to plaintiffs, unhealthiness, using a testing group and a control group. Gaskin Report ¶¶ 52-53 ("This analysis was designed to determine the effect of the omitted information regarding the dangers of sugar consumption on the demand for Post Great Grains and Honey Bunches of Oats.").

Post moves to exclude this second model, arguing that Gaskin's demand surveys and Weir's calculations based on the theoretical change in demand: (i) measure only impermissible non-restitutionary disgorgement; (ii) rely on a survey design that is unscientific and unreliable; and (iii) propose a "warning" that flagrantly violates the *First*

---

analysis); *In re NJOY, Inc. Consumer Class Action Litig., 120 F. Supp. 3d 1050, 1122 (C.D. Cal. 2015)* (rejecting analysis that failed to account for market pricing); *Apple, Inc. v. Samsung Elecs. Co., Ltd., 11-CV-01846-LHK, 2014 U.S. Dist. LEXIS 29721, 2014 WL 976898, at *12 (N.D. Cal. Mar. 6, 2014)* (inadequate showing of price premia to support injunction in patent infringement case).

[20] Nor could he, according to Post, given the complex distribution chain and the number of different label variants over time.

Amendment (Gaskin attempted to measure how much less cereal Post would have **[**50]** sold if the cereal boxes had included a warning about added sugar's unhealthiness). My analysis of the first argument is dispositive.

Judge Koh rejected a similar survey designed by Gaskin in the *Kellogg's* case. She determined that it measured only non-restitutionary disgorgement, which is not recoverable under California's Unfair Competition Law (UCL) or False Advertising Law (FAL). She explained that the demand surveys attempted to calculate how much money defendant made from products that Gaskin determined class members would not have otherwise purchased if the healthiness representations had not been made or the unhealthiness of sugar had been affirmatively disclosed. The surveys, therefore, did not measure "restitution," meaning funds secured by Post from class members, but non-restitutionary and not-recoverable disgorgement, meaning profits of defendant that did not flow from plaintiffs' purchases. *Hadley I, 324 F. Supp. 3d at 1114* ("the advantage realized model appears to 'focus[ ]' solely on Kellogg's 'unjust enrichment'—*i.e.*, the additional sales Kellogg gained from its allegedly deceptive omissions—and therefore seems to be capable of providing only a measure for nonrestitutionary disgorgement.").

Plaintiffs **[**51]** argue that Judge Koh's reasoning about the Advantage Realized Model in *Hadley I* was erroneous. They claim that she neglected to consider that the model is connected to actual retail sales of products purchased by class members, even though it focuses on Post's sales. According to plaintiffs, because those sales would not have otherwise occurred if the omitted information had been disclosed, this model accurately captures money that is owed *back* to plaintiffs.

Plaintiffs miss the point. As recognized by Judge Koh in *Hadley I,* plaintiffs do "not argue that Gaskin's proposed advantage realized model can be used to measure the loss incurred by the class—as opposed to the benefit gained by Kellogg—due to Kellogg's allegedly deceptive omissions." *Id. at 1114*. Without some connection to the amount of *actual* loss to actual class members (*e.g.*, what Post gained from the class members that it would not have but for the omissions), the appropriate amount of restitution cannot be determined. *See* *Colgan v. Leatherman Tool Group, Inc., 135 Cal. App. 4th 663, 697, 38 Cal. Rptr. 3d 36 (Cal. App. 2d Dist. 2006)*, *as modified on denial of reh'g* (Jan. 31, 2006) ("the 'object of restitution is to restore the status quo by returning to the plaintiff funds in which he or she has an ownership interest.'" (quoting *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 1149, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003))*.

By focusing **[**52]** on sales Post made to consumers who would not have otherwise purchased the Products (had they known the omitted information tested by Gaskin), the Advantage Realized Model ignores that the Products provided some value to the consumers despite the omitted information. It, therefore, is a full refund model of damages; it seeks a refund of the full price of the Products for those misled and injured purchasers. That model has been rejected by numerous courts when proffered in consumer product cases **[*578]** where the product provided some value. *See, e.g.,* *Allen v. Conagra Foods, Inc., 331 F.R.D. 641, 673 (N.D. Cal. 2019)*; *see also* *Chowning v. Kohl's Department Stores, Inc., 735 Fed. Appx. 924, 925, 2018 WL 3016908, at *1 (9th Cir. 2018)* ("The proper calculation of restitution in this case is price paid versus value received. Under California law, where a plaintiff obtains value from the product, the proper measure of restitution is 'the difference between what the plaintiff paid and the value of what the plaintiff received.'" (citation omitted)). By failing to account for the value actually realized by the class members from their purchase of the product, the Advantage Realized Model overstates the amount of restitution that might be owed to class members if plaintiffs prevail. It cannot be relied on to support the motion for class certification or to oppose defendant's **[**53]** motion for summary judgment.

Post's motion to exclude is DENIED, except to the limited extent that the Advantage Realized Model is not appropriate for and does not capture damages/restitution available to plaintiffs if they prevail. Plaintiffs cannot rely on the Advantage Realized Model for purposes of class certification or to oppose summary judgment. That said, the Consumer Impact Model does fit and is otherwise admissible. That model supports plaintiffs' motion for class certification and their opposition to Post's motion for summary judgment.

IV. PLAINTIFFS' MOTION TO EXCLUDE STROMBOM

Turning to an expert Post relies on to dispute the work of Gaskin and Weir, plaintiffs move to exclude Bruce Strombom's opinions. Strombom is an economist who opines that Gaskin and Weir's Consumer Impact/Price Premia Model: (i) is based on the flawed assumption that supply is perfectly inelastic, causing Gaskin/Weir to overstate price premia; (ii) improperly fails to account for the addition or deletion of the Challenged Statements on the Products; and (iii) did not, but should have, accounted for price variation over time. He adds that Weir's damages calculations are based on errors **[**54]** and are inaccurate .[21]

Plaintiffs move to exclude these opinions, arguing that: (i) Strombom is unqualified to render opinions on conjoint surveys; (ii) his opinions are based on a "legally-erroneous understanding of the proper measure of damages in this case" and therefore his "supply-side opinion" is wrong as a matter of law and irrelevant; (iii) his opinion depends on unreliable "before and after sales data." In addition, plaintiffs move to strike Strombom's opinions on Weir's "calculation error" and on "ascertainability" generally. MTE Strombom (Dkt. No. 190).

I need not resolve at this juncture whether Strombom is qualified to opine on conjoint surveys generally and whether he is qualified to criticize Gaskin and Weir conclusions in particular. I similarly do not need to address whether Strombom made errors in his own analyses (which go to weight and not admissibility, as with the majority of Post's attacks against Gaskin and Weir). I have concluded that the Consumer Impact Model and damages calculations proposed by Gaskin and Weir are sufficient to support class certification and oppose the motion for summary judgment. Strombom was only mentioned twice in connection with Post's motion **[**55]** to exclude Gaskin and Weir's Consumer Impact Model (where Post decided to fully argue its challenge to that model) in connection with the rejected arguments about Gaskin's failure to consider price across time and geographic location. MTE Gaskin & Weir at 15, 16 n.11. These and the other opinions Strombom provides in his Report, if considered, do not change my opinions about the admissibility of Gaskin and Weir's Consumer Impact Model and are not otherwise relevant to my determinations of the class certification or summary judgment motions.

With respect to plaintiffs' objections to Strombom's criticism that neither Gaskin nor Weir address how class members would be ascertained or damages determined for individual class members, these issues were not argued by Post in opposing class certification **[*579]** . Strombom Report ¶¶ 79-83. They are irrelevant for purposes of resolving the pending substantive motions, as I have determined the class is ascertainable and recognize that there are numerous ways aggregate damages can be fairly apportioned among injured class members if plaintiffs are successful at trial.

Plaintiffs' motion to exclude is DENIED without prejudice. Plaintiffs may, if Strombom intends to testify at trial, make **[**56]** more targeted attacks on Strombom's qualifications or on the irrelevance of his opinions *in limine* or at trial.

V. POST'S MOTION TO EXCLUDE SILVERMAN

Bruce G. Silverman is an advertising expert retained by plaintiffs to opine on: (i) the impact that advertising has on consumer perceptions regarding the health and wellness benefits of consumer products generally; (ii) consumer behavior and decision-making as it relates to labeling claims on cereal packaging; (iii) whether the challenged claims convey a material health message; and (iv) the materiality of information plaintiffs allege was deceptively omitted. Expert Report of Bruce G. Silverman (Dkt. No. 155-4), ¶¶ 1,4.

Silverman opines:

> 28. Consumers are interested in healthy eating and make food purchasing decisions based on health and wellness claims made on food packaging.
> 29. The challenged claims conveyed a health message, which is frequently bolstered by the context in which it is presented.

---

[21] Plaintiffs also move to exclude Strombom's opinions regarding deficiencies in the Advantage Realized Model and Weir's calculations based on that model. However, as that model is not admissible, I need not reach these arguments.

> 30. Consumers receive the health message in advertising, at the store, and over time, at their breakfast tables as they are exposed to the details on the box itself.
> 31. The health message is material to consumers.
>
> 32. Consumers rely on health messages **[**57]** when deciding which cereal to purchase. This is true specifically of the accused products and challenged claims.
> 33. Disclosure of material information Plaintiffs allege Post omitted, i.e., warning consumers of the potential dangers of consuming the accused products, would change consumer behavior.

He concludes:

> 352. . . It is evident to me that Post's advertising and packaging for these products focuses heavily on the alleged health benefits embodied in the claims listed in Plaintiffs' complaint, and it is equally evident from the Post and other marketing studies I reviewed that consumers respond positively to them. Thus, the claims have a material effect on consumer purchasing behavior.
>
> 353. Moreover, it is evident to me that Post's disclosure of information about the potential health risks and effects of consuming the added sugar in the cereals at issue in this matter would change consumer eating and purchasing behavior. It is likely that sales of these products would decline as consumers who currently hold to the belief that the products are healthy would cut back or eliminate the products altogether from their diets. In addition to adding a warning label, in my opinion it might also **[**58]** be appropriate for Post to fund a corrective advertising or public relations campaign to inform the public that the products at issue in this matter contain unhealthy levels of sugar.

Silverman Report.

Post moves to exclude Silverman's opinions on the meaning and materiality of the Challenged Statements, arguing that he failed to address the specific Challenged Statements at issue in the "particular combinations" that they were used on Post cereal boxes and has no methodology to achieve that specificity. It also complains that Silverman conducted no consumer surveys or other tests, and instead relied on his own experience in the industry and its own documents to support his opinions on meaning and materiality.[22]

[*580] Post's argument that Silverman's opinions must be excluded because he did not conduct any focus group or other consumer testing is misplaced. As Judge Koh explained in *Hadley I*, "California courts have explicitly 'reject[ed] [the] view that a plaintiff must produce' extrinsic evidence 'such as expert testimony or consumer surveys' in order 'to prevail on a claim that the public is likely to be misled by a representation' under the FAL, CLRA, or UCL." *Hadley I., 324 F. Supp. 3d at 1115* (internal citations omitted). **[**59]**

Also without merit is Post's assertion that Silverman needed to have but had no methodology to support his analysis of meaning and materiality. As Judge Koh explained in *Hadley II*, because "Silverman's opinions are based on his many years of marketing experience and his review of Kellogg's own internal consumer research and other documents," the motion to exclude was denied. *Hadley II, 2019 U.S. Dist. LEXIS 136791, 2019 WL 3804661, at *24 (N.D. Cal. Aug. 13, 2019)*.[23] Silverman's in-depth experience in this field, including attending numerous focus groups centered on marketing cereal and developing marketing plans for cereal products, qualify him to opine on

---

[22] Defendant also move to exclude Silverman's opinions regarding the Advantage Realized Model, which has been excluded from this case.

[23] Post's cases rejecting advertising experts' opinions based on experience are inapposite and not persuasive given plaintiffs' theory of liability in this case and Silverman's particular experience. *See, e.g., Jones v. ConAgra Foods, Inc., C 12-01633 CRB, 2014 U.S. Dist. LEXIS 81292, 2014 WL 2702726, at *15 (N.D. Cal. June 13, 2014)* (noting expert multiple admissions of potential insignificance of "100% natural label" and noting that expert's "rather startling admission might have something to do with the fact that there is no single, controlling definition of the word 'natural.'"); *GPNE Corp. v. Apple, Inc., 12-CV-02885-LHK, 2014 U.S. Dist. LEXIS 53234, 2014 WL 1494247, at *5 (N.D. Cal. Apr. 16, 2014)* (rejecting expert's proposed royalty rate based only on "30 years of experience" as "classic ipse dixit" reasoning).

the matters addressed in his Report. Post's challenges to Silverman's methodology and failure to consider specific issues go to weight, not admissibility.

Finally, Post's objections that Silverman did not consider other phrases on the packaging, other "possible influences" on consumer behavior, or Post documents not provided to him by plaintiffs' counsel, similarly go to the weight and not the admissibility of Silverman's testimony. The jury will consider the context of the Challenged Statements on the Products' labels, as well as relevant Post documents that **[**60]** impacted Post's decisions to use certain statements or how to place them, in order to determine whether "a reasonable consumer would attach importance to it or if 'the maker of the representation knows or has reason to know that its recipient regards or is likely to regard the matter as important in determining his choice of action.'" *Hinojos v. Kohl's Corp., 718 F.3d 1098, 1107 (9th Cir. 2013)*, *as amended on denial of reh'g and reh'g en banc* (July 8, 2013) (*quoting* *Kwikset Corp. v. Super. Ct., 51 Cal. 4th 310, 333, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011))*. Post repeatedly chides plaintiffs and their experts for allegedly ignoring that a truthful statement might have been material to a reasonable consumer. But that does not mean that a Challenged Statement cannot *also* be material and, therefore, actionable. Further, a statement need not be "'the sole or even the predominant or decisive factor influencing'" the class members' decisions to buy the challenged products. *In re Tobacco II Cases, 46 Cal. 4th 298, 326, 93 Cal. Rptr. 3d 559, 207 P.3d 20 (2009)* (quoting *Engalla v. Permanente Med. Grp., Inc., 15 Cal. 4th 951, 977, 64 Cal.Rptr.2d 843, 938 P.2d 903 (1997))*.

Post's motion to exclude Silverman's opinions is DENIED.

VI. PLAINTIFFS' MOTION TO EXCLUDE HANSSENS

Dr. Domonique M. Hanssens is a marketing professor who was retained by Post to review and respond to Silverman (advertising and marketing), Gaskin (survey), and Weir (survey and damages models). Hanssens opined that Gaskin's failed to account for all supply factors. **[**61]** Plaintiffs move to strike that opinion because Hanssens makes only a general criticism of conjoint analyses that have been repeatedly accepted as valid to set price premia by courts in this District. They argue that Hanssens' supply-side opinion is entirely theoretical and unworkable. And they move to strike Hanssens' opinion that Gaskin's price premia are not validated by real-world market data because Hanssens uses Strombom's **[*581]** report and data that plaintiffs have also moved to exclude as unreliable.

I need not resolve plaintiffs' challenges to Hanssens' qualifications or analysis because I have already accepted — for purposes of granting class certification and denying Post's motion for summary judgment — the validity and admissibility of the Gaskin/Weir Consumer Impact Model. Hanssens' challenges, considered on their merits, do not alter those conclusions. As with Strombom, if Hanssens intends to testify at trial, plaintiffs may make more limited and specific requests to exclude identified parts of Hanssens testimony *in limine* or at trial.

Plaintiffs also move to strike four of Hanssens' opinions that attempt to undermine Silverman regarding messaging and materiality. Some of Hanssens' **[**62]** opinions are not relevant under the California consumer protection statutes at issue, while others raise questions to be resolved by the jury.[24] Hanssens opines that Silverman's opinions "lack evidence" that all or most consumers were exposed to the Challenged Statements, that all or most consumers relied on them, that all or most consumers perceived statements to communicate healthiness, and that healthiness is material or that consumers would be impacted by plaintiffs' tested disclosure statement. The "lack of

---

[24] Whether "all or most consumers" were actually exposed to and relied on Challenged Statements are not relevant questions under the California consumer protection statutes at issue. Some of Hanssens' opinions might support Post's arguments that given the context and placement of the Challenged Statements on the labels, and in light of other unchallenged statements, some or all of the Challenged Statements would not be material to a reasonable consumer. That, however, is a merits question that does not defeat class certification or require summary judgment to Post. *See* supra at 9, discussing *Bradach v. Pharmavite, LLC, 735 Fed. Appx. 251, 254 (9th Cir. 2018)* (unpublished), cert. denied, ***139 S. Ct. 491, 202 L. Ed. 2d 379 (2018)*** & *Kumar v. Salov N.A. Corp., 14-CV-2411-YGR, 2016 U.S. Dist. LEXIS 92374, 2016 WL 3844334, at *4 (N.D. Cal. July 15, 2016)*.

evidence" arguments do not undermine my conclusions discussed above that Silverman's opinions are reliable and admissible at this juncture to support class certification on materiality. The disclosure statement is not relevant as I have excluded the Advantage Realized Model. If Hanssens intends to testify at trial, plaintiffs may raise specific **[*582]** arguments to exclude identified portions of that testimony *in limine* or at trial. For purposes of ruling on the class certification and summary judgment motions, the motion to exclude is DENIED without prejudice.

VII. PLAINTIFFS' MOTION TO EXCLUDE VAN LIERE

Dr. Van Liere is an expert in conducting research surveys, **[**63]** market analysis, and sampling analysis retained by Post to conduct a consumer survey on its behalf to test the impact of some of the Challenged Statements and consumers' perceptions of sugar as healthy or unhealthy. Plaintiffs move to exclude the survey results, arguing that the results are biased and not based on a reliable methodology because: (i) only shoppers in malls were surveyed and numerous courts have criticized attempted extrapolation of the results of similar "mall intercept" surveys to broader populations; (ii) Van Liere failed to measure impact of Challenged Statements on Great Grains and Honeycomb cereals; and (iii) his opinion about consumers' healthy perception of cereals prior to 2012 is speculative and irrelevant.

I have concluded that plaintiffs satisfy the basic materiality showing (with the limited assistance of Silverman) to support predominance on class certification and survive Post's motion for summary judgment. As with Strombom and Hanssens, none of Van Liere's opinions undermine those determinations. Moreover, plaintiffs' challenges go primarily to the methodology and, therefore, the weight of Van Liere's survey and its results, not its admissibility.[25] If Van **[**64]** Liere intends to testify at trial, plaintiffs may raise specific arguments to exclude identified portions of that testimony *in limine* or at trial. For purposes of ruling on the class certification and summary judgment motions, the motion to exclude is DENIED without prejudice.

VIII. POST'S MOTION TO EXCLUDE LUSTIG AND GREGER

A. Lustig

Robert Lustig is an Emeritus Professor of Pediatrics in the Division of Endocrinology and was the Director of the Weight Assessment for Teen and Child Health (WATCH) Program at the University of California, San Francisco for 14 years. Lustig Expert Report (Dkt. No. 155-6), ¶ 7. He was asked by plaintiffs "to summarize relevant scientific and medical literature regarding the physiological metabolism and effects of added sugar consumption on the human body, both generally and specifically in relation to the types and amounts in the challenged cereals" and to "opine on the veracity of Post's labeling statements challenged in this lawsuit in light of the scientific evidence" and "on the scientific validity of a disclosure statement used in a 'demand study' that plaintiffs propose for this litigation." *Id.* ¶ 2.

As particularly relevant to these motions, Lustig **[**65]** opines:

> 4. Added sugar is a primary driver of chronic metabolic disease, such as Type 2 diabetes, heart disease, fatty liver disease, and tooth decay. This is not based on correlation; the scientific literature supports causation for each of these disease entities.
>
> 5. Accordingly, it is my opinion that:
>
> > a. regularly and/or excessively consuming Post cereals that have been challenged by plaintiffs—namely Great Grains, Honey Bunches of Oats, Honey Bunches of Oats Whole Grain, Honey Bunches of Oats

---

[25] Citing no cases where mall intercept surveys were excluded, and not relying on any expert opinion but only on a citation to the National Academy of Sciences 2011 Survey Reference Guide, plaintiffs complain that Van Liere's mall intercept study's problems are so severe they do not simply undermine its weight but make it inadmissible. MTE Van Liere [Dkt. No. 191] at 5-6. I will not exclude Van Liere's study on the basis of that very limited and unsupported argument.

Granola, Raisin Bran, Bran Flakes, Alpha Bits, Honey Comb, and Waffle Crisp—is not healthy, and the excess added sugar is more detrimental to health than the fiber and/or vitamins can be considered beneficial; and

b. the disclosure statement used Plaintiffs' Demand Study propose is scientifically valid

Id. ¶¶ 4-5.

B. Greger

Dr. Michael Greger, M.D. FACLM is a graduate of Cornell University School of Agriculture, and Tufts University School of Medicine, a physician (licensed as a general practitioner specializing in clinical nutrition), and a founding member and a Fellow of the American College of Lifestyle Medicine. Greger Expert Report (Dkt. No. 155-8) at 5. Greger has been asked to: (i) opine on **[**66]** the health effects of added sugar consumption generally; (ii) identify, analyze, and summarize relevant scientific and medical literature regarding the health effects of cereal consumption, including concerning the consumption behaviors of cereal eaters; (iii) analyze and summarize any additional sources Post indicates it relied on to substantiate any challenged claim; and (iv) opine on whether, in light of the scientific evidence and their added sugar content, the Post cereals challenged by plaintiffs are generally healthy. *Id.* at 4.

Greger concludes that the Products are not generally healthy because: (i) the Products have high energy densities; (ii) the Products have sub-optimal carbohydrate-to-fiber ratios; (iii) the Products have high glycemic and insulinemic loads; and (iv) the trans fats in waffle crisp render the product particularly unhealthy. He also states that the "Mary Poppins" argument (the argument that the sugar content is necessary for "taste appeal" to "encourage children to consume needed nutrients at breakfast time," implying children just will not eat cereals that are less sugary) is fallacious and the "better choice" argument (the argument that sugary cereal is better **[**67]** than a donut) presents a false dichotomy. *Id.* at 40-46.

C. Motion to Exclude or Strike

1. Analytical Gaps

Post moves to exclude Lustig and Greger's opinions as not based on reliable methods because "they depend on unsupported leaps across two analytical gaps." Dkt. No. 164 at 5-15. Post claims that these experts: (i) espouse **[*583]** "theories about the health effects of added sugar in the overall diet [that] are not generally accepted"; (ii) make an unsupported leap from their claim about the health effects of added sugar to contend that the healthiness of particular foods can be judged solely on the basis of added sugar; (iii) make a further unsupported leap to claim that added sugar in breakfast cereals causes health issues, and this leap directly contradicts the existing science on breakfast cereals; and (iv) cannot "bridge their analytical gaps" with an unsupported conclusion that consumers eat too much cereal on a regular basis.

Post's arguments go to the weight of the testimony, not its admissibility. Lustig's and Greger's opinions are generally based on their own medical training, experience in practice, and research. If Post believes their opinions are in the minority or ignored contrary evidence **[**68]** or opinions, those are matters for cross-examination, not exclusion. *See, e.g., Hadley II, 2019 U.S. Dist. LEXIS 136791, 2019 WL 3804661 at *24* (denying motion to exclude Lustig despite recognition that some of his opinions were in the "minority," because his "opinions are based on his medical training, his experience treating obese children, his academic research, and his review of the scientific record. Kellogg's arguments as to why Dr. Lustig should be excluded go to weight and not admissibility."). The science and research around the impacts of high sugar consumption is continuing to develop. Even if Post is correct that these experts' opinions are currently in the minority, there *is* evidence supporting them. Simply being in minority does not mean that their opinions are excludable as unreliable.[26]

Finally, that Lustig and Gregor cannot identify any studies on sugar in "a particular food" (much less particularly in cereals) to support their opinions does not preclude their testimony. The "analytical gaps" Post complains of are nothing more than applying general research to the specific issues in this case. Those gaps can be explored on cross-examination.

2. Flawed Methodologies

Next, Post argues that the methodologies used by these two experts **[**69]** to review scientific literature were "fundamentally flawed" because they were biased in their article selection (Lustig allegedly rejected "industry funded" articles and Greger failed to conduct a "meta-analysis" or "systematic review" of literature) and drew "incorrect" conclusions from that literature. But Lustig's testimony is based on his own research and analysis of others' research and is not simply a "literature review." That he did not rely on or was dismissive of certain studies does not make his opinions excludable; Post may test them on cross-examination.

As to Greger's literature review, Post contends that it was too haphazard — literature was collected from Boolean searches, as opposed to a more systematic method of collection — and this lack of methodology combined with his lack of expertise in studying sugar led him to a number of demonstrable errors in his opinions. Post identifies only one study that was not included in Greger's search results and review. Other than that one study, Post does not actually challenge the *results* of Greger's searches themselves, other than to argue Greger failed to identify his selection criteria.[27] On that point, Greger offered to provide **[**70]** those criteria, but Post did **[*584]** not follow up. While Post asserts that Greger "did not follow any recognized method" for his literature review, Post provides no caselaw or other citations in support of that specific point.[28] Nor does Post show that Greger utilized a rejected or discredited methodology of identifying literature. Post's complaints about Greger's conclusions from his literature study go to the weight, not the admissibility, of his opinions.

3. Opinions Outside their Expertise

Finally, Post moves to exclude opinions expressed by Lustig and Greger that are alleged to be outside their areas of expertise.

---

[26] Where experts point to "an objective source demonstrating that his method and premises were generally accepted by or espoused by a recognized minority" of those in the fields, the opinions may be admissible. *Lust by & Through Lust v. Merrell Dow Pharms., 89 F.3d 594, 597 (9th Cir. 1996)*. The developing evidence around the effects of sugar in the diet, and the different views of practitioners in the field that are based on accepted sources and methodologies, make inapposite the concerns acknowledged by the Supreme Court in *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)* with respect to "conjecture" and "known techniques" with minimal support. *Id. at 594* (recognizing that in ruling particular evidence admissible or inadmissible "'a known technique which has been able to attract only minimal support within the community' . . . "may properly be viewed with skepticism." (internal citations omitted)).

[27] In Reply, Post argues — without citation — that Greger missed "numerous studies" cited by its expert, Clemens. Reply on MTE Lustig & Greger at 12-13. I will not address unsupported arguments raised in Reply.

[28] Post, instead, relies on "pick and choose" cases where courts have criticized experts who picked and chose sources when conducting literature reviews and otherwise did not explain the conclusions and bases of their selected sources. *See, e.g., Lust by & Through Lust v. Merrell Dow Pharms., 89 F.3d 594, 596 (9th Cir. 1996)* (excluding expert who selectively picked the literature reviewed); *In re Lipitor (Atorvastatin Calcium) Mktg., Sales Practices and Products Liab. Litig., 174 F. Supp. 3d 911, 929 (D.S.C. 2016)* (rejecting expert's literature review resulting from "cherry—picking articles based on the authors' biases").

a. Dr. Lustig's Opinions

In paragraph 26 of his report, Dr. Lustig opines about the healthcare costs of "chronic metabolic disease, such as diabetes and heart disease" and that, based in part on research paper he co-authored, there would be "savings in healthcare of $31 billion per year if we could reduce our added sugar consumption by 50%." Post moves to exclude those opinions as irrelevant, potentially misleading, and outside of Lustig's area of expertise. The objections are OVERRULED, as these comments are tied to Lustig's own publication and research.

Post also moves **[**71]** to exclude Lustig's comments in paragraph 31, that added sugar causes disease and that "if this were not true, then sugar taxation in Mexico, the U.K., 26 other countries around the world, and six cities in the United States, would not have been enacted." Post argues that Lustig is not an expert on public choice theory or political science, so he has no basis for opining about why laws were passed. The objection is OVERRULED because Lustig's background in law and public policy and his writing on policies (including taxation) to achieve sugar reduction provide necessary background for these opinions.

Post objects to Lustig's claims, in paragraphs 32 and 34, about the alleged "obfuscation of science" and "pressure" applied by the food "industry." Post objects to these opinions as gratuitous swipes outside his purported medical expertise, inflammatory, and irrelevant as not tied to Post. The objections are OVERRULED because the opinions are based on his review of industry-sponsored studies, but the objections may be renewed *in limine* or at trial.

Finally, Post objects to Lustig's characterization of the purpose, intent, and clarity of Challenged Statements in paragraph 44, on the grounds **[**72]** that Lustig is not an expert in marketing, consumer decision-making or how consumers interpret label statements, and because he did no independent investigation into how consumers interpret the labels. These objections are OVERRULED because they are based on his research experience, but the objections may be renewed *in limine* or at trial.

b. Dr. Greger's Improper Opinions

Post objects to Greger's frequent "gratuitous statements" throughout his Report that characterized the industry as "sugar pushers" and conspiracists like the tobacco companies as inflammatory and irrelevant as unconnected to any conduct of Post. The objections are OVERRULED, as based on Greger's review of literature of studies regarding cereals and the history of food-industry sponsored studies and his background as a nutritionist, but may be renewed *in limine* or at trial.

For the foregoing reasons, Post's motion to exclude the testimony in whole or in part of Lustig and Greger is DENIED.

IX. PLAINTIFFS' MOTION TO EXCLUDE CLEMENS

For their part, plaintiffs move to exclude Post's expert, Roger Clemens, who **[*585]** seeks to challenge the opinions of Lustig and Greger. Dkt. No. 170. Clemens opines that: (i) added sugar is not a primary **[**73]** driver of metabolic disease; (ii) consumption of cereal that contains sugar is safe; (iii) consumption of nutrient fortified cereals is an important source of good nutrition; (iv) global guidelines on dietary sugar are not consistent or based on similar quality scientific evidence; and (v) consumption of the Post cereals at issue provides health benefits to consumers. Dkt. No. 170 at 3-5.

Plaintiffs' move to exclude Clemens' opinions in full, arguing that Clemens: (i) is not qualified, as he is only a nutritional expert and not a medical doctor; (ii) failed to consider numerous "ground breaking" studies conducted by Lustig; (iii) was evasive and did not answer questions directly in his deposition; and (iv) gave irrelevant testimony because he never directly disputed the points made by Lustig and Greger, but instead attempted to reformulate the critical issue in this case as not whether one item was "unhealthy" but instead whether a person's diet as a whole was healthy.

The problem with plaintiffs' "qualifications" challenge is that plaintiffs do not dispute that Clemens is qualified to opine on pharmacology, pharmaceutical science, and biological chemistry or that he was a member of **[**74]** the 2010 Dietary Guideline Advisory Committee ("2010 DGAC"), albeit to address nutrients other than sugar. That Clemens has only limited experience directly addressing "sugar" does not automatically undermine his ability to opine on areas that are within his expertise; it does provide a ground on which to attack his opinions on cross-examination.[29] *In limine* or at trial plaintiffs may make more targeted attacks on Clemens' qualifications with respect to specifically identified opinions or testimony.

Plaintiffs next challenge the reliability of Clemens' opinions, arguing they are based on insufficient facts and data. These challenges go to weight, not admissibility. Plaintiffs' primary insufficiency challenge is based on Clemens' admissions in his deposition that he could not recall or failed to review key studies that were authored by or heavily relied on by Lustig as a basis for Lustig's opinions. In opposition, Post and Clemens address that charge by "clarifying" through a declaration and Clemens' deposition errata sheet (Dkt. Nos. 196-13, 200) that Clemens had, in fact, reviewed the majority of those studies when writing his Report and prior to his deposition.[30]

Plaintiffs' move to **[**75]** strike this argument and declaration, arguing that it is a "sham" made to contradict Clemens' deposition testimony and argue that Clemens should not be allowed to opine on the now-remembered and not-seen-before studies outside of his prior deposition. Dkt. No. 210. Reading the deposition testimony and his new declaration (as well as in the errata sheet), I conclude that Clemens' refreshed testimony is not a sham but a clarification that is not directly contradictory to his deposition statements. However, in order to avoid any prejudice to plaintiffs, Post shall produce Clemens for a subsequent deposition for up to two hours so that plaintiffs may ask Clemens about his newly-remembered consideration of the Lustig **[*586]** studies and references, as well as Clemens' opinions expressed in his declaration regarding the articles that were introduced at his deposition.[31]

Relatedly, plaintiffs challenge Clemens' testimony as unreliable because Clemens is not credible, given what plaintiffs characterize as Clemens' evasive, non-responsive, and contradictory answers in his deposition. These challenges, however, go to weight and not admissibility. Finally, plaintiffs move to exclude Clemens' opinions as **[**76]** irrelevant and unhelpful. Again, these challenges go to weight, not admissibility.

Plaintiffs' motion to exclude is DENIED. Plaintiffs may, however, raise narrowly tailored and precisely supported challenges to specific portions of Clemens' opinions or expected testimony *in limine* or at trial.

X. MOTIONS TO SEAL

---

[29] In a particularly unhelpful manner, plaintiffs argue Clemens is broadly unqualified and then point to numerous instances in his deposition where he, arguably, walked back assertions made either in his Report or in his deposition. But plaintiffs do not identify with any specificity the paragraphs, pages, or subject matters from Clemens' Report that they want excluded because he is unqualified. MTE Clements [Dkt. No. 184] at 6-8. This broad-brush approach is not helpful. Identifying the parts and specific opinions in a report that a party wants to exclude tied to the evidence supporting that specific exclusion request is required, especially in this sort of case where many of the experts are opining on very broad ranges of topics resulting in numerous opinions.

[30] Clemens declares: "I did not recall a number of these articles at the time and so said that I had not seen them previously. Following my deposition, and as part of preparing my errata sheet, I reviewed my files to confirm whether I had in fact previously reviewed those documents. I identified several articles that I had previously reviewed in preparation of my report in this matter, but that I did not specifically recall during my deposition." Dkt. No. 200 ¶ 2. In his Declaration, Clemens also addresses other articles — one by Lustig and others that were introduced as his deposition that he admits he had not considered at that time — and explains his view of them now. *Id.* ¶¶ 4-6.

[31] Plaintiffs' remaining insufficiency challenges — that Clemens failed to consider industry funding a source of bias and that he relied on "outdated" sources — likewise go to the weight not the admissibility of Clemens' testimony.

In support of both sides' motions, each side seeks to file information designated as confidential by Post under seal. Dkt. Nos. 151, 152, 153, 154, 155, 174, 175, 178, 207. The information sought to be sealed is characterized by Post as its own confidential and proprietary information, discussing Post's sales and pricing data; distribution, sales and marketing strategies; product performance and development information; and Post's internal and third-party-conducted consumer research. It also includes information produced by third-parties, including Decision Insight which conducted marketing on behalf of Post as well as marketing studies produced by other third-parties hired by Post, and "highly confidential" sales figures produced by a third-party, IRI pursuant to a subpoena issued by plaintiffs.

Parties seeking to seal judicial records relating to motions that are "more than tangentially **[**77]** related to the underlying cause of action," *Ctr. for Auto Safety v. Chrysler Grp., 809 F.3d 1092, 1099 (9th Cir. 2016)*, bear the burden of overcoming the presumption of public access to court records with "compelling reasons supported by specific factual findings" that outweigh the general history of access and the public policies favoring disclosure. *Kamakana v. City & County of Honolulu, 447 F.3d 1172, 1178-79 (9th Cir. 2006)*. Here, as the motions for class certification, summary judgment, and to exclude experts are all central to the merits of this case Post must meet the compelling justifications standard in order to seal information at issue.

Compelling reasons justifying the sealing of court records may exist "when such 'court files might have become a vehicle for improper purposes,' such as the use of records to gratify private spite, promote public scandal, circulate libelous statements, or release trade secrets." *Kamakana, 447 F.3d at 1179*. However, "[t]he mere fact that the production of records may lead to a litigant's embarrassment, incrimination, or exposure to further litigation will not, without more, compel the court to seal its records." *Id.*

Post supports its broad requests to seal with the declarations of Ananta Engineer, who is a Senior Director of Insights and Planning at Post Consumer Brands, LLC. Dkt. No. 207-1, 174-1, 158. Engineer declares, **[**78]** generally, that given the "market for ready-to-eat breakfast cereal is highly competitive" and the "three large cereal makers (General Mills, Kellogg's, and Post) are closely monitoring the dockets in the cases brought by Plaintiffs' counsel against their competitors, including this case," and that if "the exhibits filed under seal are unsealed, they will almost certainly be reviewed by Post's competitors. And if Post's competitors see the information that Post has gathered and Post's thought processes in analyzing that information, they can use it to engage in more effective branding, advertising, product development, sales, and pricing for their own products, to Post's competitive disadvantage." Engineer Decl. [Dkt. No. 174-1] ¶ 3.

I agree that sealing is merited for some of the very specific, detailed financial figures and undisclosed marketing plans included in the record as disclosure of that information would likely cause Post competitive harm. **[*587]** However, even a cursory review of the expansive amounts of material Post seeks to seal show the requested sealing is overbroad. Examples of information Post seeks to seal from plaintiffs' motion for class certification includes: (i) very **[**79]** general statements regarding consumption of cereal products (noting that it is the "Top Food[] Consumed at Breakfast"); (ii) general statements regarding consumers' interests in convenient and healthy food options (consumers eat cereal is because of its "convenience and nutritional benefits"); (iii) and the fact that "Cereal boxes are read with interest and in detail," and represent a quality "opportunity to engage with target consumers." Dkt. No. 155-2 at 2-5. It is likely that much of this information (and similar information repeated throughout the motion papers, expert reports, and exhibits) is well known in the industry, if not by the public at large. The simple fact that something is cited from a report produced by a third-party marketing consultant or by members of Post's in-house marketing team does not make it sealable. Information may be sealed from the public *only* if it is truly confidential, not generally known, *and* its disclosure would likely cause Post competitive harm.

One example from the Expert Reports concerns information produced for Post by Decision Insight. Post seeks to seal the following highlighted information regarding studies discussed in the Hanssens Report: **[**80]** those "studies include some analyses evaluating different cereal packaging options based on test and control study designs. However, these analyses are still inadequate for the purpose of evaluating the challenged claims in this case because they do not isolate the challenged claims separately, independent of other changes to the cereal packaging. *See* Decision Insight Report for Post, "Post Great Grains Cereal ShopperIQ Packaging Study," July 7, 2016, DI_0000047-87." Hanssens Report, Dkt. No. 174-10, at 5 n.13. It is hard to see how disclosure of this very general description of studies conducted by Decision Insight would not be generally known by Post's competitors and how disclosure could cause any harm whatsoever to Post.

Similar examples abound throughout the administrative motions to seal. These sorts of overbroad requests to seal will not be granted. *See, e.g.*, *Hadley v. Kellogg Sales Co., 16-CV-04955-LHK, 2018 U.S. Dist. LEXIS 224314, 2018 WL 7814785, at *3 (N.D. Cal. Sept. 5, 2018)* (rejecting overbroad sealing request of general consumer preference information). The very generalized declarations from Engineer explain why certain categories or types of information might be sealable, but those declarations do not (with some limited exceptions) address the filings **[**81]** on a line-by-line basis.

Therefore, the motions to seal are DENIED without prejudice. Within **twenty (20) days of the date of this Order** Post shall, after meeting and conferring with plaintiffs, file a chart identifying by document name, sealed Docket number, and page and line/paragraph number the precise information it maintains should remain under seal. That chart shall include citations to a declaration from Engineer (or another representative of Post with personal knowledge) attesting that the precise information at issue is confidential and not publicly known, and identifying the competitive harm that would likely flow from public disclosure of that precise information.

The filings currently conditionally under seal will remain conditionally under seal until I make a final ruling on sealing after reviewing the chart and declaration(s). At that juncture, the parties will be directed to e-file redacted documents that redact only the information I have determined may remain under seal.

CONCLUSION

Plaintiffs' motion for class certification is GRANTED. Post's motion for summary judgment is GRANTED in limited part with respect to identified preempted Statements and DENIED in all other respects. **[**82]** The motions to exclude are DENIED, except that the Advantage Realized Model cannot be used as a measure of classwide damages/restitution. The administrative motions to seal are DENIED without prejudice. Post shall submit the required sealing chart and supporting declarations within twenty days of the date of this Order.

[*588] A further Case Management Conference is set for April 28, 2020 at 2:00 p.m. If there are disagreements about the content or delivery of Class Notice, the parties shall identify them in the Joint Case Management Conference Statement, to be filed by April 21, 2020. The parties shall also propose a trial schedule. At that Conference, the Court will resolve any disputes and set this matter expeditiously for trial.

IT IS SO ORDERED.

MINUTE ORDER

The Court, having taken the above-entitled matter under submission on 02/18/2020 and having fully considered the arguments of all parties, both written and oral, as well as the evidence presented, now rules as follows:

Motion No. 1:

Defendant's (DUSA Pharmaceuticals, Inc.) Demurrer to Second Amended Complaint (Demurrer), filed on 10-22-19 under ROA No. 161, is SUSTAINED without leave to amend. The court GRANTS Defendant's Request for Judicial Notice in Support of Its Demurrer to, and Motion to Strike Portions of, Biofrontera Inc.'s Second Amended Complaint (filed on 10-22-19 under ROA No. 163), as to Exhibit Nos. 1, 2, 3, 4, 6, and 7. pursuant to Evidence Code section 452, subdivision (d). As to the remaining exhibits, the court DENIES the request for judicial notice as immaterial to the court's ruling. (See Zucchet v. Galardi (2014) 229 Cal.App.4th 1466, 1474, fn. 5, citing Jordache Enterprises, Inc. v. Brobeck, Phleger & Harrison (1998) 18 Cal.4th 739, 748, fn. 6).

The court GRANTS Defendant's Request for Judicial Notice in Support of Its Motion for Judgment on the Pleadings on the Second Amended Complaint's **[*2]** Alleged Fourth Cause of Action (filed on 10-22-19 under ROA No. 156) as to Exhibit Nos. 1-7 pursuant to Evidence Code section 452, subdivision (d). As to Exhibit No. 8, the court DENIES the request for judicial notice as immaterial to the court's ruling. (See Zucchet v. Galardi (2014) 229 Cal.App.4th 1466, 1474, fn. 5, citing Jordache Enterprises, Inc. v. Brobeck, Phleger & Harrison (1998) 18 Cal.4th 739, 748, fn. 6).

"A demurrer tests the pleading alone, and not the evidence or the facts alleged.... To the extent there are factual issues in dispute, however, this court must assume the truth not only of all facts properly pled, but also of those facts that may be implied or inferred from those expressly alleged in the complaint. [Citations.]" (City of Atascadero v. Merrill Lynch, Pierce, Fenner & Smith, Inc. (1998) 68 Cal.App.4th 445, 459.) Code of Civil Procedure section 452, states, "In the construction of a pleading, for the purpose of determining its effect, its allegations must be liberally construed, with a view to substantial justice between the parties." Perez v. Golden Empire Transportation Transit District (2012) 209 Cal.App.4th 1228, 1238, provides, "This rule of liberal **[*3]** construction means that the reviewing court draws inferences favorable to the plaintiff, not the defendant. [Citations.]" William S. Hart Union High School District (C.A.) (2012) 53 Cal.4th 861, 872, provides, "To survive a demurrer, the complaint need only allege facts sufficient to state a cause of action; each evidentiary fact that might eventually form part of the plaintiff's proof need not be alleged. [Citation.]" "Thus, the complaint ordinarily is sufficient if it alleges ultimate rather than evidentiary facts. [Citations.]" (Doe v. City of Los Angeles (Doe) (2007) 42 Cal.4th 531, 550.)

Bernardo v. Planned Parenthood Federation of America (2004) 115 Cal.App.4th 322, 351-352 (Bernardo), states, "An 'unlawful' business practice or act within the meaning of the UCL 'is an act or practice, committed pursuant to business activity, that is at the same time forbidden by law. [Citation.]' [Citation.] The California Supreme Court has explained that '[b]y proscribing "any unlawful" business practice, "[Business and Professions Code] section 17200 'borrows' violations of other laws and treats them as unlawful practices" that the unfair competition law makes independently actionable. [Citation.]' **[*4]** [Citation.]" (Italics in Bernardo.)

McKell v. Washington Mutual, Inc. (McKell) (2006) 142 Cal.App.4th 1457, 1473, provides, "A business practice is unfair within the meaning of the UCL if it violates established public policy or if it is immoral, unethical, oppressive or unscrupulous and causes injury to consumers which outweighs its benefits. [Citations.] The determination whether a business practice is unfair ' " 'involves an examination of [that practice's] impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim.... [Citations.]' [Citation.]"' [Citation.]" Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (Cel-Tech) (1999) 20 Cal.4th 163, 187, "We thus adopt the following test: When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes 17200, the word 'unfair' in that section means conduct that threatens an incipient violation of ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable **[*5]** to or the same as a violation of the law, or otherwise significantly threatens or harms competition."

Business and Professions Code section 17204 provides, "Actions for relief pursuant to this chapter shall be prosecuted exclusively in a court of competent jurisdiction by the Attorney General or a district attorney... or by a person who has suffered injury in fact and has lost money or property as a result of the unfair competition." Peterson v. Cellco Partnership (Peterson) (2008) 164 Cal.App.4th 1583, 1590, explains, "Section 17204 of the UCL governs a plaintiff's standing to assert a UCL claim. [Citation.] Prior to the enactment of Proposition 64 in November 2004, the UCL 'did not predicate standing "on a showing of injury or damage"' and was thus 'subject to abuse by attorneys who used it as the basis for legal " 'shakedown' " schemes' and frivolous lawsuits. [Citations.] To address this problem, Proposition 64 amended section 17204 to accord standing only to certain specified public officials and to any person who ' " 'has suffered injury in fact and has lost money or property as a result of such unfair competition.' "' [Citations.] Thus, in the aftermath of Proposition 64, only **[*6]** plaintiffs who have suffered actual damage may pursue a private UCL actions. A private plaintiff must make a twofold showing: he or she must demonstrate injury in fact and a loss of money or property caused by unfair competition. [Citation.]" (Italics in original.)

"In addition to alleging facts sufficient to who violations of Regulation X and Regulation Z, plaintiffs who are not California residents must also allege facts to show that the alleged violations occurred in California because California's unfair competition law does not apply extraterritorially." (Aghaji v. Bank of America, N.A. (Aghaji) (2016) 247 Cal. App. 4th 1110, 1119; See also, Sullivan v. Oracle Corporation (2011) 51 Cal.4th 1191, 1207-1208.)

Defendant challenges the first (Unfair Competition), second (Unfair Competition□Unlawful Pricing) and third (Unfair Practices□Unfair Sampling) causes of action pursuant to Code of Civil Procedure section 430.10, subdivision (e).

First Cause of Action□Unfair Competition:

Defendant contends, "Despite acknowledging this Court's prior dismissal of its prior, identical First Cause of Action on the grounds that the 'allegations related to DUSA's sampling practices did not establish a **[*7]** connection to California[,] Biofrontera remarkably contends that its mere regurgitation of those same defective Sampling Allegations, verbatim, in the SAC now somehow places those allegations within the territorial ambit of the UCL." (Demurrer; 1:17-20, footnote 3 omitted; Emphasis and italics in original.) Defendant's Opposition to DUSA Pharmaceuticals, Inc.'s Demurrer to Second Amended Complaint (Opposition) filed on 2-3-20 under ROA No. 189 asserts, "This Court previously ruled that the FAC's allegations related to DUSA's unlawful sampling practices did not establish a connection to California.... Biorfrontera's SAC makes plain that DUSA's excessive sampling practices arose in California and harmed Biofrontera in California. (Opposition; 3:25-4:1.) Paragraph 41 of the Second Amended Complaint (SAC) alleges the conduct underlying the first cause of action. Paragraph 41 states, "Under the governing case law, Biofrontera need not plead that DUSA or physicians failed to comply with the specific requirements of a statute regulating medical product samples. DUSA's sampling practices qualify as 'unfair competition' under the UCL's 'unfair' prong because excessive free samples significantly **[*8]** threaten and harm competition, regardless of whether physicians submitted written requests for the samples or complied with other statutes and regulations. In other words, the unfairness of DUSA's sampling practices turns on their effect on competition, not compliance with particular statutes." Thus, Plaintiff bases the first cause of action on the alleged act of Defendant's sampling practices by providing excessive free samples to physicians. To support that Defendant provided excessive free samples to physicians, the SAC pleads, "Most recently, a dermatologist in El Cajon, California told Biofrontera that DUSA made him 'a deal that I couldn't refuse.' A DUSA representative offered this dermatologist approximately 36 product samples of Levulan® to offset the cost of replacing an old BLU-U® light lamp. The dermatologist accepted the excessive product samples. Biofrontera's sales representative observed a new DUSA lamp and excessive Levulan® samples the next time he visited this practice." (SAC, ¶ 18.) As to harm, the SAC pleads, "DUSA's sampling practices specifically harm, and continue to harm, Biofrontera in California by making it harder for Biofrontera to obtain revenue and market **[*9]** share in California. Biofrontera has lost sales in California because it cannot make sales to dermatologists who have received DUSA's unfair excessive samples. DUSA's conduct in California, in turn, directly harm's Biofrontera's competitive standing and revenue generation in Orange County California, specifically, and California generally." (SAC, ¶ 19; see also, SAC, ¶¶ 44, 45, 56, 57, 63, 64, and 65.) The SAC does not allege any other act of excessive sampling except for the act relating to the dermatologist in El Cajon. Plaintiff's original Complaint, filed on 7-6-18, referred the court to 21 U.S.C. § 353, subdivision (d)(3)(A) regarding the distribution of drug samples to physicians. (Defendant's RJN; Exhibit 1, ¶ 16.) Plaintiff does not cite to 21 U.S.C. § 353, subdivision (d)(3)(A) in the SAC. 21 U.S.C. § 353 describes the procedure that authorizes the distribution of drug samples by a drug manufacturer or distributor. 21 U.S.C. § 353, subdivision (d), states in part, "The manufacturer or authorized distributor of record of a drug subject to subsection (b) may, by means other than mail or common carrier, distribute drug samples only if the manufacturer or authorized distributor **[*10]** of record makes the distributions in accordance with subparagraph (A) and carries out the activities described in subparagraphs (B) through (F) as follows: [¶] (A) Drug samples may only be distributed□ [¶] (i) to practitioners licensed to prescribe such drugs if they make a written request for drug samples, or [¶] (ii) at the written request of such a licensed practitioner, to pharmacies of hospitals or other health care entities...." 21 U.S.C. § 353 is relevant because it reflects the public policy as to the procedure by which a drug manufacturer or authorized distributor may provide drug samples. Paragraph 18 of the SAC does not allege facts that the El Cajon dermatologist obtained the samples in violation of 21 U.S.C. § 353, subdivision (d)(3)(A). Paragraph 18 of the SAC does not allege facts that the El Cajon dermatologist obtained the samples without making a written request. The court finds that Plaintiff, through the SAC, still has not shown that wrongful conduct occurred in California based on the act of excessive sampling. The only alleged act of excessive sampling relates to the El Cajon dermatologist. (SAC, ¶ 18.) As discussed above, paragraph 18 is insufficient to allege **[*11]** a violation of 21 U.S.C. § 353, subdivision (d)(3)(A). The SAC does not allege how the El Cajon dermatologist received the 36 product samples without making a written request. The SAC does not sufficiently demonstrates a violation of public policy or an incipient violation of ***antitrust law***. Further, assuming that paragraph 18 of the SAC is sufficient to allege a wrongful act, a single act of excessive sampling is insufficient to demonstrate immoral, unethical, oppressive or unscrupulous conduct that causes injury to consumers, or otherwise significantly threatens or harms competition. The court finds that the SAC does not sufficiently demonstrate that Defendant committed a wrongful act regarding the act of excessive sampling. Thus, the court finds that the SAC does not demonstrate that an act of "unfair" competition occurred in California. As a result, the court SUSTAINS the Demurrer to the first cause of action without leave to amend. (See below.)

Second Cause of Action□Unfair Competition (Unlawful Pricing):

Paragraph 50 of the alleges the conduct underlying the second cause of action. Paragraph 50 states in part, "DUSA's unfair pricing scheme manipulates Levulan®'s ASP and allows DUSA **[*12]** to make more profit on each sale than it otherwise could. DUSA's manipulation of the ASP through FC means that DUSA charges physicians artificially low prices for the drug that do not reflect the market's actual willingness ot pay. DUSA can charge artificially low prices because it used the ASP reported through its distributor to recoup additional profit on each sale of Levulan®." (SAC, ¶ 50.) The SAC alleges that Defendant is a company organized under the laws of New Jersey and that it entered into a contract with its distributor, Foundation Care. (SAC, ¶¶ 12 and 22.) Paragraphs 20-27 of the FAC describe the alleged pricing scheme by manipulating the ASP. The SAC, however, does not show that the wrongful conduct, the alleged manipulation of 'creating a spread' (FAC, ¶ 24), occurred in California. Therefore, the court SUSTAINS the Demurrer to the second cause of action without leave to amend. (See below.)

Third Cause of Action□Unfair Sampling (Unfair Practices Under California Business & Professions Code § 17403):

Business and Professions Code section 17403 states, "It is unlawful for any person engaged in business within this State to sell any article or product at less than the cost **[*13]** thereof to such vendor, or to give away any article or product, for the purpose of injuring competitors or destroying competition." Paragraph 62 of the SAC alleges the conduct underlying the third cause of action. Paragraph 62 states, "DUSA is engaged in business in California and has sold or offered to sell its products, including without limitation Levulan® free of charge. DUSA has given, and continues to give, away free product samples with the intent to injure Biofrontera and destroy fair competition in the PDT market. See supra ¶¶ 15-19, 33-46. In other words DUSA acted with the purpose of injuring competitors and destroying competition. See id." (SAC, ¶ 62.) It appears that this allegation pertains to the giving away of free products samples as alleged in paragraph 18 of the SAC. Paragraph 18 of the SAC, as to the El Cajon dermatologist, is the only alleged act regarding the distribution of excessive samples or the giving away of samples. The SAC does not allege any facts demonstrating that DUSA has sold its products in California for less than their cost. Further, 21 U.S.C. § 353, subdivision (d)(3)(A), authorizes the giving away of drug samples to practitioners as long as there **[*14]** is compliance with 21 U.S.C. § 353, subdivision (d)(3)(A). The SAC does not adequately allege the intent element of Business and Professions Code section 17403 because 21 U.S.C. § 353, subdivision (d)(3)(A), authorizes the distribution of drug samples, the. (Bay Guardian Co. v. New Times Media, LLC (2010) 187 Cal.App.4th 438, 456-457.) Since the SAC does not plead facts alleging that Defendant has sold its products for less than their cost with the required intent, the court SUSTAINS the Demurrer to the third cause of action without leave to amend. (SAC).

Virgina G. v. ABC Unified School Dist. (1993) 15 Cal.App.4th 1848, 1852 stated, "Where a demurrer is sustained or a motion for judgment on the pleadings is granted as to the original complaint, denial of leave to amend constitutes an abuse of discretion if the pleading does not show on its face that it is incapable of amendment." "The court abuses its discretion in sustaining the demurrer without leave to amend if the plaintiff can show a reasonable possibility of curing the defect in the complaint by amendment. [Citation.] Heritage has the burden of proving that an amendment would cure the defect. [Citation.]" (Heritage Pacific Financial, **[*15]** LLC v. Monroy (2013) 215 Cal.App.4th 972, 994.) As to this action, the court has previously granted leave to amend twice, and granted a motion for leave to amend. (See the court's 11-21-18, 5-21-19, and 9-17-19 Minute Orders (On 6-10-19, the parties filed a stipulation that extended the time for Plaintiff to file a SAC based on the Motion for Leave to Amend to File a Second Amended Complaint filed on 6-14-19.) Plaintiff's Opposition does not request leave to amend based upon a reasonable possibility of curing the defects. Therefore, the court SUSTAINS Defendant's (DUSA Pharmaceuticals, Inc.) Demurrer to Second Amended Complaint, filed on 10-22-19 under ROA No. 161, without leave to amend.

Defendant is to give notice.

Motion No. 2:

Defendant's (DUSA Pharmaceuticals, Inc.) Motion for Judgment on the Pleadings on the Second Amended Complaint's Alleged Fourth Cause of Action (Motion), filed on 10-22-19 under ROA No. 155, is DENIED. Defendant challenges the fourth cause of action (Unfair Competition□Groundless Threat) because it "... fails to state sufficient facts to constitute a cause of action by not seeking cognizable remedies under California Business and Professions Code section 17200...." **[*16]** (Notice to Demurrer; 1:8-10.) Initially, it does not appear that this Motion is procedurally proper. Code of Civil Procedure section 438, subdivision (f)(2), provides, "(f) The motion provided for in this section may be made only after one of the following conditions has occurred:... [¶] (2) If the moving party is a defendant, and the defendant has already filed his or her answer to the complaint and the time for the defendant to demur to the complaint has expired." Here, Defendant has not filed an answer to the Second Amended Complaint (SAC). Further, the time to demur has not expired because Defendant filed a demurrer to the SAC as addressed

Motion No. 1.

Assuming the Motion is procedurally proper, the court will address the merits because the parties did not discuss the applicability of Code of Civil Procedure section 438, subdivision (f)(2).

Code of Civil Procedure section 438, subdivision (g), states, "The motion provided for in this section may be made even though either of the following conditions exist: [¶] "(1) The moving party has already demurred to the complaint or answer, as the case may be, on the same grounds as is the basis for the motion provided for in this section and **[*17]** the demurrer has been overruled, provided that there has been a material change in applicable case law or statute since the ruling on the demurrer. [¶] (2) The moving party did not demur to the complaint or answer, as the case may be, on the same grounds as is the basis for the motion provided for in this section."

On 7-6-19, Plaintiff (Biofrontera Inc.) filed the original Complaint that contained the Unfair Competition□Groundless Threat cause of action as the third cause of action. On 8-10-18, Defendant filed a demurrer to the original Complaint. Defendant challenged the subject cause of action pursuant to Code of Civil Procedure section 430.10, subdivision (e), on the grounds that the original Complaint did not state facts sufficient to state a cause of action. (See Defendant's Notice of Demurrer filed on 8-10-18.) On 11-1-18, the court overruled the demurrer to this cause of action. (11-1-18 Minute Order.)

On 11-26-18, Plaintiff filed an Amended Complaint that contained the Unfair Competition□Groundless Threat cause of action as the fourth cause of action. On 1-15-19, Defendant filed a demurrer to the Amended Complaint. Defendant challenged the fourth cause of action in the Amended **[*18]** Complaint pursuant to Code of Civil Procedure section 430.10, subdivision (e), on the grounds that the Amended Complaint did not state facts sufficient to state a cause of action. (See Defendant's Notice of Demurrer filed on 1-15-19.) On 4-16-19, the court issued a tentative ruling and requested supplemental briefing. (4-16-19 Minute Order.) The court's 4-16-19 Minute specifically continued the hearing on the Demurrer to the Amended Complaint. On 5-21-19, the court overruled Defendant's demurrer to the fourth cause of action in the Amended Complaint (5-21-19 Minute Order).

As to the demurrer to the Amended Complaint pertaining to the fourth cause of action, this demurrer specifically explained that this cause of action lacked merit because it did not seek a cognizable remedy. For example, Page 15 at line 8 of Defendant's Demurrer to Amended Complaint (filed on 1-15-19 under ROA No. 15) states, "This claim cannot survive demurrer because it does not see a cognizable UCL remedy." The argument heading on Page 15 of the 1-15-19 demurrer states, "The Amended Complaint's Fourth Cause of Action Fails to State a Claim Because It Does Not Seek a Cognizable Remedy under the UCL." (Emphasis in **[*19]** original.)

This Motion, as discussed above, challenges the fourth cause of action because it "... fails to state sufficient facts to constitute a cause of action by not seeking cognizable remedies under California Business and Professions Code section 17200...." (Notice to Demurrer; 1:8-10.) The current Motion is based on the same grounds as that in Defendant's 1-15-19 Demurrer to the Amended Complaint. Under Code of Civil Procedure section 430.10, Defendant's 8-10-18 and 1-15-19 specified the grounds for the demurrers pursuant to Code of Civil Procedure section 430.10, subdivision (e). The current Motion again challenges the Unfair Competition□Groundless Threat for failing to state facts sufficient to state a cause of action. The court's 5-21-19 Minute Order overruling Defendant's

Demurrer to the fourth cause of action encompasses the same grounds as raised in this Motion. Thus, it appears that the Motion does not comply with Code of Civil Procedure section 438, subdivision (g)(1).

However, since both parties have briefed the merits of the Motion, the court will address the merits of the Motion. The court finds that the Motion adequately alleges a legally cognizable remedy. Kwikset **[*20]** Corporation v. Superior Court (Kwikset) (2011) 51 Cal.4th 310, 323-324, states, "Proposition 64 requires that a plaintiff have 'lost money or property' to have standing to sue. The plain import of this is that a plaintiff now must demonstrate some form of economic injury. [Citations.] [¶] There are innumerable ways in which economic injury from unfair competition may be shown. A plaintiff may (1) surrender in a transaction more, or acquire in a transaction less, than he or she otherwise would have; (2) have a present or future property interest diminished; (3) be deprived of money or property to which he or she has a cognizable claim; or (4) be required to enter into a transaction, costing money or property, that would otherwise have been unnecessary. [Citation.] Neither the text of Proposition 64 nor the ballot arguments in support of it purport to define or limit the concept of 'lost money or property,' nor can or need we supply an exhaustive list of the ways in which unfair competition may cause economic harm. It suffices to say that, in sharp contrast to the state of the law before passage of Proposition 64, a private plaintiff filing suit now must establish that he or she has **[*21]** personally suffered such harm. [¶] Notably, lost money or property□economic injury□is itself a classic form of injury in fact. [Citations.] However, because economic injury is but one among many types of injury in fact, the Proposition 64 requirement that injury be economic renders standing under section 17204 substantially narrower than federal standing under article III, section 2 of the United States Constitution, which may be predicated on a broader range of injuries. [Citation.] [¶] While the economic injury requirement is qualitatively more restrictive than federal injury in fact, embracing as it does fewer kinds of injuries, nothing in the text of Proposition 64 or its supporting arguments suggests the requirement was intended to be quantitatively more difficult to satisfy. Rather, we may infer from the text of Proposition 64 that the quantum of lost money or property necessary to show standing is only so much as would suffice to establish injury in fact; if more were needed, the drafters could and would have so specified. [Citation.] In turn, federal courts have reiterated that injury in fact is not a substantial or insurmountable hurdle; as then Judge Alito put it: 'Injury-in-fact **[*22]** is not Mount Everest.' [Citation.] Rather, it suffices for federal standing purposes to ' "allege] some specific, 'identifiable trifle' of injury."' [Citations.]" (Footnotes 6 and 7 omitted.)

Here, paragraph 71 alleges, "Biofrontera has also suffered injury in fact and has lost money or property as a result of DUSA's unfair competition. Because of DUSA's baseless threat to Kane and West, Biofrontera has been directly injured in its efforts to sell the BF-RhodoLED® lamp and Ameluz® to West. West has informed Biofrontera that it will no longer purchase certain Biofrontera products. DUSA's threat, in other words, directly causes Biofrontera to lose sales, market share, and goodwill." This allegation is sufficient to allege a legally cognizable injury from a pleading standpoint within the meaning of Kwikset.

Based on the above, the court DENIES Defendant's (DUSA Pharmaceuticals, Inc.) Motion for Judgment on the Pleadings on the Second Amended Complaint's Alleged Fourth Cause of Action filed on 10-22-19 under ROA No. 155. Defendant is to give notice.

Motion No. 3:

Based on the court's rulings as to Motion No. 1, the court DENIES Defendant's (DUSA Pharmaceuticals, Inc.) Motion to Strike Portions **[*23]** of the Second Amended Complaint (Motion), filed on 10-22-19 under ROA No. 165, without prejudice to Defendant re-filing this Motion.

First, the Motion does not comply with California Rules of Court, rule 3.1322. California Rules of Court, rule 3.1322 (a), states, "A notice of motion to strike a portion of a pleading must quote in full the portions sought to be stricken except where the motion is to strike an entire paragraph, cause of action, count, or defense. Specifications in a notice must be numbered consecutively." Here, the Notice of this Motion does not number the specifications in the notice consecutively.

Second, to the extent that some of the items Defendant seeks to strike pertain to the first three causes, the Motion is MOOT because the court has sustained the Demurrer to the first three causes of action without leave to amend, and has denied Motion No. 2.

Therefore, the court DENIES Defendant's (DUSA Pharmaceuticals, Inc.) Motion to Strike Portions of the Second Amended Complaint, filed on 10-22-19 under ROA No. 165, without prejudice to Defendant re-filing a Motion to Strike that complies with California Rules of Court, rule 3.1322, and pertains to items based on the current **[*24]** status of the Second Amended Complaint.

Defendant is to give notice.

Cricket, bid, league, redressability, antitrust, allegations, partner, bidding process, anti trust law, subject matter jurisdiction, Counts, selection process, antitrust claim, diversity, quotation, marks, motion to dismiss, state-law, corrupt, bidder, rights, member of the board, affirmative action, prospective relief, bid-rigging, citizenship, injunction, Corrected, contracts, entities

Counsel: **[**1]** For American Cricket Premier League, LLC, Plaintiff: Adam Jeremy Biegel, Alston & Bird LLP-DC, Washington, DC; Christopher James Borchert, Karl Geercken, Alston & Bird LLP-New York, New York, NY; David Andrew Hatchett, Alston & Bird LLP-Atlanta, Atlanta, GA; Paul Douglas Swanson, Holland & Hart LLP-Denver, Denver, CO; James Edward Hartley, Holland & Hart LLP-Boulder, Boulder, CO.

For USA Cricket, a Colorado Non-Profit Corporation, Defendant: Daniel Savrin, Morgan Lewis & Bockius LLP - Boston, Boston, MA; Rishi Satia, Sujal J. Shah, Morgan Lewis & Bockius LLP-San Francisco, San Francisco, CA; Stephen Andrew Hess, Sherman & Howard LLC-Colorado Springs, Colorado Springs, CO.

For International Cricket Council, Defendant: Alan R. Glickman, Harry S. Davis, Taleah E. Jennings, Schulte Roth & Zabel LLP-New York, New York, NY; Timothy R. Beyer, Bryan Cave Leighton Paisner LLP-Denver, Denver, CO.

For Paraag Marathe, Avinash Gaje, Venu Pisike, Atul Rai, Nadia Gruny, Eric Parthen, and John Does 3-10, Defendants: Daniel Savrin, Morgan Lewis & Bockius LLP - Boston, Boston, MA; Boston, MA; Rishi Satia, Sujal J. Shah, Morgan Lewis & Bockius LLP-San Francisco, San Francisco, CA.

For Willow TV International, **[**2]** Inc., American Cricket Enterprises, Inc., Cricket Acquisition Corporation, Defendants: Caitlin C. McHugh, Lewis Roca Rothgerber Christie LLP-Denver, Denver, CO; Michael Ryan Fleming, Nitoj Paul Singh, Dhillon Law Group Inc., San Francisco, CA.

Judges: William J. Martínez, United States District Judge.

Opinion by: William J. Martínez

Opinion

[*1170] ORDER GRANTING DEFENDANTS' MOTION TO DISMISS

Plaintiff American Cricket Premier League, LLC ("Plaintiff"), alleges that a corrupt bidding process prevented fair consideration of its bid to create an internationally recognized cricket league in the United States. Plaintiff brings claims under federal ***antitrust law*** and related state laws against the various entities and individuals (collectively, "Defendants") that Plaintiff believes are responsible for the alleged corruption.

Currently before the Court is Defendants' Joint Motion to Dismiss. (ECF No. 56.) For the reasons explained below, the Court grants the motion without prejudice for lack of subject matter jurisdiction. More specifically, the Court lacks jurisdiction under Article III of the U.S. Constitution to adjudicate Plaintiff's federal antitrust claims because there is no prospective relief this Court can grant that will remedy Plaintiff's claimed injury; **[**3]** the Court lacks Article III jurisdiction to adjudicate Plaintiff's state-law claims for the same reason; and the Court otherwise lacks statutory subject matter jurisdiction to adjudicate Plaintiff's state-law claims because Plaintiff has failed to plead diversity of citizenship.

I. LEGAL STANDARD

Defendants bring their motion to dismiss under *Federal Rule of Civil Procedure 12(b)(1)*, and alternatively under *Rule 12(b)(6)*. (*See* ECF No. 56 at 18-19.)[1] The Court finds that *Rule 12(b)(1)* controls under the circumstances of this case.

Rule 12(b)(1) permits a party to move to dismiss for "lack of subject-matter jurisdiction." "[Federal] [d]istrict courts have limited subject matter jurisdiction and may [only] hear cases when empowered to do so by the Constitution and by act of Congress." *Radil v. Sanborn W. Camps, Inc., 384 F.3d 1220, 1225 (10th Cir. 2004)* (internal quotation marks omitted). "A court lacking jurisdiction cannot render judgment but must dismiss the case at any stage of the proceedings in which it becomes apparent that jurisdiction is lacking." *Basso v. Utah Power & Light Co., 495 F.2d 906, 909 (10th Cir. 1974)*.

Rule 12(b)(1) motions generally take one of two forms: a facial attack or a factual attack. *Holt v. United States, 46 F.3d 1000, 1002 (10th Cir. 1995)*. A facial attack questions the sufficiency of the complaint as to its subject matter jurisdiction allegations. *Id.* In reviewing a facial attack, courts accept all well-pleaded allegations as true, as in **[**4]** a *Rule 12(b)(6)* setting. *Id.* A factual attack, by contrast, "may go beyond allegations contained in the complaint and challenge the facts upon which subject matter jurisdiction depends." *Id. at 1003*.

In this case, Defendants bring a facial attack, so the Court cannot stray from the allegations of the complaint (and any attachments, *see Fed. R. Civ. P. 10(c)*).[2]

[*1171] II. FACTS

The Court accepts the following as true for purposes of resolving Defendants' motion. All "¶" citations, without more, are to Plaintiff's Corrected Complaint and Jury Demand (ECF No. 51).

The international governing body for cricket is Defendant International Cricket Council ("ICC"). (¶¶ 32, 35.) "ICC recognition is crucial for any professional cricket league to be viable and internationally recognized." (¶ 32.) "Players that want to compete in ICC-sanctioned international events, or for any of the other ICC-sanctioned

---

[1] All ECF page citations are to the page number in the CM/ECF header, which does not always match the document's internal pagination, particularly in briefs with separately paginated prefatory material such as a table of contents.

[2] There are exceptions to the face-of-the-complaint rule. *See, e.g., Toone v. Wells Fargo Bank, N.A., 716 F.3d 516, 521 (10th Cir. 2013)*. Nothing in this case requires the Court to examine whether those exceptions might apply.

events, will not participate in a league that is not sanctioned by the ICC because they risk losing their ability to play in future ICC matches." (¶ 34.) In 1965, the ICC approved the United States of America Cricket Association ("USACA") (not a party here) as the national-level governing body for cricket in the United States. (¶ 36.)

In 2016, **[**5]** USACA announced plans to launch a "T20 professional cricket league in the United States." (¶ 37.) T20 is short for "Twenty20," a cricket format "designed in the mid-2000s as a faster-paced, flashier version of the game." (¶ 27.) T20 "allows for a single contest to be played efficiently in about three hours," as compared to "Test matches (lasting 5 days) and One-Day Internationals (lasting on average more than 8 hours)." (¶ 28.)

Plaintiff is a Delaware LLC headquartered in Las Vegas, Nevada. (¶ 9.) One of its principals is Jay Pandya ("Pandya"). (¶ 9(a).) He is "an experienced businessperson and cricket executive," including through his ownership of a professional cricket team in St. Lucia. (*Id.*) Pandya is also chairman and founder of non-party Global Sports Ventures ("Global"). (*Id.* ¶¶ 9(a), 38.) USACA selected Global "as its partner to do the commercial development work necessary to establish and operate [a] professional U.S. T20 cricket league." (¶ 38.)

In September 2016, Global entered into the "License Agreement" with USACA. (¶ 39.) The License Agreement granted Global the "exclusive right" to establish "the only USACA sanctioned and ICC approved professional T20 league" in the United **[**6]** States. (¶ 41 (internal quotation marks omitted).) However, USACA was under ICC suspension at the time. (¶ 42.) The License Agreement accordingly "provide[d] that the Licensed Rights, among other rights, would not become effective 'unless and until the Suspension . . . is lifted, terminates or otherwise ends . . . and the ICC shall have approved USACA's grant of such rights to [Global].'" (*Id.*)

The ICC did not want Pandya involved in any ICC-sanctioned cricket league. (¶ 46.) "The ICC's desire to exclude Global and Mr. Pandya [was] based in large part on the fact that Mr. Pandya is not part of the incumbent and traditional Indian business and social circles that dominate Indian cricket and the ICC worldwide." (¶ 47.) But the ICC knew that reinstatement of USACA would lead to Global's recognition as the USACA-sanctioned (and therefore, apparently, the ICC-sanctioned) organizer of T20 cricket in the United States. (¶ 46.)[3] The ICC therefore "placed numerous new conditions on lifting USACA's suspension." (¶ 49.) "The new conditions imposed by the ICC were arbitrary, designed to be nearly impossible for USACA to comply with[,] and were intended solely to justify ICC expelling USACA and thereby **[**7]** excluding **[*1172]** Global from the T20 cricket market in the United States." (*Id.*)

The ICC formally expelled USACA in June 2017. (¶ 52.) This "prevent[ed] the License Agreement from going into effect." (¶ 53.) At some later (unspecified) time, Global "transferred all of the Licensed Rights granted under the USACA Licens[e] Agreement to [Plaintiff]." (*Id.* n.1.)[4]

The ICC soon assisted in creating Defendant USA Cricket, a new entity headquartered in Colorado Springs that was to replace USACA as the national-level governing body for cricket in the United States. (¶¶ 54-57.) USA Cricket officially launched in September 2017 and formally applied for ICC membership in December 2017. (¶¶ 58-59.)

USA Cricket then began the process of organizing its first board of directors. (¶¶ 65-67.) The board was to have ten members, with seven to be elected. (¶ 60.) Defendants Gaje, Pisike, Rai, and Gruny ran for board membership, and Defendants Willow TV International ("Willow") and Cricket Acquisition Corporation ("CAC") "paid for substantially all of [their] campaign expenses." (¶ 68; *see also* ECF No. 51 at 1.) Willow and CAC are "entities owned and run by

---

[3] The Court says "apparently" because, as noted, the License Agreement contains a clause contemplating the need for ICC approval of the rights granted by USACA to Global—thus casting doubt on whether USACA's reinstatement would have automatically given ICC imprimatur to Global.

[4] Plaintiff does not explain what rights persist after USACA's expulsion from the ICC. The License Agreement contains a clause that contemplates "termination of USACA's membership with ICC" and requires USACA to "cause ICC or ICC's nominated body for the development of cricket in USA, to execute the necessary agreements which shall have the effect of providing or continuing, as the case may be, the Licensed Rights to [Global]." (¶ 44.) But it is unclear what right USACA has or had to cause the ICC or any successor governing body in the United States to enter into an agreement with Global.

affiliates of the influential Times Group of India (a key **[**8]** sponsor of ICC-sanctioned events in India and elsewhere)." (¶ 68.)

Gaje, Pisike, Rai, and Gruny each won a board seat (becoming what Plaintiff calls the "Conflicted Board Members"). (¶ 70.) It is not clear who won the other three elected positions. However, the remaining three members of the ten-member board were appointed by USA Cricket's "Nominating and Governance Committee," which was beholden to ICC interests. (¶¶ 65, 70.) Those three non-elected board members were therefore similar in their loyalties to the four Conflicted Board Members, meaning "there was now a clear majority of the Board beholden to ICC-friendly interests." (¶ 70.)

In November 2018,

> USA Cricket announced the United States Professional T20 League RFP (the "RFP"), which sets forth the parameters of USA Cricket's purported competitive bidding process for selection of a commercial partner (the "RFP Bid Process"). The RFP states that "USA Cricket is looking for a partner to help capitalize on [America's] interest levels in the sport and, specifically, to construct, fund, launch and operate the first professional T20 cricket league (the 'League') in the United States."

(¶ 71 (citations omitted).)

Plaintiff decided to bid **[**9]** for this opportunity, and therefore submitted a timely RFP response in January 2019. (¶ 79.) Plaintiff's RFP included, among other things, "$8 million in guaranteed compensation to USA Cricket for each of the first two years and a total of $516 million in guaranteed financial compensation over a period of 25 years." (¶ 80.)

Defendant American Cricket Enterprises ("ACE") also submitted a timely bid. (¶ 81.) ACE had "backing from . . . the founder and CEO of Willow and CAC, and [from] the principals of The Times Group of India." (*Id.*) "USA Cricket began negotiating **[*1173]** [secretly] with Willow-backed ACE almost immediately afterwards." (*Id.*) It strung Plaintiff along, however, by announcing that it would issue a "set of standard questions" to "all bidders" (which it never did), and by allowing Plaintiff to give a presentation "to a partial group of the USA Cricket Board." (¶¶ 81-82.) That took place sometime in February or early March 2019 and was, from Plaintiff's perspective, *pro forma.* (¶ 82.)

In mid-March 2019, USA Cricket informed Plaintiff that it "had selected another Proposer," which turned out to be ACE. (¶ 83.)

> Based on subsequent conversations with individual members of USA Cricket's **[**10]** Board of Directors and other USA Cricket officials that reached out to [Plaintiff] to express concerns about the integrity of the RFP process, [Plaintiff] learned that its RFP Response was superior to every other response on every objective metric and included a far more comprehensive infrastructure and economic development plan than any other Proposer.

(¶ 86.) In particular, Plaintiff learned that ACE had offered "a mere $2 million in financial contribution for each of the first two years (hundreds of millions of dollars less over the course of 25 years than [Plaintiff] guaranteed)." (¶ 87.)

> [Plaintiff] also learned from members of USA Cricket's Board of Directors that certain Board members preferred [Plaintiff's] proposal over that of any other Proposer and had wanted USA Cricket to conduct further discussions and negotiations with [Plaintiff] rather than make the rapid award to Willow-backed ACE. But those Board members were denied the opportunity to engage in such discussions . . . because they were told that the leadership of USA Cricket and the ICC had already decided who was going to win the RFP process.

(¶ 88.)

Given what Plaintiff had learned, Plaintiff contacted USA Cricket in **[**11]** late March 2019 to ask how ACE's proposal could have won out over Plaintiff's. (¶ 93.) USA Cricket responded by "challeng[ing] the veracity of [Plaintiff's] financial commitments contained in the RFP Response." (¶ 94.) In other words, it appears that USA Cricket did not believe (or at least *said* it did not believe) Plaintiff's representations with respect to guaranteed compensation. This led to further communication in which it became clear that Plaintiff's guarantee of certain compensation was a bank guarantee. (¶ 96.)

USA Cricket then offered Plaintiff "an opportunity to re-present to the RFP committee in more detail." (¶ 99 (internal quotation marks omitted).) However, USA Cricket demanded that Plaintiff sign what were called the "New Terms of Engagement." (¶ 100.) The New Terms of Engagement were, in essence, a prospective release of any claims the bidder might have against USA Cricket based on the bidding process. (¶¶ 101-06.)

Plaintiff refused to sign the New Terms of Engagement, "effectively ending its ability to be formally considered by USA Cricket." (¶ 111.) "On May 23, 2019, USA Cricket formally announced that it had selected ACE as its strategic partner." (*Id.*)

Plaintiff filed **[**12]** this lawsuit on May 28, 2019 (ECF No. 1) alleging eight claims for relief:

- *per se* violation (group boycott), or at least a rule-of-reason violation, of *section 1 of the Sherman Act, 15 U.S.C. § 1* ("Count 1");

[*1174] • monopolization in violation of *section 2 of the Sherman Act, 15 U.S.C. § 2* ("Count 2");

- violation of *Colorado Revised Statutes § 6-4-104*, which is Colorado's equivalent to *section 1 of the Sherman Act* ("Count 3");

- violation of California's antitrust proscriptions, *i.e.*, the *Cartwright Act*, *Cal. Bus. & Prof. Code § 16720* ("Count 4");[5]

- violation of *California's Unfair Competition Law ("UCL"), Cal. Bus. & Prof. Code §§ 17200 et seq.* ("Count 5");
- tortious interference with prospective business advantage ("Count 6");
- tortious interference with contract, referring to the License Agreement between USACA and Global ("Count 7"); and
- civil conspiracy ("Count 8").

(*Id.* at 35-50.)

In July 2019, Plaintiff filed the currently operative complaint, *i.e.*, the Corrected Complaint and Jury Demand (ECF No. 51). It alleges the same eight causes of action. (*Id.* at 33-47.) The complaint is "corrected" in the sense that it substitutes the correct names for certain defendants. (*See* ECF No. 39.)

All Defendants have jointly moved to dismiss. (ECF No. 56.)

III. ANALYSIS

A. Federal Antitrust Claims (Counts 1 & 2)

Section 4 of the Clayton Act authorizes private plaintiffs to sue for violations **[**13]** of federal antitrust laws. *See 15 U.S.C. § 15(a)* ("[A]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor."). To pursue such claims, a plaintiff must have standing to sue under Article III of the U.S. Constitution (like all plaintiffs in federal court), and also have "antitrust standing." *Tal v. Hogan, 453 F.3d 1244, 1253 (10th Cir. 2006)*. These are separate inquiries, and "the standing requirements in the antitrust context [are] more rigorous than that of the Constitution." *Id.*

---

[5] Several Defendants are domiciled in California (*see* ¶¶ 12-14, 18) and Plaintiff alleges that "Defendants' combination, trust, or conspiracy was substantially carried out and effectuated within the State of California" (¶ 153).

The principles of Article III standing, although less rigorous that antitrust standing, dispose of Plaintiff's federal antitrust claims. The principles of antitrust standing—particularly "antitrust injury"—are nonetheless helpful to understanding the Article III infirmity, so the Court partially addresses antitrust standing as well.

1. Article III Standing

Article III of the U.S. Constitution restricts federal courts to deciding "cases" and "controversies." *See U.S. Const. art. III, § 2, cl. 1*. These words have been interpreted to restrict federal courts from giving "advisory opinions," *Flast v. Cohen, 392 U.S. 83, 96, 88 S. Ct. 1942, 20 L. Ed. 2d 947 (1968)*, meaning that a federal court may not resolve questions in the abstract, but instead may only resolve "disputes arising out of specific facts when the resolution of the dispute will have practical consequences to the **[**14]** conduct of the parties," *Columbian Fin. Corp. v. BancInsure, Inc., 650 F.3d 1372, 1376 (10th Cir. 2011)*.

To safeguard this restriction, the Supreme Court has articulated a three-element test for "Article III standing":

> First, the plaintiff must have suffered an "injury in fact"—an invasion of a legally **[*1175]** protected interest which is (a) concrete and particularized, and (b) "actual or imminent, not 'conjectural' or 'hypothetical.'" Second, there must be a causal connection between the injury and the conduct complained of . . . . Third, it must be "likely," as opposed to merely "speculative," that the injury will be "redressed by a favorable decision."

Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992) (citations omitted; certain alterations incorporated). "Article III standing is jurisdictional . . . ." *In re Peeples, 880 F.3d 1207, 1212 (10th Cir. 2018)*.

Plaintiff's complaint raises serious questions as to injury-in-fact as it connects to redressability. Plaintiff pleads that

> [t]he rushed and conflicted bidding process robbed [it] of an opportunity to compete fairly for the right to make an ICC-sanctioned cricket league a reality in the United States.
>
> [Plaintiff] knows it was not guaranteed to be selected as a commercial business partner of USA Cricket and the ICC. But it was entitled to a fair bidding process.

(¶¶ 6-7.) In other words, Plaintiff asserts what is sometimes **[**15]** called "procedural injury." *Lujan, 504 U.S. at 573 n.7*.

In light of Plaintiff's concessions that it can only ask for a "fair bidding process," and not for an order that USA Cricket accept Plaintiff's bid instead of ACE's, Defendants' motion specifically challenges the viability of such a procedural injury in this context, and also whether this Court can enter any order redressing it. (ECF No. 56 at 20-21.) In response, Plaintiff asserts that its burden to plead standing at this phase is a "lightened" one, and Plaintiff then reiterates that it "has lost the opportunity to fairly compete for, and likely win if judged objectively, some or all of the rights to commercially develop an ICC-sanctioned U.S. cricket league." (ECF No. 64 at 22-23.)[6] As for redressability, Plaintiff says it "is not asking the Court to award the bid to [it] or force USA Cricket to partner with [it]. [It] is seeking an injunction to halt implementation of an RFP Process infected by anticompetitive conduct until it is cleansed of Defendants' misconduct." (*Id.* at 24.)

---

[6] Plaintiff also asserts two other injuries, neither of which is relevant to the present analysis. First, Plaintiff alleges that it was injured by the ICC's interference with the License Agreement between USACA and Global. (*Id.* at 23.) That allegation, if true, would be relevant to Plaintiff's standing to pursue its contractual interference claim (Count 7). But the Supreme Court has rejected any "commutative" theory of standing, by which a plaintiff borrows the injury of one cause of action in an effort to sustain standing in another. *DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 352, 126 S. Ct. 1854, 164 L. Ed. 2d 589 (2006)*. "[A] plaintiff must demonstrate standing for each claim he seeks to press." *Id.* Second, Plaintiff alleges that its "investments of time and money (including the hiring of and payments to experts that were part of its RFP Response) were wasted by this rigged process." (ECF No. 64 at 23.) Plaintiff did not allege as much in its complaint, however, and "[p]laintiffs cannot rectify their pleading deficiencies by asserting new facts in an opposition to a motion to dismiss." *Smith v. Pizza Hut, Inc., 694 F. Supp. 2d 1227, 1230 (D. Colo. 2010)*. In any event, although damages are a classic Article III injury and usually redressable by a money judgment, these kinds of damages would not amount to an "antitrust injury," as explained below.

Plaintiff conspicuously cites no case in which its theory of injury and redressability has been accepted. Nor could the Court find any such case.

As far as the Court is aware, "procedural **[**16]** injury" is viable, if at all, only in unique circumstances that have no obvious application here. One is in the administrative law context, and specifically as it relates to **[*1176]** the *National Environmental Policy Act ("NEPA"), 42 U.S.C. §§ 4231 et seq.*, which requires federal agencies to consider the environmental impacts of their actions. There, it is usually enough to argue that requiring the agency to redo its environmental analysis might lead to a better outcome for the plaintiff, even though it is not guaranteed to do so. *See Zeppelin v. Fed. Highway Admin., 305 F. Supp. 3d 1189, 1198-99 (D. Colo. 2018)*. This is considered "a special relaxation of the normal standards for redressability and immediacy." *Id. at 1198* (internal quotation marks omitted).

Another unique context in which something like "procedural injury" is a viable basis for standing is a challenge to affirmative action. In such a challenge, there is no guarantee that, *e.g.*, the bidder for a government contract would be selected, or the applicant to a state university would be admitted, even if consideration of minority status was eliminated from the process. Rather, "an allegation that some discriminatory classification prevented the plaintiff from competing on an equal footing" is enough. *Ne. Fla. Chapter of Associated Gen. Contractors of Am. v. City of Jacksonville, 508 U.S. 656, 667, 113 S. Ct. 2297, 124 L. Ed. 2d 586 (1993)*.

In both of these types of cases (NEPA and **[**17]** affirmative action), a major reason why redressability still exists is that the court can order the defendant to do something that will have a real-world effect. If a court finds that an agency failed to discharge its NEPA duties adequately, the court must "hold unlawful and set aside agency action." *5 U.S.C. § 706(2)*; *see also Morris v. U.S. Nuclear Regulatory Comm'n, 598 F.3d 677, 690 (10th Cir. 2010)* (NEPA enforced through the *Administrative Procedure Act*). At that point, if the agency still wants to go forward, it is statutorily *required* to redo the NEPA process. *See 42 U.S.C. § 4332(C)*; *see also 40 C.F.R. § 1501.4*.

The affirmative action context is slightly more complicated because, for example, it is not always a legal requirement that a government award contracts through competitive bidding. But if a court is satisfied that that the government will continue to award contracts through competitive bidding and that the plaintiff will continue to bid for those contracts, redressability is satisfied. *See, e.g., Adarand Constructors, Inc. v. Peña, 515 U.S. 200, 212, 115 S. Ct. 2097, 132 L. Ed. 2d 158 (1995)* (plurality op.) ("Because the evidence in this case indicates that the [government] is likely to let contracts involving guardrail work that contain a subcontractor compensation clause at least once per year in Colorado, that Adarand is very likely to bid on each such contract, and that Adarand often **[**18]** must compete for such contracts against small disadvantaged businesses, we are satisfied that Adarand has standing to bring this lawsuit.").

Finally, in the educational affirmative action setting, redressability is generally maintained by certifying a class of both present and future applicants to the educational institution. *See Gratz v. Bollinger, 539 U.S. 244, 260-68, 123 S. Ct. 2411, 156 L. Ed. 2d 257 (2003)*. Because there is generally no question that the institution would, or even could, stop assembling its incoming class through a competitive application process, a class action preserves the possibility of meaningful prospective relief even if—as is likely—the original plaintiffs will enroll in a different school, and perhaps even graduate, while the lawsuit is pending. *Cf. Texas v. Lesage, 528 U.S. 18, 21, 120 S. Ct. 467, 145 L. Ed. 2d 347 (1999)* (in affirmative action cases, as elsewhere, there must be an "allegation of an ongoing or imminent constitutional violation to support a claim for forward-looking relief").

[*1177] The Court's research has revealed no similar form of relief in the antitrust context. The reason is simple, and it goes deeper than Plaintiff's concession that "it was not guaranteed to be selected as a commercial business partner of USA Cricket and the ICC." (¶ 7.) The fundamental problem, as stated in Plaintiff's own **[**19]** words, is that "Defendants could have awarded the exclusive rights to develop the cricket league without an RFP Process." (ECF No. 64 at 38; *see also id.* at 31 (asserting essentially the same).) If Defendants could have done so, then what is to stop Defendants from doing so even if this Court grants precisely the injunction Plaintiff requests? That proposed injunction is as follows:

> Preliminarily and permanently enjoin [Defendants] from (i) taking any further action to support or implement their selection of a winner in connection with the corrupted RFP Bid Process described herein; (ii) excluding [Plaintiff] from, or failing to give objective and unbiased consideration to [Plaintiff] in, any current or future selection process in connection with a professional T20 cricket league in the U.S.; and (iii) using unfair practices in any selection process or implementation of their programs in connection with a professional T20 cricket league in the U.S.

(ECF No. 51 at 47-48; *see also* ECF No. 64 at 24 (affirming that this is the relief that Plaintiff believes satisfies the Article III redressability requirement).)

This language is already notable for use of terms like "any current or future selection **[**20]** process"—seemingly an implicit admission that there might not be another selection process. But most notable is what Plaintiff does *not* ask for, namely, *an order that Defendants re-bid the contract*. Plaintiff does not ask for that relief likely because Plaintiff cannot find any authority supporting the Court's ability to enter such an order.

To be sure, Plaintiff says that "Defendants could have awarded rights to develop the cricket league without an RFP Process, *but USA Cricket chose to avail itself of the benefits of an apparently competitive process*." (ECF No. 64 at 31 (emphasis added).) The implication appears to be that there is some point-of-no-return, beyond which one is irrevocably committed to a bidding process that may be judicially evaluated after the fact for fairness. But Plaintiff never actually says as much, nor cites any authority supporting the implication.

Conceivably, Congress could "loosen the strictures of the redressability prong" by granting a procedural right in the antitrust context, as it has in the environmental context. *Summers v. Earth Island Inst., 555 U.S. 488, 497, 129 S. Ct. 1142, 173 L. Ed. 2d 1 (2009)*. But Congress has not done so. Indeed, case law about "antitrust injury" makes fairly clear that the antitrust laws were not designed eliminate **[**21]** bidding processes where the party soliciting the bids predetermined the outcome. "[O]ther laws [besides the *Sherman Act*], for example, unfair competition laws, business tort laws, or regulatory laws, provide remedies for various competitive practices thought to be offensive to proper standards of business morality." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 137, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)* (internal quotation marks omitted); *see also* *JetAway Aviation, LLC v. Bd. of Cnty. Comm'rs of Cnty. of Montrose, 754 F.3d 824, 828-31, 835-36 (10th Cir. 2014)* (Holmes, J., concurring); *id. at 858* (Tymkovich, J., concurring).

In the same vein, the purpose of federal antitrust laws is to remedy harm to "competition, not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. "[A] plaintiff can recover [under the antitrust laws] **[*1178]** only if [its] loss stems from a competition-*reducing* aspect or effect of the defendant's behavior." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (emphasis in original). Here, USA Cricket solicited bids for "*a partner* to help capitalize on [America's] interest levels in [cricket] and, specifically, to construct, fund, launch and operate *the first* professional T20 cricket league . . . in the United States." (¶ 71 (internal quotation marks omitted; emphasis added).) Combined with Plaintiff's allegation that "ICC recognition is crucial for any professional cricket league to be viable and internationally recognized" (¶ 32), it is clear that USA Cricket was **[**22]** offering a monopoly to whichever bidder prevailed during the RFP process. Thus, Plaintiff's ultimate goal is to hold the monopoly that USA Cricket granted to ACE. Being deprived of that monopoly is not something the antitrust laws were designed to remedy. *JetAway, 754 F.3d at 838* (Holmes, J., concurring) ("the mere fact that one monopolist is able to successfully replace another does not harm competition and, therefore, does not effect an antitrust injury"); *id. at 855-56* (Tymkovich, J., concurring) (agreeing that "merely substitut[ing] one monopoly for another" is not an injury redressable by antitrust laws).[7] Thus, Congress has not "loosen[ed] the strictures of the redressability prong," *Summers, 555 U.S. at 497*, in the antitrust context, and especially not under the circumstances presented here.

---

[7] Plaintiff insists that it "has not claimed that [the] relevant market can sustain only a single [ICC-sanctioned T20 league], and, to the extent that Defendants make that claim, [Plaintiff] has not had an opportunity to engage in discovery to evaluate it." (ECF No. 64 at 38-39 (citations omitted).) This is beside the point. Whether or not the United States can sustain more than one cricket league (of any type, ICC-sanctioned or not), USA Cricket seeks only *one* partner, with the intent to develop *one* league. Plaintiff

The only prospective relief this Court might award that would certainly remedy Plaintiff's injury is to order USA Cricket to accept Plaintiff's bid instead of ACE's—but this Court has no power to make such an award, and Plaintiff does not request it anyway. And assuming the viability of a mere "procedural right" to a fair shot at winning the bidding war, the only prospective relief this Court might award that would guarantee that right **[**23]** is to order USA Cricket to redo the bidding—but this Court has no power to require that, and, again, Plaintiff does not request it in any event.

So the Court is left with Plaintiff's request to enjoin Defendants from "taking any further action to support or implement their selection of a winner in connection with the corrupted RFP Bid Process." (ECF No. 51 at 47-48.) If the Court were to enter such an injunction, effectively vacating the RFP award, USA Cricket would remain free to unilaterally invite ACE to develop the T20 league, and Plaintiff would be left just as empty-handed as before.

Perhaps Plaintiff means to head off this outcome through its requests that the Court enjoin Defendants from "excluding [Plaintiff] from, or failing to give objective and unbiased consideration to [Plaintiff] in, any current or future selection process," and "using unfair practices in any selection process or implementation of their programs in connection with a professional T20 cricket league in the U.S." (*Id.* at 48.) More specifically, perhaps Plaintiff chose the phrase "selection process" to cover all possible methods of selecting a partner to establish a T20 league, including a unilateral **[*1179]** invitation. But **[**24]** Plaintiff nowhere makes this explicit, nor cites any authority giving the Court power to enter an injunction to "give Plaintiff another look before making any final decision." Even if the Court had such power, redressability would still be lacking because "another look" is no more than that—and Plaintiff could still be left empty-handed in the end.

In sum, there is no prospective relief this Court has power to order that would remedy Plaintiff's alleged injury. Accordingly, Plaintiff lacks Article III standing to bring its federal antitrust claims.

2. Loose Ends

The Court must address two additional issues to ensure itself that Article III standing does not exist here.

a. *Article III Standing Through Retrospective Relief*

Late in the complaint, Plaintiff inserts an unelaborated allegation that the allegedly corrupt RFP process "allowed others to take business from [Plaintiff]—business that [Plaintiff] would have competed fairly for *and secured* if it were competing on a legitimate playing field." (¶ 134 (emphasis added).) Defendants' motion challenges this allegation as a "feint[]" that is "fatally" contradicted by Plaintiff's earlier concession that "'it was not guaranteed to be selected **[**25]** as a commercial business partner of USA Cricket and the ICC.'" (ECF No. 56 at 20 (quoting ¶ 7).) Plaintiff's 40-page response brief entirely ignores this attack. In fact, Plaintiff does not cite ¶ 134 for any purpose. (*See generally* ECF No. 64.) The Court thus deems Plaintiff to have forfeited any argument that a business opportunity which was certainly lost is a monetary injury traceable to Defendants' conduct and redressable through a money judgment—therefore creating Article III standing.[8]

b. *"Bid-Rigging"*

In reviewing Plaintiff's allegations, one passingly familiar with antitrust concepts might think of the term "bid-rigging." Bid-rigging, however, is the sort of antitrust claim that USA Cricket could have brought against bidders in the RFP process if those bidders (such as ACE and Plaintiff) had conspired amongst themselves regarding the bids each would submit, *e.g.*, to ensure that no one offered more than a certain amount of compensation to USA Cricket. *See* United States v. Mobile Materials, Inc., 881 F.2d 866, 869 (10th Cir. 1989) ("Any agreement between competitors pursuant to which contract offers are to be submitted or withheld from a third party constitutes bid rigging [and is] *per se* violative of 15 U.S.C. [§] 1.").

---

wants to be that sole partner, just as Global wanted to be USACA's sole partner. (*See* ¶ 41 (Global negotiated with USACA to create "*the only* USACA sanctioned and ICC approved professional T20 league in the United States" (internal quotation marks omitted; emphasis added))).

[8] Even if Plaintiff had made such an argument, such damages do not state an antitrust injury, as explained above.

In a rhetorical passage, Plaintiff accuses Defendants **[**26]** of "rigging competition"—an allegation meant to create an ironic contrast between international cricket's commitment to fair play on the pitch and lack of fair play in business dealings. (¶¶ 1-3.) But Plaintiff never actually accuses Defendants of bid-rigging. Plaintiff instead describes Defendants' conduct as "sham bidding." (¶ 122; *see also* ¶ 156(b); ECF No. 64 at 19.) Plaintiff's choice of words is somewhat surprising. "Sham bidding" is the name used by one decision from this District to distinguish antitrust-prohibited bid-rigging from antitrust-neutral allegations that the party soliciting the bid did not conduct the bid process fairly. *See* *L-3 Commc'ns Corp. v. Jaxon Eng'g & Maint., Inc., 863 F. Supp. 2d 1066, 1089-90 (D. Colo. 2012)* (citing *Sitkin Smelting & Refining Co. v. FMC Corp., 575 F.2d 440* ***[*1180]*** *(3d Cir. 1978))*. By invoking the term "sham bidding," Plaintiff all but admits that the Court can provide no remedy for the injury Plaintiff alleges.

* * *

For the foregoing reasons, Counts 1-2 must be dismissed for lack of Article III subject matter jurisdiction.

B. State-Law Claims (Counts 3-8)

Plaintiff's state-law claims are grounded in the same theory underlying the federal antitrust claims, namely, that Plaintiff has been "procedurally" injured by the allegedly corrupt bidding process. Thus, these claims also fail for lack of Article III standing, **[**27]** unless the relevant state laws grant rights and remedial powers not available under federal ***antitrust law*** (Plaintiff has not established that they do). But even if Plaintiff has Article III standing under one or more of its state-law claims (such as a straightforward claim for damages under the contractual interference claim, Count 7), another jurisdictional problem prevents the Court from reaching the merits of those claims.

Due to the Article III infirmity in Counts 1 and 2, the Court has no original jurisdiction over the federal antitrust claims. Yet they are the only claims Plaintiff pleads that arise under federal law. *See* *28 U.S.C. § 1331*. Accordingly, the Court can exercise jurisdiction over the state-law claims only if Plaintiff shows that diversity jurisdiction exists under *28 U.S.C. § 1332*. *See* *Penteco Corp. v. Union Gas Sys., Inc., 929 F.2d 1519, 1521 (10th Cir. 1991)* ("The party seeking the exercise of jurisdiction in his favor must allege in his pleading the facts essential to show jurisdiction." (internal quotation marks omitted)); *see also* *Newman-Green, Inc. v. Alfonzo-Larrain, 490 U.S. 826, 829, 109 S. Ct. 2218, 104 L. Ed. 2d 893 (1989)* ("When a plaintiff sues more than one defendant in a diversity action, the plaintiff must meet the requirements of the diversity statute for *each* defendant or face dismissal." (emphasis in original)).[9]

As relevant here, *§ 1332* requires that the parties be "citizens **[**28]** of different States." *28 U.S.C. § 1332(a)(1)*. When one of the parties is an LLC—as Plaintiff is—then the plaintiff fails to plead facts sufficient to show diversity unless the plaintiff pleads the citizenship of all the LLC members and shows that no member is a citizen of the same state as any defendant. *See* *Siloam Springs Hotel, L.L.C. v. Century Sur. Co., 781 F.3d 1233, 1237-1238 (10th Cir. 2015)* (an LLC takes the citizenship of all its members; "only those state-created entities that are corporations, in the traditional understanding of that word, will be treated as a person for purposes of diversity jurisdiction"). If the LLC members are themselves non-corporate business entities (other LLCs, LLPs, etc.), then the plaintiff must examine the members' members until the plaintiff "bottoms out" at a natural person or a corporation. The citizenship of those natural persons and corporations is what counts in the diversity analysis.

---

[9] To be clear, the federal antitrust claims did not open the door to supplemental jurisdiction over the state-law claims. Supplemental jurisdiction embraces "all other claims that are so related to claims in the action within [the Court's] original jurisdiction that they form part of the same case or controversy under Article III of the United States Constitution." *28 U.S.C. § 1367(a)*. *If* Plaintiff's federal antitrust claims had stated an Article III case or controversy, *then* the Court would have had original jurisdiction over them (through Article III and *28 U.S.C. § 1331*). But, as to those claims, it turns out that this Court has only ever had "jurisdiction to determine its own jurisdiction." *United States v. Ruiz, 536 U.S. 622, 628, 122 S. Ct. 2450, 153 L. Ed. 2d 586 (2002)*. It has never had original jurisdiction, and so it cannot exercise supplemental jurisdiction.

[*1181] Plaintiff does not plead the necessary allegations. As to itself, Plaintiff alleges only that it is a Delaware LLC with its principal place of business in Las Vegas, Nevada. (¶ 9.) Those facts would be relevant if Plaintiff was a corporation, but it is not. More importantly, Plaintiff entirely fails to plead the citizenship of its LLC membership, and so Plaintiff cannot **[**29]** establish that it is *not* a citizen of a state in which a defendant is organized or domiciled. For this reason, Counts 3-8 must be dismissed without prejudice for lack of subject matter jurisdiction.

IV. CONCLUSION

For the reasons set forth above, the Court ORDERS as follows:

1. Defendants' Joint Motion to Dismiss (ECF No. 56) is GRANTED;

2. Counts 1-2 of the Corrected Complaint and Jury Demand (ECF No. 51) are DISMISSED WITHOUT PREJUDICE for lack of Article III jurisdiction; and

3. Counts 3-8 of the Corrected Complaint and Jury Demand (ECF No. 51) are DISMISSED WITHOUT PREJUDICE for lack of Article III jurisdiction and for lack of statutory subject matter jurisdiction.

Dated this 12th day of March, 2020.

BY THE COURT:

/s/ William J. Martínez

William J. Martínez

United States District Judge

Judges: HON. KEVIN MCNULTY, UNITED STATES DISTRICT JUDGE.

Opinion by: KEVIN MCNULTY

Opinion

KEVIN MCNULTY, U.S.D.J.:

Pending before the Court is the motion of defendant American Board of Orthopaedic Surgery, Inc. ("ABOS"), to dismiss the Second Amended Complaint filed by plaintiff Bruce E. Ellison, M.D. ("Dr. Ellison") (DE 48). Two predecessor complaints have already been dismissed on motion of ABOS.

Dr. Ellison's Second Amended Complaint[1] asserts one count based on alleged violations of federal ***antitrust law*** in relation to the certifications ABOS provides to certain qualifying physicians ("Board Certification"). Dr. Ellison

[1] The following abbreviations are used herein:

asserts that ABOS improperly restrains trade by colluding with hospitals in requiring orthopedic surgeons to obtain Board Certification as a condition of practicing at those hospitals. ABOS allegedly prevents Dr. Ellison from obtaining Board Certification unless he first has hospital medical staff privileges, thereby reducing competition at hospitals by excluding surgeons who, like Dr. Ellison, practice **[*2]** exclusively at ambulatory surgery centers or other places that do not offer those medical staff privileges. Dr. Ellison primarily seeks declaratory and injunctive relief, but also damages, costs, and fees. ABOS has moved to dismiss the Second Amended Complaint, asserting grounds similar to those in its prior motion to dismiss the First Amended Complaint (*see* DE 29).

For the reasons stated in this opinion, I will dismiss the Second Amended Complaint pursuant to Rule 12(b)(6) for failure to state a claim upon which relief may be granted.

I. Summary

a. Factual background

I recap the factual background from my prior opinion, supplementing as necessary with facts newly asserted in the Second Amended Complaint.

Dr. Ellison holds a medical license in California, where he currently treats patients as an orthopedic surgeon. (2AC ¶¶ 11, 32) For "personal and professional reasons, Dr. Ellison would like to obtain medical staff privileges" at a hospital in northern New Jersey. (*Id.* ¶ 11) The hospitals to which he says he *would* apply for privileges—but has not actually applied—require that he possess Board Certification provided by ABOS. **[*3]** (*Id.* ¶ 29)

Defendant ABOS—the only defendant in this action—oversees the Board Certification program for physicians specializing in orthopedic surgery. (*Id.* ¶ 3) Defendant ABOS is incorporated in Delaware. (*Id.* ¶ 12) It has directors and officers who reside in many different states, although the 2AC does not specify where these members reside. (*Id.* ¶ 12) ABOS arranges for the administration of the written portion of its Board Certification exam through a third-party subcontractor at testing locations throughout the United States, including in New Jersey, collects "up to a million dollars or more annually" from physicians located in New Jersey, and communicates with hospitals and patients in New Jersey about which physicians hold Board Certifications. (*Id.* ¶11 36-39) Defendant ABOS does not maintain any offices, records, property, or staff in New Jersey. (DE 49-3 ¶ 4)

ABOS is a member of the American Board of Medical Specialties ("ABMS"). (*Id.* ¶ 2) ABMS is *not* a defendant here, nevertheless, the Second Amended Complaint provides additional color with respect to this entity. According to one article cited in the Second Amended Complaint, ABMS

> continues to be the leading not-for-profit organization **[*4]** overseeing physician certification in the United States. ABMS establishes the standards its 24 Member Boards use to develop and implement educational and professional evaluation, assessment, and certification of physician specialists. More than 860,000 physicians are certified in one or more of the approved 37 specialties and 86 subspecialties offered by the ABMS Member Boards.

(*Id.* ¶ 6, n.2 (citing https://www.prnewswire.com/news-releases/the-american-hospital-association-ioins-abms-multi-specialtv-portfolio-program-300435665.html))

The Second Amended Complaint includes additional details about another entity, the American Hospital Association ("AHA"), which is also *not* a defendant. Nearly 90% of all hospitals are members of AHA (*Id.* ¶ 4) AHA

"DE __" = Docket Entry in this case

"2AC" = Second Amended Complaint (DE 48) is a non-profit that provides "education for health care leaders and is a source of information on health care issues and trends." (*Id.* ¶ 6, n.2) AHA and ABMS have interlocking memberships. (*Id.* ¶ 5).

The 2AC asserts that AHA and ABMS (again, not defendants here) entered into an agreement in April 2017 to "provide money-making programs in connection with board certification by [defendant] ABOS and other specialty groups." (*Id.* ¶ 6) The Second Amended **[*5]** Complaint adds that AHA announced in 2017 that it had joined the ABMS Multi-Specialty Portfolio Program. This program allows

> Hospitals and health systems participating in the AHA's Health Research & Educational Trust (HRET) Hospital Improvement Innovation Network (HIIN) [to] facilitate Maintenance of Certification (MOC) Improvement in Medical Practice (Part IV) credit for physicians who are Board Certified by one of the 21 of 24 ABMS Member Boards participating in the Portfolio Program.
>
> The HRET HIIN is the first HIIN in the country to offer this service to its more than 1,600 participating hospitals. Through ABMS MOC Part IV credit, physicians can meet the requirements for maintaining their certification while meaningfully participating in quality improvement programs in their organizations. Partnering on ABMS MOC Part IV also will reduce duplication of quality improvement efforts; HRET HIIN hospitals currently are engaged in improvement efforts across 11 hospital-acquired condition topics. Physicians' roles in these projects may vary from team member to physician champion. Projects will be data-driven, focused on patient safety, and designed to implement evidence-based best practices. **[*6]** AHA hopes this program will encourage the development of long-lasting improvements, while strengthening physicians' connection to the improvement efforts of their broader organizations.
>
> "We are very pleased to be the first HIIN to provide this valuable service," said Jay Bhatt, DO, HRET President and AHA Chief Medical Officer. "Aligning physicians' pursuit of their Board Certification with hospitals' quality improvement efforts will accelerate our collective efforts to improve patient safety by promoting team-based care delivery."

(*See Id.* n.2 (citing https://www.prnewswire.corn/news-releases/the-american-hospital-association-joins-abms-multi-specialty-portfolio-program-300435665.html))[2] Dr. Ellison does not contend that this recent agreement to provide continuing certification impacts him. Rather, Dr. Ellison alleges that ABMS and AHA have previously entered into "similar agreements" to promote ABOS and other specialty groups. As part of this "arrangement," "ABOS excludes Plaintiff from obtaining board certification by ABOS unless he first has hospital medical staff privileges, and AHA member hospitals exclude physicians unless they have board certification." (2AC ¶¶ 6, 7) To achieve **[*7]** this agreement, "ABMS and its members put pressure on hospitals through AHA, to require ABMS specialty board certification, which includes ABOS." (*Id.* ¶ 18; *see also id.* ¶¶ 19, 20)

According to the Second Amended Complaint, the largest hospital systems in northern New Jersey, like RWJBarnabas, have joined into a conspiracy to make money since they are members of the AHA and require the hospitals under their purview to provide medical staff privileges only to doctors who have obtained Board Certification. (*Id.* ¶¶ 4, 23-26) St. Peter's University Hospital, located in New Brunswick, New Jersey, also requires Board Certification as a condition of obtaining medical staff privileges. (*Id.* ¶ 27) Similarly, Rutgers University Hospital requires Board Certification in order to obtain medical staff privileges and will not process the applications for employment of prospective doctors unless the applicant has acquired Board Certification within seven years after completing residency training. (*Id.* ¶ 26) The Board Certification process is controlled by ABMS and, for Dr. Ellison, ABOS such that other equally rigorous board certification programs offered by other organizations are not recognized. **[*8]** (*Id.* ¶¶ 28, 48) Thus, says Ellison, ABMS and its members ABOS, AHA, and member hospitals all have an arrangement to exclude Dr. Ellison from obtaining board certification. (*Id.* ¶ 7)

---

[2] Dr. Ellison cites to a number of other articles in the 2AC. Many of these articles are from the early 2000s, and they do not specifically refer to ABOS. (*See* 2AC ¶¶ 15 (citing a CMS Director Survey and Certification Group article from 2004 concerning the requirements for hospital medical staff privileging); ¶ 16 (citing two studies from 2007 and 2009 regarding hospital privileging as it relates to board certification); ¶ 18 (citing a 2005 article titled "Board Certification as Prerequisite for Hospital Staff Privileges"))

Dr. Ellison alleges that the requirement for Board Certification precludes him from obtaining medical staff privileges "at the major hospitals in the regions of northern New Jersey." (*Id.* ¶ 29; *see also* ¶ 9) Dr. Ellison successfully passed the written portion of ABOS's exam ("Part I") in Chicago, Illinois. (*Id* ¶ 53; DE 49-3 ¶ 6) This qualified him to take the oral portion of the exam ("Part II"), which is only administered in Chicago. (2AC ¶¶ 53-55; DE 49-3 ¶ 7) However, ABOS subsequently refused to allow him to take Part II of the exam because he did not have medical staff privileges. (*Id.* ¶¶ 44, 56)

This, says Dr. Ellison, confronted him with the proverbial catch-22: without medical staff privileges he cannot take Part II of the certification exam, but without certification he cannot acquire medical staff privileges. This practice, Dr. Ellison alleges, reduces competition to hospitals by shutting out surgeons, like himself, who practice exclusively at ambulatory surgery centers (which do not provide medical **[*9]** staff privileges), thereby reducing the number of orthopedic surgeons available to patients. (*Id.* ¶ 43) There is an exception to the staff-privileges prerequisite for physicians who have completed their residency within the last seven years, but that exception is unavailable to Dr. Ellison at this later stage of his career. (*Id.* ¶ 7)

Dr. Ellison has not applied for medical staff privileges at these New Jersey hospitals because, he says, without board certification, rejection is likely. He is therefore unwilling to apply, because a rejection of an application for medical staff privileges allegedly "results in an automatic adverse entry in the National Practitioner Data Bank, which severely damages the reputation of a physician." (*Id.* ¶ 30)

Dr. Ellison asserts that ABOS has unlawfully acted in concert with hospitals to require Board Certification as a precondition for employment, thus interfering with the market for orthopedic surgery services at hospitals in northern New Jersey. (*Id.* ¶¶ 41, 57) He also claims that ABOS has engaged in an anticompetitive tying arrangement in violation of *Section 1 of the Sherman Act*. (*Id.* ¶ 60) In this respect, ABOS and the hospitals are allegedly acting in concert **[*10]** for ABOS's pecuniary benefit. (*Id.* ¶ 58) This pecuniary benefit for these organizations is the only justification suggested by Dr. Ellison for the Board Certification precondition for obtaining medical staff privileges. He suggests that this must be the case because, from 2007-2017, the use of board certification in hospital privileging significantly increased, but that increase was not accompanied by improved physician competence or better outcomes for patients. (*Id.* ¶¶ 15-22) Instead, the only reason for the increase in Board Certification is ABOS's and ABMS's continued pressure on hospitals to require Board Certification as a condition of medical staff privileges. (*Id.*)

This restraint, Dr. Ellison asserts, reduces "the availability of physicians in the relevant market, which reduces patient choice and increases health care costs." (*Id.* ¶ 61) He seeks damages, a declaratory judgment that ABOS has violated the Sherman Act, injunctive relief allowing Dr. Ellison to take Part II of the exam, and an order requiring ABOS to cease requiring surgical privileges as a precondition for taking Part II of the exam. (*Id.* ¶¶ 56-61)

b. Procedural history

This case, or some version of it, has been **[*11]** pending for over four years. In December 2015, Ellison first brought suit against ABOS in the district where it is located, *i.e.*, the United States District Court for the Northern District of Illinois (the "Illinois Complaint"), seeking the same relief he seeks in this action. *See Ellison v. American Board of Orthopaedic Surgery, Inc.*, No. 15-cv-11848, Docket Entry 1, Illinois Complaint ¶¶ 3, 28-32. However, Dr. Ellison voluntarily dismissed the Illinois Complaint in April 2016. *Id.*

That same month, Dr. Ellison filed a factually similar complaint in the Superior Court of New Jersey, Law Division, Union County, alleging that ABOS violated the *New Jersey Consumer Fraud Act ("NJCFA"), N.J. Stat. Ann. § 56:8-1, et seq.*, and the *New Jersey Antitrust Act, N.J. Stat. Ann. § 56:9-1, et seq.* (*See* DE 1) Dr. Ellison sought treble damages, attorneys' fees, and declaratory and injunctive relief requiring ABOS to allow him to take the Part II exam.

In November 2016, ABOS removed the case to federal court ("Removed Complaint") on the basis of diversity of citizenship. *See* [28 U.S.C. § 1332(a)](). The notice of removal stated that Dr. Ellison is domiciled in California, and that ABOS is a Delaware corporation with its principal place of business in North Carolina. (DE 1 ¶¶ 11-15)[3]

In February **[*12]** 2017, ABOS moved to dismiss the Removed Complaint on a variety of grounds. (DE 4) I granted that motion and dismissed the Removed Complaint pursuant to *Rule 12(b)(6)* for failure to meet the minimal pleading standards of *Rule 8*. (DE 17) In that opinion I noted, *inter alia*, that "[t]he vagueness of the Complaint makes it difficult to discern what, if anything, connects Dr. Ellison, ABOS, and any wrongful acts to the State of New Jersey." (*Id.* at p. 5.) Additionally, without any allegation of a concrete injury in fact, I could not "accept that Dr. Ellison possesse[d] a cause of action in any jurisdiction where he theoretically could have sought, and been refused, admitting privileges." (*Id.*) Finding that Dr. Ellison had failed to state a claim, I did "not reach, or prejudge" the issues related to personal jurisdiction, venue, or standing raised by ABOS and entered the dismissal of the Removed Complaint without prejudice to the filing of a motion to amend. (*Id.*) However, I flagged numerous challenges facing plaintiff, including the issues of personal jurisdiction and venue, as follows: "the plaintiff may wish to consider whether it make more sense to file this lawsuit in a district where the defendant is incorporated **[*13]** and has its principal place of business, or in the alternative in a district where the acts complained of actually took place." (*Id.* at p.5.)

Dr. Ellison subsequently moved for leave to amend, which was granted, and filed an Amended Complaint. (DE 21, 27, 28) *See* *Ellison v. Am. Bd. of Orthopaedic Surgery, Inc., No. 16-8441, 2018 U.S. Dist. LEXIS 68549, 2018 WL 1919953, at *1 (D.N.J. Apr. 24, 2018)*. The Amended Complaint dropped the counts alleging violations of New Jersey state law and instead alleged a single count of restraint of trade in violation of *Section I of the Sherman Act, 15 U.S.C. § 1*. (*See* DE 28)

ABOS again moved to dismiss the Amended Complaint for lack of personal jurisdiction, improper venue, lack of standing, and failure to state a claim, pursuant to *Fed. R. Civ. P. 12(b)(2)*, *(3)*, and *(6)*. (DE 29) In October 2018, I issued a second opinion, again dismissing the complaint for failure to meet the pleading standards of *Rule 8*. (DE 34) Like the Removed Complaint, the Amended Complaint still stated "only in a conclusory manner that northern New Jersey hospitals conspired and knew about the alleged plan to bolster ABOS's market position." (*Id.* p. 8.) I found that the "Amended Complaint does not assert any plausible basis for a conspiracy between ABOS and the vast network of New Jersey hospitals, nor does the Amended Complaint include any plausible allegations that place the **[*14]** hospitals' conduct in a context that raises a suggestion of a preceding agreement." (*Id.* p. 9.)

Dr. Ellison then filed for leave to file a Second Amended Complaint (DE 41), which was granted (DE 47). On June 13, 2019, Dr. Ellison filed the Second Amended Complaint. (DE 48) Eight days later, on June 21, 2019, ABOS again moved to dismiss on the basis that the Second Amended Complaint still suffered from the same deficiencies as the Removed Complaint and the Amended Complaint, namely that the

> Second Amended Complaint does not cure the standing and jurisdictional flaws identified by the Court when it granted ABOS' first motion to dismiss. Nor does it adequately allege 1) an anticompetitive conspiracy between ABOS and any specified New Jersey hospitals or 2) an illegal tying arrangement, as the Court, in granting ABOS' most recent motion to dismiss, advised Plaintiff he would be required to do.

(DE 49). Plaintiff opposed the motion (DE 51), and defendant filed a reply (DE 54).

II. ANALYSIS

Federal Rule of Civil Procedure 12(b)(6) provides for the dismissal of a complaint, in whole or in part, if it fails to state a claim upon which relief can be granted. The defendant, as the moving party, bears the burden of showing that no claim has been **[*15]** stated. *Animal Science Products, Inc. v. China Minmetals Corp., 654 F.3d 462, 469 n. 9 (3d Cir. 2011)*. For the purposes of a motion to dismiss, the facts alleged in the complaint are accepted as true

[3] The Removed Complaint alleged, less specifically, that Dr. Ellison is located in California and that ABOS is headquartered in North Carolina. (DE no 1-1 ¶¶ 2, 3; DE 1-3, Civil Cover Sheet)

and all reasonable inferences are drawn in favor of the plaintiff. *New Jersey Carpenters & the Trustees Thereof v. Tishman Const. Corp. of New Jersey, 760 F.3d 297, 302 (3d Cir. 2014)*.

Federal Rule of Civil Procedure 8(a) does not require that a complaint contain detailed factual allegations. Nevertheless, "a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Thus, the complaint's factual allegations must be sufficient to raise a plaintiff's right to relief above a speculative level, so that a claim is "plausible on its face." *Id. at 570*; *see also* *West Run Student Housing Assocs., LLC v. Huntington Nat. Bank, 712 F.3d 165, 169 (3d Cir. 2013)*. That facial-plausibility standard is met "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). While "[t]he plausibility standard is not akin to a 'probability requirement' . . . it asks for more than a sheer possibility." *Iqbal, 556 U.S. at 678*.

A. Sherman Act claim

The *Sherman Anti-Trust Act* declares "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States ... to be illegal." **[*16]** *15 U.S.C. § 1*. "Although this prohibition is literally all-encompassing, the courts have construed it as precluding only those contracts or combinations which 'unreasonably' restrain competition." *Animal Sci. Prods., Inc., 34 F. Supp. 3d at 480* (quoting *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 4-5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*.

"In order to sustain a cause of action under *§ 1 of the Sherman Act*, the plaintiff must prove: (1) that the defendants contracted, combined, or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiff was injured as a proximate result of that conspiracy." *Martin B. Glauser Dodge Co. v. Chrysler Corp., 570 F.2d 72, 81-82 (3d Cir. 1977)*. *Accord* *Howard Hess Dental Laboratories Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 253 (3d Cir. 2010)*; *cf.* *Franco v. Connecticut Gen. Life Ins. Co., 818 F. Supp. 2d 792, 829 (D.N.J. 2011)* ("Pleading a colorable Sherman Act *section 1* claim requires a plaintiff to allege (1) an agreement (2) imposing an unreasonable restraint of trade within a relevant product market and (3) resulting in antitrust injury, that is 'injury of the type the antitrust laws were intended to prevent and ... that flows from that which make defendants' acts unlawful.'").

"The existence of an agreement is the hallmark of a *Section 1* claim. Liability is necessarily based on some form of concerted action.... The agreement, of course, must pertain **[*17]** to some unlawful conduct within the meaning of the antitrust laws. To establish liability under *section 1*, a plaintiff must demonstrate that the challenged practice imposed an unreasonable restraint on trade. The illegality of the restraint may be demonstrated in one of two ways: under the per se standard or under a rule of reason analysis." *Franco, 818 F. Supp. 2d at 829-30 (D.N.J. 2011)* (internal citations and quotations omitted).

"The rule of reason requires courts to conduct a fact-specific assessment of 'market power and market structure ... to assess the [restraint]'s actual effect' on competition." *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)* (citation omitted). "While the rule of reason typically mandates an elaborate inquiry into the reasonableness of a challenged business practice, there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable. Such plainly anticompetitive agreements or practices are deemed to be illegal per se." *United States v. Brown Univ. in Providence in State of R.I., 5 F.3d 658, 669 (3d Cir. 1993)* (internal quotations and citations omitted). The types of "agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal **[*18]** without elaborate inquiry as to the precise harm they have caused or the business excuse for their use ... are price fixing, division of markets, group boycotts, and tying arrangements." *N. Pac. Ry. Co., 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. *Accord*

Arizona v. Maricopa County Med. Soc., 457 U.S. 332, 345, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982); *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 830 (3d Cir. 2010)* ("Some categories of restraints, such as horizontal price-fixing and market allocation agreements among competitors, 'because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable.") (quoting *Brown Univ. in Providence in State of R.I., 5 F.3d at 669*); *In re Ins. Brokerage, 618 F.3d at 316* ("Paradigmatic examples [of per se illegal restraints] are 'horizontal agreements among competitors to fix prices or to divide markets.'" (quoting *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)))*.

1. Agreement

"To allege such an agreement between two or more persons or entities, a plaintiff must allege facts plausibly suggesting 'a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.'" *Howard Hess Dental Labs. Inc., 602 F.3d at 254* (quoting *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 755, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. With respect to the alleged conspiracy between ABOS and northern New Jersey hospitals, Dr. Ellison has failed to allege facts that plausibly suggest such an unlawful arrangement.

Dr. Ellison has alleged no facts supporting a *per se* restraint of trade. The Second Amended Complaint, like the complaints that preceded it, states only in a **[*19]** conclusory manner that northern New Jersey hospitals "conspired" with ABOS to require certification. But "[r]esort to per se rules is confined to restraints. . . that would always or almost always tend to restrict competition and decrease output." *Leegin, 551 U.S. at 886*. There are no facts alleging any type of agreement suggestive of plainly anticompetitive conduct that amounts to a *per se* unlawful restraint.

The claim is tantamount to one that hospitals cannot require physician qualifications unless they run their certification programs themselves, lest they "conspire." But there is nothing inherently harmful or unlawful about a hospital requiring physicians to be certified. It cannot be said that such a practice has no legitimate purpose, and can only be aimed at restraining trade. It has an obvious medical rationale. For this reason, a hospital's requirement that physicians meet certain qualifications will rarely if ever found to be *per se* unreasonable. *See, e.g., Weiss v. York Hosp., 745 F.2d 786, 820 (3d Cir. 1984)* ("The Medical Staff is, however, entitled to exclude individual doctors, including osteopaths, on the basis of their lack of professional competence or unprofessional conduct . . . We recognize, therefore, that in many cases involving exclusion **[*20]** from staff privilege, courts will, more or less openly, have to utilize a rule of reason balancing approach."); *Miller v. Indiana Hosp., 843 F.2d 139, 144 (3d Cir. 1988)* ("We recognized that in a hospital staff privilege case in which the hospital defends on lack of professional ability, the rule of reason test would apply."); *see also BCB Anesthesia Care Ltd. v. Passavant Mem. Area Hosp. Ass'n, 36 F.3d 664, 667 (7th Cir. 1994)* (noting that courts "invariably analyze" antitrust claims based on hospital credentialing decisions under the rule of reason because "there is nothing obviously anticompetitive about a hospital choosing one staffing pattern over another or in restricting the staffing to some rather than many or all").

The allegations in the 2AC also fail under the Rule of Reason analysis. The Second Amended Complaint reiterates, for instance, that "Defendant ABOS has undertaken its actions with a common design and understanding with hospitals to exclude some competent orthopedic surgeons from the relevant market, including Dr. Ellison." (2AC ¶ 62) This type of conclusory allegation is found throughout the 2AC. (*E.g., id.* ¶11 6, 9, 14, 41, 44, 57, 58, 60, 61, 62, 63). "But to survive dismissal it does not suffice to simply say that the defendants had knowledge; there must be factual allegations to plausibly suggest as much." **[*21]** *Howard Hess Dental Labs. Inc., 602 F.3d at 255* (citing *Twombly, 550 U.S. at 564*).

There are no such allegations here. Without more, the mere fact that certain hospitals require Board Certification for admitting privileges combined with a bare assertion that hospitals conspired with ABOS is not a sufficient allegation of an unlawful agreement. *See Twombly, 550 U.S. at 556-57* ("[A]n allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality.

Hence, when allegations of parallel conduct are set out in order to make a [Sherman Act] § 1 claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.").

Nothing in this complaint goes beyond an allegation that the hospitals chose to require certification by an outside organization, ABOS. These entities do not conspire any more than the hospitals "conspire" with medical schools by virtue of requiring their doctors to possess a medical degree. The facts to support a conspiratorial agreement or a coercive arrangement are lacking.

Dr. Ellison attempts **[*22]** to bridge that gap with public statements made by ABMS (to which Defendant ABOS is alleged to belong). According to the complaint, ABMS stated that it "encourages hospitals and insurers to consider it when granting or delineating clinical privileges." (2AC ¶ 64; *see also* ¶ 18). To begin with, these statements are attributable to ABMS and AHA—not defendant ABOS. In any event, they continue to miss the mark. There is nothing inherently unlawful about ABMS "encouraging" certain hospitals to accept its certification program. These vague allegations that ABMS influenced or pressured hospitals into requiring board certification actually suggest just the opposite. *Lacking* any actual agreement with hospitals, ABMS engaged in public marketing efforts in an attempt to expand the reach of its programs. The statements cited by Dr. Ellison confirm as much:

> We all know that the hospital business is a competitive one, and the more we can do to ensure patients, our insurers, and patient advocacy groups that we deliver the highest quality care, the better off we are. There has also been pressure from specialty boards encouraging us to restrict staff privileges to those physicians who have board certification. **[*23]** Our Board of Trustees has been struggling with the issue for more than a year, and, after many rounds of talks, they have decided that we will begin to require board certification for all physicians who have staff privileges.

(2AC ¶ 18). Implicit in this statement is the recognition by that hospital that it must compete for patients by offering high quality services. While this particular hospital struggled with the decision, its trustees ultimately agreed that one way to compete and ensure quality care was to require board certification for its physicians. There is no allegation, by the way, that this article refers to any of the hospitals mentioned in the complaint. (*See* 2AC ¶ 25)

In any event, the 2AC asserts nothing to suggest that this large collection of New Jersey hospitals decided to require board certification as a prerequisite to medical staff privileges based on an illicit agreement, rather than as the result of their own independent calculation that this requirement would improve the quality of care or make them more competitive in attracting patients. The time, place, or manner of the alleged "agreement" is not specified. The Second Amended Complaint does not assert any **[*24]** facts directly suggesting such an between ABOS and the New Jersey hospitals; nor does it indirectly state a factual context that implies a preexisting agreement with ABOS. Dr. Ellison has not pled "enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Twombly, 550 U.S. at 556*.

Nor has Dr. Ellison alleged facts sufficient to suggest that ABOS has sufficient market power to affect a restraint of trade. Dr. Ellison in one sense frames the allegations in the 2AC as restricting trade because ABOS prevents him from getting certified by other equally rigorous board certification programs offered by other organizations. (2AC ¶¶ 28, 48) Of course, "exclusionary practices in themselves are not sufficient. There must be proof that competition, not merely competitors, has been harmed" *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 187 (3d Cir. 2005)*. To overcome this hurdle, Dr. Ellison must allege that there are somehow fewer surgeons available to treat patients because of ABOS's restrictions. But all the 2AC can manage is a conclusory assertion that "ABOS's actions significantly reduce the availability of orthopedic surgeons in the relevant market, which reduces patient choice and increases health care costs." (2AC ¶ 61) There **[*25]** are no well-pled factual allegations to support this sweeping conclusion. For example, Dr. Ellison does not point to any reduction of the number of surgeons available to treat patients, or resulting inflation of prices to consumers. Indeed, it is far from evident that the purported agreement between ABOS and northern New Jersey hospitals would operate in that manner. Failure to be certified, for example, does not render a surgeon unable to practice. *See Sanjuan v. Am. Bd. of Psychiatry & Neurology, Inc., 40 F.3d 247, 251 (7th Cir. 1994)*, *as amended on denial of reh'g* (Jan. 11, 1995) (explaining that it is "hard to see how the [defendant psychiatric board's] activities could amount to an exercise of market power, which entails cutting back output in the market and thus driving up prices to consumers" where "plaintiffs already are sellers in the market for psychiatric services [and] turning down their applications for certification does not remove their output from the market and therefore does not raise prices to consumers") (internal citation omitted).

Even if the relevant market is considered to consist only of surgeons admitted to practice at these New Jersey hospitals—an unsupported contention—the necessary facts are lacking. The complaint alleges that Dr. Ellison, **[*26]** a *competitor*, has been excluded from a market segment, but gives no reason to think that *competition* has been harmed—for example, that the total number of such surgeons admitted to practice at New Jersey hospitals has been reduced. That prices for surgical services are indirectly affected cannot simply be assumed, given the complex manner in which the (highly insurance-driven) market for surgical services functions.

"[I]t is commonplace, and often very useful, for organizations to recommend quality standards . . . or adopt them as part of a certification process. . . Merely to say that the standards are disputable or have some market effects has not generally been enough to condemn them as 'unreasonable' under the Sherman Act." *DM Research, Inc. v. Coll. of Am. Pathologists, 170 F.3d 53, 57 (1st Cir. 1999)*. Dr. Ellison fails to sufficiently state a claim for an improper agreement under *Section 1* of the Sherman Act. The failure to allege an unlawful agreement alone warrants dismissal for failure to state a claim.

2. Tying Allegations

Dr. Ellison simultaneously asserts that defendant ABOS engaged in an improper tying arrangement. He alleges both a *per se* and a "rule of reason" tying violation. (2AC ¶P 64-65) "Tying is defined as selling one good (the tying product) on the condition **[*27]** that the buyer also purchase another, separate good (the tied product)." *Town Sound and Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 475 (3d Cir. 1992)*. "[T]he essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such 'forcing' is present, competition on the merits for the tied item is restrained and the Sherman Act is violated." *Id. at 476* (quoting *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984))*.

"[W]here (1) a defendant seller ties two distinct products; (2) the seller possesses market power in the tying product market; and (3) a substantial amount of interstate commerce is affected, then the defendant's tying practices are automatically illegal without further proof of anticompetitive effect." *Id. at 477*. That is, under these circumstances, a defendant's acts amount to a "per se" violation.

While the "per se illegality rule applies when a business practice on its face has no purpose except stifling competition," conduct that does not trigger a *per se* analysis is analyzed under a "rule of reason" test, which focuses on the particular facts disclosed by the record to determine whether **[*28]** the probable effect of the tying arrangement is to substantially lessen *competition*, rather than merely disadvantage some particular *competitor. Eisai, Inc. v. Sanofi Aventis U.S., LLC, 821 F.3d 394, 402-03 (3d Cir. 2016)* (citations and quotations omitted).

Under the rule of reason test, a plaintiff must show a substantial foreclosure of the market for the relevant product. *Id.* (citations and quotations omitted). Although the test does not require total foreclosure, the challenged practices must bar a substantial number of rivals or severely restrict the market's ambit. *Id.* The "concern is not about which products a consumer chooses to purchase, but about which products are reasonably available to that consumer. For example, if customers are free to switch to a different product in the marketplace but choose not to do so, competition has not been thwarted—even if a competitor remains unable to increase its market share." *Id.* (citations and quotations omitted). However, even in cases where consumers have a choice between products, the market is foreclosed if the defendant's anticompetitive conduct renders that choice meaningless. *Id.* (citations and quotations omitted).

Here, Dr. Ellison conclusorily asserts that ABOS's board certification requirements amount **[*29]** to an anticompetitive tying arrangement and defines the "tying market" as "board certification for orthopedic surgeons holding an 'M.D.' degree as required by hospitals in northern New Jersey as a condition of practicing medicine there." (2AC ¶ 45) The 2AC fails to describe the operation of the alleged tying arrangement very clearly. Presumably the "tying product" is ABOS's board certification, and the the "tied product" would be hospital medical staff privileges, or the other way around.

The relevant analysis fails at the first phase of either a *per se* analysis or rule of reason analysis. This purported tying arrangement makes little sense. A tying arrangement must be viewed in light of the power wielded by the purported seller to force a consumer to buy other products it did not want, or did not want on those terms. ABOS is not plausibly alleged to possess that power. It would be ABOS's alleged "exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms" that drives the inquiry. *Town Sound and Custom Tops, Inc., 959 F.2d at 476*.[4] "[T]he essence of illegality in tying agreements **[*30]** is the wielding of monopolistic leverage; a seller exploits his dominant position in one market to expand his empire into the next." *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 611, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*. There are no allegations that ABOS has influence over who is granted staffing privileges or that staffing privileges can be provided or sold by ABOS. (I set aside the difficulties in treating hospital staff status as a tied "product" sold in a market.) There are no well-pled allegations that ABOS is provided any direct monetary or other benefits as a result of a hospital issuing a surgeon staffing privileges. There are no facts tending to demonstrate that *ABOS*—the defendant here—is conditioning staff privileges on participation in its certification program, or profiting therefrom. The theory, then, must be some highly attenuated one, for which the necessary facts are not pled.

Because the 2AC fails to assert a tying arrangement or illicit agreement, the Court need not opine on whether the other elements of a *Section 1* Sherman Act violation are sufficiently pled; the failure to allege an unlawful agreement alone warrants dismissal for failure to state a claim. *See* *Howard Hess Dental Labs. Inc., 602 F.3d at 254* ("*Section 1* claims are limited to combinations, contracts, and conspiracies, and thus always **[*31]** require the existence of an agreement.").[5]

III. CONCLUSION

ABOS's motion to dismiss the Second Amended Complaint is granted on *Rule 12(b)(6)* grounds, for failure to state a claim under *Section 1* of the Sherman Act. Because this complaint is in its third iteration (in this district), it appears that further amendment would be futile. This dismissal of the Second Amended Complaint as against ABOS is therefore entered with prejudice. An appropriate Order follows.

Dated: March 12, 2020

/s/ Kevin Mcnulty

HON. KEVIN MCNULTY, U.S.D.J.

ORDER

THIS MATTER having come before the Court on the motion of defendant American Board of Orthopaedic Surgery, Inc. ("ABOS"), to dismiss the Second Amended Complaint (DE 49); and the plaintiff, Bruce E. Ellison, M.D., having

[4] To be clear, there is no allegation that Dr. Ellison is being forced to buy two products, when he only wanted one. Instead, he alleges that he wants both products: (1) to sit for phase II of the ABOS board certification test so that he can obtain board certification (2AC ¶ 70), and thereby obtain (2) staffing privileges from a northern New Jersey hospital. (*See, e.g., id.* ¶ 67)

[5] I therefore express no further opinion on other issues raised by ABOS. These include questions of venue, jurisdiction and standing raised by a speculative allegation that a California physician theoretically would apply for, but is likely to be denied, staff privileges at any one of a number of New Jersey hospitals.

opposed the motion (DE 51); and the defendant ABOS having filed a reply (DE 54); and the Court having considered the papers before it without oral argument pursuant to *Fed. R. Civ. P. 78(b)*; for the reasons stated in the Opinion filed on this date, and for good cause shown:

IT IS this 12th day of March, 2020,

ORDERED that the motion (DE 49) of defendant ABOS to dismiss the Second Amended Complaint for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)*, is **GRANTED** with prejudice.

/s/ Kevin Mcnulty

Opinion by: Edgardo Ramos

Opinion

OPINION AND ORDER

Ramos, D.J.:

This class action arises from twenty-five consolidated complaints filed against a number of banks and certain of their employees who allegedly conspired to fix the price of supranational, sovereign, and agency ("SSA") bonds. These actions were **[*9]** consolidated under the caption *In re SSA Bonds Antitrust Litigation, No. 16 Civ. 3711, 2018 U.S. Dist. LEXIS 147022*. *See* Docs. 36, 314. On August 28, 2018, the Court issued an Order dismissing the consolidated amended class action complaint ("CAC") for failure to state a claim and failure to plausibly allege an injury-in-fact sufficient to establish antitrust standing. Doc, 495, Specifically, the Court dismissed the Plaintiffs' CAC because Plaintiffs had not plausibly alleged any harm to them. *Id.* at 18.

The Court gave Plaintiffs leave to amend and Plaintiffs filed a second consolidated class action complaint ("SAC") on November 13, 2018. Doc, 506, The SAC included two new Plaintiffs, new factual allegations including chatroom messages (*e.g.* messages sent through social media apps like WhatsApp) and additional economic analyses. Pending before the Court is the domestic dealer defendants' motion to dismiss the SAC for failure to state a claim. Doc. 520. For the reasons set forth below, the motion is GRANTED.

I. Background

A. The SSA Bond Market

As set forth in the Court's October 4, 2019 Order, SSA bonds are debt securities issued by governmental and quasi-governmental entities to fund a range of public-policy mandates. Doc. **[*10]** 627. SSA bonds are generally regarded as secure investments because they often enjoy special legal status or government backing. Doc. 506 ¶¶ 2, 49. SSA bonds can be U.S. dollar denominated ("USD") and sold in the U.S. bond market. *Id.* 122. SSA bonds are typically issued through syndication. *Id.* ¶ 125, If an institution were seeking to issue SSA bonds, it would retain a bank or group of banks to underwrite the bond issue and then sell those bonds to investors. *Id.* The syndicate banks would serve as lead managers on the deal and be responsible for finding investors to purchase the issued bonds and for pricing the bonds. *Id*

After being issued, SSA bonds can be resold and traded by dealers and investors. *Id.* ¶ 129. Investors trade SSA bonds in an over-the-counter market, meaning that rather than using an open, anonymous exchange that matches buyers and sellers, investors transact individually and privately with dealers, *Id.* ¶¶ 129, 553, An investor typically contacts one or more dealers by telephone, electronic chat messaging, or electronic trading platform to request a quote, which the dealer relays to the investor, who can then place the order. *Id.* ¶¶ 130-31, Because it is time-consuming to **[*11]** contact dealers and because their quotes usually expire in a short amount of time, investors generally do not "shop around" with more than a few dealers at a time. *Id.* ¶ 133. Investors also do not have access to real-time market data and have limited ability to purchase secondary market trading information, so they rely on dealers for pricing information for the bonds. *Id.* ¶ 132.

Dealers typically quote prices for SSA bonds in basis points (one basis point is 1/100th of a percentage point) as a spread above the yield of the relevant benchmark U.S. Treasury bonds with a similar maturity.[1] *Id.* ¶ 139. SSA bond yields are inversely related to bond prices, thus, investors seek to buy SSA bonds at the highest available offer in basis points (i.e., the highest yield, and thus the cheapest price) and to sell them at the lowest available bid in basis points (i.e., the lowest yield, and thus the most expensive price). *Id.* ¶ 141.

B. The Alleged Conspiracy

---

[1] The Court will simply refer to "basis points" as a shorthand for this method of pricing.

Plaintiffs'[2] theory is that "Defendants agreed that they would not compete against each other for the sale of USD SSA bonds to customers." *Id.* ¶ 159. Purportedly, Defendants' overarching objective was to ensure that cartel members could transact **[*12]** with investor clients at prices that were more favorable for the conspiring dealers than would have been achieved absent collusion. *Id.* ¶ 143. Specifically, that when an investor contacted one or more dealers to purchase a bond, the Defendants would communicate with each other via chat rooms and phone calls to achieve more favorable prices and terms for themselves. *Id.* ¶ 130.

C. Procedural History

On December 21, 2018, twenty-two Dealer Defendants—including nine Domestic Dealer Defendants[3] and thirteen Foreign Dealer Defendants[4] —and four Individual Defendants,[5] filed motions to dismiss the SAC for failure to state a claim, lack, of personal jurisdiction, and improper venue. Doc. 520.

Given the complex and fact-intensive nature of the claims, the Court addressed the Foreign Dealer Defendants' and Individual Defendants' arguments in a separate opinion filed on October 4, 2019. Doc. 627. The Court analyzed the Plaintiffs' factual allegations against the Individual Defendants and the Foreign Dealer Defendants and found them insufficient to establish an antitrust conspiracy claim, an antitrust injury claim, personal jurisdiction, or venue. *Id.* at 23-27. The Court presumes familiarity with the remaining **[*13]** facts and legal analyses set out in the October 4, 2019 Order and incorporates them in this Order. The Court now addresses the Domestic Dealer Defendants' motion to dismiss for failure to state a claim.

II. Legal Standard

A. Failure to State a Claim

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). A claim is facially plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (citing *Twombly, 550 U.S. at 556*). The plaintiff must allege sufficient facts to show "more than a sheer possibility that a defendant has acted unlawfully." *Id.* (citing *Twombly, 550 U.S. at 556*). However, this "flexible 'plausibility standard'" is not a heightened pleading standard, *In re Elevator Antitrust Litig., 502 F.3d 47, 50, 50 n.3 (2d Cir. 2007)* (quoting *ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 n.2 (2d Cir. 2007))*, and "a complaint . . . does not need detailed factual allegations" to survive a motion to dismiss, *Twombly, 550 U.S. at 555*.

The question on a motion to dismiss "is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Sikhs for Justice v. Nath, 893 F. Supp. 2d 598, 615 (S.D.N.Y.*

---

[2] The named plaintiffs are the Alaska Department of Revenue, Treasury Division, the Alaska Permanent Fund Corporation, and Iron Workers Pension Plan of Western Pennsylvania ("Iron Workers") (collectively, "Plaintiffs"). Doc. 506.

[3] Barclays Capital Inc., BNP Paribas Securities Corp., Citigroup Inc., Citibank N.A., Citigroup Global Markets Inc., Credit Suisse Securities (USA) LLC, Nomura Securities International, Inc., RBC Capital Markets, LLC, and TD Securities (USA) LLC (together, the "Domestic Dealer Defendants"). *Id.*

[4] Barclays Bank PLC, Barclays Services Limited, Barclays Capital Securities Limited, BNP Paribas, Citigroup Global Markets Limited, Credit Agricole Corporate & Investment Bank, Credit Suisse AG, Credit Suisse International, Credit Suisse Securities (Europe) Ltd., Nomura International pic, Royal Bank of Canada, RBC Europe Limited, and The Toronto Dominion Bank (together, the "Foreign Dealer Defendants"). Doc. 521, 1 n. 1, 5.

[5] Gary McDonald (Doc. 533), Amandeep Singh Manku (Doc. 537), Shailen Pau (Doc. 540), and Bhardeep Singh Heer (Doc. 542) (together, the "Individual Defendants").

2012) (quoting Villager Pond, Inc. v. Town of Darien, 56 F.3d 375, 378 (2d Or. 1995)). "[T]he purpose of Federal Rule of Civil Procedure 12(b)(6) 'is to test, in a streamlined fashion, the **[*14]** formal sufficiency of the plaintiff's statement of a claim for relief without resolving a contest regarding its substantive merits'" or "weigh[ing] the evidence that might be offered to support it." Halebian v. Berv, 644 F.3d 122, 130 (2d Cir. 2011) (quoting Global Network Commc'ns, Inc. v. City of New York, 458 F.3d 150, 155 (2d Cir. 2006)). The Court therefore must ordinarily confine itself to the four comers of the complaint and look only to the allegations contained therein. *Id.* When ruling on a motion to dismiss pursuant to Rule 12(b)(6), the Court accepts all factual allegations in the complaint as true and draws all reasonable inferences in the plaintiff's favor, Nielsen v. Rabin, 746 F.3d 58, 62 (2d Cir. 2014); *see also* Twombly, 550 U.S. at 556 ("[A] well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable . . . .").

Likewise, "[t]here is no heightened pleading requirement in antitrust cases." In re Crude Oil Commodity Futures Litig., 913 F. Supp. 2d 41, 54 (S.D.N.Y. 2012). However, "a plaintiff must do more than cite relevant antitrust language to state a claim for relief." Wolf Concept S.A.R.L. v. Eber Bros. Wine & Liquor Corp., 736 F. Supp. 2d 661, 667 (W.D.N.Y. 2010) (citing Todd v. Exxon Corp,, 275 F.3d 191, 198 (2d Cir. 2001)). "A plaintiff must allege sufficient facts to support a cause of action under the antitrust laws. Conclusory allegations that the defendant violated those laws are insufficient." Id. at 667-68 (quoting Kasada, Inc. v. Access Capital, Inc., No. 01 Civ. 8893 (GBD), 2004 U.S. Dist. LEXIS 25257, 2004 WL 2903776, at *3 (S.D.N.Y. Dec. 14, 2004)). "[A] bare bones statement of conspiracy or of injury under the antitrust laws without any supporting facts permits dismissal." Id. at 668 (quoting Heart Disease Research Found, v. Gen. Motors Corp., 463 F.2d 98, 100 (2d Cir. 1972)).

B. [*15] Antitrust Standing

"Section 4 of the Clayton Act establishes a private right of action for violations of the federal antitrust laws," such as section 1 of the Sherman Act, and grants that right to "[a]ny person who [is] injured in his business or property by reason of anything forbidden in the antitrust laws." Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75 (2d Cir. 2013) (alterations in original) (quoting 15 U.S.C, § 15). The right to pursue private actions is limited by the concept of "antitrust standing." *Id.* "[A]ntitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement [the Court] must dismiss it as a matter of law." *Id.* (first alteration in original) (quoting NicSand, Inc. v. 3M Co., 507 F.3d 442, 450 (6th Cir. 2007) (en banc)). "In determining antitrust standing, [the Court] 'assume[s] the existence' of an antitrust violation." Total Gas, 889 F.3d at 115 (quoting Gelboim v. Bankof Am. Corp., 823 F.3d 759, 770 (2d Cir. 2016)).

"To satisfy the antitrust standing requirement, a private antitrust plaintiff must plausibly allege that (i) it suffered an antitrust injury and (ii) it is an acceptable plaintiff to pursue the alleged antitrust violations."[6] In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157 (2d Cir. 2016). "To demonstrate antitrust injury, 'a plaintiff must show (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the **[*16]** statute.'"[7] Arista Records LLC v. Lime Grp. LLC, 532 F. Supp. 2d 556, 568 (S.D.N.Y. 2007) (quoting Blue Tree Hotels Inv. (Can.), Ltd. v. Starwood Hotels & Resorts Worldwide, Inc., 369 F.3d 212, 220 (2d Cir. 2004)), "[T]o suffer antitrust injury, the putative plaintiff must be a participant in the very market that is directly restrained." Aluminum, 833 F.3d at 161. "[U]nlike [government] agencies, [private] [p]laintiffs do not have the right to bring suit against any person they reasonably suspect has committed a certain sort of wrong. . . . Plaintiffs can only recover in a civil action if they can establish that *they themselves* have been harmed by [d]efendants' activities," Total Gas, 889 F.3d at 109-10 (emphasis added).

---

[6] The suitability of the plaintiff is often described as whether the plaintiff is an "efficient enforcer" of the antitrust laws. Aluminum, 833 F.3d at 157-58.

[7] "While some courts speak of 'antitrust injury' comprehensively to include" all three of these elements, the third element specifically is sometimes referred to as "antitrust injury." 2A Phillip E. Areeda, Herbert Hovenkamp, et al., ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 337a, at 99-100 (4th ed. 2014),

III. Discussion

A. Plaintiffs Lack Antitrust Standing

Defendants brought this motion to dismiss for failure to state a claim, which in antitrust actions, involves an inquiry into whether plaintiffs have the right to pursue this private action. Doc. 520; *see also* *Gatt Commc'ns, 711 F.3d at 75* (holding antitrust standing is threshold inquiry and if complaint fails to establish this requirement, courts must di smiss it as matter of law). The law is clear that in antitrust conspiracy cases, plaintiffs must show that they have antitrust standing by plausibly alleging that they were a participant in the market defendants sought to restrain and suffered an antitrust injury **[*17]** as a result of the defendants' alleged violations. *See* *15 U.S.C. § 12*; *Aluminum, 833 F.3d at 157*.

Here, Plaintiffs allege that they bought and sold USD SSA bonds from the Dealer Defendants, however they do not plausibly plead that they suffered antitrust harm. Doc. 506 ¶¶ 36-41. Fatally, Plaintiffs have not plead to a single transaction that leads to a plausible inference that they suffered antitrust harm. Rather they make conclusory allegations that Defendants, like Barclays Capital Inc., "executed collusive USD SSA bond trades with Plaintiffs Alaska Department of Revenue, Alaska Department Fund Corporation, and Iron Workers during the Class Period." *See, e.g., id.* ¶¶ 54, 68 77, 88, 99. Plaintiffs can only bring a civil action for injuries that they establish they themselves suffered and Plaintiffs have not met that burden here. *See* *Total Gas, 889 F.3d at 109-10*.

The closest that Plaintiffs come to making such an allegation is when they highlight [TEXT REDACTED BY THE COURT][8]

Plaintiffs identify the harm suffered as the fact that the transaction was priced at an artificially high level because of the reduced market competition among dealers. [TEXT REDACTED BY THE COURT]

While the exchange of price information among competitors is not a *Sherman Act* violation **[*18]** *per se*—a number of factors are involved in determining whether the exchange had anticompetitive effects, i.e. the industry structure and nature of the information exchanged—exchanges of *current* price information have the greatest potential of creating anticompetitive effects and have consistently been held to violate the *Sherman Act*. *See, e.g.,* *United States v. U.S. Gypsum Co., 438 U.S. 422, 441 n.16, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)* (citations omitted).

Generally, when a consumer, because of a conspiracy, pays prices that do not reflect ordinary market conditions, they suffer injury of the type the antitrust laws intended to prevent and that flows from that which makes defendants' acts unlawful. *Sonterra Capital Master Fund Ltd. v. Credit Suisse Grp. AG, 277 F. Supp. 3d 521, 557-58 (S.D.N.Y. 2017)* (citing *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 772 (2d Cir. 2016))*. In one case, plaintiffs were found to have sufficiently alleged a legally cognizable injury where several department stores agreed among themselves to price products, as opposed to letting market competition determine prices, resulting in excessive pricing of the product. *In re Nine W. Shoes Antitrust Litig., 80 F. Supp. 2d 181, 190 (S.D.N.Y. 2000)*.

The Court accepts as true the allegation that [TEXT REDACTED BY THE COURT]

The Court does not have sufficient facts to plausibly infer that any of the Domestic Dealer Defendants involved [TEXT REDACTED BY THE COURT] were conspiring to fix prices and distort the USD SSA bond market. It is "harder to infer **[*19]** a conspiracy from individual acts of trader-based manipulation because large financial institutions are both buyers and sellers of derivative products, and thus any changes may well offset each other." *Sonterra, 277 F. Supp. 3d at 555*. Furthermore, the pleading is insufficient because Plaintiffs do not identify which of the [TEXT REDACTED BY THE COURT] entities was involved in the trade—[TEXT REDACTED BY THE COURT] Allegations in the form of group pleadings are insufficient, even for affiliated corporate entities. *See* *In re Zinc*

---

[8] [TEXT REDACTED BY THE COURT]

Antitrust Litig., 155 F. Supp. 3d 337, 384 (S.D.N.Y. 2016). In sum, Plaintiffs have not sufficiently plead they have antitrust standing.

i. Supplemental Authority

On October 18, 2019, Plaintiffs urged the Court to consider a supplemental authority in further opposition to the remaining Domestic Defendants' motion to dismiss for failure to state a claim: *In re GSE Bonds Antitrust Litigation, No. 1:19-cv-01704, Doc. 288, 2019 U.S. Dist. LEXIS 181012 (S.D.N.Y. Oct. 15, 2019)* ("*GSE II*"). Doc. 629, 1. Plaintiffs asked the Court to consider the plausibility of the overarching conspiracy they allege in connection to Defendants' argument that Plaintiffs lack antitrust standing. *Id.* at 3. However, as the ruling in *GSE II* had nothing to do with antitrust standing, the Court is unable to do so. The Court notes **[*20]** that the first *GSE* case does discuss antitrust standing. *See In re GSE Bonds Antitrust Litigation, 396 F. Supp. 3d 354, 366 (S.D.N.Y. Aug. 29, 2019)* ("*GSE I*") (holding plaintiffs proved antitrust standing after they plausibly alleged conspiracy and traded bonds directly with several defendants during class period). But as will be discussed in more detail *infra* in Part III(B), Plaintiffs have not plausibly alleged a conspiracy as to the Domestic Dealer Defendants.

The *GSE II* Court's ruling is also inapposite because it was based on distinctive features of the alleged market for government-sponsored entity ("GSE") bonds that are easily distinguishable from the SSA bonds market that Plaintiffs allege here. Doc. 632, 1. First, GSE bonds have a benchmark rate that the defendants allegedly manipulated but SSA bonds do not. *See GSE I, 396 F. Supp. 3d at 359*. Here, the pleadings do not point to a mechanism by which traders could control the SSA bond price benchmark: U.S. Treasury bonds. Doc. 506 ¶ 125. In a prior briefing, Plaintiffs explicitly stated that they "do not allege that Defendants specifically manipulated the price of every USD SSA bond traded in the market, whether through a financial benchmark or otherwise," but rather that there was an agreement among Defendants to not compete against each **[*21]** other in the market for USD SSA bonds. Doc. 407, 37-38.

Also, as the Court noted in its October 4, 2019 Order, "[t]he nature of the SSA bond market differs from that of the GSE bond market in one crucial way: SSA bonds are quoted on an individual and not systemic basis." Doc. 627, 25. SSA bond quotes were exchanged over-the-counter based on highly customized market information about specific investors, such as which bonds the investors held and in what quantity, whether the investor was an ongoing seller or buyer of certain bonds, and price levels at which the investor had traded or was seeking to trade. Doc. 506 ¶ 135.

Lastly, the extent to which the *GSE* defendants were alleged to have controlled the relevant market is markedly different than in this ease. Doc. 632, 2. The *GSE* defendants were alleged to have traded about 77% of all GSE bonds issued during the class period, pointing to a market-wide conspiracy. *GSE I, 396 F. Supp. 3d at 357-58, 362*. Here, Plaintiffs estimated that the Dealer Defendants controlled as much as 60% of the SSA bond market, but this percentage only relates to the Defendants' underwriting of SSA bonds in the primary market, Doc. 506 ¶ 505. Without supporting facts, the Court cannot assess what **[*22]** percentage of the secondary USD SSA bond market the Dealer Defendants traded. Accordingly, the supplemental authority is not persuasive in this case.

B. The Alleged Conspiracy Is Not Plausible

Plaintiffs have not adequately plead sufficient facts in the SAC to plausibly allege a conspiracy that includes any of the Domestic Dealer Defendants. Where an antitrust complaint names multiple defendants, plaintiffs must "make allegations that plausibly suggest that each defendant participated in the alleged conspiracy." *Hinds Cty., Miss. v Wachovia Bank N.A., 620 F. Supp. 2d 499, 513 (S.D.N.Y. 2009)* (quotation marks and citation omitted); *see also Concord Assocs., L.P. v. Entm't Props. Tr., No. 12 Civ. 1667 (ER), 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *23 (S.D.N.Y. Apr. 9, 2014)*, *aff'd*, *817 F.3d 46 (2d Cir. 2016)* (same). In antitrust conspiracy cases, defendants are entitled to know how they are alleged to have conspired, with whom, and for what purpose. *Id.* (citing *Zinc, 155 F. Supp. 3d at 384*). Plaintiffs have not met that burden here.

As the Domestic Dealer Defendants allege, Plaintiffs failed to cure their improper group pleading when they amended the CAC—they continue to make undifferentiated allegations against all defendants and tie together corporate affiliates without justification. Doc, 525. *See* Zinc Antitrust Litig., 155 F. Supp. 3d at 384 (holding allegations in form of a group pleading are insufficient, even for affiliated corporate entities), For example, Plaintiffs allege that Barclays **[*23]** Capital Inc. was the "Barclays Defendants' U.S.-based broker-dealer" and took directions from its overseas counterparts, served as their counterparty in most transactions, and knowingly executed collusive USD SSA bond transactions with Plaintiffs during the Class Period, Doc. 578, 80 (citing Doc. 506 ¶ 54). Allegedly, Barclays Capital Inc. also employed U.S.-based salespeople and traders who engaged in collusive trades with U.S, customers. *Id.* However, Plaintiffs do not allege any facts that show a single instance of Barclays Capital Inc. coordinating bidding, engaging in price-fixing, agreeing not to compete, etc. Doc. 603, 1.

Plaintiffs make nearly identical conclusory allegations of taking directions from their overseas counterparts to manipulate SSA bond trades with U.S. counterparties against all of the Domestic Dealer Defendants: BNP Paribas Securities Corp., Doc. 578, 84-85 (citing SAC); Citigroup, Inc., *id.* at 87; Citibank N.A., *id.*; Citigroup Global Markets Inc., *id*; RBC Capital Markets, LLC, *id.* at 98; Credit Suisse Securities (USA) LLC, *id.* at 99; Nomura Securities International, Inc., *id.* at 103; and TD Securities (USA) LLC, *id.* at 117. Plaintiffs argue that they need not show that a particular Defendant knew all of **[*24]** the details of the conspiracy or even prove that they knew the identities of all the other conspirators. *Id.* at 78. Rather, a single act may be sufficient for an inference of a Defendant's involvement in a conspiracy. *Id.* (citing United States v. Huezo, 546 F.3d 174, 180 (2d Cir. 2008)).

However, the closest Plaintiffs come to making specific allegations against any Domestic Dealer Defendant is when they allege that Citigroup, Inc. and Citibank N.A. participated in the conspiracy through the same Individual Defendant, Gary McDonald ("McDonald"), within the Class Period. Doc. 578, 86. Plaintiffs assert that McDonald [TEXT REDACTED BY THE COURT] *Id.* at 86-87. *See, e.g.*, [TEXT REDACTED BY THE COURT][9]

While these transactions hint at anticompetitive conduct between [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT], they do not involve any specific Plaintiff, which is required in antitrust cases, or point to a wider conspiracy that extends beyond these traders to the Domestic Dealer Defendants. A barebones statement of conspiracy without supporting facts is not enough to survive a motion to dismiss. *See* Wolf Concept, 736 F. Supp. 2d at 668. Accordingly, the Court finds that Plaintiffs have not sufficiently plead that they have antitrust standing or facts that support a plausible conspiracy. **[*25]**

IV. Conclusion

The Domestic Dealer Defendants' motion to dismiss for failure to state a claim is GRANTED with prejudice. For the reasons set forth in the October 4, 2019 Order, Doe. 627, and the instant Order, the Clerk of Court is respectfully directed to terminate the Domestic Dealer Defendants, Foreign Dealer Defendants, and Individual Defendants as parties.[10] *See supra* notes 3-5.

It is SO ORDERED.

Dated: March 18, 2020

New York, New York

/s/ Edgardo Ramos

---

[9] [TEXT REDACTED BY THE COURT]

[10] The Court notes that some Defendants, such as Bank of America, Deutsche Bank, and HSBC Defendants, are currently in settlement negotiations with Plaintiffs and thus the case remains active. *See, e.g.*, Doc. 636 (letter from Plaintiffs advising Court that settlement negotiations are ongoing).
