Liggett's antitrust claim is a private, primary-line, [16] non-geographic [17] Robinson-Patman Act suit. Except for the issue of price discrimination, the jurisdictional elements are undisputed. [18] ***HN5***[] Despite the connotations of the term "discrimination," there is nothing illegal *per se* about a company discriminating in price. Price discrimination means price difference and nothing more. *See* *Texaco Inc. v. Hasbrouck, 496 U.S. 543, 110 S. Ct. 2535, 2544, 110 L. Ed. 2d 492 (1990)*. B & W discriminated in price by charging different net prices [19] **[**13]** to different purchasers via volume **[*351]** rebates in actual black and white cigarette transactions. The other elements [20] -- competitive injury, causation, and antitrust injury -- have been vigorously contested throughout the entire **[**12]** litigation. The court believes that Liggett's evidence falls short in each of these categories.

---

[13] B & W's published volume rebates from mid-1984 to the end of 1985 ranged from sixty to eighty cents per carton depending on the number of cartons a customer bought from the company. B & W's rebate schedule on a per carton basis was as follows: 60 cent rebate for customers who bought 0-499 cases per quarter; 65 cent rebate for customers who bought 500-999 cases per quarter; 70 cent rebate for customers who bought 1,000-1,499 cases per quarter; 75 cent rebate for customers who bought 1,500-7,999 cases per quarter; and 80 cent rebate for customers who bought 8,000 or more cases per quarter.

[14] Lorillard is the only major cigarette manufacturer without a significant presence in the generic cigarette segment.

[15] Coupons are a form of price competition in which money-off vouchers on cigarette cartons and packs are distributed to consumers through newspapers and other mediums. Stickering is a form of price competition in which money-off stickers are attached to cigarette cartons, and sometimes even individual packs. Although the list price of couponed and stickered cigarettes does not change, the amount of money the consumer has to pay at the cash register is lessened by the value of the coupon or sticker.

[16] In Robinson-Patman Act cases, courts distinguish the probable impact of the price discrimination upon competitors of the seller (primary-line injury), the favored and disfavored buyers (secondary-line injury), or the customers of either of them (tertiary-line injury). *See* 3 E. Kintner & J. Bauer, *Federal* ***Antitrust Law*** § 20.9, at 127 (1983).

[17] Non-geographic means that the United States is the relevant market as opposed to any particular city, state, or region.

[18] The parties do not dispute that at least one of the sales of B & W black and white cigarettes was made across a state line; that each pertinent sale of B & W black and white cigarettes was for use and resale in the United States; that the black and white cigarettes sold by B & W were physical items; that the black and white cigarette sales being compared were made by B & W at about the same time; and that the B & W black and white cigarettes involved in the sales being compared were of like grade and quality.

[19] Net price equals list price minus all discounts to the customer.

[20] ***HN6***[] Antitrust injury is a requirement in all antitrust actions for monetary damages brought by private parties. *15 U.S.C. § 15(a)*. The other elements of Liggett's claim are part of the Robinson-Patman Act. *15 U.S.C. § 13(a)*.

A. *Competitive Injury*

HN7[] The Robinson-Patman Act prohibits only price discrimination the effect of which "may be substantially to lessen competition." *15 U.S.C. § 13(a)*. This statutory language has been interpreted to proscribe only that price discrimination which has a reasonable possibility [21] of injuring competition in the relevant market. *Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 434-35, 75 L. Ed. 2d 174, 103 S. Ct. 1282 (1983)*. Prior to trial, the parties stipulated that the relevant market in which to examine competitive injury was the entire United States cigarette market. Therefore, Liggett must prove that B & W's price discrimination in the sale of its black and white cigarettes had a reasonable possibility of injuring competition in the United States cigarette market as a whole.

HN8[]

[14]** The competitive injury requirement of the Robinson-Patman Act in the context of this primary-line, non-geographic claim is not fundamentally different from an attempted monopolization claim under *Section 2* of the Sherman Act. *15 U.S.C. § 2*. Of course, the standards to evaluate competitive injury are different. The Robinson-Patman Act requires a showing of reasonable possibility of injury to competition while the Sherman Act requires a dangerous probability that the attempt to monopolize will be successful. *See Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1413 (7th Cir. 1989)*. However, this difference affects only the quantum of proof needed to satisfy the respective statute's competitive injury requirements and not the type of evidence which furnishes that proof. [22] ***HN9***[] In the present case, the court believes that such evidence must consist of predatory pricing practices indicating a reasonable possibility of injury to competition and consumer welfare rather than evidence merely of injury to a competitor combined with bad intent. Absent some objective economic ability to injure competition conduct cannot be illegal no matter what the intent. *See Matsushita Elec.* ***[**15]*** *Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588-93, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*; *Henry v. Chloride, Inc., 809 F.2d 1334, 1344-45 (8th Cir. 1987)*.

Liggett fundamentally disagreed with this position at trial and argued numerous times, citing *Utah Pie Co. v. Continental Baking Co., 386 U.S. 685, 87 S. Ct. 1326, 18 L. Ed. 2d 406 (1967)*, that some showing of injury to a competitor combined with bad intent satisfied the Robinson-Patman Act's competitive injury requirement. This court rejects **[**16]** that position in the context of Liggett's atypical primary-line, non-geographic Robinson-Patman Act claim.

[*352] The typical primary-line Robinson-Patman Act case is much different from this one, pitting a small business with a limited product-line which competes only in a single geographic region against a large national manufacturer using predatory pricing tactics to displace the local competitor. *Utah Pie* is just such a case. In *Utah Pie*, several national manufacturers of frozen dessert pies challenged a small, family-operated dessert manufacturer which sold pies in the Salt Lake City area. The national manufacturers' strategy was to lower prices below cost on dessert pies in Salt Lake City, 386 U.S. at 696-97 & n. 12, 698, 701, and run the local competitor out of business. The national manufacturers could afford to do this due to profits obtained on the sale of dessert pies in other areas of the

---

[21] A few courts have used a reasonable probability of injuring competition standard instead of reasonable possibility. *See, e.g., Holleb & Co. v. Produce Terminal Cold Storage Co., 532 F.2d 29, 35 (7th Cir. 1976)*. This is a distinction of form over substance. *See International Air Indus., Inc. v. American Excelsior Co., 517 F.2d 714, 729 (5th Cir. 1975)* ("any difference between the two formulations is trivial"), *cert. denied*, ***424 U.S. 943, 47 L. Ed. 2d 349, 96 S. Ct. 1411 (1976)***. The Supreme Court in at least one case has used these standards interchangeably. *See Corn Prods. Refining Co. v. FTC, 324 U.S. 726, 739, 742, 89 L. Ed. 1320, 65 S. Ct. 961 (1945)*.

[22] A noted authority explained the parallel competitive injury requirements of the two statutes this way:

> Once a price is shown to be below the relevant costs its effect may be substantially to lessen competition, and it is condemned precisely because it has the potential to destroy competition and, if continued, the dangerous probability of doing so. If the price does not violate the relevant predatory pricing standard, it cannot tend to lessen competition or to have the dangerous probability of doing so.

P. Areeda & H. Hovenkamp, ***Antitrust Law*** 720, at 618 (Supp. 1989).

country. The local competitor could sell dessert pies only in Salt Lake City and was faced with the bleak prospect of either lowering prices to unprofitable levels or eventually losing its sales to the low-priced pies. It was in this factual setting that the Supreme Court last addressed **[**17]** the requirements of a primary-line Robinson-Patman Act claim.

Liggett's situation is much different. Liggett, as a national manufacturer of branded and generic cigarettes, is free to compete with B & W in any area of the country over any line of cigarette products and in fact does so. It faces none of the competitive constraints of the local business in *Utah Pie*. [23] **[**18]** In primary-line, non-geographic, predatory pricing cases the Robinson-Patman Act's competitive injury analysis more closely mirrors *Section 2* of the Sherman Act than *Utah Pie*. Whether brought under the Sherman Act or the Robinson-Patman Act, predatory pricing is predatory pricing. [24] After all, price cutting is the essence of any predatory pricing campaign and, as the Supreme Court has warned, "mistaken inferences in cases such as this one are especially costly, because they chill the very conduct the antitrust laws are designed to protect." *Matsushita, 475 U.S. at 594*. Although the Fourth Circuit has not addressed this issue, many other circuits have held that the competitive injury analysis in a predatory pricing case is the same under either the Robinson-Patman Act or *Section 2* of the Sherman Act. [25]

[19]** That this interpretation of the competitive injury requirement has been widely followed is not surprising since it best comports with basic antitrust principles. The antitrust laws' goal is to promote consumer welfare, not to discourage aggressive price competition. Liggett cannot satisfy the competitive injury requirement by showing simply that it was injured by B & W's price discrimination. Injury to competition occurs only if a competitor is able to raise and maintain prices in the relevant market above competitive levels because this is the only situation where consumer welfare is threatened. So, in order to injure competition via price discrimination in the United **[*353]** States cigarette market, B & W must be able to create a real possibility of both driving out rivals by loss-creating price cutting and then holding on to that advantage to recoup losses by raising and maintaining prices at higher than competitive levels. *See* *Matsushita, 475 U.S. at 589*.

With these principles in mind, there are fatal defects in both Liggett's theory and evidence of competitive injury. Liggett's theory of competitive injury was developed by its expert **[**20]** economist, William Burnett. Burnett concluded that B & W's predatory pricing of black and white cigarettes had a reasonable possibility of injuring competition in the entire United States cigarette market. He based his analysis on numerous B & W internal documents and his study of the structure and history of the cigarette industry. Burnett's theory is quite complicated and requires detailed explanation.

---

[23] Because the factual differences between geographic and non-geographic primary-line Robinson-Patman Act claims are so striking, the Third Circuit limited *Utah Pie's* competitive injury analysis to primary-line, geographic price discrimination cases. *O. Hommel Co. v. Ferro Corp., 659 F.2d 340, 351-52 (3d Cir. 1981)*, *cert. denied*, ***455 U.S. 1017, 72 L. Ed. 2d 134, 102 S. Ct. 1711 (1982)***.

[24] *See* P. Areeda & D. Turner, ***Antitrust Law*** 720, at 190 (1978) ("The basic substantive issues raised by the Robinson-Patman Act's concern with primary-line injury to competition and by the Sherman Act's concern with predatory pricing are identical.").

[25] *See* *McGahee v. Northern Propane Gas Co., 858 F.2d 1487, 1493 n. 9 (11th Cir. 1988)*, *cert. denied*, ***490 U.S. 1084, 109 S. Ct. 2110, 104 L. Ct. 234 (1977)***; *International Air, 517 F.2d at 720 n. 10*. *But see* *A.A. Poultry Farms, Inc. v. Rose Acre Farms, Inc., 881 F.2d 1396, 1404-06 (7th Cir. 1989)*, *cert. denied*, ***494 U.S. 1019, 110 S. Ct. 1326, 108 L. Ed. 2d 501 (1990)***; *Monahan's Marine, Inc. v. Boston Whaler, Inc., 866 F.2d 525, 528-29 (1st Cir. 1989)*.

Central to Burnett's analysis is that the cigarette market is a highly concentrated oligopoly [26] and that predatory pricing schemes make sense in such markets. The starting point for this analysis is Burnett's opinion that all of the manufacturers in the cigarette industry, including Liggett, enjoy monopoly profits on the sale of their branded cigarettes. He bases this opinion on six factors: (1) the degree of concentration in the domestic cigarette industry; (2) the long-time industry pattern of list-price uniformity and price leadership -- that is, when one manufacturer raises the price of its branded cigarette line the others follow and raise their prices to the same level; (3) the relative price inelasticity [27] of cigarette demand; (4) the significant barriers to entry, including **[**21]** large capital costs and the television advertising ban, which prevent new companies from competing with the major cigarette manufacturers; (5) an analysis of the relationship between cigarette prices and costs which concluded that prices have risen in the industry during a period of declining costs; and (6) the degree to which tobacco industry accounting rates of return exceed those of companies in the domestic food and kindred products industry. Burnett thought this industry structure made it possible for the major cigarette manufacturers to tacitly coordinate [28] their prices at supracompetitive levels.

[22]** According to Burnett, B & W engaged in a campaign of predatory pricing against Liggett's black and white cigarettes to protect its monopoly profits on branded cigarettes. Burnett alleged that B & W had great economic incentive to wage such a predatory campaign. His analysis was based on the following factors. First, consumer demand for cigarettes in the United States market was no longer growing and, due to health concerns, was unlikely to grow in the future. Thus, a cigarette manufacturer could increase its market share only at the expense of a rival competitor by getting existing cigarette consumers to switch their brand loyalty. Second, Liggett was a maverick -- that is, Liggett was the only major cigarette manufacturer willing to compete for consumers by offering lower prices. Liggett was not worried about its black and white cigarettes cannibalizing its monopoly profits on branded cigarettes because its branded market share was so low. Third, B & W was hurt by Liggett's entry into generic cigarettes more than the other major manufacturers. On a percentage basis, significantly more B & W branded smokers **[**23]** were switching to Liggett generics than were smokers of brands of other manufacturers. As a result, B & W's market share and its alleged **[*354]** monopoly profits were eroding quickly. This erosion gave B & W its incentive to predate.

Burnett testified that B & W came up with an ingenious scheme to kill the generic category and stop losing market share. This alleged scheme is as follows. B & W entered the generic cigarette segment by offering a look-alike black and white package designed to confuse Liggett's existing generic smokers. B & W did not want to fuel consumer demand for generic cigarettes so it focused exclusively on establishing its new business at the wholesale level. B & W captured wholesaler loyalty through significant volume rebates, targeting Liggett's highest volume customers. These rebates made the price of black and white cigarettes to wholesalers well below B & W's average variable cost. [29] B & W encouraged the wholesalers to pocket these rebates instead of passing the savings on to consumers to prevent any new demand for black and white cigarettes.

---

[26] Oligopoly is the economic term for a market in which few producers are present. There is nothing illegal *per se* about an oligopoly.

[27] Elasticity means the responsiveness of a dependent variable to changes in a causal factor. Burnett looked at what happened to consumer demand in the cigarette industry when prices rose. He concluded that demand for cigarettes was inelastic because consumer demand did not decrease very much despite steadily rising prices.

[28] Burnett does not contend that the major cigarette manufacturers overtly engaged in price-fixing in a smoke-filled room. Instead, he believes the major manufacturers silently agreed that price uniformity was in their best interests and, therefore, priced in lock-step fashion.

[29] Average variable cost equals the sum of all the variable costs divided by output. For a manufacturing firm such as a cigarette company, costs are divided into two categories -- fixed and variable. Variable costs fluctuate with a firm's output while fixed costs are independent of output. Variable costs typically include items such as materials, fuel, labor, maintenance, licensing fees, and depreciation occasioned by use. Fixed costs generally include management expenses, overhead, interest on debt, and depreciation occasioned by obsolescence. A price below average variable cost causes a manufacturer to lose money on each unit of output of the product.

[24]** According to Burnett, B & W's plan was a "win-win/lose-lose" strategy of predation since no matter what Liggett did in response B & W's plan would be successful. Because Liggett had limited financial resources, if it matched B & W's rebates it would have to cut back on its black and white consumer promotional campaign. This cutback in consumer advertising would slow the growth of the generic category and eventually, without advertising, demand for generic cigarettes would decline. If Liggett refused to offer rebates or offered less lucrative deals, its wholesale customers would abandon it in favor of B & W, preventing Liggett from getting its product to the consumer. In a few years, B & W could control prices in the generic cigarette category. Then it would narrow the price gap between branded and generic cigarettes. Price stimulated consumer demand for black and white cigarettes. By raising generic prices, B & W would decrease the relative savings on black and white cigarettes, thus cutting off consumer demand.

Although predatory pricing schemes are typically very costly due to below-cost pricing, Burnett thought B & W's plan was the exception because of simultaneous recoupment. [30] By entering **[**25]** the generic market in the above fashion, according to Burnett, B & W slowed the growth of the generic cigarette segment and thereby slowed the rate at which B & W branded smokers switched to generics. Thus, B & W recovered predatory losses immediately by slowing the loss of sales of its branded cigarettes sold at monopoly prices.

Burnett's theory is buttressed by numerous B & W documents written by top executives. These documents, indicating B & W's anticompetitive intent, are more voluminous and detailed than any other reported case. This evidence not only indicates B & W wanted to injure Liggett, it also details an extensive plan to slow the growth of the generic cigarette segment. [31]

[26]** However, despite Burnett's complicated theory and the extensive documentary evidence, Liggett still has not satisfied the competitive injury requirement of the Robinson-Patman Act with any substantial evidence. As a matter of law, B & W could not have had a reasonable possibility of injuring competition unless at the very least it had the realistic prospect of obtaining market power over the generic segment **[*355]** of the market [32] **[**27]** and an economically plausible way to recoup its losses. [33]

HN11[] Market power is "the ability to raise prices above levels that would exist in a perfectly competitive market." *Consul, Ltd. v. Transco Energy Co., 805 F.2d 490, 495 (4th Cir. 1986)*, *cert. denied*, *481 U.S. 1050, 95 L. Ed. 2d 838, 107 S. Ct. 2182 (1987)*. Without the power to control market prices, a firm that raises the price of a product cannot maintain that increase because other firms will offer consumers lower prices, thereby forcing the price-

30 Burnett's only theory of recoupment was simultaneous recoupment. He did not contend that B & W's recoupment would come by raising the price of generic cigarettes.

31 Issues of corporate ethics and morality, or the lack thereof, are not appropriate subjects for consideration by the court unless they are also violative of the antitrust, trademark, and unfair competition claims alleged.

32 Many circuits have held that the competitive injury requirement of the Robinson-Patman Act cannot be satisfied unless the alleged predator has at least a reasonable prospect of obtaining market power. *See* *Stitt Spark Plug Co. v. Champion Spark Plug Co., 840 F.2d 1253, 1255-56* (5th Cir.), *cert. denied*, ***488 U.S. 890, 109 S. Ct. 224, 102 L. Ed. 2d 214 (1988)***; *Henry, 809 F.2d at 1345*; *D. E. Rogers, 718 F.2d at 1436* (quoting *Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 823* [6th Cir. 1982]); *O. Hommel, 659 F.2d at 348*; *Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 856 (9th Cir. 1977)*, *cert. denied*, ***439 U.S. 829, 58 L. Ed. 2d 122, 99 S. Ct. 103 (1978)***; *Pacific Eng'g, 551 F.2d at 798*. A few circuits have been hesitant to apply the market power concept to the Robinson-Patman Act, but this hesitance has always been in the context of geographic price discrimination claims factually distinct from the non-geographic claim alleged here. *See* *A.A. Poultry Farms, 881 F.2d at 1404-05*; *John B. Hull, Inc. v. Waterbury Petroleum Prods., Inc., 588 F.2d 24, 28 (2d Cir. 1978)*, *cert. denied*, ***440 U.S. 960, 99 S. Ct. 1502, 59 L. Ed. 2d 773 (1979)***; *Lloyd A. Fry Roofing Co. v. FTC, 371 F.2d 277, 284-85 (7th Cir. 1966)*. Most importantly, the Supreme Court has indicated that ***HN10***[] "the success of any predatory scheme depends on maintaining monopoly power for long enough both to recoup the predator's losses and to harvest some additional gain." *Matsushita, 475 U.S. at 589*.

33 For a predatory pricing scheme to injure competition the predator must be able not only to recover its initial losses but also harvest some additional gain. *Matsushita, 475 U.S. at 588-89*. This additional gain is called recoupment, and it is only at the recoupment stage that consumer welfare is injured.

raising firm either to lower prices or lose sales. *See* [*Matsushita, 475 U.S. at 590-91*] ("petitioners must obtain enough market power to set higher than competitive prices, and then must sustain those prices long enough to earn in excess profits what they earlier gave up in below-cost prices"). An avowed predator with no prospect of controlling prices is a paper tiger unable **[**28]** to harm consumer welfare. Burnett's theory illustrates this point. According to Burnett, for B & W's scheme to succeed it had to raise generic cigarette prices above competitive levels; otherwise, it could not narrow the price gap between branded and generic cigarettes. Without a narrowing of this gap there is no incentive for generic consumers to switch back to their old brands, and B & W's alleged scheme necessarily fails.

With at most twelve per cent (12%) of the domestic cigarette market, B & W as a matter of law could not exercise market power unilaterally in either the whole cigarette market or the generic segment. *See* *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 119 n. 15, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. Even Burnett conceded this point, admitting that acting alone B & W could not injure consumer welfare by narrowing the price gap between branded and generic cigarettes. However, Burnett argued B & W was not acting unilaterally due to tacit collusion -- that is, silent price coordination -- among the major manufacturers regarding branded prices. According to Burnett, this tacit collusion effectively gave B & W upwards of ninety-five per cent (95%) of the cigarette market.

Tacit collusion among the **[**29]** major cigarette manufacturers is a dubious theory of market power. In typical cases, market power analysis is straightforward and hinges on whether a company has a large enough market share to control prices in the relevant market. Under this traditional analysis, a company with twelve per cent (12%) of the market cannot have market power. [34] **[*356]** Burnett theorizes, however, that even a relatively small company like B & W can exercise shared market power through tacit collusion with the other major cigarette manufacturers save Liggett. Liggett cites no Robinson-Patman Act or Sherman Act legal precedent which supports this theory of shared market power via tacit collusion. By contrast, the shared market power theory has been rejected several times in the Sherman Act context. *See* *H. L. Hayden Co. v. Siemens Medical Sys., Inc., 879 F.2d 1005, 1018 (2d Cir. 1989)*; *Consolidated Terminal Sys., Inc. v. ITT World Communications, Inc., 535 F. Supp. 225, 228-29 (S.D.N.Y. 1982)*; *In re Kellogg Co., 99 F.T.C. 8, 260 (1982)*. Furthermore, one circuit court considering a *Section 2* Sherman Act claim frankly acknowledged that there is "no case support" for the shared monopoly theory. *Harkins **[**30]** Amusement Enters., Inc. v. General Cinema Corp., 850 F.2d 477, 490 (9th Cir. 1988)*, *cert. denied*, *488 U.S. 1019, 109 S. Ct. 817, 102 L. Ed. 2d 806 (1989)*. Finally, a leading antitrust authority has noted that the scenario for predatory pricing by a firm possessing a small share of the market is "highly speculative" and "presses the potential for tacit price coordination very far." P. Areeda & H. Hovenkamp, ***Antitrust Law*** 711.2c, at 538-39 (Supp. 1989).

Although there is little legal precedent supporting Burnett's shared **[**31]** market power theory, in rejecting it the court need not rule that this theory is insufficient as a matter of law. The only record evidence supporting such a theory was Burnett's opinion testimony which was contradicted by witnesses from the Liggett boardroom. Liggett's most senior executives, including the president of the company, K.V. Dye, unequivocally testified at trial that there was no tacit collusion on branded cigarette pricing decisions, that the cigarette industry has never been a collusive oligopoly, and that the industry does not reap excessive profits.

Liggett seeks to explain this obvious problem by arguing that the decision-makers at Liggett are not economists and do not understand economic terms such as oligopoly, tacit collusion, and monopoly profits. This argument was considered at the summary judgment stage since these executives gave basically the same testimony at their depositions. The court allowed the case to go to trial in part because the Liggett executives were not economists and in part because of affidavits from the Liggett executives stating that they were confused by the questions asked by B & W lawyers and did not mean to contradict the testimony of **[**32]** Burnett. However, at trial, despite having

---

[34] *See, e.g.,* *United Air Lines, Inc. v. Austin Travel Corp., 867 F.2d 737, 742 (2d Cir. 1989)* (no market power with 10% of the local market and 31% of the national market); *Rutman Wine Co. v. E & J Gallo Winery, 829 F.2d 729, 736 (9th Cir. 1987)* (no market power with about 33% of the national market and 25% of the local market); *Pennsylvania Dental Ass'n v. Medical Serv. Ass'n, 745 F.2d 248, 261 (3d Cir. 1984)* (no market power with 32-35% of the relevant market), *cert. denied*, ***471 U.S. 1016, 85 L. Ed. 2d 303, 105 S. Ct. 2021 (1985)***.

consulted extensively with Burnett and having had adequate time to familiarize themselves with concepts such as tacit collusion, oligopoly, and monopoly profits, these Liggett executives again contradicted Burnett's theory. The court realizes that at the JNOV stage all reasonable inferences must be given to Liggett, the non-moving party. However, Burnett's expert opinion testimony on these issues cannot be considered substantial evidence sufficient to survive B & W's JNOV motion in light of unequivocal and contradictory trial testimony from the senior executives at Liggett who made the pricing decisions. *See* Newman v. Hy-Way Heat Sys., Inc., 789 F.2d 269, 270 (4th Cir. 1976) (experts may not "speculate in fashions unsupported by, and in this case indeed in contradiction of, the uncontroverted evidence in the case"); Selle v. Gibb, 567 F. Supp. 1173, 1182 (N.D.Ill. 1983) ("The law does not permit the oath of credible witnesses, testifying to matters within their knowledge, to be disregarded, particularly where lay persons give testimony contradicting existence of the ultimate fact to be inferred from the opinion of an expert."), **[**33]** *aff'd*, 741 F.2d 896 (7th Cir. 1984). [35]

[*357] Even if Burnett's opinion testimony on tacit collusion was uncontradicted, competition could not be injured by B & W unless it could raise generic cigarette prices, thereby narrowing the price gap between branded and generic cigarettes. Yet, even Burnett denied there was tacit collusion in the generic cigarette segment. Instead, his theory relied on the supposed motivations of the other major cigarette manufacturers. Burnett contended that there was an alignment of interest among these **[**34]** companies to protect their branded cigarette profits. Thus, they would not disrupt B & W's attempts to slow the growth of the generic segment. If no such alignment of interest existed and any of the other major cigarette manufacturers were interested in promoting the sale of generic cigarettes, even Burnett admitted that successful predation by B & W would be impossible.

No substantial record evidence supports Burnett's alignment of interest theory. Even before B & W began selling black and white cigarettes, RJR had entered the generic segment by repositioning Doral at generic prices. Burnett conceded that RJR had no anticompetitive intent and that Doral's entry expanded the generic segment. The evidence is uncontroverted that RJR's motive for selling generic cigarettes was to regain its number one position in the cigarette industry from Philip Morris. In order to do this, RJR had to sell a lot of generic cigarettes. Furthermore, there is no evidence that any of the other major cigarette companies had an interest in slowing the growth of generic cigarettes. Today, five of the six major manufacturers sell generic cigarettes in one form or another. Most importantly, in late 1985 B & W tried **[**35]** to raise the price of its generic cigarettes. Neither Liggett nor RJR followed with price increases, and B & W was forced to retract its price increase -- exactly what is supposed to happen when a company without market power unilaterally raises its price above competitive levels. Had there been an alignment of interest, RJR would have followed B & W's lead.

Not only is there no substantial evidence of market power, the testimony of Liggett's decision-makers that there were no monopoly profits obtained on branded cigarettes and that branded cigarette prices were fair to consumers totally undermines any plausible theory of economic recoupment for B & W. Without some likelihood of recoupment there is no reasonable possibility of injury to competition. Typically, recoupment happens after the predatory objective has been achieved and the predator has the ability to control prices. As explained earlier, Burnett's theory of simultaneous recoupment departed from this model. However, if there were no monopoly profits from branded cigarettes then B & W could not simultaneously recoup its losses from below-cost pricing.

Even apart from this testimony, there is another problem with Burnett's recoupment **[**36]** analysis. There is no substantial evidence in the record indicating that wholesalers would not promote the sale of generic cigarettes. Burnett's simultaneous recoupment theory depends on wholesalers pocketing B & W's volume rebates instead of promoting generic cigarettes; otherwise, there is no mechanism to slow the growth of the segment. Yet it makes no sense for wholesalers to pocket all of these rebates. Unlike branded cigarettes, there were no guarantees for wholesalers when they bought B & W's generic cigarettes. If the wholesalers did not sell all the generic cigarettes they bought, they were stuck with the product. B & W's volume rebates were lucrative to them only if they could sell

---

[35] *Accord* Miller v. FDIC, 906 F.2d 972, 975 (4th Cir. 1990) (plaintiff's contradictory testimony insufficient to create a genuine issue of fact); Townley v. Norfolk & W. Ry. Co., 887 F.2d 498, 501 (4th Cir. 1989) (a party may not create an issue of fact by contradicting own testimony); Barwick v. Celotex Corp., 736 F.2d 946, 960 (4th Cir. 1984) (a party examined at length on deposition cannot raise an issue of fact simply by submitting an affidavit contradicting the prior testimony).

their generic cigarette allotment; otherwise, they lost money. Therefore, there was no alignment of interest between B & W and the wholesalers with respect to generic cigarettes. To the extent that wholesalers wanted to sell generics to consumers, and the only record evidence at trial indicates that they did, B & W could not slow the growth of the category and consumer welfare could not be injured.

Similarly, ***HN12***[] documentary evidence alone is not substantial evidence sufficient to satisfy the competitive injury **[**37]** requirement of the Robinson-Patman Act absent some showing of market power and the possibility of recoupment. *See Henry, 809 **[*358]** F.2d at 1345*. A company with anticompetitive intent cannot injure consumers unless it has at least a reasonable possibility of obtaining market power and recouping its losses. B & W could not achieve either of these objectives and, therefore, it does not matter what the documents say concerning its hopes and plans.

Finally, Liggett did not provide any substantial evidence of actual injury to competition via market analysis. Obviously, without even the realistic prospect of obtaining market power it is impossible for a firm to actually injure competition since prices cannot be increased above competitive levels. Furthermore, even Liggett admits that the generic cigarette segment has grown. Five of the six major cigarette companies have significant entries in the generic category, and growth has increased from about four per cent (4%) when Liggett was alone in the segment to fifteen per cent (15%). The success of generic cigarettes has even encouraged some price competition on branded cigarettes. This court is aware of no Robinson-Patman Act verdict upheld solely **[**38]** on market analysis grounds. Liggett's market analysis evidence is not compelling enough for this court to become the first. [36]

[39]** B. *Causation*

HN13[] The Robinson-Patman Act is aimed only at price discrimination. Liggett must prove that the reasonable possibility of injury to competition was "the effect of" price discrimination, *15 U.S.C. § 13(a)*, in order to establish "the necessary causal relationship between the difference in prices and the alleged competitive injury." *Borden Co. v. FTC, 381 F.2d 175, 180 (5th Cir. 1967)*. [37]

In a typical primary-line Robinson-Patman Act case, the injury alleged is the result of geographic price discrimination. As the Supreme Court has explained, the Clayton Act, as amended by the Robinson-Patman Act, "was born of a desire by Congress to curb the use by financially powerful corporations **[**40]** of localized price-cutting tactics which had gravely impaired the competitive position of other sellers." *FTC v. Anheuser-Busch, Inc., 363 U.S. 536, 543, 4 L. Ed. 2d 1385, 80 S. Ct. 1267 (1960)* (footnote omitted). [38] Proof of causation is

---

[36] Much of Liggett's market analysis focuses on the steady decline of the market share of black and white cigarettes. This decline has not injured consumers because of the steady growth of branded generic cigarettes sold at the same price as black and white cigarettes. Overall, the generic segment has grown with consumers preferring branded generic cigarettes to black and white cigarettes. The rest of Liggett's market analysis is equally unconvincing. Liggett contends that B & W caused the price differential between branded and generic cigarettes to decrease. Yet, the percentage price differential has remained about thirty per cent (30%), and B & W quickly retracted the only generic cigarette price increase that it initiated because the competition did not follow. Liggett also alleges that B & W's pricing forced it to reduce its advertising, thereby slowing the segment. Still, the generic cigarette category continued to grow, fueled in part by RJR's aggressive promotion of Doral. Finally, Liggett argues that the military market provides empirical evidence of actual injury to consumers. The generic segment now accounts for over thirty per cent (30%) of the military market, as compared to approximately fifteen per cent (15%) of the civilian market. However, the age, income, and image differences in the military and the civilian sectors make such inferences suspect; the market for generic cigarettes has grown in both sectors; and without any realistic prospect of obtaining market power B & W's conduct cannot be the cause of the different market shares in the two sectors.

[37] *Accord Stitt Spark Plug, 840 F.2d at 1257*; *Black Gold, Ltd. v. Rockwool Indus., Inc., 729 F.2d 676, 680* (10th Cir.), *cert. denied*, ***469 U.S. 854, 83 L. Ed. 2d 113, 105 S. Ct. 178 (1984)***; ***William Inglis, 668 F.2d at 1040***; *Marty's Floor Covering Co. v. GAF Corp., 604 F.2d 266, 270 (4th Cir. 1979)*, *cert. denied*, ***444 U.S. 1017, 62 L. Ed. 2d 647, 100 S. straightforward when the price discrimination is geographic. In these cases, a national firm can supplant local competitors confined to a specific geographic market by charging below-cost prices in that market. The local competitor is necessarily limited to competing for customers who can buy at the below-cost price offered by **[*359]** the national company. The national firm can subsidize its losses in the local market through profits from sales in other geographic areas. Therefore, since the national firm can remain profitable while the local competitor cannot, the difference between the national firm's below-cost prices and its profitable prices has a reasonable possibility of injuring competition. However, Liggett's primary line, non-geographic claim differs from this scenario, and the geographic causation rationale discussed above has no persuasive force. Both B & W and Liggett competed for generic sales throughout the United States, and Liggett competed in all the markets in which **[**41]** B & W offered the discriminatory prices.

Because this claim is non-geographic, Liggett has not proven causation by any substantial evidence. The Robinson-Patman Act does not proscribe low prices. B & W's net prices were generally lower than Liggett's at every volume level. Yet, if there was any reasonable possibility of injury to competition from B & W's conduct it came from the low prices that B & W offered to its customers and not from the fact that these low prices varied depending on volume. *See* *O. Hommel, 659 F.2d at 350-51* (when price discrimination occurs only in the same geographic market in which the predator and the target compete "selective price-cutting cannot possibly be more harmful to small competitors than a general price reduction to the same level") (quoting Areeda & Turner, **[**42]** *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 Harv. L. Rev. 697, 725-26 [1975]). [39]

Even if B & W's low prices created a reasonable possibility of injuring competition by displacing Liggett and making it possible for B & W to raise generic cigarette prices, the fact that those prices varied gave B & W no advantage over Liggett. Liggett was free to compete for sales to B & W's low-volume generic customers, as well as those customers getting the best deals from B & W. Liggett was not excluded from any markets. As a result, Liggett was not disadvantaged any more by B & W's volume rebates than it would have been by one uniform low price. Liggett's complaint is that B & W was selling generic cigarettes for a lower price than it could at all volume levels. Consequently, ***HN14***[] Liggett has not met its burden of causation because low prices, not price discrimination, **[**43]** provide the only possible linkage to competitive injury.

Liggett disagrees. It contends that the price discrimination was a central component of B & W's predatory plan enabling B & W to make its scheme cost effective and inducing wholesalers to buy generic cigarettes exclusively from B & W. The court will consider these arguments in turn.

Liggett contends that price discrimination made B & W's plan feasible by making it less costly than if B & W offered only one low price. It cites several documents indicating that B & W wanted to "put the money where the volume was." There are no primary-line, non-geographic cases, that this court is aware of, in which cost efficiency satisfied the Robinson-Patman Act's causation requirement. Such an argument if accepted would read any meaningful causation requirement out of the Act. As opposed to one low price set at B & W's high-volume rate, volume rebates certainly saved the company money. However, the same is true of any price discrimination by any firm since price discrimination by definition requires a higher and a lower price. Furthermore, although it may have been more cost efficient for B & W, price discrimination also meant that it would cost less for **[**44]** Liggett to match B & W's prices. Since Liggett and B & W had access to the same customers and markets, B & W could not inflict greater injury on Liggett by charging different prices than by charging a lower uniform price. If Liggett was not injured more by the price discrimination then neither was competition, since Burnett's competitive injury theory hinges on **[*360]** B & W replacing Liggett as the generic price leader.

Liggett also argues that B & W's discriminatory rebates encouraged wholesalers to buy generic cigarettes exclusively from B & W. According to Liggett, the volume rebates acted as a magnet enticing customers to buy

---

[38] *Accord* *Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 903 F.2d 988, 991 & n. 5 (4th Cir. 1990)*; *O. Hommel, 659 F.2d at 350*; *Marty's Floor Covering, 604 F.2d at 270*; *International Air, 517 F.2d at 720-21*.

[39] *Accord* *Official Publications, Inc. v. Kable News Co., 884 F.2d 664, 667-68 (2d Cir. 1989)*; *Borden, 381 F.2d at 180*.

more B & W generic cigarettes to get to the next rebate level; because higher volume purchases entitled customers to higher discounts, customers opting to allocate a portion of their generic cigarette purchases to Liggett would in effect be penalized; to avoid this penalty customers would buy exclusively from B & W; the more exclusive relationships B & W could cement with former Liggett wholesale customers the faster B & W could displace Liggett and increase generic prices.

Again, Liggett cites no primary-line, non-geographic cases which support its analysis that encouraging exclusivity **[**45]** satisfies the Robinson-Patman Act's causation requirement. Volume discounts do not hurt Liggett, and hence competition, more than any other incentive since both companies compete for the same customers and the same markets. Liggett could respond to B & W's volume rebates by allocating the majority of its own incentives to its high-volume customers, a practice it had followed even before B & W's entry. Furthermore, the only advantage to a wholesaler from getting into B & W's highest volume category is receiving the lowest price available on generic cigarettes. Yet, even at the lowest volume levels, B & W's net prices were below Liggett's, obviously an incentive for a customer to buy only from the manufacturer offering the lowest price on the same product. Therefore, the magnet enticing customers to buy generic cigarettes exclusively from B & W was that B & W's net prices were below Liggett's at every volume level and not that B & W's competitive offer to customers took the form of volume rebates.

C. *Antitrust Injury*

HN15[] In a private treble damage action brought under Section 4 of the Clayton Act, [40] there is an additional causation requirement -- antitrust injury. Not only must Liggett prove that **[**46]** B & W's price discrimination had a reasonable possibility of injuring competition, Liggett also must prove that B & W's price discrimination caused its complained-of damages.

A private plaintiff like Liggett may not recover damages simply by showing "injury causally linked to an illegal presence in the market." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Instead, Liggett must prove it was injured by conduct violating the Robinson-Patman Act. *See 15 U.S.C. § 15(a)*. That is, Liggett must prove the existence of "'*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Allegheny Pepsi-Cola Bottling Co. v. Mid-Atlantic Coca-Cola Bottling Co., 690 F.2d 411, 414 **[**47]** (4th Cir. 1982)* (quoting *Brunswick, 429 U.S. at 489*). Therefore, Liggett cannot recover damages unless it is "able to show a causal connection between the price discrimination in violation of the Act and the injury suffered." *Perkins v. Standard Oil Co., 395 U.S. 642, 648, 23 L. Ed. 2d 599, 89 S. Ct. 1871 (1969)*.

Subsequent to the completion of this trial, the Supreme Court decided a case clarifying the requirements of antitrust injury. The Supreme Court held:

> ***HN16***[] Antitrust injury does not arise for purposes of § 4 of the Clayton Act until a private party is adversely affected by an *anticompetitive* aspect of the defendant's conduct; in the context of pricing practices, only predatory pricing has the requisite anticompetitive effect. Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do **[*361]** not threaten competition. Hence, they cannot give rise to antitrust injury.

Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 110 S. Ct. 1884, 1892, 109 L. Ed. 2d 333 (1990) (citations and footnotes omitted). In the context of the present case, *Atlantic Richfield* makes clear that only evidence of predatory pricing is sufficient to prove antitrust **[**48]** injury. Neither incriminating documentary evidence nor an allegedly distorted market proves antitrust injury unless accompanied by proof of predatory pricing. *Id. at 1891 n. 7* ("a firm cannot claim antitrust injury from nonpredatory price competition on the asserted ground that it is ruinous").

[40] Section 4 of the Clayton Act is a remedial provision that makes treble damages available to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15(a)*.

Liggett, of course, disagrees with this interpretation of *Atlantic Richfield*, arguing that the Supreme Court's antitrust injury analysis applies only to vertical maximum resale price-fixing cases and that the decision illustrates only that Sherman Act principles are different from Robinson-Patman Act principles. It cites as proof the fact that the Supreme Court in *Atlantic Richfield* did not dismiss the Robinson-Patman Act claim since it was "misconduct not relevant here." *110 S. Ct. at 1887*. In *Atlantic Richfield*, plaintiff sued defendant under various legal theories including the Sherman Act, the Robinson-Patman Act, and state law unfair competition statutes. Defendant moved for summary judgment on the Section 1 Sherman Act claim and the district court granted the motion. On appeal, both the Ninth Circuit and the Supreme Court considered only the issue of whether dismissing **[**49]** plaintiff's Section 1 Sherman Act claim was proper. The Robinson-Patman Act claim was not relevant to the Supreme Court's decision because that claim was not before it. This language of the Supreme Court cannot be construed to mean that antitrust injury principles under the Robinson-Patman Act are fundamentally different from those under the Sherman Act.

Liggett's interpretation of *Atlantic Richfield* is legally insupportable for several reasons. First, Liggett alleges a primary-line, non-geographic Robinson-Patman Act claim analytically similar to a *Section 2* Sherman Act attempted monopolization claim. The goal of both statutes is to maximize competition. Second, Liggett's interpretation is anticompetitive since it protects Liggett from non-predatory price competition by B & W despite the fact that such activity cannot injure competition. In *Atlantic Richfield*, the Supreme Court reiterated that "'cutting prices in order to increase business often is the very essence of competition,'" *id. at 1891* (quoting *Matsushita, 475 U.S. at 594*), and Liggett has provided no theoretical justification for distinguishing between straight price cuts and volume rebates. Also, the Supreme **[**50]** Court has held on numerous occasions that ***HN17***[] the Robinson-Patman Act should be conformed if at all possible to the standards governing the other antitrust laws. *See* *Great Atl. & Pac. Tea Co. v. FTC, 440 U.S. 69, 80, 59 L. Ed. 2d 153, 99 S. Ct. 925 (1979)*; *United States v. United States Gypsum Co., 438 U.S. 422, 458-59, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*; *Automatic Canteen Co. v. FTC, 346 U.S. 61, 63, 97 L. Ed. 1454, 73 S. Ct. 1017 (1953)*. Third, Section 4 of the Clayton Act, *15 U.S.C. § 15(a)*, provides the antitrust injury standard for both the Sherman Act and the Robinson-Patman Act. It would be odd indeed to interpret the same language of Section 4 one way under the Sherman Act and another way under the Robinson-Patman Act. Fourth, and most importantly, Liggett's interpretation requires this court to ignore the plain language of *Atlantic Richfield* in which the Supreme Court clearly stated that non-predatory pricing behavior cannot give rise to antitrust injury "regardless of the type of antitrust claim involved." *110 S. Ct. at 1892*.

Liggett also argues that *Atlantic Richfield* does not apply to Robinson-Patman Act claims because it is price discrimination rather than predatory prices which must cause the antitrust injury. Liggett's position is correct as **[**51]** far as it goes. In Robinson-Patman Act cases the price discrimination must be linked with the antitrust injury. However, this does not mean that predatory pricing is not relevant. For that position to have merit there would **[*362]** have to be some anticompetitive aspect of price discrimination other than the fact that one or all of the prices charged were predatory. Yet, the only anticompetitive aspect to B & W's volume rebates is that they were allegedly below cost. Burnett's theory is that B & W's below-cost, volume rebates were designed to drive Liggett out of the generic cigarette segment. The below-cost aspect of these rebates was crucial since this forced Liggett to either lose money on the sale of generic cigarettes or lose customers to B & W. For these reasons this court is convinced that in a primary-line, non-geographic price discrimination case predatory pricing is the only type of evidence which satisfies the antitrust injury requirement.

The court must examine whether Liggett has presented any substantial evidence of antitrust injury. The Supreme Court has stated that ***HN18***[] "predatory pricing may be defined as pricing below an appropriate measure of cost for the purpose of eliminating competitors **[**52]** in the short run and reducing competition in the long run." *Cargill, 479 U.S. at 117*. But the Court has never defined what "cost" is relevant. *Id. at 117 n. 12*. Given this Supreme Court guidance, most circuits presume that pricing below reasonably anticipated marginal cost is predatory. [41] Because marginal costs cannot be determined easily from conventional accounting methods, average variable cost

---

[41] *See, e.g.,* *Northeastern Tel. Co. v. AT & T Co., 651 F.2d 76, 88 (2d Cir. 1981)* (citations collected therein), *cert. denied*, ***455 U.S. 943, 71 L. Ed. 2d 654, 102 S. Ct. 1438 (1982)***.

is used as a surrogate. Most cases of predatory pricing focus on average variable cost evidence, and this one is no different. [42]

[53]** Liggett's predatory pricing evidence consisted of expert testimony that B & W priced its generic cigarettes below average variable cost. B & W countered with its chief financial officer who admitted that B & W lost money on the sale of generic cigarettes but stated prices were never below average variable cost. He explained that most companies lose money when they introduce a new product and that there was nothing exceptional about that. Furthermore, he stressed that B & W's overall line of cigarettes -- generic plus branded -- was very profitable.

In order to evaluate Liggett's predatory pricing evidence, this debate need not be resolved. The court believes that Liggett's predatory pricing evidence must show that B & W lost money in the relevant market stipulated to by the parties prior to trial -- the market for all cigarettes in the United States. Liggett has not and cannot do this. The evidence is uncontroverted that B & W made money on its overall cigarette sales -- branded and generic -- during the alleged predatory period.

The parties have stipulated that the relevant market is the entire cigarette market in the United States. Upon close examination, this court **[**54]** believes that there is no substantial economic evidence that generic cigarettes are sufficiently distinct from branded cigarettes to justify applying the average variable cost test to generic cigarettes alone. [43] Markets are determined by the substitutability of goods, and market definition turns on these goods' cross-elasticity of demand and supply. ***HN19***[] Cross-elasticity **[*363]** of demand is the extent to which products are "reasonably interchangeable by consumers for the same purposes." *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. Cross-elasticity of supply is "the capability of other production facilities to be converted to produce a substitutable product." *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 253 U.S. App. D.C. 142, 792 F.2d 210, 218 (D.C. Cir. 1986)*, *cert. denied*, *479 U.S. 1033, 93 L. Ed. 2d 834, 107 S. Ct. 880 (1987)*. There is obviously high cross-elasticity of demand between branded and generic cigarettes. In fact, Liggett's theory hinges on consumers substituting generic for branded cigarettes because the alleged reason for predating was that B & W branded smokers were switching to Liggett's generic cigarettes. There is also high cross-elasticity of supply between branded and generic cigarettes **[**55]** because the same machines that make branded cigarettes can easily produce generic cigarettes.

Because there is no question that generic and branded cigarettes compete with each other for **[**56]** the favor of consumers, there is no economic justification for analyzing one separately from the other. ***HN20***[] Where there is nothing economically distinct about a particular product line, the average variable cost test should not be applied to it. Dr. Philip Areeda, one of the fathers of that test, explains that where the predator and the target sell the same line of products the average variable cost test should be applied to an alleged predator's entire product line instead of to a particular product because "rivals generally can hardly be ruined so long as prices for the product line as a whole are compensatory." P. Areeda & H. Hovenkamp, ***Antitrust Law*** 1715.1a, at 592 (Supp. 1989). Numerous courts, in cases like this one where the parties are full product line competitors, have refused to apply the average variable

[42] This court used average variable cost because Liggett's evidence of predatory pricing centered on this measure; average variable cost is a conservative measure unlikely to penalize the competitive pricing activities of a more efficient competitor; and many circuits use some variant of the average variable cost test to isolate predatory pricing.

[43] Since Liggett and B & W are full-line competitors who compete for market share across all cigarette product lines, this court instructed the jury that they could consider Liggett's below-cost pricing evidence only if they determined that generic cigarettes formed a well-defined submarket based on the practical indicia test of *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. The court used this concept to aid the jury in determining whether generic cigarettes were sufficiently distinct from branded cigarettes to justify applying the average variable cost test to generic cigarettes, and not as a means of deciding the appropriate market in which to evaluate competitive injury. If there are no significant economic differences between the two products there is no reason to analyze their price-cost relationship separately.

cost test to a single product line because there could be no competitive injury in the relevant market even if that product line was priced below cost. [44]

[57]** During the alleged predatory period, Liggett and B & W were both profitable, full product line competitors with access to the same customers and markets. Due to these facts, applying the average variable cost test solely to B & W's generic cigarettes would be inappropriate. ***HN21***[] An examination of price-cost relationships should be made only in reference to the dangers posed by predatory pricing. *Henry, 809 F.2d at 1344* ("the issue of 'predatory intent' should focus on what the defendant did and whether it could lead to the evil feared"). Under Liggett's theory, the danger posed by B & W's predatory pricing was that B & W would obtain control of the generic segment, raise prices, and thereby kill-off the only low-price alternative to branded cigarettes to the disadvantage of consumers. Even assuming that this danger was real, consumer welfare could not be injured if Liggett responded by switching emphasis to its line of branded cigarettes and decreasing their price, thus charging consumers a fair price instead of a monopolistic one. This would prevent injury to both Liggett and the consumer. Liggett's market share would increase to **[*364]** offset its lost monopoly profits and consumers would still **[**58]** have a low-price cigarette alternative. Furthermore, B & W could not recoup if Liggett decreased branded prices because cost-conscious consumers would switch to the low-price Liggett brands instead of other branded cigarettes priced at monopoly rates. If the average variable cost test is applied solely to generic cigarettes and antitrust injury is inferred from this below-cost pricing, then Liggett is unjustly rewarded for failing to compete on price with its branded cigarettes. Under this scenario, Liggett's antitrust injury would come from its unwillingness to charge a competitive price for its branded cigarettes and not from B & W's price discrimination. Since Liggett has failed to introduce substantial evidence of predatory pricing to meet the antitrust injury requirement, this provides another ground for granting B & W's JNOV motion.

III. THE TRADEMARK ISSUES

Liggett has made a motion for a new trial pursuant to *Rule 59, Fed. R. Civ. P.*, on the trademark and unfair competition claims arising from B & W's alleged infringement of Liggett's quality seal trademark. Liggett contends that the court should order a new trial on these issues because (1) the jury verdict was clearly against the **[**59]** weight of the evidence, (2) B & W repeatedly relied upon prejudicial, inadmissible, and improper evidence which tainted the jury process, and (3) Liggett was precluded from using evidence which could have countered B & W's prejudicial and misleading arguments. The court finds these contentions to be without merit, and Liggett's motion will be denied.

HN22[] A motion for a new trial is governed by a different standard than a JNOV motion. *Gill v. Rollins Protective Servs. Co., 773 F.2d 592, 594 (4th Cir. 1985)*, *modified on other grounds*, *788 F.2d 1042 (4th Cir. 1986)*. Recently, the Fourth Circuit has reiterated the trial court's duty in ruling on a *Rule 59* motion for a new trial. In *Poynter by Poynter v. Ratcliff, 874 F.2d 219, 223 (4th Cir. 1989)*, the court explained that:

> Under *Rule 59 of the Federal Rules of Civil Procedure*, a trial judge may weigh the evidence and consider the credibility of the witnesses and, if he finds the verdict is against the clear weight of the evidence, is based on

---

[44] *See* *Morgan v. Ponder, 892 F.2d 1355, 1361-62 (8th Cir. 1989)* (court refuses to apply a price-cost test solely to legal advertising as opposed to all commercial advertising); *Stitt Spark Plug, 840 F.2d at 1256-57* (a relevant predatory pricing analysis must include defendant's entire line of spark plugs and not just its original equipment line); *Directory Sales Management Corp. v. Ohio Bell Tel. Co., 833 F.2d 606, 614 (6th Cir. 1987)* (although a telephone company gave away free first listings in its telephone book, they engaged in predatory pricing only if their "overall charges for advertising space in their yellow pages are priced below cost"); *Lomar Wholesale Grocery, Inc. v. Dieter's Gourmet Foods, Inc., 824 F.2d 582, 597-98 (8th Cir. 1987)*, *cert. denied*, ***484 U.S. 1010, 108 S. Ct. 707, 98 L. Dr. Pepper Co., 725 F.2d 300, 305* (5th Cir.), *cert. denied*, ***469 U.S. 833, 83 L. Ed. 2d 65, 105 S. Ct. 123 (1984)*** (where both parties are full-line competitors, 32-ounce bottles not a relevant product to apply average variable cost test to); *Janich Bros., 570 F.2d at 856* (half-gallon containers of gin and vodka are not relevant products for predatory pricing analysis); *Sewell Plastics, Inc. v. Coca-Cola Co., 720 F. Supp. 1196, 1228 (W.D.N.C. 1988)* (three-liter bottles not a relevant product for predatory pricing analysis).

> false evidence or will result in a miscarriage of justice, he must set aside the verdict, even if supported by substantial evidence, and grant a new trial.

See also Wyatt, 623 F.2d 888, 891-92; **[**60]** Williams v. Nichols, 266 F.2d 389, 392 (4th Cir. 1959). A new trial may also be granted if the court believes it has erred in the admission or rejection of evidence, or improperly instructed the jury. Montgomery Ward & Co. v. Duncan, 311 U.S. 243, 251, 85 L. Ed. 147, 61 S. Ct. 189 (1940).

HN23[] To establish trademark infringement a plaintiff must prove that there is a "likelihood of confusion" between its mark and the defendant's mark. Pizzeria Uno Corp. v. Temple, 747 F.2d 1522, 1527 (4th Cir. 1984). Both parties presented evidence from which a reasonable jury could have found in favor of that party on the trademark and unfair competition issues. The jury ruled for B & W. From the evidence introduced on the seven likelihood of confusion factors outlined in *Pizzeria Uno*, [45] the verdict cannot be considered contrary to the clear weight of the evidence.

[61]** The cornerstone of Liggett's position is its contention that B & W's stipulation of the validity of Liggett's quality seal trademark precluded any evidence or argument by B & W that consumers were not aware of the quality seal. Liggett couples this argument with the contention that B & W's repeated references to the results of Liggett's Conway Milliken Report, a telephone survey of consumers conducted by Liggett, as proof of lack of consumer recognition of the quality seal, were improper **[*365]** and contrary to the court's *in limine* ruling.

Liggett's contention that the stipulation of validity of the quality seal trademark precluded evidence and argument by B & W that most consumers were not aware of the mark is contrary to the position taken by Liggett's counsel at trial. Liggett's counsel conceded on the record at the charge conference that the strength of the mark was a question for the jury, that B & W could argue that it was not recognized, and that Liggett could argue that it was recognized. Evidence of the extent of consumer awareness of a mark obviously helps a jury determine the scope of protection to be afforded the mark. However, the court clearly instructed the jury that Liggett had **[**62]** valid federal trademark registrations for the quality seal and that the jury must accept the quality seal as a valid trademark.

Furthermore, Liggett's argument that the stipulation of validity precludes evidence that consumers were not aware of the mark is simply not the law. *See* Miss World (U.K.) Ltd. v. Mrs. America Pageants, 856 F.2d 1445, 1449 (9th Cir. 1988) ("An incontestable status does not alone establish a strong mark."); Oreck Corp. v. U.S. Floor Sys., Inc., 803 F.2d 166, 171 (5th Cir. 1986) (incontestable status does not preclude defendant from arguing mark is weak and not infringed; "Incontestable status does not make a weak mark strong."), *cert. denied*, *481 U.S. 1069, 95 L. Ed. 2d 871, 107 S. Ct. 2462 (1987)*; *see also* Munters Corp. v. Matsui America, Inc., 730 F. Supp. 790, 795-96 (N.D. Ill. 1989), *aff'd*, 909 F.2d 250 (7th Cir. 1990); Cullman Ventures, Inc. v. Columbian Art Works, Inc., 717 F. Supp. 96, 121 (S.D.N.Y. 1989); 2 J. McCarthy, *Trademarks and Unfair Competition* § 32:44D (2d ed. 1984 & Supp. 1989).

Liggett's emphasis on B & W's questions to witnesses and arguments about Liggett's Conway Milliken study is also misplaced. The court **[**63]** explained on numerous occasions during the trial that Liggett's extensive testimony and evidence concerning the promotion of its quality seal opened the door to cross-examination and evidence of the effectiveness of that promotion. The court then allowed Liggett to present additional evidence about what the study was designed to determine, how it was conducted, and the significance of the results. Furthermore, Liggett's counsel had ample opportunity in closing arguments to counter any arguments by B & W's counsel concerning the significance of the Conway Milliken Report. [46]

---

[45] The seven factors are: (1) the strength or distinctiveness of the mark; (2) the similarity of the two marks; (3) the similarity of the goods/services identified by the marks; (4) the similarity of the facilities the two parties use in their businesses; (5) the similarity of the advertising used by the two parties; (6) the defendant's intent; (7) actual confusion.

[46] Liggett also contends that B & W improperly took advantage of the court's pre-trial rulings which prevented Liggett from calling consumers who had confused B & W's black and gold lion closure seal, a seal which was not the basis of Liggett's claim in this case, with the Liggett quality seal trademark. Liggett further contends that it was tricked or prevented from calling Saul Lefkowitz, a former chairman of the United States Trademark Trial and Appeal Board, who would have testified that registration of the

[64]** Liggett's other arguments concerning the use of prejudicial, inadmissible, and improper evidence are based almost exclusively on B & W's closing argument. However, Liggett failed to object during closing argument to most of the statements which it now claims were so prejudicial as to warrant a new trial. The Fourth Circuit has emphasized that "it is the universal rule that ***HN24***[] during closing argument counsel '"cannot as a rule remain silent, interpose no objections, and after a verdict has been returned seize for the first time on the point that the comments to the jury were improper and prejudicial."'" *Dennis v. General Elec. Corp., 762 F.2d 365, 366-67 (4th Cir. 1985)* (quoting *United States v. Elmore, 423 F.2d 775, 781* [4th Cir.], *cert. denied*, *400 U.S. 825, 91 S. Ct. 49, 27 L. Ed. 2d 54* [1970], and *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 239, 84 L. Ed. 1129, 60 S. Ct. 811* [1940]). Liggett had every opportunity in its rebuttal argument to clarify any arguments which it believed were misleading on the part of B & W. The alleged improprieties **[*366]** in B & W's closing argument do not involve any exceptional circumstances which would impair "the public reputation and integrity of the judicial proceeding." *Dennis, 762 F.2d at 367*; **[**65]** *see also* *Socony-Vacuum Oil, 310 U.S. at 239*.

For the foregoing reasons, Liggett's motion for a new trial on the trademark and unfair competition claims will be denied.

An order and judgment in accordance with this memorandum opinion shall be entered contemporaneously herewith.

ORDER and JUDGMENT - August 27, 1990, Filed

For the reasons set forth in a memorandum opinion filed contemporaneously herewith,

IT IS ORDERED AND ADJUDGED that Defendant's motion for judgment notwithstanding the verdict pursuant to *Rule 50(b), Federal Rules of Civil Procedure*, be, and the same hereby is, GRANTED, and that the jury verdict and judgment in favor of the Plaintiff be, and the same hereby is, SET ASIDE, and judgment entered for the Defendant; and

IT IS FURTHER ORDERED that Defendant's alternative motion for a new trial pursuant to *Rule 59, Federal Rules of Civil Procedure*, be, and the same hereby is, DENIED; and

IT IS FURTHER ORDERED that Plaintiff's motion for a new trial pursuant to *Rule 59, Federal Rules of Civil Procedure*, be, and the same hereby is, DENIED.

End of Document

---

quality seal was proper, a fact B & W conceded. Other proposed testimony by Mr. Lefkowitz sought to instruct the jury on the law, a matter within the province of the court. The court is satisfied that its initial position concerning these witnesses was correct.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Governments > Legislation > Interpretation

HN8[] Administrative Law, Sovereign Immunity

Although a state may be a "person" for purposes of the antitrust laws, it is equally clear, under the "state action" doctrine that when a state acts in a sovereign rather than a proprietary capacity, it is exempt from the antitrust laws even though those actions may restrain trade. State action doctrine provides antitrust immunity for actions taken in a state's capacity as sovereign but does not cover proprietary functions carried out by municipal subdivisions of the state.

Administrative Law > Agency Rulemaking > Formal Rulemaking

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

HN9[] Agency Rulemaking, Formal Rulemaking

When engaged in rulemaking pursuant to section 18(a)(1) of the Federal Trade Commission (FTC) Act, the FTC itself exercises substantive lawmaking authority delegated to it by Congress.

Administrative Law > Sovereign Immunity

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Opinion by: BUCKLEY

Opinion

[*978] BUCKLEY, Circuit Judge.

The American Optometric Association, the California Optometric Association, and several States or state boards of optometry challenge a Federal Trade Commission rule that declares certain state laws restricting the practice of optometry to be unfair acts or practices. We find that the FTC lacked the statutory authority to promulgate the rule because Congress did not authorize the Commission to regulate the sovereign acts of the States.

I. BACKGROUND

A. Statutory Framework

As enacted in 1914, the Federal Trade Commission Act ("Act") **[**4]** empowered the FTC to prevent persons, partnerships, and corporations "from using unfair methods of competition in commerce." *See* Act, ch. 311, § 5, 38 Stat. 719 (1914). In 1938, Congress amended section 5 to authorize the Commission to prevent "unfair or deceptive acts or practices" as well as unfair methods of competition. Wheeler-Lee Amendment to the FTC Act, ch. 49, § 3, 52 Stat. 111 (1938). Finally, in 1975, Congress expanded the scope of section 5 to encompass acts "affecting" commerce. Magnuson-Moss Warranty -- FTC Improvement Act, § 202(a), 88 Stat. 2193 (1975) ("Magnuson-Moss Amendments"). Thus, the relevant language of section 5(a) now reads as follows:

> (1) ***HN1***[] Unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce, are declared unlawful.
> (2) The Commission is empowered and directed to prevent persons, partnerships, or corporations . . . from using unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce.

15 U.S.C. § 45 **[**5]** *(a) (1988)*.

The Magnuson-Moss Amendments also added section 18 to the Act, which grants the FTC rulemaking authority to define specific acts or practices as unfair. ***HN2***[] Section 18(a)(1) provides that

> the Commission may prescribe --
> (A) interpretive rules and general statements of policy with respect to unfair or deceptive acts or practices in or affecting commerce . . ., and
> (B) rules which define with specificity acts or practices which are unfair or deceptive acts or practices in or affecting commerce. . . . Rules under this subparagraph may include requirements prescribed for the purpose of preventing such acts or practices.

Id. § 57a(a)(1) (1988).

B. Procedural Background

These consolidated petitions seek review of the FTC's Ophthalmic Practice Rules, *54 Fed. Reg. 10,285 (1989)* ("Eyeglasses II" or "rule").

Beginning in the mid-1970's, the FTC began to investigate state-imposed restrictions on the practice of optometry. These tended to discourage the "commercial practice" of optometry -- such as partnerships between optometrists and laymen, **[**6]** use of trade names, and chain operations combining the practice of optometry with the sale of eyeglasses in shopping centers -- in favor of "traditional optometric practice" typified by sole practitioners operating in professional office buildings under their own names. The FTC's studies indicated that these restrictions resulted in higher prices and reduced the quality of eye care available to the public.

In 1980, the FTC published the results of its investigation and issued an Advance Notice of Proposed Rulemaking requesting comments and recommendations. *45 Fed. Reg. 79,823 (1980)*. The Commission formally initiated a rulemaking proceeding in **[*979]** 1985, *50 Fed. Reg. 598 (1985)*, and, on March 13, 1989, issued Eyeglasses II. *54 Fed. Reg. 10,285 (1989)*. Commission Chairman Daniel Oliver voted against adoption of the rule based on principles of federalism and his view that the FTC was without authority to promulgate it. *Id. at 10,305*.

Eyeglasses II revised Title 16, Part 456 of the Code of Federal Regulations to include a new section 456.4, "State bans on commercial practice," which begins as follows:

> (a) It **[**7]** is an unfair act or practice for any *state or local governmental entity* to:
>> (1) Prevent or restrict optometrists from entering into associations with lay persons or corporations. . . .

Id. at 10,305 (emphasis added). There follows an extensive list of the acts or practices the FTC found to be unfair, including state laws or regulations prohibiting laymen from employing optometrists to provide optometric services, limiting the number of offices that may be owned or operated by optometrists individually or as participants in such associations, and prohibiting them from practicing in department stores or shopping centers, or from practicing under any name other than their own. *Id.*

Eyeglasses II provides that the rule may be used as a defense to any state proceeding brought against an optometrist or his affiliated entity for violating those state laws or rules declared by the rule to be unfair practices. *Id.* (to be codified at *16 C.F.R. § 456.5(b)*). The rule disclaims, however, any intention to interfere with the authority of state or local governments to safeguard the health and safety of the recipients of eye care services, including **[**8]** their authority to require that optometric services be provided only by a person qualified to do so by such state or local law and to establish minimum quality standards for ophthalmic goods and services. *Id.* (to be codified at *16 C.F.R. § 456.5(a)*). Finally, it defines a "person" as "any individual, partnership, corporation, association *or other entity*." *Id. at 10,304* (to be codified at *16 C.F.R. § 456.1(g)*) (emphasis added).

Petitioners challenge all of these provisions. Several interested parties appear as *amici curiae* arguing for and against the rule.

II. DISCUSSION

Petitioners challenge Eyeglasses II on both statutory and constitutional grounds. They also attack the factual record upon which the FTC based its decision to adopt the rule. Because we agree with petitioners that the rule exceeds the FTC's statutory authority and vacate it on that basis, we do not address the alternative grounds presented.

Eyeglasses II declares that certain state-imposed restrictions on the practice of optometry are unfair acts or practices. The question of the Commission's authority to promulgate the rule presents two specific issues of statutory interpretation: **[**9]** whether a State acting in its sovereign capacity is a "person" within the FTC's enforcement jurisdiction under section 5(a)(2) of the Act, and whether a state law may be an unfair or deceptive act or practice within the FTC's rulemaking authority under section 18(a)(1).

In reviewing the FTC's interpretation of its organic act, we must first determine whether Congress had an intention on the question at issue using the traditional ***HN3***[] tools of statutory construction. *Chevron, U.S.A., Inc. v. NRDC, Inc., 467 U.S. 837, 842-43* & n.9, *104 S. Ct. 2778, 81 L. Ed. 2d 694 (1984)*. These tools include the language and structure of the Act, its legislative history, and any applicable canons of statutory construction. *See Dole v. United Steelworkers of America, 494 U.S. 26, 110 S. Ct. 929, 934-35, 937* & n. 7, *108 L. Ed. 2d 23 (1990)*; *see also Michigan Citizens for an Indep. Press v. Thornburgh, 276 U.S. App. D.C. 130, 868 F.2d 1285, 1292-93* (D.C. Cir.) ("If employment of an accepted canon of construction illustrates that Congress had a specific intent **[**10]** on the issue in question, then the case can be disposed of under the first prong of *Chevron*.") (emphasis deleted), *aff'd without opinion by an equally divided Court, 493 U.S. 38, 110 S. Ct. 398, 107 L. Ed. 2d 277 (1989)* (per curiam).

[*980] ***HN4***[] There is nothing in the language of sections 5(a) and 18(a)(1) to indicate that Congress intended to authorize the FTC to reach the "acts or practices" of States acting in their sovereign capacities. The legislative history of the Act suggests that at the time of its original enactment, Congress was concerned with the anticompetitive conduct of *businesses*, whether organized as corporations, partnerships, associations, or sole proprietorships. The House Report declared that the purpose of the Act was to empower the FTC to stop monopolies "at the threshold [by] prevent[ing] unfair competition," H.R. Rep. No. 1142, 63d Cong., 2d Sess. 19 (1914); *see also FTC v. Raladam Co., 283 U.S. 643, 647-50, 75 L. Ed. 1324, 51 S. Ct. 587 (1931)* (discussing purposes of the Act); its sponsor stated that **[**11]** ***HN5***[] the FTC's power under section 5 extended

> to persons, partnerships, and corporations, and with respect to the great *industrial activities* in interstate commerce. It embraces . . . every kind of person, natural or artificial, *who may be engaged in interstate commerce*.

See 51 Cong. Rec. 14,928 (remarks of Rep. Covington) (emphasis added). We can find nothing in the language or history of subsequently adopted amendments to support a finding that Congress has expanded the FTC's jurisdiction to embrace state action. In the absence of any evidence of such a purpose, we turn to well-established rules of statutory construction, which we find dispositive. *See INS v. Cardoza-Fonseca, 480 U.S. 421, 449, 94 L. Ed. 2d 434, 107 S. Ct. 1207 (1987)* ("ordinary canons of statutory construction compelling").

The Supreme Court has observed that "in *HN6*[] common usage, the term 'person' does not include the sovereign, [and] statutes employing the [word] are ordinarily construed to exclude it." *Will v. Michigan Dep't of State Police, 491 U.S. 58, 109 S. Ct. 2304, 2308, 105 L. Ed. 2d 45 (1989)* **[**12]** (internal quotes omitted) (holding that a State is not a person within the meaning of *42 U.S.C. § 1983*); *see also Wilson v. Omaha Indian Tribe, 442 U.S. 653, 667, 61 L. Ed. 2d 153, 99 S. Ct. 2529 (1979)*; *United States v. Cooper Corp., 312 U.S. 600, 604, 85 L. Ed. 1071, 61 S. Ct. 742 (1941)*. On the other hand, several Supreme Court decisions hold that *HN7*[] a State *is* a person for purposes of the antitrust laws. *See Jefferson County Pharmaceutical Ass'n v. Abbott Laboratories, 460 U.S. 150, 155, 74 L. Ed. 2d 882, 103 S. Ct. 1011 (1983)* (the words "persons" and "purchasers" in the Robinson-Patman Act are "sufficiently broad to cover governmental bodies") (internal quotes omitted); *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 395, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)* ("the definition of 'person' or 'persons' [in the antitrust laws] embraces both cities and States"); *see also Hawaii v. Standard Oil Co., 405 U.S. 251, 260-61, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)* **[**13]** (State may sue as a "person" under section 4 of the Clayton Act); *Georgia v. Evans, 316 U.S. 159, 162, 86 L. Ed. 1346, 62 S. Ct. 972 (1942)* (State may sue under section 7 of the Sherman Act).

HN8[] Although a State may be a "person" for purposes of the antitrust laws, it is equally clear, under the "state action" doctrine enunciated in *Parker v. Brown, 317 U.S. 341, 350-51, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, that when a State acts in a sovereign rather than a proprietary capacity, it is exempt from the antitrust laws even though those actions may restrain trade. *See City of Lafayette, 435 U.S. at 391*; *see also id. at 408-13* (state action doctrine provides antitrust immunity for actions taken in a State's capacity as sovereign but does not cover proprietary functions carried out by municipal subdivisions of the State) (plurality opinion of Brennan, J.). Thus, properly framed, the question before us is not simply whether a State is a person under section 5(a)(2) of the Act, but whether a State acting in its sovereign capacity **[**14]** is subject to the Act.

The *Parker* state action doctrine has been applied to limit the reach of the FTC's enforcement jurisdiction. *See Massachusetts Furniture & Piano Movers Ass'n v. FTC, 773 F.2d 391, 394-97 (1st Cir. 1985)*. *Parker* and later cases applying **[*981]** the doctrine, however, have involved judicial interpretations of the relevant statutes in the context of an adjudication, while in this case we consider whether the doctrine limits the FTC's rulemaking authority. *HN9*[] When engaged in rulemaking pursuant to section 18(a)(1), the Commission itself exercises substantive lawmaking authority delegated to it by Congress. Petitioners argue that we should extend the state action doctrine to limit the FTC's rulemaking authority as well.

Because the rule of statutory construction employed by the Court in *Parker* applies with equal force in this context, we conclude that *HN10*[] the state action doctrine is applicable to limit the FTC's rulemaking authority. In holding that **[**15]** *HN11*[] the Sherman Act was not intended to apply to the acts of States as sovereigns, the Court observed that it could

> find nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an *unexpressed purpose* to nullify a state's control over its officers and agents *is not lightly to be attributed* to Congress.

Parker, 317 U.S. at 350-51 (emphasis added). The Supreme Court has since applied this rule of construction in many cases involving issues of federalism. In *Will*, for example, the Court articulated the following "ordinary rule of statutory construction":

> *HN12*[] If Congress intends to alter the "usual constitutional balance between the States and the Federal **[**16]** Government," it must make its intention to do so "unmistakably clear in the language of the statute."

109 S. Ct. at 2308 (quoting Atascadero State Hospital v. Scanlon, 473 U.S. 234, 242, 87 L. Ed. 2d 171, 105 S. Ct. 3142 (1985)). The Court explained the rationale for this rule as follows:

> "In traditionally sensitive areas, such as legislation affecting the federal balance, the requirement of clear statement assures that *the legislature* has in fact faced, and intended to bring into issue, the critical matters involved in the judicial decision."

Id., 109 S. Ct. at 2308-09 (emphasis added) (quoting United States v. Bass, 404 U.S. 336, 349, 30 L. Ed. 2d 488, 92 S. Ct. 515 (1971)).

This rule of statutory construction serves to ensure that the States' sovereignty interests are adequately protected by the political process. In Garcia v. San Antonio Metro. Transit Auth., 469 U.S. 528, 547-55, 105 S. Ct. 1005, 83 L. Ed. 2d 1016 (1985), the Supreme Court held that ***HN13***[] the Tenth **[**17]** Amendment does not impose substantive limitations on federal legislative power. Rather, "State sovereign interests" are "properly protected by procedural safeguards inherent in the structure of the federal system," id. at 552, *e.g.*, the States' equal representation in the Senate. Id. at 551. "The fundamental limitation that the constitutional scheme imposes on the Commerce Clause to protect the 'States as States' is one of process rather than one of result." Id. at 554.

The Commission nevertheless insists that

> in providing the Commission with Section 18 rulemaking authority, Congress has made a limited delegation to the FTC of its legislative authority to protect consumers from acts or practices that unreasonably interfere with the efficient functioning of interstate markets.

Eyeglasses II, 54 Fed. Reg. at 10,296. As it finds the state acts and practices proscribed by the rule to be unfair, the Commission concludes that "Congress authorized the FTC to challenge" them in a section 18 rulemaking. *Id.* Were we to defer to this construction and uphold Eyeglasses II in the face of congressional **[**18]** silence, we would short-circuit the protections offered States by the political process. *See* L. Tribe, *American Constitutional* **[*982]** *Law* § 6-25, at 480 (2d ed. 1988) ("to give the state-displacing weight of federal law to mere congressional *ambiguity* would evade the very procedure for lawmaking on which *Garcia* relied to protect states' interests") (emphasis in original); *The Supreme Court, 1987 Term -- Leading Cases*, *102 Harv. L. Rev. 143, 296 (1988)* ("A rule that distills displacement of state law from congressional *silence* divests states of even *Garcia's* slender procedural guarantee.") (emphasis in original).

The clear statement doctrine leaves no room for inferences. ***HN14***[] An agency may not exercise authority over States as sovereigns unless that authority has been unambiguously granted to it. When one applies this rule of construction to sections 5 and 18(a)(1) of the Act, it becomes clear that the FTC had no authority to promulgate Eyeglasses II.

First, state regulation of the practice of optometry is a quintessentially sovereign act. Second, **[**19]** there can be little question that accepting an interpretation of the Act that sanctions the rule would alter the usual balance between the Federal Government and the States. The rule subjects States to direct FTC regulation by declaring that certain state laws constitute unfair acts or practices. It thus empowers the FTC directly to "prevent" States from imposing certain restrictions on the practice of optometry. *See* 15 U.S.C. § 45(a)(2). Third, nothing in either the language of the Act or its legislative history evidences a congressional intent to alter the state-federal balance as the rule would. The Magnuson-Moss Amendments, which codified the FTC's rulemaking authority, contain no language that could be construed as an explicit congressional authorization to reach the sovereign acts of the States. This silence is especially compelling in view of Congress's more than thirty years of experience with the state action doctrine at the time it enacted section 18(a)(1). As nothing in the language of the Act clearly expresses a congressional intent to empower the FTC to regulate state action, we must reject the rule.

III. CONCLUSION

Because we find that **[**20]** the FTC has acted beyond its statutory authority in promulgating Eyeglasses II, we grant these petitions and vacate the rule.

So ordered.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss for failure to state a claim may be granted only if it appears certain that no relief could be granted under any set of facts that could be proved consistent with the allegations. The factual allegations set forth in the complaint or counterclaim must be accepted as true and a court must view the allegations in the light most favorable to the pleader.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN2[] **Private Actions, Remedies**

Even if it appears on the face of the pleadings that recovery is remote, a claim will withstand the motion to dismiss as long as the pleader retains a possibility of success. To this landscape must be added the caveat that dismissals on the pleadings are especially disfavored in antitrust cases.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN3[] **Antitrust & Trade Law, Sherman Act**

The Sherman Antitrust Act *§ 1*, *15 U.S.C.S. § 1*, forbids every contract, combination or conspiracy in restraint of trade or commerce among the several states. The *§ 1* claimant must demonstrate a (1) concerted action by two or more persons which (2) unreasonably restrains interstate trade or commerce.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Conspiracy to Monopolize, Elements**

Unlike the proof required to establish a conspiracy to monopolize under the Sherman Antitrust Act *§ 2*, *15 U.S.C.S. § 2*, a specific intent to create a monopoly is not required under the Sherman Antitrust Act *§ 1*, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act *§ 2*, *15 U.S.C.S. § 2*, affords a basis for three distinct civil claims, each of which defendant alleges: (1) monopolization; (2) attempted monopolization; and (3) conspiring to monopolize.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN6[] **Regulated Practices, Market Definition**

To establish a monopolization claim, the claimant must demonstrate monopolizing conduct coupled with monopoly power in the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

Monopolizing conduct is the willful acquisition or maintenance of monopoly power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] **Monopolies & Monopolization, Actual Monopolization**

Monopolizing power is a matter of capacity--the possession of power to control prices or exclude competition. Before monopoly power may be assessed, the relevant geographic and product markets must be defined.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Copyright Law > ... > Protected Subject Matter > Musical Works > Musical Arrangements

Copyright Law > ... > Protected Subject Matter > Musical Works > General Overview

HN9[] **Regulated Practices, Market Definition**

Fed. R. Civ. P. 8 does not require that a claimant define specifically the boundaries of its purported market. Questions of market definition can be narrowed and determined through the discovery process.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Sherman Act, Claims**

An attempted monopolization claim under the Sherman Antitrust Act *§ 2*, *15 U.S.C.S. § 2*, comprises three elements: (1) anticompetitive conduct; (2) intent to monopolize; and (3) a dangerous probability of obtaining monopoly power. These elements essentially track those required for a successful monopolization claim.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN11[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The conspiracy to monopolize claim entails two components: (1) proof of a concerted action deliberately entered into with the specific intent to achieve an unlawful monopoly, and (2) the commission of an overt act in furtherance of the conspiracy. Defendant need not allege that the intended monopoly succeeded in any way; the agreement to restrain trade or monopolize plus the overt act in furtherance of the agreement complete the offense. Only a bare bones statement of conspiracy or injury under the antitrust laws without any supporting facts permits dismissal.

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN12[] **Misuse of Rights, Copyright & Trademark Misuse Defenses**

The patent misuse doctrine allows a court of equity to refuse protection of a patented invention when the patentee uses his lawful monopoly over the patented invention to assert economic control over unpatented products.

Copyright Law > ... > Civil Infringement Actions > Presumptions > General Overview

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > General Overview

HN13[] **Civil Infringement Actions, Presumptions**

Public performance of the copyrighted composition is an element of a prima facie copyright infringement claim.

Copyright Law > ... > Ownership Rights > Performances > Definition of Performance

Copyright Law > ... > Civil Infringement Actions > Presumptions > General Overview

Copyright Law > ... > Ownership Rights > Performances > General Overview

HN14[] **Performances, Definition of Performance**

Under the Copyright Act, public performance is defined as either (1) performing the work at a place open to the public or (2) transmitting or communicating a performance to the public, by means of any device or process, whether the members of the public capable of receiving the performance or display receive it in the same place or in separate places and at the same time or at different times. *17 U.S.C.S. § 101*.

Business & Corporate Compliance > ... > Overview & Legal Concepts > Related Legal Issues > Copyright

Copyright Law > ... > Civil Infringement Actions > Presumptions > General Overview

HN15[] **Related Legal Issues, Copyright**

Congress intended the definitions of public and performance to encompass each step in the process by which a protected work wends its way to its audience.

Copyright Law > ... > Defenses > Estoppel > Equitable Estoppel

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > General Overview

HN16[] **Estoppel, Equitable Estoppel**

Equitable estoppel applies both in law and in equity to deny a party the right to plead or prove an otherwise important fact because of something he has done or omitted to do.

Copyright Law > ... > Defenses > Estoppel > Equitable Estoppel

Copyright Law > Scope of Copyright Protection > Assignments & Transfers > General Overview

Copyright Law > ... > Assignments & Transfers > Licenses > General Overview

HN17[] **Estoppel, Equitable Estoppel**

Crucial to application of the doctrine of equitable estoppel in the copyright infringement context is at least partial responsibility of the party seeking recovery for the alleged infringement.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Unclean Hands

Copyright Law > ... > Civil Infringement Actions > Defenses > General Overview

HN18[] **Affirmative Defenses, Unclean Hands**

The unclean hands doctrine is a limited device, invoked by a court only when a plaintiff otherwise entitled to relief has acted so improperly with respect to the controversy at bar that the public interest in punishing the plaintiff outweighs the need to prevent defendant's tortious conduct.

Copyright Law > ... > Civil Infringement Actions > Defenses > General Overview

HN19[] **Civil Infringement Actions, Defenses**

The defense of unclean hands in copyright actions is recognized only rarely, when the plaintiff's transgression is of serious proportions and relates directly to the subject matter of the infringement action. This doctrine is peculiarly fact-specific, rendering dismissal on the skeletal basis of the pleadings inappropriate.

Business & Corporate Compliance > ... > Unfair Labor Practices > Employer Violations > Interference With Protected Activities

Business & Corporate Law > ... > Directors & Officers > Management Duties & Liabilities > General Overview

HN20[] **Employer Violations, Interference With Protected Activities**

Officers and employees of a corporation may be held individually liable for corporate actions that violate the antitrust laws if they authorize or participate in the unlawful acts.

Civil Procedure > Pleading & Practice > Pleadings > Impleader

HN21[] **Pleadings, Impleader**

Opinion

[*1684] [*322]** OPINION AND ORDER

JOHN F. KEENAN, UNITED STATES DISTRICT JUDGE

This copyright infringement action is before the Court on plaintiffs' motion to dismiss the three-count antitrust and copyright **[*323]** misuse counterclaim and to strike the affirmative defenses of defendant Hearst/ABC Viacom Entertainment Services d/b/a Lifetime Television ("Lifetime"). *Fed. R. Civ. P. 12(b)(6)*, *(f)*. Frances W. Preston also moves to dismiss the third-party complaint against her. For the reasons discussed below, the Court grants in part and denies in part plaintiffs' application. The third-party complaint is dismissed with leave to re-plead.

BACKGROUND

Plaintiff Broadcast Music, Inc. ("BMI") is engaged in the business of licensing performing rights in **[**2]** the copyrighted musical compositions of its affiliated composers and publishers. BMI currently represents over 53,000 affiliated composers and over 32,000 affiliated publishers who have granted BMI non-exclusive authority to license the performing rights in over 1.5 million musical compositions. Where the authority to license performing rights is non-exclusive, the copyright owner retains the right to license his works individually or on a catalogue-wide basis as if BMI did not exist. After BMI issues a license to a music user, [1] it collects the license fees and distributes all royalties to the composers and publishers after expenses and allowances for cash reserves. BMI also monitors unlicensed or unauthorized performances of music and, when able to join the copyright owner, brings infringement actions.

[3]** The thousands of individual copyright owners who have appointed BMI as their licensing agent have also authorized BMI to determine the types of licenses that it will offer and the prices at which these licenses will be available. BMI licenses its repertoire on an aggregate basis. That is, it issues a blanket license which entitles the licensee to use any or all of the works in the BMI repertoire as often as desired during the **[***1685]** license term. The license is typically conveyed for a fee reflecting a percentage of the user-licensee's revenue. In the television and radio field, BMI also offers a "per program" license which measures license fees based upon the popularity of particular programs or the time-periods in which BMI music is heard.

Lifetime is a cable television program service (in cable television parlance a "cable supplier") that acquires, produces and markets video programming to subscribers, primarily through cable system operators located across the United States. Lifetime is available to tens of millions of Americans each day on their home televisions.

Like most other cable television program services, Lifetime produces little original programming. The bulk of its programming **[**4]** consists of theatrical movies and other pre-recorded programs which are licensed or purchased by Lifetime from third-party syndicators. Most of this programming features copyrighted music, which is selected by the program producer and recorded on the program soundtrack. The music is thus permanently integrated into the program and the cable service wishing to transmit the program must either transmit whatever music is incorporated in the program or not broadcast the program at all.

A pre-recorded television program or theatrical motion picture represents the collaborative efforts of numerous individuals: composers, actors, directors, editors, etc. In the cable television industry, all copyright rights -- save one -- are secured by the program suppliers at the time of production and are transferred to the broadcasting cable service as part of the program package. The one exception to this practice concerns the licensing of music performing rights. These rights are not obtained and conveyed by the producer/syndicator, but are reserved by the copyright owner or other licensor (such as BMI) for licensing in separate transactions with the cable program services.

Defendant alleges that cable **[**5]** television music performing rights are not negotiated and licensed in a transaction between the producer and composer "at the source" because **[*324]** the copyright proprietors who are

[1] BMI licenses the works in its repertoire to the three major television networks, cable program suppliers, and thousands of local television and radio stations. Other licensees include concert halls, nightclubs, bars and skating rinks.

BMI affiliates prefer that the cable services deal with their licensing agent, BMI. The result of this, defendant contends, is that each cable service is required to purchase, through the blanket license, performing rights in all of the music in BMI's repertoire without regard to the service's needs.

Defendant maintains that the alternative of licensing performing rights directly from the copyright owner is a Hobson's choice. The blanket license system, defendant submits, eliminates any incentive for BMI's affiliates to license their works directly. BMI's affiliates are insulated from the negotiations fostered by a competitive marketplace and assured the benefits of what defendant characterizes as "BMI's take-it-or-leave-it licensing tactics." Moreover, defendant claims that it would be prohibitively expensive to locate and obtain licenses from individual composers and publishers.

Plaintiffs allege that Lifetime has for several years willfully infringed numerous copyrights of musical compositions in the BMI **[**6]** repertoire by publicly performing them without a license from either BMI or the individual copyright owners. *See* *17 U.S.C. § 106(4) (1977 & Supp. 1990)*. When plaintiff first became aware of the alleged copyright violations, it proffered an annual blanket license to Lifetime for a fee calculated at one percent of Lifetime's gross revenues. Lifetime claims that the proffered fee would be three to four times greater than the blanket license fee charged to BMI's "pay" cable television, [2] broadcast network and local broadcast station licensees. Lifetime rejected the blanket license offer and this suit followed.

The Consent Decree

In 1964, the United States commenced an anti-trust action against BMI alleging violations **[**7]** of the Sherman Anti-trust Act. In 1966, the United States District Court for the Southern District of New York entered a consent decree in that action, *see United States v. Broadcast Music, Inc*., [1966] Trade Cas. (CCH) P71,941 (S.D.N.Y. 1966), which prohibits BMI from discriminating among similarly situated music users. The second major music licensing society in the United States, the American Society of Composers, Authors and Publishers ("ASCAP") [3] is governed by a separate consent decree which provides for a "rate court." If any music user cannot negotiate an agreeable **[***1686]** license with ASCAP, the user may apply to the district court supervising the decree to fix a reasonable fee. BMI's licenses, on the other hand, are granted through private bargaining alone.

[8]** DISCUSSION

HN1[] A motion to dismiss for failure to state a claim may be granted only if it appears certain that no relief could be granted under any set of facts that could be proved consistent with the allegations. *See* *Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)*; *Lipsky v. Commonwealth United Corp., 551 F.2d 887, 894 (2d Cir. 1976)*; *Burger v. Health Ins. Plan of Greater New York, 684 F. Supp. 46, 49 (S.D.N.Y. 1988)*. The factual allegations set forth in the complaint or counterclaim must be accepted as true, *see* *Zinermon v. Burch, 494 U.S. 113, 110 S. Ct. 975, 979, 108 L. Ed. 2d 100 (1990)*, and the Court must view the allegations in the light most favorable to the pleader. *See* *Scheuer v. Rhodes, 416 U.S. 232, 237, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*; *Yoder v. Orthomolecular Nutrition Inst., Inc., 751 F.2d 555, 562 (2d Cir. 1985)*. ***HN2***[] Even if it appears on the face of the pleadings that recovery is remote, the claim will withstand the motion **[*325]** to dismiss as long as the pleader retains a possibility of success. *Scheuer, 416 U.S. at 237*. To this landscape must be added the caveat that "dismissals on the pleadings are especially disfavored in antitrust cases." *Schwartz v. Jamesway Corp., 660 F. Supp. 138, 141 (E.D.N.Y.* ***[**9]*** *1987)* (citing *Hospital Bldg. Co. v. Rex Hosp.* *Trustees, 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*.

---

[2] "Pay" cable program services typically are offered by cable system operators to subscribers for a monthly premium over the basic monthly cable service fee. Lifetime's cable service is labelled "basic" because it is generally offered by cable operators to subscribers as part of a routine cable package.

[3] Virtually every domestic copyrighted composition is in the repertory of either ASCAP or BMI, but not both. Consequently, defendant asserts, ASCAP and BMI do not compete in the same marketplace. Lifetime must, as a practical matter, seek license relationships with both organizations.

Section 1 of the Sherman Act

Defendant alleges violation of *section 1* of the Sherman Anti-trust Act, *15 U.S.C. § 1 (1982 & Supp. 1990)* in count I of its counterclaim. ***HN3***[] *Section 1* forbids "every contract, combination . . . or conspiracy in restraint of trade or commerce among the several States." The *section 1* claimant must demonstrate (1) concerted action by two or more persons which (2) unreasonably restrains interstate trade or commerce. *See Telectronics Proprietary, Ltd. v. Medtronic, Inc., 687 F. Supp. 832, 837 (S.D.N.Y. 1988)*. *Accord International Distribution Centers, Inc. v. Walsh Trucking Co., Inc., 812 F.2d 786, 793* (2d Cir.), *cert. denied*, *482 U.S. 915, 96 L. Ed. 2d 676, 107 S. Ct. 3188 (1987)*. ***HN4***[] "Unlike the proof required to establish a conspiracy to monopolize under *section 2*, a specific intent to create a monopoly is not required under *section 1*." *Walsh Trucking, 812 F.2d at 793*.

Defendant maintains that the nonexclusive agreements between BMI and its affiliates, which permit the use of the blanket license, represent a concerted effort to increase the prices of music performing rights and to restrict **[**10]** the market choices available to cable program services. Plaintiffs portray defendant's counterclaim and affirmative defenses as substantively identical to a series of earlier profitless challenges to the blanket license, particularly *Buffalo Broadcasting Co. v. American Soc'y of Composers, Authors and Publishers, 744 F.2d 917 (2d Cir. 1984)*, *cert. denied*, *469 U.S. 1211, 84 L. Ed. 2d 329, 105 S. Ct. 1181 (1985)*. *Buffalo Broadcasting* involved a challenge under *section 1* of the Sherman Act by a class of local television stations to the blanket licenses offered by BMI and ASCAP. After a bench trial, Judge Gagliardi ruled that the blanket license was an unreasonable restraint of trade. The Second Circuit reversed, ruling that the class had not established that the blanket license restrained trade.

Writing for a unanimous panel, Judge Newman concluded that given the availability of realistic licensing alternatives, the blanket license had no anti-competitive effect upon local television stations wishing to purchase music performing rights. *See id. at 926-33*. Plaintiffs argue that this ruling foreclosed all future challenges to the blanket license as an unreasonable restraint of trade. The Court disagrees.

[11]** Plaintiffs' position misapprehends the plain import of the Second Circuit's decision. Several passages from Judge Newman's opinion bear out this point. In the decision's preface, Judge Newman wrote:

> "For reasons that follow, we conclude that the evidence was insufficient as a matter of law to show that the blanket license is an unlawful restraint of trade *in the legal and factual context in which it currently exists*."

Id. at 919 (emphasis added). In discussing the precedential effect of *BMI v. CBS, Inc., 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*, [4] Judge Newman wrote: "the fact that CBS did not prove that blanket licensing of networks restrained competition does not necessarily mean that blanket licensing of local stations may not be shown to be a restraint." *Id. at 925*. If any confusion over the significance of *Buffalo Broadcasting* lingered, **[***1687]** Judge Newman erased it in the penultimate sentence of the opinion:

> "*Without doubting that the context in which the blanket license is challenged can have a significant bearing on the outcome*, we hold that the local television stations have not presented evidence in this case . . . ."

[12]** **[*326]** *Id. at 933*. [5]

---

[4] In *BMI*, the Supreme Court held that the blanket license is not a *per se section 1* violation.

[5] The Court does not dispute that Judge Winter, who concurred in *Buffalo Broadcasting*, maintains that absent evidence of agreement among composers or producers to refrain from licensing performing rights independently, "a non-exclusive blanket license cannot restrain competition." *Id. at 934* (Winter, J., concurring). The majority decision of the panel, however, is not that broad. *See BMI, Inc. v. The Christian Broadcasting Network, Inc.*, 89 Civ. 6246 (JES) (Transcript of May 11, 1990 Oral Argument on BMI's motion to dismiss identical antitrust counterclaims of another basic cable television program service, pp. 8-9).

Because the blanket license is not *per se* unlawful, *see* *BMI, Inc., supra, 441 U.S. at 20*, whether it constitutes an unreasonable restraint of trade is determined under the rule of reason. [6] As explained by the Supreme Court, "'the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.'" *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723* **[**13]** *99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)* (citation omitted). Here, an array of factual issues await the crystallizing effect of discovery, including the history of music licensing to cable program services, BMI's reasons for insisting upon the blanket license for cable program services, the presence of disincentives to individual copyright proprietors to market their compositions separately, the concomitant absence of alternatives available to cable program services and the effect of the blanket license on the availability and prices of music performing rights for cable program services.

If plaintiffs' challenge to the sufficiency of defendant's antitrust allegations were governed by the more stringent requirements of *Fed. R. Civ. P. 9(b)*, a different result might obtain. **[**14]** *See Christian Broadcasting* Tr. at 6. Antitrust allegations, however, are governed by the "short and plain statement" requirement of *Rule 8(a)*. Defendant has pleaded sufficient allegations of the material elements of a *section 1* violation to survive a motion to dismiss.

Section 2 of the Sherman Act

HN5[] *Section 2* of the Sherman Act, *15 U.S.C. § 2 (1982 & Supp. 1990)*, affords a basis for three distinct civil claims, each of which defendant alleges: (1) monopolization; (2) attempted monopolization; and (3) conspiring to monopolize. *See* *Medtronic, supra, 687 F. Supp. at 837*.

HN6[] To establish a monopolization claim, the claimant must demonstrate monopolizing conduct coupled with monopoly power in the relevant market. *See* *Delaware & Hudson Railway Co. v. Consolidated Rail Corp., 902 F.2d 174, 178 (2d Cir. 1990)*. ***HN7***[] Monopolizing conduct is "'the willful acquisition or maintenance of [monopoly] power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" *Id*. (quoting *United States v. Grinnell, 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *see* *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)* (describing **[**15]** monopolizing conduct as "exclusionary" or "predatory"). This requirement is in keeping with the cornerstone precept of ***antitrust law*** that competition is to be safeguarded, not competitors. *See* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*; *Kelco Disposal, Inc. v. Browning-Ferris Indus., 845 F.2d 404, 411 (2d Cir. 1988)*, *aff'd*, *492 U.S. 257, 109 S. Ct. 2909, 106 L. Ed. 2d 219 (1989)*; *Medtronic, 687 F. Supp. at 838*.

Defendant alleges that plaintiffs and their affiliates have agreed to accord BMI absolute authority to determine the types of licenses it will offer and the prices at which these licenses will be offered. Defendant further asserts that the affiliates have determined not to license their rights directly, thereby enabling plaintiff to employ the purportedly anti-competitive **[*327]** blanket license. Counterclaim para. 22. Accepting this assertion as true, the Court believes defendant has depicted a "pernicious market structure in which concentration of power saps the salubrious influence of competition." *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 272 (2d Cir. 1979)*, *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*. *Cf*. L. Sullivan, *Handbook of the Law of Antitrust* 107 **[**16]** (1977) (concerted action which enables wielding of monopoly power constitutes monopolization act in violation of *section 2*). Defendant has pleaded the requisite conduct that is exclusionary of competition.

HN8[] Monopolizing power "is a matter of capacity -- the possession of power to control **[***1688]** prices or exclude competition." *Id*. at 30. Before monopoly power may be assessed, the relevant geographic and product markets must be defined. *See* *Speed Auto Sales, Inc. v. American Motors Corp., 477 F. Supp. 1193, 1197*

---

[6] As acknowledged by the *Buffalo Broadcasting* majority, virtually no alleged concerted action has ever been ruled lawful *per se. See* Posner, *The Next Step in the Antitrust Treatment of Restricted Distribution: Per Se Legality*, 48 U. Chi. L. Rev. 6, 23 and n. 62 (1981).

(E.D.N.Y. 1979). "*Rule 8* ***HN9***[] does not require that a [claimant] 'define specifically the boundaries of its purported market' . . . . Questions of market definition can be narrowed and determined through the discovery process." *Minpeco, S.A. v. Conticommodity Servs., Inc., 552 F. Supp. 327, 331 (S.D.N.Y. 1982)*. Here, the relevant product market is apparent: copyrighted musical compositions in BMI's repertoire.

The relevant geographic market is a national one, as BMI offers licenses to cable services across the country. Finally, defendant easily satisfies the requirement of pleading monopoly power within the relevant market. The majority of domestic copyrighted compositions are **[**17]** in either ASCAP or BMI's repertoire, but not in both. Crediting defendant's allegations, a cable service wishing to transmit a program featuring a composition in BMI's repertoire must apply to BMI for the right.

HN10[] An attempted monopolization claim under *section 2* of the Sherman Act comprises three elements: "(1) anticompetitive conduct; (2) intent to monopolize; and (3) a dangerous probability of obtaining monopoly power." *Delaware & Hudson Railway, supra, 902 F.2d at 180*; *see Northeastern Tel. Co. v. American Tel. & Tel. Co., 651 F.2d 76, 85 (2d Cir. 1981)*, *cert. denied*, *455 U.S. 943, 71 L. Ed. 2d 654, 102 S. Ct. 1438 (1982)*. "These elements essentially track those required for a successful monopolization claim." *Delaware & Hudson Railway, 902 F.2d at 180*. Having determined defendant has pleaded a colorable monopolization claim, the same ruling applies *a fortiori* to the attempt claim. *Id*.

HN11[] The conspiracy to monopolize claim entails two components: "'(1) proof of a concerted action deliberately entered into with the specific intent to achieve an unlawful monopoly, and (2) the commission of an overt act in furtherance of the conspiracy.'" *Walsh Trucking, supra, 812 F.2d at 795* (citation omitted). **[**18]** Defendant need not allege that the intended monopoly succeeded in any way; the agreement to restrain trade or monopolize plus the overt act in furtherance of the agreement complete the offense. *Id. at 796 n. 8*. Only "a bare bones statement of conspiracy or injury under the antitrust laws without any supporting facts permits dismissal." *Heart Disease Research Found. v. General Motors Corp., 463 F.2d 98, 100 (2d Cir. 1972)*.

Viewing the allegations in the light most favorable to defendant, the counterclaim alleges an agreement between BMI and its affiliates which facilitated the purportedly anti-competitive blanket license, and that BMI has unreasonably offered only the blanket license to defendant in furtherance of the agreement to deprive music users of less costly licensing arrangements.

Copyright Misuse Counterclaim and Affirmative Defense

The third count of the counterclaim seeks a declaratory judgment that plaintiffs "have misused, extended and enlarged the copyrights they license and such copyrights are . . . unenforceable until such misuse is purged . . . ." Similarly, defendant's third affirmative defense asserts that plaintiffs' alleged copyright misuse **[*328]** bars recovery **[**19]** on their claims. The parties agree that the so-called ***HN12***[] patent misuse doctrine allows a court of equity to refuse protection of a patented invention when the patentee uses his lawful monopoly over the patented invention to assert economic control over unpatented products. *See, e.g., Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 136-40, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. In *United States v. Loew's, Inc., 371 U.S. 38, 45, 9 L. Ed. 2d 11, 83 S. Ct. 97 (1962)*, the Supreme Court recognized that copyright owners may sometimes gain comparable market dominance over their copyrighted articles, enabling them to assert economic control over uncopyrighted products. The Court did not, however, use the opportunity to create a copyright misuse doctrine.

The copyright misuse doctrine has been ill-received in the lower courts. Some courts have flatly rejected the existence of the doctrine. *See, e.g., Rural Tel. Serv. Co., Inc. v. Feist Publications, Inc., 663 F. Supp. 214, 220 (D. Kan. 1987)*; *Orth-O-Vision, Inc. v. Home Box Office, 474 F. Supp. 672, 686 (S.D.N.Y. 1979)*. Others, while recognizing the defense, have rejected its application on the facts. *See United Tel. Co. of Missouri v. Johnson Publishing Co., Inc., 855 F.2d 604, 611-12* ***[**20]*** *(8th Cir. 1988)* (compiling cases); *Broadcast Music, Inc. v. CBS*, [1983-2] Trade Cas. (CCH) para. 65,551 (S.D.N.Y. 1983) (holding that copyright misuse defense unlikely to succeed on the merits). The Court's research discloses no case where the misuse of a copyright prevented recovery on an infringement claim.

Defendant alleges that BMI has used its legal monopoly power to force cable program **[***1689]** services to purchase the blanket license at exorbitant prices. If proven, this would constitute an illegal extension of BMI's monopoly. Although recovery appears remote, the Court is persuaded by the more recent cases that the affirmative defense of copyright misuse is cognizable.

The Court rejects, however, defendant's assertion of the copyright misuse doctrine as a vehicle for affirmative relief. Such a claim is unprecedented and the Court declines to create the claim. Therefore, the Court dismisses count three of the counterclaim.

Public Performance

Defendant claims in its first affirmative defense that the complaint must be dismissed because it does not publicly perform the musical compositions which are the subject of the complaint. Rather, Lifetime asserts that it transmits **[**21]** its programming to cable operators who in turn relay the signal to the television sets of its viewers. Thus, the argument runs, only the cable operators publicly perform the compositions.

HN13[] Public performance of the copyrighted composition is an element of a *prima facie* copyright infringement claim. [7] ***HN14***[] Under the Copyright Act, public performance is defined as either (1) performing the work "at a place open to the public . . . . or (2) "transmitting or communicating a performance . . . to the public, by means of any device or process, whether the members of the public capable of receiving the performance or display receive it in the same place or in separate places and at the same time or at different times." *17 U.S.C. § 101 (1977 & Supp. 1990)*. Plaintiffs submit that the second definition encompasses defendant's provision of programming services to cable system operators. The Court agrees.

[22]** Judge Tenney thoroughly addressed this precise question in *David v. Showtime/The Movie Channel, Inc., 697 F. Supp. 752 (S.D.N.Y. 1988)*. After parsing the statute and reviewing the pertinent legislative history, Judge Tenney concluded:

> "it seems apparent from the scope of the examples provided in the legislative history that ***HN15***[] Congress intended the definitions **[*329]** of public and performance to encompass each step in the process by which a protected work wends its way to its audience. Moreover, it would strain logic to conclude that Congress would have intended the degree of copyright protection to turn on the mere method by which television signals are transmitted to the public."

Id. at 759.

The Court dismisses the affirmative defense that no public performance has occurred.

Equitable Estoppel and Unclean Hands

As a second affirmative defense, defendant asserts that BMI is equitably estopped from bringing its copyright infringement claim by virtue of anticompetitive and unlawful behavior. The fourth affirmative defense alleges that the same behavior constitutes unclean hands barring recovery. Although the two doctrines raised by these affirmative defenses have considerable **[**23]** overlap, the Court will discuss them separately.

---

[7] A copyright plaintiff must make sufficient allegations concerning (1) originality and authorship of compositions; (2) compliance with formalities required to secure a copyright; (3) ownership of the copyrighted compositions; and (4) unauthorized public performance of the copyrighted compositions by defendant. *See Boz Scaggs Music v. KND Corp., 491 F. Supp. 908, 912 (D. Conn. 1980)*. Defendant challenges only the fourth element.

HN16[] "Equitable estoppel applies both in law and in equity to deny a party the right to plead or prove an otherwise important fact -- here, the act of infringement -- because of something he has done or omitted to do." *Tempo Music, Inc. v. Myers, 407 F.2d 503, 507 n. 8 (4th Cir. 1969)*. In *Tempo*, upon which defendant's argument in large measure relies, the Court estopped plaintiff from recovering on its copyright infringement claim because ASCAP, plaintiff's licensing agent, significantly caused the infringement. The defendant supper club in *Tempo* had sought to avoid infringing the copyrights in songs in ASCAP's repertoire by requesting from ASCAP a list of the songs in its repertoire. Although the consent decree governing ASCAP required it to provide such a list on request, ASCAP declined to furnish the list to defendant, who then inadvertently violated certain of plaintiff's copyrights.

HN17[] Crucial to application of the doctrine of equitable estoppel in the copyright infringement context, therefore, is at least partial responsibility of the party seeking recovery for the alleged infringement. *See Broadcast Music, Inc. v.* ***[**24]*** *CBS, Inc*., [1983-2] Trade Cas. P 65,551 at 68,745 (S.D.N.Y. 1983). Defendant maintains that BMI brought about Lifetime's unlicensed **[***1690]** status and the alleged copyright violations by refusing to offer a reasonable license and precluding realistic alternatives. Reading the counterclaim's allegations in the light most favorable to defendant, the Court believes that defendant has alleged the type of direct causation that led the *Tempo* Court to relieve an infringer of liability.

The Fourth Circuit characterized the *Tempo* defendant's position as "impossible" because it could only avoid infringement by playing no music at all or by paying what it regarded "as an exorbitant licensing fee." *Tempo, 407 F.2d at 506*. Plaintiffs argue that defendant's failure to attempt to avoid playing music from the BMI repertoire or to obtain licenses directly from individual owners is fatal to its assertion that BMI in part "caused" the alleged violations. Crediting Lifetime's assertion that it would be unable to obtain licenses directly, it is fatuous to suggest that Lifetime could remain a competitive cable service while unable to transmit programming containing any of the over 1.5 million **[**25]** compositions in BMI's repertoire. The Court cannot dismiss the equitable estoppel affirmative defense at this stage.

HN18[] The unclean hands doctrine "is a limited device, invoked by a court only when a plaintiff otherwise entitled to relief has acted so improperly with respect to the controversy at bar that the public interest in punishing the plaintiff outweighs the need to prevent defendant's tortious conduct." *Playboy Enter., Inc. v. Chuckleberry Publishing, 486 F. Supp. 414, 435 (S.D.N.Y. 1980)*. ***HN19***[] The defense of unclean hands in copyright actions is "recognized only rarely, when the plaintiff's transgression is of serious proportions and relates directly to the subject matter of the infringement action." 3 M. Nimmer, *Nimmer on Copyright, § 13.09[B]* at 13-145 (1988). This doctrine is peculiarly fact-specific, rendering dismissal on the skeletal **[*330]** basis of the pleadings inappropriate. Moreover, the Court's observations concerning dismissal of the equitable estoppel affirmative defense on the pleadings apply with equal force to the unclean hands application. *See supra* pp.19-20.

Dismissal of the Third-Party Complaint

Defendant alleges that Frances W. Preston, the President **[**26]** and Chief Executive Officer of BMI, "has authorized the unlawful conduct of BMI" asserted in the counterclaim and affirmative defenses. Paragraph 13 of the Counterclaim and Third-Party Complaint, which contains the sole direct reference to Preston, purports to incorporate Preston into all references to BMI or counterclaim defendants in the pleading. Preston moves pursuant to *Fed. R. Civ. P. 12 (b)(6)* to dismiss the third-party complaint. *See Kenneth Leventhal & Co. v. Joyner Wholesale Co., 736 F.2d 29 (2d Cir. 1984)*.

Preston advances a congeries of arguments in urging dismissal of the third-party-complaint. Her first argument concededly rises and falls with BMI's motion to dismiss the antitrust claims pressed against it. Therefore, this argument is unavailing.

Preston next correctly points out that officers and employees of a corporation cannot conspire with the corporation for purposes of the joint action essential to a violation of *section 1* of the Sherman Act. *See Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*; *Gucci v. Gucci Shops, Inc., 651 F. Supp. 194, 197 (S.D.N.Y. 1986)*. Defendant does not claim, however, that the requisite concerted action

[27]** derives from an agreement between Preston and BMI. The plurality of actors alleged to have agreed to violate the antitrust laws consists of BMI and its thousands of affiliates. Further, it is firmly settled that ***HN20***[] officers and employees of a corporation "may be held individually liable for corporate actions that violate the antitrust laws if they authorize or participate in the unlawful acts." *Brown v. Donco Enter., Inc. 783 F.2d 644, 646 (6th Cir. 1986)*; *see* *Tillamook Cheese & Dairy Ass'n Tillamook Co. Cream Ass'n., 358 F.2d 115, 118 (9th Cir. 1966)*. A more fundamental defect impairs the third-party complaint.

Fed. R. Civ. P. 14(a), which governs third-party impleader, provides in relevant part:

> ***HN21***[] "a defending party, as a third-party plaintiff, may cause a summons and complaint to be served upon a person not a party to the action *who is or may be liable to the third-party plaintiff for all or part of the plaintiff's claim against the third-party plaintiff* (emphasis added)."

Thus, in order for Lifetime to assert a third-party claim, it must be "attempting to transfer to the third-party defendant liability that may be imposed upon [it] in the main action." *Tri-Ex Enter.,* ***[**28]*** *Inc. v. Morgan Guaranty Trust Co., 586 F. Supp. 930, 932 (S.D.N.Y. 1984)*.

Lifetime may properly assert a third-party complaint against Preston only if she is or may be liable to Lifetime for all or part of Lifetime's copyright infringement liability to BMI. The only ways the Court can conceive Preston could be a proper third-party defendant **[***1691]** would be if she were a co-infringer or a contributory infringer of the copyrights in BMI's repertoire. Plainly she is not. Accordingly the third-party complaint is dismissed.

Conceding its error, Lifetime maintains that Preston may be properly joined as a counterclaim defendant pursuant to *Fed. R. Civ. P. 13* and *20*. *Rule 13(h)* provides that "persons other than those made parties to the original action may be made parties to a counterclaim or crossclaim in accordance with . . . Rules 19 and 20." *Rule 20(a)* permits the joinder as defendants of all persons against whom is asserted any claim arising out of the same transaction "and if any question of law or fact common to all defendants will arise in the action." Since Lifetime seeks to allege the same wrongdoing against BMI and Preston, *Rule 20(a)* is satisfied and Preston may be joined as a counterclaim **[**29]** defendant.

[*331] Lifetime must, of course, amend its answer. Curative assertions in memoranda do not effect the amendment. *See* *Jacobson v. Peat, Marwick, Mitchell & Co., 445 F. Supp. 518, 526 (S.D.N.Y. 1977)*. The Court suggests that in drafting its amended counterclaim, Lifetime apply particular attention to removing the peculiarities in the present answer occasioned by wholesale incorporation-by reference. [8]

CONCLUSION

For the reasons explained above, the Court grants and denies in part BMI's motion to dismiss. Lifetime is directed to file an amended counterclaim within 20 days of this decision. Reciprocal discovery is to proceed. The parties are to **[**30]** appear for a status conference on November 5, 1990 at 11:00 a.m. in courtroom 228.

SO ORDERED.

End of Document

[8] For example, a plain reading of the present pleading reveals such bemusing allegations as: BMI and Preston each have composers and publishers as affiliates, BMI and Preston each control the copyrights which BMI licenses, BMI and Preston were both sued by the United States in 1964, and both BMI and Preston possess unrestrained ability to exert enormous market power.

Vernon v. S. Cal. Edison Co.

United States District Court for the Central District of California

August 30, 1990, Decided ; August 30, 1990, Filed

Case No. CV 83-8137 MRP

HN1[] **Antitrust & Trade Law, Regulated Industries**

Summary judgment is a useful tool for narrowing the issues to be tried in antitrust proceedings. Summary judgment is appropriate in an antitrust case involving a regulated electric utility. A moving party is entitled to summary judgment when there is no genuine issue as to any material fact and the movant is entitled to a judgment as a matter of law. Summary judgment is mandated against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] **Monopolies & Monopolization, Actual Monopolization**

To prove the offense of monopolization under § 2 of the Sherman Act, plaintiff must show that (1) defendant possesses monopoly power in relevant market, (2) defendant willfully acquired or maintained that power, and (3) plaintiff suffered causal antitrust injury.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN3[] **Antitrust & Trade Law, Sherman Act**

To prevail on a claim of attempted monopolization under § 2 of the Sherman Act, plaintiff must demonstrate that (1) defendant had the specific intent to control prices or destroy competition; (2) defendant engaged in predatory or anticompetitive conduct directed towards accomplishing that unlawful purpose; (3) there was a dangerous probability that defendant would succeed in its endeavors; and (4) plaintiff suffered causal antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] **Monopolies & Monopolization, Actual Monopolization**

There is no general unqualified duty for a firm possessing monopoly power to cooperate with its business rivals. A monopolist has no duty to reduce its prices in order to help consumers, or any obligation to extend a helping hand to new market entrants or to help its competitors survive or expand their businesses.

Opinion

FINDINGS OF FACT AND CONCLUSIONS OF LAW IN SUPPORT OF ORDER GRANTING EDISON'S MOTION FOR SUMMARY JUDGMENT ON PLAINTIFF'S FORECLOSURE CLAIMS

Having read and considered the papers and evidence submitted in connection with defendant Southern California Edison Company's ("Edison's") Motion for Summary Judgment on plaintiff's foreclosure damage claims, associated motions of defendant Edison and plaintiff the City of Vernon ("Vernon") and the pleadings filed herein, and having heard oral argument with respect to the proposed findings and conclusions and objections thereto, the Court finds and concludes as follows:

A.

FINDINGS OF FACT

1. *INTRODUCTION*

1.1 Plaintiff Vernon's First Amended and Supplemental Complaint in this action alleged, *inter alia,* that Edison violated §§ 1 and 2 of the Sherman Act through a pattern of conduct commencing in 1961 and continuing into the present. Vernon's contentions fall into three basic categories: (1) those relating to the terms and conditions of Vernon's access to Edison's transmission lines and access to non-Edison sources of power (the "foreclosure" claims); (2) those concerning **[*2]** Edison's rates; and (3) those asserting a conspiracy between Edison and the Nevada Power Company to boycott Vernon.

1.2 Edison has filed motions for partial summary judgment on Vernon's § 2 rate and § 1 group boycott claims, and for summary judgment on Vernon's foreclosure claims.

1.3 By its Order dated March 1, 1990 and "Memorandum of Decision Granting Motions for Summary Judgment with Respect to Rate Claims and Group Boycott Claims" filed March 7, 1990 (the "Memorandum of Decision"), the Court granted Edison's motions for partial summary judgment on the plaintiff's rate and boycott claims.

1.4 These Findings of Fact and Conclusions of Law are made in connection with the Court's Order dated March 1, 1990 granting Edison's Motion for Summary Judgment on Plaintiff's Foreclosure Damage Claims.

2. *FACTUAL BACKGROUND*

(a) *Southern California Edison Company*

2.1 Defendant Edison is an investor-owned utility that provides electric service in central and southern California, within a service territory established by the California Public Utilities Commission ("CPUC").

2.2 Edison, as a fully integrated electric utility, generates, transmits, and distributes electricity.

2.3 Edison **[*3]** provides electric service to residential, commercial, and industrial customers located throughout its service territory.

2.4 Edison also purchases electricity from and sells electricity to other utilities located outside its service territory.

2.5 Edison operates its own electric "control area." A "control area" can be viewed as an area or system within which the operation of all generation, transmission and distribution facilities must be coordinated so that the system is operated as a synchronized integrated whole, at the same frequency, and in a reliable fashion. Typically every major utility operates a control area.

(b) *Vernon and the Other Resale Cities*

2.6 Plaintiff is a California municipality that owns its own distribution system and provides electric service at retail within its boundaries. While Vernon has some generating capacity, most of the power it sells is acquired through wholesale purchases from Edison or other bulk power suppliers.

2.7 Vernon occupies an area of approximately 5.06 square miles and is located within Edison's service territory. Vernon has common boundaries with the City of Los Angeles, the service territory of the Los Angeles Department of Water **[*4]** and Power ("LADWP") and other cities in Los Angeles County that are also within Edison's service territory. Vernon is primarily an industrial city.

2.8 In addition to Vernon, Edison's "wholesale" or "resale" customers include the cities of Anaheim, Azusa, Banning, Colton, and Riverside ("the "Cities"). Because they purchase from Edison wholesale electricity that they resell to their retail customers, Vernon and the Cities are sometimes referred to as "Resale Cities." Like Vernon, the Cities are located within Edison's service territory and each own their own distribution systems and provide electric service at retail within their boundaries. Because Vernon and the Cities do not operate their own control areas and are within Edison's control area, Edison has the ultimate responsibility for meeting their system load requirements.

2.9 From 1962 to 1977, Vernon purchased all of its electricity that it resold to its resale customers from Edison pursuant to an operating agreement entered into by the parties. Since 1977, Vernon has been a partial requirements customer of Edison.

2.10 Vernon and Edison entered into a limited Integrated Operations Agreement ("IOA") restricted to Vernon's participation **[*5]** in the Palo Verde Nuclear Generating Station located in Arizona. Vernon has an ownership interest in this generation facility and has participated through the Southern California Public Power Authority, in which it is a member. The Edison-Vernon Palo Verde IOA is Exhibit P to the O'Malley Opposition Declaration.

(c) *Edison's Transmission Network*

2.11 Edison's transmission lines are a part of an interconnected series of transmission lines connecting Edison with other utilities located throughout the western United States. Edison's Extra High Voltage ("EHV") transmission lines (generally operated at 500 kV or above) are used for the transmission of large blocks of power from remote generation resources, including those of other utilities, to the main grid of Edison's transmission system which is operated at 220 or 230 kilovolts or "kV" (the "220 kV network").

2.12 One group of EHV transmission lines in which Edison has rights is the Pacific Intertie. The Pacific Intertie consists of two 500 kV alternating current ("AC") lines running from Oregon through California (the "AC lines") and one 800 kV direct current ("DC") line running from Oregon through Nevada into Southern California **[*6]** (the "DC line").

2.13 Edison's EHV transmission lines to the Southwest consist principally of 500 kV AC lines from the Los Angeles basin to Nevada, Palo Verde (in Arizona) and the Four Corners area (in New Mexico). Other EHV transmission lines to the Southwest are owned by LADWP, San Diego Gas & Electric Company and the Southern California Public Power Authority.

2.14 Edison's 220-kV network, which consists of a grid or network of 220 or 230 kV transmission lines, is situated in the greater Los Angeles metropolitan area. Edison's 220 kV network connects with a number of major utilities, including LADWP and the California Department of Water Resources ("CDWR").

(d) *Regulation*

2.15 The terms and conditions of Edison's rates and service to its retail customers are regulated by the CPUC. The CPUC also has jurisdiction over Edison in that Edison cannot dispose of its assets or rights which are used or useful for service to retail customers without CPUC approval.

2.16 Edison's rates and terms of service to its resale customers are regulated by the FERC. Any agreements between Edison and its Resale Cities, including Vernon, regarding resale service or transmission must be filed with **[*7]** the FERC. Edison cannot legally charge a rate or provide a service to a Resale City without an appropriate FERC rate schedule for that rate or service being in effect.

2. *17 In 1972*, in part as a result of certain antitrust claims brought by the Cities, Edison and each of the Resale Cities entered into settlement agreements. Those agreements, in addition to releasing Edison from antitrust liability for conduct prior to that time, contemplated a framework within which the Resale Cities could begin to acquire energy from other sources and integrate it into the Edison system.

2.18 Integration is a contractual concept under which resources and loads of independent parties are planned and operated as if they were a single system.

2.19 The integration of resources into Edison's system, as opposed to the mere transmission of such energy by Edison is important because of Edison's rate structure. If Edison integrates a proposed resource, Edison gives the customer credit not only for the energy brought into the system, but also a "capacity credit" for the reduction in generating capacity Edison must maintain.

2.20 Anaheim and Riverside, after five years of negotiations, entered into IOAs with **[*8]** Edison to establish standards for the integration and transmission of resources. These IOAs became part of Edison's rate schedules in 1979.

2.21 Vernon did not seek to participate in the negotiations for IOAs that took place in the 1970s.

2.22 Azusa, Banning and Colton entered into IOAs similar to those entered into by Anaheim and Riverside. These IOAs became part of Edison's rate schedules in 1981.

2.23 Since 1981, Edison has offered to enter into an IOA with Vernon similar to the IOAs with the five Cities. Vernon, however, has refused to enter into such a "generic" IOA.

2.24 Under the 1972 Settlement Agreements, and the Cities' generic IOAs, Edison must provide the Resale Cities with all of their requirements for electricity to the extent the Resale Cities are unable to obtain power from others or from their own facilities. The IOAs have allowed the Resale Cities to build their own generation projects, to participate in joint projects with others, and to purchase capacity from others.

2.25 Edison's standard for the timing of capacity credit in the generic IOAs, § 8.1.2.3 of the IOAs, past applications of that standard, as well as other terms of the IOAs were challenged in FERC Docket **[*9]** No. ER81-177. Although the decision in that Docket is still subject to rehearing, the FERC concluded that the standard set forth in § 8.1.2.3 of the generic IOAs was not just and reasonable because it allowed Edison to discriminate unduly in determining when a wholesale customer should begin receiving capacity credits for a noticed resource. The FERC concluded that a three-year notice requirement for partial requirements customers who intend to acquire and integrate a capacity resource was reasonable. In that FERC Docket, Vernon proposed and supported the position that a three-year notice requirement should be adopted for the integration of a capacity resource. Docket No. ER 81-177, 27 FERC para. 63.053 at 65,205, incorporated by the FERC in its decision (41 FERC para. 61,188 at 61,496). In addition, the FERC found other terms in the generic IOA to be unreasonable.

2.26 In this action, Vernon does not contend that a three-year notice requirement for the integration of capacity is unreasonable.

(e) *Special Condition 12*

2.27 In addition to the IOAs, Special Condition 12 allows the Resale Cities, in certain circumstances, to import and receive credit for capacity obtained from sources **[*10]** other than Edison without "integration" of the resource pursuant to the IOA.

2.28 Special Condition 12 arose, in part, out of an agreement between Edison and Vernon regarding the operation of diesel generators owned by Vernon. In July 1982, Edison and Vernon entered into an agreement under which Edison committed to file a tariff with the FERC which would provide Vernon with an opportunity to operate generation projects within the City of Vernon, including Vernon's diesel generators.

2.29 Special Condition 12 was included within a proposed resale rate schedule filed by Edison with the FERC in October 1983. Under the terms of the July 1982 settlement, Vernon's diesel generators could be used by Vernon when they were available for capacity and associated energy. Under Special Condition 12, additional capacity and associated energy could be generated or imported by Vernon by giving certain notices to Edison, with the first notice due on or before July 1, 1985, for generation or imports commencing during the two-year period January 1, 1987 through December 31, 1988.

2.30 There is no provision for penalties if a resource noticed by a Resale City under Special Condition 12 is not contracted **[*11]** for or actually received by that City and no limit on the amount of a City's load that must be met by Special Condition 12 resources.

2.31 In June 1985, Vernon noticed approximately 27 MW of Special Condition 12 resources from outside the City boundaries, with credit to commence on January 1, 1987. Prior to January 1, 1987, Vernon requested, and Edison agreed (although not obligated to do so under Special Condition 12) that a purchase from CDWR could substitute for the 27 MW of resources from other utilities which Vernon had noticed. Edison provided Vernon firm transmission service on Edison's 220 kV network for the 27 MW of Special Condition 12 resources from CDWR.

2.32 In June 1987, Vernon gave notice for all of the Special Condition 12 resources that it felt it could handle for the period of January 1, 1989 through December 31, 1990. That included 98 MW of capacity and associated energy during the summer and 62 MW of capacity and associated energy during the winter from CDWR. Prior to the start of delivery of resources on January 1, 1989, Edison again permitted Vernon to substitute for certain Special Condition 12 resources previously noticed.

2.33 Vernon has used Special Condition **[*12]** 12 to reduce its dependence on Edison for its capacity and energy needs.

(f) *Interruptible Transmission Service*

2.34 On or about December 15, 1981, Nevada Power Company ("NPC") and Vernon entered into an Interconnection Agreement providing, in part, for the sale of non-firm energy by NPC to Vernon.

2.35 On or about January 5, 1982, Vernon and Edison entered into an agreement for the integration and interruptible transmission service for non-firm energy purchased by Vernon from NPC. The agreement was filed with the FERC and became part of Edison's rate schedules as of February 1, 1982.

2.36 During 1982 and 1983, Vernon imported significant quantities of non-firm energy from NPC under these arrangements.

2.37 On or about December 23, 1983, Edison and Vernon executed an agreement for the integration of, and interruptible transmission service for, non-firm energy purchased by Vernon from the CDWR.

2.38 The NPC and CDWR interruptible transmission service ("ITS") Agreement provided in part that the availability of transmission service "shall be determined at the sole discretion of Edison," and Edison reserved the right to interrupt or curtail such service "at any time and for any reason." **[*13]** Edison has entered into ITS agreements with the other Resale Cities that provide ITS on all of Edison's transmission lines. These agreements also provide for interruption "at any time and for any reason."

2.39 The form of interruptible transmission service contracts offered by LADWP include a provision that allows LADWP to interrupt or curtail such service "at any time and for any reason." One of Vernon's consultants, Mr. Brodie, admitted that interruptions of ITS for minimum load are not unusual in the industry and that the owner of transmission facilities is expected to have a priority of use of those facilities.

2.40 Although Edison's ITS contracts with Vernon and its other Resale Cities allow Edison to interrupt or curtail such transmission service "at any time and for any reason," Vernon has not presented any evidence that when Edison did interrupt Vernon's transmission, that Edison did so for anticompetitive reasons.

(g) *Vernon's bulk power resources*

2. 41 In 1983, Vernon bought nearly all of its electricity from Edison. By 1987, Vernon was purchasing less than one half of its power from Edison.

2.42 As of 1989, Vernon's non-Edison resources included the following: (1) a **[*14]** diesel plant with peaking capacity of approximately 21.5 MW; (2) entitlements of an average of approximately 11 MW of peaking power and associated energy from Hoover Dam; (3) a 10.6 MW interest in the Palo Verde Nuclear Generating Station; and (4) two gas turbines with a total peaking capacity of 11.2 MW. Vernon also purchases approximately 98 MW during the summer and 62 MW during the winter of capacity and associated energy from the CDWR, and 30 MW of capacity and associated energy from LADWP. In total, Vernon currently has capacity from non-Edison resources of approximately 180 MW during the summer and 145 MW during the winter.

2.43 Vernon's electric requirements at its peak are approximately 195 MW, so during the summer months, Vernon has its own non-Edison resources to obtain over 92% of its capacity.

2.44 In addition, Vernon is able to purchase economy energy during off-peak hours from non-Edison sources at the rate of approximately 70 MW.

2.45 Vernon operates its diesels, its Hoover power, CDWR, and LADWP purchases, and the gas turbines, pursuant to Edison's Special Condition 12; Vernon's Palo Verde ownership interest is integrated pursuant to the Edison-Vernon Palo Verde IOA.

[*15] 2.46 Vernon is increasing its outside resources even beyond what it had as of 1989.

3. *VERNON'S FORECLOSURE DAMAGE CLAIMS*

3.1 In support of its foreclosure claims, Vernon alleges that Edison unlawfully restrained Vernon from purchasing bulk power from suppliers other than Edison by denying Vernon access to its transmission lines. Specifically, Vernon contends that Edison should have given the City additional transmission over the Pacific Intertie and over certain other EHV lines extending to the Southwest, as well as unconstrained transmission over Edison's 220 kV network for Vernon's purchases from CDWR. Vernon further alleges that as a result of this foreclosure, as set out in Claims I and II of Vernon's First Amended Complaint, the City was forced to purchase wholesale power from Edison at prices higher than it would otherwise have had to pay. Vernon claims that it was thus unable to compete with Edison in the provision of retail electric service.

3.2 Vernon calculates its damages resulting from the foreclosure as the difference between the rate Edison charged Vernon and that which Vernon alleges it could have paid if Edison had "foreclosed" Vernon's access to the transmission **[*16]** lines.

3.3 Mr. Whitfield A. Russell, an engineer testifying on behalf of Vernon, quantified these overcharge claims in five alternative damage scenarios. Pursuant to the procedural schedule established by the Court, Exhibit 2867 is the final version of Vernon's damage study and is the only one which could have been presented by Vernon at trial.

3.4 Vernon's damage study prepared by Mr. Russell includes three principal damage scenarios, *i.e.*, the Special Condition 12 capacity claims, the IOA capacity claims, and the energy-only claim. The two capacity claim scenarios each offer an alternative formulation, so that there are a total of five different damage models in the Vernon study.

3.5 These alternative calculations, according to Vernon's witness, produce damages ranging from a low of $ 14,969,341 under the so called "Energy-Only" calculation to a high of $ 59,574,440 under the base case "Capacity Damage" calculation. Damages are calculated for the years 1982 through 1987.

3.6 All five of the damage scenarios presented by Vernon assume that Edison is obligated to provide Vernon with a relative size share access to Edison's EHV transmission lines, and unconstrained access to Edison's **[*17]** 220 kV network. The relative size share access calculated by Mr. Russell is based upon the ratio of Vernon's load divided by Edison's total load, including the load of Vernon.

3.7 Under both of Vernon's IOA capacity damage scenarios, Vernon is assumed to be able to import new and additional capacity and energy into the Edison control area, and receive credit for capacity purchases, pursuant to the provisions of a hypothetical IOA, upon 18-months notice to Edison of the proposed additional capacity transactions.

3.8 Although Edison first made Special Condition 12 available to Vernon in June 1984, such that resources noticed pursuant to this provision could be imported to offset demand charges beginning in January 1987, Vernon's Special Condition 12 capacity damage scenarios assume that this provision would have been available for purposes of offsetting Vernon's demand charge by 1983 rather than 1987.

3.9 In summary, the only conduct of Edison from which Vernon claims quantifiable damages consists of: (1) the failure of Edison to provide Vernon with relative size share access to its EHV transmission lines and unconstrained access to its 220 kV network; (2) the failure of Edison to provide **[*18]** Vernon with an Integrated Operations Agreement containing terms acceptable to Vernon, including a provision requiring Edison to accept into its control area, and provide capacity credit for capacity imported on 18-months advance notice; and (3) the failure of Edison to have Special Condition 12 included in its FERC resale rate schedules four years earlier than this rate provision was included in Edison's FERC rate schedules.

3.10 Vernon's damage study does not segregate damages as to alleged foreclosure from any particular transmission line.

3.11 Vernon has also argued that Edison improperly interrupted transmission service provided to Vernon for purchases of non-firm energy from NPC and CDWR pursuant to the interruptible transmission service agreements between Vernon and Edison. Vernon has not, however, quantified any damages specifically arising from this alleged conduct.

3.12 Vernon's "relative size share" claim is premised on the argument that Vernon is entitled to direct relative size share access to Edison's EHV transmission lines, including Edison's entitlement on the Pacific Intertie and its transmission facilities linking Edison with the desert Southwest. The relative size **[*19]** share entitlement postulated by Vernon would give the City firm transmission service over Edison's EHV lines in an amount determined by first calculating Vernon's load as a proportion of Edison's total load and then multiplying this percentage figure by the megawatt capacity of the particular transmission lines. Vernon claims that Edison was obligated under the antitrust laws to offer this type of access even in the absence of a specific request by the City and even if Edison is unaware that access was desired.

3.13 The Court finds that Vernon has never made a formal request to Edison for relative size share firm transmission access.

3.14 In addition to this direct relative size share access, Vernon contends that it is entitled to unlimited access to Edison's 220 kV network provided there is sufficient capacity to meet the total demand, and if the grid is unable to handle all the demand, that the constraint on the system should be shared.

3.15 Edison admits that it has not given Vernon direct relative size share access to its transmission lines as assumed in Vernon's damage study.

3.16 If Edison granted Vernon relative size share access when Edison was fully utilizing its transmission **[*20]** lines to import low cost power, the result would be to shift the benefit of the low cost power to Vernon and away from Edison's other customers.

3.17 Exhibits A, B and C attached by Vernon to its "Double Dip" Motion demonstrate the shifting of benefits that would occur had Edison acceded to a Vernon demand for greater access to Edison's transmission lines.

3.18 Exhibit C is a specific example of how the type of access assumed by Vernon in its damage claims would discriminate in Vernon's favor and against Edison's retail customers. Page 1 of that exhibit shows that the wholesale customer shares equally and proportionately in the benefits of Edison's low-cost imported energy. Pages 2 and 3 of that exhibit reveal how providing a 10% relative size share access, with the remainder purchased pursuant to an average cost-based wholesale rate, would discriminate in favor of the wholesale customers and against the retail customers. As can be seen on page 3, as a result of the "double dip," [1] the energy costs of the wholesale customer are decreased, with additional costs imposed on the retail customers. This disproportionate access would result in the wholesale customer obtaining a higher percentage **[*21]** of its requirements from the low-cost power, while the retail customers would receive a lower percentage of their requirements from the same source.

---

[1] That is, access to low-cost energy both from direct transmission use and indirectly through Edison's resale rates.

3.19 To the extent the foregoing Findings of Fact are also Conclusions of Law, they are to be construed as Conclusions of Law as well.

B.

CONCLUSIONS OF LAW

4. *STANDARDS FOR GRANTING SUMMARY JUDGMENT*

4.1 ***HN1***[] Summary judgment is a useful tool for narrowing the issues to be tried in antitrust proceedings. *Matsushita Electric Industrial Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 585-86 (1986)*; *Richards v. Neilsen Freight Lines, 810 F.2d 898, 902 (9th Cir. 1987)*; *Universal Analytics, Inc. v. MacNeal-Schwendler Corp., 707 F. Supp. 1170, 1173-74* *("Universal Analytics").*

4.2 Summary judgment is appropriate in an antitrust case involving a regulated electric utility. *See* *City of Mt. Pleasant, Iowa v. Associated Electric Coop, Inc.,* ***[*22]*** *838 F.2d 268, 273 (8th Cir. 1988)* (the court expressly declined to accept the plaintiff's contention that "a different, heightened standard for summary judgment applies in complex antitrust cases.").

4.3 A moving party is entitled to summary judgment when "there is no genuine issue as to any material fact" and the movant "is entitled to a judgment as a matter of law." *See* *Fed. R. Civ. Proc. 56(c)*. Under the *Celotex* Court's interpretation of this rule, summary judgment is mandated "against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp. v. Catrett, supra, 477 U.S. at 322*.

4.4 The Court concludes that there is no genuine issue to any material fact, and that Edison's Foreclosure Motion can be decided as a matter of law. The Court further notes that Vernon appears to agree with Edison that in this case, the sufficiency of Edison's proffered business justification is a matter of law and is thus appropriate for resolution pursuant to Edison's Foreclosure Motion. Vernon explicitly states that "Edison's asserted business reasons **[*23]** for denying access to Vernon are insufficient as a matter of law." *Vernon's Statement of Genuine issues,* [2] *Issue No. 4, at 3. See, id.*, *Issue Nos. 5, 12-13, at 3-4.* Moreover, Vernon failed to submit any facts sufficient to controvert or raise a factual dispute underlying the issue of legitimate business justification. *See*, *e.g.*, *Vernon's Opposition Memorandum at 22-27.*

5. *ELEMENTS OF A § 2 CLAIM FOR MONOPOLIZATION AND ATTEMPTED MONOPOLIZATION*

5.1 ***HN2***[] To prove the offense of monopolization under § 2, Vernon must show that (1) Edison possesses monopoly power in relevant market, (2) Edison willfully acquired or maintained that power, and (3) Vernon suffered causal antitrust injury. *Oahu Gas Service, Inc. v. Pacific Resources, Inc., 838 F.2d 360, 363 (9th Cir.)*, *cert. denied, 109 S. Ct. 180 (1988) ("Oahu Gas Service")*, *Catlin v. Washington* ***[*24]*** *Energy Co., 791 F.2d 1343, 1347 (9th Cir. 1986)*.

5.2 ***HN3***[] To prevail on a claim of attempted monopolization under § 2, Vernon must demonstrate that (1) Edison had the specific intent to control prices or destroy competition; (2) Edison engaged in predatory or anticompetitive conduct directed towards accomplishing that unlawful purpose; (3) there was a dangerous probability that Edison would succeed in its endeavors; and (4) Vernon suffered causal antitrust injury. *See* *California Computer Products, Inc. v. IBM Corp., 613 F.2d 727, 736 (9th Cir. 1979)*.

5.3 To show that Vernon's claims constitute § 2 violations under either theory, Vernon must show that these claims constitute anticompetitive conduct that caused antitrust injury to Vernon.

---

[2] "Vernon's Statement of Genuine Issues" refers to Vernon's Statement of Genuine Issues of Fact Submitted in Opposition to Edison's Foreclosure Motion.

5.4 In its Foreclosure Motion, Edison assumed, solely for the purposes of the Foreclosure Motion, that there was competition between Edison and Vernon, that Edison had monopoly power in a properly defined market, and that Edison's transmission lines are essential facilities. For the purpose of ruling on this Foreclosure Motion, the Court also makes these assumptions, and makes no findings and has reached no conclusions on the issues of competition, **[*25]** monopoly power, or essential facilities.

5.5 In regard to the issue of whether Edison's transmission lines are essential facilities, the Court finds that there are factual questions on this issue, and that such factual questions required the denial of Vernon's Motion for Partial Summary Judgment on the Essential Facilities Claim (Vernon's "Essential Facilities Motion"). The Court notes, however, that credible arguments can be made that Edison's transmission facilities are not essential facilities within the meaning of the antitrust laws.

5.6 With respect to the issue of franchise competition, the Court finds that there are factual questions and that such factual questions required the denial of Vernon's Motion for Partial Summary Judgment on the Franchise Competition Claims (Vernon's "Franchise Competition Motion").

6. *ANTITRUST OBLIGATIONS IMPOSED UPON A COMPANY WITH MONOPOLY POWER*

6.1 ***HN4***[] There is no general unqualified duty for a firm possessing monopoly power to cooperate with its business rivals. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 600*.

6.2 A monopolist has no duty to reduce its prices in order to help consumers, *Berkey Photo, Inc. v. Eastman* ***[*26]*** *Kodak Co., 603 F.2d 263, 294 (2d Cir. 1979)*, *cert. denied, 444 U.S. 1093 (1980)*, or any obligation to extend a helping hand to new market entrants or to help its competitors survive or expand their businesses, *California Computer Products, Inc. v. IBM, supra, 613 F.2d at 744*.

6.3 As the Ninth Circuit has recently acknowledged:

It is consistent neither with *Berkey Photo* nor with the body of ***antitrust law*** as a whole to say that a holder of lawful monopoly power must passively concede every time someone else demands the right to do some portion of what that firm does, regardless of whether the services at issue are performed within the scope of the lawfully acquired monopoly and regardless of whether the 'monopolist' is merely conducting itself in a way that any other (non-monopolist) firm would under the circumstances.

Catlin v. Washington Energy Co., 792 F.2d at 1347, quoting *Grason Electric Co. v. Sacramento Mun. Utility Dist., 571 F. Supp. 1504, 1517 n.17 (E.D. Cal. 1983)*.

6.4 There are certain occasions, however, when a court will impose affirmative obligations on a monopolist. *See*, *e.g.*, *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472* ***[*27]*** *U.S. at 601*. Where the monopolist's competitor is the monopolist's customer as well, the antitrust laws may impose duties on the monopolist to ensure that the monopolist's conduct does not unjustifiably impair its customer's ability to compete. *See* *Olympia Equipment Leasing, 797 F.2d at 376*; *Oahu Gas Serv., 838 F.2d at 368*.

6.5 Although affirmative duties are imposed on a monopolist, "these duties are not absolute, however; they arise only when there is no justification for refusing to aid a competitor." *Oahu Gas Service, supra, 838 F.2d at 368*; *Aspen Skiing, supra, 472 U.S. at 604-05*. Thus, even if the monopolist has affirmative duties to its competitors, if the monopolist had a legitimate business justification for its conduct, the plaintiff cannot prevail on its claim of a violation of § 2. *See, e.g.*, *Oahu Gas Service, supra, 838 F.2d at 368*; *Image Technical Service, Inc. v. Eastman Kodak Co., 90 Daily Journal D.A.R. 4702, 4705 (9th Cir. 1990)*; *Theee Movies of Tarzana v. Pacific Theatres, Inc., 828 F.2d 1395, 1400-1401 (9th Cir. 1987)*, *cert. denied, 108 S. Ct. 1028 (1988)*. *See also*, *Universal Analytics, supra, 707 F. Supp. at 1180*.

6.6 Under **[*28]** this standard, even the presence of a predatory motive "will not make otherwise lawful conduct (i.e., conduct engaged in for a legitimate business purpose) unlawful." Universal Analytics, supra, 707 F. Supp. at 1180 (citation omitted). As the Ninth Circuit in *Oahu Gas Service* stated:

Where a monopolist's refusal to aid a competitor is based partially on a desire to restrict competition, we determine antitrust liability by asking whether there was a legitimate business justification for the monopolist's conduct. *See* Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L.Ed.2d 467 (1985); Dimidowich v. Bell & Howell, 803 F.2d 1473, 1478 (9th Cir. 1986); Drinkwine v. Federated Publications, Inc., 780 F.2d 735, 740 (9th Cir.), *cert. denied, 475 U.S. 1087, 106 S. Ct. 1471, 89 L.Ed.2d 727 (1986)*.

Oahu Gas Service, supra, 838 F.2d at 368.

6.7 Under this view of the legitimate business justification defense, the Ninth Circuit has found a variety of conduct not to be in violation of the antitrust laws. *See, e.g.*, Oahu Gas Service, 838 F.2d at 360 (monopolists-suppliers' decision not to expand refinery justified where **[*29]** investment required would have resulted in negative return because of price controls); The Jeanery, Inc. v. James Jeans, Inc., 849 F.2d 1148, 1159-60 (9th Cir. 1988) (improvement of the defendant's distribution network); Mozart Co. v. Mercedes-Benz of North America, Inc., 833 F.2d 1342, 1349 (9th Cir. 1987), *cert. denied, 109 S. Ct. 179 (1988)* ("Mozart") (quality control over the products and services provided by the defendant); Drinkwine v. Federated Publications, Inc., 780 F.2d 735, 740 (9th Cir. 1985), *cert. denied, 475 U.S. 1087 (1986)* (same).

7. *THE CONDUCT CHALLENGED BY VERNON DOES NOT VIOLATE § 2 OF THE SHERMAN ACT*

(a) *Vernon's Relative Size Share Access Claim*

7.1 Even assuming that Edison has monopoly power and viewing Edison's transmission facilities and rights as an "essential facility", Vernon cannot sustain its allegations of an antitrust violation premised on Edison's refusal to provide relative size share transmission access. Under the essential facilities doctrine, Edison is only required to give Vernon reasonable access to its transmission network. *See*, *e.g.*, Southern Pacific Communications Co. v. AT&T Co., 740 F.2d at 1009; **[*30]** *In* Re Air Passenger Computer Reservations Systems Antitrust Litigation, 694 F. Supp. 1443, 1451 (C.D. Cal. 1988). Reasonable access does not include that which would harm Edison's other customers or which would be impractical. Southern Pacific Communications Co. v. AT&T Co., supra, 740 F.2d at 1009, quoting Hecht v. Pro-Football, Inc., 570 F.2d 982, 992-93 (D.C. Cir. 1977), *cert. denied, 436 U.S. 956 (1978)*.

7.2 Moreover, even complete denial of access to an essential facility is not an antitrust violation where there is a legitimate business justification for the denial. *See*, *e.g.*, Image Technical Service, Inc. v. Eastman Kodak Co., supra, 90 Daily Journal D.A.R. at 4705; Becker v. Egypt News Co., Inc., 713 F.2d 363, 366 (8th Cir. 1983); *Venture Technology, Inc. v. Nat'l Fuel Gas Co.,* 1980-81 Trade Cas. (CCH) para. 63,780, at 78-169 (W.D.N.Y. 1981), *rev'd on other grounds,* 685 F.2d 41 (2d Cir.), *cert. denied,* 459 U.S. 1007 (1982).

7.3 Under the standards articulated in the foregoing cases, Edison's failure to allow Vernon "relative size share" access to Edison's EHV lines is not unlawful anticompetitive conduct. Vernon has conceded that **[*31]** if Edison granted Vernon the access it has demanded, the costs for Edison's other customers would increase. Even assuming competition exists between Edison and Vernon, Edison is not obligated by the antitrust laws to confer a benefit on Vernon at the expense of its own customers. *Town of Massena v. Niagara Mohawk Power Corp.,* 1982-82 Trade Cases (CCH) para. 63,526 (N.D.N.Y. 1980), *see also,* Hect, 570 F.2d at 992-93 ("antitrust laws do not require that an essential facility be shared if such sharing would be impractical or would inhibit the defendant's ability to serve its customers adequately").

7.4 Edison's justification for not granting Vernon relative size share access is distinguishable from that proffered by the utility, and rejected by the Supreme Court, in Otter Tail Power Co. v. United States, 410 U.S. 366, 372, *reh'g denied, 411 U.S. 910 (1973)*. In *Otter Tail,* the Court addressed a situation where the Otter Tail Power Company had refused to sell wholesale power to municipal systems and refused to wheel power as well. Otter Tail's total refusals were motivated by an intent to retain the municipals as all-requirements customers. This result was achieved **[*32]** by these absolute refusals to deal on an "essential facility." Otter Tail did not argue that it lacked excess transmission capacity to provide transmission service or that its transmission system could not accommodate new imports wheeled into its municipal customers. Otter Tail's only justification for its refusals to deal was the desire to keep its municipals (and future municipals) as captive customers.

7.5 The facts now before this Court are not analogous to those of *Otter Tail.* First, Edison has not refused to sell wholesale power to Vernon. Edison has had in place a partial requirements resale rate and there is no evidence that Edison ever threatened, or even suggested, that it would terminate that service. Second, Edison has not refused to wheel power to Vernon. As is stated above, Edison has provided Vernon with significant transmission service (or "wheeling") for outside resources, and as a result, Vernon is now buying relatively little power from Edison. Most of Vernon's power needs are being met from outside resources "wheeled" to Vernon by Edison. Third, Edison's denial of access to its transmission system was motivated by a desire to benefit its own customers rather **[*33]** than just Vernon. This is a legitimate business justification.

7.6 As a matter of law, Edison's conduct with respect to transmission has not been unreasonably exclusionary.

(b) *Vernon's IOA Claim*

7.7 The issue in regard to the IOA claim is not whether Edison can foreclose access to outside resources since it is clear that Edison has offered Vernon an IOA and access to outside resources. An IOA and access has been made available to Vernon on the same terms and conditions as for the other Resale Cities; Vernon made a decision to restrict its own IOA to its Palo Verde purchases.

7.8 As with Vernon's demand for relative size share access, to the extent that Edison had a duty to integrate Vernon's power purchases, that duty is not absolute; it is limited by Edison's legitimate business justifications.

7.9 Even assuming an obligation of Edison to furnish a different IOA than what was actually offered to Vernon, the Court concludes that Edison had a legitimate business justification for not providing Vernon with an IOA with only an 18-month notice period for capacity additions to the Edison control area.

7.10 The Court further notes that Vernon has previously asserted, and the FERC has **[*34]** concluded, that a three-year notice period is appropriate, and hence antitrust liability cannot be premised in this action based upon an IOA that has only an 18-month notice period.

7.11 Vernon's damage study improperly assumes that the failure of Edison to provide an IOA with an 18-month notice provision was unlawful, since the failure to provide Vernon with an IOA with an 18-month notice provision is not an antitrust violation.

7.12 Vernon has presented no evidence which raises a triable issue of fact with respect to the IOA.

(c) *Vernon's Special Condition 12 Claim*

7.13 In that the Court has concluded that there is and has been a legitimate business justification for Edison refusing to allow the import of capacity resources into the Edison control area on less than three-years' notice, the Court further concludes that Edison was under no obligation under the antitrust laws to offer Special Condition 12 to Vernon.

7.14 Vernon's Special Condition 12 claim is analogous to that raised by the plaintiff in *Olympia Equipment Leasing Co. v. Western Union Telegraph Co., supra, 797 F.2d at 376*, and was rejected by the court in that case. In *Olympia,* the plaintiff alleged that **[*35]** Western Union's withdrawal of assistance in marketing telex equipment constituted a Sherman Act § 2 violation. The court rejected the plaintiff's contention. Reasoning that a monopolist has no generalized duty to extend a helping hand to its competitors. The court concluded that Western Union's withdrawal of voluntary assistance could not possibly constitute a § 2 violation.

If a monopolist does extend a helping hand, though not required to do so, and later withdraws it as happened in this case, does he incur antitrust liability? We think not . . . . Since Western Union had no duty to encourage the entry of new firms into the equipment market, the law would be perverse if it made Western Union's encouraging gestures the fulcrum of an antitrust violation.

Id., 797 F.2d at 376.

7.15 This rationale applies equally to Vernon's contentions concerning the availability of Special Condition 12. Here, Edison had no duty under the antitrust laws to provide Special Condition 12 treatment to Vernon. Having no such obligation, its failure to provide Special Condition 12 earlier than it actually did cannot be the basis of a § 2 violation.

7.16 The Court concludes that Edison had a legitimate **[*36]** business justification for not implementing Special Condition 12 earlier than it did.

7.17 Vernon's damage study improperly assumes that the failure of Edison to initiate Special Condition 12 earlier than it did was unlawful, since the failure to initiate Special Condition 12 earlier was not an antitrust violation.

7.18 Vernon has presented no evidence which raises a triable issue of fact with respect to Special Condition 12.

7.19 Because two of Vernon's damage scenarios are predicated upon the existence of Special Condition 12 years before it was actually offered, the conduct underlying these scenarios is not a violation of § 2 of the Sherman Act.

(d) *Vernon's Interruptible Transmission Service Claim*

7.20 The granting of summary judgment with respect to Vernon's contentions based upon purportedly improper denials, interruptions, or curtailments of ITS for nonfirm energy is mandated on three separate grounds.

7.21 First, Vernon has failed to quantify any damages arising from any of these interruptions. As the Court explained in its "Memorandum of Decision" (at 14-16), a plaintiff must show some measurable damages flowing from an antitrust injury in order to meet the requirements **[*37]** of § 4 of the Clayton Act, *15 U.S.C. § 15*. Vernon has failed to make this showing.

7.22 Second, Vernon's concerns in regard to interruptions at best involve the interpretation of contract language giving Edison discretion as to when interruptions can be made. A contractual dispute as to the reasonableness of conduct is not enough to support an antitrust claim. *See* *Universal Analytics, supra, 707 F. Supp. 822, 828 (N.D. Cal. 1986)*. *See*, *also*, *Colorado Interstate Gas Co. v. Natural Gas Pipeline Co.,* 19892 Trade Cas. (CCH) para. 68,751, at 61,950 (10th Cir.).

7.23 Third, the Court concluded that Vernon has failed to demonstrate that Edison's reasons for interrupting were not legitimate.

8. *THE CHALLENGED CONDUCT VIEWED SEPARATELY AND AS A WHOLE*

8.1 In examining Edison's conduct that is alleged to give rise to damages, the Court has concluded that the challenged conduct does not constitute a violation of § 2 of the Sherman Act. None of the challenged conduct individually amounts to an antitrust violation and viewing the conduct in its totality does not change any of the conclusions as to the propriety of the conduct.

8.2 At times in its opposition, Vernon argued **[*38]** that a number of other Edison alleged acts or conduct constituted evidence of violations of the antitrust laws. Vernon, however, failed to link any of these other alleged acts to any quantifiable damages, and Vernon makes no claim of damages or injury arising from these alleged acts. Nor has Vernon presented any arguments to demonstrate that any such acts or conduct has any sort of synergistic effect when viewed as a whole.

8.3 Accordingly, for the reasons set out at pages 19-20 of the Court's Memorandum of Decision, the Court concludes that summary judgment in favor of Edison and against Vernon is appropriate.

9. *CONCLUSIONS*

9.1 To the extent that the foregoing Conclusions of Law are also Statements of Fact, they are intended to be Findings of Fact as well.

9.2 Defendant Edison is entitled to summary judgment on Vernon's foreclosure damage claims in this action.

9.3 Having granted summary judgment in favor of defendant Edison and against plaintiff Vernon on all damage claims in this action and made the above stated Findings and Conclusions, the Court asked plaintiff Vernon to advise the Court of what remained for trial. Vernon advised the Court that the foregoing Findings of **[*39]** Fact and Conclusions of Law address and dispose of all remaining claims of Vernon herein, including those in Claim I of the First Amended Complaint for which Vernon is seeking relief. As a consequence, judgment in this action should now be entered in favor of defendant Edison and against plaintiff Vernon, with Edison to recover its costs of suit herein.

JUDGMENT - August 30, 1990, Filed

The Court having granted Edison's Motions for Summary Judgment on plaintiff's foreclosure claims, rate claims and group boycott claims, and having filed its Memorandum of Decision and Findings of Fact and Conclusions of Law thereon, and the issues having been duly heard and a decision having been duly rendered.

IT IS HEREBY ORDERED AND ADJUDGED that the plaintiff City of Vernon take nothing in this action, that this action be dismissed on the merits and with prejudice, and that defendant Southern California Edison Company shall recover from plaintiff City of Vernon its costs in this action in the amount of $.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is a harsh remedy which should only be granted when the moving party has established his right to judgment with such clarity as not to give rise to controversy.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] **Summary Judgment, Burdens of Proof**

A district court may grant a motion for summary judgment if all of the information before the court demonstrates that there is no genuine issue as to material fact and the moving party is entitled to judgment as a matter of law. The burden is on the moving party. Once the moving party discharges this burden, the non-moving party must do more than show that there is some doubt as to the facts. Instead, the non-moving party bears the burden of setting forth specific facts showing that there is sufficient evidence in its favor to allow a jury to return a verdict for it.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN3[] **Summary Judgment, Entitlement as Matter of Law**

In passing on a motion for summary judgment, the court must review the facts in a light most favorable to the party opposing the motion and give that party the benefit of any inferences that can logically be drawn from those facts. The court is required to resolve all conflicts of evidence in favor of the non-moving party.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN4[] **Relevant Market, Geographic Market Definition**

The relevant market is determined by reference to both the product market and the geographic market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] **Regulated Practices, Market Definition**

The essential test for ascertaining the relevant product market involves the identification of those products or services that are either (1) identical to or (2) available substitutes for a party's product or service. This comparative analysis has been characterized as the reasonable interchangeability standard. Reasonable interchangeability may be gauged by (1) the product's uses, i.e., whether the substitute products or services can perform the same function, and/or (2) consumer response (cross-elasticity of demand).

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Regulated Practices, Market Definition**

Cross-elasticity of demand refers to the change in the demand by consumers for one product as the result of a change in the price of another product.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

[HN7]() [] **Regulated Practices, Market Definition**

The market test may be utilized in conjunction with submarket criteria. A submarket may be determined by examining such practical indicia as (1) industry or public recognition of the submarket as a separate economic entity, (2) the product's peculiar characteristics and uses, (3) unique production facilities, (4) distinct customers, (5) distinct prices, (6) sensitivity to price changes, and (7) specialized vendors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

[HN8]() [] **Regulated Practices, Market Definition**

Only reasonably interchangeable products may be included in the same market. A product is reasonably interchangeable for another if consumers of the products considered them to be reasonable substitutes.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

[HN9]() [] **Sherman Act, Claims**

To establish monopolization in violation of the Sherman Act, *15 U.S.C.S. § 2*, it must be shown that the accused party (1) possessed monopoly power in the relevant market; and (2) used its monopoly power to foreclose competition, gain a competitive advantage, or destroy a competitor.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

[HN10]() [] **Regulated Practices, Monopolies & Monopolization**

Monopoly power is defined as the power to control prices and exclude competition with respect to a particular product and within a particular geographic market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

[HN11]() [] **Actual Monopolization, Claims**

To prove a violation of *15 U.S.C.S. § 2*, whether based upon a claim of attempted or actual monopolization, a plaintiff must show that a defendant engaged in anticompetitive behavior, that is, a defendant used its monopoly power to foreclose competition, gain a competitive advantage, or destroy a competitor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN12[] **Monopolies & Monopolization, Actual Monopolization**

A mere showing of monopoly power unaccompanied by evidence of anticompetitive behavior is insufficient to support a claim for illegal monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

Anticompetitive conduct is conduct without legitimate business purpose. Such conduct makes sense only because it eliminates competition. Acts which are ordinary business practices typical of those used in a competitive market do not constitute anticompetitive conduct violative of the Sherman Act, *15 U.S.C.S. § 2*. To be labeled anticompetitive, the conduct involved must be such that its anticipated benefits were dependent on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN14[] **Monopolies & Monopolization, Actual Monopolization**

Under the essential facilities doctrine, those in possession of facilities which cannot practically be duplicated must share the facilities with their competitors on fair terms. The policy behind prohibiting denial of an essential facility to a competitor, at least in part, is to prevent a monopolist in a given market from using its power to inhibit competition in another market.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN15[] **Regulated Practices, Monopolies & Monopolization**

The essential facilities doctrine requires (1) control of an essential facility by a monopolist, (2) the inability to practically or economically duplicate the facility, and (3) the unreasonable denial of the use of the facility to a competitor when such use is economically and technically feasible.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN16[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is defined as the sale of one item, the tying product, on the condition that the buyer purchase a second product, the tied product, from the same source.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN17[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of the tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such forcing is present, competition on the merits in the market for the tied item is restrained and the Sherman Act, *15 U.S.C.S. §§ 1* and *2*, is violated.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN18[] **Private Actions, Standing**

The question of standing to sue under the Clayton and Sherman Acts is one of law. Antitrust standing requirements go beyond injury in fact. The court must also determine whether the plaintiff, even if injured, is the proper party to bring the action.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN19[] **Clayton Act, Claims**

Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, authorizes private damage suits for violations of federal antitrust laws by persons injured in their business or property by reason of anything forbidden in the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN20[] **Private Actions, Standing**

In order to establish standing, a plaintiff must demonstrate that the antitrust injury is of the type the antitrust laws were designed to prevent and that the injury flows from that which makes the defendant's acts unlawful. A mere causal connection between an antitrust violation and harm to plaintiff cannot be the basis for antitrust compensation unless the injury is directly related to the harm the antitrust laws were designed to protect. To have standing to sue under the antitrust laws, the plaintiff must be the target of the anticompetitive activity, not one who has merely suffered indirect, secondary, or remote injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN21[] **Private Actions, Standing**

In order to determine if a party has standing, the court must first define the antitrust injury that the antitrust laws concerning tie-ins were designed to prevent. The anti-competitive effects of the tying agreement are two-fold. First, the tying agreement may force the party subject to the tie to give up substitutes for the tied product, or may force the party subject to the tie to purchase a product for which he has no use. Second, the tying agreement may destroy the free access into the market of suppliers of the tied product. Therefore, the court's focus is upon competition in the tied market. Because restraints on competition in the tied market affect consumers and competitors in the tied market, consumers and competitors in the tied market are the parties that have standing to sue.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN22[] **Remedies, Damages**

Section 16 of the Clayton Act, *15 U.S.C.S. § 26*, also authorizes private suits for injunctive relief against threatened loss or damage by a violation of the antitrust laws. Although the standing rules for suits under Section 4 and Section

16 of the Clayton Act are somewhat different, standing under Section 16 also requires that the plaintiff show a threatened antitrust injury to receive injunctive relief.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN23[] **Antitrust & Trade Law, Sherman Act**

Under the Sherman Act, *15 U.S.C.S. § 1*, every contract, combination, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

International Trade Law > International Commerce & Trade > Exports & Imports > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN24[] **Conspiracy to Monopolize, Sherman Act**

Under the Sherman Act, *15 U.S.C.S. § 1*, there are two essential elements of any *section 1* offense: (1) a contract, combination, or conspiracy, resulting in (2) an unreasonable restraint of trade.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN25[] **Antitrust & Trade Law, Sherman Act**

To find a violation of section 1of the Sherman Act, *15 U.S.C.S. §1*, a court must first find the existence of a contract, combination, or conspiracy. A conspiracy imports a plurality of persons acting in concert to attain a common goal or purpose. Neither independent nor unilateral action is proscribed.

Antitrust & Trade Law > Sherman Act > Claims

International Trade Law > International Commerce & Trade > Exports & Imports > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

International Trade Law > General Overview

HN26[] Sherman Act, Claims

The second element of a *section 1* violation of the Sherman Act, *15 U.S.C.S. § 1*, unreasonable restraint of trade, may be established by proof that the conspiracy was of a type that the law finds to be inherently unreasonable, a per se violation, or it may rest on a showing of anticompetitive motive or effect in the particular case, a rule of reason violation.

Antitrust & Trade Law > Sherman Act > Claims

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN27[] Sherman Act, Claims

There are certain business combinations and practices which are so pernicious and devoid of redeeming attributes that they are considered to be unreasonable restraints on interstate or foreign commerce per se. If a party is injured as a result of a per se violation of *section 1* of the Sherman Act, *15 U.S.C.S. § 1*, he need not allege or prove any particular effect or impact of the violation on interstate or foreign commerce; the existence of such an effect or impact is conclusively presumed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN28[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A practice could only be considered a per se violation if its effect and purpose is to threaten the proper operation of our predominately free-market economy, that is, if the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output. Thus, the per se label must be applied only after the courts have had considerable experience with the type of conduct challenged and application of the rule of reason has inevitably resulted in a finding of anticompetitive effects.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN29[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Certain categories of per se violations are well defined and include price fixing, certain concerted refusals to deal, horizontal market division, and certain types of tying agreements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

International Trade Law > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN30[] **Vertical Restraints, Price Fixing**

Illegal price fixing includes any combination formed for the purpose of and with the effect of raising, depressing, fixing, or stabilizing the price of a commodity or service in interstate or foreign commerce. Price fixing is per se illegal if it is done horizontally or vertically. Agreements between competitors that tamper with the selling or purchase price of commodities or services constitute horizontal price fixing. Agreements between persons in the chain of distribution that fix the resale price of a commodity or service constitute vertical price fixing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN31[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

If a business practice challenged has not been subject to any previous judicial experience, and if it does not appear that the practice would always or almost always tend to restrict competition, then the rule of reason should be applied rather than the per se rule.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN32[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In order to prevail in a cause of action alleging a conspiracy to restrain trade under the rule of reason, a plaintiff must establish: (1) an agreement among two or more persons or distinct business entities, (2) which is intended to harm or unreasonably restrain competition, and (3) which actually causes injury to competition.

HN33[] **Jurisdiction, Jurisdictional Sources**

28 U.S.C.S. § 1337 provides the court with original jurisdiction of any civil action arising under any act of Congress regulating commerce or protecting trade and commerce against restraint and monopolies.

Judges: [1]** Stephen N. Limbaugh, United States District Judge.

Opinion by: LIMBAUGH

Opinion

[*918] MEMORANDUM

STEPHEN N. LIMBAUGH, UNITED STATES DISTRICT JUDGE

Plaintiff filed an eight count complaint against defendants which arises out of defendants' refusal to sanction for tournament play a bowling ball manufactured by plaintiff. In Counts I - VII plaintiff alleges that defendants' refusal to sanction violated *Section 1* and *Section 2* of the Sherman Antitrust Act. In Count VIII plaintiff alleges that defendant is liable for tortious interference with business relations. This cause is before the Court on defendants' **[*919]** motion for summary judgment on Counts I - VII of plaintiff's complaint.

Summary Judgment Standard

Courts have repeatedly recognized that *HN1*[] summary judgment is a harsh remedy which should only be granted when the moving party has established his right to judgment with such clarity as not to give rise to controversy. *New England Life Ins. Co. v. Null, 554 F.2d 896, 901 (8th Cir. 1977)*. Summary judgment motions, however, "can be a tool of great utility in removing factually insubstantial cases from crowded dockets, freeing courts' trial time for those that really do raise genuine issues of material fact." *City of Mt. Pleasant, Iowa v. Associated Electric **[**2]** Cooperative Inc., 838 F.2d 268, 273 (8th Cir. 1988)*.

Pursuant to *Fed.R.Civ.P. 56(c)*, *HN2*[] a district court may grant a motion for summary judgment if all of the information before the court demonstrates that "there is no genuine issue as to material fact and the moving party is entitled to judgment as a matter of law." *Poller v. Columbia Broadcasting System, 368 U.S. 464, 467, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. The burden is on the moving party. *City of Mt. Pleasant, supra, 838 F.2d at 273*. Once the moving party discharges this burden, the non-moving party must do more than show that there is some doubt as to the facts. *Matsushita Electric Industrial Co. v. Zenith Radio, 475 U.S. 574, 586, 106 S. Ct. 1348, 1355, 89 L. Ed. 2d 538 (1986)*. Instead, the non-moving party bears the burden of setting forth specific facts showing that there is sufficient evidence in its favor to allow a jury to return a verdict for it. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 2510, 91 L. Ed. 2d 202 (1986)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 324, 106 S. Ct. 2548, 2553, 91 L. Ed. 2d 265 (1986)*.

HN3[] In passing on a motion for summary judgment, the court must review the facts in a light most favorable **[**3]** to the party opposing the motion and give that party the benefit of any inferences that can logically be drawn from those facts. *Buller v. Buechler, 706 F.2d 844, 846 (8th Cir. 1983)*. The court is required to resolve all conflicts of evidence in favor of the non-moving party. *Robert Johnson Grain Co. v. Chemical Interchange Co., 541 F.2d 207, 210 (8th Cir. 1976)*. With these principles in mind, the Court turns to an examination of the facts.

Statement of Facts

Plaintiff is a corporation which manufactures and sells urethane bowling balls. The Professional Bowlers Association of America is a nonprofit membership association. The Professional Bowlers Association, Inc. is a wholly owned subsidiary of the Professional Bowlers Association of America which organizes and promotes televised bowling tournaments throughout the United States. The Court will refer to both defendants as the "PBA" or "defendants" when it refers to them collectively.

The Professional Bowlers Association, Inc. sells approximately thirty-four national tournaments to the television networks and title sponsors every year. Each PBA tournament begins with a field of approximately 160 bowlers. After several **[**4]** rounds of play, only the top five bowlers remain. The final rounds of play among the top five bowlers are televised in a program which lasts approximately one and one-half hours. The bowlers compete for purses which range from $ 125,000 to $ 400,000. The money for the tournament purses comes from two sources. First, the PBA licenses to television networks the right to televise the final rounds of PBA national tournaments. The television networks pay the PBA a rights fee in exchange for the licenses. Second, the PBA sells to corporate sponsors the right to associate their name with particular tournaments.

The PBA sells its national tournaments to the networks in three packages, or tour segments. From January through April, ABC broadcasts the "Winter Tour". From June through August, ESPN broadcasts the "Summer Tour". From October through December, NBC broadcasts the "Fall Tour". The television networks purchase the rights to televise PBA tournaments because they can sell 30-second **[*920]** commercial spots to advertisers who wish to advertise their products during the broadcast of the final rounds of the tournaments.

Manufacturers of bowling balls, such as plaintiff, encourage professional bowlers **[**5]** to use their balls during the televised portion of the PBA tournaments. To entice professional bowlers to use their balls during televised tournament play, the manufacturers frequently establish an incentive program by which a manufacturer agrees to pay a certain sum to a professional bowler who uses that manufacturer's ball in the televised portion of the tournament.

In 1984 plaintiff introduced its first bowling ball known as the Blue Tank. Plaintiff submitted the Blue Tank ball to the PBA and in 1984 received approval for the use of the Blue Tank in PBA tournament play. The Blue Tank had a picture of a military tank on its side. Several manufacturers have named their balls and have placed a depiction of the name on the side of the ball. Plaintiff offered an incentive program for bowlers who used the Blue Tank during televised tournament play. The Tank was used three times during televised tournament play during the year of its introduction.

In 1985 plaintiff decided to introduce the "Bud Ball." Plaintiff obtained a license from Anheuser-Busch ("A-B"), a leading manufacturer of domestic beer, for the use of the Budweiser bow tie logo. To create the Bud Ball plaintiff placed the Budweiser **[**6]** bow tie logo on a bowling ball colored in Budweiser red. Plaintiff made arrangements with A-B to develop an incentive program for use of the Bud Ball which would substantially increase a bowler's earnings if he won a PBA tournament while using the Bud Ball.

The PBA promulgates rules and regulations ("PBA Rules") which regulate PBA tournaments and other aspects of the sport of professional bowling. The PBA Rules establish product standards for bowling balls and other bowling equipment. The PBA Rules also restrain PBA bowlers concerning their usage of bowling articles bearing commercial advertisements. The PBA Rules which are relevant to the instant action include:

> Rule VII, Section A [before any bowler can use any new equipment in PBA competition it must have PBA clearance].
>
> Rule VII, Section E [prohibits logos on bowling balls other than the original under which they were manufactured].
>
> Rule XI, Section I and J [before any bowler can avail himself of an incentive offer, it must have PBA approval].

Rule XVIII, Section D [proscribes speech by PBA bowlers during interviews of the name of a commercial organization or product unless it relates to the tournament's title sponsor].

[7]** Rule XX, Section A [logos competitive with a title sponsor are precluded from appearing on a player's shirt].

Manufacturers of bowling balls must apply to the PBA for certification of their balls before a bowling ball can be used in PBA tournament play. On July 16, 1986 Mr. Donald Budde of plaintiff wrote to Mr. Joseph Antenora, commissioner of the PBA, concerning the Bud Ball. Mr. Budde informed the PBA that plaintiff would be introducing the Bud Ball later in the summer for use during the 1986 Fall Tour on NBC. Mr. Antenora mentioned the Bud Ball to Mr. Eddie Elias. Mr. Elias negotiates on behalf of the PBA the sale of the PBA's television rights to the networks and the sale of title sponsorships to the corporations.

Mr. Elias was concerned that the appearance of the Bud Ball in the Fall Tour would cause friction with NBC. Mr. Elias contacted Mr. James Burnette, who was in charge of sales at NBC. Mr. Burnette informed Mr. Elias that NBC would refuse to show the Bud Ball if it were used in one of the tournaments televised by NBC during the Fall Tour. Mr. James Nottingham, an employee in NBC's standards and practices department, warned Mr. Antenora that NBC would consider it a breach **[**8]** of contract if the Bud Ball were used during one of its televised tournaments, and that NBC may not televise the tournaments if the Bud Ball were used. A-B contacted **[*921]** NBC in order to persuade NBC to change its position, but to no avail.

In 1983, NBC and the PBA executed a contract for the years 1984 and 1985 under which NBC provided the production crew for each event on the Fall Tour and paid the PBA a fixed rights fee to televise the tournaments. In 1986, NBC renewed its contract with the PBA on substantially different terms. For 1986 NBC insisted that the PBA assume the responsibility for producing its events. NBC did not pay to the PBA a fixed rights fee. Instead, the PBA had to sell 24 commercial spots (of 30 seconds' length each) per tournament for NBC. The funds from the sale of the commercial spots went directly from the advertiser to NBC. The PBA guaranteed that it would raise a certain sum from such sales. If the PBA was able to arrange for advertising income over this set amount, the PBA would keep the excess amount. However, if the PBA was not able to generate enough spot commercial sales to reach this level, the PBA would suffer a reduction in the rights fees paid to them **[**9]** by NBC to make up the shortfall.

The PBA sells sponsorships for its individual tournaments. Corporate sponsors pay the PBA a fee in order to associate their name with a particular tournament. The PBA was concerned that the Bud Ball would violate their contracts with sponsors such as Brunswick and AMF. Miller Brewing Company ("Miller") changed its sponsor contract in response to the Bud Ball. Miller's sponsor contract with the PBA gave Miller the right to exclude the appearance of advertising for products competitive with Miller during the broadcast of a tournament which Miller sponsored. After the Bud Ball was introduced, Miller changed the terms of the contract with the PBA to prohibit the use of any bowling items containing commercial logos during tournaments it sponsors.

On August 27, 1986 plaintiff made written application to the PBA for a determination that the Bud Ball conformed with PBA product specifications, and for certification of the Bud Ball for use by PBA members. Prior to the application for the Bud Ball, no other ball submitted to the PBA was ever denied clearance. On November 3, 1986 the PBA Executive Board refused to approve plaintiff's application for certification **[**10]** for PBA tournament use. Plaintiff was notified of the PBA Executive Board's action in a letter from Mr. Antenora dated December 8, 1986. The PBA Executive Board subsequently voted to "table clearance" of the Bud Ball. To date the Bud Ball has not been cleared for PBA use. The sole reason for the decision was the appearance of the commercial logo on the ball.

The Bud Ball was cleared for use by the American Bowling Congress on December 5, 1985 and June 20, 1986, and by the Ladies Professional Bowlers Tour ("LPBT") in November, 1986. The Bud Ball was used by bowlers in LPBT tournaments televised on ESPN.

The only other bowling ball manufactured by plaintiff is the Black Tank. The Black Tank is identical in construction and composition to the Bud Ball, but is different in appearance. The Black Tank is black and has a military tank pictured on it. Plaintiff sought and received clearance for use of the Black Tank in PBA tournament play beginning on April 18, 1988.

The PBA permits its members to wear commercial logos on their shirts and pants during televised tournament play. The PBA Rules permit professional bowlers to wear a total of three commercial logos on the shirt and pants. Professional **[**11]** bowlers must secure prior approval from the PBA for each logo they desire to wear.

The PBA has cleared a bowling ball for use in PBA tournament play that bears the name of a bowling alley - Timber Lanes. The bowling ball was approved for use during a regional tournament in the Northwest which was not televised. The Timber Lane ball, however, was not permitted to be used in a national televised tournament.

Relevant Market

Defendants assert that plaintiff's claims under *Section 1* and *2* must fail because defendants do not possess monopoly power in the relevant market. To determine **[*922]** whether competition has been harmed in violation of the antitrust laws, the Court must define the relevant market. ***HN4***[] The relevant market is determined by reference to both the product market and the geographic market. [1] *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 1521, 8 L. Ed. 2d 510 (1962)*. Plaintiff defines the relevant product market as items used by professional bowlers during televised tournament play. The Court suspects that plaintiff's definition of the relevant market is too narrowly drawn. Defendants, however, have failed to present the Court with sufficient evidence to expand **[**12]** the relevant product market to include other means of advertising a bowling ball.

HN5[] The essential test for ascertaining the relevant product market involves the identification of those products or services that are either (1) identical to or (2) available substitutes for the defendants' product or service. *United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. This comparative analysis has been characterized as the "reasonable interchangeability" standard. The *DuPont* court noted that reasonable interchangeability may be gauged by (1) the product's uses, i.e., whether the substitute products or services can perform the same function, and/or (2) consumer response (cross-elasticity of demand). [2]

[13]** Furthermore, a market can be divided into several submarkets. ***HN7***[] The market test may be utilized in conjunction with the submarket criteria promulgated in *Brown Shoe Co. v. United States, supra.* A submarket may be determined by examining such practical indicia as (1) industry or public recognition of the submarket as a separate economic entity, (2) the product's peculiar characteristics and uses, (3) unique production facilities, (4) distinct customers, (5) distinct prices, (6) sensitivity to price changes, and (7) specialized vendors. *370 U.S. at 325, 82 S. Ct. at 1523*.

In the instant matter the product market to be defined is that for the advertisement of a bowling ball. Defendant has attempted to define the product market as the advertisement of beer. Plaintiff manufactures and sells bowling balls, not beer. Although A-B manufactures and sells beer, A-B is not a party to this suit and does not claim that it was injured by defendants' refusal to sanction the Bud Ball. Furthermore, plaintiff seeks to advertise the Bud Ball in order to sell bowling balls, not beer. The mere fact that the bowling ball contains the logo of a beer manufacturer does not change the nature of the product **[**14]** from bowling balls to beer. Therefore, defendants arguments concerning the numerous avenues by which A-B advertises Budweiser beer are properly disregarded as immaterial.

Defendants assert that the plaintiff has many options for the advertisement of a bowling ball: (1) plaintiff may purchase commercial spots advertising the Bud Ball during televised PBA tournaments or other sporting events, (2) plaintiff may purchase the sponsorship of a PBA tournament, (3) plaintiff may purchase print advertisements in

---

[1] There is no dispute over the definition of the relevant geographic market. Since defendants organize and promote tournaments throughout the United States, and the tournaments are televised nationwide, the Court assumes that the relevant geographic market is the United States.

[2] ***HN6***[] Cross-elasticity of demand refers to the change in the demand by consumers for one product as the result of a change in the price of another product. 2 P. Areeda & D. Turner, ***Antitrust Law*** 349 (1978).

bowling journals and other media, and (4) plaintiff may pay professional bowlers to endorse the Bud Ball. Defendants, however, did not carry their burden in broadening the relevant product market by merely listing the options by which plaintiff may advertise the Bud Ball.

HN8[] Only reasonably interchangeable products may be included in the same market. A product is reasonably interchangeable for another if consumers of the products considered them to be reasonable substitutes. The consumer of the product in the instant matter is a purchaser of advertising for a bowling ball. Therefore, the question is whether the purchaser of advertising for **[*923]** a bowling ball considers spot commercials, tournament **[**15]** sponsorships, print advertisements, and paid endorsements as reasonable substitutes for a professional bowler using the ball during a televised tournament. Defendants may prove products are reasonably interchangeable by presenting the Court with a measurement of their cross-elasticities of demand. For example, if the price of a spot commercial increases, do purchasers of advertising for sporting goods purchase endorsements from professional athletes instead. The Court has no evidence of cross-elasticity before it. Instead, defendants merely argue that plaintiff's definition of the relevant product market is untenable given its options in advertising. The Court disagrees.

As narrow as plaintiff's product market appears, plaintiff may still have defined a valid submarket. Professional bowlers are role models for the amateur bowlers who observe them during televised tournament play. The use of a bowling article during televised tournament play allows the viewing consumer to see that the product has the endorsement of the professional using the product. An amateur bowler who watches the televised tournament may place great significance on the bowling ball used by the successful professional **[**16]** bowlers of the day. Therefore, this endorsement can have a significant effect on the sale of the product so used.

Furthermore, the PBA is the sole sponsor of televised tournament play for men. Professional bowling does not attract live viewers in significant numbers, and gets no televised coverage except for the tours sponsored by defendants. If a professional bowler cannot use the Bud Ball during televised tournament play, his paid endorsement in a spot commercial or print advertisement would be discounted by the consumer who watches the televised tournament play. The viewer would question the quality of the ball when a professional bowler endorses the ball during a commercial advertisement but uses another ball during televised tournament play.

In sum, although the Court suspects that plaintiffs' submarket may be too narrowly defined, defendant has failed to carry its burden to broaden the relevant product market by proving the substitutability of other means of advertising. For the purposes of the motion for summary judgment, the Court will assume that the relevant product market is the items used by professional bowlers during televised tournament play. For the foregoing reasons, **[**17]** defendant's motion for summary judgment on the ground that it does not possess a monopoly in the relevant market is denied.

Section 2 Claims

In Counts III, IV, V, VI, and VII plaintiff alleges that defendants violated *Section 2* of the Sherman Act, *15 U.S.C. § 2*. The Court considers Count IV (essential facility) and Count VI (tying arrangement) separately, *infra*. The Court now addresses the merits of Counts III, V, and VII. The factual allegations underlying all three counts are the same. Professional bowlers must join the PBA to enter PBA tournaments. The PBA Rules, to which PBA members must adhere, proscribe the use of bowling balls which have not been sanctioned by the PBA. Because the Bud Ball was not sanctioned by the PBA, no professional bowler could use the Bud Ball during televised tournament play. In Count III plaintiff alleges that defendants monopolized or conspired to monopolize the market of commercial advertising on bowling articles used in televised tournament play. Plaintiff asserts that defendants have abused this monopoly power by unreasonably and arbitrarily excluding the Bud Ball from being used in tournament play. In Count V, plaintiff alleges that defendants **[**18]** have used their monopoly power over the administration of the sport of bowling to monopolize the adjacent market of advertising services applied to commercial bowling articles used in televised tournaments. In Count VII, plaintiff alleges that defendants have attempted to monopolize or conspired to attempt to monopolize the relevant market.

HN9[] To establish monopolization in violation of *Section 2* it must be shown that defendants (1) possessed monopoly power **[*924]** in the relevant market; and (2) used its monopoly power to foreclose competition, gain a competitive advantage, or destroy a competitor. *Trace X Chemical v. Canadian Industries, 738 F.2d 261, 265 (8th Cir. 1984)*, *cert. denied*, *469 U.S. 1160, 105 S. Ct. 911, 83 L. Ed. 2d 925 (1985)*.

A. *Monopoly Power*

For purposes of this motion for summary judgment the Court has accepted plaintiff's definition of the relevant market as being articles that a professional bowler uses during televised tournament play. *HN10*[] Monopoly power is defined as the power to control prices and exclude competition with respect to a particular product and within a particular geographic market. *United States v. E.I. DuPont de Nemours & Co., supra, 351 U.S. at 391, 76 S. Ct. at 1004*. **[**19]** Since defendants exercise absolute control over the articles professional bowlers may use during televised tournament play, and may prohibit the use of any article, defendants do possess monopoly power in the relevant market.

B. *Anti-Competitive Behavior*

HN11[] To prove a violation of *Section 2*, whether based upon a claim of attempted or actual monopolization, plaintiff must show defendants engaged in anticompetitive behavior, that is, defendants used their monopoly power to foreclose competition, gain a competitive advantage, or destroy a competitor. *Trace X Chemical v. Canadian Industries, supra, 738 F.2d at 265-66*. *HN12*[] A mere showing of monopoly power unaccompanied by evidence of anticompetitive behavior is insufficient to support a claim for illegal monopolization. *Id*. (*citing* *Northeastern Telephone Co. v. American Telephone & Telegraph Co., 651 F.2d 76 (2d Cir. 1981)*, *cert. denied*, *455 U.S. 943, 102 S. Ct. 1438, 71 L. Ed. 2d 654 (1982))*. If defendant's activities were not anticompetitive, defendant is absolved of liability for claims of monopolization and attempted monopolization. *Trace X Chemical, supra, 738 F.2d at 266*.

HN13[] Anticompetitive conduct is conduct **[**20]** without legitimate business purpose. *Id*. (*citing* *Becker v. Egypt News Co., 713 F.2d 363, 366 (8th Cir. 1983))*. Such conduct makes sense only because it eliminates competition. *Id*. Acts which are ordinary business practices typical of those used in a competitive market do not constitute anticompetitive conduct violative of *Section 2*. *Trace X Chemical, supra, 738 F.2d at 266* (*citing* *Telex Corp. v. IBM, 510 F.2d 894, 925-26 (10th Cir. 1975)*, *cert. denied*, *423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975))*. To be labeled anticompetitive, the conduct involved must be such that its "anticipated benefits were dependent on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power." *Trace X Chemical, supra, 738 F.2d at 267* (*quoting William Inglis v. ITT Continental Baking Co., 668 F.2d 1014, 1030 (9th Cir. 1982)*, *cert. denied*, *459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61, 103 S. Ct. 58 (1982))*.

There is little dispute between the parties as to why defendants refused to sanction the Bud Ball for PBA tournament play. The Court has closely examined the reasons proffered by defendants for their refusal **[**21]** to sanction the Bud Ball and concludes that defendants' actions were neither unreasonable nor anticompetitive but a valid exercise of business judgment to protect their enterprise.

First, defendants' refusal to sanction the Bud Ball was in response to NBC's negative reaction to the idea of a bowling ball bearing a commercial advertisement. NBC frowned upon the Bud Ball as a means of free advertising for A-B, and informed the defendants that it did not want the Bud Ball to appear during the 1986 Fall Tour. If defendants sanctioned the Bud Ball despite NBC's resistance, NBC may have considered defendants' action a breach of the contract and refused to televise the 1986 Fall Tour.

Defendants' ability to effectively serve the interests of professional bowlers is dependent upon defendants' obtaining television coverage of the tours. The purpose of PBA, Inc. is to organize and promote bowling tournaments in which its members compete for prize money. There are two **[*925]** sources of prize money: 1) corporations that sponsor tournaments, and 2) networks that pay defendants a licensing fee to televise the tournaments. [3] If the tournaments in the 1986 Fall Tour did not receive television coverage, **[**22]** the sources of prize money would disappear. NBC would not pay defendants a rights fee if it did not televise the tournaments. Also, the value of a corporate sponsorship for a particular tournament would decrease if the tournament was not nationally televised. Although defendants may have capitulated under pressure from NBC, a good working relationship with NBC and the other networks is crucial to defendants' ability to serve professional bowlers. The networks have control over defendants' lifeline through their televising of defendants' tours. Defendants, which had legitimate concerns over their vitality, did not behave anticompetitively because they succumbed under pressure from NBC concerning approval of the Bud Ball.

[23]** Second, defendants were concerned that the appearance of the Bud Ball on a tour would decrease the number of corporations willing to sponsor tournaments. Miller, one of defendants' regular tournament sponsors, did not want the products of a competitor to be advertised during a tournament it sponsored. Miller changed the terms of its sponsorship contract to prevent the use of any commercial logos on the articles worn or used by professional bowlers during the tournaments Miller sponsored. No corporate sponsor seeks to have the advertising value of its sponsorship diluted by the commercial logos of other companies.

Third, the presence of the Bud Ball in a tournament would decrease the value of spot commercial time. The price of a spot commercial decreases as the amount of intra-program advertising increases. Therefore, if beer is being advertised on the side of the bowling ball during the PBA tournament, the price of a spot commercial shown during a commercial break decreases.

In the 1986 Fall Tour defendants had an immediate concern over the price of spot commercial time. Defendants had to raise a certain amount of revenue from selling spot commercials or suffer a reduction in the **[**24]** rights fee. A decrease in the value of spot commercial time might translate into a direct monetary loss for defendants. Defendants are concerned about the price of spot commercial time even when defendants are not responsible for selling spot commercials. The networks pay defendants a rights fee to televise the tournaments because they can sell spot commercial time to advertisers who want to promote their products during the tournament. If the value of spot commercial time decreases for any reason (i.e. decrease in the number of viewers, change in the demographics of viewers, increase in advertising during the tournament), the networks will reduce the rights fee paid to defendants to televise the tournaments. Furthermore, if the price of spot commercial time decreases, the PBA tours become less attractive to the networks vis-a-vis other programs they can televise instead. Therefore, it is in the interest of defendants to maximize the value of spot commercial time so defendants are not lured to televise other programs.

Plaintiff asserts that defendants' refusal to sanction the Bud Ball was arbitrary. First, plaintiff points to other sports such as auto racing, boxing, tennis, and golf **[**25]** where the professional athletes are freely permitted to endorse products during the televised broadcast of the sporting event. For example, the cars in televised auto races are covered with commercial logos. Defendants assert that their decision is to keep the sport of professional bowling "clean", that is, free from the numerous intra-program commercial advertisements **[*926]** that bombard the television viewer of an auto race. The Court agrees that defendants have discretion over whether to permit commercial advertising during the sports event on the equipment that athletes use, or keep the sport "clean" and maximize the price of advertising for spot commercials. The Court will not grant potential advertisers the power to determine the amount and type of advertising that the sport must allow.

---

[3] For the 1986 Fall Tour there was a third possible source of revenue. As was explained *supra*, for the 1986 Fall Tour NBC did not pay a fixed rights fee. Instead, the PBA had to sell 24 commercial spots (of 30 seconds' length each) per tournament for NBC. The PBA guaranteed that it would raise a certain sum from such sales. If the PBA was able to arrange for advertising income over this set amount, the PBA would keep the excess amount. However, if the PBA was not able to generate enough spot commercial sales to reach this level, the PBA would suffer a reduction in the rights fees paid to them by NBC to make up the shortfall.

Second, the PBA Rules permit professional bowlers during televised tournament play to wear a maximum of three commercial logos on their shirt and pants. For example, the PBA Rules may permit a professional bowler to wear an A-B logo on the sleeve of his shirt during televised tournament play. Defendants receive no compensation from either the professional bowler or the advertiser when the logo is worn. **[**26]** Defendants have drawn a line between commercial logos on clothing and commercial logos on the bowling ball. First, the networks have not voiced any opposition to logos worn on the professional bowlers' clothing. Second, defendants perceive a distinction between wearing a logo on a shirt, and placing a logo on a bowling ball. Because defendants have discretion over the type of advertising they will allow during their tournaments, defendants may be arbitrary in permitting logos on one article but not on another without violating the antitrust laws. Plaintiff also argues that defendants sanctioned a bowling ball with the name of a bowling alley - Timber Lanes - emblazoned on its side. Defendants' approval of the Timber Lanes Ball is distinguishable. The Timber Lanes ball was used during a regional tournament which did not receive any television coverage. Defendants refused to sanction the Timber Lanes ball for use during a televised tournament.

Plaintiff asserts that defendants made no effort to negotiate with plaintiff concerning the approval of the Bud Ball. Defendants never offered to sanction the Bud Ball on the condition that the television camera shoot around it. Also, defendants **[**27]** could have shown the Bud Ball but concealed the A-B logo. This argument contravenes the raison d'etre of the lawsuit. Plaintiff argues that the success of the Bud Ball was dependent on defendants' approval of the ball for use in televised PBA tournaments. Plaintiff sought approval for the Bud Ball so television viewers of the tournaments would see the great bowlers of the day using the Bud Ball and purchase it for themselves. If the network shot around the Bud Ball or made it unrecognizable to the television viewer, plaintiff would not receive the valuable endorsement they contend is necessary for the successful marketing of the ball. [4]

Plaintiffs depict defendants' refusal to sanction the Bud Ball as **[**28]** anticompetitive. The Court, however, views defendants' action as a sound exercise of business judgment calculated to preserve their ability to serve the interests of professional bowlers. For the foregoing reasons, the Court enters summary judgment in favor of defendants and against plaintiff on the merits of Count III, Count V, and Count VII of plaintiff's complaint.

Essential Facilities

In Count IV plaintiff alleges that defendants have denied plaintiff an essential facility in violation of *15 U.S.C. § 2*. Plaintiff defines the facility as the items which professional bowlers may use during televised tournament play. Defendants, through their rules which regulate the equipment a bowler may use during televised tournament play, has monopoly power over this facility. Plaintiff alleges that access to this facility is essential for the effective promotion of its commercial bowling articles.

HN14[] Under the essential facilities doctrine, those in possession of facilities which cannot practically be duplicated must **[*927]** share the facilities with their competitors on fair terms. *City of Malden, Mo. v. Union Electric Company, 887 F.2d 157, 160 (8th Cir. 1989)*. The policy behind prohibiting denial **[**29]** of an essential facility to a competitor, at least in part, is to prevent a monopolist in a given market from using its power to inhibit competition in another market. *Twin Laboratories v. Weider Health & Fitness, 900 F.2d 566, 568 (2nd Cir. 1990)*. ***HN15***[] The essential facilities doctrine requires (1) control of an essential facility by a monopolist, (2) the inability to practically or economically duplicate the facility, and (3) the unreasonable denial of the use of the facility *to a competitor* when such use is economically and technically feasible. *City of Malden, Mo. v. Union Electric Company, supra, 887 F.2d at 160* (Emphasis added).

For this motion the Court will assume the existence of the first two factors. The third factor, however, is not satisfied because plaintiff and defendant are not competitors in any market. Plaintiff manufactures and sells bowling balls. For the purposes of this action, plaintiff also competes with other businesses which seek to advertise their products

[4] Also, plaintiff alleges that defendant never offered to sanction the Bud Ball for a price. This argument is directly related to plaintiff's essential facilities claim, which is discussed, *infra*. Unless defendants' control an essential facility, defendants have no obligation to deal with plaintiff on any terms.

during the PBA tour. The PBA organizes and promotes televised bowling tournaments throughout the United States. Defendants sell to networks the right to televise the tournaments. Defendants compete **[**30]** with other sporting events and non-sport programs which seek to be televised by the networks. Also, defendants sell to corporations the right to associate their name with a particular tournament. Defendants compete with other events that seek corporate sponsorship. It is clear that plaintiff and defendant are not competitors.

The Court has surveyed the relevant cases for applications of the essential facilities doctrine to the field of advertising. The Court has found several cases that are distinguishable from the instant matter. In *Soap Opera Now, Inc. v. Network Publishing Corp., 737 F. Supp. 1338 (S.D.N.Y. 1990)*, plaintiff and defendant both published a periodical which focused on daytime soap opera news, gossip, and coming attractions. Plaintiff published its periodical in the form of a short newsletter; defendant's periodical was a 150 page color magazine. When defendant refused to permit plaintiff to advertise plaintiff's newsletter in defendant's magazine, plaintiff sued defendant for a violation of the essential facilities doctrine. The court dismissed the essential facilities claim because plaintiff and defendant were not competitors. The court stated:

> Even assuming **[**31]** that the [defendant] possesses market power in its product market, plaintiff's monopolization and attempted monopolization claims premised upon an essential facilities theory must fail. Plaintiff's attempt claim is deficient because [plaintiff] and [defendant] do not compete in any market. For the same reason, any other possible claim under an essential facilities theory must fail. In order to make out a claim under the essential facilities doctrine, a plaintiff must demonstrate "a competitor's inability practically or reasonably to duplicate the essential facility," and "the denial of the use of the facility to a competitor." [Citations omitted]. Because plaintiff has not raised a factual issue as to whether the [defendant] denied its services "to a competitor," any claim based upon the denial of an essential facility must be dismissed.

737 F. Supp. at 1348-49.

In *Twin Laboratories v. Weider Health & Fitness, supra*, the plaintiff and defendant both produced nutritional supplements for body builders. Both parties also published bodybuilding magazines. Defendant published two magazines which were universally acknowledged to be the leading magazines in the bodybuilding field; **[**32]** plaintiff's magazine had a much smaller circulation. When defendant terminated plaintiff's ability to purchase advertising spots for nutritional supplements in defendant's magazines, plaintiff brought an action against defendant claiming a violation of the essential facilities doctrine. In *Twin Laboratories* the essential facilities doctrine properly applied because the plaintiff and defendant were competitors in the sale of nutritional supplements. The advertising **[*928]** space sought in by plaintiff in defendant's magazines was to be used to advertise a product in direct competition with a product manufactured by defendant. [5] In the instant matter, plaintiff and defendant are not competitors.

Plaintiff asserts that plaintiff and defendants are potential competitors because defendants may, at some future time, require or entice bowlers to wear clothing and use equipment **[**33]** bearing defendants' logo during televised PBA tournaments. Therefore, plaintiff and defendant would compete to get professional bowlers to display products with their respective logos. Plaintiff's argument is without merit. Although possible or prospective competition between the parties may satisfy the competition element of an essential facilities claim, there must be a link between the possible or prospective competition and the reason defendants denied plaintiff access to the essential facility.

Defendants did not refuse to sanction the Bud Ball because they would like to place their logo on bowling balls instead. Defendant refused to sanction the Bud Ball because it contained the logo of A-B which is not the manufacturer of the ball. Bowling balls adorned with the manufacturer's logo have been sanctioned by defendants. Also, bowling balls adorned with a depiction of the name of the ball, such as plaintiff's Blue Tank and Black Tank balls, have been sanctioned by defendants. Plaintiff's Black Tank ball was sanctioned after the plaintiff's failed

---

5 The Court held that the essential facilities doctrine was not violated because plaintiff failed to show that it had suffered any economic loss due to defendant's actions.

attempt to introduce the Bud Ball. Although the PBA has discussed the possibility of having professional bowlers wear its logo or use **[**34]** equipment with its logo, these discussions are remote from defendants' refusal to sanction the Bud Ball. The Court will not permit plaintiff to circumvent the requirement of competition between the parties by setting forth a purely speculative source of competition between plaintiff and defendants which is unrelated to defendants' denial of the alleged essential facility.

For the foregoing reasons, the Court enters summary judgment in favor of defendant and against plaintiff on Count IV of plaintiff's complaint.

Tying Claim

In Count VI plaintiff alleges that defendants violated *15 U.S.C. §§ 1* and *2* by the employment of an illegal tying arrangement. Plaintiff seeks monetary relief under *15 U.S.C. § 15* and injunctive relief under *15 U.S.C. § 26*. In order to enter a tournament sponsored by defendant, a professional bowler must purchase a membership to the PBA. As a member of the PBA, the professional bowler must adhere to the PBA Rules. The PBA Rules restrict the items a professional bowler may use during a tournament by requiring prior approval by the PBA. A professional bowler who joins the PBA is subject to disciplinary sanctions if he disobeys the PBA Rules.

"***HN16***[] A tying arrangement **[**35]** is defined as the sale of one item (the tying product) on the condition that the buyer purchase a second product (the tied product) from the same source." *Rosebrough Monument Co. v. Memorial Park Cemetery Association, 666 F.2d 1130, 1140 (8th Cir. 1981)*, *cert. denied*, *457 U.S. 1111, 102 S. Ct. 2915, 73 L. Ed. 2d 1321 (1982)*. In *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1985)*, the Supreme Court explained:

> ***HN17***[] The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of the tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated.

466 U.S. at 12, 104 S. Ct. at 1558.

Plaintiff defines the tying product as the right to enter PBA sponsored tournaments, and the tied product as the membership in the PBA. In order to participate in the **[*929]** PBA sponsored tournament, the professional bowler must purchase a membership in the PBA. **[**36]** [6] Professional bowlers might forego membership in the PBA, and all the restrictions on their conduct that PBA membership entails, if entry into PBA sponsored tournaments was not "tied" to PBA membership.

Defendants argue that plaintiff lacks standing to bring a claim for a tying arrangement. ***HN18***[] The question of standing to sue under the Clayton and Sherman Acts is one of law. In *Associated General Contractors v. California State Council of Carpenters, 459 U.S. 519, 535 n. 31, 103 S. Ct. 897, 907 n. 31, 74 L. Ed. 2d 723 (1983)*, the Supreme Court explained that antitrust standing requirements go beyond injury in fact. The court must also determine whether the plaintiff, even if injured, is the proper party to bring the action.

A. *Section 4*

HN19[] Section 4 of the Clayton Act, *15 U.S.C. § 15*, authorizes private damage suits for violations of federal antitrust laws by persons injured in their "business or property by reason of anything forbidden in the antitrust **[**37]** laws. . . ." The language of this section, if interpreted expansively, provides any party which can show a causal link between the injury and violation, no matter how remote, with standing to sue. Numerous courts,

[6] Professional bowlers must also pay a fee to enter a PBA tournament.

however, have narrowed the potential scope of Section 4 to prevent unfair and oppressive results. *Midwest Communications v. Minnesota Twins, 779 F.2d 444, 450 (8th Cir. 1985)*, *cert. denied*, *476 U.S. 1163, 106 S. Ct. 2289, 90 L. Ed. 2d 730 (1986)*.

HN20[] The plaintiff must demonstrate that the antitrust injury is of the type the antitrust laws were designed to prevent and that the injury flows from that which makes the defendant's acts unlawful. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*. "[A] mere causal connection between an antitrust violation and harm to plaintiff cannot be the basis for antitrust compensation unless the injury is directly related to the harm the antitrust laws were designed to protect." *McDonald v. Johnson & Johnson, 722 F.2d 1370, 1374* (8th Cir.), *cert. denied*, *469 U.S. 870, 105 S. Ct. 219, 83 L. Ed. 2d 149 (1984)*. To have standing to sue under the antitrust laws, the plaintiff must **[**38]** be the target of the anticompetitive activity, "not one who has merely suffered indirect, secondary, or remote injury. . . ." *Midwest Communications v. Minnesota Twins, supra, 779 F.2d at 451 (8th Cir. 1985)* (*quoting* *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 710 (11th Cir. 1984))*.

HN21[] The Court must first define the antitrust injury that the antitrust laws concerning tie-ins were designed to prevent. The anti-competitive effects of the tying agreement are two fold. First, the tying agreement may force the party subject to the tie to give up substitutes for the tied product, or may force the party subject to the tie to purchase a product for which he has no use. Second, the tying agreement may destroy the free access into the market of suppliers of the tied product. *United States v. Loew's, Incorporated, 371 U.S. 38, 45, 83 S. Ct. 97, 102, 9 L. Ed. 2d 11, 18 (1962)*. Therefore, the court's focus is upon competition in the tied market. Because restraints on competition in the tied market affect consumers and competitors in the tied market, consumers and competitors in the tied market are the parties that have standing to sue. *Bell v. Dow Chemical Co., 847 F.2d 1179, 1183* ***[**39]*** *(5th Cir. 1988)* (Citations omitted).

In the instant matter the consumers of the tied product are the professional bowlers who must purchase a PBA membership in order to enter PBA tournaments. Although plaintiff is a member of the PBA, plaintiff's membership was apparently voluntary and certainly not the result of coercion in connection with the tying arrangement alleged in this action. Therefore, plaintiff is not a purchaser or potential purchaser of the tied product. Plaintiff is also not a competitor in the market for the tied product. Plaintiff neither sells memberships **[*930]** to professional bowlers nor sponsors tournaments.

B. *Section 16*

HN22[] Section 16 of the Clayton Act, *15 U.S.C. § 26*, also authorizes private suits for injunctive relief "against threatened loss or damage by a violation of the antitrust laws. . . ." Although the standing rules for suits under Section 4 and Section 16 of the Clayton Act are somewhat different, standing under Section 16 also requires that the plaintiff show a threatened antitrust injury to receive injunctive relief. As was explained *supra*, the injury to which plaintiff is threatened is not one which the ***antitrust law*** against tying arrangements **[**40]** was designed to protect.

In sum, the laws against tie-in arrangements were designed to protect competition in the tied market. Although plaintiff's injury may be causally related to the alleged illegal tie-in, plaintiff's injury is only tangential to that which the antitrust laws were designed to protect. For the foregoing reasons, the Court enters summary judgment in favor of defendants and against plaintiff on Count VI of plaintiff's complaint.

Section 1 Claims

In Counts I and II of its complaint plaintiff alleges that defendant violated *Section 1* of the Sherman Act, ***HN23***[] *15 U.S.C. § 1*. *Section 1* of the Sherman Act provides in part:

> Every contract, combination . . ., or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. . . .

HN24[] *15 U.S.C. § 1*. There are two essential elements of any *Section 1* offense: (1) a contract, combination, or conspiracy, resulting in (2) an unreasonable restraint of trade. *Pumps & Power Co. v. Southern States Industries, 787 F.2d 1252, 1256 (8th Cir. 1986)*; *Overseas Motors, Inc. v. Import Motors Limited, Inc., 375 F. Supp. 499, 531 (E.D. Mich. 1974)*, *aff'd* *519 F.2d 119* (6th **[**41]** Cir.), *cert. denied 423 U.S. 987, 96 S. Ct. 395, 46 L. Ed. 2d 304 (1975)*.

A. *Proof of Combination or Conspiracy*

HN25[] To find a violation of *Section 1*, the Court must first find the existence of a contract, combination, or conspiracy. *International Travel Arrangers, Inc. v. Western Airlines, 623 F.2d 1255, 1265* (8th Cir.), *cert. denied 449 U.S. 1063, 101 S. Ct. 787, 66 L. Ed. 2d 605 (1980)*. A conspiracy imports a plurality of persons acting in concert to attain a common goal or purpose. *White v. Hearst Corp., 669 F.2d 14, 18 (1st Cir. 1982)*. Neither independent nor unilateral action is proscribed. *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775*, *reh'g denied*, *466 U.S. 994, 104 S. Ct. 2378, 80 L. Ed. 2d 850 (1984)*; *Pumps & Power Co. v. Southern States Industries, supra, 787 F.2d at 1256 (8th Cir. 1986)*. Plaintiff alleges that the Professional Bowlers Association, some of its Executive Board members, Professional Bowlers Association, Inc., Miller as a advertising sponsor, NBC, ABC, and professional bowlers who are members of the Professional Bowlers Association conspired to exclude the Bud Ball from tournament appearances.

[42]** First, Miller was not a participant in any concerted action. Miller's sponsor contract with the PBA gave it the right to exclude the appearance of advertising for products competitive with Miller during the broadcast of a tournament which Miller sponsored. After the Bud Ball was introduced, Miller changed the terms of the contract with the PBA to prohibit the use of any bowling items containing commercial logos. There is no evidence of concerted activity on the part of Miller. Prior to the inception of the Bud Ball Miller would not have allowed the advertising of a competitor, such as A-B, during a tournament that Miller sponsored. After the inception of the Bud Ball, Miller altered its contract to exclude advertising of all non-Miller products. The action of Miller to alter its sponsorship contract was taken independently and unilaterally.

With the exception of Miller, the Court will assume, for purposes of defendant's motion, that plaintiff has alleged sufficient **[*931]** facts to prove a conspiracy involving defendants.

B. *Unreasonable Restraint of Trade*

HN26[] The second element of a *Section 1* violation, unreasonable restraint of trade, may be established by proof that the conspiracy was **[**43]** of a type that the law finds to be inherently unreasonable (a *per se* violation), or it may rest on a showing of anticompetitive motive or effect in the particular case (a rule of reason violation). *Overseas Motors, Inc. v. Import Motors Limited, Inc., supra, 375 F. Supp. at 531*.

1. Per Se Analysis

"*HN27*[] There are certain business combinations and practices which are so pernicious and devoid of redeeming attributes that they are considered to be unreasonable restraints on interstate or foreign commerce per se." *Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, 578 F.2d 1256, 1259 (8th Cir. 1978)*. If a party is injured as a result of a per se violation of *§ 1* of the Sherman Act, he need not allege or prove any particular effect or impact of the violation on interstate or foreign commerce; the existence of such an effect or impact is conclusively presumed. *Id*.

As the Supreme Court stated in *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 19, 20, 99 S. Ct. 1551, 1562-63, 60 L. Ed. 2d 1 (1979)*, *HN28*[] a practice could only be considered a *per se* violation if its effect and purpose was "to threaten the proper operation of our predominately free-market economy," that is, if the practice "facially **[**44]** appears to be one that would always or almost always tend to restrict competition and decrease output." Thus, the *per se* label must be applied only after the courts have had considerable experience with the type of conduct challenged and application of the rule of reason has inevitably resulted in a finding of anticompetitive effects. *Havoco v. Am. Ltd. v. Shell Oil Co., 626 F.2d 549, 553 (7th Cir. 1980)*.

HN29[] Certain categories of per se violations are well defined and include price fixing, certain concerted refusals to deal, horizontal market division, and certain types of tying agreements. *Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, supra, 578 F.2d at 1259*; *Sewell Plastics, Inc. v. Coca-Cola Co., 720 F. Supp. 1186, 1190 (W.D.N.C. 1988)*.

I. Group Boycott

In Count I plaintiff alleges that defendant participated in a group boycott in violation of *Section 1*. Plaintiff's claim concerning a group boycott does not set forth a *per se* violation of the antitrust laws. Group boycotts are considered to be per se illegal only when they are engaged in by competitors of the plaintiff. In *F.T.C. v. Indiana Federation of Dentists, 476 U.S. 447, 106 S. Ct. 2009, 90 L. Ed. 2d* ***[**45]*** *445 (1986)*, the Court stated:

> As we observed last Term in *Northwest Wholesale Stationers, Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, [86 L. Ed. 2d 202, 105 S. Ct. 2613]* (1985), the category of restraints classed as group boycotts is not to be expanded indiscriminately, and the *per se* approach has generally been limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor. . . .

106 S. Ct. at 2018.

In *Lomar Wholesale Grocery v. Dieter's Gourmet Foods, 824 F.2d 582 (8th Cir. 1987)*, *cert. denied*, *484 U.S. 1010, 108 S. Ct. 707, 98 L. Ed. 2d 658 (1988)*, the Court stated:

> We believe that absent any collusion at some horizontal level, "[]the rule of reason provides a more discriminating way of differentiating" the procompetitive refusal to deal from the anticompetitive one. Because [plaintiff's] complaint alleged no combination between horizontal competitors, the District Court did not err . . . in awarding summary judgment to defendants on [plaintiff's] claim that defendants violated the per se rule by engaging in a group boycott.

824 F.2d at 595 (*quoting* *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 132* ***[**46]*** *n. 6 (2d Cir. 1978))*.

[*932] In the instant matter, neither defendants nor the networks are competitors of plaintiff. Plaintiff seeks to place advertisements on bowling balls used by professional bowlers during televised tournaments. Plaintiff asserts that the placement of an advertisement on a bowling ball would make it a competitor of defendants and the networks because the advertisement on the bowling ball would compete with defendants and the networks' sale of spot commercial time during the broadcast of the tournament. Thus, plaintiff and defendants are horizontal competitors and the alleged group boycott should be determined on a *per se* theory of liability.

The Court rejects plaintiff's characterization of this relationship as competition. The networks sell spot commercial time to be aired during the broadcast of PBA tournaments; for the 1986 Fall Tour defendants sold commercial time to be aired during the broadcast of PBA tournaments. Plaintiff, which seeks to advertise during the broadcast, has devised a gimmick which will provide both plaintiff and a separate commercial enterprise with a means of advertising during the broadcast of the tournament for which neither will have to **[**47]** pay the networks. This is not a source of competition between the parties; plaintiff does not seek to enter the business of selling advertising. [7] Instead, plaintiff, which would normally be a purchaser of advertising from the networks, seeks to obtain for free a service for which the networks earn their revenue by selling.

II. Price Fixing

In Count II plaintiff alleges that defendant entered an agreement affecting prices in *per se* violation of *Section 1* of the Sherman Act. Plaintiff alleges that by excluding advertising on bowling balls, defendants and the networks can maintain an artificially high level of advertising prices for spot commercials. If commercial advertising were permitted on the side of a bowling ball, the networks would earn less money from the sale of spot commercials, and defendants would earn less money from the sale of the rights to televise the tournaments.

---

[7] In fact, plaintiff paid to A-B a licensing fee for the use of its logo on the Bud Ball.

The Supreme Court has defined *HN30*[] illegal price **[**48]** fixing to include any "combination formed for the purpose of and with the effect of raising, depressing, fixing, or stabilizing the price of a commodity" or service in interstate or foreign commerce. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 844, 84 L. Ed. 1129*, *reh'g. denied*, *310 U.S. 658, 60 S. Ct. 1091, 84 L. Ed. 1421 (1940)*; *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*. Price fixing is *per se* illegal if it is done horizontally or vertically. Agreements between competitors that tamper with the selling or purchase price of commodities or services constitute horizontal price fixing. Agreements between persons in the chain of distribution that fix the resale price of a commodity or service constitute vertical price fixing.

In the instant matter the alleged agreement cannot be identified as classic horizontal or vertical price fixing. The Court cannot characterize the price restraint as horizontal because the alleged coconspirators are not competitors of each other or of the plaintiff. The Court cannot characterize the price restraint as classically vertical because defendants do not sell to the networks a product or service for which a resale **[**49]** price is fixed. Defendants sell to the networks the right to broadcast the final rounds of the tournaments. The networks, in turn, sell to advertisers 30 second time spots to be aired during the broadcast of the tournament. Although defendants and the networks each have an interest in maximizing the price of a spot commercial during a tournament broadcast, the product of advertising time is not being transferred from defendants to the networks with an agreement as to what to charge for it. Rather, by refusing to sanction the Bud Ball, defendants have maintained their product in a manner that will enable the network to command a higher price for the advertising than if the Bud Ball appeared in the tournaments. Furthermore, the alleged **[*933]** agreement does not fix the prices of advertising. Instead, the alleged agreement has a positive effect on the prices of spot commercials.

HN31[] If the business practice challenged has not been subject to any previous judicial experience, and if it does not appear that the practice would always or almost always tend to restrict competition, then the rule of reason should be applied rather than the per se rule. *Havoco v. Am. Ltd. v. Shell Oil Co., supra,* ***[**50]*** *626 F.2d at 553*. The Court has not encountered a restraint of this nature. Due to the unique relationship between defendants and the networks, and the unique characteristics of the sport of professional bowling, the Court is unable to characterize the restraint as one that is inherently pernicious.

Therefore, the Court concludes that the alleged price restraint is not a *per se* violation of *Section 1* and will instead proceed to a rule of reason analysis.

2. Rule of Reason Analysis

HN32[] In order to prevail in a cause of action alleging a conspiracy to restrain trade under the rule of reason, plaintiff must establish: (1) an agreement among two or more persons or distinct business entities, (2) which is intended to harm or unreasonably restrain competition, and (3) which actually causes injury to competition. *Rosebrough Monument Co. v. Memorial Park Cemetery, supra, 666 F.2d at 1138* (citations omitted). The primary considerations in determining whether a restraint of trade is unreasonable are whether the intent of the restraint is anticompetitive and whether the restraint itself has significant anticompetitive effects. *Id*. As was explained *supra*, the intention of defendants **[**51]** was not to harm or unreasonably restrain competition. Instead, defendants refusal to sanction the Bud Ball was a sound exercise of business judgment designed to secure its continued efficacy in serving the interests of professional bowlers.

The restraint does have an anticompetitive effect in that it forecloses the Bud Ball from entry into the submarket defined, *supra*. The Court, however, has weighed the anticompetitive effects of the foreclosure against the rights of defendants to administer the sport of professional bowling and the networks to earn revenue from the sale of advertising spots, and concludes that any anticompetitive effects are not significant. The Court has considered the ramifications of plaintiff's position to the television broadcasts of sporting or other events. The heart of this suit is not a conflict between plaintiff, a manufacturer of sporting goods, and defendant, an organizer and promoter of sporting events. Instead, the conflict is between plaintiff and the networks that televise sporting events. Plaintiff's position is that the athlete in a televised sporting event should be able to endorse the product of a sporting goods manufacturer by his use of **[**52]** the product. The sporting goods manufacturer receives a valuable endorsement from the athlete; the athlete is handsomely paid by the manufacturer in the form of an incentive payment. Therefore, both the sporting goods manufacturer and the athlete benefit by this arrangement. The networks, which are in the business of selling advertising, suffer in two ways. First, the networks are compelled to permit advertising during their telecast for which they are not compensated. Second, the intra-program advertising decreases the price of spot-commercial programming. The antitrust laws do not require, and this Court will not compel, the networks to give away the product or service that they are in the business of selling.

For the foregoing reasons, defendants' motion for summary judgment concerning Count I and Count II of plaintiff's complaint is granted.

TORTIOUS INTERFERENCE WITH BUSINESS RELATIONS

In Count VIII plaintiff alleges that defendants are liable for the state law tort of tortious interference with business relations. In Counts I-VII plaintiff alleged violations of the federal antitrust laws. The Court exercised jurisdiction over Counts I-VII under ***HN33***[] *28 U.S.C. § 1337*, which provides **[**53]** the court with "original jurisdiction **[*934]** of any civil action . . . arising under any act of Congress regulating commerce or protecting trade and commerce against restraint and monopolies. . . ." The Court exercised pendent jurisdiction over plaintiff's state law claim. [8]

The Court has entered summary judgment in favor of defendant and against plaintiff on the merits of Counts I-VII of plaintiff's complaint. The Court exercises its discretion to dismiss Count VIII for lack of subject matter jurisdiction pursuant to *Fed.R.Civ.P. 12(b)(1)*. *Rosado v. Wyman, 397 U.S. 397, 402-405, 90 S. Ct. 1207, 1212-14, 25 L. Ed. 2d 442 (1970)*; *Koke v. Stifel, Nicolaus, & Co., 620 F.2d 1340, 1346-1347 (8th Cir. 1980)*.

Dated this 6th day of September, 1990.

ORDER - September 6, 1990, Filed

In accordance with the memorandum filed herein this day,

IT IS HEREBY ORDERED that defendants' motion for summary judgment on Counts I - **[**54]** VII is GRANTED. Judgment is entered in favor of defendants and against plaintiff on the merits of Count I, Count II, Count III, Count IV, Count V, Count VI, and Count VII of plaintiff's complaint.

IT IS FURTHER ORDERED that Count VIII of plaintiff's complaint is DISMISSED for lack of subject matter jurisdiction.

Dated this 6th day of September, 1990.

End of Document

[8] Plaintiff did not allege diversity of the parties as an independent source of federal jurisdiction.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN1[] **Private Actions, Remedies**

When a plaintiff establishes that it has been damaged as a proximate result of the defendants' violation of the antitrust laws, then the amount of its damages may be proven by any reasonable theory. The essential requirement is only that it is plaintiff's burden to develop a reasonable theory for calculating the amount of damages.

Civil Procedure > Pretrial Matters > Motions in Limine > General Overview

Civil Procedure > Trials > Opening Statements > General Overview

HN2[] **Pretrial Matters, Motions in Limine**

The primary purpose of a motion in limine is to prevent prejudice at trial by either (1) precluding an opponent from mentioning potentially inadmissible evidence in his opening statement, or eliciting such evidence from a witness until the court has had the opportunity to rule on its admissibility, or (2) procuring a definitive ruling on the admissibility of evidence at the outset of the trial. Under federal law, motions in limine are generally disfavored. This is because prior to trial, the court cannot know whether or for what purpose the evidence will be offered during the trial. Further, the absence of a contextual setting makes it particularly difficult for the court to render definitive rulings at this stage of the proceedings. Thus, where the parties have often sought to exclude broad categories of evidence, the court has generally denied the motions.

Antitrust & Trade Law > Regulated Industries > General Overview

HN3[] **Clayton Act, Defenses**

There is ample authority that where antitrust claims arise in the context of a regulated industry, the antitrust defendant is entitled to raise and have considered its good faith adherence to regulatory obligations as an antitrust defense. For the regulatory justification defense to apply, the defendant must first be able to point to a regulatory basis that is reasonable in the sense of being concrete articulable and recognized as legitimate by the appropriate regulatory agency.

Civil Procedure > ... > Discovery > Methods of Discovery > Expert Witness Discovery

HN4[] **Methods of Discovery, Expert Witness Discovery**

Fed. R. Civ. P. 26(b)(4)(B) deals with the ability of a party to discover information about or from an adversary's nonwitness experts, and not with the admissibility at trial of collateral information regarding experts retained by a co-defendant.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN5[] **Private Actions, Purchasers**

The status of assignments under the Sherman and Clayton Acts is a matter of federal law. In determining the validity of assignments of federal antitrust claims from direct to indirect purchasers, the court must examine any potential conflict. If the assignments serve to exacerbate any of the primary concerns underlying these decisions, the assignments must be rejected, at least insofar as they might affect the conduct of the trial.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN6[] **Private Actions, Remedies**

Considerable latitude is allowed in proving various elements of antitrust injury, including lost profits. This is because damage issues in antitrust cases are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts. Thus, if the fact of lost profits is demonstrated, the actual amount need not be proven to an absolute certainty, since in such cases economic harm is frequently intangible and difficult to quantify.

Civil Procedure > Pretrial Matters > Conferences > Final Pretrial Conferences

Civil Procedure > Pretrial Matters > General Overview

Civil Procedure > Pretrial Matters > Conferences > General Overview

Civil Procedure > Pretrial Matters > Conferences > Pretrial Orders

HN7[] **Conferences, Final Pretrial Conferences**

Under the Federal Rules, the pretrial order supersedes the pleadings and controls the subsequent course of litigation. *Fed. R. Civ. P. 16(e)*. Generally, claims of parties which are not included in the final pretrial order cannot be asserted at trial except to prevent manifest injustice. The trial court has the discretion to exclude from trial those issues and claims not found in the pretrial order.

Commercial Law (UCC) > General Provisions (Article 1) > General Provisions

Contracts Law > Breach > General Overview

Commercial Law (UCC) > General Provisions (Article 1) > Application & Construction > General Overview

Commercial Law (UCC) > ... > Application & Construction > Remedies > Damages

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

Contracts Law > ... > Types of Damages > Compensatory Damages > General Overview

HN8[] **General Provisions (Article 1), General Provisions**

The Uniform Commercial Code (U.C.C.) embodies general common law principles of contract damages which seek to place the aggrieved party in as good a position as if the other party had fully performed the contract. Where the contract claim involves an alleged breach of the duty of good faith fair dealing, the U.C.C. provides no additional remedy. *Kan. Stat. Ann. § 84-1-106*.

Opinion

MEMORANDUM AND ORDER

In these consolidated cases, three utilities, the Kansas Power and Light Company (KPL), the Kansas Gas and Electric Company (KGE), and Utilicorp United, Inc. (Utilicorp), the states of Kansas and Missouri, and Farmland Industries (Farmland), brought actions against three natural gas producers, Amoco Production Company (Amoco), Cities Service Oil and Gas Corporation (Cities), CSG Exploration Company (Exploration), and one pipeline, Williams Natural Gas Company (Pipeline), [1] asserting claims under federal and state antitrust laws, RICO, and various common-law claims. **[*4]**

Now before the court are defendants' motion for summary judgment on plaintiffs' "Section 104" damage theory and numerous motions in limine filed by both sides. As was the case in the court's August 2, 1990, order, due to time constraints, the court will announce its rulings in abbreviated form.

DEFENDANTS' MOTION FOR SUMMARY JUDGMENT ON PLAINTIFF KANSAS, MISSOURI, AND FARMLAND'S "SECTION 104" DAMAGE THEORY

Plaintiffs' "Section 104" antitrust damage theory, first introduced into this case late in 1989, is based on language contained in the 1978 Federal Energy Regulatory Commission's (FERC) order authorizing construction of the Rawlins-Hesston Pipeline, which provides:

(E) The filing of related producer certificate applications or written commitments to sell the gas covered by such application to the Applicant is required. These commitments shall be verified under oath by a responsible **[*5]** official of the company and shall be filed in the pipeline's docket. The commitment shall contain the producer's agreements to:

(1) Accept a certificate at the *applicable just and reasonable rate* as determined by the Commission, or the contract rate, whichever is lower. . .

(Emphasis supplied)

---

[1] The court granted summary judgment in favor of two other defendants, the Moxa and Wamsutter Limited Partnerships, on August 2, 1990.

Kansas, Missouri and Farmland construe this language to limit Amoco to the wellhead prices allowed producers of Wamsutter gas under the NGA, prior to passage of the NGPA. [2] These NGA producer prices are carried forward in Section 104 of the NGPA, (codified at *15 U.S.C. § 3314*), and are even lower than the Section 102 or 103, (codified at *15 U.S.C. §§ 3312*, *3313*), rates that would have applied to the Wyoming gas if tight sands incentive prices had not been paid. By contending that the Pipeline should have established the price of Wamsutter and Amoco tight sands gas under Section 104, rather than Section 102 and 103 of the NGPA, plaintiffs' damage claims are effectively doubled.

[*6] ***HN1***[] When a plaintiff establishes that it has been damaged as a proximate result of the defendants' violation of the antitrust laws, then the amount of its damages may be proven by any reasonable theory. *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251 (1946)*. The essential requirement is only that it is plaintiff's burden to develop a reasonable theory for calculating the amount of damages. *Knutson v. Daily Review, Inc., 468 F.Supp 226, 230 (N.D.Cal.1979)*, *aff'd*, *664 F.2d 1120 (9th Cir.1981)*, *citing* *Lehrman v. Gulf Oil Corp., 500 F.2d 659, 668 (5th Cir. 1974)*, *reh. denied*, *503 F.2d 1403*, *cert. denied*, *420 U.S. 929 (1975)*; L. Sullivan, *Handbook of the Law of Antitrust*, § 251 at 786 (1977).

Defendants oppose the Section 104 theory on two grounds. First, defendants contend that assertion of the theory in the instant case is unreasonable since, in the nearly twelve years since the Rawlins-Hesston certificate was issued, neither plaintiffs nor any other party has raised this pricing theory before the FERC. Opportunities where the Section 104 theory might logically have been raised include the time period from 1979 to 1988, when the Pipeline made purchased gas adjustment **[*7]** (PGA) filings every six months at the FERC to determine the means by which changes in gas purchase costs would be passed on to customers. During that time, neither plaintiffs nor any other party claimed the Pipeline should be limited to payment of Section 104 prices for Wamsutter and Amoco gas. Further, in numerous other rate proceedings before the FERC dealing with the Pipeline's payment of Section 102 and 103 prices, the Section 104 issue was not raised. On this basis, defendants also claim that raising the Section 104 theory at this time is an impermissible collateral attack upon prior FERC orders.

Second, defendants argue the Section 104 theory fails as a matter of FERC law. They claim that, although the same language relied upon by plaintiffs was used in over 50 FPC and FERC certificates, FERC has not interpreted any of these certificates (1) to require the payment of Section 104 prices for gas that qualifies under Sections 102, 103, or 107(c)(5) of the NGPA or (2) to mean that gas flowing through a pipeline subject to such a condition may not be sold or purchased at prices above Section 104 rates. Defendants further assert that, even if the FERC had previously been inclined **[*8]** to enforce the claimed Section 104 pricing provision, this enforcement power was lost when the NGA was superseded by the NGPA.

In response, plaintiffs have completely failed to carry their burden under summary judgment standards, to rebut or even dispute any of the above arguments. The gist of plaintiffs' response is merely that the Section 104 theory is "an entirely permissible calculation." Although plaintiffs' attempt to raise the Section 104 theory may not rise to the level of an "impermissible collateral attack" on the prior FERC orders approving the Section 102 and 103 prices, on the record presently before the court, we conclude plaintiffs have not met their burden to show the reasonableness of the Section 104 theory. Accordingly, defendants' motion is granted.

MOTIONS IN LIMINE

HN2[] The primary purpose of a motion in limine is to prevent prejudice at trial by either (1) precluding an opponent from mentioning potentially inadmissible evidence in his opening statement, or eliciting such evidence from a witness until the court has had the opportunity to rule on its admissibility, or (2) procuring a definitive ruling on the admissibility of evidence at the outset of the trial. **[*9]** *See Annot.*, 63 A.L.R.3d 311 (1975); 21 Wright & Graham, *Federal Practice and Procedure*, § 5037, p. 193-94 (1977). Under federal law, motions in limine are

---

[2] Plaintiffs do not contend Section 104 prices apply to Moxa gas, since this gas was not transported by the Rawlins-Hesston Pipeline.

generally disfavored. *Scarboro v. Travellers Ins. Co., 91 F.R.D. 21, 22 (E.D.Tenn. 1981)*. The better practice is to deal with questions of admissibility of evidence as they arise during trial. *Sperberg v. Goodyear Tire & Rubber Co., 519 F.2d 708, 712* (6th Cir.), *cert. den.*, *423 U.S. 987 (1975)*. This is because prior to trial, the court cannot know whether or for what purpose the evidence will be offered during the trial. Further, the absence of a contextual setting makes it particularly difficult for the court to render definitive rulings at this stage of the proceedings. Thus, where the parties have often sought to exclude broad categories of evidence, the court has generally denied the motions.

PLAINTIFF'S MOTIONS IN LIMINE

I. *Motion to Exclude All Evidence of Failure of Utilities to be Damaged Because Overcharges Were Passed On To Customers*

Plaintiffs move to preclude defendants from arguing that the utilities suffered no antitrust injury, since their overcharges were passed on to their customers. **[*10]** Defendants concede that under *Kansas v. Utilicorp United, Inc., 110 S.Ct. 2807 (1990)*, this defense is prohibited and, accordingly, the court grants plaintiffs' motion in this respect. The court's ruling does not, however, preclude all reference to the passthrough where it might otherwise be relevant.

II. *Plaintiffs' Motion to Exclude Evidence of FERC Policies and Practices*

Plaintiffs argue, with no supporting authority, that evidence of defendants' compliance with FERC policy and practices should be excluded on the basis of this court's prior rulings on the exclusive and primary jurisdiction issues. Plaintiffs also contend this evidence is "irrelevant, prejudicial, confusing and misleading."

HN3[] There is ample authority that "where antitrust claims arise in the context of a regulated industry, the antitrust defendant is entitled to raise and have considered its 'good faith adherence to regulatory obligations as an antitrust defense.'" *State of Illinois ex rel. Hartigan v. Panhandle Eastern Pipe Line, 730 F.Supp. 826, 933 (C.D. Ill. 1990)*, *citing* *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1109-10* (7th Cir.), *cert. denied*, *464 U.S. 891 (1983)*. **[*11]** We agree that "for this regulatory justification defense to apply, the defendant must first be able to point to a regulatory basis that is reasonable in the sense of being 'concrete articulable and recognized as legitimate' by the appropriate regulatory agency." *Id.*

Further, evidence of regulatory compliance is relevant to the issue of monopolization, since it may demonstrate that the alleged monopolistic activities are, in fact, procompetitive. Moreover, evidence of good-faith compliance with regulatory mandates may be relevant to defendants' alleged motivation to restrain competition.

Finally, in the instant case, it is plaintiffs who have raised the issue of regulation by claiming defendants' anticompetitive goal was to evade regulatory control over affiliate transactions. Having raised this issue, plaintiffs cannot now be allowed to exclude defendants' evidence to the contrary. Accordingly, plaintiffs' motion is denied.

III. *Motion to Exclude Testimony of Expert, C. Michael Butler, III*

Plaintiffs argue that any testimony by Butler regarding FERC Order 99 and FERC policies and practices in the late 1970's and early 1980's should be excluded because it reflects his opinion **[*12]** and because Butler does not (by his own admission) speak for the FERC. Nevertheless, plaintiffs argue since Butler's deposition testimony gives the impression that he is a spokesperson for FERC, his testimony will confuse the jury. Plaintiffs also contend Butler's testimony is excludable, since it includes legal opinions "telling the jury what result to reach." These arguments lack substance.

Here, plaintiffs have put in issue the defendants' motivation. In determining whether defendants' conduct was proper, the duties and obligations of defendants under FERC regulation must be considered in determining whether defendants' conduct was undertaken in furtherance of legitimate business or regulatory objectives. *See* *State of Ill. ex rel. Hartigan v. Panhandle Eastern Pipeline Co., supra at 908*. Plaintiffs have not disputed Butler's expert qualifications to assist the jury by testifying to these facts and, accordingly, the court denies plaintiffs' motion. *Rule 702, Fed R. Evid.*

IV. *Motion to Exclude Internal Memorandum Prepared by KPL Outside Legal Counsel*

Plaintiffs seek to exclude an internal memorandum, prepared as an initial analysis of the complaint filed in the MGUA **[*13]** proceeding by an attorney for KPL, which was inadvertently produced in discovery in this case. Plaintiffs argue this evidence is irrelevant, is not admissible as lay or expert testimony, and would confuse and mislead the jury.

We agree that the memorandum, which contains tentative impressions and initial legal conclusions as to claims filed in another proceeding, is irrelevant and, even if relevant, we conclude that any probative value the evidence might possess is outweighed by the substantial prejudice to plaintiffs, which would result from its introduction. *Rules 401*, *403, Fed. R. Evid.* Accordingly, plaintiffs' motion is granted.

V. *Motion to Exclude Testimony of FERC Staff Attorney Regarding Proposed FERC Rule*

Plaintiffs move to exclude the statements made to Amoco in 1980 by FERC staff attorney Leslie Lawner regarding the proposed FERC rule on tight sands pricing eligibility (Order No. 99). Lawner told Amoco that no negotiations and no consideration would be necessary to obtain tight sands pricing -- but rather that the contracts could be amended as a "pro forma act." Plaintiffs argue for exclusion on the basis that this opinion interpreted the proposed Rule and not actual **[*14]** Order No. 99 which followed later. Plaintiffs also argue that since Lawner's testimony will be introduced through a third party, it is excludable as hearsay.

The court agrees with defendants that Lawner's statements are not offered for their truth, but are offered and are relevant to prove (1) Amoco's state of mind in pursuing tight sands amendments with Pipeline, i.e. whether the amendments were executed with anticompetitive purpose or for legitimate business motives, and (2) lack of fraudulent intent. On this basis, the court denies plaintiffs' motion.

VI. *Motion to Exclude Evidence of Pipeline's Reliance on Advice of Counsel*

Plaintiffs contend the court should exclude any evidence relating to the Pipeline's reliance upon advice of counsel, since (1) Pipeline has disclaimed any intent to rely on an advice of counsel defense, and (2) because the evidence is not relevant and, even if relevant, is highly prejudicial. [3] Defendants counter that the evidence is admissible, even though not claimed as an affirmative defense, since it is relevant to prove (1) defendants' good faith and/or lack of required intent for violations of the antitrust, fraud and mail fraud (RICO) statutes, **[*15]** and (2) lack of anticompetitive purpose in amending the gas purchase contracts. Further, defendants assert the evidence is relevant to plaintiffs' claim of breach of the contractual duty of good faith and fair dealing.

The court agrees with defendants that this evidence is relevant to issues of anticompetitive motive and/or intent as well as to the issue of good faith and fair dealing. The court notes further, that in nearly all of the cases cited by plaintiffs, such evidence was admitted. Accordingly, plaintiffs' motion is denied.

VII. *Motion to Exclude Evidence of Plaintiff Utilities' Designation and Later Withdrawal of Designation of John Wilson and George Donkin as Expert Witnesses*

John Wilson and **[*16]** George Donkin were originally designated as experts by KPL, KG&E, and Utilicorp. These designations were later withdrawn, and both Wilson and Donkin will now testify for Kansas, Missouri and Farmland. Plaintiffs seek to preclude defendants from raising the issue of these experts' prior designation and subsequent withdrawal by the utilities under *Rules 103*, *402*, *403*, and 26(b)(4)(B), Federal Rules of Evidence.

---

[3] Plaintiffs' other objections to this evidence, i.e. the alleged bias of the counsel in question and the lack of specificity of the advice, go more to the weight of the evidence than its admissibility. The court also finds that defendants did not prohibit or limit discovery to the extent claimed by plaintiffs.

The court finds no basis for exclusion under the rules cited by plaintiffs. ***HN4***[] Rule 26(b)(4)(B) deals with the ability of a party to discover information about or from an adversary's nonwitness experts, and not with the admissibility at trial of collateral information regarding experts retained by a co-defendant. For similar reasons, the cases cited by plaintiffs, *Steele v. Seglie, 1986 WL 30765* (D. Kan. March 27, 1886), and *Ager v. Stormont Hosp., 622 F.2d 496 (10th Cir.1980)*, are inapposite. Although the court has reservations about the relevance of the testimony at issue, at this point the court denies plaintiffs' motion. [4]

[*17] VIII. *Motion to Exclude Evidence of Alleged Poor Management of Gas Service Company (GSC) Prior to Acquisition by KPL*

Pursuant to *Rules 401*, *402* and *403, Federal Rules of Evidence*, plaintiffs move to exclude "any evidence related to any aspect of GSC management," including the following: attitudes by William LaLonde (former GSC president) towards low-income consumers; management study by the Arthur Anderson company, which "can be read to be critical of management in certain respects"; and internal memoranda of GSC regarding operations and management after KPL's acquisition of GSC.

Defendants assert that the motion is overbroad and, further, that the evidence regarding alleged poor management of GSC is relevant to several issues, including (1) the lost profits claim (as an alternate reason for lost profits); (2) market power issues, insofar as GSC was criticized for not taking advantage of alternate intrastate gas supplies; and (3) fraud and concealment, insofar as GSC's lack of knowledge of details of the Wyoming program was due to lack of diligence on management's part.

We agree with defendants that the motion is overbroad, and also find that the evidence at issue possesses relevance **[*18]** to the issues noted by defendants. Accordingly, plaintiffs motion is denied.

IX. *Motion to Exclude Evidence of Natural Gas Explosions and Electric Contact Accidents*

Plaintiffs contend evidence of natural gas explosions and electric contact accidents is irrelevant to any issue in case and even if relevant, is highly prejudicial, and will serve only to inflame the jury. Defendants assert that, although they do not intend to offer evidence of details of these accidents, they may wish to offer evidence of these occurrences to counter plaintiffs' claims for lost profits. Defendants argue that some of the lost profits claimed by plaintiffs may be due to a costly repair program initiated subsequent to these accidents, and also due to KPL's deferral of a rate increase request because of safety questions arising from these explosions.

The court agrees with plaintiffs that detailed evidence of the accidents is prejudicial and irrelevant. However, if plaintiffs claim their lost profits are due solely to price of natural gas, the court believes defendants should be allowed to bring in other sources of lost profits and would allow evidence of the accidents for this limited purpose. Accordingly, **[*19]** plaintiffs' motion is denied.

X. *Motion to Exclude Evidence of Present Status of Two Former Kansas Corporation Commission Chairmen as District Judges*.

Here, plaintiffs note that defendants have listed two current federal district judges, both former chairmen of the Kansas Corporation Commission (KCC), as witnesses, and have also listed documents referring to or authored by these judges as trial exhibits. Plaintiffs move to exclude any reference to their current status as district judges.

Defendants state they have no intention of offering evidence of the status of these judges and, in addition, have no expectation of calling them as live witnesses, although they may use the testimony of each while chairman of the

[4] Defendants also counter that interrogatories have indicated that testimony of these two experts will be used by the States to support antitrust claims purportedly assigned by utilities to states. In view of the court's ruling on the assignment issue, this motion may be moot.

KCC. We agree with plaintiffs that reference to these witnesses' current status as district judges is irrelevant and prejudicial and, accordingly, grant plaintiffs' motion. *Rules 401*, *403, Fed. R. Evid.*

XI. *Motion to Exclude Evidence Relating to Wolf Creek Nuclear Generation Facility*

Plaintiffs move to exclude evidence of KG&E's involvement in the construction of the Wolf Creek Nuclear Generation Facility (Wolf Creek), specifically the facility's construction **[*20]** cost and the KCC's initial decision to exclude certain of these costs from KG&E's rate base. Plaintiffs claim this evidence is irrelevant and highly prejudicial, due to public hostility to KG&E engendered during the Wolf Creek hearings.

Defendants counter that the testimony is relevant to the issue of relevant market (to show that defendants' natural gas competes with alternative sources of fuel including nuclear energy), and equally relevant to rebut plaintiffs' allegation that the natural gas shortage was over by 1980 (to show that KG&E began to build Wolf Creek in the 1970's due to the gas shortage and remained committed to construction of facility in 1980 and 1981 because of stated "uncertain long-term gas supplies"). We agree with defendants that this evidence is relevant to the limited issues cited, especially to plaintiffs' claim regarding the supply of gas. Accordingly, plaintiffs motion is denied.

XII. *Motion to Exclude Expert Arthur Seder's Opinion as to the Reasonableness of Defendants' Acts*

Plaintiffs move to exclude defendants' expert, Arthur Seder, from offering "any opinion as to the reasonableness of defendants' conduct" with respect to the antitrust claims. Plaintiffs **[*21]** claim this testimony is irrelevant, unfairly prejudicial, and would not assist the jury in determining any material fact at issue. Defendants assert that Seder's testimony, based on his experience as an attorney and former officer of a major interstate pipeline, is relevant to support defendants' claims that their conduct (1) lacked anti-competitive effect and intent, and (2) resulted from legitimate business objectives.

The court agrees with defendants that this expert's testimony will assist the trier of fact in developing the relevant factors pertaining to the economic and competitive conditions in the industry in the relevant time period, factors which the court, in its August 2, 1990, order, deemed essential for resolution of the antitrust issues in this case. Accordingly, the court denies plaintiffs' motion.

XIII. *Motion to Condition Attendance of Certain of Defendants' Witnesses on Their Appearance in Plaintiffs' Case in Chief, and to Designate Counsel for Examination of Witnesses*

Plaintiffs move for an order (1) requiring defendants to make certain of their present and former employees available for live testimony during plaintiffs' case in chief, if defendants intend **[*22]** to have those witnesses testify live in defendants' case in chief; and (2) requiring plaintiffs and defendants to designate a single attorney per witness for direct and cross examination of all witnesses. As the parties were informed in the August 21, 1990, hearing, the court grants these motions in part.

First, witnesses employed by defendants, who will testify live in defendants' case in chief, must be produced for live testimony in plaintiffs' case in chief. [5] The court orders defendants to respond to plaintiffs' requests for these witnesses by September 10, 1990, and further orders plaintiffs to furnish defendants with the dates these witnesses will be called in plaintiffs' case in chief by September 17, 1990. The court expects counsel to comply with the letter and spirit of this ruling in order to effect the expeditious presentation of evidence without needless repetitive calling of witnesses. Following these witnesses' direct testimony, the court will allow defendants a broadened scope of cross examination. Second, the parties will designate one attorney as lead counsel for direct and cross examination of each witness. Following initial examination, each party will be permitted **[*23]** supplementary questions as needed, subject to rulings on cumulativeness and redundancy.

DEFENDANTS' MOTIONS IN LIMINE

---

[5] The category of witnesses under the defendants' "present employ or direct control" includes employees only, and would generally not include retirees. Disputes concerning witnesses employed as consultants will be dealt with as they arise.

I. *Motion to Invalidate the Sharing and Partial Assignment Agreements Between KPL and Kansas/Missouri*

Defendants move to invalidate the Sharing and Partial Assignment Agreements (assignments) between KPL and the Attorneys General of Kansas and Missouri. In the alternative, defendants move for an order that "any trial be conducted as if the assignments did not exist."

The tights sands gas at issue in these cases was sold by the Pipeline, in part, to local distribution companies (LDC's). Plaintiff KPL is an LDC and resold the gas to its own customers, including industrial, commercial, and residential users in Kansas, Missouri, Oklahoma, and Nebraska. KPL also **[*24]** purchased gas for its own use. KPL claims, as damages, an alleged overcharge for each unit of gas purchased, including gas resold to others. KPL also claims lost profits resulting from the alleged overcharge.

The complaints of the States, through their Attorneys General, originally included claims of residential users and governmental entities in Kansas and Missouri who purchased gas, either directly or indirectly (through an LDC), from the Pipeline. In *In re Wyoming Tight Sands Cases, 695 F.Supp. 1109 (D.Kan. 1988)*, the district court dismissed the states' *parens patrie* claims on behalf of residential users based on *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481 (1968)*, and *Illinois Brick Co. v. Illinois, 431 U.S. 720 (1977)*, in which the Supreme Court held that the direct purchaser of a product and no other in the distribution chain is the "party injured" within the meaning of section 4 of the Clayton Antitrust Act. [6] Therefore, only the direct purchaser, here, KPL, may sue to recover the full amount of any alleged illegal overcharges. The district court was subsequently affirmed by the Tenth Circuit, *In re Wyoming Tight Sands Antitrust Cases* ***[*25]*** *, 866 F.2d 1286 (10th Cir. 1989)*, and the Supreme Court, *Kansas v. Utilicorp United Inc., 110 S.Ct 2807 (1990)*, which declined to create an exception to the rule for regulated industries.

[*26] Two months after the Supreme Court granted certiorari to review the direct purchaser issue in this case, KPL entered into agreements, each styled "Sharing and Partial Assignment Agreement," with the Missouri and Kansas Attorneys General. In these agreements, the parties state that it is "in their interests to resolve" who is "the most appropriate party to advance claims in [this] litigation relating to natural gas resold by KPL to residential consumers of natural gas." Further, the parties agreed as follows:

1. KPL agreed to assign its claims against defendants for illegal antitrust overcharges attributable to natural gas resold by KPL to residential consumers of natural gas in Missouri and Kansas to the states, so that "those claims may be prosecuted by [Missouri and Kansas] with the same rights as KPL would have."

2. In return, the States agreed to dismiss, with prejudice, the appeals against KPL then pending before the Supreme Court.

3. Further, the States agreed to "support KPL in its claims for lost earnings, not to exceed $ 15,000,000, attorney's fees and out-of pocket expenses incurred in KPL's prosecution of the [litigation]," wherever the claims may be presented "whether **[*27]** by settlement, in court, or before the [Missouri Public Service Commission or Kansas

---

[6] In *Hanover Shoe*, plaintiff alleged that defendant United had monopolized the shoe manufacturing machinery industry and sought treble damages for overcharges paid in leasing machinery from defendant. United defended, in part on the ground that Hanover had passed on the overcharge to its customers and, as a result, had suffered no injury. The Supreme Court disallowed the defense, concluding that (1) establishing the amount of the overcharge shifted to indirect purchase "would normally prove insurmountable," *392 U.S. at 493*, and (2) allowing a pass-on defense" would reduce the effectiveness of antitrust actions by diminishing the recovery available to any potential plaintiff. *See id. at 494*.

In *Illinois Brick*, the Court reached a similar result. In that case, the State of Illinois sued concrete block manufacturers for alleged antitrust violations. The status of Illinois was that of an indirect purchaser. The Court rejected the claim, holding that since, under *Hanover Shoe*, the defendants could not use a pass-on defense in an action by direct purchasers, offensive use of the pass-on theory by an indirect purchaser would implicate similar risks of complicated proof as well as risks of multiple liability. *431 U.S. at 730-31*.

Corporation Commission]. The parties also agreed that they would cooperate in the prosecution of their claims and with regard to disbursement of any damages.

4. The parties then agreed, "unless inconsistent with a final order of the applicable court in this case," that [Missouri and Kansas] would at trial offer evidence of (a) purchase of gas by residential consumers; (b) operation of relevant PGA (purchase gas adjustment clauses; and (c) "other evidence relating to natural gas purchases by [Missouri and Kansas] residents."

5. The parties agreed the assignment would be valid and enforceable "regardless of the outcome" of the Supreme Court decision then pending.

Generally, ***HN5***[] the status of assignments under the Sherman and Clayton Acts is a matter of federal law. [7] *In re Fine Paper Litigation State of Washington, 632 F.2d 1081, 1090 (3d Cir. 1980)*. Thus, in determining the validity of assignments of federal antitrust claims from direct to indirect purchasers, the court must examine any potential conflict with the Supreme Court's decisions in *Hanover Shoe*, *Illinois Brick*, and *Kansas v. Utilicorp* **[*28]** *United*. If the assignments serve to exacerbate any of the primary concerns underlying these decisions, the assignments must be rejected, at least insofar as they might affect the conduct of the trial.

Central to the holding of *Illinois Brick* was the Supreme Court's concern with (1) the difficulty of apportioning damage overcharges between direct and indirect purchasers; (2) the increase in complexity in already complicated treble damage suits; and (3) the risk of multiple recoveries. The court agrees with defendants that, here, the assignments implicate each of these concerns. In these respects, the instant case differs from *In re Fine Paper Litigation State of Washington, supra*, where the court upheld the validity of assignments of federal antitrust claims to indirect purchasers. In that case, the **[*29]** assignments arose in the context of a settlement and the court found they would "provide defendant with assurances against multiple liability" and "[would] not add to the complexity of the lawsuit." *632 F.2d at 1090*. Here, in the context of a trial involving multiple claims of five plaintiffs against four defendants, the increase in complexity is much more serious. [8]

Moreover, while the court in *In re Fine Paper* found no apportionment problems, here, such complications exist. First, apportionment would be necessary to separate damages suffered by residential consumers in the states of Kansas, Missouri, Nebraska and Oklahoma. Second, apportionment would be necessary to the extent KPL is entitled **[*30]** to claim any portion of the overcharge it may have absorbed. [9] As the Supreme Court indicated, the necessity of devising such an apportionment formula to account for these variables is "the very complexity that *Hanover Shoe* and *Illinois Brick* sought to avoid." *Kansas v. Utilicorp United, supra, 110 S.Ct. at 2809*.

Finally, allowing the assignments here would increase the likelihood of multiple and overlapping recoveries. Presently, KPL claims damages for breach of resale contracts to residential consumers which parallel the federal antitrust claims of residential consumers. We agree with the Supreme Court that "the task of disentangling **[*31]** overlapping damage claims is not lightly to be imposed upon potential antitrust litigants, or upon the judicial system. *Id. at 2814*, *quoting* *Blue Shield of Virginia v. McCready, 457 U.S. 465, 475, n.11 (1982)*.

For all the above reasons, the court declines to confer validity on those portions of the assignments which purport to allow the states of Kansas and Missouri to prosecute, at trial, the claims of residential consumers (indirect

---

[7] Since the briefs of the parties fail to adequately address the assignments as they pertain to KPL's state antitrust claims, the court decides here only the issue of assignment of federal antitrust claims.

[8] For example, as defendants argue, this case could be further complicated, since even if the States could represent consumers residing in Kansas and Missouri, they could not represent consumers from other states. These unrepresented consumers could then seek intervention and further delay the resolution of the action.

[9] The absorption of overcharges could occur due to (1) the extent market conditions and state regulation would have allowed the utility to raise its rates prior to the overcharge, and (2) because state regulation might have prevented an immediate or complete passthrough of gas purchase costs. *See* *Kansas and Missouri v. Utilicorp United, Inc., supra, 110 S. Ct at 2813*.

purchasers of natural gas) in their respective states. Trial will therefore proceed as if the assignments did not exist. [10] **[*32]** Specifically, we grant defendants' request that the assignments not affect the presentation of evidence, arguments of counsel, use of expert witnesses, and requests for damages by the respective plaintiffs during the trial. To hold otherwise, would be to allow the States, as indirect purchasers, to accomplish by assignment that which the Supreme Court has clearly prohibited. [11]

II. *Motion To Preclude the Utilities' Lost Profit Damages*

Under their federal antitrust claims, plaintiffs KPL and Utilicorp seek overcharge damages for natural gas, as well as lost profits on the gas these companies would have sold had the alleged unlawful 107(c)(5) prices not been charged by the Pipeline. To estimate these lost profits, plaintiffs intend to estimate the additional sales the utilities would have made, but for the alleged overcharge, and then multiply these lost sales by the per-unit profit margin allowed under their actual rate structure.

Defendants move for an order precluding claims for lost profits, because (1) allowing them would violate the policy underlying *Kansas v. Utilicorp United* and *Illinois Brick*; (2) the assumptions upon which the calculations for lost profits are based are "inherently speculative"; and (3) regulation of the utilities complicates a lost profits analysis.

Defendants' contentions **[*33]** have no merit. First, in both cited cases, the Supreme Court recognized the potential of recovery of lost profits as a separate element of antitrust damages, *Kansas v. Utilicorp United, 110 S.Ct at 2813* ("an overcharge may injure a utility, *apart from the question of lost business*, even if the utility raises its rates to offset its increased costs"); *Illinois Brick 431 U.S. at 733 n.13, 743 n.27* (injury from reduction in sales volume may be claimed above and beyond overcharge damage).

Second, neither in these two cases, nor in *Hanover Shoe v. United Shoe Machinery Corp., 392 U.S. 481 (1968)*, did the Supreme Court expressly disapprove the use of economic formulas devised by experts to prove the element of lost profits. In fact, it has long been a cardinal principle of ***antitrust law*** that ***HN6***[] considerable latitude is allowed in proving various elements of antitrust injury, including lost profits. This is because "damage issues in [antitrust cases] are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts . . . ," *World of Sleep, Inc. v. La-Z-Boy Chair Co., 756 F.2d 1467, 1478* (10th Cir), *cert. den.*, *474 U.S. 823* ***[*34]*** *1985)*, *quoting* *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123-24 (1969)*. Thus, if the fact of lost profits is demonstrated, the actual amount need not be proven to an absolute certainty, since in such cases economic harm is "frequently intangible and difficult to quantify." *Id.*, *citing King v. King Enterprises v. Champlin Petroleum Co., 657 F.2d 1147, 1157 (10th Cir. 1981)*, *cert. denied*, *454 U.S. 1164 (1982)*.

Third, we reject defendants' contention that the regulatory complications of a lost profits analysis warrants precluding the introduction of such evidence. In essence, defendants' claim here is that plaintiffs' economic model supporting the lost profits theory is flawed, because it fails to account for the impact of the state regulatory agencies, i.e. whether or not the profits allegedly lost would have been permitted or approved. Even if defendants are correct, their objections go more to the weight of the evidence than its admissibility. It will be up to the trier of fact to determine the reasonableness of the economic model offered to support the lost profits claim. [12] Accordingly, defendants' motion is denied.

---

[10] As defendants argue, the States have not moved for substitution of parties as required by *Rule 25(c), Fed. R. Civ. P.*, which applies to "any transfer of interest" during the pendency of an action. Although the court has decided the instant motion on the merits, we note that, had the motion for substitution been made, it is unlikely that we would have determined that the substitution would "facilitate the conduct of the litigation." *See* 7C Wright, Miller & Kane, *Federal Practice and Procedure*, § 1958, p. 557 (1986).

[11] We note, however, that our ruling does not, at this time, affect the assignments as they pertain to the post-trial apportionment between the parties of any damages.

[12] In addition, as the court stated in its August 2, 1990, order, any damages which are essentially duplicative will be thoroughly scrutinized at trial.

[*35] III. *Motion to Prohibit Introduction of Certain Damage Evidence by Kansas and Missouri*

As a "housekeeping matter," defendants move to preclude introduction of certain evidence relating to damages. First, based on *Kansas v. Utilicorp United, supra*, defendants argue that any damage calculation introduced by the States based on total volume of gas the Pipeline sold to LDC's for resale to residential consumers/indirect purchasers is improper. The States agree and have already indicated their intention to rely solely on overcharges born by state governmental direct purchasers. Accordingly, the court grants this portion of defendants' motion. [13]

Next, defendants contend the States may not assert new antitrust or breach of contract damage claims on behalf of municipal distribution customers. With respect to the antitrust claims, the **[*36]** court finds Kansas has only asserted, and continues only to assert claims on behalf of municipal utilities for gas purchased for their own use and not for resale. Since Kansas has not attempted to assert new antitrust claims, this portion of the motion is moot. On the other hand, in its response, Missouri concedes that it wishes to assert claims for breaches of contract for three municipalities (Granby, Oronogo, and Plattsburg) which were not included in the pretrial order. [14] Missouri now moves for modification of the pretrial order to include these claims, asserting that, since defendants have known of these claims "for years," Missouri's "inadvertent failure to include them in the pretrial order should not be dispositive."

As the parties are well aware, ***HN7***[] under the Federal Rules, the pretrial order supersedes the pleadings and controls the subsequent course of litigation. *Fed. R. Civ.* ***[*37]*** *P. 16(e)*. Generally, claims of parties which are not included in the final pretrial order cannot be asserted at trial except to prevent manifest injustice. *Id. See Hernandez v. Alexander, 671 F.2d 402, 407 (10th Cir. 1982)*. Moreover, the trial court has the discretion to exclude from trial those issues and claims not found in the pretrial order. *Randolph County v. Alabama Power Co., 784 F.2d 1067, 1072 (11th Cir. 1986)*, *modified on other grounds*, *798 F.2d 425 (1986)*, *cert. denied*, *479 U.S. 1032 (1987)*.

Here, the court agrees with defendants that the size and scope of the litigation are factors to be considered in granting a motion to modify a pretrial order. Taking into consideration the magnitude and complexity of this case, as well as the impending trial date, and given the fact that Missouri has not demonstrated any excuse for its neglect in failing to modify the pretrial order at an earlier time, we grant defendants' motion.

Finally, defendants move for an order precluding the State Attorneys General from seeking breach of contract and/or fraud damages on behalf of cities within those states. Defendants argue that neither Attorney General is authorized to bring **[*38]** an action on behalf of a city on a matter of local (rather than state-wide) concern since, under the home rule provisions of the respective states, a city has the exclusive right to govern its own affairs where purely local matters are concerned.

Although styled as a motion in limine, the court concludes that the ruling sought by defendants in this motion is a dispositive one. Since the deadline for filing dispositive motions was May 1, 1991, and given the fact that defendants have not moved for leave to file out of time, the court denies this portion of the motion as untimely.

Moreover, the court finds defendants' argument fails on the merits. Although both Kansas and Missouri have empowered municipalities, through their city attorneys, to prosecute actions to which the city is a party, the court finds nothing in either state's statutes which would preclude the state attorneys general from prosecuting such suits in appropriate cases. *See K.S.A. 75-702* (attorney general may appear in cases "in which the state shall be interested or a party"); *R.S.Mo. § 27.060* (attorney general may appear "to protect the rights and interest of the state). *See also Clark Oil & Refining Corp. v.* ***[*39]*** *Ashcroft, 639 S.W.2d 594, 595-97 (Mo. 1982)* (relevant inquiry is not whether state law allows challenged exercise of attorney general's power, but rather whether it prohibits it);

---

[13] The court, however, declines at this time to grant defendants' motion with respect to the state's "mention" of evidence of the full amount of alleged overcharges in this case.

[14] The pretrial order identifies only three contracts, two for direct sale and one for resale, all involving the city of Springfield.

Memorial Hospital Assoc. v. Knutson, 239 Kan. 663, 667, 722 P.2d 1093, 1097 (1986) (attorney general's powers are as broad as the common law unless restricted or modified by statute).

IV. *Motion to Preclude the Introduction of Overcharge Damages in Connection With Non-Antitrust Claims*

Defendants seek to preclude plaintiffs from claiming damages for overcharges on their claims for breach of contract against the Pipeline. [15] Defendants assert that, since a portion of the alleged overcharges was passed on to customers, allowing plaintiffs to collect the total amount of these damages would constitute a windfall. The court agrees.

[*40] ***HN8***[] The Uniform Commercial Code embodies general common law principles of contract damages which seek to place "the aggrieved party in as good a position as if the other party had fully performed [the contract]." *See* K.S.A. 84-1-106; R.S.Mo. 400.1-106(1). Where the contract claim involves an alleged breach of the duty of good faith fair dealing, the UCC provides no additional remedy. *See*, *e.g.*, Rigby Corporation v. Boatmen's Bank & Trust Co., 713 S.W.2d 517, 536 (Mo. Ct. App. 1986) (no other remedy for breach of obligation of good faith than for plaintiff to be restored to *status quo ante*). The court agrees with defendants that contract claims for overcharges not absorbed by plaintiffs would place plaintiffs in a better position than that which plaintiffs would have occupied but for the breach. The court further agrees that the policies which allow the collection of such damages in antitrust cases are not applicable in the contract context. Accordingly, the court grants defendants' motion as to those breach of contract claims for overcharges which were passed on to customers.

V. *Motion to Bar Multiple Damage Theories*

Defendants seek to limit plaintiffs' presentation **[*41]** of expert evidence regarding multiple theories of antitrust overcharge damages to the damage theory which produces the "lowest overcharge figure." Plaintiffs' differing damage theories are posited on various hypothetical competitive alternatives available to the Pipeline at the time it agreed to the payment of Section 107(c)(5) tight sands prices. [16]

The parties agree that the traditional recovery in antitrust cases is the amount **[*42]** by which the unlawful price charged exceeds the price that would have been charged in the absence of the alleged violations. Defendants cite no applicable authority which would require the court to limit plaintiffs' damage theories at this time. The court agrees with plaintiffs that, as long as each theory is a reasonable approximation of competitive terms which Pipeline could have been expected to demand at the time, it is for the jury to decide which theory to apply. *See* Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251 (1946) (proper to submit antitrust claim to jury under two damage scenarios yielding two different amounts). Accordingly, defendants' motion is denied.

VI. *Motion to Prevent Expert George Donkin's Testimony Regarding the Competitiveness of Defendants' Contracts*

Here, defendants seek to exclude testimony by Kansas, Missouri and Farmland's expert, George Donkin, relating to the competitiveness of defendants' gas purchase contracts. They contend Donkin's opinion is based on his review of contracts between other non-party pipelines and producers in the Rocky Mountain area in the relevant time period. These contracts were produced in discovery in the *Midwest* **[*43]** *Gas Users Association* (MGUA) proceeding and are subject to a protective order, including a ruling that the contracts could not be used in the instant case unless obtained through separate discovery. Defendants contend that, since the plaintiffs did not conduct separate discovery, they are attempting to circumvent this ruling through the testimony of expert Donkin,

[15] Defendants also seek to preclude plaintiffs from claiming damages for overcharges on their tortious interference claim. Since the court granted defendants' motion for summary judgment on that claim in its August 2, 1990, order, this motion is moot.

[16] The "No 107" estimate assumes the Pipeline would have refused to pay 107(c)(5) prices and would have instead paid § 102 or § 103 prices. The "market-out" estimate assumes the Pipeline would have negotiated for immediately exercisable market-out provisions. Finally, the "base case" estimate is derived from assumptions that the Pipeline would have chosen different pricing alternatives based on the year the gas was produced.

With respect to the utilities' expert Dr. Kretz, these plaintiffs have represented to the court that Dr. Kretz intends to rely solely on the "base rate" theory of damages.

who gained access to the contracts as a witness in the MGUA proceeding. Defendants state that Donkin's deposition indicates that, in reaching his conclusion regarding the competitiveness of defendants' contracts in the instant case, he "could not remove from [his] mind the information that applies under those [MGUA] contracts and transactions in arriving at opinions and conclusion in this antitrust litigation." Defendants further argue that, if defendants attempt to cross examine Donkin on the basis for his opinions in order to discredit his reliance on these contracts, Donkin will hide behind the FERC protective order to avoid questions about the contracts' terms.

Plaintiffs counter that (1) Donkin will not testify at trial regarding the MGUA contracts; (2) his opinion regarding competitiveness of defendants' contracts **[*44]** is based on substantial admissible evidence apart from the MGUA contracts; and (3) because the admissible contracts constitute a sufficient basis for Donkin's opinion, that opinion is admissible regardless of his awareness of the protected MGUA contracts. Further, plaintiffs contend that, since they do not intend to elicit the MGUA contracts as a basis for Donkin's opinion, if defendants wish to do so, it is defendants' burden to seek relief from the FERC protective order or seek discovery of the contracts in this case. [17]

Here, the court agrees with plaintiffs that Donkin has testified that the MGUA contracts served merely as "input into [his] overall opinion, but only in the sense that [they] are further support for the opinions and conclusions that [he] otherwise would **[*45]** have if that information did not exist." Therefore, if Donkin testifies that his opinion regarding competitiveness is based upon contracts other than the MGUA contracts, and if plaintiffs do not elicit testimony regarding the MGUA contracts from Donkin, the burden then falls upon defendants (should they dispute Donkin's testimony and seek to establish that his opinion was, in fact, based on the MGUA contracts) to seek relief from the protective order or seek separate discovery. Accordingly, the court denies this motion.

VII. *Motion to Preclude Plaintiffs from Mischaracterizing Ongoing FERC Proceedings*

Defendants move to preclude plaintiffs from arguing to the jury that FERC has decided the "arm's-length bargaining" issue adverse to defendants. Clearly, as plaintiffs concede, such reference would be improper, as that issue is still pending before the administrative agency.

Accordingly, the court grants defendants' motion.

VIII. *Motion to Preclude Plaintiffs' Experts from Offering Factual Conclusions*

Defendants seek to preclude plaintiffs' experts Wilson, Donkin, and Leitzinger from testifying about (1) the proper weight to be given conflicting evidence on disputed issues **[*46]** of fact and (2) witness credibility. Although the court agrees with the general principles underlying this motion, the court finds this motion overbroad. While experts may be precluded from testifying regarding the truthfulness of specific witnesses, an expert may render an opinion based on a review of the disputed evidence in the case. Accordingly, the court denies this motion and will, instead, rule on specific objections as they are raised at trial.

IX. *Motion to Preclude Reference to Out of State Residence of Counsel*

Defendants seek to preclude reference, during trial or voir dire, to the out-of-state residence of numerous counsel in this case, contending such reference would be irrelevant and prejudicial. The court agrees with plaintiffs that pursuant to *Rule 47(a), Federal Rules of Civil Procedure*, courts and counsel uniformly pose questions about the jury's relationships with various parties and their attorneys. *See*, *e.g.*, *Progner v. Eagle, 377 F.2d 461, 462 (4th Cir. 1967)*. Accordingly, the court denies this motion, since any improper attempt to prejudice jurors due to employment of out-of-state counsel can be adequately dealt with at trial.

X. *Motion* **[*47]** *to Prohibit Appealing to Self-Interest of Jurors as Ratepayers and Taxpayers*

---

[17] Plaintiffs' argument is also based on *Rule 703, Fed. R. Evid.*, which provides that an expert may rely on inadmissible facts or data in forming his opinion, as long as they are "of a type reasonably relied upon by experts in the particular field."

Defendants move to exclude any appeal by plaintiffs to a potential financial stake jurors, as ratepayers, might have in the outcome of this case. Clearly, such an appeal is strictly prohibited and plaintiffs state they have no intention of making such an appeal. Accordingly, the court grants defendants' motion.

In summary, defendants' motion for summary judgment on plaintiffs' "Section 104" damage theory (Doc. #1292) is granted, and the motions in limine filed by plaintiffs and defendants (Doc. #1361, #1422, and #1433) are granted in part and denied in part, as set forth above.

IT IS SO ORDERED.

Dated this 6th day of September, 1990, at Kansas City, Kansas.

Desai v. Impacta, S.A.

United States District Court for the District of New Jersey

September 7, 1990, Decided ; September 7, 1990, Filed

Civil Action No. 89-4817

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

To determine the sufficiency of pleadings under a *Fed. R. Civ. P. 12(b)(6)* standard, the court must take the allegations of the complaint as true and give the plaintiff the benefit of all inferences which fairly may be drawn from the liberally viewed complaint. The complaint cannot be dismissed unless plaintiff can prove no set of facts that would entitle the plaintiff to relief. However, the rule also provides that if on a motion asserting the defense numbered (6) to dismiss for failure of the pleading to state a claim upon which relief can be granted, matters outside the pleading are presented to and not excluded by the court, the motion shall be treated as one for summary judgment and disposed of as provided in *Fed. R. Civ. P. 56*, and all parties shall be given reasonable opportunity to present all material made pertinent to such a motion by R. 56. Fed. R. Civ. P 12(b).

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Summary Judgment, Motions for Summary Judgment**

Summary judgment is disfavored in antitrust cases. However, in the context of an antitrust case, to survive a motion for summary judgment, the non-moving party must establish that there is a genuine issue of material fact as to whether the moving party entered into an illegal conspiracy that caused the non-moving party to suffer a cognizable injury. *Fed. R. Civ. P. 56(e)*. This showing has two components. First, the non-moving party must show more than a conspiracy in violation of the antitrust laws; they must show an injury to them resulting from the illegal conduct. Second, the issue of fact must be "genuine." *Fed. R. Civ. P. 56(c)*, *(e)*. When the moving party has carried its burden under R. 56(c), its opponent must do more than simply show that there is some metaphysical doubt as to the material facts. Therefore, when the non-moving party's evidence is merely "colorable" or "not significantly probative," the court may grant summary judgment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN3[] **Monopolies & Monopolization, Actual Monopolization**

There are two main elements in monopolization: (1) the possession of monopoly power in a relevant market, and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident. These two elements actually comprise a three-pronged standard. First, a plaintiff must define the relevant market, which has been allegedly monopolized by the defendant. Next, the plaintiff must show that the defendant possesses monopoly power within that relevant market. Lastly, the plaintiff must show that the defendant willfully acquired and maintained that power, as opposed to having attained that position through legitimate means or circumstances.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN4[] **Relevant Market, Geographic Market Definition**

The relevant market for the purposes of determining monopolization under the antitrust laws is the market for comparable products or lines of products in a particular geographic sales area.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] **Relevant Market, Product Market Definition**

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes and specialized vendors. The definition of the relevant geographic market must correspond to the commercial realities of the industry and be economically significant.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Regulated Practices, Market Definition**

In general, products which have a high cross-elasticity of demand are included in the same product market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power is the power to control prices or exclude competition. The existence of such power may be inferred from the predominant share of the market. However, no precise standards for the percentage of market share that a defendant must have, absent direct evidence of monopoly power, before being found guilty of monopolization have been defined. Several courts have held that absent special circumstances, a defendant must have a market share of at least 50 percent before he can be found guilty of monopolization.

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN8[] **Attempt, Elements**

The two elements of an attempted monopolization offense: (1) the actor must have a specific intent to monopolize the relevant market, and (2) the actor must have sufficient market power to come dangerously close to success. As with a claim of actual monopolization, market share is a critical consideration. A market share of less than 50 percent may support an attempted monopolization claim if other factors such as concentration of market, high barriers to entry, consumer demand, strength of the competition, or consolidation trend in the market are present. However, while the exact market share percentage necessary to prove attempt to monopolize may vary under differing market conditions, absent a showing of special market conditions, a market share of less than 10 percent, as a matter of law, usually will not support a finding of attempt to monopolize.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN9[] **Actual Monopolization, Claims**

One element of a conspiracy to monopolize offense is a specific intent to monopolize the relevant market. In addition, such intent may be inferred from the proof of actual monopoly power. Conspiracy claims under the Sherman Act, *15 U.S.C.S. §§ 1*, *2*, must be reciprocally distinguishable from and independent of each other although the objects of the conspiracies may partially overlap.

Antitrust & Trade Law > Sherman Act > General Overview

Mergers & Acquisitions Law > Antitrust > Interlocking Directorates

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN10[] **Antitrust & Trade Law, Sherman Act**

Vertical agreements on resale prices are per se illegal. Within the context of vertical nonprice restraints, however, the scope of per se illegality is much narrower. This distinction is based on the conclusion that vertical nonprice restraints have not been shown to have such a "pernicious effect on competition" and to be so "lacking in redeeming value" as to justify per se illegality.

HN11[] **Sherman Act, Claims**

To sustain a claim under the Sherman Act, *15 U.S.C.S. § 1*, plaintiffs must allege and prove: (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiff was injured as a proximate result of that conspiracy.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Constitutional Law > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Jurisdiction

HN12[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

Pendent jurisdiction exists whenever there is a claim arising under the U.S. Const., the laws of the United States, and treaties made, or which shall be made, under their authority of the *U.S. Const., art. III, § 2*, and the relationship between that claim and the state claim permits the conclusion that the entire action before the court comprises but one constitutional "case." The federal claim must have substance sufficient to confer subject matter jurisdiction on the court. It has consistently been recognized that pendent jurisdiction is a doctrine of discretion.

Counsel: JOSEPH H. SHARLITT, ESQ., JANIS H. BRENNAN, ESQ., Goodwin & Soble, Washington, D.C. -and- JOHN J. DALTON, JR., ESQ., Cedar Grove, New Jersey, (Attorneys for Plaintiffs).

Judges: Alfred M. Wolin, United States District Judge.

Opinion by: WOLIN

Opinion

OPINION

Plaintiffs Navin Desai and Bramer Aluminum Corporation originally brought their Complaint in this action on November 20, 1989. Without any defendant having yet answered, Desai filed their First Amended Complaint on February 6, 1990. The First Amended Complaint differed from the original Complaint only in the addition of 411 International, Inc., as a party-plaintiff. Desai's First Amended Complaint asserted claims for the violation of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and asserted several contract and state law tort claims.

Defendants Impacta, S.A. and Geoffrey **[*2]** M. Thomas ("the Brazilian defendants") then moved to dismiss the complaint pursuant to Fed. R. Civ. P 12 (b) (6) or for summary judgment pursuant to *Fed. R. Civ. P. 56*. By letter of counsel, filed March 6, 1990, defendants Amber International, Inc., James Krah and John Grim ("the New Jersey defendants") requested to join in the motion filed by the Brazilian defendants to dismiss the complaint or for summary judgment. The Court granted the New Jersey defendants permission to join in the original motion to dismiss at the hearing held before the Court in this matter on April 9, 1990. In addition to the arguments raised by the Brazilian defendants, the New Jersey defendants also contend that any claims against them are barred by the entire controversy doctrine and by a prior settlement reached among the various parties in a prior state court action.

The Court heard argument on the contentions raised by the New Jersey defendants on April 9, 1990 and reserved decision in light of the disposition of the Brazilian defendants' motion. After having reviewed the submissions of plaintiffs and the Brazilian defendants, the Court carried the motion of the Brazilian defendants until June 25, 1990, **[*3]** and allowed plaintiffs to file a second amended complaint to which the motion would then be addressed. The permission to file a second amended complaint was granted on the condition that should the pending *Rule 12 (b) (6)* motion be granted, the grant would be with prejudice. Plaintiffs filed a Second Amended Complaint on May 8, 1990. Supplemental certifications and affidavits were submitted by the parties and the Court heard oral argument on June 25, 1990. After reviewing the original and supplemental submissions of the parties and hearing the arguments of counsel, for the reasons set out below, the Court will grant the motion of all defendants and dismiss plaintiffs' Second Amended Complaint in its entirety. Counts One through Five will be dismissed with prejudice and Counts Six through Ten will be dismissed without prejudice.

I. *BACKGROUND*

Plaintiffs' Second Amended Complaint consists of ten counts. Counts One through Four allege violations of *Sections 1* and *2* of the Sherman Act. Counts One and Two are alleged solely against defendant Impacta, S.A. Counts Three and Four name all defendants. Count Five seeks injunctive relief for all defendants' alleged violations of the antitrust **[*4]** laws. Counts Six through Ten allege various state law causes of action against one or the other, or both, of the Brazilian defendants.

Plaintiff Bramer Aluminum Corp. ("Bramer") is a New Jersey corporation incorporated in 1982. Bramer is a distributor of flexible and rigid extruded aluminum tubes. Bramer is a wholly-owned subsidiary of plaintiff 411 International, Inc. ("411"), a holding company incorporated in 1985. Plaintiff Navin Desai is the owner of a majority interest in 411. Defendant Impacta, S.A. ("Impacta") is a Brazilian manufacturer of flexible and rigid extruded aluminum tubes. For the purposes of this opinion, the Court will refer to flexible extruded aluminum tubes as flexible tubes and will refer to rigid extruded aluminum tubes as aerosol cans. Defendant Geoffrey M. Thomas was at all times relevant to this action the Managing Director of Impacta and was, at all relevant times, responsible for Impacta's sales and distributor relationship with plaintiffs. Defendants James Krah and John Grim were employees of Bramer until approximately April 12, 1988, when they left Bramer to form defendant Amber International, Inc. ("Amber").

Plaintiffs allege in their Second Amended **[*5]** Complaint that the jurisdiction of this Court over all defendants is founded on the existence of a federal question relating to defendants alleged violations of the antitrust laws. Plaintiffs' allege that this Court has pendent jurisdiction over the common law counts asserted in the complaint against defendants Impacta and Thomas. [1] Plaintiffs' claims can be sorted into three distinct categories. First, plaintiffs have alleged that defendants have violated *Section 2* of the Sherman Act by monopolizing, attempting to monopolize and conspiring to monopolize the relevant market set out in the Second Amended Complaint. Second, plaintiffs have alleged that defendants have violated *Section 1* of the Sherman Act by conspiring to eliminate Bramer as a distributer of flexible tubes and aerosol cans. Third, plaintiffs have alleged that defendants Impacta and Thomas are liable under several state law causes of action which were previously brought against and settled with defendants Amber, Krah and Grim in a previous state court action. Defendants have moved to dismiss the complaint in its entirety prior to submitting their answer because they believe that plaintiffs have yet to allege a valid **[*6]** and enforceable cause of action after three attempts. All parties have submitted material outside the pleadings which the Court has accepted for the purposes of this determination. The Court will discuss and analyze plaintiffs allegations within the rubric of the three broad categories set out above.

[1] Defendants Amber, Krah and Grim are all citizens of New Jersey, plaintiffs' state of citizenship. Therefore, there is not complete diversity between all plaintiffs and all defendants. Accordingly, this Court may not exercise jurisdiction over this action on the basis of diversity.

II. *DISCUSSION*

Defendants originally moved pursuant to *Fed. R. Civ. P. 12 (b) (6)* and *Fed. R. Civ. P. 56* to dismiss the complaint with prejudice or, in the alternative, for summary judgment. ***HN1***[] To determine the sufficiency of pleadings under a *Rule 12 (b) (6)* standard, the Court must take the allegations of the complaint as true and give the plaintiff the benefit of all inferences which fairly may be drawn from the liberally viewed complaint. **[*7]** *Wilson v. Rackmill, 878 F.2d 772, 775 (3d Cir. 1989)*. The complaint cannot be dismissed unless plaintiff can prove no set of facts that would entitle the plaintiff to relief. Id.; *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 101-02 (1957)*.

However, *Rule 12* also provides that:

If on a motion asserting the defense numbered (6) to dismiss for failure of the pleading to state a claim upon which relief can be granted, matters outside the pleading are presented to and not excluded by the court, the motion shall be treated as one for summary judgment and disposed of as provided in *Rule 56*, and all parties shall be given reasonable opportunity to present all material made pertinent to such a motion by *Rule 56*.

Fed. R. Civ. P 12(b). At the hearing on April 9, 1990, the Court informed all parties that the Court would carry defendants' motion until June 25, 1990, and allow plaintiffs to file a second amended complaint to which the motion would then be addressed. The Court advised all parties that should the pending *Fed. R. Civ. P. 12 (b) (6)* motion be granted, the grant would be with prejudice. Plaintiffs and the Brazilian defendants each submitted additional memoranda, affidavits, **[*8]** certifications and declarations in support of their positions. These submissions supplemented prior submissions outside the pleadings which the parties had placed before the Court. The Court finds that the parties have had sufficient opportunity to present the materials pertinent to a motion for summary judgment pursuant to *Fed. R. Civ. P. 56*, and therefore, will treat defendants' motion as one for summary judgment and dispose of that motion as provided in *Fed. R. Civ. P. 56*.

Summary judgment shall be granted if "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*; *Hersch v. Allen Products Co., 789 F.2d 230, 232 (3d Cir. 1986)*. The Supreme Court has indicated that "at the summary judgment stage the judge's function is not himself to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 2511 (1986)*. In making this determination, **[*9]** a court must make all reasonable inferences in favor of the non-moving party. *Meyer v. Riegel Prods. Corp., 720 F.2d 303, 307 n.2 (3d Cir. 1983)*, *cert. dismissed,* *465 U.S. 1091 (1984)*. Only then may summary judgment be granted if no reasonable trier of fact could find for the non-moving party.

The Third Circuit has repeatedly stated that ***HN2***[] summary judgment is disfavored in antitrust cases. *See* *Arnold Pontiac-GMC, Inc. v. General Motors Corp., 786 F.2d 564, 572 (3d Cir. 1986)*, and cases cited therein. However, the Supreme Court has stated in the context of an antitrust case that:

[t]o survive [a] motion for summary judgment, [the non-moving party] must establish that there is a genuine issue of material fact as to whether [the moving party] entered into an illegal conspiracy that caused [the non-moving party] to suffer a cognizable injury. *Fed.Rule Civ.Proc. 56(e)*; *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 288-89, 88 S. Ct. 1575, 1592, 20 L. Ed. 2d 569 (1968)*. This showing has two components. First, [the non-moving party] must show more than a conspiracy in violation of the antitrust laws; they must show an injury to them resulting from the illegal **[*10]** conduct. . . . Second, the issue of fact must be 'genuine.' Fed.Rules Civ.Proc 56(c), (e). When the moving party has carried its burden under *Rule 56(c)*, its opponent must do more than simply show that there is some metaphysical doubt as to the material facts.

Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 585-86, 106 S. Ct. 1348, 1355-56 (1986) (footnotes omitted). Therefore, when the non-moving party's evidence is merely "colorable" or "not significantly probative," the Court may grant summary judgment. *Anderson, 477 U.S. at 249-50, 106 S. Ct. at 2511*.

A. *Plaintiffs' Claims Under Section 2 of the Sherman Act*

Plaintiffs' Second Amended Complaint asserts three claims under *Section 2* of the Sherman Act, *15 U.S.C. § 2*, which proscribes three separate offenses: (1) actual monopolization, (2) attempted monopolization and (3) combinations or conspiracies to monopolize. *See, e.g., Fragale & Sons Beverage Co. v. Dill, 760 F.2d 469, 474 (3d Cir. 1985)*. Plaintiffs claim that defendants have violated *Section 2* in all three ways. Count One alleges that Impacta:

held a monopoly (as of April through December, 1988 and extending to the date of the filing **[*11]** of this Second Amended Complaint) in the Brazilian import submarket of [flexible tubes] and aerosol [cans] imported into the United States for automotive and industrial end uses [and that] Defendant Impacta exercised that monopoly power to exclude Plaintiff Bramer from competing with Defendant Amber in the marketing of such [flexible tubes] and aerosol [cans] to customers in interstate commerce in the U.S. for automotive and industrial end uses.

Second Amended Complaint, para. 21(a). Count Two alleges that the conduct of Impacta also constituted an attempt to monopolize the Brazilian import submarket for automotive and industrial end uses by its refusal to provide Bramer with flexible tubes and aerosol cans in order to compete with Amber in December, 1988. Second Amended Complaint, para. 22(a,). Count Three alleges that all defendants have engaged in a conspiracy to monopolize the Brazilian import submarket. The alleged purpose of this conspiracy has been to exclude Bramer from competing with Amber in the marketing of products in that submarket. Second Amended Complaint, para. 23(b). Each Count alleges that the public at large has suffered an antitrust injury in that consumers in **[*12]** interstate commerce have been deprived of competition between Bramer and Amber on the basis of price and services. Second Amended Complaint, para. 21(c) (incorporated by reference into each Count). The Court will consider each *§ 2* claim separately.

1. *Actual Monopolization*

In *Bonjorno v. Kaiser Aluminum & Chemical Corp., 752 F.2d 802, 808 (3d Cir. 1984)*, *cert. denied, 477 U.S. 908 (1986)*, the Third Circuit explained the key components of a monopolization claim:

HN3[] There are two main elements in monopolization (1) the possession of monopoly power in a relevant market, and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident.

Id. (citing *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704 (1966))*. *See also* *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 117 (3d Cir. 1980)*, *cert. denied, 451 U.S. 911 (1981)* (citing to *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338, 1348 n.17 (3d Cir. 1975)* which "expressly held that definition of the relevant market was critical in *§ 2* attempt cases").

[*13] These two elements actually comprise a three-pronged standard. First, a plaintiff must define the relevant market which has been allegedly monopolized by the defendant. Next, the plaintiff must show that the defendant possesses monopoly power within that relevant market. Lastly, the plaintiff must show that the defendant willfully acquired and maintained that power, as opposed to having attained that position through legitimate means or circumstances. Therefore, the Court will first address the question of whether defendants, in fact, have monopoly power in a relevant market. Only if that hurdle is jumped will the Court turn to question of how that monopoly power was obtained and maintained.

(a) *Relevant Market*

The first step in determining whether a *§ 2* violation has occurred is to define the "relevant market." A relevant market has two dimensions. One, the plaintiff must identify the group of products with which the defendant's products effectively compete, termed the relevant product market. Two, the plaintiff must identify the geographic area within which the defendant competes in marketing those products, termed the relevant geographic market. Thus, ***HN4***[] the relevant market for **[*14]** the purposes of determining monopolization under the antitrust laws is the market for comparable products or lines of products in a particular geographic sales area.

In *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 1523-24 (1962)*, the Supreme Court stated that ***HN5***[] "[t]he outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Id*. (footnote omitted). The Court went on to add that:

[W]ithin this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. *United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 593-595, 77 S. Ct. 872, 877* [(1957)]. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes and specialized vendors.

Brown Shoe Co., 370 U.S. at 325, 82 S. Ct. at 1524 (footnote omitted). Concerning **[*15]** the definition of the relevant geographic market, the Court stated that it must "correspond to the commercial realities of the industry and be economically significant." *Brown Shoe Co., 370 U.S. at 336-37, 82 S. Ct. at 1530* (citation omitted). Although *Brown Shoe Co.* dealt with a case arising under § 7 of the Clayton Act, the Supreme Court has found its analysis of the relevant product and geographic markets to also apply to cases arising under *§ 2* of the Sherman Act. *Grinnell Corp., 384 U.S. at 572, 86 S. Ct. at 1704*; *see* *Edward J. Sweeney & Sons, Inc., 637 F.2d at 117*.

Plaintiffs' Second Amended Complaint, with its incorporated affidavits, defines the relevant market in this case as the "Brazilian import submarket." Plaintiffs allege that the primary product market in this action is that of flexible tubes and aerosol cans. Second Amended Complaint, para. 4(b). Within that primary market, plaintiffs have carved out and defined an alleged submarket. Plaintiffs have termed this submarket the "Brazilian import submarket." Second Amended Complaint, para. 4(d). The Brazilian import submarket consists of the flexible tubes and aerosol cans that are imported to the United **[*16]** States from Brazil for use by automotive-industrial end users. *See* Second Amended Complaint, paras. 4(e) and (f).

This submarket is alleged to have several distinguishing features. First, plaintiffs allege that there are a distinctive group of purchasers for the imported flexible tubes from Brazil. Plaintiffs claim that whereas only automotive-industrial end users purchase the Brazilian flexible tubes, the overall market embraces purchases by cosmetic, pharmaceutical and automotive-industrial end users. Second Amended Complaint, para. 4(e) (i) (a). Second, plaintiffs allege that the quality of the Brazilian flexible tubes is uniformly lower than that of domestically produced flexible tubes. Second Amended Complaint, para. 4(e) (i) (a). Third, plaintiffs allege that the price of the Brazilian flexible tubes is approximately 30% to 35% lower than that of flexible tubes manufactured in the United States, Canada and Europe. Second Amended Complaint, paras. 4(e) (ii), (iii). Fourth, plaintiffs contend that the unique manner in which Impacta and Bramer (and now Amber) have marketed the Brazilian flexible tubes has distinguished the submarket from the overall United States' market for **[*17]** flexible tubes. *See* Second Amended Complaint, paras. 4(e) (v) (b), (vii) and (viii) (a). Fifth, plaintiffs allege that, although the submarket for aerosol cans is smaller than that of flexible tubes, there is a limited market for the Brazilian aerosol cans for automotive-industrial uses. Second Amended Complaint, para. 4(f) (ii). Lastly, plaintiffs allege that:

The price and service advantages made available to customers within the U.S. (in the automotive and industrial end uses of these products [flexible tubes and aerosol cans]) and the unique system of vendors (such as Bramer) servicing the Brazilian import submarket extended to both products imported into the U.S. from Brazil in the Brazilian import submarket, squeezetubes [flexible tubes] and aerosol tubes [cans].

Second Amended Complaint, para. 4(f) (iii). In support of their definition of the relevant market, plaintiffs have submitted the Affidavit of John Richard Breen ("Breen Aff.") and the Affidavit of Joe L. Abbott ("Abbott Aff.") with their Second Amended Complaint and have incorporated those affidavits in their Second Amended Complaint. Second Amended Complaint, para. 4(e) n. 1. Previously, plaintiffs submitted **[*18]** affidavits of Navin Desai in support of their definition of the relevant market.

For the purposes of this motion, defendants have assumed that the market percentages that plaintiffs have employed in their complaints and other submissions are correct. Plaintiffs contend that "[t]he Brazilian import submarket into the U.S. of [flexible tubes] is supplied 100% by a single manufacturer, Defendant Impacta." Second Amended Complaint, para. 4(e) (ix); Breen Aff., para. 11; Abbott Aff., para. 7. Plaintiffs also contend that Impacta produces the entire supply of aerosol cans for the Brazilian import submarket. *See* Second Amended Complaint, para. 4(f) (ii) . Plaintiffs also allege that either Bramer or Amber have been the exclusive distributors for the Brazilian import submarket. Plaintiffs assert that as of April 1988, the period of time when the allegedly illegal conduct took place, "Bramer held a market share of approximately 5% of all [flexible tubes] sold to the automotive and industrial trades in the U.S." Second Amended Complaint, para. 4(e)(xi). In addition, "[t]he share held by the Brazilian import market (which is supplied by Impacta) is no more than 2% of the total use of aerosol **[*19]** [cans] within the U.S.; it is confined, as noted, to automotive and industrial end uses." Second Amended Complaint, para. 4(f) (ii). Somewhat inconsistently, plaintiffs allege in the same paragraph that "Impacta holds a 50% or slightly larger market share in this limited market [for aerosol cans for non-cosmetic, automotive and industrial uses]." *Id*. The Court will adopt the larger, 2%, figure as Impacta's market share of the total United States market for the purposes of this antitrust analysis.

The Second Amended Complaint is plaintiffs' third attempt to state causes of action against the defendants in this case. After corresponding with the Brazilian defendants concerning the informal objections of the Brazilian defendants to the original complaint, plaintiffs filed a First Amended Complaint which differed from their original complaint only in the addition of 411 as a party-plaintiff. After a complete briefing of defendants' motion to dismiss, and the Court's admonition that a subsequent dismissal would be with prejudice, plaintiffs submitted the Second Amended Complaint. Plaintiffs state that:

The Second Amended Complaint differs from the First Amended Complaint (before **[*20]** the Court on April 9) solely in the more detailed definition of the market involved in this case and in additions to the First Four Counts of charges which explicitly allege injury to the public (separately and apart from injury to these plaintiffs) resulting from the conduct of the Defendants herein. . . . It should be emphasized that no new facts are added to the thrust of Plaintiffs' position before this Court.

Plaintiffs' Supplemental Memorandum ("P. Supp. Mem."), p. 1. Solely, for the purpose of this motion, defendants' assume that plaintiffs' allegations regarding the quality of the Brazilian products, the limitation of the Brazilian import submarket to automotive-industrial end uses, and the limitation of the product market to aluminum tubes, as opposed to other types of flexible tubes, are true. Brazilian Defendants' Supplemental Memorandum, p. 2 n. * The Court is presented with the situation where the material facts of the case are either undisputed or assumed true. Therefore, the Court will determine whether, as a matter of law, plaintiffs state a claim under *Section 2* of the Sherman Act for which relief can be granted on the basis of the relevant market definition contained **[*21]** in the Second Amended Complaint and plaintiffs' other submissions.

To begin with, the Court notes that plaintiffs have not explicitly described a relevant geographic market in any of their submissions to the Court. However, in their overall description of the product market it is apparent that plaintiffs' consider the entire United States as the potential market for the sale of Impacta's flexible tubes and aerosol cans. There have been no allegations that the importation of the Brazilian products has in any way been limited to a specific geographic region in this country. In fact, plaintiffs' have described the primary market in this action as the market for flexible and rigid extruded aluminum containers used in basic United States industries. *See* Second Amended Complaint, para. 4(b). Accordingly, the Court finds 16 that the relevant geographic market for the primary market for flexible tubes and aerosol cans, as well as any submarkets for the same products, is the entire United States.

Now the Court must determine the relevant product market within which defendant Impacta is alleged to have exercised monopoly power. As set out above, plaintiffs have defined the relevant product **[*22]** market narrowly. The issue before the Court is whether plaintiffs' definition is valid as a matter of law. The Supreme Court has indicated that the boundaries of the relevant product market are determined by the "reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe Co., 370 U.S. at 325, 82 S. Ct. at 1524* (footnote omitted). A product market may be a submarket for antitrust purposes if, as a practical matter, that submarket operates as a separate and distinct economic entity. *Id*. The Supreme Court listed several indicia, recited above, which may be considered by the Court in making the determination as to what constitutes a relevant product market. *Id*. These factors are intended as practical guides to aid the Court in its assessment of the degree of interchangeability of use and cross elasticity of demand between different products. In essence, the Court's determination of a relevant market seeks to discover what products may be reasonably substituted for each other by the parties who consume them.

Plaintiffs have posited a narrow product submarket which essentially consists of Impacta's flexible **[*23]** tubes and aerosol cans which are imported into the United States for use in the automotive and industrial industries. Defendants assert that, as a matter of law, Impacta cannot monopolize the product market which consists solely of a portion of Impacta's own products. To support their contention, defendants direct the Court's attention to the Supreme Court and Third Circuit authorities cited above. The Court finds that regardless of plaintiffs' desire to define a primary product market or a submarket, plaintiffs may not define a relevant market which excludes products which are used indiscriminately and interchangeably with Impacta's products.

Plaintiffs attempt to distinguish their Brazilian import submarket from the general, primary market for flexible tubes and aerosol cans by alleging that the Brazilian import submarket has a distinctive group of purchasers, the Brazilian manufactured products are of lower quality than domestically manufactured equivalents (rendering the products unsuitable for the pharmaceutical industry), the price for the Brazilian products is 30% to 35% lower than similar products manufactured in the United States, Canada and Europe, and that there are marketing **[*24]** services which are unique to the Brazilian import submarket. Because plaintiffs' definition of the Brazilian import submarket only includes the Brazilian products that are sold to automotive-industrial end users, the fact that Impacta's products may not be of sufficient quality to be used in the pharmaceutical industry is of no consequence. Essentially then, plaintiffs contend that this submarket is distinct based on the fact that Impacta's products are priced lower than similar products manufactured in the United States, Canada and Europe and are marketed by Bramer and Amber with the provision of certain ancillary services. The Court finds as a matter of law, that these two allegations are insufficient to distinguish the Brazilian import submarket as a relevant product market for the purposes of the antitrust laws.

The Supreme Court, in *Brown Shoe Co.,* held that the division of a product market on the basis of "low-priced" and "medium-priced" shoes was unrealistic. *Brown Shoe Co., 370 U.S. at 326, 82 S. Ct. at 1524-25*. The Supreme Court held that:

the boundaries of the relevant market must be drawn with sufficient breadth to . . . recognize competition where, in fact, competition **[*25]** exists.

Id. at 326, 82 S. Ct. at 1524. The mere fact that Impacta may sell its products at a price 30% to 35% less than that of domestic, Canadian or European manufacturers does not warrant a finding that no other products are interchangeable with Impacta's. Plaintiffs have indicated in their Second Amended Complaint that "[t]here exist six major domestic suppliers producing aluminum [flexible tubes] for the U.S. market." Second Amended Complaint, para. 4(e) (ii); Breen Aff., para. 6. Plaintiffs admit that Canadian and European manufacturers supply flexible tubes for general use to the United States market. Second Amended Complaint, para. 4(e) (iii) . Plaintiffs also implicitly acknowledge that other, similar flexible tubes are available to and used by consumers for the same purposes. *See*

Second Amended Complaint, para. 4(e) (v) (a) (The price for Impacta's flexible tubes was "less than the price paid by customers of the same product for the same uses who purchased the product from American manufacturers."); Breen Aff., para. 10. Plaintiffs also admit that the Brazilian import submarket is highly price sensitive, that any substantial elevation of the price by Impacta would **[*26]** cut its share of the submarket drastically. Second Amended Complaint, para. 4(e) (viii) (a). ***HN6***[] In general, products which have a high cross-elasticity of demand are included in the same product market. *See* *E.I. du Pont de Nemours & Co., Inc., 351 U.S. 377, 400, 76 S. Ct. 994, (1956)*.

Additionally, the Court finds no logic in the argument that the very services which Bramer provided in order to allow Impacta's products just to compete effectively with the products of other manufacturers have created a distinct product market. Plaintiffs allege that without the marketing services provided by Bramer and Amber, American customers would not have endured the troubles of purchasing Impacta's products, regardless of their lower price. Second Amended Complaint, para. 4(e) (vii). The Court finds that the facts pled by plaintiffs, and sworn to in the affidavits and certifications submitted by plaintiffs in opposition to defendants' motion fail to allege a narrow Brazilian import submarket. Accordingly, the Court holds that the relevant product market for flexible tubes and aerosol cans encompasses at least the products manufactured by Impacta, the six domestic manufacturers, and the Canadian **[*27]** and European manufacturers for use by automotive-industrial end users in the United States. [2] Consequently, the Court finds that plaintiffs have failed to satisfy the first element of a *§ 2* claim for monopolization because they have not sufficiently pled a relevant market within which to judge monopoly power.

(b) *Monopoly Power; Acquisition and Maintenance*

In *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 1005 (1956)*, the Supreme Court defined ***HN7***[] monopoly power as "the power to control prices or exclude competition." *Id*. "The **[*28]** existence of such power may be inferred from the predominant share of the market." *Grinnell Corp., 384 U.S. at 571, 86 S. Ct. at 1704*. However, no precise standards for the percentage of market share that a defendant must have, absent direct evidence of monopoly power, before being found guilty of monopolization have been defined. In *United States v. Aluminum Company of America, 148 F.2d 416 (2d Cir. 1945)*, *approved and adopted,* *American Tobacco Co. v. United States, 328 U.S. 781, 811-14, 66 S. Ct. 1125, 1139-41 (1946)*, Judge Learned Hand created the widely accepted rule of thumb that while ninety percent:

is enough to constitute a monopoly; it is doubtful whether sixty or sixty-four percent would be enough; and certainly, thirty-three percent is not.

Aluminum Co. of America, 148 F.2d at 424. Supreme Court cases, as well as cases from this circuit, suggest that absent special circumstances, a defendant must have a market share of at least fifty percent before he can be found guilty of monopolization. It is undisputed that defendants have an approximate market share of 5% of the relevant market for flexible tubes and 2% of the relevant market for aerosol cans. The **[*29]** Court holds that Impacta's market share in either of the relevant markets is too small, as a matter of law, to enable Impacta to commit the offense of monopolization proscribed by *§ 2* of the Sherman Act. Therefore, the Court will dismiss Count One of plaintiffs' Second Amended Complaint with prejudice.

2. *Attempted Monopolization*

In *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338 (3d Cir. 1975)*, the Third Circuit articulated ***HN8***[] the two elements of an attempted monopolization offense: (1) "the actor [must] have a specific intent to monopolize the relevant market, and (2) the actor [must] have sufficient market power to come dangerously close to success." *Id. at*

[2] In the case of *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 488 (5th Cir. 1984)*, the Fifth Circuit held that "absent exceptional market conditions, one brand in a market of competing brands cannot constitute a relevant product market." In that case, the court rejected plaintiff's argument that the relevant product market was Holiday Inn hotel rooms, rather than hotel rooms, as defined by the district court. *Id. at 487-89*.

1348. Thus, as with a claim of actual monopolization, market share is a critical consideration. The case law suggests that a market share of less than 50 percent may support an attempted monopolization claim "if other factors such as concentration of market, high barriers to entry, consumer demand, strength of the competition, or consolidation trend in the market are present." *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 490 (5th Cir. 1984)* (footnote and citations omitted). However,

[w]hile **[*30]** the exact market share percentage necessary to prove attempt to monopolize may vary under differing market conditions, absent a showing of special market conditions, a market share of less than ten percent, as a matter of law, usually will not support a finding of attempt to monopolize.

Id. at 491 (citations omitted).

Under this standard, it is clear that Impacta's market share of the relevant market mandates a finding that an attempt to monopolize the relevant market would not have a "dangerous probability of success." The Court finds that plaintiffs have failed to allege an essential element of their *§ 2* attempted monopolization claim. Therefore, the Court will grant defendants' motion and dismiss Count Two of the Second Amended Complaint with prejudice.

3. *Conspiracy to Monopolize*

HN9[] One element of a conspiracy to monopolize offense is a "[s]pecific intent to monopolize the relevant market." *Fleer Corp. v. Topps Chewing Gum, Inc., 658 F.2d 139, 153 (3d Cir. 1981)*, *cert. denied, 455 U.S. 1019 (1982)*. [3] In addition, "[s]uch intent may be inferred . . . from the proof of actual monopoly power." *Id. at 154*. In *American Tobacco Co. v. United States, 328 U.S.* ***[*31]*** *781, 66 S. Ct. 1125 (1946)*, the Supreme Court added the requirement that conspiracy claims under *§§ 1* and *2* of the Sherman Act must be "reciprocally distinguishable from and independent of each other although the objects of the conspiracies may partially overlap." *Id*. at 788, 66 S. Ct. at ; *See* *Regency Oldsmobile, Inc. v. General Motors Corp., 723 F. Supp. 250, 269-70 (D.N.J. 1989)* (Wolin, J.).

As noted above, Impacta did not possess monopoly power over the relevant market in flexible tubes and aerosol cans. Thus, plaintiffs must prove their conspiracy to monopolize claim by presenting evidence that Impacta and the New Jersey defendants conspired with a specific **[*32]** intent to monopolize the relevant market. [4] Plaintiffs' evidence to support this claim is identical to the evidence presented in support of its *§ 1* claim. Plaintiffs contend that the one conspiracy which they allege is "a restraint of trade proscribed by *Section 1* of the Sherman Act and is also violative of *Section 2* of Sherman [sic]." Second Amended Complaint, para. 24. Although it is possible to state a claim for violations of both sections of the Sherman Act in the same action, and the objects of the conspiracy may overlap, the claims for conspiracy under *§§ 1* and *2* must be distinguishable from and independent of each other.

[*33] Plaintiffs' conspiracy to monopolize claim under *§ 2* is exactly the same as its *§ 1* claim. For that reason alone, the Court must dismiss plaintiffs' claim under *§ 2*. Moreover, plaintiffs have not proffered sufficient allegations or offered adequate evidence to support an inference of a conspiracy to monopolize. Plaintiffs allege only that defendants intended to oust Bramer as a competitor in the United States market for flexible tubes and aerosol cans. At most, this allegation might state a claim under *§ 1* for restraint of trade. In light of the market power of defendant

---

[3] *See also* *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 626, 73 S. Ct. 872, 889 (1953)*; *American Tobacco Co. v. United States, 328 U.S. 781, 789, 66 S. Ct. 1125, 1129 (1946)*; *V. &* *L. Cicione, Inc. v. C. Schmidt & Sons, Inc., 403 F. Supp. 643, 651 (E.D. Pa. 1975)*, *aff'd without opinion,* ***565 F.2d 154 (3d Cir. 1977)***.

[4] The Court finds that although defendant Thomas is named as a member of the alleged conspiracy to monopolize in Count Three, and a member of the conspiracy to violate *§ 1* in Count Four, as the General Manager of defendant Impacta, Thomas cannot be held to have conspired with his corporate employer. *See* *Tose v. First Pennsylvania Bank, N.A., 648 F.2d 879, 894* (3d Cir.), *cert. denied,* ***454 U.S. 893 (1981)***; *Copperweld Corp. v. Independence Tube Co., 467 U.S. 752, 769, 104 S. Ct. 2731, 2740-41 (1984)*.

Impacta, it cannot be inferred that defendants intended such a restraint to lead to the monopolization of the relevant market. Therefore, for that reason as well, the Court will grant defendants' motion and dismiss Count Three of the Second Amended Complaint with prejudice.

B. *Plaintiffs' Claim Under Section I of the Sherman Act*

HN10[] Vertical agreements on resale prices are *per se* illegal. *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 407-08, 31 S. Ct. 376, (1911)*. Within the context of vertical nonprice restraints, however, the scope of *per se* illegality is much narrower. *Continental* **[*34]** *T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 57-59, 97 S. Ct. 2549, 2561-62 (1977)*. This distinction is based on the Supreme Court's conclusion "that vertical nonprice restraints ha[ve] not been shown to have such a 'pernicious effect on competition' and to be so 'lack[ing] [in] . . . redeeming value' as to justify *per se* illegality." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 724, 108 S. Ct. 1515, 1519 (1988)* (quoting *GTE Sylvania, 433 U.S. at 58, 97 S. Ct. at 2561* (quoting *Northern Pacific R. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518 (1958)))*. Moreover, in *Business Electronics Corp.* the Supreme Court noted that:

We have been solicitous to assure that the market-freeing effect of our decision in *GTE Sylvania* is not frustrated by related legal rules. In *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 763, [104 S. Ct. 1464, 1470]* (1984), which addressed the evidentiary showing necessary to establish vertical concerted action, we expressed concern that '[i]f an inference of such an agreement may be drawn from highly ambiguous evidence, there is considerable danger that the doctrin[e] enunciated in *[GTE]* **[*35]** *Sylvania* . . . will be seriously eroded.' See also *id., at 761, n. 6, [104 S. Ct. at 1469, n. 6*.] We eschewed adoption of an evidentiary standard that 'could deter or penalize perfectly legitimate conduct' or 'would create an irrational dislocation in the market' by preventing legitimate communication between a manufacturer and its distributors. *Id. at 763, 764, [104 S. Ct. at 1470*].

Business Electronics Corp., 485 U.S. at 726, 108 S. Ct. at 1520. Plaintiffs erroneously contend that their *§ 1* claim alleges a *per se* violation of the Sherman Act because they have alleged in general terms that the public is injured by the alleged conduct of defendants. Plaintiffs allege that defendants have engaged in a conspiracy to eliminate Bramer as a competitor to Amber by Impacta's refusal to deal with Bramer. This case falls squarely within the confines of the Supreme Court's holding in *Business Electronics Corp.* Accordingly, plaintiffs' claim of a *§ 1* vertical nonprice restraint must be analyzed pursuant to the rule of reason standard "which proscribes only those agreements that restrain trade unreasonably." *Fleer Corp., 658 F.2d at 147* (citations omitted).

In the Third **[*36]** Circuit, in order ***HN11***[] to sustain a *§ 1* claim, plaintiffs must allege and prove:

(1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiff was injured as a proximate result of that conspiracy.

Fleer Corp., 658 F.2d at 147 (citing to *Martin B. Glauser Dodge Co. v. Chrysler Corp., 570 F.2d 72, 81 (3d Cir. 1977)*, *cert. denied, 436 U.S. 913 (1978))*. For the reasons which follow, the Court holds that plaintiffs have failed to allege or to prove sufficient facts to make out a claim pursuant to *§ 1* of the Sherman Act. Therefore, defendants' motion will be granted and the Court will dismiss Count Four of the Second Amended Complaint.

1. *Effects Within the Relevant Market*

As the Court has determined above, the relevant market for the purposes of plaintiffs' antitrust claims is the market for flexible tubes and aerosol cans within the United States to be used by automotive and industrial end users. Plaintiffs have **[*37]** failed to allege how, in any manner, this market has been effected in an anti-competitive fashion by the introduction of a new distributor of Impacta's products. Although plaintiffs allege a vague injury to the public of decreased competition between Bramer and Amber in the areas of price and services, plaintiffs do not allege that there have been any anti-competitive effects on the price of Impacta's products or on the services which have been provided by Bramer and Amber. Furthermore, there have been no allegations of any adverse effects on interbrand competition. *See* Business Electronics Corp., 485 U.S. at 724, 108 S. Ct. at 1519 (the primary concern of ***antitrust law*** has been safeguarding interbrand competition). The Court finds that plaintiffs' vague allegations are insufficient as a matter of law to allege adverse, anti-competitive effects on the relevant market in this case.

2. *Illegal Conduct By Defendants*

Plaintiffs' allegations concerning the illegality of defendants' alleged conduct in refusing to deal with plaintiffs lack one key element. Plaintiffs have failed to allege that Impacta has refused to honor an order for Impacta's products. In fact, plaintiffs have **[*38]** failed to dispute the assertions made by Thomas in his Supplemental Declaration of May 31, 1990. Thomas indicates that Bramer has received Several shipments of aerosol cans during 1989. SUpplement para. Declaration of Thomas dated May 31, 1990, para. 7. Also, plaintiffs have failed to dispute the assertion made by Thomas in his Affidavit of March 30, 1990, that neither 411 nor Desai have ordered any flexible tubes Since December, 1988. P. Supp. Mem., p. 19. Plaintiffs' ask this Court to infer that had plaintiffs ordered any flexible tubes, defendants would have refused to supply them. *Id*. It is Unreasonable to request the Court to infer Specific allegations of illegal conduct when it was within plaintiffs power to provide the basis for Specific allegations by merely ordering flexible tubes from Impacta sometime after December, 1988. The Court finds that plaintiffs' allegations are insufficient as a matter of law to allege that the objects of and the conduct pursuant to the alleged conspiracy were illegal.

3. *Other Elements*

Because the Court finds that plaintiffs have failed to allege sufficient facts to establish that the alleged conspiracy produced adverse, anti-competitive **[*39]** effects within the relevant markets, or that defendants' conduct was illegal, it will not be necessary to determine whether plaintiffs have alleged Sufficient facts from which a trier of fact could reasonably determine that the first and fourth elements of the *§ 1* claim have been Satisfied. However, the Court notes that even if plaintiffs were found to have produced SUfficient evidence of an effect within the relevant market, it is doubtful whether plaintiffs have pled or proven sufficient facts from which the Court could reasonably infer the existence of a conspiracy.

C. *Plaintiffs' Claim for Injunctive Relief*

Because of the Court's prior determinations dismissing Counts One, Two, Three and Four of the Second Amended Complaint for failure to allege a violation of *§§ 1* and *2* of the Sherman Act, Count Five of the Second Amended Complaint, requesting injunctive relief for those alleged violations, must also be dismissed.

D. *The New Jersey Defendants' Motion to Dismiss*

In light of the disposition of the motion brought by the Brazilian defendants, and joined by the New Jersey defendants, the separate motion of the New Jersey defendants to dismiss the action as against them **[*40]** on the basis of the New Jersey Entire Controversy doctrine and on the basis of a prior settlement agreement will be dismissed as moot.

E. *Plaintiffs' Pendent State Law Causes of Action*

Counts Six through Ten of plaintiffs' Second Amended Complaint allege various state law causes of action against defendants Impacta and Thomas. These claims were originally before the Court pursuant to the exercise of pendent jurisdiction. The Supreme Court has held that:

HN12[] Pendent jurisdiction . . . exists whenever there is a claim 'arising under [the] Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority * * *,' *U.S. Const., Art. III, § 2*, and the relationship between that claim and the state claim permits the conclusion that the entire action before the court comprises but one constitutional 'case.' The federal claim must have substance sufficient to confer subject matter jurisdiction on the court.

United Mine Workers of America v. Gibbs, 383 U.S. 715, 725, 86 S. Ct. 1130, 1138 (1966). The Supreme Court went on to state that "[i]t has consistently been recognized that pendent jurisdiction is a doctrine of discretion[.]" *Id. at **[*41]** 726, 86 S. Ct. at 1139*; *Tully v. Mott Supermarkets, Inc., 540 F.2d 187, 196* (3d Cir. 976). Considering the posture of the instant case, the Court finds that it would best serve the interests of judicial economy and fairness to the litigants to decline to exercise jurisdiction over the remaining state law claims in this action. In light of he Court's determination that the facts alleged do not state a claim under federal law for which relief can be granted, at this early stage of the proceeding it would best serve the interests of the parties to allow plaintiffs an opportunity to refile their state law claims in an appropriate forum if those claims can be eformulated to obviate the necessity of relying on allegations which have already been determined to be insufficient. Therefore, the Court will decline to exercise pendent jurisdiction over plaintiffs' remaining state law claims and will dismiss Counts Six through Ten without prejudice.

III. *CONCLUSION*

For the reasons stated above, the Court will grant all defendants' motion to dismiss the complaint, or for summary judgment and will dismiss the Second Amended Complaint in its entirety. Counts One, Two, Three, Four and Five **[*42]** will be dismissed with prejudice. Counts Six, Seven, Eight, Nine and Ten will be dismissed without prejudice. The separate motion of defendants Amber, Krah and Grim will be dismissed as moot in light of the disposition of all defendants' motion.

An appropriate order is attached.

Dated: September 7, 1990.

ORDER

In accordance with the Court's opinion filed herewith,

It is on this 7th day of September, 1990,

ORDERED that the motion of all defendants to dismiss the complaint, or for summary judgment is granted; and it is further

ORDERED that the Second Amended Complaint is dismissed in its entirety; and it is further

ORDERED that Counts One, Two, Three, Four and Five are dismissed with prejudice; and it is further

ORDERED that Counts Six, Seven, Eight, Nine and Ten are dismissed without prejudice; and it is further

ORDERED that the separate motion of defendants Amber, Krah and Grim is dismissed as moot in light of the disposition of the motion of all defendants.

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN4[] Sherman Act, Scope

15 U.S.C.S. § 1 of the Sherman Act makes unlawful combinations in restraint of interstate commerce. Attempts to monopolize any part of interstate trade or commerce, whether alone or in a combination or conspiracy, are also unlawful under *15 U.S.C.S. § 2*. Thus, involvement of interstate commerce in defendant's activities is a jurisdictional requirement to actions filed under the Sherman Act.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Sherman Act, Jurisdiction

In determining jurisdiction under the Sherman Act, the focus of the inquiry is defendant's business activities. Plaintiffs must make a showing of a substantial effect on interstate commerce generated either by defendants' general business activities or by the alleged antitrust violations themselves, which provide a strong indicator that defendant's business has an interstate impact. To make this showing plaintiffs must first identify the relevant aspect of interstate commerce; it is not sufficient to presume an interrelationship of the local activity to some unspecified aspect of interstate commerce. Then the plaintiffs must demonstrate that defendants' local activity has an effect on some other appreciable activity demonstrably in interstate commerce. This effect must be, as a matter of practical economics not insubstantial. Whether the defendants' activities sufficiently affect interstate commerce to create Sherman Act jurisdiction is a highly fact-based question calling for common sense judgment. Applying such common sense judgment means that while no specific dollar amount need be alleged and plaintiffs may show aggregate effects on commerce of defendants' activities, the alleged effect must still be considered in proportion to the parties' businesses as a whole.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > Inferences

HN6[] **Antitrust & Trade Law, Sherman Act**

While jurisdiction is not defeated in a case relying on anticompetitive effects by plaintiff's failure to quantify the adverse impact of defendant's conduct, plaintiff's evidence must at least support an inference that some quantifiable effect on commerce of defendant's intended interference with plaintiff's business has occurred.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN7[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

To prevail on a claim under the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. S. § 1962*, plaintiffs must demonstrate that the enterprise which is involved in or benefits from the racketeering activity is one engaged in, or having an effect on, interstate commerce. This nexus may be "minimal," but constitutes part of plaintiffs' burden to prevail. Specifically, the effect on commerce must be shown. It is not necessary for plaintiffs to demonstrate that the predicate acts themselves had an interstate effect.

HN8[] **Constitutional Law, Congressional Duties & Powers**

A "minimal" interstate nexus to establish jurisdiction under RICO can be no less than that required for the Sherman Act. That is to say, RICO jurisdiction ends where local activities have incidental effects on interstate commerce, exactly at the point where Sherman Act jurisdiction ends.

Opinion by: JENSEN

Opinion

[*1391] JENSEN, District Judge

In this action alleging federal antitrust and racketeering law violations and pendent state law tort claims, the individual plaintiffs [1] appeal the grant of summary judgment in favor of defendants [2] (collectively referred to as "Burke Vending") and dismissal of the pendent state law claims for lack of jurisdiction in the district court. The issues are (1) whether plaintiffs have demonstrated that Burke Vending's activities have an effect upon interstate commerce sufficient to come within the scope of either federal antitrust laws or **[**2]** the Racketeer Influenced and Corrupt Organization Act, *18 U.S.C. § 1961 et seq.* ("RICO"); (2) whether even if such effect were demonstrated, defendants possess **[*1392]** sufficient market power to render their activities unlawful under the antitrust rule of reason; and (3) whether the district court erred in finding that defendants had committed no acts of extortion or intimidation against plaintiffs as competitors or prospective witnesses. We affirm the judgment.

[3]** I. FACTS AND PROCEDURAL HISTORY

A. The Complaint

---

[*] The Honorable D. Lowell Jensen, United States District Judge for the Northern District of California, sitting by designation.

[1] The plaintiffs are Lowell Musick and Sharlene Musick, dba Chow Biz; Tom Manus; Cheryl Tombaugh; and George Parlee. All are citizens of California engaged in the business of commercial catering in the Santa Clarita Valley area of Los Angeles County.

[2] The named defendants are Gene Burke, president and major shareholder of corporate defendant Burke Vending and Catering Corporation, a California corporation; David C. Smith; Lafayette Smith; Phil Smith; Rafael Espinoza; Barry Cisneros; David Manning; Don Ternario; Don Wheeler; Orlando Rivas; Peter Limon; Marco Lefferman; Edward Corner; John Sheehy; Steve Sanchez; Jane Collier; Mark Sullivan; and Derrick Kroll. Corporate defendant Michael's Catering is alleged to be a California corporation but is identified by defendants as a dba of Burke Vending and Catering Corporation. The individual defendants are alleged to be agents or employees of each other.

This dispute concerns alleged antitrust and racketeering law violations in claimed acts of violence and extortion by Burke Vending against its competitors, plaintiffs/appellants, in the mobile catering service industry in the Santa Clarita Valley area of Los Angeles, California. Plaintiffs allege that during the period from 1985 to 1988 each of them was threatened and harassed by employees or agents of Burke Vending while attempting to serve customers at various business locations throughout the Santa Clarita Valley area, and that Burke Vending engaged in price discrimination and entered into agreements to sell goods on the basis of refusal to use goods of its competitors.

The Complaint alleges that the purpose of this harassment, unlawful price discrimination, and agreement not to use goods of competitors was to restrain competition in the market area and obtain a monopoly, all in violation of the Sherman Act, *15 U.S.C. §§ 1*, *2*; the Wilson Tariff Act, *15 U.S.C. § 8*; the Clayton Act, *15 U.S.C. §§ 14*, *15*; and the Robinson-Patman Price Discrimination Act, **[**4]** *15 U.S.C. § 13*. The threats and harassment were further alleged to have amounted to a pattern of racketeering activity conducted for the benefit of defendant Gene Burke's mobile catering business, [3] in violation of Racketeer Influenced and Corrupt Organization Act, *18 U.S.C. § 1961* ("RICO"). Pendent state law tort claims were also asserted for interference with business advantage, assault and battery, and intentional infliction of emotional distress.

B. Disposition in the District Court

In the district court, defendants brought motions for summary judgment against each of the federal claims asserting lack of jurisdiction, in that defendants' activities were neither in commerce nor had an effect on interstate commerce as required under the statutes. Defendants also moved for dismissal of the state law **[**5]** claims for lack of pendent jurisdiction, should summary judgment be granted.

The district court granted the motions for summary judgment on the federal law claims and adopted defendants' proposed findings of fact as uncontroverted facts of the action. The district court found that defendants' activities were wholly local, without effect on interstate commerce; and that even if federal jurisdiction existed, defendants did not have sufficient market power to render their conduct unlawful under the rule of reason.

As to the RICO claim, the district court found that Burke Vending's activities were local and had only an incidental effect on interstate commerce. The district court further found that even if the jurisdictional effect on interstate commerce existed, plaintiffs had failed to show evidence of any predicate acts for purposes of establishing RICO liability. Although it was not a necessary basis of summary judgment, the district court found that no employee or lessee of Burke Vending had engaged in extortion, intimidation or retaliation against plaintiffs or their witnesses. Finally, having granted summary judgment for defendants on the federal claims, the district court dismissed **[**6]** the state law claims for lack of pendent jurisdiction, without prejudice to bringing these claims in state court.

For the reasons set forth below, the panel affirms the grant of summary judgment and dismissal of the pendent state law claims for lack of jurisdiction.

C. Facts

The parties to this action are each engaged in the business of commercial mobile **[*1393]** catering in the Santa Clarita Valley area of Los Angeles County. Their operations include driving catering trucks to businesses and construction locations throughout the area to sell a variety of prepared food or food products, snacks, drinks, and other products to employees at those business or construction sites. The products are purchased wholesale from local distributors who obtain many products from out-of-state manufacturers and suppliers, and are then resold at retail prices to the employee-consumers. The catering trucks the businesses use are assembled and customized from standard parts, some of which are manufactured outside of California.

Defendant Burke Vending owns 18 catering trucks, 3 of which are driven by employees and 15 of which are leased to independent operators who also purchase their **[**7]** products from Burke Vending for resale. Plaintiff Lowell

---

[3] Burke Vending and Michael's Catering are alleged to be the enterprises benefitting from the pattern of racketeering activity alleged in the RICO claim.

Musick operates four to five catering trucks in the Santa Clarita Valley area, with a total annual business volume of approximately $800,000. Musick asserts that $500,000 of his annual sales volume is derived from sales of products imported from out-of-state. Burke Vending asserts that all of its products are purchased from local distributors. No figures are available for the volume of business Burke Vending does per year, nor the amount of that business that is derived from products shipped in interstate commerce. Plaintiffs also offer no figures for the number of catering trucks or volume of business operated by the other individual plaintiffs.

While the Santa Clarita market area is approximately 25 miles from the nearest sizeable city, there are no geographic barriers to competition from outside the area. Within the market area there are in addition to catering trucks, fast food restaurants and convenience stores which offer substantially the same products as are offered by the parties' mobile catering services. The only difference among these businesses is that the mobile catering services deliver the products directly **[**8]** to the customers' worksites, while employees would have to leave their worksites to reach the fixed distribution outlets. Plaintiffs assert that it is impossible for these employees to leave their worksites during the day but offer no supporting evidence on this point.

In a series of declarations submitted in opposition to the motions for summary judgment, plaintiffs allege that certain Burke Vending agents, defendants Lafayette Smith, David Smith and Don Wheeler, would follow them to worksites and forcibly interfere with their attempts to serve customers. This forcible interference included verbal threats and orders to leave, blocking customer access to plaintiffs' trucks with their own vehicles, throwing nails and other debris in the paths of plaintiffs' trucks, and at least one incident of physical assault. Non-forcible interference was also described, in the form of following plaintiffs to worksites and giving food and other products away to undercut plaintiffs' sales at those sites. Plaintiffs allege that they and their customers were placed in fear by the nature and manner of defendants' activities. Their declarations also support an inference that defendants suggested this **[**9]** harassment would cease if plaintiffs abandoned their attempts to service the locations at which the incidents occurred. At least three of the plaintiffs state in their declarations that they abandoned one or more service locations as a result of the harassment activities.

Defendant Gene Burke stated in his declaration in support of the motions for summary judgment that he had no knowledge of acts of violence or intimidation by his employees, and that such acts would be contrary to Burke Vending policies.

II. JURISDICTION OF ANTITRUST CLAIMS

A. Standard for Summary Judgment

HN1[] Under *Rule 56(c) of the Federal Rules of Civil Procedure*, summary judgment may be granted when "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the party is entitled to a judgment as a matter of law."

[*1394] ***HN2***[] In a motion for summary judgment, "if the party moving for summary **[**10]** judgment meets its initial burden of identifying for the court those portions of the materials on file that it believes demonstrates the absence of any genuine issues of material fact," then "the nonmoving party must set forth, by affidavit or as otherwise provided in *Rule 56*, '*specific facts* showing that there is a genuine issue for trial.'" *T.W. Electric Service, Inc. v. Pacific Elec. Contractors, 809 F.2d 626, 630 (9th Cir. 1987)* (citing *Celotex Corp. v. Catrett, 477 U.S. 317, 106 S. Ct. 2548, 2553, 91 L. Ed. 2d 265 (1983)*; *Kaiser Cement Corp. v. Fischbach & Moore, Inc., 793 F.2d 1100, 1103-04* (9th Cir.), *cert. denied*, *479 U.S. 949, 107 S. Ct. 435, 93 L. Ed. 2d 384 (1986))* (emphasis in original).

Plaintiffs opposing summary judgment may not rest on their pleadings. *Fed. R. Civ. P. 56(e)*. Although reference is made to the moving party's "burden" under this rule, *Rule 56* places no evidentiary burden on a moving defendant beyond that which is required for him to prevail at trial. Therefore, while it is incumbent upon the adverse plaintiff to offer evidence sufficient to raise a genuine issue of fact on an **[**11]** issue on which the plaintiff has the burden of proof, the moving defendant need provide nothing more than a reference to those materials on file in the case which support the movant's belief that there is an absence of any genuine issues of material fact.

HN3[] The district court's grant of summary judgment is reviewed de novo. *Kaiser Cement, 793 F.2d at 1103*; *Lew v. Kona Hosp., 754 F.2d 1420, 1423 (9th Cir. 1985)*. When judging the evidence at the summary judgment stage, the district court is not to make credibility determinations or weigh conflicting evidence, and is required to draw all inferences in a light most favorable to the nonmoving party. *T.W. Electric, 809 F.2d at 630-31* (citing *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 1356, 89 L. Ed. 2d 538 (1986))*. The Court of Appeals applies the same standard upon review. *Kaiser Cement, 793 F.2d at 1103*; *Diaz v. American Telephone & Telegraph, 752 F.2d 1356, 1362 (9th Cir. 1985)*.

Summary judgment **[**12]** may issue "after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp., 106 S. Ct. at 2552*. The standard for judging either a defendant's or plaintiff's motion for summary judgment is the same standard used to judge a motion for a directed verdict: "whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 251-52, 106 S. Ct. 2505, 2512, 91 L. Ed. 2d 202 (1986)*.

*B. Jurisdictional Reach of Federal **Antitrust Law***

1. Statutory Requirements.

HN4[] The Sherman Act makes unlawful combinations in restraint of interstate commerce. *15 U.S.C. § 1*. Attempts to monopolize any part of interstate trade or commerce, whether alone or in a combination or conspiracy, are also unlawful. *15 U.S.C. § 2*. **[**13]** Thus involvement of interstate commerce in a defendant's activities is a jurisdictional requirement to actions filed under the Sherman Act. *E.g., McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 241, 100 S. Ct. 502, 508, 62 L. Ed. 2d 441 (1980)* (considering whether local real estate brokerage activities have an effect on interstate commerce sufficient to satisfy the jurisdictional element).

Before proceeding with our consideration of the reach of the Sherman Act, however, we note that the Wilson Tariff Act, the Clayton Act and the Robinson-Patman Act each contain a more stringent jurisdictional requirement, in that the defendant must be alleged to be itself engaged in interstate or import commerce. *See Gulf Oil Corp. v. Copp Paving Co., Inc., 419 U.S. 186, 95 S. Ct. 392, 398, 42 L. Ed. 2d 378 (1974)*; *15 U.S.C. §§ 8*, *13*, *14*. **[*1395]** Appellant makes no attempt to show that Burke Vending is in any way engaged in interstate commerce; indeed, to the extent that Burke Vending purchases products and truck parts manufactured out-of-state, it obtains such products and parts strictly from local distributors. Therefore, **[**14]** as an initial matter, the grant of summary judgment as to the Fourth and Fifth Causes of Action, for violation of the Clayton Act and Robinson-Patman Act, must be affirmed.

2. Effect on Interstate Commerce Under the Sherman Act.

As the power of Congress to regulate interstate commerce reaches beyond activities actually in commerce to those local activities which substantially affect interstate commerce, so the reach of the Sherman Act is correspondingly broad. *McLain, 444 U.S. at 241, 100 S. Ct. at 508*. Congress intended the Sherman Act to be "as inclusive as the constitutional limits of Congress' power to regulate commerce." Report of the Attorney General's National Committee to Study the Antitrust Laws 62 (1955), *quoted in Rasmussen v. American Dairy Ass'n., 472 F.2d 517, 526* (9th Cir.), *cert. denied*, *412 U.S. 950, 37 L. Ed. 2d 1003, 93 S. Ct. 3014 (1973)*.

HN5[] In determining jurisdiction under the Sherman Act, the focus of the inquiry is the defendant's business activities. *Western Waste Serv. v. Universal Waste Control, 616 F.2d 1094, 1097 n. 2* **[**15]** (9th Cir.), *cert. denied*, *449 U.S. 869, 101 S. Ct. 205, 66 L. Ed. 2d 88 (1980)* (citing *McLain, supra*). Appellants must make a showing of a substantial effect on interstate commerce generated either by appellees' general business activities, *McLain, 444 U.S. at 242, 100 S. Ct. at 509*, or by the alleged antitrust violations themselves, which provide "a strong indicator that the defendant's business has an interstate impact." *Western Waste, 616 F.2d at 1097*; *see also Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738, 744, 96 S. Ct. 1848, 1852, 48 L. Ed. 2d 338 (1976)* (hereafter *Rex*

Hospital) (allegation that defendant's interference with plaintiff's expansion plans substantially affected interstate commerce sufficient to meet jurisdictional requirement).

To make this showing appellants must first identify the relevant aspect of interstate commerce; it is not sufficient to presume an interrelationship of the local activity to some unspecified aspect of interstate commerce. *McLain, 444 U.S. at 242, 100 S. Ct. at 509*. Then the appellants must demonstrate that appellees' local activity **[**16]** has "an effect on some other appreciable activity demonstrably in interstate commerce." *Id.* This effect must be, "as a matter of practical economics . . . not insubstantial." *Id. at 246, 100 S. Ct. at 511* (and citations therein); *Palmer v. Roosevelt Lake Log Owners Ass'n., 651 F.2d 1289, 1291 (9th Cir. 1981)*.

Whether the defendant's "activities sufficiently affect interstate commerce to create Sherman Act jurisdiction is a highly fact-based question calling for common sense judgment." *Mitchell v. Frank R. Howard Memorial Hosp., 853 F.2d 762, 765 (9th Cir. 1988)*, *cert. denied*, *489 U.S. 1013, 109 S. Ct. 1123, 103 L. Ed. 2d 186 (1989)*; *see also* *Rasmussen v. American Dairy Ass'n., 472 F.2d 517, 526* (9th Cir.), *cert. denied*, *412 U.S. 950, 37 L. Ed. 2d 1003, 93 S. Ct. 3014 (1973)* ("In this area perhaps more than in most, each case must turn on its own facts."). Applying such common sense judgment means that while no specific dollar amount need be alleged and a plaintiff may show aggregate effects on commerce of defendant's activities, the alleged effect must still be considered **[**17]** in proportion to the parties' businesses as a whole.

In *Rex Hospital, supra*, the Supreme Court held that defendant's activities had a sufficient effect on interstate commerce where they would, if successful, (1) prevent millions of dollars in construction funding from out-of-state sources from flowing to plaintiff's hospital; (2) reduce plaintiff's purchases of out-of-state supplies and its revenues from out-of-state insurance companies by "thousands or perhaps hundreds of thousands of dollars;" and (3) reduce management fees plaintiff would pay to its out-of-state corporate parent. *425 U.S. at* ***[*1396]*** *744*. The Court held that this combination of factors created a sufficient allegation of effect on interstate commerce to satisfy the Sherman Act jurisdiction requirement. There is no indication in *Rex Hospital*, however, that any one of these factors would have been sufficient on its own.

In *Burke v. Ford, 389 U.S. 320, 88 S. Ct. 443, 19 L. Ed. 2d 554 (1967)*, the Supreme Court found that state-wide market division by liquor wholesalers in Oklahoma would necessarily affect interstate commerce, because Oklahoma had no in-state **[**18]** liquor distillers and therefore all of the liquor in the state was supplied from outside the state. This single fact necessarily meant that any reduction of competition among wholesalers within the state would have a direct effect on out-of-state suppliers. *Id. at 321-22, 88 S. Ct. at 444*.

The Ninth Circuit held that a defendant's business activities, both generally and those specifically alleged to have an anticompetitive effect, satisfied the jurisdiction requirement in *Western Waste, supra.* That case involved competition between waste disposal businesses in the Phoenix, Arizona, market. Plaintiff Western Waste Service System alleged that defendant Universal Waste Control provided waste disposal services substantially below cost and conspired with other competitors, in order to drive Western Waste from the waste disposal business in the area and obtain a monopoly. *616 F.2d at 1095*. The district court granted a motion to dismiss for lack of jurisdiction, relying on the holding of *Sun Valley Disposal Co. v. Silver State Disposal Co., 420 F.2d 341 (9th Cir. 1969)*, that a wholly local garbage disposal business which **[**19]** supplied its business with equipment from out of state remained a local activity not subject to Sherman Act jurisdiction. *Id. at 343*.

The Ninth Circuit reversed, finding *Sun Valley* overruled by *McLain* to the extent that it required a plaintiff to show that the effect of defendant's alleged antitrust violation, rather than defendant's business activities as a whole, had the necessary effect on interstate commerce. *Western Waste, 616 F.2d at 1098*. However, as to *Sun* Valley's holding that purchase of out-of-state equipment was inadequate by itself to allege facts supporting federal jurisdiction, the *Western Waste* Court did not overrule this holding but rather found it factually distinguishable from the case before it. While the *Western Waste* parties' total out-of-state purchases amounted to almost $ 500,000 in the most recent year, the Court relied on the following additional facts to determine that a sufficient allegation of jurisdiction was made: (1) defendant's direct restraint of interstate commerce by using its market power to have plaintiff's dealership of out-of-state garbage compaction equipment cancelled; (2) defendant's **[**20]** business activity of providing scrap materials to brokers for shipment out of state; and (3) defendant's financing of its equipment purchases with funds borrowed from its out-of-state corporate parent. 616 F.2d at 1098-99. [4] These additional factors were found to constitute "material differences" between the facts of *Western* Waste and those of Sun Valley. Id. at 1099.

Therefore, there remains undiminished authority in the Ninth Circuit that a showing of purchase of supplies and equipment **[**21]** from out of state, *by itself*, is insufficient to identify a relevant aspect of interstate commerce substantially affected by an antitrust defendant's business activities. Even the broadest statement of Sherman Act jurisdiction to be found in the Ninth Circuit, *Rasmussen v. American Dairy Ass'n., 472 F.2d 517, 526* (9th Cir.), *cert. denied*, *412 U.S. 950, 37 L. Ed. 2d 1003, 93 S. Ct. 3014 (1973)*, acknowledges that the reach of federal jurisdiction is limited when local businesses merely purchase some **[*1397]** business inventory and equipment from the stream of interstate commerce.

Rasmussen dealt with the effect on interstate commerce of interference with sales of a filled milk product which was processed and sold entirely within the State of Arizona. 472 F.2d at 524-25. In holding that sales of the filled milk were the end of a line of commerce leading from outside the state through the in-state processor to in-state consumers, the Ninth Circuit focused on the fact that the nonfat dried milk and all the other ingredients used in processing the product, except for local water, came from out of state: "Thus, for all practical **[**22]** purposes, the out-of-state ingredients *are* [the filled milk product] . . . In economic terms [the filled milk] consists almost wholly of ingredients that move in interstate commerce." *Id. at 525* (emphasis in original). Significantly, on the facts before it, the Court could be certain that the ingredients themselves had traveled in commerce, and were not merely articles of a type inferentially found in commerce. *Id.* Thus the case closely resembled *Burke v. Ford*, discussed *supra*, in turning on the necessary impact on out-of-state suppliers of interference with wholly in-state businesses.

Certainly defining a product as "in commerce" even though it never leaves the state, due solely to its composition of out-of-state ingredients, offers a very broad rule if generally applied. Therefore, the *Rasmussen* Court sought to limit the application of its holding when applied in other factual situations. *Id. at 526*. Recognizing both the fact-reliant nature of each case involving effects on commerce and the limits of federal jurisdiction, the Court harmonized the holding in *Sun Valley*:

> Since every enterprise, however localized, **[**23]** inevitably has some effect, however remote, on the flow of commerce among the states, some "localness," "remoteness," or "de minimis" factor must intervene or federal regulation is boundless.
> * * *
>
> . . . *Sun Valley Disposal* involved local businesses using supplies drawn from the stream of interstate commerce. We recognized that interference with those businesses inevitably had some interstate effect. We held, nonetheless, that this effect was "incidental," and did not justify federal regulation of competitive restraints imposed on businesses that were "wholly local in character." *See Sun Valley Disposal Co. v. Silver State Disposal Co.*, [] *420 F.2d at 343*.

472 F.2d at 526 [footnote omitted].

It appears that the case before the panel today describes exactly that sort of incidental effect on interstate commerce which does not warrant federal intervention. It is undisputed that the parties conduct their catering services in one limited area of Los Angeles County, serving local businesses and their employees. Appellants base their claim of effect on interstate commerce on the sole fact that a majority of the products they purchase **[**24]** for

[4] On this last fact, compare *Western Waste* with *McLain, supra, 444 U.S. at 245* ("appreciable amount" of hundreds of millions of dollars involved in subject real estate market's financing was obtained from out-of-state lenders) and *Rex Hospital, supra, 425 U.S. at 744* ("large portion" of multimillion dollar planned expansion by plaintiff to be financed by out-of-state lenders and management fee paid by plaintiff to out-of-state corporate parent).

resale are drawn from interstate commerce, as are some of their truck parts. Appellants also ask that we infer that the same must be true for Burke Vending, as its business is so similar to appellants'.

As the above discussion shows, this single factor, i.e., equipment and supplies drawn generally from the stream of interstate commerce, is qualitatively insufficient to establish Sherman Act jurisdiction. Furthermore, assuming arguendo that some showing of this type could be sufficient, the amount of interference with commerce identified by appellants is de minimis. Even viewing appellants' evidence in the light most favorable to them, it is difficult to perceive, "as a matter of practical economics," any substantial impact on interstate commerce of Burke Vending's alleged interference with appellants' sales of out-of-state goods.

Appellant Lowell Musick states that his business makes sales of approximately $ 500,000 per year in goods ultimately drawn from out-of-state. The other appellants do not offer evidence regarding the extent of their sales of goods from out-of-state. There is no evidentiary showing that Musick's business in the Santa Clarita Valley area has been reduced **[**25]** or eliminated as a result of Burke Vending's conduct, **[*1398]** and therefore it is virtually impossible to assess the impact on interstate commerce of Burke Vending's activities. Other appellants have stated that they quit or reduced selling in the Newhall (Santa Clarita) area as a result of the violence and threats directed against them, but they do not indicate the geographical extent of the limitations on their business, nor the resultant effect on their sales of out-of-state goods.

HN6[] While "jurisdiction [is not] defeated in a case relying on anticompetitive effects by plaintiff's failure to quantify the adverse impact of defendant's conduct [citations]," *McLain, supra, 444 U.S. at 243*, plaintiff's evidence must at least support an inference that some quantifiable effect on commerce of defendant's intended interference with plaintiff's business has occurred. The record here does not support such an inference, because there is no indication that appellants have been disabled in any way from selling their out-of-state goods in the Santa Clarita Valley. Certainly the conduct of Burke Vending's agents, if proved, is wrongfully anticompetitive and rightfully **[**26]** subject to condemnation; however, even vicious anticompetitive activity is beyond the reach of the Sherman Act if it is wholly local in character.

Therefore, the district court properly found that appellants had failed to raise a genuine issue of material fact that Burke Vending's activities affect interstate commerce as a matter of practical economics. In view of our determination that appellants failed to make the necessary showing as to jurisdiction, we need not reach the question of the market power of Burke Vending. The grant of summary judgment as to the First, Second and Third Causes of Action under the Sherman Act is affirmed.

III. JURISDICTION UNDER RICO

HN7[] To prevail on a claim under the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. § 1962* ("RICO"), plaintiffs must demonstrate that the enterprise which is involved in or benefits from the racketeering activity is one engaged in, or having an effect on, interstate commerce. *United States v. Rone, 598 F.2d 564, 573 (9th Cir. 1979)*, *cert. denied sub nom. Little v. U.S., 445 U.S. 946, 100 S. Ct. 1345, 63 L. Ed. 2d 780 (1980)*; **[**27]** *18 U.S.C. § 1962(c)*. This nexus may be "minimal," but constitutes part of plaintiffs' burden to prevail in this action. *Id.* Specifically, the effect on commerce must be shown. *United States v. Bagnariol, 665 F.2d 877, 892 (9th Cir. 1981)*, *cert. denied sub nom. Walgren v. U.S., 456 U.S. 962, 72 L. Ed. 2d 487, 102 S. Ct. 2040 (1982)*. It is not necessary for plaintiffs to demonstrate that the predicate acts themselves had an interstate effect. *Rone, 598 F.2d at 573*; *Bagnariol, 665 F.2d at 892*.

As discussed above, the jurisdictional reach of the Sherman Antitrust Act extends to the constitutional limits of Congress' power to regulate interstate commerce. *United States v. South-Eastern Underwriters Ass'n., 322 U.S. 533, 64 S. Ct. 1162, 88 L. Ed. 1440 (1944)*; *Western Waste, supra, 616 F.2d at 1096*. Therefore, we are persuaded that ***HN8***[] a "minimal" interstate nexus to establish jurisdiction under RICO can be no less than that required for the Sherman Act. That is to say, RICO jurisdiction ends where local activities have incidental effects on interstate **[**28]** commerce, exactly at the point where Sherman Act jurisdiction ends.

The evidence of interstate effect of the Burke Vending enterprise that appellants offer for their RICO claim is identical to that offered for their antitrust claims. Even accepting that the parties all offer out-of-state goods in the amounts asserted by appellant Lowell Musick, there is no basis on which to conclude that these sales create RICO jurisdiction where they are insufficient as a matter of law to create federal jurisdiction under the antitrust statutes.

For this reason, the district court properly found that appellants had failed to raise a genuine issue of material fact that Burke Vending's activities affected interstate commerce sufficiently to invoke RICO jurisdiction, and summary judgment for appellees **[*1399]** on the Sixth Cause of Action is affirmed.

IV. DISTRICT COURT'S FINDINGS OF FACT

In granting the motions for summary judgment, the district court issued findings of fact and conclusions of law related to each cause of action in the Complaint, although such findings and conclusions are not required on decision of a motion under *Rule 56*. *Fed. R. Civ. P. 52(a)*.

In its conclusions of **[**29]** law, the district court found that defendants Burke Vending and Michael's Catering were neither engaged in interstate commerce nor in local activities appreciably affecting interstate commerce. Therefore, the district court concluded that defendants' activities were not subject to the jurisdiction of either federal ***antitrust law*** or federal racketeering law.

As the above discussion shows, this conclusion was correct and provided proper basis for the district court's grant of summary judgment on the antitrust and RICO claims. Because federal jurisdiction is lacking in this action, the panel notes that the district court's Findings of Fact and Conclusions of Law on the merits of this case have no precedential, res judicata, or collateral estoppel effect.

V. CONCLUSION

The district court's finding that federal jurisdiction did not exist over appellants' antitrust and RICO claims was proper, because the record fails to provide sufficient evidence of a substantial effect on interstate commerce of either Burke Vending's anticompetitive activities or its commercial activities as a whole. Therefore dismissal of the pendent state law claims was also proper. The findings and conclusions **[**30]** of the district court bearing on the merits of the controversy are of no legal or precedential effect.

AFFIRMED.

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN4[] Motions to Dismiss, Failure to State Claim

A motion to dismiss for failure to state a claim may be granted only if it appears certain that no relief could be granted under any set of facts that could be proved consistent with the allegations. The factual allegations set forth in the complaint of counterclaim must be accepted as true, and the court must view the allegations in the light most favorable to the pleader. Even if it appears on the face of the pleadings that recovery is remote, the claim will withstand the motion to dismiss as long as the pleader retains a possibility of success. Dismissals on the pleadings are especially disfavored in antitrust cases.

Governments > Legislation > Interpretation

HN5[] Legislation, Interpretation

The antitrust laws must be construed liberally and that antitrust immunity is disfavored.

HN6[] Public Enforcement, US Department of Justice Actions

To further the national policy of establishing a global communications network in conjunction and in cooperation with other countries, *47 U.S.C.S. § 701(a)*, Congress established the Communications Satellite Corporation (Comsat) as a government-created monopoly and as the official United States participant in the global system. *47 U.S.C.S. § 701(c)*. Congress created detailed supervision and regulation of Comsat's activities, with particular emphasis on the Executive Branch's responsibility to ensure that Comsat's relationships with foreign governments and international organizations shall be consistent with the national interest and foreign policy of the United States. U.S.C.S. *§ 721(a)(4)*. Executive Order No. 12,046, 3 C.F.R. 158, § 5-201 (1978), invests the Secretary of State with the responsibility for instructing Comsat in its role as the United States representative to the International Telecommunications Satellite Organization. That Executive Order No. 12,046, 3 C.F.R. 158, § 5-201 (1978), also directs the Secretary of Commerce to conduct a "continuous review" of the satellite communications system, including Comsat's activities, and to ensure effective compliance at all times with the Communications Satellite Act of 1962, *47 U.S.C.S. § 701 et seq.* 3 C.F.R. 158, § 2-301(b), (c).

Communications Law > Federal Acts > Communications Satellite Act

HN7[] Federal Acts, Communications Satellite Act

Section 701(c) of the Communications Satellite Act of 1962, *47 U.S.C.S. §§ 701 et seq.*, applies to the Communications Satellite Corporation in its capacity as common carrier, not in its role as signatory to the International Telecommunications Satellite Organization.

Civil Procedure > Parties > Joinder of Parties > General Overview

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN8[] Subject Matter Jurisdiction, Jurisdiction Over Actions

Fed. R. Civ. P. 19(a) requires joinder of parties whose inclusion will not defeat subject matter jurisdiction if (1) in their absence complete relief cannot be accorded among those already parties, or (2) their absence will impair their ability to protect their interest in the subject of the case or create a substantial risk of subjecting parties already joined to multiple or inconsistent obligations. *Fed. R. Civ. P. 19(a)*. If such parties exist and are unable to be joined, the court must determine whether in equity and good conscience the action should proceed without the absent parties or be dismissed because the absent parties are indispensable. *Fed. R. Civ. P. 19(b)*.In making that determination, the court must consider (1) the prejudicial effect to the joined or absent parties of the indispensable parties' absence; (2) the feasibility of diminishing the prejudicial effect by including "protective provisions" in the judgment; (3) whether the judgment rendered in the case could be adequate; and (4) whether an adequate remedy is available to plaintiff after dismissal. *Fed. R. Civ. P. 19(b)*.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN9[] **Evidence, Inferences & Presumptions**

In order to establish a prima facie case of a New York state law claim for interference with prospective advantage, plaintiff must plead (1) a prospective contractual relationship with a third party; (2) that would have been consummated (3) but for the defendant's interference by wrongful means or malicious intent (4) without justification. The "but-for" requirement is a strict one as it is more stringent than "being reasonably certain" or "having a reasonable expectation." The motive and justification requirements also are strictly construed. Defendant's motive in interfering must be entirely malicious, without any secondary purpose such as advancing competing economic interests.

Opinion

OPINION and ORDER

Plaintiff filed this antitrust suit under *sections 1* and *2* of the Sherman Antitrust Act, *15 U.S.C. §§ 1*, *2 (1982 & Supp. 1990)* seeking injunctive relief and treble damages pursuant to sections 4 and 16 of the Clayton Antitrust Act, *15 U.S.C. §§ 15*, *26*. Defendant has moved to dismiss the complaint for lack of subject matter jurisdiction, failure to state a claim, and failure to join a necessary and indispensable party. Fed. A. Civ. P. 12(b)(1),(6),(7). For the reasons discussed below, **[*2]** the Court grants the motion and dismisses the complaint.

FACTS

Reynold Anselmo is a Connecticut citizen doing business as Alpha Lyracom, a sole proprietorship, which in turn does business as Pan American Satellite ("PAS"). Alpha Lyracom owns and operates the first international commercial communications satellite outside the International Telecommunications Satellite Organization ("Intelsat"). Alpha Lyracom provides its services through a space telecommunications satellite called PAS I, which was launched in 1988.

Intelsat consists of 117 nations and their official representatives. Its origins are in a 1961 U.N. resolution calling for international cooperation in developing a global communications system. *See* G.A. Res. 1721, 1 U.N. GAOR Supp. (No. 17) at 6, U.N. Doc. A/5100 (1962). The resolution voiced the common objective of the United Nations' member-nations that "communication by means of satellite should be available to the nations of the world . . . on a global and non-discriminatory basis." *Id.* at 7.

To facilitate the United States' participation in the contemplated global system, Congress enacted the Communications Satellite Act of 1962, *47 U.S.C. §§ 701 et seq.* **[*3]** ("CSA"). The CSA created a private corporation, defendant Communications Satellite Corp. ("Comsat"), and designated it as the United States representative or signatory to Intelsat. Pursuant to that designation, Comsat is subject to extensive Presidential supervision "to assure that [Comsat's relations with foreign governments and international organizations] shall be consistent with the national interest and foreign policy of the United States." *47 U.S.C. § 721(a)(4)*.

In addition, Congress sought to ensure that:

all authorized users shall have nondiscriminatory access to the system; that maximum competition be maintained in the provision of equipment and services utilized by the system; that the corporation created under this chapter be so organized and operated as to maintain and strengthen competition in the provision of communications services to the public; and that the activities of the corporation created under this chapter and of the persons or companies participating in the ownership of the corporation shall be consistent with the Federal antitrust laws.

Id. *§ 701(c)*.

The United States, through the vehicle of Comsat, joined Intelsat in 1964. Today Intelsat owns and **[*4]** operates a global system of communications satellites that provides international telecommunications services to more than 170 countries, territories and dependencies, and domestic telecommunications services to over thirty countries. International agreements prescribe the functions and authority of Intelsat, as well as the relations among the United States Government, Intelsat and the other member-nations. [1]

A. *The Intelsat sat Agreements*

In 1971, the member-nations executed two pacts known as the Definitive Agreement and the Operating Agreement. The Definitive Agreement **[*5]** was executed by the Government of each member-nation, the Operating Agreement was executed by the signatory or representative of each member-nation. Comsat signed the Operating Agreement as the United States signatory.

The Preamble to the Definitive Agreement expresses the commitment of each member-nation to "the aim of achieving a single global commercial telecommunications satellite system as part of an improved global telecommunications network . . . which will contribute to world peace and understanding." The Definitive Agreement entrusts the carrying out of this goal to Intelsat. Art. II(a).

In 1976 the United States, as host country, also entered into the Headquarters Agreement with Intelsat ("HQ Agreement").

1. *Intelsat's Organizational Structure*

a. *Assembly of Parties*

The Definitive Agreement provides that Intelsat's Assembly of Parties shall consist of all member-nations, including the United States. The Assembly of Parties convenes every two years to consider aspects of Intelsat that bear upon

---

[1] International Executive agreements to which the United States is a party, such as the Intelsat Agreements, constitute the law of the United States, *Weinberger v. Rossi, 456 U.S. 25, 31 (1982)*; *Dames & Moore v. Regan, 453 U.S. 654, 677 (1981)*, and are subject to the same rules of construction applicable to treaties. *United States v. Pink, 315 U.S. 203, 223-24, 227-30 (1942)*; *United States v. Belmont, 301 U.S. 324, 330-32 (1937)*.

the nations as sovereigns. It is also charged with establishing the long-term objectives of Intelsat. Pursuant to Article XIV(d) of the Definitive Agreement, any member-nation **[*6]** wishing to establish or use a non-Intelsat international satellite system (such as plaintiff's) must first consult with the Assembly of Parties, which must declare that the system will not be antithetical to Intelsat's objectives in order for the system to be approved.

b. *Meeting of Signatories*

Under the Definitive Agreement, the designated representatives of each member-nation meet annually. The majority of member-nations other than the United States have designated a government agency or the government itself as its representative. Each representative has one vote at the meetings. A majority of representatives must be present to constitute a Drum. Decisions on substantive matters, when made on other than a consensus basis, require an affirmative vote of two-thirds of the voting representatives.

c. *Board of Governors*

The Board of Governors, presently composed of 29 persons representing 103 signatories, is responsible for the day-to-day conduct of Intelsat. The Chief Executive of Intelsat is the Director General, who is responsible to the Board for the performance of all managerial functions.

2. *Intelsat's Functions and Procedures*

While Intelsat was created by its member-nations **[*7]** to establish a single global satellite communications system, procedures were also provided in the event any member-nation wished to establish separate, non-Intelsat, international or domestic satellite communications services. These procedures, known as the consultation process set forth in article XIV of the Definitive Agreement, must be followed by the member-nations to ensure that any separate system is compatible with Intelsat and its international mission.

The consultation procedures distinguish between separate satellite systems for domestic and for international public communications services in terms of both the governing body responsible for consultation and the applicable standards that must be satisfied. Proposals for domestic systems (Art. XIV(c)) are initiated by the nation in which service will be utilized and are subject to review only for technical compatibility with the Intelsat system. That review is performed by the Board of Governors, and findings are made in the form of recommendations.

On the other hand, when a separate system is proposed by a nation to meet its international communications services requirements (Art. XIV(d)), the final assessment of both the **[*8]** technical compatibility and economic impact of the proposed system on Intelsat must be made *by the Assembly of Parties.* Since international systems implicate the foreign relations and foreign policies of Intelsat's member-nations, it is those member-nations, sitting as the Assembly of Parties, which have the responsibility and authority for concluding the consultation process and for issuing, by a two-thirds majority, the requisite findings.

The Definitive Agreement directs that rates for use of Intelsat satellites must be uniform and, in the aggregate cover the costs of operating the system. Rates are established by the Board, not individual signatories such as Comsat.

3. *Immunities*

Article XV of the Definitive Agreement requires that each member-nation grant appropriate privileges, exemptions and immunities to Intelsat, to the member-nations (Parties) and their representatives; and to the Signatories and representatives of Signatories, relating to their conduct in carrying out their functions and duties. Pursuant to that directive, the United States entered into the HQ Agreement with Intelsat in 1976. Paragraph 16 provides that:

"[t]he officers and employees of Intelsat, **[*9]** representatives of the Parties and of the Signatories . . . shall be immune from suit and legal process relating to acts performed by them in their official capacity and falling within their functions . . . ."

HN1[] The International Organizations Immunities Act, *22 U.S.C. §§ 288 et seq. (1982 and Supp. V 1987)* ("IOIA") confers immunity from suit every form of judicial process on international organizations designated by the

President. Intelsat, since its inception, has been designated by the President of the United States as an international organization entitled to the immunities provided in the IOIA, with the current designation set forth in Executive Order No. 11,966, signed by President Ford in 1977. Executive Order No. 11,966, 3 C.F.R. 90 (1978) (App. H). The IOIA also provides that foreign officers and employees of international organizations such as Intelsat are immune from suit and legal process relating to acts performed in their official capacity. *22 U.S.C. § 288d(b)*. Further, the IOIA provides that "the archives of international organizations shall be inviolable." *22 U.S.C. § 288a(c)*.

4. *Executive Branch Control of Comsat as U.S. Signatory to Intelsat*

The Executive Branch **[*10]** exercises considerable control over Comsat's participation in Intelsat. ***HN2***[] Exec. Order No. 12,046 dictates that "with respect to telecommunications, the Secretary of State shall exercise primary authority for the conduct of foreign policy, including the determination of United States positions . . . in negotiations with foreign governments and international bodies." The instructional process through which the Secretary directs Comsat's participation in Intelsat is formalized in written procedures. The procedures recognize that as U.S. representative to Intelsat, "Comsat exercises . . . an important foreign policy function on behalf of the U.S." Before each Intelsat meeting, Comsat must circulate the agenda of the meeting to State Department officials who are charged with the responsibility of issuing instructions to Comsat on how to approach the agenda.

5. *Development of U.S. Policy on Separate, non Intelsat Systems*

Although Intelsat has inarguably functioned as the preeminent global satellite system for member-nations, in 1983 the FCC received several applications to operate non Intelsat systems from United States companies. The influx of applications occasioned President Reagan **[*11]** to issue Presidential Determination No. 85-2, pursuant to his responsibility to determine whether additional international satellite systems were "required in the national interest" under *sections 701(d)* and *721(a)* of the Communications Satellite Act. The President decided it was in the nation's interest to allow the development of separate systems, but directed the United States to consult with Intelsat before final authorization of any separate system in order to meet the United States' obligations under the Definitive Agreement. The President also instructed the Secretaries of State and Commerce to style criteria for the FCC which would insure that the United States met its international obligations. Two criteria were then prescribed that must be satisfied prior to final FCC authorization to commence a separate system.

First, each new system must be restricted to providing services through the sale or long-term lease of transponders or space segment capacity for communications not interconnected with public - switched message networks. Second, one or more foreign authorities are to authorize use of each system and enter into consultation procedures with the United States Party **[*12]** under Article XIV(d) of the Definitive Agreement to ensure technical compatibility and to avoid economic harm to Intelsat.

Thus, ***HN3***[] before the FCC may grant final authorization for a proposed separate system, such as plaintiffs', (1) the applicant must first obtain the authorization of each affected foreign country for the use of the system within that country and enter into Article XIV(d) consultations, and (2) then the United States government must undertake and complete the consultation procedures within Intelsat's Assembly of Parties (*i.e.*, member-nations) as required by Article XIV(d) of the Definitive Agreement.

Congress ratified the President's accommodation of the competing interests of Intelsat and fostering United States companies' entrance into the telecommunications industry in the Foreign Relations Authorization Act, Fiscal Years 1986-87 ("FRAA"), Pub. L. No. 99-93, 99 Stat. 405, 425-2 (1985).

The FCC issued a Report and Order regarding the applications for separate systems on July 25, 1985. *In re Establishment of Satellite Systems Providing International Communications,* FCC Docket No. 84-1299 (July 25, 1985) ("Report and Order"). The FCC Report and Order adhered **[*13]** to the separate systems policy articulated by the President and the Secretaries of State and Commerce and ratified by Congress. Thus, while the FCC noted that separate satellite systems would benefit users of international communications services, it concluded that "it [is] necessary to impose the Executive branch restrictions on the authorization of these systems in order to meet our international obligations under the Intelsat Agreement." *Id.* at 5. The FCC Report and Order did not constitute final approval of any particular separate system. Rather, it expressly stated that the Commission will not issue a final license for the operation of any separate system "until the United States has completed coordination of that system with Intelsat pursuant to Article XIV(d) of the Intelsat Agreement and we have been informed by the Department of State that the United States has fulfilled its obligation under Article XIV(d)." *Id.* at 143. In short, the FCC recognized that United States' support for separate systems must proceed with the Intelsat framework to which the political branches of our government are expressly committed.

6. *Introduction of PAS I*

The FCC preliminarily approved **[*14]** plaintiffs' application in September 1985 to construct and operate a subregional Western Hemisphere satellite system. Following Art. XIV(d) consultations and a favorable resolution by the Assembly of Parties, plaintiffs received final FCC approval in September 1987 to launch its satellite PAS I for communications between the United States and Peru; the satellite was launched in June 1988. In 1988 the Board of Governors, following Art. XIV(c) consultations approved requests by the United Kingdom and Chile for use of plaintiffs' services in domestic communications. In 1988 and 1989, the Assembly of Parties, following Art. XIV(d) consultations, approved plaintiffs' services in international communications in the United Kingdom, Germany, Ireland and several Central and South American countries.

The Complaint

In brief, plaintiffs allege that Comsat, as United States signatory to Intelsat, is responsible for conducting Article XIV(d) consultations on PAS' behalf. Compl. para. 23. Plaintiff maintains that rather than performing this duty, Comsat has engaged in anticompetitive conduct to thwart plaintiffs' successful entry into the domestic and international telecommunications markets. **[*15]** Paragraphs 27 and 28 of the complaint contain the core allegations of conduct constituting restraint of trade and monopolization in violation of *sections 1* and *2* of the Sherman Antitrust Act.

As defendant points out with alacrity, most of the allegations assert that Comsat conspired with Intelsat and its representatives to delay plaintiffs' entry into the market. See, e.g., 28(d),(g),(h),(i),(k-n), (p-r). Plaintiffs do, however, allege substantial unilateral anticompetitive action by Comsat. *See, e.g.,* para. 28(b),(c),(e),(f),(g),(o),(s),(w),(xy).

HN4[] A motion to dismiss for failure to state a claim may be granted only if it appears certain that no relief could be granted under any set of facts that could be proved consistent with the allegations. See *Hishon v. King & Spaulding, 467 U.S. 69, 73 (1984)*; *Lipsky v. Commonwealth United Corp., 551 F.2d 887, 894 (2d Cir. 1976)*; *Burger v. Health Ins. Plan of Greater New York, 684 F. Supp. 46, 49 (S.D.N.Y. 1988)*. The factual allegations set forth in the complaint of counterclaim must be accepted as true, see *Zinermon v. Burch, 110 S.Ct. 975, 979 (1990)*, and the Court must view the allegations in the light most favorable to **[*16]** the pleader. See *Scheuer v. Rhodes, 416 U.S. 232, 237 (1974)*; *Yoder v. Orthomolecular Nutrition Inst., Inc., 751 F.2d 555, 562 (2d Cir. 1985)*. Even if it appears on the face of the pleadings that recovery is remote, the claim will withstand the motion to dismiss as long as the pleader retains a possibility of success. *Scheuer, 416 U.S. at 237*. To this landscape must be added the caveat that ""dismissals on the pleadings are especially disfavored in antitrust cases." *Schwartz v. Jamesway Corp., 660 F. Supp. 138, 141 (E.D.N.Y. 1987)* (citing *Hospital Bldg. Co. v. Rex Hosp. Trustees, 425 U.S. 738, 746 (1976))*.

Defendant argues forcefully that it is immune from suit by reason of the IOIA and the Intelsat Agreements. Plaintiffs respond that *§ 701(c)* of the CSA reflects the clear intention of Congress to subject Comsat to the ***antitrust law***. In considering these positions, the Court bears in mind ***HN5***[] that the antitrust laws must be construed liberally and that antitrust immunity is disfavored. See *National Gerimedical Hosp. v. Blue Cross of Kansas City, 452 U.S. 378, 388-89 (1981)*; *Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 231 (1979)*.

In order to **[*17]** allow Intelsat to function outside the unpredictable legal standards of some nations, the United States and the other member-nations accorded Intelsat and its constituent parts immunity from suit. Article XV(c) of the Definitive Agreement directed that a Headquarters Agreement be executed by the U.S. as host-nation with Intelsat which would grant appropriate immunities. Paragraph 16 of the HQ Agreement provides immunity from suit to Intelsat, *"the representatives of the Parties* and of the Signatories . . . ." (emphasis added). Plaintiffs first seek to circumvent this straightforward grant of immunity to Comsat by embracing a strict interpretation of this language. They argue that they have sued a party and signatory itself, not its representatives. This argument is unpersuasive for two reasons. First, plaintiffs in their complaint acknowledge that Comsat is the representative of the United States Party to Intelsat. Compl. para. 11, 23. Second, plaintiffs ignore that paragraph 16 of the HQ Agreement implements the directive of Art. XV(c) of the Definitive Agreement to the United States to confer "appropriate privileges and immunities to Intelsat . . . to Parties . . . [and] to **[*18]** Signatories [e.g., Comsat] and representatives of Signatories."

Plaintiff next points out that paragraph 16 of the HQ Agreement states that its grant of immunity "may be waived by . . . the Parties and Signatories for their representatives." They assert that Congress, on behalf of the United States Party, waived Comsat's immunity from the antitrust laws in *section 701(c)* of the CSA, which provides that the activities of Comsat "shall be consistent with the antitrust laws." Defendant maintains that review of the pertinent legislative history reveals that Congressional concern with potential anticompetitive conduct was confined to the fact that communications common carriers (such as AT&T) would own large amounts of Comsat stock. Because "[r]egard for [the statutory] purposes should infuse construction of the legislation," the Court next parses *section 701(c)* and its legislative history. *United States v. Dotterweich, 320 U.S. 277, 280 (1943)*.

HN6[] To further the national policy of establishing a global communications network "in conjunction and in cooperation with other countries," *47 U.S.C. § 701(a)*, Congress established Comsat as a government-created monopoly and as the official "United **[*19]** States participa[nt] in the global system." *47 U.S.C. § 701(c)*. Congress created detailed supervision and regulation of Comsat's activities, with particular emphasis on the Executive Branch's responsibility to ensure that Comsat's relationships with foreign governments and international organizations "shall be consistent with the national interest and foreign policy of the United States." U.S.C. *§ 721(a)(4)*. Executive Order No. 12,046, 3 C.F.R. 158, § 5-201 (1978) invests the Secretary of State with the responsibility "for instructing [Comsat] in its role" as the United States representative to Intelsat. That Order also directs the Secretary of Commerce to conduct a "continuous review" of the satellite communications system, including Comsat's activities, and to ensure "effective compliance at all times with the" CSA. *Id.* § 2-301(b),(c).

Despite the intricate legal framework and supervision governing Comsat to ensure a course of action consistent with the objectives of Intelsat, plaintiffs seek to expose Comsat to antitrust liability whenever Comsat votes on resolutions at Intelsat meetings, participates in Article XIV consultations as the representative of the United States government **[*20]** or participates in Intelsat pricing or procurement decisions. Those actions, however, are plainly within the Congressional grant of authority to Comsat to "plan, initiate, construct, own, manage, and operate" a communications satellite system "in conjunction with foreign governments or business entities . . . ." *47 U.S.C. § 735(a)(1)*. Congress could not have intended to require Comsat to participate in Intelsat subject to Executive Branch directives and, at the same time, have intended that Comsat proceed at its own antitrust peril in carrying out that official role.

The legislative history of the CSA confirms that Congress did not intend to subject Comsat to the antitrust laws with respect to its activities as Signatory to Intelsat. Rather, Congress envisioned a far narrower scope for the "antitrust consistency" language in *Section 701(c)* than plaintiffs suggest. First, the Senate report confirms that Congress intended to establish, through a global system, a single provider of international satellite services to and from the United States. S. Rep. No. 1584, 87th Cong., 2d Sess. 28 (1962) ("such a system is by nature a Government-created monopoly"); *id. at 30* ("establishment **[*21]** of a communications satellite system involves the creation of such a monopoly"). There was agreement with the need to create a monopoly to achieve the Act's policy objectives, [2] but significant debate focused on the nature of that monopoly.

---

[2] The legislative history contains many indications that the existence of more than one public satellite system was not contemplated or even regarded as feasible. For example, the Assistant Attorney General, Antitrust Division, testified at the Congressional hearings that,

[*22] While the view prevailed that the sole United States participant in the global system should be a government-created but privately-owned corporation subject to stringent regulation, there were antitrust concerns about whether and to what extent communications common carriers should be permitted to participate in the ownership of the corporation. Congress displayed concern that the newly-created corporation would be dominated by common carriers such as AT&T, and that such ownership would permit them to collude or subvert Comsat for private gain. [3] **[*23]** In particular, there was concern that large common carrier shareholders could control Comsat's procurement of goods and services or access to Comsat's international satellite services to the disadvantage of competing common carriers. In short, Congress' antitrust concerns related to the activities of Comsat and its owners as communications common carriers and not to Comsat's activities as United States representative to the global satellite system subject to Executive Branch regulation. [4]

Seeking to allay Congressional concern, the Department of Justice explained to Congress how it could fashion a plan that would be consistent with the antitrust laws

"[T]he Department of Justice believes that to be *consistent with the antitrust laws* any plan adopted must meet certain conditions. These conditions are:

(1) All interested communication common carriers be given an opportunity to participate in the ownership of the system;

(2) All interested communication common carriers be given unrestricted use on nondiscriminatory terms of the facilities of the system whether or not they elect to participate in ownership;

[*24] (3) All interested parties engaged in the production and sale of communication and related equipment be given an opportunity to participate in ownership of the system; and

(4) All interested parties engaged in the production and sale of communication and related equipment be given unrestricted opportunity to furnish such equipment to the system whether or not they elect to participate in ownership."

Space Satellite Communications: Hearings Before the Subcomm. on Monopoly of the Select Comm. on Small Business, 29 (Aug. 2, 1961) (statement of Lee Loevinger, Assistant Attorney General, Antitrust Division) (emphasis added).

---

for numerous technical reasons we are not going to permit [competing satellite systems], we are going to permit one system and we are going to say who can put it up and under what circumstances; *anyone who later wants to come along and engage in that long-distance communication must use the established facility.*

Communications Satellites: Hearings Before the House Comm. on Interstate and Foreign Commerce, 146 (July 26, 1961) (statement of Lee Loevinger) (emphasis added).

Similarly, Nicholas Katzenbach, Assistant Attorney General, Office of Legal Counsel, testified that "the capacity of a single satellite system would be adequate to handle all of the communication possibilities that one can foresee." *Communications Satellites: Hearings Before the House Comm. on Science and Astronautics,* 722 (Aug. 1, 1961).

[3] Section 734(b)(2) of the CSA contains detailed provisions governing the extent to which communications common carriers may own Comsat's shares. Indeed, as originally enacted, this section reserved 50% of Comsat's shares for purchase by communications common carriers. Pub. 1. No. 87-624, § 304(b)(2), 76 Stat. 419, 424 (1962), *amended by* Pub. L. No. 97-410, 96 Stat. 2043, 2045 (1983).

[4] The Senate report commented on these specific antitrust concerns. S. Rep. No. 1584, 87th Cong., 2d Sess. 11 (1962) (provisions enacted to "prevent any single interest or group of interests from dominating the activities of the corporation"; statute's competitive objectives were to ensure (1) competition in the procurement of equipment and services and (2) non-discriminatory access to international satellite system for communications common carriers); *id*. at 13.

Having been advised by the Justice Department of the safeguards needed to ensure that Comsat and its owners operate in a manner "consistent with the [Federal] antitrust laws," Congress later added that phrase to the statute. Thus, the substance and chronology of the legislative history compel the conclusion dictated by the fundamental objectives of the Act, namely, that Congress did not intend the "antitrust consistency" phrase to authorize private lawsuits against Comsat *in its role as the United States representative to Intelsat.* [5]

[*25] The Court declines to discern a Congressional purpose "'to paralyze with one hand what it sought to promote with the other.'" *Weinberger v. Hanson, Westcott & Dunning, Inc., 412 U.S. 609, 631 (1973)* (citation omitted). ***HN7***[] *Section 701(c)* applies to Comsat in its capacity as common carrier, not in its role as signatory to Intelsat. Accordingly, paragraph 16 of the HQ Agreement, in conjunction with Art. XV(c) of the Definitive Agreement requires this Court to recognize defendant's immunity from this action.

Because the Court rules that the immunity conferred on defendant under the HQ Agreement bars this suit, it need not reach all of defendant's arguments in favor of dismissal. Two of these arguments, however, warrant discussion.

The Court believes that dismissal is appropriate in the alternative under *Fed. R. Civ. P. 12(b)(7)* for failure to join necessary and indispensable parties under *Rule 19*. ***HN8***[] *Rule 19(a)* requires joinder of parties whose inclusion will not defeat subject matter jurisdiction "if (1) in [their] absence complete relief cannot be accorded among those already parties, or (2)" their absence will impair their ability to protect their interest in the subject of the case **[*26]** or create a substantial risk of subjecting parties already joined to multiple or inconsistent obligations." *Rule 19(a)*. If such parties exist and are unable to be joined, the Court must "determine whether in equity and good conscience" the action should proceed without the absent parties or be dismissed because the absent parties are indispensable. *Rule 19(b)*.

In making that determination, the Court must consider (1) the prejudicial effect to the joined or absent parties of the indispensable parties' absence; (2) the feasibility of diminishing the prejudicial effect by including "protective provisions" in the judgment; (3) whether the judgment rendered in the case could be adequate; and (4) whether an adequate remedy is available to plaintiff after dismissal. *Id.*

Plainly, Intelsat and its member-nation are "necessary" parties under *Rule 19(a)*. It taxes credulity to suggest that complete relief can be granted as between plaintiffs and Comsat. The lion's share of the complaint's allegations depict concerted action between Comsat and Intelsat's member-nations to restrain trade and monopolize the international telecommunications market. Moreover, as discussed below, the Court could **[*27]** not meaningfully grant plaintiff's request for injunctive relief without the presence of Intelsat and of the governments and their official representatives which purportedly engaged in violations of the antitrust laws.

The United States has one vote in Intelsat's Assembly of Parties and Comsat has but one vote as the United States representative in the Meeting of Signatories. In these bodies as well as the Board of Governors, substantive matters require a two-thirds majority vote. Therefore, for injunctive relief to be effective, the Court would have to enjoin (1) at least two-thirds of the 117 Signatories from committing the kind of acts alleged to have injured PAS (e.g., certain resolutions); (2) at least two-thirds of the 117 member-nations in the Assembly of Parties from engaging in the kind

---

[5] Congress understood that Comsat would not be subject to an antitrust suit for functioning as the sole United States participant in what was to become the Intelsat global system. When asked by Senator Kefauver whether the government could "bring an antitrust suit against [Comsat] under *Section 2* monopolization -- of the Sherman Act," the Assistant Attorney General in charge of the Antitrust Division replied that "for purposes of this discussion we should assume that we cannot." *Antitrust Problems of the Space Satellite Communications System: Hearings Before the Subcomm. on Antitrust and Monopoly of the Senate Comm. on the Judiciary* 160 (April 4, 1962). The Department of Justice had also expressly advised Congress that "the mere doing what [Comsat is] permitted to do under this bill is not itself going to result in an offense against the Sherman Act." *Antitrust Problems of the Space Satellite Communication System: Hearings Before The Subcomm. on Antitrust and Monopoly of the Senate Comm. on the Judiciary* 58 (March 29, *1962) (testimony* of Assistant Attorney General Katzenbach). See *Communications Satellites: Hearings Before the House Comm. on Interstate and Foreign Commerce* 153 (July 26, 1961) (testimony of Assistant Attorney General Loevinger) (where the government "grants an exclusive right to any company to do a particular thing, . . . the exercise of this Government-granted right, is not an antitrust violation . . .").

of conduct alleged to have injured PAS (e.g., denials or delays in Article XIV consultations); and (3) members of Intelsat's Board of Governors representing in the aggregate at least two-thirds of the ownership of Intelsat from engaging in the type of conduct alleged to have injured PAS (e.g., predatory rates and procurement decisions).

Moreover, Comsat has no role in many of the kinds of **[*28]** actions alleged to have injured PAS and to have been undertaken by individual foreign nations or groups of foreign nations. For example, the alleged denials or delays of the necessary operating agreements is a matter solely within the control of those nations in which PanAmSat wishes to send and disseminate satellite signals (see Compl. 28(f), (h) and (t); the alleged denials or delays in granting Article XIV(c) consultations for wholly foreign domestic service are matters within the control of the foreign nations concerned (*see* Compl. paras. 28(d)-(f), (h), (j)-(n), (p)-(r), and (t)); and the alleged denials or delays of Article XIV(d) consultations for satellite services between or among two or more foreign nations are matters within the control of those particular foreign nations (see Compl. 28(d)-(f), (h), (j)-(n), (p)-(r) and (t)). Thus, for an injunction to be effective in prohibiting these types of alleged unlawful acts, it would need to be directed not only at Comsat, but at those individual foreign nations or groups of nations which have responsibility for the alleged unlawful activities.

Plaintiffs note that they could recover on their claim for money damages without **[*29]** the presence of Intelsat and its member-nations because joint tortfeasors are not indispensable parties. See *Samaha v. Presbyterian Hosp. in City of New York, 757 F.2d 529, 531 (2d Cir. 1985)*. While this is correct, it does not surmount the obstacle which prevents this Court from issuing effective injunctive relief: the absence of Intelsat and its member-nations, whose conduct permeates the allegations even under the most liberal reading of the complaint. [6]

[*30] Plaintiff's New York State law claim for interference with prospective advantage must be dismissed for an independent reason. ***HN9***[] In order to establish a *prima facie* case, plaintiff must plead (1) a prospective contractual relationship with a third party; (2) that would have been consummated (3) but for the defendant's interference by wrongful means or malicious intent (4) without justification. See *Optivision, Inc. v. Syracuse Shopping Center Assoc's, 472 F. Supp. 665, 685 (N.D.N.Y. 1979)*.

The "but-for" requirement "is a strict one as it is more stringent than 'being reasonably certain' or 'having a reasonable expectation." *Id.* (citations omitted). The motive and justification requirements also are strictly construed. Defendant's motive in interfering must be entirely malicious, without any secondary purpose such as advancing competing economic interests. See *PPX Enters., Inc. v. Audio Fidelity Enters., Inc., 818 F.2d 266, 269 (2d Cir. 1987)*.

Plaintiff alleges in paragraph 30 of the Complaint that but for Comsat's actions, PAS would have sold the entire capacity of PAS I by the time it launched the satellite. This allegation is deficient under New York law because plaintiffs **[*31]** do not specify with whom a prospective contractual relation was lost. Concomitantly, plaintiffs are also unable to satisfy the strict "but for" pleading requirement.

CONCLUSION

For the reasons described above, the Court dismisses the complaint. This action is ordered removed from the active docket of this Court.

SO ORDERED

---

[6] In some cases it may not be necessary to join additional parties with respect to equitable claims because Rule 65(d) permits injunctions to be enforced not only against parties, but also against others "in active concert or participation with them who receive actual notice of the order by personal service or otherwise." *Vuitton et Fils S.A. v. Carousel Handbags, 592 F.2d 126, 129* (2d Cir. l979). But Rule 65(d), which may avoid the indispensable party issue in other contexts, is inapplicable here. The alleged co-conspirators who would be essential to the entry of effective injunctive relief -- Intelsat, its member-nations and their representatives -- are immune from process.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN3[] **Summary Judgment, Entitlement as Matter of Law**

When a district court resolves a case on summary judgment for the defendant after full discovery, the appellate court asks whether the non-moving party has presented a record adequate to support a favorable finding.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Monopolies & Monopolization, Actual Monopolization**

An antitrust defendant's conduct is redeemed by a legitimate business purpose. The key is whether the conduct was an attempt to exclude rivals on some basis other than efficiency.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN5[] **Anticompetitive & Predatory Practices, Predatory Hiring & Price Squeezes**

Unlawful predatory hiring occurs when talent is acquired not for purposes of using that talent but for purposes of denying it to a competitor. Such cases can be proved by showing the hiring was made with such predatory intent, i.e. to harm the competition without helping the monopolist, or by showing a clear nonuse in fact. Absent either of those circumstances employment should not be held exclusionary.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN6[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Acquiring talent not to use it but to deny it to possible rivals is exclusionary. Such an arrangement has the same harmful tendency and the same lack of redeeming virtue as the promise by a non-employee that he will not compete with the monopolist. But unlike the latter agreement whose existence or non-existence is a rather clear-cut question, exclusionary employment would be hard to identify. A monopolist would probably use important talent once acquired. And the court should not try to judge whether the acquired talent was used more effectively than readily available alternative personnel. Nor should it try to do so when the defendant pursues a hard-to-match, if not unmatchable, program of recruiting, say, young researchers in his field. In the absence, therefore, of the monopolist's proved subjective intent to hire talent preclusively or of clear non-use in fact, employment should not be held exclusionary.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN7[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Business justification is not legitimate if only a pretext for exclusionary conduct.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN8[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The burden of proving intent to monopolize and lack of legitimate business justifications lies with plaintiff.

Opinion by: PER CURIAM

Opinion

[*1257] This is an appeal from entry of summary judgment in favor of the defendant in a private antitrust action claiming monopolization violations of *section 2* of the Sherman Act, *15 U.S.C. § 2 (1988)*. [1] Plaintiff-appellant is Universal Analytics, Inc. ("UAI") and the defendant-appellee is MacNeal-Schwendler Corp. ("MSC"). Both parties occupy a small corner of the aerospace technology field, producing computer software programs called NASTRAN. The programs were originally developed by the National Aeronautics and Space Administration with which MSC contracted. We assume, as did the district court, that for purposes of deciding defendant's summary judgment

[1] This section provides:

HN1[] **Monopolizing trade a misdemeanor; penalty**

Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars, or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court.

motion, **[**2]** the relevant market is NASTRAN programs. We also assume that entry barriers to the market are substantial.

UAI filed this action in 1987, alleging various violations of federal antitrust and state laws. The district court granted summary judgment for the defendant-appellee in a comprehensive opinion which describes **[**3]** the nature of all of the allegations and the reasons why the district court concluded there were no material issues of fact with respect to any of them. The district court's opinion is reported at *707 F. Supp. 1170 (C.D. Cal. 1989)*.

In this appeal, appellant provides us with no basis for overturning any of the rulings of the district court. The one issue which warrants our discussion is whether there were any genuine issues of material fact with respect to UAI's claim that MSC's hiring of five of UAI's six key technical employees in 1986 and 1987 was predatory in violation of *section 2* of the Sherman Act. As the district court pointed out, that claim was the "thrust of this lawsuit." *707 F. Supp. at 1176*.

HN2[] Monopolization claims under *section 2* of the Sherman Act are composed of three elements: (1) the defendant's possession of monopoly power in the relevant market; (2) the defendant's willful acquisition or maintenance of such power; and (3) causal antitrust injury. *The Movie 1 & 2 v. United Artists, 909 F.2d 1245, 1254* (9th Cir. 1990, as amended **[**4]** July 25, 1990); *see Oahu Gas Serv., Inc. v. Pacific Resources, Inc., 838 F.2d 360, 363* (9th Cir.), *cert. denied*, *488 U.S. 870, 102 L. Ed. 2d 149, 109 S. Ct. 180 (1988)*.

The facts, which we must view most favorably to UAI, *see State Farm Fire and Cas. Co. v. Martin, 872 F.2d 319, 320 (9th Cir. 1989)* (per curiam); *Fed. R. Civ. P. 56(c)*, show beyond question that MSC did hire five key employees from UAI, and that the employees were difficult to replace because the training in this particular area requires two years. We also assume the hiring did result in some decrease in UAI's ability to compete with MSC, and UAI was MSC's only competitor of any significance. At all times relevant to this suit, MSC had approximately 90 percent of the market, and UAI, which entered the market in the early 1980s, about five percent. [2] Thus, we assume the first element of a *section 2* claim was met. *See 707 F. Supp. at 1173*.

[5]** This brings us to the second element, whether UAI willfully maintained its monopoly power by illegally raiding UAI's employees. *See Christofferson Dairy, Inc. v. MMM Sales, Inc., 849 F.2d 1168, 1174 (9th Cir. 1988)*. ***HN3***[] Because the district court resolved this case on summary judgment for the defendant after full discovery, we ask whether the non-moving party (here UAI) has presented a record adequate to support a favorable finding. *See Thurman **[*1258]** Industries, Inc. v. Pay ' N Pak Stores, Inc., 875 F.2d 1369, 1373 (9th Cir. 1989)*. We find that UAI has not met this burden, and that the evidence is so one-sided that MSC must prevail as a matter of law. *See Anderson v. Liberty Lobby, Inc, 477 U.S. 242, 251-52, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. No reasonable jury could find that MSC illegally restricted competition.

The leading Supreme Court decision in recent years on monopolization is *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*, in which the Supreme **[**6]** Court reasoned that ***HN4***[] an antitrust defendant's conduct is redeemed by a legitimate business purpose. *Id. at 608-10*; *see* Areeda, *Essential Facilities: An Epithet in Need of Limiting Principles*, 58 Antitrust L.J. 841, 849 (1990); *see also United States v. Grinnell, 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. *Cf. Oahu Gas Service, 838 F.2d at 368* (legitimate business justification immunizes monopolist against claim by competitor that it failed to aid). As the Supreme Court said, the key is whether the conduct was an attempt "to exclude rivals on some basis other than efficiency." *Aspen Skiing, 472 U.S. at 605* (quotation and footnote omitted).

So far as we have been able to determine, this is the first reported case of a claimed violation of *section 2* as a result of alleged employee raiding or predatory hiring. The conventional allegations of predatory conduct relate to pricing or refusals to deal. *See* L. Sullivan, *Handbook of the Law of Antitrust* 112 (1977); *see, e.g.,* **[**7]** *Image Technical Service, Inc. v. Eastman Kodak Co., 903 F.2d 612 (9th Cir. 1990)* (refusal to deal); *William Inglis v. ITT Continental Baking Co., 668 F.2d 1014 (9th Cir. 1981)* (predatory pricing). We agree with the district court that the

[2] The remaining five percent of the market was split among five competitors.

allegations of predatory hiring stated a claim capable of surviving a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, *see* III P. Areeda & D. Turner, ***Antitrust Law*** Paras. 702(a)-702(c) at 108-110 (1978), and that the case therefore turned on whether there were any genuine issues of material fact concerning UAI's allegations that the hirings were predatory. The most helpful and comprehensive discussion of the concept of predatory hiring is in Areeda and Turner, *supra*. ***HN5***[] Unlawful predatory hiring occurs when talent is acquired not for purposes of using that talent but for purposes of denying it to a competitor. Such cases can be proved by showing the hiring was made with such predatory intent, i.e. to harm the competition without helping the monopolist, or by showing a clear nonuse in fact. [3] **[**8]** Absent either of those circumstances, according to Professors Areeda and Turner, employment should not be held exclusionary.

> ***HN6***[] Acquiring talent not to use it but to deny it to possible rivals is exclusionary. Such an arrangement has the same harmful tendency and the same lack of redeeming virtue as the promise by a non-employee that he will not compete with the monopolist. But unlike the latter agreement whose existence or non-existence is a rather clear-cut question, exclusionary employment would be hard to identify. A monopolist would probably use important talent once acquired. And the court should not try to judge whether the acquired talent was used more effectively than readily available alternative personnel. Nor should it try to do so when the defendant pursues a hard-to-match, if not unmatchable, program of recruiting, say, young researchers in his field. In the absence, therefore, of the monopolist's proved subjective intent to hire talent preclusively or of clear non-use in fact, employment should not be held exclusionary.

Id. at 110 (footnote omitted).

[9]** Here UAI claims it demonstrated predatory intent. The principal evidence offered by UAI to support its contention that MSC was guilty of predatory hiring was a memo from Michael Gockel, the Executive Vice **[*1259]** President of MSC, to Joseph Gloudeman, MSC's Chief Executive Officer, written before the third of the five UAI employees was hired. It read:

> Do not put this in personnel folder -- throw out.
> Joe:
> This guy came through some months ago, and we turned him down because he didn't give us a warm feeling. In your case, he made reference to Stuttgart connection, which you found implausible.
>
> Since then, Nima B. [an earlier UAI employee] has given him a strong endorsement. As Nima is a winner, this is important. Also *we wound UAI again*, and Layfield has shown that he is hard-nosed enough to fire someone who does not work out.
> I recommend a hire.
> MG
> (emphasis added).

These four words, "we wound UAI again," UAI insists, is alone sufficient to create a genuine issue of material fact as to the lawfulness of the hirings. We disagree. The memo shows that one reason for the hirings was to disadvantage the competition, but that MSC's primary motivation **[**10]** was to obtain a productive employee for itself, and that MSC had no intention of retaining the employee unproductively. The district court also had uncontroverted evidence that the employees were hired primarily for their programming competence in their specialized areas, the salary paid them by MSC was no more than a 20% increase over the wage they earned at UAI (amounting to, at most, $ 6,000), and all but one of them expressed frustration and unhappiness working for UAI. In no case did MSC seek out the UAI employees; each of the programmers made an independent effort to seek employment from MSC, largely through independent employment agencies. Additionally, each of the employees was free to leave MSC and return to UAI. MSC did not require any of the employees to sign covenants not to compete or otherwise bind them to continued employment with MSC. Further, each of the UAI employees

---

[3] UAI might also have succeeded had it been able to demonstrate that MSC intended to pay the UAI programmers more than MSC could reasonably expect as a return from their work.

were immediately put to work in their area of specialization. None was permitted to languish in nonproductive or underproductive capacities.

The "wound memo" evidence was insufficient for a jury to find the requisite elements of predatory conduct on the part of MSC. The memo at most shows that a secondary **[**11]** motivation of the hiring was to disadvantage the competition. The memo does not undermine MSC's legitimate business reasons for hiring much needed and competent computer programmers, or permit a jury to find that any of MSC's reasons for hiring the programmers was pretextual. [4] See *Technical Services, Inc., 903 F.2d at 620* (***HN7***[] business justification is not legitimate if only a pretext for exclusionary conduct).

Thus, the **[**12]** district court was correct that UAI failed to make a showing sufficient to establish the elements essential to its cause of action. *See Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; *see also Technical Services, 903 F.2d at 620* & n.9 (***HN8***[] burden of proving intent and lack of legitimate business justifications lies with plaintiff).

AFFIRMED.

End of Document

---

[4] UAI also points us to the memorandum of an employee of MSC which noted, inter alia, that two UAI programmers seeking employment at MSC "represent two of the three remaining nonmanagement programmers at UAI." However, as in the case of the "wound memo," the rest of the memorandum indicates that MSC's primary motivation was to hire employees with general NASTRAN experience, which UAI concedes are highly-prized in the industry. Thus, this memo does not make UAI's case any stronger.

Concur by: JOHNSON (In Part)

Dissent by: JOHNSON (In Part); TJOFLAT; ANDERSON; EDMONDSON

Dissent

JOHNSON, Circuit Judge, concurring in part and dissenting in part in which KRAVITCH, Circuit Judge, joins:

While I concur in the Court's opinion that City Gas Company of Florida refused to deal in violation of *section 2* of the Sherman Act, *15 U.S.C.A. § 2* ("*section 2*"), I am constrained to dissent from the Court's holding that the territorial agreement between City Gas and Peoples Gas Systems, Inc. ("Peoples") is not immune from *section 2* liability under the state action doctrine.

I. FACTS

A. *Background*

City Gas is a major distributor of natural gas in southern Florida. City Gas purchases natural gas from Florida Gas Transmission Company ("FGT"). [1] City Gas then distributes the gas to its approximately 100,000 customers through a network of pipes. City Gas and Peoples are the two largest natural gas utilities in Florida. Both entered the natural gas business in 1960, when they applied for and received **[*1263]** allocations (i.e., permits) from the Federal Energy Regulatory Commission ("FERC") to purchase and resell natural gas from FGT. [2] **[**4]**

After a brief period of competition for customers, City Gas and Peoples entered into an agreement not to compete ("the territorial agreement"). The territorial agreement provided each party with a service area where the other would not solicit customers. City Gas and Peoples submitted the territorial agreement to the Florida Public Service Commission ("FPSC"), [3] and on November 9, 1960, the FPSC entered an order stating:

[**] Judges Johnson and Kravitch, concurring in part and dissenting in part, concur in affirmance of the judgment of the district court. Thus, a majority of seven judges agrees to affirm the judgment of the district court.

[1] FGT operates the only pipeline transporting natural gas into Florida.

[2] The natural gas industry in Florida is regulated by the FERC and the Florida Public Service Commission ("FPSC"). At the federal level, the FERC regulates the wellhead cost of natural gas (i.e., cost from the producer to the wholesaler) and the wholesale price paid by retail distributors such as City Gas. At the state level, the FPSC regulates the retail rates charged by distributors such as City Gas. Retail rates are determined through a process known as a "rate case."

[3] The FPSC was formerly the Florida Railroad and Public Utilities Commission.

> It is our opinion that territorial **[**5]** agreements which will minimize, and perhaps even eliminate, unnecessary and uneconomical duplication of plant and facilities which invariably accompany expansion into areas already served by a competing utility, are definitely in the public interest and should be encouraged and approved by an agency such as this, which is charged with the duty of regulating public utilities in the public interest.

Florida Railroad and Public Utilities Commission, Order No. 3051 (November 9, 1960) [hereinafter "*Order*"].

Chapter 366 of the Florida Statutes ("chapter 366") empowers the FPSC "to regulate and supervise each public utility with respect to its rates and service and the issuance and sale of its securities." *Fla.Stat.Ann. § 366.04*. [4] In fixing rates, the FPSC is authorized to consider "the efficiency, sufficiency, and adequacy of the facilities provided and the services rendered; the cost of providing such service and **[**6]** the value of such service to the public; [and] the ability of the utility to improve such service and facilities. . . ." *Id.* at § 366.041. The FPSC may also "require repairs, improvements, additions, and extensions to the plant and equipment of any public utility when reasonably necessary to promote the convenience and welfare of the public. . . ." *Id.* at § 366.05.

After 1974, the Florida statute expressly provided the FPSC with the power to authorize territorial agreements between electric utilities. *Section 366.04(2)* provided: "In the exercise of its jurisdiction, the [FPSC] shall have power over rural electric cooperatives and municipal electric utilities for the following purposes: . . . (d) To approve territorial agreements between and among rural electric cooperatives, municipal electric utilities, and other electric utilities under its jurisdiction." **[**7]** *Id.* at *§ 366.04(2)* (West Supp. 1989). The statute said nothing about territorial agreements among natural gas utilities such as City Gas and Peoples. [5] In 1965, however, the Florida Supreme Court held that the FPSC had implied authority under chapter 366 to approve or forbid the territorial agreement between Peoples and City Gas. *City Gas Co. v. Peoples Gas System, Inc., 182 So.2d 429, 436 (Fla. 1965)*. [6]

[8]**

B. *Procedural History*

1. District Court

On April 23, 1983, Consolidated filed its complaint in the present action. The **[*1264]** amended complaint alleged that City Gas's actions constituted an attempt to monopolize and monopolization in violation of *section 2*. Consolidated asked for treble damages under *15 U.S.C.A. § 15* and injunctive relief under *15 U.S.C.A. § 26*. City Gas counterclaimed that Consolidated's restrictive covenants and easements in Bel Aire precluded City Gas from competing for Consolidated's customers in violation of *15 U.S.C.A. §§ 1*, *2*, and *14*.

The district court held a nine-day bench trial in October 1985. The court determined that the territorial agreement violated *section 2* and rejected City Gas's defense that because the FPSC approved the agreement the territorial agreement was exempt from antitrust liability under the state action doctrine of *Parker v. Brown, 317 U.S. 341, 351, 63 S. Ct. 307, 313, 87 L. Ed. 315 (1943)*. *Consolidated Gas Co. v. City Gas Co., 665 F. Supp. 1493 (S.D. Fla. 1987)*.

2. Panel Opinion

---

[4] The statute defines "public utility" as including natural gas distributors, but not LP gas distributors. *Fla.Stat.Ann. § 366.02*.

[5] *Section 366.04* was revised in 1989 and the new statute expressly empowers the FPSC to approve territorial agreements between natural gas utilities. *See* 1989 Fla.Sess.Law Serv. 89-292 *§ 2* (West).

[6] In *City Gas Co.*, Peoples had sued under the territorial agreement to prevent City Gas from selling bottled gas in Peoples service area. City Gas's answer claimed that the territorial agreement was void under state and federal antitrust laws. *City Gas Co., 182 So.2d at 431*. The Florida Supreme Court held that because the FPSC had the authority to approve the territorial agreement the agreement was not invalid under Florida antitrust laws. The court did not reach the federal issues. *Id. at 436*.

On appeal, City Gas argued **[**9]** that it was immune from antitrust liability for the territorial agreement and the refusal to deal with Consolidated under the state action doctrine. The panel unanimously rejected these arguments and affirmed the district court. The panel held that because chapter 366 explicitly authorized territorial agreements between electric utilities without mentioning gas utilities, the statute did not clearly articulate a state policy favoring territorial agreements among gas utilities and, therefore, state action immunity could not apply. *Consolidated Gas Co. v. City Gas Co., 880 F.2d 297, 301-02 (11th Cir. 1989)*. The panel rejected City Gas's argument that the Florida Supreme Court decision in *City Gas Co.*, holding that chapter 366 impliedly authorized territorial agreements among gas companies, was sufficient to invoke the state action doctrine. *Id. at 303*.

II. ANALYSIS

A person (or corporation) violates *section 2* when he (1) possesses monopoly power in the relevant market and (2) willfully acquires or maintains that power through means other than growth or development as a consequence of superior products, business acumen, or historical accident. **[**10]** *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1703-04, 16 L. Ed. 2d 778 (1966)*. In *Parker*, however, the Supreme Court recognized that in passing the Sherman Act Congress did not intend to restrain state action or official action directed by a state to restrain competition. *Parker, 317 U.S. at 351, 63 S. Ct. at 313*.

In *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*, the Supreme Court found that the *Parker* doctrine applied to private parties who restrain competition in violation of the Sherman Act if (1) the challenged restraint was implemented pursuant to a clearly articulated and affirmatively expressed state policy, and (2) the policy was actively supervised by the state. *Id. at 105, 100 S. Ct. at 943*. In *Southern Motor Carriers Rate Conference v. United States, 471 U.S. 48, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)*, the Supreme Court reaffirmed the applicability of the *Midcal* two-pronged test to private parties' claims of state action immunity and held that a state policy that permits **[**11]** but does not compel anticompetitive conduct may be clearly articulated for purposes of the first prong of Midcal. *Id., 471 U.S. at 61, 105 S. Ct. at 1729*.

City Gas argues that the territorial agreement is immune from antitrust liability under *Midcal* and *Southern Motor Carriers*. Consolidated argues that the territorial agreement is not entitled to immunity because chapter 366 does not constitute a clearly articulated state policy authorizing such agreements and the state does not actively supervise such a policy.

1. Clearly Articulated State Policy

In *Southern Motor Carriers*, the United States sued two rate bureaus -- groups of private carriers that jointly set rates -- for violations of the antitrust laws. *Southern Motor Carriers, 471 U.S. at 50, 105 S. Ct. at 1723*. The rate bureaus submitted their **[*1265]** rate proposals to the public service commissions in each state for approval or rejection. *Id.* Of the four states involved, three had statutes explicitly permitting collective ratemaking. *Id. at 63, 105 S. Ct. at 1730*. The Court held that these statutes satisfied the first prong of *Midcal. Id.* **[**12]** The fourth state, Mississippi, had no statute addressing collective ratemaking. Mississippi statutes did, however, authorize the State Public Service Commission to regulate common carriers and to prescribe just and reasonable rates. *Id.* (citing *Miss.Code Ann. §§ 77-7-1*, 221). The Court held that this statute made clear the legislature's intent that rates should be determined by a regulatory agency rather than by the market. *Id. at 63-64, 105 S. Ct. at 1730*. This intent, the Court held, was sufficient to pass the first prong of *Midcal. Id. at 64-65, 105 S. Ct. at 1730-31*.

> A private party acting pursuant to an anticompetitive regulatory program need not "point to specific, detailed legislative authorization" for its challenged conduct. As long as the state as sovereign clearly intends to displace competition in a particular field with a regulatory structure, the first prong of the *Midcal* test is satisfied.

Id. at 64, 105 S. Ct. at 1730. The Court noted that requiring express statutory authorization of every action that an agency might take to implement a policy would diminish the flexibility of agencies **[**13]** and consequently their usefulness to state governments. *Id.*

In the present case, chapter 366 grants the FPSC broad powers to regulate public utilities, including natural gas distributors. Section 366.05 authorizes the FPSC to regulate repairs and extensions of facilities. *See* *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 42, 105 S. Ct. 1713, 1718, 85 L. Ed. 2d 24 (1985)* (statute authorizing city to provide sewage services and to determine the areas to be served would logically result in anticompetitive conduct, and, therefore, the legislature must have intended such conduct). The Florida Supreme Court has interpreted chapter 366 to empower the FPSC to authorize territorial agreements between natural gas distributors. *City Gas Co., 182 So.2d at 436*. This statute, as interpreted by the Florida courts, demonstrates the Florida legislature's intent to displace competition with a regulatory scheme. Chapter 366, therefore, satisfies the first prong of *Midcal*.

The Court holds today that the Florida Supreme Court opinion in *City Gas Co.* is irrelevant under the first prong of *Midcal* because the applicability of federal ***antitrust law*** **[**14]** is an issue of federal law. The Court is correct in part; the issue of whether *Midcal* is satisfied is one of federal law. The content, however, of the state law to which the federal courts apply the *Midcal* test is determined under state law. *See* *Cotton States Mut. Ins. Co. v. Anderson, 749 F.2d 663, 667 (11th Cir. 1984)*. Accordingly, this Court must apply the *Midcal* test to the Florida statute as interpreted by the Florida courts. *See* *City of Eau Claire, 471 U.S. at 44-45 n. 8, 105 S. Ct. at 1719 n. 8* ("Although the Wisconsin Supreme Court's opinion does not, of course, decide the question presented here of the city's immunity under the *federal* antitrust laws, it is instructive on the question of the state legislature's intent in enacting the statutes. . . ." (emphasis in original)). The Court concludes that the Florida Supreme Court should not have the last word on the proper interpretation of chapter 366 and endorses the district court's critique of the Florida Supreme Court's analysis of the Florida statute. *Consolidated Gas, 880 F.2d at 303* (recounting district court's analysis of chapter 366's language). Because **[**15]** the Florida Supreme Court is the final authority on the meaning of chapter 366, we should not endorse such a critique. *Cotton States, 749 F.2d at 667* ("'state courts have a right to construe their own statutes,' and federal courts are bound by that state interpretation." (citation omitted)).

2. Active Supervision

The Court also holds that the agreement was not actively supervised by the state. The active supervision prong of *Midcal* stems from the Supreme Court's recognition that where private parties engage in **[*1266]** anticompetitive conduct they are likely to act in their own interests rather than in the interests of the state. *Patrick v. Burget, 486 U.S. 94, 100, 108 S. Ct. 1658, 1662, 100 L. Ed. 2d 83 (1988)*. The active supervision prong ensures that the state action doctrine will immunize only the particular activities of private parties that, in the judgment of the state, further state regulatory policies. *Id.* In *Patrick*, the Supreme Court stated that in order to satisfy the active supervision requirement, the state must exercise "ultimate control over challenged anticompetitive conduct." *Id. at 101, 108 S. Ct. at 1663*. **[**16]**

> The active supervision prong of the *Midcal* test requires that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy. Absent such a program of supervision, there is no realistic assurance that a private party's anticompetitive conduct promotes state policy, rather than merely the party's individual interests.

Id.

In *Patrick*, the plaintiff challenged the peer-review process in a hospital after a peer-review panel threatened to revoke his hospital privileges. *Id. at 97, 108 S. Ct. at 1661*. The Supreme Court held that the peer-review process was not entitled to state action immunity because there was no active supervision by the state. *Id. at 100, 108 S. Ct. at 1662*. The Court rejected the defendants' arguments that the state actively supervised the peer-review process through the State Health Division, the State Board of Medical Examiners, and the state judiciary because the defendants failed to show that any of these state entities actually reviewed, or even could review, peer-review decisions regarding hospital **[**17]** privileges. *Id. at 101, 108 S. Ct. at 1663*. [7]

---

[7] The Court found that the judiciary was an inadequate supervisor because no statute expressly provided for judicial review of privilege terminations, and because state courts did not review privilege terminations on the merits for compliance with state policy. *Patrick, 486 U.S. at 104-05, 108 S. Ct. at 1664-65*.

In the present case, I would hold that the state actively supervised the territorial agreement. The FPSC actually reviewed the territorial agreement and approved it. First, the FPSC found that it had the authority to accept or reject the territorial agreement. The *Order* stated that because the territorial agreement purported to impinge on the FPSC's authority to order additions and extensions to plant and equipment of Peoples and City Gas, the territorial agreement could not be valid without the FPSC's approval. *Order* at 1. Second, the *Order* approved the territorial agreement; the FPSC found that the **[**18]** territorial agreement was consistent with the state's policy of procuring for the public essential utility services at reasonable costs. *Id.* Accordingly, FPSC's *Order* satisfies the active supervision requirement of *Midcal*. [8]

[19]** III. CONCLUSION

Because the Florida regulatory scheme satisfied both prongs of *Midcal*, I believe that the district court erred in holding that the territorial agreement is not entitled to state action immunity.

TJOFLAT, Chief Judge, dissenting:

I. INTRODUCTION

At first blush, this case appears to involve a straightforward application of *section 2* of the Sherman Act, *15 U.S.C. § 2 (1988)*. A natural gas utility, City Gas Company (City Gas), with an apparent monopoly **[*1267]** in the natural gas business in south Florida, refused to sell wholesale natural gas to another company, Consolidated Gas Company (Consolidated), that wanted to enter the natural gas business too. Consolidated brought suit under *sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15(a)*, *26 (1988)*, [1] claiming that City Gas refused to deal in violation of *section 2* and thus requesting an injunction ordering City Gas to supply wholesale natural gas to Consolidated and damages. The district court held in favor of Consolidated and granted the requested relief.

[20]** On closer inspection, however, the case's stripes begin to change. Because of certain factual peculiarities of this case -- peculiarities that the district court deemphasized -- established theories of liability under *section 2* simply do not apply. To begin with, City Gas operates only at the retail distribution level of the natural gas business; the company does not, and never has, operated at the wholesale level of that business. That is, City Gas obtains a supply of gas from the region's only wholesale supplier, Florida Gas Transmission Company (FGT), and then distributes that gas to commercial and residential customers. City Gas has chosen to operate only on that level, and its natural gas rates -- which are set by the Florida Public Service Commission (FPSC) based on a detailed analysis of City Gas' operation, *see* 1989 Fla.Stat. ch. 366, *infra* 5218-5219, -- reflect the specifics of its operation *on the retail level*. For City Gas to enter the wholesale supply business as well as the retail distribution business would fundamentally change the nature of its operation and thus the structure of its rate base. Consolidated, however, wanted City Gas to alter the **[**21]** nature of its operation and enter the wholesale natural gas business. Consolidated, moreover, wanted City Gas to make this change so that Consolidated could itself enter the retail

---

[8] The FPSC has reviewed the validity of the territorial agreement on two subsequent occasions. First, in 1965, the FPSC entered an order withdrawing part of its approval of the territorial agreement. ***Peoples Gas System, Inc. v. Mason, 187 So.2d 335, 337 (Fla. 1966)***. The Florida Supreme Court overturned the FPSC's decision because there was no showing of changed circumstances from 1960, when the FPSC promulgated the *Order.* ***Id. at 339*** (FPSC may withdraw or modify its approval only after proper notice and hearing, and upon a showing of changed circumstances). Second, in 1972 the FPSC rescinded and then reaffirmed its approval of the territorial agreement. FPSC Order Nos. 5495, 5800. Accordingly, the FPSC's active supervision is continuing.

[1] These sections of the Clayton Act authorize private actions under the antitrust laws. *Section 4* authorizes private actions for treble damages and provides in pertinent part: "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor. . . ." *15 U.S.C. § 15(a)*. *Section 16* authorizes private actions for injunctive relief, and provides in pertinent part: "Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws. . . ." *Id. § 26*.

distribution business and compete with City Gas. And Consolidated thought that City Gas should do this, not because competition would necessarily benefit natural gas consumers in general, but because City Gas provided the most economical source of wholesale gas *for Consolidated*. According to Consolidated, under these circumstances, *section 2* of the Sherman Act required City Gas to do what Consolidated wanted.

Unbelievably enough, Consolidated persuaded the district court that City Gas should be required fundamentally to change the nature of its operation and sell wholesale natural gas to Consolidated so that Consolidated could compete against City Gas in the retail distribution business. Consolidated also persuaded the district court that established theories of liability under *section 2* mandated this result. What is even more unbelievable, Consolidated has also persuaded this court, sitting en banc, on these same points. This court, therefore, affirms the district court's decision. [2]

[22]** With all due respect, I strongly dissent. In my view, the district court's decision is unsupported by established ***antitrust law***. Because the district court did not take proper account of the fact that City Gas *was not* in the business of selling natural gas at wholesale, the district court improperly concluded that City Gas possessed monopoly power in the relevant market for purposes of *section 2*. Based on that erroneous conclusion, the district court also improperly applied to these facts the primary theories of liability under *section 2* -- namely, the "essential facilities doctrine" **[*1268]** and the "intent test." The district court's decision, therefore, has no basis in established ***antitrust law***.

Instead, the district court in effect created a new rule of liability under *section 2*. Neither the district court, nor this court today, however, has considered the practical implications of this rule. Having failed to do so, the district court could not have properly applied this new rule in the present case. Even if today's court upholds this new rule, therefore, I would reverse the district court's decision and remand for further proceedings as required by the rule. In my **[**23]** view, though, a thorough consideration of the new rule's practical implications leads unavoidably to the conclusion that this new rule should be struck down. In attempting to apply the rule, the district courts of this circuit will face insurmountable difficulties in fashioning and implementing effective remedies. Even if the courts can overcome these difficulties, which I doubt, the rule will lead to results that will be flatly inconsistent with the policies behind the antitrust laws.

In addition to these fundamental points, I also dissent from the district court's conclusion that the state-action immunity doctrine of *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, did not protect City Gas' conduct from antitrust liability. I dissent as well from the district court's conclusion that a 1960 territorial agreement between City Gas and Peoples Gas, Inc. (Peoples Gas), another retail distributor of natural gas in Florida, provided an alternate basis for liability under *section 2*.

This dissent is organized as follows: in part II, I restate the factual background of the case. In part III, I demonstrate that City Gas' territorial agreement with Peoples **[**24]** Gas provides no basis for liability. I then turn to the more fundamental problems with the district court's decision.

In part IV, I criticize the district court's conclusion that City Gas possessed monopoly power in the relevant market. In part V, I discuss the formulas for determining liability on which the district court relied: the essential facilities doctrine and the intent test. As I demonstrate, none of these formulas provides a basis for liability here. I then discuss some recent Supreme Court and lower court decisions also relied on by the district court. None of these decisions control the present case either.

Next, having established that the district court's decision has no basis in established ***antitrust law***, I assume that the district court established a new rule of ***antitrust law*** and, in part VI, consider the practical implications of that rule. As this part shows, the rule will be impossible to apply, and even if it can be applied, it will produce results that are inconsistent with the policies behind the antitrust laws. For those reasons, I conclude that Congress could not

---

[2] The panel, and this court today, have adopted the district court's findings of facts and conclusions of law. For the sake of convenience, therefore, I refer throughout this dissent to the district court's decision.

have intended such a rule to be developed under *section 2*. Because the court today nevertheless **[**25]** upholds this rule, I also demonstrate that the district court failed to apply it properly in the present case. On that basis, I would vacate the district court's decision and would remand the case for further proceedings as I describe.

In part VII, I then take up the issue of state-action immunity, demonstrating that in this case, the doctrine protects City Gas from antitrust liability. Finally, I conclude the dissent in part VIII.

II. BACKGROUND

This case involves two retail distributors of natural gas in Florida. Consolidated, the plaintiff in this case, entered the gas distribution business in the early 1960s and decided to distribute LP gas. Consolidated received its LP gas by rail or truck from wholesale suppliers and stored it in its own tanks. Consolidated then transported the LP gas from its storage tanks to its customers through a series of underground pipes located in easements. City Gas, the defendant in this case, entered the retail gas business in 1949, also as an LP gas company. In the early 1960s, however, when natural gas became available for resale in Florida, City Gas began to supply natural gas as well. Natural gas differs from LP gas in that it is transportable **[**26]** only by pipeline. In addition, unlike the unregulated interstate trade of LP gas, the Federal **[*1269]** Energy Regulatory Commission (FERC) regulates the transportation of wholesale natural gas through interstate pipelines. FGT owns the interstate pipeline supplying wholesale gas in Florida. In order to acquire a supply of natural gas for resale from FGT, therefore, City Gas had to obtain FERC authorization, which it did. City Gas also had to build a lateral pipe to connect the pipesystem that it used to transport LP gas to FGT's pipeline. [3]

In September 1960, City Gas also **[**27]** entered into a territorial agreement with Peoples Gas, another natural gas retail supplier in Florida. Pursuant to this agreement, the two companies determined which territories each would serve and agreed not to compete with one another in those territories. The companies requested, and received, approval of this agreement by the FPSC, which was charged by statute to supervise and regulate public utilities, *see* Fla.Stat. ch. 366 (1987). [4] In subsequent litigation between the two companies, the Florida Supreme Court upheld the agreement as consistent with state antitrust laws and also held that the FPSC had authority under chapter 366 of the Florida Statutes, *see id.*, to approve such agreements. *See* *City Gas Co. v. Peoples Gas Sys., 182 So.2d 429, 435-36 (Fla. 1965)*.

When **[**28]** City Gas entered the natural gas business, the price of natural gas was higher than that of LP gas, but both were relatively low. That remained the case until 1973, when the Arab Oil Embargo (an event beyond City Gas' control) skyrocketed world oil prices, including the price of LP gas. Until the early 1980s, however, natural gas suppliers were not in much better shape. Although federal regulation of wholesale rates kept the price of natural gas relatively low, a national shortage of natural gas severely limited its availability for resale. By 1981, things began to change: a natural gas surplus developed. As a result, LP distributors such as Consolidated found themselves unable to compete with natural gas prices; they were forced to convert to natural gas, a process that Consolidated began in early March 1982. On the other hand, those companies such as City Gas, which had risked entering the natural gas business at a time when the future of natural gas was relatively uncertain, found themselves in a position to enjoy the benefits of their initiative. A combination of historical accident (the rise in oil prices as the result of events in the Arab world) and business initiative (investing **[**29]** in the natural gas trade) resulted in economic benefits for companies such as City Gas.

In February 1982, one month before Consolidated undertook its conversion, City Gas began to market its natural gas to Consolidated's LP gas customers. These marketing efforts included door-to-door solicitations, mailing

---

[3] The district court made much of the fact that FGT assumed the lateral pipe costs. Given the uncertain state of the natural gas market in the 1960s, however, *see infra* slip op. at 5137, , that fact is of little significance. Because the natural gas market was limited and its future uncertain, City Gas still took a large degree of initiative and assumed substantial risk in devoting its resources to natural gas distribution.

[4] The statute has been amended. *See* 1989 Fla.Laws ch. 89-292 (codified as amended, Fla.Stat. ch. 366 (1989)). See *infra* note 86, for a discussion of the amendment and its relevance to the present case.

campaigns, and newspaper advertisements. As a result of these efforts, City Gas signed several customers that Consolidated had previously served. [5] **[**30]** **[*1270]** In order to serve these customers, City Gas expanded its pipeline into Consolidated's service area. [6]

---

[5] The district court put an unwarranted spin on its characterization of these facts. Adopting a good-guys/bad-guys motif, the district court cast Consolidated as the good guys and City Gas as the bad guys. Everything that City Gas did was bad -- part of large-scale and well-planned effort to drive out all competition from the natural gas industry and thereby grease the wheels of its large, rumbling monopoly. As the good guys, Consolidated naturally suffered, finding itself the weak and unwitting victim of the monstrous monopolist.

In my view, this characterization was unjustified. Viewed objectively, City Gas' conduct was that of a rational business actor. It adopted an aggressive marketing campaign to increase its customer base -- activity that epitomizes competition but that the district court labeled anticompetitive because the conduct was a competitive success. Consider the district court's characterization of City Gas' marketing efforts. The district court noted that, shortly before undertaking this marketing and expansion effort, City Gas' Board of Directors met and considered acquiring Consolidated -- which was then simply a struggling LP gas company -- a consideration that hardly constitutes anticompetitive conduct. The district court then stated:

> City Gas' solicitations and pipeline extensions were not simply ordinary business expansions, but rather, were basic components of City Gas' strategy to force Consolidated to sell out. This conclusion is further supported, we think, by the fact that City Gas had to duplicate a portion of Consolidated's pipeline in order to serve the eighteen Consolidated customers it had recently signed. Yet if City Gas had expected to reach a purchase agreement with Consolidated, it would have acquired Consolidated's pipelines and would not have had to incur this expense. City Gas' action of duplicating these pipelines before notifying Consolidated of its interest in acquiring the company seems to have been designed to force Consolidated to sell at a low price or face the resultant certainty of losing its customers and their value as quickly as City Gas could serve them.

This characterization of these events is, in my view, absurd. As the Supreme Court stated in *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*, what violates section 2 of the Sherman Act is "the willful acquisition or maintenance of [monopoly] power *as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident*." (Emphasis added.) City Gas' successful expansion effort was clearly the latter: the very type of growth or development that defines competition. If the courts were to characterize as anticompetitive conduct every effort that businesses undertook to expand their business through advertising and building facilities, we would soon find ourselves in a competitive crisis. And surely the district court did not mean to argue that because City Gas legitimately intended to compete for Consolidated's business -- which would in turn reduce the value of Consolidated's assets -- City Gas' conduct suddenly became anticompetitive. I can think of no legitimately competitive conduct that, when successful, does not adversely affect a less-successful competitor's assets: when one cola company captures a higher percentage of the market, another cola company's market share slips.

Nor was the district court justified in characterizing Consolidated as a victim because, in attempting to enter the natural gas market as a retail distributor, it had to face City Gas as a competitor. Consider these passages from the district court's opinion:

> In deciding to convert from LP gas to natural gas in 1982, Consolidated suddenly found itself in potential competition with City Gas, which had grown to be a giant in the south Florida area.
>
> > . . . .
> >
> > . . . Consequently, Consolidated was forced to compete with City Gas in order to retain its customers or else see them go to City Gas for *more economical* gas service.
> >
> > . . . .
> >
> > . . . Thus, it became crucial that Consolidated convert to natural gas for as low a cost as possible in order to be able to offer rates that were competitive with those City Gas could offer.

Consolidated undertook to convert to natural gas. On March 9, 1982, Consolidated "wrote a letter to FGT requesting that FGT begin providing it with natural gas, and that FGT construct the necessary pipeline facilities." *Consolidated Gas Co. v. City Gas Co., 665 F. Supp. 1493, 1504 (S.D.Fla. 1987)*. As the district court found, FGT responded on April 2, 1982, stating that Consolidated would need a natural gas allocation from FERC in order to purchase wholesale gas from FGT and that Consolidated would have to reimburse FGT approximately $ 250,000 for the cost of connecting to FGT's pipeline. FGT suggested that Consolidated instead arrange to connect to City Gas' pipesystem. **[**31]** On May 21, 1982, Consolidated applied to FERC for the allocation approving its connection to FGT's pipeline. On June 21, 1982, City Gas **[*1271]** filed a petition to intervene in the application proceedings in order to oppose Consolidated's requested allocation. City Gas questioned whether Consolidated's LP gas distribution system could operate at the pressures required for natural gas delivery and also whether FGT's natural gas supply was adequate to serve Consolidated as well as City Gas. On November 21, 1983, an administrative law judge granted Consolidated's application, and FERC affirmed on September 19, 1984. FERC ruled, however, that FGT had to pay the connection costs. The entire administrative process lasted approximately twenty-eight months.

The district court found that City Gas' intervention in the FERC proceedings delayed the approval process for approximately one year. According to the district court, if City Gas had not intervened, the entire process would have taken only six to nine months, and Consolidated would have received a temporary allocation within ninety days of filing its application. The district court further found that, as a result of City Gas' intervention **[**32]** and the resulting delay in the proceedings, Consolidated's business was "severely hurt": "During the course of the proceedings, City Gas began providing service to seven of Consolidated's eight commercial customers and the bulk of its residential customers." *Id. at 1510*. Presumably, City Gas' provision of service to Consolidated's customers resulted from City Gas' marketing efforts and the fact that (because of historical accident and its own business initiative) it was equipped to expand and supply natural gas to those customers. The district court, however, concluded these activities "were not simply ordinary business expansions, but rather, were basic components of City Gas' strategy to force Consolidated to sell out." *Id. at 1507*. [7] **[**33]** Based on these facts, the district court

---

665 F. Supp. at 1505-06 (emphasis added). City Gas had the foresight and took the initiative to enter the natural gas business at an early stage. By 1982, as the result of "growth [and] development as a consequence of a superior product, business acumen, [and] historic accident," *Grinnell, 384 U.S. at 570-71, 86 S. Ct. at 1704*, City Gas found itself in a highly competitive position. For that, City Gas need not feel guilty. And for having failed to jump that train itself, Consolidated can claim no sympathy.

By holding that under these circumstances Consolidated can invoke the antitrust laws to require City Gas to underwrite Consolidated's entry into the natural gas market, the district court, affirmed by the court today, embarked on an entirely unprecedented course. Before embarking, however, we should be entirely clear that under established law, City Gas *has done nothing wrong*.

[6] This expansion effort triggered a lawsuit by Consolidated, seeking an injunction to prevent City Gas from laying pipe in certain utility easements over which Consolidated claimed an exclusive right. The State Circuit Court granted Consolidated a preliminary injunction but then dissolved it, and the State Court of Appeal affirmed the dissolution, holding that Consolidated had no exclusive right to the easement.

[7] The district court again applied its good-guys/bad-guys characterization to City Gas' intervention into the FERC proceedings. Although the district court held that City Gas' intervention did not itself constitute a violation of *section 2*, the court suggested that the action was evidence of City Gas' bad motives. This was so for two reasons: "first, Consolidated was severely damaged by the delay which occurred as a direct result of City Gas' intervention; and, second, City Gas' reason for opposing Consolidated's application was to protect its own domain." *665 F. Supp. at 1542*. Neither the district court, nor any one else, ever indicated that City Gas had committed an abuse of process by intervening into the FERC proceeding. On the contrary, City Gas, along with some other intervening natural gas suppliers, had legitimate concerns relating to Consolidated's requested allocation. In my view, a rational business actor has a strong interest in "protect[ing] its own domain." *Id.* Thus, City Gas did nothing wrong in intervening in the proceedings. If Consolidated's request for an allocation took longer than Consolidated expected, that may have harmed Consolidated but the fault is certainly not attributable to City Gas, which merely exercised its right to petition in a legitimate way. Perhaps the problem was that Consolidated's expectations, which the district court seems to have adopted, were entirely unreasonable.

found that "Consolidated was left with only [one] alternative if it was to remain in business: the purchase of natural gas directly from City Gas." *Id. at 1510*.[8]

[34]**

[*1272] City Gas and Consolidated had already entered into negotiations regarding the possibility of such purchases. They could not, however, arrive at an acceptable price for the transaction. City Gas initially offered to sell gas for resale at cost plus ten cents per therm [9] and later at cost plus five cents per therm. Consolidated rejected the offers as unreasonable and brought suit under *sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15(a)*, *26*, claiming that City Gas' conduct constituted a refusal to deal in violation of *section 2* of the Sherman Act. The district court agreed with Consolidated and held that City Gas' offered prices were unreasonably high, thus constituting a refusal to deal in violation of *section 2*.

[35]** The district court also found, however, that City Gas had never before sold gas at wholesale. Although it had entered into a contract in 1965 to sell wholesale gas to another retail distributor, Florida Gas, that contract was abandoned by the parties and City Gas never performed under it. Aside from that isolated (and unperformed) contract, City Gas operated entirely at the retail level.

Consolidated claimed that City Gas violated *section 2* of the Sherman Act both by offering to sell gas to Consolidated at unreasonably high prices, which constituted a refusal to deal under *section 2*, and by entering into a territorial agreement with Peoples Gas. In part III, I consider the territorial agreement and show that it provides no basis for liability in the present case. In parts IV through VI, I then turn to the purported refusal to deal, demonstrating that it provides no basis for liability either. Finally in part VII, I show that even if City Gas' conduct justifies the imposition of liability under *section 2*, City Gas is immune under the state-action immunity doctrine of *Parker, 317 U.S. at 341, 63 S. Ct. at 307*.

III. THE TERRITORIAL AGREEMENT

The court today **[**36]** adopts the district court's holding that City Gas' territorial agreement with Peoples Gas constituted a violation of *section 2*. I disagree with that holding and would reverse on that basis.

---

[8] As the district court noted, shortly before undertaking this marketing and expansion effort, City Gas' Board of Directors had met and passed a resolution to acquire "the assets of Consolidated Gas Company and take whatever steps with respect thereto, as they deem appropriate." *665 F. Supp. at 1507*. Based on these facts, the district court concluded

> that City Gas' solicitations and pipeline extensions were not simply ordinary business expansions, but rather, were basic components of City Gas' strategy to force Consolidated to sell out. This conclusion is further supported, we think, by the fact that City Gas had to duplicate a portion of Consolidated's pipeline in order to serve the eighteen Consolidated customers it had recently signed. Yet if City Gas had expected to reach a purchase agreement with Consolidated, it would have acquired Consolidated's pipelines and would not have had to incur this expense. City Gas' action of duplicating these pipelines before notifying Consolidated of its interest in acquiring the company seems to have been designed to force Consolidated to sell at a low price or face the resultant certainty of losing its customers and their value as quickly as City Gas could serve them.

Id. at 1507-08.

Faced with this situation, Consolidated began its effort to convert to natural gas. As the district court stated: "In deciding to convert from LP gas to natural gas in 1982, Consolidated suddenly found itself in potential competition with City Gas, which had grown to be a giant in the south Florida area." *Id. at 1505*.

[9] "Therm," as defined in the FPSC's regulations under chapter 366, "denote[s] a unit of heating value equivalent to one hundred thousand (100,000) British thermal units." 1986 Fla.Admin.Code Ann. 25-7.003(15). A British thermal unit is, of course, "the quantity of heat required to raise the temperature of one pound of water one degree Fahrenheit." *Id. at 25-7*.003(14).

Section 2 of the Sherman Act provides in pertinent part: "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony. . . ." *15 U.S.C. § 2 (1988)*. As the Supreme Court stated in *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*:

> The offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

The district court analyzed the territorial agreement under this standard and held that it constituted a "willful acquisition" of monopoly power under the second prong. **[**37]** As I discuss below, the district court should never have reached this issue in the first place because City Gas did not possess monopoly power in the relevant market. *See infra* slip op at 5150-5160, . Putting the monopoly power issue aside for the moment, however, the district court erred in holding City Gas liable under *section 2* based on the territorial agreement.

Section 2 itself provides no cause of action for a private plaintiff. Private plaintiffs bring such actions under *section 4* of the Clayton Act, *15 U.S.C. § 15*, which provides an action for treble damages for "any person who shall be injured in his business or property by reason of anything forbidden **[*1273]** in the antitrust laws." [10] **[**38]** Before a private plaintiff can challenge a monopolist's conduct under *section 2* of the Sherman Act, therefore, it must satisfy the requirements of *section 4* of the Clayton Act. [11]

Although *section 4* is broadly worded, courts have interpreted the section's "injured . . . by reason of" language as imposing a causation requirement on the private plaintiff. As this court has stated, the plaintiff must show "a causal relationship between the antitrust violation [alleged] and the injury [sustained]." *Cable Holdings, Inc. v. Home Video, Inc., 825 F.2d 1559, 1561 (11th Cir. 1987)* (quoting *National Indep. Theatre Exhibitors, Inc. v. Buena Vista Distribution Co., 748 F.2d 602, 607 (11th Cir. 1984)*, **[**39]** *cert. denied*, *471 U.S. 1056, 105 S. Ct. 2120, 85 L. Ed. 2d 484 (1985))*. To satisfy this "causal relationship" requirement, the plaintiff must show that the violation is "a material cause of," *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 89 S. Ct. 1562, 1571 n. 9, 23 L. Ed. 2d 129 (1969)*, or "materially contributed to," *Cable Holdings, 825 F.2d at 1562*, its injury. Beyond this obvious requirement, the plaintiff must also prove "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)* (emphasis original); *see Associated Gen. Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 539-40, 103 S. Ct. 897, 909, 74 L. Ed. 2d 723 (1983)* (refining *Brunswick* test); *Blue Shield v. McCready, 457 U.S. 465, 476-78, 102 S. Ct. 2540, 2546-48, 73 L. Ed. 2d 149 (1982)* (same); *see also* *Cargill, Inc. v. Monfort, Inc., 479 U.S. 104, 113-15, 107 S.*

---

[10] *Section 16* of the Clayton Act also provides that "any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. As I discuss below, *see infra* slip op. at 5146-5150, , courts have interpreted *section 16* as imposing a causation requirement that is similar to *section 4*'s. For purposes of convenience, I refer only to the requirement under *section 4*, but the discussion also applies to Consolidated's request for injunctive relief under *section 16* to the extent that its request is based on the territorial agreement.

[11] The Government brings civil enforcement actions under *section 4* of the Sherman Act, *15 U.S.C. § 4*, which provides, in pertinent part:

> The several district courts of the United States are invested with jurisdiction to prevent and restrain violations of *sections 1 to 7* of the title; and it shall be the duty of the several United States attorneys, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. . . .

Ct. 484, 491, 93 L. Ed. 2d 427 (1986) **[**40]** (antitrust injury requirement also applies in suits for injunctive relief under *section 16* of Clayton Act). [12]

Although the antitrust injury analysis is somewhat complex, I do not belabor it here. In my view, Consolidated has not satisfied even the basic element of the causation requirement with respect to the territorial agreement: that agreement is simply not a material cause of Consolidated's injury. Without giving any apparent thought to this causation requirement, the district court summarily concluded **[**41]** that the territorial agreement constituted a "willful acquisition . . . of monopoly power" under the second prong of the *Grinnell* standard and, on that basis, imposed liability on City Gas under *section 2*. Whether or not the agreement constituted a "willful acquisition" under the *Grinnell* standard, [13] the agreement also had to satisfy the causal connection requirement of *section 4*. As I demonstrate now, it did not do so.

[*1274] Consolidated's injury, as stated in its amended complaint, was the economic loss that followed from its inability to enter the natural gas market as a retail gas distributor. Consolidated, of course, traced that injury to conduct by City Gas. The district court considered two specific forms of conduct by City Gas: (1) its refusal to supply wholesale gas to Consolidated; and (2) its territorial **[**42]** agreement with Peoples Gas. Putting aside the issue of liability under *section 2*, [14] the refusal to deal would be a material cause of Consolidated's injury: Consolidated could not enter the retail gas market without a supply of gas; City Gas refused to provide such a supply; Consolidated, therefore, could not enter the market and suffered economic loss as a result.

No such causal connection exists, however, between Consolidated's injury and the territorial agreement. That agreement relates to competition between City Gas and Peoples Gas, two retail distributors **[**43]** of natural gas. Pursuant to the agreement, each company took control of a given distribution area and agreed not to compete for control of the other company's distribution area. [15] The direct causal result of the agreement, therefore, was that City Gas could operate in its distribution area without competition from Peoples Gas. Given that no other competitor seriously challenged City Gas' control of that distribution area, the agreement may have ensured City Gas' acquisition of monopoly power in that distribution area. Even without the agreement, however, a single company would eventually have gained control over what became City Gas' territory. After an initial period of competition, a single natural gas distributor almost inevitably acquires a natural monopoly in a given distribution area. Although the territorial agreement might have affected this process in the present case, I doubt that its absence would have changed the present situation. City Gas, as the company already operating in its current area, would probably have acquired the natural monopoly over service in that area, and if City Gas had not, another company would have done so. With or without the territorial agreement, **[**44]** Consolidated would still have been in the same position: trying to enter the retail distribution market in an area under the control of a monopolist.

---

[12] In the *Brunswick* case, for example, the plaintiff had already proved that its loss "occurred 'by reason of' the unlawful [conduct]," or as a material result of that conduct, but the Court held that the plaintiff had not proved that the loss occurred "'by reason of' that which made the [conduct] unlawful." *Brunswick, 429 U.S. at 488, 97 S. Ct. at 697*. In short, not every injury materially caused by conduct proscribed by the antitrust laws will justify a recovery under those laws.

[13] As I discuss below, the district court was also off target in attempting to fit this case into the "willful acquisition" prong of the *Grinnell* standard. *See infra* part V.

[14] Consolidated raised only a *section 2* claim, charging in its amended complaint that City Gas' conduct constituted an attempt to monopolize and monopolization under *section 2* of the Sherman Act. Consolidated has not presented a claim under *section 1* of the Sherman Act, *15 U.S.C. § 1*, attacking City Gas' conduct as part of a conspiracy in restraint of trade. The territorial agreement might have been relevant to such a claim.

[15] Consolidated claimed that this agreement was a horizontal market division. As the Court explained in *United States v. Topco Assocs., 405 U.S. 596, 608, 92 S. Ct. 1126, 1133, 31 L. Ed. 2d 515 (1972)*, a horizontal market division is an agreement between competitors at the same level of the market structure to allocate territories in order to minimize competition. Such concerted action is usually termed a "horizontal" restraint, in contradistinction to combinations of persons at different levels of the market structure, *e.g.*, manufacturers and distributors, which are termed "vertical" restraints.

Even if the territorial agreement was a material cause of City Gas' acquisition of monopoly power, it still would not have been a material cause of Consolidated's injury: City Gas' possession of monopoly power did not cause Consolidated's injury. **[**45]** Rather, that injury was caused by how City Gas chose to *exercise* its monopoly power. Of course, the fact that City Gas had monopoly power was an important condition underlying the whole case. That power led Consolidated to request a supply of wholesale gas from City Gas in the first place and gave City Gas the choice whether or not to sell the gas in the second place. That power, standing alone, however, did not injure Consolidated. City Gas could just as easily have used its monopoly power to help Consolidated as to hurt Consolidated. City Gas' decision about how to exercise its monopoly power, therefore, determined whether or not Consolidated was injured. [16] Thus, the territorial agreement, **[*1275]** even if it was a material cause of City Gas' acquisition of monopoly power, was not a material cause behind City Gas' decision on how to exercise that power or behind that decision's result -- i.e., Consolidated's injury.

[46]** The district court's improper treatment of the territorial agreement in this case resulted, in my view, from a failure to grasp the distinction between a private antitrust suit under *section 4* of the Clayton Act, which challenges conduct as violative of *section 2* of the Sherman Act, and a government enforcement action brought directly under the Sherman Act, *see supra* notes 1, 10-11. The *Grinnell* case, for example, involved a government action. The district court, however, cited *Grinnell* (and only *Grinnell*) for the proposition that "if as a result of horizontal market division a company acquires monopoly power, it . . . violates *§ 2* of the Sherman Act." *665 F. Supp. at 1523* (citing *Grinnell, 384 U.S. at 576, 86 S. Ct. at 1706-07*). Because *Grinnell* involved a government enforcement action, it does not support the application of this rule to the present case, which of course is a private action. The government in *Grinnell* brought suit directly under *section 2* and therefore did not need to prove that an injury was causally related to the defendant's conduct. It merely needed to prove an antitrust violation in and of itself. The **[**47]** "willful acquisition" component of *Grinnell* reflects the specifics of that kind of a case: the government could make a case by proving that the defendant had improperly acquired its monopoly power, whether or not the defendant had actually *used* that power anticompetitively to injure a competitor. Thus, the government must prove, under the second prong of the *Grinnell* standard, only that the company with monopoly power acted anticompetitively in a general way. A showing that the company engaged in "the willful acquisition . . . of monopoly power," *Grinnell, 384 U.S. at 570-71, 86 S. Ct. at 1704*, would satisfy that requirement in a case like *Grinnell*. [17]

[48]** In a private action under *section 2*, however, such a showing would not be sufficient to prove liability, unless the company's "willful acquisition" directly caused the plaintiff's injury. In order to satisfy *section 4*'s causation requirement in the present case, therefore, Consolidated would have to show a causal relationship between the territorial agreement and its injury. [18] Because Consolidated has made no such showing, nor in my view could it

---

[16] In this respect, *section 4*'s causation requirement parallels the elements of liability under *section 2*. As courts have stated, monopoly power alone provides no basis for liability under *section 2*; rather, the improper exercise of that power justifies the imposition of liability. *See, e.g., Byars v. Bluff City News Co., 609 F.2d 843, 853 (6th Cir. 1979)*; *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 273 (2d Cir. 1979)* (citing *Standard Oil Co. v. United States, 221 U.S. 1, 62, 31 S. Ct. 502, 516, 55 L. Ed. 619 (1911))*, *cert. denied*, ***444 U.S. 1093, 100 S. Ct. 1061, 62 L. Ed. 2d 783 (1980)***; *see infra* slip op. at 5160, .

[17] As the passage from *Grinnell* cited by the district court indicates, however, the restrictive agreement in that case was only one of the exclusionary practices supporting the government's case. *See Grinnell, 384 U.S. at 576, 86 S. Ct. at 1706-07*. Whether that agreement, standing alone, would have provided an independent basis for liability even in *Grinnell* remains uncertain.

[18] Even if Consolidated could satisfy the injury requirement with respect to the territorial agreement, I doubt that the agreement would provide a basis for liability *under section 2* of the Sherman Act. As I note above, *see supra* note 15, Consolidated properly characterized the agreement as a "horizontal market division." A horizontal market division can, of course, provide the basis for liability *under section 1* of the Sherman Act. *See, e.g., Topco, 405 U.S. at 596, 92 S. Ct. at 1126*. I have found no support for the proposition that a horizontal market division could also provide a basis for liability *under section 2*. The district court here did not address this point; it merely stated that "a territorial agreement, even between regulated utilities, is a per se violation of the Sherman Act" and concluded that City Gas "has violated *§ 2* of the Sherman Act." *665 F. Supp. at 1532*. In support of this proposition, however, the district court cited three cases in which territorial agreements were held to violate *section 1*, and not *section 2*, of the Sherman Act. These *section 1* cases, in my view, do not control in this *section 2* case. Thus, the district court's

make such a showing, I would reverse the district court's holding that the territorial agreement provided a basis for imposing liability on City Gas under section 2.

[49]**

IV. MONOPOLY POWER

Putting aside the issue of the territorial agreement, the court today also adopts the **[*1276]** district court's holding that City Gas refused to deal in violation of section 2 of the Sherman Act. Again, as the Supreme Court stated in Grinnell, 384 U.S. at 570-71, 86 S. Ct. at 1704:

> The offense of monopoly under § 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

The district court held that City Gas' conduct implicated both of these elements and thus constituted an antitrust violation. I first analyze the district court's discussion of City Gas' monopoly power; then, in Part V, I address the district court's discussion of the "willful acquisition or maintenance" element.

The district court held, and the court today agrees, that City Gas possessed monopoly power in both the wholesale and retail natural gas markets. I agree that City Gas had monopoly power in the retail natural gas market; **[**50]** however, I question whether City Gas had monopoly power in the *wholesale* natural gas market. That City Gas had such power in the wholesale market, moreover, is crucial to the theories on which the district court and this court today have based City Gas' antitrust liability.

In conducting its monopoly power analysis, the district court followed the standard approach, first defining the relevant product and geographic markets and then determining whether City Gas possessed monopoly power within those markets. With respect to the relevant product market, the district court restated the Supreme Court's holding in United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 1012, 100 L. Ed. 1264 (1956), that the "market is composed of products that have reasonable interchangeability for the purposes for which they are produced -- price, use and qualities considered." 665 F. Supp. at 1516 (quoting *DuPont*). The district court concluded that the relevant product market was limited to natural gas and did not include LP gas because of its prohibitive expense. The district court then defined the relevant geographic market as "the area **[**51]** of effective competition in the known line of commerce . . . in which the seller operates, and to which the purchaser can practicably turn for supplies." Id. at 1518 (quoting Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 628, 5 L. Ed. 2d 580 (1961)). Applying this definition, the district court concluded that the relevant geographic market was City Gas' service area and was not limited to Consolidated's service area.

The district court next considered whether City Gas possessed monopoly power within this market. The district court defined monopoly power as "the 'power to control prices or exclude competition,'" id. at 1519 (quoting Grinnell, 384 U.S. at 571, 86 S. Ct. at 1704), and stated that "frequently courts have approached the problem by defining first the relevant product and geographic markets and then computing the defendants' market share from this statistical data," *id.* The district court then found that "in the wholesale market, City Gas sold 100% of the natural gas requested for resale in its service area." *Id.* Based on this finding, the district court held that City Gas possessed **[**52]** monopoly power within the wholesale natural gas market. On appeal, the panel adopted this holding as well. *See* Consolidated Gas Co. v. City Gas Co., 880 F.2d 297, 300-01 (11th Cir. 1989).

City Gas has challenged this holding, contending that it could not possibly have monopoly power because it sold *no* wholesale gas whatsoever. Rather, City Gas claims, FGT sells 100% of the gas for resale in the relevant service area. In response to this argument, the panel reasoned that although City Gas had never sold gas for resale, it had

---

holding that the territorial agreement provided a basis for liability under section 2 -- even if Consolidated could satisfy the Clayton Act's causation requirement -- lacks supporting authority.

power to do so and had in fact entered into a contract (in 1965) to supply gas for resale to a retail natural gas distributor named Florida Gas. That contract, however, was abandoned by the parties, and it is undisputed that City Gas never actually sold gas at wholesale -- either to Florida Gas or to anyone else. **[*1277]** Putting the Florida Gas contract aside for a moment, I first demonstrate in section A that City Gas could not have possessed monopoly power in the relevant market defined by the district court because City Gas never actually operated in that market. I then consider in section B the abandoned contract and conclude **[**53]** that it has no relevance to the issue of whether City Gas possessed monopoly power in the wholesale market in this case.

A. *The Relevant Market*.

I suggest that the monopoly power issue is more complicated than the district court's analysis reflects. Consider first the complexities of the factual situation here. Consolidated wants gas for resale. FGT supplies gas for resale, but in order to acquire gas from FGT, City Gas must spend $ 250,000 to construct a lateral pipeline and must wait approximately two years for a FERC allocation. City Gas distributes gas at retail but also has the "power" to supply gas for resale to Consolidated. City Gas, however, has never actually sold gas for resale, although it considered doing so and even went as far as entering into a contract to do so (which was subsequently abandoned and never performed, *see infra* slip op. at 5158-5160,). Now, assuming for the moment that Consolidated really did not have the option of obtaining gas from FGT -- the cost and delay involved were just too prohibitive -- Consolidated must then acquire gas from City Gas or it will be unable to compete. It would seem, therefore, that City Gas has the power to **[**54]** control prices and exclude competition in the relevant market. At least with respect to Consolidated, City Gas does not compete with any other wholesale supplier: City Gas can independently set the wholesale price and restrict (or deny entirely) Consolidated's ability to acquire a wholesale supply. This is exactly the conclusion that the district court reached. This conclusion assumes, however, that City Gas *is* a wholesale gas supplier. We know that City Gas has the *power* to supply gas at wholesale -- the panel emphasized that point -- but (as the district court itself found) City Gas has chosen not to exercise that power. It has the potential to sell gas at wholesale, but it simply has not yet undertaken to exercise that potential. In my view, this fact must be addressed before the district court can conclude that City Gas has monopoly power in the wholesale market. Neither the district court nor the court today has adequately addressed this point, though; nor, in my view, could they do so. The district court has defined a market that simply does not exist. In support of my conclusion, in subsection 1, I first consider a basic but very important issue: what is a market? I **[**55]** then show in subsection 2 that the district court's construction of the relevant market is inconsistent with the basic notion of a market. I focus specifically on the district court's conclusion regarding the relevant geographic market in this case.

1. The Concept of a Market.

Economists hold that a market exists when buyers and sellers exchange goods or services. *See, e.g.*, The MIT Dictionary of Modern Economics 263 (D. Pearce ed. 1986) (market is "any context in which the sale and purchase of goods and services takes place"); J. Hanson, A Dictionary of Economics and Commerce 255 (6th ed. 1986) ("In a wider sense, however, a market can signify any area in which buyers and sellers are in contact with one another. . . ."); *see also* C. Ferguson & J. Gould, Microeconomic Theory 259 (4th ed. 1975). [19] This idea of exchange can also be defined in terms of supply and demand: an exchange can occur if a buyer wants goods or services that a seller can supply. However defined, exchange is a function of price. A buyer's desire to buy and a seller's desire to sell are qualified by price: the parties desire to proceed *only at a certain price, or within a certain range of prices* **[**56]** . Beyond that price, or outside of that range of prices, the parties do not desire to proceed **[*1278]** with the transaction at issue. The market, then, is the mechanism by which price is established. The market serves as such a mechanism by providing a history of transactions (both complete and incomplete) in the context of which parties negotiate their price. [20]

---

[19] These definitions contain a resonance of what a market historically was: a physical location where merchants sold their goods. The definitions, however, use terms of location that are at once more modern and more abstract, referring to "any context" or "any area."

[20] This description would apply as well to the historical market -- the physical location where merchants hawk their goods. The mere existence of such a physical market did not guarantee a "market" in the sense of a mechanism for negotiating price. The

[57]**

A market, obviously, exists independently of whether or not a given transaction is completed -- i.e., whether the parties agree to a price. A failed transaction merely becomes part of the history that serves as the context for future negotiations. The present case, however, involves something entirely different than a failed transaction in an established market. In the present case, no market existed in which the parties could reach an acceptable price. Neither City Gas nor any other retail distributor in the region has ever sold gas at wholesale to another retail supplier. The parties in this case could refer to no history of transactions (or prices) as a basis for setting a price term for their potential transaction. When the transaction failed in this case, therefore, its failure reflected the absence of an established market that could have enabled the parties to negotiate an exchange. The transaction's failure, moreover, meant that no such market came into existence as a result of the transaction. Thus, the absence of a market for the transaction at issue in the present case explains, at least in part, the inability of City Gas and Consolidated to agree to a transaction price. **[**58]** More importantly, the absence of a market -- both as a context for the transaction or as a result of the transaction -- meant that the district court here could not determine what the transaction price should have been.

Consider a hypothetical situation: in 1970, Senior Partner at a large law firm with a respected antitrust practice strolls into the office of Acme Rocket and Spaceship's President. Acme, of course, built the spacecraft that recently landed on the moon. President greets Senior Partner (they went to college together) and asks him what's on his mind. Senior Partner (who has been billing 3000 hours a year for thirty-five years) tells President that he wants a branch office orbiting the moon and would like Acme to supply a spaceship for that purpose. Senior Partner also indicates that he can find no other company capable of building such a spaceship for him. President says that Acme can do the job, and the two begin to discuss a price. Senior Partner says that his firm will be willing to pay five million dollars. President smiles politely and gently suggests that the required spaceship would cost nearly a billion dollars to design and build. Senior Partner responds that **[**59]** at most his firm could manage to pay ten million. President then says that because Senior Partner is such an old friend, and the publicity from the spaceship would be so good, Acme could build it for half price, or $ 500 million. Senior Partner says he understands and resigns himself to spending the rest of his career in his two-floor corner office in New York. President claps him **[*1279]** on the back, and the two head off to the golf course.

As this negotiation suggests, no "market" for private spaceships existed at the time. True, Senior Partner wanted a spaceship, and Acme could theoretically have built one -- that is, a supply and demand existed for private spaceships. But no history of a price existed for such a transaction, and the negotiation obviously failed to establish one. No price existed because no market existed -- no mechanism by which the parties to this potential transaction could establish a price. Following the district court's reasoning in the present case, however, one would have to conclude that a market for private spaceships did exist in 1970 and, in addition, that Acme possessed monopoly power in that market. These conclusions are obviously ludicrous, **[**60]** but they necessarily follow from the district court's definition of a market: *potential* demand plus *potential* supply.

2. The District Court's Analysis.

---

physical market meant that parties to a potential transaction had a place where they could conduct their negotiations, but it did not necessarily provide the parties with a history of transactions in the context of which they could negotiate a price.

For example, imagine strolling through the agora on a classically beautiful day in ancient Athens. Merchants are selling olives, retsina, and goats. Suddenly, a mysterious looking figure appears in the center of the agora with a creature resembling a goat, but golden in color and with a single, spiral horn rising from the top of its head. The figure announces that this creature is for sale, and a crowd begins to gather. A goatherd, whose interest has been piqued, offers to buy the beast for five drachmas, the going rate for a ram. The mysterious figure laughs and instead offers to sell the unicorn in exchange for the goatherd's entire herd. The goatherd, along with the rest of the crowd, looks at the figure in surprise. Clearly, they have never tried to buy a unicorn before. The figure scans the crowd, but no one attempts another offer. With a sudden wave of his arm, the figure opens a path through the crowd and departs, as quickly as he came.

The historical market, thus, provides a stage for this scene. The history of transactions incorporated in that market, however, are useless as a basis for arriving at a price for a unicorn.

With this discussion of the idea of a market in mind, I now consider the district court's specific conclusions regarding the relevant market in this case. I focus on the district court's analysis of the relevant geographic market. As I discuss above, the district court defined the relevant geographic market as "the area of effective competition in the known line of commerce . . . in which the seller operates, and to which the purchaser can practicably turn for supplies." *665 F. Supp. at 1518* (quoting *Tampa Electric, 365 U.S. at 327, 81 S. Ct. at 628*). This definition consists of two parts: defining the relevant area first in terms of where the seller sells and then in terms of where the purchaser can go to purchase. Both parts emphasize a market's practical realities: with respect to the seller, the inquiry looks to the "area of *effective* competition," and with respect to the purchaser, the inquiry looks to the area where the purchaser "can *practicably* turn for supplies." *Tampa Electric, 365 U.S. at 327, 81 S. Ct. at 628* **[**61]** (emphasis added).

Two questions arise from the district court's application of this inquiry. First, I question whether a firm could in fact be a "seller" under this definition if the firm does not operate, and has never operated, in the "area of effective competition" at issue. I doubt that a firm can properly be labeled a wholesale "seller" of a product if that firm sells that product only on the retail level. Second, I question whether a firm wanting to purchase supplies at wholesale can "practicably turn" to an entity that does not deal in the product at issue. The district court, however, answered both of these questions in the affirmative, and in so doing developed a new rule of antitrust liability. That is, if given the circumstances of a market, a purchaser can "practicably turn" nowhere for its supplies, then a court is justified to compel another entity, even though it is not in the supply business at issue, to enter that business in order to provide the purchaser with its supplies.

At bottom, this is the principle underlying the district court's analysis of the monopoly power issue in the present case. The district court backed into its holding that City Gas possessed **[**62]** monopoly power after concluding that Consolidated had no other practicable source of supply. Not only is that conclusion itself erroneous, as I discuss below, *see infra* slip op. at 5150-5160, , but as a result of that conclusion, the district court constructed the relevant geographic market so as to cut out FGT -- the regional wholesale supplier of natural gas. In my view, a properly constructed wholesale market in this case would necessarily include FGT. The relevant market must include FGT because City Gas is not a "seller" as defined in *Tampa Electric*. Thus, Consolidated could not practicably turn to City Gas for its supply. Without FGT's presence, therefore, no wholesale market would exist. This would be the case, moreover, whether or not Consolidated could practicably turn to FGT for its natural gas supply. As I suggest below, however, the district court erred in concluding that Consolidated could not have done so.

Based on its findings of fact, as I discuss above, the district court concluded that "Consolidated was left with only [one] alternative if it was to remain in business: **[*1280]** the purchase of natural gas directly from City Gas." *665 F. Supp. at 1510*. **[**63]** The district court reached this conclusion based on considerations of cost, time, and competition. In the district court's view, the $ 250,000 cost of interconnecting to FGT's pipeline posed a substantial barrier to Consolidated's entry into the natural gas market. In addition, until November 1984, Consolidated lacked the FERC allocation necessary to allow it to interconnect with the FGT pipeline at all. Thus, from the fall of 1982 (that is, after the approximately three-to-six months that approval of the FERC allocation would have required, according to the district court, had City Gas not intervened in the FERC proceedings) until November 1984, Consolidated could have purchased gas only from City Gas. The district court also emphasized the competition between Consolidated and City Gas. When Consolidated decided to convert from LP to natural gas, it was, as the district court put it, "forced to compete with City Gas in order to retain its customers or else see them go to City Gas for more economical gas service." *Id. at 1505*. In the district court's view, as a result of this competition, "it became crucial that Consolidated convert to natural gas for as low a cost **[**64]** as possible in order to be able to offer rates that were competitive with those City Gas could offer." *Id. at 1506*.

The district court then translated these conclusions into a hypothetical relevant market. More specifically, the district court took its findings concerning the conditions necessary to enable Consolidated to compete with City Gas and used them as a basis for constructing a relevant (but hypothetical) market. The district court's effort in constructing this market, however, was propelled by the assumption that Consolidated was entitled to compete. Driven by this assumption, the district court disregarded as features of the market some of the very conditions stipulated by its findings -- namely, the entry barriers in terms of time, cost, and competition.

Rather than structuring a hypothetical market according to the terms that would be necessary to enable Consolidated to compete on equal footing with firms already operating in that market, the district court should have examined the structure of the market as it actually existed (entry barriers and all). Based on that structure, the district court should then have analyzed whether City Gas actually **[**65]** possessed monopoly power and whether it had in fact used that power to prevent Consolidated from competing. The focus of the antitrust laws is to prevent anticompetitive conduct by monopolists, but not to enable an entity to compete whether or not a monopolist acts anticompetitively. The antitrust laws are designed to create an equal *opportunity* for competition, *see* *Charles A. Ramsay Co. v. Associated Bill Posters of United States & Canada, 260 U.S. 501, 512, 43 S. Ct. 167, 168, 67 L. Ed. 368 (1923)*; they do not create an absolute entitlement to compete successfully. Given this distinction, we must be very careful here in ascribing to City Gas responsibility for the entrance barriers to the *retail* natural gas business. If those entry barriers (in terms of time, cost, and competition) are simply too high to enable Consolidated to compete (independent of whether City Gas possessed monopoly power or has used that power anticompetitively), then the district court cannot mandate that City Gas underwrite Consolidated's entry into the retail natural gas market, especially when that mandate would require City Gas to undertake a new level of operation and limit its **[**66]** own legitimate opportunities for expansion.

As it actually exists, then, the relevant geographic market, or "the area of effective competition in the known line of commerce . . . in which the seller operates, and to which the purchaser can practicably turn for supplies," *665 F. Supp. at 1518* (quoting *Tampa Electric, 365 U.S. at 327, 81 S. Ct. at 628*), necessarily included FGT's pipeline. In a case such as this one, where entities exist that are actually engaged in the "line of commerce" at issue, the district court erred in holding that the "effective competition in the known line of commerce . . . in which the seller operates" consisted of another entity that was not actually engaged in that "line of commerce" even if that entity could hypothetically be engaged in **[*1281]** such commerce and even if that entity would provide the antitrust plaintiff with the most economically feasible supply.

As this discussion demonstrates, therefore, the district court's finding that City Gas possessed a 100% share of this market is clearly erroneous. Because the district court misconceived the nature of the relevant market, its finding regarding City Gas' share **[**67]** of that market is meaningless. Within the actual wholesale market, FGT clearly possessed the inordinate share, and City Gas possessed virtually none, if any at all.

In addition, the district court erred in concluding that Consolidated could not "practicably" have turned to FGT for its supply. The district court, as I discuss in detail above, *see supra* slip op. at 5144-5146, , made three findings on this point: (1) the FERC proceedings, which resulted in an order granting Consolidated's request for an allocation to interconnect to FGT's pipeline, lasted approximately twenty-eight months; (2) construction of the interconnection would cost Consolidated $ 250,000; and (3) Consolidated would have to compete with City Gas. These findings, however, do not support the conclusion that Consolidated could not practicably have turned to FGT for a wholesale gas supply. Taking these same factors into account, the FERC order issued September 19, 1984, which granted the allocation, held that FGT was "the applicant's most feasible source of supply." [21] As the district court itself restated, the FERC order opined that, although competition with City Gas would be difficult, Consolidated's **[**68]** entry into the natural gas distribution market -- with FGT as its supplier -- was economically feasible. When FERC issued its order, the delay in gaining approval of the allocation had already occurred. Similarly, City Gas had already placed itself in a strong competitive position; indeed, City Gas had accomplished that well before Consolidated even began its conversion to natural gas. Thus, from Consolidated's perspective, the only practical difference between turning to FGT as opposed to City Gas for a wholesale gas supply was that the first option would cost Consolidated an additional $ 250,000.

The record on appeal in this case further indicates that, in light of Consolidated's assets and its projected profits and business opportunities, **[**69]** it was economically feasible for Consolidated to cover the $ 250,000 expense of interconnecting to FGT's pipeline. I test this conclusion by considering whether, given the evidence Consolidated

[21] That criterion must be satisfied before the FERC can order an allocation under Section 7(a) of the Natural Gas Act, *15 U.S.C. § 717f(a) (1988)*, which requires that the allocation be "necessary or desirable in the public interest" standard.

presented at trial concerning its expected future profits as a natural gas company with a supply of gas, Consolidated could feasibly have obtained underwriting for a bond issuance in the amount of $ 250,000 in order to fund the cost of hooking up to FGT. At trial, Consolidated called an expert witness, Ben Ball, to the stand to render an opinion regarding the company's present value with a natural gas supply. This value was, in effect, what a willing buyer, fully informed of all relevant facts, would pay a willing seller, also so informed. Ball assumed that Consolidated could indefinitely obtain a "competitively priced source of natural gas," *665 F. Supp. at 1514*, and could continue to operate profitably, with that supply of gas, for twenty years. [22] **[**71]** He then estimated Consolidated's annual profits for that period, including profits that it would have made by servicing former customers that had been captured by City Gas. From those profits, he deducted the expenses that Consolidated **[**70]** would have incurred in transforming its operation to natural gas distribution; this deduction included the approximately $ 20,000 **[*1282]** cost of hooking up to City Gas' pipesystem. Ball assumed that the hypothetical buyer would expect a ten-percent return on its investment, and, using this rate, he found the present value of the projected stream of profits over the twenty-year period: the figure was $ 2,275,130. *Id. at 1515*. From these figures, it follows that Consolidated would generate annual profits of approximately $ 267,000 (i.e., a willing buyer would pay $ 2,275,130, at a ten-percent interest rate, for a twenty-year annuity paying $ 267,000 a year). [23]

Now, assume that Consolidated issues a $ 250,000 bond, to mature in twenty years, and pays interest at a high rate, say fifteen percent annually. Given that rate, Consolidated's nominal annual interest payments would be $ 37,500. Because Consolidated could deduct those interest payments from its taxes -- paid at a corporate rate of thirty-four percent, *see* *I.R.C. § 11(b)(1) (1988)* -- its real interest expense would be $ 24,750 annually. After paying this amount (which would represent a mere 9.3% of Consolidated's annual profits of $ 267,000), Consolidated would still generate annual profits in the amount of $ 242,250, and its present value as a company generating $ 242,250 in annual profits over the next twenty years (assuming a ten-percent interest rate) would be roughly $ 2,060,000. In addition, given the amount of its projected future profits, one would expect Consolidated to have little difficulty in paying back $ 250,000 in principal **[**72]** at the end of twenty years.

As these figures suggest, a reasonable underwriter would obviously have found these hypothetical bonds to be a safe investment and would have underwritten them. Consolidated, therefore, could have "practicably turned" to FGT for a supply of wholesale gas. As a result, the district court erred in excluding FGT from the relevant geographic market, and if FGT had been included in the relevant market, the district court obviously could not have held that City Gas possessed monopoly power in that market, even if City Gas did sell at wholesale. The fact remains, however, that City Gas never sold natural gas at wholesale. In essence, then, the issue whether Consolidated could practicably have purchased wholesale gas from FGT is irrelevant to this case. Whatever sources Consolidated may or may not have found, City Gas was not one of them. City Gas simply did not participate in the relevant market.

B. *The Florida Gas Contract*.

In addition, City Gas' contract with Florida Gas has no significance for the issue of monopoly power. To begin with, the contract was abandoned, and City Gas never performed. The panel acknowledged that "City Gas never actually sold **[**73]** any gas under this agreement" but stressed that "it had the *power* to do so." *880 F.2d at 301* (emphasis in original). I agree. The fact that City Gas had the power to sell at wholesale, however, does not mean that it had monopoly power in the wholesale market, that it was actually in the wholesale market, or that a wholesale market even existed. The abandoned contract has no relevance to these issues. On the contrary, the fact that the contract was abandoned, as the district court agreed, indicates that City Gas never actually sold at wholesale, choosing for whatever reason not to exercise its hypothetical power in the wholesale market. In my view, that is the significant

---

[22] Ball based his "competitively priced source of gas" figure on the price City Gas paid for wholesale gas from FGT. As I discuss below, *see infra* notes 60-61 & accompanying text, that figure provided an improper basis for calculating Consolidated's future profits *if Consolidated purchased gas from City Gas*. These figures, on the other hand, would provide a proper basis for calculating Consolidated's future profits *if Consolidated purchased gas from FGT*, which is the focus of my discussion here.

[23] The source of these and other present-value figures in this opinion is L. Gitman, Principles of Managerial Finance app. A, tbl. A-4 (3d ed. 1982).

point: that City Gas *legitimately decided not to exercise* its power -- not selling to Consolidated, to Florida Gas, or to any other firm. Pursuant to this decision, City Gas did not operate as a wholesale natural gas supplier.

In addition, the abandoned contract provided no evidence that the wholesale market, as defined by the district court, was anything more than hypothetical. As I discuss above, *see supra* slip op. at 5151-5154, , a market is a mechanism for establishing price; a **[**74]** wholesale price, therefore, provides evidence that a wholesale market exists for a given product in a given geographical area. Thus, the Florida Gas contract could provide evidence that a wholesale natural gas **[*1283]** market existed only if the contract contained a reliable price term. If the contract did not contain a reliable price term, then it could provide no evidence that the parties to the contract were able to negotiate a price term -- i.e., that a market existed. I suggest that the district court in this case implicitly found that the contract did not contain a reliable price term. That is, the district court did not look to the price term in this contract as a basis for deciding that the price that City Gas quoted to Consolidated was unreasonable, thus constituting a refusal to deal, or as a basis for setting the price at which City Gas had to sell to Consolidated as ordered in the district court's injunction. In fact, the district court never decided what a reasonable price would be in the present case and instead delegated to the FPSC the task of setting a price for the forced sale. *Id. at 1512, 1534, 1545*. The district court, therefore, could not have had much **[**75]** confidence in the price term set in City Gas' contract with Florida Gas. And this is not surprising, given that the contract was abandoned. Because the contract did not contain a reliable price term, therefore, it could not provide evidence that a wholesale market actually existed -- let alone that City Gas operated in that market.

Even if the district court found that the contract did contain a reliable price term, indeed even if City Gas had actually performed under the contract, in my view the contract would still be irrelevant to the issue whether City Gas possessed monopoly power in the relevant market. City Gas' transaction with Florida Gas would not have occurred in the relevant geographic market, accepting for the sake of discussion the district court's definition of that market here.

The district court found that the relevant geographic market consisted of City Gas' service area, Consolidated's service area, and unserved portions of southwest Dade County. 665 F. Supp. at 1518-19. Thus, the district court defined the relevant area in terms of where Consolidated could look for its gas supply and where it could look to distribute that gas. The compatible area **[**76]** in Florida Gas' case would be totally different. Florida Gas operated in a different area of Dade County than the area in which Consolidated operated, and Florida Gas did not look to expand into southwest Dade County as did Consolidated. The only area of overlap between the geographic areas involved in the Florida Gas contract and in the present case would be City Gas' service area. Even that area, however, differs in the two situations. The contract with Florida Gas dates back to 1965; Consolidated did not begin its efforts to enter the natural gas business until 1982. Between 1965 and 1982, City Gas' service area changed significantly. As the district court itself emphasized, the size of that service area is an important factor in defining the relevant geographic market:

> the relevant geographic market should encompass all of the service area City Gas serves. . . . The effects of demand and cost are spread throughout City Gas' service area through the rate regulation process. Thus, City Gas can cross-subsidize prices or costs in any one part of its territory with revenues earned in the rest of its service area.

665 F. Supp. at 1518. For purposes **[**77]** of establishing the relevant geographic market, therefore, City Gas' service area *in 1982* had no relation to its service area *in 1965* at the time of the Florida Gas contract.

Even applying the factors used by the district court to define the relevant geographic market in the present case, it is apparent that the relevant geographic market for the Florida Gas contract was entirely different. Even if the parties had not abandoned that contract, it would have been performed in a different relevant market than the one involved here and therefore would have had no bearing on the question whether City Gas operated in the relevant market, let alone possessed monopoly power in that market.

For these reasons, in my view, the district court erred in holding that City Gas possessed monopoly power in the wholesale natural gas market.

V. LIABILITY UNDER SECTION 2

A. *Legal background*.

Section 2 of the Sherman Act provides in pertinent part: "Every person who shall **[*1284]** monopolize, or attempt to monopolize, . . . any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony. . . ." 15 U.S.C. § 2 (1988). As **[**78]** the Supreme Court has stated:

> The offense of monopoly under § 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966). In order to violate section 2, therefore, the monopolist must possess monopoly power and must also use that power anticompetitively. Section 2 does not prohibit the possession of monopoly power in and of itself -- of "monopoly in the concrete." Standard Oil Co. v. United States, 221 U.S. 1, 62, 31 S. Ct. 502, 516, 55 L. Ed. 619 (1911); *see* Byars v. Bluff City News Co., 609 F.2d 843, 853 (6th Cir. 1979); Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 273 (2d Cir. 1979) (citing *Standard Oil*), *cert. denied*, *444 U.S. 1093, 100 S. Ct. 1061, 62 L. Ed. 2d 783 (1980)*.

In *United States v. Griffith*, the Supreme Court addressed the **[**79]** requirement of anticompetitive conduct and characterized it as "the use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor." 334 U.S. 100, 107, 68 S. Ct. 941, 945, 92 L. Ed. 1236 (1948). In determining what conduct falls into this category, the idea of intent has always been central. As the Court stated in United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992 (1919): "in the absence of any *purpose* to create or maintain a monopoly, the [Sherman] act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." (Emphasis added.) The Court also emphasized the importance of intent in *Griffith*, when it indicated that mere possession of monopoly power could "itself [be] a violation of § 2, provided it is coupled with *the purpose or intent* to exercise that power" to foreclose competition. 334 U.S. at 107, 68 S. Ct. at 945 (emphasis added).

As the Court has recognized, however, "no **[**80]** monopolist monopolizes unconscious of what he is doing." Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602 n. 28, 105 S. Ct. 2847, 2857 n. 28, 86 L. Ed. 2d 467 (1985) (quoting United States v. Aluminum Co. of Am., 148 F.2d 416, 432 (2d Cir. 1945) (L. Hand, J.)). The effects of a defendant's conduct on competitors and, more importantly, on consumers and on competition in general are also important factors in evaluating whether the conduct at issue is anticompetitive. *See* id. at 605, 105 S. Ct. at 2858-59. This point merely suggests that, as an evidentiary matter, "the requisite intent [under section 2] can be inferred if a defendant maintains his power by conscious and willful business policies, however legal, that inevitably result in the exclusion or limitation of actual or potential competition." Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 990 (D.C.Cir. 1977) (citing Aluminum Co., 148 F.2d at 428-31), *cert. denied*, *436 U.S. 956, 98 S. Ct. 3069, 57 L. Ed. 2d 1121 (1978)*.

A primary type of anticompetitive conduct in section 2 cases -- and the type **[**81]** of conduct at issue here -- is a defendant's refusal to deal with a competitor or potential competitor. Such refusals to deal fall into one of two general categories. One category involves monopoly leveraging. Monopoly leveraging occurs when a vertically integrated monopolist -- i.e., a monopolist that operates on several levels of the market -- uses its monopoly power on one level of the market to gain a competitive advantage on another level of the market. [24] For example, in *United States v. Terminal R.R. Ass'n, 224 U.S. 383, 224 U.S. 383, 32 S. Ct. 507, 56 L. Ed. 810 (1912)*, a group of railroads servicing **[*1285]** the St. Louis area also owned the only railroad terminal that provided access to the city. The terminal owners used their monopoly power over the terminal to overcharge other railroads for access to the terminal and thereby to gain a competitive advantage in the downstream market for railroad service in St. Louis. The majority of refusal-to-deal cases under *section 2* fall into this monopoly-leveraging category. *See, e.g., Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; *Associated Press v. United States, 326 U.S. 1, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)*; **[**82]** *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*; *Terminal R.R., 224 U.S. at 383, 32 S. Ct. at 507*; *Fishman v. Estate of Wirtz, 807 F.2d 520 (7th Cir. 1986)*; *Olympia Equip. Leasing Co. v. Western Union Tele. Co., 797 F.2d 370 (7th Cir. 1986)*, *cert. denied*, *480 U.S. 934, 107 S. Ct. 1574, 94 L. Ed. 2d 765 (1987)*; *Catlin v. Washington Energy Co., 791 F.2d 1343 (9th Cir. 1986)*; *Paschall v. Kansas City Star Co., 727 F.2d 692* (8th Cir.), *cert. denied*, *469 U.S. 872, 105 S. Ct. 222, 83 L. Ed. 2d 152 (1984)*; *MCI Communications Corp. v. AT & T, 708 F.2d 1081* (7th Cir.), *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*; *Byars, 609 F.2d at 843*; *Berkey Photo, 603 F.2d at 263*; *Hecht, 570 F.2d at 982*; *Poster Exch., Inc. v. National Screen Serv. Corp., 431 F.2d 334 (5th Cir. 1970)*, *cert. denied*, *401 U.S. 912, 91 S. Ct. 880, 27 L. Ed. 2d 811 (1971)*.

[83]** The second category of refusal-to-deal cases under *section 2* does not involve monopoly leveraging, but rather involves a monopolist's use of its monopoly power on one level of the market to maintain or expand its power on that same level of the market. For example, in *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*, a single newspaper in a small town had a monopoly over the newspaper advertising business in that town. When a local radio station began to sell radio advertising, the newspaper refused to sell advertising space to anyone also advertising on the radio. The newspaper thus anticompetitively used its monopoly power on one level of the market to maintain its power on that same level by preventing the radio from competing for advertisements. Although the majority of *section 2* cases fall into the first category, some important cases are of this second type. *See, e.g., Aspen, 472 U.S. at 585, 105 S. Ct. at 2847*; *Lorain Journal, 342 U.S. at 143, 72 S. Ct. at 181*; *Official Airline Guides, Inc. v. FTC, 630 F.2d 920 (2d Cir. 1980)*, *cert. denied*, *450 U.S. 917, 101 S. Ct. 1362, 67 L. Ed. 2d 343 (1981)*. **[**84]**

The key to both categories of refusal-to-deal cases -- whether they involve monopoly leveraging or exercises of monopoly power on a single level of the market -- is that the circumstances surrounding the refusal to deal must give rise to an inference of anticompetitive intent. Intent is rarely established by direct evidence; almost invariably, it is established by circumstantial evidence: the nature of the defendant's conduct and its effect on competition in the market demonstrate that the defendant intended to foreclose competition in the relevant market. In order to decide whether a refusal to deal of either type constitutes anticompetitive conduct under *section 2*, courts have developed two formulas for analyzing the circumstantial evidence in a given case: (1) the "essential facilities doctrine" and (2) the "intent test." These formulas aid the court in weighing and evaluating the circumstantial evidence in a given case to determine whether that evidence yields an inference of an intent to foreclose competition.

The first formula, the essential facilities doctrine, holds that an antitrust defendant may have acted anticompetitively if the circumstances of a case satisfy a four-part **[**85]** test: (1) the defendant is a monopolist in control of a facility or resource that is essential to a competitor's operation; (2) the facility or resource cannot practically or reasonably be duplicated by competitors; (3) the monopolist refuses to deal with competitors; and (4) the monopolist could feasibly deal with competitors. *See MCI, 708 F.2d at 1081*; *Hecht, 570 F.2d at 982*. If the four elements of this standard are satisfied, **[*1286]** an inference of the defendant's anticompetitive intent may arise and thus justify the imposition of liability under *section 2*.

The second formula, the intent test, directly addresses the issue of intent by evaluating the monopolist's conduct and determining whether, under the circumstances of the case, the conduct at issue demonstrates an illegal intent to destroy competition. If the conduct gives rise to an inference of anticompetitive intent, then the monopolist is

[24] Monopoly leveraging also refers to a monopolist's conduct in attempting to integrate vertically, by using its established monopoly power (on a given level of the market) to leverage its way into another level of the market.

subject to liability under *section 2*. *See* *Lorain Journal, 342 U.S. at 152-53, 72 S. Ct. at 186*; *Eastman Kodak, 273 U.S. at 375, 47 S. Ct. at 404*; *MCI, 708 F.2d at 1148-49*; *Poster Exchange, 431 F.2d at 339-40*. **[**86]**

In defining the character and limits of these tests, it is essential to understand their function as mechanisms for evaluating circumstantial evidence to determine whether the defendant acted -- i.e., refused to deal -- with an anticompetitive intent. The tests have validity only to the extent that they enable such a determination. Even if a court, for example, could mechanically apply the elements of the essential facilities doctrine to a given case, if that application would not support an inference of anticompetitive intent, then the test would not justify the imposition of liability under *section 2*. Indeed, as an analysis of the essential facilities cases demonstrates, liability in those cases is supported by more than the mechanical application of the doctrine's four-part test. The cases all possess certain features (beyond the test's four elements) that support an inference of anticompetitive intent.

One primary feature of the essential facilities cases is that they all involve monopoly leveraging. *See, e.g.,* *Otter Tail, 410 U.S. at 366, 93 S. Ct. at 1022*; *Associated Press, 326 U.S. at 1, 65 S. Ct. at 1416*; *Terminal R.R., 224 U.S. at 383, 32 S. Ct. at 507*; **[**87]** *Fishman, 807 F.2d at 520*; *MCI, 708 F.2d at 1081*; *Byars, 609 F.2d at 843*; *Berkey, 603 F.2d at 263*; *Hecht, 570 F.2d at 982*. [25] In fact, the courts in these cases, after stating the four elements of the doctrine, generally explain that the doctrine's underlying rationale is a concern about monopoly leveraging. The *MCI* court, for example, after describing the four-part test, stated that "such a refusal may be unlawful because a monopolist's control of an essential facility (sometimes called a 'bottleneck') can extend monopoly power from one stage of production to another, and from one market into another." *708 F.2d at 1132*.

[88]** Another distinguishing feature of the essential facilities cases is that, before the defendant refused to deal with the firm at issue, the defendant was already engaged in the business of providing the service at issue or access to the facility at issue, either to the refused firm itself or to other, similarly situated firms. Thus, in refusing to deal with a given firm, the defendant discriminates between customers. That discrimination, moreover, has an anticompetitive motivation. For example, in *Terminal R.R.*, the terminal owners were in the business of providing railroads with access to the terminal. The terminal owners allowed railroads that did not compete in St. Louis to use the facility at a non-extortionate charge. The terminal owners, however, allowed railroads that *did* compete in St. Louis to use that facility only at extortionate rates.

Because essential facilities cases generally involve these two features -- monopoly leveraging and discrimination -- the four elements of the doctrine merely provide a shorthand formula for inferring the presence of anticompetitive intent when the circumstances of a case follow a certain pattern. When the case does not follow that **[**89]** pattern and does not involve those same features, however, the essential facilities **[*1287]** doctrine is not a reliable means of analysis. [26]

The monopoly-leveraging feature of these cases, moreover, is itself such a powerful indication of anticompetitive intent that courts have frequently held it to be a sufficient basis, independent of the essential facilities doctrine, for imposing liability under *section 2*. *See, e.g.,* *Otter Tail, 410 U.S. at 366, 93 S. Ct. at 1022*; *Eastman Kodak, 273 U.S. at 359, 47 S. Ct. at 400*; **[**90]** *Olympia, 797 F.2d at 370*; *Catlin, 791 F.2d at 1343*; *Paschall, 727 F.2d at 692*; *Berkey, 603 F.2d at 263*; *Poster Exchange, 431 F.2d at 334*. These courts thus refer to the "monopoly-leveraging theory" as a third formula for evaluating anticompetitive intent. [27] Of course, the rationale for imposing liability in

---

[25] *But see* *Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509 (10th Cir. 1984)*, *aff'd*, *472 U.S. at 585, 105 S. Ct. at 2847*. The Tenth Circuit there applied the essential facilities doctrine to a refusal to deal that did not involve monopoly leveraging. See *infra* slip op. at 5184-5187, , for a discussion of the case. In affirming the Tenth Circuit, however, the Supreme Court did not analyze the case under the essential facilities doctrine. In my view, this case is not properly classified as an essential facilities case.

[26] As Areeda and Hovenkamp note, the essential facilities doctrine can be mechanically applied to a broad range of situations: "the 'essential facility' is just an epithet describing the monopolist's situation: he possesses something the plaintiff wants. It is not an independent tool of analysis but only a label -- a label that beguiles some commentators and courts into pronouncing a duty to deal without analyzing the implications. . . ." P. Areeda & H. Hovenkamp, ***Antitrust Law***, para. 736.1a, at 701 (Supp. 1989).

these cases is the same as the principal rationale for imposing liability under the essential facilities doctrine: a monopolist's extension of power from one stage of the market into another provides a strong indication of anticompetitive intent and thus justifies the imposition of liability under section 2. The cases applying this "monopoly-leveraging theory" could also be characterized as "intent test" cases: they merely hold that the conduct of monopoly leveraging is sufficient evidence of an illegal intent to justify the imposition of liability under section 2. Indeed, some of these cases -- such as *Eastman Kodak* and *Poster Exchange* -- are generally cited in connection with the intent test.

[91]** The so-called "intent test" also provides an appropriate analytical tool in refusal-to-deal cases that do not involve monopoly leveraging and to which the essential facilities doctrine does not apply. In these cases, a monopolist with monopoly power in one level of a market refuses to deal with a competitor or potential competitor in order to gain a competitive advantage in that same market rather than in another level of the market. Under the intent test, a court can infer an anticompetitive intent from such conduct if, for example, the conduct represents a significant departure from the monopolist's normal pattern of business. That was the case in *Lorain Journal, 342 U.S. at 148-50, 72 S. Ct. at 183-84*, where a newspaper in the business of selling advertising refused to sell advertising space to certain customers; it was also the case in *Aspen, 472 U.S. at 589-93, 105 S. Ct. at 2850-52*, where an owner of a several ski areas in Aspen decided no longer to participate in an all-Aspen ski ticket after years of participating in the ticket. Because the intent test, like the essential facilities doctrine, is nothing more than a means of evaluating circumstantial **[**92]** evidence, however, it justifies the imposition of liability under section 2 only when, under the circumstances of the case, an anticompetitive intent is clearly inferable.

In the following sections, I analyze the present case under this general legal framework. In my view, City Gas' conduct did not constitute an antitrust violation under section 2. As I discuss in section B, this case is not a monopoly-leveraging case: City Gas is simply not a vertically integrated company; it operates only on one level of the natural gas market and has never attempted to extend its operation into another level of that market. For this reason, in section C, I distinguish the present case from the line of cases in which courts have imposed section 2 liability under the monopoly-leveraging theory.

In section D, I then discuss the essential facilities doctrine, which does not apply to **[*1288]** the present case either. In subsection 1, I assume for the sake of discussion that the essential facilities doctrine could apply to the present category of case, but show that the doctrine's four-part test would still not be satisfied under the circumstances here. In subsection 2, I show that the doctrine **[**93]** does not properly apply to the present type of case. To that end, I analyze the early Supreme Court cases on which the doctrine is based and then discuss the characteristics and limits of the doctrine as developed in those cases. On that basis, I conclude that this case is not an essential facilities case.

In section E, I analyze the case under the intent test. I first examine the Supreme Court's decision in *Lorain Journal* and discuss the characteristics and limits of the so-called intent test as it derives from that case. I then demonstrate that this theory is inapplicable to the present case.

In section F, I address two more recent Supreme Court cases -- *Aspen* and *Otter Tail* -- on which the district court heavily relied in the present case. Although neither of these cases expressly applies either the essential facilities doctrine or the intent test, they are still understandable in the context of the preceding sections' discussion. As I show, moreover, neither case justifies the imposition of liability here.

Finally in section G, I consider the Seventh Circuit's decision in *MCI*, which the district court also used as a basis for liability here. Although one **[**94]** holding in *MCI* (on which the district court, and the panel, relied) does not apply,

---

[27] To summarize briefly the terminology, refusal to deal cases under section 2 involve two types of conduct, either monopoly leveraging or non-monopoly leveraging. Courts have developed a variety of formulas for analyzing the circumstantial evidence in these refusal-to-deal cases in order to determine whether the evidence gives rise to an inference of anticompetitive intent. These formulas include the essential facilities doctrine, the intent test, and the monopoly-leveraging theory.

another holding of the *MCI* case does apply, and under that holding, City Gas' conduct does not constitute a violation of *section 2*.

B. *Vertical Integration*.

Before addressing the issue of liability under *section 2*, I pause to discuss the concept of vertical integration, which underlies the idea of monopoly leveraging. On the subject of vertical integration, Areeda and Turner have this to say:

> Vertical integration, simply put, is the inclusion within a single firm of two or more stages in the production and distribution of an end-product. A firm integrates "upstream" or "backward" when it undertakes to produce raw materials or semi-fabricated components which have been or could be supplied by independent producers. A firm integrates "downstream" or "forward" when it undertakes further processing or distribution of products which have been or could be sold to independent producers or distributors.

3 P. Areeda & D. Turner, ***Antitrust Law*** para. 723 (1978). According to this definition, I cannot conceive of City Gas as a vertically integrated company. The natural gas business **[**95]** involves a relatively simple technology. At the far end of the production stream, natural gas reserves are located, and the gas is pumped from the ground. The natural gas is then transported through interstate pipelines from the reserves to new areas for distribution. Once the natural gas reaches these distribution areas, it is transferred to local pipesystems, which move the gas from the pipelines to the customers and thereby supply the gas on a retail level. Thus, three levels of operation exist in the natural gas business: (1) drilling gas, (2) transporting the gas for resale, and (3) supplying the gas to customers at retail. In the present case, City Gas is involved solely in the third level of operation -- supplying gas at retail. City Gas is therefore not a vertically integrated company. [28]

Even if City Gas on occasion had actually sold natural gas at wholesale **[**96]** to other retail distributors, I question whether that would have constituted vertical integration into another level of operation. Given FGT's predominance in the wholesale market, City Gas' participation in that market would have lacked antitrust significance: City Gas would still have lacked the market power to act anticompetitively under *section 2*. *See supra* slip op. at 5150-5160, . In addition, **[*1289]** the sale of some surplus gas by one natural gas retail supplier to another retail supplier would hardly constitute an integration by the first supplier into an upstream market. In my view, one could not seriously contend that City Gas' potential sales of its surplus gas to another retail supplier would constitute integration into the second level of the market -- the interstate transportation level on which FGT operates. Clearly, City Gas would in no way displace FGT's operation; on the contrary, all of the gas involved in City Gas' trade would still come from FGT. If City Gas' potential sales of gas for resale constituted vertical integration, the integration would have to occur on a sublevel of the retail distribution level of the market.

Although integration into **[**97]** such a sublevel could theoretically occur, practically it could not. Any potential sublevels of the supply operation would be so interrelated with each other that it would not be reasonable to consider them as severable. *See, e.g., Berkey Photo, 603 F.2d at 276-79* (describing features of "integrated firm"). Although a retail distributor generally has its own pipesystem, which picks up a supply of natural gas from a wholesale source and then distributes it to retail customers, the distribution at the back end of this process is not severable from the supply process at the front end of the operation. In order to distribute gas to customers, a retail distributor must have a pipesystem, and the pipesystem must have gas in it. Thus, the pipesystem must connect with a source of natural gas. Variations in the nature of the source, the size of the pipesystem, or even the character of the customers do not, I suggest, alter the degree of vertical integration of a retail (whether wholly retail or merely predominately retail) supplier of natural gas. In terms of the level of vertical integration, City Gas' operation is identical to what Consolidated's operation would (hypothetically) **[**98]** be. Both companies would possess pipesystems that distribute natural gas from a supply source to their customers. In my view, neither the fact that Consolidated's source might have been City Gas rather than FGT nor the fact that one of City Gas' customers might have been Consolidated is of any significance on the issue of vertical integration.

---

[28] I have discussed in detail above the irrelevance of City Gas' abandoned contract with Florida Gas. *See supra* slip op. at 5158-5160, .

Because these two companies would be engaged in identical operations, integrated to the same degree and operating at the same levels of the market, this case is fundamentally different from the monopoly-leveraging cases to which the district court analogized the present case. City Gas is simply not using its power as a monopolist on one level of a market to expand its operation into, maintain its monopoly in, or force out competition from another level of the market. City Gas is doing nothing more than competing -- legitimately and successfully -- with Consolidated for more business in the retail natural gas market. City Gas was successful for a variety of reasons: it is bigger, it has been in business longer, it has better resources (i.e., a hook up to FGT's pipeline), it implemented an aggressive marketing strategy, and its prices were lower. **[**99]** In short, City Gas could provide customers with better service than Consolidated. We might say, with the benefit of hindsight, that as a result of a series of historical accidents, Consolidated missed the boat years back when it failed to get into the natural gas supply business. None of this, however, means that the antitrust laws impose a duty on City Gas to deal with Consolidated. I discuss why in the following sections.

C. *The Monopoly-Leveraging Theory*.

I first consider the line of cases stemming from *Eastman Kodak, 273 U.S. at 359, 47 S. Ct. at 400*, which holds that monopoly leveraging -- a monopolist's attempt to use its monopoly power on one level of the market to gain a competitive advantage on another level of the market -- is evidence of anticompetitive intent and constitutes a violation of *section 2*. The present case, however, as I discuss in the above section, does not involve monopoly leveraging: City Gas' conduct implicated only the retail level of the natural gas market. This line of cases therefore provides no basis here for imposing liability under *section 2*.

[*1290] In *Eastman Kodak*, the plaintiff operated a stock house for photographic **[**100]** supplies in Atlanta, Georgia. Kodak supplied the plaintiff, and other stock houses in the area, with wholesale photographic supplies. Kodak, however, itself began to purchase stock houses, expanding its operation from the wholesale level into the retail level as well. By 1910, Kodak had acquired control of all stock houses in Atlanta but the plaintiff's, and, at that point, Kodak refused to sell the plaintiff supplies at wholesale prices. In evaluating the situation, the Court stated:

> Although there was no direct evidence -- as there could not well be -- that the defendant's refusal to sell to the plaintiff was in pursuance of a purpose to monopolize, we think that the circumstances disclosed in the evidence sufficiently tended to indicate such purpose, as a matter of just and reasonable inference, to warrant the submission of this question to the jury.

273 U.S. at 375, 47 S. Ct. at 404.

Similarly, in *Poster Exchange, 431 F.2d at 334*, [29] a frequently cited case decided by our predecessor court, a vertically integrated producer/distributor of motion-picture advertising accessories refused to supply a local distributor. The district **[**101]** court held that the defendant "intentionally used the monopoly power it had at the manufacturing level to eliminate [the plaintiff] as a competitor at the distributor-jobber level." *Id. at 339*. Applying *Eastman Kodak*, the district court held that this use of monopoly "power at one level to drive out competition at another" constituted a violation of *section 2*. *Id.*

The present case simply does not fit this factual pattern. City Gas possesses monopoly power as a natural gas supplier at the retail level. It does not possess monopoly power on the wholesale level; nor does it operate on that level. City Gas, moreover, has never used its monopoly power on the retail level in order to leverage its way into another level of the market. Rather, if City Gas has used its **[**102]** monopoly power at all in this case, then it has used that power only with respect to the retail distribution market for natural gas. Given these circumstances, *Eastman Kodak* and its progeny do not control here: those monopoly-leveraging cases justify no inference under

[29] In *Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir. 1981)* (en banc), this court adopted as binding precedent all decisions of the former Fifth Circuit handed down prior to October 1, 1981.

the present circumstances of a "purpose to monopolize," *Eastman Kodak, 273 U.S. at 375, 47 S. Ct. at 404*. [30] Nor do the so-called "essential facilities" cases, which I discuss in the next section, justify such an inference here.

[103]** D. *Essential Facilities Doctrine*.

As the district court stated, "the essential facilities doctrine teaches that, when a business controls a scarce facility, it assumes an obligation to provide its competitors reasonable access to that facility." *665 F. Supp. at 1532* (citing *Byars, 609 F.2d at 856*). The rationale behind this doctrine, as the district court noted, is that "[a] refusal to deal in this context may be unlawful because it could result in the monopolist extending its power vertically from one level of production to another." *Id. at 1532-33*. With this qualification in mind, the district court then articulated the four-part standard for applying the doctrine:

> The case law sets forth four elements necessary to establish liability under the essential facilities doctrine: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; **[*1291]** (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

Id. at 1533 (quoting *MCI, 708 F.2d at 1132-33*).

This test **[**104]** must be understood for what it is: merely a mechanism for evaluating the circumstantial evidence in a given case to determine whether that evidence yields an inference of the defendant's anticompetitive intent. Before considering in subsection 2 the limits of this doctrine as a means of evaluating circumstantial evidence, I first examine in subsection 1 the district court's application of the test to the present case. In my view, that application is erroneous in and of itself.

1. The District Court's Analysis.

Applying this test to the present case, the district court concluded that all four elements were satisfied and thus held that City Gas was liable under *section 2* for refusing to deal with Consolidated. *See* *id. at 1534-35*. The district court first held that "City Gas, a monopolist, controlled an essential facility -- a pipeline that transported wholesale gas." *Id. at 1534*. Under the second element of the test, the district court held that duplication by Consolidated of City Gas' facility -- the lateral pipe connecting City Gas' pipesystem to FGT's pipeline -- would be "unreasonable 'due to regulatory restriction, and delays, and the expense and time required.'" **[**105]** *Id.* (quoting *Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1521 (10th Cir. 1984)*, *aff'd*, *472 U.S. at 585, 105 S. Ct. at 2847*). Applying the third part of the test, the district court noted that City Gas had offered to sell gas to Consolidated for ten cents per therm over cost (City Gas' cost of purchasing gas at wholesale from FGT), which the district court held "essentially amounted to a refusal to deal at all." *Id.* Finally, under the fourth part of the test, the district court held that City Gas could feasibly have sold wholesale gas to Consolidated.

In my view, the district court misapplied the doctrine. First, as I discuss above, *see supra* slip op. at 5150-5160, , City Gas is not a monopolist in the wholesale market. Second, the facility under City Gas' control is not properly labeled "essential" under the doctrine. Third, Consolidated could practically and reasonably have duplicated City Gas' lateral connection to FGT's pipeline. Fourth, the district court improperly held that City Gas' offered price constituted a refusal to deal. I address these points in turn.

---

[30] As I discuss below, *see infra* part VI, the present case also involves difficulties in fashioning a remedy that do not arise in these monopoly-leveraging cases. In these cases, the defendants were already engaged in providing the service at issue: Kodak sold photographic supplies at wholesale; National Screen sold movie advertising accessories at wholesale. Here, City Gas never sold gas at wholesale to anyone. In fashioning a remedy, therefore, the district court could look to no price established by City Gas for the transaction at issue. The district court instead had to set its own price (a task it delegated to the FPSC). That task presents a set of complications that I explore below. Regarding these problems, however, the monopoly-leveraging cases provide no guidance.

The district court based its application **[**106]** of the essential facilities doctrine on the following factual findings. Before Consolidated received its FERC allocation in 1984, Consolidated could have purchased gas for resale only from City Gas. After 1984, although Consolidated would have been authorized to purchase from FGT, it "would have encountered a prohibitive transportation problem." *665 F. Supp. at 1534*. That is, construction of "[a] lateral pipeline connecting Consolidated's facilities to the FGT main would have cost $ 250,000.00." *Id.* The district court concluded that "there is grave doubt as to whether Consolidated could have effectively competed with City Gas based on these additional expenses." *Id.*

The test's first element requires "control of the essential facility by a monopolist." *MCI, 708 F.2d at 1132-33*. Based on its earlier holding that City Gas possessed monopoly power in the wholesale market, the district court assumed that City Gas was a monopolist with control over the "essential" facility -- presumably, "a pipeline that transported wholesale gas." *665 F. Supp. at 1534*. As I discuss above, *see supra* slip op. at 5150-5160, , City Gas did **[**107]** not possess monopoly power in the wholesale market; indeed, City Gas did not even operate in that market. The district court thus improperly concluded that City Gas was a monopolist for purposes of the first element of the essential facilities doctrine.

In addition, the district court improperly characterized the facility at issue here as "essential" under the first part of the test. The district court initially identified the "essential facility" as "a pipeline that transported wholesale gas." In so doing, the district court mischaracterized a very **[*1292]** important feature of this facility: that is, City Gas' pipesystem transports only *retail* -- and not *wholesale* -- natural gas. [31] As such, this facility could not be essential to Consolidated's operation. Consolidated needed a facility that supplied wholesale gas. Because this facility supplied only retail gas, it did not do what Consolidated needed it to do. For this reason, the facility cannot properly be labeled "essential" under the doctrine's first element.

[108]** I also attack for one other reason the district court's conclusion that this facility is essential. As I note above, *see supra* slip op. at 5168, , the essential facilities doctrine is designed to deal with the danger that a monopolist in control of a scarce resource will "extend[] its power vertically from one level of production to another." *665 F. Supp. at 1532-33*. This concern, in my view, also defines the term "essential." That is, a facility becomes essential if, in restricting competitors' access to that facility, a monopolist gains a competitive advantage in another level of the market -- that is, a market downstream or upstream from the market containing the facility itself. As courts have reiterated again and again, the antitrust laws do not protect competitors; rather, the laws protect

---

[31] As a more general problem, the district court improperly identified the facility at issue here. According to the district court's description, the facility appears to be a facility (the pipesystem) and the resource contained in that facility (the natural gas for resale). The district court, however, also referred to "City Gas' lateral pipe" as the essential facility. This lateral pipe connected City Gas' pipesystem to FGT's pipeline and enabled City Gas to pump a supply of natural gas into its pipesystem. Which of these three elements -- the gas, the lateral pipe, or the pipesystem itself -- constituted the essential facility? Clearly, all three components, together, formed the essential facility here. Consolidated did not want access just to City Gas' lateral pipe. That pipe was located a long distance from Consolidated's pipesystem. Consolidated, however, needed more than just gas: it needed access to City Gas' entire pipesystem in order to obtain the gas. Of course, Consolidated wanted access to that pipesystem only insofar as it contained gas, thus making the lateral pipe (through which City Gas acquired its gas) an indispensable component of the facility. In short, Consolidated wanted to hook into City Gas' pipesystem, at a point near Consolidated's own pipesystem, in order to take gas from City Gas' pipesystem (gas from FGT's pipeline that entered City Gas' pipesystem through City Gas' lateral pipe) in order to supply its own pipesystem. In effect, therefore, Consolidated wanted access to City Gas' entire distribution operation.

This case is not about a piece of City Gas' system, but rather about that system as a whole. Consolidated claimed that in order to compete with City Gas, it had to have access to City Gas' system. Consolidated needed gas from FGT, and, according to Consolidated, City Gas -- with its lateral pipe and pipesystem -- stood between Consolidated and FGT. Thus, Consolidated either had to go around City Gas' system or through it. Consolidated argued that going around that system would be too expensive to allow Consolidated to compete (in effect, what the second element of the essential facilities doctrine requires). It therefore claimed that access to the facility -- i.e., City Gas' system as a whole -- was "essential." Consolidated, therefore, wanted to be a customer of City Gas', but with an important difference from the rest of City Gas' customers: Consolidated wanted City Gas to sell this gas at a lower price than City Gas charged its other customers so that Consolidated itself could turn around and sell the gas.

competition. *See, e.g., Roland Mach. Co. v. Dresser Indus., 749 F.2d 380, 394 (7th Cir. 1984)*, *United States v. Syufy Enters., 903 F.2d 659, 663 (9th Cir. 1990)*. This principle, of course, applies to the essential facilities doctrine as well: the doctrine addresses the danger of monopoly leveraging and the anticompetitive effects **[**109]** that it has on *competition in general*. Applying this principle to the present case, City Gas' system is not essential in this sense. City Gas is not attempting to extend its power from one level of the market into another. City Gas, a monopolist at the retail distribution level, operates only at the retail level of the natural gas business. Its facility obviously relates to competition on that level, but the facility is not a mechanism for extending City Gas' power to another level of the market -- or for that matter, from another level of the market onto the retail level. City Gas operates solely on a single level of the market. The facility here, therefore, cannot properly be labeled "essential."

Even assuming this facility could be labeled "essential," I question the district court's determination that Consolidated could not practically or reasonably have duplicated it for purposes of the second element of the test. Consider what Consolidated **[*1293]** would have had to do in order to duplicate this facility. Consolidated already had a pipesystem in place from the days of its LP distribution. In order to change to natural gas distribution, therefore, Consolidated merely **[**110]** had to find a source of wholesale gas. Buying gas from FGT, the regional wholesale supplier, required two things: (1) an allocation from FERC, and (2) a lateral pipe connecting Consolidated's pipesystem to FGT's pipeline. Consolidated applied to FERC for the allocation on May 21, 1982. FERC issued its final decision granting the allocation on September 19, 1984. The process thus took two years and four months. The lateral pipe would have cost Consolidated $ 250,000. These factors of time and expense are not sufficient to support the conclusion that Consolidated could not reasonably or practically have connected directly to FGT's pipeline.

As I discuss above, *see supra* slip op. at 5157-5158, , given Consolidated's projected future profits as a company with a natural gas supply, Consolidated could feasibly have obtained underwriting for a $ 250,000 bond to finance the lateral pipe. Based on the figures presented by Consolidated's expert witness, the company's annual profits, with a supply of gas, would have been approximately $ 267,000, and the company would have generated those profits for twenty years. The annual interest rate on a $ 250,000 bond, figured at a rate of fifteen **[**111]** percent, would be $ 37,500. Taking into account Consolidated's tax deduction for those interest payments, the real interest would be $ 24,750 annually -- a figure representing 9.3% of Consolidated's annual profits. After paying that interest, Consolidated would be left with $ 242,250 in annual profits. Given those profits, Consolidated would have little trouble paying off the $ 250,000 principal on its bond offering at the end of twenty years. As these figures demonstrate, given the profits that Consolidated claims it could have generated for twenty years, it was clearly feasible for the company to undertake a $ 250,000 expenditure on a lateral pipe that would give it a supply of natural gas from FGT, an established wholesale supplier of natural gas.

This conclusion is also consistent with existing caselaw, which suggests that duplication of the facility must involve a high degree of impracticality and infeasibility before it will satisfy the essential facility doctrine's second element. *MCI, 708 F.2d at 1081*, a case on which the district court itself relied, illustrates this limit. In that case, MCI brought suit against AT & T, claiming that AT & T's refusal to **[**112]** allow MCI to interconnect with various AT & T facilities constituted monopolization in violation of *section 2* of the Sherman Act. A jury awarded MCI $ 1.8 billion; the Seventh Circuit affirmed in part, and reversed in part. I briefly state the facts.

Before 1969, the telecommunications industry existed as a lawful monopoly. The Bell System companies provided local exchange service, and AT & T provided long-distance service, which used the Bell System's exchange facilities to connect with customers on the local level. AT & T also used its long-distance lines to provide special services such as point-to-point lines (private lines connecting two locations) that do not require switching through the local exchange system and to provide other services such as foreign exchange (FX) lines and common control switching arrangements (CCSA) that do require switching through the local system.

In 1963, MCI began its attempt to enter the long-distance telephone market. It applied to the FCC for permission to construct and operate a long-distance system providing private-line service between Chicago and St. Louis. That service would require interconnections to ordinary local telephone lines in **[**113]** the two cities. Bell's local exchange system was all that was available. Six years later, in 1969, after a long administrative process, in which AT & T opposed MCI's application, the FCC finally approved MCI's request. As a result of that decision, applications similar to MCI's poured into the FCC. The FCC instituted a rulemaking procedure to deal with the applications. In June 1971, the FCC issued a decision, *see Establishment of Policies & Procedures for Consideration of Applications to Provide Specialized* **[*1294]** *Common Carrier Servs.* (*Common Carrier* decision), *24 F.C.C.2d 318 (1970)*, and as a result, AT & T agreed to enter into negotiations with MCI concerning the local interconnections. They reached an interim agreement in September 1971, but because AT & T disputed the reach of the *Common Carrier* decision, that agreement did not allow MCI interconnections for its FX or CCSA services. Finally, in April 1974, the FCC clarified the reach of its earlier decision and ordered AT & T to provide the disputed interconnections. Shortly before that decision, MCI filed its antitrust suit.

MCI's attempt to enter the telephone market thus involved substantial **[**114]** investments in time and capital. MCI spent *six* years engaged in administrative proceedings, with AT & T as an adversary, in order to gain initial FCC approval in 1969 for construction and operation of its St. Louis to Chicago line. *Two* more years passed before the FCC handed down its *Common Carrier* decision in 1971, and then another *three* years until the FCC finally clarified the effect of that decision in 1974 by issuing an order requiring AT & T to provide the disputed interconnections. From start to finish, the entire approval process took *eleven* years. In addition, MCI made a substantial expenditure in constructing its own long-distance lines. The original Chicago-to-St. Louis line required a terminal in each city and microwave relay towers along the whole length of the line to connect the terminals. MCI then extended the line from these original points as the company began to construct a nationwide long-distance system. This venture, moreover, to develop a nationwide long-distance system that would compete with AT & T, involved a tremendous capital investment, and even more initiative and risk. In order to finance its venture, MCI raised $ 110 million in loans **[**115]** and underwriting by leading lenders and equipment suppliers. As the *MCI* court stated, this made MCI "one of the largest start-up ventures in the history of Wall Street." *708 F.2d at 1095*.

In contrast, Consolidated completed its allocation proceedings before FERC in twenty-eight months, but was then unwilling to spend $ 250,000 on a lateral pipe. Compare that process in terms of time and money to the eleven-year administrative proceeding that MCI went through and to the $ 110 million that MCI raised and *actually invested*. Moreover, given Consolidated's net worth without a natural gas supply -- approximately $ 775,000 according to its own experts -- it could easily have financed the $ 250,000 required to construct the lateral pipe. *See supra* slip op. at 5157-5158, 5171 , . If we take into account what Consolidated claims it would have been worth with a natural gas supply -- *over $ 2.25 million* according to its expert witness -- its claim that it could not feasibly spend $ 250,000 on a lateral pipe becomes truly preposterous. As the facts in *MCI* suggest, a high degree of impracticality and infeasibility must be demonstrated in order to satisfy **[**116]** the second element of the essential facilities doctrine. [32] Given the nature of MCI's investment in terms of time, money, and initiative, as compared to the significantly smaller investment that Consolidated was unwilling to make here, Consolidated has not satisfied the second element of the essential facilities doctrine. *MCI* surely does not stand for the proposition that a firm has a duty to provide a free ride to potential market entrants, and that is exactly what Consolidated is after by claiming that access to City Gas' pipesystem is essential to Consolidated's ability to enter the market.

[117]** In addition, I also question whether City Gas has actually refused to deal in this case. The district court found that City Gas made a series of offers to sell to Consolidated, the lowest of which was at a price of cost (i.e., the cost of City Gas' wholesale gas from FGT) plus five cents per therm and held that those prices were **[*1295]** so unreasonable that they constituted a refusal to deal under *section 2*. The district court, however, never determined what a reasonable price would have been. Indeed, the district court never set any price whatsoever: in granting Consolidated's request for an injunction ordering City Gas to supply wholesale gas, the district court never set a price for that mandated sale, but rather delegated the price-setting task to the FPSC. *See 665 F. Supp. at 1512, 1534, 1545*. If the district court never determined what a reasonable, or "fair" [33] price would have been, then I

---

[32] The nature of the facilities that courts have held are not practically or feasibly able to be duplicated in other essential facilities cases also supports my conclusion here. *See, e.g., Terminal R.R., 224 U.S. at 383, 32 S. Ct. at 507* (major railroad terminal); *Fishman, 807 F.2d at 520* (Chicago stadium); *Aspen, 738 F.2d at 1509* (ski mountain); *Hecht, 570 F.2d at 982* (Robert F. Kennedy Stadium).

question on what basis it could legitimately have determined that City Gas' offered price was so unreasonable that it constituted a refusal to deal under *section 2*. As I discuss in more detail in part VI, the district court could have made that determination only **[**118]** in light of its determination of what the "fair" price would have been -- that is, by comparing the offered price to the fair price and deciding that the offered price was so much higher than the fair price that it was unreasonable and constituted a refusal to deal. Without determining the fair price, therefore, the district court had no basis for concluding that City Gas' offered price constituted a refusal to deal. The third prong of the essential facilities doctrine is thus not satisfied here either.

For these reasons, the district court in my view improperly applied the essential facilities doctrine to the present case. As this discussion also suggests, this case is radically different from the typical essential facilities case. That the district court would nevertheless so readily apply the doctrine and also find it to be controlling **[**119]** -- and that the court today would affirm that result -- are therefore matters of considerable concern to me. I think it is necessary to take this opportunity to analyze thoroughly the character and the limits of the essential facilities doctrine, and the implications of forcing its application to a case such as this one. I undertake to do so in the following subsection.

2. The Doctrine's Limits.

The essential facilities doctrine, as I explain above, *see supra* slip op. at 5161-5164, 5168-5169, , , is nothing more than a mechanism that aids courts in evaluating circumstantial evidence to determine whether the evidence supports an inference of anticompetitive intent. Given a certain type of fact pattern, the doctrine's four-part test will generally give rise to such an inference. Absent that type of fact pattern, however, even if the facts of the case could be found to satisfy the test, they would not support an inference of anticompetitive intent. Such an inference depends on more than the four elements of the test; it arises from the larger factual context -- the circumstantial evidence -- of the case as a whole. The four elements of the doctrine therefore may indicate, **[**120]** but by no means define, the kind of refusal-to-deal cases in which an inference of anticompetitive intent is justified. In this subsection, I undertake to describe more fully the factual features and the kinds of circumstantial evidence that are necessary to give rise to an inference of anticompetitive intent in addition to satisfying the essential facilities doctrine and its four-part test.

I begin with a discussion of the doctrine's origin and application in two Supreme Court cases -- *United States v. Terminal R.R. Ass'n, 224 U.S. 383, 32 S. Ct. 507, 56 L. Ed. 810 (1912)*, and *Associated Press v. United States, 326 U.S. 1, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)*. Based on these cases, I describe the factual context necessary for a proper application of the essential facilities doctrine. I then consider the present case in light of that discussion in order to demonstrate that this case lacks certain key features that must be present if the essential facilities doctrine is justifiably to give rise to an inference of anticompetitive intent and require the imposition of liability under *section 2*.

In *Terminal R.R.*, frequently cited as the original **[**121]** essential facilities case, a group of railroads that serviced St. Louis acquired ownership of a railroad terminal **[*1296]** that provided the sole means of access to St. Louis. The terminal owners allowed competing railroads to use the terminal only on payment of an extremely high fee, an arrangement that secured a competitive advantage to the terminal owners' railroads. The terminal owners, however, allowed railroads from East St. Louis to use the terminal without payment, apparently because a toll bridge in Memphis, Tennessee provided the East St. Louis railroads an alternate means of access to the city. As a result of this situation, the federal government (and not a private plaintiff) brought an antitrust enforcement action against the terminal owners. [34]

---

[33] As I explain in detail below, *see infra* slip op. at 5196-5203, , by "fair" price, I mean the price required by the *just compensation clause of the fifth amendment*.

[34] The government brought suit under *section 4* of the Sherman Act, *15 U.S.C. § 4*, contending that the arrangement was a combination in restraint of trade in violation of *section 1* of the Sherman Act, *id. § 1*.

The Supreme **[**122]** Court held in favor of the government and remanded the case to the district court with instructions to enter a decree requiring the terminal owners to provide all competing railroads with access to the facility "upon such just and reasonable terms and regulations as will, in respect of use, character, and cost of service, place every such company upon as nearly an equal plane . . . as that occupied by the proprietary companies." *224 U.S. at 411, 32 S. Ct. at 516*. Two principal considerations supported the Court's decision. First, the Court noted that the terminal owners were not merely terminal owners. Their activities were not limited to operating the terminal, but also included the provision of railroad services in St. Louis. *See id. at 406-07, 32 S. Ct. at 514*. The terminal owners' railroads thus gained a competitive advantage in providing railroad service by virtue of their terminal ownership. The case thus involved a classic monopoly-leveraging situation: the terminal owners were using their monopoly power on one level of the market to gain a competitive advantage on another level of the market. Second, the terminal owners discriminated between **[**123]** other railroads in imposing the usage fee. The terminal owners did not, for example, assess a higher fee on railroads operating in East St. Louis. Based on these considerations, the Court issued its instructions concerning the decree. [35]

The next seminal Supreme Court case to which lower courts have pointed in discussing the essential facilities doctrine is **[**124]** *Associated Press*. In that case, the government brought an action seeking to enjoin enforcement of a newspaper association's bylaws. That association consisted of more than 1200 newspapers involved in the collection and distribution of news; the bylaws prohibited distribution or sale of news to nonmembers by any of the association's members. The government claimed that the arrangement constituted a conspiracy in restraint of trade -- a violation, as in *Terminal R.R.*, of *section 1* of the Sherman Act -- as well as an attempt to monopolize in violation of *section 2* of the Act.

The Court held that, in restraining the sale of news to nonmembers that competed with the association's members, the bylaws were designed to give members a competitive advantage over nonmembers and thus constituted a violation of the antitrust laws. The Court therefore approved an injunction ordering the association also to provide news to nonmembers on nondiscriminatory terms. *326 U.S. at 21, 65 S. Ct. at 1425*. In *Associated Press*, as in *Terminal R.R.*, the Court emphasized that the defendant attempted to use its power as a newspaper association to gain a competitive advantage over **[**125]** nonmember newspapers -- i.e., monopoly leveraging. In addition, as in *Terminal R.R.*, the association discriminated between newspapers in allowing access to its services: members, of course, enjoyed the benefits of the association's news, whereas nonmembers enjoyed **[*1297]** no benefits, and the bylaws prevented certain newspapers from becoming members. Finally, as in *Terminal R.R.*, the element of conspiracy underlying formation of the association (or the group of railroads owning the terminal) influenced the Court's decision.

If we are to understand the essential facilities doctrine as an outgrowth of these cases, as the lower courts applying the doctrine suggest we should, then we must understand the limits of the doctrine as articulated in these cases. To that end, I offer some observations on the teachings of *Terminal R.R.* and *Associated Press*.

These cases demonstrate three distinct factual features. First, the defendants were already engaged in the business of providing access to the essential facility or resource at issue. The terminal owners in *Terminal R.R.* were in the business of providing terminal access to railroads. The newspaper association in **[**126]** *Associated Press* was in the business of gathering and distributing news to newspapers. In short, the defendants in both cases were already in the business of selling the essential resource, or service, to other entities. Second, the defendants were vertically integrated: they also operated on another level of the market, and the facility or resource at issue was essential to their operations on that level as well. The terminal owners in *Terminal R.R.* ran their own trains into St. Louis, and that operation required access to the terminal. The member newspapers in *Associated Press* ran their own newspapers and depended on the association for their news. Third, the defendants in these cases, in

[35] The Court rejected the government's request for a dissolution of the ownership group. Relying on a proposition that "'injury to the public by the prevention of an undue restraint on or the monopolization of trade or commerce is the foundation upon which the prohibitions of the statute rest,'" *id. 224 U.S. at 409, 32 S. Ct. at 515* (quoting *Standard Oil, 221 U.S. at 78, 31 S. Ct. at 523*), the Court held that mandating equal access to the facility on the part of all railroads would accomplish the requirements of the antitrust laws most consistently with the public's interest in a well-operated railroad terminal.

control of essential facilities at one level of their operations, competed on the second level of operation with other entities that also required access to the essential facility in order to operate at this second level. The terminal owners in *Terminal R.R.* competed with other railroads servicing St. Louis, and those other railroads required access to the terminal in order to reach the city. Likewise, the member newspapers in *Associated Press* competed with nonmember newspapers **[**127]** that needed the association's news. Given these three factors, the defendants' attempts to restrain their competitors' access to the essential facilities at issue became significant for antitrust purposes: under the circumstances, that conduct gave rise to an inference of anticompetitive intent.

The essential facilities doctrine merely provides a means to evaluate this type of fact pattern in order to determine whether the facts give rise to such an inference of intent. I question how far courts can legitimately extend the doctrine when the circumstances of a case fail to approximate the fact pattern of these two cases. The cases themselves provide some guidance on this point. As the Supreme Court indicated in *Terminal R.R.*, it would have been a different case if the terminal owners had been solely in the terminal business and not in the railroad business as well. *See* *224 U.S. at 406-07, 32 S. Ct. at 514*. If that were the case, the terminal owners' conduct in charging high prices would not have had the anticompetitive overtones that the conduct had in the actual case. The case would not have been a monopoly-leveraging case: the terminal owners would not have **[**128]** been using their monopoly power over the terminal to gain a competitive advantage in supplying railroad services; they would simply have been charging some railroads a higher fee for use of the terminal. The inference of anticompetitive intent in the case did not arise from the conduct -- the high fee charged for access to the terminal -- in and of itself; rather, the inference arose from the *effect* of the high fee on the terminal owners' competitive position in the downstream railroad market. By charging downstream competitors a higher fee, the terminal owners obtained a competitive advantage in providing railroad service to St. Louis. *See* *id. at 408, 32 S. Ct. at 515*. If the terminal owners had not also been in the business of providing railroad services, then their high fee charges would have produced no such competitive advantage and would not, therefore, have given rise to an inference of anticompetitive intent.

The circumstances of the *Associated Press* case also support this analysis. The association's refusal to supply news to nonmember **[*1298]** newspapers gave the member newspapers a competitive advantage in the newspaper market. The refusal **[**129]** to deal thus gave rise to an inference of anticompetitive intent. If the association were differently constituted -- for example, as an independent news-reporting service, not composed of newspapers, and not engaged in the newspaper business -- its refusal to deal with nonmember newspapers would not have given the association a competitive advantage on another level of operation. The association, in that case, would not have engaged in monopoly leveraging, and its refusal to deal would not have signaled an anticompetitive intent.

These two cases would also have been different if the defendants had not already been in the business of providing access to the essential facility at issue, which is exactly the situation in the present case. This type of situation, however, is so fundamentally different from the fact pattern of *Terminal R.R.* and *Associated Press* that the Court in those cases did not touch on how to approach it. I therefore discuss a hypothetical case in order to demonstrate that the essential facilities doctrine does not properly extend to this type of situation: that is, absent the first factual feature of these two cases, satisfying the four elements of the essential **[**130]** facilities doctrine will not give rise to an inference of anticompetitive intent. As I also demonstrate, the imposition of liability under *section 2* in this hypothetical case would have practical implications that do not arise in the typical essential facilities case. The typical cases, moreover, fail to foresee these practical implications, let alone to address them. For this reason as well, the essential facilities cases do not control the result in this hypothetical case.

Assume that a newspaper called the *Times* possesses a one hundred percent share of the daily newspaper market in a given city. The *Times* has achieved this position by providing first-rate news and reporting services for years. The *Times* has a large reporting staff and, because it has been in business for a long time, its reporters have a vast web of information sources throughout the city. Assume, further, that the *Post* undertakes to publish a daily newspaper in the same city, thus entering into competition with the *Times*. The *Post*, however, has only enough resources for a small reporting staff, and even if it could afford a larger staff, it would take several years to build up the information **[**131]** network that the *Times*' reporters have developed. The *Post*, therefore, wants to buy news from the *Times*. The *Times*, however, refuses to sell to the *Post*. The *Times* has never sold its news to anyone (newspapers or otherwise) and has no intention of starting to do so now. As the *Times* also admits, it has no interest in supplying news to a rival newspaper so that the rival can compete. Indeed, in the *Times'* view, if the *Post* cannot survive in the daily newspaper market unless it can obtain news from the *Times*, that is all for the better. As would be expected, the *Post* has a difficult time making ends meet. The *Post*, therefore, hires some lawyers of its own and brings an antitrust suit against the *Times*, seeking an injunction ordering the *Times* to sell news to the *Post*.

I suggest that the court must deny this request for an injunction: the essential facilities doctrine provides no basis for imposing a duty to deal on the *Times* under these circumstances. As a preliminary point, this is not a monopoly-leveraging case such as *Terminal R.R.* or *Associated Press*. The *Times* is not a vertically integrated entity: the **[**132]** paper assembled its large reporting staff and developed its information networks entirely for purposes of, indeed as an integral part of, its own newspaper operation and not, as in *Associated Press*, to produce news for resale. The *Times* has never sold news to any other entity whatsoever. Its refusal to sell news to the *Post*, therefore, could not be classified as an attempt to use its "monopoly" power as a newsgatherer to maintain its distribution monopoly: its newsgathering operation is an integral part of its newspaper operation as a whole. [36] Given the constantly reiterated **[*1299]** rationale of the essential facilities doctrine -- to guard against the evils of monopoly-leveraging -- this hypothetical case would thus appear to fall beyond the doctrine's scope. For the sake of discussion, I assume that the essential facilities doctrine could theoretically apply to this non-monopoly-leveraging case. In practice, however, it could not.

[133]** Even assuming the elements of the essential facilities doctrine were satisfied here -- i.e., the court finds that the *Times* is a monopolist in control of an essential resource that the *Post* cannot reasonably or practicably duplicate, and the *Times* has refused to supply that resource to the *Post* although it could feasibly do so -- under the circumstances of this case, the *Times*' conduct in refusing to deal with the *Post* does not give rise to an inference of anticompetitive intent. Because the *Times* has never sold news, it has not acted inconsistently in refusing to deal with the *Post*. In the typical essential facilities case, in contrast, the defendant does act inconsistently, refusing to deal with some entities but not with others. In *Terminal R.R.*, for example, the terminal owners charged some railroads an exorbitant fee for access to the terminal and charged others a reasonable fee for the same access. In these typical cases, moreover, the inconsistent treatment relates to potential customers' status as competitors: the terminal owners in *Terminal R.R.*, for example, refused to deal only with railroads that also competed with the terminal **[**134]** owners' railroads. The inconsistent treatment there, coupled with the refused railroads' status as competitors, signaled the defendant's anticompetitive intent.

If the defendant treats all potential customers the same, however, even if it uniformly refuses to deal with any at all, that conduct would not give rise to an inference of anticompetitive intent. Thus, the *Times*, unlike the terminal owners, has not acted inconsistently in refusing to deal with the *Post*. For whatever reasons, the *Times* has chosen not to sell its news at all, and its decision not to deal with the *Post* merely follows from that blanket policy. Its decision is not inconsistent. Nor does the decision relate to the *Post's* specific status as competitor. Unlike the fact pattern in *Terminal R.R.* and other typical essential facilities cases, therefore, the circumstances of this hypothetical case give rise to no inference of anticompetitive intent.

The practical implications of imposing a duty to deal on the *Times* also suggest the inapplicability of section 2 under these hypothetical circumstances. In *Terminal R.R., Associated Press*, and other typical essential facilities cases, the **[**135]** defendants, when ordered to deal with the excluded entities, did not have to undertake a new business or provide a new service. They merely had to give the excluded entities the *same service that was already being provided* to other entities. Thus, in response to the Court's decision, the defendants in both cases had to stop *not doing what they usually did*. The Court's decision enjoined them to operate normally with respect to all customers. In this hypothetical case, however, if the *Times* were ordered to deal with the *Post*, the court's decree would be fundamentally different from the decrees in typical essential facilities cases. This decree would not order the *Times*

---

[36] The monopoly-leveraging cases that I discuss above, *see supra* slip op. at 5167-5168, , would therefore not control here either.

to resume its ordinary course of operation; rather, it would order the *Times* to undertake a *new* course of operation, *to begin providing a service that it had never before provided*. In my view, this kind of a case is fundamentally different from the typical essential facilities case. [37] Not only is this kind of case factually and legally inconsistent with typical essential facilities cases, but the practical implications of imposing a duty to deal under these circumstances are radically **[**136]** different than such implications in the typical essential facilities cases. Consequently, those cases simply do not control here.

As a general matter, the antitrust laws do not impose a positive duty on companies to help competitors. The antitrust laws **[*1300]** focus on various types of conduct that inhibit competition. The laws, however, do not purport to facilitate competition by imposing a duty on a company to help another company into competition. As the Seventh Circuit stated in *Olympia Equip. Leasing Co. v. Western Union Tele. Co., 797 F.2d 370, 375-76 (7th Cir. 1986)*, *cert. denied*, *480 U.S. 934, 107 S. Ct. 1574, 94 L. Ed. 2d 765 (1987)*, a firm

> has no general duty to help its competitors. . . . "There is a difference between positive and negative duties, and the antitrust laws, like other legal doctrines sounding in **[**137]** tort, have generally been understood to impose only the latter." . . . A monopolist has no duty to reduce its prices in order to help consumers, . . . and no duty to extend a helping hand to new entrants. . . .

Id. (quoting *USM Corp. v. SPS Technologies, Inc., 694 F.2d 505, 512-13 (7th Cir. 1982)*, *cert. denied*, *462 U.S. 1107, 103 S. Ct. 2455, 77 L. Ed. 2d 1334 (1983))* (citations omitted). It is not surprising, therefore, that in every essential facilities case disclosed by my research in which a court imposed a duty to deal, the defendant was already engaged in the course of dealing at issue. *E.g., Otter Tail, 410 U.S. at 428, 93 S. Ct. at 1022* (defendant already in business of wheeling power); *Associated Press, 326 U.S. at 1, 65 S. Ct. at 1416* (defendant already in business of selling news); *Terminal R.R., 224 U.S. at 383, 32 S. Ct. at 507* (defendant already in business of operating railroad terminal); *Fishman, 807 F.2d at 520* (defendant already in business of leasing Chicago stadium); *Aspen, 738 F.2d at 1509* (defendant already engaged in practice **[**138]** of providing all-Aspen ski ticket), *aff'd*, *472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*; *MCI, 708 F.2d at 1081* (defendant already in business of providing interconnections to local telephone exchange networks); *Hecht, 570 F.2d at 982* (defendant already in business of leasing Robert F. Kennedy Stadium). In these cases, moreover, the defendant had *in fact* been engaged in the course of dealing at issue: a duty to deal has never been imposed on a company under the rationale that the company could, in the court's view, feasibly engage in that course of conduct. Under this established law, therefore, the *Times* has no "positive duty" to sell news to the *Post*. But that is exactly the kind of duty that an injunction ordering it to deal with the *Post* would impose on the *Times*.

This legal principle -- that the antitrust laws impose no positive duty on a company to help its competitors -- is also supported by strong policy considerations. The imposition of a duty to deal in such circumstances would encourage economic inefficiencies and promote inequity. In order to achieve its level of success in the newspaper **[**139]** business, the *Times* invested significant amounts of capital over a period of time. That investment required initiative and involved significant risks. An attempt by any company to develop a product or service -- i.e., to compete in a market -- requires initiative, innovation, and risk-taking. Our antitrust laws are designed to ensure that every company has the opportunity to compete under these terms. Our antitrust laws, however, do not mandate that a company, having made this investment in capital and taken this initiative and risk, must then provide a free ride into the market for every potential new competitor that comes along. Such a policy would be unfair to those companies that have made investments and taken risks; moreover, it would discourage businesses from taking initiative, assuming risk, and making investments of capital in the first place. A policy that would lead to these results is not, in my view, a good one; nor is it the policy behind our antitrust laws.

In addition, courts must respect rational decisions of economic actors. If the *Times* has opted not to undertake a course of operation -- not to sell to others material that it develops for its own operation **[**140]** -- the court has no

---

[37] Indeed, it differs from refusal-to-deal cases in general, under any formula of analysis. *See supra* slip op. at 5160-5165, .

business second-guessing that decision. The *Times* itself is in the best position to evaluate whether to enter into the course of dealing at issue, and it has decided not to do so. For the court to evaluate such a decision -- in effect upholding or overturning it by deciding whether or not to impose a duty to deal -- would push the court beyond the limits of its **[*1301]** administrative capabilities. If courts were to review such decisions, then the question whether an entity should have undertaken a course of dealing would become an element of every refusal-to-deal case. [38] The plaintiff would bear the burden of proving this element of the case, and the courts would have to develop a legal standard for judging the evidence. I suggest that this "element" of a refusal-to-deal case would be an impossible one to prove. What kind of a showing would the courts require a plaintiff to make? Assume a plaintiff has access to a defendant's books, to the defendant's research and development, and to the defendant's plans for expansion and growth -- or that the plaintiff could devise a reasonable approximation of this information. What if, based on this evidence, the **[**141]** plaintiff could show that the defendant could feasibly undertake the activity at issue, indeed would profit from that activity: would that provide a sufficient basis for a court to hold, as a matter of law, that the defendant *must* undertake that course of conduct? Would it be sufficient if the plaintiff could make an even stronger showing -- a showing that the defendant could not stay in business without undertaking that course of dealing, but that if the defendant did undertake it, he would become a millionaire, indeed a billionaire? What if the defendant argues in defense of its decision not to undertake the course of dealing that its board of directors and shareholders had a moral objection to doing so? Or that such an undertaking would place additional demands on the staff's time, which would conflict with the company's policy emphasizing the importance of spending quality time outside of the office? Or, that the undertaking would simply be inconsistent with the company's own plans for expansion? I suggest that the court has no legal basis for forcing a party to undertake an operation that the party has chosen not to undertake.

[142]** The courts would also face extreme administrative problems in imposing effective remedies in cases like this hypothetical one. If the court issued an injunction ordering the *Times* to sell news to the *Post*, the court would obviously have to set a transaction price in its injunction. In the typical essential facilities case, the court can simply look to the terms set by the defendant in its normal dealings with other customers. Unlike the association in *Associated Press* or the terminal owners in *Terminal R.R.*, however, the *Times* has no established terms for the sale of news to which the court could look in fixing a transaction price. Thus, the court must come up with a price on its own. As I discuss in detail in part VI, courts would confront severe difficulties in undertaking this price-setting task. The price must be fair to the *Times*; [39] the court cannot require it to sell news at a loss, or at the cost of its ability to compete. On the other hand, the price must also enable the *Post* to compete; if the *Post* cannot compete after purchasing news at that price, then the court will be unable to fashion a remedy that will provide relief to the *Post* **[**143]** . In that event, under established principles of equity, the case must be dismissed: courts cannot entertain claims that cannot be remedied. I discuss these issues in more detail below, *see infra* slip op. at 5194-5213, .

Because the essential facilities cases all involve defendants that are already engaged in providing the service at issue, those cases do not foresee, let alone address, any of the practical problems that would arise if the court were to impose a duty to deal in cases like this hypothetical case. Given these problems, and the failure of the essential facilities cases to provide any guidance, that doctrine provides no basis for liability under section 2 in this hypothetical case.

This hypothetical case, moreover, closely resembles the present case. For the same reasons that the hypothetical case is not **[*1302]** properly an essential facilities case, neither **[**144]** is the present case. City Gas has decided not to enter the business of supplying natural gas at wholesale. In so deciding, it has done nothing wrong, and its conduct in refusing to sell wholesale gas to Consolidated is not anticompetitive conduct under these essential facilities cases. Nor do the antitrust laws impose a duty on City Gas to enter the wholesale supply business and sell gas to Consolidated. The antitrust laws impose no positive duty on a company to help its competitors. Imposing

---

[38] As such, this element would be very different from a legitimate business reason asserted by a company in its defense after a plaintiff has already submitted sufficient evidence to raise an inference of anticompetitive intent.

[39] That is, it must satisfy the *fifth amendment's* just compensation requirement. *See infra* slip op. at 5196-5203, .

such a duty in this case, as in the hypothetical case discussed above, would create serious problems of policy and of judicial administration. For these reasons, under the teachings of *Terminal R.R., Associated Press*, and their progeny, the essential facilities doctrine does not justify the imposition of liability under *section 2* in the present case.

E. *The "Intent Test."*

The district court also analyzed the case under the so-called "intent test," which considers whether, under the circumstances of a case, a monopolist's conduct demonstrates an illegal intent to destroy competition. If the conduct gives rise to an inference of anticompetitive intent, then the monopolist is subject **[**145]** to liability under *section 2*. *See* *Lorain Journal, 342 U.S. at 153, 72 S. Ct. at 186*; *Eastman Kodak, 273 U.S. at 375, 47 S. Ct. at 404*; *MCI, 708 F.2d at 1148*; *Poster Exchange, 431 F.2d at 338*. Applying these cases generally, the district court found, "based on a review of the record evidence, that [City Gas'] real purpose here was to maintain its monopoly unlawfully." *665 F. Supp. at 1540*. It held, therefore, that City Gas' conduct constituted a violation of *section 2*.

Courts have used this approach in both monopoly-leveraging and non-monopoly-leveraging cases. In the former, which I discuss above, *see supra* slip op. at 5167-5168, , the courts have held that the conduct of monopoly leveraging is sufficient evidence of illegal intent to justify the imposition of liability under *section 2*. *See, e.g., Eastman Kodak, 273 U.S. at 375, 47 S. Ct. at 404*; *Poster Exchange, 431 F.2d at 339*. Courts have also inferred intent in non-monopoly-leveraging cases, where a company with monopoly power on one level of the market refuses to deal in order to maintain its **[**146]** monopoly on that same level of the market. *See, e.g., Lorain Journal, 342 U.S. at 153-54, 72 S. Ct. at 186-87*. This so-called "intent test" is of course nothing more than a fancy label for what courts do in virtually every refusal-to-deal case under *section 2*: because direct evidence of anticompetitive intent rarely exists, courts evaluate the circumstantial evidence in a given case to determine whether it gives rise to an inference of anticompetitive intent. The intent-test cases, therefore, demonstrate factual contexts from which such an inference can arise.

As the preceding sections make clear, the present case does not involve monopoly leveraging. The district court, therefore, could not have inferred an illegal intent from an attempt by City Gas to extend its monopoly power from one level of the market to another. As I discuss above, the *Eastman Kodak-Poster Exchange* cases, which involve monopoly leveraging, do not control the present case. If the evidence in this case is to give rise to an inference of anticompetitive intent, therefore, it must do so on the basis of City Gas' conduct in using its power on the retail level in order to maintain its monopoly **[**147]** on that same level. Given this situation, *Lorain Journal* becomes the relevant case.

In that case, the only newspaper in Lorain, Ohio refused to accept paid advertisements from parties also advertising on a radio station that had begun to compete with the newspaper in the advertising market. The government brought an enforcement action under *section 4* of the Sherman Act, claiming that the newspaper had acted in violation of *section 2*. The Supreme Court agreed and approved an injunction requiring the newspaper to accept advertisements on its already established terms even if the parties also advertised on the competing radio station. The newspaper was not itself involved in the radio business, nor did it have any desire to become involved in that business. It was not, **[*1303]** therefore, attempting to use its monopoly power in the newspaper advertising business to gain a share of the radio broadcasting market. Rather, the newspaper's conduct was designed to protect its own monopoly in the newspaper advertising business. That conduct, though, demonstrated the newspaper's anticompetitive intent to foreclose competition in the relevant advertising market.

Lorain Journal **[**148]** , like other refusal-to-deal cases, has a crucial factual feature: the newspaper refused to provide a service that it was already in the business of providing. The newspaper sold advertising space on established terms (presumably a given dollar amount per column inch) to parties that wanted to advertise. The case arose when the newspaper refused to sell such space on the same terms to certain parties that also wanted to advertise. [40] The present case, of course, lacks this feature: City Gas has not refused to sell what it was already in the business of selling. Consolidated wanted to buy gas at wholesale. City Gas, however, sold only retail gas, which is an entirely different product. Because of this factual distinction, *Lorain Journal* does not control here for two reasons.

[149]** First, what gave rise to an inference of anticompetitive intent in *Lorain Journal* was the newspaper's diversion from its established course of conduct. The newspaper suddenly refused to sell advertising. Of course, it also refused only with respect to a specific class of advertisers -- those also advertising on the competing radio station. The sudden refusal, coupled with the identity of the refused customers, clearly signaled an anticompetitive intent. In the present case, City Gas did not change its established course of conduct. Rather, it did exactly the opposite: it refused to divert from its established course of conduct. City Gas has never sold gas at wholesale, and it continued not to do so in the present case. The fact that Consolidated, the would-be purchaser here, was a competitor of City Gas means nothing because City Gas never sold to any firm at all, regardless of the firm's competitive status. *Lorain Journal* is therefore distinguishable on the facts.

In addition, because this case does not involve a business in which City Gas was already engaged, it poses remedial problems not present in *Lorain Journal*. There, the trial court could simply mandate that **[**150]** the newspaper sell advertising space to the excluded parties on the same terms that the newspaper sold space to all other advertisers. Such a remedy would provide the excluded parties with relief -- advertising space in the newspaper -- and the court could easily impose that remedy within the limits of its administrative capabilities. That, however, is not the case here. Because City Gas does not, and has never, sold natural gas at wholesale, it obviously has established no terms for such a transaction. The district court, therefore, could not simply mandate that City Gas sell Consolidated wholesale gas on its already-established terms. Instead, the district court itself had to set a price for the forced sale. The district court did not do so, however; rather, it delegated the task to the FPSC. Had the district court undertaken to set the price, it would have found that task to be impossible, as I discuss in detail in part VI below. For this reason as well, *Lorain Journal* does not control the present case.

As this discussion demonstrates, therefore, the so-called "intent test" provided no basis for imposing liability here. Unlike the typical refusal-to-deal cases analyzed under **[**151]** this test, the circumstances in this case simply did not give rise to an inference of anticompetitive intent. I turn now to a discussion of two additional Supreme Court cases.

F. Aspen *and* Otter Tail.

The district court also relied heavily on two more recent Supreme Court cases -- *Aspen Skiing Co. v. Aspen Highlands Skiing* ***[*1304]*** *Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*, and *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)* -- which also involve refusals to deal under *section 2*. Although lower courts frequently cite both cases as support for the essential-facilities doctrine and the intent test, as well as the monopoly-leveraging theory, neither case explicitly applies any of these formulas for determining liability in *section 2* cases. Both cases, nevertheless, follow from the general principles established in the early Supreme Court cases that I discuss in the preceding section. I consider *Aspen* and *Otter Tail* in turn, analyzing the theories of liability applied in the cases and demonstrating that neither case supports the imposition of a duty to deal on City **[**152]** Gas.

1. *Aspen*.

In *Aspen*, Aspen Highlands Skiing Corp. (Highlands), which owned one of four skiing areas in Aspen, brought a private antitrust suit against Aspen Skiing Company (Ski Co.), which owned the other three areas. From 1962 to 1977, Ski Co. and Highlands had offered an all-Aspen ticket that skiers could use interchangeably at all four skiing areas. In the 1977-78 season, however, Ski Co. offered to participate in the all-Aspen ticket only on terms that were

---

[40] These advertisers, moreover, did not request advertising space on special terms, monetary or otherwise; the subject of their advertisements was unobjectionable; and the advertisements would not have had an adverse impact on the newspaper's ability to attract other clients. Thus, the newspaper presumably had no legitimate business reason for its refusal.

unacceptable to Highlands; Ski Co. would consider no counterproposal and, as the district court held, in effect refused to deal with Highlands. Highlands brought a treble damages action against Ski Co. under *section 4* of the Clayton Act, claiming that Ski Co. had monopolized the downhill skiing market in violation of *section 2* of the Sherman Act. As the Supreme Court described, the case raised the question whether "a firm with monopoly power has a duty to cooperate with its smaller rivals in a marketing arrangement in order to avoid violating *§ 2* of the Sherman Act." *472 U.S. at 587, 105 S. Ct. at 2849*.

In the district court, a jury found in favor of Highlands, and the Tenth Circuit affirmed, **[**153]** relying on the essential facilities doctrine as a basis for holding that Ski Co. had a duty to deal with Highlands. The Tenth Circuit also held that sufficient evidence existed to support the jury's finding that Ski Co. had an intent to create or maintain a monopoly. The Supreme Court approached the case in broader terms, analyzing whether Ski Co. had a duty to deal with Highlands under the circumstances. The Court first stated that "even a firm with monopoly power has no general duty to engage in a joint marketing program with a competitor." *Id. at 600, 105 S. Ct. at 2856*. The Court elaborated that this proposition is a counterpart to the "independent businessman's cherished right to select his customers and his associates." *Id. at 601, 105 S. Ct. at 2856*. Of course, as the Court quickly qualified, these rights -- both to select customers and not to deal with competitors -- are not absolute. The Court articulated the key to determining when such a decision constitutes an antitrust violation: when "the challenged conduct is fairly characterized as 'exclusionary' or 'anticompetitive.'" *Id. at 602, 105 S. Ct. at 2857*. The Court then **[**154]** examined Ski Co.'s conduct.

The Court identified a crucial feature of Ski Co.'s refusal to deal:

> In the actual case that we must decide, the monopolist did not merely reject a novel offer to participate in a cooperative venture that had been proposed by a competitor. Rather, the monopolist elected to make an important change in a pattern of distribution that had originated in a competitive market and had persisted for several years.

Id. at 603, 105 S. Ct. at 2858. Ski Co.'s refusal to deal thus demonstrated one of the key features of the *Terminal R.R.* and *Associated Press* cases: its refusal to deal was not a refusal to undertake a new course of dealing; rather, it was a refusal to continue a course of dealing in which it was already engaged.

After identifying this feature, the Court suggested that even such a decision "to make an important change in the character of a market . . . is not necessarily anticompetitive." *Id., 105 S. Ct. at 2858*. As the Court explained, the question "cannot be answered by simply considering [the] effect of [Ski Co.'s conduct] on Highlands. In addition, it is relevant to consider its **[**155]** impact **[*1305]** on consumers and whether it had impaired competition in an unnecessarily restrictive way." *Id. at 605, 105 S. Ct. at 2859*. Based on its consideration of these additional factors, the Court agreed that the evidence was sufficient to support a finding that "consumers were adversely affected by the elimination of the 4-area ticket." *Id. at 606, 105 S. Ct. at 2859*. The Court also noted that Ski Co.'s conduct was not "justified by any normal business purpose." *Id.* at 608, 105 S. Ct. 2860. Because the evidence was sufficient to support the jury's verdict in favor of Highlands, the Court affirmed.

This case does not support the imposition of a duty to deal on City Gas. The decisive feature in *Aspen* -- Ski Co.'s decision "to make an important change in a pattern of distribution that had originated in a competitive market and had persisted for several years," *id. at 603, 105 S. Ct. at 2858* -- is not present in this case. On the contrary, City Gas made no "important change in a pattern of distribution;" indeed, City Gas *refused* to make such a change, and that refusal is what Consolidated challenges **[**156]** in the present case. Given this crucial distinction between *Aspen* and the present case, *Aspen* does not control.

The remedy problem in the present case also did not arise in *Aspen*. Although the Supreme Court made no mention of the damages amount awarded in *Aspen*, the long history of the all-Aspen ticket produced an extensive body of evidence on the division of profits from the all-Aspen ticket between Ski Co. and Highlands. The trial court (or jury) in that case could easily have arrived at a damages figure that would accurately have reflected Ski Co.'s economic position while providing relief to Highlands. That is not true in the present case. Because City Gas has never sold gas for resale, either to Consolidated or anyone else, the district court had no point of reference for calculating a hypothetical transaction price. See *infra* slip op. at 5199-5203, , for a detailed elaboration of this point.

Aside from the problem of imposing a remedy in the present case, the district court below also failed to focus on any of the factors articulated by the Supreme Court in *Aspen* as support for the Court's determination that Ski Co.'s conduct was exclusionary: **[**157]** whether the conduct had an "impact on consumers and whether it has impaired competition in an unnecessarily restrictive way." *Id. at 605, 105 S. Ct. at 2859*. A consideration of these factors in the present case also suggests that City Gas' refusal to deal is not classifiable as exclusionary.

With respect to the conduct's impact on consumers, the record contains no evidence of a negative impact. In fact, the district court indicated that City Gas' service was more economical than the service that Consolidated could provide. *See 665 F. Supp. at 1505*. The district court did note that City Gas would have to pass on to its customers the costs of extending its pipesystem into Consolidated's service area. *Id. at 1513*. The district court, however, failed to account for the increased price that Consolidated would have to pay for wholesale gas compared to the price City Gas paid FGT: even if City Gas were forced to sell to Consolidated, it would be entitled to sell at a rate providing a reasonable rate of return on its investment, *see supra* part VI. Assuming that City Gas' distribution and hook-up operation was efficient, and no evidence **[**158]** to the contrary appears, Consolidated would have to make up for the difference in its wholesale price either by charging its retail customers more than City Gas would charge or by streamlining even further its distribution operation. Even assuming that Consolidated could streamline its operation, the record contains no evidence that this would actually benefit consumers. Unlike the negative impact on consumers from the abolition of the all-Aspen ticket in *Aspen*, the benefits to consumers from Consolidated's entry into the market would be minimal -- at best, slightly reduced natural gas rates for some consumers. Even that benefit would come only at the expense of higher natural gas rates for other consumers. I question, moreover, whether this type of competition really would benefit the consumer. Competition that forces a natural gas utility to streamline its operation might, in fact, harm the consumer. **[*1306]** Although such competition could conceivably result in slightly decreased gas rates for some customers, it might increase safety risks for all customers by pressuring gas suppliers to cut corners in order to lower their prices. That sort of pressure would not benefit **[**159]** consumers.

Moreover, the district court failed to consider that given the nature of the natural gas business, competition in that business is likely to benefit consumers only in the short term, if at all. As the district court stated, City Gas possessed a natural monopoly in its service area. That is not strange: because entering the natural gas supply business involves the expenses of building a pipesystem and arranging hookups to customers, virtually every supplier has a natural monopoly in its supply area. Two supply companies cannot continue to operate in the same service area. Companies compete only at the outset to gain control of a service area and to expand into new areas as they develop. Given the naturally monopolistic state of the natural gas supply business, the benefits of competition to the consumer are limited. Competition between companies for initial control of a service area may lower retail prices, but only in the short term. Once one supplier gains control of the service area (and thus develops a natural monopoly), the incentive for lower retail pricing also ends. (Of course, the FPSC monitors the rates set by all natural gas companies. *See infra* slip op. **[**160]** at 5218, .) Moreover, consumers would not benefit from continuing competition between gas companies within a single service area. Constant switching by customers between companies would generate transaction costs and force an increase in retail prices to all customers. In addition, constant competition between companies is likely to undermine safety concerns as the companies try to shave costs in order to increase their competitiveness. Competition in the natural gas supply market is, therefore, by no means the best state of affairs from the consumers' perspective.

As this discussion indicates, *Aspen* does not support the imposition of a duty to deal in the present case. The *Aspen* case is immediately distinguishable from the present case in that Ski Co.'s refusal to deal involved a significant alteration in its previous course of dealings with Highlands. That course of dealing provided a reference point for a meaningful damages award. No such course of dealing exists in the present case. Also, whereas the refusal to deal in *Aspen* adversely affected skiers, the refusal in this case had no such effect on gas consumers. In fact, the evidence suggests that the continued **[**161]** existence and expansion of City Gas' natural gas monopoly might actually benefit consumers, especially with respect to long-term safety concerns.

2. *Otter Tail*.

Nor does the Supreme Court's holding in *Otter Tail, 410 U.S. at 366, 93 S. Ct. at 1022*, support the imposition of a duty to deal in the present case. In *Otter Tail*, an electric power company produced electricity on the wholesale level and distributed its electricity as a retail franchisor in various municipalities. The company also engaged in "wheeling," or transmitting power generated by other companies over its transmission system. On the retail distribution level, municipalities granted Otter Tail ten- or twenty-year franchises, and during that time Otter Tail served as the sole distributor -- a natural monopolist -- in the given municipality. The case arose when certain municipalities attempted to establish municipal distribution systems on their own. Having built their own local distribution systems, the municipalities hoped that Otter Tail would sell or wheel them wholesale power. Otter Tail, however, refused to provide either service. Consequently, the government brought an antitrust enforcement **[**162]** action against Otter Tail, attempting to enjoin it from refusing to deal with the municipalities under the circumstances. The district court granted the government an injunction, and the Supreme Court upheld the decree.

Unfortunately, the *Otter Tail* opinion reveals no immediate rationale in support of the district court's action. As Judge Easterbrook observed in his dissent in *Fishman **[*1307]** v. Estate of Wirtz, 807 F.2d 520, 573-74 (7th Cir. 1986)*:

> A study of the majority opinion for four Justices in *Otter Tail* will not reveal the Court's reason; it gave only a result. . . . It did not offer any reason other than to say that Otter Tail had reduced competition. . . . To rely on *Otter Tail* my colleagues must be able to tease a reason out of a silent opinion.

In Judge Easterbrook's view, the key to the *Otter Tail* decision is the effect that Otter Tail's refusal to deal had on the electricity-generating level of the market. As Judge Easterbrook described, three markets existed in the electric power industry: the power generation market, the transmission market, and the retail distribution market. Otter Tail controlled the transmission **[**163]** market, and its refusal to deal occurred on that level. What made that refusal to deal an antitrust violation, in Judge Easterbrook's view, was that competition existed on the generating level. That is, the municipalities that wanted to enter into retail distribution of electricity could have taken advantage of the competition on the generating level, which would have resulted in lower prices for consumers at the retail level, if Otter Tail would have agreed to wheel. And according to Judge Easterbrook, consumer benefit is the primary consideration in determining antitrust liability. *See also* *Aspen, 472 U.S. at 605, 105 S. Ct. at 2859*; *supra* slip op. at 5185-5186, . Thus, Otter Tail's conduct was clearly anticompetitive.

Given this interpretation, *Otter Tail* does not control the present case. Judge Easterbrook's description of the three levels of the electric power industry applies also to the natural gas industry. As I describe above, *see supra* slip op. at 5165-5167, , the natural gas industry consists of three stages: (1) production; (2) interstate transportation and wholesale supply; and (3) intrastate distribution at retail. The present **[**164]** case, however, is factually distinguishable from *Otter Tail* in two respects: first, whereas Otter Tail participated on the transmission level as well as on the distribution level, City Gas participated only on the retail distribution level; second, whereas competition existed on the generating level in *Otter Tail*, no such competition existed in the present case -- FGT was the only source of wholesale gas in the region. Thus, the absence of competition on the generating (or wholesale) level in the present case means that consumers would not have benefitted had City Gas not refused to deal, in contrast to *Otter Tail* where consumers would have benefitted had Otter Tail not refused to deal. In addition, because City Gas never participated in the second level of the market, its conduct had no causal connection to any benefit consumers might have derived even if competition had existed on the production or wholesale levels. Applying Judge Easterbrook's interpretation of *Otter Tail*, then, that case does not control here.

Another possible rationale for the *Otter Tail* holding is that Otter Tail engaged in classic monopoly leveraging -- using its power on the transmission **[**165]** level to increase its business on the retail distribution level. Throughout the *Otter Tail* opinion, the Court indicated that Otter Tail had "'a strategic dominance in the transmission of power in most of its service areas'" and that Otter Tail used that dominance "to foreclose potential entrants into the retail area from obtaining electric power from outside sources of supply." *Id. at 377, 93 S. Ct. at 1029*. This rationale, of course, does not apply in the present case: City Gas has not engaged in monopoly leveraging. Otter Tail was clearly a vertically integrated company; City Gas, as I discuss above, was just as clearly not vertically integrated.

As the district court in *Otter Tail* stated, Otter Tail's "operation consists of an integrated power system running the full gamut from initial production to final sale of electrical power combined with pool arrangements which supply emergency power reserves." *United States v. Otter Tail Power Co., 331 F. Supp. 54, 56 (D.Minn. 1971)*. Although Otter Tail did the majority of its business on the retail level, it also contracted with a number of other electric systems to obtain supplementary power, which it both **[**166]** used itself and "regularly" wheeled to other companies. *Id. at 56-57*. **[*1308]** For example, it wheeled power to approximately eighteen municipalities pursuant to an interconnection contract with the Bureau of Reclamation, the entity that had agreed to supply wholesale power to one of the municipalities with which Otter Tail refused to deal. *Id. at 57-58*. City Gas, on the other hand, was not involved in the initial production of gas; it was not a natural gas wholesaler; nor did it buy excess quantities of gas to distribute to other companies for resale. Rather, it was engaged solely in the retail distribution of gas. City Gas was not attempting to use its market power as a natural gas producer or wholesaler (it was neither) to maintain its monopoly as a retail distributor of gas. It was simply choosing to maintain its operation exclusively on the retail level as it then existed, refusing to extend that operation to another level of the market. Whereas Otter Tail's anticompetitive conduct followed from its vertical integration, the alleged violative conduct here followed from City Gas' decision *not to* integrate vertically. For this reason, **[**167]** *Otter Tail* does not control.

Another point of distinction between *Otter Tail* and the present case concerns the status of the municipalities attempting to enter the retail distribution market in *Otter Tail* and that of Consolidated in the present case. For example, Elbow Lake, one of the municipalities that Otter Tail refused to supply, had constructed its own generating plant. The town had also arranged for a supply of wholesale power from the Bureau of Reclamation, which had high voltage lines in the area but relied on Otter Tail and other companies to wheel power from its bulk lines to its wholesale customers. When Otter Tail refused, Elbow Lake applied to the Federal Power Commission (FPC) for an order requiring Otter Tail to interconnect to Elbow Lake and sell the wholesale power itself. [41] Elbow Lake had thus independently assumed the costs and faced the barriers of entering into the retail distribution market. Not only had Elbow Lake built its own generating facilities, it had also gained the Commission's approval to interconnect with Otter Tail, a process that involved litigation against Otter Tail in two forums, *see id. at 371* & nn. 4 & 5, *93 S. Ct. at 1027* **[**168]** & nn. 4 & 5.

Here, in contrast, Consolidated has attempted to limit its entry costs: it wanted to purchase its gas from City Gas in order to enter the market in the most competitive posture and at the least possible expense. Whereas Elbow Lake completed the administrative process necessary to gain Commission approval of an interconnection to Otter Tail's system, Consolidated not only attempted to avoid the delay of such proceedings but also pointed to that delay as a justification for requiring City Gas to provide it with wholesale gas. Moreover, whereas Elbow Lake built an entire generating plant at great expense, Consolidated refused to invest even $ 250,000 to build the lateral pipeline that would have connected its pipesystem to FGT's line. In short, Elbow Lake was not attempting to obtain a free ride into the retail distribution market by forcing Otter Tail **[**169]** involuntarily to undertake a new function so that Elbow Lake could avoid the market's entry barriers and enjoy an enhanced competitive position. That, I suggest, is exactly what Consolidated is attempting to do. To impose a duty to deal on City Gas in these circumstances, therefore, would be to say that any potential market entrant deserves a free ride into the market, on the best possible terms, and at the expense of those entities that have already entered the market on more difficult terms, with more risk, and at greater costs. The antitrust laws, in my view, do not support such a result.

Otter Tail provides no basis for imposing a duty to deal in the present case for one further reason: it fails to address the remedy problem that arises here. The *Otter Tail* decree, which the Supreme Court approved, mandates that Otter Tail supply power -- either by selling its own at wholesale or by wheeling from other companies -- to municipalities that have established their own retail distribution systems. The Supreme Court addressed the regulatory **[*1309]** issues implicated by the decree, [42] but the Court conveniently failed to address the question of

---

[41] Although the FPC could not order a company to wheel involuntarily, the FPC did have authority to order interconnections and sales at wholesale.

[42] The Court faced the question of whether the federal regulatory scheme limited the district court's power to fashion a decree. The Court concluded that the requirement of FPC approval of interconnections posed a potential limit on the decree. Because the decree mandated wholesaling only subject to Commission approval, however, the facts of the case did not implicate that

price: if Otter Tail had **[**170]** to supply power, then how much should it get paid? As the Supreme Court concluded, "the District Court . . . in any event has retained jurisdiction to enable the parties to apply for 'necessary or appropriate' relief." *410 U.S. at 381-82, 93 S. Ct. at 1031-32*. Given the particular circumstances of the case, the district court on remand could presumably come up with a reasonable price term. Otter Tail already sold power at wholesale and wheeled power. Thus, the price terms in those existing transactions would provide a point of reference as the district court attempted to impose a price term for future transactions. In addition, Otter Tail did a substantial portion of its wheeling pursuant to a contract with the Bureau of Reclamation, a major supplier of wholesale power in the area. Many of the municipalities with which Otter Tail had refused to deal had themselves arranged to purchase wholesale power from the Bureau under the assumption that Otter Tail would wheel it. Thus, an even more specific reference point existed for imposing a price term with respect to many of the transactions that would arise pursuant to the district court's decree in *Otter Tail*.

[171]** The present case poses a different set of problems. *Otter Tail*, however, provides no solution. Given these circumstances, *Otter Tail* most certainly does not justify the imposition of liability in this case.

G. *MCI Revisited*.

I return finally to *MCI Communications Corp. v. AT & T, 708 F.2d 1081 (7th Cir. 1982)*, *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*, focusing on an aspect of the Seventh Circuit's holding that, in my view, does control in the present case and that demonstrates the absence of liability under *section 2* here. As I discuss above, *see supra* slip op. at 5171-5173, , the *MCI* case arose out of MCI's effort to enter the long-distance telephone market -- an effort that required access to the Bell network's local exchange facilities. As I also discuss above, *see id.*, the Seventh Circuit held that AT & T had a duty to allow MCI access to those local exchange facilities. [43] The court reached this conclusion by applying the essential facilities doctrine.

[172]** As the court stated:

> A monopolist's refusal to deal under these circumstances is governed by the so-called essential facilities doctrine. Such a refusal may be unlawful because a monopolist's control of an essential facility (sometimes called a "bottleneck") can extend monopoly power from one stage of production to another, and from one market into another. Thus, the antitrust laws have imposed on firms controlling an essential facility the obligation to make the facility available on non-discriminatory terms.

708 F.2d at 1132 (citing *Terminal R.R., 224 U.S. at 410-11, 32 S. Ct. at 515-16*). According to this statement, the concern motivating the essential facilities doctrine is that an entity with monopoly power on one level of a market can use that power to gain control on another level of a market -- i.e., **[*1310]** by monopoly leveraging. In order to prevent this from occurring, the essential facilities doctrine imposes a duty to deal on the monopolist.

Applying this rationale to AT & T's refusal to provide local interconnections for MCI's FX and CCSA services, *see supra* slip op. at 5173-5175, , the court characterized **[**173]** AT & T's refusal as an attempt to use its monopoly over local exchange systems to maintain its monopoly over long-distance services. *Id. at 1133*. The court pointed to *Otter Tail* as authority for holding that AT & T's conduct was anticompetitive. The court characterized the rationale

---

limit. If, in light of future events, a problem were to arise, the Court indicated that the district court, which retained jurisdiction, could consider the problem then.

The Supreme Court noted, however, that the Federal Power Act gave the FPC no authority to order an electric company to wheel if the company had not voluntarily undertaken an obligation to do so, *see id. at 375-76, 93 S. Ct. at 1028-29*. Thus, the federal regulatory scheme had no impact on the district court's decree that Otter Tail wheel power. *Id. at 376, 93 S. Ct. at 1029*; *see Florida Power & Light Co. v. FERC, 660 F.2d 668, 674-76 (5th Cir. Unit B Nov. 1981)*, *cert. denied*, ***459 U.S. 1156, 103 S. Ct. 800, 74 L. Ed. 2d 1003 (1983)***.

[43] In fact, the court held only that the evidence was sufficient to support the jury's finding that AT & T's refusal to deal was unlawful. *708 F.2d at 1132-33*.

behind the *Otter Tail* decision as a concern "that market power in one market (transmission) was being used to further a monopoly in another market (retail distribution)." *Id.* (citing *Otter Tail, 410 U.S. at 377-79, 93 S. Ct. at 1029-30*). Based on this interpretation of *Otter Tail* and the facts in MCI, the court held that AT & T's conduct was anticompetitive. MCI wanted to compete with AT & T on the long-distance level, but to compete on that level, MCI required access to the exchange facilities at the local level. AT & T refused to provide MCI that access, and the court held that the refusal violated *section 2*. [44] That holding provides no support for the district court's decision in the present case. As I maintain throughout this part, the situation is entirely different here: City Gas has not engaged in monopoly leveraging.

[174]** A different aspect of the *MCI* opinion, however, is instructive here. The *MCI* court also held that AT & T had no duty to allow MCI to interconnect to AT & T's long-distance system (as opposed to the local exchange facilities) for multipoint service. Multipoint service consists of a private line for a customer between City A and City B, such as MCI's Chicago-to-St. Louis line. In requesting multipoint interconnections to AT & T's system, MCI wanted access to AT & T's multipoint line running from City B to City C, for example from St. Louis to Kansas City. This claim was entirely different from the claim concerning interconnections to Bell's local exchange system. In effect, multipoint interconnections required access to AT & T's own *long-distance* system rather than to the local exchange system, which was all that MCI required in order to operate its FX and CCSA services. The multipoint interconnections, therefore, involved only the long-distance market, the very market in which MCI was attempting to compete with AT & T. MCI claimed that it could not compete in that market -- by providing multipoint service to its customers -- unless AT & T provided access to its own lines. **[**175]** AT & T contended that MCI was simply trying to use AT & T's lines to provide service to customers in cities where MCI's current facilities could not reach, even though MCI was authorized to build facilities that could reach those cities.

The Seventh Circuit rejected MCI's claim, holding that the denial of interconnections for multipoint service could not form a basis of liability. *Id. at 1149*. The court reasoned that

> MCI's primary business was to build precisely the type of facilities to which it sought access from the Bell System. There was no sufficient explanation as to why MCI, on the one hand, was building its own network, and, on the other, was entitled to access in the interim to AT & T's facilities. Thus, the jury lacked sufficient evidence to conclude that these interconnections were essential.

Id. at 1148. The court continued:

> As a matter of antitrust liability, . . . can an entrant which actually builds its own facilities between Chicago and Milwaukee, for example, thereby gain entitlement to use all the far-flung facilities of the Bell System? Is its entitlement based on its expressed intention to duplicate major portions of the Bell **[**176]** System **[*1311]** a national basis? Could it claim entitlement before (or without) building any facilities of its own? We think the ramifications of the demand for multipoint service are troubling and complex, and that under the circumstances of this case . . ., the denial of interconnections for multipoint service cannot form a basis of liability.

Id. at 1149. [45]

I suggest that this holding controls in the present case. Like MCI, Consolidated had no basis for claiming an entitlement to buy wholesale **[**177]** gas from City Gas. As in *MCI*, Consolidated's primary business was to provide

---

[44] MCI merely wanted access to the local exchange facilities on the same terms that AT & T had access to them. The Bell System, which consisted of twenty-three operating companies, provided the local exchange services. These companies were in the business of providing telephone service on the local level and of selling AT & T access to that service for its long-distance operation. Thus, the Bell System was obviously in the business of interconnecting long-distance lines to its local switching services.

[45] The court reached this conclusion based on its application of antitrust principles. It considered those principles independently of the effect that a regulatory determination regarding such interconnections might have. As the court admitted, its conclusion might have been different if the FCC had authorized or mandated that AT & T provide the interconnections. Without such an FCC order, however, the antitrust laws imposed no duty on AT & T to provide the interconnections. *See id. at 1149*.

the same service as City Gas provided. City Gas operated a retail distribution system; Consolidated wanted to do exactly the same. Like MCI, Consolidated claimed that it could not compete in the retail distribution market unless it had access to City Gas' system. As in *MCI*, Consolidated wanted access to City Gas' system so that it could provide the same service that City Gas provided and compete with City Gas on the same, and only, level of the market on which City Gas operated. Consolidated, like MCI, had every right to compete in the market at issue, and City Gas, like AT & T, could do nothing to prevent Consolidated from competing. As the *MCI* court indicated, however, City Gas had no duty to help Consolidated enter into competition against it. Like AT & T, which was not in the business of providing interconnections for other long-distance services (as compared to the local Bell companies, which were in the business of providing interconnections for long-distance systems), City Gas was not in the business of selling gas at wholesale. The refusal to deal in the present case, like AT & T's refusal **[**178]** to provide multipoint interconnections in *MCI*, related only to a single level of market operation and involved no attempt to leverage into another market level. Following the rule in *MCI*, if Consolidated wanted to provide the same service as provided by City Gas, which operated on a single market level as a non-vertically integrated entity, then Consolidated itself had to construct the facilities that such an operation required.

H. *Conclusion.*

As I discuss above, *see supra* slip op. at 5178-5180, , the antitrust laws do not impose a positive duty to help a competitor. The antitrust laws proscribe conduct that inhibits competition; the laws, however, do not purport to facilitate competition by imposing a duty on a company to help another company into competition. As the Seventh Circuit stated in *Olympia*, a firm

> has no general duty to help its competitors. . . . "There is a difference between positive and negative duties, and the antitrust laws, like other legal doctrines sounding in tort, have generally been understood to impose only the latter." . . . A monopolist has no duty to reduce its prices in order to help consumers, . . . and no duty to **[**179]** extend a helping hand to new entrants. . . .

797 F.2d at 375-76 (quoting *SPS Technologies, 694 F.2d at 512-13*) (citations omitted). This is especially true when such a duty would require the company to undertake a course of dealing in which it does not already engage -- such as providing interconnections or selling gas at wholesale where it normally does not. Courts must respect rational decisions of economic actors. If an entity has opted not to undertake a course of operation, courts have no business second-guessing that decision. In addition, the imposition of a duty to deal in such circumstances would encourage economic inefficiencies and promote inequity. An attempt by any company to develop a product or service -- i.e., to compete in a market -- requires initiative, innovation, and risk-taking. Our antitrust laws are designed to ensure that every company has **[*1312]** the opportunity to compete under these terms, but not to require that a company which has made this investment in capital and taken this initiative and risk provide a free ride into the market for every potential competitor that comes along. Such a policy would be unfair **[**180]** to those companies that have made investments and taken risks; moreover, it would discourage businesses from taking initiative, assuming risk, and making investments of capital in the first place. A policy with these results would not, in my view, be a good one. More importantly, it is not the policy that our antitrust laws were designed to promote.

As the above sections demonstrate, no legal basis exists for requiring City Gas to enter the wholesale business and supply Consolidated with gas. The factual circumstances of this case are fundamentally different from typical refusal-to-deal cases, and given the circumstances here, City Gas' refusal to deal gives rise to no inference of anticompetitive intent under any of the approaches used by courts to evaluate circumstantial evidence. Finally, as I discuss in more detail in the next part, the present case presents extreme administrative problems for the imposition of an effective remedy -- problems that Congress could not have intended the courts to solve. City Gas' conduct, therefore, does not constitute a violation of *section 2*.

VI. THE *FIFTH AMENDMENT*

As part V demonstrates, this case is not a typical refusal-to-deal case. **[**181]** In the typical refusal-to-deal case, a defendant participates in the market at issue, selling a product or service either directly to a plaintiff (in previous transactions) or to other customers. The defendant then attempts to charge the plaintiff a higher price than it charges other customers or simply refuses outright to deal with the plaintiff. As a result, the plaintiff [46] **[**182]** brings suit under the Clayton Act, *15 U.S.C. §§ 15*, *26*, contending that the defendant has violated *section 2* of the Sherman Act by refusing to supply the product at issue to the plaintiff and seeking an injunction ordering the defendant to supply the product on the same terms as those given to the defendant's other customers and also seeking damages. [47] If the court concludes that the defendant has violated *section 2* of the Sherman Act by charging the plaintiff higher prices or refusing outright to deal with the plaintiff, then the court orders the defendant to deal with the plaintiff and to do so at the same price that the defendant has set in its dealings with other customers.

In the present case, City Gas has never sold gas for resale to anyone. [48] In deciding **[*1313]** not to supply gas to Consolidated, City Gas did not discriminate against Consolidated by attempting to charge Consolidated a higher price than City Gas charged its other customers or by entirely denying Consolidated a service that City Gas provided to other customers. Under these circumstances, the district court could not conclude that City Gas violated *section 2* by treating Consolidated differently than City Gas treated its other customers. Nor could the district court require City Gas to sell wholesale gas to Consolidated at the same **[**183]** price that City Gas sold gas to its other customers. Such a decree would be meaningless since City Gas has never sold wholesale gas to any firm at any price.

[184]** Under the typical refusal-to-deal cases, therefore, City Gas did nothing wrong. It merely operated as a retail gas distributor in its established service area and decided not to deal at all on the wholesale level. The district court, however, developed a new rule of law: it held that *section 2* of the Sherman Act imposed a positive duty on City Gas to change the nature of its operation and sell wholesale gas to Consolidated so that Consolidated could enter the retail distribution market and compete with City Gas. [49] The district court applied this rule in the present

---

[46] The government might also bring a civil enforcement action under *section 4* of the Sherman Act, *15 U.S.C. § 4*, to enjoin the defendant from refusing to deal in violation of *section 2*. *See infra* note 11.

[47] As I elaborate below, *see infra* slip op. at 5205-5210, , the private plaintiff may also seek, in addition to an injunction, damages for profits lost between the refusal to deal and the date of final judgment; or, if injunctive relief would not provide a remedy because the refusal to deal forced the plaintiff to go out of business, then the plaintiff may seek damages for loss of its going concern value and damages for profits lost in the interim.

[48] The district court and panel made much of the fact that City Gas "had, in fact, entered into a contract with a third party [Florida Gas] to sell its gas for resale." *880 F.2d at 300*, *see* *665 F. Supp. at 1510*. This contract, however, was merely executory: City Gas never performed. As the panel claimed, this contract no doubt provides evidence that City Gas had "*power*" to sell gas at wholesale, *880 F.2d at 301* (emphasis in original), but the contract is not evidence that City Gas ever actually did sell at wholesale. As I discuss in part IV, that City Gas might have possessed the *power* to sell at wholesale is neither here nor there; rather, what is significant is that City Gas *legitimately chose not to exercise* that power -- not selling to Consolidated, to Florida Gas, or to any other firm. And in making this choice, City Gas did nothing wrong.

As I also discuss in part IV, the contract would not be relevant even if the parties had not abandoned it: the contract would have involved a different geographic market than the market involved in the present case. Perhaps the best evidence of this contract's irrelevance, though, is the fact that the district court never looked to it as a basis for establishing a selling price in its injunctive order requiring City Gas to supply wholesale gas to Consolidated. The district court delegated the task of establishing a selling price to the FPSC. *See* *665 F. Supp. at 1512, 1534, 1545*. In so doing, the district court implicitly found the Florida Gas contract to be unreliable as evidence of City Gas' wholesale gas price.

[49] In articulating this new rule of law, the district court should have distinguished the body of antitrust cases in which courts have held that the antitrust laws impose no positive duties, but only negative duties. *See, e.g.,* *Aspen, 472 U.S. at 600-01, 105 S. Ct. at 2856-57*; *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992 (1919)*; *Olympia, 797 F.2d at 376 (7th Cir. 1986)*; *Florida Fuels, Inc. v. Belcher Oil Co., 717 F. Supp. 1528, 1532 (S.D.Fla. 1989)*. These cases teach that a

case to take a portion of City Gas' gas supply and give it to Consolidated. This new rule thus requires City Gas -- a company that has done nothing wrong -- to undertake a new level of operation and engage in a forced sale of wholesale gas to Consolidated.

[185]** In my view, Congress could not have intended *section 2* of the Sherman Act to mandate such a result. This becomes apparent when one considers the practical implications of the rule's enforcement, which the district court, as well as this court today, has entirely failed to do. As those implications suggest, the rule will be impossible to apply. The district courts of this circuit will confront severe difficulties in fashioning remedies under the rule. In addition, the rule's application will frustrate the very purposes behind the antitrust laws. I develop these points in the following section by analyzing how a court would apply this new rule to the facts of the present case.

I first introduce the idea that this rule implicates the *fifth amendment takings clause*. As I note above, because City Gas has never sold gas at wholesale and has therefore established no price for such sales, the court under these circumstances must set a selling price if it is to require City Gas to sell to Consolidated. That price must satisfy the *fifth amendment's* just compensation requirement. [50] I then consider what finding the *just compensation clause* requires under the present facts. Next, I discuss **[**186]** some further implications of the *fifth amendment*, which suggest that the rule is impossible to apply and leads to results that are inconsistent with the purposes behind the antitrust laws. Based on this discussion, I conclude that Congress could not have intended *section 2* to support such a rule. The rule, therefore, should be struck down.

[*1314] Because our court today nevertheless upholds this impossible rule, I analyze in section B the district court's errors in attempting to apply it and conclude that the judgment should be vacated and the case remanded for further proceedings as I describe.

A. *Implications of Enforcing the Rule*.

1. The *Fifth Amendment*.

The *fifth amendment* provides in pertinent part: "nor **[**187]** shall private property be taken for public use, without just compensation." *U.S. Const. Amend. 5*. Courts have long held that the *fifth amendment* applies to utility rates set by federal and state regulatory agencies: in order to satisfy the *just compensation clause*, rates must not be "so 'unjust' as to be confiscatory," *Duquesne Light Co. v. Barasch, 488 U.S. 299, __, 109 S. Ct. 609, 615, 102 L. Ed. 2d 646 (1989)*. *See, e.g., In re Permian Basin Area Rate Cases, 390 U.S. 747, 770, 88 S. Ct. 1344, 1361, 20 L. Ed. 2d 312 (1968)*; *FPC v. Natural Gas Pipeline Co. of Am., 315 U.S. 575, 585-86, 62 S. Ct. 736, 742-43, 86 L. Ed. 1037 (1942)*; *Tenoco Oil Co. v. Department of Consumer Affairs, 876 F.2d 1013, 1020 (1st Cir.1989)*; *Jersey Cent. Power & Light Co. v. FERC, 258 U.S. App. D.C. 189, 810 F.2d 1168, 1175 (D.C.Cir.1987)*. This line of cases indicates that the *fifth amendment* does not proscribe rate regulation in and of itself; rather, it proscribes rate regulation *at a price that denies just compensation*. The Supreme Court has therefore articulated a standard -- the "historical cost basis" -- for **[**188]** reviewing rate regulations to determine whether they satisfy this constitutional mandate. *See Barasch*,

---

company has no duty to foster competition or to aid a competitor but that a company may not do anything to prohibit competition or to prevent a company from competing. Under the district court's new rule, which the court today upholds, *section 2* would seem to impose a positive duty on City Gas, requiring it to sell at wholesale to Consolidated so that Consolidated can compete, even though City Gas has never voluntarily sold wholesale gas to any firm. Although I see no grounds for distinguishing these cases from the present case, I assume for purposes of discussion that their inapplicability to the present case could be explained.

[50] In the typical refusal-to-deal case, the *fifth amendment* poses no problem: the court requires the defendant to sell at its already-established selling price, applying a presumption that the defendant has set the price that it must receive in order to obtain just compensation.

489 U.S. at , 109 S. Ct. at 616-17; *FPC v. Hope Natural Gas Co., 320 U.S. 591, 603-05, 64 S. Ct. 281, 288-89, 88 L. Ed. 333 (1944)*. [51]

[189]** Assuming the facts of the present case, a different category of regulation is involved. The regulation here goes beyond ratemaking to require City Gas to provide a service that it did not normally provide. If administrative price regulation implicates the *fifth amendment*, then this more intrusive category of regulation obviously implicates the *fifth amendment* as well. [52] **[**190]** Thus, if **[*1316]** this "taking" is to pass constitutional muster, then a court confronting these facts must set a price in its injuction that provides City Gas with just compensation for its gas. [53]

---

[51] The *Hope* Court approved historical cost as a basis for calculating rates. Under this rule, just compensation is provided by "rates which enable [a] company to operate successfully, to maintain its financial integrity, to attract capital, and to compensate its investors for the risks assumed." *Hope, 320 U.S. at 605, 64 S. Ct. at 289*.

The rationale behind this rule, as one judge has stated, is that regulation

> was part of the original compact between investors and the state. Rate regulation is, in theory, the substitute for competition. The state stands in the shoes, as it were, of competitors, keeping the utility within bounds that would be drawn by market forces in a non-monopolistic market. Whether economically sound or not, utility rate regulation in itself raises no constitutional concerns.

Jersey Central, 810 F.2d at 1190 (Starr, J., concurring). A crucial principle behind this rule, therefore, is the idea that the utility companies have *voluntarily* undertaken to operate in a regulated industry, enjoying the benefits of a natural monopoly in return for submitting to reasonable regulation of their rates. As a corollary to this principle, the utility company may, of course, choose not to participate in the industry any longer: although the regulations limit the companies' rates, those regulations, as this court has itself observed, do not require "the regulated group . . . to participate in the regulated industry." *Whitney v. Heckler, 780 F.2d 963, 972* (11th Cir.), *cert. denied*, ***479 U.S. 813, 107 S. Ct. 65, 93 L. Ed. 2d 23 (1986)***.

[52] Application of established takings cases also supports this conclusion. In this case, the "compact" rationale, *see supra* note 51, under which utilities voluntarily subject themselves to regulation in return for certain benefits, does not apply. Rather, "the regulated group is . . . required [by a federal court implementing the Sherman Act] to participate in the regulated industry," *Whitney, 780 F.2d at 972*, and courts have considered such compulsion to be an important indication of a *fifth amendment* taking. Such a regulation could still be enforced if the company was provided just compensation. Because the company acts under compulsion, however, rather than voluntarily submitting to regulation as in the ratemaking cases, the court should apply a more rigorous standard for just compensation than the relatively broad "zone of reasonableness" standard developed under *Hope*. Before turning to the question of just compensation, I first analyze this case under established takings principles.

As the Supreme Court has emphasized, "the power to exclude has traditionally been considered one of the most treasured strands in an owner's bundle of property rights." *Loretto v. Teleprompter Manhattan CATV Corp., 458 U.S. 419, 435, 102 S. Ct. 3164, 3176, 73 L. Ed. 2d 868 (1982)*; *see* *Nollan v. California Coastal Comm'n, 483 U.S. 825, 830-32, 107 S. Ct. 3141, 3145, 97 L. Ed. 2d 677 (1987)*; ***Kaiser Aetna v. United States, 444 U.S. 164, 179-80, 100 S. Ct. 383, 393, 62 L. Ed. 2d 332 (1979)***; *see also* *FCC v. Florida Power Corp., 480 U.S. 245, 251-53, 107 S. Ct. 1107, 1112, 94 L. Ed. 2d 282 (1987)*. In fact, the Court has held that a permanent physical occupation of property by the government constitutes a *per se* taking. *See, e.g., Loretto, 458 U.S. at 434-36, 102 S. Ct. at 3175-76*; *see also* *Florida Power Corp., 480 U.S. at 251-53, 107 S. Ct. at 1112*. The severity of such an invasion warrants this conclusion without requiring analysis under the "multifactor inquiry generally applicable to nonpossessory governmental activity." *Loretto, 458 U.S. at 440, 102 S. Ct. at 3178-79*; *see* *Penn Central Transp. Co. v. City of New York, 438 U.S. 104, 124, 98 S. Ct. 2646, 2659, 57 L. Ed. 2d 631 (1978)* (describing multifactor inquiry); *see also infra* (applying inquiry in present case). The Supreme Court has emphasized, however, that this permanent-physical-occupation rule is "very narrow." *See, e.g., Florida Power, 480 U.S. at 251-53, 107 S. Ct. at 1112*; *Loretto, 458 U.S. at 441, 102 S. Ct. at 3179*.

In my view, this case presents a close question concerning the *Loretto* rule's applicability. *Loretto* involved a state regulation that required landlords to allow cable television companies to install cable facilities on their property. The Court found that the installation involved a permanent, physical attachment and thus held that it constituted a *per se* taking. *Loretto, 458 U.S. at 441, 102 S. Ct. at 3179*. As the Court has subsequently indicated, a key rationale behind that holding was the fact that the statute *required* landlords to allow cable installation. On this basis, the Court in *Florida Power* distinguished a federal statute, the Pole Attachments Act, *47 U.S.C. § 224 (1982)*, which authorized the FCC to regulate the terms of contracts between utility companies

[191]**

---

and cable operators for the attachment of cable to utility poles, from the regulation in *Loretto*. As the *Florida Power* court discussed,

> while the statute we considered in *Loretto* specifically *required* landlords to permit permanent occupation of their property by cable companies, nothing in the Pole Attachments Act as interpreted by the FCC in these cases gives cable companies any right to occupy space on utility poles, or prohibits utility companies from refusing to enter into attachment agreements with cable operators.

480 U.S. at 251, 107 S. Ct. at 1112. The Court in *Florida Power* expressly stated, however, that it did "not decide . . . what the application of *Loretto* . . . would be if the FCC in a future case required utilities, over objection, to enter into, renew, or refrain from terminating pole attachment agreements." *Id. at 251 n. 6, 107 S. Ct. at 1112 n. 6*. The present case seems to present exactly this question, and to the extent that the element of compulsion explains the rule in *Loretto*, that rule should apply here.

Another key factor in the *Loretto* decision was the nature of the invasion: the permanence of the facilities and the landlord's lack of control over them and their installation. In my view, the invasion in the present case is factually similar. As in *Loretto*, the district court's mandate requires a permanent, physical intrusion onto City Gas' property. The intrusion is permanent in two ways: first, a pipe must be constructed *permanently* to attach City Gas' pipesystem to Consolidated's pipesystem; and second, this interconnecting pipe will permanently drain natural gas from City Gas' pipesystem and into Consolidated's pipesystem. As the Court has previously held, such a continuous arrangement constitutes a "permanent physical occupation" for purposes of the *Loretto* rule. *See* Nollan, 483 U.S. at 832, 107 S. Ct. at 3145 (easement giving individuals "permanent and continuous right to pass to and fro, so that the real property may continuously be traversed").

I also think that City Gas, like the landlord in *Loretto*, lacks control over this invasion. City Gas has no control over the invasion in that City Gas cannot refuse to provide gas. But City Gas also lacks control over the invasion in a secondary sense that the *Loretto* Court also held to be important. The Court there referred to the landlord's lack of control over the "placement, manner, use, and possibly the disposition of the installation" and suggested that the outcome might have been different if the landlord had such control. *458 U.S. at 440 n. 19, 102 S. Ct. at 3179 n. 19*. Similarly, in *Nollan*, the Court noted the property owner's inability to regulate the continuous flow of traffic across his property. *See* *483 U.S. at 830-32, 107 S. Ct. at 3145*. Here, City Gas will have to supply gas according to the terms mandated by the district court: in set amounts, at set times, and at set prices. The fact that City Gas owns its own pipesystem is of no significance. The district court, and not City Gas, decrees the terms of the arrangement. I would think, therefore, that *Loretto* controls: if *section 2* of the Sherman Act requires City Gas to deal under these circumstances, that constitutes a *per se* taking.

Even if *Loretto* does not control, this forced supply constitutes a taking under the *Penn Central* multifactor inquiry. That inquiry looks to (1) the economic impact of the regulation, (2) the extent to which it interferes with investment-backed expectations, and (3) the character of the governmental action. *See* Penn Central, 438 U.S. at 124, 98 S. Ct. at 2659. Imposing a duty to deal will have a significant economic impact on City Gas. With an investment of time and money, City Gas will have to divert some of its own gas supply to Consolidated and also administer the actual process of supplying gas to Consolidated. In addition, by enabling Consolidated to compete without having to undertake the costs associated with entry into the natural gas supply business, the duty to deal might force City Gas to change its retail distribution business: in order to avoid losing customers to Consolidated, City Gas might (subject to the FPSC's approval) have to lower its retail prices, if it can do so without loosening the safety controls of its operation; it might have to undertake a more aggressive marketing strategy, which would in turn increase its operating costs; it might also lose potential business opportunities -- e.g., the ability to extend its services to customers in territory occupied by Consolidated. In the event of a gas shortage, moreover, City Gas might have to curtail delivery to its own customers in order to continue supplying Consolidated.

As these considerations suggest, the duty to deal will also interfere with City Gas' investment-backed expectations. By changing the market's regulatory structure and altering the nature of competition in that market, the duty to deal will significantly affect these expectations.

Finally, the character of the district court's invasive action suggests a taking. This is not a case where a government regulation merely restricts the use of property. Rather, the case involves an actual physical invasion of City Gas' property: gas is removed from its pipesystem and transferred to Consolidated's pipesystem. Even under the multifactor inquiry, therefore, this case involves a taking.

The *fifth amendment* requirement means more though: it also controls the court's determination of whether City Gas violated the duty to deal imposed under this new rule. The *fifth amendment* protects City Gas from having to sell its gas at a price lower than the just compensation price. Thus, City Gas violated its duty to deal under *section 2* only if it refused to deal *at the fifth amendment price*. [54] The court must make this determination by comparing the *fifth amendment* price to the selling price actually offered by City Gas and evaluating whether that offered price was unreasonably high, thus constituting a refusal to deal in violation of *section 2*. The court must therefore set the *fifth amendment* price in order not only to fashion its injunction, but also to evaluate whether City Gas violated its duty to deal in the first place.

[192]** In addition, the *fifth amendment* price controls the court's determination of whether Consolidated can satisfy the injury-in-fact requirements of *sections 4* and *16* of the Clayton Act. As I discuss below, *see infra* slip op. at 5206-5207, , in order to prove injury, or the likelihood of injury, for purposes of *sections 4* and *16*, Consolidated must show that it could have turned a profit by purchasing wholesale gas from City Gas *at the fifth amendment price*. If Consolidated could not have turned a profit after purchasing gas at that price, then City Gas' refusal to deal did not injure Consolidated, and Consolidated has no standing under the Clayton Act to point to that conduct as a basis for liability under *section 2*. In order properly to decide this issue, however, the court must first find the *fifth amendment* price. I now consider the application of **[*1317]** these *fifth amendment* requirements to the present facts.

2. Finding a *Fifth Amendment* Price.

Assuming the facts of the present case, the court finds as follows: City Gas initially offered to sell the gas at cost [55] plus ten cents per therm. Consolidated eventually made a counter offer to buy the gas at cost **[**193]** plus two and one-half cents per therm. City Gas rejected the offer as too low, but then lowered its initial price to cost plus seven cents per therm. Consolidated later proposed a price of cost plus five cents per therm. The parties reached no agreement and the negotiations ceased. *See* *665 F.Supp. at 1510*. [56]

---

[53] In deciding this case, of course, the court faces the question of just compensation in a different procedural context than it would in the standard ratemaking cases that I cite above. Rather than *reviewing* a state or federal agency's rate determination to decide whether it passes constitutional muster, the court, as I explain in the text below, must itself *set* the just compensation price in order to determine the issue of liability in the case.

In addition, this "taking" must satisfy the *fifth amendment's* "public use" requirement. That requirement, however, has been interpreted broadly. As the Supreme Court stated in *Hawaii Housing Auth. v. Midkiff, 467 U.S. 229, 240, 104 S. Ct. 2321, 2329, 81 L. Ed. 2d 186 (1984)*, "the 'public use' requirement is . . . coterminous with the scope of a sovereign's police powers." *See also* *Berman v. Parker, 348 U.S. 26, 32-33, 75 S. Ct. 98, 102, 99 L. Ed. 27 (1954)*. Thus, the courts conduct "'an extremely narrow'" review of "a legislature's judgment as to what constitutes a public use," *Midkiff, 467 U.S. at 240, 104 S. Ct. at 2328* (quoting *Berman*): "the Court . . . will not substitute its judgment for a legislature's judgment as to what constitutes a public use 'unless the use be palpably without reasonable foundation,'" *id. at 241, 104 S. Ct. at 2329* (quoting *United States v. Gettysburg Elec. R. Co., 160 U.S. 668, 680, 16 S. Ct. 427, 429, 40 L. Ed. 576 (1896))*. I assume, for the sake of discussion, that the taking in the present case would satisfy this requirement.

[54] In effect, antitrust doctrine already reflects this idea by holding that a party is not liable under *section 2* for a refusal to deal if a valid business justification supports that party's decision. *See, e.g.,* *Mid-Texas Communications Sys., Inc. v. AT & T, 615 F.2d 1372, 1388-89* (5th Cir.), *cert. denied*, ***449 U.S. 912, 101 S. Ct. 286, 66 L. Ed. 2d 140 (1980)***; *Poster Exchange, 431 F.2d at 339*; *Gamco, Inc. v. Providence Fruit & Produce Bldg., Inc., 194 F.2d 484, 488* (1st Cir.), *cert. denied*, ***344 U.S. 817, 73 S. Ct. 11, 97 L. Ed. 636 (1952)***.

[55] In its "cost" figure, the district court below included only the price that City Gas paid for its wholesale gas and not the overall costs that City Gas incurred in its retail gas operation. *See* *665 F. Supp. at 1511*.

[56] As I discuss above, *see supra* notes 5 & 7, the district court below put a spin on these facts, characterizing City Gas as the bad guys and Consolidated as the good guys. The district court suggested that City Gas knew its initial offer of cost plus ten cents per therm was too high and that the FPSC would never approve it. In addition, the district court pointed to testimony by

[194]**

Now, in order to prove its case under the new rule, Consolidated must make two showings: it must (1) establish a selling price that will justly compensate City Gas; and (2) prove that City Gas' price of cost plus seven cents per therm was substantially higher than the just compensation price [57] and therefore constituted a refusal to deal under *section 2*. [58] I next consider how Consolidated can establish the just compensation price.

[195]**

A just compensation price provides a property owner with a reasonable rate of return on its investment. In a typical takings case, for example where the government institutes a condemnation procedure and takes Blackacre so that the interstate highway can become two lanes wider, the government compensates the owner for Blackacre's fair market value, or "what a willing buyer would pay in cash to a willing seller." *United States v. Miller, 317 U.S. 369, 374, 63 S. Ct. 276, 280, 87 L. Ed. 336 (1943)*. [59] The present facts, however, do not describe a typical takings case. Rather than the one-shot taking of Blackacre to widen the interstate highway, the present facts involve a *continuous* taking of a portion of City Gas' assets. The fair-market-value standard obviously does not provide **[*1318]** an acceptable formula for calculating a reasonable rate of return in a case involving this type of continuous taking. *See* *Hope, 320 U.S. at 601, 64 S. Ct. at 287* ("The heart of the matter is that rates cannot be made to depend upon 'fair value' when the value of the going enterprise depends on earnings under whatever rates may be anticipated.") Consolidated **[**196]** must therefore find an alternative basis for establishing a *fifth amendment* price.

As one possibility, Consolidated might point to a wholesale gas price set by a company similarly situated to City Gas, claiming that that price will provide City Gas just compensation. That company has to be virtually identical to City Gas in terms of the factors that a gas company takes into account in setting its wholesale price, *see infra*. For example, the company must deal in both the retail and wholesale markets. No such company exists under the facts of the present case. [60] **[**198]** Nor can Consolidated point to any other existing operation, under the facts here, as

---

City Gas' Vice President that "he made no attempt to ascertain a reasonable price for direct gas sales to Consolidated, and that he came up with the cost plus ten cents terms 'out of the air.'" *665 F. Supp. at 1510*.

This characterization assumes that City Gas had a duty to enable Consolidated to enter the natural gas business at as little cost as possible so that it could most effectively compete with City Gas. Because City Gas did not want, and did not seriously attempt, to do this, the court characterized its behavior as bad. This characterization is counterintuitive. City Gas did exactly what one would expect any rational business firm to do: it continued operating as it normally did, doing nothing illegal to obstruct a potential competitor's entrance into the market but also doing nothing to facilitate its entrance into the market. To characterize this type of conduct as bad is to adopt a position totally at odds with normal business practices in this country.

[57] Consolidated must show that City Gas' price exceeded the *fifth amendment* price by a *substantial* amount. If that point is fairly debatable, then City Gas will not be subject to liability.

I suggest that Consolidated might also have to show that its counter offer was reasonable in light of the *fifth amendment* price. If Consolidated offered a price, indicating that it would *pay no more* for the gas, and the *fifth amendment* price substantially exceeded Consolidated's offered price, then Consolidated has no claim under *section 2*.

[58] Consolidated bears the burden of proof on this point. In arranging the order of proof, however, the court might apply a presumption requiring City Gas to come forward with all of the evidence, on the ground that the evidence is exclusively in its possession and that fairness requires City Gas to proceed first. City Gas will then have to present evidence demonstrating that the price it quoted to Consolidated was necessary to provide just compensation. See *infra* slip op. at 5199-5203, , for a discussion of the factors relevant to such a showing. The burden, however, will then shift to Consolidated to rebut City Gas' just compensation price.

[59] Blackacre's fair market value can be determined based on the selling price of comparable pieces of property. Even if no comparable sales have occurred in the market, the value can be determined by constructing a hypothetical market and taking expert testimony regarding Blackacre's best-use price.

a basis for calculating the just compensation price. [61] Instead, **[**197]** Consolidated has to establish the *fifth amendment* price based on City Gas' actual costs, which is in effect the historical-cost basis of the *Hope-Barasch* cases. *See supra* note 51 & accompanying text.

Under this inquiry, Consolidated must establish a variety of factors, for example: (1) the price at which City Gas itself purchases the gas; (2) City Gas' operating costs in purchasing and delivering the gas; (3) City Gas' fixed costs in purchasing and delivering the gas; and (4) any business opportunities that City Gas might lose as a result of selling gas to Consolidated. [62] In addition, a court faced with the present facts must take into account the risks assumed by City Gas' investors. The court **[**199]** must determine the return needed to compensate those investors for that risk, and the greater the risk, the higher the rate of return has to be. [63] **[**200]** The court must evaluate all of the evidence and, adopting the role of a ratemaker, set a price that enables City Gas to sell at a reasonable profit. Consolidated must then prove that City Gas' offered price was unreasonable. [64] In **[*1319]** addition, the court must determine, for purposes of the injury-in-fact requirement of *sections 4* and *16* of the Clayton Act, whether Consolidated can turn a profit at the *fifth amendment* price.

Courts have a difficult enough time interpreting and applying the historical-cost test in a reviewing capacity. *See, e.g., Jersey Central, 810 F.2d at 1175*. [65] **[**201]** I suppose, however, that if an administrative agency can

---

[60] If such a company had existed in the present case, then the district court below, in fashioning its injunction requiring that City Gas sell to Consolidated, would not have had to delegate to the FPSC the task of setting a selling price. *See 665 F. Supp. at 1512, 1534, 1545*. Instead, it could have looked to that other company's wholesale gas price as evidence of City Gas' just compensation price.

Even if such a company could be found, its selling price would probably not be controlling. That company would be a regulated company, selling its wholesale gas at rates approved by the FPSC. As such, that company would have voluntarily undertaken to sell at wholesale in a regulated market, subjecting itself to the FPSC's rates in return for the benefits of operating in a regulated industry. *See supra* note 51. That price would not be presumptively fair to City Gas, a company that has not voluntarily undertaken to deal at those FPSC-approved rates.

[61] Consolidated obviously could not point to the price charged by wholesalers like FGT, as a basis for the just compensation price. City Gas has opted not to sell in the wholesale market, applying its resources to the retail market instead. As a retail distributor, City Gas' fixed and operating costs are entirely different from those of a wholesaler like FGT: City Gas' investments are committed to a variety of expenditures that are unnecessary for a wholesale operation. In order to receive a reasonable return on its investment, therefore, City Gas must charge a different price than FGT charges.

[62] In order to evaluate this last factor, the court considers, in part, probable changes in the market value of Consolidated's stock.

[63] As the *Hope* Court stated:

The investor interest has a legitimate concern with the financial integrity of the company whose rates are being regulated. From the investor or company point of view it is important that there be enough revenue not only for operating expenses but also for the capital costs of the business. These include service on the debt and dividends on the stock. . . . By that standard the return to the equity owner should be commensurate with returns on investments in other enterprises having corresponding risks. That return, moreover, should be sufficient to assure confidence in the financial integrity of the enterprise, so as to maintain its credit and to attract capital.

320 U.S. at 603, 64 S. Ct. at 288.

[64] That is, Consolidated must prove that the price City Gas offered Consolidated was *substantially* higher than the *fifth amendment* price. *See supra* note 57.

[65] In that context, moreover, the courts' task is eased by a high initial burden of proof on the utility company to show that the rate is unreasonable before the test even applies. In addition, the courts apply a broad standard of reasonableness in reviewing rates set by regulators. In part, that standard reflects institutional concerns and ensures the courts' deference to agencies' determinations. That standard also reflects the nature of the compact between utility companies that have voluntarily entered a regulated market and the state, which regulates the market. *See supra* note 51. In the present case, however, City Gas has not

establish a rate by taking evidence concerning these factors, then the court can adopt the role of a regulator and do so too. Of course, the just compensation price established by the court under the present facts must satisfy a more stringent standard than the standard that applies to rates set by a regulatory agency. *Cf. id.; supra* note 51. [66]

In order to demonstrate that Congress could not have intended *section 2* to support such a rule in the first place, I continue with this analysis and assume, for the sake of discussion, that Consolidated manages to establish (1) the *fifth amendment* price in this case, (2) that City Gas breached its **[**202]** duty under *section 2* by offering a price that was unreasonably high in light of the *fifth amendment* price, and (3) that Consolidated actually suffered damages as a result of City Gas' refusal to deal. I assume further that the court orders City Gas to supply wholesale gas to Consolidated at the *fifth amendment* price. As I describe in the next section, however, the matter would not end there.

3. Changed Circumstances.

Assume that City Gas abides by the court's decree and begins supplying gas for resale to Consolidated. A few months later, the cost of supplying gas to Consolidated increases. As a result, the price set by the court in its decree no longer justly compensates City Gas, and City Gas moves for a modification of the decree to increase the selling price. Consolidated opposes the increase. At that point, the court, which has retained jurisdiction, again has to assume the role of regulator and undertake an extensive inquiry into the facts to determine whether a price increase is justified.

The increase in City Gas' costs can result from any of several factors: City Gas' purchase price from FGT might increase; City Gas' own delivery costs might increase; or, City Gas might **[**203]** make some business decisions that increase its operating costs. Assume here that City Gas decides that it must spend more money on advertising in order to compete with Consolidated: after all, Consolidated entered the market in order to compete with City Gas, which is exactly what the district court's injunction was designed to achieve.

At the hearing, therefore, City Gas argues that the just compensation price must include the legitimate expenses of competing with Consolidated. If the *fifth amendment* price does not reflect these expenses, City Gas contends, then the company will eventually have to pass them off to its customers by increasing its retail price (assuming the FPSC will approve such a rate **[*1320]** increase). [67] If the court denies the rate increase, according to City Gas, that will give Consolidated a decisive competitive advantage and will therefore defeat the purpose behind the court's injunction -- i.e., enabling both companies to compete on equal terms. City Gas argues that denial of the increase will give Consolidated a free ride at City Gas' expense and that the *fifth amendment* surely protects it from that result.

[204]** Consolidated, on the other hand, argues that if the court increases the selling price, then City Gas will gain a competitive advantage in the marketplace. Consolidated's costs will increase; it will, in turn, have to pass those costs off to its customers, *see supra* note 67; and as a result, it will be unable to compete with City Gas' lower retail prices. That result, says Consolidated, is inconsistent with the policies behind the antitrust laws.

---

voluntarily entered such a compact. A price that might be satisfactory in the regulatory context, therefore, will not necessarily provide City Gas with a reasonable rate of return on its investment here.

[66] As I develop below, *see infra* slip op. at 5210-5213, , the district court in this case did not find a *fifth amendment* price, let alone evaluate City Gas' offered price in light of that *fifth amendment* price. The district court, therefore, never properly decided whether, in light of the *fifth amendment* price, City Gas actually refused to deal under *section 2*. In addition, having failed to find a *fifth amendment* price, the district court did not properly determine whether Consolidated actually suffered injury as a result of City Gas' refusal to deal. Finally, because of this failure to find a *fifth amendment* price, the remedies fashioned by the district court were also erroneous: as I discuss below, *see id.*, proper remedies in this case must be based on the *fifth amendment* price.

[67] City Gas' shareholders will initially absorb these expenses through a depletion of City Gas' resources but will then pass them off to the customers through rate increases. If the FPSC does not approve rate increases, however, the shareholders will assume the burden themselves. In that case, City Gas will eventually go out of business (when its resources are exhausted).

What is the court to do in such a situation? I suggest that whatever it does, it cannot serve the purposes of the antitrust laws while at the same time satisfying the *fifth amendment's* requirements. Whether the court grants or denies City Gas' request for an increase in the selling price, its decision will harm one segment or another of natural gas consumers. If the court grants the increase, then Consolidated's consumers will eventually bear the burden of Consolidated's increased costs. If the court denies the increase, then City Gas' consumers will bear the burden of City Gas' increased costs. Surely Congress could not have intended to create a rule that inevitably harms consumers: harm to consumers is exactly what Congress designed **[**205]** the antitrust laws to prevent.

The court might attempt to avoid this dilemma by placing controls on the competition between City Gas and Consolidated. For example, the court could allocate parts of the territory within the area of competition to each of the companies and prohibit them from competing for control of the other company's territory. Such a forced allocation, however, would run afoul of the *fifth amendment* by restricting City Gas' ability to compete and expand, if not by actually limiting City Gas' present distribution area.

Finally, if the court denies the rate increase, what will it do when City Gas' customers, who will have to pay more for their gas, seek to intervene in the case on the ground that the court's decision infringes upon rights accorded them (by implication) under the antitrust laws? If the court instead grants the increase, then Consolidated's customers rather than City Gas' customers will seek to intervene. In short, whichever way the court decides the question, consumers will be harmed.

Congress clearly could not have intended *section 2* to support this new rule of liability. That rule, as my discussion demonstrates, forces the courts to adopt the **[**206]** role of a regulatory agency, an agency charged, moreover, with an impossible task and facing a set of never-ending problems. In addition, the rule frustrates the purposes behind the antitrust laws: it creates situations in which, however a court rules, consumers will be harmed. A rule that leads to such results is not consistent with Congress' intent in passing *section 2*.

B. *The District Court's Application of the Rule Below.*

This court today, nevertheless, upholds this impossible rule. Even under this rule, however, I would vacate the district court's judgment and remand the case for further proceedings. The district court failed to find a *fifth amendment* price in the present case, and that failure created reversible error on three grounds: (1) the district court never properly decided whether, given the *fifth amendment* price, City Gas actually refused to deal under *section 2*; (2) the district court failed to determine whether, for purposes of *sections 4* and *16* of the **[*1321]** Clayton Act, Consolidated suffered any injury in fact as a result of City Gas' refusal; and (3) the absence of the *fifth amendment* price also infected the remedies fashioned by the district court.

[207]** I would thus instruct the district court on remand first to find the *fifth amendment* price, in the manner I describe above, second to decide whether City Gas breached its duty to deal under the district court's new rule, third to determine whether Consolidated suffered injury as a result of City Gas' refusal to deal, and fourth, to revisit the remedies issues. I now provide more particular instruction on these last two points.

1. Injury in Fact.

It is an established principle of law that *injuria absque damno*, or an injury without damage, creates no right to a remedy. *See* *Shumate & Co. v. National Ass'n of Secs. Dealers, Inc., 509 F.2d 147, 152 (5th Cir.1975)* ("injury is the *sine qua non* for stating a cause of action"). *Section 4* of the Clayton Act expressly incorporates this principle by creating a private suit for treble damages only for "any person who shall be *injured* in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15 (1988)* (emphasis added); *see* *Associated Gen. Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; **[**208]** *Blue Shield v. McCready, 457 U.S. 465, 476-78, 102 S. Ct. 2540, 2546-48, 73 L. Ed. 2d 149 (1982)*; *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*; *Cable Holdings, Inc. v. Home Video, Inc., 825 F.2d 1559, 1561-62 (11th Cir. 1987)*; *National Indep. Theatre Exhibitors, Inc. v. Buena Vista Distribution Co., 748 F.2d 602, 607 (11th Cir.1984)*, *cert. denied*, *471 U.S. 1056, 105 S. Ct. 2120, 85 L. Ed. 2d 484 (1985)*; *McClure v. Undersea Indus., 671 F.2d 1287, 1289 (11th Cir. 1982)*. Similarly, *section 16* of the Clayton Act, which authorizes private suits for injunctive relief, requires the private plaintiff to show a likelihood of injury. *See 15 U.S.C. § 26*; *Cargill, Inc. v. Monfort, Inc., 479 U.S. 104, 111-15, 107 S. Ct. 484, 490-91, 93 L. Ed. 2d 427 (1986)*.

Because the district court failed to find the *fifth amendment* price, it did not properly decide whether Consolidated suffered injury. On remand, in order to prove injury in fact, Consolidated would have to show that it could have **[**209]** turned a profit after purchasing gas from City Gas at the *fifth amendment* price. If Consolidated can show that it could have turned a profit, that showing would prove that it suffered injury as a result of City Gas' refusal to deal. The showing would satisfy *section 4*'s injury-in-fact requirement and would probably also demonstrate a likelihood of future injury for purposes of *section 26* of the Clayton Act as well. If, on the other hand, Consolidated cannot show that it could have turned a profit, then City Gas' refusal to deal caused no injury: Consolidated would have gone out of business regardless of the refusal. [68] In that event, Consolidated would be unable to show that it suffered, or was likely to suffer, injury in fact and thus would be unable to make out a case under *sections 4* or *26* of the Clayton Act. I next discuss the remedies issues.

[210]** 2. Available Remedies.

The availability of remedies in this case -- assuming City Gas violated *section 2* -- depends upon the assumption that Consolidated could have turned a profit with a supply of natural gas at the *fifth amendment* price. As I discuss above, injury is an element of liability under *sections 4* and *16* of the Clayton Act. The principle of *injuria absque damno*, though, also implicates the availability of remedies. In the **[*1322]** present case, therefore, if Consolidated could not have turned a profit with gas, then it is entitled to no remedy. As I also discuss above, the *fifth amendment* price controls this injury question as well. Consolidated's ability to turn a profit, and thus prove injury, depends upon the *fifth amendment* price. To the extent that the *fifth amendment* price changes, therefore, Consolidated's profitability, and the question of injury, will also change. With these principles in mind, I now turn to the specific remedies issues raised here. Depending upon whether or not Consolidated can operate in the future as a natural gas distributor, one of two remedial schemes, which I discuss in turn in subsections a and b, will provide relief. As I **[**211]** demonstrate in subsection c, however, the two schemes are inconsistent with one another. In subsection d, I then consider the district court's errors in granting Consolidated relief under both schemes and instruct it on how to proceed on remand.

a. The first remedial scheme.

In its amended complaint, Consolidated sought both permanent injunctive relief and damages for lost profits under the first remedial scheme. Consolidated's request for permanent injunctive relief implied that at the time of City Gas' refusal to deal, and at least until the date of the amended complaint, Consolidated could have turned a profit after purchasing wholesale gas at the *fifth amendment* price. The request for an injunction further implied that, based on Consolidated's ability to turn a profit in the past, Consolidated could have turned a profit in the future if the district court granted the injunction and provided Consolidated with a supply of wholesale gas. [69] Consolidated thus

---

[68] Congress surely did not design the antitrust laws merely to prevent companies from going out of business where the defendant has done nothing to undercut that company's ability to compete. Nor did Congress provide for liquidated damages in the antitrust laws, and I sincerely doubt that Congress intended the antitrust laws to tie up a courtroom for months for the purpose of awarding nominal damages merely to punish a company such as City Gas for not selling gas at the *fifth amendment* price.

[69] Curiously, Consolidated did not request a preliminary injunction. If Consolidated's ability to operate as a natural gas supplier -- and to do so at a profit -- depended upon a hook-up to City Gas, then presumably Consolidated would have wanted a hook-up as soon as it could obtain one. Nevertheless, for reasons not apparent in the record, Consolidated decided not to request a preliminary injunction. Instead, it waited until trial to specify the remedy it was seeking. There, Consolidated claimed that City Gas, by refusing to supply wholesale gas, had in effect taken Consolidated's business. Consolidated therefore sought damages in the form of the going concern value of its business. Through its expert witness, Ben Ball, Consolidated asserted that City Gas had deprived it of twenty years of future profits. As it turned out, the district court awarded Consolidated its lost future profits (reduced to their present value) as well as a permanent injunction requiring City Gas to supply Consolidated with gas at a price

requested damages for its lost profits from the date of City Gas' refusal to deal to the date of final judgment and a permanent injunction enabling Consolidated to operate in the future as retail natural gas distributor **[**212]** *with a supply of gas*. This combination of remedies would make Consolidated whole, with the damages compensating for any losses incurred before the injunction and the injunction enabling it to operate in the future as a company with a supply of natural gas.

[213]** In calculating Consolidated's damages for lost profits under this remedial scheme, a court must undertake the following inquiry: based on the *fifth amendment* price, the court must determine what Consolidated's profits would have been if it had a natural gas supply. Of course, if Consolidated could not have turned a profit, then it is not entitled to damages. [70] In addition, because the *fifth amendment* price is always subject to change, the court must determine whether the *fifth amendment* price remained fixed from the time of the refusal to deal until the time of final judgment. If the *fifth amendment* price changed, then the court must reassess whether Consolidated could have turned a profit at each interval of changing prices.

[214]** If the court decides to grant the injunction, and requires City Gas to supply gas at the *fifth amendment* price, the court must then retain jurisdiction over the case and **[*1323]** entertain City Gas' motions to modify the injunction in light of any subsequent changed circumstances or to dismiss the case in the event that Consolidated can no longer turn a profit. As I discuss above, the *fifth amendment* price is subject to constant change, as are Consolidated's own costs. Thus, the court must retain jurisdiction over the case, not only to redetermine the *fifth amendment* price in light of successively changing circumstances, but also to redetermine whether Consolidated can still turn a profit at the modified *fifth amendment* price. If at any subsequent time Consolidated can no longer turn a profit at the *fifth amendment* price, then the court must vacate the injunction and dismiss the case.

This combination of damages for lost profits and injunctive relief would make Consolidated whole. The damages would compensate it for whatever loss it suffered as a result of the refusal to deal prior to the date of final judgment, and the injunction would enable it to operate in the future as **[**215]** a company with a natural gas supply.

b. The second remedial scheme.

As I suggest above, the implication of Consolidated's request for injunctive relief was that Consolidated, which had been shut down for want of a natural gas supply, could resume operation if it acquired a natural gas supply. This outlook could change, of course, if, prior to trial, the effects of the refusal to deal put Consolidated permanently out of business, thus rendering injunctive relief useless. In that event, at trial, Consolidated would seek (1) damages for the net going concern value of the company, with gas, just prior to its demise and (2) damages in the amount of lost profits from the date of the refusal to deal to the date of its demise. [71]

[216]** The principle behind the damages for loss of Consolidated's going concern value is that City Gas' refusal to deal eventually resulted in Consolidated's demise, in effect a taking of its business (less the assets that

---

to be set by the FPSC. The granting of injunctive relief was patently inconsistent with the damages award, an issue that I discuss below, *see infra* slip op. at 5209-5210, 5212, , .

[70] If Consolidated cannot show past injury for purposes of the damages award, then Consolidated will probably also be unable to show a likelihood of future injury for purposes of injunctive relief. In a case such as this one, a plaintiff generally proves a likelihood of future injury based on a showing of past injury.

[71] Conceivably, Consolidated could have lost a part of its going concern value prior to its total demise. Assume, for example, that Consolidated (as an LP gas distributor) serviced Whiteacre and Blackacre and that, soon after the refusal to deal, City Gas took control of Blackacre. At that point, which preceded its general demise, Consolidated lost the ability to go back into operation in Blackacre even if it could have acquired a supply of gas before its general demise. In that case, Consolidated would still seek damages for the company's going concern value just prior to the demise, as well as damages for profits lost prior to its demise; it would also seek damages for the going concern value of its operation in Blackacre -- the portion of its operation that was lost before the demise. Of course, when the court determined the going concern value of Consolidated's *entire* operation just prior to the demise, that operation would no longer include Consolidated's operation in Blackacre. *Cf. infra* note 76 (discussing loss of partial going concern value in relation to injunctive relief).

Consolidated kept). That is, as a result of City Gas' continued refusal to deal, Consolidated could no longer operate as a natural gas distributor even if it had a supply of natural gas. The damages for loss of going concern value would therefore compensate Consolidated for the difference between what Consolidated would have been worth had City Gas supplied gas and what it was worth without a supply of gas just prior to its demise. [72]

In calculating these damages, a court must undertake the following analysis: the court must first determine Consolidated's fair market value -- or, what a hypothetical willing buyer, fully informed of all relevant **[**217]** facts, would pay a hypothetical willing seller, also fully informed of all relevant facts, for Consolidated -- with gas as compared to without gas. Without a supply of gas, Consolidated would be worth the salvage value of its plant and equipment (its pipesystem), that is, what a hypothetical buyer would pay for the company without gas just prior to its demise -- say, for the sake of discussion, $ 750,000. With a supply of gas, Consolidated would still not be worth any more than its salvage value *unless* it could have turned a profit with a supply of gas at the *fifth amendment* price. If Consolidated **[*1324]** could have turned a profit with gas, then the court must determine the damages caused by the refusal to deal through the eyes of the hypothetical willing buyer and seller.

Assume that the court finds that the buyer and seller strike the following deal: after dickering about how long Consolidated can count on a supply of gas from City Gas and about how long Consolidated can turn a profit at City Gas' *fifth amendment* price, the buyer and seller reach a compromise on these points. The buyer then decides how much it is willing to invest in order to obtain Consolidated's profits **[**218]** over the established period of time. [73] **[**219]** The seller decides what amount it will accept, and the two reach another compromise. They conclude that Consolidated with a supply of gas will probably generate $ 250,000 in profits per year for twenty years. [74] Given the nature of the investment risks, the buyer expects a ten percent annual return on its investment and is thus willing to pay approximately $ 2,128,500, or the present value of annual profits of $ 250,000 over a period of twenty years. The buyer will in effect purchase a twenty-year annuity that pays $ 250,000 a year. The court thus finds that Consolidated's loss of going concern value is $ 1,353,500 -- the difference between $ 2,128,500 (Consolidated's fair market value with gas) and $ 775,000 (Consolidated's fair market value without gas).

Consolidated also seeks damages for the profits it lost while in operation after City Gas' refusal to deal until the time of its demise. [75] The court must determine those damages based on the profits that Consolidated would have made if it had purchased gas at City Gas' *fifth amendment* price. *See supra* slip op. at 5206, . The district court must also take into account any changes in the *fifth amendment* price during that period of operation.

[220]** *c. The two schemes' inconsistency*.

As this discussion indicates, these two remedial schemes are theoretically inconsistent. As I explain above, Consolidated can recover damages for loss of its going concern value if, by the time of trial, it can no longer operate as a natural gas distributor. Under that measure of damages, City Gas in effect pays Consolidated the present value of the profits that Consolidated would have made in the future ($ 250,000 for twenty years in my hypothetical example) had City Gas sold it gas. In contrast, if, having acquired a supply of gas, Consolidated can operate in the

---

[72] I assume that City Gas was Consolidated's only feasible gas supplier, i.e., that hooking up to FGT's pipeline was too expensive for Consolidated.

[73] In the dickering process, the buyer and seller assess the risk of the investment. The buyer emphasizes the possibility that Consolidated will generate profits only for a short term, taking into account the likelihood of changes in the *fifth amendment* price. Obviously, the more uncertain Consolidated's profit picture might be, the less the buyer is willing to pay.

[74] For the sake of discussion, I assume that $ 250,000 in annual profits represents Consolidated's net operating profits: gross revenues less gas delivery costs with no reserve for depreciation. I also assume that Consolidated's fixed assets -- its plant and equipment -- are self-consuming and will be worthless at the end of twenty years.

[75] In the unlikely event that the demise occurred the moment of City Gas' refusal, and Consolidated could still show that it could have turned a profit had City Gas not refused to deal, then Consolidated obviously cannot seek damages for lost profits in the past: the damages for loss of future profits will be calculated as of the moment of the refusal and will thus include all profits that Consolidated could have generated had the refusal not occurred.

future as a natural gas distributor, then it will seek an injunction. Thus, the permanent injunction means that Consolidated *can* operate as a natural gas distributor, whereas the award of damages for loss of going concern value means that Consolidated *cannot* operate as a natural gas distributor. If Consolidated can continue to operate, the court orders City Gas to supply wholesale gas to Consolidated. If Consolidated cannot continue to operate, however, the court does not order City Gas to supply the gas but instead awards Consolidated damages equivalent to the present **[**221]** value of the profits that it would have made had City Gas supplied it with gas.

Now, if the court awards Consolidated *both* an injunction *and* damages for loss of its going concern value (i.e., the present value of the profits that Consolidated would have made had City Gas supplied it **[*1325]** with gas), not only are the remedies theoretically inconsistent -- the injunction implying that Consolidated can continue to operate as a natural gas distributor, and the damages implying that Consolidated cannot continue to operate as a distributor -- but the award also provides Consolidated with a double recovery. That is, Consolidated recovers its future profits twice: once in the form of the damages equivalent to the present value of twenty-years worth of profits, and again in the form of the profits that it generates over the same twenty years by operating its business. [76]

[222]** With these remedial models, and the inconsistencies between them, in mind, I now consider what the district court actually did in the present case and provide instruction on how it would proceed assuming the case were remanded.

d. Remedies granted below and instructions for remand.

The district court below improperly applied the first remedial model. The district court awarded damages for lost profits in the amount of $ 83,090.15, which covered the period of time from the refusal to deal [77] until the date of trial. The district court, however, did not arrive at this figure by calculating what Consolidated's profits during that time would have been, based on the *fifth amendment* price, with a natural gas supply. Rather, the district court reached this figure based on the profits that *City Gas* made in servicing Consolidated's former customers. The district court determined City Gas' net profits by subtracting City Gas' wholesale gas costs from City Gas' gross revenues. *665 F. Supp. at 1515*. As I show above, however, *City Gas'* profit picture has no relevance to what Consolidated's profit picture would have been. *See supra* slip op. at 5201-5205, **[**223]** . City Gas' wholesale cost -- the cost of gas from FGT -- has no relation to the *fifth amendment* price that Consolidated would have paid for wholesale gas from City Gas. The district court, therefore, improperly calculated this damages figure. On remand, I would instruct the district court instead to award damages based on a showing by Consolidated of what its profits would have been had it purchased gas from City Gas at the *fifth amendment* price.

---

[76] These two remedial schemes would be consistent and would not involve a double recovery in a case where a company permanently loses part of its assets as a result of a refusal to deal but retains enough of its assets to continue operating once it gains access to the needed resource. Assume, for example, that Company A operated in Whiteacre and Blackacre and had an opportunity to expand into Beyondacre. As a result of Company B's refusal to sell resource X to Company A (which would constitute a violation of *section 2* under the district court's new rule, even though Company B has never sold resource X to other companies), Company A can no longer operate in Blackacre and has lost forever the opportunity to expand into Beyondacre; Company A's operation, although still profitable, is now limited to Whiteacre. Thus, the court grants an injunction ordering Company B to deal, which allows Company A to continue its operation in Whiteacre, and the court also awards damages for lost profits between the time of Company B's refusal to deal and the final judgment in the case. In addition, the court awards Company A the fair market value of its operation in Blackacre and its opportunity to expand into Beyondacre (these business opportunities having been lost forever). If the court, in doing so, made the necessary factual findings -- such as what the *fifth amendment* price was for resource X, whether Company A could turn a profit given that *fifth amendment* price, and what the degree of uncertainty concerning Company A's profitability was -- these remedies would be proper.

[77] The district court below found that City Gas refused to deal as of February 20, 1982 -- the date when City Gas' Board of Directors met and first considered acquiring Consolidated. In my view, that finding is clearly erroneous. The refusal could not have occurred until City Gas and Consolidated entered into negotiations and City Gas refused to deal at the *fifth amendment* price.

The district court similarly erred in fashioning the injunction in this case. Assuming that on remand Consolidated could show the likelihood of future injury, *see supra* slip op. at **[**224]** 5204-5205, , the district court, under its new rule of liability, should grant an injunction ordering City Gas to supply wholesale gas to Consolidated. The injunction, though, may require City Gas to supply gas only *at the fifth amendment price*. Because, in the proceedings below, the district court never set the *fifth amendment* price, it could include no price term in its **[*1326]** injunction and, as a result, delegated the price-setting task to the FPSC, *see 665 F. Supp. at 1512, 1534, 1545*. [78] On remand, the district court would have to include the *fifth amendment* price term in the injunction. In addition, the district court would have to retain jurisdiction over the case (which it did not do below), entertaining any motions made by City Gas to modify the injunction in light of changed circumstances or to dismiss the case if Consolidated can no longer turn a profit.

[225]** The district court also awarded damages for the loss of Consolidated's going concern value in the amount of $ 1,503,975. I first consider the district court's error in calculating this figure without having found a *fifth amendment* price. I then discuss the inconsistency of its decision to award these damages as well as to grant an injunction.

The court awarded damages for loss of going concern value in the amount of $ 1,503,975 based on testimony by Consolidated's expert witness, Ben Ball. Consolidated called Ball to the stand to render an opinion concerning Consolidated's present value as a company with a natural gas supply -- in effect, what a hypothetical willing buyer, fully informed of all relevant facts, would pay a hypothetical willing seller, also fully informed of all relevant facts. In formulating his opinion, Ball assumed that Consolidated could indefinitely obtain a "competitively priced source of natural gas," *665 F. Supp. at 1514*, and then forecast that, with this supply of gas, Consolidated could continue to operate profitably for twenty years. He estimated the company's annual profits for that period, including the profits that Consolidated would have **[**226]** made by servicing former customers that were now lost to City Gas. From those combined profits, he deducted the expenses that Consolidated would have incurred in changing from LP gas distribution to natural gas distribution and in hooking up to City Gas' pipesystem. Ball then opined that the hypothetical buyer would expect a ten-percent return on his investment, and, using that rate, he reduced the annual net profits during the twenty years to their present value. He concluded that Consolidated's "value today as a natural gas firm," *665 F. Supp. at 1515*, was $ 2,275,130.

From that figure, Ball subtracted $ 771,155 -- the salvage value of Consolidated's assets without gas. Ball arrived at that figure based on the price that City Gas offered to pay Consolidated for all its assets, in the course of their negotiations regarding the wholesale gas supply. As Ball suggested, that figure represented the salvage value of Consolidated's assets as a company without a natural gas supply -- the assets that Consolidated still possessed. After subtracting this figure, Ball was left with a figure of $ 1,503,975, which represented "the diminution of Consolidated's value as a natural **[**227]** gas company as a result of City Gas' actions," *id. at 1515*, that is, the present value of the profits that Consolidated would have made over the next twenty years if City Gas had not refused to deal, less Consolidated's present salvage value.

The district court erred, however, in relying on Ball's profit figures to the extent that those figures were not based on the *fifth amendment* price. Although this error did not infect Ball's calculation of Consolidated's without-gas value (i.e., its salvage value), the error did infect his calculation of Consolidated's with-gas value (i.e., the present value of a twenty-year stream of profits). Rather than basing his figures on the *fifth amendment* price, Ball considered a "competitively priced source of natural gas." As I discuss in detail above, however, no "competitively priced source of gas" existed. *See supra* notes 60, 61, & accompanying text. Presumably, Ball **[*1327]** based his figure on FGT's price to City Gas, which has no relevance to the *fifth amendment* price here. *See id.* In addition, rather than

---

[78] In improperly directing the parties to repair to the FPSC for a determination of the wholesale price, the district court in the present case implied that the FPSC's price would, without further consideration by the district court, operate as a provision (the price term) of the injunction. The district court apparently gave no thought to what should happen if the FPSC's price did not satisfy the *fifth amendment*. That is, the district court did not retain jurisdiction to review the FPSC's price in the event that the price failed to provide City Gas with just compensation.

determining what Consolidated's rates would have been if Consolidated bought gas at City Gas' *fifth amendment* **[**228]** price, Ball looked to "City Gas' rates" to its customers. As I also discuss above, City Gas' rates were irrelevant to Consolidated's rate structure. *See id.* For these reasons, Ball's figures provided no support for the damages award; the district court, therefore, improperly relied on those figures in calculating the damages award. On remand, the district court would have to recalculate the award in a manner consistent with the *fifth amendment*.

As a more serious problem, this award of damages for loss of Consolidated's going concern value is inconsistent with permanent injunctive relief and gives Consolidated a double recovery. [79] As I discuss above, *see supra* slip op. at 5209-5210, , the remedies are theoretically inconsistent: the permanent injunction implies that Consolidated can operate (for twenty years) as a profitable natural gas company whereas the damages award (in the form of the present value of a twenty-year stream of profits) implies that Consolidated can no longer operate as a natural gas company. Consolidated either can operate as a gas company or it cannot operate as such; it cannot, however, do both. Depending on which course Consolidated elects, it **[**229]** will be entitled either to an injunction or to damages for loss of going concern value; it cannot, however, receive both.

To award Consolidated both remedies, moreover, constitutes a double recovery. After compensating Consolidated for the loss of its going concern value by awarding it the present value of the profits that it would have made over the next twenty years as a gas company, a permanent injunction then in effect duplicates the award. The injunction gives Consolidated gas for the next twenty years and thus the profits that the damages award assumed Consolidated would have made during that time had City Gas not refused to deal. [80] Armed with the injunction, Consolidated can sell its "going concern" **[**230]** for the same present-value price reflected in the going concern damages award. Consolidated thus earns twenty-years worth of profits *twice*. Under the district court's decision, therefore, Consolidated has obviously received a double recovery. On remand, Consolidated would have to elect between remedies.

In addition, if, on remand, **[**231]** Consolidated were to elect damages for loss of going concern value, then the district court would have to find the date of Consolidated's demise and begin its damages calculation as of that date. Based on that date as well, the district court would have to determine whether Consolidated should recover any damages for lost profits prior to the date of its demise. The expert on whose figures the district court relied indicated that he had calculated "Consolidated's value *today* as a natural gas firm." *Id. at 1515* (emphasis added). The district court, however, did not specify which date "today" was -- whether it was the date of the refusal, the date of Consolidated's amended complaint, the date of trial, or some other interim date. That date, of course, must be the date of Consolidated's demise -- the point in time at which Consolidated's continued operation as a natural gas company became impracticable. The district court would have to calculate the damages for loss of **[*1328]** going concern value (in the form of the present-day value of twenty-years' worth of future profits) as of that point forward and would have to calculate the damages for lost profits from **[**232]** that point backward to the date of the refusal to deal.

The district court, however, never explicitly decided whether or not Consolidated's business was ruined -- let alone when its demise might have occurred. Instead, the district court implied that Consolidated both died and stayed alive. On remand, the district court would have to address this problem. First, it would have to require Consolidated to elect between these two remedial schemes. Depending on its ability to operate in the future, Consolidated could elect *either* injunctive relief, with damages for profits lost in the past, *or* it may elect damages for loss of going

[79] Ball's testimony assumed an entire taking of Consolidated's business as a company with gas. Thus, the record provided no basis for treating this case as a partial-taking situation, *see supra* notes 71 & 76, in which damages for loss of going concern value might be consistent with injunctive relief.

[80] In awarding Consolidated damages in the form of the present-day value of the profits that it would have made over the next twenty years, the district court found -- albeit implicitly (by accepting Ben Ball's testimony) -- that City Gas would have supplied gas for that period at a "competitive price." If Ball's testimony supported the finding that, with a supply of gas from City Gas, Consolidated could have operated profitably for twenty years, then that testimony certainly supported, with equal force, the district court's conclusion (implicit in its award of permanent injunctive relief) that an injunction would enable Consolidated to operate profitably for twenty years.

concern value, with damages for profits lost in the past. In either case, however, the district court's award of damages for lost profits in the amount of $ 83,090.15, which covered the period of time from the refusal until the date of trial, would not be a proper award: the district court did not base the award on the fifth amendment price and never properly determined the dates of the refusal, *see supra* note 77, or of Consolidated's demise.

Thus, even if today's court upholds the impossible rule fashioned by the district court, the district **[**233]** court has still failed to apply it properly in the present case. For that reason, I would vacate the district court's decision and remand for further proceedings as I describe.

VII. STATE-ACTION IMMUNITY

Even if City Gas could be held to have violated section 2, which in my view it has not violated, City Gas would still be immune from federal antitrust liability under the state-action immunity doctrine of Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943). I first discuss the *Parker* doctrine's application to private parties. I then analyze City Gas' conduct -- both its territorial agreement with Peoples Gas and its refusal to deal with Consolidated (neither of which, as I have shown, would provide grounds for liability anyway) -- under this doctrine.

A. *The* Midcal *Test*.

The district court correctly stated that in a case such as the present one, when a private party claims immunity under the state-action immunity doctrine, the party must satisfy both parts of the test articulated by the Supreme Court in *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc.*: [81] "First, the challenged restraint must be 'one clearly **[**234]** articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' by the State itself." 445 U.S. 97, 105, 100 S. Ct. 937, 943, 63 L. Ed. 2d 233 (1980) (quoting City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 98 S. Ct. 1123, 1135, 55 L. Ed. 2d 364 (1978) (opinion of Brennan, J.)). I discuss what these two prongs require in turn.

1. The Clearly Articulated Prong.

In Southern Motor Carriers Rate Conference v. United States, 471 U.S. 48, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985), the Supreme Court considered the first prong of this test. In that case, the United States brought an antitrust challenge against the collective ratemaking practices **[**235]** of rate bureaus composed of motor common carriers in the southeast. Under procedures authorized, but not compelled, by the states in which the carriers operated, the rate bureaus submitted joint rate proposals to the public service commission in each state. Id. at 50, 105 S. Ct. at 1723. The Supreme Court held that Midcal's first prong did not require the state to compel the challenged conduct: "The federal antitrust laws do not forbid the States to adopt policies that permit, but do not compel, anticompetitive conduct by *regulated* private parties." Id. at 60, 105 S. Ct. at 1728 (emphasis original).

[*1329] The Court then considered whether the first prong would be satisfied "in the absence of a statute expressly permitting the challenged conduct." Id. at 63, 105 S. Ct. at 1730. In *Southern Motor Carriers*, statutes in North Carolina, Georgia, and Tennessee explicitly permitted collective ratemaking; the Mississippi motor carrier statute, however, did not expressly permit such ratemaking, *see* Miss.Code Ann. § 77-7-1 et seq. (1972 & Supp. 1984). Rather, that statute authorized the public service commission **[**236]** to prescribe "just and reasonable" rates for intrastate transportation but left the details of the rate-setting process to the commission itself. The Supreme Court held that the statute satisfied *Midcal's* clearly articulated requirement. The Court reasoned that the statute clearly indicated the legislature's intent that the commission, rather than the market, would set intrastate rates. The legislature left the details of that process to the commission, and the commission exercised its authority by encouraging collective ratemaking. The Court concluded,

> A private party acting pursuant to an anticompetitive regulatory program need not "point to a specific, detailed legislative authorization" for its challenged conduct. *Lafayette v. Louisiana Power & Light Co.*, 435 U.S. [389]

---

[81] Municipalities, unlike private parties, must satisfy only the first *Midcal* requirement in order to have *Parker* immunity. *See* Town of Hallie v. City of Eau Claire, 471 U.S. 34, 46-47, 105 S. Ct. 1713, 1720, 85 L. Ed. 2d 24 (1985).

> at 415, 98 S. Ct. [1123] at 1138 (opinion of BRENNAN, J.). As long as the State as sovereign clearly intends to displace competition in a particular field with a regulatory structure, the first prong of the *Midcal* test is satisfied.

471 U.S. at 64, 105 S. Ct. at 1730.

The application of the first *Midcal* requirement to conduct by private parties **[**237]** under *Southern Motor Carriers* thus parallels the requirement's application to conduct by municipalities under Town of Hallie v. City of Eau Claire, 471 U.S. 34, 42-44, 105 S. Ct. 1713, 1718-19, 85 L. Ed. 2d 24 (1985), a case handed down the same day as *Southern Motor Carriers*. In *Town of Hallie*, a township challenged a city's conduct in gaining a monopoly over sewage treatment and tying its provision of sewage collection services to its treatment services. The city claimed immunity under *Parker* based on a state statute, which granted the city authority to develop sewage systems and to "'describe with reasonable particularity the district to be [served].'" Id. at 41, 105 S. Ct. at 1717 (quoting Wis.Stat. § 62.18(1) (1981-1982)). The Court considered whether that statute satisfied the requirement of a clearly articulated state policy. The Court applied a foreseeability test: it observed that "the statutes clearly contemplate that a city may engage in anticompetitive conduct. Such conduct is a foreseeable result of empowering the City to refuse to serve unannexed areas." Id. at 42, 105 S. Ct. at 1718. The Court then **[**238]** stated that "it is not necessary . . . for the state legislature to have stated explicitly that it expected the City to engage in conduct that would have anticompetitive effects." Id., 105 S. Ct. at 1718. Citing City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 415, 98 S. Ct. 1123, 1138, 55 L. Ed. 2d 364 (1978) (opinion of Brennan, J.), the Court held that "it is sufficient that the statutes authorized the City to provide sewage services and also to determine the areas to be served." 471 U.S. at 42, 105 S. Ct. at 1718 (same passage cited in *Southern Motor Carriers* holding, *see supra* slip op. at 5214,). In the Court's view, the statutes plainly showed that "'the legislature contemplated the kind of action complained of'" -- a showing that was "sufficient to satisfy the 'clear articulation' . . . test." Id. at 44, 105 S. Ct. at 1719 (quoting Lafayette, 435 U.S. at 415, 98 S. Ct. at 1138).

Both *Southern Motor Carriers* and *Hallie* thus derive from the Court's earlier pronouncements in *Lafayette* and stand for the proposition that, under the first *Midcal* requirement, **[**239]** a state legislature need not *expressly* permit (and clearly need not compel) the conduct at issue; rather, if the legislature, by displacing competition in a given field with a broad regulatory structure, has contemplated that such conduct might occur, that will satisfy the "clearly articulated" requirement. *See also* Executive Town & Country Servs. v. City of Atlanta, 789 F.2d 1523, 1529 (11th Cir. 1986). Of course, as the Supreme Court **[*1330]** stated in Community Communications Co. v. City of Boulder, 455 U.S. 40, 55, 102 S. Ct. 835, 843, 70 L. Ed. 2d 810 (1982), the requirement "is not satisfied when the State's position is one of mere *neutrality* respecting the . . . actions challenged as anticompetitive." Thus, when the Constitution of Colorado granted cities "the full right of self-government in both local and municipal matters," id. at 43 n. 1, 102 S. Ct. at 837 n. 1, the Court held that the provision did not clearly articulate a state policy to displace competition with regulation in the cable television industry: the constitutional provision had nothing at all to do with cable television regulation. Id. at 55, 102 S. Ct. at 843; **[**240]** *see also* Bolt v. Halifax Hosp. Medical Center, 891 F.2d 810, 825 (11th Cir.) (legislature must have foreseen specific *type* of anticompetitive conduct alleged in case), *cert. denied*, *495 U.S. 924, 110 S. Ct. 1960, 109 L. Ed. 2d 322 (1990)*.

2. The Active Supervision Prong.

Midcal's second requirement of active supervision, as the Court explained in *Hallie*, reflects the concern that "where a private party is engaging in the anticompetitive activity, there is a real danger that he is acting to further his own interests, rather than the governmental interests of the State." Hallie, 471 U.S. at 47, 105 S. Ct. at 1720. The active supervision requirement is thus "designed to ensure that the state action doctrine will shelter only the particular anticompetitive acts of private parties that, in the judgment of the State, actually further state regulatory policies." Patrick v. Burget, 486 U.S. 94, 100-01, 108 S. Ct. 1658, 1663, 100 L. Ed. 2d 83 (1988). The crux of active supervision, as the Court stated in *Patrick*, is "that the State exercise ultimate control over the challenged anticompetitive conduct. **[**241]** " Id., 108 S. Ct. at 1663. The state must therefore "have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy." *Id., 108 S. Ct. at 1663*.

Applying this formula in *Patrick*, the Court held that a state did not actively supervise a physician peer-review process. Although the state had mandated the peer-review process in the first place, that state lacked ultimate authority over the peer-review committee's actual decisions: neither the state nor any of its administrative bodies reviewed specific decisions or had authority to overturn decisions not in accordance with state policy. *See id. at 102-04, 108 S. Ct. at 1664*. [82] The Court, therefore, held that no state actor actively supervised the peer-review process and that the federal antitrust laws applied. *Id. at 104-05, 108 S. Ct. at 1665*; *see also Shahawy v. Harrison, 875 F.2d 1529, 1535-36 (11th Cir. 1989)* (applying *Patrick* to public hospital peer-review procedure).

[242]** Similarly, in *324 Liquor Corp. v. Duffy, 479 U.S. 335, 107 S. Ct. 720, 93 L. Ed. 2d 667 (1987)*, the Supreme Court held that New York State's liquor-pricing scheme did not satisfy *Midcal's* active supervision prong. That scheme, which did satisfy *Midcal's* clear articulation prong, required liquor wholesalers to post a wholesale bottle price and then prohibited retailers from selling at less than 112% of that posted price. In effect, though, the scheme allowed wholesalers to set retail prices. Although the retail price was based on the posted *bottle* price, wholesalers generally sold liquor to retailers at a lower, posted *case* price. In addition, the retail price was based on the *current* posted bottle price; the wholesalers could thus sell at a low posted price and then increase the posted price in order to allow retailers to sell at a higher price. *See id. at 342-46* & n. 6, *107 S. Ct. at 725-26* & n. 6. As a result, the Court found that the state did not actually set prices, did not review the reasonableness of established prices, and did not generally monitor the **[*1331]** market or reexamine the pricing program. *See id. at 345-46, 107 S. Ct. at 726*. **[**243]** The Court therefore held that the state did not actively supervise the pricing system. [83]

As these two cases hold, then, the state must possess ultimate authority over the regulatory scheme at issue. The state must also exercise this authority to ensure that the scheme works as the state intended it to work. If the scheme breaks down and allows private parties to act however they want, then under *324 Liquor*, Midcal's active supervision requirement would not be satisfied: the state must exercise its authority by disapproving "particular anticompetitive acts . . . that fail to accord with state policy." *Patrick, 486 U.S. at 101, 108 S. Ct. at 1663*. Of course, if the scheme operates effectively, automatically requiring private actors to act in **[**244]** accord with state policy, the state would have nothing to disapprove, and the active supervision prong would be satisfied. *See 324 Liquor*, 479 U.S. at 344 n. 6, 107 S. Ct. at 725 n. 6.

I now apply the *Midcal* test to the present case, considering in turn City Gas' territorial agreement and its refusal to deal.

B. *Applying* Midcal.

1. The Territorial Agreement.

As I discuss above, City Gas' territorial agreement with Peoples Gas provided no basis for antitrust liability in the present case. Nevertheless, assuming for the sake of discussion that the agreement might provide a basis for liability, City Gas is still immune under the state action doctrine.

a. Clearly articulated state policy.

---

[82] Because the state courts conducted no review of specific committee decisions, the *Patrick* court found it unnecessary to decide "the broad question whether judicial review of private conduct ever can constitute active supervision." *486 U.S. at 104, 108 S. Ct. at 1664-65*; *see also Pinhas v. Summit Health, Ltd., 894 F.2d 1024, 1030 (9th Cir. 1989)* (also avoiding that question), *cert. granted*, ***496 U.S. 935, 110 S. Ct. 3212, 110 L. Ed. 2d 660 (1990)***. I consider this question below, as it applies to this case. *See infra* slip op. at 5223, .

[83] The Court did suggest that a simple "minimum markup" statute, which required retailers to charge 112% of their *actual* wholesale cost, might satisfy Midcal's second prong. *See 479 U.S. at 344 n. 6, 107 S. Ct. at 725 n. 6*.

City Gas' territorial agreement is protected pursuant to a clearly articulated state policy. That policy is expressed in Chapter 366 of the Florida Statutes, Fla.Stat. ch. 366 (1987), [84] which prescribes the duties of the utility companies in Florida and charges the FPSC with administrative responsibility. Chapter 25-7 of the Florida Administrative Code contains regulations promulgated by the FPSC for gas utilities. *See* 1986 Fla.Admin.Code Ann. ch. 25-7 (FPSC **[**245]** regulations promulgated under chapter 366).

The court today adopts the district court's conclusion that these provisions did not satisfy *Midcal's* clearly articulated requirement. The district court based its conclusion on the fact that chapter 366 expressly grants the FPSC power to approve territorial agreements involving electric utilities, and that other chapters do the same with respect to telephone, water, and sewage utilities, but that the legislature failed expressly to grant this power to the FPSC with respect to natural gas utilities. In the district court's view, that omission clearly indicates that the legislature did not intend to authorize the FPSC to approve territorial agreements between natural gas utilities. Given **[**246]** this clear indication, the district court was not persuaded otherwise by the Florida Supreme Court's opinion in *City Gas Co. v. Peoples Gas Sys., 182 So.2d 429, 436 (Fla. 1965)*, which addressed the very territorial agreement at issue here and held that chapter 366 implicitly grants the FPSC authority to approve such agreements.

I disagree with the district court's interpretation of the legislative intent behind chapter 366. That interpretation overemphasized the absence of an express grant of power to approve territorial agreements between natural gas utilities and, as a result, reached a conclusion that was inconsistent with the general structure of the regulatory scheme created by chapter 366 for the natural gas industry and with the role of the FPSC within that scheme. The scheme that the legislature has created in effect requires the FPSC to approve territorial agreements in exercising its prescribed **[*1332]** ratemaking functions. Given the nature of this scheme, therefore, if the legislature had intended that the FPSC not approve such agreements, then it would have had to include a provision expressly prohibiting the FPSC from doing so and also explaining **[**247]** how the FPSC could accomplish its statutorily mandated ratemaking responsibility without that power. [85] In my view, chapter 366 and the regulatory scheme that it creates clearly demonstrate the legislature's intent "to displace competition in [the natural gas] field with a regulatory structure," *Southern Motor Carriers, 471 U.S. at 64, 105 S. Ct. at 1730*. Under the Supreme Court's decision in *Southern Motor Carriers*, that intent satisfies the first prong of the *Midcal* test. *See id.*, *105 S. Ct. at 1730*. I first review chapter 366 to determine the kind of regulatory scheme that it creates and the FPSC's role within that scheme. I then consider the inconsistency of the district court's interpretation with this scheme.

[248]** In chapter 366, the state empowers, as "an exercise of the police power of the state," the FPSC to regulate public utilities. *Fla.Stat. § 366.01*. Section 366.03 addresses the general duties of public utilities: "Each public utility shall furnish to each person applying therefore reasonably sufficient, adequate, and efficient service upon terms as required by the commission." Section 366.04 then describes the duties of the FPSC: "the commission shall have jurisdiction to regulate and supervise each public utility with respect to its rates and service and the issuance and sale of its securities." Thus, *section 366.05* provides that the FPSC "shall have power to prescribe fair and reasonable rates and charges . . . to be observed by each public utility." The FPSC fixes these rates based on the factors described in section 366.041:

> In fixing the just, reasonable, and compensatory rates, charges, fares, tolls, or rentals to be observed and charged for service within the state by any and all public utilities under its jurisdiction, the commission is authorized to give consideration, among other things, to the efficiency, sufficiency, and adequacy of the facilities provided and **[**249]** the services rendered; the cost of providing such service and the value of such service to the public; the ability of the utility to improve such service and facilities; and energy conservation and

---

[84] This chapter has been amended by 1989 Fla. Laws ch. 89-292, to authorize expressly the FPSC to approve territorial agreements and resolve territorial disputes between natural gas utilities. I consider below the amendment's effect on the present case, *see infra* note 86.

[85] Indeed, once the panel's decision in this case adopted this inconsistent position, the Florida legislature in effect overruled it by adding language that expressly authorizes the FPSC to approve territorial agreements and resolve territorial disputes between natural gas utilities. The legislature thus made explicit what, as I have observed, was already implicit in the old provision.

> the efficient use of alternative energy resources; provided that no public utility shall be denied a reasonable rate of return upon its rate base in any order entered pursuant to such proceedings.

The FPSC further addresses the rate-fixing process in its regulations under chapter 366. Section 25-7.033(2) of the regulations requires each utility to "file with the Commission tariffs containing schedules for all rates and charges." Section 25-7.033(3) then states that no "schedules of rates or charges, or modifications or revisions of the same, shall be effective until filed with and approved by the Commission as provided by law." In addition, the FPSC has established procedures to monitor existing rates to ensure that they are fair and just and provide a reasonable rate of return as specified in section 366.041 of the Florida Public Utilities statute. Sections 366.07 through 366.072 also provide procedures for rate adjustments.

In addition to its rate-setting function, the FPSC's **[**250]** powers reach the utilities' general assets. As *section 366.05* provides: "the commission shall have power to . . . require repairs, improvements, *additions, and extensions* to the plant and equipment of any public utility when reasonably necessary to promote the convenience and welfare of the public and secure adequate service or facilities for those reasonably entitled thereto." (Emphasis added.) Under section 366.04, the FPSC also has jurisdiction "to regulate and supervise each public utility with respect to . . . the issuance and sale of its securities."

[*1333] Chapter 366 thus establishes a full-scale regulatory structure and grants the FPSC broad regulatory and supervisory powers within that structure. Not only does the FPSC fix utilities' rates -- a process that engages the FPSC in an in-depth and continuous review of virtually every aspect of the utilities' operation -- but the FPSC also has direct supervisory power with respect to the utilities' use of their own assets. The FPSC has jurisdiction to regulate utilities' stock issuances, to require repairs to the utilities' facilities, and also to mandate additions and extensions of those facilities -- undertakings **[**251]** that would substantially affect utilities' assets.

True, the statute does not explicitly grant the FPSC power to approve territorial agreements and resolve territorial disputes between natural gas companies, whereas the statute does grant such powers with respect to electric utilities. In light of the powers the statute does expressly grant to the FPSC, however, and the general regulatory structure that the statute creates, I find this omission to be insignificant. The Florida legislature clearly intended to displace competition in the natural gas industry with a system of regulation. As my review of this regulatory structure shows, moreover, the nature of a utility's operating territory -- its size, the density of consumers, the degree of competition with other companies -- is a crucial factor in the rate-fixing process. In order to provide the utility with a "reasonable rate of return" -- the standard applied under the statute -- the FPSC will obviously consider the utility's distribution area and the degree of competition in that area. The size of a utility's operating area will affect its cost structure: a larger area might increase the utility's fixed and operating costs; it **[**252]** might also require a greater investment in equipment and in a gas supply; in turn, however, the larger area might enable the utility to sell a larger volume of gas, thus generating higher gross revenues and perhaps more operating capital. As I discuss in detail in part VI, the degree of competition with other gas companies will also significantly affect the utility's cost structure: a company must invest resources in order to compete, an investment that increases the utility's costs. That investment in competition, moreover, might affect the general structure of the utility's assets. If the FPSC does not allow the utility to recover those costs through a rate increase, then the utility must cover them from its own assets, which might in turn force the utility to cut corners on safety or on research and development of alternative energy sources or which might simply force the utility out of business -- concerns that obviously fall directly within the FPSC's jurisdiction.

As this discussion indicates, the utility's operating territory is of central concern to the FPSC's regulatory function and undeniably falls within the FPSC's purview: the nature of the utility's territory directly **[**253]** influences the rates set for consumers. To think, therefore, that the Florida legislature did not intend the FPSC to approve territorial agreements -- whether or not the legislature explicitly authorized such approval -- is utterly inconsistent with the overall structure of the regulatory scheme that the Florida legislature did impose and the powers that it expressly granted to the FPSC. Given the nature of this scheme as actually created, had the legislature intended the FPSC not to approve such agreements, the legislature would have had to add a provision expressly prohibiting the FPSC from doing so and also explaining how the FPSC could accomplish its statutorily mandated ratemaking functions without that power. Under *Southern Motor Carriers*, this comprehensive regulatory scheme satisfies the first prong of the *Midcal* test. [86]

[254]** *b. Active supervision prong*.

As my review of chapter 366's regulatory scheme also demonstrates, the FPSC **[*1334]** exercises "ultimate control" over the territorial agreement. The FPSC "ha[s] and exercise[s] power to review [territorial agreements between natural gas utilities] and disapprove those that fail to accord with state policy." *Patrick, 486 U.S. at 101, 108 S. Ct. at 1663*. Under *Patrick*, therefore, *Midcal's* second prong is satisfied as well.

The panel, in holding that the active supervision requirement was not satisfied, pointed to language in a decision by the FPSC and characterized it as an "expression of doubt . . . as to its authority to establish exclusive territories or to resolve territorial disputes between natural gas utilities." *880 F.2d at 303* (citing *In re: Tariff filed by Miller Gas*, 85 FPSC 10:205, at 5-6 (Oct. 18, 1985)). [87] The panel then noted that the FPSC approved the specific territorial agreement at issue here, but, in a confusing passage, the panel seemed to conclude that, "simply because the Commission has on occasion, some 15 to 25 years ago, looked at this agreement does not automatically **[**255]** immunize it from federal antitrust scrutiny." *Id. at 303*. That isolated review, in the panel's opinion, was not sufficient. The panel also summarily rejected the argument that the Florida Supreme Court's review of the agreement in *Peoples Gas* satisfied the active supervision prong.

[256]** The panel's approach, in my view, is improper in that it failed to consider the regulatory and supervisory functions that the FPSC exercises in its continuous rate-fixing process. That process, I suggest, satisfies the active supervision requirement. As I describe above, the FPSC continually takes account of existing territorial allocations in the course of setting rates. The FPSC sets rates that will provide the utility with a reasonable rate of return *given existing territorial allocations*. To the extent that the FPSC sets rates that allow the utility to continue to operate (that is, operate at a profit), the FPSC necessarily approves the existing territorial allocation. The FPSC, moreover, continually reviews the utility's rates: under § 25-7.024 of the FPSC's regulations, the gas utility must file a rate of return report for every month, based on which the FPSC continually monitors the utility's rates and, necessarily, its territorial allocation. In addition, if the FPSC disapproves of such an allocation, it has ultimate authority to mandate the utility to alter its distribution area "when reasonably necessary to promote the convenience and welfare of the public and secure **[**257]** adequate service or facilities for those reasonably entitled thereto." *Fla. Stat. § 366.05(1)*. In choosing not to exercise that authority -- and it has chosen not to do so in the present case -- the FPSC thus implicitly approves the existing territorial allocation.

This is not a case, moreover, like *324 Liquor* where the state establishes a regulatory scheme that merely enforces private arrangements. Rather, the FPSC assumes a very active role under this regulatory scheme, initially

---

[86] This conclusion finds support in the Florida Supreme Court's holding in the *Peoples Gas* case that chapter 366 implicitly grants the FPSC power to approve territorial agreements. As the panel noted, *880 F.2d at 302-03*, although that decision is not dispositive of this inquiry, it is relevant.

[87] The district court quoted the relevant passage from the FPSC's decision:

> It is not clear that this Commission has the statutory authority to either establish exclusive service territories for natural gas utilities (as it does for telephone, water and sewer utilities) or resolve territorial disputes between natural gas utilities (as specifically authorized for electric utilities). However, our resolution of this question is not necessary in view of our [other] finding. . . .

665 F. Supp. at 1530. This "expression of doubt" is clearly dictum. Whatever doubt the FPSC might have *expressed*, moreover, has not effected the FPSC's *actions* in approving territorial agreements, as I discuss. Also, that expression of doubt has nothing to do with the active supervision issue; rather, the expression merely comments on whether the state has clearly articulated a policy in favor of territorial agreements. As I show above, the state has indeed done so -- regardless of whatever doubt the FPSC (an agency without judicial authority to interpret legislative intent) may have expressed.

approving the utility's proposed rates, and, in doing so, undertaking an investigation and consideration of a variety of factors as mandated in chapter 366. *See id.* §§ 366.041,.06. Nor is this a case like *Patrick*, where the state supervises a peer-review committee's general procedures but does not review the committee's specific, substantive decisions. Here, the FPSC does more than prescribe general procedures for filing rates; it actually conducts **[*1335]** the rate-fixing process itself, setting initial rates and continually monitoring them.

In this case, furthermore, the Florida Supreme Court has directly reviewed the territorial agreement at issue. Although the Supreme Court has not **[**258]** yet had occasion to decide the question whether such review satisfies the active supervision requirement, *see* *Patrick, 486 U.S. at 102-05, 108 S. Ct. at 1664-65* (state courts conducted insufficient review of specific committee decisions, thus not necessary to decide broad question whether such review could ever satisfy active supervision requirement); *see also* *Pinhas v. Summit Health, Ltd., 894 F.2d 1024, 1030 (9th Cir. 1989)* (same), *cert. granted*, *496 U.S. 935, 110 S. Ct. 3212, 110 L. Ed. 2d 660 (1990)*, the Florida courts' review of the agreement here is, in my view, sufficient to satisfy the active supervision requirement. In *Peoples Gas*, the Florida Supreme Court carefully considered City Gas' territorial agreement with Peoples Gas and approved that agreement under chapter 366. *See* *182 So.2d at 436*. Unlike the judicial review conducted by the courts in *Patrick, see supra* note 82, which merely considered the procedures through which the peer-review committee's decision was reached but not the decision's merits, the Florida Supreme Court specifically reviewed the territorial agreement itself and approved **[**259]** it as consistent with state policy. That review, in my view, constituted active supervision. [88]

Thus, based on both the Florida Supreme Court's decision in *Peoples Gas* and on the FPSC's supervisory powers in the rate-fixing process, the active supervision prong is satisfied. Under *Midcal*, therefore, City Gas is immune from antitrust liability on the basis of its territorial agreement with Peoples Gas.

2. **[**260]** The Refusal to Deal.

I reach the same conclusion with respect to City Gas' refusal to sell wholesale gas to Consolidated. [89] I apply the two prongs of the *Midcal* test in turn.

a. Clearly articulated state policy.

Section 366.03 states: "No public utility shall be required to furnish electricity or gas for resale. . . ." This provision explicitly and affirmatively expresses a state policy not to require utilities to sell at wholesale. Indeed, I could think of no more explicit an expression of this policy. The policy, of course, does not *compel* gas utilities not to sell at wholesale; it merely *permits* them to refrain from selling at wholesale. Under *Southern Motor Carriers*, though, *Midcal's* clearly articulated prong does not require the state to compel **[**261]** the anticompetitive conduct; the state need only permit such conduct, as it does in section 366.03. It is beyond dispute, in my view, that this statutory provision satisfies the first prong of the *Midcal* test. [90]

---

[88] As the Supreme Court has made clear, a state court's determination that conduct is consistent with some state law does not necessarily insulate that conduct from federal ***antitrust law***. *See* *Parker, 317 U.S. at 351, 63 S. Ct. at 314* (citing *Northern Sec. Co. v. United States, 193 U.S. 197, 344-47, 24 S. Ct. 436, 459-61, 48 L. Ed. 679 (1904))*. Here, however, the Florida Supreme Court has approved that conduct as consistent with the state's policy to displace competition in the natural gas industry. Such a decision is exactly what invokes *Parker* immunity.

[89] Curiously, the panel noted that City Gas challenged the district court's holding that *Parker* immunity did not apply to its refusal to deal, *see* *880 F.2d at 301*, but nevertheless failed to address the issue.

[90] The district court claimed that the legislature, in drafting this provision, had in mind sales of gas for resale to landlords who would re-meter the gas for further distribution to their tenants and that the legislature, therefore, did not specifically contemplate wholesale sales to other natural gas utilities. Although the legislature no doubt had in mind sales to landlords, that fact provides no basis for the district court's conclusion that this provision does not apply to wholesale sales to other natural gas utilities. Not only is that reading inconsistent with the provision's plain language, which refers in broad terms to sales of gas for resale generally, but the district court's construction of the legislature's intent is extremely crabbed. Wholesale sales to other natural

[262]** **[*1336]** *b. Active supervision*.

The active supervision prong of the *Midcal* test is also satisfied here. Two reasons support this conclusion. First, by virtue of its rate-setting function, the FPSC regulates a utility's decision to sell at wholesale. If a utility were to decide to sell at wholesale, the FPSC would exercise its ratemaking function with respect to the wholesale price. The utility would therefore base its decision whether or not to sell at wholesale, at least in part, on the likelihood that the FPSC would approve wholesale rates that were sufficiently high to allow the utility to recover a reasonable return on its investment. As I describe above, the economic implications of selling at wholesale may be quite broad -- affecting the structure of competition in the marketplace and thus forcing the utility to reconsider the deployment of its own resources. *See supra* slip op. at 5219, . The FPSC's rate-fixing process, in the utility's view, might not adequately take into account all of these implications. Or, at least, the utility might be uncertain whether or not the FPSC's rate-fixing calculation would adequately consider these implications. Unless **[**263]** the FPSC were to promulgate regulations expressly dealing with rate calculations for wholesale sales, which it has not, the FPSC would continue to discourage wholesale sales through its rate-fixing process. The FPSC's ratemaking function, therefore, by virtue of its effects on a utility's decision whether or not to sell gas at wholesale, satisfies the active supervision requirement.

Even if the FPSC's ratemaking function did not so affect the utility's decision whether or not to sell gas at wholesale, the active supervision prong would still be satisfied here. As the Court explained in *Patrick*, the purpose of the active supervision requirement is "to ensure that the state action doctrine will shelter only the particular anticompetitive acts of private parties that, in the judgment of the state, actually further state regulatory policies." *486 U.S. at 100-01, 108 S. Ct. at 1663*. Because the state policy concerning sales of gas at wholesale is to leave such decisions entirely to the utility's discretion, the utility would necessarily be acting in accordance with the state policy whether or not it decided to sell at wholesale. Either decision would be consistent with **[**264]** state policy, and neither decision could be inconsistent with that policy. The state, therefore, would never have to exercise its power to disapprove a decision that failed to accord with state policy: no decision could so fail. In this situation, the concerns behind the active supervision requirement are automatically satisfied regardless of how the state supervises the decisionmaking process. *See* P. Areeda & H. Hovenkamp, ***Antitrust Law*** para. 212.7, at 168-69 (Supp. 1989). For this reason as well, the second prong of the *Midcal* test is satisfied in this case.

C. Conclusion.

As the foregoing discussion shows, even if City Gas' conduct could justify the imposition of liability under *section 2* of the Sherman Act, City Gas is immune from liability under the state-action immunity doctrine of *Parker*.

VIII. CONCLUSION

This case's history has been complicated and long. The case is extremely important, however, in that it involves issues of first impression and tests the limits of the antitrust laws. In my view, the district court decided the case improperly, imposing liability on City Gas under *section 2* of the Sherman Act. Because this court today upholds the district **[**265]** court's decision, I am compelled to dissent.

As a preliminary issue, City Gas' territorial agreement with Peoples Gas provided no basis for liability here. That agreement had no causal relationship to Consolidated's injury. Consolidated, therefore, has no standing under the Clayton Act, which authorizes private actions under the antitrust laws, to challenge the territorial agreement.

Nor did City Gas' decision not to sell wholesale natural gas to Consolidated constitute a refusal to deal in violation of **[*1337]** *section 2*. As an initial problem, City Gas did not possess monopoly power in the relevant market. First, the relevant market defined by the district court did not exist. Second, even if that market did exist, City Gas never operated on the wholesale level of the natural gas market; it operated only as a retail distributor of natural gas.

---

gas companies also place an administrative burden on the FPSC by altering the structure of competition in the industry or of the utility's assets, thus increasing the complexity of the ratemaking process. *See supra* slip op. at 5218-5219, . The district court's too narrow construction of the legislature's intent is thus inconsistent with the nature of the regulatory scheme created by chapter 366.

Moreover, City Gas' abandoned and unperformed contract with Florida Gas does not suggest otherwise. Third, even if City Gas had operated as a natural gas wholesaler, it would not have possessed monopoly power in that market. FGT had a tremendous share of that market, and Consolidated, given its projections of the profits it could make **[**266]** as a natural gas company, could practicably have turned to FGT for a wholesale supply of natural gas.

Given the fact that City Gas has never operated as a natural gas wholesaler, no basis existed to require City Gas to deal with Consolidated. Under established law, a defendant is liable under *section 2* when the circumstances surrounding its refusal to deal give rise to an inference of anticompetitive intent. Courts have developed various formulas -- such as the essential facilities doctrine, the monopoly-leveraging theory, and the intent test -- for evaluating the circumstantial evidence in a given case in order to determine whether the evidence justifies an inference of intent. The circumstances here, however, give rise to no inference of anticompetitive intent under any of these formulas. Nor does the existing caselaw under *section 2* justify the imposition of liability on City Gas. The practical implications of imposing a duty to deal in the present category of case also support the conclusion that *section 2* does not apply. In short, the present case simply did not involve the type of refusal to deal that violates *section 2*.

In nevertheless imposing a duty to deal under *section **[**267]** 2* in the present case, the district court thus created a new rule of antitrust liability, which this court today upholds. Under this new rule, City Gas -- a company that has done nothing wrong under established law -- must undertake an entirely new level of operation and submit to a forced sale of gas to Consolidated. City Gas must do so, moreover, not because that undertaking will benefit consumers or enhance competition in general -- it will do neither -- but because the undertaking will enable *Consolidated* to enter the natural gas market as a retail distributor on the most favorable terms possible. That is, this new rule requires City Gas to give its potential competitors a free ride into the natural gas market.

This new rule is, in my view, extraordinarily bad law. It promotes inefficiencies, undermines business firms' rational decisions, and leads to results that are flatly inconsistent with the purposes behind the antitrust laws. In addition, this new rule will be impossible to apply. The district courts of this circuit will face an administrative nightmare in attempting to fashion remedies under this rule. Given these practical implications, Congress surely could not have **[**268]** intended *section 2* to support such a rule. This new rule should therefore be struck down.

Even under this impossible rule, however, which this court today upholds, the district court's decision was erroneous. The district court failed properly to apply its own new rule. For that reason, I would vacate the decision and remand the case for further proceedings. Because the rule implicates the *fifth amendment*, a proper application of the rule depends on a determination of the *fifth amendment* price for the forced sale of gas here. The district court, however, did not find the *fifth amendment* price in the present case. As a result, it did not properly determine (1) whether, given the *fifth amendment* price, City Gas refused to deal in violation of *section 2*; and (2) whether, for purposes of the Clayton Act, Consolidated suffered any injury in fact as a result of City Gas' conduct.

In addition, the district court's failure to set a *fifth amendment* price infected the remedies it awarded Consolidated. First, the district court did not properly calculate its damages awards: those damages must be based on the *fifth amendment* price. Second, the district court was unable to set a price in its **[**269]** injunction requiring City Gas to sell gas to Consolidated; instead, it delegated **[*1338]** the price-setting task to the FPSC. Third, the district court erred in awarding Consolidated both an injunction as well as damages for the loss of its going concern value. Not only are those two remedies theoretically inconsistent, but by awarding Consolidated both remedies, the district court gave Consolidated a double recovery.

For these reasons, even under this impossible new rule, the district court's decision must be vacated, and the case must be remanded so that the district court can properly address these issues.

Finally, even if the district court could properly determine under its new rule that City Gas' conduct violated *section 2*, in my view, City Gas is still immune from liability under the state-action doctrine of *Parker*. City Gas' conduct -- both in entering into a territorial agreement with Peoples Gas and in refusing to sell gas to Consolidated -- was consistent with a clearly articulated and affirmatively expressed state policy that was actively supervised by the state.

Based on the foregoing discussion, I respectfully, but strongly, dissent from this court's decision **[**270]** today.

ANDERSON, Circuit Judge, dissenting:

I join Parts IV and V of Chief Judge Tjoflat's opinion, in which he concludes that City Gas was not a monopolist in the wholesale market and that its refusal to deal did not trigger liability under the essential facilities doctrine or the intent test.

I also join subparts A. and B.1. of Part VII of Chief Judge Tjoflat's opinion, in which he concludes that state action immunity would shield City Gas with respect to the territorial agreement. I also join Judge Johnson's dissent on the issue of state action immunity with respect to the territorial agreement.

EDMONDSON, Circuit Judge, dissenting:

For the reasons stated by Judge Tjoflat, I think that City Gas -- whether or not it would otherwise be liable -- is immune from liability under the state-action immunity doctrine of *Parker v. Brown, 317 U.S. 341, 351, 63 S. Ct. 307, 313-14, 87 L. Ed. 315 (1943)*.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] **Injunctions, Preliminary & Temporary Injunctions**

A court must consider in deciding whether to issue a preliminary injunction (1) whether a substantial likelihood exists that the party seeking the preliminary relief ultimately will succeed on the merits; (2) whether it is likely that the party seeking preliminary relief will suffer immediate and irreparable harm if the relief is not granted; (3) whether granting the relief would cause substantial harm to the other parties; and (4) whether granting the preliminary relief would protect the public interest. The plaintiff bears the burden of proving each of these elements. Although the case law is clear that a court should apply each of the four factors in a flexible manner, the likelihood of success on the merits factor is one of the most significant factors The plaintiff need only raise questions going to the merits so serious, substantial, difficult and doubtful, as to make them fair ground for litigation and thus for more deliberate investigation to satisfy the likelihood of success on the merits element.

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] **Injunctions, Mandatory Injunctions**

The United States Court of Appeals for the Sixth Circuit has ruled that where the relief prayed for is much broader than a mere restraining order preserving the status quo and there is sufficient doubt about whether appellant will ultimately prevail, granting a mandatory injunction is inadvisable. It is inappropriate to give a party relief on the "front end" where sufficient doubt exists as to the party's ultimate chance of prevailing, especially where the relief sought preliminarily is the ultimate relief requested and where that relief is mandatory in nature.

HN9[] **Regulated Industries, Sports**

The National Collegiate Athletic Association ("NCAA") seeks to market a particular brand of football, college football. The identification of this "product" with an academic tradition differentiates college football from and makes it more popular than professional sports to which it might otherwise be comparable, such as, for example, minor league baseball. In order to preserve the character and quality of the "product," athletes must not be paid, must be required to attend class, and the like. And the integrity of the "product" cannot be preserved except by mutual agreement; if an institution adopted such restrictions unilaterally, its effectiveness as a competitor on the playing field might soon be destroyed. Thus, the NCAA plays a vital role in enabling college football to preserve its character, and as a result enables a product to be marketed that might otherwise be unavailable. In performing this role, its actions widen consumer choice, not only the choices available to sports fans but also those available to athletes, and hence can be viewed as procompetitive.

Opinion

[*739] MEMORANDUM

THOMAS A. WISEMAN, JR., CHIEF UNITED STATES DISTRICT JUDGE

This cause of action came before the Court on August 31, 1990, on Gaines' Application for Temporary Restraining Order **[*740]** and Preliminary Injunction. This Court denied the Motion for a Temporary Restraining Order on that date. In the September 13 hearing on Gaines' Motion for a Preliminary Injunction, Gaines urged this Court to enjoin the Defendants from enforcing certain rules ("Rules") promulgated by the National Collegiate Athletic Association ("NCAA") which deem Gaines ineligible to compete in the 1990-91 college football season for Vanderbilt University ("Vanderbilt"). This Court denied the preliminary injunction from the bench and now issues this Opinion setting forth the reasons **[**2]** for the denial.

I.

The facts leading to this lawsuit are not in dispute. Bradford L. Gaines was a football player for Vanderbilt during the 1986-89 football seasons. He is currently enrolled at Vanderbilt to complete the thirteen additional semester hours he needs to graduate. Gaines has attended Vanderbilt on a full athletic scholarship.

In late March of 1990, Gaines submitted a Petition For Special Eligibility and Renunciation of College Eligibility to the National Football League ("NFL") declaring himself eligible for the NFL draft to be conducted on April 22-23, 1990. The paragraph immediately preceding his signature on the Petition contained the following language: "I HEREBY IRREVOCABLY RENOUNCE ANY AND ALL REMAINING COLLEGE FOOTBALL ELIGIBILITY I MAY HAVE. I WISH TO BE ELIGIBLE FOR THE NFL DRAFT SCHEDULED FOR APRIL 22-23, 1990."

On April 7-8, 1990, Gaines attended a scouting combine in Indianapolis, Indiana. The combine gave Gaines and other college football players a chance to try out before the scouts for various pro football teams. Gaines had no other contact with any NFL team prior to the draft, and he was not selected by any team during any round of the draft.

Shortly after **[**3]** the draft, Gaines was contacted by a representative of one NFL team regarding a possible free agency contract with that team. Mr. Tim Greer, who serves as the agent for Gaines' older brother, a football player in the Canadian Football League ("CFL"), briefly discussed this possible free agency contract with the NFL team. However, the next day the team let Gaines know that they were no longer interested in signing him to a free agency contract. Subsequently, Mr. Greer phoned numerous teams in the NFL and the CFL on Gaines' behalf, but Gaines has never entered into any contract with any professional team. Nor has Greer received any compensation of any kind from Gaines. Additionally, Greer has never compensated Gaines in any way.

As a result of NCAA Rules 12.1.1(f), 12.2.4.2, and 12.3.1, Gaines is now ineligible to complete his fourth year of eligibility as a football player at Vanderbilt. Rule 12.1.1(f) [1] provides that an athlete loses his amateur status when he enters a professional draft or enters into an agreement with an agent to negotiate a professional contract. Rule 12.2.4.2, [2] **[**5]** commonly known as the "no-draft" rule, makes a player ineligible for participation in a particular **[**4]** intercollegiate sport when he or she asks to be placed on the draft list or supplemental draft list of a professional league in that sport. **[*741]** Rule 12.3.1, [3] commonly known as the "no-agent" rule, makes any player ineligible for participation in any future intercollegiate sport in which the player agrees, orally or in writing, to be represented by an agent for the purposes of marketing the player's abilities in the sport. This Rule applies even if the player receives no money or financial benefit of any kind from the agent, even if the agent is a family member or a close family friend, and even if the agent has not charged and agrees not to charge the player any fee.

II.

In his Memorandum of Law in support of his application for a preliminary injunction, Gaines argues that the Defendants, by preventing college football players like himself from returning to college play for which they are otherwise eligible after an unsuccessful bid in the NFL draft, have engaged in an unlawful exercise of monopoly power in violation of *15 U.S.C. § 2*. [4] Gaines cites *15 U.S.C. § 26*, which provides that any party threatened with loss or damage by a violation of the antitrust laws may seek injunctive relief against the threatened conduct, as the basis for his injunction suit **[**6]** against the Defendants.

The parties agree on the four relevant factors ***HN2***[] this Court must consider in deciding whether to issue a preliminary injunction:

---

[1] Rule 12.1.1(f) provides as follows:

12.1.1 Amateur Status. An individual loses amateur status and thus shall not be eligible for intercollegiate competition in a particular sport if the individual:

* * * *

(f) Enters into a professional draft or an agreement with an agent or other entity to negotiate a professional contract.

[2] Rule 12.2.4.2 provides as follows:

12.2.4.2 Draft List. An individual loses amateur status in a particular sport when the individual asks to be placed on the draft list or supplemental draft list of a professional league in that sport, even though:

(a) The individual asks that his or her name be withdrawn from the draft list prior to the actual draft,

(b) The individual's name remains on the list but he or she is not drafted, or

(c) The individual is drafted but does not sign an agreement with any professional athletics team.

[3] Rule 12.3.1 provides as follows:

12.3.1 General Rule. An individual shall be ineligible for participation in an intercollegiate sport if he or she ever has agreed (orally or in writing) to be represented by an agent for the purpose of marketing his or her athletics ability or reputation in that sport. Further, an agency contract not specifically limited in writing to a sport or particular sports shall be deemed applicable to all sports and the individual shall be ineligible to participate in any sport.

[4] *15 U.S.C. § 2* provides the following:

HN1[] "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony. . . ."

(1) whether a substantial likelihood exists that the party seeking the preliminary relief ultimately will succeed on the merits;

(2) whether it is likely that the party seeking preliminary relief will suffer immediate and irreparable harm if the relief is not granted;

(3) whether granting the relief would cause substantial harm to the other parties; and

(4) whether granting the preliminary relief would protect the public interest.

American Motors Sales Corp. v. Runke, 708 F.2d 202, 205 (6th Cir. 1983). The parties also agree that the plaintiff bears the burden **[**7]** of proving each of these elements. Although the case law is clear that this Court should apply each of the four factors in a flexible manner, the likelihood of success on the merits factor is one of the most significant factors. *Gibson v. Sallee, 648 F. Supp. 54, 56 (M.D.Tenn. 1986)* (citing *Roth v. Bank of the Commonwealth, 583 F.2d 527, 537 (6th Cir. 1978))*.

This Court recognizes that the plaintiff need only raise "questions going to the merits so serious, substantial, difficult and doubtful, as to make them fair ground for litigation and thus for more deliberate investigation" to satisfy the likelihood of success on the merits element. *Roth v. Bank of the Commonwealth, 583 F.2d 527, 537 (6th Cir. 1978)*; *Brandeis Machinery & Supply Corp. v. Barber-Greene Co., 503 F.2d 503, 505 (6th Cir. 1974)*. However, as elaborated below, this Court has concluded that Gaines has not raised any question on the merits of his *§ 2* claim which presents a "fair ground for litigation." Consequently, because Gaines has failed to show a substantial likelihood that he ultimately will succeed on the merits, this Court must deny his application for a preliminary injunction.

Before analyzing **[**8]** the likelihood of success on the merits factor, however, it is important to point out the nature of the injunctive relief sought by Mr. Gaines and to emphasize the effect of this relief on the standards this Court must apply in determining whether to issue the injunction. **[*742]** Despite the fact that Gaines requested relief in language suggesting the injunction would be merely prohibitory, [5] it is clear to this Court that Gaines really is seeking a mandatory injunction. As Defendant NCAA correctly argued (*see* NCAA's Memorandum In Opposition To Plaintiff's Request For Preliminary Injunction, p. 6 n. 4), Gaines seeks a preliminary injunction to force the NCAA and Vanderbilt to do an affirmative act -- the NCAA to restore his eligibility and Vanderbilt to allow him to participate in its football program this season -- not to preserve the status quo.

[9]** Because Gaines is requesting mandatory relief which would change the status quo, he bears an especially heavy burden in convincing the Court that an injunction is appropriate. ***HN3***[] The United States Court of Appeals for the Sixth Circuit has explained that where "the relief prayed for . . . is much broader than a mere restraining order preserving the status quo" and there is "sufficient doubt about whether appellant will ultimately prevail", granting a mandatory injunction is inadvisable. *See* *Dunn v. Retail Clerks International Ass'n, Local 1529, 299 F.2d 873 (6th Cir. 1962)*. This Court agrees that it is inappropriate to give a party relief on the "front end" where sufficient doubt exists as to the party's ultimate chance of prevailing, especially where the relief sought preliminarily is the ultimate relief requested and where that relief is mandatory in nature.

Several courts in other circuits have ruled in accord more recently. *See* *United Steelworkers of America v. Textron, Inc., 836 F.2d 6, 10 (1st Cir. 1987)* (courts disfavor injunctions that disturb, rather than preserve, the status quo; however, it is appropriate to issue an injunction which changes the "just previous" status **[**10]** quo when the injury to the seeking party is "serious enough," the absence of harm to the opposing party is "clear enough," and the seeking party's likelihood of success is "great enough."); *Committee of Cent. American Refugees v. I.N.S., 795 F.2d*

[5] Gaines' Complaint prays for the following relief:

B. That the Court issue an injunction restraining the Defendants from enforcing NCAA Rules 12.1.1(f), 12.2.4.2, and 12.3.1 in a manner which declare the Plaintiff ineligible from competition as a member of the Vanderbilt University football team during the coming season.

Plaintiff's Complaint at p. 7.

1434, 1441 (9th Cir. 1986) (where a plaintiff seeks a mandatory preliminary injunction "that goes beyond maintaining the status quo *pendente lite*, 'courts should be extremely cautious' about issuing a preliminary injunction and should not grant such relief unless the facts and law clearly favor the plaintiff." (quoting Martin v. International Olympic Committee, 740 F.2d 670, 675 (9th Cir. 1984))); Diaz v. I.N.S., 648 F. Supp. 638, 656 (E.D.Cal. 1986) (the burden of the plaintiff "increases sharply" in seeking mandatory relief; standards for such relief are "stringent").

As detailed below, this Court has concluded that Gaines has not met his burden of proving the likelihood of success on his § 2 claim.

III.

In evaluating Gaines' proof of a § 2 violation, this Court must determine whether he has shown that enforcement of the NCAA Rules constitutes an unlawful exercise of monopoly power by the NCAA. The courts are clear on what **[**11]** ***HN4***[] an unlawful monopoly under § 2 consists of:

> (1) the possession of monopoly power in the relevant market and
>
> (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Beard v. Parkview, 912 F.2d 138 (6th Cir. 1990) (quoting United States v. Grinnell, 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)).

However, before focusing on the two-prong test, the Court must determine whether the eligibility Rules implemented by Vanderbilt and other NCAA schools are subject to federal ***antitrust law***.

[*743] A.

HN5[] The federal antitrust laws seek to prevent restraints on "free competition in businesses and commercial transactions." Hennessey v. NCAA, 564 F.2d 1136 (5th Cir. 1977) (quoting Apex Hosiery Co. v. Leader, 310 U.S. 469, 493, 60 S. Ct. 982, 992, 84 L. Ed. 1311 (1940)). The Defendants argue that the NCAA Rules are not subject to antitrust analysis because they are not designed to generate profits in a commercial activity but to preserve amateurism by assuring that the recruitment of student athletes does not become a commercial activity. *See* Vanderbilt University's Brief **[**12]** In Support Of Motion To Dismiss And Response In Opposition To Application For Preliminary Injunction, p. 4. This Court agrees with the Defendants on this point.

There is no dispute that "while organized as a non-profit organization, the NCAA -- and its member institutions -- are, when presenting amateur athletics to a ticket-paying, television-buying public, engaged in a business venture of far greater magnitude than the vast majority of 'profit-making' enterprises." Hennessey, 564 F.2d at 1149 n. 14. The United States Supreme Court has recognized that the NCAA's television restrictions are subject to antitrust scrutiny because those regulations are commercial in nature. *See* NCAA v. Board of Regents of the University of Oklahoma, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) (holding NCAA's television restrictions violated § 1 of the Sherman Act).

However, there is a clear difference between the NCAA's efforts to restrict the televising of college football games and the NCAA's efforts to maintain a discernible line between amateurism and professionalism and protect the amateur objectives of NCAA college football by enforcing the eligibility Rules. The U.S. Supreme Court **[**13]** recognized as much in the *Board of Regents* case:

> The specific restraints on football telecasts that are challenged in this case do not, however, fit into the same mold as do rules defining the conditions of the contest, *the eligibility of participants*, or the manner in which members of a joint enterprise shall share the responsibilities and the benefits of the total venture.

Board of Regents, 468 U.S. at 117 (emphasis added). Although the U.S. Supreme Court did not state that eligibility rules were not subject to antitrust scrutiny, it cited a case with approval, *Jones v. NCAA, 392 F. Supp. 295 (D.Mass. 1975)*, which stated exactly that. *See* *Board of Regents, 468 U.S. at 102 n. 24*.

In *Jones* a college hockey player sought restoration of his eligibility for intercollegiate competition after it was discovered that he had received compensation for playing hockey before his college enrollment. The court upheld the eligibility Rules under §§ 1 and 2 of the Sherman Act, reasoning that the antitrust laws are aimed primarily at combinations with commercial objectives and have limited application to other types of organizations. The court concluded that the plaintiff **[**14]** ha[d] "not shown how the action of the N.C.A.A. in setting eligibility guidelines had any nexus to commercial or business activities in which the defendant might engage," *Id. at 303*, and that "the N.C.A.A. eligibility rules were not designed to coerce students into staying away from intercollegiate athletics, but to implement the N.C.A.A. basic principles of amateurism." *Id. at 304*.

This distinction between commercial NCAA rules and primarily noncommercial rules was clearly set forth in *Justice v. NCAA, 577 F. Supp. 356 (D.Ariz. 1983)*. The court pointed out that the NCAA now engages in two types of rule-making -- "one type, exemplified by the rules in *Hennessey* [rule limiting number of assistant coaches employable at any one time by certain member institutions] and *Jones* [eligibility rule] is rooted in the NCAA's concern for the protection of amateurism; the other type is increasingly accompanied by a discernible economic purpose [citing *Board of Regents*]." *Id. at 383*. The court upheld the rules at issue (NCAA sanctions rendering the University of Arizona football team ineligible to participate in post-season **[*744]** competition) as being of the former type. *Id*. **[**15]**

The United States Court of Appeals for the Fifth Circuit also has indicated that the NCAA has "some support in the caselaw" (citing to *Jones* and *Justice*) for its argument that the eligibility Rules are not subject to the antitrust laws because these Rules have "purely or primarily noncommercial objectives." *McCormack v. NCAA, 845 F.2d 1338, 1343 (5th Cir. 1988)*. The Fifth Circuit decided the case by assuming that the antitrust laws apply to eligibility rules, and by then finding that the NCAA rules restricting benefits to be awarded to student athletes were reasonable and thus did not violate § 1 of the Sherman Act. [6]

[16]** This Court agrees with the Fifth Circuit in *Hennessey* that the NCAA, with its multimillion dollar annual budget, is engaged in a business venture and is not entitled to a *total* exemption from antitrust regulation on the ground that its activities and objectives are educational and are carried on for the benefit of amateurism. *See* *Hennessey, 564 F.2d at 1148-49*. However, by holding that the eligibility Rules challenged by Gaines are not subject to antitrust analysis, this Court is by no means creating a total exemption, but rather a very narrow one. Justice White's dissenting opinion in *Board of Regents* provides support for this position: "Although the NCAA does not enjoy blanket immunity from the antitrust laws, [citations omitted] it is important to remember that the Sherman Act 'is aimed primarily at combinations having commercial objectives and is applied only to a very limited extent to organizations . . . which normally have other objectives.'" *Board of Regents, 468 U.S. at 133* (White, J., dissenting) (quoting *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 213 n. 7, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959))*.

The United States District Court for the Northern **[**17]** District of Indiana very recently ruled, in a case with facts strikingly similar to those presently before this Court, that it was "unwilling to rely on a single district court opinion [*Jones v. NCAA*] for the conclusion, sought by the NCAA, that the antitrust laws have no application to NCAA regulations concerning eligibility." *Banks v. NCAA, 746 F. Supp. 850, 857 (N.D.Ind. 1990)*. As detailed above, this Court has found more than a single opinion on which to base its conclusion.

---

[6] The D.C. Circuit also has cited *Jones* with approval. In *Ass'n For Intercollegiate Ath. For Women v. NCAA, 236 U.S. App. D.C. 311, 735 F.2d 577 (D.C. Cir. 1984)*, the court, qualifying somewhat its position on the applicability of ***antitrust law*** to eligibility and similar rules, stated: "We do not assert that regulations governing noncommercial activity are exempt from the Sherman Act. Rather, we assert only that such regulations carry less potential of significantly restraining commerce than do regulations governing commercial activity." *Id. at 588 n. 19*.

According to the NCAA Constitution, the purposes of the NCAA eligibility Rules are to maintain amateur intercollegiate athletics "as an integral part of the educational program and the athlete as an integral part of the student body and by so doing, retain a clear line of demarcation between intercollegiate athletics and professional sports." Defendant NCAA's Memorandum In Opposition To Plaintiff's Request For Preliminary Injunction, p. 23 (quoting Purposes and Fundamental Policy of the NCAA, Article One of NCAA Constitution). The overriding purpose of the eligibility Rules, thus, is not to provide the NCAA with commercial advantage, but rather the opposite extreme -- to prevent commercializing **[**18]** influences from destroying the unique "product" of NCAA college football. Even in the increasingly commercial modern world, this Court believes there is still validity to the Athenian concept of a complete education derived from fostering full growth of both mind and body. The overriding purpose behind the NCAA Rules at issue in this case is to preserve the unique atmosphere of competition between "student-athletes." This Court, therefore, rejects the notion that such Rules may be judged or struck down by federal ***antitrust law***.

For the foregoing reasons this Court concludes that denial of Gaines' Application **[*745]** For a Preliminary Injunction is proper because ***HN6***[] the eligibility Rules at issue are not subject to scrutiny under *§ 2* of the Sherman Act.

B.

Notwithstanding the above conclusion, this Court, adopting an approach similar to the Fifth Circuit's in *McCormack v. NCAA, 845 F.2d 1338 (5th Cir. 1988)*, will assume that the antitrust laws apply to the NCAA eligibility Rules and explain why Gaines has not shown a substantial likelihood of succeeding on the merits of his *§ 2* claim. As discussed above, Gaines must show both that the NCAA possesses monopoly power in the relevant market and **[**19]** that the NCAA has willfully acquired or maintained that power.

HN7[] Monopoly power consists of "the power to control prices or exclude competition." *United States v. Grinnell, 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Smith v. Northern Michigan Hospitals, 703 F.2d 942, 954 (6th Cir. 1983)*. The parties dispute the proper definition of the relevant market in which to measure the NCAA's alleged monopoly power. Gaines posits that the product market is one for "major college football player services," consisting of football players at schools in Division I-A of the NCAA. Plaintiff's Brief, p. 13. Assuming this is the relevant market, Gaines argues that the NCAA controls 100% of the market.

In contrast, the NCAA contends that the heart of Gaines' antitrust claim focuses on a different and broader market -- the professional football recruitment market -- by asserting that the Rules hamper competition between the NCAA and the NFL for the top college football players. Consequently, the NCAA argues that it does not have monopoly power over this broader market because it is not capable of controlling prices or excluding competition when the "buyers" in the market are not only **[**20]** the NFL and the NCAA, but also the Canadian Football League, the World League of American Football, and the Arena Football League. *See* NCAA's Memorandum, pp. 16-19.

This Court is hard-pressed to see any validity to the parties' interpretation of college football players like Brad Gaines as "sellers" and NCAA schools and professional football leagues or teams as "buyers" in an economic market. However, this Court sees no need to elaborate on the proper, if any, market definition because Gaines' proof is clearly insufficient as to the second element necessary to a *§ 2* claim.

After showing that a party possesses monopoly power in the relevant market, the plaintiff must show that the party has willfully acquired or maintained its monopoly power. *Grinnell, 384 U.S. at 570-71*. The United States Supreme Court has summarized what a plaintiff must show to establish "willfulness" under *§ 2*. Although in the case of an attempted monopolization the plaintiff must prove a specific intent to accomplish the "forbidden objective," in the case of an actual monopolization "evidence of intent is merely relevant to the question whether the challenged conduct is fairly characterized as '*exclusionary'* ***[**21]*** *or 'anticompetitive' or 'predatory'. . . ." Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 105 S. Ct. 2847, 2857, 86 L. Ed. 2d 467 (1985)* (emphasis added).

Thus, the critical question becomes whether the NCAA eligibility Rules are "unreasonably exclusionary" or "anticompetitive." Gaines argues that the Rules are unreasonably exclusionary because they permanently exclude him and others similarly situated from competing in major college football, because the Rules effectively discourage all major college football players from even attempting to see whether they could make it in the NFL, and because enforcement of the Rules consequently results in the NCAA keeping to itself the most talented of major college football players and enhancing its power with the great economic benefits derived from having the top athletes.

Gaines analogizes the NCAA practices at issue to refusals to deal and argues that, because the U.S. Supreme Court has repeatedly struck down arrangements in **[*746]** which a firm with monopoly power refuses to deal with other firms in order to exclude them from business, this Court similarly should find that the NCAA is unlawfully excluding Gaines because **[**22]** he had contact with a "competitor," the NFL. Gaines also places emphasis on the fact that several NCAA committees and officials have recognized the Rules are restrictive and sometimes unfair and have proposed that college football players should be allowed to enter the professional draft without losing eligibility. *See* Supplemental Affidavit of Paul A. Alexis.

The Defendants, on the other hand, forcefully argue that they have a complete defense to any allegation of the exercise of monopoly power by the NCAA. The U.S. Supreme Court has stated that ***HN8***[] an entity with monopoly power does not violate *§ 2* by refusing to deal with a competitor if there are *valid business reasons* for the refusal. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 597, 605, 105 S. Ct. 2847, 86 L. Ed. 2d 467, 477, 482 (1985)*. The Supreme Court approved the district judge's jury instruction on this issue, which said, in pertinent part, the following:

> 'In other words, if there were legitimate business reasons for the refusal, then the defendant, even if he is found to possess monopoly power in a relevant market, has not violated the law. We are concerned with conduct which unnecessarily excludes **[**23]** or handicaps competitors. This is conduct which *does not benefit consumers by making a better product or service available* -- or in other ways -- and instead has the effect of impairing competition.'

Id. at 597, 86 L. Ed. 2d at 477 (emphasis added).

This Court is convinced that the NCAA Rules benefit both players and the public by regulating college football so as to preserve its amateur appeal. Moreover, this regulation by the NCAA in fact makes a better "product" available by maintaining the educational underpinnings of college football and preserving the stability and integrity of college football programs. Therefore, Gaines cannot succeed on the merits of his *§ 2* claim because the NCAA has shown legitimate business justifications for the Rules at issue.

It seems obvious to this Court that rules which are justified by legitimate business reasons necessarily cannot be deemed "unreasonably exclusionary" or "anticompetitive." Thus, the legitimate business reasons of the NCAA justifying enforcement of the eligibility Rules negate any attempt by Gaines to show the second element of a *§ 2* claim -- willful maintenance of monopoly power. Consequently, regardless of whether the **[**24]** NCAA justifications are viewed as a defense to a *§ 2* challenge or rather as proof contradicting an assertion of willful monopolization, they necessitate a ruling by this Court in favor of the Defendants at this preliminary injunction stage of the proceeding.

The NCAA eligibility Rules have recently been upheld under § 1 of the Sherman Act. *Banks v. NCAA, 746 F. Supp. 850 (N.D. Ind. 1990)*. This Court realizes that the test for a § 1 violation is somewhat different than the two-prong test for a *§ 2* violation. In *Banks* the court upheld the Rules under the Rule of Reason, which requires the court to balance the procompetitive and anticompetitive effects of an alleged restraint and strike down the restraint if the anticompetitive effects predominate. *See Banks*, slip op. at 17. Although the Rule of Reason was developed specifically in *§ 2* case, its focus on the reasonableness of a restraint on competition overlaps with the *§ 2* test for "willfulness" because in a *§ 2* case the court must also decide whether the regulation at issue is unreasonably anticompetitive. Thus, this Court agrees with the findings of the *Banks* court that the "no-agent" and "no-draft" Rules have **[**25]** primarily procompetitive effects in that they promote the integrity and quality of college football and preserve the distinct "product" of major college football as an amateur sport. Gaines would have us hold that a finding of *any* anticompetitive effect requires finding a *§ 2* violation. Gaines argues that such an effect is evident from the proposition that **[*747]** the Rules deter many college players from even testing the professional waters. However, the proper inquiry is whether the Rules are unreasonably anticompetitive. This Court has concluded that the Rules are overwhelmingly procompetitive, are justified by legitimate business reasons, and consequently cannot be viewed as having any unreasonably exclusionary or anticompetitive effect.

The United States Supreme Court has expressly recognized the legitimate procompetitive effects of the eligibility Rules:

> ***HN9***[] The NCAA seeks to market a particular brand of football -- college football. The identification of this "product" with an academic tradition differentiates college football from and makes it more popular than professional sports to which it might otherwise be comparable, such as, for example, minor league baseball. In order **[**26]** to preserve the character and quality of the "product," athletes must not be paid, must be required to attend class, and the like. And the integrity of the "product" cannot be preserved except by mutual agreement; if an institution adopted such restrictions unilaterally, its effectiveness as a competitor on the playing field might soon be destroyed. Thus, the NCAA plays a vital role in enabling college football to preserve its character, and as a result enables a product to be marketed which might otherwise be unavailable. In performing this role, its actions widen consumer choice -- not only the choices available to sports fans but also those available to athletes -- and hence can be viewed as procompetitive.

NCAA v. Board of Regents of Univ. of Olka., 468 U.S. 85, 101-02, 104 S. Ct. 2948, 82 L. Ed. 2d 70, 84 (1984). The Supreme Court distinguished the NCAA television restrictions, which it invalidated under § 1, from "most of the regulatory controls of the NCAA [which] are justifiable means of fostering competition among amateur teams and therefore procompetitive because they enhance public interest in intercollegiate athletics." *Id., 468 U.S. at 117, 82 L. Ed. 2d at 94*. The **[**27]** only conclusion which this Court can reach in light of the Supreme Court's language quoted above is that the Rules challenged by Gaines are not unreasonably anticompetitive.

C.

Because this Court has determined that Gaines has failed to show a substantial likelihood of success on the merits, it is not necessary to discuss fully the other three elements relevant to a preliminary injunction determination.

This Court recognizes that Gaines is harmed more by a denial of his preliminary injunction request than if the injunction was issued. However, Gaines has not made a strong showing that he will suffer immediate and irreparable injury upon denial of his request. It is true he will not be able to play football for Vanderbilt this season. However, it is not true that his chances of playing professional football are irreparably foreclosed. Although his chances may be narrowed by his lack of college play this year, he himself has admitted that he has a good chance to play in some professional league (CFL, Arena Football, etc.). *See* Alexis Affidavit. Ex. 4.

Secondly, this Court must consider the hardship which likely would result to the Defendants were Gaines' request granted. This Court **[**28]** does not consider lightly a request which puts it in the position of substituting its judgment for the authority of a regulatory body, in this case the NCAA. This Court also is reluctant to blur the line further between professional and college football, especially because of the likely increased confusion among players and schools like Vanderbilt concerning the possible consequences of a player unsuccessfully entering the pro draft or a school letting such a player back into its program.

Finally, although there indeed is a strong public interest in encouraging free and open competition in the marketplace, with respect to the unique "marketplace" for college football, there are other strong interests to consider. The public interest is promoted by preserving amateurism and protecting the educational objectives of intercollegiate athletics. As the United **[*748]** States Supreme Court has articulated, "the preservation of the student-athlete in higher education adds richness and diversity to intercollegiate athletics and is entirely consistent with the goals of the Sherman Act." *Board of Regents, 468 U.S. at 120, 82 L. Ed. 2d at 96*.

IV.

Despite the compelling situation which has befallen Mr. **[**29]** Gaines, he has failed to show a substantial likelihood of success on the merits of his *§ 2* claim. From the outset he shouldered a heavier burden because of the mandatory nature of the relief sought. However, this Court is convinced that Gaines has not carried even the lighter burden of establishing any fair ground for litigation of his claim. There is substantial support in the caselaw for this Court's conclusion that the NCAA eligibility Rules are not subject to antitrust scrutiny. Nonetheless, upon such scrutiny, it is clear to this Court that the NCAA has demonstrated strong business justifications for enforcing the current eligibility Rules, leading to the conclusion that the Rules cannot be deemed unreasonably anticompetitive or exclusionary.

For the foregoing reasons Gaines' Application For a Preliminary Injunction is denied.

ORDER - September 20, 1990, Entered

In accordance with the accompanying Memorandum, plaintiff's application for a preliminary injunction is denied.

Yamaha Store of Bend, Inc. v. Yamaha Motor Corp.

Supreme Court of Oregon

April 10, 1990, Argued and submitted ; September 20, 1990

SC No. S36613

HN5[] Monopolies & Monopolization, Attempts to Monopolize

Or. Rev. Stat. § 646.040(1), requires that a plaintiff prove that a defendant's price discrimination "probably" had the proscribed effect on competition.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > Remedies > Damages > General Overview

HN6[] Private Actions, Remedies

The general rule in Oregon in assessing damages has been that a plaintiff should recover only such sums as will compensate a plaintiff for the injury suffered as a result of a defendant's wrong. Furthermore, when damages are susceptible to proof with approximate accuracy, the necessary evidence must be supplied.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > Remedies > Damages > General Overview

HN7[] Private Actions, Remedies

A plaintiff must prove lost profits damages with reasonable certainty.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > Remedies > Damages > General Overview

HN8[] Private Actions, Remedies

The presumed damages provision of Or. Rev. Stat. § 646.160, is a specific statutory exception to the general rule. The provision expressly overrides the general rule of compensatory damages by providing for statutory damages without regard to a plaintiff's actual losses; it also provides an express measure of such damages by conclusively presuming that a successful price discrimination plaintiff has "sustained damages equal to the monetary amount or equivalent of the unlawful discrimination.

Opinion by: VAN HOOMISSEN

Opinion

[*336] **[**657]** Plaintiff, The Yamaha Store of Bend, Oregon, Inc., sued defendant **[***2]** Yamaha Motor Corporation, U.S.A., (Yamaha) for price discrimination, *ORS 646.040(1)*, [1] **[***3]** for breach of contract, and in tort for intentional interference with business and economic relationships. [2] The jury awarded plaintiff a verdict on its price discrimination and breach of contract claims. Judgment was entered trebling the price discrimination award and awarding plaintiff attorney fees and costs. [3] The Court of Appeals affirmed. *Yamaha Store of Bend, Inc. v. Yamaha Motor Corp., 98 Or App 290, 779 P2d 1061 (1989)*.

[*4]** We allowed review to consider two issues of first impression under Oregon's Anti-Price Discrimination Law: What kind of evidence is legally sufficient to present a factual **[*337]** issue of competition, and what is the proper measure of damages under the "such further damages" provision of *ORS **[**658]** 646.160*? [4] We conclude that plaintiff presented sufficient evidence to present a factual issue of competition and that the trial court, therefore, did not err in denying Yamaha's motion for a directed verdict on that issue. However, we also conclude that the trial

---

[1] *ORS 646.040(1)* provides:

> ***HN1***[] "It is unlawful for any person engaged in commerce or food commerce, or both, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities, or services or output of a service trade, of like grade and quality or to discriminate in price between different sections, communities or cities or portions thereof or between different locations in sections, communities, cities or portions thereof in this state, where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them."

[2] Yamaha's cross-claims against defendants Jacques were settled before trial. Plaintiff's claim against defendants Jacques was dismissed by plaintiff. On Yamaha's counterclaim against plaintiff for unpaid parts, plaintiff and Yamaha stipulated before trial that $ 29,391 would be credited to Yamaha against any judgment in plaintiff's favor.

[3] *ORS 646.150* provides:

> ***HN2***[] "If no injunctive relief is sought or required, any person injured by any violation of *ORS 646.010 to 646.180* may maintain an action for damages alone in any court of general jurisdiction in this state. The measure of damages in such action shall be the same as that prescribed by *ORS 646.140*."

ORS 646.140(1) provides:

> ***HN3***[] "Any person injured by any violation, or who will suffer injury from any threatened violation, of *ORS 646.010 to 646.180* may maintain an action in any court of general equitable jurisdiction of this state, to prevent, restrain or enjoin the violation or threatened violation. If in such action, a violation or threatened violation of *ORS 646.010 to 646.180* is established, the court shall enjoin and restrain or otherwise prohibit such violation or threatened violation, and the plaintiff in the action is entitled to recover three-fold the damages sustained by the plaintiff, and the costs of suit and a reasonable attorney fee at trial and on appeal."

[4] *ORS 646.160* provides:

> ***HN4***[] "In any proceedings instituted or action brought in pursuance of the provisions of *ORS 646.140* or *646.150*, the plaintiff, upon proof that the plaintiff has been unlawfully discriminated against by the defendant, shall conclusively be presumed to have sustained damages equal to the monetary amount or equivalent of the unlawful discrimination; and, in addition thereto, may establish *such further damages,* if any, as the plaintiff may have sustained as a result of the discrimination." (Emphasis added.)

court erred in allowing the jury to consider an improper measure of damages and that the judgment as to those damages cannot stand.

[*5]** Given the jury's verdict for plaintiff, disputed questions of fact have been resolved in plaintiff's favor. *Katter v. Jack's Datsun Sales, Inc., 279 Or 161, 163, 566 P2d 509 (1977)*; *Scott v. Mercer Steel/Edwards Realty, 263 Or 464, 466-67, 503 P2d 1242 (1972)*.

Yamaha, the United States distributor for Yamaha motorcycles, published a list of the prices that it charged its dealers for motorcycles. Plaintiff, a retail Yamaha motorcycle dealer from 1978 to 1983, purchased motorcycles, parts, and accessories from Yamaha for resale in Bend, Oregon, and the surrounding area, including Deschutes, Jefferson, and Crook counties.

In June 1982, the largest Portland-area Yamaha dealer went out of business. That dealer had about 550 new 1980, 1981, and 1982 motorcycles in its inventory, which Yamaha repossessed. In July 1982, Yamaha sold those repossessed motorcycles to Beaverton Honda (Beaverton) at prices substantially below Yamaha's regular dealer list prices. Yamaha did not offer to sell any of the repossessed motorcycles at the lower price to plaintiff or to any of its other dealers. Yamaha also provided Beaverton with advantageous **[***6]** credit terms (free "flooring") and advertising support. [5] **[*338]** Beaverton then changed its name to Beaverton Honda-Yamaha and became metropolitan Portland's largest Yamaha dealer.

Beaverton then sold the repossessed motorcycles at retail prices close to other dealers' wholesale costs for the same models. Beaverton advertised its low prices extensively in Portland newspapers and on Portland television stations, all of which were readily available to readers and viewers in the Bend area. Plaintiff's customers were aware of Beaverton's lower prices; plaintiff reduced its own prices and, in some cases, sold motorcycles at or below plaintiff's actual cost. Beaverton sold at least two motorcycles to customers with Bend addresses and several **[***7]** others to customers residing in plaintiff's central Oregon market area.

I.

At trial, Yamaha moved for a directed verdict on plaintiff's price discrimination claim, arguing that as a matter of law plaintiff and Beaverton were not "competitors," a necessary element of an *ORS 646.040(1)* price discrimination claim. The trial court denied that motion, and the Court of Appeals affirmed that denial. On review, Yamaha contends that the Court of Appeals erred in holding that there was evidence of actual competition between plaintiff and Beaverton.

Yamaha argues that the question of whether Beaverton's competitive market included the Bend area may only be determined by how many actual sales Beaverton made to Bend area residents. Pointing to evidence showing that out of more than 800 sales, Beaverton sold only two motorcycles to Bend residents, Yamaha argues that that evidence establishes as a matter of law plaintiff and Beaverton were *not* competitors. Yamaha also argues that it was **[**659]** not sufficient for plaintiff to show the effects of Beaverton's advertising campaign on plaintiff's competitive position (*e.g.,* that Bend area residents would shop in the Portland area or that they knew **[***8]** about Beaverton's lower prices and expected plaintiff to meet them). Yamaha relies primarily upon *Eastern Auto Distrib. v. Peugeot Motors of America, 795 F2d 329, 335 (4th Cir 1986)* (a few "crossover" sales do not prove actual competition) and other federal cases. [6] We find the cited federal cases inapposite, **[*339]** however, because they are concerned with exclusive geographic market areas with defined boundaries. No such clearly defined market areas are involved here.

---

[5] Yamaha also gave advertising support to its other dealers. Thus, advertising support apparently does not constitute part of plaintiff's price discrimination claim. *See 3 Advising Oregon Businesses* (Oregon CLE 1985) § 65.51 (advertising allowance as price discrimination).

[6] Federal cases interpreting the Robinson-Patman Act are persuasive authority in interpreting Oregon's Anti-Price Discrimination Law. *Top Service Body Shop v. Allstate Ins. Co., 283 Or 201, 217 n 21, 582 P2d 1365 (1978)*; *Redmond Ready-Mix, Inc. v. Coats, 283 Or 101, 110, 582 P2d 1340 (1978)*.

The rationale behind the requirement for actual competition in the same market area is that if the favored and disfavored buyers, here Beaverton and plaintiff, [7] **[***10]** do not in **[***9]** fact compete for the same customers, there cannot be a reasonable probability [8] of harm to competition. *Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F2d 1163, 1170-71 (7th Cir 1978)*, *cert den 440 U.S. 982, 99 S Ct 1791, 60 L Ed 2d 242 (1979)*; *M. C. Manufacturing Co. v. Texas Foundries, Inc., 517 F2d 1059, 1066 (5th Cir 1975)*, *cert den 424 U.S. 968, 965 S Ct 1466, 47 L Ed 2d 736 (1976)*; *see* F. Rowe, *Price Discrimination Under the Robinson-Patman Act* 179 (1962) (if buyers on different sides of a boundary line do not compete with each other, no adverse competitive effects at the buyer level follow from the supplier's price variations).

There is no dispute that Yamaha sold 1980, 1981, and 1982 motorcycles to Beaverton at prices significantly lower than the prices Yamaha charged plaintiff for the same models. Furthermore, Yamaha also gave Beaverton advantageous credit terms not given to plaintiff. Beaverton then advertised the sale of its lower priced motorcycles extensively in Portland newspapers and on Portland television stations, media which Yamaha acknowledges in its petition for review are "state-wide" media. [9]

[*11]** **[*340]** The Honda motorcycle dealer in Bend testified that 75 percent of his competition came from Portland area motorcycle dealers, that Bend area customers compared his prices with those of the Portland area dealers, and that his customers came into his store with *The Oregonian's* classified advertising in hand. He testified that Portland pricing directly affected his own prices because, in order to make a sale, he often had to match Portland dealers' prices.

A former Oregon Yamaha district manager, who had been the Oregon Kawasaki district manager at the time of Yamaha's sale to Beaverton, testified that the predictable effect of Yamaha's sale to Beaverton was to put all other dealers in Beaverton's market at a competitive disadvantage.

One of plaintiff's owners testified that Beaverton's advertising of its lower prices forced plaintiff to lower its own prices. **[**660]** Plaintiff's general manager testified that it was impossible for plaintiff to compete with Beaverton because of Beaverton's advertising and low prices and that although plaintiff's primary sales area was the Bend area, plaintiff nevertheless had to lower its prices to compete with Beaverton.

A Bend resident testified **[***12]** that he had become aware of Beaverton's lower prices from television advertising seen in Bend and that he had bought a motorcycle from Beaverton because of its advertised lower price.

A former Baker, Oregon, Yamaha dealer testified that he, too, had been damaged by Yamaha's 1982 sale to Beaverton. There also was evidence that of twelve Yamaha dealers in northwestern Oregon before the challenged

---

[7] Price discrimination cases distinguish among the probable impact of the price discrimination on competitors of the seller (primary-line discrimination), on the favored and disfavored buyers (secondary-line discrimination), or on the customers of either of them (third-line discrimination). *See* *Redmond Ready-Mix, Inc. v. Coats, supra, 283 Or at 115 n 17*; 3 *Advising Oregon Businesses, supra,* § 65.44-65.45; 3 E. Kintner & J. Bauer, *Federal* ***Antitrust Law*** § 20.9 at 127 (1983). This is a secondary-line discrimination case.

[8] ***HN5***[] *ORS 646.040(1)* requires that a plaintiff prove that a defendant's price discrimination "probably" had the proscribed effect on competition. *Redmond Ready Mix, Inc. v. Coats, supra, 283 Or at 114*.

[9] In *Zoslaw v. MCA Distributing Corp., 594 F Supp 1022 (ND Cal 1984)*, the court denied the defendant's motion for a summary judgment, even though there was no evidence that the plaintiff had actually lost any sales. The court found that there remained an issue of fact as to the competition element, based in part on the fact that the defendant's advertisements reached the plaintiff's market area. The court also relied on statements that the plaintiff's customers would "buy the product at a much lower price at [the defendant's store]" to find that there was an issue concerning the defendant's competitive presence in the plaintiff's market area. *594 F Supp at 1035*.

sale to Beaverton, some started closing up within a few months after the sale, and all twelve were out of business by the time this case came to trial. [10]

Plaintiff's expert witness, an economist, testified that the relevant competitive market is wherever the impacts of a price differential are felt; that **[***13]** Beaverton's extensive advertising of its low prices would have an impact on plaintiff; that competition in the Bend area definitely would be **[*341]** lessened; and that the effect was a foreseeable, natural, and necessary consequence of Beaverton's extensive advertising of its low prices. He further testified that the foreseeable consequences to plaintiff would include diversion of sales, negative customer relations, and the depressed value of plaintiff's new and used motorcycle inventory. He testified, "The Bend area is reasonably in the Portland [market] area."

Yamaha's own records showed that Beaverton made sales in Oregon to customers from Salem, Albany, Hood River, Madras, Bend, Lakeview, Long Creek, Burns, and Pendleton. In addition to sales in Oregon, Beaverton made sales to customers in Montana, California, Alaska, and Washington. Beaverton's advertisements in *The Oregonian* proclaimed, "We're your # 1 in the U.S.A. Yamaha connection."

We agree with the trial court and the Court of Appeals that there was evidence in the record from which a jury could find that the Bend area was part of Beaverton's market; that Beaverton competed with plaintiff for customers from the **[***14]** Bend area; that Yamaha discriminated in the prices it charged Beaverton and plaintiff for 1982 motorcycles; and that such discrimination had the proscribed effect on competition. *ORS 646.040(1)*. The trial court therefore did not err in denying Yamaha's motion for a directed verdict.

II.

We next consider Yamaha's contention that the Court of Appeals erred in affirming that devaluation of inventory was a proper measure of damages as to plaintiff's inventory of 1980 and 1981 motorcycles (the noncurrent inventory). For the purposes of this assignment of error, Yamaha assumes that plaintiff proved actionable price discrimination as to its inventory of 1982 motorcycles (the current inventory) and therefore is entitled to *ORS 646.160* presumed damages for the difference in the price plaintiff and Beaverton paid Yamaha in 1982 for 1982 motorcycles.

At trial, Yamaha moved to strike plaintiff's devaluation evidence, arguing that as a matter of law devaluation of inventory was not a proper measure of damages *as to plaintiff's noncurrent inventory* because plaintiff had in fact sold all of its noncurrent inventory before trial. Yamaha asserted that the proper measure of plaintiff's damages **[***15]** was instead lost **[*342]** profits, *i.e.,* the difference between the prices plaintiff actually received for its noncurrent inventory and the prices it would have received *but for* Yamaha's price discrimination on the 1982 models. The trial court denied Yamaha's motion to strike. On these facts, we agree with Yamaha, and **[**661]** conclude that the trial court erred in denying Yamaha's motion.

Although terming them "devaluation-of-inventory" damages, plaintiff essentially sought (and the jury awarded) damages measured by the difference between the prices Beaverton paid Yamaha in 1982 for 1980 and 1981 motorcycles and the prices plaintiff paid Yamaha in 1980 and 1981 for the same models, a measure of damages identical to presumed damages under *ORS 646.160*. [11]

---

[10] Yamaha argues on appeal that there was no evidence at trial that any of those dealers closed because of Yamaha's sale to Beaverton and that other factors contributed to the closures. Although we do not decide that issue, the concurrence in time of those events made such evidence relevant for consideration by the jury.

[11] The jury awarded plaintiff damages of $ 2,166.56 for the difference in price charged to Beaverton and plaintiff on 1982 motorcycles purchased from defendant and $ 23,691.45 for the reduction in value of plaintiff's 1980 and 1981 motorcycles, for total price discrimination damages of $ 25,858.01. The jury also gave plaintiff an identical award of $ 25,858.01 on its alternate breach of contract claim (for the reduction in value of plaintiff's inventory of new and noncurrent motorcycles due to Yamaha's breach of the dealership agreement). The trial court trebled the price discrimination award and entered judgment for plaintiff for $ 77,574.03. The trial court offset that award by $ 29,391, which the parties had stipulated plaintiff owed Yamaha for parts, resulting in a net recovery to plaintiff of $ 48,183.03.

[*16]** In affirming that measure of damages, the Court of Appeals explained:

> "[Yamaha] argues * * * that devaluation of inventory is not a proper measure of damages in this case [for plaintiff's 1980 and 1981 inventory], because plaintiff in fact sold all of the motorcycles in its inventory, most for prices above its actual costs. That fact is not inconsistent with finding that Beaverton's advertising reduced the value of plaintiff's 1980 and 1981 models. The evidence that plaintiff received less than its usual markup for those motorcycles because of the competition from Beaverton is evidence that the competition reduced the value of the inventory. A jury could find that the reduction in value was equal to the difference between the prices that plaintiff and Beaverton paid. Under *ORS 646.160*, there is a conclusive presumption that plaintiff suffered damages equal to the amount of the price discrimination. It is consistent with that provision to permit the jury to apply the same measure of damages to the discrimination on the older models." *Yamaha Store of Bend, Inc. v. Yamaha Motor Corp., supra, 98 Or App at 296-97*.

[*343] On these facts, we **[***17]** disagree that it is "consistent" with *ORS 646.160* to have permitted the jury to apply a devaluation of inventory measure of damages when all of plaintiff's noncurrent inventory had in fact been sold before trial.

At trial, plaintiff expressly disclaimed that it was seeking *ORS 646.160* presumed damages with respect to its noncurrent inventory, apparently, according to the Court of Appeals,

> "because federal cases require that the allegedly discriminatory sales be reasonably contemporaneous. Plaintiff had bought its stock of 1980 and 1981 models in those years, while Beaverton purchased its stock in 1982." *Id., 98 Or App at 296 n 8*. [12] **[***18]**

The trial court specifically instructed the jury that *ORS 646.160* conclusively presumes that plaintiff was damaged in the amount of the discrimination on the 1982 models. [13] Plaintiff, however, was entitled **[**662]** to recover "such further damages" as it may have sustained as to its noncurrent inventory as a result of Yamaha's price discrimination on plaintiff's current inventory. The question is: How are "such further damages" to be measured?

[*19]** **[*344]** For more than a century, ***HN6***[] the general rule in Oregon in assessing damages has been that a plaintiff should recover only such sums as will compensate a plaintiff for the injury suffered as a result of a defendant's wrong. *Budd v. Multnomah St. Ry. Co., 15 Or 413, 419, 15 P 569 (1887)*. [14] Furthermore, when

---

[12] Federal cases interpreting the Robinson-Patman Act do require that discriminatory sales be "reasonably contemporaneous." *See, e.g., Rutledge v. Electric Hose & Rubber Co., 511 F2d 668, 677 (9th Cir 1975)*; *Atalanta Trading Corp. v. Federal Trade Com'n, 258 F2d 365, 372 n 6 (2nd Cir 1958)*; *Valley Plymouth v. Studebaker-Packard Corp., 219 F Supp 608, 610 (SD Cal 1963)*. The posture of this case does not require us decide whether the reasonably contemporaneous rule applies under state law, or, if so, how it would apply to these facts.

[13] The trial court instructed the jury in part:

> "With regard to the second claim only, that is the price discrimination claim if plaintiff has proven by preponderance of the evidence, each of the elements necessary to prevail on its price discrimination claim, the second claim, the law conclusively presumes that plaintiff was damaged in the amount of the price discrimination that is the difference between the price charged plaintiff and the price charged Beaverton. This amount may not exceed $ 3,292.24.
>
> "This presumption of damages only applies to plaintiff's price discrimination claim. That presumed price differential cannot be the basis for the measure of damage on the other claim.
>
> "* * *
>
> "Plaintiff seeks damages for reduction in value of plaintiff's 1980 and 1981 motorcycle inventory which plaintiff had on hand at the time of the Beaverton deal. * * * The measure of damages for loss and value of property is the amount of money that is equal to the difference between the value of property in question before the Beaverton sale and the reduced value of the property, if any, resulting from the Beaverton sale."

damages are susceptible to proof with approximate accuracy, the necessary evidence must be supplied. *Porter Const. Co. v. Berry et al, 136 Or 80, 93, 298 P 179 (1931)*. [15]

[*20]** ***HN8***[]

The presumed damages provision of *ORS 646.160* is a specific statutory exception to the general rule just stated. That provision expressly overrides the general rule of compensatory damages by providing for statutory damages without regard to a plaintiff's actual losses; it also provides an express measure of such damages by conclusively presuming that a successful price discrimination plaintiff has "sustained damages equal to the monetary amount or equivalent of the unlawful discrimination." No similar directives are provided in the statutory provision for "such further damages."

We believe that by using the qualifier "further" in *ORS 646.160*, the legislature intended that insofar as possible any additional damages must be compensatory damages designed to restore a plaintiff to the place he or she would have occupied but for the price discrimination. Stated differently, the amount of "such further damages" should be equal to any actual loss to a plaintiff attributable to a defendant's price discrimination. This interpretation of our statute appears to be consistent with federal case law which holds that under the Robinson-Patman Act all price discrimination damages must be proved. **[***21]** *See e.g., J. Truett Payne Co. v. Chrysler Motors* ***[*345]*** *Corp., supra, 451 U.S. at 561-63* ("automatic damages" rejected; plaintiff must show actual damages). Plaintiff cites no legislative history or other authority in support of its argument that on a devaluation of inventory measure of damages was appropriate on these facts, and we have found none.

Plaintiff sold all of its noncurrent inventory before trial and had records demonstrating how much it actually received on those sales. The trial court should have required plaintiff to prove its actual damages with respect to all its claims, except its claim for *ORS 646.160* presumed damages as to its 1982 inventory. Because the trial court erred in denying Yamaha's motion to strike plaintiff's evidence concerning damages pertaining to the 1980 and 1981 models, the judgment awarding plaintiff price discrimination damages of $ 23,691.45 for the reduction in value of its noncurrent inventory, and $ 25,858.01 for breach of contract based upon the same **[**663]** improper theory of damages cannot stand. A new trial is required.

The final issue is the scope of retrial. We first recognize the distinction **[***22]** between the liability and the damages issues. Plaintiff's proof of Yamaha's price discrimination on the 1982 motorcycles and of Yamaha's breach of the dealership agreement was sufficient. Therefore, there is no need for a new trial on the liability issues. Furthermore, proof of plaintiff's price discrimination damages on the 1982 motorcycles was specific. Therefore, as to plaintiff's claim for price discrimination: the judgment in plaintiff's favor on the issue of liability is affirmed; the judgment in plaintiff's favor for $ 6,499.68 ($ 2,166.56 X 3) presumed damages as to plaintiff's 1982 motorcycles is affirmed; the judgment in plaintiff's favor for $ 71,074.35 ($ 23,691.45 X 3) such further damages as to plaintiff's noncurrent inventory is vacated. As to plaintiff's claim for breach of contract: the judgment in plaintiff's favor on the issue of liability is affirmed, the judgment in plaintiff's favor for $ 25,858.01 breach of contract damages is vacated. The case is remanded to the trial court for a new trial only on the issue of price discrimination damages as to plaintiff's noncurrent inventory, and breach of contract damages for Yamaha's breach of the parties' dealership **[***23]** agreement.

---

[14] *Accord Millers Mut. Fire Ins. Co. v. Wildish Const. Co., 306 Or 102, 117, 758 P2d 836 (1988)* (just compensation without enrichment); *United Engine Parts v. Ried, 283 Or 421, 432, 584 P2d 275 (1978)* (to make plaintiff "whole"); *Ore. Mutual Fire Ins. Co. v. Mathis, 215 Or 218, 224, 334 P2d 186 (1959)* (same).

[15] Generally, ***HN7***[] a plaintiff must prove lost profits damages with reasonable certainty. *Willamette Quarries v. Wodtli, 308 Or 406, 412, 781 P2d 1196 (1989)*. While the standard for proving damages, apparently, is not in issue here, federal courts sometimes allow a relaxed standard for proving damages in antitrust cases. *See Texaco Inc. v. Hasbrouck, U.S. , , 110 S Ct 2535, 110 L Ed 2d 492 (1990)*; *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 565-66, 101 S Ct 1923, 68 L Ed 2d 442 (1981)*. We need not decide here whether the federal rule excusing antitrust plaintiffs from an unduly rigorous standard of proving antitrust injury is applicable to *ORS 646.160*.

The trial court found that plaintiff was entitled to reasonable attorney fees and costs on its price discrimination **[*346]** claim pursuant to *ORS 646.140* and on its contract claim pursuant to a provision in the parties contract. In the Court of Appeals, Yamaha assigned as error the trial court's award of $ 90,000 attorney fees to plaintiff as being "excessive." Yamaha did not pursue that issue in this court. Nevertheless, because we conclude that the trial court erred in denying Yamaha's motion to strike plaintiff's devaluation of inventory theory of damages, on remand, the circuit court shall reexamine the issue of attorney fees and costs.

The decision of the Court of Appeals is affirmed in part and reversed in part. The judgment of the circuit court is affirmed in part and reversed in part. Remanded to the circuit court for further proceedings consistent with this opinion.

Energy & Utilities Law > Antitrust Issues > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

HN1[] **Monopolies & Monopolization, Actual Monopolization**

A firm can engage in a price squeeze only if it operates at two levels of an industry and only if its competitors at one level are also its customers.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Energy & Utilities Law > Antitrust Issues > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Monopolies & Monopolization, Actual Monopolization**

A price squeeze occurs when the integrated firm's price at the first level is too high, or its price at the second level is too low, for the independent to cover its costs and stay in business.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Energy & Utilities Law > Antitrust Issues > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Monopolies & Monopolization, Actual Monopolization**

A price squeeze violates § 2 of the Sherman Act, 15 U.S.C.S. § 2(a), when (1) the firm conducting the squeeze has monopoly power at the first industry level, (2) its price at this level is higher than a "fair price," and (3) its price at the second level is so low that its competitors cannot match the price and still make a "living profit."

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Energy & Utilities Law > Antitrust Issues > General Overview

HN4[] **Sherman Act, Claims**

Under § 2 of the Sherman Act, 15 U.S.C.S. § 2(a), it is unlawful for a firm to monopolize any part of the trade or commerce among the several States. To prove a violation of this statute, a plaintiff must demonstrate (1) that the defendant possesses monopoly power in the relevant market, and (2) that the defendant has acquired or maintained that power by improper means.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN5[] **Monopolies & Monopolization, Actual Monopolization**

"Exclusionary conduct" has been defined as conduct, other than competition on the merits or restraints reasonably "necessary" to competition on the merits, that reasonably appears capable of making a significant contribution to creating or maintaining monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Energy & Utilities Law > Antitrust Issues > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Monopolies & Monopolization, Actual Monopolization**

A practice is "anticompetitive" only if it harms the competitive process. It harms that process when it obstructs the achievement of competition's basic goals -- lower prices, better products, and more efficient production methods.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

When a firm, or even a group of firms adhering to a vertical agreement, lowers prices but maintains them above predatory levels, the business lost by rivals cannot be viewed as an "anticompetitive" consequence of the claimed violation.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

It is unlawful for a monopolist to charge more than a "fair price" for the primary product while simultaneously charging so little for the secondary product that its second-level competitors cannot make a "living profit."

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

The price squeeze is exclusionary if the anticompetitive risks associated with a price squeeze outweigh the possible benefits and the adverse administrative considerations.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Full price regulation dramatically alters the calculus of antitrust harms and benefits. First, regulation significantly diminishes the likelihood of major antitrust harm. In particular, it diminishes the likelihood of "entry barrier" harm, namely the risk that (1) prices will rise because (2) new firms will hesitate to enter a market and compete after (3) a squeeze has driven pre-existing independent competitors from the marketplace. All three propositions are made doubtful by regulation.

Antitrust & Trade Law > Sherman Act > General Overview

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Business & Corporate Compliance > ... > Electric Power Industry > Federal Power Act > Federal Rate Regulation

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

In a regulated industry, regulators control prices directly. Statutes typically require regulators to maintain prices at "reasonable" levels.

Energy & Utilities Law > Antitrust Issues > Exclusionary Conduct

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > Utility Companies

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Energy & Utilities Law > Antitrust Issues > General Overview

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

Energy & Utilities Law > Electric Power Industry > General Overview

Energy & Utilities Law > Electric Power Industry > Electricity Distribution & Transmission > General Overview

HN12[] **Antitrust Issues, Exclusionary Conduct**

Regulation in the electricity industry makes it less likely that a price squeeze will actually drive independent distributors from the marketplace. Local electricity distribution is considered a "natural monopoly" with service typically provided by a single franchised company to relatively immobile customers.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Energy & Utilities Law > Antitrust Issues > Exclusionary Conduct

HN16[] **Antitrust Issues, Exclusionary Conduct**

A price squeeze in a fully regulated industry such as electricity will not normally constitute "exclusionary conduct" under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2(a)*.

HN18[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Monopoly power is the power to raise price well above competitive levels before customers will turn elsewhere.

Opinion

[*18] BREYER, Chief Judge,

The chief question raised by this appeal is whether a pricing practice known as a price squeeze violates the antitrust laws when it takes place in a fully regulated industry.

To understand the nature of a price squeeze the reader must keep three basic facts in mind. First, *HN1*[] a firm can engage in a price squeeze only if it operates at two levels **[**2]** of an industry, and only if its competitors at one level are also its customers. Alcoa, the defendant in a famous antitrust case, provides an example of such a firm. *See* *United States v. Aluminum Co., 148 F.2d 416 (2d Cir. 1945)* (Alcoa). For several decades, Alcoa controlled the domestic production of almost all of America's aluminum ingot. It sold its ingot to independent fabricators, some of whom turned the ingot into aluminum sheet; it also fabricated sheet itself. Both Alcoa and the independents sold the finished sheet to the same group of consumers. Alcoa, therefore, operated at two levels of the aluminum business -- ingot production and sheet production -- and it competed with its customers (the independent sheet fabricators) at the second level.

Second, ***HN2***[] a price squeeze occurs when the integrated firm's price at the first level is too high, or its price at the second level is too low, for the independent to cover its costs and stay in business. Suppose, hypothetically, that Alcoa's price for ingot was $ 100 per ton; that the independents' costs of fabricating ingot **[**3]** into sheet was $ 50 per ton; and that Alcoa's price for sheet was $ 145 per ton. Under these circumstances, the independents, with ingot costs of $ 100 and fabricating costs of $ 50, would have no "room" to make a profit, for they could not charge more than $ 145 for sheet without losing all of their business to Alcoa. Alcoa's prices of $ 100 for ingot and $ 145 for sheet would squeeze the independents out of business.

Third, Judge Learned Hand, in *United States v. Aluminum Co., supra*, wrote that ***HN3***[] a price squeeze violates Sherman Act *§ 2*, *15 U.S.C. § 2(a)*, when (1) the firm conducting the squeeze has monopoly power at the first industry level, (2) its price at this level is "higher than a 'fair price,'" and (3) its price at the second level is so low that its competitors cannot match the price and still make a "living profit." *See id. at 437-38*. Other courts, using substantially similar language, have reached the same conclusion. *See, e.g., Bonjorno v. Kaiser Aluminum & Chem. Corp., 752 F.2d 802, 808-11 (3d Cir. 1984)*, *cert. denied*, *477 U.S. 908, 91 L. Ed. 2d 572, 106 S. Ct. 3284 (1986)*; **[**4]** *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 553 (2d Cir. 1977)*; *Carl Hizel & Sons, Inc. v. Browning-Ferris Indus., Inc., 600 F. Supp. 161, 161-62 (D. Colo. 1985)*.

This case raises a narrow question about the price squeeze theory of antitrust liability: does Sherman Act *§ 2* forbid a governmentally **[*19]** regulated firm with *fully regulated* prices -- prices that are regulated at both industry levels -- from asking regulators to approve prices that could create a price squeeze? Despite language in some cases suggesting that the answer is yes, *see* [slip op.] pp. 34-36, *infra*, our analysis of the likely effects of a price squeeze in a fully regulated industry leads us to conclude that the answer is no. Effective price regulation at both the first and second industry levels makes it unlikely that requesting such rates will ordinarily create a serious risk of significant anticompetitive harm. At the same time, regulatory circumstances create a significant risk that a court's efforts to stop such price requests will bring about the very harms -- diminished efficiency, higher prices -- that **[**5]** the antitrust laws seek to prevent. We conclude, therefore, that price regulation will, in most cases, prevent a price squeeze from constituting an "exclusionary practice" of the sort that Sherman Act *§ 2* forbids.

We also conclude that, regardless, the plaintiffs in this particular case did not demonstrate the existence of an unlawful exclusionary practice, for the evidence does not support a critical jury finding. It does not show that the defendant, Boston Edison, possessed monopoly power in the primary product market.

For these reasons, we reverse a judgment in favor of the plaintiffs.

I

Background

The private firms that supply American homes and businesses with electricity are called "investor-owned utilities." Most of these firms are fully integrated, operating at all three levels of the electric power industry: (1) they *produce* (or generate) electricity, (2) they *transmit* electricity from generators to local distributors, and (3) they *distribute* electricity at the local level. *See generally* Joskow, *Mixing Regulatory and Antitrust Policies in the Electric Power Industry: The Price Squeeze and Retail Market Competition*, in *Antitrust and Regulation* **[**6]** 175-78 (F.M. Fisher ed. 1985) [hereinafter *Joskow*]; Meeks, *Concentration in the Electric Power Industry: The Impact of Antitrust Policy*, 72 Colum. L. Rev. 64, 67-69 (1972) [hereinafter *Meeks*]. Despite being fully integrated, these firms typically do not distribute only electricity that they themselves have generated. Rather, in many parts of the country, groups of firms have formed power "pools" through which they coordinate the generation, transmission, and distribution of electricity throughout a large geographical area. These pooling arrangements aim to enhance reliable and efficient electric service by matching customer demands (which change minute by minute) with available low-cost supply sources. As a result of power pooling, an integrated utility will often wind up distributing electricity generated by a different, interconnected company. *See generally* 16 U.S.C. § 824a-1 (governing pooling agreements); *New England Power Pool Agreement, 56 F.P.C. 1562 (1976)* (describing the New England Power Pool), *petitions for review denied,* *Municipalities of Groton v. FERC, 190 App. D.C. 399, 587 F.2d 1296 (D.C.Cir. 1978)*; **[**7]** C. Phillips, Jr., *The Regulation of Public Utilities* 585-92 (1988) (discussing coordination among electric utilities) [hereinafter *C. Phillips*]. Even in the absence of explicit pooling arrangements, the many physical interconnections among American utilities, combined with the tendency of electricity to flow instantaneously along interconnected lines to wherever it is demanded, make it likely that electricity distributed by one utility will be supplied by another. One legal consequence of these interconnections and pooling arrangements is that most electricity flows "interstate," permitting federal, as well as state, regulation of electricity. *See* *Cincinnati Gas & Elec. Co. v. FPC, 376 F.2d 506, 507-09* (6th Cir.), *cert. denied*, *389 U.S. 842, 88 S. Ct. 77, 19 L. Ed. 2d 106 (1967)*; *Public Serv. Co. v. FPC, 375 F.2d 100* (7th Cir.), *cert. denied*, *387 U.S. 931, 87 S. Ct. 2054, 18 L. Ed. 2d 992 (1967)*; *see generally* *FPC v. Florida Power & Light Co., 404 U.S. 453, 30 L. Ed. 2d 600, 92 S. Ct. 637 (1972)*.

Investor-owned utilities of the type we have described supply approximately 75% **[*20]** **[**8]** of the nation's electricity. The remainder is supplied by government- and consumer-owned systems. Unlike their investor-owned counterparts, these systems tend *not* to be integrated. The federal government, for example, generates about 10% of the nation's electricity (at systems such as the Tennessee Valley Authority), but sells most of it to independent distributors. Approximately 2,000 municipalities and cooperatives own small-scale distribution companies, but only a handful generate their own electricity; most purchase the electricity they distribute from investor-owned utilities or from the federal government. In contrast to investor-owned systems, municipal systems typically enjoy generous tax and financing subsidies and substantial freedom from regulation. *See generally Joskow* at 175-78; Joskow and Schmalensee, *Markets for Power: An Analysis of Electric Utility Deregulation* 17-20 (1983); Lopatka, *The Electric Utility Price Squeeze as an Antitrust Cause of Action*, *31 UCLA L. Rev. 563, 568* & n. 29 (1984) [hereinafter *Lopatka*]; *Meeks*, 72 Colum. L.J. at 67-69.

The record before us reveals facts typical of the national pattern. The defendant, **[**9]** Boston Edison, is a fully integrated investor-owned utility. It belongs to the New England Power Pool ("NEPOOL"). It transmits electricity (either self-generated or, *e.g.*, secured from other NEPOOL members) to 52 cities and towns in eastern Massachusetts. Each of these towns has only one distribution system serving all of the towns' inhabitants. In 39 of the towns, Edison owns the distribution system. In the remaining towns, either the town itself or another utility owns the distribution system. Concord and Wellesley, the plaintiffs, are two of the towns that own their own distribution systems. They take all of their electricity over Edison's transmission lines, and buy most of it directly from Boston Edison.

Edison's rates are completely regulated. The Federal Energy Regulatory Commission ("FERC," or the "Commission") regulates the rates that Edison charges when it sells electricity at "wholesale" (*i.e.*, when it sells electricity to other firms, including municipal distributors, for resale to final customers). *See* 16 U.S.C. § 824 (regulating the "transmission . . . and . . . sale of electric energy at wholesale in interstate commerce"). Before **[**10]** Edison can increase its rates, it must publish the new rates in the Federal Register and give notice of the proposed increase to each of its wholesale customers. *See* 18 C.F.R. § 35.8 (1990). If an interested party raises a legitimate question about the rate increase, FERC normally will suspend the new rates for up to five months, investigate them, and, if it has not completed its investigation by then, permit them to take effect *subject to refund* in the event it ultimately rejects them. *See* 16 U.S.C. § 824d(d, e). Similarly, the Massachusetts Department of Public Utilities ("DPU") regulates the "retail" rates that Boston Edison charges to consumers in the 39 cities and towns in which it distributes electricity. *See* M.G.L. c. 164, §§ 93-94G. In contrast, as we mentioned earlier, no agency regulates the retail rates that municipal distributors, such as Concord and Wellesley, charge to their customers, for these distributorships are non-profit entities indirectly controlled (through the ballot) by the very customers they serve.

Between 1984 and 1987, Edison filed a series of wholesale rate increases with FERC. Wellesley and Concord vigorously **[**11]** opposed those rate increases before the Commission. In each case, after briefly suspending the rates, the Commission allowed them to take effect subject to refund. The towns sought judicial review of FERC's decisions. Eventually, with one exception not relevant here, *see* *Towns of Wellesley, Concord and Norwood v.*

FERC, 786 F.2d 463 (1st Cir. 1986), this court upheld as lawful the relevant FERC determinations, *see* Towns of Concord and Wellesley v. FERC, 844 F.2d 891 (1st Cir. 1988); Boston Edison Co. v. FERC, 885 F.2d 962 (1st Cir. 1989).

Concord and Wellesley then attacked the same wholesale rate increases on another legal front. They brought this antitrust action in federal district court. They pointed out that these *wholesale* rate increases filed with FERC were not matched by corresponding **[*21]** *retail* rate increases. Thus, over a three-year period, Edison's rates to Concord and Wellesley increased while its rates to its own retail customers in the 39 towns surrounding Concord and Wellesley stayed roughly the same. The effect of this disparity, said Concord and Wellesley, was to put the two towns in a price squeeze. **[**12]** If they did not raise their own retail rates to reflect the higher cost of buying electricity from Edison, they would make less money; but if they raised their retail rates while Edison's stayed the same, customers for whom they and Edison compete (say, a small manufacturer with high energy costs) might decide to forego Concord and Wellesley and settle in a town served by Edison. In light of the resulting potential harm to their electricity distributing businesses, Concord and Wellesley argued that the wholesale price increases, in the absence of corresponding retail price increases, amounted to unlawful monopolization. *See* Sherman Act § 2, 15 U.S.C. § 2(a). A jury agreed, and the district court declined to overturn its verdict. *See* Town of Concord v. Boston Edison Co., 721 F. Supp. 1456 (D. Mass. 1989). We disagree with the district court, and we reverse the judgment.

II

The Price Squeeze

The basic legal principles that govern this monopolization case are well settled. Even though Boston Edison is a regulated firm, it has no blanket immunity from the antitrust laws. *See* Otter Tail Power Co. v. United States, 410 U.S. 366, 372-75, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973); **[**13]** *see also* Cantor v. Detroit Edison, 428 U.S. 579, 596 n. 35, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976); Gulf States Utils. Co. v. FPC, 411 U.S. 747, 758-59, 36 L. Ed. 2d 635, 93 S. Ct. 1870 (1973). The ***antitrust law*** relevant in this case makes ***HN4***[] it unlawful for a firm to "monopolize . . . any part of the trade or commerce among the several States." Sherman Act § 2, 15 U.S.C. § 2(a). To prove a violation of this statute, a plaintiff must demonstrate (1) that the defendant possesses "monopoly power in the relevant market," and (2) that the defendant has acquired or maintained that power by improper means. *See* United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966); Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 230 (1st Cir. 1983). Like many courts and commentators, we refer to improper methods of acquiring or maintaining monopoly power as "exclusionary conduct." Borrowing from Professors Areeda and Turner, **[**14]** we have defined ***HN5***[] "exclusionary conduct" as "'conduct, other than competition on the merits or restraints reasonably "necessary" to competition on the merits, that reasonably appears capable of making a significant contribution to creating or maintaining monopoly power.'" Barry Wright, 724 F.2d at 230 (quoting 3 P. Areeda & D. Turner, ***Antitrust Law*** para. 626, at 83 (1978) [hereinafter *Areeda & Turner*]).

We shall assume for now that Edison has monopoly power in a relevant market and begin by examining whether Edison's pricing practices amount to exclusionary conduct. Traditional antitrust principles will guide our analysis. We shall compare the challenged practice's likely anticompetitive effects with its potentially legitimate business justifications. *See* Clamp-All Corp. v. Cast Iron Soil Pipe Inst., 851 F.2d 478, 486 (1st Cir. 1988), *cert. denied*, *488 U.S. 1007, 102 L. Ed. 2d 780, 109 S. Ct. 789 (1989)*; Interface Group, Inc. v. Massachusetts Port Auth., 816 F.2d 9, 10 (1st Cir. 1987); *Meeks*, 72 Colum. L.J. at 80. In doing so, we shall bear in mind that a practice is not "anticompetitive" simply because **[**15]** it harms competitors. After all, almost all business activity, desirable and undesirable alike, seeks to advance a firm's fortunes at the expense of its competitors. Rather, ***HN6***[] a practice is "anticompetitive" only if it harms the competitive process. *See* Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488-89, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977); Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962); Clamp-All, 851 F.2d at 486. It harms that **[*22]** process when it obstructs the achievement of competition's basic goals -- lower prices, better products, and more efficient production methods. *See, e.g.,* Grappone, Inc. v. Subaru of New England, Inc., 858 F.2d 792, 794 (1st Cir. 1988); Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 253 U.S. App. D.C. 142, 792 F.2d 210, 228-29 (D.C. Cir. 1986), *cert. denied*, *479*

U.S. 1033, 107 S. Ct. 880, 93 L. Ed. 2d 834 (1987); *Olympia Equip. Leasing Co. v. Western Union Telegraph Co., 797 F.2d 370, 379 (7th Cir. 1986)*, **[**16]** *on denial of r'hrg*, *802 F.2d 217*, *cert. denied*, *480 U.S. 934, 107 S. Ct. 1574, 94 L. Ed. 2d 765 (1987)*; *Assam Drug Co. v. Miller Brewing Co., 798 F.2d 311, 315 (8th Cir. 1986)*; *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1220 (10th Cir. 1986)*, *cert. denied*, *486 U.S. 1005, 100 L. Ed. 2d 192, 108 S. Ct. 1728 (1988)*; *see also* *Reiter v. Sonotone, 442 U.S. 330, 343, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979)* ("Congress designed the Sherman Act as a 'consumer welfare prescription.'") (quoting R. Bork, *The Antitrust Paradox* 66 (1978)); *Apex Hosiery Co. v. Leader, 310 U.S. 469, 500-01, 84 L. Ed. 1311, 60 S. Ct. 982 (1940)* ("Restraints on competition" do not constitute antitrust violations unless they "have or [are] intended to have an effect upon prices in the market or otherwise . . . deprive purchasers or consumers of the advantages which they derive from free competition").

Finally, we shall take account of the institutional fact that antitrust rules are court-administered rules. They must be clear enough for lawyers to explain them to clients. **[**17]** They must be administratively workable and therefore cannot always take account of every complex economic circumstance or qualification. *See* *Barry Wright, 724 F.2d at 234*. (Indeed, the need for clarity and administrability sometimes leads to *per se* rules that prohibit inquiry into the actual harms and benefits of challenged conduct. *See* *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*.) They must be designed with the knowledge that firms ultimately act, not in precise conformity with the literal language of complex rules, but in reaction to what they see as the likely outcome of court proceedings.

These last-mentioned administrative considerations are particularly important when courts apply ***antitrust law*** to a regulated industry. That is because "regulation" and "antitrust" typically aim at similar goals -- i.e., low and economically efficient prices, innovation, and efficient production methods -- but they seek to achieve these goals in very different ways. Economic regulators seek to achieve them *directly* by controlling prices through rules and regulations; antitrust seeks to achieve them **[**18]** *indirectly* by promoting and preserving a process that tends to bring them about. An antitrust rule that seeks to promote competition but nonetheless interferes with regulatory controls could undercut the very objectives the antitrust laws are designed to serve. Thus, where regulatory and antitrust regimes coexist, *see, e.g.,* *Otter Tail, 410 U.S. at 372* (electric industry); *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 352, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)* (bank mergers), antitrust analysis must sensitively "recognize and reflect the distinctive economic and legal setting" of the regulated industry to which it applies. Watson & Brunner, *Monopolization by Regulated "Monopolies": The Search for Substantive Standards*, 22 Antitrust Bull. 559, 565 (1977) [hereinafter *Watson & Brunner*]; *see generally Meeks, supra*.

For reasons we shall now set out, these principles lead us to conclude that a price squeeze of the sort at issue here does not ordinarily violate Sherman Act *§ 2* where the defendant's prices are regulated at both the primary and secondary levels. In so holding, we *are not* saying either that **[**19]** the antitrust laws do not apply in this regulatory context, or that they somehow apply less stringently here than elsewhere. Rather, we are saying that, in light of regulatory rules, constraints, and practices, the price squeeze at issue here is not ordinarily exclusionary, and, for that reason, it does not violate the Sherman Act. *Cf.* 1 *Areeda & Turner* para. 223d, at 140 (noting that "antitrust courts can and do consider **[*23]** the particular circumstances of an industry and therefore adjust their usual rules to the existence, extent, and nature of regulation"); *Watson & Brunner*, 22 Antitrust Bull. at 560 (warning that "the dogmatic transposition of monopolization concepts from conventional market settings to regulated industries" may produce results inimical to the goals of antitrust). We reach this conclusion by (1) analyzing the ordinary price squeeze, (2) comparing it to the "regulatory" price squeeze, and (3) noting that regulation makes a critical difference in terms of antitrust harms, benefits, and administrative considerations.

A. Price Squeeze Liability in an Unregulated Industry

To explain our conclusion, we must first discuss the ordinary **[**20]** price squeeze case, the case of an unregulated monopolist whose prices (at, say, the wholesale and retail levels) leave inadequate room for an independent competitor (at, say, the retail level) to survive. Only if the reader understands the major antitrust harms, benefits, and administrative considerations in that ordinary case, and sees how they are rather evenly balanced, will he understand why price regulation tips that balance so significantly towards legality. *Cf.* 3 *Areeda & Turner* para.

729c, at 235-38 (arguing that *Alcoa* overstated the harms, understated the benefits, and disregarded significant administrative burdens associated with the ordinary price squeeze).

The antitrust argument against the price squeeze typically begins by observing that a "one-level" monopolist engaged in a prolonged price squeeze may drive independent competitors out of business and thereby extend its monopoly power to a second industry level. This fact alone, however, does not mean that a price squeeze is anticompetitive. Merely eliminating competitors is not necessarily anticompetitive, for, as we explained earlier, even legitimate business activity that succeeds in helping a firm will **[**21]** likely disadvantage the firm's competitors. *See* [slip op.] pp. 13-14, *supra*, and cases cited. Moreover, the extension of monopoly power from one to two levels does not *necessarily*, nor in an *obvious* way, give a firm added power to raise prices. As several members of the Supreme Court have pointed out, a "widely accepted" (albeit "counterintuitive") economic argument supports the conclusion of many commentators that "there is but one maximum monopoly profit to be gained from the sale of an end-product," 3 *Areeda & Turner* para. 725b at 199. *See* Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 36, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (O'Connor, J., concurring in the judgment); *see also* R. Bork, *The Antitrust Paradox* 229 (1978) ("Vertically related monopolies can take only one monopoly profit") [hereinafter *R. Bork*]; R. Posner & F. Easterbrook, *Antitrust* 870 (2d ed. 1989) ("There is only one monopoly profit to be made in a chain of production."). (For an intuitive explanation of this "counterintuitive" argument, see Appendix A to this opinion.) What difference does it make, one might ask, whether the monopolist obtains this "maximum **[**22]** monopoly profit" by controlling two industry levels or just one?

At least two arguments have been made in answer to this question. The first is that a monopolist who extends his monopoly to a second industry level raises "entry barriers," thereby fortifying his monopoly position. Assume, for example, that Alcoa has monopolized only ingot production and has raised its prices somewhat above the competitive level. Alcoa's monopoly position in ingot will no doubt deter some new firms from entering ingot production, but it might also attract some new firms hoping to obtain a share of Alcoa's supercompetitive profits. Now assume Alcoa extends its monopoly to sheet production as well, the industry level, say, that consumes most of Alcoa's ingot. New firms might now be more reluctant to enter *ingot* production, fearing that Alcoa, in its capacity as "sheet fabricator-monopolist," would refuse to buy ingot from the new ingot producer, or that it would drop its own ingot prices and take the industry's entire "single monopoly profit" from the sale of sheet. The new firm might conclude that the only prudent way to challenge Alcoa would be to enter the industry at *both* levels at once. **[**23]** Insofar **[*24]** as it is more difficult for a firm to enter an industry at two levels than at one, the monopolist, by expanding its monopoly power, has made entry by new firms more difficult. And insofar as the monopolist previously set prices cautiously to avoid attracting a competitive challenge, the added security of a two-level monopoly could even lead that monopolist to raise its prices. *See* 3 *Areeda & Turner* para. 725h, at 204-08; *see also id.* para. 1011, at 243-54; Shepherd, *Potential Competition Versus Actual Competition*, 42 Admin. L. Rev. 5-34 (1990).

The second argument against permitting extension of monopoly power concerns "non-price" competition. The existence of competitors at a second "level," irrespective of their effects upon price, provides an added incentive for the monopolist to develop better products and better, more efficient ways to produce the product. *See* 2 *Areeda & Turner* paras. 402b2-402b3, at 269-70; *id.* para. 403c, at 272 & n. 3; 3 *Areeda & Turner* para. 725g, at 204. Indeed, a "second-level" independent firm that develops better products or more efficient production methods may thereby obtain the strength **[**24]** needed to challenge the monopolist at the "primary level."

We recognize that there are other arguments one might make about the possible anticompetitive effects of a price squeeze, *see generally* 3 *Turner & Areeda* paras. 725e-725f, at 201-04 (reviewing other arguments); and we realize, as well, that scholars dispute the practical significance of the two arguments just made. *Compare* 3 *Areeda & Turner* paras. 725g-725h, at 204-08 *with R. Bork* at 240-43. Nonetheless, we believe that other arguments (such as those related to economic price discrimination) tend to be inconclusive in respect to anticompetitive effects. *See* 3 *Areeda & Turner* paras. 725e-725f, at 201-04; *R. Bork* at 241-42. We therefore believe that the two arguments just given are the most important of those that favor prohibiting a price squeeze; and we are willing to assume they would justify such a prohibition were there nothing to be said in favor of permitting prices that could create such a squeeze.

There are, however, at least two traditional circumstances in which prices that create a squeeze might simultaneously bring about economic benefits. First, the primary-level monopolist might **[**25]** carry out its second-level activities more efficiently than its independent competitors. If so, prices that squeeze the less efficient second-level competitors, even to the point of forcing them from the business, could (by lowering costs) lower prices, or, in any event, save economic resources. *See* 3 *Areeda & Turner* para. 725d, at 201 ("Whenever vertical integration produces new efficiencies, some of the cost savings . . . [will] be translated into a price reduction and . . . [will] save productive resources."); *R. Bork* at 243.

Second, prices that squeeze a "second-level" firm will benefit consumers whenever the "second-level" firm *is itself* a monopolist. *See* *Fishman v. Estate of Wirtz, 807 F.2d 520, 563* (Easterbrook, J., dissenting) ("That successive monopolies injure consumers is a proposition on which there is unanimous agreement") (collecting authority). If, for example, ingot costs $ 40, the fabricating process costs $ 35, and the profit-maximizing price for sheet is $ 100, an ingot monopolist will charge $ 65 for the ingot, hoping that competition at the fabricating level will keep the total price at $ 100. If a different, independent **[**26]** monopolist dominates the fabricating level, however, that independent monopolist buying ingot at $ 65 will mark up the price by more than $ 35, because he wants to earn monopoly profits as well. The result will be a market price of more than $ 100, resulting in smaller monopoly profits overall (for the final price is too high), but greater profits for the second monopolist than if he sold sheet for only $ 100. (Appendix B to this opinion contains a numerical example that may help the interested reader understand intuitively why this is so.) Under these circumstances, entry by the ingot monopolist into the sheet-fabrication level -- even by means of a price squeeze -- will help the consumer by limiting the final price of sheet to $ 100. *Cf.* *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 109 L. Ed. 2d 333, 110 S. Ct. 1884, 1891* ***[*25]*** *(1990)* (***HN7***[] "When a firm, or even a group of firms adhering to a vertical agreement, lowers prices but maintains them above predatory levels, the business lost by rivals cannot be viewed as an 'anticompetitive' consequence of the claimed **[**27]** violation." (footnote omitted)); *see generally* 3 *Areeda & Turner* para. 725c, at 200-01.

Again, the price squeeze may have additional benefits, *see generally* 3 *Turner & Areeda* paras. 725e-725f, at 201-04, and one can debate the empirical significance of those we have mentioned. But we believe that the two examples we have given show that prices that create a squeeze can, at least sometimes, have important beneficial effects.

Finally, we note that it is not easy for courts to administer Judge Hand's price squeeze test. That test makes ***HN8***[] it unlawful for a monopolist to charge more than a "fair price" for the primary product while simultaneously charging so little for the secondary product that its second-level competitors cannot make a "living profit." *See* *Alcoa*, 148 F.2d at 437-38. But how is a judge or jury to determine a "fair price?" Is it the price charged by other suppliers of the primary product? None exist. Is it the price that competition "would have set" were the primary level not monopolized? How can the court determine this price without examining **[**28]** costs and demands, indeed without acting like a rate-setting regulatory agency, the rate-setting proceedings of which often last for several years? Further, how is the court to decide the proper size of the price "gap?" Must it be large enough for all independent competing firms to make a "living profit," no matter how inefficient they may be? If not, how does one identify the "inefficient" firms? And how should the court respond when costs or demands change over time, as they inevitably will?

We do not say that these questions are unanswerable, but we have said enough to show why antitrust courts normally avoid direct price administration, relying on rules and remedies (such as structural remedies, *e.g.*, prohibiting certain vertical mergers) that are easier to administer. *See* *United States v. Trenton Potteries Co., 273 U.S. 392, 397, 71 L. Ed. 700, 47 S. Ct. 377 (1927)* (observing that "the reasonable price fixed today may through economic and business changes become the unreasonable price of tomorrow"); *United States v. Addyston Pipe & Steel Co., 85 F. 271, 283 (6th Cir. 1898)* (Taft, J.) (stating that to inquire into the reasonableness of **[**29]** prices is to "set sail on a sea of doubt"), *aff'd*, *175 U.S. 211, 20 S. Ct. 96, 44 L. Ed. 136 (1899)*; 3 *Areeda & Turner* para. 701, at 148-50 ("The courts correctly regard as uncongenial and foreign to the Sherman Act the burden of continuously supervising economic performance.").

To reach Alcoa's conclusion that ***HN9***[] the price squeeze is exclusionary, one must believe that the anticompetitive risks associated with a price squeeze outweigh the possible benefits and the adverse administrative considerations. We do not question that conclusion here, but we qualify it by noting that the harms and benefits (including the more doubtful ones we have glossed over, *see generally* 3 *Areeda & Turner* paras. 725e-725f, at 201-04), are closely balanced. In light of this close balance, we should not blindly and automatically apply Alcoa's price squeeze rules in the presence of significantly different economic circumstances such as full economic regulation.

B. Price Squeeze Liability in a Regulated Industry

[30]** ***HN10***[] Full price regulation dramatically alters the calculus of antitrust harms and benefits. First, regulation significantly diminishes the likelihood of major antitrust harm. In particular, it diminishes the likelihood of "entry barrier" harm, namely the risk that (1) prices will rise because (2) new firms will hesitate to enter a market and compete after (3) a squeeze has driven pre-existing independent competitors from the marketplace. All three propositions are made doubtful by regulation. For one thing, ***HN11***[] in a regulated industry, regulators control prices directly. Statutes typically require regulators to maintain prices at "reasonable" levels. *See, e.g.*, *16 U.S.C. §§ 824d(a)*, *824e(a)* (an electric utility's **[*26]** rates must be "just and reasonable"); *FPC v. Hope Natural Gas Co., 320 U.S. 591, 603, 88 L. Ed. 333, 64 S. Ct. 281 (1944)* (A "reasonable" rate is one that permits the firm to recover its costs and earn a reasonable profit); *see generally* J. Bonbright, A. Danielsen & D. Kamerschen, *Principles of Public Utility Rates* (2d ed. **[**31]** 1988) (describing ratemaking principles) [hereinafter J. Bonbright].

For another thing, factors related to regulation, such as the economic ability of a market to support new entry, or the legal requirement that a firm secure permission to enter, are likelier to determine new entry into a regulated industry than is a new entrant's fear of a two-level monopolist's enhanced retaliatory power. After all, should the regulator decide that new entry is warranted, it typically has the legal authority to prevent an existing "two-level" monopolist from improperly disadvantaging a new "second-level" competitor by, say, refusing to deal to with it or by charging unreasonably high prices. *See, e.g.*, *16 U.S.C. §§ 824f*, 824i-824k (authorizing FERC to order interconnections, sales and wheeling of electricity among utilities); *see also* 2 A. Kahn, *The Economics of Regulation* 113-172 (discussing the concept of "natural monopoly") [hereinafter *A. Kahn*]; *Meeks*, 72 Colum. L. Rev. at 95 & n. 135 (noting that utilities in "all but a handful of states . . . must obtain a certificate of public convenience and necessity to serve an area" with electricity) **[**32]** (collecting statutes).

Finally, ***HN12***[] regulation in the electricity industry makes it less likely that a price squeeze will actually drive independent distributors from the marketplace. Local electricity distribution, after all, is itself considered a "natural monopoly" with service typically provided by a single franchised company to relatively immobile customers. *See Joskow* at 178; *cf.* *Otter Tail, 410 U.S. at 369*. Higher wholesale electricity prices (or lower retail prices elsewhere) will not lead the entire towns of Wellesley and Concord to pull up stakes and move to Dover. And the record lacks convincing evidence that competition between Edison and the plaintiff towns for customers living on the towns' borders, or for mobile high-energy-consuming industrial customers, is sufficiently important to threaten the plaintiffs with bankruptcy should such users switch to Edison. *Cf. Joskow* at 209-13 (arguing that, as a rule, there is little actual competition between electricity distributors). Even if an integrated utility such as Edison managed to set prices that severely **[**33]** squeezed a distributor, it could not take over the municipality's distribution area without the regulator's permission. *See, e.g.*, *M.G.L. ch. 164 § 68* (Massachusetts municipality may not sell its distributorship without regulatory approval).

Second, regulators try to set prices that reflect costs. To the extent that they succeed, an integrated utility's prices are likely to squeeze independent distributors who buy from it at wholesale only if those distributors operate less efficiently, *i.e.*, at higher cost. Consequently, a rule preventing prices that create a squeeze will more likely discourage efficient operations and deprive consumers of prices that reflect lower costs.

Third, for institutional reasons, an antitrust rule making the price squeeze illegal threatens consumers. The plaintiffs say that Edison violated the antitrust laws by *asking* for rates (*i.e., filing* rate proposals) that would produce for Edison a "higher return" on its "wholesale sales than. . . . on its retail sales." *See* Appellee's Brief at 4-8, 35-36. Other courts considering price squeeze claims have also emphasized that the alleged antitrust violation consisted of proposing or requesting **[**34]** rates that would narrow the gap between wholesale and retail rates so as to squeeze existing retail competitors. *See, e.g., City of Kirkwood v. Union Elec. Co., 671 F.2d 1173, 1179 (8th Cir.*

1981) (**HN13**[] "The question" in a price squeeze case is "whether the defendant utility acted illegally *in proposing* a certain anticompetitive combination of rates") (emphasis added), *cert. denied*, *459 U.S. 1170, 103 S. Ct. 814, 74 L. Ed. 2d 1013 (1983)*; City of Newark v. Delmarva Power & Light Co., 467 F. Supp. 763, 768 (D. Del. 1979) (chief allegation in price squeeze case **[*27]** was that defendant "used its power to *initiate* rates . . . to attempt to obtain an anticompetitive rate structure") (emphasis in original). A rule that penalizes the filing of wholesale rate increases would not necessarily lead firms to abandon wholesale rate increases; it could, instead, simply lead them to seek a retail rate increase whenever they seek a wholesale rate increase. (Conversely, it would discourage a utility from conceding that a retail price cut is reasonable **[**35]** unless it is also prepared to concede that a wholesale price cut is reasonable.) In this case, for example, the rule might have permitted Edison to escape liability by filing (or perhaps obtaining) a rate increase in the 39 cities and towns where it distributes electricity itself. Indeed, the rule would encourage Edison to seek a retail rate increase so high that a jury could not find the wholesale/retail gap too narrow. Such a rule of law (which could lead to unnecessary regulatory proceedings and unnecessary rate increases) would seem to work at cross-purposes with basic antitrust objectives. *Cf.* Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986) (warning courts against adopting rules or practices that "chill the very conduct the antitrust laws are designed to protect"); Barry Wright, 724 F.2d at 234 ("We must be concerned lest a rule or precedent that authorizes a search for a particular type of undesirable pricing behavior end up by discouraging legitimate price competition.").

Fourth, an anti-price-squeeze rule, particularly the "equal profit earned at both levels" rule that plaintiffs **[**36]** advocate, presents special administrative difficulties in the regulatory context. For one thing, **HN14**[] the Constitution guarantees a regulated firm a reasonable return on its investment, *see* Hope Natural Gas Co., supra; Bluefield Water Works v. Public Serv. Comm'n, 262 U.S. 679, 690, 43 S. Ct. 675, 67 L. Ed. 1176 (1923); *see also* 16 U.S.C. §§ 824d(a), 824e(a) (rates must be "just and reasonable"). May courts prevent a utility from asking the regulator for a rate increase should the utility believe that current wholesale returns are, constitutionally speaking, too low? Similarly, what if the utility believes that different risks at different levels of the industry call for somewhat different rates of return?

For another thing, how will juries decide the amount of the firm's investment on which the "rate of return" is calculated? Profit, after all, is a return on a certain amount of investment. Much electricity investment is used to serve *both* wholesale and retail services. Accounting systems for allocating investment between different **[**37]** services or customer classes are notoriously complicated and sometimes arbitrary. *See J. Bonbright* at 495 (noting that dozens of schemes exist for allocation investment among customer classes) (collecting sources); *Joskow* at 180 ("Despite the legal distinction between 'retail sales' . . . and 'wholesale sales,' . . . essentially there is no functional distinction between generation and transmission facilities dedicated to retail and wholesale transactions."). Will juries be permitted to "second guess" the regulator's allocation rules or its specific investment allocation decisions? Is the jury (as may, in a sense, have occurred here) to be permitted to decide that the utility's allocation (following Commission allocation procedures) of, say, $ 100 million investment to distribution and $ 400 million to wholesale, should have been $ 200 million/$ 300 million instead (in which case, of course, the pre-existing 10% profit earned at each level would look like 5% earned at retail and 13% at wholesale). What antitrust benefit would be gained by permitting juries to speculate in this way? Would not the results likely be arbitrary? For that matter, what antitrust benefit would be gained **[**38]** by a rule that freezes prices at levels designed to produce "equal profit rates" using some historically based commission-approved system for allocating investment? Any such court involvement in the rate-setting process could easily discourage utilities from proposing, and commissions from considering, such innovative, economically based, energy-conserving pricing systems as off-peak pricing (charging higher prices for electricity used during peak periods), incremental-cost pricing **[*28]** (charging prices for certain services reflecting the higher costs of hypothetical new construction), or even traditional Ramsay pricing (tailoring rates to reflect the comparative likelihood that higher rates will force customers to discontinue service); for there is no particular reason to believe that such rates would (or would not) reflect "equal" profits according to some particular prior, historical, commission-approved system for allocating investment. *See generally* 1 *A. Kahn* 87-103. At best, permitting judges and juries to speculate in this area would force regulators continually to revisit prior investment-allocation rules and would discourage regulatory efforts to develop (often **[**39]** with a utility's help) a set of economically rational pricing practices -- which, after all, is a common objective of ***antitrust law*** and regulation.

Fifth and finally, ***HN15***[] a distributor who disagrees with the utility's, or the commission's, cost-allocation methods or with its rates, or who believes that a price squeeze will harm it (whether or not the price squeeze also harms the competitive process), has an administrative remedy. It can challenge a utility's rates and practices before the Commission as unjust, unreasonable, or "discriminatory." *See* *16 U.S.C. §§ 824d*(a, b), 824e(a); *18 C.F.R. § 2.17(a) (1990)*. As part of its challenge, it can ask the Commission to consider the alleged price squeeze harm. *See* *FPC v. Conway, 426 U.S. 271, 48 L. Ed. 2d 626, 96 S. Ct. 1999 (1976)*. If FERC permits the rates to take effect after suspension and later determines that a price squeeze exists, it can order an appropriate refund.

In sum, the relevant antitrust considerations differ significantly, in degree and in kind, when a price squeeze occurs in a fully **[**40]** regulated as opposed to an unregulated industry. Indeed, these considerations, which are closely balanced in the ordinary price squeeze, change so significantly when the squeeze takes place in a fully regulated industry that, in our opinion, the legal consequences of the squeeze change as well. That is to say, ***HN16***[] a price squeeze in a fully regulated industry such as electricity will not normally constitute "exclusionary conduct" under Sherman Act *§ 2*.

We are aware that reported opinions in three circuit courts of appeal and several district courts suggest that a price squeeze may be unlawful in the regulated electricity industry. *See* *City of Kirkwood v. Union Elec. Co., 671 F.2d 1173 (8th Cir. 1982)*, *cert. denied*, *459 U.S. 1170, 74 L. Ed. 2d 1013, 103 S. Ct. 814 (1983)*; *City of Groton v. Connecticut Light & Power Co., 662 F.2d 921 (2d Cir. 1981)*; *City of Mishawaka v. American Elec. Power Co., 616 F.2d 976 (7th Cir. 1980)* *(Mishawaka II), cert. denied*, *449 U.S. 1096, 101 S. Ct. 892, 66 L. Ed. 2d 824 (1981)*; **[**41]** *see also* *City of Newark v. Delmarva Power & Light Co., 467 F. Supp. 763 (D. Del. 1979)*; *Borough of Ellwood City v. Pennsylvania Power Co., 462 F. Supp. 1343 (W.D. Pa. 1979)*, *later proceeding*, *570 F. Supp. 553 (1983)*; *City of Batavia v. Commonwealth Edison Co.*, No. 76-C-4388, slip op. (N.D. Ill. Jan 16, 1984). In only one of those cases, however, did the court actually enter, or affirm, a judgment against the defendant; thus, there is extremely little case law *holding* that a public utility price squeeze is exclusionary. Moreover, in all of the cases we have cited, the price squeeze allegation was but one of several allegations of several different kinds of "exclusionary conduct," and the one court that affirmed a Sherman Act *§ 2* judgment against a utility stressed that it might well *not* have done so had the price squeeze stood alone (as it does in the case before us). *See* *Mishawaka II, 616 F.2d at 986* (suggesting that "no one aspect [of the defendant's conduct] standing alone is illegal"). Further, in every case, the price squeeze allegation involved wholesale prices that *exceeded* retail prices, **[**42]** (a matter here in doubt), thereby eliminating some of the "administrative" problems we have found surrounding a jury's efforts to determine the reasonableness of the price "gap." *See* *City of Mishawaka I v. Indiana & Michigan Electric Co., 560 F.2d 1314, 1316 (7th Cir. 1977)* (wholesale price to municipalities "substantially higher" than retail price to industrial customers, threatening municipalities with "financial extinction"); *City of Kirkwood, 671 F.2d at 1176*; *City of Groton, 662 F.2d at 925*; **[*29]** *City of Newark 467 F. Supp. at 766*; *Borough of Ellwood City* 570 F. Supp. at 557; *City of Batavia, supra*. Thus, technically speaking, our holding is consistent with these other cases. Indeed, since we cannot find significant evidence that Edison's price squeeze deprived plaintiffs of a "living profit" (for the plaintiffs earned substantial returns, and even increased their sales, during the price squeeze period), our holding is arguably a consistent application of the rule set forth in *Alcoa* itself.

Nevertheless, we recognize that our reasoning and analysis differs significantly from **[**43]** that in the opinions (other than *Alcoa*) just cited. We have carefully considered these differences and have found nothing to convince us that our analysis is incorrect. Even so, we have limited our holding by stating that "normally" a price squeeze will not constitute an exclusionary practice in the context of a fully regulated monopoly, thereby leaving cases involving exceptional circumstances for another day. And we have stressed that our reasoning applies with full force only when the monopolist who engages in the squeeze is regulated at both industry levels. We recognize that a special problem is posed by a monopolist, regulated at only one level, who seeks to dominate a second, unregulated level, in order to earn at that second level the very profits that regulation forbids at the first. *See* 3 *Areeda & Turner* para. 726e, at 217-20.

III

Monopoly Power

A second, legally fatal problem with plaintiffs' case is that they failed to show that Boston Edison possessed monopoly power in the relevant market. As we have repeatedly pointed out, the traditional, Alcoa-type price squeeze occurs when a monopolist uses its control over the *monopolized* product (*e.g.* **[**44]** , ingot) to obtain a monopoly at a second industry level (*e.g.*, sheet). In this case, it is undisputed that Boston Edison has a (lawful) monopoly at one level of the electricity industry, namely transmission, for a given area normally can support only one transmission system, *see, e.g., Meeks*, 72 Colum. L. Rev. at 87, and Edison owns the transmission grid covering the area that includes Concord and Wellesley. The plaintiffs, however, cannot show (indeed, with one exception, they do not try to show) that Boston Edison used its control of electricity *transmission* to their disadvantage. To the contrary, the record clearly demonstrates that Boston Edison will "wheel" (*i.e.*, transmit) electricity from other producers to any distributor upon request, all for a nominal transmission charge that no one claims is unreasonably high. *See* Record Appendix at 1442, 1451-52, 1704-05 [hereinafter *App.*]. Indeed, Concord and Wellesley buy some of their electricity from the New York Power Authority, which wheels that electricity over Edison's lines, and at least half a dozen municipal distributorships use Edison's lines to obtain *all* of their electric power **[**45]** from non-Edison sources. *See App.* at 1449-50. Concord is a member of NEPOOL, all of whose members have interconnected lines, used to transfer electricity freely among them; and the record suggests that Wellesley is free to join NEPOOL should it wish to do so. The only arguably contrary evidence in the record consists of Concord's claim that Boston Edison refused to connect it to a 115 kv line; but the record does not (1) suggest that Concord needs that connection to buy electricity elsewhere, (2) indicate that the dispute concerns anything other than the connection price, or (3) show that the demanded connection price was unreasonably high.

At the same time, the record fails to show that Edison had monopoly power at the *generation* level, the industry level at which plaintiffs claim Edison charged too high a rate. To the contrary, the record shows that more than a dozen different power generating companies sell wholesale power in New England and that this power flowed freely among NEPOOL members. It shows that municipalities near Concord and Wellesley, municipalities to the north, south, east, and west of Concord and Wellesley, bought their electricity from production companies **[**46]** other than Boston **[*30]** Edison. It shows that Boston Edison's electricity production accounted for less than 12% of the electricity produced by these New England utilities. These facts and figures suggest that Boston Edison is far from attaining the 70% to 90% of the sales in a well-defined marketplace that Judge Hand (and later commentators) thought indicative of monopoly power. *See, e.g., Alcoa*, 148 F.2d at 424 (stating that ***HN17***[] a 90% market share "is enough to constitute a monopoly" but that 60% is probably, and 30% is "certainly," not enough); *City of Mount Pleasant v. Associated Elec. Coop., Inc., 838 F.2d 268, 279-80 (8th Cir. 1988)* (electricity suppliers accessible via wheeling must be included in wholesale market); *Lopatka*, 31 U.C.L.A.L. Rev. at 611 (arguing that the geographic market for wholesale electricity "includes all generation sources from which the municipality could obtain power at relatively insubstantial wheeling costs").

In their efforts to show monopoly power at the generation level, the towns point to three pieces **[**47]** of evidence. First, they say that Concord had a study made "which concluded that it was not economically feasible for the Town . . . to obtain its power requirements from non-Edison sources. . . ." The study in question, however, says that "the reason" the town will have lower power costs in the long run by buying from Edison is that Edison's "rate is based on embedded resources which are lower priced than the new units with which" the town would have to "meet its power supply requirements" if it stopped buying from Edison. This "reason" does not show that Edison has monopoly power. It shows only that Edison can charge lower prices because it bought its generating equipment at older, cheaper prices, (rather like a wheat farmer who, having purchased unusually fertile land long ago, could now sell wheat at lower prices or earn higher profits than other farmers, even in a highly competitive wheat market). In a competitive market a firm that bought older, cheaper generating equipment would simply charge the higher prices that the cost of new, expensive equipment requires its competitors to charge and it would pocket the difference. In a regulated market, the regulator forces the "historically **[**48]** lucky" firm to pass along some, or all, of this potential extra profit to its customers in the form of lower prices. In either case, the "extra" profit resulting from lower costs is not a monopoly profit. It is called an "economic rent." And its presence is consistent with a perfectly competitive marketplace. *See* 2 *Areeda & Turner* para. 510, at 33-34; P.A. Samuelson, *Microeconomics*, at 213-214, 635 (13th ed. 1989); G. Stigler, *The Theory of Price*, at 258-63 (4th ed. 1987). Concord's study, which relates Edison's superior performance to cost advantages, is not evidence that Edison has market power.

Second, plaintiffs point to a provision in Edison's tariff that states that, if they wish to buy power from other firms, they must either (1) give Edison five years advance notice, or (2) compensate Edison for any adverse impact Edison suffers in the subsequent three years. We need not explain all the reasons why this provision does not show that Edison possesses monopoly power, however, because, at a minimum, the record does not show that the tariff either unreasonably, or significantly, limits a customer's ability to buy from others. To the contrary, the plaintiffs have **[**49]** bought power from non-Edison sources, namely the New York Power Authority, despite the provision. And the plaintiffs remain free to challenge before FERC any unreasonably high charge that Edison might try to assess under this provision.

Third, the plaintiffs argue that the kind of electricity supply service they need -- a firm commitment by a generating source to supply their full requirements -- was simply unavailable from any firm other than Edison; hence, Edison had "monopoly power" over the price of this particular kind of service. Plaintiffs offered three pieces of evidence to support this contention: (1) John O'Neil, superintendent of the Concord light plant, in response to the question, "Was there any other firm requirements power available for Concord to purchase from utilities other than Boston Edison?," answered, "Not to my knowledge, no, sir." **[*31]** (2) Maurice Berdan manager of the Wellesley light plant, in response to the question, "Is there any other source of firm requirements wholesale power available to the Town of Wellesley other than Boston Edison Company?", answered (over an objection that the answer "appears to call for an expert opinion and/or for hearsay"), **[**50]** "We had consultants look at it, and I have also had discussions with other people in the industry that we have not found any other sources of power, firm requirements power, that would be available . . ." and it was "public knowledge in the industry that firm requirements power is not available." (3) The minutes of the March 10, 1987 Concord Municipal Light Board meeting report,

> A question was raised as to whether or not Concord could become a customer of New England Power. It was stated that the 'NEES Plan' does not include new large power loads; Princeton's request to return to all-requirements status was rejected.

We do not think this evidence sufficient to show that Edison possessed "monopoly power" with respect to "firm requirements" contracts to supply electricity. For one thing, we do not see how a reasonable juror could conclude from this testimony and minutes that no firm other than Edison would sell "firm requirements" electricity at a price that roughly reflected current production costs. After all, the record is filled with evidence that other municipal distributors bought electricity from other suppliers. Both town witnesses were testifying in the context **[**51]** of a report (discussed at [slip op.] pp. 40-41, above) that said it was less *economical* for the towns to buy electricity elsewhere than from a utility that had especially low historical costs. Neither town witness had himself tried to obtain a "firm requirements" contract for electricity (indeed, Mr. O'Neill conceded that he had "never talked to another utility besides Boston Edison on behalf of Concord"). And neither town witness made clear either the specific basis for his conclusion, nor, for that matter, did either witness say that he meant it was *not possible* to find an alternative supplier at prices reasonably close to current costs of production. To the contrary, David Foote, an Edison witness, who worked for a group of New Hampshire utilities, stated that he had contacted three New England utilities (other than Edison) during the period in question and found that one of them would enter into a "firm requirements" contract to supply electricity.

For another thing, as we explained above, a simple showing that Edison offered a "firm requirements" contract (or any other type of contract) for power *more cheaply* than alternative suppliers does *not* show that Edison **[**52]** had monopoly power. ***HN18***[] Monopoly power is the power to raise price well above competitive levels before customers will turn elsewhere. *See generally* 2 *Areeda & Turner* paras. 501-506, at 322-29. The plaintiffs' evidence shows neither that Edison's rates were significantly lower than the rates of others, nor that any such lower rates reflected anything other than lower costs; and the latter, as we explained earlier, is evidence only of an economic rent, not of monopoly power. *See* [slip op.] pp. 40-41, *supra*. In the face of these economic facts, and other evidence in the record, the three pieces of evidence cited are simply too skimpy to support a "monopoly power" conclusion.

Finally, even though classical price regulation rests upon the premise that the regulated firm maintains a "natural monopoly," we resist any temptation to permit a jury to infer monopoly power from the mere fact of wholesale rate regulation itself. Whatever the historical basis for such regulation, today there is a growing conviction among students of the subject that the electricity generation business **[**53]** (as opposed to the transmission and distribution business) may be able to support several competing firms. *See, e.g.*, P. Joskow, *Regulatory Failure, Regulatory Reform and Structural Change in the Electric Power Industry in Brookings Papers: Microeconomics 1989* at 189-90 (1989); R. Pierce, *A Proposal to Deregulate the Market for Bulk Power*, *72 Va. L. Rev. 1183, 1212-15 (1986)*.

For these reasons, we do not believe plaintiffs met their burden of providing **[*32]** evidence from which a jury could find that Edison had significant monopoly power in the relevant market, *i.e.*, the power to raise price significantly higher than the cost-based level that competition would otherwise bring about.

The judgment of the district court is *Reversed*.

APPENDIX A

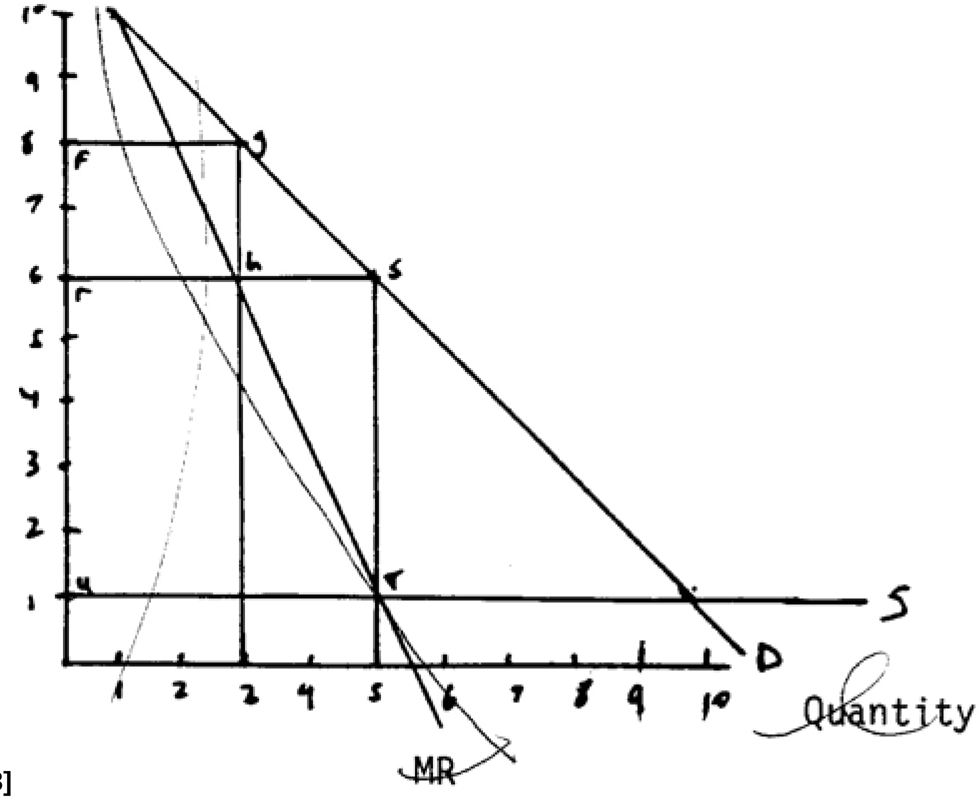
We offer the following highly simplified intuitive explanation of the "single monopoly profit" argument, based upon an example given by Professors Areeda and Turner.

> Assume that copper is used only to produce pipe. Assume that the industry has two "levels:" (1) refining ore into copper ingot and (2) fabricating ingot into pipe. Assume the profit-maximizing price for copper pipe is $ 100. (Charging **[**54]** more would reduce pipe sales to the point where the monopolist would earn less profit; charging less would increase pipe sales, but not enough to make up for lost potential revenue on each sale.) Assume the cost (including a reasonable profit) of refining ore into ingot is $ 40. Assume the cost of fabricating ingot into pipe is $ 35.
> Suppose that the "ingot" stage of the industry is monopolized but the "pipe" stage is competitive. An ingot monopolist would charge $ 65 for its ingot; it would rely upon competition among pipe fabricators to keep the mark-up at $ 35 and the fabricated-pipe price at $ 100; and it would pocket $ 25 ($ 65 minus $ 40) of monopoly profit.
> Suppose, instead, that the "ingot" stage of the industry is competitive but the "pipe" stage is monopolized. Competition at the "ingot" stage would produce an ingot price of $ 40. The pipe monopolist would buy the ingot for $ 40; it would sell the fabricated pipe for $ 100; and (after subtracting the $ 40 cost of ingot and $ 35 cost of fabrication) it would pocket $ 25 of monopoly profit.
>
> Now suppose a single, integrated firm managed to achieve a monopoly at *both* "levels" of the industry. It would sell pipe at the **[**55]** profit-maximizing price of $ 100. After deducting its total costs ($ 40 plus $ 35), it would pocket $ 25 of monopoly profit.
> In each case, the profit-maximizing price remains $ 100 and the monopoly profit is $ 25. This normally will remain so as long as the manufacturing costs associated with ingot and pipe remain the same.

See 3 *Areeda & Turner* para. 728b, at 199.

Appendix B

This is a graphic and a numerical example offered to help provide an intuitive understanding of the possible price effect of having two separate monopolists at two different industry levels.



[*33]

Price	Quantity	Total revenue	M's costs	M's profits	R's costs	R's profits
10	1	10	1	9	6	4
9	2	18	2	16	12	6
8	3	24	3	21	18	6
7	4	28	4	24	24	4
6	5	30	5	25	30	0
5	6	30	6	24	36	[negative]
4	7	28	7	21		
3	8	24	8	16		
2	9	18	9	9		
1	10	10	10	0		

It costs $ 1 to make a widget.

A single monopolist ("M") will maximize his profit by setting a price of $ 6 and selling 5 widgets. His profit is $ 25 (represented by the area "rstu").

If M sells widgets for $ 6 **[**56]** each to an independent retailer ("R") with monopoly power, R will maximize *his* profit by setting a price of $ 8 and selling 3 widgets. His profit is 6 (represented by the area "rhgf").

M's best strategy is enter the retailing level of the industry and to set a final price of (roughly) $ 6.

End of Document

Guralnick v. Supreme Court of New Jersey

United States District Court for the District of New Jersey

September 26, 1990 ; September 26, 1990, Filed

Civil No. 89-3958 (CSF)

Reporter

747 F. Supp. 1109 *; 1990 U.S. Dist. LEXIS 12940 **

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN1[] **Jurisdiction Over Actions, Exclusive Jurisdiction**

The New Jersey Constitution grants exclusive jurisdiction over the admission to the practice of law and the discipline of persons admitted to the New Jersey Supreme Court. N.J. Const., art. 6, § 2. The New Jersey Supreme Court has construed its rule-making powers in this regard very broadly.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

Constitutional Law > State Constitutional Operation

HN2[] **Alternative Dispute Resolution, Mandatory ADR**

Acting pursuant to its constitutional power to regulate the practice of law and the discipline of practitioners, the New Jersey Supreme Court provided a system of compulsory binding arbitration for attorney-client fee disputes.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

HN3[] Alternative Dispute Resolution, Mandatory ADR

See N.J. Ct. R. 1:20A-3(a).

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Civil Procedure > Judgments > Pretrial Judgments > General Overview

Civil Procedure > Judgments > Pretrial Judgments > Judgment on Pleadings

HN4[] Summary Judgment, Entitlement as Matter of Law

A court will not grant a motion for judgment on the pleadings unless the movant clearly establishes that no material issue of fact remains to be resolved and that he is entitled to judgment as a matter of law. In considering a motion for judgment on the pleadings, the trial court is required to view the facts presented in the pleadings and the inferences to be drawn therefrom in the light most favorable to the nonmoving party. In this fashion the courts hope to insure that the rights of the nonmoving party are decided as fully and fairly on a *Fed. R. Civ. P. 12(c)* motion, as if there had been a trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN5[] Discovery, Methods of Discovery

Fed. R. Civ. P. 56(c) provides that summary judgment shall be granted if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.

Administrative Law > Judicial Review > Reviewability > Questions of Law

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

HN6[] Reviewability, Questions of Law

Due process is not necessarily judicial process. The due process clause of the *U.S. Const. amend. XIV* does not guarantee a trial to a litigant. No court has interpreted the *fourteenth amendment* to include a fundamental right to a trial. No provision in the Federal Constitution forbids a state from granting to a tribunal, whether called a court or a board of registration, the final determination of a legal question. Neither is the right of appeal essential to due process of law.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

HN7[] **Procedural Due Process, Scope of Protection**

The due process clause of *U.S. Const. amend. XIV* requires notice and an opportunity to be heard before an impartial observer, and provides the right to confront and cross-examine witnesses prior to the deprivation of a life, liberty or property interest. In examining whether the existing procedure is sufficient, the court must evaluate the private interest which is affected, the probable value of additional or substitute procedural safeguards in protecting against accidental deprivation of that interest, and the public interest, including a review of the administrative and fiscal burden that the additional procedure would entail.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN8[] **Alternative Dispute Resolution, Mandatory ADR**

This court finds that the mandatory fee arbitration system comports with the mandates of due process. There is no fundamental right to have a trial under *U.S. Const. amend XIV*, and sufficient procedural safeguards exist to ensure that plaintiffs' rights are protected.

Constitutional Law > Equal Protection > General Overview

HN9[] **Constitutional Law, Equal Protection**

There are three standards of judicial review for alleged equal protection violations, and the standard to be applied depends upon the basis used for the classification.

Constitutional Law > Equal Protection > General Overview

Education Law > Discrimination in Schools > Racial Discrimination > Equal Protection

HN10[] **Constitutional Law, Equal Protection**

Courts review state classifications based on suspect traits, such as race or national origin, under the strict scrutiny standard. In order to survive this standard, the classification must be narrowly tailored to the achievement of a compelling state interest.

Constitutional Law > Equal Protection > General Overview

Criminal Law & Procedure > ... > Illegal Consensual Relations > Interracial Relations > General Overview

Family Law > Marriage > Nature of Marriage

HN11[] **Constitutional Law, Equal Protection**

Classifications that deprive a person of a fundamental right also receive strict scrutiny.

Constitutional Law > Equal Protection > Parentage

Education Law > Discrimination in Schools > Gender & Sex Discrimination > Segregation Based on Sex

Constitutional Law > Equal Protection > General Overview

HN12[] **Equal Protection, Parentage**

Quasi-suspect classifications, such as those based on gender or illegitimacy, receive middle level scrutiny. This test requires the state law to be substantially related to an important state interest.

Constitutional Law > Equal Protection > General Overview

HN13[] **Constitutional Law, Equal Protection**

The rational basis test requires that the classification be rationally related to the achievement of a legitimate state interest.

Constitutional Law > Equal Protection > Parentage

Constitutional Law > Equal Protection > General Overview

HN14[] **Equal Protection, Parentage**

Because attorneys are not a suspect class, and because the deprivation of a fundamental right is not involved, the strict scrutiny standard is not applicable. Because there is no classification based on gender or illegitimacy, middle level scrutiny is also inapplicable.

Constitutional Law > Equal Protection > General Overview

HN15[] **Constitutional Law, Equal Protection**

The court recognizes the interest of a state in regulating the legal profession and the attorney-client relationship to be a "compelling" one.

Constitutional Law > Equal Protection > General Overview

HN16[] **Constitutional Law, Equal Protection**

A "compelling" state interest meets and surpasses the requirements of the rational basis test, which requires only a "legitimate" interest. This court finds the maintenance of public confidence in the judicial system to be a legitimate state interest.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

Constitutional Law > Equal Protection > General Overview

HN17[] **Alternative Dispute Resolution, Mandatory ADR**

Requiring attorneys to justify their fees in an inexpensive forum before an impartial panel is rationally related to the maintenance of the public's confidence in the legal system and to the interest in minimizing the burden on both the client and the attorney. In addition, the arbitration process is apt to result in a much quicker determination than the overburdened court system can provide, allowing the attorneys to recover their fees sooner than if an action was brought in court.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

Constitutional Law > Equal Protection > Nature & Scope of Protection

Constitutional Law > Equal Protection > General Overview

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN18[] **Alternative Dispute Resolution, Mandatory ADR**

This court finds that the mandatory arbitration system is rationally related to a legitimate state interest; therefore, the arbitration system does not violate the *equal protection clause of the fourteenth amendment*.

Constitutional Law > Congressional Duties & Powers > Contracts Clause > General Overview

HN19[] **Congressional Duties & Powers, Contracts Clause**

See *U.S. Const. art. I, § 10, cl. 1*.

Constitutional Law > Congressional Duties & Powers > Contracts Clause > General Overview

HN20[] **Congressional Duties & Powers, Contracts Clause**

When a state is a party to a contract and acts to impair that contract, the impairment will be upheld only if the impairment is reasonable and necessary to serve an important public interest and if there is no other means of achieving the state's goal.

Constitutional Law > Congressional Duties & Powers > Contracts Clause > General Overview

HN21[] **Congressional Duties & Powers, Contracts Clause**

The tripartite analysis for impairment of contracts entered into by private parties is controlling. The three-part test requires (1) a substantial impairment of the contractual relationship, (2) that is justified by a significant and legitimate public purpose, and (3) is based on reasonable conditions and is of a character appropriate to the public purpose justifying the legislation's adoption.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN22[] **Alternative Dispute Resolution, Mandatory ADR**

The privilege of practicing law in New Jersey subjects an attorney to the imposition of reasonable conditions and limitations, including the forfeiture of the right to a jury trial if the client elects to arbitrate a fee dispute.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

Civil Procedure > Appeals > Appellate Jurisdiction > State Court Review

HN23[] **Alternative Dispute Resolution, Mandatory ADR**

See N.J. Ct. R. 1:20A-1(a).

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

HN24[] **Parker State Action Doctrine, Local Governments & Private Parties**

The Sherman Act was not intended to restrain state action or official action directed by a state. Instead, the law was only intended to prohibit private parties from engaging in restraints of trade.

Antitrust & Trade Law > Sherman Act > General Overview

HN25[] **Antitrust & Trade Law, Sherman Act**

There is a two-part test for determining whether parties are exempt from the antitrust laws when they engage in anticompetitive conduct. The anticompetitive conduct must be pursuant to a clearly articulated and affirmatively expressed state policy, and the policy must be actively supervised by the state. It is not enough that anti-competitive conduct is prompted by state action; rather, anti-competitive activities must be compelled by direction of the State acting as a sovereign. Where the anticompetitive conduct is performed by private parties, active state supervision is required in order to have the state action exemption apply.

Administrative Law > Agency Adjudication > Alternative Dispute Resolution

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Mandatory ADR

HN26[] **Agency Adjudication, Alternative Dispute Resolution**

The Fee Arbitration Committee operates as a state agency under the supervision and appointment of the New Jersey Supreme Court. Accordingly, this court finds sufficient state "supervision" to hold that the state exemption to the federal antitrust laws.

Counsel: [1]** Mark S. Guralnick, Esq., Garber & Guralnick, Mount Laurel, New Jersey, Attorney for Plaintiffs.

Robert J. Del Tufo, Attorney General of New Jersey, by: Sherrie L. Gibble, Deputy Attorney General, Trenton, New Jersey, Attorney for Defendants Supreme Court of New Jersey, the District Fee Arbitration Committee of the Supreme Court of New Jersey, the District III Fee Arbitration Committee for Burlington and Ocean Counties and Nicholas C. Montenegro, Esquire, Secretary of the District III Fee Arbitration Committee.

Dietrich, Dietrich & Mikulski, by: Thaddeus P. Mikulski, Jr., Esq., Trenton, New Jersey, Attorney for Defendant Yvonne Kiefer.

Judges: Clarkson S. Fisher, United States District Judge.

Opinion by: FISHER

Opinion

[*1110] CLARKSON S. FISHER, UNITED STATES DISTRICT JUDGE

Defendants' motion for judgment on the pleadings and plaintiffs' cross-motion for judgment on the pleadings are before the court. In their complaint, plaintiffs challenge the constitutionality of the New Jersey Fee Arbitration System ("FAS") and charge the New Jersey Supreme Court with violations of federal antitrust laws. [1] For the reasons that follow, summary judgment will be granted in favor of defendants.

[2]** The facts are not in dispute. This controversy arises from a fee dispute between the plaintiffs, Mark Guralnick and Joel Garber, and defendant Yvonne Kiefer. Kiefer hired Garber and Guralnick, attorneys, to represent her in a divorce action and signed a retainer agreement on November 17, 1988. Kiefer was not satisfied with the attorneys' services and refused to pay the full fee charged. The attorneys' fee was $ 2,124, of which $ 1,000 was paid as a

---

[1] Plaintiffs' complaint also alleged the violation of the New Jersey Antitrust Act, *N.J. Stat. Ann. §§ 56:9-1 to:9-19* (West 1989); however, plaintiffs declined to address the issue in their motion for judgment on the pleadings. *See* Plaintiff's Brief at 57 n. 10.

retainer, leaving a balance of $ 1,124. Garber and Guralnick instituted an action against Kiefer for the balance in the Superior Court of New Jersey on July 7, 1989. Kiefer filed an answer on August 7, 1989, in which she noted that she had filed a request for fee arbitration.

[*1111] Pending the outcome of the fee arbitration, plaintiffs' state court collection action was stayed. Plaintiffs then brought a *42 U.S.C. § 1983* action before this court and requested a stay of the fee arbitration, which was granted.

In their federal action, plaintiffs seek declaratory and injunctive relief. Plaintiffs claim that the compulsory nature of the New Jersey FAS violates their right to due process and to equal protection under the United States Constitution. **[**3]** Plaintiffs further claim that the FAS violates the contract clause, that it infringes upon their *seventh amendment* right to a jury trial, and that it results in involuntary servitude in violation of the *thirteenth amendment*. Finally, plaintiffs allege that the defendants, through the FAS, have conspired to restrain trade by arbitrarily and capriciously setting attorney's fees in order to reduce competition and impair transactions in interstate commerce.

A. *The New Jersey Fee Arbitration System*

Before turning to the issues in this case, a description of the fee arbitration system that exists presently in New Jersey is necessary. ***HN1***[] The New Jersey Constitution grants exclusive jurisdiction "over the admission to the practice of law and the discipline of persons admitted" to the New Jersey Supreme Court. N.J. Const., art. 6, § 2. The New Jersey Supreme Court has construed its rule-making powers in this regard very broadly. *Winberry v. Salisbury, 5 N.J. 240, 254-55, 74 A.2d 406, 413-14*, *cert. denied*, *340 U.S. 877, 71 S. Ct. 123, 95 L. Ed. 638 (1950)*.

HN2[] Acting pursuant to its constitutional power to regulate the practice of law and the discipline of practitioners, the New Jersey Supreme Court provided a system **[**4]** of compulsory binding arbitration for attorney-client fee disputes. *See* S. Pressler, *Current Rules Governing the Courts of the State of New Jersey* 1:20A-1 to:20A-6 (1990) [hereinafter N.J. Ct. R.]. In *In re LiVolsi, 85 N.J. 576, 428 A.2d 1268 (1981)*, the New Jersey Supreme Court explained its purpose in enacting a system of compulsory fee arbitration:

> Forcing clients to go to court to resolve attorney fee disputes places a heavy burden on the clients. . . . Clients, especially those of limited income, often find it very difficult to procure another attorney to represent them in fee disputes. Also, if a client were forced to give the attorney a retainer that eventually proved to be unreasonably high, the client might not be able to afford the delay of another trial before being reimbursed. . . .
> Imposing these burdens on clients causes "immeasurable" harm to the relationship between the Bar and the public. . . .
>
> Though the matters which come to fee arbitration represent a very small proportion of the total number of fee relationships, they are among the most visible matters to a public greatly concerned about how the judicial system deals with attorney-client disputes. **[**5]** Our success in establishing a fair fee arbitration system will do much to assure the public of the fairness of the judicial system as a whole, and thereby increase the public confidence that is so necessary for that system to operate effectively.

Id. at 599, 604, 428 A.2d at 1279-80, 1282-83 (citations omitted).

Implementing this system of fee arbitration, the New Jersey Supreme Court appointed Fee Arbitration Committees ("Committees") to serve in designated geographical areas. N.J. Ct. R. 1:20A-1. Jurisdiction to arbitrate fee disputes arising within its district is vested in each Committee. N.J. Ct. R. 1:20A-2. A Committee may have as many members as the court determines, but there may be no fewer than eight. At the minimum, the court must select four New Jersey attorneys and two non-attorneys. N.J. Ct. R. 1:20A-3(a).

HN3[] The rules provide in material part:

> A fee dispute shall be arbitrated only upon a client's written request or upon written consent to the attorney's request. Fee Committees shall have authority to consider such a request whether or not the attorney has already received the fee **[*1112]** in dispute. . . . *The request or consent shall include a stipulation by the client*

> **[**6]** *that if an action for payment of the fee is then pending, it shall be stayed pending a determination by the Fee Committee, and the amount of the fee as so determined shall be entered as a judgment in the action*, provided that a client's request for arbitration shall have been filed within sixty (60) days after service of process.

N.J. Ct. R. 1:20A-3(a) (emphasis added).

The arbitration committee hearing must be held before a panel of at least three members, a majority of whom must be attorneys. N.J. Ct. R. 1:20A-3(b). However, if the matter in controversy is less than $ 3,000, it may be heard by a single attorney. *Id*. A majority of the panel will render the Committee's decision. *Id*. Upon the request of a party, a Committee has the power to compel the attendance of witnesses and the production of documents through the issuance of subpoenas. *Id*. The rules of evidence and procedure need not be strictly adhered to during the hearing. *Id*. No transcript or recording of the hearing is made unless ordered by the Director of the Office of Attorney Ethics or the Disciplinary Review Board. *Id*. However, the decision of the Committee and the reasons in support of that decision **[**7]** must be recorded. *Id*.

If an action is pending against the client for collection of the fee, the Committee decision will be entered as a judgment. N.J. Ct. R. 1:20A-3(a). If no such action is pending, the attorney may, by summary action, obtain judgment in the amount of the fee determined by the Committee. *Id*.

There is no appeal on the merits from the determination of an arbitration committee. N.J. Ct. R. 1:20A-3(c). However, in certain instances, either the attorney or the client may appeal to the Disciplinary Review Board, a nine-person body appointed by the New Jersey Supreme Court to review the determinations of District Ethics Committees and Fee Arbitration Committees. *Id*.; N.J. Ct. R. 1:20-4(a), (e). If it is alleged that a Committee member improperly failed to disqualify himself, that the Committee failed to comply with the procedural requirements of the rules or that there was actual fraud on the part of any member of the Committee, an appeal may be taken. *Id*. If, after a hearing, the Disciplinary Review Board finds that there has been a violation of rule 1:20A-3(c), it may remand to the Committee for a new determination, or it may decide the matter itself. **[**8]** N.J. Ct. R. 1:20A-3(d). No appeal may be taken from the decision of the Disciplinary Review Board.

B. *Standard of Review*

Defendants and plaintiffs both moved for judgment on the pleadings under *rule 12(c) of the Federal Rules of Civil Procedure*. ***HN4***[] A court will not grant a motion for judgment on the pleadings

> unless the movant clearly establishes that no material issue of fact remains to be resolved and that he is entitled to judgment as a matter of law. In considering a motion for judgment on the pleadings, the trial court is required to view the facts presented in the pleadings and the inferences to be drawn therefrom in the light most favorable to the nonmoving party. In this fashion the courts hope to insure that the rights of the nonmoving party are decided as fully and fairly on a *rule 12(c)* motion, as if there had been a trial.

Society Hill Civic Ass'n v. Harris, 632 F.2d 1045, 1054 (3d Cir. 1980) (quoting 5 C. Wright & A. Miller, *Federal Practice and Procedure*, § 1368, at 690 (1969) (footnotes omitted)).

Because plaintiffs presented materials outside the pleadings to this court for its consideration, these motions will be converted into motions for summary judgment **[**9]** in accordance with *Federal Rule of Civil Procedure 12(c)*. *See* *Miskovsky v. United States, 414 F.2d 954, 955 (3rd Cir. 1969)*. However, the standard of review for a motion for summary judgment does not differ from that for a motion for judgment on the pleadings.

HN5[] *Rule 56(c) of the Federal Rules of Civil Procedure* provides that summary judgment shall be granted:

> **[*1113]** if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.

Id.

On a motion for summary judgment, the moving party must demonstrate the absence of an issue of material fact and its entitlement to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. In this case, the facts are not disputed. Consequently, the court need only address the issues of law presented to determine which party is entitled to judgment as a matter of law.

C. *The Due Process Clause of the Fourteenth Amendment*

Plaintiffs claim that the FAS violates their substantive and procedural due process rights under the *fourteenth amendment*. Plaintiffs argue that the compulsory **[**10]** arbitration procedure, with its stay of pending court actions and lack of provision for appeal to a court of law, violates their fundamental right of access to a court of law.

HN6[] But "due process is not necessarily judicial process." *Reetz v. Michigan, 188 U.S. 505, 507, 47 L. Ed. 563, 23 S. Ct. 390 (1903)*. The *due process clause of the fourteenth amendment* does not guarantee a trial to a litigant. No court has interpreted the *fourteenth amendment* to include a fundamental right to a trial. As the Supreme Court noted in *Reetz*, "no provision in the Federal Constitution . . . forbids a state from granting to a tribunal, whether called a court or a board of registration, the final determination of a legal question." *Id*. The Court continued, "neither is the right of appeal essential to due process of law." *Id. at 508*.

HN7[] The *due process clause of the fourteenth amendment* requires notice and an opportunity to be heard before an impartial observer, and provides the right to confront and cross-examine witnesses prior to the deprivation of a life, liberty or property interest. *Goldberg v. Kelly, 397 U.S. 254, 267-68, 25 L. Ed. 2d 287, 90 S. Ct. 1011, 1020 (1970)*. In examining whether the existing procedure is sufficient, the court must evaluate **[**11]** the private interest which is affected, the probable value of additional or substitute procedural safeguards in protecting against accidental deprivation of that interest, and the public interest, including a review of the administrative and fiscal burden that the additional procedure would entail. *Mathews v. Eldridge, 424 U.S. 319, 334-35, 47 L. Ed. 2d 18, 96 S. Ct. 893, 902-903 (1976)*.

The private interest in this case, the attorneys' fee, is a significant "property" interest from the plaintiffs' point of view, because it provides the means by which they live and are able to conduct their practice.

The existing procedure for fee arbitration provides notice and a hearing before a Committee of attorneys and laymen. It also provides an opportunity to compel the attendance of witnesses and the production of documents through the use of subpoenas. N.J. Ct. R. 1:20A-3(b).

The plaintiffs claim that the inability to perform discovery and the failure to follow the rules of civil procedure and evidence in the FAS deprives them of their procedural due process rights. Yet the need for discovery should be minimal because the information required to establish the plaintiffs' entitlement to the fee sought should be within the plaintiffs' **[**12]** own records, not those of the client. As stated in *Kelley Drye & Warren v. Murray Indus., 623 F. Supp. 522, 528 (D.N.J. 1985)*, "depositions and extensive pretrial proceedings are precisely what the arbitration procedure is designed to avoid."

The fact that the majority of the Committee members are "trained in the rules of evidence and skilled in distinguishing competent from incompetent evidence and able to impartially judge facts presented at the hearing" alleviates evidentiary concerns. *In re Logan, 70 N.J. 222, 228, 358 A.2d 787, 791 (1976)*. Further, both the plaintiff and defendant are allowed to have counsel present during the Committee hearing, and **[*1114]** the hearings are to be "conducted formally," although it is not necessary to adhere to the rules of evidence and procedure. N.J. Ct. R. 1:20A-3(b). Finally, the findings of the arbitration committee and the reasons in support of those findings are to be recorded. *Id*.

In sum, the existing procedural protections accorded the plaintiffs in the FAS are sufficient. Allowing an appeal of Committee decisions to the courts would significantly increase the burden on the judicial system. "The advantages of swift, inexpensive proceedings **[**13]** outweigh by far any greater likelihood of just results achieved by allowing appellate proceedings. The loss of public confidence is too high a price to pay for some indeterminate improvement in the quality of fee arbitration determinations." *LiVolsi, 85 N.J. at 603, 428 A.2d at 1282*. In addition, forcing clients to resolve fee disputes by going to court places a heavy burden on the client. *Id. at 599*.

HN8[] Accordingly, this court finds that the New Jersey Fee Arbitration System comports with the mandates of due process. There is no fundamental right to have a trial under the *fourteenth amendment*, and sufficient procedural safeguards exist to ensure that plaintiffs' rights are protected.

D. *The Equal Protection Clause*

The plaintiffs allege that the unilateral and compulsory nature of the FAS classifies attorneys and discriminates against attorneys in violation of equal protection.

HN9[] There are three standards of judicial review for alleged equal protection violations, and the standard to be applied depends upon the basis used for the classification.

HN10[] Courts review state classifications based on "suspect" traits, such as race or national origin, under the "strict scrutiny" standard. **[**14]** In order to survive this standard, the classification must be narrowly tailored to the achievement of a compelling state interest. *See Regents of the Univ. of California v. Bakke, 438 U.S. 265, 320, 57 L. Ed. 2d 750, 98 S. Ct. 2733, 2763 (1978)* (enrollment quotas based on race at state funded university violated equal protection because they were not necessary to promote substantial state interest).

HN11[] Classifications that deprive a person of a fundamental right also receive strict scrutiny. *See Loving v. Virginia, 388 U.S. 1, 9-11, 87 S. Ct. 1817, 1822-23, 18 L. Ed. 2d 1010 (1967)* (statute prohibiting interracial marriage received strict scrutiny because it distinguished on basis of race and because it infringed upon fundamental right to marry).

"Quasi-suspect" ***HN12***[] classifications, such as those based on gender or illegitimacy, receive "middle level scrutiny." This test requires the state law to be substantially related to an important state interest. *See Mississippi Univ. for Women v. Hogan, 458 U.S. 718, 723-24, 73 L. Ed. 2d 1090, 102 S. Ct. 3331, 3335 (1982)* (gender-based segregation at women-only state-funded university received middle level scrutiny).

HN13[] The "rational basis test" requires that the classification be rationally related to the achievement of a legitimate state interest. *See Williamson* ***[**15]*** *v. Lee Optical of Oklahoma, 348 U.S. 483, 491, 99 L. Ed. 563, 75 S. Ct. 461 (1955)* (statute barring optician from issuing eyeglasses without written prescription from licensed ophthalmologist is rationally related to state's interest in protecting health of its citizens).

HN14[] Because attorneys are not a "suspect class," and because the deprivation of a fundamental right is not involved, the "strict scrutiny" standard is not applicable. Because there is no classification based on gender or illegitimacy, "middle level scrutiny" is also inapplicable.

Therefore, the FAS must withstand the "rational basis" test in order to be held constitutional. The Supreme ***HN15***[] Court has recognized the interest of a state in regulating the legal profession and the attorney-client relationship to be a "compelling" one. *Goldfarb v. Virginia State Bar, 421 U.S. 773, 792, 44 L. Ed. 2d 572, 95 S. Ct. 2004, 2015 (1975)*. ***HN16***[] A "compelling" state interest meets and surpasses the requirements of the rational basis test, which requires only a "legitimate" interest. Further, **[*1115]** this court finds the maintenance of public confidence in the judicial system to be a legitimate state interest. *See also LiVolsi, 85 N.J. at 586, 428 A.2d at 1273*. ***HN17***[] Requiring attorneys to justify their fees in an **[**16]** inexpensive forum before an impartial panel is rationally related to the maintenance of the public's confidence in the legal system and to the interest in minimizing the burden on both the client and the attorney. In addition, the arbitration process is apt to result in a much quicker determination than the overburdened court system can provide, allowing the attorneys to recover their fees sooner than if an action was brought in court.

HN18[] Accordingly, this court finds that the New Jersey attorney Fee Arbitration System is rationally related to a legitimate state interest; therefore, the arbitration system does not violate the *equal protection clause of the fourteenth amendment*.

E. *The Contract Clause*

Plaintiffs argue that the deprivation of a contractual right to sue in court for the value of services rendered amounts to an impairment of a private contract in violation of the contract clause. ***HN19***[] The contract clause provides that "no State shall . . . pass any . . . Law impairing the Obligation of Contracts." *U.S. Const., art. I, § 10, cl. 1*.

Plaintiffs rely on the analysis of the United States Supreme Court in *United States Trust Company v. New Jersey, 431 U.S. 1, 52 L. Ed. 2d 92, 97 S. Ct. 1505 (1977)*, in support **[**17]** of their position. In *United States Trust*, legislation passed by New York and New Jersey repealed a covenant entered into by the two states. *Id. at 3, 97 S. Ct. at 1508*. The covenant had limited the New York Port Authority's power to subsidize passenger rail service with revenues from reserves pledged as security for bonds offered by the port authority. *Id*. The Trust Company, as trustee and bondholder, sued for declaratory relief, alleging that the impairment of the bondholder's security amounted to an impairment of contract in violation of the contract clause. *Id*. The Supreme Court held that ***HN20***[] when a state is a party to a contract and acts to impair that contract, the impairment will be upheld only if the impairment is reasonable and necessary to serve an important public interest and if there is no other means of achieving the state's goal. *Id. at 29-30, 97 S. Ct. at 1521*. The court finds the *United States Trust* analysis inapplicable here, because the state is not a party to the contract at issue: the agreement between the attorney and the client.

Instead, this court finds ***HN21***[] the tripartite analysis for impairment of contracts entered into by private parties established by the Supreme Court in *Energy* ***[**18]*** *Reserves Group, Inc. v. Kansas Power & Light Co., 459 U.S. 400, 74 L. Ed. 2d 569, 103 S. Ct. 697 (1983)*, to be controlling. The three-part test in *Energy Reserves* requires (1) a substantial impairment of the contractual relationship, (2) that is justified by a significant and legitimate public purpose, and (3) is based on "'reasonable conditions and [is] of a character appropriate to the public purpose justifying [the legislation's] adoption.'" *Id. at 411-12, 103 S. Ct. at 704*.

First, the impairment alleged by the plaintiffs is not substantial because it does not change the terms of the contract. Rather, it dictates the forum in which disputes regarding the attorney's fee may be adjudicated, if the client so chooses. Plaintiffs have not demonstrated that the imposition of an arbitration committee for attorney fee disputes results in significant changes in the fees charged the clients. The allegation that "among members of the bar, there is a widely held perception that Fee Arbitration Committees typically compromise lawyers' bills" is insufficient. Plaintiffs' Brief at 24, n. 5.

Second, notwithstanding the insubstantial impairment of contract, this court finds the FAS to be justified by a significant and legitimate public purpose: **[**19]** the maintenance of public confidence in the New Jersey judicial system. By providing an inexpensive forum in which to resolve attorney fee disputes, that end is served. The New Jersey Supreme Court in *LiVolsi* fully endorsed American Bar Association reports indicating that forcing clients to go to court **[*1116]** to resolve fee disputes placed a heavy burden on the clients. *LiVolsi, 85 N.J. at 599, 428 A.2d at 1279-80* (citing ABA, Report of the Special Committee on Resolution of Fee Disputes 2-4 (1974)). The Supreme Court also rejected the idea that noncompulsory attorney arbitration would be as effective as compulsory arbitration, noting that "national surveys demonstrate that a significant and growing number of attorneys refuse to arbitrate their fee disputes." *LiVolsi, 85 N.J. at 599, 428 A.2d at 1280*.

Third, in determining whether the impairment is reasonable and appropriate to serve an important public purpose when the state is not a contracting party, "courts properly defer to legislative judgment as to the necessity and reasonableness of a particular measure." *Energy Reserves, 459 U.S. at 412-13, 103 S. Ct. at 705*. Given the quasi-legislative power to "formulate court rules and policy" granted **[**20]** to the New Jersey Supreme Court in the state constitution, deference to the necessity and reasonableness of the FAS is appropriate under *Energy Reserves*. N.J. Const., art 6, § 2.

Accordingly, this court finds the Fee Arbitration System to be a reasonable and necessary exercise of the power of the New Jersey Supreme Court to regulate the practice of law in New Jersey, and that the system does not violate the contract clause of the United States Constitution.

F. *The Right to a Jury Trial*

Plaintiffs allege that the compulsory arbitration system deprives them of their right to a jury trial pursuant to the *seventh amendment of the United States Constitution*.

In *Kelley Drye*, the court addressed the issue of whether the compulsory arbitration system infringed upon *seventh amendment* rights and held that it did not. *623 F. Supp. 522, 526-27 (D.N.J. 1985)*. The court concluded that ***HN22***[] the privilege of practicing law in New Jersey subjected an attorney to the imposition of reasonable conditions and limitations, including the forfeiture of the right to a jury trial if the client elects to arbitrate a fee dispute. *Id*. This court finds no merit to plaintiffs' argument that it must **[**21]** retreat from the position taken in that case.

G. *Involuntary Servitude*

Plaintiffs allege that the FAS

> reduces honest lawyers to compulsory involuntary service. At the very least, it leaves lawyers ethically obligated to represent their clients to the fullest extent, then steals from them the legal protections necessary to collect a reasonable fee.
>
> There is no secret about the fact that fee arbitration committees frequently issue decisions reducing lawyer's fees or altogether eradicating them. This trend results in compulsory, involuntary service . . . as proscribed by the *Thirteenth Amendment*.

Plaintiffs' Brief at 50-51.

The court finds the involuntary servitude argument to be without merit. First, the plaintiffs voluntarily undertook the task of representing Ms. Kiefer in her divorce action. Nothing in their brief indicates otherwise. Second, the plaintiffs voluntarily sought entry into the practice of law in New Jersey, an act that requires submission to the rules and regulations promulgated by the New Jersey Supreme Court.

> ***HN23***[] Every attorney authorized to practice law in the State of New Jersey . . . shall be subject to the disciplinary jurisdiction of the Supreme Court **[**22]** . . . .

N.J. Ct. R. 1:20A-1(a).

Third, plaintiffs do not provide any evidence to justify their sweeping condemnation of the Fee Arbitration Committees. Plaintiffs do not purport to prove that the Committees forgive all of the debt owed by the client to the attorney. Attorneys do receive compensation for their efforts under this system, and plaintiffs do not claim otherwise. Further, in *LiVolsi*, the New Jersey Supreme Court concluded that there was no evidence that the arbitration system caused significant hardship for lawyers. *85 N.J. at 600-01, 428 A.2d at 1280*.

Therefore, this court finds that the argument that the New Jersey Fee Arbitration System places the plaintiffs in involuntary **[*1117]** servitude in violation of the *thirteenth amendment* is without merit.

H. *Federal Antitrust Claims*

Plaintiffs allege that, by allowing price fixing and the determination of fair fees for legal services in restraint of trade, the attorney FAS violates the Sherman Act, *15 U.S.C.A. §§ 1-7* (West 1973 & Supp. 1990).

In *Parker v. Brown, 317 U.S. 341, 351, 87 L. Ed. 315, 63 S. Ct. 307, 313 (1943)*, the Supreme Court held that ***HN24***[] the Sherman Act was not "intended to restrain state action or official action directed by a state." Instead, **[**23]** the law was only intended to prohibit private parties from engaging in restraints of trade. *Id*. In *Parker*, the state actively participated in the creation and enforcement of a program to develop marketing policies for the raisin crop. *Id. at 352, 63 S. Ct. at 314*. The Court concluded that no violation of federal ***antitrust law*** had occurred in *Parker* and noted that the state, as sovereign, had imposed the restraint of trade as an act of government. *Id*.

The Supreme Court refined the "state action" exemption to the Sherman Act in *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. In *Midcal*, the California state liquor price control system allowed the producers of wine to dictate the wholesale prices of wine to wholesalers. *Id. at 99, 100 S. Ct. at 940*. The state system authorized the producers to set prices and provided the enforcement mechanism in the event of violation, but the state did not actively participate in the setting of the wine prices. *Id. at 99-100, 100 S. Ct. at 940*. The actual prices were dictated to the wholesalers by the individual wine producers, not by the state. *Id. at 103, 100 S. Ct. at 942*.

The Court established ***HN25***[] a two-part test for determining whether parties are exempt **[**24]** from the antitrust laws when they engage in anticompetitive conduct. The anticompetitive conduct must be pursuant to a "'clearly articulated and affirmatively expressed . . . state policy,'" and the policy must be "'actively supervised'" by the state. *Id. at 105, 100 S. Ct. at 943* (citing *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123, 1135 (1978))*; *see also* *Goldfarb v. Virginia State Bar, 421 U.S. 773, 791, 44 L. Ed. 2d 572, 95 S. Ct. 2004, 2015 (1975)* ("It is not enough that . . . anti-competitive conduct is 'prompted' by state action; rather, anti-competitive activities must be compelled by direction of the State acting as a sovereign."). The Court in *Midcal* concluded that where the anticompetitive conduct was performed by private parties, active state supervision was required in order to have the state action exemption apply. *445 U.S. at 106, 100 S. Ct. at 943*.

Plaintiffs' reliance on *Midcal* is misplaced, because the New Jersey FAS does not allow private parties to set the fees which attorneys may charge their clients. The Fee Arbitration Committees, appointed by the New Jersey Supreme Court pursuant to its constitutional power to regulate the practice of law in New Jersey, are not private parties, but are an extension **[**25]** of the New Jersey Supreme Court. As such, the Committees act in their official capacity to regulate the practice of law in New Jersey by providing a forum for the resolution of attorney fee disputes. The New Jersey Supreme Court appoints the members of the Committees and dictates the rules and regulations by which the Committees operate. Additionally, the arbitration committees are acting pursuant to the New Jersey Supreme Court's policy of maintaining the public's confidence in the state judicial system. *LiVolsi, 85 N.J. at 604, 428 A.2d at 1282*. Therefore, because the state is actively involved, and because there are no private parties engaged in price fixing, the *Midcal* test is not applicable.

In dicta, the Supreme Court noted in *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 46 n. 10, 85 L. Ed. 2d 24, 105 S. Ct. 1713, 1720 (1985)*, that "in cases in which the actor is a state agency, it is likely that active state supervision would also not be required." In *Hallie*, the Court held that active state supervision is not a requirement for exemption from federal **[*1118]** antitrust laws where the actor is a municipality, rather than a state agency. *Id. at 46*. Although this court would be inclined to follow *Hallie* **[**26]** and hold that active state supervision is unnecessary when the actor is a state agency, it need not do so here because there is sufficient state supervision for the FAS to fall within the "state action" exemption to the antitrust laws.

HN26[] The Fee Arbitration Committee operates as a state agency under the supervision and appointment of the New Jersey Supreme Court. Accordingly, this court finds sufficient state "supervision" to hold that the state exemption to the federal antitrust laws enunciated in *Parker v. Brown* applies.

I. *Conclusion*

Consequently, the New Jersey Fee Arbitration System does not violate federal ***antitrust law***; nor does it infringe upon the rights granted to the plaintiffs under the *fourteenth*, *seventh* and *thirteenth amendments* and *article 1, section 1, of the United States Constitution*.

For these reasons, defendants' motion for summary judgment is granted. Plaintiffs' cross-motion for summary judgment is denied. An order accompanies this opinion. No costs.

ORDER - September 26, 1990, Filed

This matter having come before the court on motion for judgment on the pleadings brought by defendants, New Jersey Supreme Court, the District III Fee Arbitration Committee, **[**27]** Nicholas Montenegro and Yvonne Kiefer, and on cross-motion for judgment on the pleadings brought by plaintiffs, Mark S. Guralnick and Joel Garber; and the court having read and considered the written submissions of counsel; and good cause having been shown,

IT IS on this 26th day of September, 1990,

ORDERED that summary judgment be and hereby is entered in this matter in favor of defendants and against plaintiffs.

Mechanical Rubber & Supply Co. v. American Saw & Mfg. Co.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN1[] **Public Enforcement, State Civil Actions**

Ill. Rev. Stat. ch. 38, para. 60-3(4) prohibits contracting to sell goods on the condition that the lessee or purchaser shall not deal in the goods of competitors where the effect of the condition is to substantially lessen competition or tend to create a monopoly in any line of commerce.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN2[] **Subject Matter Jurisdiction, Federal Questions**

A qualification of the so-called "well-pleaded complaint" rule for determining jurisdiction is that a plaintiff cannot deny a defendant his right to a federal forum by artfully disguising an essentially federal law claim in terms of state law.

Antitrust & Trade Law > Clayton Act > General Overview

HN3[] **Antitrust & Trade Law, Clayton Act**

Ill. Rev. Stat. ch. 38, para. 60-3(4) is substantially identical in terms to § 3 of the Clayton Act, *15 U.S.C.S. § 14*. Under the Clayton Act, insofar as the interstate commerce element is concerned, a complaint can rest on the theory that the acts complained of occur within the flow of commerce, or that the acts complained of occur wholly on a state or local level in interstate commerce, but substantially affect interstate commerce, or on both theories.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Parties

Constitutional Law > Congressional Duties & Powers > General Overview

Governments > Federal Government > US Congress

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN4[] **Supplemental Jurisdiction, Pendent Parties**

A two-part test must be satisfied before a district court can exercise pendent party jurisdiction. The Seventh Circuit states that: First, the court must examine whether the constitutional power to exercise such jurisdiction exists. Second, the court must examine whether Congress limits the court's power to exercise pendent party jurisdiction in the specific statutory provision confronting federal jurisdiction in that case. The constitutional power to exercise pendent party jurisdiction exists if the federal claim is not frivolous, the federal and state claims derive from a common nucleus of operative fact, and the federal and state claims are the kind that the plaintiff is ordinarily expected to try in one judicial proceeding. The statutory power to exercise pendent party jurisdiction depends upon whether Congress in the particular statutory grant at issue has expressly or by implication negated pendent party jurisdiction.

Administrative Law > Sovereign Immunity

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Parties

Torts > ... > Liability > Federal Tort Claims Act > Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN5[] **Administrative Law, Sovereign Immunity**

A party must show an affirmative grant of jurisdiction under the relevant statute before a pendent party can acquire jurisdiction. It is insufficient to show merely that Congress does not expressly or by implication negate pendent party jurisdiction. A plaintiff must show an independent basis for jurisdiction against the pendent party to establish jurisdiction over the pendent claims.

Counsel: **[**1]** Mr. Phillip B. Lenzini, Peoria, Illinois, Attorney for Plaintiff.

Mr. Ronald L. Hamm, Peoria, Illinois, and Mr. Michael T. Reid, Chicago, Illinois, for American Saw, Mr. Franklin Renner, Peoria, Illinois, for Hagerty Brothers.

Judges: Michael M. Mihm, United States District Judge.

Opinion by: MIHM

Opinion

[*1293] ORDER

MICHAEL M. MIHM, UNITED STATES DISTRICT JUDGE

Before the Court is a Motion by the Plaintiff Mechanical Rubber to remand (#22) this case to state court. Also before the Court is the issue of whether or not this Court has pendent party jurisdiction over Hagerty Brothers Company. These issues have been fully briefed. The Court denies the Plaintiff's Motion to Remand (#22). And, the Court finds it lacks subject matter jurisdiction over Hagerty Brothers.

BACKGROUND

Mechanical Rubber filed an Amended Complaint on December 20, 1989. Count I of the Amended Complaint alleges antitrust violations under Illinois law against American Saw. *See*, ***HN1***[] Ill.Rev.Stat. ch. 38, § 60-3(4). This statute prohibits contracting to sell goods on the condition that the lessee or purchaser will not deal in the goods of the competitors where the effect of the condition is to substantially lessen competition or tend to create a monopoly in any line of commerce. The Amended **[**2]** Complaint alleges that American Saw sold goods to the Plaintiff on the condition that Plaintiff not deal in the goods of competitors of American Saw. Also, it is alleged that the effect of the condition will be to substantially lessen competition or to tend to create a monopoly. The Plaintiff seeks treble damages, injunctive relief, and an award of attorney's fees in Count I.

Counts II through VII of the Plaintiff's Amended Complaint allege various state causes of action against American Saw and Hagerty Brothers.

DISCUSSION

American Saw removed this case to federal court pursuant to *28 U.S.C. § 1441(a)* and *(c)*. Under *28 U.S.C. § 1441(a)*, American Saw asserted that this case was removable because this Court would have original jurisdiction over the state antitrust claim, which is actually a federal antitrust claim disguised as a state antitrust claim. Also, American Saw contends that removal is proper pursuant to *28 U.S.C. § 1441(c)* because the claims against American Saw, particularly the antitrust claim, are separate and independent claims which would be removable if sued upon alone because diversity exists between American Saw and Mechanical Rubber (*see also*, *28 U.S.C. §* ***[**3]*** *1332*).

I. *Was Removal Proper Under 28 U.S.C. § 1441(a)*

American Saw argues that this Court has original jurisdiction over the Amended **[*1294]** Complaint because it states a cause of action under the federal antitrust laws, although the Complaint, through artful pleading, attempts to state a claim under the state antitrust laws.

Mechanical Rubber maintains that a Plaintiff is the master of his complaint and that he can defeat removal to the federal courts by ignoring his federal claims and pursuing only the state claims in state court. *See, People of the State of Illinois v. Kerr-McGee Chemical Corp., 677 F.2d 571 (7th Cir. 1982)*; *Jones v. General Tire and Rubber Company, 541 F.2d 660 (7th Cir. 1976)*; *Nuclear Engineering Company v. Scott, 660 F.2d 241 (7th Cir. 1981)*; and *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 1665-1667, 104 L. Ed. 2d 86 (1989)*.

In response, American Saw quotes the following:

> ***HN2***[] A qualification of this so-called "well-pleaded complaint" rule for determining jurisdiction is that a plaintiff may not deny a defendant his right to a federal forum by artfully disguising an essentially federal law claim in terms of state law.

Nuclear Engineering Company, ***[**4]*** *660 F.2d at 249*; *see also, Kerr-McGee*, 667 F.2d at 575; *General Tire and Rubber Company, 541 F.2d at 664*; and *Federated Department Stores, Inc. v. Moitie, 452 U.S. 394, 397 n. 2, 69 L. Ed. 2d 103, 101 S. Ct. 2424, 2427 (1981)*.

In *Federated Department Stores*, the United States brought an antitrust action against the defendant department stores alleging a violation of the Sherman Act by agreeing to fix the retail price of women's clothing sold in Northern California. Seven parallel civil suits were subsequently filed by private plaintiffs which were consolidated. The district court dismissed the complaints on the ground that the plaintiffs had not alleged an antitrust injury.

The plaintiffs in five of the suits appealed the dismissal to the Ninth Circuit. Moitie and Brown, however, chose not to appeal and instead filed two actions in state court. Although the complaints purported to raise only state antitrust claims, they made allegations similar to those made in the prior complaint. The defendants removed the state actions to federal court. The district court denied the plaintiffs' motions to remand, holding that the complaint, artfully couched in terms of state ***antitrust law***, was in many respects identical **[**5]** with the prior complaints and that the action was properly removed to federal court because the complaint raised essentially federal antitrust claims. (Unpublished district court opinion). The district court further dismissed the complaints on the basis of *res judicata*.

The Ninth Circuit affirmed the district court on the issue of removal but reversed on the issue of *res judicata. Moitie v. Federated Department Stores, Inc., 611 F.2d 1267 (9th Cir. 1980)*.

The Supreme Court reversed the Ninth Circuit on the *res judicata* issue. And, as to the issue of removal, the Supreme Court stated:

> The Court of Appeals also affirmed the district court's conclusion that Brown II was properly removed to federal court, reasoning that the claims presented were federal in nature. We agree that at least some of the claims had a sufficient federal character to support removal. *As one treatise puts it, courts will not permit plaintiff to use artful pleading to close off defendant's right to a federal forum . . . [and] occasionally, the removal court will seek to determine whether the real nature of the claim is federal, regardless of plaintiff's characterization*. 14 C. Wright, A. Miller, **[**6]** and E. Cooper, *Federal Practice and Procedure*, § 3722, pp. 564-566 (1976) (citing cases) (footnote omitted). The district court applied the subtle principle to the facts of this case. After an extensive review and analysis of the origins and substance of the two *Brown* complaints, *it found, and the Court of Appeals expressly agreed, the respondents had attempted to avoid removal jurisdiction by "artful[ly]" casting their "essentially federal law claims" as state-law claims*. We will not question here that fact finding. *See, Prospect Dairy, Inc.* ***[*1295]*** *v. Dellwood Dairy Company, 237 F. Supp. 176 (N.D. N.Y. 1964)*; *In re Wiring Device Antitrust Litigation, 498 F. Supp. 79 (E.D. N.Y. 1980)*; *Three J Farms, Inc. v. Alton Box Board Company*, 1979-1 Trade Cases para. 62,423 (S.C. 1978), reversed on other grounds, *609 F.2d 112 (CA 4 1979)*, *cert. denied*, *445 U.S. 911 [100 S. Ct. 1090, 63 L. Ed. 2d 327]* (1980).

Federated Department Stores, 452 U.S. at 397 n. 2.

Exactly what the Supreme Court was affirming is unclear because the district court opinion is unpublished and the Ninth Circuit opinion summarily affirms that portion of the district court opinion regarding the removal of the antitrust claims. However, **[**7]** American Saw quotes extensively from the three lower court opinions which the Supreme Court cited in its explanatory footnote.

Particularly relevant is a quotation from *In re Wiring Device Antitrust Litigation, 498 F. Supp. 79 (E.D.N.Y. 1980)*. The court stated:

> A federal court need not blind itself to the real gravamen of a claim because plaintiff tenders a blindfold in the form of artificial characterizations in its complaint. Peeking to determine reality is particularly appropriate *where it is apparent that the central federal claim is inseparable from the state law theory, and where the question of federal jurisdiction turns on the out-of-state status of the parties and the interstate nature of the transactions complained of*. (Citations omitted). Where, as here all defendants are unquestionably engaged in interstate commerce, those who are damaged from an alleged restraint of trade find a remedy in the federal, not the

> state, antitrust laws. This conclusion is buttressed in this case by the long-standing holding of the South Carolina Supreme Court, described in more detail below, that the state antitrust statute under which the plaintiffs have attempted to bring their **[**8]** action applies only to intrastate commerce and does not reach interstate commerce of any kind. (Citation omitted).

Id. at 82 (emphasis added); *see also, T.O.C. v. United Artists Theatre Circuit, 631 F. Supp. 832, 834 (N.D. Cal. 1986)*.

Count I of the Amended Complaint alleges that American Saw is a manufacturer of industrial saw blades with its principal place of business in Massachusetts. (Amended Complaint at para. 3). It also alleges that American Saw sells its nationally known Lenox saw blades to industrial distributors in Illinois and elsewhere for resale to industrial and commercial users. (*Id*.).

The antitrust violation alleged is that American Saw sold its saw blades to Plaintiff on the condition that it not deal in the goods of Defendant's competitors, the effect of which may be substantially lessened competition or tend to create a monopoly. It alleges that American Saw has engaged in a practice of terminating other Lenox dealers who begin dealing in competing lines and reinstating such dealers only if the competing lines were dropped. (*Id*. at P 8).

It is undisputed that American Saw's products (saw blades) purchased by Mechanical Rubber were manufactured **[**9]** in Massachusetts and shipped in interstate commerce to the Plaintiff's principal place of business in Peoria, Illinois. Orders for the products were sent by Mechanical Rubber from Illinois to Massachusetts. Payments were made via interstate commerce also.

American Saw asserts that the specific antitrust wrong alleged consists of sales in interstate commerce on the condition that Plaintiff not deal in the goods of competitors of American Saw. As American Saw notes, the state ***antitrust law*** alleged to have been violated, ***HN3***[] Ill.Rev.Stat. ch. 38, § 60-3(4), is substantially identical in terms to § 3 of the Clayton Act, *15 U.S.C. § 14*. Under the Clayton Act, insofar as the interstate commerce element is concerned, the Complaint can rest on the theory that the acts complained of occurred within the flow of commerce, or that the acts complained of occurred wholly on a state or local level in interstate commerce, **[*1296]** but substantially affected interstate commerce, or on both theories. *Kallen v. Nexus Corp., 353 F. Supp. 33 (N.D. Ill. 1973)*.

Thus, American Saw asserts that because of *its out-of-state status and the interstate nature of the transactions complained of*, Mechanical Rubber has **[**10]** alleged a federal antitrust violation and not a state antitrust violation. American Saw concedes it is clear after *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)* that federal ***antitrust law*** is not intended in any direct way to preempt state ***antitrust law*** except where there might be a direct conflict between the two laws. However, it maintains that its position is not that federal antitrust laws preempt the state antitrust laws, but that the federal antitrust laws apply to acts affecting or occurring in the flow of commerce and that the Illinois antitrust laws apply to acts affecting intrastate commerce.

This Court agrees with the Defendant American Saw. Count I is sufficiently federal in character that the Court has subject matter jurisdiction over American Saw and the Plaintiff must properly bring this count under the federal antitrust laws. And, although neither of the parties have cited any law on this point and the Court has found no law on this point, this Court believes that Illinois courts would not extend the application of its ***antitrust law*** so that it would burden interstate commerce.

The Plaintiff's Complaint alleges in relevant part:

> 3. At all times mentioned **[**11]** herein, the Defendant American Saw and Manufacturing Company (hereafter "American Saw"), was engaged in the business of manufacturing and producing and distributing to industrial distributors in the central region of the State of Illinois *and elsewhere the nationally known brand and product line of high quality industrial saw blades commonly known as "Lenox", with its principal place of business in East Long Meadow, Massachusetts*.

> 8. For the purpose of forming and effectuating monopoly power, the Defendant American Saw *has engaged and does engage in a pattern with various Lenox dealers whereby* the distributorships of those dealers who either began offering competing product lines or contemplated offering competing product lines were revoked by the Defendant American Saw and such dealerships were reinstated only if the competing line was terminated or abandoned.

(Plaintiff's Amended Complaint at paras. 3 and 8) (emphasis added).

Paragraph 3 makes it clear that the Defendant American Saw is an out-of-state party who does business nationally in a product line known as Lenox. Further, it is undisputed that the sales, orders, and shipping of American Saw's products were made **[**12]** in interstate commerce. And, from both paragraphs 3 and 8 of the Complaint, it is apparent that the Plaintiff is alleging that American Saw is engaging in a pattern of terminating distributorships on a national level of those dealers who either begin offering competing product lines or who are contemplating offering competing product lines. Thus, this Court finds that the Plaintiff has attempted to avoid removal jurisdiction by artfully casting an essentially federal law claim as a state law claim.

However, as the Defendant American Saw concedes, Count I of the Amended Complaint also states a cause of action in intrastate commerce which may be a cognizable claim under Ill.Rev.Stat. ch. 38, paras. 60-1 to 60-11. Thus, Count I properly alleges claims under state and federal law.

Because the Court has found that this case was removable under *28 U.S.C. § 1441(a)* as this Court would have had original jurisdiction over the antitrust claim if it had originally been brought in federal court, it is unnecessary for this Court to consider whether or not the antitrust claim is a separate and independent claim which would be removable on the basis of diversity if sued upon alone under *28 U.S.C.* ***[**13]*** *§ 1441(c)*.

II. *Does this Court Have Jurisdiction Over Hagerty Brothers Company*

The question in this case is whether the Court has pendent party jurisdiction over **[*1297]** the state law claims against Hagerty Brothers Company. ***HN4***[] A two-part test must be satisfied before a district court can exercise pendent party jurisdiction. *Huffman v. Hains, 865 F.2d 920, 922 (7th Cir. 1989)*. In describing the factors which bear on the Court's decision to exercise its pendent party jurisdiction, the Seventh Circuit stated in *Huffman*:

> First, the court must examine whether the constitutional power to exercise such jurisdiction exists. Second, the court must examine whether Congress has limited the court's power to exercise pendent party jurisdiction in the specific statutory provision confronting federal jurisdiction in that case. (Citation omitted). The constitutional power to exercise pendent party jurisdiction exists if the federal claim is not frivolous, the federal and state claims "derive from a common nucleus of operative fact," and the federal and state claims are the kind that the plaintiff "would ordinarily be expected to try . . . in one judicial proceeding." (Citations omitted). The **[**14]** statutory power to exercise pendent party jurisdiction depends upon whether "Congress in the [particular statutory grant at issue] has . . . expressly or by implication negated" pendent party jurisdiction. (Citations omitted).

Id. at 922-923.

The federal claim is clearly not a frivolous claim as the Court's earlier discussion indicates. Further, both the federal and state claims in this case derive from a common nucleus of operative facts and are claims that a plaintiff would ordinarily be expected to try in one judicial proceeding. Thus, this Court has the constitutional power to exercise jurisdiction over these state claims.

However, the second factor in the *Huffman* test regarding whether or not the Court has the statutory power to exercise jurisdiction has been modified by a subsequent Supreme Court decision. *See, Finley v. United States, 490 U.S. 545, 109 S. Ct. 2003, 104 L. Ed. 2d 593 (1989)*. In *Finley*, the plaintiff had sued the United States in federal court under the Federal Tort Claims Act for wrongful death. Later, the plaintiff moved to amend her complaint to add state tort law claims against the city and an electric company, claiming that their negligence had caused the death. **[**15]** No independent basis for federal jurisdiction against the city or the electric company existed. The district court allowed the joinder of the additional defendants as pendent parties. The Ninth Circuit reversed, holding that the Tort Claims Act does not permit pendent jurisdiction over additional parties.

In affirming the Ninth Circuit, the Supreme Court distinguished between pendent claim jurisdiction and pendent party jurisdiction. The Court acknowledged that *United Mine Workers v. Gibbs, 383 U.S. 715, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)* held that pendent claim jurisdiction over non-federal claims may exist where parties are litigating other matters properly before the federal court. However, the Court reasoned that pendent party jurisdiction is analytically and fundamentally different from pendent claim jurisdiction in stating:

> We may assume, without deciding, that constitutional criterion for pendent-party jurisdiction is analogous to the constitutional criterion for pendent-claim jurisdiction, and that petitioner's state-law claims pass that test. *Our cases show, however, that with respect to the addition of parties, as opposed to the addition of only claims, we will not assume that the full constitutional* ***[**16]*** *power has been congressionally authorized, and will not read jurisdiction statutes broadly*.

Id. 109 S. Ct. at 2006-2007 (emphasis added). The *Finley* Court then went on to quote from its decision in *Aldinger v. Howard, 427 U.S. 1, 15, 49 L. Ed. 2d 276, 96 S. Ct. 2413, 2420 (1976)* the following:

> "The addition of a completely new party," we said, "would run counter to the well-established principle that federal courts . . . are courts of limited jurisdiction marked out by Congress." (Citation omitted). "Resolution of a claim of pendent-party jurisdiction . . . calls for careful **[*1298]** attention to the relevant statutory language." (Citation omitted).

Finley, 109 S. Ct. at 2007.

Thus, it would appear that the question to be considered is whether or not the statutory language of the statute in question allows pendent party jurisdiction. The existence of this issue is supported by the fact that the *Finley* court noted that mere factual similarity between the state and federal claims is of no consequence to determine the propriety of pendent party jurisdiction because neither the convenience of the litigants nor considerations of judicial economy are sufficient to justify the extension of the ancillary jurisdiction. **[**17]** *Id. at 2008*. The *Finley* Court's analysis then focused on the actual language of the Federal Tort Claims Act to determine whether the text of the jurisdictional statute in any way authorized the inclusion of private defendants. *Id. at 2008-2010*. After concluding that the statutory language did not extend to parties other than the United States, the Court found that pendent party jurisdiction was not available under the Tort Claims Act. *Id*. at 2010.

After *Finley*, federal courts have generally interpreted *Finley* to preclude pendent party jurisdiction unless there exists an independent jurisdictional basis for the pendent party. *Lather v. Beadle County, 879 F.2d 365, 367-368 (8th Cir. 1989)*; *Teledyne, Inc. v. Kone Corp., 892 F.2d 1404, 1407-1409 (9th Cir. 1990)*; *Ezell v. Burlington Northern Railroad Company, 724 F. Supp. 863, 864-865 (D. Wyo. 1989)*. In fact, one federal court in a footnote went so far as to say that "pendent-party jurisdiction apparently is no longer a viable concept." *Staffer v. Bouchard Transportation Company, 878 F.2d 638, 643, n. 5 (2nd Cir. 1989)*. In addition, one prominent commentator stated:

> It is possible to read *Finley* **[**18]** as only a construction of the Federal Tort Claims Act. Much of the opinion is devoted to an examination of that statute. So read the opinion would be fairly narrow, although it still would be contrary to the strong indication in *Aldinger* that pendent-party jurisdiction would be proper where, as in *FTCA*, federal jurisdiction is exclusive and a refusal to allow pendent-party jurisdiction would require separate suits in state and federal court.
>
> It seems clear, however, that this reading of *Finley* would be too narrow. A fair reading is that the court is distinguishing sharply between pendent claims and pendent parties. Although the *Finley* court assumes, without deciding, that pendent-party jurisdiction would be within the constitutional grant of judicial power, *it holds that "an affirmative grant of pendent-party jurisdiction" must be found in a statute. "[A] grant of jurisdiction over claims involving particular parties does not itself confer jurisdiction over additional claims by or against different parties*." There may be statutes that affirmatively grant pendent-party jurisdiction, but they surely must

> be exceptional. It is not surprising that lower courts are **[**19]** reading *Finley* as putting an end to that jurisdiction.

Wright, Miller & Cooper, *Federal Practice and Procedure*: Jurisdiction 2d, § 3567.2 (emphasis added).

Several district court cases subsequent to the *Finley* decision have allowed claims against pendent parties. *See, Armstrong v. Edelson, 718 F. Supp. 1372, 1376-1377 (N.D. Ill. 1989)*; *Carter v. Dixon, 727 F. Supp. 478, 479-480 (N.D. Ill. 1990)*; *Bailey v. City of Chicago*, No. 89-1021, slip op. (N.D. Ill., June 28, 1990); *Craig v. First American Capital Resources, Inc., 740 F. Supp. 530 (N.D. Ill. 1990)*.

However, the above cases apply the second part of the *Huffman* test as if the Supreme Court had not decided *Finley*. In *Bailey*, the court stated that "the statutory power to exercise pendent party jurisdiction depends upon whether Congress in the particular statutory grant at issue has expressly or by implication negated pendent party jurisdiction." *Bailey*, slip op.

In light of the express language of the *Finley* opinion, the subsequent interpretation of the *Finley* opinion by several circuit courts, and the interpretation of the *Finley* opinion given by a respected **[**20]** commentator, this Court believes that the second factor of the *Huffman* test has been **[*1299]** modified by the *Finley* decision. This Court believes that ***HN5***[] a party must show an affirmative grant of jurisdiction under the relevant statute before a pendent party can acquire jurisdiction. It is insufficient to show merely that Congress has not expressly or by implication negated pendent party jurisdiction as the *Huffman* court required. Interpreting *Finley* so narrowly that it only has application to the Federal Tort Claims Act is untenable in light of the explicit language used by the Supreme Court distinguishing pendent party jurisdiction from pendent claim jurisdiction.

Thus, the Plaintiff must show an independent basis for jurisdiction against the pendent party to establish jurisdiction over the pendent claims. As the Plaintiff does not allege an independent basis for jurisdiction, and the Court cannot find an independent basis for jurisdiction over the Plaintiff's claims against Hagerty Brothers Company, the claims against Hagerty Brothers must be dismissed.

CONCLUSION

The Court DENIES the Plaintiff's Motion to Remand (#22) for the reasons stated herein. And, the Court DISMISSES **[**21]** all claims against Hagerty Brothers Company as this Court lacks subject matter jurisdiction over the Defendant. Thus, the Motion by Hagerty Brothers to Dismiss Count IV of the Amended Complaint (#18) is MOOT.

ENTERED this 26th day of September, 1990.

Opinion

OPINION

The matters before the court are:

1) the motion to stay (#20) of Portland General Electric Company (PGE);

2) the motion to stay (#30) of the Public Utility Commission of the State of Oregon (PUC);

3) the motion of Columbia Steel Casting Co., Inc. (Columbia) to strike the reply of the PUC (#39); [1] **[*2]** and

4) the motion of Columbia to strike the reply of PGE (#40). [2]

BACKGROUND

In 1972, PGE and Pacificorp, doing business as Pacific Power & Light Company (PP&L), entered into an agreement (the 1972 Agreement) [3] to exchange electric distribution properties and customer accounts in defined areas within and around the City of Portland in order to eliminate duplicate electric utility facilities. In general, PP&L transferred its properties and customers within the Rainier Service District, an area which the agreement labels as "Parcel C," to PGE in exchange for PGE's transfer to PP&L of its properties and customers in areas labeled Parcels A and B in the 1972 Agreement.

[*3] The City of Portland consented to the agreed exchange. [4] The Public Utilities Commissioner approved the agreement. By Order 72-870, the PUC approved "the transfer of certain exclusively served territory in the Rainier area from Pacific Power & Light Company to Portland General Electric Company and approved the transfer and exchange of utility property and facilities and customers between the two companies as applied for." Exhibit 1 to PGE's Motion to Stay, p. 39.

Columbia is within the area identified by the 1972 Agreement as Parcel C. Parcel C is the area from which PP&L transferred its property and customers to PGE. At the time the agreement was signed, Columbia was not a customer of PP&L. Columbia has always been a customer of PGE. Columbia purchases electricity from PGE pursuant to an Agreement for Electric Power Service (PGE Agreement) which is automatically renewed on a yearly basis until one party provides written termination notice to the **[*4]** other party at least thirty days prior to the anniversary date of the start of the first term of the agreement, July 1, 1980.

At present, the electric rates for PP&L's industrial customers, such as Columbia, are less than the electric rates for PGE's industrial customers. Columbia has requested PP&L to provide it with electricity. PP&L owns a transmission line that crosses the plant site of Columbia.

In a letter from Columbia to PGE, [5] **[*5]** dated May 30, 1990, Columbia notified PGE that because PGE had announced that it might seek, through litigation, to prevent PP&L from providing electricity to Columbia, PP&L had not constructed a necessary substation to supply Columbia with alternate electric service. In the letter, Columbia requested PGE to deliver electricity provided by PP&L to Columbia as of 12:00:01 a.m. July 1, 1990, and until the resolution of litigation. In a letter from PGE to Columbia, [6] dated May 30, 1990, PGE stated that Columbia was within the exclusive service territory of PGE and therefore must purchase electricity from PGE.

---

[1] Columbia filed a response in opposition to the PUC's motion to stay on August 7, 1990. The PUC filed a reply to Columbia's opposition to the PUC's motion to stay on August 28, 1990. On August 28, 1990, Columbia filed a motion to strike the PUC's reply for failure to comply with the filing deadline. Local Rule 220-3(b) states that "any reply to the opposition [of a motion] shall be served and filed by the moving party within eleven (11) days after service of the opposition statement." Local Rule 220-(3)c states that "no further briefing shall be allowed without leave of court." Without leave of the court and without explanation, the PUC filed its reply in excess of eleven days after service of the opposition statement as required by Local Rule 220-3(b). Therefore, Columbia's motion to strike the reply of the PUC (#39) is granted.

[2] PGE filed a reply to Columbia's opposition to the PUC's motion to stay. Columbia moves to strike the reply because PGE was not the moving party and did not receive leave of the court. PGE was not the moving party, and PGE did not receive leave of this court. Therefore, pursuant to Local Rule 220-3(b) & (c), Columbia's motion to strike the reply of PGE (#40) is granted.

[3] In the complaint, PP&L uses the label "Facilities Agreement" to refer to the 1972 Agreement between PGE and PP&L. However, PGE objects to this label. Therefore, the court has chosen to refer to the agreement as the "1972 Agreement."

[4] Ordinance No. 134416, passed April 26, 1972, effective May 26, 1972.

[5] Exhibit A to Answer and Counterclaims of Columbia, p. 35.

[6] Exhibit A to Answer and Counterclaims of Columbia, p. 37.

On May 31, 1990, PP&L filed this action, Civil No. 90-524-FR, seeking a declaratory judgment against PGE, Columbia and the PUC. PP&L prays for a judgment declaring the rights and obligations of the parties under the PGE Agreement, the the 1972 Agreement, and the Sherman Antitrust Act.

On June 19, 1990, Columbia filed a related action, Civil No. 90-592-FR, now consolidated with Civil No. 90-524-FR (this action), for a declaratory judgment, injunctive relief and damages against PGE, PP&L, and PUC Commissioners Myron B. Katz, Nancy Ryles (now deceased), and Ronald Eachus. Columbia seeks a judicial declaration of the rights and obligations of the parties as follows:

a. that Columbia may terminate the PGE Agreement and take service from Pacific;

b. that PGE does not have an exclusive right to serve Columbia under the terms of the Facilities Agreement;

c. that the Portland City Charter, state utility law and Portland franchise agreements permit Pacific to serve Columbia;

d. that the PUC's Order 72-870 does not empower or authorize PGE **[*6]** to monopolize electric power service to Columbia Steel, nor does it serve to foreclose Pacific from providing electric service to Columbia Steel;

e. that the Portland City Charter prohibits the formation of exclusive service territories within the City of Portland;

f. that the wrongful conduct by defendants PGE and PUC alleged herein, to prevent service to Columbia Steel from alternative electric power suppliers violates state utility laws and Federal and state antitrust laws; and,

g. that Pacific is obligated by applicable Federal ***antitrust law***, state ***antitrust law*** and state utility statutes to serve Columbia Steel upon request.

Columbia Complaint, para. 39.

On July 2, 1990, PGE filed an application with the PUC for orders concerning territorial allocations within the City of Portland. PGE's application requests cumulatively, and not in the alternative, as follows:

1. pursuant to *O.R.S. 756.450* and O.A.R. 137-02-010 to 060, a declaratory order of the PUC affirming that the order [7] allocated exclusive service territory in the City of Portland;

2. pursuant to *O.R.S. 758.420* and O.A.R. 860-25-010, an order of the PUC approving an agreement between PGE and PP&L allocating to **[*7]** PGE certain service territory in the City of Portland; and

3. pursuant to *O.R.S. 758.435* and O.A.R. 860-250-010, an order of the PUC allocating to PGE certain territory in the City of Portland now served exclusively by PGE.

On July 3, 1990, PGE filed a motion to stay this proceeding until after the resolution of its application before the PUC. On July 30, 1990, the PUC filed both its answer to the combined complaints and a motion to stay these proceedings until the related action before it is complete.

In answer to the combined complaint, the PUC denied, due to insufficient knowledge, nearly all of the allegations. However, it did admit that the 1972 Agreement created allocated service territories within the City of Portland and did admit that PP&L is barred from providing electric service to Columbia. PUC Answer, para. 13.

On August 1, 1990, PGE filed its answers to the complaints. PGE alleges that PUC Order 72-870 approving the 1972 Agreement legally created exclusive **[*8]** service territories and that under the state action doctrine, the agreement and the utilities are immune from federal antitrust laws. Alternatively, PGE alleges that the PUC has interpreted its 1972 order as establishing exclusively served territories and that PGE has acted in good faith in complying with the order as interpreted by the PUC.

[7] PUC Order 72-870 approving the 1972 Agreement.

CONTENTIONS OF THE PARTIES

PGE argues that the issues in its related application before the PUC are dispositive of the claims in this case. PGE argues that "the PUC does have the power to immunize the alleged violations of the antitrust laws under the state action doctrine." PGE Reply in Support of Motion to Stay, p. 15 (emphasis in original). PGE contends that the state action doctrine applies if the PUC has clearly articulated and affirmatively expressed state policy and is actively supervising territorial allocation. PGE contends that the PUC should be permitted to resolve any ambiguities regarding the meaning of its order as a material aid to this court in ultimately deciding the case.

PGE contends that both its application with the PUC and this case seek a declaration of prospective rights and obligations as they relate to the provision **[*9]** of electric service by PP&L to Columbia. PGE characterizes the allocation of territories as a technical and a policy decision. PGE argues that the doctrine of primary jurisdiction justifies preliminary action by the PUC. In summary, PGE argues that this court should stay this case until after the PUC has responded to its request for prospective allocation.

The PUC also asserts that the doctrine of primary jurisdiction requires a stay of this case. The PUC acknowledges that an issue raised by Columbia is whether the PUC has authority to allocate territory in cities which franchise two or more utilities. The PUC asserts that because it "has been interpreting territorial allocation statutes for years," it should "have first call." PUC Motion to Stay, p. 8. The PUC contends that "if nothing else, what the PUC decides on PGE's request for prospective allocation of territory is something for which this court should wait." PUC Motion to Stay, p. 9 (emphasis in original).

Columbia responds that the motions to stay should be denied because the doctrine of primary jurisdiction does not apply. Columbia argues that the interpretation of the meaning of the 1972 order is not a technical, but **[*10]** rather a legal, question. Columbia also contends that the administrative proceeding will not address the antitrust aspects of this case. Columbia asserts that "PGE's asserted defense to the anti-trust laws requires a determination by the Court of the legal effect of a contract between PGE and PP&L and the 1972 Order." Columbia's Memo in Opposition, p. 3.

Columbia argues that a central question in this case is whether the law allows territorial allocations within the City of Portland, not whether the territory in question is appropriate for exclusive service. Columbia further asserts that as a party to the case, the PUC can determine and then assert its view of the meaning and effect of the 1972 order.

Columbia also argues that a determination of these issues by the court would assist and instruct rather than interfere with the administrative agency carrying out its lawful mandate.

ANALYSIS

The decision whether to proceed is within the discretion of the court. The doctrine of primary jurisdiction applies where the resolution of d claim before a court requires the resolution of issues by the court, which under a regulatory scheme have been placed within the special competence of **[*11]** an administrative body. In such a case, the judicial process is suspended pending referral of such issues to the administrative body for its views. *United States v. Western Pac. R.R., 352 U.S. 59, 64 (1956)*. The doctrine of primary jurisdiction calls for the referral of a case to an administrative body for preliminary review when issues not within the conventional experience of judges are raised or when the case requires the exercise of administrative discretion. The doctrine of primary jurisdiction promotes the uniform and expert administration of the regulatory scheme.

The PUC is a party to this proceeding and has asserted in its answer that the 1972 Agreement "created allocated service territories within Portland and that Pacific is barred from providing electric service to Columbia." PUC Answer, para. 13. "Allocated territories" can only be created by approval of the PUC. See *O.R.S. 758.400(1)*. Implicitly, the PUC has charged that it has the authority, and has exercised that authority, to create allocated territories within the City of Portland. The PUC has already addressed the issue before this court and will have an opportunity to address it again in this proceeding. Whether **[*12]** PUC Order 72-870 legally created allocated territories within the City of Portland is an issue ripe for judicial determination. The doctrine of primary jurisdiction does not justify a stay of this case.

The motions to stay, PGE #20 and PUC #30, are denied.

CONCLUSION

1. PGE's motion to stay (#20) is denied.

2. PUC's motion to stay (#30) is denied.

3. Columbia's motion to strike the reply of the PUC (#39) is granted.

4. Columbia's motion to strike the reply of PGE (#40) is granted.

DATED this 27 day of September, 1990.

HN1[] **Basis of Recovery, American Rule**

Absent an agreement, statute or court rule, under the present judicial system, under the "American Rule" attorney's fees are not available.

Business & Corporate Law > Agency Relationships > Fiduciaries > General Overview

HN2[] **Agency Relationships, Fiduciaries**

Under the law of Illinois, a fiduciary relationship arises between parties when one reposes trust and confidence in another, and the latter achieves substantial dominance and influence over the actions of the former. The existence of such a relationship must be shown by proof so clear and convincing, so strong, unequivocal and unmistaken that it leads to only one conclusion. Whether there is a fiduciary relationship is a question of fact, not law.

Business & Corporate Law > Agency Relationships > Fiduciaries > General Overview

HN3[] **Agency Relationships, Fiduciaries**

A slightly dominant business position by one of the parties over the other does not, by itself, operate to convert an ordinary business relationship or contractual arrangement into a confidential or fiduciary relationship. A confidential relationship only goes to a situation where one party, because of some close relationship, relies very heavily on the judgment of the other.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN4[] **Breach of Contract Actions, Elements of Contract Claims**

Under the law of Tennessee, the essential elements of a breach of contract claim are the existence of a contract, breach of that contract, and injuries or damages proximately caused by the breach.

Torts > ... > Contracts > Intentional Interference > Elements

HN5[] **Intentional Interference, Elements**

Under New York law, it is well settled that in order to prevail on a claim for tortious interference with contractual relations, the following elements must be proven: (1) the existence of a valid contract between the plaintiff and a third party; (2) knowledge of the contract on the part of the defendant; (3) the defendant's intentional procurement of a breach of the contract by the third party; and, (4) resultant damages caused by the breach. A cause of action for tortious interference with contractual relations does not lie, however, if the contract is one terminable at will, unless there is a showing of fraud, misrepresentation, unfair conduct or other wrongful acts.

Torts > ... > Contracts > Intentional Interference > Defenses

HN6[] **Intentional Interference, Defenses**

A claim for tortious interference with contractual relations may not be asserted against a party to the contract. Only a stranger to a contract, such as a third party, can be held liable for tortious interference with a contract.

Torts > ... > Contracts > Intentional Interference > Elements

HN7[] **Intentional Interference, Elements**

The absence of damages is fatal to the success of a cause of action for tortious interference of a contract. To recover on the cause of action for wrongful interference, a plaintiff has to prove damages resulting from that interference.

Torts > ... > Contracts > Intentional Interference > Elements

HN8[] **Intentional Interference, Elements**

Under New York law, in order to prevail on a claim of tortious interference with prospective economic advantage, a plaintiff is required to show the defendant's interference with business relations existing between the plaintiff and a third party, either with the sole purpose of harming the plaintiff or by means that are dishonest, unfair or in any other way improper. If the defendant's interference is intended, at least in part, to advance its own competing interests, the claim will fail unless the means employed include criminal or fraudulent conduct. Additionally, the tort usually involves interference with a business relationship not amounting to a contract and involves either a severance or injury to that relationship.

Antitrust & Trade Law > Sherman Act > Claims

HN9[] Sherman Act, Claims

The proof required to sustain a claim under the Sherman Act of a conspiracy includes, inter alia, evidence of a relevant product and geographic market, reduction of that market by reason of the conspiracy, and an anti-competitive effect outweighing any pro-competitive benefits.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

HN10[] Federal & State Interrelationships, Choice of Law

A federal district court adjudicating a diversity action is required to apply the choice of law rules of the forum state within which the court sits. However, the Court need only apply choice of law rules where there is a "true conflict." Otherwise, the controversy is considered a "neutral" case, and the Court is free to apply the law of either one of the states involved.

Business & Corporate Law > Unincorporated Associations

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN11[] Business & Corporate Law, Unincorporated Associations

Both New York and Illinois law are substantially the same with respect to the key issue of the standard of judicial review with regard to the termination or expulsion of members from a private association. The courts are generally reluctant to take a role in dispute resolution between a private, voluntary association and its members, with, however, certain limited exceptions such as bad faith, bias or other wrongful conduct. The charter or articles of incorporation of an Illinois corporation is a contract of a three-fold nature. It is operative as between the corporation and the State and it creates rights and duties as between the corporation and its shareholders, as well as between the shareholders themselves. Judicial review of an association's disciplinary proceedings is favored only where a member's expulsion, technically in strict compliance with the association's by-laws, is influenced by bias, prejudice or lack of good faith.

Business & Corporate Law > Unincorporated Associations

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN12[] Business & Corporate Law, Unincorporated Associations

Under Illinois law, a court will not review the actions of a voluntary association with respect to its members; when a court does intervene, however, the scope of its intervention is exceedingly narrow. Judicial inquiry into the affairs of private, voluntary associations is limited to the question of whether an association has treated its members in accord with its by-laws and rudimentary due process, such as when the association acts in "bad faith" in expelling a member.

Business & Corporate Law > Unincorporated Associations

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN13[] Business & Corporate Law, Unincorporated Associations

A private organization, particularly if tinged with public stature or purpose, may not expel or discipline a member adversely affecting substantial property, contract or other economic rights, except as a result of fair proceedings which may be provided for in organization by-laws, carried forward in an atmosphere of good faith and fair play. New York law is in accord with this principle to the extent that mere procedural compliance with the disciplinary process does not insulate the termination process from judicial scrutiny if it was tainted by bad faith or wrongful, corrupt conduct. Judicial review is unavailable, unless the reason for expulsion is so trivial as to suggest that the action of the association was capricious or corrupt, or unless the association failed to administer its own rules fairly.

Business & Corporate Law > Unincorporated Associations

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN14[] Business & Corporate Law, Unincorporated Associations

Courts are reluctant to interfere with the internal affairs of an association as long as its procedures do not violate standards of fair dealing. Where a private club or association hears and decides an internal dispute, the courts will not review the determination unless there is a showing that the hearing was in bad faith or basically unfair or that the determination was fraudulent or was utterly unsupported by any evidence.

Business & Corporate Law > Unincorporated Associations

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN15[] Business & Corporate Law, Unincorporated Associations

Where the disciplinary process of a voluntary association is tainted by bad faith, a court has not only the power but the duty to exercise its equitable powers to intervene at the behest of an expelled member. Even if there is a facially proper basis for the termination of the member, the process is not insulated from judicial scrutiny if it was stained by bad faith.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Remedies > Injunctions > Grounds for Injunctions

HN16[] Judges, Discretionary Powers

A plaintiff's success on the merits, however, is only the first step in determining whether a court in its discretion should grant the drastic relief of a permanent injunction. The governing standard in determining whether to grant the extraordinary equitable relief of a permanent injunction is as follows: First, the plaintiff must have achieved actual success on the merits. Second, once having demonstrated success, permanent injunctive relief is only available when a remedy at law would be inadequate to afford complete relief. Third, the balance of the equities must tip decidedly in favor of the plaintiff.

Civil Procedure > Remedies > Injunctions

HN17[] **Remedies, Injunctions**

Insofar as fashioning the ultimate remedy, a court has a wide range of discretion in framing an injunction in terms it deems reasonable to prevent wrongful conduct.

Opinion

[*1484] MEMORANDUM DECISION AND ORDER

ARTHUR D. SPATT, UNITED STATES DISTRICT JUDGE

In this case the plaintiff corporation, a member of a national trade organization, alleges that the organization terminated its membership as a result of "bad faith" on the part of the organization and a competitor-member. The plaintiff seeks to be reinstated as a member, among other remedies. There is one crucial issue before the Court: Has the plaintiff established that the trade organization acted in "bad faith" in terminating **[*1485]** the plaintiff's membership so that judicial intervention is appropriate?

BACKGROUND

The plaintiff Automotive Electric Service, Corp. ("the plaintiff") is a warehouse distributor of automotive parts. This type of business purchases automotive parts from manufacturers **[**2]** and other suppliers, stores the parts in a warehouse and sells the parts to jobbers -- mostly retail automotive parts stores and installers. This business is also referred to as an "automotive after market parts business".

The plaintiff is a close corporation owned by the Judelson family for over seventy years, which employs more than fifty persons and has its main office and warehouse in Woodside, Queens, New York. The plaintiff has approximately 400 accounts and its sales volume in 1989 was approximately $ 7,000,000. Its geographic territories are Queens, Brooklyn, Bronx, Manhattan, Westchester, Nassau and Suffolk Counties.

In November 1984, the plaintiff became a member of the defendant Association of Automotive Aftermarket Distributors ("AAAD" or "the Association"), a national trade organization of warehouse distributors. AAAD is an Illinois not-for-profit organization with its primary place of business in Memphis, Tennessee. There are a number of similar trade associations in the warehouse distributor industry. AAAD offers to its members volume discount purchasing and a national account merchandising program involving the supply of Goodyear Tire and Rubber Company ("Goodyear") **[**3]** company-owned retail automotive parts stores ("GASC stores" or "company-owed stores"). Although AAAD has been trying to develop several other national account programs, at the time of the relevant occurrences in this case, it had only one such viable national account, the Goodyear account. Under a contract with Goodyear, members of AAAD are principal providers of the Goodyear company-owned (GASC) stores.

AAAD is governed by a set of by-laws, an Executive Committee and a President. A principal feature of AAAD is their "Parts Plus" program. In the program, the members of AAAD attempt to persuade their jobbers to be Parts Plus jobbers, and operate their stores under the "Parts Plus" logo. AAAD employs the services of Marketing Resources, Inc. ("MRI"), an advertising and marketing agency. The members of AAAD are expected to use their best efforts to implement the Parts Plus program by advertising and active solicitation of Parts Plus jobbers with the object of developing a strong network of Parts Plus members. In August 1986, the membership unanimously adopted certain "Standards of Performance" including a requirement that each member had to vigorously promote and implement the Parts **[**4]** Plus program.

AAAD has thirty-five members of whom twenty-two do less than ten million dollars in sales and nineteen are smaller than the plaintiff. Each member has one vote irrespective of size. The largest member in AAAD is a firm called Parts, Inc., whose business comprises approximately 35% of the total sales of all AAAD members. The Executive Committee is made up of its officers and three members. Despite their membership in this trade organization, the AAAD by-laws do not grant any members exclusive territories or preclude any member from competing with other members in any territory.

Among the provisions in the AAAD by-laws and crucial to the determination to terminate the plaintiff, is the following provision set forth in paragraph 11 of the AAAD by-laws (Plaintiff's Exhibit 5), which permits termination of a member:

> ". . . if, in the opinion of the Executive Committee, a Member demonstrates a lack of sincere intent to be a bona fide, active and participating Member of the Association, or to commit to duly adopted Association programs or objectives. . . ."

AAAD contends that the plaintiff failed to meet the requirements of its Parts Plus program and, during the period 1987 **[**5]** through 1989, despite warnings and meetings, failed to improve its Parts Plus program. On November 16, 1989, the Executive **[*1486]** Committee of AAAD voted to terminate the plaintiff's membership, which, of necessity, would mean that the plaintiff would no longer be permitted to sell to the Goodyear GASC stores under its contract with AAAD. As a result of the involuntary termination of its membership in AAAD, the plaintiff commenced this lawsuit.

In essence, the plaintiff contends in this action that it is the victim of a conspiracy to improperly terminate its membership in AAAD so that a larger and newer member, Motor Age, Inc. ("Motor Age") could take over the plaintiff's valuable Goodyear company-owned stores. This was accomplished, according to the plaintiff, by secret agreements, misrepresentations and a breach of the fiduciary duties and contractual obligations set forth in the by-laws.

The plaintiff further contends that its termination was part of an overall plan by which the larger members would advance their own interests at the expense of the smaller members, so that AAAD will have a cadre of larger, more financially powerful member companies. The plaintiff contends that it was **[**6]** terminated as a result of a conspiracy between the larger members, who control the Executive Committee and Motor Age, to take over the plaintiff's Goodyear accounts.

The plaintiff further contends that it relies upon the Goodyear accounts and will go out of business if it is forced to give up the Goodyear business as a result of its termination as a member of AAAD. It therefore asserts that it will be irreparably damaged unless the Court prevents AAAD from terminating its membership. To that end the plaintiff, among other requests for relief, seeks injunctive relief, reinstatement as a member of AAAD and damages. The complaint contains six causes of action, as follows:

1) Breach of fiduciary relationship;

2) Breach of the membership by-laws;

3) Breach of the agreement between the plaintiff and AAAD specifically as to the Goodyear account;

4) Wrongful interference with the plaintiff's contractual rights;

5) Wrongful interference with the plaintiff's business opportunities; and

6) Violations of the Sherman Act and New York's Donnelly Act.

PROCEDURAL SETTING

Following termination from AAAD, the plaintiff commenced this action in the Supreme Court of the State of New York, Queens **[**7]** County. At the time that the plaintiff filed in state court, a sweeping *ex parte* temporary restraining order ("TRO") was obtained requiring, *inter alia*, AAAD not to interfere with the plaintiff's membership. On December 22, 1989, the defendants removed this case to this Court pursuant to *28 U.S.C. § 1441* on the grounds of diversity (*see* *28 U.S.C. § 1332*). The plaintiff not having requested an extension, the *ex parte* TRO expired on January 1, 1990 (*see* *Fed. R. Civ. P. 65(b)*; *see also* *Granny Goose Foods, Inc. v. Brotherhood of Teamsters & Auto Truck Drivers, 415 U.S. 423, 439-40, 39 L. Ed. 2d 435, 94 S. Ct. 1113, 1124* [1974]).

On January 25, 1990, after oral argument by all sides, this Court granted a second TRO preventing AAAD from terminating the plaintiff's membership. The parties later stipulated to an extension of this last TRO, waived discovery and proceeded to a hearing on the plaintiff's application for a preliminary injunction. After commencement of the hearing, the parties agreed, and the Court ordered that the motion be converted to a full trial on the merits of the entire case pursuant to *Fed. R. Civ. P. 65(a)(2)*. In the interim, the defendants moved to vacate the TRO on the grounds that **[**8]** it had expired by its own terms, or, in any event, by operation of law. On February 23, 1990, the Court denied that application and instead granted a temporary or interim injunction preventing AAAD from terminating the plaintiff's membership for the pendency of the trial. Thus, the plaintiff has at all times until the present continued as a member of AAAD and, as such, continued to service its Goodyear company-owned stores.

[*1487] THE TRIAL AND FINDINGS

Since the determinations in this case are, of necessity, factually oriented, the Court is compelled to detail much of the evidence in connection with its findings of fact.

The Plaintiff's Case:

GARY W. DAVIS ("Davis") was the President and a shareholder and director of Matthews Auto Electric, Inc. ("Matthews"), a warehouse distributor operating in Oklahoma, Arkansas and Kansas, which was admitted as a member of AAAD in January 1987. The representative of AAAD with regard to recruitment of Matthews was one Joe Matlock, the Executive Vice President of AAAD. Matthews conducted an aggressive "Parts Plus" promotion and succeeded in converting all of their customers to Parts Plus jobbers. The Matthews promotional costs to convert its **[**9]** jobbers into Parts Plus jobbers was approximately $ 500,000. Six days after the "kick-off" promotional meeting by Matthews to convert jobbers to the Parts Plus program in 1987, Parts, Inc., the largest member of AAAD, purchased the business of Davis' chief competitor. This purchase placed Parts, Inc. directly in the territory of Matthews.

According to Davis, after he vigorously complained to Marvin Almy, the President of AAAD, and Paul Kachapis, the Chairman of the Executive Committee, about the Parts, Inc. intrusion into his territory, the Matthews Company was terminated by AAAD in June 1989 and eventually filed for bankruptcy under Chapter 11 in August 1989. The Matthews firm is still being operated under Chapter 11 procedures.

On cross-examination Davis conceded that the by-laws did not prohibit Parts, Inc. from operating in Matthews' territory or from acquiring another warehouse distributor in Matthews' market area. Further, Davis conceded that from December 1988 to June 1989 Matthews made no payments to AAAD for its purchases of auto parts and also stopped paying dues and promoting the Parts Plus program. Also, in May 1989, Matthews received a notice of possible termination from **[**10]** AAAD and declined to contest its termination.

RICHARD JUDELSON is the Vice-President, Director and a shareholder of the plaintiff corporation and was the plaintiff's principal factual witness. Plaintiff's first contact with AAAD was in 1984 when Joe Matlock contacted them and explained the advantages of joining the defendant-association. With regard to the purchases of auto parts, AAAD furnishes a "group sales allowance" ("GSA") which is a discount given to AAAD, which retains 20% of the amount of the discount and returns 80% of the discount to its members. In 1988 the plaintiff received in excess of $ 100,000 from the GSA plan. These discounts result from better pricing plateaus, group purchases and "entire truckload" prices.

The cost of joining and maintaining a membership in AAAD by the plaintiff included a $ 17,500 initiation fee and annual dues of $ 2,000 per year and marketing dues based on a percentage of annual net sales approximating a total of $ 12,000 per year.

In September 1984, the plaintiff decided to join AAAD and, by October 1984 they were voted in as a member. The plaintiff entered into a written agreement with AAAD with regard to the Goodyear business and plaintiff **[**11]** geared up to serve the Goodyear company-owned stores in their geographical territory. This process involved revising its computer program, purchasing an initial inventory, and adding a night crew to execute Goodyear orders and deliveries.

The plaintiff started its Parts Plus program in the summer of 1985 on advice from Alan Hunsaker, then a Vice-President of MRI. In 1985 the plaintiff's first Parts Plus program was printed and prepared by Hunsaker. Other plans or amendments were prepared annually with the assistance and advice of Hunsaker. The plaintiff arranged dinner meetings for its jobbers in the fall of 1986 to promote the program and within days fifteen customers agreed to enter the program.

According to Richard Judelson, in the summer of 1987, the plaintiff was advised **[*1488]** that their Parts Plus program didn't receive sufficient customer support and Hunsaker recommended that the program be put "on hold" in order to regroup.

At about the same time, the plaintiff got word of a prospective new member of AAAD, the defendant Motor Age, Inc. ("Motor Age"), a warehouse distributor competitor of the plaintiff which sold in plaintiff's territory. Apparently Motor Age was negotiating to purchase **[**12]** another AAAD member named Forshay-Gabriel, a warehouse distributor in Newark, New Jersey. The plaintiff strongly objected to membership by its competitor and so advised Matlock. Although Richard Judelson was told by President Almy in November 1987 that no Motor Age membership application was pending, two days later the plaintiff received a Motor Age application, dated November 18, 1987 and a ballot including a profile from Motor Age that was dated September 8, 1987. The application contained a statement by Almy and Kachapis, which reads, in part, as follows:

> "The application of this member was discussed with the AAAD Executive Committee prior to submission to the membership. We do have existing members in close proximity to Motor Age. It was the consensus of the Executive Committee, however, that we are not at a saturation point in the Metropolitan New York market and that the overall status of the Association would be enhanced by a larger presence in the largest market in the country.
> * * * *
>
> *Existing national account business would remain with the current members who are serving Goodyear*.
>
> The AAAD Executive Committee and President endorse the application of Motor Age and **[**13]** urge your favorable response on this application" (emphasis supplied).

The ballot itself was placed on the same sheet as a memorandum from Joe Matlock dated November 12, 1987, which stated, in part, as follows:

> "Motor Age, should it be accepted, would at once conform to the standards which our members adopted in Montreal last year. They would overnight create a strong Parts Plus presence in a very major autoparts

> consuming area where we have had no program success to date and so, in the interest of AAAD's increased market share, it is highly recommended that you vote favorably for the admission of Motor Age as a AAAD member."

The plaintiff voted "most strongly" to disapprove the application of Motor Age and contacted all of the members of AAAD and urged them to vote against such admission. On November 26, 1987, Almy called and advised the plaintiff that a meeting would be held on November 30, 1987 with regard to the plaintiff's request to be heard in opposition to the application of Motor Age. Jerry Judelson attended the meeting and, along with several other members, stated their reasons for opposing the Motor Age application. No vote was taken on the first ballot.

By application **[**14]** -- memorandum dated December 21, 1987, a second ballot as to Motor Age's admission was circulated to the membership. As with the first ballot, Almy urged the members to vote "yes" on the second ballot. Contrary to prior practice as to the form of the ballots, the second ballot did not contain the option to vote to abstain, despite a request by the plaintiff to include a space to abstain. On January 18, 1988, the plaintiff was advised by Almy that the members approved the Motor Age application for membership.

In April-May 1988 there was a meeting at the plaintiff's office with representatives of the Standards Committee with regard to the Committee's concern about the lack of a viable Parts Plus program by the plaintiff. The Standards Committee advised the plaintiff that it was dissatisfied with the plaintiff's Parts Plus program and gave the plaintiff a deadline of October 1988 to submit a plan and to have a viable program underway by the end of 1988. Thereafter, the plaintiff purchased a Parts Plus sign for its warehouse, answered the telephone "Auto Parts Plus" and placed Parts Plus decals on its trucks, among other efforts. **[*1489]** In addition, Al Schuttinger was made its Parts Plus program **[**15]** manager.

At this time Richard Judelson noticed certain changes in the relationship between the plaintiff and AAAD. Prior to the admission of Motor Age as a member, the plaintiff received approximately six leads from AAAD as to new customers. Subsequent to the admission of Motor Age the plaintiff received no additional leads. Prior to Motor Age's admission the plaintiff was consulted with regard to potential new national account business; that kind of consultation ceased upon the admission of Motor Age.

In addition, in September 1989 the John Deere Co. liquidated a large inventory of auto parts at substantial discounts to AAAD members. Although the plaintiff placed an early order, AAAD unilaterally cancelled the order due to the plaintiff's prospective termination. Since Motor Age was permitted to purchase these discounted products, it gained a competitive advantage. In 1989 there were two instances in which Motor Age purchased certain "Trust" products and plaintiff was not advised of this opportunity. According to Richard Judelson, Motor Age was given a competitive edge over the plaintiff with regard to the two Trust products. Also, Motor Age was provided the opportunity to participate **[**16]** in the new pilot national account program with the Firestone Company, while the plaintiff was denied that right.

In 1989, the Standards Committee initiated a series of steps that culminated in its request to the Executive Committee that plaintiff's membership in AAAD be terminated. A letter was sent by Almy to the plaintiff on April 27, 1989 stating that the Standards Committee recommended that "the termination of membership of Automotive Electric be considered" on the basis of a "lack of sincere intent to be a bona fide, active and participating member". The plaintiff was advised that this matter would be discussed at the Executive Committee meeting of May 23, 1989 to be held at Memphis, Tennessee and that plaintiff's representatives "may be heard at 1:00 p.m. that day." The plaintiff responded in writing and sent representatives to the Memphis Executive Committee meeting.

After an investigation by a delegation of the Standards Committee, the plaintiff received a letter from AAAD dated October 10, 1989 advising it that the matter of plaintiff's termination would be raised again at an Executive Committee meeting at which time plaintiff would be entitled to appear and have an opportunity **[**17]** to be heard. This letter was sent notwithstanding the fact that the plaintiff had, by then, signed up six new Parts Plus stores.

On November 16, 1989 the Executive Committee met, at which time Jerry Judelson and Al Schuttinger appeared and presented the plaintiff's defense to the accusation that it was not properly supporting the Parts Plus program.

By letter dated November 17, 1989, plaintiff was notified that "it was the vote of the Committee to terminate the membership of Automotive Electric effective immediately". The letter stated that:

> "The grounds for termination were failure to commit to duly adopted Association programs and to demonstrate a sincere intent to be a bona fide, active and participating Member of the Association in that you have failed to establish a genuine and effective Parts Plus program in your marketing area."

As to the prospective results of termination of the plaintiff's membership in AAAD, Richard Judelson testified that the Goodyear business constituted 30% of the plaintiff's annual sales. The plaintiff's sales to Goodyear company-owned stores were as follows:

1987	$ 2,266,805.80
1988	$ 2,193,582.07
1989	$ 2,152,019.95

[18]** He also stated that the combination of Goodyear company-owned stores and Trust sales constituted 33 1/3% of the plaintiff's gross sales. In addition, the plaintiff made additional changes in its financial structure in order to take on the Goodyear business. It placed a two million dollar mortgage on its warehouse. It entered into an arrangement with Milberg Factors to factor its receivables due to the need for additional **[*1490]** capital created by the extended payment terms granted to Goodyear in its contract with AAAD. As to the impact of the loss of the Goodyear and Trust business as a result of its termination from AAAD membership, Richard Judelson testified that the plaintiff would not be able to pay its bills, its mortgage payments or its factor. In sum, Judelson testified that without the Goodyear and Trust business, plaintiff could not continue to operate as a warehouse distributor.

On cross-examination, Richard Judelson admitted that the plaintiff has no Parts Plus jobbers on Long Island and in Westchester County, even though both areas are significant markets. In 1985 when plaintiff initiated its Parts Plus program, it had 250 active jobbers and, as a result of its initial promotional **[**19]** efforts fifteen were converted to Parts Plus jobbers. Of these fifteen jobbers, fourteen have since dropped out of the program or gone out of business and only one is still a Parts Plus jobber. Judelson conceded that the plaintiff voted for promulgation of the Standards at the August 1986 membership meeting, that he knew that the plaintiff would have to comply with the standards and that the failure to comply with the standards could result in termination of the plaintiff's membership. Significantly, Richard Judelson conceded that in December 1986, prior to the admittance of Motor Age as a member, Hunsaker stated that the credibility of the plaintiff's Parts Plus program suffered because the plaintiff did not deliver the required elements of the program. This was clear evidence of a problem involving the plaintiff's Parts Plus program prior to the admission of Motor Age. Further evidence of this same problem was set forth in the MRI Service Report of January 19, 1987 which summarized a strategic planning meeting held in December 1986, and referred to the plaintiff's Parts Plus program as follows:

> "II. *The Parts Plus Program*
>
> The Parts Plus Program has delivered less than the **[**20]** desired results i.e., the jobbers on the program not really supporting Automotive Electric Service or the program.
> The overall credibility of the program was mentioned as a concern. This is usually the case if the program deliverables are not delivered or there is a lack of long-range commitment on the part of the warehouse. While every attempt was made to deliver what was promised, the follow through by the jobber or his attitude was not supportive. The commitment was made by the warehouse, but when the support did not come, the commitment of the warehouse began to erode."

By the end of 1986, the number of the plaintiff's Parts Plus jobbers was reduced from fifteen to six. In an evaluation of the plaintiff's Standards and Objectives, dated March 16, 1987, it was stated that the plaintiff's "Parts Plus programs have made little progress in the market. Question management commitment to the program as well as abilities of the company to deliver on the program". In another evaluation of Standards and Objectives dated November 10-11, 1987, all the Parts Plus categories with regard to the plaintiff were answered in the negative including the telling comment that the plaintiff did not **[**21]** actively promote Parts Plus.

Despite warnings in 1988 by AAAD about the need to invigorate their Parts Plus program, the plaintiff did not sign up any jobbers in the program during the year 1988. In fact, the plaintiff agreed to increase its Parts Plus jobbers by the end of 1988 and did not do so even when threatened with termination of membership in AAAD. By the end of 1988 the plaintiff was down to one or two Parts Plus jobbers, a figure less than 1% of its customers. In September 1988, the plaintiff did develop a written Parts Plus Program involving twenty-seven separate elements, which plan was to be implemented prior to the end of 1988. In 1989 some progress was made when plaintiff added a total of six Parts Plus jobbers. In addition, during 1989 the plaintiff participated in another AAAD promotional program by selling seven "Repair America" kits and distributing 2800 "Repair America" booklets.

[*1491] With regard to the plaintiff's claim of prospective financial ruin if it lost the Goodyear business, it was conceded by Richard Judelson that in 1984, prior to membership in AAAD, it had forty employees and sales of five million, while in 1989 it had fifty-five employees and sales of seven **[**22]** million. He further testified that the plaintiff added a staff to service the Goodyear stores at an annual cost of $ 200,000 or $ 30,000 per employee, but admitted that these employees did not work solely on the Goodyear stores. Further, Richard conceded that payment terms on the Goodyear sales were less favorable than other customers in that the Goodyear bills were not paid for an average 125 days. In fact, this late payment plan necessitated the plaintiff's use of a factor. Also, the contract between the plaintiff and AAAD contemplated a non-exclusive right to service the Goodyear company-owned stores, namely, Goodyear could purchase automotive goods from any other warehouse distributor. Also, Judelson conceded that the plaintiff could attempt to sell to the Goodyear stores even if its membership in AAAD was terminated.

In addition, contrary to the plaintiff's contention, the plaintiff's tenure as a member of AAAD does not appear to have been profitable. According to its financial statements, in 1984 the plaintiff had a net profit of $ 746,000; in 1985 a net profit of $ 15,000; in 1986 a net profit of $ 12,000; in 1987 a net loss of $ 112,000; and in 1988 a net loss of $ 32,000. **[**23]** Notwithstanding these figures taken from the plaintiff's financial statements, Richard Judelson testified that actually the plaintiff earned a gross profit of $ 585,000 on the 2.3 million in sales to Goodyear stores in 1987 and also obtains other benefits in purchase discounts of approximately $ 40,000 per year. Judelson also attempted to explain the substantial difference in the 1984 net profit as opposed to the later years while a member of AAAD, in that the 1984 figures included a net gain to the plaintiff as a result of real estate sold in Connecticut that year, while in 1987 the plaintiff suffered an extraordinary loss of $ 120,000 when it sold its Connecticut subsidiary. In sum, however, according to the financial statements, the plaintiff had a net operating loss in each of years 1986, 1987, 1988 and 1989.

GILBERT REYES was employed by the plaintiff as a sales representative. On a ruse, in April 1989 he answered a AAAD advertisement in an auto trade magazine which was promoting the Parts Plus program. Reyes filled out a card requesting Parts Plus jobber information giving his location as his home in Rosedale, Queens, New York and sent it to AAAD. He received a letter from AAAD **[**24]** with enclosures stating that the AAAD Parts Plus distributor for Rosedale, Queens was Motor Age.

JERRY JUDELSON is the Secretary, a Director and the majority shareholder of the plaintiff corporation. He testified that by the end of June 1989 the number of plaintiff's Parts Plus jobbers had increased to six. At the final November 16, 1989 Executive Committee meeting, he advised the members of the Executive Committee that his Deere order had been improperly cancelled and that his firm was no longer being given Parts Plus leads. He exhibited photographs of a Motor Age Parts Plus store without a sign and a Motor Age truck without a Parts Plus sign.

On cross-examination, Jerry Judelson conceded that on November 10, 1987 the plaintiff's Parts Plus program was "on hold" and that it continued "on hold" from the summer of 1987 to the fall of 1988; that at the May 1988 Standards Committee meeting he acknowledged that the plaintiff did not have a Parts Plus program in place and he agreed to do so before the end of 1988; that he was told that "termination" was a possible consequence; and that by September 1988 the plaintiff could not implement all of the 27 separate elements in his proposed Parts **[**25]** Plus program.

ROBERT BERKOWICZ is a certified public accountant who has been the accountant for the plaintiff corporation for only one year. He prepared a statement dated February 27, 1990 regarding the impact of the loss of sales of the

Goodyear company-owned stores. In this regard, Berkowicz relied on the plaintiff's books and records. He did no audit nor did he **[*1492]** conduct any full-fledged accounting review of the plaintiff's records. Berkowicz testified that, in his opinion, the plaintiff earned a gross profit (from sales less cost of goods) of 29% before operating and fixed expenses. Further, it was his opinion that if the plaintiff lost the Goodyear account, it could not pay its current expenses. Therefore, in that event, he would recommend that plaintiff's officers close down the business and go into bankruptcy.

The Court does not credit the testimony of the plaintiff's accountant. He performed no audit of the plaintiff's financial records; no books and records were produced; no financial statements were prepared for 1989; he has no other clients in the auto parts industry; he omitted key operating expenses such as delivery expenses; he assumed that the Goodyear business would **[**26]** not be replaced; he reviewed no original records; his calculation of the gross profit figures of $ 357,000 in 1988 and $ 300,000 in 1989 were contrary to the credible evidence; his report was based on assumptions and figures given to him by Richard Judelson; he accepted the "word" of Richard Judelson in arriving at the 29% gross profit figure; he admitted the 29% gross profit figure was an "educated guess"; he failed to calculate the substantial interest charges involved in factoring the Goodyear accounts receivable; and his covering letter states that "management's assumptions are not necessarily true".

The Court finds that the conclusions stated by Berkowicz were speculative and unsupported by the credible evidence. Indeed, in view of the net operating losses sustained by the plaintiff in 1987 ($ 25,000) and in 1988 ($ 94,000), his testimony is unworthy of belief.

HORACE MARVIN ALMY, also known as MARVIN ALMY, has been the President of the defendant AAAD since August 1, 1985. The total annual sales of AAAD members is approximately 640 million dollars per year. The plaintiff corporation had sales of seven million in 1988 and the defendant Motor Age, the second largest AAAD member, **[**27]** had sales of forty million. During the past years, Almy conceded that some larger members have purchased smaller members. In fact, three of the seven present members of the Executive Committee acquired other AAAD members. Almy stated that one of the goals of AAAD was to bring in one of the largest warehouses in each target area.

Almy testified that Joe Matlock retired on January 31, 1990 as the Executive Vice-President of AAAD. During his employment with the defendant Association, Matlock's two main duties were the solicitation of new members and the development of the Parts Plus program. In connection with his solicitation duties, he recruited both the plaintiff and Motor Age as Association members. It is significant that Matlock was an authorized representative of AAAD for the purpose of procuring new Association members.

Almy testified that the Goodyear company-owned stores were not available to Motor Age when it became a new member, and that there was no agreement with Motor Age or Paul Lehr, its President, for it to obtain the plaintiff's Goodyear accounts. Almy further testified that no such agreement was made by him, Matlock, or with anyone else at AAAD.

After the first "application" **[**28]** and ballot was mailed to the Association members on November 18, 1987, because of concerns raised by the plaintiff and others, the Executive Committee decided to terminate the ballot and investigate further. A second application and ballot was sent out on December 21, 1987. The ballot stated that each member should vote and return the ballot by January 15, 1988. Almy stated that the second balloting resulted in 29 affirmative votes and that only 26 were needed for an affirmative admission vote. On January 18, 1988 Almy advised the members of the results of the balloting -- that Motor Age had been voted in as a member of AAAD.

Almy interpreted the crucial para. 11 of the by-laws as requiring a commitment on the part of members to successfully participate in the Parts Plus program. He stated that successful participation means "results", **[*1493]** not merely good intentions. Almy did not believe that New York City was a difficult Parts Plus program market; certainly no more difficult than other urban areas where Parts Plus programs had greater success.

The by-laws of the Association provide that the members financial information shall be confidential, as follows:

"ARTICLE VII - MEMBER FINANCIAL **[**29]** INFORMATION

> *Section 1*. It shall be the obligation of each Member, within ninety (90) days after the end of its fiscal year, to submit to the Association copies of its balance sheet and statement of income as of the end of and for such fiscal year, *for confidential review by the President*, and to submit available interim financial information within ten (10) days after requested to do so by the President.
> * * * *
>
> *Section 4*. Members shall not have access to specific financial information submitted by other Members or prospective Members unless Member or prospective Member approves such access . . . that he considers essential in making such determination" (emphasis supplied).

With respect to a "working together -- winning together" contest to obtain new Parts Plus jobbers in which the plaintiff was assigned a goal of one, the plaintiff's performance was fifth or sixth out of thirty-nine members. During this "contest", the plaintiff obtained two new Parts Plus jobbers when its assigned goal was only one and then had a total of six Parts Plus jobbers. Motor Age had a goal of eight jobbers and obtained none.

In April 1989, the first letter of termination was sent to the plaintiff. **[**30]** A meeting of the Executive Committee was held in May, 1989 and the plaintiff was afforded an opportunity to be heard. The Executive Committee tabled the Standards Committee recommendation to terminate the plaintiff's membership and sent out two representatives to make an inspection of the plaintiff's Parts Plus jobbers. The two representatives were Carl Molin, the Chairman of the Standards Committee, who had already recommended termination, and Joe Matlock, who, the Court later learned, was not impartial, and had already allegedly entered into a surreptitious agreement to obtain the plaintiff's Goodyear stores for Motor Age. The plaintiff was not afforded an opportunity to accompany the subcommittee members on their investigating rounds, nor was it given an opportunity to provide the subcommittee with a list of its new Parts Plus jobbers, nor was plaintiff provided with a copy of their report.

At the November 16, 1989 Executive Committee meeting at which a vote was taken to terminate the plaintiff's membership, after the plaintiff's representatives were heard and left the meeting, present at the meeting when the termination vote was taken were Marvin Almy and Joe Matlock. Not only **[**31]** did Matlock attend this final Executive Committee meeting but he alone reported to the Executive Committee the negative results of the investigation of the plaintiff's Parts Plus jobbers, which was directly followed by the vote to expel the plaintiff.

One day after the termination vote was taken, on November 17, 1989, letters were sent to the plaintiff, to all suppliers and manufacturers and to Goodyear, that the plaintiff was no longer participating in AAAD projects. At this point, by reason of the plaintiff's termination, Motor Age would have obtained the plaintiff's Goodyear stores.

On cross-examination, Almy emphasized that there were no exclusive geographic areas among AAAD members and that there were overlaps in territorial areas among many of the members including Central California, Dallas-Fort Worth, Birmingham, Chattanooga, Orlando, Albany, Newark and Pittsburgh.

After the first evaluations of the members' Parts Plus programs on March 16, 1987, Almy noted that the plaintiff had made little progress and its management's commitment to the program was questioned. Among the six problem companies to be further observed was the plaintiff. In the second evaluation by the Standards **[**32]** **[*1494]** Committee on November 10-11, 1987, the plaintiff's Parts Plus program continued to rate poorly. In fact, the plaintiff had not even prepared an annual Parts Plus program.

The Standards Committee determined that satisfactory progress had not been made by the plaintiff and a delegation was requested to visit the plaintiff. If there was no improvement, the Standards Committee discussed a recommendation to the Executive Committee for possible termination. No new positive information was ascertained by the delegation and the matter of plaintiff's termination was referred to the Executive Committee. The Executive Committee met on May 23, 1989. The Executive Committee decided to table the question of the plaintiff's termination and to obtain additional information from Matlock, Almy and the AAAD staff.

Thereafter the "fact finding" trip described above was made by Matlock and Carl Molin of the plaintiff's Parts Plus jobbers resulting in an unfavorable report on June 12, 1989. Following this trip, Joe Matlock submitted a report to the Executive Committee and the Standards Committee dated June 7, 1989 and June 12, 1989 (*see* Defendant AAAD Exhibit O), including the following findings:

> **[**33]** "Neither Carl nor I saw or heard anything during our investigation of AESC's Brooklyn-Queens jobbers to indicate that satisfactory progress is being made here with Parts Plus no matter who's at fault.
> The conclusion to be drawn here is that other NY warehouses have been effective, but AESC has experienced four years of failure to achieve Parts Plus objectives in their market."

All the evidence concerning the plaintiff's commitment to the Parts Plus program was not unfavorable. In his evaluation of May 31, 1988, Almy wrote that he believed the plaintiff was dedicated to the Parts Plus program and able to make it work. On October 4, 1988, Hunsaker reported to the Standards Committee that the plaintiff was recommitted and has developed a program. By the end of the second quarter of 1989, the plaintiff had six new jobbers. At the time of its termination, the plaintiff had a total of seven Parts Plus jobbers, all in New York City, of a potential 1,000 jobbers and had sent out 28,000 flyers in an attempt to obtain additional jobbers.

In addition to the plaintiff, the membership of another member, General Auto Parts Distributors of San Francisco, was terminated in April of 1989. However, **[**34]** this firm was in the process of either going out of business or reorganizing so that the termination was really a "formality". The plaintiff was the only member terminated solely because of a lack of commitment to the Parts Plus program.

PAUL LEHR was one of the two significant witnesses in this case. His testimony on direct examination consists of two different segments. Initially, on direct, Lehr was confident, responsive and believable. Then after he was shown certain "surprise" documents, his composure changed and his testimony became evasive and less credible.

Lehr has been in the automotive aftermarket industry since 1975 and is the President of the defendant Motor Age, Inc., a privately held New Jersey corporation incorporated in October 1980. He prides himself as being a "hands-on" Chief Executive Officer. He and his family jointly own 60% of the Motor Age shares. The defendant Motor Age East, Inc. ("Motor Age East"), was a New York corporation which was a subsidiary of Motor Age, being 80% owned by Motor Age. Motor Age East was merged with Motor Age in June 1989 and is no longer in existence.

Lehr first learned of the defendant Association in 1977 and had contact with it **[**35]** at that time, and, in particular, he discussed some matters with Joe Matlock. In the late 1970s, Lehr was a Vice President of a warehouse distributor known as Parts Group, which filed for Chapter 11 in 1980. Lehr was asked to stay on to oversee the orderly liquidation of the four companies constituting the Parts Group. In October 1980 he formed a new corporation called Motor Age, Inc. and made a successful offer for the assets of the four bankrupt **[*1495]** corporations. He operated Motor Age from its old facility in Hackensack, New Jersey until 1985 when he moved to its present location in Bogota, New Jersey.

Lehr testified that his next contact with AAAD was in the Fall of 1986 when he contacted Matlock and Almy about his possible purchase of Forshay-Gabriel and whether he could then become a member of AAAD. This date of contact between Lehr and Matlock in the Fall of 1986 is significant because it was following this period that plaintiff's Parts Plus problems became a growing concern of AAAD, leading to the plaintiff's ultimate termination.

In January of 1987, Motor Age decided not to purchase Forshay-Gabriel. Eight months later, in July-August 1987, Matlock, Almy and Paul Kachapis, Chairman **[**36]** of the AAAD Executive Committee, visited him. He was given a "sales pitch" to join AAAD. Lehr was told that the New York metropolitan area was the largest market in the United States and that there was room for an additional member, such as Motor Age. He was asked to visit MRI and obtain additional data on AAAD.

In this early testimony by Lehr he stated unequivocally that the AAAD representatives made it very clear that the Goodyear company-owned stores in the Motor Age territory were already allocated to other members and that this arrangement would not be changed. In other words, Lehr clearly testified that in July-August 1987 he was told that if Motor Age became a member, it would not be able to service any of the Goodyear company-owned stores already allocated to the members in his geographical area, including, of course, the plaintiff. In sum, he testified that he was told and knew that if he became a member of AAAD, the Goodyear company-owned stores would remain with the existing members:

> "Q Was there any discussion with respect to the potential of Motor Age becoming a supplier to Goodyear stores in connection with prospective AAAD membership?
>
> A Yes. They made it very clear **[**37]** in the conversation that the Goodyear stores were already assigned to -- in the territory I serviced, and the Goodyear stores were assigned to four, maybe five distributors depending again upon how you define the market place.
> Actually, in terms where I was distributing there were five other members who serviced Goodyear and they made it very clear in no case would any existing supply arrangement between an AAAD member and Goodyear store be modified or changed by virtue if I was to become a member.
> * * * *
> Q Was it always very clear it was unavailable to Motor Age and would not be taken from any of the then members of AAAD servicing Goodyear?
> A It was always clear there would be no changing in the existing supply match up were Motor Age to become a member. It was not available."

Motor Age decided to apply for membership in AAAD in November 1987 and, in January 1988, became a member. In September 1989, Lehr became a member of the Executive Committee. Other officers of Motor Age are also presently taking an active role in various committees of AAAD.

After admission to membership, Motor Age converted seventy-one or seventy-two jobbers to the Parts Plus program. However, by early 1989, **[**38]** its Parts Plus jobbers were reduced in number to fifty-five to sixty. (Plaintiff's Exhibit 31 shows fifty such jobbers for Motor Age as of September 1989.) Of these Parts Plus jobbers, however, only six were in the five boroughs of the City of New York, further evidence that New York City is a difficult market for the Parts Plus program.

According to Lehr, the first discussion with a representative of AAAD concerning the acquisition by Motor Age of Goodyear company-owned stores was in May 1989 in a telephone call from Almy:

> "Q There came a time as you described when you received word from Mr. Almy in approximately May of 1989 regarding the potential of Motor Age servicing Goodyear, is that correct?
>
> **[*1496]** A You asked me when was the first time I had a conversation with anyone regarding Goodyear. I said it was a phone call form Mr. Almy in May 1989, that's correct."

At that time, in May 1989, Almy called him with regard to "contingent planning", namely, *if* the plaintiff's membership was terminated would he be interested in servicing the Goodyear company-owned stores and if so, when could he do so. Not surprisingly, Lehr answered "Yes", and that he could do so within thirty to sixty **[**39]** days. In response, Almy said, "Okay, do nothing now, the matter is still under review".

In the summer of 1989, Lehr decided to solicit the independent non-company owned Goodyear stores, which were "fair game" for any member.

According to Lehr, the next Goodyear discussion was at a dinner with Almy in July 1989 when he asked Almy "whether there was anything new on the plaintiff's situation" and Almy said, "No, the matter was still under review".

Lehr testified, with specificity, that when he returned from a Phoenix AAAD meeting on September 26 or 27, 1989 he made a decision to take active steps to take over the plaintiff's Goodyear stores.

On November 16, 1989, the Executive Committee voted to terminate plaintiff's membership. Lehr was not present at this vote. Lehr testified that at that time, he knew for the first time that Motor Age would get the plaintiff's Goodyear stores. Motor Age was poised and ready to serve the plaintiff's Goodyear accounts as of December 17, 1989.

In answer to several pointed questions raised by the plaintiff's trial counsel, Lehr denied that he had any copies or printouts of the plaintiff's GASCs (Goodyear customers) prior to November 1989. In addition, **[**40]** Lehr unequivocally denied that Joe Matlock sent him copies of the plaintiff's sales data prior to 1989.

"Q Did you have that specific information with respect to the plaintiff's GASCs?

A The plaintiff was listed right on the list along with every one else.

Q Did you have that information?

A Not in my possession but I certainly seen it.

Q You had no copies or printouts of it?

A The first time I got a listing in detail of the plaintiff's GASCs I believe was in November or December of 1989 when I was visited by staff.

I don't recall getting the plaintiff's detailed information previously.

Q Is it -- and isn't it a fact that prior to the time you even applied to AAAD Joe Matlock sent you copies of information and data pertaining to plaintiff's sales to its GASCs?

A *Joe Matlock did not send me information on the plaintiff's GASC sale*.

Q Isn't it a fact prior to the time you applied for AAAD membership Joe Matlock promised that Motor Age can have the plaintiff's GASCs if it joined AAAD?

A Absolutely not.

Q Prior to the date you applied Joe Matlock sent you a list what the GASCs were an [sic] information on the plaintiff's sale to its GASC which included monthly **[**41]** sales, annual sales, inventory, turnover terms and other information?

A I had that information on Forshay-Gabriel not on Automotive Electric" (emphasis supplied).

At this point in the trial, from a forceful, confident and persuasive witness, Lehr's posture changed and direct evidence of "bad faith" entered the case, tangibly, for the first time:

"Q Let me show you a document and I ask if this is your signature here?

A This is not my signature, no.

Q Is this?

A Yes, that is.

Q Is this Motor Age stationery?

A Yes.

MR. FRANK: I have a copy for you, counsel.

(Whereupon, there was a pause in the proceedings.)

Q Is that your signature?

A Yes.

[*1497] Q Is that your note, sir?

A This is mine. This is my signature. This is not my signature.

Q This is your signature at a location on this page?

A Yes.

THE COURT: Referring to the right side of the page?

THE WITNESS: Yes.

Q It is on Motor Age letterhead?

A Inter-office stationery.

Q Your signature is below all the typed language on that document, is it not?

A To the right and below.

MR. FRANK: I would move this item into evidence.

THE COURT: Show it to counsel.

MR. FRANK: They have copies now.

MR. GRIMM: *Your Honor, **[**42]** from my point of view I have not seen this document before*. I think it is appropriate to lay a foundation. All he's done is identified his name on one page" (emphasis supplied).

The document shown to Lehr by plaintiff's trial counsel, is the most crucial piece of evidence in this case, and, it was apparent to the Court that Lehr was surprised to see it in the possession of the plaintiff's counsel. Plaintiff's Exhibit 38 is the significant document. The first sheet in Plaintiff's Exhibit 38 is a document entitled "Inter-Office Memo" dated September 10, 1987. The memo includes a typewritten portion and a handwritten part in the right upper border. The typewritten portion is reproduced in its entirety, as follows:

"INTER-OFFICE MEMO

TO: AO FROM: PPL

CD

SUBJECT: AAAD Info DATE: September 10, 1987

Attached is data on Goodyear business that Joe promised us. It appears that his 'guess' at Auto Electric's volume was too high, although the Forshay numbers were correct. In total, the Goodyear volume is about $ 5 1/2 million per year -- still not too shabby.

Paul (handwritten)

[43]** MOTOR

AGE"

On the upper right-hand side of this memo from "Paul", obviously from Paul Lehr, dated September 10, 1987, appears the following handwritten note:

"SB - Start 'AAAD' file in my credenza near All Pro file. P."

Plaintiff's Exhibit 38 also includes a AAAD FAX lead sheet, dated September 8, 1987, which is precisely reproduced, as follows:

"FROM AAAD 9. 8.1987 16:15

AA

AD

ASSOCIATION OF AUTOMOTIVE AFTERMARKET DISTRIBUTORS

(AAAD)

FAX NUMBER 901-278-2228

LEAD SHEET

DATE: 9-8-87

TO: PAUL LEHR

FROM: JOE MATLOCK

TRANSMITTED BY: AE

NO. OF PAGES (INCLUDING THIS PAGE): 5

COMMENTS:_"

Attached to the FAX lead sheet of September 8, 1987 are four pages of figures, including a detailed breakdown of the plaintiff's "Goodyear sales/inventory analysis" for its fourteen Goodyear locations. These figures include the number and amounts of sales and inventory turnover **[**44]** for each of the plaintiff's fourteen Goodyear stores. Another sheet faxed to Lehr lists the "Stores served by Auto Elec." and gives the store number and the location of each store.

The Court takes note of the words by Lehr in the "inter-office memo" of September 10, 1987. "Attached is data on Goodyear business that Joe promised us" and, referring to the Goodyear stores of both the plaintiff and Forshay-Gabriel, "In total, the Goodyear volume is about $ 5 1/2 million per year -- still not too shabby."

To compound Lehr's credibility problem, after having been shown the document containing his handwriting, he denied ever seeing the document:

"MR. FRANK: I will proceed further.

Q Have you seen this document before?

A No.

Q You've never seen this document?

[*1498] A I don't recall seeing it.

Q Have you seen this second page before?

A No, I have not seen the second page.

* * * *

Q Your signature on that addressed with a little note addressed to S B. Is that Sharon, your secretary?

A Yes.

Q Did you write a note: Start AAAD file in my credenza near All Pro file and start this note on that is --

A What is written above is my handwriting.

Q Is your handwriting put on the sheet before **[**45]** or after the typed or printed matter?

A It would appear it was put after it was typed. But I don't recall writing it on this document. It is not my handwriting, it is not signed by me as to the memorandum, but the note on the upper right-hand corner is my handwriting.

Q Isn't it a fact that by this document you boasted to your employees regarding the GASC business that Motor Age was going to get from Forshay-Gabriel and Automotive Electric?

A I didn't write this memorandum so I didn't do the boasting. I say this is my handwriting over here. I did not write the memorandum."

These documents furnish clear and convincing evidence that AAAD sent the confidential Goodyear business of the plaintiff to Motor Age on September 8, 1987 and that Lehr was under the impression, at that time, that Motor Age was, in some manner, to be given the plaintiff's Goodyear accounts. These documents and Lehr's testimony prior to and subsequent to viewing the documents constitute evidence of "bad faith" on the part of both defendants.

On the stand, Lehr unequivocally denied that there was any agreement between Motor Age and AAAD for Motor Age to become a member and take over the plaintiff's Goodyear **[**46]** accounts. Lehr further denied that he ever boasted to his employees that such an agreement existed.

At the conclusion of his direct examination, the testimony of Paul Lehr was interrupted and the plaintiff produced the second crucial witness, one TEDDY GARFINKLE, who was employed by Motor Age for five years between August 1983 and November 1988. After two years Garfinkle was appointed the sales manager of Motor Age.

In 1987 he had conversations with Lehr about Motor Age taking over the Forshay-Gabriel business, and, in particular, its Goodyear stores, because of the high profit margin of the Goodyear business. Garfinkle testified that he had no conversations with Lehr concerning the plaintiff prior to Motor Age joining AAAD. However, Garfinkle testified that, after Motor Age became a member of AAAD, Paul Lehr told him about a "deal" in which Motor Age would obtain the Goodyear business from Forshay-Gabriel and the plaintiff, as follows:

"Q What did Mr. Lehr say?

A Paul told me he made a deal, it was not on paper, but that eventually we would be getting the Goodyear business that was now owned by Forshay Gabriel and Auto Electric.
Q Would you know the full name?

A Auto Electric **[**47]** Service Corp.
* * * *
Q Did Mr. Lehr say it was made before or after joining?
A Made before joining.
Q Would you please tell me as much as you can about what he said that the deal was?
A In relation to getting the Goodyear business, okay, the only thing I was told we were promised we would get the Goodyear business."
* * * *
Q Were you under some impression, without saying what it was?
A Yes.
Q What was the basis of your having this impression?
A I was told by Paul that we did have a secret deal with AAAD.

[*1499] Q Please continue with your spring conversation?
A Paul told me AAAD's legal department recommended at that time it wouldn't be a good idea for them to give Motor Age a program. They were waiting to build a case, I guess, against Automotive Electric for poor performance or whatever the standards of AAAD are."

When Garfinkle asked Lehr for an opportunity for him to familiarize himself with the deal, Lehr handed him a file called his "Goodyear file". He personally received these documents from Lehr in the Spring of 1988. In the "Goodyear file" was Plaintiff's Exhibit 38 including the 1987 "inter-office memo" and the financial data on the plaintiff's Goodyear stores.

[48]** "Q Did Mr. Lehr at any time give or show you any documents pertaining to Motor Age and Goodyear business?
A Yes.
Q When did he do so?
A I was also anxious and I asked if I can familiarize myself with the Goodyear program knowing we were supposed to get this deal and at that point he gave me a file which he called his Goodyear file.
Q When was that?
A That was the spring of '88.
Q Did Mr. Lehr give you some documents?
A Yes.
Q What did he refer -- what did he refer to those document as?
A As his Goodyear file.
Q Did you receive those documents?
A Yes.
Q From whom -- what person did you receive the document from?
A From Paul.
Q Now, let me show you what has been marked Plaintiff's Exhibit 38 for identification and please take a moment to look at that and all pages of it.
(Whereupon, there was a pause in the proceedings.)
A I have looked.
Q Do you recognize this document?
A Yes.
Q What do you recognize it to be?
A This is a document that was part of the Goodyear file given to me by Paul."

Plaintiff's Exhibit 41, found in the Motor Age "Goodyear file" is dated November 30, 1986 and apparently constitutes a detailed description of the automotive **[**49]** parts inventory statistics of the plaintiff Automotive Electric Service Corp. The document contains the monthly sales of the plaintiff.

Garfinkle further testified that he was responsible for converting the Motor Age All Pro jobbers to Parts Plus jobbers and for signing up new Parts Plus jobbers. From January 18, 1988 to October 1988 only one All Pro jobber converted to a Parts Plus jobber. Based on his fifteen years of experience in the automotive aftermarket industry, Garfinkle was of the opinion that the Parts Plus program was a "very hard sell" in urban areas, and it was not a real benefit to jobbers in New York City. This evidence supports the plaintiff's contention that New York City is a difficult area to obtain Parts Plus jobbers.

Garfinkle met the Judelsons in about December 1989, and voluntarily disclosed the documentary evidence (Plaintiff's Exhibits 38 through 41) to them about one month later. Questioned on cross-examination by trial counsel for Motor Age, Garfinkle stated that he resigned from Motor Age when his commissions on two occasions were reduced. An argument with Lehr ensued and he stated that Lehr humiliated him in front of the other salesmen. Obviously, his **[**50]** resignation under these circumstances engendered anger on his part toward Lehr and Motor Age. When offered certain benefits by Lehr on condition that he return all papers, he candidly admitted that he accepted the benefits but surreptitiously kept certain documents and ultimately showed them to a competitor of Motor Age. Garfinkle further conceded that he had a minor business relationship with the plaintiff, involving approximately $ 15,000 in sales.

On cross-examination by counsel for Motor Age, further details surfaced about the alleged "secret agreement" between Lehr and AAAD. In particular Garfield related the substance of a conversation with Lehr **[*1500]** in March-April 1987. At that time Lehr told him he had a secret deal with AAAD to get the Goodyear business. Lehr stated that he no longer needed to purchase Forshay-Gabriel and could put up his own warehouse for Goodyear stores and run Forshay-Gabriel out of business. Lehr further stated that Garfinkle would operate the warehouse for Goodyear business. The plan was for Garfinkle to work one day a week on his old accounts and the other four days on the Goodyear stores.

Garfinkle resigned his position with Motor Age in October 1988; he **[**51]** was not discharged. The cross-examination of Garfinkle did not result in any contradictions or discrepancies. He stuck to his testimony that Lehr had discussed a "secret deal" with him and gave the general terms of the deal. The Court credits the testimony of Garfinkle.

After the completion of Garfinkle's testimony, Paul Lehr resumed the stand. Under "cross-examination" by his own attorney, he reviewed his education (MBAs in finance and accounting) and past employment. Since Motor Age was incorporated in 1980 its sales increased markedly from four million in 1981, fifteen million in 1984, forty million in 1987 to fifty-two million in 1989. He stated that his initial negotiations with Matlock took place in the Fall of 1986 and solely related to the prospective purchase of Forshay-Gabriel. The prospective Forshay-Gabriel purchase negotiations ended just prior to Christmas 1986, and, according to Lehr, that ended his contact with AAAD. Lehr testified that new discussions began in July 1987, when he discussed membership in AAAD with Matlock, Almy and Kachapis. Lehr then admitted that he discussed the Goodyear business at that time and suggested reallocation of the Goodyear business pro **[**52]** rata based on sales. Lehr testified that Matlock laughed at him and said there was no precedent for reassigning Goodyear company-owned stores to incoming members. Then Lehr requested an equal one-third division between the plaintiff, Forshay-Gabriel and Motor Age. He said Matlock was not persuaded but would being the matter before the Executive Committee. It was at this point, according to Lehr, that Matlock agreed to send him the Goodyear financial figures concerning the stores of the plaintiff and Forshay-Gabriel.

The Court notes that in his original testimony, prior to the appearance of Plaintiff's Exhibit 38 and Garfinkle, Lehr testified unequivocally that the AAAD representative made it clear that the Goodyear stores would remain with the old members and that he could not have any of the Goodyear company-owned stores. In his prior testimony, Lehr stated that the first discussions concerning a possible Motor Age acquisition of the plaintiff's Goodyear stores was in May 1989. After seeing Plaintiff's Exhibit 38 and hearing Garfinkle, Lehr moved up those conversations to July 1987, almost two years earlier. This change in dates is significant. If a 1987 secret agreement did in fact **[**53]** exist between AAAD and Motor Age, and Lehr was being considered to take over plaintiff's Goodyear stores, AAAD had two years to "build a case" against the plaintiff.

The Court further notes that on direct examination nothing was mentioned by Lehr about his receipt of the financial data on plaintiff's Goodyear stores or of the "AAAD file" kept in his credenza. Also, on direct examination, Lehr testified that he didn't recall ever seeing Plaintiff's Exhibit 38 or that it was given to Motor Age prior to its membership in AAAD. This testimony was not true, as Lehr later conceded.

In any event, Lehr ultimately conceded that Matlock did send him the plaintiff's Goodyear data and that the handwritten portion of the "inter-office memo" of September 10, 1987 was his. Lehr also conceded that he gave Garfinkle his "Goodyear file" for several months in 1988. He stated, however, that after Garfinkle returned the file, it did not include Plaintiff's Exhibit 38.

Lehr testified on cross-examination by his counsel, that Matlock called him in September-October 1987 and said that the Executive Committee would not agree to his request for reassignment of the Goodyear **[*1501]** company-owned stores. This was quite **[**54]** a variance from his original testimony that no discussion of the Goodyear stores took place until May 1989, almost two years later.

Getting to the crucial issue, on cross examination, Lehr denied that there was any understanding or agreement between Motor Age and AAAD that Motor Age could get the plaintiff's Goodyear company-owned stores or to cause plaintiff's membership to be terminated and that he never told Garfinkle of such a deal. He further stated that any discussions about Goodyear stores related to the independent stores and not to the company-owned stores. (The Court notes that the figures in Plaintiff's Exhibit 38 concern the plaintiff's Goodyear company-owned stores and not Goodyear independent stores.)

As to Ted Garfinkle's testimony regarding a secret deal to acquire the plaintiff's Goodyear stores, Lehr stated that in January, 1987 he told Garfinkle that he was interested in buying Forshay-Gabriel because of its Goodyear stores. The Goodyear company-owned stores are what attracted Lehr to Forshay-Gabriel.

The Court also notes that while Lehr testified that he asked for only one-third of the 5.5 million dollar Goodyear business, he circulated an inter-office memo on **[**55]** September 10, 1987 referring to the entire volume of "about $ 5 1/2 million per year -- still not too shabby". There was no reference in this memo of only a one-third share. The clear import was that -- in some manner -- Motor Age was to obtain the entire 5 1/2 million dollar Goodyear business then held by both Forshay-Gabriel and the plaintiff. The means by which Motor Age would obtain the plaintiff's Goodyear business is less clear. As to the Forshay-Gabriel Goodyear accounts; they would be purchased. As to the Automotive Electric Goodyear business; no mention was made at that time as to the manner of acquisition. Ultimately, fortuitously, the plaintiff's membership in AAAD was terminated and its Goodyear business given to Motor Age. Thus, Motor Age's expectations with regard to the plaintiff's Goodyear business, as indicated in its inter-office memorandum of September 10, 1987, came true.

At this point, the plaintiff Automotive Electric Service Corporation rested.

The Defendants' Case:

ALAN HUNSAKER was formerly employed by MRI since 1983 and has been employed since January 1990 as Director of Marketing for AAAD. While with MRI one of his responsibilities was to implement the **[**56]** AAAD Parts Plus program. Hunsaker assisted the plaintiff in developing a Parts Plus program. He started with plaintiff in October 1985 with a "kickoff" program in which the plaintiff signed up fifteen jobbers within the first two weeks. From these first fifteen jobbers, the plaintiff let the Parts Plus program slide until they were down to very few jobbers. Then the program was slightly rejuvenated in 1989 when the plaintiff added six jobbers.

The progress of the plaintiff in the Parts Plus program is traced by the various service reports filed by Hunsaker. The service report of January 29, 1986 indicated that greater member commitment was required. Hunsaker testified that in 1986 the plaintiff failed to deliver the elements of the Parts Plus program he had worked out for them. In Hunsaker's January 19, 1987 service report he stated that "the commitment of the warehouse began to erode".

Alan Hunsaker testified in detail to a chronological history of failure on the part of the plaintiff to implement a viable Parts Plus program. He stated that the plaintiff put its Parts Plus program "on hold" in June 1987. Further, he stated that plaintiff delivered no Parts Plus program in 1988. However, **[**57]** in September 1988 a program was finally put together for 1988/1989 which Hunsaker felt would be acceptable, if implemented. The program provided for an initial four Parts Plus jobbers and ten to twelve members by the end of 1989. Instead of increasing their Parts Plus jobbers by December 1988, the members fell from four to three. In sum, Hunsaker was of the opinion that the plaintiff lacked commitment to the Parts Plus program and didn't deliver what it promised.

[*1502] During cross-examination, Hunsaker conceded that in 1988, the plaintiff erected a Parts Plus sign at its warehouse and placed Parts Plus signs on its trucks. Also as of October 1988, the plaintiff's telephone was answered "Auto - Parts Plus". Further, in the MRI memorandum dated October 4, 1988, Hunsaker rendered a more favorable report as to the plaintiff's Parts Plus efforts, as follows:

> "Opinion
>
> I feel that Automotive Electric has recommitted to the delivery to the Part Plus program and has developed a program which it will be possible for them to deliver. Areas where problems occurred previously have been addressed and specific individuals designated as responsible for seeing that those are remedied. The target set **[**58]** by Automotive Electric of the initial four Parts Plus members and targeting a total of ten to twelve by the end of '89 is, in my estimation, a realistic and controllable number.
>
> * * * *
>
> Also worth noting is the fact that as I was waiting to see the Judelson's and noticed that the phone was being answered as Automotive Electric Parts Plus. Automotive has also identified their invoices, statements, credit memos, etc. (see attached) which both Parts Plus and Trust logos."

In actuality, by June 1989, the plaintiff had acquired six new jobbers in addition to the one old one and had accomplished half of its target of ten to twelve jobbers with additional time available to the end of 1989. Further, in the April 7, 1989 MRI "Standards Committee Update", Hunsaker stated that the plaintiff, "Has met the guidelines as set forth by the Standards Committee, to a point". One month later, notwithstanding this favorable report by the person directly supervising the plaintiff's Parts Plus program, the Standards Committee recommended plaintiff's termination.

MARK DARNELL MULLER was the President and Chief Executive Officer of Muller Warehouse, Inc. a AAAD member since 1979, operating in the Dallas-Fort **[**59]** Worth area. His firm has approximately fifty-three Parts Plus jobbers. He is a member of the Standards Committee and the Executive Committee.

In the fall of 1987 the Standards Committee focused on five members who were deficient in meeting the standards of the Parts Plus program, including the plaintiff. On-site meetings were scheduled and Muller visited the plaintiff and two other deficient members. Even though the plaintiff was asked to send a representative to the next meeting of the Standards Committee, the plaintiff failed to do so. While one of the five firms went out of business, two of the firms made progress, while the plaintiff and Forshay-Gabriel failed to do so.

In the Spring of 1989, the Standards Committee decided that if the plaintiff did not show more progress it would recommend termination. It was Muller's opinion that after five years and no viable Parts Plus program, it was proper to terminate the plaintiff. Muller conceded, however, that Forshay-Gabriel had no Parts Plus program and was not terminated. Further, he testified that the only visit by AAAD's attorney was to the plaintiff.

PAUL KACHAPIS, the Chairman of the Executive Committee of AAAD, was the final **[**60]** defense witness. He is employed by Alden Warehouse, a AAAD member located in Somerset, Massachusetts. Alden has about forty-eight Parts Plus jobbers. He voted to terminate the plaintiff in order to "raise the standards" of AAAD.

In February 1987, Matlock told him that Motor Age wanted Goodyear business. Kachapis told Matlock that none was available. Also, he stated that he personally told Lehr on three or four occasions that no Goodyear stores were available.

Of importance to this determination, Kachapis testified that the Goodyear company-owned store data was confidential, not available in the industry and would not be divulged to non-members. The Court wonders why then, was the confidential financial data of the plaintiff's Goodyear stores sent to Lehr in September 1987, prior to his becoming a member? Specifically asked **[*1503]** whether he authorized Matlock to give Lehr the financial information concerning the Goodyear stores, prior to Motor Age's membership, Kachapis answered "No". Although Kachapis later said if he was asked he wouldn't have stopped Matlock from supplying this information, the Court does not credit this response.

Both defendants rested.

In rebuttal, the plaintiff produced **[**61]** ALFRED SCHUTTINGER, an employee of the plaintiff for thirty years, an outside salesman and the plaintiff's Parts Plus manager. Schuttinger told the Executive Committee that when Matlock took part in the investigation of plaintiff's jobbers in 1989, he called on the wrong accounts. Also, at the Executive Committee meeting on November 16, 1989, Schuttinger produced letters from the plaintiff's five new Parts Plus jobbers and no Executive Committee member asked to see the letters.

Schuttinger was of the opinion that it was very difficult to sell the Parts Plus program in the New York City area and despite this handicap, the plaintiff signed up six new Parts Plus jobbers in the first six months of 1989. He conceded, however, that the plaintiff had no Parts Plus jobbers in Nassau, Suffolk or Westchester.

All sides rested.

Additional Findings:

1. At the outset, the Court finds that the plaintiff has failed to establish any overall plan by AAAD and the larger members to squeeze out smaller members.

2. The plaintiff had no viable Parts Plus program in 1987 and 1988. In fact, the plaintiff's Parts Plus program was "on hold" from the summer of 1987 to the fall of 1988.

3. New York City **[**62]** is a difficult area to obtain Parts Plus jobbers.

4. At least by September 8, 1987, the defendant Motor Age by Paul Lehr, its President, and the defendant AAAD by Joe Matlock, its Executive Vice-President and authorized soliciting representative, entered into an oral agreement, intended to be secret, by the terms of which, in substance, Matlock promised Motor Age that if it became a member, it would obtain the Goodyear company-owned stores then serviced by the plaintiff. As a part of this agreement there was also discussion of the means by which Motor Age would get the plaintiff's Goodyear accounts, including the possible termination of the plaintiff for failing to commit to a viable Parts Plus program.

5. The Court finds the said secret agreement to permit Motor Age to take over plaintiff's Goodyear business was made before Motor Age became a member of AAAD and the prospect of obtaining the plaintiff's Goodyear business was a substantial factor in inducing Motor Age to enter AAAD.

6. On or about September 8, 1987, the same day that Joe Matlock sent Lehr the confidential financial data on the plaintiff's Goodyear business, the defendant Motor Age sent its "profile" to AAAD, preparatory **[**63]** to applying for membership.

7. At or about or shortly after the date of the Motor Age memorandum of September 10, 1987 (Plaintiff's Exhibit 38), the defendant Motor Age applied for admission to AAAD.

8. In a meeting with Marvin Almy in November, 1987, Richard Judelson inquired as to the status of Motor Age and Almy said no discussions were going on. The Court finds that, contrary to such assertions by Almy, discussions must have been going on, since a ballot and "application" was sent out by Almy on November 18, 1987 including a profile from Motor Age dated September 8, 1987.

9. The first Motor Age ballot was mailed on November 18, 1987, and it said that the Dun & Bradstreet report for Motor Age was favorable and the report was on file in the office (important because of the bankruptcy history of the predecessor of Motor Age). In fact, the Dun & Bradstreet report was dated December 11, 1987, three weeks later. Further Almy was aware that Motor Age's predecessor had been in bankruptcy in the late 1970s but did not report that fact to the membership **[*1504]** when he recommended the admission of Motor Age.

10. Evidence of misrepresentation is demonstrated in the applications for membership from **[**64]** Motor Age. The November 18, 1987 "application" (Plaintiff's Exhibit 10) includes the following representation:

> "Existing national account business would remain with the current members who are serving Goodyear."

This was a fraudulent misrepresentation since, prior to that time, Lehr and Matlock entered into a secret agreement for Motor Age to take over the plaintiff's Goodyear accounts.

11. The Motor Age application states:

> "Goodyear (or other national account) considerations -- None."

This was a fraudulent misrepresentation since, prior to that time, Lehr had made a secret agreement with Matlock to obtain the plaintiff's Goodyear accounts.

12. The Court finds that there were no "irregularities" in the balloting for Motor Age membership which would require vacating its membership in AAAD.

The Court finds that the election of Motor Age to membership in AAAD was proper, valid and substantially complied with the by-law requirements.

13. The Court finds that the plaintiff had adequate notice and opportunity to be heard at the November 16, 1989 Executive Committee meeting at which time a vote to terminate the plaintiff was passed. Therefore, there was no violation of procedural due **[**65]** process with regard to the plaintiff's termination.

14. Despite Forshay-Gabriel not having any Parts Plus program in place, AAAD never terminated or even threatened to terminate its membership.

DISCUSSION

The plaintiff's complaint sets forth six causes of action against both AAAD and Motor Age, all of which arise out of the termination of the plaintiff's membership. The six causes of action include: (1) breach of fiduciary duty; (2) breach of AAAD by-laws; (3) breach of the Goodyear Agreement; (4) wrongful interference with contractual relations; (5) wrongful interference with prospective business opportunities; and, (6) violation of the "laws of the United States of America and the State of New York". The plaintiff seeks damages, permanent injunctive relief and attorney's fees.

Preliminarily, the Court notes that jurisdiction based on diversity is proper, since each of the parties are citizens of different states and the matter in controversy exceeds the sum or value of $ 50,000 (*see* *28 U.S.C. § 1332*).

At the outset, the Court dismisses the plaintiff's claims for monetary relief as a matter of law. First, by reason of the initial TRO and the subsequent interim or temporary **[**66]** injunction, the plaintiff has remained a member of AAAD during the pendency of the trial and to the present time. The plaintiff has continued to service its Goodyear stores as a AAAD member and, as a result, has not suffered any monetary damages.

Although there may have been discussion at the close of the trial concerning the postponement of proof of damages, the Court now rules that there could not be any monetary damages arising from the "bad faith" involved in the secret agreement between AAAD and Motor Age. Significantly in this regard, the plaintiff has, at all times, retained its membership in AAAD and continued to serve Goodyear without interruption.

When asked by the Court what monetary damages the plaintiff is claiming, the plaintiff's counsel raised only the following issues: 1) the AAAD cancellation of the plaintiff's John Deere contract; 2) inclusion of Motor Age in AAAD;

3) additional discounts made to Motor Age and not the plaintiff; 4) AAAD steering jobber leads to Motor Age rather than the plaintiff; and, 5) attorney fees.

The Court finds that none of these alleged theories of damages are viable. In fact, counsel for the plaintiff conceded that there are no damages **[**67]** in the event that the Court finds that the plaintiff would be entitled **[*1505]** only to an injunction directing reinstatement of its membership, as follows:

> "MR. FRANK: Under your Honor's hypothetical -- I would submit that, under those limits, you had circumstances we would not be entitled to damages, other than an injunction for restoration, and of course the plaintiff would ask at that time for an affirmative prohibition against any type of retaliatory action."

The Court also rejects the plaintiff's claim for attorney's fees. It is well settled that ***HN1***[] absent an agreement, statute or court rule, under our present judicial system, under the "American Rule" such attorney's fees are not available (*see* *Hooper Assocs., Ltd. v. AGS Computers, Inc., 74 N.Y.2d 487, 492, 548 N.E.2d 903, 904, 549 N.Y.S.2d 365, 366* [1989]). The plaintiff has not provided the Court with any such agreement or statute, nor has the Court independently been able to find any authority justifying such an award under these circumstances (*cf.* *Lewis v. S. L. & E., Inc., 629 F.2d 764, 773* [2d Cir. 1980] [district court erred in entering award of attorney's fees absent agreement or statute]).

Accordingly, assuming that the **[**68]** plaintiff is successful on the merits of any cause of action, the only relief properly available at this time is reinstatement as a member of AAAD pursuant to the terms of a permanent injunction. Specifically, as to injunctive relief, the plaintiff seeks: (1) reinstatement as a member of AAAD; and, (2) termination of Motor Age's membership. The Court now turns to the applicable substantive law underlying the causes of action in the complaint to determine whether the plaintiff has established any of the six causes, and if so, whether an injunction should issue.

For the reasons that follow, the Court finds that the plaintiff has succeeded on the merits of the second cause of action, namely, breach of the AAAD by-laws. As to the remaining five causes of action, the Court finds that they are either without merit as a matter of law, or that the plaintiff has failed to sustain its burden of proof.

Accordingly, the five causes of action that are dismissed are initially reviewed, followed by a discussion of the second cause of action and the applicable standard for a permanent injunction.

1. Breach of Fiduciary Duty.

With respect to the first cause of action, the parties agree, and **[**69]** the Court finds, that Illinois, rather than New York law applies (*see* *First Nat'l City Bank v. Banco Para El Comercio Exterior de Cuba, 462 U.S. 611, 621, 77 L. Ed. 2d 46, 103 S. Ct. 2591, 2597* [1983]; *Treco, Inc. v. Land of Lincoln Sav. & Loan, 749 F.2d 374, 377* [7th Cir. 1984]). In any event, as to the elements of a fiduciary relationship, the laws of the two states apparently do not differ (*see* *Sound Video Unlimited, Inc. v. Video Shack Inc., 700 F. Supp. 127, 133* [S.D.N.Y. 1988]).

HN2[] Under the law of Illinois, a fiduciary relationship arises between parties when one reposes trust and confidence in another, and the latter achieves substantial dominance and influence over the actions of the former (*see* *In re Estate of Shedrick, 122 Ill. App. 3d 861, 866, 462 N.E.2d 581, 585, 78 Ill. Dec. 462* [1st Dist. 1984]). The existence of such a relationship "must be shown by proof so clear and convincing, so strong, unequivocal and unmistaken that it leads to only one conclusion" (*Carey Elec. Contracting, Inc. v. First Nat'l Bank, 74 Ill. App. 3d 233, 237-38, 392 N.E.2d 759, 763, 30 Ill. Dec. 104, 108* [2d Dist. 1979]; *see also* *Maguire v. Holcomb, 169 Ill. App. 3d 238, 242, 523 N.E.2d 688, 690, 119 Ill. Dec. 932* [5th Dist.], *appeal denied*, *122 Ill. 2d 577, 530 N.E.2d* ***[**70]*** *248* [1988]). Whether there is a fiduciary relationship is a question of fact, not law (*see* *BA Mortgage & Int'l Realty Corp. v. American Nat'l Bank & Trust Co., 706 F. Supp. 1364, 1372* [N.D. Ill. 1989], *citing* *In re Estate of Wernick, 151 Ill. App. 3d 234, 244, 502 N.E.2d 1146, 1153, 104 Ill. Dec. 486* [1st Dist. 1986], *aff'd in part, rev'd in part*, *127 Ill. 2d 61, 535 N.E.2d 876, 129 Ill. Dec. 111* [1989]).

The Court finds here that the plaintiff failed to establish by clear and convincing **[*1506]** proof that there exists a fiduciary relationship between AAAD and its members. The plaintiff concededly entered AAAD for business purposes. No proof was adduced at trial showing that the plaintiff may have been a "servient" party in the relationship or that AAAD exercised substantial dominion or control over the plaintiff's day-to-day business operations or decision-making. Rather, the proof shows that the plaintiff independently made all necessary business decisions and did not "blindly obey" AAAD's orders.

HN3[] A slightly dominant business position by one of the parties over the other does not, by itself, operate to convert an ordinary business relationship or contractual arrangement into a confidential or fiduciary relationship **[**71]** (*see* *Carey Elec. Contracting, Inc. v. First Nat'l Bank, supra, 74 Ill. App. 3d at p. 238, 392 N.E.2d at pp. 763-64* ["[a] confidential relationship only goes to a situation where one party, because of some close relationship, relies very heavily on the judgment of the other"]).

The Court finds that AAAD did not dominate or influence the actions of the plaintiff. The only actions AAAD had "control" over, if any, are those which the plaintiff obligated itself contractually to do, namely, comply with the membership standards, which included participation and development in the Parts Plus marketing program. Clearly, under such circumstances, there is an interdependence between the parties, rather than one achieving substantial dominance, influence or control over the other. The plaintiff has shown nothing more than the usual contractual business relationship between a trade organization and a member, not a confidential or fiduciary relationship (*see* *Seaboard Seed Co. v. Bemis Co., Inc. 632 F. Supp. 1133, 1136-37* [N.D. Ill. 1986]).

The plaintiff has failed to prove that there was a fiduciary relationship between AAAD and the plaintiff-member. Instead, the proof submitted at trial **[**72]** amply supports a finding that the plaintiff was acting as an independent party in its business relations with AAAD (*see* *Zeilenga v. Stelle Indus., Inc., 52 Ill. App. 3d 753, 757, 367 N.E.2d 1347, 1350, 10 Ill. Dec. 581, 584* [4th Dist. 1977] [no fiduciary relationship existed between not-for-profit manufacturing concern and its members, since plaintiff acted as independent rather than servient party]).

Accordingly, the first cause of action is dismissed.

2. Breach of the Goodyear Contract.

The third cause of action in the plaintiff's complaint alleges that AAAD breached the April 22, 1985 contract, regarding the servicing of Goodyear company-owned stores in the New York-metropolitan area. [1] The parties agree that as to this cause of action, pursuant to the Goodyear Agreement, Tennessee law governs.

HN4[] Under the law of Tennessee, the essential elements of a breach of contract claim are the existence of a contract, breach of that contract, and injuries or damages proximately **[**73]** caused by the breach (*see* *Tedder v. Raskin, 728 S.W.2d 343, 351* [Tenn. App. 1987]). Since there is no dispute as to the existence of a valid contract, the issues are whether there has been a breach, and if so, whether the plaintiff has suffered damages.

Without reaching the issue of whether there has been a breach, the Court finds that there are no damages, since the plaintiff was permitted to continue to service the Goodyear account. Accordingly, the third cause of action is dismissed.

3. Interference with Contractual Rights/Benefits.

The plaintiff's fourth cause of action, to be determined under New York law as the parties have agreed, [2] is based upon a theory of wrongful or tortious interference **[*1507]** with contractual relations. Although not clear from the plaintiff's submissions, the Court agrees with the defendants' interpretation that the claim stems from either the by-laws and/or the Goodyear Agreement.

---

[1] Motor Age is not a party to the April 22, 1985 contract.

[2] The plaintiff alleges that New York law applies to the fourth cause of action. The defendants contend that New York and Illinois law are the same, and therefore it does not matter which state's law is applied by the Court. Accordingly, the Court applies the law of the forum state.

[74]** ***HN5***[] Under New York law, it is well settled that in order to prevail on a claim for tortious interference with contractual relations, the following elements must be proven: (1) the existence of a valid contract between the plaintiff and a third party; (2) knowledge of the contract on the part of the defendant; (3) the defendant's intentional procurement of a breach of the contract by the third party; and, (4) resultant damages caused by the breach (*see* *Universal City Studios, Inc. v. Nintendo Co., Ltd., 797 F.2d 70, 75* [2d Cir.], *cert. denied*, *479 U.S. 987, 93 L. Ed. 2d 581, 107 S. Ct. 578* [1986]; *Pennsylvania Engineering Corp v. Islip Resource Recovery Agency, 710 F. Supp. 456, 464* [E.D.N.Y. 1989]; *Israel v. Wood Dolson Co., 1 N.Y.2d 116, 120, 134 N.E.2d 97, 99, 151 N.Y.S.2d 1, 5* [1956]; *Giannelli v. St. Vincent's Hosp., 160 A.D.2d 227, 232, 553 N.Y.S.2d 677, 681* [1st Dep't 1990]; *see generally* 2 F. Harper, F. James & O. Gray, *The Law of Torts* §§ 6.5-6.10 [2d ed. 1986] [overview of elements and application of the tort]).

A cause of action for tortious interference with contractual relations does not lie, however, if the contract is one terminable at will (*see Kaminski v. United Parcel Serv.,* ***[**75]*** *120 A.D.2d 409, 501 N.Y.S.2d 871* [1st Dep't 1986]), unless there is a showing of fraud, misrepresentation, unfair conduct or other wrongful acts (*see* *Koeppel v. Schroder, 122 A.D.2d 780, 505 N.Y.S.2d 666* [2d Dep't 1986]; *see generally* 72 N.Y. Jur. 2d, *Interference* § 9 [1988 & Supp. 1990] [collecting cases]).

As to the defendant AAAD, it is a party to both the by-laws and the Goodyear Agreement. Accordingly, the claim against AAAD is legally insufficient and fails as a matter of law, since it is well settled that such ***HN6***[] a claim may not be asserted against a party to the contract (*see* *Payne v. Kathryn Beich & Nestle, 697 F. Supp. 612, 615-16* [E.D.N.Y. 1988] [citing cases]). Put simply, AAAD cannot be held liable for inducing the breach of a contract to which it is a party (*see* *Murphy v. Capone, 120 A.D.2d 714, 502 N.Y.S.2d 511* [2d Dep't 1986]; *see also* *Koret, Inc. v. Christian Dior, S.A., 161 A.D.2d 156, 554 N.Y.S.2d 867, 869* [1st Dep't 1990] ["it is well established that only a stranger to a contract, such as a third party, can be held liable for tortious interference with a contract"]).

The claim against Motor Age, however, requires a more detailed analysis **[**76]** with respect to both the Goodyear Agreement and the by-laws.

As to the Goodyear Agreement, as noted above, the Court finds that this was a valid contract between the plaintiff and AAAD, and that it is properly characterized as a contract terminable at will upon notice. Although generally such an at-will contract would bar recovery under this theory (*see Kaminski v. United Parcel Serv., supra*), the Court finds here that as a result of the wrongful acts and bad faith of Motor Age, there was attempt to intentionally interfere or procure the breach of the contract so as to bring even an at-will contract within the ambit of this tort (*compare* *Guard-Life Corp. v. S. Parker Hardware Mfg. Corp., 50 N.Y.2d 183, 406 N.E.2d 445, 428 N.Y.S.2d 628* [1980] [absent proof of wrongful conduct, no liability exists for the alleged interference with exclusive distributorship contract terminable at will]). In sum, the Court finds that Motor Age was aware of the existence of this contract and that Motor Age intentionally attempted to procure its breach.

Notwithstanding the proof of the first three essential elements, the plaintiff's claim must be dismissed for failure to prove the fourth, namely, **[**77]** that the plaintiff has sustained damages as a result of the interference. ***HN7***[] The absence of damages, of course, is fatal to the success of this cause of action (*see Litton Indus., Inc. v. Lehman Bros.* *Kuhn Loeb Inc., 709 F. Supp. 438, 453* [S.D.N.Y. 1989]). As stated by the New York Court of Appeals in *Simon v. Noma Elec. Corp., 293 N.Y. 171, 177, 56 N.E.2d 537, 539 (1944)*, "to recover on the cause of action for wrongful interference . . . plaintiff had to prove damages resulting **[*1508]** from that interference". To the extent that the plaintiff relies on the attorney's fees it incurred as part of the damages, the Court finds no applicable exception to the general rule that attorney's fees are not recoverable as damages (*see, e.g.,* *Goldberg v. Mallinckrodt, 792 F.2d 305, 309* [2d Cir. 1986] [exception applies where party's wrongdoing exposes another to litigation with a third party, in which first party is not involved]).

Accordingly, the fourth cause of action is dismissed as against both defendants.

4. Interference With Business Opportunities.

The fifth cause of action alleges prospective interference with the plaintiff's business opportunities. The parties agree that New **[**78]** York law governs.

The Second Circuit summarized this tort ***HN8***[] under New York law, as follows:

> "In order to prevail on a claim of tortious interference with prospective economic advantage, a plaintiff is required to show 'the defendant's interference with business relations existing between the plaintiff and a third party, *either* with the sole purpose of harming the plaintiff *or* by means that are "dishonest, unfair or in any other way improper."' . . . If the defendant's interference is intended, at least in part, to advance its own competing interests, the claim will fail unless the means employed include criminal or fraudulent conduct."

PPX Enters., Inc. v. Audiofidelity Enters., Inc., 818 F.2d 266, 269 (2d Cir. 1987) (citations omitted); *see also Lerman v. Medical Assocs. of Woodhull, P.C., 160 A.D.2d 838, 554 N.Y.S.2d 272, 273* (2d Dep't 1990).

Additionally, the tort "usually involves interference with a 'business relationship not amounting to a contract'" (*PPX Enters., Inc. v. Audiofidelity Enters., Inc., supra, 818 F.2d at p. 270*, *quoting* 32 N.Y. Jur., *Interference* § 40 [1963]), and involves either a severance or injury to that relationship (*see* ***[**79]*** *id*.).

Presumably, the relationship which is the subject of the claim as against AAAD, is between the plaintiff and Goodyear. This relationship arises solely out of the contract between the plaintiff and AAAD over the servicing of the Goodyear account. The plaintiff has not adduced proof showing that Motor Age's "sole motive was to inflict injury". However, the plaintiff has established that Motor Age employed unfair, and improper means to interfere with plaintiff's advantageous business relationship with Goodyear (*see e.g. Nifty Foods Corp. v. Great Atl. & Pac. Tea Co., 614 F.2d 832, 838* [2d Cir. 1980]). Nevertheless, similar to the discussion concerning the fourth cause of action sounding in wrongful interference with contract, the plaintiff failed to establish any damages.

Based upon the foregoing, the fifth cause of action is dismissed.

5. Violation of "The Laws of The United States and The State of New York".

The plaintiff's all-encompassing sixth cause of action includes allegations of unlawful and unfair trade practices in violation of both federal and state law. Although not specified in the plaintiff's papers or during the course of trial until the last day, it **[**80]** appears that the claim is based on the alleged violations of *section 1* of the Sherman Act, *15 U.S.C. § 1*, and New York's counterpart ***antitrust law***, the Donnelly Act, *N.Y. Gen. Bus. Law § 340*.

Not only has the plaintiff failed to allege the requisite elements of this cause of action under either the Sherman Act or the Donnelly Act, but the evidence adduced by the plaintiff does not establish any price fixing whatsoever.

As to the Sherman Act, nothing was offered to prove the existence of a conspiracy among competitors to fix prices with respect to certain goods (*see International Distribution Centers, Inc. v. Walsh Trucking Co., 812 F.2d 786, 793* [2d Cir. 1987]). ***HN9***[] The proof required to sustain such a claim includes, *inter alia*, evidence of a relevant product and geographic market, reduction of that market by reason of the conspiracy, and an anti-competitive effect outweighing any pro-competitive benefits (*see International Distribution Centers,* ***[*1509]*** *Inc. v. Walsh Trucking Co., supra, 812 F.2d at pp. 793-95*; *see also United States Football League v. National Football League, 842 F.2d 1335, 1360* [2d Cir. 1988]). No such proof was offered here.

To the extent that the plaintiff **[**81]** attempts to state a claim under the Donnelly Act, it is also deficient, since *section 340* of the Donnelly Act is patterned after *section 1* of the Sherman Act and its application is governed under the same standards as those developed under the Sherman Act (*see, e.g., Empire Volkswagen, Inc. v. World-Wide Volkswagen Corp., 814 F.2d 90, 98 n. 4* [2d Cir. 1987], *citing Hsing Chow v. Union Central Life Ins. Co., 457 F. Supp. 1303, 1308* [E.D.N.Y. 1978]). Accordingly, the plaintiff's failure to establish a Sherman Act violation is equally fatal to its Donnelly Act claim. Therefore, the sixth cause of action is dismissed in its entirety.

6. Breach of AAAD By-laws.

Having dismissed five of the six causes of action, the Court now turns to the remaining cause of action; namely, the second cause alleging breach of the membership by-laws by AAAD. As to this cause of action, the parties dispute what state law governs. The plaintiff contends that Illinois law applies; AAAD argues that New York law should control. Thus, a threshold consideration for the Court is to determine this conflicts of law issue.

HN10[] A federal district court adjudicating a diversity action is required to apply **[**82]** the choice of law rules of the forum state within which the court sits (*see* *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 85 L. Ed. 1477, 61 S. Ct. 1020, 1021* [1941]). However, the Court need only apply choice of law rules where there is a "true conflict" (*see* *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 838, 86 L. Ed. 2d 628, 658, 105 S. Ct. 2965, 2988* [1985]; *Norlin Corp. v. Rooney, Pace, Inc., 744 F.2d 255, 263-64* [2d Cir. 1984]). Otherwise, the controversy is considered a "neutral" case, and the Court is free to apply the law of either one of the states involved.

It appears that ***HN11***[] both New York and Illinois law are substantially the same with respect to the key issue of the standard of judicial review with regard to the termination or expulsion of members from a private association (*compare* *Purpura v. Richmond County Country Club, 114 A.D.2d 460, 461, 494 N.Y.S.2d 371, 372* [2d Dep't 1985] [New York law], *with* *Dannhausen v. Business Publications Audit of Circulation, Inc., 797 F.2d 548, 551* [7th Cir. 1986] [Illinois law]). In both states, the courts are generally reluctant to take a role in dispute resolution between a private, voluntary association and its members, with, however, certain limited exceptions such as bad faith, **[**83]** bias or other wrongful conduct. Applying the law of either state, the Court finds that the plaintiff has sustained its difficult burden proving "bad faith" on the part of AAAD and Motor Age so as to establish its cause of action for breach of the by-laws and that judicial intervention is warranted.

The by-laws of AAAD are an agreement between the association and its members. On this subject, in *Bowman v. Armour & Co., 17 Ill.2d 43, , 160 N.E.2d 753, 755 (1959)* the Supreme Court of Illinois held as follows:

> "The charter or articles of incorporation of an Illinois corporation is a contract of a three-fold nature. It is operative as between the corporation and the State and it creates rights and duties as between the corporation and its shareholders, as well as between the shareholders themselves" (citations omitted).

The threshold consideration for the Court's determination is whether the Court may properly intervene at all in this dispute. Traditionally, the courts relied upon contract, property or tort theories to justify judicial intervention in disputes arising between a private association and its members (*see generally Developments in the Law -- Judicial Control* ***[**84]*** *of Actions of Private Associations*, 76 Harv. L. Rev. 983, 998-1005 [1963] [summarizing various theories]). This approach has changed in favor of judicial review of an association's disciplinary proceedings only where a member's **[*1510]** expulsion, technically in strict compliance with the association's by-laws, is influenced by bias, prejudice or lack of good faith (*see Illinois Supreme Court Review -- Judicial Reinstatement of Members Expelled From Voluntary Associations*, 67 Nw. U.L. Rev. 659, 746-54 [1972]; *see generally* Annotation, *Propriety of Suspension or Expulsion From Trade Association*, 72 A.L.R.3d 422 [1976 & Supp. 1990] [collecting cases]).

HN12[] Under Illinois law, "[a] court will not review the actions of a voluntary association with respect to its members; when a court does intervene, however, the scope of its intervention is exceedingly narrow" (*National Ass'n of Sporting Goods Wholesalers, Inc. v. F.T.L. Mktg. Corp., 779 F.2d 1281, 1285* [7th Cir. 1985]). Accordingly, "judicial inquiry into the affairs of private, voluntary associations is limited to the question of whether an association has treated its members in accord with its by-laws and *rudimentary due process*" **[**85]** (*Dannhausen v. Business Publications, supra, 797 F.2d at p. 551* [emphasis supplied]; *see also* *Virgin v. American College of Surgeons, 42 Ill. App. 2d 352, 368-71, 192 N.E.2d 414, 422-24* [1st Dist. 1963]), such as when the association acts in "bad faith" in expelling a member (*see Illinois Supreme Court Review-Judicial Reinstatement, supra*, 67 Nw. U.L. Rev. at p. 754).

In the leading case of *Van Daele v. Vinci, 51 Ill. 2d 389, 282 N.E.2d 728*, *cert. denied sub nom. Certified Grocers of Ill., Inc. v. Sparkle Feed Center, Inc., 409 U.S. 1007, 34 L. Ed. 2d 300, 93 S. Ct. 438 (1972)*, the Supreme Court of Illinois granted injunctive relief in the form of reinstatement to a member of a voluntary retail grocers' association, where the association's disciplinary procedure deprived the member of basic, "rudimentary" due process because of the existence of bias and bad faith accompanying the termination process. In *Van Daele*, the applicable rule was clearly set forth, as follows:

"We agree 'that ***HN13***[] a private organization, particularly if tinged with public stature or purpose, may not expel or discipline a member adversely affecting substantial property, contract or other economic rights, except as a result of **[**86]** fair proceedings which may be provided for in organization by-laws, carried forward in an atmosphere of good faith and fair play' (*McCune v. Wilson (Fla. 1970), 237 So. 2d 169, 173*.)" (*Id. at p. 394, 282 N.E.2d at p. 732*).

The Court reasoned in *Van Daele* that blind adherence to the association's by-laws with respect to the disciplinary procedure does not insulate the actions from judicial review if the action itself was undertaken in bad faith. This decision directly followed the established principle that courts should not intervene in the affairs of private associations, absent a showing of bad faith or bias.

New York law is in accord with the *Van Daele* holding to the extent that mere procedural compliance with the disciplinary process does not insulate the termination process from judicial scrutiny if it was tainted by bad faith or wrongful, corrupt conduct (*see, e.g., Purpura v. Richmond County Country Club, supra, 114 A.D.2d at p. 461, 494 N.Y.S.2d at p. 372* [1985] ["judicial review . . . is unavailable, unless the reason for expulsion is . . . so trivial as to suggest that the action of the association was capricious or corrupt, or unless the association failed **[**87]** to administer its own rules fairly"]).

The rule in New York was also stated in *Matter of Northrup v. Kirwan, 88 Misc. 2d 255, 263, 387 N.Y.S.2d 221, 227 (Sup. Ct. Monroe County 1976)*, *aff'd*, *57 A.D.2d 699, 395 N.Y.S.2d 389* (4th Dep't 1977), as follows:

"we are met at the threshold with the prevailing rule that ***HN14***[] courts are reluctant to interfere with the internal affairs of an association as long as its procedures do not violate standards of fair dealing" (citations omitted).

Moreover, as set forth in *Bernstein v. The Players, 120 Misc. 2d 998, 1001, 466 N.Y.S.2d 897, 899 (Sup. Ct. N.Y. County 1983)*, in reviewing the decision of a voluntary association under the standard set forth above, the Court may not consider **[*1511]** whether it would have arrived at the same conclusion. Rather such decision is subject to review, only as follows:

"Where a private club or association hears and decides an internal dispute, the courts will not review the determination unless there is a showing that the hearing was in bad faith or basically unfair or that the determination was fraudulent or was utterly unsupported by any evidence. *Madden v. Atkins, 4 N.Y.2d 283, 297, 174 N.Y.S.2d 633, 151 N.E.2d 73* ***[**88]*** *(1958)* (concurring opinion of Judge Desmond); *People ex rel. Johnson v. N.Y. Produce Exchange, 149 N.Y. 401, 44 N.E. 84 (1896)*; *see also Fittipaldi v. Legassie, 7 A.D.2d 521, 525, 184 N.Y.S.2d 226 (4th Dept. 1959)*."

As set forth in great detail above, the evidence presented at trial shows that as to the procedural requirements of the disciplinary process itself, AAAD properly terminated the plaintiff's membership. With the assistance of MRI, the plaintiff developed an initial Parts Plus program in October of 1985. As of 1986, it is apparent that the plaintiff's Parts Plus program declined. Significantly, in March of 1987, the plaintiff's efforts and overall performance was considered deficient under the AAAD membership standards, of which the plaintiff was well aware. By the close of 1987, AAAD effectively had no Parts Plus program in place. In May of 1988, representatives of the Standards Committee met with the plaintiff, as well as other members who were performing poorly, to discuss the implementation of an effective program for the upcoming year. The proof shows that little progress followed.

By early 1989, the plaintiff had three Parts Plus jobbers, one less **[**89]** than it had in May of 1988. Concededly, however, the New York metropolitan area is a very competitive and difficult marketplace to implement such a program. However, in 1989, a real effort was made by the plaintiff to improve its Parts Plus program. It placed the Parts Plus logo on its building, its trucks and in its phone answering. Significantly, it increased its Parts Plus jobbers by six in mid-1989.

The Standards Committee thereafter made a recommendation to the Executive Committee to consider termination of the plaintiff's membership. A hearing was conducted, at which time the plaintiff claimed it complied with the Parts

Plus program, and in fact invited AAAD to do an independent evaluation. AAAD accepted the invitation and conducted an investigation of the plaintiff's jobbers, which, according to the report prepared by Joe Matlock, revealed that they were unaware of the plaintiff's participation in the Parts Plus program. The Executive Committee thereafter held a second hearing on November 16, 1989, at which time, allegedly because of the plaintiff's failure to commit to AAAD programs, the Association decided that it was in the best interests of the Association that the plaintiff's **[**90]** membership be terminated.

In reviewing the plaintiff's Parts Plus performance in 1989, acting with reasonable prudence, the AAAD Executive Committee could have decided that the plaintiff did demonstrate "a sincere interest to be a bona fide, active and participating member of the Association" and have voted to retain the plaintiff as a member. On the other hand, taking into consideration the plaintiff's poor performance during the years 1987 and 1988, notwithstanding the improvement in 1989, the same reasonably prudent Executive Committee could have decided that the plaintiff still lacked the commitment referred to in the by-laws, and voted to expel the plaintiff. In the absence of bad faith, this Court would not have interfered with either decision.

In sum, the Court finds that AAAD substantially complied with the disciplinary or termination process set forth in the Association's by-laws. Absent bad faith or bias, this Court would not intervene in the dispute or review the determination of AAAD to expel the plaintiff. Any technical violation raised by the plaintiff would not, standing alone, warrant judicial intervention. It is the proper policy of the Court to refrain from unnecessarily **[**91]** interfering in the internal affairs of a private, not-for-profit **[*1512]** trade association, which is governed by by-laws.

However, ***HN15***[] where, as here, the disciplinary process is tainted by bad faith, the Court has not only the power but the duty to exercise its equitable powers to intervene at the behest of an expelled member. Even if there is a facially proper basis for the termination of the member, the process is not insulated from judicial scrutiny if it was stained by bad faith.

As set forth above in stark detail, bad faith emerged when a "secret" agreement was reached in 1987 between Motor Age and AAAD to take over the plaintiff's Goodyear accounts. Out of this clandestine and corrupt [3] "meeting of the minds" came the bad faith, which permeated the termination process.

The secret agreement was initially entered into by Paul Lehr on the part of Motor Age and Joe Matlock **[**92]** on the part of AAAD. Joe Matlock was the Executive Vice President of AAAD in charge of soliciting new members and was in a position to bind AAAD. Matlock was subsequently involved in almost every phase of the process that led to the admission of Motor Age and the plaintiff's termination. The initial letter application by Motor Age was sent by Lehr to Matlock (*see* Defendant's Exhibit C). A November 12, 1987 memorandum by Matlock to the members, which was on the same sheet as the ballot, stated the following:

> ". . . it is highly recommended that you vote favorably for the admission of Motor Age as an AAAD member" (Plaintiff's Exhibit 10).

Matlock was a member of the two-person committee that "investigated" plaintiff's Parts Plus program in 1989. Matlock wrote the final June 7, 1989 report which significantly contributed to the vote to expel the plaintiff. The last paragraph of Matlock's report reads as follows:

> "The conclusion to be drawn here is that other NY warehouses have been effective, but AESC has experienced four years of failure to achieve Parts Plus objectives in their market."

The Court notes that Joe Matlock did not testify at this trial. Although Matlock was a key **[**93]** executive of AAAD until he resigned in January 1990, after this litigation commenced, no inference will be taken by the Court by reason of the failure on the part of the plaintiff to prove that Matlock, a retired AAAD employee, was still under the control of AAAD. Nevertheless, it is noted that Matlock never was produced to deny the existence of the secret agreement with Motor Age.

---

[3] According to Black's Law Dictionary p. 182 (abridged 5th ed. 1983), the definition of "corrupt" includes: spoiled; tainted; vitiated and morally degenerate.

After the plaintiff's representatives were heard at the Executive Committee meeting on November 16, 1989 and then left the meeting, present when the termination vote was taken were Joe Matlock and Marvin Almy. Matlock not only attended this final Executive Committee meeting at which the vote to expel the plaintiff was taken, but he alone reported the negative results of the recent investigation of the plaintiff's Parts Plus jobbers.

Further, there is evidence in the record that the Legal Department of AAAD was informed of and acquiesced in the secret agreement. Garfinkle testified that:

> "Paul told me AAAD's legal department recommended at that time it wouldn't be a good idea for them to give Motor Age a program. They were waiting to build a case, I guess, against Automotive Electric for poor performance **[**94]** or whatever the standards of AAAD are."

In addition, attorney Johnson, counsel for AAAD personally visited only one of the six firms that were having Parts Plus problems -- the plaintiff.

There is other evidence in the record of preferential treatment accorded to Motor Age at the expense of the plaintiff. Upon admission, Motor Age alone was given a special payment of $ 500 per jobber converted to the Parts Plus program, for a total of $ 42,000 paid by AAAD to Motor Age. Motor Age was permitted to purchase "Trust" labeled products from automotive parts manufacturers Premier and Arc directly **[*1513]** without compelling Premier and Arc to pay GSA discount fees to AAAD. Thus, Motor Age was able to purchase the Premier and Arc products cheaper and could undersell the plaintiff in their competitive territories. This was a special privilege extended to Motor Age, at the plaintiff's expense. Further, notwithstanding its prior order to purchase John Deere cut-price auto parts, plaintiff's order was unilaterally cancelled by AAAD, while Motor Age was permitted to purchase these auto parts at discount, which, again, enabled Motor Age to undersell the plaintiff. In addition, after Motor Age gained membership **[**95]** in AAAD, the leads in the territorial areas shared by Motor Age and the plaintiff, were directed solely to Motor Age.

The bad faith emanating from the secret agreement must have influenced Matlock's actions as he guided the Executive Committee to the ultimate expulsion of the plaintiff.

The documentary evidence consisting of the fax lead sheet from Matlock to Lehr dated September 8, 1987, the Lehr memorandum dated September 10, 1987 commenting on the plaintiff's Goodyear business, and the annexed detailed financial data on the plaintiff's Goodyear stores (Plaintiff's Exhibit 38), coupled with the evasive and contradictory testimony of Paul Lehr and the forthright and believable testimony of Ted Garfinkle, furnishes clear and convincing evidence that there was a secret agreement between AAAD and Motor Age, to bring in Motor Age as a member in order for it to take over the plaintiff's Goodyear business. Given the thrust of the representations by Motor Age in its application promising not to attempt to obtain any such business and the representations by AAAD that it would not tolerate such a takeover, this secret agreement and its sequelae constituted "bad faith" on the part of both **[**96]** defendants.

In sum, at least as to the November 17, 1989 termination, the process was forever tainted; the bad faith so permeated the circumstances leading up to the termination as to deprive the plaintiff of even rudimentary due process. Accordingly, seldom required judicial intervention is appropriate in this case.

HN16[] The plaintiff's success on the merits, however, is only the first step in determining whether the Court in its discretion should grant the drastic relief of a permanent injunction. The governing standard in determining whether to grant the extraordinary equitable relief of a permanent injunction is as follows: First, the plaintiff must have achieved actual success on the merits (*see* *Smithkline Beckman Corp. v. Proctor & Gamble Co., 591 F. Supp. 1229, 1235* [N.D.N.Y. 1984], *aff'd without opn*., *755 F.2d 914* [2d Cir. 1985], *citing* *Sierra Club v. Alexander 484 F. Supp. 455, 471* [N.D.N.Y. 1980]). Second, once having demonstrated success, permanent injunctive relief is only available when a remedy at law would be inadequate to afford complete relief (*see, e.g.,* *New York State NOW v. Terry, 886 F.2d 1339, 1362* [2d Cir. 1989] [must show irreparable harm], **[**97]** *cert. denied*, *495 U.S. 947, 110 S. Ct. 2206, 109 L. Ed. 2d 532* [1990]). Third, the balance of the equities must tip decidedly in favor of the plaintiff (*see* *New York State NOW v. Terry, 704 F. Supp. 1247, 1262* [S. D.N.Y.] [citing cases], *aff'd, but modified on other grounds*, *886 F.2d 1339* [2d Cir. 1989], *cert. denied*, *495 U.S. 947, 110 S. Ct. 2206, 109 L. Ed. 2d 532* [1990]).

Having satisfied the first prong, namely, success on the merits, the next step is to determine whether there exists an adequate remedy at law or whether the plaintiff might suffer irreparable harm absent the issuance of an injunction. To resolve this element, the Court turns to the seminal decision by Judge Friendly in *Semmes Motors, Inc. v. Ford Motor Co., 429 F.2d 1197, 1205 (2d Cir. 1970)* discussing irreparable harm in connection with the attempt by Ford Motor Company to terminate the family run dealership of Semmes Motor, Inc. Although in the context of a preliminary injunction, this Court finds the crisp language of certain passages especially pertinent here, where the factual setting is somewhat similar:

> "Ford's contention that Semmes failed to show irreparable injury from termination **[*1514]** is wholly unpersuasive. Of course, Semmes' past profits would afford **[**98]** a basis for calculating damages for wrongful termination, and no one doubts Ford's ability to respond. But the right to continue a business in which William Semmes had engaged for twenty years and into which his son had recently entered is not measurable entirely in monetary terms; the Semmes want to sell automobiles, not to live on the income from a damages award."

See also *John B. Hull, Inc. v. Waterbury Petroleum Prods., Inc., 588 F.2d 24, 29 (2d Cir. 1978)*, *cert. denied*, *440 U.S. 960, 99 S. Ct. 1502, 59 L. Ed. 2d 773 (1979)*.

The Court finds that absent membership in AAAD and the opportunity to service the Goodyear stores, which account for almost one-third of the plaintiff's gross sales, it may have to terminate its business. This is not a case of mere lost profits, but rather the basic existence of a seventy year old business may be threatened. The evidence reveals that in order to prepare to service the substantial Goodyear account, the plaintiff added a night shift, placed a two million dollar mortgage on their warehouse and became involved with a factor with a running balance owed of approximately $ 700,000. Like the plaintiffs in *Semmes*, the Judelsons have a virtually unmeasurable interest in **[**99]** continuing to operate their business and a damage award would, in this Court's view, be inadequate to afford complete relief. In this regard, the Court notes that the remedy of reinstatement by way of an injunction was also found appropriate in *Van Daele*.

As to the balance of hardships, the scale tips decidedly in favor of the plaintiff. There is no question that the "hardship" imposed upon AAAD in keeping the plaintiff as a member is minimal compared to the ruinous financial hardship that would ensue to the plaintiff absent such relief. Accordingly, the Court grants the plaintiff's application for a permanent injunction, based upon it having established the second cause of action.

HN17[] Insofar as fashioning the ultimate remedy, the Court "has a wide range of discretion in framing an injunction in terms it deems reasonable to prevent wrongful conduct" (*Spring Mills, Inc. v. Ultracashmere House, Ltd., 724 F.2d 352, 355* [2d Cir. 1983], *citing* *Seibert v. Sperry Rand Corp., 586 F.2d 949, 951* [2d Cir. 1978]).

In exercising this discretion, the Court frames the terms of the injunction as follows: the defendant AAAD is directed to reinstate the plaintiff as a full member in AAAD, **[**100]** entitled to the same rights and privileges as all other members in good standing. Specifically, AAAD is directed not to interfere with the plaintiff's membership in the association and/or the plaintiff's rights with regard to the Goodyear account, so long as the plaintiff is in full compliance with the provisions of the by-laws and applicable standards set forth by the Standards Committee. In this regard, the performance of the plaintiff for purposes of possible future termination, as with any other member in good standing of AAAD, is to be judged from this day forward.

The complaint is otherwise dismissed as to all of the defendants.

CONCLUSION

For the foregoing reasons, the first, third, fourth, fifth and sixth causes of action are dismissed, as are the plaintiff's claims for damages and attorney's fees. The plaintiff's request to terminate the membership of Motor Age in AAAD is denied. Having succeeded on the merits of the second cause of action, and shown irreparable harm and a balance of the equities in its favor, the plaintiff is granted a permanent injunction as follows: AAAD is directed to reinstate the plaintiff as a full member in good standing as it was prior to the **[**101]** termination on November 17, 1989, entitled to the same rights, privileges and benefits of all other members in good standing who must comply with the by-laws and applicable standards set forth by the Standards Committee. The plaintiff's performance is to be judged from this date forward for purposes of future disciplinary or termination proceedings, if any, and the past activities, actions or performance of **[*1515]** the plaintiff upon which this decision is based, are not to be considered by AAAD.

The Clerk of the Court is directed to enter judgment in favor of the plaintiff on the second cause of action.

SO ORDERED.

[*42] ORDER LIMITING DISCOVERY

The Amended Complaint (# 9), filed March 27, 1990, on behalf of Plaintiff Rebel Oil Company, Inc., and Auto Flite Oil Company, Inc. (hereinafter "REBEL") alleges three claims for relief against Defendant Atlantic Richfield Company (hereinafter "ARCO").

REBEL brings this action under Section 4 of the Clayton Act seeking treble damages of at least $ 10,000,000 under three causes of action: Count I -- illegal price discrimination under the Robinson-Patman Act, *15 U.S.C. § 13(a)*; Count II -- illegal price-fixing conspiracy under *Section 1* of the Sherman Act, *15 U.S.C. § 1*; and Count III -- illegal attempted monopolization under *Section 2* of the Sherman Act, *15 U.S.C. § 2*.

REBEL essentially claims that beginning in 1982, ARCO began executing a plan to monopolize the Las Vegas retail discount gasoline market and thereby destroy effective competition **[**2]** from discount marketers like REBEL. REBEL alleges that ARCO schemed to lower its wholesale price of gasoline in Las Vegas below its cost and below its comparable prices in Los Angeles, despite the higher costs of transporting gasoline 250 miles by pipeline from Los Angeles to Las Vegas. REBEL further alleges that ARCO conspired with and coerced its independent dealers to fix the ARCO pump prices at correspondingly below-cost, predatory levels. As a result, alleges REBEL, ARCO's share at the Las Vegas discount gasoline market went from zero to at least an estimated 65% to 80% in less than five years. REBEL alleges that every significant independent discount gasoline marketer in Las Vegas, except REBEL, was put out of business by ARCO's predation.

Extensive discovery requests have been propounded by both parties, and to date, REBEL has produced voluminous documents for inspection by ARCO.

Before the Court for consideration are Defendant ARCO's Motion for a Protective Order Limiting the Scope of Plaintiffs' Discovery (# 24), filed May 29, 1990, and Plaintiffs' Cross-Motion to Compel Discovery from Defendant and for the Entry of a New Scheduling Order (# 26), filed June 13, 1990.

By its **[**3]** Motion for Protective Order, ARCO asks the Court to limit the scope of Plaintiffs' discovery at the outset of this case to the threshold issue which ARCO contends may dispose of the entire action: whether significant entry barriers exist in the Las Vegas gasoline market. ARCO maintains that if REBEL is unable to meet the initial burden of showing that entry barriers exist, all other discovery sought by REBEL would be irrelevant and REBEL's challenge directed to ARCO's low price marketing strategy would fail.

REBEL responds that ARCO's Motion for Protective Order amounts to an effort to block virtually all of the discovery which has been served on it in this action and amounts to an effort to "repeal discovery rules and rewrite ***antitrust law*** for this case."

Clearly the Federal Rules of Civil Procedure empower a district court to control the timing and order of discovery. Rule 26(c) provides in pertinent part that a district court "may make any order which justice requires to protect a party or person **[*43]** from annoyance, embarrassment, oppression, or undue burden or expense, including [an order] . . . . (4) that certain matters not be inquired into, or that the scope of discovery be limited **[**4]** to certain matters." Rule 26(d) allows the Court to issue an Order to control the sequence and timing of discovery "upon motion, for the convenience of the parties and witnesses and in the interests of justice." Rule 26 is a grant of power to impose conditions on discovery in order to prevent abuse of the court's processes, among other things. *Bridge C.A.T. Scan Associates v. Technicare Corp., 710 F.2d 940 (2nd Cir. 1983)*. Where appropriate, a district court may limit a party's discovery as long as the party is able to develop fully its case. *Mid-South Grizzlies v. Nat'l Football League, 550 F. Supp. 558 (E.D. Pa. 1982)*, *aff'd* *720 F.2d 772 (3d Cir. 1983)*, *cert. denied, 467 U.S. 1215, 81 L. Ed. 2d 364, 104 S. Ct. 2657 (1984)*.

Whether the Court should exercise its authority to limit the timing and order of discovery as proposed by ARCO turns upon an application of principles of ***antitrust law*** to the allegations contained in REBEL's Amended Complaint.

The Requirement of "Antitrust Injury"

Section 4 of the Clayton Act, *15 U.S.C. sec. 15*, furnishes the jurisdictional basis for all three private-party antitrust claims advanced in REBEL's Amended Complaint. That statute provides, *inter alia,* that "Any **[**5]** person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States . . . ." *15 U.S.C. § 15(a)*. It also provides for treble damages and attorneys fees, creating incentives for private attorneys general. *Id.*

The Supreme Court has repeatedly held that a private party bringing an antitrust suit under Section 4 of the Clayton Act must prove [1] "antitrust injury." *See, e.g., ARCO v. USA Petroleum Co., 495 U.S. 328, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. A plaintiff can show antitrust injury by demonstrating that it suffered an injury that (1) is "of the type the antitrust laws were intended to prevent" and (2) "flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*.

Recent Supreme Court cases make it clear that the antitrust injury requirement cannot be satisfied without a showing of predatory **[**6]** pricing. *ARCO v. USA Petroleum Co., 495 U.S. 328, 109 L. Ed. 2d 333, 110 S. Ct. 1884*

---

[1] *See infra,* pp. 44-45.

(1990). The clarity with which this standard can be stated is misleading, however, because the concept of predation defies simple definition. The most commonly accepted indicia of predatory pricing is pricing below cost. What constitutes pricing "below cost" can in itself be a slippery concept. Most courts have adopted a modified Areeda-Turner test at least for the purposes of evaluating Sherman Act cases. *See, e.g., Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585, n. 8, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*; *Transamerica Computer Co. v. IBM, 698 F.2d 1377, 1386 (9th Cir. 1983)*; *ITT Continental Baking Co.,* 3Trade Reg. Rep. para. 22,188 (FTC 1984). Under the Areeda-Turner test, a monopolist, or one with market power, who prices below marginal cost is presumed to engage in predatory pricing. [2]

[7]** Proof of Market Power

Explicit in the Areeda-Turner predation test is a requirement that the plaintiff show the defendant to be a monopolist **[*44]** or one with "market power." Market power exists when (1) a firm has a substantial market share and (2) there are entry barriers in a relevant market. *California v. American Stores, 872 F.2d 837 (9th Cir. 1989)*, *rev'd on other grounds, 495 U.S. 271, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*; *Oahu Gas Service, Inc. v. Pacific Resources, Inc., 838 F.2d 360, 363 (9th Cir. 1988)*, *cert. denied, 488 U.S. 870, 102 L. Ed. 2d 149, 109 S. Ct. 180*. Entry barriers are important to the extent that they indicate a company's ability to control prices or exclude competition in the relevant market. *Oahu Gas, 838 F.2d at 366*. The justification behind the entry barriers requirement is that if it is relatively easy for new firms to enter the market, a monopolist will not be able to raise its prices above a competitive level without thereby inviting new competition.

The Supreme Court has recently clarified that even when elements of the substantive antitrust laws are satisfied, a private plaintiff must still satisfy the Clayton Act section 4 requirement of antitrust injury. **[**8]** *ARCO v. USA Petroleum Co., 495 U.S. 328, 334, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*. For instance, in *USA Petroleum,* although plaintiffs had demonstrated a per se violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*, they had failed to prove the existence of predatory behavior. In the absence of such proof, summary judgment against them was proper. *Id.*

The Supreme Court explicitly adopted a requirement that all private antitrust plaintiffs demonstrate the existence of predatory behavior in the *USA Petroleum* decision. *Id.* The implicit message in the Supreme Court's decision is that all private antitrust plaintiffs must now demonstrate that defendants have market power. This demonstration entails showing that defendants have a substantial share of the relevant market and that there are entry barriers to that market. After market power is demonstrated, private antitrust plaintiffs must demonstrate the other aspect of predation: pricing below cost.

Standards for Adequacy of Demonstration

What constitutes an "adequate showing" regarding entry barriers in a relevant market is a difficult issue. The Ninth Circuit has established that both market definition and market power are **[**9]** essentially questions of fact appropriate for jury consideration. *Oahu Gas Service, Inc. v. Pacific Resources, Inc., 838 F.2d 360, 363 (9th Cir. 1988)*; *Twin City Sportservice v. Charles O. Finley & Co., 676 F.2d 1291, 1299 (9th Cir. 1982)*, *cert. denied, 459 U.S. 1009, 74 L. Ed. 2d 400, 103 S. Ct. 364 (1982)*; *Greyhound Computer Corp. v. International Business Machines Corp., 559 F.2d 488, 496-97 (9th Cir. 1977)*, *cert. denied, 434 U.S. 1040, 54 L. Ed. 2d 790, 98 S. Ct. 782 (1978)*. Traditionally, questions of market definition and market power have been raised only in the context of substantive antitrust statutes such as *Section 2* of the Sherman Act.

---

[2] Most courts have rejected the hard-to-calculate marginal cost standard and have replaced it with a calculation of reasonably anticipated average variable cost. *See, e.g., Transamerica Computer Co. v. IBM, 698 F.2d at 1386*. The Federal Trade Commission has held that there is a presumption of legality if defendant's prices are above average variable costs. This presumption becomes conclusive if the prices exceed average total costs. *ITT Continental Baking Co.,* 3Trade Reg. Rep. para. 22,188 (FTC 1984). The FTC and others urge capital, executive, and administrative costs, sales expenses, and some elements of promotional expense to be included in the average variable cost computation. Areeda and Turner include only capital costs in their computation.

The Supreme Court has supplied the "antitrust injury" requirement of Section 4 of the Clayton Act. ARCO v. USA Petroleum, 495 U.S. 328, 110 S.Ct 1884, 109 L. Ed. 2d 333 (1990); Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986); Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977). In its interpretation of Section 4 in the context of *USA Petroleum,* the Supreme Court does not clarify whether the "antitrust injury" requirement must be proven as a jurisdictional matter [3] **[**11]** to be decided by the trial court or whether **[*45]** it must be proven during the trial before a jury **[**10]** awards damages. [4]

Obviously, some of the language which supports the interpretation that "antitrust injury" is a requirement to be satisfied before damages are awarded also supports the interpretation that it is a jurisdictional concern: it is axiomatic that if a suit is not allowed to go forward for lack of jurisdiction **[**12]** then the plaintiff will not collect any damages.

A Bifurcated Approach to Discovery

Proving that a defendant has engaged in pricing below cost entails extensive discovery regarding virtually all aspects of a company's business. On the other hand, discovery into relevant markets and entry barriers is a more discrete undertaking. Since under the recent Supreme Court's holding private antitrust plaintiffs such as REBEL must prove the existence of entry barriers and relevant markets, it makes sense for this Court to initially restrict discovery to those topics.

This bifurcated method of conducting discovery includes adequate safeguards to protect the rights of both REBEL and ARCO while greatly streamlining and potentially reducing to cost of the litigation. Burdensome discovery will be eliminated for those cases in which plaintiffs would have no chance of ultimately prevailing.

Conclusion

In focusing on the legitimate needs of the parties to this action for discovery, and in balancing the relative hardships faced by ARCO if the unlimited discovery sought by REBEL is granted as compared to the hardship faced by REBEL if discovery is limited, the Court concludes ARCO's Motion for **[**13]** Protective Order should be granted. ARCO would endure great hardship and expense if it had to comply at this time with the sweeping discovery requests made by REBEL. ARCO would have to present virtually every document in its possession or control regarding its operations in Los Angeles and Las Vegas, including among other things those concerning such broad

---

[3] At one point, the Court refers to *Cargill, Inc. v. Monfort of Colorado, Inc.,* stating that "we found that a plaintiff competitor had not shown antitrust injury and thus could not challenge a merger that was assumed to be illegal under § 7 of the Clayton Act . . . ." USA Petroleum, 495 U.S. at 340. Later in that decision, the Court declares, "We have previously recognized that even in cases involving *per se* violations, the right of action under § 4 of the Clayton Act is available only to those private plaintiffs who have suffered antitrust injury." Id. at 344 (emphasis in the original). A third time when the Court implies that the antitrust injury must be shown as a jurisdictional concern is where the Court states that it declines to dilute the antitrust injury requirement against vertical, maximum price-fixing schemes, "if such a scheme causes the anticompetitive consequences detailed in *Albrecht,* consumers and the manufacturers' own dealers may bring suit." *Id., referring to* Albrecht v. Herald Co., 390 U.S. 145, 159, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968), *reh'g denied, 390 U.S. 1018, 88 S. Ct. 1258, 20 L. Ed. 2d 169*. Finally, the Court declares that since "respondent's injury . . . . is not 'inextricably intertwined' with the antitrust injury that a dealer would suffer," it "does not militate in favor of permitting respondent to sue on behalf of petitioner's dealers." Id. at 345, *quoting* Blue Shield of Virginia v. McCready, 457 U.S. 465, 484, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982).

[4] "A private plaintiff may not recover damages under § 4 of the Clayton Act merely by showing 'injury causally linked to an illegal presence in the market.'" ARCO v. USA Petroleum, 495 U.S. at 334 (1990), *quoting* Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977). Likewise, the Court declares, "The *per se* rule is a method of determining whether § 1 of the Sherman Act has been violated, but it does not indicate whether a private plaintiff has suffered antitrust injury and thus whether he may recover damages under § 4 of the Clayton Act." Id. at 341. Furthermore, "the antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from an competition-reducing aspect of effect of the defendant's behavior." Id. at 328 (emphasis deleted).

categories of activity as production, transportation and refinement of petroleum products. Additionally, officers and employees of ARCO would be subjected to depositions in these same subject areas. Yet, for the reasons stated above, most of the discovery sought by REBEL from ARCO would prove to be unnecessary unless REBEL can make an adequate showing of market definition and the existence of entry barriers into the Las Vegas retail gasoline market.

IT IS THEREFORE ORDERED that ARCO's Motion for Protective Order Limiting the Scope of Plaintiffs' Discovery (# 24) is granted to the extent that REBEL's discovery of ARCO shall, until further Order of the Court, be limited to the issues of ARCO's share of the relevant retail gasoline market in Las Vegas and to the issue of whether entry barriers exist with respect to that market.

IT IS **[**14]** FURTHER ORDERED that REBEL's Cross-Motion to Compel (# 26) is denied.

Securities Law > Postoffering & Secondary Distributions > Tender Offers > General Overview

HN8[] Mergers & Acquisitions Law, Takeovers & Tender Offers

Neither the Williams Act, 15 U.S.C.S. §§ 78m(d)-(e), 78n(d)-(f), nor the Securities and Exchange Commission regulations make a distinction between joint bids made by parties prior to entering a battle for control of the target and those made by parties who are rival bidders at the outset.

Mergers & Acquisitions Law > Takeovers & Tender Offers > General Overview

Securities Law > Postoffering & Secondary Distributions > Tender Offers > Disclosures

Securities Law > Postoffering & Secondary Distributions > Tender Offers > General Overview

HN9[] Mergers & Acquisitions Law, Takeovers & Tender Offers

The Williams Act, 15 U.S.C.S. §§ 78m(d)-(e), 78n(d)-(f), has language allowing joint bids for target companies and the Securities and Exchange Commission (SEC) promulgates a regulation, regulation 14D-1, 17 C.F.R. §§ 240.14d-1 through 240.14d-101 (1990), that requires disclosure of agreements between bidders. In order for § 14(d) and the accompanying SEC regulation to function as intended, such agreements cannot be subject to suit under the antitrust laws; to permit such a suit would foster a direct conflict between the securities and antitrust laws.

Mergers & Acquisitions Law > Takeovers & Tender Offers > General Overview

Securities Law > Postoffering & Secondary Distributions > Tender Offers > General Overview

HN10[] Mergers & Acquisitions Law, Takeovers & Tender Offers

Among the sections added to the 1934 Act by the Williams Act was § 14(e), 15 U.S.C.S. § 78n(e), which makes it unlawful for any person to engage in any fraudulent, deceptive, or manipulative acts or practices, in connection with any tender offer. Bidders are prohibited under this section from engaging in fraudulent acts involving misrepresentation or nondisclosure, and though the word "manipulation" appears in § 14(e) it has not been viewed as relating to making or withdrawing bids.

Mergers & Acquisitions Law > Takeovers & Tender Offers > General Overview

Securities Law > Postoffering & Secondary Distributions > Tender Offers > Disclosures

Securities Law > Postoffering & Secondary Distributions > Tender Offers > General Overview

HN11[] **Mergers & Acquisitions Law, Takeovers & Tender Offers**

Because the Securities and Exchange Commission has the power to regulate bidders' agreements under § 14(e), *15 U.S.C.S. § 78n(e)*, and has implicitly authorized them by requiring their disclosure under Schedule 14D-1, *17 C.F.R. §§ 240.14d-1 - 240.14d-101 (1990)*, as part of a takeover battle, to permit an antitrust suit to lie against joint takeover bidders would conflict with the proper functioning of the securities laws.

Mergers & Acquisitions Law > Takeovers & Tender Offers > General Overview

Securities Law > Postoffering & Secondary Distributions > Tender Offers > General Overview

HN12[] **Mergers & Acquisitions Law, Takeovers & Tender Offers**

Allowing antitrust suits to rule out agreements between rival bidders would give target shareholders undue advantage in the takeover context and discourage such activity.

Opinion by: CARDAMONE

Opinion

[*825] CARDAMONE, Circuit Judge,

Before us is an appeal brought by Michael Finnegan, the representative of disgruntled **[**2]** shareholders of a target company, Federated Department Stores, Inc. (Federated), who alleges that he suffered economic injury actionable under the antitrust laws when R.H. Macy & Co., Inc. (Macy's) and Campeau Corp. (Campeau) -- two rival bidders for a controlling interest in the target company -- entered into a mutually advantageous agreement, effectively reducing the amount of money needed to gain control of Federated.

It is recognized that competition is the touchstone of the antitrust laws, while in the regulated securities industry the emphasis is on requiring full disclosure without otherwise changing the balance in the market for corporate control. Tension and **[*826]** at times conflict exist between these established public policies. That conflict is present in this case. Since we cannot assume that Congress was so muddled that it gave with the right hand of securities regulation that which it then took away with the left hand of ***antitrust law***, this lawsuit may not proceed. Although appellant makes an innovative argument for the application of the antitrust laws -- more suitable for and in fact the topic of a law review article, *see* Rock, *Antitrust and the Market* **[**3]** *for Corporate Control*, *77 Calif. L. Rev. 1365, 1388-90 (1989)* -- those laws have no application to the instant litigation and appellant's redress, if any, must be found under the corporate or securities laws.

BACKGROUND

The allegations of the complaint, which we must accept as true for purposes of reviewing this dismissal under Rule 12(b)(6), are fully set forth in the district court's opinion. *See* Finnegan v. Campeau Corp., 722 F. Supp. 1114 (S.D.N.Y. 1989). We recite only those necessary to our discussion of the issues on appeal. In March 1988 Federated was "put into play," that is, offered for sale to the highest bidder and a battle for its control between Macy's and Campeau began. At first the rival bidders pushed up the price of Federated stock with each submitting a bid one step higher than the other. In April 1988 it dawned on the contestants that constantly raising the price of the target company was economically disadvantageous for them. Consequently, they allegedly reached an understanding under which Macy's agreed to withdraw its latest bid and allow Campeau to acquire Federated. In exchange, Campeau agreed to permit Macy's to purchase **[**4]** two Federated divisions -- I. Magnin and Bullock's Wilshire -- and to pay Macy's $ 60 million to cover its legal and investment banking expenses. The difference between the $ 73.50 a share ultimately paid by Campeau to acquire Federated and Macy's withdrawn bid of $ 75.51 amounted to about $ 172 million. Whether Campeau's purchase was worth the price it had to pay is questionable in light of Campeau's present insolvent condition and Federated's Chapter 11 petition filed in the United States Bankruptcy Court in Cincinnati, Ohio. *See* N.Y.L.J., May 17, 1990, at 7, col. 3.

In his complaint Finnegan charges that the agreement between Macy's and Campeau constitutes a conspiracy in violation of § 1 of the Sherman Act (Act), 15 U.S.C. § 1 (1988). Specifically, he asserts that Macy's and Campeau conspired to "refrain[] from bidding against each other for the purchase of the shares of common stock of Federated in order to supress [sic], . . . and eliminate competition in the market for Federated common stock and to cause the sale of said shares at a price lower than a competitive price." Macy's moved to dismiss Finnegan's complaint under Fed. R. Civ. P. 12(b)(6) **[**5]** and the United States District Court for the Southern District of New York (Haight, J.) granted the motion. *See also Case v. R.H. Macy & Co.*, N.Y.L.J., May 17, 1990, at 25, col. 3 (N.Y. Sup. Ct.) (dismissing claim by Federated shareholders under the state antitrust laws).

In deciding that the present transaction did not involve "trade or commerce" within the ambit of § 1 of the Act the district court relied on Bucher v. Shumway, 452 F. Supp. 1288 (S.D.N.Y. 1978), *aff'd mem.*, *622 F.2d 572* (2d Cir.), *cert. denied*, *449 U.S. 841, 101 S. Ct. 120, 66 L. Ed. 2d 48 (1980)*, and Kalmanovitz v. G. Heileman Brewing Company, 769 F.2d 152 (3d Cir. 1985). *See* 722 F. Supp. at 1116. Following the conclusion that the antitrust laws were inapplicable, it reasoned that applying those laws would be inconsistent with the federal securities laws' regulatory scheme and pointed, as an example, to the limitation of damages under the securities laws to actual damages versus the treble damages available under § 15 of the Sherman Act, as did the court in Schaefer v. First National Bank, 326 F. Supp. 1186, 1192 (N.D. Ill. 1970), **[**6]** *aff'd in pertinent part*, 509 F.2d 1287 (7th Cir. 1975), *cert. denied*, *425 U.S. 943, 96 S. Ct. 1682, 48 L. Ed. 2d 186 (1976)*. 722 F. Supp. at 1118. Campeau apparently did not move in the district court, though it received the benefit of the dismissal, *see* 722 F. Supp. at 1118, and did not **[*827]** submit briefs or participate in oral argument in our Court in response to Finnegan's appeal from the dismissal of his complaint.

DISCUSSION

As a preliminary matter we note that Finnegan has standing to bring this civil action ***HN1***[] under § 15 of the Sherman Act, 15 U.S.C. § 15 (1988), which provides "any person who shall be injured in his business or property by reason of anything forbidden in the anti-trust laws may sue therefor" in federal court.

A claim analogous to the one at bar was presented in *Bucher*, and dismissal there was affirmed in an unpublished opinion. Appellant urges that we not apply the reasoning of the district court in *Bucher* because his claim is factually distinguishable. In **[**7]** *Bucher* the Signal Companies and Gulf and Western Industries made a joint tender offer for one-third of the outstanding shares of Signal. Suit was brought by shareholders of Signal who alleged that they received a lower price for their shares because Signal and Gulf and Western did not compete against each other for the company and against a third bidder, Dresser Company, but made a joint bid for the company. Presumably the difference between *Bucher* and the present case is that in the former the two bidders, Signal and Gulf and Western, made a joint bid at the outset, while in the case at hand Macy's and Campeau entered the takeover battle as active competitors, and only during the bidding process did they reach agreement on the acquisition of Federated.

I *Applicability of the Sherman Act*

Although we agree with the ultimate conclusion reached in the trial court that the Sherman Act has no application to this case, we reach it for somewhat different reasons. We do not, as did that court, adopt the rationales of *Bucher* and *Kalmanovitz. See* *Finnegan, 722 F. Supp. at 1116*. These courts premised their decisions to dismiss antitrust claims on the theory **[**8]** that the sale of the stock of a single company is not within the meaning of "trade or commerce" under the Sherman Act as that Act was construed in *Apex Hosiery Co. v. Leader, 310 U.S. 469, 84 L. Ed. 1311, 60 S. Ct. 982 (1940)*:

> The end sought [by the Act] was the prevention of restraints to free competition in business and commercial transactions which tended to restrict production, raise prices or otherwise control the market to the detriment of purchasers or consumers of *goods and services*, all of which had come to be regarded as a special form of public injury.

Id. at 493 (emphasis supplied). Based upon this language those courts found the Act inapplicable because "a share of stock is not an item of goods." *Bucher, 452 F. Supp. at 1290*; *accord* *Kalmanovitz, 769 F.2d at 156-57*.

We think this isolated statement in *Apex Hosiery* has been misperceived. The Supreme Court did not intend the application of the antitrust laws to be limited to "goods" qua "item of goods." Black's Law Dictionary acknowledges that "goods" is "[a] term of variable content. It may include every species of **[**9]** personal property or it may be given a very restricted meaning." *Black's Law Dictionary* 823 (4th ed. 1968). That the Supreme Court meant the term "goods" to be viewed in the broader sense is evidenced by its holding during the same term as *Apex Hosiery* was decided that the anti-trust laws covered agreements to restrain "the price of a *commodity* in interstate or foreign commerce," *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)* (emphasis supplied), and subsequent Supreme Court decisions have adhered to this broader position, *see, e.g.,* *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)* (per curiam). *See also Black's Law Dictionary* 343 (4th ed. 1968) (defining "commodity" as "any movable or tangible thing that is produced or used as the subject of barter or sale").

The Court also has refused to exempt banks from the antitrust laws simply because they "deal[] in the intangibles of credit and services rather than in the manufacture **[*828]** or sale of tangible commodities." *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 368, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*. **[**10]** Following that lead, at least one federal court has applied the antitrust laws to predatory practices involving sales of stock. *See* *Rothberg v. National Banner Corp., 259 F. Supp. 414, 416 (E.D. Pa. 1966)*; *see also* *Strobl v. New York Mercantile Exch., 768 F.2d 22* (2d Cir.) (applying the antitrust laws to commodities futures contracts for Maine potatoes), *cert. denied*, *474 U.S. 1006, 88 L. Ed. 2d 459, 106 S. Ct. 527 (1985)*. Embracing this expansive view of the scope of "in restraint of trade or commerce" within *§ 1* of the Sherman Act, we decline to adopt the district court's narrow holding that the antitrust laws are inapplicable because what is being sold are shares of stock of Federated. *Cf.* *Bozant v. Bank of New York, 156 F.2d 787, 789-90 (2d Cir. 1946)* (L. Hand, J.) (finding that bank was a producer of "goods," i.e. stocks, bonds and commercial paper). That there are few antitrust cases involving sales of stock comports with our belief that such claims are properly brought under the securities and not antitrust laws; it does not establish that the antitrust laws are inapplicable because stock may not be categorized **[**11]** as a manufactured good.

II *Implied Revocation of the Antitrust Laws*

As an alternative ground for dismissing the instant complaint, the district court held that the Sherman Act's application to cases of market manipulation was impliedly revoked by more specific provisions in the Williams Act. It adopted the Seventh Circuit's conclusion in *Schaefer*, 509 F.2d at 1299-1300, that there is an irreconcilable inconsistency between the single damages provided by the securities laws and the treble damages provided by the antitrust laws. We explicitly rejected the *Schaefer* rationale in *Strobl, 768 F.2d at 30*, and accordingly need not revisit this ground for implicit revocation of the antitrust laws.

A. *Doctrine of Implied Revocation*

Nevertheless, the doctrine of implied revocation provides a firm foundation for the district court's dismissal. Although the Williams Act, 82 Stat. 454, *codified at 15 U.S.C. §§ 78m(d)-(e)* & *78n(d)-(f) (1988)*, does not foreclose all antitrust claims arising in the context of market manipulation, we hold that the Sherman Act is implicitly repealed in the circumstances of the case at **[**12]** bar.

The three seminal Supreme Court cases, *Silver v. New York Stock Exchange, 373 U.S. 341, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963)*, *Gordon v. New York Stock Exchange, 422 U.S. 659, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975)*, and *United States v. National Association of Securities Dealers, 422 U.S. 694, 45 L. Ed. 2d 486, 95 S. Ct. 2427 (1975)*, establish the rules for implied revocation of the antitrust laws in the field of securities regulation. To begin with, ***HN2***[] repeal "by implication is not favored and not casually to be allowed. Only where there is a 'plain repugnancy between the antitrust and regulatory provisions' will repeal be implied." *Gordon, 422 U.S. at 682* (quoting *Philadelphia Nat'l Bank, 374 U.S. at 350-51*). The holdings in *Silver* and *Gordon* teach that antitrust laws do not come into play when they would prohibit an action that a regulatory scheme permits. *Strobl, 768 F.2d at 27*.

In *Silver*, the New York Stock Exchange denied its members' request for direct telephone **[**13]** connections to nonmembers located in Texas. Because the Securities and Exchange Commission (SEC) lacked authority to supervise the Stock Exchange's rules on direct telephone connections the antitrust laws were not revoked by implication. The holding in *Silver* was expressly limited to cases involving Stock Exchange rules and orders that lay outside the jurisdiction of the SEC, leaving open the possibility of implied revocation in other contexts. *See 373 U.S. at 358 n.12, 360*. In *Gordon*, the Court examined the other context expressly left open in *Silver*. There the New York Stock Exchange ruling in dispute -- establishing a system of fixed commission rates -- was subject to regulation and approval by the SEC under § 19(b) (9) of the Securities Exchange **[*829]** Act of 1934 (1934 Act), *15 U.S.C. § 78s(b) (1988)*. *422 U.S. at 685*. In *Gordon* the elements of implied repeal were met because allowing the antitrust laws to play a role in the area of commission rates would unduly interfere with the operation of the securities law.

Further, in *National Association of Securities Dealers*, implicit revocation with respect **[**14]** to certain sales and distribution restrictions used in marketing securities of mutual funds was found. The Supreme Court held that because the SEC had the power to authorize such restrictions on sales and distributions under § 22(f) of the Investment Company Act of 1940, *15 U.S.C. § 80a-22(f) (1988)*, and because there was "no way to reconcile the Commission's power to authorize these restrictions with the competing mandate of the antitrust laws," there was an implied repeal of the latter laws. *422 U.S. at 722*. By way of contrast, in *Strobl* we found there was no inconsistency between the Commodity Exchange Act and the Sherman Act because price manipulation -- a practice forbidden by the Sherman Act -- was also forbidden by the Commodity Exchange Act. 768 F.2d at 27. As a consequence of the above decisions, ***HN3***[] repeal by implication may only be found where there is a conflict between the provisions of the antitrust and securities laws.

B. *Implied Revocation in this Case*

1. *Purposes of the Williams Act*

In the case at bar, **[**15]** the antitrust laws are inconsistent with the Williams Act and implied repeal is necessary to make the securities regulations work. *See Silver, 373 U.S. at 357*. In 1968 Congress enacted the Williams Act, which amended sections of the 1934 Act, to "close a significant gap in investor protection under the Federal securities laws by requiring the disclosure of pertinent information to stockholders when persons seek to obtain control of a corporation by a cash tender offer or through open market or privately negotiated purchases of securities." 113 Cong. Rec. 854 (1967) (quoted in *Piper v. Chris-Craft Indus. Inc., 430 U.S. 1, 26, 51 L. Ed. 2d 124, 97 S. Ct. 926 (1977))*. Its purpose "is to insure that public shareholders who are confronted by a cash tender offer . . . will not be required to respond without adequate information . . . ." *Rondeau v. Mosinee Paper Corp., 422 U.S. 49, 58, 45 L. Ed. 2d 12, 95 S. Ct. 2069 (1975)*.

Declining to pass legislation that benefitted either bidders or incumbent management, Congress instead adopted a "policy of evenhandedness." *Chris-Craft, 430 U.S. at 31*. **[**16]** ***HN4***[] The twin aims of the Williams Act were therefore protection of target shareholders and neutrality as between bidders and target companies. *See* Johnson &

Millon, *Misreading the Williams Act*, 87 Mich. L. Rev. 1862, 1895-96 (1989). These goals are to be reached through the disclosure requirements mandated under the Williams Act.

Section 14(d) of the statute grants to the SEC the authority to prescribe substantive rules and regulations setting forth information necessary to protect shareholders of target companies. Under § 14(d), a bidder for a public company whose shares are registered with the SEC under the 1934 Act must file a Schedule 14D-1 with the SEC on the date of the commencement of the tender offer. The disclosure requirements of Schedule 14D-1 and the language of the Williams Act contemplate agreements between bidders. Item 7 of Schedule 14D-1 reads:

> **HN5**[] *Contracts, Arrangements, Understandings or Relationships with Respect to the Subject Company's Securities*. Describe any contract, arrangement, understanding **[**17]** or relationship . . . between the bidder . . . and any person with respect to any securities of the subject company (including . . . joint ventures . . .), naming the persons with whom such contracts, arrangements, understandings or relationships have been entered into . . . .

17 C.F.R. § 240.14d-100 (1989).

HN6[] Further, § 14(d)(2) of the 1934 Act, 15 U.S.C. § 78n(d)(2) (1988), reads:

> When two or more persons act as a partnership, limited partnership, syndicate, **[*830]** or other group for the purpose of acquiring, holding, or disposing of securities of an issuer, such syndicate or group shall be deemed a "person" for purposes of this subsection.

Because disclosure is the means by which Congress sought to protect target shareholders, the prior provisions make clear that **HN7**[] once information regarding an agreement between rival bidders has been revealed in a filing, the target company's shareholders have received the protection Congress and the SEC **[**18]** designed for them and there has been compliance with the Williams Act.

Recognizing the logical implication of the word "group" as anticipating the sort of bid made by Macy's and Campeau, appellant contends that these provisions authorize only those agreements made by bidders prior to engaging in a contest for control of a target company, not agreements made by rival bidders during the bidding process such as was the case here. We are unable to agree with this view because **HN8**[] neither the Williams Act nor the SEC regulations make a distinction between joint bids made by parties prior to entering a battle for control of the target and those made by parties who are rival bidders at the outset. We would think the SEC justified in deeming an agreement such as that alleged here to be a joint bid and to require the parties to file amendments to their existing filings under Schedule 14D-1, *see* 17 C.F.R. § 240.14d-3(b) (1990). Further, joint bids are not that uncommon. For example, in 1984 Reliance Financial Services Corporation and Fisher Brothers jointly offered to purchase Walt Disney Productions, **[**19]** and Waste Management, Inc. and Genstar made a joint offer for SCA Services, Inc. *See* 1 M. Lipton and E. Steinberger, *Takeovers and Freezeouts*, § 1.08(4) (1989 ed.).

2. *Disclosure Under the Williams Act*

Congress drafted **HN9**[] the Williams Act with language allowing joint bids for target companies and the SEC promulgated a regulation -- Regulation 14D-1, 17 C.F.R. §§ 240.14d-1 through 240.14d-101 (1990) -- that requires disclosure of agreements between bidders. In order for § 14(d) and the accompanying SEC regulation to function as intended, such agreements cannot be subject to suit under the antitrust laws; to permit such a suit would foster a direct conflict between the securities and antitrust laws. *Silver, 373 U.S. at 357*; *see also* *Strobl, 768 F.2d at 27* ("antitrust laws may not apply when such laws would prohibit an action that a regulatory scheme might allow"). We cannot presume that Congress has allowed competing bidders to make a joint bid under the Williams Act and the SEC's regulations and taken that right away by authorizing suit against **[**20]** such joint bidders under the antitrust laws.

The SEC also has the power to regulate tender offers under the antifraud provision of the same statute. **HN10**[] Among the sections added to the 1934 Act by the Williams Act was § 14(e), 15 U.S.C. § 78n(e) (1988), which made it "unlawful for any person . . . to engage in any fraudulent, deceptive, or manipulative acts or practices, in connection with any tender offer . . . ." Bidders are prohibited under this section from engaging in fraudulent acts involving misrepresentation or nondisclosure, and though the word "manipulation" appears in § 14(e) it has not been viewed as relating to making or withdrawing bids. *See* *Schreiber v. Burlington Northern, Inc., 472 U.S. 1, 8, 86 L. Ed. 2d 1, 105 S. Ct. 2458 (1985)*. Congress aimed to redress fraudulent practices by means of disclosure, and "nowhere in the legislative history is there the slightest suggestion that § 14(e) serves any purpose other than disclosure, or that the term 'manipulative' should be read as an invitation to the courts to oversee the substantive **[**21]** fairness of tender offers." *Id. at 11-12*; *see also* *id. at 9 n.8* ("The process through which Congress developed the Williams Act also suggests a calculated reliance on disclosure, rather than court-imposed principles of 'fairness' or 'artificiality,' as the preferred method of market regulation.").

[*831] Finnegan asserts that the SEC is without authority to regulate agreements between rival bidders such as Macy's and Campeau because the SEC is only empowered to regulate in the area of disclosure. This assertion misperceives the scope of that federal agency's power. The last sentence in § 14(e) states:

> The Commission shall, for the purposes of this subsection, by rules and regulations define, and prescribe means reasonably designed to prevent, such acts and practices as are fraudulent, deceptive, or manipulative.

In adding this sentence in 1970, "Congress . . . provided a mechanism for defining and guarding against those acts and practices which involve material misrepresentation or nondisclosure." *Schreiber, 472 U.S. at 11 n. 11*. Under its authority the SEC has promulgated procedural rules providing, **[**22]** *inter alia*, additional withdrawal rights, *see* *17 C.F.R. § 240.14d-7 (1989)*, and that an offer be held open to "all security holders of the class of securities subject to the tender offer," *17 C.F.R. § 240.14d-10(a)(1) (1989)* (All Holders Rule); *Polaroid Corp. v. Disney, 862 F.2d 987, 994 (3d Cir. 1988)* (upholding the SEC's authority to promulgate the All Holders Rule notwithstanding that it is only tangentially related to ensuring complete disclosure). *See* *CTS Corp. v. Dynamics Corp. of America, 481 U.S. 69, 79-80, 95 L. Ed. 2d 67, 107 S. Ct. 1637 (1987)*.

The SEC is able to regulate agreements between bidders by virtue of its authority to define fraudulent, deceptive or manipulative practices and to prescribe means to prevent such practices. *15 U.S.C. § 78n(e)*. Through its power to prohibit fraudulent activity, the SEC has supervisory authority over the submission of joint bids or other agreements in the corporate auction contest. *Cf.* *National Ass'n of Sec. Dealers, 422 U.S. at 726-28* (SEC election not to initiate restrictive regulations constituted administrative oversight). Although such **[**23]** agreements are not defined as deceptive practices under the regulations, the fact that they must be disclosed under Regulation 14D-1 clearly implies that the SEC contemplated their existence. That the SEC has chosen not to prohibit agreements between rival bidders as fraudulent or manipulative practices once shareholders are properly informed of them, does not reduce the SEC's supervisory authority over such agreements.

Consequently, ***HN11***[] because the SEC has the power to regulate bidders' agreements under § 14(e), *cf.* *Gordon, 422 U.S. at 685*; *National Ass'n of Sec. Dealers, 422 U.S. at 726-27*, and has implicitly authorized them by requiring their disclosure under Schedule 14D-1 as part of a takeover battle, *cf.* *Silver, 373 U.S. at 357*; *Strobl, 768 F.2d at 27*, to permit an antitrust suit to lie against joint takeover bidders would conflict with the proper functioning of the securities laws.

3. *Neutrality Under the Williams Act*

A further though lesser conflict may also be seen between the antitrust laws and the **[**24]** Williams Act. It surfaces in the legislative policy of maintaining neutrality among bidders, shareholders and target company management. Congress realized "that takeover bids should not be discouraged because they serve a useful purpose in providing a check on entrenched but inefficient management." S. Rep. No. 550, 90th Cong., 1st Sess. 3-4 (1967). If the antitrust laws were applied to prohibit agreements between rival bidders, it would discourage potential bidders from making a tender offer. Once more than one bidder entered the fray for control of a target company, the shareholders of that company could use the antitrust laws to force a fight to the last ditch, notwithstanding that the bidders could agree on terms more advantageous to themselves. Certainly this would discourage takeover activity -

- an end Congress sought to avoid in enacting the Williams Act. *See* Statement of Senator Williams, 113 Cong. Rec. 854-55 (1967) (the Williams Act seeks "to balance the scales equally to protect the legitimate interests of the corporation, management, and shareholders without unduly impeding cash takeover bids").

[*832] This conflict has been recognized in cases discussing implied **[**25]** preemption of state takeover laws by the Williams Act. *See, e.g.,* *CTS, 481 U.S. 69, 107 S. Ct. 1637, 95 L. Ed. 2d 67*; *Edgar v. MITE Corp., 457 U.S. 624, 73 L. Ed. 2d 269, 102 S. Ct. 2629 (1982)*. In *MITE*, a plurality of the Supreme Court held that the Illinois Take-Over Act was preempted by the Williams Act because some of its provisions favored target company management in takeover contests, and therefore upset the Act's objective of evenhandedness between the target company and bidders. *457 U.S. at 630-40*. A different result was reached in *CTS*, where the Court stated that even under the broad interpretation of the Act adopted by the plurality in *MITE*, an Indiana takeover statute was not preempted because it did not favor incumbent management over hostile bidders in contests for control. *481 U.S. at 80-87*.

Here, the application of the antitrust laws would upset the balance among incumbent management, target shareholders and bidders which Congress sought to achieve through the Williams Act. ***HN12***[] Allowing antitrust suits **[**26]** to rule out agreements between rival bidders would give target shareholders undue advantage in the takeover context and discourage such activity. Fewer takeover attempts ultimately favor incumbent management whose entrenched position is thereby less subject to challenge. Hence, reasoning by analogy from the logic of *MITE* and *CTS*, the antitrust laws are rendered inapplicable by the Williams Act in the instant case.

CONCLUSION

Accordingly, for the reasons stated above, the judgment dismissing appellant's complaint is affirmed.

That the assignment of a claim depends on whether the claim survives the death of a party applies in the context of treble damage claims.

Judges: John A. Nordberg, United States District Judge.

Opinion by: NORDBERG

Opinion

MEMORANDUM OPINION AND ORDER

On September 23, 1986, Lincoln National Life Insurance Company ("Lincoln") filed suit against A. David Silver after Lincoln's investment as a limited partner in Santa Fe Private Equity Fund II, L.P. ("SFPEF II") went awry. Lincoln's Second Amended Complaint, filed on August 25, 1988, alleges claims under federal and state securities laws, violations of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. §§ 1961 et seq.*, and pendent state law claims. On October 24, 1988, defendant Silver filed a Motion to Dismiss Certain Counts of the Second Amended Complaint.

On June 26, 1990, the Honorable Bernard Weisberg, United States Magistrate, entered a Report and Recommendation advising that the Motion to Dismiss be granted with respect to two counts and denied with respect to four other counts alleging violations of RICO. Pursuant to *Rule 72(b) of the Federal Rules of Civil Procedure*, the defendant filed objections to the Magistrate's denial of his motion to dismiss the RICO counts. The plaintiff responded in support of the Magistrate's Report. After reviewing those portions **[*2]** of the Report to which the defendant objected de novo, this court adopts the Report and Recommendation in part and fails to adopt the Report and Recommendation in part.

FACTS

The court adopts the statement of facts as set forth in the Magistrate's Report and Recommendation.

DISCUSSION

This court agrees with the Magistrate's recommendation to dismiss Count II of the Second Amended Complaint. Count II is based on § 17(a) of the Securities Act of 1933. Such a claim depends on an implied private right of action. The Seventh Circuit, however, has recently followed other courts in refusing to imply such a right of action. *Schlifke v. Seafirst Corp., 866 F.2d 935, 942-43 (7th Cir. 1989)*. The parties have not objected to the Magistrate's finding and recommendation with respect to § 17(a), and this court adopts that portion of his report.

Lincoln has voluntarily requested the dismissal of Count XIV. Thus, the issue of the dischargeability of Silver's indebtedness to SFPEF II is no longer before this court.

The remaining issue presented in Silver's Motion to Dismiss arises out of Counts XI to XIII and Count XIX of the Second Amended Complaint. These Counts allege violations of RICO, **[*3]** specifically violations of *18 U.S.C. § 1962(a) - (d)*. Defendant Silver moved to dismiss those counts on the ground that the assignment of those claims by SFPEF II to Lincoln is invalid.

In his Report, the Magistrate was of the opinion that those claims are assignable under federal law. Silver filed an objection to this portion of the Magistrate's finding. Having reviewed the issue of assignment of RICO claims de novo, this court rejects the portion of the Magistrate's Report denying defendant's Motion To Dismiss Counts XI to XIII and Count XIX and grants Silver's Motion to Dismiss those Counts.

Silver argues that under federal law those claims that do not survive the death of a party are not assignable, and that the Northern District of Illinois, following Seventh Circuit, precedent has determined that RICO claims do not survive. Therefore, Silver urges this court to hold that RICO claims are not assignable.

HN1[] Survival of federal claims is governed by federal law. *Smith v. No. 2 Galesburg Crown Finance Corp., 615 F.2d 407, 413 (7th Cir. 1980)*. *Khan v. Grotnes Metalforming Systems, Inc., 679 F. Supp. 751, 756 (N.D.Ill. 1988)*.

While the Seventh Circuit has not ruled on the issue **[*4]** of the survivability of RICO claims, the Northern District of Illinois has addressed the issue several times, holding on each occasion that civil RICO claims are penal and do not survive the death of a party. Washburn v. Isidore Brown, No. 81 C 1475, *1988 U.S. Dist. Lexis 13474* (N.D.Ill, Nov. 25, 1988); Eliasen v. Hamilton, No. 81 C 123, *1987 U.S.Dist. Lexis 1826* (N.D.Ill. March 9, 1987); First Interstate Bank v. Chapman and Cutler, [1986-1987 Transfer Binder]Fed. Sec. L. Rep. (CCH) para. 92,873 (N.D.Ill. June 12, 1986); First Interstate Bank v. National Republic Bank [1984-1985 Transfer Binder]Fed. Sec. L. Rep. (CCH) para. 91,994 (N.D.Ill. March 10, 1985) ("First Interstate I"); but see *State Farm Fire and Casualty Co. v. Caton, 540 F. Supp. 673 (N.D.In. 1982)*.

Although the issue of the survivability of a RICO claim has been repeatedly addressed at the district court level, no court within the Seventh Circuit has considered the assignability of a RICO claim. There are, however, two federal district court cases on point, both of which allowed the assignment. In Flinn Foundation v. Petro-Lewis Corp., CCH Fed. Secs. L. Repts. [1985 Transfer Binder] para. 92,449 **[*5]** at 92,735 (D.Colo. 1985), the court acknowledged that "there is some case support for the proposition that claims under a statute providing for a penalty are not transferable," but because treble damage claims under the antitrust laws are assignable, so too are RICO claims for treble damages.

Similar reasoning was applied in *In re National Mortgage Equity Corporation Mortgage Pool, 636 F. Supp. 1138, 1155 (C.D.Cal. 1986)*. The National Mortgage court rejected the idea that the assignability of a RICO claim is dependent on whether such a claim is classified as penal or remedial. Federal courts have attempted to characterize treble damage claims in a variety of contexts. While different courts have reached different conclusions regarding, for example, the nature of an antitrust treble damage claim, they have almost universally held such claims to be assignable. The Ninth Circuit itself had found antitrust treble damage claims to be assignable in *Hicks v. Bekins Moving & Storage Co., 87 F.2d 583 (9th Cir. 1937)*, while in another case, *Kline v. Coldwell, Banker & Co., 508 F.2d 226, 235 (9th Cir. 1974)*, it had indicated that such damage awards are punitive. Id.

Characterizing **[*6]** RICO treble damage claims leads to similarly disparate results; thus the "argument . . . that the assignability of RICO claims is wholly dependent on the proper characterization of the treble damage provision as either punitive or remedial is untenable." *636 F. Supp. at 1155*. Having rejected the characterization of a claim as a basis for determining its assignability, the court in National Mortgage relied instead on the parallels between the RICO and the antitrust treble damage provisions. Because antitrust claims are assignable, so too are RICO claims.

In both National Mortgage and Flinn the courts began their analysis with the question of whether the survival of a RICO claim determines its assignability. After discarding that principle, both courts analogized RICO treble damage provisions to those of the antitrust laws. The Plaintiffs make a similar argument in this case. They argue that because RICO's treble damage claim was modeled almost verbatim after the treble damage provision of the Clayton Antitrust Act, this court should follow the weight of the law with regard to antitrust claims and hold RICO claims to be assignable. [1]

[*7] Courts have frequently discussed the utility of relying on the antitrust laws to resolve various interpretive disputes with regard to RICO. In *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 498 (1985)*, however, in the context of establishing what constitutes the requisite injury for a RICO claim, the Supreme Court cautioned against leaning too heavily on the Clayton Act for interpreting RICO, because RICO was enacted in the face of proposals

---

[1] Clayton Act claims have been held to be assignable in the Second Circuit, *Mercu-Ray Industries, Inc. v. Bristol Meyers Co., 392 F.Supp. 16, 18 (S.D.N.Y. 1974)*, aff'd sub nom., *568 F.2d 837 (2d Cir. 1974)*, *D'Ippolito v. Cities Service Co., 374 F.2d 643, 647 (2d Cir. 1967)*; the Third Circuit, *In re Fine Paper Litigation, 632 F.2d 1081, 1090 (3d Cir. 1980)*; the Fifth Circuit, *Jefferson County Pharmaceutical Ass'n v. Abbott Laboratories, 656 F.2d 92, 98 (5th Cir. 1981)*, rev'd on other grounds, *460 U.S. 150 (1983)*; the Eighth Circuit, *Louisiana Farmers' Protection Union v. Great A & P Tea Co., 131 F.2d 419, 423 (8th Cir. 1942)*; and the Ninth Circuit, *Hicks v. Bekins Moving & Storage Co., 87 F.2d 583, 585 (9th Cir. 1937)*; and in various district courts as well. See, e.g., *Health Care Equalization Committee v. Iowa Medical Society, 501 F.Supp. 970, 977-78 (S.D.Iowa 1980)*; *Isidor Weinstein Inv. Co. v. Hearst Corp., 303 F.Supp. 646, 649 (N.D.Cal. 1969)*; *Gerr v. Schering Corp., 256 F.Supp. 572, 574 (S.D.N.Y. 1966)*; *Fischer Bros. Aviation, Inc. v. NWA, 117 F.R.D. 144, 146 (D.Minn. 1986)*.

"to add RICO-like provisions to the Sherman Act." In enacting a separate statute, Congress hoped to avoid strangling RICO with Antitrust precedent. Id., citing 115 Cong.Rec. 6995 (1969) (ABA comments on S.2048). While Congress did enact a separate statutory scheme for RICO, it nonetheless was guided in its drafting by the Clayton Act. As the Seventh Circuit stated in *Tellis v. United States Fidelity and Guaranty Co., 805 F.2d 741, 746 (7th Cir. 1986)*, "the treble damage provision in § 1964(c) is virtually identical to the damages provision in the antitrust laws."

Furthermore, in spite of its cautionary note in *Sedima, 473 U.S. 479*, the Supreme Court, borrowed the statute of limitations from the Clayton Act for use in RICO **[*8]** suits. *Agency Holding Corp. v. Malley-Duff & Assocs., 483 U.S. 143 (1986)*. In selecting the Clayton Act statute of limitations period, the Supreme Court noted that the disparate nature of the predicate acts underlying a RICO claim mandated a uniform statute of limitations. If courts were left to apply the appropriate state law statutes of limitations, the Court reasoned, plaintiffs and defendants would be placed in a position of guessing which rule would apply to the act forming the basis of the claim.

Whether or not a claim may be assigned is more akin to the statute of limitations question presented in Agency Holding Corp. than it is to the interpretive question presented in Sedima. Like the issue of how long the limitations period should be, the question of assignment is not addressed in the RICO statute. Addressing a RICO issue left untouched by the legislature by reference to the Clayton Act constrains RICO less than does defining an element of a RICO offense in terms of the Clayton Act.

The affinity between the treble damage provisions of the Clayton Act and RICO, coupled with the courts' habit of looking to the Clayton Act for gap-filling needs, counsels this court **[*9]** to look to the multitude of decisions holding Clayton Act claims assignable. But rather than adopting wholesale the principle that treble damage claims are assignable, the policy behind such decisions must be explored.

The court in *National Mortgage, 636 F. Supp. 1138*, found that some of the courts that had held antitrust claims to be assignable had also deemed treble damage awards to be, at least in part, punitive. The court, however, did not focus explicitly on the issue of whether those courts that have found antitrust claims to be assignable have also found them to survive the death of a party. Because the court looked at the characterization of treble damage claims in a variety of contexts, its analysis was skewed. In other words, it is clear that both RICO and the Clayton Act contain elements that are both penal and remedial; thus, depending on the context, a claim may be characterized one way or the other. As the rule determining assignability looks to the characterization of a claim in the context of the survivability of that claim, it is to that context that this court must look.

Most of the jurisdictions which have ruled on the issue of whether treble damage claims under **[*10]** the antitrust acts are assignable have also found such claims to survive the death of a party. For example, the Ninth Circuit in *Hicks, 87 F.2d 583, 585*, found that an action brought under the antitrust acts was not penal in nature, and therefore that such an action survived the death of the party and was assignable. [2] The court in National Mortgage did not mention this opinion, while it did look to a later case, *Kline, 508 F.2d at 235*, in which the Ninth Circuit termed the treble damage provisions of the antitrust acts to be punitive in the context of declining to certify a class for a class action suit. It was in Hicks, however, that the Ninth Circuit established its reasoning for allowing the assignment of an antitrust claim. Assignment was allowed, because, at that time, the Ninth Circuit determined that antitrust claims were remedial, not punitive. If now the consensus in the Ninth Circuit has shifted towards an understanding that at least two thirds of a treble damage award is punitive, that does not change the basis of the original determination regarding the assignment of such claims.

[*11] While the Third Circuit has not explicitly addressed the issue of survival of treble damage claims in antitrust actions, the District Court of New Jersey found them to be punitive and to abate with the death of a party in *Haskell v. Perkins, 28 F.2d 222, 224 (D.N.J. 1928)*. Haskell at first glance appears to buttress the argument of the court in National Mortgage that survivability and assignability have not gone hand in hand with regard to antitrust claims. In

---

[2] See also, *Sullivan v. Associated Billposters and Distributors, 6 F.2d 1000, 1009 (2d Cir 1925)* (holding that the common law rule applies to claims of injury to business, not claims of injury to property, under the antitrust laws); *Derdiarian v. Futterman, 223 F.Supp. 265, 271 (S.D.N.Y. 1963)*.

the case in which the Third Circuit found antitrust claims to be assignable, however, *In re Fine Paper Litigation, 632 F.2d 1081 (3d Cir. 1980)*, the court based its decision on cases from the Ninth Circuit, the Second Circuit, and the Southern District of New York, all of which courts have found that antitrust claims survive the death of a party. [3]

[*12] The Eighth Circuit has not addressed the issue of survival of antitrust claims. Nor did it explain its decision in *Louisiana Farmers' Protection Union v. Great A & P Tea Co., 131 F.2d 419 (8th Cir. 1942)*, to allow the assignment of an antitrust claim. While it did not explicitly rely on the penal/remedial distinction, neither did the Eighth Circuit provide an alternative basis for its decision. Thus, Farmers' Protection Union does not suggest to this court that the survivability of a claim is an unsound basis for deciding whether it is assignable.

The only Circuit in which the dichotomy between the issue of assignment and the issue of survival is absolute is the Fifth Circuit. That court held that antitrust treble damage claims were assignable in *Jefferson County Pharmaceutical Ass'n v. Abbot Laboratories, 656 F.2d 92, 98 (5th Cir. 1981)*. The court cited *Copper Liquor, Inc. v. Adolph Coors Co., 506 F.2d 934 (5th Cir. 1975)* as authority for the proposition, but Copper Liquors does not provide any rationale for its holding. The Fifth circuit had pronounced antitrust treble damage claims to be a penalty and had found that all but actual damages abate with the death **[*13]** of a party in *Rogers v. Douglas Tobacco Board of Trade, 244 F.2d 471 (5th Cir. 1957)*. Thus the decisions regarding assignment could not have been based on the survivability of the claims.

In the end, the decisions do not present a clear pattern either embracing or eschewing survivability as a basis for allowing the assignment of an antitrust claim. Three courts - the Ninth Circuit, the Second Circuit and the Southern District of New York - have explicitly followed the survivability rule in allowing the assignment of antitrust claims. [4] The Third Circuit implicitly relies on such reasoning; while the Eighth Circuit provides no rationale for its holding. Only the Fifth Circuit implicitly breaks with the common law rationale for allowing the assignment of a claim. Because the federal courts have not clearly abandoned the common law rule with respect to ***antitrust law***, this court does not feel compelled to conclude, as did the court in National Mortgage, "that the penal-remedial dichotomy does not control a RICO claim's assignability." *636 F. Supp. at 1155*.

[*14] Having determined that the survival of a claim does determine its assignability, this court looks next to pertinent Seventh Circuit decisions. While the Seventh Circuit has neither addressed the assignability of treble damage claims under the antitrust laws, nor the survivability of antitrust claims, it has addressed the survival of antitrust claims. In holding that treble damage claims under the Sherman Antitrust Act do not abate with the death of the defendant, in *Fishman v. Estate of Wirtz, 807 F.2d 520 (7th Cir. 1986)*, the court borrowed language from the Supreme Court in asserting that "treble damages in antitrust suits were 'provided in part for punitive purposes . . . but also to make the remedy more meaningful by counterbalancing "the difficulty of maintaining a private suit. . . ."'" *Id., at 560-561*, citing *Brunswick Corp v. Pueblo Bowl-O-Mat, 429 U.S. 477, 696 n.10 (1977)*, quoting 21 Cong.Rec. 2456 (1890). While the court in Fishman reasoned in general terms, its decision was based in part on the "precise circumstances" of the case. *Id., at 561*.

In spite of the parallel language in RICO and the antitrust acts, the decision in Fishman has not led any **[*15]** court within the Seventh Circuit to adopt its language in the context of RICO claims. In fact, in the two most recent cases to come before the Northern District of Illinois the court has found that RICO treble damage claims are punitive and

---

[3] As authority for its decision that antitrust claims are assignable, the Third Circuit in *In re Fine Paper, 632 F.2d at 1090*, relied on *D'Ippolito v. City Service Co., 374 F.2d 643 (2d Cir. 1967)*; *Hicks v. Bekins Moving & Storage Co., 87 F.2d 583*, (9th Cir 1937); and *Mercu-Ray Industries, Inc. v. Bristol-Meyers Co., 392 F.Supp. 16 (S.D.N.Y. 1974)*, aff'd mem., *508 F.2d 837 (2d Cir. 1974)*.

[4] *Hicks v. Bekins Moving & Storage, 87 F.2d 583, 585*, (9th Cir. 1937); *Sullivan v. Associated Billposters & Distributors, 6 F.2d 1000, 1009 (2d Cir. 1925)*; *Derdiarian v. Futterman, 223 F.Supp. 265, 271 (S.D.N.Y. 1963)*.

abate with the death of a party. Washburn v. Isidore Brown, No. 81 C 1475, *1988 U.S. Dist. Lexis 13474* (N.D.Ill, Nov. 25, 1988); Eliasen v. Hamilton, No. 81 C 123, *1987 U.S.Dist. Lexis 1826* (N.D.Ill. March 9, 1987). [5]

[*16] *CONCLUSION*

This court believes that the common law rule, that ***HN2***[] the assignment of a claim depends on whether the claim survives the death of a party, applies in the context of treble damage claims. Because the Seventh Circuit effectively limited its holding on the survival of the antitrust treble damage claims to the facts in Fishman, that holding cannot form the basis for rejecting the line of cases in the Northern District of Illinois which have held that RICO claims are penal in nature and do not survive the death of a party. For this reason the court declines to accept the reasoning of the Magistrate with respect to the defendant's motion to dismiss. The defendant's motion to dismiss is granted without prejudice with respect to Counts XI to XIII and Count XIX of the second amended complaint.

End of Document

[5] The Seventh Circuit held in *Tellis v. United States Fidelity & Guaranty Co., 805 F.2d 741, 745-46 (7th Cir. 1986)*, that treble damage claims could best be characterized as penal in nature. While this may support an argument that Fishman should be limited to its particular facts, this court hesitates to place too much emphasis on an assessment that arose in a completely different context. Tellis involved an analysis of the various state statutes of limitations that could be applied to RICO actions, prior to the Supreme Court's application of the Clayton Act statute of limitations in *Agency Holding Corp, 483 U.S. 183*.

Hinkleman v. Shell Oil Co.

United States District Court for the District of Maryland

October 5, 1990, Decided ; October 5, 1990, Filed

CIVIL NO. H-90-869

Reporter
1990 U.S. Dist. LEXIS 21022 *

FRANCIS GEORGE HINKLEMAN Plaintiff vs. SHELL OIL COMPANY Defendant

Subsequent History: Affirmed by *Hinkleman v. Shell Oil Co., 962 F.2d 372, 1992 U.S. App. LEXIS 9822 (4th Cir. Md., 1992)*

Disposition: Defendant's motion to dismiss granted.

Core Terms

amended complaint, purchaser, leases, courts, real estate, termination, gasoline, advertising, merchandise, commodity, alleges, terms, anti trust law, furnishing, processing, connected, resale

Judges: [*1] Alexander Harvey, III, Chief, United States District Judge.

Opinion by: Alexander Harvey, III

Opinion

MEMORANDUM AND ORDER

Presently pending in this civil action is defendant's motion to dismiss Count II of the amended complaint. Plaintiff is Francis G. Hinkleman (hereinafter "Hinkleman"), a Maryland resident who formerly operated a retail service station at 103 Mountain Road in Pasadena, Maryland. Defendant is Shell Oil Company (hereinafter "Shell"), a Delaware corporation engaged in the refining and marketing of petroleum and related products.

The amended complaint in this lawsuit contains two counts. Count I alleges that the franchise agreement between the parties has been wrongfully terminated under federal law. Count II alleges that the administration of defendant's variable rent program violated *§§ 11-204(a) (5) of the Maryland Commercial Law Article*.

Memoranda in support of and in opposition to the pending motion have been submitted and reviewed by this Court. A hearing on this motion is not necessary. *See* Local Rule 105.6. For the reasons to be stated herein, defendant's motion to dismiss Count II of the amended complaint will be granted.

I.

Facts

1

[*2] Francis Hinkleman and Shell executed a service station franchise agreement in 1985. On January 4, 1990, Shell sent Hinkleman a certified letter containing a notice of termination of the franchise, to be effective on April 16, 1990. As justification for the terminations, Shell cited Hinkleman's failure to pay timely all sums due to Shell.

On March 23, 1990, Hinkleman filed a one-count complaint in this Court alleging wrongful termination of his dealership under the Petroleum Marketing Service Act, *15 U.S.C. §§ 2801 et seq.* Shortly thereafter, Hinkleman sought a temporary restraining order and preliminary injunction to prevent termination of his dealership. By agreement of the parties, a temporary restraining order was entered by the Court on April 16, 1990 to prevent immediate termination of the dealership. A hearing on plaintiff's motion for a preliminary injunction was then held on May 2. In a Memorandum Opinion filed on May 8, this Court denied plaintiff's motion for a preliminary injunction and ordered plaintiff to surrender the service station on or before May 21, 1990. Hinkleman surrendered the service station to Shell on May 21.

With leave of the **[*3]** Court, plaintiff filed an amended complaint on August 15, containing two counts. Count I seeks monetary damages for violation of the Petroleum Marketing Practices Act. [2] Count II alleges that the administration of defendant's variable rent program [3] violated *§§ 11-204(a)(5), Md. Com. Law Code Ann.*

II

Discussion

[*4] *Section 11-204(a)(5) of the Maryland Commercial Law Article* is a part of the state's antitrust subtitle, which was enacted "to complement the body of federal [***antitrust] law***. . . ." *Md. Comm. Law Code Ann. §§ 11-202(a)(1)*. The Legislature explicitly provided that construction of the antitrust subtitle should be "guided by the interpretation give by the federal courts to the various federal statutes dealing with the same or similar matters. . . ." *Md. Com. Law Code Ann. §§ 11-201(a)(2)*.

Section 11-204(a)(5) provides that a person may not:

> discriminate in favor of one purchaser against another purchaser of a commodity bought for resale, with or without processing, by contracting to furnish, furnishing or contributing to the furnishing of any service or facility connected with the processing, handling, sale, or offering for sale of the commodity on terms not accorded to all purchasers on proportionally equal terms.

This provision is substantially identical to §§ *2(e) of the Robinson-Patman Act,* Codified at *15 U.S.C. § 13(6)*. That statute is as follows:

> Furnishing services or facilities **[*5]** for processing, handling, etc.
> (e) It shall be unlawful for any person to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale or offering for sale of such commodity so purchased upon terms not accorded to all purchasers on proportionally equal terms.

---

1 The factual background of the parties' dispute is more fully described in this Court's Memorandum Opinion of May 8, 1990. For purposes of the pending motion, less detail is necessary.

2 In its memorandum in support of the pending motion, Shell has advised that it will soon move for summary judgment on Count I. The deadline for submission of substantive motions in this case is November 30, 1990.

3 As is customary in the petroleum business, Shell owns the realty on which its service stations are located. Under Shell's variable rent program, Shell dealers receive rent discounts for gasoline orders above specified levels. Thus, the more gasoline a dealer orders *from* Shell, the less rent he pays *to* Shell. Shell negotiates agreements involving rent discounts with each individual dealer, and provisions pertaining to rent discounts therefore differ from dealer to dealer.

Count II of the amended complaint alleges that Shell's variable rent program (hereinafter the "VRP") violates § 11-204 (a)(5). Plaintiff contends that Shell discriminated against him in favor of other Shell dealerships by not according him Proportionally equal terms under the VRP. According to plaintiff, Shell was aware that the gasoline volume levels in its lease agreement with plaintiff were Unreasonable and that plaintiff's inability to meet these levels would eventually lead to termination of his franchise.

In its motion to dismiss, Shell asserts that this Court should construe the Maryland statute in the same manner as federal courts have construed § 2(e) of the Robinson-Patman **[*6]** Act. Shell argues that the VRP could not violate § 2(e) because the VRP is not related to advertising or other promotional allowances and services. In support of this contention, Shell asserts that a real estate lease is not a tangible commodity for resale and that its VRP is not connected with the advertising or promotion of gasoline.

Plaintiff responds that the plain language of the Maryland statute indicates that the prohibitions of §§ 11-204(a)(5) apply to Shell's VRP. Plaintiff contends that decisions under § 2(e) of the Robinson Patman Act should not control this Court's interpretation of Maryland's § 11-204(a)(5). In support of this assertion, plaintiff argues that the state antitrust subsection was intended to expand federal law, that federal case law does not bind courts construing state ***antitrust law***, and that the Maryland statute defines "service" to include leases. *See* Md. Com. Law Code Ann. § 11-201(9).

A motion to dismiss under Rule 12(b)(6), F.R.Civ.p., should be denied unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957). **[*7]** In determining whether to dismiss a complaint, this Court must view the well-pleaded material allegations in a light most favorable to the plaintiff, with the alleged facts accepted as true. 2A *Moore's Federal Practice,* Para. 12.07 [2.-5) (2d ed. 1987); 5 C. Wright & A. Miller, *Federal Practice and Procedure* § 1357, at 594-97 (1969).

On the record here, this Court concludes that defendant has met its burden of demonstrating that Count II of the amended complaint fails to state a claim under § 11-204(a)(5), Md. Com. Law Code Ann. First, the Court is satisfied that Maryland's § 11-204(a)(5) is substantially identical to § 2(e) of the Robinson-Patman Act, 15 U.S.C. § 13(e). No cases have been cited construing § 11-204(a)(5) in a manner different from § 2(e), and the Court is not aware of any such authorities. Second, it is well established that federal case law guides any interpretation of Maryland's antitrust laws. *See* Quality Discount Tires, Inc. v. Firestone Tire & Rubber Co., 282 Md. 7, 12, 382 A.2d 867 (1970); Neugebauer v. A.S. Abell Co., 474 F. Supp. 1053, 1071 (D.Md. 1979) (Young, J.); Purity Products Inc. v. Tropicana Products Inc., 702 F. Supp. 564, 574 (D.Md. 1988) **[*8]** (Harvey, J.), *aff'd, 887 F.2d 1081 (4th Cir. 1989)*. Under these circumstances, this Court will interpret Maryland's § 11-204(a) (5) as imposing the same legal duty as does § 2(e) of the Robinson-Patman Act.

"The purpose of § 2(e) . . . is to strengthen the prohibition against unfair price discrimination disguised in the form of advertising or pronlotional services provided to purchasers on a discriminatory basis." Purdy Mobile Homes, Inc. v. Champion Home Bldrs. Co., 594 F.2d 1313, 1317 (9th Cir. 1979). See also Rutledge v. Electric Hose & Rubber Co., 511 F.2d 668, 678 (9th Cir. 1975); Cecil Corley Motor Co. v. General Motors Corp., 380 F. Supp. 819 (M.D. Tenn. 1974). It is thus apparent that § 2(e) of the Robinson-Patman Act is concerned exclusively with discrimination in the advertising, promotion or merchandising of a Commodity for resale. Accordingly, it has been held that § 2(e) applies only to services or facilities connected with the *resale* of the product by the purchaser. Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 546 (9th Cir. 1983), *cert. denied, 465 U.S. 1038, 79 L. Ed. 2d 712, 104 S. Ct. 1315 (1984).* **[*9]**

Apart from these broad criteria, courts have not formulated a test to determine when § 2(e) applies. Instead, the issue has been left for resolution on a case-by-case basis. [4] Examples of services held covered under § 2(e)

[4] Further guidance is provided by regulations published by the Federal Trade Commission. These regulations list the following examples of services within the scope of § 2(e): handbills, displays, demonstrations, catalogs, storage cabinets, accepting returns for credit, prizes or merchandise for conducting promotional contests. 16 C.F.R. § 240.5 (1990). One commentator has

include: advertisements, demonstrators, partial payment of customer's salaries, right to return merchandise, and mailings to clients of favored customers. E. Kintner, *Federal* ***Antitrust Law*** § 27.6 (1983) (citations omitted).

[*10] Courts have been unwilling to apply *§ 2(e)* to every case in which a supplier of a product discriminates among customers. *Section 2(e)* has been ruled inapplicable in cases involving the following services: allocation of merchandise (including willingness to sell at all), availability and terms of credit, and delivered. E. Kinter, *Federal* ***Antitrust Law****, supra* at § 27.6. Significantly, two courts have held that *§ 2(e)* does not apply to real estate leases or real estate transactions. *Rea v. Ford Motor Co., 355 F. Supp. 842, 869 (W.D. Pa. 1973)*, *rev'd in part on other grounds, 497 F.2d 577 (3d Cir.)*, cert. *denied, 419 U.S. 868 (1974)*; *Export Liquor Sales, Inc. v Ammex Warehouse Co., 426 F.2d 251 (6th Cir. 1970)*, *cert. denied, 400 U.S. 1000, 27 L. Ed. 2d 451 (1971)*.

When these principles of federal case law are applied to the allegations of the amended complaint, it is apparent that no violation of *§ 2(e) of the Robinson-Patman Act* has been alleged. The allegedly discriminatory rents charged by Shell do not help favored dealers merchandise gasoline. *See Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534.* **[*11]** The leases and the gasoline are therefore not related closely enough for *§ 2(e)* to apply. Although it could be argued that Shell's alleged discrimination in its VRP hindered plaintiff's attempts to merchandise gasoline (for example, by raising his "overhead" costs), the argument proves too much, inasmuch as the statute focuses on the form of the alleged discrimination and not its effect.

The fact that the allegedly discriminatory service is directly related to real estate is also an important factor here. The leasing of real estate involves a type of transaction which is quite different from the sort of services which courts have ruled are covered by *§ 2(e)*. As noted hereinabove, two courts have explicitly held that real estate transactions are outside the scope of the statute. Finally, as defendant points out, every parcel of real estate is essentially unique and terms of a real estate lease would not lend themselves to being discriminatory.

For these reasons, this Court concludes that since Count II of the amended complaint does not allege a violation of the Robinson-Patman Act, it likewise does not state a claim under *§ 11-204(a)(5) of the Maryland Commercial Law*. Count **[*12]** II does not allege discrimination in the advertising, promotion or merchandising of gasoline. The leases involved here can be characterized as "connected" with retail sales of gasoline only in the most attenuated sense. Moreover, *§ 11-204(a)(5)* does not apply to real estate leases. Accordingly, Count II must be dismissed.

III

Conclusion

For the reasons stated, it is this *5th* day of October, 1990, by the United States District Court for the District of Maryland,

ORDERED that defendant's motion to dismiss Count II of the amended complaint be and the same is hereby granted.

Alexander Harvy III

Chief, United States District Judge

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN3[] **Monopolies & Monopolization, Attempts to Monopolize**

Attempted monopolization requires a specific intent to destroy competition or build monopoly. A desire to increase market share or even to drive a competitor out of business through vigorous competition on the merits is not sufficient. The plaintiff must show that the defendant sought to create a monopoly by circumventing the competitive process. The requisite intent may be shown through direct evidence or through inference by showing anticompetitive practices.

Opinion

[*925] YOUNG, Senior District Judge

Abcor Corporation (Abcor) and its owner, James Kibler, appeal the grant of summary judgment by the district court in favor of the defendant AM International, Inc. (AMI), in this antitrust action alleging an illegal scheme to drive Abcor out of business. Because we find no material issues of fact, we **[**2]** affirm the judgment of the district court.

I.

AMI manufactures and services Multigraphics printing equipment worldwide. **[*926]** Abcor provides maintenance and repair services for AMI machines in the Washington, D.C., area. Abcor's owner, James Kibler, was a service technician at AMI until 1973 when he left to start his own company servicing AMI machines. He took six AMI employees with him at the time and over the years has hired numerous AMI employees. While AMI is a much larger company overall, Abcor has become the dominant service company for AMI machines in the Washington area. Of the 3,000 such machines in the Washington area, 2,200 are serviced in-house by the owners. Of the remaining 800 machines, Abcor services about 400, AMI services 200, and other competitors service 200.

In January 1987, AMI began negotiations with Abcor to purchase the company. The parties apparently reached a preliminary agreement, but AMI terminated the negotiations. AMI decided that it would rather compete for a larger market share in Washington rather than purchase one through the acquisition of Abcor, and it is clear that AMI did in fact step up its efforts to gain a larger share of the market. **[**3]** The dispute in the case turns on whether those efforts were legal competition on the merits or illegal anticompetitive measures designed to drive Abcor out of business.

Plaintiffs allege that AMI took the following steps to destroy Abcor:

1. created a low-priced, deceptive service contract to target Abcor's customers;
2. improperly used a list of Abcor's customers and financial information allegedly obtained during the acquisition negotiations to solicit Abcor's customers and undercut Abcor's prices;
3. inhibited Abcor's purchase of AMI parts by terminating Abcor's over-the-counter access to parts in AMI's Washington area supply depot and terminated its acceptance of telephone orders from Abcor in the Chicago parts center (requiring written orders);
4. attempted to spread false information about Abcor to the effect that the company was going to go out of business; and
5. hired Abcor employees to hurt the company and steal customers.

Abcor and its sole owner, Kibler, filed suit in the Federal District Court for the Eastern District of Virginia alleging violation of § 2 of the Sherman Act for monopolization and attempted monopolization in addition to state **[**4]** law violations based on defamation and tortious interference with business relations. After substantial discovery, the district court granted summary judgment in favor of the defendants. The district court found that a genuine issue of fact existed concerning the market definition and whether there was a dangerous probability of success in the attempt to monopolize. However, these issues were rendered immaterial by the holding of the court that the plaintiff had failed to produce evidence to support a finding of (1) an intent to monopolize, (2) anticompetitive activity, or (3) antitrust injury. The court dismissed the federal claims and then exercised its discretion to dismiss the pendent state law claims without prejudice. Abcor now appeals to this court, and we affirm.

II.

HN1[] A plaintiff seeking to establish attempted monopolization under § 2 of the Sherman Act must show three things: (i) the defendant formed a specific intent to monopolize the market, (ii) the defendant engaged in anticompetitive or predatory conduct designed to further that intent, and (iii) a dangerous probability of **[**5]** success. *White Bag v. International Paper, 579 F.2d 1384, 1387 (4th Cir. 1974)*. On a motion for summary judgment made by the defendant, the plaintiffs are entitled to have all reasonable inferences drawn in their favor. The plaintiffs must, however, produce evidence to support a finding on each essential element to their case. *Rule 56(e), Fed. R. Civ. P.*; *Matsushita Electric Industry Co. v. Zenith Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. ***HN2***[] We review the decision of the district court to grant summary judgment *de novo*.

[*927] 1. *Specific Intent to Monopolize*

The Supreme Court has held that ***HN3***[] attempted monopolization requires "a specific intent to destroy competition or build monopoly." *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 626, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*. A desire to increase market share or even to drive a competitor out of business through vigorous competition on the merits is not **[**6]** sufficient. *United States Steel Corp. v. Fortner Enterprises, 429 U.S. 610, 612 n.1, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977)* ("No inference of intent to monopolize can be drawn from the fact that a firm with a small market share has engaged in nonpredatory competitive conduct in the hope of increasing sales."). The plaintiff must show that the defendant sought to create a monopoly by circumventing the competitive process. The requisite intent may be shown through direct evidence or through inference by showing anticompetitive practices. *See, e.g., Conoco Inc. v. Inman Oil Co., 774 F.2d 895, 905 (8th Cir. 1985)*.

The district court found that the "sporadic activity on the part of AMI is insufficient to show . . . specific intent . . . to destroy Abcor's ability to compete in the alleged market. . . ." [1] Abcor argues that the court ignored both direct and circumstantial evidence that AMI sought to destroy Abcor through anticompetitive tactics.

[7]** Abcor's strongest direct evidence of intent derives from deposition testimony by Kibler. Kibler testified that an AMI manager called him shortly after AMI decided not to buy Abcor and said that AMI had decided that it did not need to buy Abcor because it could acquire its business through competition. An AMI salesman provided some corroboration by testifying that "top management" at AMI felt that it "could eventually get the business a little at a time, and therefore it wasn't worth it, buying it outright."

Plaintiffs argue that in the context of a motion for summary judgment the court must accept Kibler's inference that these statements imply a plan to destroy Abcor through illegal, anticompetitive actions. Plaintiffs seek to bolster this inference by arguing that since AMI had not been successful competing with Abcor in the past (resulting in its low market share), its renewed effort must have involved more than just straightforward competition on the merits.

The argument fails, however, because the statements quoted above do not show any evidence of illegal intent. By themselves, the statements show only that AMI planned to increase its competitive activity in the Washington **[**8]**

---

[1] We assume, without deciding, that the relevant market consists of the servicing and repair of AMI machines in the Washington, D.C., area. As we discuss below, the district court found a genuine issue of fact concerning the market definition. Because of our disposition of the other issues in this case, however, we need not reach the issue of market definition.

area. While plaintiffs attempt to rely on Kibler's testimony that he interpreted AMI's statements and actions as indicative of illegal anticompetitive intent, he had no basis from which to make such an inference. In essence, he seeks to create a material factual dispute by asserting that he believes AMI had an anticompetitive plan. These bald assertions are not enough to survive summary judgment. ***HN4***[] "When a motion for summary judgment is made and supported as provided in [*Rule 56*], an adverse party may not rest upon the mere allegations or denials of the adverse party's pleadings, but . . . must set forth specific facts showing that there is a genuine issue for trial." *Fed. R. Civ. P. 56(e)*.

Even if the record does not contain sufficient direct evidence to support a finding that AMI possessed the specific intent to monopolize the relevant market through anticompetitive means, plaintiffs assert that the trier of fact may also infer specific intent from a series of anticompetitive acts. Plaintiffs argue that AMI engaged in at least five separate illegal, anticompetitive acts. However, as discussed **[**9]** more fully herein, none of the actions relied upon by plaintiffs rise to the level of illegal competition. Even viewing the acts as a whole, the record reveals no more than vigorous competition **[*928]** which did not rise to the level of an antitrust violation.

2. *Anticompetitive Activity*

HN5[] To prove a violation of § 2 of the Sherman Act, plaintiffs must also show that the defendant engaged in anticompetitive or predatory conduct designed to further an intent to monopolize. Here plaintiffs allege that AMI engaged in a series of anticompetitive activities designed to destroy Abcor. We address each in turn.

a. Discriminatory and Deceptive Pricing

In the past, Abcor has been able to offer its maintenance and repair services at prices about 20% less than those offered by AMI. Plaintiffs contend that AMI responded by instituting price reductions that, although they did not rise to the level of predatory pricing, were nonetheless deceptive. AMI allegedly offered its standard service contract, the Preventive Maintenance Agreement (PMA), to at least one Abcor customer at a substantial **[**10]** discount and then falsified its own records to hide this discount to avoid giving a similar discount on its General Services Administration (GSA) contract. In particular, one AMI employee testified that, when he could not locate a file during discovery, he was told to create a dummy contract and "bring it to court." AMI also began offering a new Full Maintenance Agreement ("FMA"), which plaintiffs assert was deceptive because it offered essentially the same service as the PMA, but at a lower price. [2] Plaintiffs assert that the FMA was a special contract designed for use solely in the Washington area against Abcor.

The GSA contract referred to by plaintiffs requires AMI to give comparable price discounts on its GSA Schedule Contract as it gives to an "identified customer or category of customers." AMI suggests that any price cuts to Abcor customers **[**11]** would not invoke this clause because the "identified category of customers" was limited to states. Despite substantial discovery, plaintiffs remain unable to counter AMI's explanation of the GSA contract price reduction clause. In any event, Abcor may not complain of an antitrust violation if AMI violated a duty to a third party by engaging in what would otherwise be legitimate competition on the merits.

A further problem with plaintiffs' argument arises because the price cuts were not predatory, *i.e.*, selling below cost to drive Abcor permanently out of the market to enable future monopolistic behavior. Given that AMI faced stiff competition in the Washington area from Abcor, it was entitled to respond with non-predatory price cutting. If anything, AMI's actions suggest enhanced competition.

While plaintiffs admit that the price cuts by AMI were not predatory, they nonetheless contend that the price discounts were irrational and anticompetitive because AMI risked having to reduce its GSA contract price just to compete with Abcor. This argument encounters several problems. First, as discussed above, plaintiffs have not produced evidence to show that AMI actually risked reductions **[**12]** in its GSA contract prices. Second, they have neither contended nor shown that the discounted prices were below costs. As a result, even if AMI had to reduce

[2] The alleged deception would not have harmed consumers because they would ostensibly have received the same service as under the PMA contract, but at a lower price.

prices on the GSA contract, the price scheme would not be predatory. Finally, the evidence clearly indicates that AMI did not expect to reduce its prices on the GSA contract and was thus not expecting to suffer the losses asserted by plaintiffs. Whether or not such an action would violate AMI's contract with GSA concerns GSA, not Abcor.

b. Misuse of Confidential Financial and Customer Information

Plaintiffs argue that AMI obtained Abcor's customer list during the negotiations to acquire Abcor and then used that list to solicit Abcor customers. This argument encounters at least two problems. First, while it is clear the AMI has an Abcor customer list, plaintiffs do not know how AMI obtained the list. Kibler cannot remember **[*929]** whether or not he supplied AMI with a list during the negotiations. AMI could well have obtained the list through legitimate means. Kibler admitted that Abcor has an AMI customer and price list. If legally obtained, the defendant was free to use it to locate potential customers for solicitation. **[**13]** Second, Abcor admits that its customer list is not secret. AMI sold all of the equipment in the alleged market, so it knows who requires service.

Plaintiffs also contend that AMI obtained financial information during the acquisition negotiations and used the information to infer Abcor's profit margin. With such information, they assert, AMI could then determine exactly how low it had to cut prices to eliminate Abcor's profits. AMI responds by pointing out that it obtained only aggregate financial information, nothing with specific information on profit margins. While use of financial information revealed in acquisition negotiations would abuse Abcor's confidence in revealing the information, such use would not necessarily constitute a violation of the antitrust laws. Moreover, nothing in the record shows that AMI actually used the information in this way. ***HN6***[] Mere assertions by the plaintiffs are not enough to survive summary judgment.

c. Selective Denial of Parts

For many years, Abcor was able to purchase parts for AMI machines over-the-counter at AMI's parts depot in the Washington area. **[**14]** In mid-1988, AMI terminated this service for all "non-end users" (including Abcor) and terminated Abcor's ability to order parts by telephone from the Chicago parts center. Abcor is free to order parts, but it must do so in writing. While Abcor has not lost any customers because of these decisions, plaintiffs allege that the new system inhibits Abcor's ability to handle emergencies. These hindrances, they argue, were instituted as part of an overall plan to destroy Abcor.

AMI responds that the Washington area parts depot is only for AMI servicing. It sometimes lets machine owners servicing their own equipment buy directly to foster goodwill. AMI declines to sell locally to Abcor because it feels Abcor should bear its own inventory costs. The plaintiffs are free to purchase parts from Chicago. In fact, total purchases have increased in recent years. If Abcor wants to ensure emergency access to a supply of parts, it may do so by maintaining its own stockpile rather than "free riding" on the inventory costs incurred by AMI. AMI says it terminated its acceptance of phone orders to avoid confusion and disputes over orders. [3] In addition, AMI points out that Abcor has not lost a contract **[**15]** because it was unable to get parts.

In general, ***HN7***[] a seller has the right to choose with whom it wishes to deal. For example, in *Olympia Equip. Leasing v. Western Union Telegraph, 797 F.2d 370 (7th Cir. 1986)*, the defendant Western Union had encouraged competition in the telex equipment market by having its salesmen sell competing equipment, including the plaintiff's. When Western Union ceased having its own salesmen market competing equipment, the plaintiff filed suit. The court held that "a firm with lawful monopoly power has no general duty to help its competitors, whether by holding a price umbrella over their heads or otherwise pulling its competitive punches." *797 F.2d at 375*. The plaintiff had no right to "free ride" on the sales force of the defendant. **[**16]** *Id. at 377-78*. *Cf.* *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)* (monopolist film maker did not have to facilitate competition from other camera manufacturers by revealing new film prior to marketing).

[3] AMI acknowledges that it sometimes allows phone orders from individual customers that are smaller with a lower risk in case of error.

HN8[] The right to refuse to deal, however, is not unfettered. The plaintiffs here point to the decision in *General Industries Corp. v. Hartz Mountain Corp., 810 F.2d 795 (8th Cir. 1987)*. In *Hartz*, the court upheld a verdict for the plaintiff under the Sherman **[*930]** Act. Plaintiff, a former distributor for the defendant Hartz, was terminated after it began to carry competing brands. The court noted that "although a refusal to deal, without more, does not violate the antitrust laws, the Supreme Court has found that 'if accompanied by unlawful conduct or agreement, or conceived in monopolistic purpose or market control, even individual sellers' refusals to deal have transgressed the [Sherman] Act.'" *810 F.2d at 802* (quoting *Times-Picayune, 345 U.S. at 625*).

AMI's change in parts **[**17]** policy simply does not rise to the same level of anticompetitive activity. The defendant in *Hartz* completely severed business relations with the plaintiff. By contrast, AMI has not eliminated Abcor's access to parts. It has only eliminated Abcor's "free ride" by shifting the inventory cost to the plaintiff.

d. Lies and Misinformation

Plaintiffs further contend that AMI engaged in a campaign of spreading lies and misinformation to create the impression that Abcor was going out of business. These accusations stem from two events. In the first, Bonnie Dunsing, an AMI employee, testified that an AMI manager, Ron Gallier, instructed her to call Abcor customers and tell them that Abcor was going out of business altogether. While Abcor was in fact going out of the graphics *supplies* business, it was continuing its *service* business. Dunsing refused to make the calls and was terminated soon thereafter for revealing confidential information to a competitor. AMI responds by arguing that Dunsing misconstrued her instructions because, as she admitted, Gallier never specifically referred to the *service* business, only to going out of business in general.

In the second incident, **[**18]** an AMI salesman told the AFL-CIO, a large Abcor customer, that Abcor was going out of the supplies business and might soon go out of the service business as well. While plaintiffs concede that the AMI salesmen said nothing untrue, the customer was left with the incorrect impression that Abcor would be going out of business entirely. AMI corrected the misunderstanding as soon as it became aware of the mistake.

The record contains evidence indicating that both incidents may have occurred and the incidents lend some weight to the plaintiffs' allegations. Nevertheless, these two incidents alone do not, without more, constitute enough evidence to support a finding of attempted monopolization. ***HN9***[] To avoid summary judgment, the plaintiffs must produce not "merely colorable" but "significantly probative" evidence. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249-50, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

e. Hiring of Abcor Employees

The plaintiffs allege that AMI hired two Abcor service technicians, when they were not needed, to hurt Abcor and help solicit Abcor customers. **[**19]** As AMI points out, Kibler is a former AMI employee who started Abcor with six former AMI employees. Abcor has consistently hired AMI employees and used them to garner customers away from AMI. The fact that AMI has now hired two back is only a sign that it is fighting back. Kibler himself described the situation as "you lose two, you get two back."

In the specific instances at issue here, nothing suspicious taints the hiring of the two employees. Both had strong motivations to leave Abcor. One was divorcing Kibler's daughter. The second was experiencing personal problems, had left Abcor before, and had been reprimanded on numerous occasions at Abcor. AMI claims, and Abcor does not dispute, that both employees initiated the contact. Moreover, ***HN10***[] special concern must be given to finding antitrust violations for hiring personnel away from competitors. Courts should be careful not to impede the ability of the employee to market his or her skills. III Areeda & Turner, ***Antitrust Law*** § 738d (1978).

f. AMI's Actions Viewed as a Whole

Plaintiffs argue that even if each individual action cited **[**20]** above does not amount to **[*931]** an antitrust violation, the court should look at the defendant's actions as a whole and infer a pattern of anticompetitive activity. While the court should view the entire record, the actions here do not support a finding of anything more than aggressive competition. Even if AMI has engaged in some unfair competition, as we noted in *Military Services*

Realty, Inc. v. Realty Consultants of Virginia, Ltd., 823 F.2d 829, 832 (4th Cir. 1987), **HN11**[] "'courts should be circumspect in converting ordinary business torts into violations of antitrust laws. To do so would be to 'create a federal common law of unfair competition' which was not the intent of the antitrust laws.'" [4] The "sporadic activity" identified by the plaintiffs does not amount to an antitrust violation.

[21]** 3. *Antitrust Injury*

The district court held that plaintiffs had failed to produce evidence of any antitrust injury. The court noted that Abcor had not lost a single customer or contract or any loss of market share, and nothing indicated any loss stemming from illegal, anticompetitive activity. The Sherman Act is designed to protect competition, not competitors. *See* Brown Shoe Co. v. United States, 370 U.S. 294, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962).

The plaintiffs point to testimony from its economic expert indicating that Abcor's profit margin had declined in the last two years, just after AMI is alleged to have started its campaign to drive Abcor out of business. While Abcor's profit margin may have declined, the plaintiffs have failed to show a causal link to anticompetitive activity. More aggressive competition on the merits from AMI may also have reduced Abcor's profit margin as it struggled to respond. For example, having to warehouse its own supply of parts rather than relying on AMI may have increased Abcor's costs. Plaintiffs' expert, who was unfamiliar with the term "antitrust injury" prior to his deposition, did not identify the source of **[**22]** the reduced profit margin.

4. *Market Definition and Dangerous Probability of Success*

Plaintiffs seek a narrow market definition limited to the servicing of AMI equipment in the Washington, D.C., area. AMI argues that servicing of similar equipment made by other manufacturers and servicing of other reproductive equipment, such as photocopying machines, should be included. The district court found a genuine issue of fact existed concerning market definition and refused to grant the defendant's motion for summary judgment on this issue.

The district court also declined to grant summary judgment on the issue of dangerous probability of success. AMI argues that, in the Fourth Circuit, no dangerous probability of success exists as a matter of law unless the defendant controls 70% of the market. *See* White Bag Co. v. International Paper Co., 579 F.2d at 1387. AMI has, at most, 25% of the relevant market. In fact, Abcor dominates the local market. Plaintiffs argue that if AMI succeeded in driving Abcor out of the market, AMI would probably attain more than 70% of the market. The fact that Abcor has a bigger share now, they contend, is negated by the much greater **[**23]** size of AMI overall.

Because we affirm the district court's grant of summary judgment on the issues of specific intent and anticompetitive activity, we need not, and do not, reach these other questions.

III.

Plaintiffs have produced evidence to show that AMI sought to increase its market share and perhaps even to drive Abcor out of the market completely. However, **HN12**[] "the antitrust laws were designed to protect competition, not competitors. The elimination of a single competitor[,] standing alone, does not prove anticompetitive effect." Military Serv. Rlty., 823 F.2d at **[*932]** 832 (citations omitted). When the record is viewed as a whole, it shows no more than that the defendant began a campaign of more aggressive competition, which has not been very successful. Injury to Abcor, if any, is the result of more competition, not predatory action. We therefore affirm the grant of summary judgment in favor of the defendant by the district court.

AFFIRMED.

Opinion

OPINION

Defendant Cessna Aircraft Company has moved pursuant to *28 U.S.C. § 1292 (b)* to certify this Court's August 30, 1990 order denying in part Cessna's motion for summary judgment. Cessna has requested that the Court certify the following question of law:

Did the District Court correctly find that Gulfstream Associates, Inc. had standing as a direct purchaser of the Gulfstream III, serial no. 426, aircraft, for the purposes of recovering antitrust damages in circumstances where plaintiff assigned its contract to purchase the aircraft, did not pay the purchase price and did not receive title to or take delivery of the aircraft?

Cessna has also requested a stay of the action pending the appeal it seeks. For the reasons stated below, the Court will decline to grant an interlocutory **[*2]** appeal.

I. BACKGROUND

On August 30, 1990, the Court issued an order which, among other things, denied "Cessna's motion for summary judgment which arises out of the purchase of Gulfstream III, serial no. 426. . . ." August 30, 1990 Order at 2. The Court also issued an accompanying 22 page opinion which sets forth certain undisputed facts relevant to the issue now before the Court. Plaintiff Gulfstream III Associates, Inc. negotiated a price of $ 9,975,000, subject to an escalation clause, with the manufacturer, Gulfstream Aerospace Corporation. August 30, 1990 Opinion at 12. Plaintiff then assigned the contract to JB & A Aircraft, Inc. for $ 10,020,000. Id. The assignment to JB & A was independently negotiated between plaintiff and JB & A. Id. at 13. Plaintiff paid $ 3,497,500 to the manufacturer in cash deposits before the assignment, Id. at 12, and remained liable after the assignment for the full amount of the balance on its contract with the manufacturer. Id. at 14. R.H. Macy & Co. in turn received an assignment from JB & A and took delivery of the airplane. Id. at 13. Plaintiff then received $ 2,984,657.30 from Macy's and JB & A. Id. The difference **[*3]** between this payment and plaintiff's deposit to the manufacturer was $ 512,841.70, an amount which plaintiff took as a loss in its tax return. Id.

The Court held that plaintiffs, despite assigning their contract to JB & A, had standing to bring their antitrust claim under the direct purchaser doctrine of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061 (1977)*. Opinion of August 30, 1990 at 15. It is this holding which Cessna now seeks to challenge via interlocutory appeal.

II. DISCUSSION

HN1[] Title *28 U.S.C.A. § 1292 (b) (Supp. 1990)* provides in relevant part:

When a district judge, in making in a civil action an order not otherwise appealable under this section, shall be of the opinion that such order involves a controlling question of law as to which there is substantial ground for difference of opinion and that an immediate appeal from the order may materially advance the ultimate termination of the litigation, he shall so state in writing in such order. . . .

Plaintiff does not dispute that the order on which Cessna seeks an interlocutory appeal involves, in the terms of *§ 1292 (b)*, "a controlling question of law. . ." Plaintiff does dispute, however, **[*4]** that there is "substantial ground for difference of opinion" as to the question of law decided. Plaintiff's Memorandum of Law in Opposition at 4-6. [1]

This Court has held twice that plaintiff has standing to bring its antitrust claim against Cessna. On January 11, 1988, in a related case, Judge Lechner held that Gulfstream III Associates, Inc. was the direct **[*5]** purchaser of the same airplane which is currently at issue. *Rosefielde v. Falcon Jet Corp., 701 F. Supp. 1053, 1073 (D.N.J. 1988)*

---

[1] Plaintiff also argues that an interlocutory appeal will not materially advance the termination of the litigation. Plaintiff's Opening Memorandum at 6-7. If the Court certified the question presented and the Third Circuit Court of Appeals held that plaintiff has no standing, this case would be completely finished at the trial court level. On the other hand, plaintiffs may or may not appeal the Court's dismissal of their other claims. See August 30, 1990 Order at 2 (dismissing plaintiffs' claims concerning other airplanes). Because the Court holds that there is no substantial ground for difference of opinion, it will not reach the advancement of litigation issue.

(relying on Illinois Brick and *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224 (1968))*. [2] Thus, the August 30, 1990 Opinion was the second time that this Court has held that plaintiff has standing to bring its claim. The Court's consistency on this issue creates some doubt as to the substantiality of ground for difference of opinion.

[*6] The current state of the law leaves even less doubt that plaintiff has standing to bring its claim under § 4 of the Clayton Act, *15 U.S.C. § 15*. [3] **[*7]** The United States Supreme Court recently reaffirmed the direct purchaser rule in *Kansas v. Utilicorp United, Inc., 110 S. Ct. 2807 (1990)*:

The rationales underlying Hanover Shoe and Illinois Brick will not apply with equal force in all cases. We nonetheless believe that ample justification exists for our stated decision not to 'carve out exceptions to the [direct purchaser] rule for particular types of markets.' The possibility of allowing an exception, even in rather meritorious circumstances, would undermine the rule. . . . In sum, even assuming that any economic assumptions underlying the Illinois Brick rule might be disproved in a specific case, we think it an unwarranted and counterproductive exercise to litigate a series of exceptions. Having stated the rule in Hanover Shoe, and adhered to it in Illinois Brick, we stand by our interpretation of § 4. *110 S. Ct. at 2817* (citation omitted; brackets in original). [4]

Cessna argues that the direct purchaser rule does not govern the issue of plaintiff's standing because plaintiff is not a purchaser at **[*8]** all. Letter Memorandum of October 9, 1990. Cessna argues that because plaintiff never took delivery of the airplane, never received title to it, never paid the purchase price, and assigned its contract of purchase, plaintiff did not purchase the airplane and therefore has no standing. Cessna's Opening Memorandum at 9-11.

The fact that plaintiff never took possession of the airplane does not render plaintiff a non-purchaser. Plaintiff was allegedly harmed when it paid an artificially high price resulting from the price-fixing conspiracy with which plaintiff has charged Cessna and other manufacturers. Whether plaintiff actually comes into possession of the airplane is irrelevant to whether, as alleged, it suffered that harm. ***HN4***[] Receipt of title is likewise irrelevant to the determination of a direct purchaser. See In re Fertilizer Antitrust Litigation, 1979-2 Trade Cas. (CCH) para. 62,894, at 79,174-75 (E.D. Wash. 1979) (assuming passage of title directly from defendant price-fixers to plaintiff consumers, only consignee retailers had standing under Illinois Brick).

The Court also rejects Cessna's argument that plaintiff did not pay the purchase price to the manufacturer and therefore **[*9]** cannot be considered a purchaser. The Court found that "plaintiff paid $ 3,497,500 in cash deposits towards the Gulfstream III, serial no. 426, prior to the assignment." August 30, 1990 Opinion at 12. The fact that

---

[2] Because Cessna was not a party to Rosefielde, Judge Lechner's decision could not have had any preclusive effect on the Court's recent determination of the standing issue. See *Blonder-Tongue Laboratories, Inc. v. University of Illinois Foundation, 402 U.S. 313, 329, 91 S. Ct. 1434, 1443 (1971)* ***HN2***[] (due process prohibits issue preclusion against non-party to first litigation of issue). The August 30, 1990 indicates that Judge Lechner's decision had no collateral estoppel effect on the Court's recent decision on standing. See August 30, 1990 Opinion at 15 n.1 (referring to, but not relying on, Rosefielde).

[3] ***HN3***[] Section 4 of the Clayton Act provides in relevant part: "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . and shall recover threefold the damages by him sustained. . . ." *15 U.S.C.A. § 15(a) (Supp. 1990)*.

[4] Cessna argues that Utilicorp aids its argument in favor of certification pursuant to *28 U.S.C § 1292(b)* because the district court in Utilicorp certified the direct purchaser issue to the Tenth Circuit Court of Appeals. Cessna Reply Memorandum at 4. When the district court certified the issue, however, the Seventh Circuit decision which the district court had followed had recently been withdrawn. ***In re Wyoming Tight Sands Antitrust Cases, 695 F. Supp. 1109, 1119 (D. Kan. 1988)***, aff'd, *866 F.2d 1286 (10th Cir. 1989)*. By the time the Tenth Circuit answered the certified question, the Seventh Circuit had issued an en banc opinion reversing its original stance. *866 F.2d at 1293*. The Supreme Court granted certiorari to resolve the conflict between the Seventh and Tenth Circuits. 110 S. Ct. at 2811. There is no such history in this case. In fact, Cessna has not brought to the Court's attention any apposite case from any court to support its position.

these payments represented only a fraction of the price plaintiff negotiated with the manufacturer does not make plaintiff any less a purchaser. In Hanover Shoe, the Supreme Court refused to apportion the overcharge paid between direct and indirect purchasers. *392 U.S. at 493, 88 S. Ct. at 2231*. In Illinois Brick, the Supreme Court construed Hanover Shoe to rest "on the judgment that the antitrust laws will be more effectively enforced by concentrating the full recovery for the overcharge in the direct purchasers rather than by allowing every plaintiff potentially affected by the overcharge to sue only for the amount it could show was absorbed by it." *431 U.S. at 734-35, 97 S. Ct. at 2069*. The overcharged direct purchaser, and not any remote party in the chain of distribution, is the party injured so as to have standing. *Id. at 729, 97 S. Ct. at 2066*. See also P. Areeda & D. Turner, ***Antitrust Law***, para. 337 (1978) (middleman ordinarily recovers from **[*10]** offender without deduction for amount of injury passed on to consumer). The manufacturer in this case overcharged plaintiff if it overcharged anyone.

Cessna cites *New York v. Hendrickson Bros., Inc., 840 F.2d 1065* (2d Cir.), cert. denied, *488 U.S. 848, 109 S. Ct. 128 (1988)* for the proposition that a plaintiff must pay the purchase price to have standing. Cessna's Opening Memorandum at 12. In Hendrickson, the State of New York had standing under the Clayton Act because it had contracted with an antitrust conspirator, even though the federal government contributed 75 percent of the contract price. *840 F.2d at 1079*. Although Cessna attempts to distinguish Hendrickson on the ground that the federal government merely reimbursed the state government, Cessna's Reply Memorandum at 5-6, the federal government was held to be an indirect purchaser because it "neither dealt with the contractors nor owed them any funding duty." *840 F.2d at 1079*. JB & A and Macy's likewise did not negotiation the prices they paid directly with the alleged co-conspirator and did not owe funding duties to it. On the other hand, JB & A and Macy's, as well as plaintiff, may have had funding obligations **[*11]** to the manufacturer. See Closing Memorandum, Sale of Gulfstream III to R.H. Macy & Co., Inc., [5] Cessna Exhibit 57 in support of its cross-motion for summary judgment. Only one of the three can have standing, however, and so funding obligations cannot be the dispositive factor in this case. Plaintiff negotiated a price directly with the manufacturer and was the first of the potential purchasers to make payments to the manufacturer.

Under certain circumstances, a plaintiff can have standing without making any payment to the alleged price-fixer. In Fertilizer Antitrust Litigation, retailers who sold on consignment were held to have standing even though the retailers received money from defendants, rather than paying them. 1979-2 Trade Cas. at 79,175. **[*12]** The court reasoned that the consignment retailers had to decide whether to pass on or absorb the alleged overcharge. Id. The same reasoning governs here in a far less extreme application of Illinois Brick. Plaintiff is suing to recover for a 15 percent overcharge of the purchase price, August 30, 1990 Opinion at 9, or $ 1,496,250 (before trebling). This amount is well below the $ 3,497,500 plaintiff paid the manufacturer before assigning its contract. Although the loss that plaintiff took was only $ 512,842.70, this number does not reflect how much of the alleged 15 percent overcharge plaintiff may have absorbed. At least where the amount of the payments made is greater than the alleged overcharge, a purchaser has standing despite not having paid the entire purchase price.

Plaintiff's assignment of its contract, after it made payments under the contract, does not destroy its standing. The price which plaintiff negotiated with the manufacturer put it at risk with respect to any antitrust violation that went into determining that price. Although plaintiff presumably sold its interest to its assignee at an even higher price than it would have in the absence of the alleged violation, **[*13]** "the buyer is equally entitled to damages if he raises the price for his own product." *Hanover Shoe, 392 U.S. at 489, 88 S. Ct. at 2229*. Unlike the assignors, plaintiff negotiated a price directly with the alleged price-fixer. Having done so, plaintiff did not lose its standing by assigning its contract.

A subsidiary question is whether, in assigning its contract, plaintiff also assigned its potential claims for antitrust violations. As a general proposition, a claim under the Clayton Act can be assignable. *In re Fine Paper Litigation, 632 F.2d 1081, 1090 (3d Cir. 1980)* (holding assignments of Clayton Act claims not in conflict with Illinois Brick). In Fine Paper, however, the parties to the assignment executed express assignments of antitrust rights. *632 F.2d at*

---

[5] The Court gives little weight to the characterization of this transaction as a sale by the manufacturer to Macy's. There is little reason to believe the parties to the closing had the arcana of antitrust standing in mind when they named the closing memorandum.

1089. In contrast, Cessna has not pointed to any language in plaintiff's assignment to JB & A that so much as alludes to rights under the antitrust laws. See Purchase Agreement Assignment, Cessna Exhibit 56 in support of its cross-motion for summary judgment. On this record, the Court will not infer an assignment of plaintiff's Clayton Act rights.

Plaintiff's direct contractual obligations and payments **[*14]** to an alleged price-fixer give plaintiff standing to sue under the Clayton Act. Especially in light of the Supreme Court's recent holding in Utilicorp that ***HN5***[] the direct purchaser rule applies regardless of the applicability of the rationale underlying the rule, *110 S. Ct. at 2817*, the Court can not state that there is substantial ground for difference of opinion that plaintiff has standing.

III. CONCLUSION

For the foregoing reasons, the Court will deny Cessna Aircraft Company's motion to certify pursuant to *28 U.S.C. § 1292 (b)*.

An appropriate order is attached.

ORDER

In accordance with the Court's opinion filed herewith,

It is on this day of October, 1990,

ORDERED that defendant Cessna Aircraft Company's motion to certify pursuant to *28 U.S.C. § 1292 (b)* is denied.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN2[] **Summary Judgment, Entitlement as Matter of Law**

In assessing whether the movant has met his burden under *Fed. R. Civ. P. 56(c)*, the court should view the evidence and all factual inferences therefrom in the light most favorable to the party opposing the motion. All reasonable doubts about the facts should be resolved in favor of the non-movant. If the record presents factual issues, the court must not decide them; it must deny the motion and proceed to trial. Summary judgment may be inappropriate even where the parties agree on the basic facts, but disagree about the inferences that should be drawn from these facts.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN3[] Summary Judgment, Entitlement as Matter of Law

The party opposing a motion for summary judgment need not respond to it with any affidavits or other evidence unless and until the movant has properly supported the motion with sufficient evidence.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] Summary Judgment, Entitlement as Matter of Law

On a motion for summary judgment, the moving party must demonstrate that the facts underlying all the relevant legal questions raised by the pleadings or otherwise are not in dispute, or else summary judgment will be denied, notwithstanding that the non-moving party has introduced no evidence whatsoever.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN5[] Summary Judgment, Opposing Materials

In opposing a motion for summary judgment, the non-moving party may not rest upon mere allegations, but must rebut any facts presented by the moving party in order to demonstrate the existence of a genuine and material issue of fact for trial. Furthermore, the mere existence of a scintilla of evidence in support of the non-movant's position is insufficient; there must be evidence on which a jury could reasonably find for the non-movant. In determining whether this evidentiary threshold has been met, the trial court must view the evidence presented through the prism of the substantive evidentiary burden applicable to the particular cause of action before it. If the non-movant fails to adduce evidence which would be sufficient, when viewed in a light most favorable to the non-movant, to support a jury finding for the non-movant, summary judgment may be granted.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN6[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment is mandated, if after adequate time for discovery, the non-moving party fails to make a showing sufficient to establish the existence of an element essential to that party's case and on which that party would bear the burden of proof at trial.

Governments > Legislation > Interpretation

HN17[] **Price Discrimination, Competitive Injuries**

The legislative intent of P.R. Law 75, *P.R. Laws Ann. tit. 10, § 278a* is to equalize the parties bargaining power and to balance the contractual conditions of two groups unequal in their strength. The distributor is to be not only protected from arbitrary terminations, but also from undue practices on the part of principals or grantors.

HN18[] **Price Discrimination, Competitive Injuries**

In enacting and amending P.R. Law 75, *P.R. Laws Ann. tit. 10, § 278a*, the Puerto Rico legislature recognizes that principals possess the economic clout not only to eliminate dealers outright, but also without fully eliminating them, to gradually reduce and impair the extent of their previously established relationships.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Labor & Employment Law > ... > Employment Contracts > Conditions & Terms > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Gasoline Fuels > Gasoline Dealers & Distributors

HN19[] **Price Discrimination, Competitive Injuries**

P.R. Law 75, *P.R. Laws Ann. tit. 10, § 278a*, leaves principal and dealer free to change or bargain in good faith the prices and credit terms for the sale of the franchised product. Law 75 simply supplements the contract law to the extent necessary to protect weaker dealers from the abusive employment of one-sided contract terms by economically superior principals.

Opinion

[*1558] WILLIAM HOEVELER, UNITED STATES DISTRICT JUDGE

This action involves two consolidated cases, both of which are before the Court on two motions for summary judgment by Whirlpool Corp. (hereinafter "Whirlpool"), against UMCO International (hereinafter "UMCO").

I. Background

In late 1984, UMCO entered into negotiations with Whirlpool to establish a distributorship in Puerto Rico for Whirlpool products. UMCO's stated objective was to take over what it feels was an "exclusive" distributorship in Puerto Rico which was formerly enjoyed by the Protane Gas Company. On December 21, 1984, UMCO executed a standard Whirlpool distributorship to be effective December 28, 1984, for a one year period ending December 28, 1985. There is no explicit term in the agreement which grants to UMCO the same exclusive rights and privileges that it contends were previously held by Protane Gas. It is UMCO's disappointment over its unrequited desire to be Whirlpool's "exclusive dealer" which **[**2]** animates the conflict now unfolding before this Court.

Whirlpool's interests did indeed lie beyond an exclusive relationship with UMCO. Approximately six weeks prior to Whirlpool's execution of the agreement with UMCO, Whirlpool had entered into another distributorship agreement with Western Auto Sales (hereinafter "Western Auto"), which contemplated entering the Puerto Rican market sometime in 1985. UMCO, however, was not wholly in the dark concerning this agreement between Whirlpool and Western Auto, and had in fact made inquiries as to what impact the Whirlpool/Western Auto liaison would have on the Whirlpool/UMCO relationship.

In the Fall of 1985 Whirlpool began supplying Western Auto of Puerto Rico, and the relationship between UMCO and Whirlpool soured. By Spring of 1985 UMCO had initiated this action against Whirlpool in the Superior Court of Puerto Rico. The allegations included violations of Law 75, Dealers' Contracts, *10 L.P.R.A. sec. 278 et seq.* for impairment of its distributorship agreement; and violations of the Puerto Rico Anti-Monopoly Act, *10 L.P.R.A. sec. 263* (the Puerto Rican counterpart of the Robinson-Patman Act) for price discrimination. This action was removed **[**3]** on grounds of diversity of citizenship in April of 1985 to the United States District Court for the District of Puerto Rico.

Now in federal court, UMCO moved to enjoin Whirlpool from selling its products to Western Auto. The plot then thickens. Pursuant to this motion for injunction, there was an evidentiary hearing during which Whirlpool learned of certain dealings **[*1559]** which caused it to conclude that UMCO had been bribing Whirlpool's sales manager. In redress for these alleged bribes, Whirlpool initiated its own proceedings before this Court for violations of the Federal Racketeering Influenced Corrupt Organizations Act (RICO).

In an effort to sort out the chain of events, a brief recapitulation might prove helpful. First, UMCO expresses its desire to be an exclusive Whirlpool dealer, signs a non-exclusive dealership contract, and files suit against Whirlpool when Whirlpool begins dealing with Western Auto. Then, Whirlpool learns of suspected bribes being made by UMCO to Whirlpool's man in the field, and responds to this affront with a RICO action in the Southern District of Florida. The two actions were consolidated. Now before this Court are Whirlpool's two motions **[**4]** for summary judgment. The first motion arises from UMCO's first action, which for clarity's sake will hereinafter be called the "Puerto Rico Action". The second motion is directed against UMCO's counterclaims in the second action, hereinafter to be referred to as the "Florida Action". The two motions are examined in turn, below.

II. Standard on Summary Judgment

The standard to be applied in reviewing a summary judgment motion is stated unambiguously in *Rule 56(c) of the Federal Rules of Civil Procedure*:

> HN1[] The judgment sought shall be rendered forthwith if the pleadings, depositions, answers to interrogatories and admission on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.

As set forth in the Rule, summary judgment may be entered only where there is no genuine issue of material fact. Moreover, the moving party bears the burden of meeting this exacting standard. *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 1608, 26 L. Ed. 2d 142, 154 (1970)*. **[**5]**

In applying this standard, the Eleventh Circuit has explained that:

> HN2[] In assessing whether the movant has met this burden, the courts should view the evidence and all factual inferences therefrom in the light most favorable to the party opposing the motion. *Adickes, 398 U.S. at 157, 90 S. Ct. at 1608*; [*Environmental Defense Fund v.*] *Marsh*, 651 F.2d at 991 [5th Cir. 1981]. All reasonable doubts about the facts should be resolved in favor of the non-movant. *Casey Enterprises v. Am. Hardware Mutual Ins. Co., 655 F.2d 598, 602 (5th Cir. 1981)*. If the record presents factual issues, the court must not decide them; it must deny the motion and proceed to trial. *Marsh*, 651 F.2d at 991; *Lighting Fixture & Elec. Supply Co. v. Continental Insurance Co., 420 F.2d 1211, 1213 (5th Cir. 1969)*. Summary judgment may be inappropriate even where the parties agree on the basic facts, but disagree about the inferences that should be drawn from these facts. *Lighting Fixture & Elec. Supply, 420 F.2d at 1213*. **[**6]** . . .
>
> Moreover, HN3[] the party opposing a motion for summary judgment need not respond to it with any affidavits or other evidence unless and until the movant has properly supported the motion with sufficient evidence. *Adickes v. S.H. Kress & Co., 398 U.S. at 160, 90 S. Ct. at 1609-10*; *Marsh*, 651 F.2d at 991. HN4[] The moving party must demonstrate that the facts underlying all the relevant legal questions raised by the pleadings or otherwise are not in dispute, or else summary judgment will be denied, notwithstanding that the non-moving party has introduced no evidence whatsoever. *Brunswick Corp. v. Vineberg, 370 F.2d 605, 611-612 (5th Cir. 1967)*. *See*, *Dalke v. Upjohn Co., 555 F.2d 245, 248-49 (9th Cir. 1977)*.

Clemons v. Dougherty County, Ga., 684 F.2d 1365, 1368-1369. (11th Cir. 1982).

HN5[] In opposing a motion for summary **[**7]** judgment, the non-moving party may not rest upon mere allegations, but must rebut any facts presented by the moving party in order to demonstrate the existence of a genuine and material issue of fact for trial. *Adickes 398 U.S. at 160, 26 L. Ed. 2d at 156*. Furthermore, the mere existence of a scintilla of evidence in support of the non-movant's position is insufficient; **[*1560]** there must be evidence on which a jury could reasonably find for the non-movant. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 106 S. Ct. 2505, 2511, 91 L. Ed. 2d 202, 214 (1986)*. In determining whether this evidentiary threshold has been met, the trial court must "view the evidence presented through the prism of the substantive evidentiary burden" applicable to the particular cause of action before it. *Id. 477 U.S. at 254, 91 L. Ed. 2d at 215*. If the non-movant fails to adduce evidence which would be sufficient, when viewed in a light most favorable to the non-movant, to support a jury finding for the non-movant, summary judgment may be granted. *Id. 477 U.S. at 253, 91 L. Ed. 2d at 215*. Moreover, **[**8]** HN6[] summary judgment is mandated, if after adequate time for discovery, the non-moving party fails to make a showing sufficient to establish the existence of an element essential to that party's case and on which that party would bear the burden of proof at trial. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-323, 91 L. Ed. 2d 265, 273, 106 S. Ct. 2548 (1986)*.

III. The Puerto Rico Complaint

There are two main thrusts to UMCO's Puerto Rico action. First, UMCO argues that Whirlpool's dealings with Western Auto are in violation of Puerto Rico's "Law 75" which protects the rights of distributors against suppliers. Second, UMCO alleges that the Whirlpool/Western Auto relationship is in violation of the Puerto Rico Anti-Monopoly Act *10 L.P.R.A. Section 263*, which is the Puerto Rican equivalent to the Robinson Patman Act.

A. UMCO'S CLAIM UNDER LAW 75

In Count I of the Puerto Rico action, UMCO claims that Whirlpool's dealings with Western Auto were detrimental to the established exclusive dealing arrangement between UMCO and Whirlpool, and thus in violation of Law 75, which provides that:

> **[**9]** *HN7*[] Notwithstanding the existence in a dealer's contract of a clause reserving to the parties the unilateral right to terminate the existing relationship, no principal or grantor may directly or indirectly perform any act detrimental to the established relationship or refuse to renew said contract on its normal expiration, except for just cause.

10 L.P.R.A. Sec. 278a. "The Legislature of Puerto Rico enacted Law 75 with the purpose of injecting stability and creating leverage between the parties to a distributorship contract, in order to impede arbitrary impairments or termination by principals after a distributor had created a favorable market for its product." *General Office Products Corp. v. Gussco Mfg. Inc., 666 F. Supp. 328, 330 (D. Puerto Rico 1987)* *citing* 18 *Dario de Sesiones* 1531 (1964).

Whirlpool's simple response to UMCO's claim under Law 75 is that there was no exclusive dealing arrangement between the parties, and thus Whirlpool's supplying to Western Auto can visit no injury to the "established" UMCO/Whirlpool relationship. The task at hand is therefore to determine whether exclusivity was **[**10]** in fact a component of the relationship established between the parties, or merely the fanciful yearning of UMCO.

1. *Law of the Case*

This, however, is not the first occasion that a court of law has pondered the fact or fancy of exclusivity between the parties at bar. While this action was pending in the District Court for the District of Puerto Rico, Whirlpool filed a motion for summary judgment which raised the identical argument now faced by this Court. The District Judge in Puerto Rico, Carmen Consuelo Cerezo, referred the matter to United States Magistrate Justo Arenas, who issued a Report and Recommendation on June 29, 1987, recommending that the motion for summary judgement on this claim under Law 75 be denied. In an Order dated April 18, 1988, Judge Cerezo adopted the recommendation of the Magistrate. Presently consolidated with another action before this Court, Whirlpool presents this motion for summary judgment in what is effectively "another bite at the apple." Understandably, UMCO claims that this issue, already having been decided by Judge Cerezo, should not be reopened by this Court, and further suggests that this Court **[*1561]** is barred from revisiting the **[**11]** issue by the doctrine of the "law of the case".

The "law of the case" doctrine is not, however, as restrictive of the this Court's jurisdiction as UMCO would believe. The Eleventh Circuit case of *Robinson v. Parrish, 720 F.2d 1548 (11th Cir. 1983)*, is particularly instructive on this point. In *Robinson*, a subsequent judge granted a motion for summary judgment which an earlier judge had rejected. The Eleventh Circuit held that plaintiffs were "misguided in arguing that the 'law of the case' doctrine should have barred the district judge below from ruling contrary to the previous district judge":

> The "law of the case" doctrine is "the rule under which the trial court and appellate courts are bound by any findings of fact or conclusions of law made by the appellate courts in a prior appeal of the case at issue." *United States v. Burns, 662 F.2d 1378 (11th Cir. 1981)*. The purpose of the doctrine is to bring an end to litigation by foreclosing the possibility of repeatedly litigating an issue already conclusively decided *White v. Murtha, 377 F.2d 428 (5th Cir. 1967)*. **[**12]** . . .
> To hold that a district court must rigidly adhere to its own rulings in an earlier stage of a case would actually thwart the purpose of the doctrine. New developments or further research often will convince a district court that it erred in an earlier ruling, or the court may simply change its mind. We believe it would be wasteful and unjust to require the court to adhere to its earlier ruling in such an instance.

Robinson, 720 F.2d at 1549-50. *See also* *United States v. Williams, 728 F.2d 1402 (11th Cir. 1984)*; *Cale v. Johnson, 861 F.2d 943, 948 (6th Cir. 1988)* (denial of summary judgment motion does not foreclose granting of motion by subsequent judge); *Paulson v. Greyhound Lines, Inc., 628 F. Supp. 888, 891* (D. Minn.), *aff'd*, *804 F.2d 506 (8th Cir. 1986)* (law of the case did not prevent granting of motion for summary judgment even though predecessor judge had twice denied same motion). In light of the authority discussed above, it is clear that no barrier precludes reexamination of Whirlpool's motion. Having now revisited the matter however, the Court concurs with the result **[**13]** reached by the Magistrate that the summary judgment be denied, but differs (as explained below) with the basis on which such a result should be premised.

2. *Reexamination of the Issues Presented*

Under Law 75, Whirlpool is prohibited from acting to the detriment of the "established relationship" between itself and UMCO. Accordingly, the first issue confronted by the Magistrate, and reexamined now, regards the exclusivity of the contractual relationship between the parties.

a. Exclusivity of the Contract

The contract itself is unambiguous; it contains no term granting or even implying exclusivity. It is a well settled tenet of Puerto Rican law that where a contract is unambiguous, its literal meaning must be applied. *31 L.P.R.A. Section 3471*. Moreover, Plaintiff actually requested an exclusivity clause, which was denied by Whirlpool. Transcript of the Preliminary Injunction hearing at page 213. [1] Furthermore, the very plausibility of an exclusive contract is undermined by Plaintiff's established knowledge before the signing of the contract, of Western Auto's planned entry into the Puerto **[**14]** Rican market for the sale of Whirlpool products. (Tr. 197, 200, 317-318, 332-333). In whole, the Magistrate concluded, and this Court agrees, that the contract gives no support whatsoever to UMCO's claim of exclusivity. Failing to demonstrate exclusivity from the face of the contract, UMCO shifts its argument beyond the world of *written* contract and into the largely uncharted realm of "Aquilian fault", or *in culpa contrahendo* -- the basis on which the Magistrate grounded his decision to recommend denial of the motion.

[*1562] b. In Culpa Contrahendo

Having concluded that the contract was not intended to be exclusive, the Magistrate nevertheless denied Whirlpool's motion for summary judgment based on the arcane principle of *culpa in contrahendo*. As stated in the Magistrate's Report and Recommendation:

> In Puerto Rico, the civil code, grounded on values of good faith and the doctrine **[**15]** of *culpa in contrahendo*, may impose extra-contractual liability ("Aquilian fault") under Art. 1802, *31 L.P.R.A. Section 5141*, [2] on whoever acts in a tortious or wrongful manner during preliminary negotiations. *Produciones Tommy Muniz, Inc. v. Comite Organizador de los VIII Juegos Panamericos (COPAN), 113 D.P.R. 517, 529, 13* Official Translations 666, 679 (1982) (unjustified withdrawal from negotiations breached good faith imposed by precontractual relations and abused the legal right to withdraw, imposing liability for damages): "Good faith . . . imposes on the parties negotiating or attempting to negotiate, an archetype of social conduct, loyalty and fidelity to the word given . . . and consists in that every party to the contractual relation commits himself trustingly to the loyal conduct of the other party. Each confides in that the other will not defraud him . . . The parties are under the obligation to conduct themselves according to good faith in the sense that each is burdened by a reciprocal loyalty to observe a conduct that is socially valuable and demandable." *Id. at 528, 13* Official Translations at 678.

The Magistrate continues: **[**16]**

> Concomitantly, the exercise of a right carried out in an abusive manner is a source of liability, such abuse occurring when it "exceeds the limits imposed by good faith or by the social or economic end of said right." *Id*. (quoting *Velilla v. Pueblo Supermarkets, Inc., 111 P.R. Dec. 585, 588 (1981)*, and citing *Soriano Tavarez v. Riviera Anaya, 108 P.R. Dec. 663 (1979))*. Just as withdrawal from precontractual negotiations when consummation is reasonably expected constitutes conduct actionable under Art. 1802, *Id. at 529*, 13 Official Translations at 678-679, so also here, setting up a reasonable expectation of compliance with a critical term

---

[1] Further references to the transcript of the preliminary injunction hearing will be referred to as "Tr.".

[2] The civil law doctrine of *culpa in contrahendo* is embodied in Art. 1802, ***31 L.P.R.A. sec. 5141*** which states that: A person who by an act or omission causes damage to another through fault or negligence shall be obliged to repair the damage so done. Concurrent imprudence of the party so aggrieved does not exempt from liability, but entails a reduction of the indemnity.

> upon which plaintiff moved in reliance, and subsequent noncompliance, if all elements are proven, imposes liability under Art. 1802. . . .
>
> United States law is not unaware of the underlying values of good faith and of the doctrine of *culpa in contrahendo*. Case law acknowledges precontractual liability on grounds similar to those applied by civil law in notions of good faith and *culpa in contrahendo*, through the legal institutions of "promissory estoppel," *Hoffman v. Red Owl Stores, Inc., [26 Wis. 2d 683], 133 N.W.2d 267 (1965)*; **[**17]** *Chrysler Corporation v. Quimby, [51 Del. 264], 144 A.2d 123 (1958)*, and "negligent misrepresentation," *Guilbert v. Phillips Petroleum Company, 503 F.2d 587 (6th Cir. 1974)*. *See also* Kessler & Fine, *Culpa in Contrahendo, Bargaining in Good Faith, and Freedom of Contract: A Comparative Study*, 77 Harv.L.Rev. 401, 448 (1964).

Ultimately, in his recommendation, the Magistrate concludes that based on the doctrine of *culpa in contrahendo*, the motion for summary judgment should be denied since "if the elements are proven, the noncompliance would be an act detrimental to the relationship in [violation of Law 75]."

[18]** After study of the doctrine, however, this Court hesitates to apply it to the facts at bar. The doctrine of *culpa in contrahendo* which literally means "fault in negotiating" dates back to 1861 and was first introduced in Germany to remedy "instances where a party by 'lack of diligence' had prevented the consummation of ***HN8***[] a valid contract . . . [Thus the negligent party is] held liable to the innocent party who had suffered damages [in reliance] on the validity **[*1563]** of the contract." See generally, Kessler & Fine, *Culpa in Contrahendo, Bargaining in Good Faith, and Freedom of Contract: A Comparative Study*, 77 Harvard L. Rev. 401 (1964). While this doctrine has not been adopted in this country except in Louisiana [3] and in Puerto Rico, it has been discussed by other jurisdictions as well. However, of the all cases found referring to the doctrine, none involves circumstances in which a contract was actually consummated by the parties. Rather, the doctrine appears to have been applied without exception only to situations in which one of the parties relied upon a contract being formed at some point in the future, and failing such contractual binding was **[**19]** prevented from realizing certain reasonable expectations. *See* *Kethley v. Draughon Business College, 535 So. 2d 502*, (La. App. 2 Cir. 1988); *Associated Executive Control, Inc. v. Bankers Union Life Insurance Co., 425 So. 2d 800 (La. App. 4 Cir. 1983)*; *Unit Two Architects, Inc. v. Modica, 376 So. 2d 979 (La. App. 1 Cir. 1979)*; *West Baton Rouge Parish School Board v. T.R. Ray, Inc., 367 So. 2d 332 (La. 1979)*; *Coleman v. Bossier City, 305 So. 2d 444 (La. 1975)*. In the case of *Snyder v. Champion Realty Corp., 631 F.2d 1253 (5th Cir. 1980)*, the former Fifth Circuit addressed the applicability of *culpa in contrahendo* to a case involving a brokerage contract for payment of a commission upon sale of a tract of land. The contract provided that the brokers would be paid the excess of any money over $ 125 per acre paid for the land by a buyer procured by them. Thereafter, a buyer who was originally willing to pay $ 150 per acre, defaulted twice on the sale and the seller negotiated directly with the buyer to effect a sale on credit at a lower price. The brokers sued to recover their **[**20]** commission and the court affirming summary judgment in favor of the defendant seller held:

> The plaintiffs, somewhat uncertain how to pigeon-hole their claim, argue that despite the terms of the brokerage contract, Champion is guilty of "legal fault", a kind of constructive bad faith, under the civilian doctrine of *culpa in contrahendo*. The doctrine is, in general terms, the civilian equivalent of the common law concept of promissory estoppel. It is used as a basis for compensating one party for his expenses incurred in reliance on another party's offer to form a unilateral contract where that offer is withdrawn before acceptance. See Comment, *Culpa in Contrahendo, in German French and Louisiana Law*, 15 Tul.L.Rev. 87 (1940). *It has nothing to do with this case*. (emphasis added).

631 F.2d at 1255-56.

[21]** Even the primary case relied on by the Magistrate in his recommendation, *Produciones Tommy Muniz, Inc. v. Comite Organizador de los VIII Juegos Panamericos (COPAN), 113 D.P.R. 517, 529, 13* Official Translations 666, 679 (1982) involved a situation where contract formation *was prevented* by unjustified withdrawal of one of the

---

[3] *See generally*, *La.Rev.Stat. Sec. 37:145* and *La.Civ.Code Art. 1878* and Art. 1967, Louisiana Statutes Annotated. *See also,* *Kethley v. Draughon Business College, 535 So. 2d 502, 506 n. 2 (La. App. 2 Cir. 1988)*.

parties. Indeed, Puerto Rico case law indicates that the doctrine is a doctrine of "extra-contractual liability" which does not apply where a contract has been consummated. *Produciones Tommy Muniz, Inc. v. Comite Organizador de los VIII Juegos Panamericos (COPAN), 113 D.P.R. 517, 529, 13* Official Translations 666, 676-679 (1982). *See also Arroyo v. Caldas*, 68 P.R.R. 639, 641 (1948) (Section 1802 (*culpa in contrahendo*) is "confined to . . . fault or negligence without there existing a prior obligation or a contract."); *Falcon v. E.M. Amy & Sons, Inc*., 87 P.R.R. 527, 533 (1963) ("Since the action filed herein stemmed from the nonperformance of the contractual obligation, it does not arise by virtue of Section 1802").

The Magistrate cited to no case in which this doctrine was applied **[**22]** to a contract already in existence. Nor has UMCO alerted this Court to any such authority. In short, although providing an interesting historical detour, this Court does not find that the doctrine of *culpa in contrahendo* provides a theory with which UMCO can overcome Whirlpool's motion for summary judgment. However, as examined below, there is another **[*1564]** basis whereby UMCO may successfully withstand summary judgment.

c. Impairment of the "Established Relationship"

Having explored the little known terrain of *in culpa contrahendo*, the Court presently returns to a scrutiny of the statute under which UMCO pursues its claim: Puerto Rico's Law 75, which states that:

> Notwithstanding the existence in a dealer's contract of a clause reserving to the parties the unilateral right to terminate the existing relationship, no principal or grantor may directly or indirectly perform any act detrimental to the *established relationship* or refuse to renew said contract on its normal expiration, except for just cause.

10 L.P.R.A. Sec. 278a. (emphasis supplied).

Failing to demonstrate that its contractual relationship with Whirlpool was "exclusive", UMCO nonetheless **[**23]** claims that the "established relationship" between the parties provided for exclusivity, and that Whirlpool's dealings with Western Auto were therefore in contravention of Law 75. Thus the threshold inquiry concerns the nature of the "established relationship" between the parties. Whirlpool argues that the relationship is established by the terms of the contract which do not provide for exclusivity. In response, UMCO contends that the "established relationship" provision of Law 75 is not limited to the integrated contract, but rather includes the "understanding" between the parties that the relationship was to be exclusive.

HN9[] The stated purpose of Law 75 is to provide a protective supplement to all dealer/supplier contracts in an effort to equalize the bargaining inequity between the large principals and the smaller dealers:

> The traditional provisions which regulate contracts between parties have shown their inefficacy in protecting the legitimate rights of the representative or agent, making it thus necessary to legislate in order to regulate this relationship and guarantee that **[**24]** manufacturers act in good faith, fairly, and not in an arbitrary manner, and to safeguard the rights and justified expectation of the representatives and agents inherent to the relationship.

Medina & Medina v. Country Pride Foods, Ltd., 858 F.2d 817, 820 (1st Cir. 1988) (*quoting* 18 Dario de Sesiones 1531 (1964)). Indeed, as one commentator recently explained:

> ***HN10***[] The expressed legislative intent was to protect the "legitimate expectations and interests" of distributors or agents in ways in which traditional principles of contract law had not been effective. The termination of dealerships could no longer be left up to the reparations provided by general contract law.

Vidal, *The Concept of Just Cause for the Lawful Termination of a Dealership Under the Dealer's Contracts Law of Puerto Rico*, 58 Revista Juridica U.P.R. 261, 267 (1989). Thus, an interpretation of law 75's protection of the dealer's "established relationship" with the supplier cannot be limited to the provisions of the contract, b***HN11***[] ut rather extends to a protection of the "legitimate **[**25]** expectations" of the dealer.

However, since the UMCO/Whirlpool contract does not provide for exclusivity, UMCO clearly has the burden of demonstrating a factual dispute as to whether the "established relationship" provided for exclusivity. In support of this burden, UMCO presents the sworn statement of Robert Segota, the Latin American and Caribbean sales manager for Whirlpool from October 1978 to August 1985, who testifies that it was Whirlpool's practice to treat their distributors as exclusive dealers in their "prescribed marketing areas". Accordingly, Mr. Segota explains that Protane Gas Co., UMCO's predecessor, was considered the Whirlpool's exclusive distributor for Puerto Rico. It is Mr. Segota's opinion that when UMCO acquired the Whirlpool distributorship from Protane, that this acquisition was on an "exclusive basis". Mr. Segota states that UMCO was informed by Whirlpool that Western Auto would be entering the market as a retailer, and therefore subject to the wholesale markups traditional to the appliance industry for retail appliance dealers, thereby benefitting from prices that were "significantly **[*1565]** lower than the prices at which Western Auto Puerto Rico would **[**26]** be purchasing the products." Mr. Segota further states that he understood, and informed UMCO, that Whirlpool would ship to a Western Auto's regional distribution center (warehouse) and thereafter unload and reload for shipment to Puerto Rico and therefore Western Auto would have significantly higher freight and transportation costs. Thus, according to Mr. Segota, Whirlpool gave UMCO every reason to believe that UMCO would not be in direct competition with Western Auto for the Puerto Rican market. Mr. Segota's statement alone raises a disputed fact as to the nature of the "established relationship" between UMCO and Whirlpool.

Additionally, the affidavit of Clayton Umbel, the president of UMCO sets forth that:

> 5. During UMCO's negotiation and discussions with Whirlpool regarding the acquisition of Protane's assets, I questioned Whirlpool and was informed by its representatives that a large chain retailer, Western Auto, would soon commence purchasing and selling the Whirlpool product line through its retail outlets in Puerto Rico. I was assured, however, that Western Auto would not receive distributor prices and, therefor, UMCO would not be in direct competition with Western Auto **[**27]** at the same functional level of distribution.
> 6. Upon inquiry into the nature of Western Auto's pricing and distribution system with Whirlpool, I was informed that potential areas of conflict existed between UMCO and Western Auto regarding pricing and distribution of spare parts. In response to my telex, I was informed that Western Auto would not be in a position to sell spare parts at wholesale prices because Western Auto would buy these parts as a dealer. This representation was consistent with dealer contracts and with previous statement to me from Whirlpool that its prices to Western Auto would not place UMCO and Western Auto in direct competition in the Puerto Rico market.

As reflected by the testimony of both Robert Segota and Clayton Umbel, there remains a controverted issue of fact as to the nature of the relationship established between the parties, thus rendering inappropriate Whirlpool's motion for summary judgment on this issue.

B. UMCO'S CLAIM OF PRICE DISCRIMINATION

In Count III of its Puerto Rico complaint, UMCO claims that Whirlpool violated *Section 263* of the Puerto Rico Anti-Monopoly Act, *10 L.P.R.A. Sec. 263*, by charging lower prices to Western Auto than **[**28]** were offered to UMCO. ***HN12***[] *Section 263(a)* provides:

> It shall be unlawful for any person, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where such commodities are sold for use, consumption, or resale in Puerto Rico, and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce in Puerto Rico, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them.

HN13[] This statute was patterned after, and in all material respects is identical to Section 2(a) of the Clayton Act, 38 Stat. 730, as amended by the the Robinson-Patman Act, *15, U.S.C. Sec. 13(a)*. Accordingly, federal precedents construing the Robinson-Patman Act are applicable to the interpretation of *Section 263*. [4]

[4] Puerto Rico commentators and courts have stated that interpretations of the Federal Robinson-Patman Act are to be looked to in construing ***Section 263***. *See, e.g.*, Estrella, ***Antitrust Law*** *in Puerto Rico*, 28 Revista Juridica del Colegio de Abogados, No. 3, pg. 615 (It is hornbook law that when a statute is adopted from a foreign jurisdiction, it is presumed to be adopted with the interpretation of the jurisdiction of origin.). *See also Corretger v. District Court*, 1951, 72 PRR 704, 710.

[29]** UMCO contends that its actual price of doing business for the same product was greatly different from the price enjoyed by Western Auto since Western Auto received advantageous credit terms while UMCO **[*1566]** was wholly denied credit, and Western Auto benefitted from a warranty reimbursement program which was denied UMCO. In response, Whirlpool maintains that it is entitled to summary disposition for this claim on two grounds. First, Whirlpool argues that disparate credit terms and warranty programs cannot, as a matter of law, form the basis of an action under either the Robinson-Patman Act or *Section 263*. Second, Whirlpool claims that even if disparate credit terms were discriminatory, then UMCO's claim must still fail since it has failed to show "antitrust injury", whereby claimant must show that the alleged injury is "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 109 L. Ed. 2d 333, 110 S. Ct. 1884, 1189 (1990)*.

1. *Disparate Credit Terms as Price Discrimination*

Regarding the alleged discrimination in credit terms, Whirlpool **[**30]** maintains that such credit variance is not, as a matter of law, actionable under the Robinson-Patman Act or *Section 263*. This contention is not, however, supported by the case law. In the case of *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 648, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980)*, the Supreme Court stated, albeit in the context of price-fixing agreements, that credit terms are "inseparable" from price:

> It is virtually self-evident that extending interest-free credit for a period of time is equivalent to giving a discount equal to the value of the use of the purchase price for that period of time. Thus, credit terms must be characterized as an inseparable part of the price.

Because credit, by its very nature, involves delicate assessments concerning financial strength, business experience, and many other factors, a court should be cautious in allowing disparate credit terms to provide the basis for a price discrimination claim. This caution should not, however, induce blindness to a particularly egregious use of credit which could operate effectively to produce wide variance in price. [5] In short, **[**31]** ***HN14***[] a party must be allowed a reasonable latitude in setting its credit terms, but must be prevented from cloaking discriminatory pricing under the veil of available credit. There is no requirement that all buyers be offered the same credit terms, merely that they be evaluated under the same standards for granting or denying credit. As stated by one court: "a manufacturer is free to extend different [credit] terms to competing purchasers so long as it makes its decisions in a non-discriminatory manner, i.e., the same standards of credit worthiness must be extended to all applicants for credit who are in competition with each other." *Carlo C. Gelardi Corp. v. Miller Brewing Co., 502 F. Supp. 637, 647 (D.N.J. 1980)*.

[32]** In the case at bar, UMCO has provided testimony that its prior favorable credit terms were completely revoked by Whirlpool in late October 1985, while Western Auto continued to enjoy Whirlpool's credit. As recounted by the president of UMCO, Mr. R. Clayton Umbel:

> 9. As of October 30, 1985, UMCO had 120-day payment terms with Whirlpool and a $ 500,000 open line of credit with Whirlpool. UMCO also had previously provided Whirlpool with standby letters of credit totaling approximately $ 2.3 million. . . . [Then] Without prior warning, by letters dated October 30, 1985, UMCO received notice that the existing credit practices between Whirlpool and UMCO were immediately cancelled . . . .
>
> 10. At no time prior to these actions did Whirlpool express any dissatisfaction with UMCO's performance or any of its obligations under the distributorship agreements. Whirlpool did not provide any reasons prior to its actions as described in paragraph 9 above.
>
> 11. As a result of Whirlpool's unilateral modification of the credit terms, UMCO was permitted to purchase products for the remainder of the distributorship **[*1567]** year only on a cash basis or irrevocable letter of credit. UMCO's **[**33]** Puerto Rican distributorship was impaired. UMCO was unable to fill orders for

[5] *See e.g., Craig v. Sun Oil Company of Pennsylvania 515 F.2d 221, 224 (10th Cir. 1975)* ("We do not say that there could not be a discrimination in credit of such magnitude or nature as to constitute a violation, but no such extreme situation was alleged here").

> November and December 1985 because it did not have the cash flow with which to buy products from Whirlpool. Prior to the change in credit terms, UMCO had negotiated and paid for stand-by letters of credit which it was unable to use following the change. The cancellation of the credit terms also caused UMCO to raise the prices of Whirlpool products to UMCO's customers.
> 12. In contrast, Western Auto was provided with more favorable credit terms. . . .

The above statements support the allegation that the credit term discrimination was sufficiently extreme to create an action for price discrimination, thus precluding summary judgment on this issue. [6]

2. *Antitrust Injury*

UMCO's treble damage claim is brought under the Puerto **[**34]** Rico counterpart to Section 4 of the Clayton Act, *10 L.P.R.A. Sec. 268(a)*. As most recently articulated by the Supreme Court, ***HN15***[] a private plaintiff may not recover damages under Section 4 of the Clayton Act (or *Section 268(a)*) merely by showing injury causally linked to an illegal presence in the market. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 109 L. Ed. 2d 333, 110 S. Ct. 1884, 1189 (1990)*. ***HN16***[] In order to state a cause of action under Section 4 or *Section 268(a)*, a plaintiff must show "antitrust injury", meaning that the alleged injury is "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Atlantic Richfield* at 1189. Thus, even if UMCO shows that Whirlpool's disparate credit terms were in violation of *Section 263*, its claim is nevertheless insufficient as a matter of law unless it can establish that the alleged injury flowed from the anti-competitive practice challenged, and not some other **[**35]** cause.

Whirlpool contends that UMCO has failed to show antitrust injury since its damages resulted, not from any discriminatory actions by Whirlpool, but rather through UMCO's own competitive shortcomings. [7] In response, Plaintiff has submitted the affidavit of UMCO's president, Mr. R. Clayton Umbel, in which it is stated that Whirlpool's pricing discrimination through disparate credit terms caused UMCO to be "unable to fill orders for November and December 1985 because it did not have the cash flow with which to buy products from Whirlpool." There is no need to probe further; such testimony creates a controverted issue of fact as to the damages flowing from Whirlpool's alleged price discrimination, and is therefore sufficient to preclude summary judgment on this matter.

[36]** IV. THE FLORIDA ACTION

As noted in Section I of this Order, 1985 was a bad year for the Whirlpool/UMCO relationship. In the Fall of 1985, Whirlpool suspected UMCO of bribing Whirlpool's Caribbean sales manager. On October 30, 1985, Whirlpool notified UMCO by letter that it would not be reappointed in Puerto Rico when its current distributorship agreement expired on December 31, 1985. In the same letter, Whirlpool further notified UMCO that, for the remaining two months of the agreement, Whirlpool would accept UMCO's orders only if they were accompanied by payment in full or were covered by a confirmed irrevocable letter of credit acceptable to Whirlpool's Credit Department. Then, on October 31, 1985, Whirlpool filed this action ("Florida Action") before this Court alleging violations of the Federal Racketeering Influenced Corrupt Organizations Act (RICO). UMCO filed counterclaims to this Florida action, **[*1568]** which are now the target of this motion for summary judgment.

Count I of UMCO's counterclaim, alleges that Whirlpool violated Puerto Rico's Law 75 by cutting off UMCO's credit without warning. Counts III & IV allege wrongful termination of UMCO's Venezuelan and Colombian **[**37]** distributorship respectively.

A. UMCO's COUNTERCLAIM UNDER LAW 75

---

[6] Since the motion is denied on the basis of discriminatory credit terms, it is unnecessary to explore whether or not the warranty reimbursement program can be considered a component of price at this time.

[7] Specifically, Whirlpool contends that UMCO's failure effectively to compete is a self-inflicted injury stemming from the inefficiencies of its two-tiered marketing system. Western Auto, by contrast, utilizes a direct marketing arrangement.

In Count I of its counterclaim in the Florida action, UMCO claims that Whirlpool's unilateral curtailment of UMCO's credit is in violation of Puerto Rico's law 75, which protects dealers against any acts of the principal that are "detrimental to the established relationship" of the parties. In support of its motion for summary judgment, Whirlpool maintains that its actions were merely an exercise of its rights under the Distributorship Agreement, and thus were consistent with, rather than detrimental to, the "established relationship" between the parties. Specifically, Section 8 of the Distributorship Agreement provides Whirlpool with the option of unilaterally determining the credit terms applicable to UMCO's purchases:

> Credit terms applicable to purchases from Whirlpool will be determined by Whirlpool's Credit Department in Benton Harbor, Michigan, U.S.A. You will pay Whirlpool for all products ordered by you from Whirlpool at the prices and upon the terms on which each such order is accepted by Whirlpool.

UMCO does not dispute Whirlpool's interpretation of the meaning of Section 8. Rather, UMCO grounds **[**38]** its claim in the appeal to a higher authority: Law 75, which (as previously noted in Section III-A, *supra*) provides that:

> Notwithstanding the existence in a dealer's contract of a clause reserving to the parties the unilateral right to terminate the existing relationship, no principal or grantor may directly or indirectly perform any act detrimental to the established relationship or refuse to renew said contract on its normal expiration, except for just cause.

10 L.P.R.A. Sec. 278a.

HN17[] The "legislative intent [of Law 75] was to equalize the parties bargaining power and to balance the contractual conditions of two groups unequal in their strength . . . . The distributor was to be not only protected from arbitrary terminations, but also from *undue practices* on the part of principals or grantors." *General Office Products Corp. v. Gussco Manufacturing, Inc., 666 F. Supp. 328, 330 n. 4 (D.P.R. 1987)* (emphasis added) *See also Marina Industrial, Inc. v. Brown Boveri Corp., 114 D.P.R. 64, 85 (1984)*. **[**39]** ***HN18***[] In enacting and amending Law 75, the Puerto Rico legislature recognized that principals possessed the economic clout not only to eliminate dealers outright, but also "without fully eliminating them, . . . to gradually reduce and impair the extent of their previously established relationships." House Commerce and Industry Committee Statement of Motives of Act No. 75. Law 75 was therefore drafted to protect dealers not only from termination but from practices short of termination which impaired the dealers' established relationships.

Thus, the fact that the integrated contract provided for Whirlpool's unilateral alteration of credit terms does not immunize exercise of this contractual provision from Law 75 scrutiny. UMCO claims that Whirlpool effectively terminated the UMCO/Whirlpool relationship by making it impossible for UMCO to place orders. If Whirlpool were allowed freely to terminate UMCO's credit simply because such a right were embodied in Clause 8 of the distributorship agreement, then Whirlpool could avoid the protection of Law 75 simply through the drastic manipulation of credit terms as UMCO alleges has happened in the **[**40]** case at bar. Were Whirlpool correct, principals would be free to employ their superior bargaining position to engraft such unilateral powers as credit withdrawal into the dealer/supplier contracts, and then use these provisions to create such an unfavorable situation for the dealer as to force **[*1569]** termination. Such an interpretation would vitiate the stated protection of Law 75.

By contrast, the requirement that principals exercise their contract rights in good faith consistent with their "established relationships" preserves both the policies of Law 75 and the parties' freedom of contract. Law 75 does not require that Whirlpool never change UMCO's credit terms; it only requires that any change be made in good faith consistent with their "established relationship." *Medina & Medina, 858 F.2d at 822-23* (Law ***HN19***[] 75 leaves "principal and dealer free to change or bargain in good faith the prices and credit terms for the sale of the franchised product."). Law 75 simply supplements the contract law to the extent necessary to protect weaker dealers from the abusive employment **[**41]** of one-sided contract terms by economically superior principals.

In light of the above discussion, Whirlpool would only be entitled to summary judgment on Count I of the Florida Action were it to demonstrate as an undisputed matter of fact that it had altered the credit terms of the established UMCO/Whirlpool relationship in good faith. Such showing is not supported by the record before the Court. Whirlpool's motion for summary judgment on Count I of the Florida Action is therefore denied.

B. UMCO's VENEZUELAN AND COLOMBIAN DISTRIBUTORSHIP

Whirlpool's final motion for summary judgment is directed at UMCO's claim for lost profits that would have been generated under the Venezuela and Colombia distributorship had they not been terminated by Whirlpool. UMCO received notice from Whirlpool of the termination of these distributorships at the same time it received notice of the termination of its Puerto Rico distributorship. Whirlpool argues that the only profits to which UMCO may reasonably be entitled to, if any, are those profits which UMCO would have received during the course of the agreement, January 1, 1986 through December 31, 1986, and not beyond its expiration.

As suggested **[**42]** in Whirlpool's memorandum of law, and as indicated in the Section 21 of the Distributorship Agreements, the Agreements are to be interpreted under Michigan law. The memoranda filed on this issue, however, deal only fleetingly with the issue's interpretation under Michigan law. The Court therefore requests that the parties rebrief the issue with a focus on the law that should govern the Venezuela and Colombia Distributorship Agreements. As movant, Whirlpool shall submit its memorandum within twenty days from the date of this Order. Response and reply memoranda shall be filed in accordance with local rules.

DONE AND ORDERED. in chambers at Miami, Florida, this 16th day of October, 1990.

Anaheim v. Southern California Edison Co.

United States District Court for the Central District of California

October 22, 1990, Decided ; October 22, 1990, Filed

HN1[] **Antitrust Issues, Exclusionary Conduct**

A price squeeze under the antitrust laws has been defined as occurring when a vertically integrated company with monopoly power at the wholesale level but competition at the retail level deliberately sets its wholesale rates so high that its wholesale customers cannot compete in the retail market. A price squeeze then is a form of price discrimination that has an anticompetitive effect. It may be caused by differences or inconsistencies in federal and state ratemaking policies and procedures (regulatory price squeeze) or by intentional acts of a monopolist taken to disadvantage or eliminate competitors (predatory price squeeze).

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Sherman Act, Claims**

To prove a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, plaintiffs must establish three elements: (1) the possession of monopoly power in the relevant market, (2) the willful acquisition or maintenance of that power, and (3) causal antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN3[] **Monopolies & Monopolization, Actual Monopolization**

The determination of whether a defendant possesses monopoly power involves a two-step inquiry. First, the court must determine what constitutes the relevant market, that is, the arena within which the strength of the competitive forces is measured. Second, the court must evaluate whether a defendant exercises monopoly power in that market. The relevant market is defined by reference both to the product which is being sold and to the geographical area in which the product is sold.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] **Regulated Practices, Market Definition**

Where the monopolist is alleged to have impaired the customer-competitors' ability to compete by raising the wholesale rates, the relevant product market is the wholesale market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Regulated Practices, Market Definition**

Under the antitrust laws, the relevant geographic market is the market area in which the seller operates, and to which the purchaser can practicably turn for supplies.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Monopolies & Monopolization, Actual Monopolization

A firm cannot impose monopoly prices if buyers are free to purchase a competitor's goods.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[] Regulated Practices, Market Definition

Where the alleged monopolist is regulated, traditional market share analysis is not necessarily indicative of the monopolist's power to control prices.

Antitrust & Trade Law > Regulated Industries > General Overview

Energy & Utilities Law > Antitrust Issues > Exclusionary Conduct

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN8[] Antitrust & Trade Law, Regulated Industries

The price squeeze theory of antitrust liability is concerned with gaps in the regulatory scheme that result from the dual federal and state regulation of the investor-owned utility's rates. While a utility does not have total control over its rates, the utility has the power to adversely affect competition within the system of dual regulation. By manipulating the timing and amount of its rate filings, it is possible for the utility to ensure that the rates of its wholesale customers are unjustifiably high in relation to the rates of its retail customers. It is possible for the disparity in rates to be obtained by a utility's inaction as well. For example, the utility could simply decline to take any steps to redress a price disparity created by the inconsistent actions of the federal and state regulatory agencies.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN9[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The fact that the monopolist's control of prices may be checked by the regulatory system in the form of refunds does not completely close the gap in the regulatory scheme that result from the dual federal and state regulation of the investor-owned utility's rates -- refunds may be inadequate. Refunds are often received only after many years of agency proceedings by which time the customer-competitor may have lost its customers, delayed improvements or ultimately been squeezed out of the market. The dual regulatory system offers an obvious, ready made illegal opportunity with a legitimate gloss.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Sherman Act, Claims**

The second element of a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, is the willful acquisition or maintenance of monopoly power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Even where monopoly power is lawfully acquired, the monopolist may not maintain that power by engaging in exclusionary conduct. Exclusionary conduct is defined as conduct, other than competition on the merits or restraints reasonably necessary to competition on the merits, that reasonably appears capable of making a significant contribution to maintaining monopoly power.

Energy & Utilities Law > Antitrust Issues > Exclusionary Conduct

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

HN11[] **Antitrust Issues, Exclusionary Conduct**

As to the issue of price discrimination, the plaintiff customer/competitor has the burden of establishing that a rate differential existed, and defendant utility then has the burden of proving the cost justification for the disparity.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

HN12[] Regulated Industries, Energy & Utilities

There is no minimum period of time for which a plaintiff must establish price discrimination in order to show that there is a price squeeze.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Governments > Legislation > Statutory Remedies & Rights

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN13[] Actual Monopolization, Anticompetitive & Predatory Practices

A distinction can be made between a utility caught in the web of dual regulation and one that deliberately seeks to take advantage of the regulatory systems to maintain or extend its monopoly power. Although a utility does have a constitutional and statutory right to earn a reasonable return on its investment, as a monopolist, it also must take care that otherwise lawful acts do not have anticompetitive effects. Its relationship as a monopolist-supplier to its customer-competitors must be carefully weighed along with its knowledge of the probable consequences of its overall conduct in judging whether its actions were those of the reasonable regulated firm.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > US Federal Energy Regulatory Commission

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Energy & Utilities Law > Antitrust Issues > Exclusionary Conduct

HN14[] Anticompetitive & Predatory Practices, Predatory Hiring & Price Squeezes

In contrast to the Federal Energy Regulatory Commission, which looks only to the end result in determining if a refund is required, an antitrust court looks to all of a utility's conduct and justifications to infer innocent or culpable intent.

Energy & Utilities Law > Antitrust Issues > General Overview

Torts > ... > Duty > Affirmative Duty to Act > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Energy & Utilities Law > Natural Gas Industry > Liquefied Natural Gas

HN15[] **Energy & Utilities Law, Antitrust Issues**

The monopolist's special position imposes on it what may be characterized as affirmative duties to aid its competitor. However, these duties arise only when there is no justification for refusing to aid a competitor.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

HN16[] **Regulated Industries, Energy & Utilities**

If only the filing of rate applications and the failure to mitigate the effects of a probable price squeeze created thereby provide a basis for finding the requisite specific intent under § 2 of the Sherman Act, 15 U.S.C.S. § 2, the court must find that plaintiffs have not met their burden on the issue.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Sherman Act, Claims**

The third element of a claim under § 2 of the Sherman Act, 15 U.S.C.S. § 2, that must be established is causal antitrust injury. In an antitrust case, the plaintiff must show not only that the defendant's acts caused the injury, but that the plaintiff's injury is of a type the antitrust laws were intended to prevent.

Antitrust & Trade Law > Regulated Industries > General Overview

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

HN19[] **Antitrust & Trade Law, Regulated Industries**

In a case involving a price squeeze by a regulated utility, an antitrust court should confine its definition of antitrust injury to that injury that cannot be redressed by the regulatory scheme itself.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

HN20[] **Antitrust & Trade Law, Sherman Act**

A court in a essential facility case under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, is dealing with the allegation that monopoly power in one market is being used to injure competition in a second market. Thus, to prevail in an essential facility case, a plaintiff first must establish that a defendant possesses monopoly power in the market that provides some structure, service or item to plaintiff. Next, a plaintiff must show that a defendant is in competition with plaintiff in a second market. Finally, a plaintiff must demonstrate that the denial of the structure, service or item constitutes the unlawful use of monopoly power under the essential facility doctrine. There are four elements necessary to establish liability under the essential facility doctrine: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN21[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The essential facility doctrine defines a facility as essential not based on the characteristics of the facility withheld, but based on the effect on competition of the withholding of the facility.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN22[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To determine whether a monopolist's structure, service or item should be classified as an essential facility, a court must assess the extent to which the monopolist's refusal of access actually impairs the ability of the customer-competitor to compete. Moreover, a court must determine whether the competitor can avoid injury by using an alternative to the monopolist's structure, service or item. The application of the essential facility doctrine is most compelling where the monopolist's refusal makes it legally or physically impossible for its competitor to compete at all in the relevant market. In most cases, however, the refusal does not physically or legally exclude the competitor from the relevant market; the competitor can always secure an alternative to the monopolist's facility at some price. In such cases, a court is called upon to determine whether the competitor's alternatives to the use of the monopolist's facility are so expensive that the structure, service or item will be deemed an essential facility.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN23[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The essential facility cases apply a test of reasonableness, finding a facility to be essential where the monopolist's refusal severely impairs the competitor in the relevant market and leaves the competitor without reasonable alternatives.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Energy & Utilities Law > Pipelines & Transportation > Electricity Transmission

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN24[] Actual Monopolization, Anticompetitive & Predatory Practices

Even where the harm to the competitor is sufficient to establish that the monopolist's structure, service or item is an essential facility, a monopolist's refusal to deal may not violate § 2 of the Sherman Act, 15 U.S.C.S. § 2. A monopolist may justify the refusal to deal by pointing to legitimate business reasons for the refusal.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN25[] Antitrust & Trade Law, Regulated Industries

While a regulated monopolist's actions in response to a regulatory agency's dictates enjoy a limited antitrust immunity, the monopolist must show that, at the time of the various anticompetitive acts it had a reasonable basis to conclude that its actions were necessitated by concrete factual imperatives recognized as legitimate by the regulatory authority.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Energy & Utilities Law > Pipelines & Transportation > Electricity Transmission

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Energy & Utilities Law > Electric Power Industry > State Regulation > General Overview

HN26[] Regulated Practices, Monopolies & Monopolization

A utility's concern that its other customers would suffer by the granting of access to an essential facility is a legitimate business justification for denying access.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN27[] Regulated Practices, Monopolies & Monopolization

A monopolist's interest in extracting and maintaining monopoly profits does not justify anticompetitive conduct.

Opinion

OPINION

Plaintiffs, the Cities of Anaheim, Riverside, Azusa, Banning and Colton ("Cities"), each own and operate an electricity distribution system and are the exclusive providers of electric service to the retail customers within their respective municipal boundaries. The Cities are located within the broad southern and central service territory of defendant Southern California Edison Company ("Edison"), a fully integrated investor-owned utility that generates, transmits and distributes electricity. Edison provides electric service at retail to customers who are situated within the Edison service area but not within the Cities' borders. In addition, Edison purchases electricity from and sells electricity to other utilities located inside and outside this service area. The Cities purchase from Edison at wholesale a substantial portion of the electric power **[*2]** which the Cities resell at retail to their customers.

The Cities, then, are *both* customers of and competitors with Edison. The Cities are customers of Edison for wholesale electric power. Edison and the Cities are also competitors, each seeking to attract large industrial customers to locate within their respective service areas. Further, Edison and the Cities compete with each other to provide superior rates and service. The Cities' dual relationship with Edison as both customers and competitors furnishes the foundation of the Cities' allegations of antitrust liability.

The Cities claim that two types of conduct by Edison violated *§ 2* of the Sherman Act, *15 U.S.C. § 2*. First, the Cities contend that Edison engaged in a price squeeze. The Cities maintain that the defendant charged its wholesale electricity customers a higher rate than it charged its large industrial customers, effectively impairing the Cities' ability to compete for customers. Second, the Cities contend that Edison unlawfully denied them access on certain Edison-controlled transmission lines essential for the transmission of low cost electric power from the Pacific Northwest.

This case began before Judge Malcolm **[*3]** Lucas, who entered a number of orders to which this memorandum will refer. The case was transferred to this Court, which, after vacating several previously entered orders, conducted a bench trial and took the matter under submission. Subsequently, Edison brought on a Motion for Collateral Estoppel which was heard by the Court and also taken under submission. This Memorandum reflects the Court's disposition of the trial and the motion.

I. *STATEMENT OF FACTS*

A. *Edison's transmission network*

Edison, like almost every major utility, maintains what is known as a "control area." In this area, Edison is responsible for coordinating the generation, transmission and distribution of electricity. Edison's control area is the same as its service area, excluding the cities of Los Angeles, Burbank, Glendale and Pasadena, which operate their own control areas. Since the Cities are located within Edison's control area, Edison is responsible for ensuring that the Cities have access to as much wholesale electric power as they need at any time.

In its control area, Edison operates a transmission network which consists of two types of lines. Extra High Voltage ("EHV") transmission lines -- **[*4]** lines operated at frequencies above 230kV -- are used to transmit large blocks of electric power from remote generation sources. This high voltage power, which is usually sold in large volume, is referred to as "bulk power." Edison's local matrix -- a system of transmission lines operated at 220kV -- connects Edison with neighboring utilities including the Los Angeles Department of Water and Power ("LADWP") and the California Department of Water ("DWR"). The EHV lines bring bulk power to the local matrix. After power is delivered to the local matrix, the power is transmitted to either Edison's or the Cities' distribution substations. These substations, in turn, transform the power into low voltages for delivery to retail customers. The low voltage electric power distributed to retail customers is referred to as retail electric power.

Prior to 1972, the Cities were "full requirements" customers of Edison, purchasing all of their wholesale electric power from Edison. The Cities entered into full requirements contracts with Edison in the mid-1960s because the terms of the contracts were considered attractive by the Cities at that time. In 1972, in part as a result of antitrust claims **[*5]** brought by the Cities, the parties entered into settlement agreements. These agreements released Edison from antitrust liability for conduct prior to that time. Moreover, the agreements contemplated a framework within which the Cities could begin to acquire electric power from sources other than Edison. These alternate sources are referred to as "resources" of electric power.

After five years of negotiation, Anaheim and Riverside entered into Integrated Operations Agreements ("IOAs") with Edison. The IOAs serve two purposes. First, the IOAs establish a method for determining how Edison should adjust its rates for wholesale customers who purchase some of their electric power from sellers other than Edison. Second, the IOAs assure that customers who purchase from sellers other than Edison will have access to the Edison-controlled transmission lines. The IOAs with Anaheim and Riverside became incorporated into Edison's rates schedules in 1979. Azusa, Banning and Colton entered into similar agreements with Edison that became part of Edison's rates schedules in 1981.

The most significant adjustment of an Edison customer's rate under an IOA depends on whether the particular customer's alternate **[*6]** electricity resource is characterized as "integrated" or "non-integrated." The labeling of a resource as integrated implies that the resource, in effect, is planned for and operated as part of the Edison system. On the other hand, the description of a resource as non-integrated indicates that Edison has not incorporated the resource into its system, but is merely transmitting the resource over Edison lines to the consumer. The characterization of a given resource as integrated or non-integrated significantly affects the wholesale price of electricity to a customer. Edison's wholesale rates include a charge for the amount of electricity used (the "demand charge") and a charge reflecting Edison's cost of maintaining and constructing electricity generation facilities sufficient to meet a customer's needs. If Edison integrates a resource proposed by a wholesale customer, Edison gives the customer credit (a "capacity credit") for the reduction in generating capacity Edison must maintain. If Edison declines to integrate the resource, the customer continues to pay for Edison's cost of maintaining sufficient generating capacity to meet the customer's demand at all times. Under the IOAs, Edison **[*7]** has considerable discretion in the decision to treat the Cities' resources as integrated or non-integrated.

In addition to establishing a system to adjust the prices paid by the Cities, the IOAs provide for the transmission of the Cities' bulk power purchased from sellers other than Edison. Because Edison owns all local transmission lines leading to the Cities, Edison schedules the transmission of any electric power purchased by the Cities. Under the IOAs, Edison has guaranteed the Cities access to the local transmission matrix; this guarantee is called a "firm transmission right." Edison has also provided the Cities with "interruptible transmission rights" on Edison's other transmission lines. For example, the Cities have an interruptible transmission rights on the Pacific Intertie, the group of EHV lines to the Pacific Northwest on which Edison and other regional utilities have rights. From the perspective of the Cities, interruptible transmission service is less desirable than firm transmission service because interruptible transmission service may be curtailed by the provider of it at any time and for any reason; in contrast, firm transmission is available at all times and allows **[*8]** the utility to schedule its purchases in advance.

From 1976 to 1985, Anaheim and Riverside received capacity credit for only one resource, the San Onofre Nuclear Generating Station. As a result, Anaheim and Riverside purchased nearly all of their capacity requirements from Edison. In addition, Azusa, Banning and Colton purchased all of their capacity requirements from Edison. [1] **[*9]** Since 1985, however, Anaheim and Riverside have received capacity credit for other resources, in part because of Special Condition 12, which became part of Edison's rates schedules in 1983 and provided for a shorter period of

[1] Anaheim purchased 96.8%, Riverside 97.2% and Azusa, Banning and Colton 100% of their wholesale capacity requirements from Edison during the period from 1975 through 1985. Anaheim and Riverside did make purchases from suppliers other than Edison during that period. Since these purchases were not integrated, the total amount of electricity purchased from Edison was 87.5% for Anaheim and 89.4% for Riverside.

time for giving Edison notice of the availability of capacity resources. As a result, Anaheim and Riverside are now less dependent on Edison for their firm bulk power. [2]

B. *The price squeeze claim*

The Cities' first claim of conduct violative of *§ 2* is that Edison engaged in a price squeeze. Historically, Edison's wholesale rate ("R-2") was the same as the rate charged to Edison's large industrial customers (for convenience, "A-8"), and the rate of return on these two rate classes was lower than for other classes. In 1973, the oil embargo caused fuel and electricity prices to escalate, and Edison sought increases in both the R-2 and A-8 rates. A utility's wholesale rates are regulated by the Federal Energy Regulatory Commission ("FERC"), *16 U.S.C. § 824*. In order to increase a wholesale rate, a utility must file a proposed rate schedule with the FERC. The proposed rate may be suspended for up to five months, after which it automatically **[*10]** takes effect, subject to refund with interest if the rate is later found by the FERC not to be just and reasonable. *See 16 U.S.C. § 824d(e)*. In contrast, a utility's retail rates are subject to regulation by a state agency -- in the case of Edison, the California Public Utilities Commission ("CPUC"), *Cal. Pub. Util. Code §§ 701*, *703*. In California, a retail rate does not go into effect until the CPUC has approved it. [3] To increase the rates for both the A-8 and R-2 customers, it was necessary for Edison to commence two separate rate proceedings with two separate regulatory bodies.

Edison commenced proceedings with the CPUC to raise the A-8 rate to its industrial customers in June 1974. There was a delay in the CPUC's decision-making process, and Edison sought interim relief for a partial rate increase pending the CPUC's final **[*11]** determination. On December 30, 1975, the CPUC granted Edison only a portion of that interim relief, resulting in an interim rate increase of only 8.7% for the A-8 class. Edison received a final decision from the CPUC on December 21, 1976, forty months after Edison had filed its application. This decision permitted a change in the A-8 rate to become effective on January 13, 1977, but allowed only about one-third of the increase originally requested by Edison.

In the meantime, on October 31, 1975, Edison filed ER76-205 with the FERC seeking an increase in the R-2 rate. Edison sought the minimum one day suspension of the proposed rate increase; and despite the Cities' urging that the rates be suspended for five months, the FERC granted Edison a one month suspension. Edison's proposed R-2 rate went into effect on February 1, 1976. The R-2 rate that went into effect on that date was higher than the A-8 rate, and continued to be higher than the A-8 rate even after the CPUC allowed the A-8 rate to be raised effective January 13, 1977.

The Cities protested the wholesale rate increase and intervened in the ER76-205 proceeding. The Cities took the position that the rates were not just and reasonable **[*12]** both because the rates did not accurately reflect increases in Edison's costs of service and because the disparity between the R-2 and the A-8 rate resulted in a price squeeze. Edison, however, continued to charge its proposed rates pending a determination by the FERC as to the propriety of those rates. The administrative proceedings on the ER76-205 rate schedule spanned thirteen years. [4]

---

[2] Anaheim's capacity provided by Edison was 68% in 1986, 35% in 1987 and 1988 and 24% in 1989; Riverside's capacity provided by Edison was 74% in 1986, 45% in 1987, 49% in 1988 and 40% in 1989. Edison's Memorandum of Points and Authorities in support of Response to Cities' Motion for Leave to File Third Amended Complaint, Ex. F & G.

[3] In the time period relevant to this suit, there was no requirement that the CPUC make a decision concerning a rate change by any set date after the application for the change was filed.

[4] The initial hearings before the Administrative Law Judge ("ALJ") on both the cost of service issue and the price squeeze claim were held in August 1977. The ALJ issued an initial decision on June 1, 1978, approving the rate increase in part and ordering refunds to the Cities of $ 4.4 million. The Cities' price squeeze claim was rejected. *Southern California Edison Co.,* 3 FERC para. 63,033 (1978). The FERC affirmed the ALJ's findings on the cost of service issue, and in an appeal dealing only with this issue, the Court of Appeals affirmed. *Southern California Edison Co.,* 8 FERC para. 61,198 (1979), *reh'g denied in part and granted in part,* Opinion 62-A, 10 FERC para. 61,260 (1980), *aff'd sub. nom. Cities of Anaheim v. FERC, 669 F.2d 799 (D.C. Cir. 1981)*. The FERC disagreed, however, with the ALJ's price discrimination analysis and remanded the price squeeze claim for a second phase of hearings.

[*13] After the second phase of price squeeze proceedings before the Administrative Law Judge ("ALJ"), but before he issued his opinion, the Cities commenced this antitrust suit against Edison alleging that the price squeeze not only resulted in rates that were not just and reasonable, but that the creation of the price squeeze violated the antitrust laws. Shortly before the antitrust case was tried, the ALJ issued an initial decision finding that the rate differential had resulted in a price squeeze and ordered refunds to the Cities of $ 3,805,496 plus interest. *Southern California Edison Co.,* 34 FERC para. 63,086 (1986) (*"FERC_III").* After this Court concluded the trial of this case, the FERC issued its opinion affirming in part and reversing in part the ALJ's decision; the FERC affirmed the finding that a price squeeze existed, but found the overcharge to be in the amount of $ 2,642,000. See *Southern California Edison Co.,* 40 FERC para. 61,371 (1987) (*"FERC_IV"), reh'g denied in part and granted in part,* 50 FERC para. 61,275 (1990) (*"FERC_V").* Edison has paid that amount with interest.

C. *The foreclosure claim*

The Cities' second claim of conduct in violation of **[*14]** *§ 2* is that they have been denied firm access on the Pacific Intertie. The Pacific Intertie has been and continues to be an important transmission facility for Edison because it gives Edison and other California utilities entitled to use it access to Pacific Northwest suppliers, including the Bonneville Power Authority ("BPA"), a federal agency that generates and sells hydroelectric power. Although utilities in that region are preferred for the electric power generated by the BPA, the BPA does sell power outside the Pacific Northwest when it is available, usually as a result of favorable water conditions. This electric power is known as BPA Surplus and, as with the other electric power sold by the BPA, is subject to a preference clause for publicly-owned entities. *16 U.S.C. § 832c(a)*. Pacific Northwest power, particularly the BPA Surplus, is significantly lower in price than other bulk electric power available in the western United States.

The Pacific Intertie consists of two 550kV AC lines running from Oregon through California and one 800kV DC line running from Oregon through Nevada. The AC lines are owned by several entities. In Oregon, the BPA owns one line within Oregon and shares **[*15]** ownership of the other line with Portland General Electric Company. In California, the AC line is owned by the Pacific Gas & Electric Company ("PG&E") from the California-Oregon border to the Midway substation near Bakersfield; it is owned by Edison from Midway to Lugo, except for two relatively short segments in northern California, one owned by the United States Bureau of Reclamation (the "USBR") and another by the Pacific Power & Light Company. The DC line is owned by the BPA north of the Nevada-Oregon border, and from the Oregon-Nevada border to Sylmar is owned 50% by Edison and 50% by the cities of Los Angeles, Burbank, Glendale and Pasadena.

In California, the Pacific Intertie is effectively controlled by Edison, PG&E and San Diego Gas & Electric ("SDG&E") (collectively the "California Companies") through a series of contracts, the most important of which is the California Companies Pacific Intertie Agreement ("CCPIA"). The CCPIA provides that the Intertie capacity owned by Edison and PG&E on both the DC and AC lines is shared among PG&E, Edison and SDG&E 50%, 43% and 7%, respectively. These percentages were developed by the California Companies based on each company's maximum **[*16]** load as a percentage of their combined maximum loads (including, in the case of Edison, the Cities'). SDG&E does not own any portion of the Pacific Intertie, but pays a transmission charge to PG&E and Edison representing 7% of the costs of ownership and maintenance.

The CCPIA also provides for the sharing of rights and obligations incurred by the California Companies under EHV agreements with DWR, Sacramento Municipal Utility District ("SMUD") and USBR. Under these agreements, DWR, SMUD and USBR are entitled to certain transmission service on the Intertie for the purpose of purchasing power from the Pacific Northwest. Under the DWR's EHV agreement, the DWR has an entitlement to 300Mw of firm transmission over the Intertie. PG&E, Edison and SDG&E share, in a ratio of 50-43-7, any of DWR's entitlement that DWR is not using.

Anaheim and Riverside have attempted to gain firm access on the Pacific Intertie in order to purchase low cost electric power by exercising their statutory preference for BPA Surplus. In 1976, Anaheim contacted Edison asking if any transmission service on the Pacific Intertie was then available. As a result of that inquiry, Edison met with Anaheim and Riverside in **[*17]** 1977. Edison indicated that transmission service was not generally available when low cost Northwest electric power could be purchased and that when transmission service was available, Edison was required by contract to offer it first to PG&E and SDG&E.

In January 1978, Anaheim and Riverside attempted to obtain firm access on the Intertie by contracting with DWR for a portion of DWR's Intertie entitlement. The DWR's EHV contract, however, required that the consent of Edison, PG&E and SDG&E be obtained before the DWR assigned any of its Intertie rights. Edison, as well as PG&E and SDG&E, refused to agree to the assignment to Anaheim and Riverside on the ground that DWR did not have rights under its transmission contract to provide transmission service to other entities. While the interpretation of the contract language in question is disputed by the Cities and Edison, Edison's interpretation appears to be legally correct. Apparently recognizing its doubtful contractual posture, the DWR informed Anaheim and Riverside that it could not assign its transmission rights to those cities without the consent of the California Companies.

In part because of Edison's position that it had to have **[*18]** a specific proposal to consider before it could determine whether to allow Anaheim and Riverside firm transmission on the Intertie, those two cities made a request for the firm transmission of 175Mw of electric power they had contracted to purchase from the BPA and the City of Tacoma. Anaheim and Riverside asserted, as all of the Cities have in this case, that firm transmission was necessary to make purchases under these contracts because BPA Surplus and Northwest bulk electric power is sold on a pre-scheduled basis, at least one day in advance. Edison rejected Anaheim's and Riverside's request stating that Edison needed all of its entitlement to transmit firm, low cost electric power into the Edison system for the benefit of all of its customers, including Anaheim, Riverside and the other plaintiff Cities. Edison did offer Anaheim and Riverside interruptible transmission service on the Intertie at that time, but Anaheim and Riverside maintained that interruptible service was inadequate. Edison's refusals to grant any firm access on the Intertie was one of the two central causes of the Cities' commencement of this antitrust action in 1978.

After the action was filed, further attempts **[*19]** were made to obtain access on the Intertie through participation in an upgrade of the DC line of the Pacific Intertie. The existing Intertie participants had upgraded the Intertie in 1979 and 1982, and in 1984 considered upgrading the capacity again. Riverside, Anaheim and Colton each contacted Edison requesting participation in the upgrade. Edison denied those cities any ownership participation in Edison's share of the upgrade. In denying this request, Edison noted that it anticipated full usage of the DC line upgrade in order to benefit all of Edison's customers and that it would be financially unsound for Edison to utilize less than its full share of the upgrade. Edison did not grant the Cities firm access on the Intertie.

II. *PRICE SQUEEZE*

Plaintiffs contend that Edison violated the antitrust laws by creating a price squeeze when it changed the historic relationship between the R-2 and A-8 rates and charged the Cities a higher rate for wholesale electric power than it charged certain of its large industrial customers for retail electric power. ***HN1***[] A price squeeze under the antitrust laws has been defined by one court as occurring when a vertically integrated company with monopoly **[*20]** power at the wholesale level but competition at the retail level deliberately sets its wholesale rates so high that its wholesale customers cannot compete in the retail market. *City of Kirkwood v. Union Elec. Co., 671 F.2d 1173, 1176 n.4 (8th Cir. 1982)*, *cert. denied, 459 U.S. 1170 (1983)*. A price squeeze then is a form of price discrimination that has an anticompetitive effect. [5] **[*21]** It may be caused by differences or inconsistencies in federal and state ratemaking policies and procedures ("regulatory price squeeze") or by intentional acts of a monopolist taken to disadvantage or eliminate competitors ("predatory price squeeze"). Though the electric utility price squeeze has a relatively brief history as a theory of antitrust liability, it has been recognized by a number of courts. [6]

---

[5] It is the FERC's view that "price discrimination becomes 'price squeeze' when the disparity between wholesale and retail rates causes an anticompetitive effect, i.e., the wholesale customer loses or is likely to lose retail load, thereby 'squeezing' the wholesale customer out of the retail market." *FERC IV,* 40 FERC at 62,151.

[6] *City of Mishawaka v. American Elec. Power Co, 616 F.2d 976 (7th Cir. 1980)*, *cert. denied,* ***449 U.S. 1096 (1981)***, *reh'g denied,* ***450 U.S. 960 (1981)***; *City of Kirkwood, 671 F.2d 1173*; *City of Groton v. Connecticut Light & Power Co., 662 F.2d 921 (2d Cir.*

The opportunity for a regulated utility to engage in a predatory price squeeze is created by the dual regulatory system that governs electric rates. It is possible for a utility intending to seriously impair or eliminate its competitors to take advantage of this dual regulatory scheme by timing its applications for new rates so as to ensure that over a given period of time, its customer-competitors pay wholesale rates that are unjustifiably higher than the retail rates then in effect. *See* Lopatka, *The Electric Utility Price Squeeze as an Antitrust Cause of* Action, *31 UCLA L. Rev. 563,* **[*22]** *623-30 (1984)*; *see also City of Mishawaka v. American Elec. Power Co., 616 F.2d 976, 982-84 (7th Cir. 1980)*, *cert. denied, 449 U.S. 1096*, *reh'g denied, 450 U.S. 960 (1981) ("Mishawaka II").*

As stated, in *FERC IV,* the FERC found that over the 11-1/2 month period, from February 1, 1976 to January 12, 1977, Edison's R-2 wholesale rate exerted a "regulatory price squeeze" on its R-2 customers, including the Cities, in the amount of approximately $ 2,642,000. *FERC IV,* 40 FERC at 62,165. This decision affirmed in part and reversed in part the Initial Decision of the Administrative Law Judge in *FERC III* and required Edison to pay a refund, with interest, to the R-2 class. *See FERC IV,* 40 FERC at 62,180-81. In reaching this decision, the FERC necessarily made findings on a number of the issues litigated in this case. Thus, before considering the elements of the Cities' predatory price squeeze claim, the Court must comment briefly on Edison's contention that the Cities are collaterally estopped from relitigating issues that were resolved against them in the price squeeze proceedings before the FERC.

A. *Collateral estoppel as to findings made by the FERC*

[*23] The FERC, in determining whether a wholesale rate is unjust or unreasonable, must consider whether wholesale rates are unduly discriminatory and anticompetitive in relation to retail rates. *Federal Power Comm'n v. Conway Corp., 426 U.S. 271, 279 (1976)*. If the rates are found to be unduly discriminatory and anticompetitive, the FERC's obligation is to set a rate which covers the cost of service, but which also eliminates or reduces as much as possible the anticompetitive relation between the wholesale and retail rates. The rate must be set within the reasonable cost zone at a point that minimizes price discrimination. Thus, when a wholesale customer believes that a price squeeze has occurred, it may, as the Cities did here, intervene in the FERC's rate proceedings to litigate that issue. Because the federal court has broader powers to remedy a price squeeze found to be predatory as well as anticompetitive, and in addition, because treble damages are available, the customer may also be motivated to file an antitrust suit based on the same facts. As a result, two tribunals with different mandates and procedures may conduct price squeeze inquiries that are theoretically, but not **[*24]** practically, independent of each other.

Although Edison lost on the regulatory price squeeze issue in the *FERC IV* proceeding, Edison argues that, in this case, the Court should give preclusive effect to certain findings the FERC made with respect to the Cities' evidence in that proceeding. Edison makes this argument because the result of giving preclusive effect to those findings would be to deprive the Cities of most of the evidence they used to prove price discrimination, anticompetitive effect and damages in this case. While Edison's arguments are not without substance, the Court has concluded that the FERC's findings should not be given collateral estoppel effect in this case.

The guidelines governing the circumstances under which agency determinations should be accorded preclusive effect in subsequent judicial proceedings are at best unclear. Although courts have been willing to give preclusive effect to agency findings in some cases, *see* 14A C. Wright, A. Miller & E. Cooper, Federal Practice & Procedure § 4475 (2d ed. 1985) [hereinafter Wright & Miller); *Restatement (Second) of Judgments § 83* (1982), it is by no means true that courts routinely accord that effect to agency **[*25]** findings in the same way they do to judicial determinations. *See* Note, *The Collateral Estoppel Effect of Administrative Agency Actions in Federal Civil Litigation,* 46 Geo. Wash. L. Rev. 65, 87 & n.140 (1977); Note, *Collateral Estoppel Effects of Administrative Agency Determinations: Where Should Federal Courts Draw the Line?, 73 Cornell L. Rev. 817, 818 (1988)*; *see also Lyle v. Secretary of Health and Human Services, 700 F.2d 566, 568 n.2 (9th Cir. 1983)* (stating that in the administrative law context, the principles of collateral estoppel and res judicata are applied less rigidly than in the context of courts).

1981). *But see Town of Concord v. Boston Edison Company,* F.2d (1st Cir. 1990); *City of Newark v. Delmarva Power & Light Co., 467 F. Supp. 763 (D. Del. 1979)* (disallowing antitrust remedy for price squeeze by electric utility).

The analysis that courts have tended to apply in the "administrative collateral estoppel" context requires that, in addition to considering traditional collateral estoppel requirements, a court determine whether the agency's procedure provided an adequate substitute for judicial procedure and whether the particular statutory scheme involved suggests that preclusive effect should or should not be granted. *See* Wright & Miller, *supra,* § 4475; *see also* P. Areeda & H. Hovenkamp, ***Antitrust Law*** para. 323.2f (Supp. 1989). A leading Ninth Circuit case **[*26]** in this area generally incorporates these concerns into a three-part inquiry:

(1) whether the [agency] was acting in a judicial capacity;

(2) whether the issue presented to the district court was actually litigated before the [agency); and

(3) whether its resolution was necessary to the [agency's] decision.

See *Exxon Corp. v. Fischer, 807 F.2d 842, 845-46 (9th Cir. 1987)*, *modified on other grounds, 817 F.2d 1429 (9th Cir. 1989)*.

The Court assumes for the purpose of this discussion that the third concern of *Exxon* would be satisfied with respect to the issues involved here. Accordingly, these issues are examined solely in the light of the first and second concerns expressed in *Exxon.*

The first *Exxon* factor derives from *United States v. Utah Construction Co., 384 U.S. 394 (1966)*. The *Utah* Court stated in dicta that courts should give preclusive effect to agency determinations that otherwise meet collateral estoppel requirements, where "an administrative agency is acting in a judicial capacity." *Id. at 422*. Among the varied forms of administrative proceedings that have developed, a spectrum that ranges from decisions that lack all protections provided **[*27]** by Article III courts, *see, e.g.*, *Nasem v. Brown, 595 F.2d 801, 806-807 (D.C. Cir. 1979)* (finding that agency did not act in a judicial capacity where the decision was based solely on a written record), to those that provide most of those protections, *see, e.g.*, *Amos v. Commissioner, 360 F.2d 358 (4th Cir. 1965)* (finding that tax court exercises judicial functions), is clearly discernible. Proceedings that fall somewhere in the middle may present difficult questions, but, as Edison points out, the FERC price squeeze proceedings do not belong in this middle category. The FERC proceedings provided a hearing and the opportunity to rebut opposing evidence and cross-examine witnesses. Further, the FERC made findings and conclusions after considering testimony, briefs and argument. Nearly identical characteristics satisfied the Ninth Circuit panel in *Exxon* that a state agency was "acting in a judicial capacity." *See* *Exxon, 807 F.2d at 846* (finding that the Coastal Commission was "acting in a judicial capacity" when it decided a question of law after a hearing, with the opportunity to present and rebut evidence, and made findings and conclusions after carefully considering **[*28]** the parties' supporting statements). The FERC was unquestionably acting in a judicial capacity, within the meaning of *Utah.*

Exxon's second factor -- that the issue presented to the district court has been actually litigated before the agency -- is the critical point on which the resolution of the collateral estoppel question in this case rests. This factor reflects *both* the traditional collateral estoppel requirement that an issue has been actually litigated, as well as the concern unique to the administrative estoppel context: that the issue before the court be substantively the same as the issue that was before the agency. *See generally* *Restatement (Second) of Judgments § 83, comment b* (stating that "the essential question is whether, within the context of the larger purpose of the administrative proceeding, an issue is formulated as it would be in a court, and decided according to procedures similar to those of a court"). Edison argues that all of the issues for which it seeks collateral estoppel effect were actually litigated, and that this requirement is therefore satisfied. Careful analysis persuades the Court to the contrary.

The first step in applying Exxon's "actually **[*29]** litigated" test is to define the issues which concerned the agency and those that concern the court because the level of abstraction chosen in defining "issue" is actually determinative of the question of whether this requirement for estoppel is met. Both parties appear to agree that the FERC's finding of a "price squeeze" is not an issue that could be collaterally estopped. They both recognize that the issue before the FERC as to whether a regulatory price squeeze existed is very different from the issue before this Court as to whether a price squeeze that violated *§ 2* existed. The latter requires a showing of exclusionary intent, whereas the former can be simply the result of a clash between the ratemaking procedures and policies of state and federal regulatory bodies.

An earlier case that addressed the question of whether the FERC's conclusion with respect to a price squeeze claim could estop a federal court's determination of an antitrust price squeeze claim concluded that the FERC's decision had no such effect. *See* Borough of Ellwood City v. Pa. Power Co., 570 F. Supp. 553, 560 (W.D. Pa. 1983) [hereinafter *Ellwood City).* The question presented in *Ellwood City* -- whether **[*30]** the FERC's finding of no price squeeze collaterally estopped litigation of the price squeeze issue in a district court -- is easier to answer now than it was in 1983 when *Ellwood City* was decided because in *FERC IV,* the difference between the type of price squeeze addressed by the FERC and that addressed by an antitrust court is clearly defined. The inquiry here is more involved than that of the court in *Ellwood City,* however, in that Edison seeks to collaterally estop the Cities as to individual findings upon which the FERC's conclusion of a regulatory price squeeze rests. Neither the *Ellwood City* case, nor any other price squeeze case, appears to have addressed this precise argument. Thus, it is appropriate to look at a few of these findings to illustrate why collateral estoppel should not apply.

1. *The price discrimination issue*

a. *The finding that the Cities' bill comparison analysis does not measure price discrimination*

The FERC, in reversing the finding that the Cities' bill comparison analysis was an alternative method of determining the existence of price discrimination even where a more reliable comparative rate of return analysis was available, **[*31]** stated that of the measurement methods presented to it, the bill comparison was inferior and therefore should not be used. At the time, the FERC had before it several different studies by the Cities and by Edison. The FERC chose to use one of Edison's studies, with adjustments, as the best method for measuring the existence of price discrimination. The situation in which this Court finds itself is significantly different. In this antitrust case, the burden is on the Cities to establish a *prima facie* case of price discrimination. The Court may determine that the Cities have not met this burden, in light of Edison's superior studies, or that Edison's studies rebut the Cities' case in whole or in part. However, the question of whether any part of the Cities' bill comparison evidence was reliable enough to support a *prima facie* case of price discrimination was not the issue actually litigated by the FERC. Indeed, we have no way of knowing what the FERC would have decided if it had had to make a determination based on the Cities' studies standing alone. The one thing that is clear is that the FERC did not find the Cities' analysis so wholly invalid that the analysis cannot be used **[*32]** for any purpose in this case. The Court can give attention to the FERC's criticism of the Cities' analysis, but the Cities are not collaterally estopped to rely on them in this case.

b. *The finding that the Cities' comparative rate of return study does not use the correct A-8 coincidence factor in calculating retail costs*

The same observation may be made with respect to the disposition of this issue. The FERC did not address whether or not the Cities' comparative rate of return analysis should be rejected, but rather, as between the Cities' use of an 89.1% coincidence factor and Edison's use of an 82% coincidence factor, which factor was superior. The FERC did not conclude that one was clearly correct and the other clearly erroneous. It simply stated that it had doubts about the use of the Cities' figure, whereas no one had challenged Edison's figure as unreasonable. The FERC then used Edison's comparative rate of return study. The FERC's reasons for choosing or rejecting a particular study or part of a study may be useful to the Court in deciding what weight to give that study, but the issue the FERC ultimately determined is not formulated as it would be in a court. This issue **[*33]** is thus not appropriate for the application of collateral estoppel.

c. *The finding that the Cities' analyses did not account for synchronization of fuel costs*

The question of whether or not the FERC actually litigated the validity of the Cities' studies and found them to be invalid based on the failure to adjust for fuel expenses is somewhat more involved. It is undisputed that *FERC IV* affirmed *FERC III's* finding that the Cities' failure to adjust for fuel undercollections invalidated their comparative rate of return study. In the two previously discussed situations, the FERC was merely deciding that, of the studies before it, the Cities' were inferior, not that the Cities' studies were invalid. Still, in this situation, as in the previous two, the character of the proceeding must be kept in mind. When the FERC declares a study "invalid" and then uses another party's valid study, it is exercising an option available to it within the context of ratemaking. Clearly this Court would not be bound to treat the Cities' analyses as wholly invalid in the antitrust context though the FERC's view might well be considered persuasive on this point.

The same comments apply with equal **[*34]** vigor to Edison's argument that the Cities' analyses rely on incorrect time periods.

d. *The finding that the Cities' analyses do not account for valid policy differences between the FERC and CPUC*

The issue of whether or not tax normalization is a genuine policy difference that an antitrust court should recognize as having a significant effect on the analysis of price discrimination was not litigated in the FERC proceedings. The FERC was concerned with whether or not Edison should be allowed to adjust its A-8 rate of return figures to reflect tax normalization. Ultimately, the FERC decided that Edison could not adjust its figures because it had not been required to use tax normalization. Obviously, the statement that differences in tax accounting procedures were genuine policy differences is not a "finding" for collateral estoppel purposes.

2. *The actual anticompetitive effect and damages issues*

Edison argues that the Cities are collaterally estopped from proving actual harm to competition based on the FERC finding that the Cities presented no evidence that they had lost actual customers or failed to annex specific territories, and the further finding that Edison had rebutted **[*35]** the Cities' claims of actual anticompetitive effect. Suffice it to say that the FERC does not use the same legal standards in reaching a conclusion of "no actual anticompetitive effect," as would an antitrust court. Moreover, collateral estoppel as to this issue is unnecessary because the Cities have conceded that no customers or territories were lost due to the price squeeze. The question before this Court is whether the Cities can prove an antitrust violation without showing lost customers. *Cf. Mishawaka II, 616 F.2d at 986-87* (requiring proof of specific injuries).

3. *The Court's discretion to adopt the FERC's findings*

As to a final point, even if it could find that the requirements for the application of collateral estoppel had been met on the issues specified by Edison, the Court would be hesitant to conclude that the FERC's findings should be given preclusive effect because the regulatory scheme governing rates does not contemplate that such administrative decisions are to preclude independent judicial action. Wright & Miller, *supra,* § 4475; *cf. Ellwood City, 570 F. Supp. at 560* (declining to give preclusive effect to the FERC decision that no price squeeze existed **[*36]** because "courts can afford relief the FERC cannot provide"). The FERC is concerned only with "regulatory price squeezes," or price differentials that have an anticompetitive effect without regard to intent. *See FERC* IV, 40 FERC at 62,176. Thus, although the FERC and the federal court address many of the same facts, their concerns, requirements and perspectives are significantly different; as the FERC itself stated, it does not engage in "comprehensive antitrust proceedings." *FERC IV,* 40 FERC at 62,168; *FERC V,* 50 FERC at 61,872 n.10. Moreover, as the Cities argue, the FERC's responsibility is to determine whether wholesale rates are consistent with its statutory and regulatory requirements whereas the Court's responsibility is to determine whether Edison's conduct violated the antitrust laws, irrespective of the FERC's regulatory requirements.

While this difference in the mandates of the two tribunals causes the Court to refuse to apply collateral estoppel principles in this case, it is still important to recognize that the Court is not prevented from exercising its discretion to adopt portions of the FERC's price squeeze analysis and conclusions where the Court deems **[*37]** it appropriate to do so. It is within the Court's discretion to selectively adopt some of the FERC's findings to avoid a duplication of efforts. The Court also should take into account the fact that the FERC has exhaustively considered the economic issues involved in determining the existence and amount of the price squeeze and "has substantially greater expertise in the area." *Mishawaka II, 616 F.2d at 988*. Thus, while the Court is not bound by the FERC's findings, the Court need not disregard them so long as the Court is satisfied that the FERC's analysis is consistent with its own.

Finally, Edison correctly points out that prior to the trial in this case, Judge Lucas ruled that the FERC's finding that the Cities and Edison are in competition collaterally estopped litigation of that issue in this antitrust case. [7] Edison argues that fairness requires that the Cities, having benefitted from estoppel on that issue, should be precluded from arguing that collateral estoppel does not apply to other issues. The Court, of course, recognizes that its conclusions here may not be wholly consistent with the view expressed in Judge Lucas' prior orders. The possibility of inconsistency, **[*38]** however, should not control the disposition of the remaining issues in the case. [8] Having explained the reasons for determining that collateral estoppel of particular issues decided by the FERC does not bar the litigation of the Cities' antitrust price squeeze claim, the merits of those claims should now be addressed.

B. *Section 2 analysis*

HN2[] To prove a violation of *§ 2*, plaintiffs must establish three elements: (1) the possession of monopoly power in the relevant market, (2) the willful acquisition or maintenance of that power, and (3) causal antitrust injury. *Oahu Gas Service, Inc. v. Pacific Natural Resources Inc., 838 F.2d 360, 363 (9th Cir. 1988)*, *cert. denied, 109 S.Ct 180 (1988)*; *Catlin v. Washington Energy Co., 791 F.2d 1343, 1347* ***[*39]*** *(9th Cir. 1986)*.

1. *Monopoly Power*

HN3[] The determination of whether Edison possesses monopoly power involves a two-step inquiry. First, the Court must determine what constitutes the "relevant market, *i.e.* 'the arena within which the strength of the competitive forces is measured,'" *Grason Electric Co. v. Sacramento Mun. Util. Dist., 571 F. Supp. 1504, 1519 (E.D. Cal. 1983)*, *rev'd on other grounds, 770 F.2d 833 (9th Cir. 1985)*, *cert. denied, 474 U.S. 1103 (1986)* (quoting P. Areeda, *Antitrust Analysis* 133 (2d Ed. 1974)). Second, the Court must evaluate whether the defendant exercises monopoly power in that market. *See, e.g., United States v E.I. du Pont De Nemours & Co., 351 U.S. 377, 391-94 (1956)*. The relevant market is defined by reference both to the product which is being sold and to the geographical area in which the product is sold.

A utility price squeeze case, however, does not fit easily into the traditional antitrust analysis, and particularly is this true with respect to the analysis employed in determining the relevant market. In a price squeeze case, two product markets -- wholesale and retail -- are involved. The Cities assert, and Edison has not **[*40]** disputed, that the relevant wholesale product is firm bulk electric power ("bulk power") and that the relevant retail product is low voltage electric power delivered to end-use consumers. The Court must determine whether the Cities are required to show that Edison possessed monopoly power in the retail, the wholesale, or both markets to satisfy the first element of an antitrust claim. [9] In *Mishawaka I,* the district court held that a showing of monopoly power in *either* the retail or the wholesale market would establish this element of *§ 2* price squeeze claim. *City of Mishawaka v. American Elec. Power Co., Inc., 465 F. Supp. 1320, 1325 (N.D. Ind. 1979)* *("Mishawaka I"), aff'd except as to remedies, 616 F.2d 976 (7th Cir. 1980)* *("Mishawaka II"), cert. denied, 449 U.S. 1096 (1981)*. This Court finds more persuasive the conclusion reached in *Borough of Lansdale v. Philadelphia Elec. Co., 692 F.2d 307 (3d Cir. 1982)*

---

[7] Order Specifying Certain Facts to be without Controversy, filed May 18, 1981 [hereinafter 1981 Order].

[8] The Cities did not rely solely on Judge Lucas' order and in fact did litigate the issue of competition before this Court. *See* Part II.D.2, *infra.*

[9] In *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 275-76 (2d Cir. 1979)*, *cert. denied,* ***444 U.S. 1093 (1980)***, the Court adopted the "monopoly leveraging" theory. The Court held that "the use of monopoly power attained in one market to gain a competitive advantage in another is a violation of *§ 2*, even if there has not been an attempt to monopolize the second market. It is the use of economic power that creates the liability." *Id. at 276*. The Ninth Circuit has not adopted the flexible standard for monopoly leveraging Set forth in *Berkey.* In *Catlin v. Washington Energy Co.,* the Ninth Circuit noted that it had not adopted *Berkey* in any of its decided cases, but instead has found *§ 2* violations based on anticompetitive conduct by the monopolist in the second market. *791 F.2d 1343, 1346 (9th Cir. 1986)* (discussing *M.A.P. Oil Co. Inc. v. Texaco, Inc., 691 F.2d 1303 (9th Cir. 1982)*, and *Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534 (9th Cir. 1983)*, *cert. denied,* ***465 U.S. 1038 (1984))***. In *Syufy Enterprises v. American Multicinema, Inc., 793 F.2d 990, 996 n.10 (9th Cir. 1986)*, *cert. denied,* ***479 U.S. 1031 (1987)***, the Ninth Circuit recognized "the debate concerning the anticompetitive effects of leveraging."

[hereinafter *Lansdale].* In *Lansdale,* the court held that ***HN4***[] where the monopolist is alleged to have impaired the customer-competitors' ability to compete by raising the wholesale rates, the relevant product market is the wholesale market. *Id* ***[*41]*** *. at 312*. The Cities, then, were required to establish that Edison possessed monopoly power in the bulk power market, *i.e.,* the wholesale market in which the relationship of Edison and the Cities was that of supplier and customer.

[*42] It is, in addition, necessary to define the relevant geographic market. The Cities contend that the relevant geographic market for bulk power is Edison's control area and that Edison possesses the power to control prices in that market since it owns and controls all of the transmission lines to the Cities. Edison contends that the relevant geographic market is larger than its control area because the Cities could have purchased, and in some instances did purchase, bulk power from distant suppliers. Edison maintains that the relevant geographic market for bulk power consists of fifteen states in the western United States and part of Canada, and that competitive forces in that market prevented Edison from controlling the price of bulk power available to the Cities.

HN5[] Under the antitrust laws, the relevant geographic market is the "market area in which the seller operates, and to which the purchaser can practicably turn for supplies." *Tampa Elec. Co. v. Nashville Coal, 365 U.S. 320, 327 (1961)*. If the Cities had the opportunity to purchase from suppliers in a large geographic area, the market should be defined broadly; and, under traditional market analysis, it would be more difficult **[*43]** to show that Edison possessed monopoly power. ***HN6***[] "A firm cannot impose monopoly prices if buyers are free to purchase a competitor's goods." *General Business Systems v. North American Philips Corp., 699 F.2d 965, 972 (9th Cir. 1983)*. But Edison cannot establish that the geographic market extends beyond its control area simply by demonstrating that the Cities' potential suppliers are widely dispersed. While the Cities had suppliers other than Edison in the western United States, the Cities were not completely free to purchase bulk power from these other suppliers. Edison owns all the transmission lines surrounding the Cities, and had nearly absolute discretion to permit or to refuse integration of the Cities' proposed purchases. From 1975 to 1985, the Cities purchased virtually all of their bulk power requirements from Edison, receiving capacity credit for only one proposed resource. Although Edison did transmit to the Cities a certain amount of bulk power from other suppliers, these purchases were not integrated, and most were transmitted on an interruptible basis. Recognizing the commercial realities of the situation in the relevant time period, Edison was in a monopoly position **[*44]** with respect to the Cities' bulk power supply. *See* *Otter Tail Power Co. v. United States, 410 U.S. 366, 369-370 (1973)*, *reh'g denied, 411 U.S. 910 (1973)* (relevant geographic market determined to be defendant utility's control area because of defendant's control over transmission lines). The Court reaches this conclusion as a matter of fact, not as a matter of law. *See* *Lansdale, 692 F.2d at 311*.

To show that Edison possessed monopoly power in the bulk power market in its control area, the Cities must establish that Edison had "'the power to control prices or exclude competition'" in that market. *United States v. Grinnell Corp., 384 U.S. 563, 571 (1966)* (quoting *United States v. E.I. du Pont de Nemours & Corp., 351 U.S. at 391*)). In antitrust cases involving unregulated industries, courts rely on evidence of the defendant's market share to assess whether the defendant exercises monopoly power. *MCI Communications v. American Telephone & Telegraph Co., 708 F.2d 1081, 1106-1107 (7th Cir. 1983)*, *cert. denied, 464 U.S. 891 (1983)*. Edison argues here that the presence of regulation made it impossible for it to control prices or exclude competition within the meaning **[*45]** of the antitrust laws. Edison is correct that ***HN7***[] where the alleged monopolist is regulated, traditional market share analysis is not necessarily indicative of the monopolist's power to control prices. *See* *MCI Communications, 708 F.2d at 1107*. Indeed, utilities usually exercise monopoly power with respect to their customers and are regulated because it has been determined that competition should not prevail in that industry. *See* Watson & Brunner, *Monopolization by Regulated "Monopolies": The Search for Substantive Standards,* 22 Antitrust Bull. 559, 566 (1977).

The presence of regulation limits, but does not wholly negate, Edison's ability to control prices and to obtain monopoly profits. "Insensitivities, gaps or delays" in the system of regulation may enable the regulated monopolist to obtain more than competitive returns and to improperly affect actual or potential competition in a related market. P. Areeda & H. Hovencamp, ***Antitrust Law*** para. 518.3d (Supp. 1989); *see also* *Central Telecommunications v. TCI Cablevision, 800 F.2d 711, 726 (8th Cir. 1986)*.

HN8[] The price squeeze theory of antitrust liability is concerned with gaps in the regulatory scheme that result from **[*46]** the dual federal and state regulation of the investor-owned utility's rates. While a utility does not have total control over its rates, the utility has the power to adversely affect competition within the system of dual regulation. By manipulating the timing and amount of its rate filings, it is possible for the utility to ensure that the rates of its wholesale customers are unjustifiably high in relation to the rates of its retail customers. It is possible for the disparity in rates to be obtained by a utility's inaction as well. For example, the utility could simply decline to take any steps to redress a price disparity created by the inconsistent actions of the federal and state regulatory agencies.

HN9[] The fact that the monopolist's control of prices may be checked by the regulatory system in the form of refunds does not close the gap completely -- refunds may be inadequate. Refunds are often received only after many years of agency proceedings by which time the customer-competitor may have lost its customers, delayed improvements or ultimately been squeezed out of the market. As the Seventh Circuit recognized in *Mishawaka II,* the dual regulatory system offers an "obvious, ready **[*47]** made illegal opportunity with a legitimate gloss." *616 F.2d at 983-84*.

Thus, because Edison was in a position to control and did exercise control over the Cities' bulk power supply, and because the dual regulatory scheme does not foreclose and indeed provides the opportunity for anticompetitive conduct, the Court finds that Edison possessed monopoly power in the bulk power market in its control area.

2. *Competition*

To prevail on a price squeeze claim, the Cities must demonstrate that they are not only customers but also competitors of Edison. The Cities' status as customer-competitors of Edison is a threshold issue in their price squeeze case. Judge Lucas found at an early stage in the case that the parties were collaterally estopped from disputing the FERC finding on this issue. [10] Nevertheless, since evidence on this issue was presented to this Court, discussion of it is appropriate here.

In the electric utility industry, retail competition can exist at three different levels: competition **[*48]** for the right to serve all the customers in a given territory (franchise competition), competition for individual customers (*e.g.* large industrial customers), and fringe area competition for customers on the periphery of the service area of rival utilities. *City of Groton v. Connecticut Light & Power Co., 662 F.2d 921, 930 (2d Cir. 1981)*. Although initially arguing both customer and franchise competition, at trial the Cities appeared to abandon their customer competition claim and focused mainly on franchise competition.

Franchise competition is the rivalry between an investor-owned electric utility and a municipally-owned utility for the right to serve a defined group of customers, usually a city or a community. A community within the control area of an investor-owned utility may choose to condemn through eminent domain proceedings the private utility operating within its boundaries. Conversely, if the community is operating its own utility, it may choose to sell it to the privately-owned utility. Within Edison's service area, then, retail customers have only two choices: Edison or a municipally-owned utility. In addition to competition for the right to provide service, franchise **[*49]** competition between a private utility and a municipally-owned utility may take the form of yardstick competition -- the competitive pressure on utilities generated by comparisons of their rates and quality of service with those of neighboring utilities.

The Cities have shown that there was franchise competition between Edison and the Cities. Although Edison last acquired a municipally-owned utility in the 1960s, [11] **[*50]** Edison considered and developed plans to take over a number of municipally-owned systems during the 1960s and came close to acquiring Colton's system. [12] In

[10] 1981 Order at 3(f)(i).

[11] In 1965, Edison acquired Desert Cooperative Inc., which distributed electricity in the community of Twenty-Nine Palms in San Bernardino County.

recognition of possible municipal takeovers, Edison monitored the development of community interest in publicly-owned utilities, which became more common in the 1970s as fuel prices increased. In late 1974, Edison formed a municipal ownership task force to respond to "municipal threats." The task force, together with Edison's resale accounts staff, prepared and disseminated information to Edison's representatives designed to assist them in discouraging customers interested in municipal ownership.

The Cities also showed that Edison monitored the retail rates charged by the municipally-owned utilities and provided rate comparisons to its industrial customers. Similarly, the Cities regularly monitored Edison's rates in order to be competitive with it. Anaheim, for example, adopted a policy in 1976 to maintain rates that were at least five percent lower than rates Edison charged to adjacent communities.

The evidence presented at trial amply supports the finding of Judge Lucas that the Cities and Edison were competitors.

3. *Anticompetitive conduct*

As stated, ***HN10***[] the second element of a *§ 2* violation is the "willful acquisition or maintenance of [monopoly] power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. at 570-71*. Even where monopoly power is lawfully acquired, the monopolist may not maintain that power by engaging **[*51]** in exclusionary conduct. Exclusionary conduct is defined as "'conduct, other than competition on the merits or restraints reasonably "necessary" to competition on the merits, that reasonably appears capable of making a significant contribution to . . . maintaining monopoly power.'" *Barry Wright Corp. v. ITT Grinnell, 724 F.2d 227, 230 (1st Cir. 1983)* (quoting III P. Areeda & D. Turner, ***Antitrust Law*** para. 626 (1978)).

The Cities contend that the amount and timing of the October 1975 wholesale rate filing that resulted in the rate increase for the Cities and the resulting price discrimination constituted exclusionary conduct under *§ 2*. ***HN11***[] As to the issue of price discrimination, the Cities had the burden of establishing that a rate differential existed, and Edison then had the burden of proving the cost justification for the disparity. *See Mishawaka II, 616 F.2d at 984* (noting defendant utility's failure to justify rate differential).

In finding a regulatory price squeeze, the FERC determined that the rate differential between the R-2 and A-8 rates from February 1, 1976 to January 12, 1977 was not cost-justified and resulted in a price squeeze. *FERC IV,* 40 FERC at 63,161-62. **[*52]** In making this determination, the FERC rejected the Cities' contention that the price squeeze lasted over a longer period: from February 1, 1976 to January 15, 1978. In this Court, the Cities sought to establish the existence of a price squeeze for a 23-1/2 month period rather than an 11 or 11-1/2 month period. *FERC* IV, 40 FERC at 62,163.

That a rate differential between the R-2 and A-8 rates existed from February 1, 1976 to September 13, 1977 was held to be an issue without controversy by Judge Lucas, [13] and that this differential continued until January 15, 1978 was not disputed. Determining whether these rates were discriminatory over this entire period, however, is an involved inquiry. Edison, of course, sought to prove that no price squeeze ever existed and that Edison's rates were cost-justified over the entire period, including the period that the FERC found Edison to have been engaged in a regulatory price squeeze. Edison's experts testified at length that the Cities' bill comparison study was inaccurate because of its failure to take into account the costs of service. The Court is persuaded that Edison's experts are correct in making this criticism of the bill comparison **[*53]** study.

Edison also contends, as it did before the FERC, that the time period used by the Cities to show price discrimination is inappropriate, and that the entire time period the rates were in effect, the 43 month "locked-in" period, must be considered. The Court finds this argument to be without merit. First, ***HN12***[] there is no minimum period of time

---

[12] Although the measure did not receive the two-thirds vote necessary to pass, in 1965 sixty percent of the Colton voters voted to sell the system to Edison.

[13] Order Granting Defendant's Motion for Reconsideration and Modification, June 18, 1981.

for which a plaintiff must establish price discrimination in order to show that there is a price squeeze. *See* City of Groton, 662 F.2d at 934 (five month period long enough to support price squeeze claim if substantial sums involved). Second, there is no support for the contention that competitive prices charged in the latter part of the locked-in period somehow mitigate the discriminatory prices from February 1, 1976 to January 12, 1977. *Cf.* Ohio Valley Elec. Corp. v. General Elec. Co., 244 F. Supp. 914, 941 (S.D.N.Y 1965) (in § 1 tying case, price increases in the period after **[*54]** the alleged conspiracy in existence not relevant).

After lengthy review of the presentation made by both the Cities and Edison as well as the analysis of this issue made by the FERC, the Court is persuaded that it should adopt the FERC's conclusion that an unjustifiable rate differential existed from February 1, 1976 until January 12, 1977. As stated, the Court is free to make its own decision as to amount and duration of the price squeeze. Having satisfied itself as to the wisdom of the FERC's findings, the Court concludes that the Cities were subjected to a price squeeze as ultimately found by the FERC.

One other aspect of Edison's conduct remains to be examined. Edison did not take steps to prevent the price squeeze from occurring, nor did Edison attempt to ameliorate the effects of the squeeze on the Cities when the Cities complained about it. Edison took the position that it was entitled to a reasonable rate of return from the customers affected by the two rate applications, and it stuck with that position. This aspect of Edison's conduct is addressed in the next section as part of the analysis of intent.

4. *Intent*

As a price squeeze can result from the nature of the dual **[*55]** regulatory system despite the absence of any exclusionary intent on the part of the utility in creating it, distinguishing between innocent and exclusionary conduct in this context has proved troublesome for both the FERC and the courts. [14] The FERC has resolved this problem by confining its inquiry to the "regulatory price squeeze" for which intent is not an element. *FERC IV,* 40 FERC at 62,151. Most courts have resolved the dilemma by requiring plaintiffs in cases involving regulated utilities to prove "something more" than general intent. In Mishawaka II, 616 F.2d at 985, the Seventh Circuit held that "[i)n the particular circumstances of a regulated utility . . . entitled to recover its cost of services and provide its investors with a reasonable rate of return, we believe that something more than general intent should be required to establish a Sherman Act violation." The Circuit restated this position in MCI Communications, 708 F.2d at 1108, where, in analyzing the requirement of "willfulness" in a case involving a regulated public utility, it held that the district court had not erred in requiring the plaintiff to prove that each anticompetitive act of the defendant **[*56]** had been done with the intent to maintain a monopoly in the relevant market. The Second Circuit has also adopted this view. City of Groton, 662 F.2d at 931.

In utility price squeeze cases, courts have rested their finding of specific intent on a consideration of the utility's overall conduct in relation to its customer-competitors and not merely on the filing of discriminatory rates alone. *See* Lopatka, *supra,* at 605 n.206 (citing cases). The reason for this result is relatively simple. Regulated utilities like Edison are required to make rate filings in two different agencies; they must engage in this conduct to run their business. Thus, unless the amounts and the timing of the rate filings in the two agencies are so outrageously discriminatory as **[*57]** to clearly indicate the utility's exclusionary intent in creating the price squeeze, the trier of fact cannot draw any inference of intent from the filings alone. There must be other conduct which, when taken together with the creation of the price squeeze, permits the Court to find that the utility intended willfully to maintain its monopoly power in violation of § 2. This other conduct furnishes the basis for an inference of "something more" than general intent.

Thus, in Mishawaka II, 616 F.2d at 984-85, the court gave significant weight to the district court's finding of the existence of threats to municipal wholesale power supplies and the defendant utility's policy of acquisition of municipal systems. In *Town of Concord v. Boston Edison Company,* F.2d (1st Cir. 1990), the First Circuit held that "a price squeeze in a fully regulated industry such as electricity will not normally constitute 'exclusionary

---

[14] See *generally* Lopatka, *supra,* at 603, 615 (distinguishing between predatory and innocent price squeezes); *see also* Watson & Brunner, *supra,* at 576-79 (describing general difficulty of identifying culpable behavior in the regulatory context).

conduct' under Sherman Act *§ 2*," stating that in all of the price squeeze cases dealt with in other circuits, "the price squeeze allegation was but one of several allegations of several different kinds of 'exclusionary conduct,'" the price squeeze allegation being **[*58]** insufficient standing alone.

Although the First Circuit in *Town of Concord* virtually rules out the possibility that a *§ 2* violation could be found based on a price squeeze allegation standing alone, it obviously does not say, nor do any of the other cases cited here say, that price squeeze conduct should be viewed as irrelevant in assessing the utility's intent.

HN13[] A distinction can be made between a utility caught in the web of dual regulation and one that deliberately seeks to take advantage of the regulatory systems to maintain or extend its monopoly power. Although a utility does have a constitutional and statutory right to earn a reasonable return on its investment, as a monopolist, it also "must take care that otherwise lawful acts do not have anticompetitive effects." *Oahu, 838 F.2d at 368*. Its relationship as a monopolist-supplier to its customer-competitors must be carefully weighed along with its knowledge of the probable consequences of its overall conduct in judging whether its actions were those of the reasonable regulated firm. *City of Groton, 662 F.2d at 931*.

Edison has argued that the evidence shows that it did not have the requisite intent for a *§ 2* violation **[*59]** because before both agencies it applied for rates that would produce identical revenue to cost ratios, would become effective simultaneously and would not result in a price squeeze. Edison contends that, but for an unusually long delay on the part of the CPUC in approving the retail rate increase, no price squeeze would have occurred; Edison therefore argues that it should not be held responsible. Moreover, Edison maintains that it did everything it reasonably could have done to avoid the result of the two rate increases being approved at different times. Edison informed the CPUC of the serious hardship any delay would cause and requested interim rate relief if the final decision were to be further delayed. Although Edison could have taken steps to reduce the wholesale rate, it claims it did not do so because such action would have resulted in a less than five percent rate of return on those customers.

The Court finds Edison's characterizations of the events leading to the price squeeze untenable for several reasons. First, the CPUC's delay did not take Edison by surprise. Even before Edison filed its rate increase with the FERC, Edison knew that it would not receive a ruling from **[*60]** the CPUC before the latest possible date on which the wholesale rate would take effect. Notwithstanding this knowledge, Edison filed the wholesale rate increases. Moreover, Edison asked for the minimum suspension of one day; if granted, this would have created a price squeeze even if the CPUC had issued its decision on the earliest possible date predicted by Edison. Edison's explanation that it applied for the one day suspension because it had always done so and had always received a five month suspension is implausible. Moreover, Edison did not passively acquiesce in whatever extension the FERC granted, but in fact vigorously opposed the Cities' request for a five month suspension.

Second, nothing in the record supports Edison's contention that it took steps to avoid the price squeeze. Rather, it is evident from the testimony that Edison did everything it could to obtain the highest possible rate of return from each class of customers without regard to the effect it would have on the relationship between rates. While Edison may have attempted to prod the CPUC into action on its retail rate application, Edison's motivation was clearly its desire to salvage declining revenues from **[*61]** the retail class. It was not trying to prevent a price squeeze. Indeed, even the original rate design sent to the two agencies was not intended to avoid the price squeeze.

Third, Edison's argument that any delay in the increase of its wholesale rates would have resulted in an unacceptably low rate of return of less than four percent with respect to its wholesale customers does not totally convince the Court. Although in general Edison is correct that a utility should not be required to take a beating before the FERC because it took a beating before the CPUC, Edison did have less restrictive alternatives available to it which would have mitigated the anticompetitive effects of its actions. Edison was not confronted with the "either/or" choice of an unacceptably low rate of return or going forward with its request for 9.14%. For example, it could have reduced its request to some middle point that would have paralleled the interim relief of 8.7% requested at the CPUC. It could have chosen not to use tax normalization, a procedure not permitted by the CPUC, in the calculations submitted to the FERC. However, Edison took neither these nor any other steps to avoid the price squeeze that **[*62]** was bound to result and as a consequence, it cannot successfully argue that the squeeze was unintentional. Edison clearly had the general intent to do what it did. The question is whether Edison's conduct in this regard can support an inference of the specific intent required in a *§ 2* regulated utility case.

To hold a utility responsible under *§ 2* where it knows that its requests for rates in two different regulatory agencies are likely to create a price squeeze would not read the intent element out of that section altogether as Edison contends. ***HN14***[] In contrast to the FERC, which looks only to the end result in determining if a refund is required, an antitrust court looks to all of the utility's conduct and justifications to infer innocent or culpable intent, a well-established approach in antitrust jurisprudence. [15] *See Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602 (1985)* (intent analysis subsumed in conduct analysis); *Drinkwine v. Federated Publications, Inc., 780 F.2d 735, 740 (9th Cir. 1985)*, *cert. denied, 475 U.S. 1087 (1986)*, *reh'g denied, 476 U.S. 1131 (1986)* (specific intent necessary for attempted monopolization claim may be inferred **[*63]** from clearly exclusionary conduct); III P. Areeda & D. Turner, ***Antitrust Law*** para. 626a (1978). If, after examining all of Edison's conduct and justifications, the Court could conclude that Edison had the required specific intent to violate *§ 2*, there would be no legal impediment to finding antitrust liability for the price squeeze.

Looking only at Edison's conduct with respect to the price squeeze, the Court certainly has no difficulty in concluding that, in filing the rate applications, Edison was interested only in its own rate of return on its **[*64]** investment and that it had little or no interest in protecting the Cities from the effects of a probable price squeeze. However, the Court cannot conclude that Edison filed the rate applications and thereby created the squeeze with the intent of taking over the Cities' or any other municipality's utility's electricity distribution system. Nor can the Court conclude that Edison was after any other customers of the Cities. Edison may have been somewhat ruthless in seeking to secure what it considered a satisfactory rate of return; but that does not permit an inference that Edison intended to extend or maintain its monopoly power in so doing. In short, other than the filings themselves, the only price squeeze conduct on which a finding of *§ 2* intent on the part of Edison could be based is the failure to assist the Cities and the failure to protect them against the effects of a squeeze.

Unless Edison had an affirmative duty to protect and assist the Cities in this situation, the Court finds it difficult to draw an inference of exclusionary intent from its failure to do so. In *Oahu,* the Ninth Circuit stated that ***HN15***[] the "monopolist's special position" imposed on it "what may be characterized **[*65]** as affirmative duties" to aid its competitor. However, these duties "arise only when there is no justification for refusing to aid a competitor." *838 F.2d at 368*. In that case, the monopolist was charged with violating the antitrust laws by electing not to produce propane gas for the plaintiff, a retail seller of propane gas. The monopolist's decision "had been based not only on economic factors but also on a desire to restrict the supply of propane potentially available to [the plaintiff]." *Id.* The Circuit stated that in situations "where a monopolist's refusal to aid a competitor is based partially on a desire to restrict competition, we determine antitrust liability by asking whether there was a legitimate business justification for the monopolist's conduct." *Id.* The Ninth Circuit reversed the trial court's judgment of antitrust liability, holding that the monopolist's decision not to produce propane because to do so would not have been economically efficient was a legitimate business reason. This justification precluded antitrust liability. *Id.* The rule of *Oahu* has since been explained and discussed in *Image Technical Service, Inc. v. Eastman Kodak Co., **[*66]** 903 F.2d 612, 620 (9th Cir. 1990)*.

Applying the teaching of *Oahu* to the proof here, it is evident that even if Edison could be found to have created the price squeeze partially out of a desire to restrict competition by the Cities, it had legitimate economic reasons for seeking what it regarded as a just and reasonable rate of return in the two regulatory agencies. Thus, under *Oahu,* it had no affirmative duty to mitigate the effect of any price squeeze that might occur as a result of the timing and amount of the two applications. The Court need not consider what the result would be in a case in which the amount and timing of the filings are so egregious as to evidence *only* an intent to maintain or extend monopoly power because that is clearly not the situation here.

---

[15] Edison has also argued that certain regulatory differences between the CPUC and the FERC must be taken into account in determining whether a price discrimination exists at all. Since Edison controlled the time and amount of the rate increase, the rate differential cannot be attributed to regulatory differences. The regulatory differences, however, like any differences in the cost of service, may be appropriately considered in measuring the quantum of discrimination.

As a final point respecting intent, the Cities argued throughout the case that the intent necessary to establish a *§ 2* violation could be inferred, if not from Edison's price squeeze conduct, then certainly from its denial of firm access to the Intertie. This argument is consistent with the existing case law which requires that the overall conduct of the monopolist utility be examined to determine whether or **[*67]** not it had the specific intent to violate the antitrust laws. The troublesome problem in this case is that, as discussed in a later part of this opinion, the Court finds that Edison had legitimate business reasons for denying the Cities firm access to the Intertie. Since the Court has not found that Edison's conduct with respect to the Intertie was in violation of the antitrust laws, the Court can hardly use that conduct as a basis for inferring the specific intent necessary for a violation of *§ 2* on the price squeeze claim.

In engaging in this detailed analysis of Edison's conduct, and the inferences to be drawn from it, the Court is not neglecting the forest in favor of a close examination of the leaves of every tree in it. The Court is mindful that the Cities urged it to consider the "synergistic effects" of Edison's acts, and that the case was presented and argued that way. However, this Court must, as the court in *City of Groton* did, analyze the Cities' claims and Edison's conduct with respect to them separately. *662 F.2d at 928*. And ***HN16***[] if, as is the case here, only the filing of the rate applications and the failure to mitigate the effects of a probable price squeeze created **[*68]** thereby provide a basis for finding the requisite specific intent under *§ 2*, the Court must find that the plaintiffs have not met their burden on this issue. What they have proved would not have been enough in *Mishawaka II,* and it is not enough here.

5. *Antitrust injury and damages*

HN17[] The third element of a *§ 2* claim that must be established is causal antitrust injury. *Oahu, 838 F.2d at 363*; *Catlin v. Washington Energy Co., 791 F.2d at 1347*. In an antitrust case, the plaintiff must show not only that the defendant's acts caused the injury, but that the plaintiff's injury is of a type the antitrust laws were intended to prevent. *Brunswick Corp. v. Pueblo Bowl-o-Mat Inc., 429 U.S. 477, 487 (1977)*. The Cities' only claims of injury resulting from the price squeeze are the amount of the overcharge and their litigation expenses for intervening in the FERC rate proceedings. The Cities concede that they have not lost any customers, and the Cities have not introduced any evidence of delayed capital improvements, lost revenues or profits or any other injury to their ability to compete for the provision of service to retail customers. With respect to the overcharge, the Cities **[*69]** contend that since excessive price is "injury of the type the antitrust laws were intended to prevent" the appropriate measure of damages is the price increment that "flows from" the distortion of the market caused by the monopolist's anticompetitive conduct. *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 294 (2d Cir. 1979)*, *cert. denied, 444 U.S. 1093 (1980)*. Edison responds that the Cities' reasoning was rejected in *Mishawaka II, 616 F.2d at 989*, which held that damages in a price squeeze case can be proved only by a showing of specific injury such as lost customers, revenues or profits, or by a showing that the FERC's refund with interest did not make the plaintiffs whole. Edison further argues that the *Mishawaka II* result is compelled by *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 561 (1981)*, in which the Supreme Court held that automatic damages based on a difference in price may not be awarded in a treble damage claim for violations of the Robinson-Patman Act because such a price differential is not itself proof of antitrust injury.

Every writer and judge who has approached the problem of defining antitrust injury and awarding antitrust **[*70]** damages in a utility price squeeze case has been struck by the complexity of the task. Obviously, assuming that a predatory price squeeze is found, an award of treble the difference between the higher wholesale rate the plaintiff paid and the lower retail rate in effect would be legally and practically wrong because some of the difference in the rates would necessarily be attributable to factors other than the defendant's conduct in violation of the antitrust laws. The same objection of inaccuracy might be made to trebling the amount of the refund awarded by the FERC in cases where an unreasonably low retail rate was in effect during the squeeze. *See* Lopatka, *supra,* at 637.

The Court has given exhaustive consideration to the FERC's method of calculating the amount of the overcharge involved here. Although the Court declines to give collateral estoppel effect to the findings that support the refund ordered by the FERC, it has decided to adopt the overcharge analysis used by that agency. Thus, it is the conclusion of the Court that if the amount of the overcharge were determinative of the measure of damages to be awarded in this case, the Court would find the overcharge to be **[*71]** in the amount found to have been unjustifiably excessive in *FERC IV.* Having reached that decision, however, the Court must also conclude that it agrees with the reasoning of the Seventh Circuit in *Mishawaka II* that ***HN18***[] the Cities cannot show antitrust injury simply by establishing the amount of the overcharge, and that the utility's overcharge is not an accurate measure of the Cities' antitrust damages. *Mishawaka II, 616 F.2d at 989*. The Court has another reason for this view in addition to those argued by Edison. The rationale for finding that a price squeeze by a regulated utility can be a violation of the antitrust laws -- that antitrust courts can remedy gaps in the regulatory scheme -- supports the *Mishawaka II* conclusion that ***HN19***[] an antitrust court should confine its definition of antitrust injury to that injury that cannot be redressed by the regulatory scheme itself. *Mishawaka II, 616 F.2d at 989*. This result is not compelled by *J. Truett Payne,* as Edison contends, nor is it based on an obvious distinction between the Cities' theory and that upheld in *Hanover Shoe Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 489 (1968)*. *See Mishawaka II, 616 F.2d* ***[*72]*** *at 988-89* (distinguishing *Hanover Shoe* on the ground that in that case, absent antitrust action, plaintiff would have continuously suffered the overcharge arising from defendant's abuse of its monopoly position). [16] Rather, it is based on the need to reconcile the respective roles of the regulatory agencies and federal courts in this context. Courts have dealt with the differing interests of these agencies and the courts at the intent stage of the *§ 2* analysis, *City of Groton, 662 F.2d at 932*, or at both the intent and the injury stages of the analysis. *Mishawaka II, 616 F.2d at 989*.

[*73] The remedy afforded by the regulatory scheme for a price squeeze is designed to ensure that any unjustifiable charge is refunded with interest. However, the refund is not always a "complete cure" for the impairment of the customer-competitor's ability to compete. *Mishawaka II, 616 F.2d at 986*. In those situations, the customer-competitor should be entitled to seek damages from the Court in the antitrust case for the injury not compensated by the action of the agency. The *Mishawaka II* conclusion -- that in price squeeze cases, antitrust courts should remedy the antitrust injury not redressed by the FERC -- seems a sensible reconciliation of the regulatory and antitrust schemes.

The Cities have urged the Court to disregard the holding in *Mishawaka II,* to treat the overcharge as an antitrust injury and to award antitrust damages flowing from it. The Cities also argue that because the FERC refunds did not flow from the antitrust violation but are instead analogous to settlement payments, the refund payments should not be offset before trebling. *See Los Angeles Memorial Coliseum Comm'n v. National Football League, 791 F.2d 1356, 1380 (9th Cir. 1986)*, *cert. denied, 484* ***[*74]*** *U.S. 826 (1987)* (Nelson, J., dissenting).

The Court has already stated its reasons for declining to award damages in the amount of the overcharge, thus rendering a decision on the offset question unnecessary. However, if the Court had reached that issue, the law of the Ninth Circuit would have required that the refund be offset before trebling. *See Los Angeles Memorial Coliseum Comm'n., 791 F.2d at 1374* (antitrust plaintiff only entitled to treble the amount necessary to compensate it for injury caused by defendant's violation).

The only remaining damages claimed by the Cities are their litigation expenses for challenging the R-2 rate in the FERC proceedings. In the Ninth Circuit, litigation costs incurred as a result of an action filed in violation of the

---

[16] *J. Truett Payne v. Chrysler Motors Corp., 451 U.S. 557 (1980)* does not control this case. *Truett Payne* held that price discrimination alone could not establish both the fact and the measure of injury for a treble damage claim under § 4 where the plaintiff had established price discrimination in violation of the Robinson-Patman Act, *15 U.S.C. 13(a)*. The Robinson-Patman Act outlaws price discrimination by "any person engaged in commerce," where the effect "may be substantially to lessen competition or tend to create a monopoly . . ." *15 U.S.C. § 13(a)*. Because Robinson-Patman is a prophylactic statute, a court cannot infer from the fact of a violation that the defendant's behavior has caused the plaintiff any injury. *Truett Payne, 451 U.S. at 569* (Powell J., dissenting); *cf. Brunswick, 429 U.S. 477* (addressing § 7 of the Clayton Act, also a prophylactic statute); *see also* Areeda, *Antitrust Violations Without Damage Recoveries,* 89 Harv. L. Rev. 1127, 1130-33 (1976) (describing relationship between substantive liability under § 7 of the Clayton Act and damage recoveries). In contrast, *§ 2* prohibits unlawful use of monopoly power because such conduct is harmful to competition. One kind of violation of *§ 2* is charging monopoly prices, which a plaintiff can show harms it directly. *Hanover Shoe, 392 U.S. at 489*. The electric utility price squeeze has not generally been attacked under the Robinson-Patman Act, in part because of uncertainty over whether courts would find electricity to constitute a commodity for purposes of the Act, *compare City of Newark, 467 F. Supp. at 774* (not a commodity) *with City of Kirkwood, 671 F.2d at 1181* (is a commodity), but perhaps also because of the limitations of *Truett Payne.*

antitrust laws constitute antitrust injury as defined in Brunswick. Rickards v. Canine Eye Registration Found., 783 F.2d 1329, 1336 (9th Cir. 1986), *cert. denied, 479 U.S. 851 (1986)*. This principle was established in *Handgards*, *Inc. v. Ethicon*, *Inc.,* in which the court held that the costs of defending a "bad faith" patent infringement suit "flowed" from the defendant's antitrust wrong. Handgards, 601 **[*75]** F.2d 986, 997 (9th Cir. 1979), *cert. denied, 444 U.S. 1025 (1980)*.

Edison disputes the applicability of *Handgards* to this case arguing that intervenors in regulatory proceedings are unlike defendants forced to defend a patent infringement action brought in bad faith. A violation of the antitrust laws, however, may occur through the abuse of the processes of administrative agencies as well as courts of law, Clipper Express v. Rocky Mountain Motor Tariff Bureau, Inc., 690 F.2d 1240, 1254 (9th Cir. 1982), *cert. denied, 459 U.S. 1227 (1983)*. Nevertheless, the controlling fact on this issue is that Edison, as a regulated industry, has no choice but to file for rate increases in the FERC and the CPUC. Unlike an unregulated monopolist, Edison cannot conduct its business without making such filings. Where the legitimacy of the amounts and timing of these filings is disputed, as it is here, and the monopolist's position is partially vindicated in the regulatory agency, as it was here, it is inappropriate to award litigation expenses on the authority of *Handgards.*

Finally, in arguing that even if such litigation costs constitute antitrust injury, the Cities should be **[*76]** required to segregate the amount of expenses attributable to the "bad faith" nature of the filing from the amount the Cities would have incurred in litigating a typical rate case, Edison points up a serious problem: as a practical matter, the bad faith portion of the Cities' FERC litigation expenses could not be segregated by any reasonable trier of fact. This Court agrees with Edison that the Cities would likely have intervened in these and all other rate proceedings involving themselves and Edison whether a price squeeze existed or not. The Cities and Edison are part of a regulated industry; the parties in *Handgards* were not. The case is simply inapposite.

The Court agrees with the *Mishawaka II* court [17] that the Cities' litigation expenses for their intervention in the FERC proceedings are not an injury the antitrust laws were designed to prevent nor are these expenses properly awardable as antitrust damages.

[*77] III. *FORECLOSURE*

The Cities also claim that Edison violated § 2 by denying the Cities' requests that Edison allocate to them a portion of Edison's transmission rights on the Pacific Intertie. Although a monopolist is not generally required to aid a competitor, courts have, in a distinct category of cases, imposed liability under § 2 on the monopolist who refuses to aid a competitor where cooperation is essential to the preservation of competition. *See* Aspen Skiing, 472 U.S. at 601; Oahu, 838 F.2d at 368. These are cases in which the monopolist controls a structure, service or item essential to the competitor's ability to compete with the monopolist. Because the monopolist in this situation stands in relation to its competitor not only as a rival, but also as the supplier, or potential supplier, of something essential to the competitor's business, it is possible for the monopolist to use this advantage to inflict injury on its competitor. By charging an unreasonably high price, imposing unreasonable conditions on access, or withholding access to the structure, service, or item entirely, the monopolist-supplier can disadvantage the customer-competitor in, or exclude it **[*78]** from, the market in which the two compete. *See* Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359 (1927) (monopolist in professional photographic equipment market sets price so high at wholesale that customer who competes with monopolist at retail will be driven from retail market).

---

[17] The Court does include in price squeeze damages the expenses of litigating the defendants' attempt to withdraw as wholesale suppliers. Mishawaka II, 616 F.2d at 989-90.

Courts and commentators have used the term "essential facility" to describe the kinds of structures, services and items that monopolists may be required to share with their competitors. [18] *See, e.g., MCI Communications, 708 F.2d at 1132-33* (local telephone exchange is an essential facility). Citing the essential facility doctrine, the Cities argue that the Pacific Intertie is an essential facility, that the Cities are not only competitors, but also customers, and that Edison's refusals to grant them firm transmission paths on the Intertie violate *§ 2*.

[*79] A. *The essential facility doctrine*

As in a *§ 2* price squeeze case, ***HN20***[] a court in a *§ 2* essential facility case is dealing with the allegation that monopoly power in one market is being used to injure competition in a second market. [19] **[*81]** *MCI Communications, 708 F.2d at 1133*; *Otter Tail, 410 U.S. at 377*. Thus, to prevail in an essential facility case, the plaintiff first must establish that the defendant possesses monopoly power in the market that provides some structure, service or item to the plaintiff. Next, the plaintiff must show that the defendant is in competition with the plaintiff in a second market. Finally, the plaintiff must demonstrate that the denial of the structure, service or item constitutes the unlawful use of monopoly power under the essential facility doctrine. Courts have articulated four elements necessary to establish liability under the essential facility doctrine:

(1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

*MCI Communications, 708 F.2d **[*80]** at 1132-33*. Remarkably, this test fails to identify how a court should determine what constitutes an essential facility. Without explicit guidance as to how to make this determination, some courts *seem* to apply an "I know it when I see it" [20] test based on an examination of the inherent qualities of the monopolist's structure, service or item. *Olympia Equipment Leasing Co. v. Western Union Tel. Co., 797 F.2d 370 (7th Cir. 1986)*, *reh'g denied, 802 F.2d 217 (1986)*, *cert. denied, 480 U.S. 934 (1987)* (reasoning that an advertising list is not the kind of thing that a monopolist can be required to share); *Consolidated Gas Co. of Florida v. City Gas Co. of Florida, 665 F. Supp. 1493, 1534 (S.D. Fla. 1987)*, *aff'd, 880 F.2d 297 (11th Cir. 1989)*, *vacated, 889 F.2d 264 (1989)*, *reinstated 1990 U.S. App. LEXIS 16430 (1990)* (gas pipeline is an essential facility because it is like an electric line). The apparent emphasis of some cases on the nature of the monopolist's facility reflects superficial analysis, however, and obscures the *ratio decidendi* of the essential facility cases.

In the refusal to deal context, the prohibition of *§ 2* is directed at the monopolist who, in its capacity as a supplier, discriminates against a customer-competitor in order to injure the competitor in the market in which it competes. A monopolist does not run afoul of *§ 2* by foreclosing access to a structure, service or item, no matter how unique or spectacular that structure, service or item may be. Rather, a monopolist violates the antitrust laws by using its power over a structure, service or item to injure or foreclose competition in the relevant market. *See Robinson v. Magovern, 521 F. Supp. 842, 913 (W.D. Pa. 1981)*, *aff'd, 688 F.2d 824 (3d Cir. 1982)*, *cert. denied, 459 U.S. 971 (1982)* (although doctor was excluded from using the only hospital with a residency program, relevant inquiry does not concern the nature of the hospital, but the effect of the exclusion on the doctor's ability to perform in the relevant market for open-heart surgery). Thus, ***HN21***[] the essential facility doctrine -- properly conceived **[*82]** -- defines

---

[18] Courts have also applied the essential facility doctrine to find violations of § 1 of the Sherman Act. *See, e.g., Hecht v. Pro-Football, Inc., 570 F.2d 982 (D.C. Cir. 1977)*, *cert. denied,* ***436 U.S. 956 (1978)*** (holding a restrictive covenant in a stadium lease violates § 1 where use of stadium is essential to potential market entrant.)

[19] In *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585 (1985)*, the Supreme Court did not base its decision on the essential facility doctrine, but the reasoning of *Aspen* nevertheless influenced the analysis to be employed in essential facility cases.

[20] *Jacobellis v. Ohio, 378 U.S. 184, 197 (1964)* (Stewart, J., concurring).

a facility as essential not based on the characteristics of the facility withheld, but based on the effect on competition of the withholding of the facility.

HN22[] To determine whether a monopolist's structure, service or item should be classified as an essential facility, a court must assess the extent to which the monopolist's refusal of access actually impairs the ability of the customer-competitor to compete. Moreover, a court must determine whether the competitor can avoid injury by using an alternative to the monopolist's structure, service or item. The application of the essential facility doctrine is most compelling where the monopolist's refusal makes it legally or physically impossible for its competitor to compete at all in the relevant market. *See, e.g., MCI Communications, 708 F.2d at 1132-33* (where it is physically impossible for competitor to compete with monopolist in the long-distance phone service market without access to local telephone exchange, and where government regulation prohibits construction of alternate local network, exchange is an essential facility).

In most cases, however, the refusal of the structure, service or item does not physically or **[*83]** legally exclude the competitor from the relevant market; the competitor can always secure an alternative to the monopolist's facility *at some price.* In such cases, a court is called upon to determine whether the competitor's alternatives to the use of the monopolist's facility are so expensive that the structure, service or item will be deemed an essential facility. *See Consolidated Gas Co. of Florida, 665 F. Supp. at 1534* (holding that where alternative to monopolist's pipeline is the construction of new pipeline at cost of $ 250,000 to plaintiff, monopolist's pipeline is essential facility); *Gamco, Inc. v. Providence Fruit & Produce Building, 194 F.2d 484, 487 (1st Cir. 1952)*, *cert. denied, 344 U.S. 817 (1952)* (building treated as an essential facility because "to impose upon the [competitor] the additional expense of developing another site, attracting buyers, and transhipping his fruit and produce by truck is clearly to extract a monopolist's advantage.").

Whether a facility is essential, then, "involves vexing questions of degree," P. Areeda & H. Hovencamp, ***Antitrust Law**,* para. 736.2b at 723 (Supp. 1989). ***HN23***[] The essential facility cases apply a test of reasonableness, **[*84]** finding a facility to be essential where the monopolist's refusal severely impairs the competitor in the relevant market and leaves the competitor without reasonable alternatives. *See MCI Communications, 708 F.2d at 1132-33*.

HN24[] Even where the harm to the competitor is sufficient to establish that the monopolist's structure, service or item is an essential facility, a monopolist's refusal to deal may not violate *§ 2*. A monopolist may justify the refusal to deal by pointing to legitimate business reasons for the refusal. *Gamco. Inc., 194 F.2d at 488* (monopolist bears burden of showing refusal to deal was reasonable); *Town of Massena v. Niagara Mohawk Power Corporation,* 1980-2 Trade Cases (CCH) para. 63,526 (N.D.N.Y. 1980) (collecting other cases) (business and engineering reasons justify refusal to share electric transmission facilities); *see Oahu, 838 F.2d at 363* (when antitrust laws impose affirmative duties on a monopolist, the monopolist does not violate the antitrust laws if the anticompetitive conduct is justified by legitimate business reasons).

The Cities claim that Edison's refusals to allow them firm transmission paths on the Pacific Intertie constitute the denial **[*85]** of access to an essential facility. Once it is established that Edison possesses monopoly power in the bulk power market, the Cities' claim is governed by a two-part inquiry. First, the Cities must establish that Edison's refusals to give them firm transmission significantly impaired the Cities' ability to compete in the retail market and that the Cities had no reasonable alternative to the Intertie. Second, if the Cities make such a showing, Edison can avoid liability by proving that its refusals were justified by legitimate business concerns.

Applying this analysis, the Court finds that the Cities have failed to show that Edison's denial of firm transmission on the Intertie significantly affected the Cities' ability to compete with Edison in the retail electricity market. Therefore, one of the requirements for a finding that the Pacific Intertie is an essential facility has not been met. Moreover, even if the Cities had established that the refusals of access to the Intertie significantly impaired their ability to compete and that they had no reasonable alternative to it, Edison's legitimate business concerns justified its denial of the Cities' requests.

B. *The Cities were not* **[*86]** *denied access to an essential facility*

As discussed in the analysis of the price squeeze claim, Edison is a monopolist with respect to the Cities' supply of bulk power because it owns and controls the transmission lines linking the Cities to Edison and other generation resources. [21] The Cities' ability to compete with Edison is dependent on access to bulk power. Since a utility can contract to purchase bulk power only if that utility has rights of access to a transmission path for the power bought, the Cities are unable to consummate bulk power transactions without Edison's cooperation.

It is undisputed that through various agreements with the Cities, Edison **[*87]** has allowed the Cities firm as well as interruptible access over some of its lines at some times. The Cities have gained greater access in recent years. The Cities complain, however, that Edison has foreclosed firm access to the one transmission path that is indispensable to them: the Pacific Intertie. Excluded from the Intertie, the Cities contend that a vital resource at the other end -- BPA Surplus and other low cost Northwest power -- is practically unavailable for their use.

Capitalizing on the impulse to view the essential facility doctrine as a doctrine concerned with the inherent qualities of the monopolist's facility, the Cities attempted to shift the focus of this claim away from competition in the relevant market, and toward the Pacific Intertie itself. The Cities introduced evidence at trial to show the unique attributes of the Intertie and the irreplaceability of BPA Surplus and low cost Northwest power. They established the practice of selling BPA Surplus on a prescheduled basis; the importance of having a firm transmission path on the Intertie in order to purchase BPA Surplus; the lack of alternative transmission paths; and the low prices of BPA Surplus and other Northwest **[*88]** power.

Although the Cities succeeded in proving that the Pacific Intertie is for all practical purposes the only transmission path for the delivery of BPA Surplus to Southern California, and that BPA Surplus -- when available -- was less expensive in the relevant time period than other sources of bulk power, these facts alone are not sufficient to make the Intertie an essential facility. As stated, whether the Pacific Intertie is an essential facility as to the Cities is a function of the harm to the Cities' competitive viability caused by not having access to it.

A careful examination of the evidence relating to the Cities' and Edison's bulk power transactions reveals that Edison's refusals to share firm access to the Intertie have not been shown to have handicapped the Cities' competitive viability in any serious way. When any bulk power purchased by the Cities or Edison is imported into Edison's control area, it is mixed together -- bulk power is obviously fungible, regardless of the source of generation. Edison then has the responsibility of dispatching to the Cities a sufficient amount of electric power to meet their needs and giving to the Cities energy credits, and, if the **[*89]** resources are integrated, capacity credits, for their purchases.

Because Edison has provided the Cities with firm access on the local transmission matrix, the Cities are able to purchase bulk power from neighboring utilities. Edison, meanwhile, has a continuing obligation to meet all the Cities' bulk power needs at the Cities' request. The inability to make direct purchases from the Northwest with a firm transmission path on the Intertie does not leave the Cities cut off from sufficient amounts of power, nor does it constitute a refusal by Edison to transport or "wheel" power from other suppliers. [22] From the Cities' perspective, then, the advantage of access to the Intertie is not related to the quantity or quality of the power, but solely to price, reflected in the form of capacity or energy credits.

[*90] The real question here is not only whether the Cities should have access to low cost power, but whether the Cities should have that access at the expense of Edison's other customers. With rights to a firm path on the Interie,

---

[21] The Court has not separately analyzed whether the Cities have established Edison's monopoly power for the foreclosure claim. For the purposes of this discussion, the Court will assume that the Cities have made any additional showing necessary to the extent the analysis of this element of a *§ 2* essential facilities claim differs from a *§ 2* price squeeze claim.

[22] Settlement agreements require Edison to provide the Cities with all their bulk power requirements and to wheel power that the Cities obtain elsewhere. Therefore, this case does not present the question of whether the Intertie is essential because Edison has cut off the Cities' access to power. *Cf. Otter Tail Power Co. v. United States, 410 U.S. 366 (1973)* (vertically integrated utility must transmit power over its lines to municipalities that compete with the utility at retail).

the Cities would be able to contract with Northwest sellers to purchase directly from them when low cost firm bulk power is available. If the Cities made those purchases of low cost bulk power, Edison would be responsible for importing that power into the Edison system, and dispatching it to the Cities. Without the Cities having a firm path on the Intertie, the identical operation would occur, but with a different cost result to the Cities. When BPA Surplus and other low cost power is available in the Northwest, Edison fully utilizes its rights on the Intertie to purchase the maximum amount of the low cost power for the benefit of all of its customers. That fact is undisputed. Thus, whenever it is available, Edison will always import as much of the low cost electric power over its transmission lines into its control area as possible. The only difference created by granting firm access on the Intertie to the Cities is that the Cities pay for the power at the rate **[*91]** the Northwest seller charges, whereas without access to the Intertie, the Cities in effect buy BPA Surplus and other low cost Northwest power through Edison and share the benefit of that low cost power with all of Edison's customers.

Edison's refusals to share its firm transmission path on the Intertie, then, deprive the Cities of one thing only: the ability to contract directly with sellers to purchase BPA Surplus or other low cost Northwest power. [23] The Cities' emphasis on the lack of substitutes for the Intertie misdirects the Court's inquiry. It is substitutes for power at *the price of* BPA Surplus and other low cost Northwest power, not substitutes for the Intertie, that are the primary concern in assessing the competitive harm to the Cities.

The Cities argue that making direct purchases from the BPA and other Northwest sellers is the **[*92]** only way to get power at those low prices; but when Edison imports low cost power from outside its own control area, the savings from the economy purchase are fully accounted for in the cost of bulk power that Edison sells at wholesale. Courts generally require wholesale rates to reflect the "rolled in" cost of energy -- a utility may not allocate the low cost purchases to its own customers and the higher cost purchases to its resale customers. *See generally* *Nevada Power Co. v. Federal Power Comm'n, 589 F.2d 1002 (9th Cir. 1979)*. Thus, while Edison maintains control over the purchases of BPA Surplus and other low cost Northwest power by refusing to share the Intertie, Edison does not abuse this control to extract a monopolist's advantage. A city that purchases all of its power from Edison indirectly benefits from the low prices paid by Edison for the BPA Surplus and Northwest power.

The Cities raise two arguments in an attempt to show that purchasing from Edison is not a viable alternative to firm access on the Pacific Intertie. First, the Cities argue that they share fully in Edison's savings from Northwest purchases only if they buy all of their energy requirements from Edison. **[*93]** The Cities are correct that a city that purchases some of its bulk power from sources other than Edison will have a smaller percentage of its total power needs supplied at Northwest prices. However, the Cities presumably choose to buy energy from other sources only when they can obtain a price below that which would be charged by Edison. While the Cities may obtain less power at the Northwest prices, the Cities' total cost for obtaining bulk power in all likelihood will still fall below the cost of purchasing its requirements from Edison. Under these circumstances, the Cities can hardly suffer any competitive disadvantage relative to Edison. The Court agrees with Edison's expert that the financial benefit to the Cities of "perfectly equal access" would not have had a significant impact on the Cities' ability to compete in the retail electricity market.

Second, the Cities argue that purchasing their power from Edison is not an adequate substitute for firm access to the Intertie because the Cities are prevented from exercising their statutory preference for BPA Surplus. *16 U.S.C. § 832c(a)*. The Cities claim that the preference clause not only allows the Cities priority over Edison in **[*94]** making purchases of BPA Surplus, but imposes a duty on Edison to afford firm transmission to the Cities to achieve that preference. Thus, the Cities, having a firm path on the Intertie, claim the right to actually displace Edison in making some of its purchases.

The Cities' argument that their preference with respect to bulk power gives them the right to displace Edison on Edison's transmission path is so lacking in substance that the Court is compelled to dismiss it without further discussion. Moreover, the Cities' whole argument asks the Court to turn the essential facility doctrine on its head.

---

[23] In reaching this conclusion, the Court has accepted the Cities' argument that the interruptible service offered by Edison was not a reasonable alternative to firm access.

Rather than seeking to impose a duty to deal based on the harm that would result to competition from the monopolist's refusal, the Cities seek to impose a duty to deal based on the extent to which a competitor might benefit if it had unlimited access to the monopolist's facility. The antitrust laws, however, have never been interpreted as placing on a monopolist a duty to affirmatively aid its competitors at a detriment to its own customers. *See* Hecht, 570 F.2d at 992-93 (essential facility need not be shared if it would inhibit defendant's ability to serve defendant's customers). The **[*95]** antitrust laws impose affirmative duties on monopolists dealing with their customer-competitors when the refusal to deal hampers competition with the monopolist. *See* Olympia Equipment Leasing, 797 F.2d at 378. All that the Cities have shown is that their cost of power would be lower and that they would therefore benefit from access. Despite the Cities' unpersuasive attempt to show that Edison denied them firm access to the Intertie as part of a long-term effort to take over their distribution systems, the Cities actually made no showing at all that their competitive viability was seriously impaired by Edison's refusal to grant firm access to them. To impose on Edison an affirmative duty to assist the Cities under those circumstances would be contrary to the Supreme Court's unambiguous pronouncement that the "antitrust laws . . . were enacted for 'the protection of *competition,* not *competitors.*'" Brunswick Corp. v. Pueblo Bowl-o-Mat Inc., 429 U.S. at 488 (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 320 (1962)).

The Court, therefore, concludes that the Cities have not shown that they were denied access to an essential facility.

C. *Legitimate business reasons* **[*96]** *justify Edison's refusals of access*

Even if the Court could reach the legal conclusion that the Pacific Intertie is an essential facility as to the Cities, Edison showed legitimate business reasons justifying its refusals to grant the Cities' request for firm access to it. Courts do not find a violation of § 2 if the refusal to grant access to an essential facility is justified by legitimate business reasons. *See Massena,* 1980-2 Trade Cases (CCH) para. 63,526 at 76,812-813; Hecht, 570 F.2d at 992-93. Edison has proffered three justifications for its refusals to grant firm access to the Pacific Intertie. First, Edison argues that regulatory imperatives justified the refusals. Second, Edison argues that concerns over reliability of electric service led to the refusals. Third, Edison contends that the refusals were justified by the desire to share the savings of low cost bulk power with all of Edison's customers. Although the Court rejects Edison's claims based on regulatory imperatives and reliability, the Court finds the final justification sufficient to render Edison's conduct not in violation of § 2.

1. *Regulatory Imperatives*

Edison contends that it was justified in **[*97]** refusing to allow the Cities a firm path on the Pacific Intertie because the CPUC forbids a utility from taking any action that unnecessarily harms the utility's customers. ***HN25***[] While a regulated monopolist's actions in response to a regulatory agency's dictates enjoy a limited antitrust immunity, the monopolist must show that,

at the time [of] the various anticompetitive acts . . . it had a reasonable basis to conclude that its actions were necessitated by concrete factual imperatives recognized as legitimate by the regulatory authority.

Phonetele Inc. v. American Tel. & Tel. Co., 664 F.2d 716, 737-38 (9th Cir. 1981), *cert. denied, 459 U.S. 1145 (1983)*.

The Cities have demonstrated that the CPUC had no jurisdiction over agreements between the Cities and Edison concerning the sharing of Intertie access. [24] *See* Nantahala Power & Light Company v. Thornburg, 476 U.S. 953, 966 (1986). Moreover, if the CPUC could regulate such an agreement, Edison never sought the opinion of the CPUC as to whether it objected to Edison's sharing Intertie access with the Cities. Edison has not established to the Court's satisfaction that the CPUC would have prohibited the sharing of firm transmission **[*98]** paths on reasonable terms. Finally, Edison has failed to show that its concern over CPUC regulation is anything but a post-

[24] CPUC did not review transmission agreement between Edison and Pasadena over Palo Verde line because FERC was the proper regulatory authority.

hoc legal argument. Edison never informed the Cities, at the time it refused the requests for firm access to the Intertie, that regulation by the CPUC required the denial.

2. *Reliability*

Edison also argues that it denied access to the Intertie to ensure the reliability of its own retail electric service. The Cities offer persuasive reasons why this putative justification must be rejected. First, the access requested by the Cities was not of sufficient magnitude to significantly affect Edison's ability to provide consistent reliable service. Second, Edison could have ensured reliability without denying access. If Edison was concerned about having a sufficient amount of bulk energy to respond to emergencies, Edison could have arranged to repurchase power **[*99]** during crisis periods. Thus, Edison would remain in complete control of its system's reliability whether or not the Cities had access to the Intertie. Access to the Intertie is really a matter of calculating the price of power; it has nothing to do with the reliability of the system.

3. *Protection of other customer groups*

The evidence establishes that Edison denied access to the Intertie because Edison contributed to the construction of it and wished to use it to benefit all of its customers. Edison saw no reason why the Cities should benefit from the low cost surplus to a greater extent than other Edison customers. This is a legitimate business justification for Edison's refusals of firm access to the Intertie. Edison was itself using all of the available capacity on the Intertie at the times when the Cities requested firm access to it. Edison provided the Cities with interruptible service on the Intertie at times when Edison was not using the line. Lack of available capacity has long been accepted as a legitimate reason for the denial of access to an essential facility. *See, e.g., Hecht, 570 F.2d at 992-93* (stadium booked every day); *Gamco, 194 F.2d at 487*.

Even if lack **[*100]** of capacity were not a legitimate business justification, ***HN26***[] Edison's concern that its other customers would suffer is. *See Massena,* 1980-2 Trade Cases (CCH) para. 63,526 at 76,812-813. It is undeniable that if the Cities received a larger proportion of the low cost power purchases transmitted over the Intertie, then Edison's other customers would pay more for their electric power. For the purpose of this antitrust analysis, the precise calculation of how much more is unimportant; it is not disputed that it would result in an increase. The Cities insist that if they had firm access to the Intertie, the Cities would always be able to fill the capacity with BPA Surplus because of the federal preference. If displaced, the economic benefit of that BPA Surplus and other low cost Northwest power transmitted over the Intertie would be shifted from Edison to the Cities.

It is important to distinguish Edison's legitimate business justification -- the increased costs to its customers -- from profit maximization. ***HN27***[] A monopolist's interest in extracting and maintaining monopoly profits does not justify anticompetitive conduct. *See* *Otter Tail, 410 U.S. at 380* (use of monopolist's "weapons" **[*101]** to ensure long run financial performance does not to justify refusal to deal); *Delaware & Hudson Railway Co. v. Consolidated Rail Corp., 902 F.2d 174, 178 (2d Cir. 1990)* ("a monopolist cannot escape liability for conduct that is otherwise actionable simply because that conduct also provides short-term profits"). Edison's rates to its customers are based on its energy and capacity costs and a rate of return approved by the regulatory agencies. An increase in its costs therefore will not increase Edison's profits so much as its customers' electric bills.

The Cities suggest that the increase in Edison's costs need not adversely affect Edison's other customers, because the increase would be small and Edison could simply accept a lower rate of return than that approved by regulatory agencies or cut the salaries of corporate officers. The Court does not regard the Cities' suggestion as a serious one; furthermore, the antitrust laws do not require so much of a lawful monopolist.

The alleged *§ 2* violation in this case occurred when, having contributed to the construction of the Intertie with the aim of reducing the rates of all its customers -- including the Cities -- Edison refused to **[*102]** credit the Cities with firm access on it because to do so would reduce the Cities' costs of bulk power at the expense of Edison's other customers. On this theory, the Cities cannot prevail.

IV. *CONCLUSION*

An antitrust court always addresses a few simple questions: what did the defendant do, what were its reasons for doing it, and how has competition been hurt by it? Thus, the Court looks at the defendant's overall conduct and the reasons the defendant gives for it to see if the conduct was reasonably necessary to competition on the merits.

Applying that simple analysis here, what Edison did with respect to the price squeeze came dangerously close to being unreasonable under the antitrust laws, and what it did with respect to the request for access on the Pacific Intertie was carefully calculated to be, and it was, reasonable. Putting the two types of conduct together does not work the magic of synergism to make a *§ 2* violation.

Judgment must be for Edison.

JUDGMENT - October 22, 1990, Filed

This action came on regularly for trial in the United States District Court for the Central District of California, the Honorable Mariana R. Pfaelzer, Judge, presiding. Witnesses were sworn **[*103]** and testified and exhibits were offered and admitted. After hearing and considering the evidence and arguments of counsel, the matter was submitted for decision by the Court. The issues having been duly heard and the Court having made its findings of fact and conclusions of law,

IT IS HEREBY ORDERED AND ADJUDGED that the plaintiff Cities of Anaheim, Riverside, Banning, Colton and Azusa take nothing in this action, that this action be dismissed on the merits and with prejudice, that defendant Southern California Edison Company shall have judgment against the plaintiff Cities, and that defendant Southern California Edison Company shall recover from the plaintiff Cities its costs in this action in the amount of $.

Opinion

UNPUBLISHED OPINION

Appellant J.V.B. Enterprises, Inc. (JVB), challenges the trial court's grant of summary judgment in favor of respondent City of Marshall (City). The trial court concluded, and we agree, that the City did not violate antitrust laws of Minnesota, the City is immune from liability, and JVB's constitutional rights were not violated because it had no property interest in the liquor license. We affirm.

FACTS

The City Council of Marshall denied JVB a liquor license and JVB brought an action for a writ of mandamus. The trial court found the City Council unreasonably denied JVB's application for a liquor license and a writ of mandamus was issued. JVB, however, never subsequently requested the license because the competition had increased and it decided not to **[*2]** open the club.

JVB subsequently initiated this action, claiming damages resulting from the City Council's denial of its application for a liquor license. JVB contends it is entitled to damages for alleged violation of the antitrust laws of Minnesota, and also claims violation of constitutional rights. The trial court granted the City's motion for summary judgment and dismissed JVB's cause of action.

DECISION

HN1[] On review of a grant of summary judgment, this court must determine "whether there are any genuine issues of material fact" and "whether the trial court erred in its application of the law." *Offerdahl v. University of Minnesota Hospitals & Clinics, 426 N.W.2d 425, 427 (Minn. 1988)*. There are no genuine issues of material fact. Therefore, the only issue is whether the trial court erred in its application of the law.

1. MINNESOTA ***ANTITRUST LAW***, *MINN. STAT. §§ 325D.49*-.66

The City did not violate the Minnesota ***antitrust law*** because its actions fall within an exemption pursuant to *Minn. Stat. § 325D.55, subd. 2* (1988), which provides:

HN2[] Nothing contained in *sections 325D.49 to 325D.66*, shall apply to actions or arrangements otherwise permitted, or regulated **[*3]** by any regulatory body or officer acting under statutory authority of this state or the United States.

HN3[] The City has statutory authority to regulate liquor licenses within the City of Marshall. *Minn. Stat. §§ 340A.401*-.416 (1988).

2. IMMUNITY FROM LIABILITY

HN4[] The denial of an application for a liquor license is a discretionary act. The City has immunity pursuant to *Minn. Stat. § 466.03, subd. 6* (1988).

3. CONSTITUTIONAL RIGHTS

JVB was not deprived of its property without due process of law. ***HN5***[] A liquor license "is not a property right but is in the nature of a privilege, and, as such, subject to reasonable regulations." *Cleveland v. Rice County, 238 Minn. 180, 185, 56 N.W.2d 641, 644 (1952)*. Additionally, the United States Supreme Court has held that ***HN6***[] due process of law is not violated if there is an adequate remedy under state law. *Parratt v. Taylor, 451 U.S. 527, 538, 101 S.Ct. 1908, 1914 (1981)*. In this situation, there was an adequate remedy under state law, namely, the issuance of a writ of mandamus. The trial court correctly concluded that the City did not violate JVB's constitutional **[*4]** rights.

Affirmed.

HN1[] **Removal, Specific Cases Removed**

A defendant may remove to a federal court any civil action founded on a claim or right arising under the laws of the United States, pursuant to *28 U.S.C.S. § 1441(b)*. There are two ways in which a case may, for removal purposes, "arise under" federal law. First, a plaintiff's well-pleaded complaint simply may raise issues of federal law. Second, a complaint may raise a select type of claim that is singled out by Congress for federal preemption. Pursuant to the well-pleaded complaint rule, a court must look solely to the four corners of a complaint to determine whether or not a claim arises under federal law. Removal jurisdiction does not exist simply because a plaintiff can choose a federal claim instead of, or in addition to, a state claim advanced. Furthermore, a federal law defense will not support removal jurisdiction, even if the defense is anticipated in a complaint's allegations. The well-pleaded complaint rule makes a plaintiff the master of a claim; the plaintiff may avoid federal jurisdiction by exclusive reliance on state law.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN2[] **Subject Matter Jurisdiction, Federal Questions**

In certain limited circumstances, a federal court may look behind a complaint to preclude a plaintiff from defeating federal question jurisdiction through "artful pleading," that is, by disguising a federal claim as a claim arising under state law. One such circumstance involves state-law claims which are completely preempted by federal law. Federal preemption is ordinarily a federal defense to a plaintiff's suit. As a defense, it does not appear on the face of a well-pleaded complaint and therefore, does not authorize removal to federal court. One corollary of the well-pleaded complaint rule is that Congress may so completely preempt a particular area, that any civil complaint raising this select group of claims is necessarily federal in character.

Opinion

[*502] ORDER

SUSAN H. BLACK, UNITED STATES DISTRICT JUDGE

This case is before the Court on the plaintiff's Motion to Remand, filed on May 18, 1990. The defendant filed its response in opposition on June 8, 1990. Pursuant to the Court's Order of June 5, 1990, the Attorney General of Florida was permitted to file a memorandum of law addressing the issues raised in the plaintiff's motion. The Court heard oral argument on July 26, 1990. Also pending is Defendant's Request, in the Alternative, for Stay and Certification of Order Granting Remand, filed on August 1, 1990, to which the plaintiff filed a response in opposition on August 2, 1990, and the defendant's Motion to File Supplemental Authority in Connection with Plaintiff's Motion to Remand, filed on September 18, 1990, to which the plaintiff filed a response in opposition on September 28, 1990.

This case was originally filed in the Circuit Court of the Fourth Judicial Circuit, in and for Duval County, Florida. The Complaint **[**2]** alleges that the plaintiff, a Florida corporation operating from Jacksonville, and the defendant, a Florida corporation operating from Miami, pursuant to four distributorship agreements, competed to distribute supplies to Burger King's independent franchisees located in a number of states, including Florida. Complaint at 3-5, paras. 4, 9, 10, 15, filed on April 20, 1990. The Complaint alleges that the defendant conceived and engaged in a course of conduct with the purpose and intent of eliminating the plaintiff as a competitor. *Id*. at 8-10, PP 26-27. The Complaint specifically alleges that, through this conduct, the defendant has monopolized trade and commerce in the State of Florida, *id*. at 15, P 45; has attempted to monopolize trade and commerce in the State of Florida, *id*. at 17, P 51; has entered into combinations and conspiracies to monopolize trade and commerce **[*503]** in the State of Florida, *id*. 19, at P 56; and has entered into various contracts, combinations, and conspiracies to unreasonably restrain trade and commerce and substantially lessen competition in the State of Florida, all with the intent to injure the plaintiff and eliminate it as a competitor, **[**3]** *id*. at 20-21, P 58.

I. THE PARTIES' CONTENTIONS

The defendant contends that, pursuant to the "artful pleading" exception to the well-pleaded complaint rule, it is entitled to removal jurisdiction. In support of this allegation, the defendant alleges that the plaintiff's Florida Antitrust Act claims are really federal Sherman Act claims in disguise, since they seek to redress not just alleged restraints on commerce in Florida, but also alleged restraints on commerce occurring wholly in other states. The defendant alleges that this broad claim is nationwide in scope, and, therefore, the claim is a federal antitrust claim to which the federal courts have exclusive jurisdiction. *Marrese v. American Academy of Orthopaedic Surgeons, 470 U.S. 373, 379-80, 84 L. Ed. 2d 274, 105 S. Ct. 1327 (1985)*.

The plaintiff contends that the defendant has construed the artful pleading exception too broadly. The plaintiff alleges that there is no federal issue contained within the four corners of its Complaint nor are its causes of action dependent upon issues of federal law. Therefore, the plaintiff contends that the Court does not have subject matter jurisdiction and requests that the Court remand this case to state court. **[**4]** Lastly, the plaintiff requests costs and expenses as a result of the alleged improper removal.

II. REMOVAL AND THE WELL-PLEADED COMPLAINT RULE

HN1[] A defendant may remove to a federal court any civil action "founded on a claim or right arising under the . . . laws of the United States." *28 U.S.C. § 1441(b) (1988)*; *Franchise Tax Bd. v. Construction Laborers Vacation Trust, 463 U.S. 1, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983)*. "There are two ways in which a case may, for removal purposes, 'arise under' federal law. First, the plaintiff's well-pleaded complaint simply may raise issues of federal law. Second, . . . the complaint may raise a select type of claim that has been singled out by Congress for federal preemption." *Pruitt v. Carpenters' Local Union No. 225, 893 F.2d 1216, 1218 (11th Cir. 1990)*.

Pursuant to the well-pleaded complaint rule, a court must look solely to the four corners of a complaint to determine whether or not a claim arises under federal law. *Oklahoma Tax Comm'n v. Graham, 489 U.S. 838, 103 L. Ed. 2d 924, 109 S. Ct. 1519, 1521 (1989)*; *Caterpillar, Inc. v. Williams, 482 U.S. 386, 392, 96 L. Ed. 2d 318, 107 S. Ct. 2425 (1987)* (federal jurisdiction exists only when a federal question is presented on the face of the plaintiff's properly pleaded complaint **[**5]** unaided by the answer or by the petition for removal). Removal jurisdiction does not exist simply because the plaintiff could have chosen a federal claim instead of, or in addition to, the state claim advanced. *Merrell Dow Pharmaceuticals, Inc. v. Thompson, 478 U.S. 804, 809 n. 6, 92 L. Ed. 2d 650, 106 S. Ct.*

3229 (1986). Furthermore, a federal law defense will not support removal jurisdiction, even if the defense is anticipated in the complaint's allegations. *Oklahoma Tax Comm'n v. Graham, 109 S. Ct. at 1519*; *Caterpillar, Inc., 482 U.S. at 393* ("it is now settled that a case may *not* be removed to federal court on the basis of a federal defense, including the defense of pre-emption, even if the defense is anticipated in the plaintiff's complaint"). "The [well- pleaded complaint] rule makes the plaintiff the master of the claim; he or she may avoid federal jurisdiction by exclusive reliance on state law." *Caterpillar, Inc., 482 U.S. at 392*.

III. THE ARTFUL PLEADING EXCEPTION

HN2[] "In certain limited circumstances, a federal court may look behind the complaint to preclude a plaintiff from defeating federal question jurisdiction through 'artful pleading,' that is, by disguising a federal claim as **[**6]** a claim arising under state law." *Bowlus v. Alexander & Alexander Servs., Inc.,* ***[*504]*** *659 F. Supp. 914, 918 (S.D.N.Y. 1987)*. One such circumstance involves state-law claims which have been completely preempted by federal law. In *Metropolitan Life Insurance Co. v. Taylor, 481 U.S. 58, 107 S. Ct. 1542, 95 L. Ed. 2d 55 (1987)*, the United States Supreme Court explained the preemption exception to the well-pleaded complaint rule:

> Federal pre-emption is ordinarily a federal defense to the plaintiff's suit. As a defense, it does not appear on the face of a well-pleaded complaint, and, therefore, does not authorize removal to federal court. One corollary of the well-pleaded complaint rule developed in the case law, however, is that Congress may so completely pre-empt a particular area, that any civil complaint raising this select group of claims is necessarily federal in character.

Metropolitan Life, 107 S. Ct. at 1546 (citation omitted).

The defendant conceded at oral argument that this is not a case in which federal statutes preempt state regulation of the subject matter. ***HN3***[] State courts are not precluded by federal ***antitrust law*** from adjudicating claims arising under state ***antitrust law***.

The perimeter of **[**7]** the second circumstance in which courts have permitted removal in the absence of a federal question expressed on the face of the complaint constitutes the basis of the parties' dispute. It is the plaintiff's position that the second component of the artful pleading exception only arises when a plaintiff's choice of a state forum is motivated by the desire to evade the consequences of prior federal litigation. The defendant contends that the plaintiff's construction of this second circumstance is too narrow. Relying upon footnote two of *Federated Department Stores, Inc. v. Moitie, 452 U.S. 394, 397, 69 L. Ed. 2d 103, 101 S. Ct. 2424 (1981)*, the defendant contends that courts are permitted to peek behind the four corners of the complaint to determine whether the nature of the complaint is really federal; there need not be a prior federal adjudication.

1. Federated Department Stores v. Moitie

To understand the United States Supreme Court's decision in *Moitie*, it is necessary to trace the procedural and factual history of the case. In 1976, retail purchasers filed seven separate class actions against the owners of various department stores. [1] *Id. at 395*. The purchasers alleged that the stores agreed to **[**8]** fix the retail price of women's clothing sold in Northern California in violation of the Sherman Act, *15 U.S.C. § 1*. *Id*. For reasons not relevant to this case, all of actions were dismissed. *Id*. While five of the class actions were appealed to the Ninth Circuit Court of Appeals, two actions were refiled in state court. *Id*. The refiled cases contained similar allegations to the previously dismissed federal action, yet raised only state-law claims. *Id*. The refiled cases were removed to federal court and were once again dismissed by the district court. *Id*. The district court held "that the complaints, though artfully couched in terms of state law, were 'in many respects identical' with the prior complaints, and were thus properly removed to federal court because they raised 'essentially federal law' claims." *Id*. However, this time

[1] Six of the actions were originally filed in federal court. The seventh action was filed in state court and was removed on the basis of diversity of citizenship and federal question jurisdiction. *Federated Department Stores, Inc. v. Moitie, 452 U.S. 394, 395, 69 L. Ed. 2d 103, 101 S. Ct. 2424 (1981)*.

the cases were dismissed due to the doctrine of res judicata. *Id. at 396-97*. The Ninth Circuit created a new exception to the doctrine of res judicata and reversed the district court. *Id. at 397*.

[9]** The Court finds that the defendant reads *Moitie* too broadly. The opinion clearly stated that "the only question presented in this case is whether the Court of Appeals for the Ninth Circuit validly created an exception to the doctrine of res judicata," *id. at 395*, and concluded that "it is enough for our decision here that Brown I is res judicata as to **[*505]** respondents' federal-law claims." *Id. at 402*. Nowhere in the opinion does the Supreme Court state that it was establishing a new exception to the well-pleaded complaint doctrine.

Furthermore, the procedural and factual history of the case provides an interpretation of footnote two that is different from that of the defendant. Footnote two, in its entirety, states that:

> The Court of Appeals also affirmed the District Court's conclusion that Brown II was properly removed to federal court, reasoning that the claims presented were "federal in nature." We agree that at least some of the claims had a sufficient federal character to support removal. As one treatise puts it, courts "will not permit plaintiff to use artful pleading to close off defendant's right to a federal forum . . . [and that] occasionally the removal court **[**10]** will seek to determine whether the real nature of the claim is federal, regardless of plaintiff's characterization." 14 C. Wright, A. Miller, & E. Cooper, Federal Practice and Procedure § 3722, pp. 564-566 (1976) (citing cases) (footnote omitted). The District Court applied that *settled principle* to the facts of this case. After "an extensive review and analysis of the origins and substance of" the two Brown complaints, it found, and the Court of Appeals expressly agreed, that respondents had attempted to avoid removal jurisdiction by "artful[ly]" casting their "essentially federal law claims" as state-law claims. We will not question here that factual finding.

Moitie, 452 U.S. at 397 n. 2 (emphasis added) (citations omitted). Thus, it is clear that the district court, the appellate court, and the Supreme Court were confronted with a factual situation in which the plaintiff was attempting to disguise his claims in state court to prevent the effect of the previous federal adjudication on the merits. *Moitie* was not a case in which the district court peeked behind the plaintiff's claims to determine that they were really federal in nature. Rather, the district court and the **[**11]** Supreme Court determined that the plaintiff's state-law claims were really federal in the context of the previously dismissed federal action. Lastly, were the Supreme Court establishing a new exception to the well-pleaded complaint rule, it would not have stated that the district court had applied the "settled principle" to the facts of this case. *Id*. Thus, the Supreme Court was merely affirming the district court's finding that the state-law claims were not unrelated to the previously dismissed federal claims, and did so by stating that it too agreed that "at least some of the claims had a sufficient federal character to support removal." *Id*.

Interpreted against this background the Court finds that *Moitie* does not stand for the proposition which the defendant contends; ***HN4***[] a prior federal adjudication is required before a court may peek behind the four corners of a plaintiff's complaint. [2] Furthermore, just two years later, the Supreme Court, in *Franchise Tax Board v. Construction Laborers Vacation Trust, 463 U.S. 1, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983)*, stated that the law of removal jurisdiction "has remained basically unchanged for the past century." *Franchise Tax Bd., 463 U.S. at 7*. *See* ***[**12]*** *also, Ethridge v. Harbor House Restaurant, 861 F.2d 1389 (9th Cir. 1988)*; *Department of Banking & Finance v. United States Trust Corp., 610 F. Supp. 919, 920 (S.D. Fla. 1985)*.

The Court finds that the other post-Moitie cases upon which the defendant relies either fit within the prior federal adjudication category of the artful pleading exception, [3] **[**13]** fit within the preemption category of **[*506]** the artful pleading exception, [4] or are factually distinguishable from the case *sub judice*. [5] **[**14]** , [6]

[2] *See California v. Chevron Corp., 872 F.2d 1410, 1415 (9th Cir. 1989)*; *Travelers Indem. Co. v. Sarkisian, 794 F.2d 754* (2d Cir.), *cert. denied*, ***479 U.S. 885, 93 L. Ed. 2d 253, 107 S. Ct. 277 (1986)***; *Bowlus v. Alexander & Alexander Servs., Inc., 659 F. Supp. 914 (S.D.N.Y. 1987)*.

[3] *Villarreal v. Brown Express, Inc., 529 F.2d 1219, 1221 (5th Cir. 1976)* (following settlement of the federal action, the plaintiff repled in state court state-law claims which were essentially identical to the prior federal law); *Alabama v. Mills Family Bakery of*

IV. ATTORNEY'S FEES

HN5[] A federal district court may order a defendant to pay attorney fees and costs incurred by a plaintiff as a result of an improper removal. *28 U.S.C. § 1447(c) (1988)*. Such a decision is within the sound discretion of the trial court. In the instant case, the Court finds that the law interpreting the perimeters of the artful pleading doctrine is somewhat ambiguous. Consequently, the defendant's basis for removal and opposition to the plaintiff's motion to remand was colorable, and the Court will deny the plaintiff's request for attorney fees and costs.

V. CONCLUSION

In conclusion, neither of the components of the artful pleading exception apply to the facts of this case. Congress has not preempted state ***antitrust law*** nor is this a case like *Moitie* in which the plaintiff first filed a **[**15]** lawsuit containing federal claims, and then, after dismissal, sought to recast those claims under state law. Rather, the plaintiff in this case has consistently sought to litigate state claims in state court. *See United Jersey Banks v. Parell, 783 F.2d 360* (3rd Cir.), *cert. denied*, *476 U.S. 1170, 90 L. Ed. 2d 979, 106 S. Ct. 2892 (1986)*. Although the defendants allege that the action implicates federal ***antitrust law***, as well as the *Commerce Clause*, the Court finds that, even if this were so, this would only provide the defendants with a federal defense. [7] Under the well-pleaded

---

Alabama, Inc., No. CV90-PT-0978-M, slip op. at 5 n.3 (N.D. Ala. May 22, 1990) (complaint "arguably resurrects the original FTC complaint which was clearly based on federal law").

[4] The Supreme Court in *Franchise Tax Bd. v. Construction Laborers Vacation Trust, 463 U.S. 1, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983)*, addressed the artful pleading exception to the well-pleaded complaint rule in the context of preemption. *See* ***Aaron v. National Union Fire Ins. Co., 876 F.2d 1157 (5th Cir. 1989)***, *cert. denied*, ***493 U.S. 1074, 107 L. Ed. 2d 1028, 110 S. Ct. 1121 (1990)***; *Ethridge v. Harbor House Restaurant, 861 F.2d 1389 (9th Cir. 1988)*; *Patriot Cinemas, Inc. v. General Cinema Corp., 834 F.2d 208, 217 n. 4 (1st Cir. 1987)*; *United Jersey Banks v. Parell, 783 F.2d 360, 366* (3rd Cir.), *cert. denied*, ***476 U.S. 1170, 90 L. Ed. 2d 979, 106 S. Ct. 2892 (1986)***; *Powers v. South Cent. United Food & Commercial Workers Unions, 719 F.2d 760 (5th Cir. 1983)*.

[5] *In re Carter, 618 F.2d 1093 (5th Cir. 1980)*, *cert. denied*, *450 U.S. 949, 67 L. Ed. 2d 378, 101 S. Ct. 1410 (1981)*, did not involve a motion to remand filed by the plaintiff. Rather, the plaintiff was arguing that he had relied upon federal law. It was the defendant, who, after removing the case and losing, alleged that the district court did not have subject matter jurisdiction. The court was not recharacterizing the plaintiff's complaint in a fashion contrary to the plaintiff's own position. Furthermore, in *Powers v. South Cent. United Food & Commercial Workers Unions, 719 F.2d 760, 766 (5th Cir. 1983)*, the Fifth Circuit stated that, in *Carter*, "the plaintiff's complaint necessarily presented a federal claim."

In *Buchanan v. Delaware Valley News, 571 F. Supp. 868, 872 (E.D. Penn. 1983)*, the Court held that, since Pennsylvania had no state antitrust statute, the plaintiff's state antitrust claim was actually a federal antitrust claim.

In *In re Wiring Device Antitrust Litigation, 498 F. Supp. 79, 81 (E.D.N.Y. 1980)*, it was conceded that there was diversity between the parties. Therefore, the Court's discussion regarding the federal question was mere dicta. Furthermore, there had previously been a federal antitrust indictment, as well as thirty federal antitrust cases with the same claims and defendants. *See Bowlus v. Alexander & Alexander Servs., 659 F. Supp. 914, 919 (S.D.N.Y. 1987)*.

Lastly, in *Three J Farms, Inc. v. Alton Box Board Co*., 1979-1 Trade Cas. (CCH) (D.S.C. 1978), paras. 62,423, 76,547, 76,550, *rev'd on other grounds*, *609 F.2d 112 (4th Cir. 1979)*, *cert. denied*, ***445 U.S. 911, 63 L. Ed. 2d 327, 100 S. Ct. 1090 (1980)***, the court held that, since plaintiff's complaint alleged interstate commerce and since the Supreme Court of South Carolina had previously ruled that any claim alleging interstate commerce must be federal antitrust claim, South Carolina had displaced state law from the field.

[6] The defendant also cites to *T.O.C., Inc. v. United Artists Theatre Circuit, 631 F. Supp. 832 (N.D. Cal. 1986)*. However, this case was recently disapproved of by the Ninth Circuit Court of Appeals in *Redwood Theatres, Inc. v. Festival Enterprises, Inc., 908 F.2d 477 (9th Cir. 1990)*.

complaint rule, a federal defense is insufficient to support removal. If, once back in state court, it is determined that the complaint does not state a claim under the Florida Antitrust Act, then the state court will simply dismiss the claim.

[16]** **[*507]** Therefore, the Court will grant the plaintiff's Motion to Remand, filed on May 18, 1990, and remand the case to the Circuit Court of the Fourth Judicial Circuit, in and for Duval County, Florida. However, the Court will deny the plaintiff's requests for costs and attorney's fees. The Court will deny the Defendant's Request, in the Alternative, for Stay and Certification of Order Granting Remand, filed on August 1, 1990. Lastly, the Court will deny the defendant's Motion to File Supplemental Authority in Connection with Plaintiff's Motion to Remand, filed on September 18, 1990.

Accordingly, it is

ORDERED:

1. That the plaintiff's Motion to Remand, filed on May 18, 1990, is granted; the case shall be remanded to the Circuit Court of the Fourth Judicial Circuit, in and for Duval County, Florida.

2. That the plaintiff's requests for costs and attorney's fees are denied.

3. That the Defendant's Request, in the Alternative, for Stay and Certification of Order Granting Remand, filed on August 1, 1990, is denied.

4. That the defendant's Motion to File Supplemental Authority in Connection with Plaintiff's Motion to Remand, filed on September 18, 1990, is denied.

DONE AND ORDERED at Jacksonville, **[**17]** Florida, this 22 day of October, 1990.

End of Document

---

[7] Thus, even if the defendant has correctly interpreted the reach of the *Healy v. Beer Institute, Inc., 491 U.S. 324, 105 L. Ed. 2d 275, 109 S. Ct. 2491, 2499 (1989)*, the Court notes that such an interpretation would simply constitute a federal defense to the plaintiff's state-law claims.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN1[] **Sherman Act, Claims**

In order to satisfy the test for Sherman Act violations, the party seeking immunity must establish that (1) the challenged restraint is a state policy which is clearly articulated and affirmatively expressed, and (2) the state actively supervises any private anti-competitive conduct.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN2[] **Antitrust & Trade Law, Exemptions & Immunities**

Active supervision meant regulatory oversight of anti-competitive conduct. The active supervision prong of the test for immunity requires that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy. Absent such a program of supervision, there is no realistic assurance that a private party's anticompetitive conduct promotes state policy, rather than merely the party's individual interests.

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN3[] Utility Companies, Rates

Ill. Rev. Stat. ch. 111-2/3, para. 1-101.

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN4[] Utility Companies, Rates

Ill. Rev. Stat. ch. 111-2/3, para. 1-102 grants to the Illinois Commerce Commission broad supervisory powers over all telephone public utilities. One responsibility of the Commission is to approve or actually set rates for telephone services. Ill. Rev. Stat. ch. 111-2/3, para. 13-505. The Act provides that no proposed rate becomes effective unless and until the Commission approves it, either by taking no action for 45 days or by issuing an order after a public hearing. The Act also authorizes the Commission to establish rates. It states, that the Commission may, upon its own motion or upon complaint, investigate whether such proposed rate change is just and reasonable and if it finds that such changes are unjust or unreasonable the Commission shall have the power and duty to establish rates it finds to be just and reasonable.

Communications Law > ... > Regulated Entities > Telephone Services > Payphone Services

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN5[] Telephone Services, Payphone Services

There is no requirement that the Illinois Commerce Commission specifically review each proposed usage rate as it applies to each and every affected customer. It is enough that the Commission "exercises ultimate control over" the rate setting.

HN6[] Antitrust & Trade Law, Sherman Act

The implied immunity doctrine holds that the nature and extent of federal government regulation may justify exemption from federal anti-trust liability. The doctrine is based on the principle that where two pieces of federal legislation are inconsistent, the latter act impliedly repeals the prior act to the extent of the inconsistency.

Opinion

REPORT AND RECOMMENDATION

All-Tone Communications, Inc. ("All-Tone") sued American Information Technologies Corporation a/k/a Ameritech ("Ameritech") and Illinois Bell Telephone Company ("Illinois Bell") alleging violations of federal ***antitrust law*** and a pendent state claim of tortious interference with contractual relationships. Illinois Bell filed a motion for partial summary judgment contending that it is immune from antitrust claims as to usage rates (charges) set or approved by the state. Illinois Bell's motion is now before the court.

Procedural History

On March 3, 1987, All-Tone filed its complaint against Ameritech and Illinois Bell. On December 15, 1988, Illinois Bell moved for partial summary judgment as to paragraphs 20 through 25 of the complaint. [1] In these paragraphs, All-Tone alleges that the usage rates Illinois Bell charges All-Tone for calls made from All-Tone's pay telephones are "discriminatory and anti-competitive." Illinois Bell's Motion For Partial Summary Judgment, para. 2. All-Tone's response and Illinois Bell's reply **[*2]** were filed February 10 and February 24, 1989, respectively. Without leave of court, All-Tone filed two supplemental responses, on September 22 and March 20, 1990. Illinois Bell responded to each supplemental filing, vociferously objecting to the supplemental filings as well as responding to the merits of each.

[*3] Uncontested Facts

Illinois Bell is a local telephone utility operating in parts of Illinois and subject to the regulatory jurisdiction of the Illinois Commerce Commission ("the Commission") for its intrastate services. Ill.Rev.Stat. ch. 111-2/3, paras. 1-102, et seq. Illinois Bell owns and operates local exchange networks, the system of trunks, lines and switches which

---

[1] The pertinent paragraphs are as follows:

20. Ameritech and Illinois Bell's latest discriminatory tactic will slash All-Tone's profits and will require All-Tone to charge its customers more for pay telephone service than Illinois Bell charges its own [pay telephone] customers for the same service.

21. Beginning on March 4, 1987, Ameritech and Illinois Bell will charge All-Tone a new, discriminatory rate for use of central office services and facilities. The new rate is sensitive to (a) the time of day the call is placed, (b) the distance the call travels, (c) the time length of the call, and (d) the volume of calls placed from the calling telephone number.

22. Prior to March 4, 1987, All-Tone paid Illinois Bell approximately 4.5 cents per call made on one of All-Tone's pay telephones to a location within the Chicago calling area. As a result, All-Tone was able to charge customers a flat rate of twenty-five cents for each local call. Under the new discriminatory tariff, the telephone call in Chicago will cost 4.5 [cents] could now cost All-Tone in excess of 25 [cents].

23. Under the new tariff, the charges All-Tone will pay to Illinois Bell will increase sharply. These increased charges will adversely affect All-Tone's ability to compete in the market. For example, if All-Tone keeps its charge to the customer at 25 [cents], its profit margin could disappear entirely; alternately, if All-Tone raises its charges to compensate for the increased rates, it cannot and will not be competitive with Illinois Bell telephones. In locations where both All-Tone and Illinois Bell have a pay telephone, an All-Tone customer will have to pay more for a call placed on the All-Tone pay telephone, an All-Tone customer will have to pay more for a call placed on the Illinois Bell pay telephone.

24. In addition, because of the new rates, All-Tone will be required to bear the cost of reprogramming all of its pay telephones in order to charge its customers according to the new rate schedule.

25. Illinois Bell's new tariff does not change the rate for Illinois Bell's pay telephones. As a result, users of Illinois Bell's pay telephones will continue to make calls within the Chicago calling area for a flat rate of twenty five (sic) cents.

carries telephone calls locally. Pertinent to this litigation, it also operates pay telephones throughout Market Service Area 1 ("MSA-1"), roughly Chicago and its suburbs.

All-Tone was incorporated in January, 1986 and began operations in June, 1986 as a provider of coin operated pay telephone services also throughout MSA-1. All-Tone competes with Illinois Bell in the pay telephone market, in the same geographic area. All-Tone's pay telephones are connected to Illinois Bell's telephone network, for which All-Tone pays Illinois Bell a usage rate. All-Tone is a reseller of telephone services. That is, it buys a service from Illinois Bell and, in turn, sells this service to other customers. Resellers are considered business customers and they pay Illinois Bell's business rates for services which are resold.

All-Tone **[*4]** complains of the revised usage rates for MSA-1. The revised rates are based on frequency, duration, distance, and time of day of the call. Illinois Bell proposed new rates as part of a system-wide effort to align its rates more closely with its true costs. Illinois Bell originally submitted the proposed rates in July, 1985. Nearly two dozen parties intervened in the process, and a total of sixteen days of hearings were held. On June 25, 1986, the Commission approved the negotiated MSA-1 rate restructure and ordered a phase-in implementation. The Commission's opinion does not discuss the impact of the new usage-based rates on competing pay telephone companies.

The Parties' Positions

All-Tone contends in paragraphs 20 through 25 of its complaint that the implementation of the new usage rates will adversely affect its business and that the new rates violate the federal antitrust laws. All-Tone attempts to defeat the motion for summary judgment by arguing that Illinois Bell's rates are tied to the facilities Illinois Bell is providing to All-Tone. It argues that a question of fact exists as to whether Illinois Bell is providing the facilities on reasonable and non-discriminatory terms **[*5]** and conditions.

Illinois Bell counters these allegations with an affirmative defense: that it is exempt from antitrust actions relating to usage rates due to the state action immunity doctrine. It relies on *Parker v. Brown, 317 U.S. 341, 63 S.Ct. 307 (1943)*, which held state officials immune from anti-trust liability, and *Southern Motor Carriers Rate Conference v. United States, 471 U.S. 48, 105 S.Ct. 1721 (1985)*, extending this protection to private parties when certain criteria are met (described below). Thus, Illinois Bell argues, even assuming everything All-Tone complains of in paragraphs 20 through 25 is true, Illinois Bell cannot be sued for its usage rates as a matter of law.

Discussion

The first order of business is to interject some order into the business of the briefing process in this case. The briefing schedule set by the court for the instant motion only allowed for a response and a reply. After the motion was fully briefed, All-Tone filed two supplemental responses. All-Tone did not ask leave to file either supplemental response: they were submitted without leave of court. The court finds All-Tone's **[*6]** actions inappropriate. The filing of memoranda not provided for by court order may only be accomplished with the court's indulgence, by means of an appropriate motion.

All-Tone submits that its supplemental filings supplied newly discovered information pertinent to the instant motion. The court does not agree. The only issue before the court is whether Illinois Bell is shielded from anti-trust liability by dint of the state action immunity doctrine. The supplemental motions did not address this issue, nor provide information relevant to its disposition. As such, the court will not consider All-Tone's two supplemental responses and, consequently, need not consider Illinois Bell's supplemental replies.

The State Immunity Doctrine

Illinois Bell grounds its motion for partial summary judgment on the state immunity doctrine. This doctrine was established by the United States Supreme Court in Parker. Parker was an action filed by a raisin producer against the California Director of Agriculture and other state officials, seeking to enjoin the enforcement of the State's Agricultural Prorate Act. That statute created a cartel of raisin producers in order to stabilize prices and prevent **[*7]** economic waste. *Id. at 346, 63 S.Ct. at 311*. The Court recognized that the statute was clearly anti-competitive, but nonetheless held that the state officials were immune from antitrust liability under the Sherman Antitrust Act. The Court found that the Sherman Act was not intended "to restrain a state or its officers or agents from activities directed by its legislature." *Id. at 350-51, 63 S.Ct. at 313*.

In Southern Motor Carriers, the Supreme Court expanded the state immunity doctrine to protect the conduct of private parties if certain criteria are met. Southern Motor Carriers dealt with the regulation of intrastate trucking rates in four southern states, North Carolina, Georgia, Mississippi and Tennessee. In each of the four states, trucking companies were required to submit proposed intrastate rates to the state's Public Service Commission. A proposed rate would become effective only if the state's commission approved the rate, either by taking no action for a specified period or by issuing an order after a public hearing. The defendants, private associations composed of competitors in the trucking business, submitted joint rate proposals on behalf of their members **[*8]** to the commissions of each of the four states. North Carolina, Georgia and Tennessee had statutes that did not compel, but expressly permitted common carriers to submit such joint rate proposals. Mississippi's statute made no reference to joint rate proposals, but simply authorized its commission to regulate common carriers and to set just and reasonable rates for their service within the states.

The Supreme Court held that the defendants were protected from allegations of price-fixing in violation of the Sherman Act, relying on a two-pronged test delineated in *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 100 S.Ct. 937 (1980)*. ***HN1***[] In order to satisfy the test, the party seeking immunity must establish that (1) the challenged restraint is a state policy which is clearly articulated and affirmatively expressed, and (2) the state actively supervises any private anti-competitive conduct. *Southern Motor Carriers, 471 U.S. at 57, 105 S.Ct. at 1727*.

The Court held that a state policy could be clearly articulated and affirmatively expressed where a state "expressly permits, [even though **[*9]** it] does not compel, anti-competitive conduct". *Id. at 61, 105 S.Ct. at 1729*. The statutes for North Carolina, Georgia and Tennessee satisfied the first prong of Midcal. However, Mississippi's statute made no reference to joint rate proposals. Nonetheless, the Court found in Mississippi's statute a clear intent for the intrastate rates to be set by the regulatory agency rather than the market place. The Court held that this satisfied the first requirement of Midcal. *Id. at 63-64, 105 S.Ct. at 1730*.

Regarding the second prong of the Midcal test, the Court indicated that ***HN2***[] active supervision meant regulatory oversight of anti-competitive conduct. *Id. at 57, 62 n.23, 105 S.Ct. at 1727, 1729 n. 23*. This requirement was discussed in more detail in *Patrick v. Burget, 486 U.S. 94, 108 S.Ct. 1658 (1987)*. There the Court stated:

The active supervision prong of the Midcal test requires that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy. **[*10]** Absent such a program of supervision, there is no realistic assurance that a private party's anticompetitive conduct promotes state policy, rather than merely the party's individual interests.

Patrick at 101, 108 S.Ct. at 1663.

Illinois Bell's Rates Are Exempt

Illinois Bell has pointed to a clearly articulated policy of the state to regulate telephone companies, including usage rates. The Illinois Public Utilities Act (the "Act"), Ill. Rev. Stat. ch. 111-2/3, para. 1-101 et seq., states:

HN3[] [The General Assembly] declared [it] to be the policy of the State that public utilities shall continue to be regulated effectively and comprehensively.

Para. 1-102. *HN4*[] The Act grants to the Commission broad supervisory powers over all telephone public utilities, paras. 4-101, 13-101. [2] One responsibility of the Commission is to approve or actually set rates for telephone services. Para. 13-505. The Act provides that no proposed rate becomes effective unless and until the Commission approves it, either by taking no action for 45 days or by issuing an order after a public hearing.Paras. 9-201, 13-504, 13-505. The Act also authorizes the Commission to establish **[*11]** rates. It states, in pertinent part:

The Commission may, upon its own motion or upon complaint, investigate whether such proposed [rate] change is just and reasonable and if it finds . . . that such changes are unjust or unreasonable . . . the Commission shall have the power and duty to establish rates . . . it finds to be just and reasonable.

Para. 13-504. In the instant case, the "anti-competitive conduct" complained of by All-Tone is Illinois Bell's revised usage rates. The Act not only provides for state regulation of telephone companies generally; it also provides for state regulation of rate setting. The legislative mandate of the Act clearly satisfies the first prong of the Midcal test.

[*12] Illinois Bell has also demonstrated that the Commission actively supervises telephone companies, specifically, usage rates charged. A proposed usage rate must be filed with the Commission. Para. 13-501. As stated above, a proposed rate does not become effective until the Commission approves the rate.Paras. 9-201, 13-504, 13-505. Moreover, the Commission is not limited to merely accepting or rejecting the rates as proposed, it may determine what rates it finds to be just and reasonable. Para. 13-504. The Commission held nearly 16 days of hearings on the rates at issue in this case. Not only does the Commission have the power and authority to supervise the rate setting, there can be little question that the Commission exercised its authority over the rates proposed. The second part of the Midcal test is satisfied.

All-Tone argues that the Commission did not directly consider whether the rates charged to resellers were reasonable and non-discriminatory. It states that no mention is made of competing pay telephone companies in the two orders dated August 24, 1983 and July 17, 1983. In the Third Interim Order, the Commission concluded that it did "not have a sufficient record **[*13]** at this time on which to decide whether resale of COTS [Coin Operated Telephone Service] should be allowed." Third Interim Order, September 18, 1984, at 10. This is an incorrect understanding of what it meant by active state supervision. There need only be a "program of supervision". *Patrick, at 101, 108 S.Ct. at 1663*. *HN5*[] There is no requirement that the Commission specifically review each proposed usage rate as it applies to each and every affected customer. It is enough that the Commission "exercises ultimate control over" the rate setting. Id.

All-Tone urges us to disregard Illinois Bell's claim of immunity, citing *MCI Communications Corp. v. AT & T, 708 F.2d 1081 (7th Cir. 1983)*, and other similar cases. [3] However, these cases address the issue of implied immunity and not the state action immunity doctrine. *HN6*[] The implied immunity doctrine holds that the nature and extent of federal government regulation may justify exemption from federal anti-trust liability. The doctrine is based on the principle that where two pieces of federal legislation are inconsistent, the latter act impliedly repeals the prior act to the extent **[*14]** of the inconsistency. *United States v. National Association of Security Dealers, 422 U.S. 694, 719-20, 95 S.Ct. 2427, 2443 (1975)*; *Silver v. New York Stock Exchange, 373 U.S. 341, 357, 83 S.Ct. 1246, 1257*

---

[2] The resale of telephone services to customers such as All-Tone is an example of how the state regulates the telephone service industry. It is not controverted that Illinois Bell, in the past, provided telephone service only to end-users. That is, customers were not allowed to resell to others the service they received from Illinois Bell. About the time of the 1984 Bell Systems divestiture, the Commission decided to permit resale in Illinois. See ***United States v. Western Electric Co., Inc., 673 F.Supp. 525 (D.D.C. 1987)***; and Interim Order, Second Interim Order, and Third Interim Order, Docket 82-0292, August 24, 1983, June 27, 1984, and September 18, 1984, respectively.

[3] *Northeastern Telephone Company v. AT & T, 651 F.2d 76 (2d Cir. 1981)*; *U.S. Transmission Systems, Inc. v. AT & T, 564 F.Supp. 1020 (S.D. N.Y. 1983)*; ***United States v. AT & T, 461 F.Supp. 1314 (D.D.C. 1978)***.

(1963). For example, in MCI, the implied immunity issue was whether the Communications Act of 1934 granted AT & T immunity from the Sherman Antitrust Act. MCI, 708 F.2d at 1102.

By contrast, the state action immunity doctrine "represents an attempt to resolve conflicts that may arise between principles of federalism and the goal of the antitrust laws, unfettered competition in the marketplace." Southern Motor Carriers at 61, 105 S.Ct. at 1729. **[*15]** The "principles of federalism" addressed above, were explained as follows:

In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

Parker, 317 U.S. 350-51, 63 S.Ct. at 313. These tenets gave rise to the state action immunity doctrine, which, as previously described, evolved to encompass protection for private parties regulated by the state. All-Tone erroneously relies on cases which treat the issue of implied immunity.

Similarly, All-Tone's reliance on Mid-Texas Communication Systems Inc. v. AT & T, 615 F.2d 1372 (5th Cir. 1980) and Sound, Inc. v. AT & T, 631 F.2d 1324 (8th Cir. 1980) is not persuasive. These cases were decided prior to Southern Motor Carriers and have been implicitly overruled. See Health Care Equalization Committee v. Iowa Medical Society, 851 F.2d 1020, 1024 (8th Cir. 1988)(test applied in Sound, Inc. has been superseded by, inter **[*16]** alia, Midcal and Patrick). Inasmuch as Illinois Bell has satisfied the criteria for immunity from the antitrust laws, its motion for summary judgment should be granted.

RECOMMENDATION

Based on the foregoing, it is recommended that Illinois Bell's motion for partial summary judgment as to paragraphs 20 through 25 of the complaint be granted.

Written objection to any finding of fact, conclusion of law, or the recommendation for disposition of this matter must be filed with the Honorable Ann C. Williams within ten days after service of this Report and Recommendation. See Fed.R.Civ.P. 72(b). Failure to object will waive any such issue.

HN1[] **Scope, Monopolization Offenses**

The Sherman Act, *15 U.S.C.S. § 2*, makes it unlawful for any person to monopolize, or attempt to monopolize, or combine or conspire to monopolize any part of the trade or commerce among the several States. In construing a Sherman Act claim, the United States Supreme Court has held that a plaintiff must establish 1) the possession of monopoly power in the relevant market, and 2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Such prohibited power includes power to control prices or exclude competition.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Appeals > Standards of Review > General Overview

HN2[] **Judgment as Matter of Law, Directed Verdicts**

In considering a motion for directed verdict, the trial court must determine whether there was sufficient evidence presented to raise a material issue of fact for the jury. Sufficient evidence is such that, when viewed in the light of those inferences most favorable to the nonmovant, there is either a complete absence of proof on the issues or no controverted issues of fact upon which reasonable men could differ. Appellate courts apply this same standard. This standard also applies to motions for judgment notwithstanding the verdict.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN3[] **Jury Trials, Jury Instructions**

In considering a motion for directed verdict or a judgment notwithstanding the verdict, a court must interpret the entire record in the light most favorable to plaintiffs and give to them the benefit of all inferences which the evidence fairly supports, even though contrary inferences might reasonably be drawn. Moreover, the court must assume that the jury followed the court's instructions.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > Judgment Notwithstanding Verdict

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN4[] Standards of Review, Clearly Erroneous Review

Once the jury has acted, a court sets aside its verdict and the trial court's refusal to grant a judgment notwithstanding the verdict motion only if the court is satisfied, upon a thorough review of the record, that error has been committed. Courts also give plaintiffs the benefit of reasonable and favorable inferences that may be drawn from the evidence. Courts may not pass upon credibility of witnesses in making this review. To the extent that the trial court drew or made legal conclusions based on the jury's responses to interrogatories, the court may review decisions of law de novo.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] Actual Monopolization, Claims

The "dangerous probability" element of the attempted monopolization offense reflects the well-established notion that the Sherman Act, *15 U.S.C.S. § 2*, governs single-firm conduct only when it threatens actual monopolization. The Sherman Act protects competition, not competitors, and does not reach conduct that is only unfair, impolite, or unethical.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN6[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

As a general rule, there exists no duty to deal, so long as the determination is made unilaterally. Furthermore, even the use of unfair business practices as part of the termination may not invoke sanction under the antitrust laws. A monopolist, however, may be held to different standards. A refusal to deal practice should be condemned only if it is unreasonably anticompetitive. Even a refusal to deal designed to accomplish vertical integration, without more, should not be a basis for imposing liability upon a purported monopolist. Courts should examine business reasons for a refusal to deal, and must give them some leeway in making business decisions.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN7[] Regulated Practices, Market Definition

Market definition under *15 U.S.C.S. § 2* looks to the existence of competitors as evidence of countervailing power which would preclude monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN8[] **Monopolies & Monopolization, Attempts to Monopolize**

The ultimate inquiry in any attempted monopolization case is whether the defendant has or reasonably might come close to having the ability to control total market output and prices.

Tax Law > Federal Income Tax Computation > Tax Accounting > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Terminating or threatening to terminate deliveries to a purchaser who refuses to provide full payment is not predatory or unlawful anti-competitive conduct. The Sherman Act, *15 U.S.C.S. § 2*, does not give purchasers the exclusive right to dictate the terms on which they will deal, nor does it require a monopolist to accede to every demand of its competitors or customers.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Evidence > Burdens of Proof > General Overview

HN10[] **Monopolies & Monopolization, Attempts to Monopolize**

To prove its claim of attempted monopolization, a plaintiff has to prove that the defendant engaged in anticompetitive conduct with the specific intent to monopolize and that the attempt had a dangerous probability of success.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN11[] **Regulated Practices, Trade Practices & Unfair Competition**

Anticompetitive conduct is conduct designed to destroy competition, not just to eliminate a competitor. Lively legal competition will result in the efficient and shrewd businessman routing the inefficient and imprudent from the field. The antitrust laws must be administered in such a way that they do not restrain such vigorous competition in order to protect inefficient competitors. The successful competitor, having been urged to compete, must not be turned upon when he wins. Merely to attempt to succeed in business is not anticompetitive conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN12[] Monopolies & Monopolization, Attempts to Monopolize

The third element of attempted monopolization is a dangerous probability of success. The greater a firm's market power, the greater the probability of successful monopolization. In order to be found liable for attempted monopolization, a firm must possess market strength that approaches monopoly power--the ability to control prices and exclude competition. Market strength is often indicated by market share.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] Monopolies & Monopolization, Actual Monopolization

15 U.S.C.S. § 2 is directed to single firm conduct, whereas 15 U.S.C.S. § 1 deals with concerted action and proscribes unreasonable restraints through combinations or conspiracies. The conduct of a single firm is governed by 15 U.S.C.S § 2 alone and is unlawful only when it threatens actual monopolization. It is not enough that a single firm appears to restrain trade unreasonably, for even a vigorous competitor may leave that impression. Concerted activity subject to 15 U.S.C.S § 1 is judged more sternly than unilateral activity under 15 U.S.C.S § 2.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN16[] Regulated Practices, Trade Practices & Unfair Competition

The officers of a single firm are not separate economic actors pursuing separate economic interests, so agreements among them do not suddenly bring together economic power that was previously pursuing divergent goals. Coordination within a firm is as likely to result from an effort to compete as from an effort to stifle competition. In the marketplace, such coordination may be necessary if a business enterprise is to compete effectively.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN17[] Actual Monopolization, Anticompetitive & Predatory Practices

The mechanism by which a firm engages in predatory pricing -- lowering prices -- is the same mechanism by which a firm stimulates competition; because cutting prices in order to increase business often is the very essence of competition; mistaken inferences are especially costly, because they chill the very conduct the antitrust laws are designed to protect.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN18[] Regulated Practices, Trade Practices & Unfair Competition

Antitrust laws do not require the courts to protect small businesses from the loss of profits due to continued competition, but only against the loss of profits from practices forbidden by the antitrust laws. Competition for increased market share is not activity forbidden by the antitrust laws. It is simply vigorous competition. To hold that the antitrust laws protect competitors from the loss of profits due to such price competition would, in effect, render illegal any decision by a firm to cut prices in order to increase market share. The antitrust laws require no such perverse result, for it is in the interest of competition to permit dominant firms to engage in vigorous competition, including price competition.

HN19[] Standing, Clayton Act

In order to have standing to sue for treble damages under the Clayton Act, *15 U.S.C.S. § 15*, a person must be within the target area of the alleged antitrust conspiracy, i.e., a person against whom the conspiracy was aimed, such as a competitor of the persons sued. Accordingly, courts have drawn a line excluding those who have suffered economic damage by virtue of their relationships with targets or with participants in an alleged antitrust conspiracy, rather than being targets themselves. Courts, therefore, exclude as targets those who have suffered economic damages by virtue of their relationships with targets.

HN20[] **Clayton Act, Claims**

Innumerable elements, including proximity and directness, constitute proper areas of inquiry in identifying a person injured by reason of a violation of the antitrust laws within the meaning of § 4 of the Clayton Act, *15 U.S.C.S.§ 15*. Examination of these factors facilitates identification of who is entitled to prosecute an action under § 4.

Opinion by: WELLFORD

Opinion

[*1416] WELLFORD, Circuit Judge

The parties in this antitrust controversy are, or were at one time, involved in businesses related to **[**2]** road and highway construction in northwestern Ohio. Plaintiff Arthur S. Langenderfer, Inc. (Langenderfer) was an asphalt paving contractor that ceased operations in 1978, allegedly due to defendants' antitrust violations. Northern Ohio Asphalt Paving Co. (NOAP), a sister company of Langenderfer, is an asphalt producer. Langenderfer and NOAP were the original plaintiffs in a related case, *Langenderfer v. S.E. Johnson Co., 729 F.2d 1050* (6th Cir.), *cert. denied*, *469 U.S. 1036, 83 L. Ed. 2d 401, 105 S. Ct. 510 (1984)* (*Langenderfer I*), a case in which this court vacated judgment based on a verdict in favor of plaintiffs and remanded for a new trial.

I. GENERAL BACKGROUND

While the *Langenderfer* I appeal was pending, the original plaintiffs were joined by other plaintiffs in a companion case, and when *Langenderfer I* was decided and a remand effectuated, the separate actions were consolidated. One of the "new" plaintiffs is MacRitchie Materials, Inc. (MacRitchie), a limestone supplier and sister company of Langenderfer and NOAP that was denied leave to intervene in *Langenderfer I. See 729 F.2d at 1060*. The other new plaintiffs are M&B Asphalt Co., Inc. (M&B), an asphalt producer, paving contractor, **[**3]** and limestone quarry operator, and G.M. Sader Excavating & Paving Co., Inc. (Sader), an asphalt paving and excavating contractor. The defendant companies (which shall be referred to collectively as "Johnson") are commonly owned, and are involved in various aspects of the road construction business. Defendant John T. Kirkby is the president of Johnson and chief executive officer of the Johnson entities.

In the *Langenderfer I* trial, plaintiffs relied largely on evidence of alleged predatory pricing in bidding on public road projects. Plaintiff introduced no evidence to indicate that defendants' bids were less than defendants' total average costs, and we held that the trial court did not instruct the jury properly on the legal standard for a predatory pricing antitrust violation. Because the predatory pricing claim could not stand separately as a matter of law, and because it was unclear whether the jury verdict was based on predatory pricing or on other alleged anticompetitive behavior, we vacated the judgment in favor of plaintiffs in *Langenderfer I*, and remanded for a new trial. We noted that in order to prevail on a claim of monopolization or attempt to monopolize, plaintiff **[**4]** must "establish that Johnson engaged in some type of prohibited anticompetitive conduct." *729 F.2d at 1054-55*.

Plaintiffs in the current action allege that the defendants violated *§ 2* of the Sherman Act by monopolizing and attempting to monopolize "the production and supply of highway construction materials and in the bidding, construction and repair of asphalt highways" in a thirteen-county area of northwest Ohio. These highway projects were administered on a competitive bidding basis by the Ohio Department of Transportation (ODOT) and/or the Ohio Turnpike Commission (OTC). Defendants assert once again in defense of the charges that Johnson's success relative to the plaintiffs was the result of better foresight and management, which led to diversification, improved efficiency, and lower costs.

The allegations of plaintiff Sader differed significantly from those of the other plaintiffs, because Sader was not an actual competitor in ODOT/OTC work. Instead, Sader did mostly private paving work, but alleged that it relied on Johnson for raw materials, and that Johnson terminated Sader's credit in retaliation for the testimony of Sader's president, Gregory Sader, in *Langenderfer I*. **[**5]** Johnson maintained, on the other hand, that the credit cut-off was for legitimate business reasons. We shall deal with the claims of each of the plaintiffs independently.

[*1417] The jury made the following findings, after submission of special interrogatories:

1. As to all plaintiffs except Sader, relevant product markets included limestone, sand, and asphalt used in ODOT and OTC paving contracts, as well as the ODOT and OTC paving contracts themselves.

2. The relevant geographic market for *all* plaintiffs was the thirteen-county area.

3. Defendants possessed monopoly power, defined as "the power to control prices or exclude competition," in all of the relevant product markets, and that power was willfully acquired, maintained, or used through anticompetitive conduct. Asked to describe one or more types of anticompetitive conduct, the jury replied, "The acquisitions were all made to exclude and/or injure competition and increase Johnson's power which he succeeded in doing." [1]

[6]** 4. Defendants' monopolization caused injury to all of the plaintiffs (including Sader).

5. Defendants possessed the specific intent to achieve a monopoly in all of the relevant markets, engaged in anticompetitive conduct **[**7]** toward that end, and there was a dangerous probability that they would achieve a monopoly.

6. Defendants' attempt to monopolize caused injury to all of the plaintiffs (including Sader).

7. Damages (before trebling) were $ 1,675,000 for Langenderfer and NOAP; $ 200,000 for MacRitchie; $ 350,000 for M&B; and $ 250,000 for Sader.

The trial court entered judgment in accord with the verdict, trebling the damages found by the jury, and allowing payment of interest at the annual rate of 5.79 percent until paid.

On appeal, defendants contend that as a matter of law, no monopoly power may be found in the supply of sand, limestone, asphalt, or in bidding and performance of state and turnpike jobs.

In addition, defendants maintain that plaintiffs failed to support allegations of anticompetitive conduct, relying instead on evidence of Johnson's above-cost bids, contrary to the holding of *Langenderfer I*. In addition, Johnson asserts that the thirteen-county area cannot represent the relevant market for M&B, which performs most of its work in only two counties and has never actually worked in the majority of the thirteen counties found to be the relevant market. Johnson makes a similar contention as to Sader. As an affirmative defense, Johnson claims that MacRitchie lacks antitrust standing, and that Sader may not recover under *§ 2* of the Sherman Act based on Johnson's revocation of Sader's credit privileges.

The original Johnson Company was founded in 1929 by Sherman Johnson, who died in 1956. The company then owned **[**8]** three stone quarries and three hot-mix plants, and was the largest asphalt paving contractor in northwest Ohio. Following Mr. Johnson's death, defendant Kirkby became the principal operating officer in 1957. At that time, plaintiff Langenderfer was the second largest asphalt paver in the area. Beginning in 1961, Kirkby, as principal officer on behalf of defendants, embarked on a series of acquisitions, described by this court in *Langenderfer I. 729 F.2d at 1053-54*.

---

[1] The jury instructions listed the following six alleged anticompetitive acts:

1. Monopolistic stone pricing;
2. Price or profit squeezing and cross-subsidization;
3. Leveraging its position in ODOT and OTC;
4. Tying the sale of stone and sand to the sale of asphalt;
5. Intimidating, discouraging, coercing and retaliating against competitors;
6. Refusal to sell stone to Sader.

Defendants assert that because the jury's above-reflected response to the interrogatory did not list any of these six alleged anticompetitive acts, its findings were not consistent with a violation of the antitrust laws. The trial court found, however, that the jury's response to this "one or more" question was not inconsistent with the general verdict.

We vacated and remanded the first judgment because the proper legal standards were not applied, particularly as to predatory pricing. We stated, however, that there was "substantial evidence indicating that Kirkby, both individually and **[*1418]** as chief officer of Johnson, intended to eliminate competition and dominate the market." *Langenderfer I at 1054*. Furthermore, in the first appeal, we noted that there was expert testimony by economists to the effect that Johnson's acquisitions created "significantly increased market concentration," and therefore had a tendency to create a "monopolistic market structure." *Id. at 1054*.

After remand by this court, plaintiffs amended their complaint asserting that Langenderfer was **[**9]** a general paving contractor until "forced out of business by the defendants [2] in 1978." NOAP asserted that it was in the business of purchasing sand and stone, mixing these at asphalt plants, and selling the resulting materials to Langenderfer, asphalt pavers, and others. These plaintiffs asserted that Johnson, Ohio Engineering, and Creager were competitors in constructing and repairing highways and roads in northwestern Ohio with Langenderfer, and that "business is generally performed . . . after competitive bidding by the governmental authorities." Langenderfer alleged that it "customarily carried on its procurement of materials through plaintiff NOAP." Plaintiffs averred that to minimize costs, "the paving contractor normally purchases highway construction materials for the quarry or asphalt plant located closest to the job site."

[10]** Defendants were charged with "unlawfully combining in restraint of interstate trade and conspiring to monopolize and attempt to monopolize . . . in the production and supply of highway construction materials and in the bidding, construction and repair of asphalt highways." In addition, plaintiffs charged that defendants quoted and charged them higher prices for stone, sand, or asphalt than those charged to defendant paving contractors. They also charged defendants with refusing to sell these materials, tying sales of stone and sand to asphalt, and other "predatory" practices, including forcing competitors out of the sand, stone, and asphalt business by these practices, all done with requisite anticompetitive intent.

Defendants denied the charges of unlawful anticompetitive conduct and averted that a corporate restructuring took place in 1986 leaving S.E. Jason Companies, Inc. as the only active Johnson entity with wholly owned subsidiaries Creager, Stoneco (formerly Oamco, Inc.), and Alloy Founders. [3]

[11]** A basic issue in the retrial of this case arose in defendants' motion to exclude evidence of alleged predatory bidding by reason of our holding in *Langenderfer I*. The district court agreed with plaintiffs and held bidding practices admissible because such practices may "portray the effects of defendants' long term monopolization of this market." [4] Even if some of the **[*1419]** evidentiary emphasis in the second trial was on the asserted predatory bidding practices of defendants, and this is a separate charge from monopolization or attempted monopolization, we find the ruling to permit such evidence not to be prejudicial error under all the circumstances. It is clear,

---

[2] Defendants named were the Johnson companies, Ohio Engineering Co. (Ohio), Fred R. Creager & Sons, Inc. (Creager), Matco Asphaltic Concrete Producing Co. (Matco), OAMCO, Inc. (OAMCO), C.P. Calaway, Inc. (Calaway), Maumee Stone Co. (Maumee), Michigan Stone Co. (MSC), Wolcottville Sand & Gravel Corp. (WAS&G), Saxon Development Co. (Saxon), Stoneco, Inc. (Stoneco), and J.T. Kirkby.

[3] Defendants also responded that Ohio & Metro "no longer exist," and that Calaway "is currently an inactive corporation" (as of July 1986). Johnson answered that Maumee & MSC merged into it; that WAS&G "operated a sandpit in Indiana and became inactive and is now inactive, but that WAS&G's assets, after reactivation, were transferred into Stoneco." Defendants further answered that Saxon "is inactive and has no current business activities." Kirkby was alleged, in the answer, to have owned less than a five percent interest in Johnson at all relevant times.

[4] We do not endorse the reason given by the district court for this ruling. While we find no error in the holding that evidence of bidding practices may be relevant and admissible, we do not believe, as asserted, that its exclusion would be to "direct a verdict for defendants." We held in *Langenderfer I* that bidding "above the *total* average costs" of defendants was not an antitrust violation under the Sherman Act, and that the proper test for anticompetitive conduct in that regard was not whether defendants' bids were "above competitors' costs." *729 F.2d at 1055*. The effect of *Langenderfer I*, it should be observed, was to set aside the judgment based upon plaintiffs' asserted cause of action for predatory pricing, which was the thrust of the first trial and appeal. The district court, however, charged the jury to the above effect. Plaintiffs' experts emphasized what they perceived to be low bidding and "predatory pricing" conduct of defendants.

nonetheless, that a considerable portion of plaintiffs' proof was directed towards defendants' low bidding procedures, and plaintiffs, as well as their experts, relied heavily on this testimony throughout, despite defendants' objections.

[12]** *Section 2* ***HN1***[] of the Sherman Act makes it unlawful for any "person" to "monopolize, or attempt to monopolize, or combine or conspire . . . to monopolize any part of the trade or commerce among the several States." In construing a *§ 2* claim, the Supreme Court has held that a plaintiff must establish "(1) the possession of monopoly power in the relevant market, and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. Such prohibited power includes "power to control prices or exclude competition." *Grinnell Corp., 384 U.S. at 571*; *United States v. E. I. duPont, 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*.

II. STANDARD OF REVIEW

Defendants' appeal is from the district court's denials of the motion for directed verdict and for judgment notwithstanding the verdict. ***HN2***[] In considering a motion for directed verdict, "the trial court 'must determine whether there was sufficient evidence presented to raise a material issue of fact for the jury.'" *Milstead v. International Brh. of Teamsters, 580 F.2d 232, 235 (6th* ***[**13]*** *Cir. 1978)*, *quoting* *O'Neill v. Kiledjian, 511 F.2d 511, 513 (6th Cir. 1975)*. Sufficient evidence "is such that, when viewed in the light of those inferences most favorable to the nonmovant, there is either a complete absence of proof on the issues or no controverted issues of fact upon which reasonable men could differ. *Appellate courts apply this same standard*." *Milstead, 580 F.2d at 235* (citations omitted) (emphasis added). This same standard applies to motions for judgment n.o.v. *Morelock v. NCR Corp., 586 F.2d 1096, 1104 (6th Cir. 1978)*, *cert denied*, *441 U.S. 906, 60 L. Ed. 2d 375, 99 S. Ct. 1995 (1979)*.

We therefore consider whether plaintiffs have carried their burden of showing monopoly power and anticompetitive conduct.

> ***HN3***[] As the case is presented to us, we must interpret the entire record in the light most favorable to [plaintiffs] and give to [them] the benefit of all inferences which the evidence fairly supports, even though contrary inferences might reasonably be drawn. . . .
>
> Moreover, we must assume that the jury followed the court's instructions.

Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 604, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985), citing *Continental Ore Co. v. Union Carbide & Carbon Corp.,* ***[**14]*** *370 U.S. 690, 696, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*.

In applying the *Aspen Skiing* standard to the facts submitted to the jury, it is worth noting that this is the second jury to find in favor of plaintiffs Langenderfer and NOAP with regard to elimination of competition and domination of the market claims.

HN4[] Once the jury has acted, we set aside its verdict and the district court's refusal to grant a j.n.o.v. motion only if we are satisfied, upon a thorough review of the record, that error has been committed. We also give plaintiffs the benefit of reasonable and favorable inferences that may be drawn from the evidence. We may not pass upon credibility of witnesses in making this review. To the extent, of course, that the district court drew or made legal conclusions based on the jury's responses to interrogatories, we may review decisions of law *de novo*.

III. M & B CLAIM

M & B has been in the asphalt paving business in several Ohio counties since about 1957. According to plaintiffs' exhibit **[*1420]** I and the record, it has a base of operations only in Seneca County, Ohio, where it has maintained one or two asphalt plants over the approximately twenty-five years of its existence prior to the filing of this **[**15]** antitrust action in December 1983 against defendants. Seneca County is located in the extreme southeast corner of the thirteen-county relevant market as determined by the jury at trial.

In its brief in this cause, M & B maintains that over the entire relevant time period, it has bid in six counties. Its chief financial officer and one of its two principal operators, Robert M. Chesebro, however, testified that during the twenty year period up to 1980, it did 95 percent of its work in Seneca County and in adjacent Sandusky County. [5] Throughout, its "base of operations" remained in these two counties.

[16]** M & B's plant and an available quarry at Bloomville are very near adjacent Huron and Crawford Counties, outside the thirteen-county area. M & B also bid and did work in Erie, Huron, and Crawford Counties, the latter adjacent to Seneca County to the south and east (Erie County is adjacent and east of Sandusky County). Chesebro testified he "very seldom" operated in Wyandot County. Plaintiffs' map identifying batch plants, stone quarries, and sandpits in the area in question in this litigation reflects that defendants have never had a single plant, quarry or sandpit located in Sandusky and Seneca Counties. It reflects, on the other hand, that during the relevant period there were two independent quarries located in Sandusky County, both available to M & B. There have been three quarries located in Seneca County, two of which were controlled by defendants' primary stone supply competitor, France Stone, and one belonging to Basic, which was the principal source for M & B until M & B acquired operating control of it in 1984. Chesebro conceded that the three largest quarries in the area of his operation were France, National Lime & Stone, and Sandusky Crushed Stone.

Plaintiffs also have **[**17]** a quarry at Rising Sun, very near both Sandusky and Seneca Counties, and there have been two other independent quarries located just south of the Seneca County line. There were no figures produced showing the sand production in these two counties of base operations of M & B. No sandpits in the two counties are reflected on plaintiffs' exhibit 1. Since early 1984 at least, M & B has had its own supply of stone and sand, and it sells sand and limestone to other contractors. There is simply no proof whatever that defendants control or have any monopoly power over the supply of stone and sand in the area in which M & B operated from 1980 to the date of trial. [6]

[18]** The district court, in its jury instructions, presented M & B's alternative contention as to a relevant geographic submarket to be Seneca, Sandusky, Ottowa, Wood, Hancock, and Wyandot Counties, apparently those six counties in which it had submitted bids. There was insufficient evidence in the record to establish defendants' monopoly or attempted monopoly status in such a submarket, or that M & B was a real and active competitor in this submarket or in a two-county submarket during the relevant period. Two examples: (1) defendants had no quarry or sand facility in Seneca, Sandusky, Hancock, and Wyandot Counties in the southeast portion of the thirteen-county alleged relevant market or submarket areas; France and other independents had **[*1421]** eleven quarries in these four counties; (2) plaintiffs and others operated six asphalt plants and defendants operated two in these four counties.

M & B claims that it was competing in a relatively free and open competitive market in its two-county area from 1966 to 1970. In those five years it earned, without control of any quarry or stone source, an average of less than $ 16,000 a year. During the years 1980 through 1986, for which it seeks damages **[**19]** for alleged anticompetitive conduct, it earned an average of *over* $ 16,000 in actual profits a year. Five of the six years after 1979 were profitable, and there was an increase in profit each year from 1982 through 1985. The loss year, 1981, when

---

[5] In a deposition, Chesebro stated that this two county area remained "pretty constant." He also stated that "Seneca and Sandusky Counties account for *over* 90 percent of our work." (emphasis added) (referring to the entire relevant period). Defendants' credit officer Uhl testified, without contradiction, that M & B won bids on ODOT work in only three counties over twenty-plus years prior to trial. The amended complaint asserted that M & B "engaged in business as a general paving contractor principally in Seneca, Sandusky, and contiguous counties."

[6] M & B's Chesebro testified also that M & B bought very little stone from defendants' quarry at Portage, and only on occasion. M & B bought or obtained few materials from defendants and cannot fairly be characterized as anything but a minor and infrequent customer. Defendants' alleged high stone prices, bringing about an alleged profit squeeze, would therefore seem clearly not to bear on M & B's situation directly, if at all.

revenues were abnormally low, was due, in part, to the bankruptcy of a large contractor customer. In 1981, plaintiffs' exhibit 152AA reflects that M & B claimed damages of over $ 124,000 in 1981 because it suffered a loss instead of realizing the same 2.7 percent of pretax profit it realized on much lower revenues in the 1966-70 period. This loss is not explained in any fashion by M & B, and it defies reason and logic to assume that its entire 1981 loss, almost $ 77,000, plus another claimed amount of $ 47,000, was attributable somehow to defendants' low bidding practices in the southeast part of the thirteen-county area claimed by plaintiffs to be the relevant market.

The proof in this case demonstrates, moreover, that on several state asphalt paving jobs since 1980 in which M & B was the *only* bidder, it claims to have lost money. Chesebro also admitted that his company "always lost money on state work." It would seem illogical and **[**20]** unreasonable, then, to blame defendants for continuing losses on state turnpike work after 1980 under these circumstances, particularly in light of the fact that M & B has had, since 1984, its own source of stone and sand entirely independent of defendants' sources which are located outside of the area in which M & B does from 90 percent to 95 percent of its work and has its base of operations.

It does not carry the day on the issue of proving a relevant market within the thirteen-county area of northwest Ohio for M & B to argue that it is a "potential" competitor in the majority of the thirteen counties in which it has not operated at all for some thirty years of its existence at the time of the trial. M & B, as pointed out, has done work and has been an actual competitor with defendants, both before and after 1980, in basically only two counties. Contrary to M & B's assertions, we believe *City of Cleveland v. Cleveland Electric Illuminating Company, 734 F.2d 1157, 1166-67* (6th Cir.), *cert. denied*, *469 U.S. 884, 83 L. Ed. 2d 190, 105 S. Ct. 253 (1984)*, is of no comfort to M & B's contention about the proper relevant market in this case. The market selected must "both 'correspond to the *commercial realities*' **[**21]** of the industry and be *economically significant*." *Id. at 1167* (quoting from *Brown Shoe Co. v. United States, 370 U.S. 294, 336-37, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))* (emphasis added). The "commercial realities" here indicate strongly that M & B is neither an actual nor potential competitor in defendants' area of service and operation in and beyond the thirteen counties of northwest Ohio. Like the plaintiff in *City of Cleveland*, M & B presented no evidence that it planned to compete for business outside of Seneca and Sandusky Counties and areas immediately adjacent thereto.

The evidence is also undisputed that during the period from 1980 on there came about *increased* competition in the immediate area of concern to M & B in the form of additional, substantial competitors in the marketplace for asphalt paving. M & B had little actual competition with Price Construction Co. when its assets were acquired in 1969 by defendants. [7] The elimination of Price and defendants' acquisition of Ohio Engineering Co. were more than offset by the emergence of Miller and Gerken as serious competitors in the area. Erie **[*1422]** Blacktop, another asphalt paving contractor, concededly also came into the M & B "bailiwick" -- Seneca **[**22]** and Sandusky Counties -- after 1980 from time to time to bid on projects in which M & B was interested. After 1980, in jobs in which M & B and defendants bid, M & B was the successful bidder in four of six projects.

It is not controverted but that M & B's bids on a number of jobs during the relevant period exceeded the State Engineer's estimate for these jobs. It is also not controverted that M & B's proportion of success on bids submitted on ODOT and OTC work in its area of operations did not decrease after 1980 in comparison to earlier periods. There is also no substantial evidence that the number of bidders decreased from 1979 through the time of trial. This would clearly indicate that M & B was not foreclosed, nor were others, from bidding on the asphalt work which is the subject matter of this controversy. It may also indicate that M & B's costs, even after acquiring its own quarry source, **[**23]** are higher than other competitive bidders in the marketplace. This evidence (and other proof in the record) indicates a failure to prove dangerous probability of success of monopolization by defendants in the area in which M & B operated or that competitors were driven from the market even after acquisitions were made by defendants. It does reflect that the real basis of complaint by M & B was the low bids submitted by defendants which plaintiffs characterize as predatory bidding or pricing. It should also be noted that this practice of low and successful bidding by defendants has extended over twenty years in northwest Ohio -- some indication that it is not a short-range procedure designed to raise prices later, as indicated by plaintiffs' experts.

---

[7] Price did not sell its sand business to defendants; instead, defendants agreed to continue buying sand from Price (and others).

With respect to M & B's claims, we deem it appropriate to note the recent comments of another court which dealt with *§ 2* antitrust claims:

> ***HN5***[] The "dangerous probability" element of the attempted monopolization offense reflects the well-established notion that *section 2* of the Sherman Act governs single-firm conduct only when it threatens actual monopolization. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767, 104 S. Ct. 2731, 2739,* ***[**24]*** *81 L. Ed. 2d 628 (1984)*. The Sherman Act protects competition, not competitors, and does not reach conduct that is only unfair, impolite, or unethical. *United States v. American Airlines, Inc., 743 F.2d 1114, 1119 (5th Cir. 1984)*, *cert. dismissed*, *474 U.S. 1001, 106 S. Ct. 420, 88 L. Ed. 2d 370 (1985)*. As we recently emphasized in *Ball Memorial Hospital, Inc. v. Mutual Hospital Insurance, Inc., 784 F.2d 1325 (7th Cir. 1986)*,
>
> "competition is a ruthless process. A firm that reduces costs and expands sales injures rivals -- sometimes fatally. The firm that slashes costs the most captures the greatest sales and inflicts the greatest injury. The deeper the injury to rivals, the greater the potential benefit. These injuries to rivals are by-products of vigorous competition, and the antitrust laws are not balm for rivals' wounds."
>
> *Id. at 1338*.
>
> This is not to say that injury to rival firms cannot ever lead to injury to consumers and that *section 2* of the Sherman Act cannot be used to prevent such injury. But *section 2*
>
> "must be used with the greatest caution. Action that injures rivals *may* ultimately injure consumers, but it is also perfectly consistent with **[**25]** competition, and to deter aggressive conduct is to deter competition. Thus, the plaintiff faces a stiff burden in any *section 2* litigation. 'It is not enough that a single firm appears to restrain trade unreasonably, for even a vigorous competitor may leave that impression. For instance, an efficient firm may capture unsatisfied customers from an inefficient rival, whose own ability to compete may suffer as a result. This is the rule of the marketplace and is precisely the sort of competition that promotes the consumer interests that the Sherman Act aims to foster. In part because it is sometimes difficult to distinguish robust competition from conduct with long-run anticompetitive effects, Congress authorized Sherman Act scrutiny **[*1423]** of single firms only when they pose a danger of monopolization. Judging unilateral conduct in this manner reduces the risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur.'"
>
> *Id.* (quoting *Copperweld Corp. v. Independence Tube Cob, 467 U.S. 752, 767-68, 104 S. Ct. 2731, 2739-40, 81 L. Ed. 2d 628 (1984))*.

Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1413-14 (7th Cir. 1989) (footnotes **[**26]** omitted).

In summation, then, we conclude that M & B failed to prove that it was realistically an economically significant competitor or potential competitor in the thirteen-county area claimed to be a relevant market; nor did it establish any claimed submarket in which defendants were shown to be actual or potential monopolists. There was also a failure of proof as to unfair competition or attempted monopoly by defendants in the principal area of operation of M & B. The undisputed material facts do not show that defendants have had a dangerous likelihood of success in the elimination of competition in M & B's area of operations since 1980. On the contrary, M & B has acquired control of a quarry site and has enjoyed increasing profits over the last four years for which proof was available through 1986. M & B did not show that it ever depended upon defendants as a significant source of sand or asphalt stone or other asphalt components, or that defendants discriminated against it in pricing products or in not affording it competitive discounts. Defendants, indeed, had no quarry or sand source in the primary area of M & B's operations -- Seneca or Sandusky County. M & B cannot reasonably **[**27]** claim the benefit of the testimony of plaintiffs' experts that defendants' alleged "excessive profits on the stone level" worked a price squeeze on M & B. The primary evidence submitted by M & B, on the other hand, was the same type of predatory pricing evidence which was relied upon by Langenderfer in its original trial against defendants and found by this court to be insufficient in *Langenderfer I, 729 F.2d 1050*, to establish a cause of action as a matter of law under *§ 2* of the Sherman Act. M & B's attorney, in his closing statement to the jury, asked for "$ 339,000 in damages for profits lost." The jury awarded M & B $ 350,000 in damages.

Under these circumstances, we must REVERSE the award pursuant to the jury verdict rendered to M & B. It follows that the award of attorneys fees and costs, based upon the judgment for M & B as a prevailing party, must also be reversed and set aside. M & B, of course, is therefore entitled to no injunctive or equitable relief.

IV. SADER CLAIM

The jury found in favor of Sader but answered specific interrogatories to the effect that there was no relevant market proved as to this plaintiff consisting of limestone, sand, or asphalt **[**28]** used in ODOT and OTC asphalt paving contracts as in the case of the other plaintiffs. The jury also answered interrogatories indicating that there was no relevant market proved as to Sader consisting of either ODOT or OTC asphalt paving contracts. The jury responded, however, that there was "a relevant geographic market or submarket for Sader," and determined that market to be the thirteen counties located in northwest Ohio. The jury found that acquisitions made by defendants were "all made to exclude &/or injure competition and increase Johnson's power," and that anticompetitive conduct caused injury to Sader in the amount of $ 250,000. In his final closing argument, Sader's attorney asked the jury for damages in the amount of $ 224,500.

Defendants argue on appeal that "Sader is neither a consumer nor a competitor in the relevant markets alleged." Defendants' Brief at 45. Gregory M. Sader, principal owner and officer of Sader since 1962, testified that he operates a small paving and excavating business (9 employees) headquartered in Bowling Green, Wood County, Ohio, located in the north central part of the thirteen-county area in controversy. Sader is not ODOT "qualified," and cannot **[**29]** bid on ODOT or OTC asphalt paving **[*1424]** contracts, although Sader does subcontracting on ODOT work. Defendants further argue that Sader failed to prove monopoly or attempted monopoly in "the markets in which Sader competes."

The brief filed on Sader's behalf responds that the issue in the case was whether "defendants' refusal to deal with Sader was for 'valid business reasons' or whether it was unreasonable anticompetitive conduct as Sader contended." Sader argues that this was properly a jury issue. Sader concedes it owned no quarry nor any asphalt plant, but asserts it depended on defendants for "stone, sand and asphalt at Bowling Green." Contending that it is irrelevant that it did not compete in the ODOT/OTC markets against defendants, Sader suggests that it was a "potential ODOT, OTC competitor that was foreclosed."

A number of factors with respect to Sader, as in the case of plaintiff M & B, would weigh strongly against any suggestion that Sader was, in reality, a potential competitor in the ODOT/OTC market. At the time Sader filed the complaint against defendants, it had been in business in the Bowling Green area for more than twenty years; by the time of trial, more than twenty-five **[**30]** years. It had never seriously sought to compete in the ODOT/OTC market which was the basis of the original monopolization complaint in this case. Sader, moreover, never indicated that it intended to compete with defendants beyond nearby Wood County, and the district court instructed the jury that Sader claimed a relevant submarket of Bowling Green, Wood County, and southern Lucas County. [8] Sader testified that his operation grew during the 1960s despite defendant Johnson's acquisition of Wood County Stone Company, his principal quarry source, in 1961. (An independent operation, Urbana, had maintained a hot mix plant at this site from which Sader acquired asphalt "product" at the time.) [9] Stone was still made available to Sader at this nearby

---

[8] Sader stated that in recent years 90 percent of his work was in Wood County and areas of nearby Lucas County. In earlier years he did work within and without the wider thirteen-county area, but again mostly in Wood County.

[9] Urbana moved this plant away at the expiration of its lease. Sader testified that its superintendent later was employed by defendants. Wood's plant and equipment were taken over by Portage in 1964 or 1965.

Portage quarry by defendants, but without the volume discount previously granted by Wood from and before 1960. (For a further discussion of Portage quarry costs and prices, see Part V, *infra*.) Sader testified that the "biggest majority" of his work was always in Wood and adjacent Lucas County (Toledo) with "emphasis" in Bowling Green. In the 1960s, defendants' OAMCO facility at Portage and their Maumee Stone site became Sader's chief suppliers, **[**31]** but not of sand. Like many other asphalt pavers, Sader trucked sand in from outside the thirteen-county area. Plaintiff MacRitchie Materials had a quarry at West Millgrove some 15 to 20 miles away from construction sites in and around Bowling Green. (Plaintiff also had a batch plant 15 miles away from Bowling Green at Waterville, and France had a quarry there and another about the same distance at Custor, the latter variously estimated at 15 to 17 miles from Bowling Green.) [10]

[32]** Sader testified that during the 1960s and 1970s, defendants began to exert pressures on him in bidding "in his area." Sader also trucked sand for the Creager Company, which was in financial difficulty when acquired by defendants in 1971. We attribute little significance to the Creager acquisition [11] **[**33]** insofar as it relates to Sader, who summarized his complaint about defendants generally by observing, "Johnson just blocked us basically from growing on a normal, healthy business way" during the late sixties and seventies. He also testified, **[*1425]** moreover, that the plaintiff experienced difficulty in scheduling delivery of materials from defendants. In 1977, Sader complained personally to Kirkby about scheduling problems: "Ted said he would look into it, and see if he could not get it straightened out" but the problem allegedly continued. [12] Sader also encountered difficulties in scheduling rental trucks at times.

Sader complained about defendants' hot asphalt prices and the fact that, as with stone, they would not give him discounts on this product. Sader also said that plans he had with others in his same situation to set up an asphalt plant were discouraged by a threat that defendants "would not be able to supply our stone needs." Sader said he "pursued the plan" but never carried it out. (Each of the four or five quarries located in or very near the boundaries of Wood County had an asphalt plant operating at the quarry -- this included the defendants' quarry at Portage.) Sader said that the planned source of stone was defendants' quarry at Maumee in Lucas County, more distant from Bowling Green than at least four other quarries which Sader characterized as not being "economically" located for his purposes. [13] He added that defendants' representatives in 1977 and 1978 were pressing for more asphalt business **[**34]** from him. He also claimed that defendants refused in 1977 or 1978 to allow him "to set up [a pugmill for a Perrysburg job] on the Lime City quarry site." Instead, he set it up at a nearby France quarry and he bought 25,000 tons of stone from France instead of defendants.

There is no doubt, however, that Sader's primary complaint, and the only one which we are persuaded has arguable merit, is its claim that it was cut off from buying materials because of cooperation with plaintiffs in pursuit of their claims at the first trial, Sader avers that at or about the time he agreed to give a deposition in that proceeding in 1979, defendants' credit representative called on him and told him he expected a check on Sader's account, and Sader agreed to pay it within a month. Sader asserts that he paid the bill of about $ 13,000, which he conceded was three months overdue. [14] Sader attributes to his 1980 testimony for plaintiffs a much lower than

---

[10] In cross-examining defendants' expert, Dr. Myslinski, Sader's counsel referred to Pugh and West Millgrove quarries as being 12 to 15 miles away from Bowling Green.

[11] Apparently, defendants continued to operate Creager after acquisition as a non-union facility in contrast to its other facilities. Sader complained this gave an advantage to defendants, but this has nothing to do with anticompetitive conduct.

[12] Sader admitted that most other "smaller pavers that worked the area was [sic] having the same problems with scheduling." Sader was thus not singled out or treated discriminatorily in that regard.

[13] Sader conceded that he bought "very little" stone from Maumee.

[14] A monthly bill on August 31, 1979 (Exhibit 9M) revealed that Sader owed Maumee Stone Co. nearly $ 47,000, a considerable part of which was at least 30 days old, and that in early September, Sader paid some $ 11,000 on this bill; Sader satisfied this account the following month, mid-October. Early in 1980, Sader's account reflected over $ 26,000 past due (up to 90 days) and he was warned, per telephone, that the "account is in serious condition and because of the status credit privileges have been removed." (Exhibit BP.) In fact, credit limits of $ 10,000 were later imposed. In 1982, credit privileges were again suspended for

expected Johnson **[**35]** bid on a Bowling Green job which he subsequently lost. (He also claims that Johnson improperly used information he gave to them on this job to underbid him, Sader understanding at the time that Johnson would not bid on this job.)

[36]** Later, in 1980, Johnson "made special credit arrangements" for Sader, limiting his credit to $ 10,000 because Sader was persistently "slow pay." It was during this time that another dispute about credit arose between Sader and defendants. Sader also had been severely restricted in credit extended during 1982. Sader's version of a major dispute is that defendants furnished him defective asphalt for a large private driveway Sader installed and that the customer balked at paying him for the job. Defendants denied that the asphalt was defective and suggested testing the contested product. Sader held up any payment on his total account despite the fact that the driveway job in dispute involved only approximately $ 4,000. A lawsuit in an Ohio state court developed over this controversy, and Sader finally paid the $ 4,000 **[*1426]** pursuant to a court order. Indeed, defendants employed lawyers in three different locations to handle commercial disputes and collections with Sader since 1980.

There is abundant, uncontroverted evidence in written communications from defendants to Sader that his accounts were consistently overdue in the 1979 to 1983 period, and that from time to time credit privileges during **[**37]** this period were withdrawn by defendants. During the same period, evidence reflects that France also suspended credit privileges for Sader in 1980 after numerous warnings; that American Asphalt products in Sylvania, Ohio, turned the Sader account over to attorneys for collection (again, after numerous warnings concerning an account of $ 2,200 in 1983); that an insurance agency was forced to threaten suit against Sader in early 1984 to collect an insurance account exceeding $ 15,000 more than 120 days delinquent. Many other witnesses testified that Sader was slow or delinquent in payment of its accounts during the period, although their companies did not cut him off. There is also clear evidence that defendants, during the relevant period, placed other of its customers, whose credit or financial condition was doubtful, on a cash basis for sale of its products. In short, the record establishes that a number of other persons with a contractual relationship with Sader had serious problems with Sader's failure to pay its accounts and either threatened or litigated with Sader concerning a past due balance, and that defendants cut off credit to others in similar "slow pay" circumstances.

[38]** It appears clear in this case that the problems between Sader and defendant in the relevant period arose out of commercial and credit controversies and did not arise in an anti-trust context. That Sader may have been forced in some instances by credit restrictions to obtain asphalt materials from a source 15 to 17 miles further away than a defendant source is not a sufficient basis for this *§ 2* Sherman Act claim.

In overruling defendants' motion j.n.o.v. following the verdict for Sader, the district court cited *Byars v. Bluff City News Co., Inc., 609 F.2d 843 (6th Cir. 1979)*, as authority. *Byars* is pertinent only with respect to its discussion of refusal to deal by a monopolist. *Id. at 854*. It was uncontroverted in that case that defendant Bluff City refused to deal on any basis with Byars, a competitor in the concededly relevant Memphis area market, in "primary life" magazines and periodicals. *Byars* recognized ***HN6***[] the general rule -- "there exists no duty to deal, so long as the determination is made unilaterally." *Id.* Furthermore, "even the use of unfair business practices as part of the termination may not invoke sanction under the antitrust laws." *Id. at 855*. **[**39]** A monopolist, however, may be held to different standards, *Id. at 855*, citing *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 71 L. Ed. 684, 47 S. Ct. 400 (1927)*, where Kodak provided no "independent business reason for its refusal to deal" and "Kodak had monopoly power over the national wholesale market." In *Byars*, we concluded that a refusal to deal practice should be condemned only if it is "unreasonably anticompetitive." *609 F.2d at 860*. Even a "refusal to deal designed to accomplish vertical integration, without more, should not be a basis for imposing liability" upon a purported monopolist. *Id. at 861*. We observed further that courts should examine business reasons for a refusal to deal, and "must give them some leeway in making business decisions." *Id. at 862*.

Sader's brief not only cites *Eastman Kodak Co., supra*, and *Byars*, but also *Riverview Investments v. Ottawa Community Improvement Corp., 769 F.2d 324, 328* (6th Cir.) ("what matters is that freedom to compete is restrained"), *revised*, *774 F.2d 162 (6th Cir. 1985)*. We do not construe *Riverview Investments*, a combination or

delinquent accounts. In March of 1980, by notice, France also advised Sader that its "account is seriously overdue," and his credit privileges were apparently withdrawn at a France quarry.

security case, as pertinent to the refusal to deal aspect of this case. **[**40]** *Kerasotes Michigan Theatres v. National Amusements, Inc., 854 F.2d 135 (6th Cir. 1988)*, also cited by Sader, was principally concerned with "leveraging" or misuse of monopoly power in one market to exclude a competitor from another market. We deem *Kerasotes* to have minimal relevance to Sader's claims. *United States v. Griffith, 334 U.S. 100, 92 L. Ed. 1236, 68* ***[*1427]*** *S. Ct. 941 (1948)*, mentioned by Sader in a footnote, is also, like *Kerasotes*, a theater and film case concerned with defendants who pooled their powers to exclude others from obtaining films for exhibition. None of these authorities is helpful to Sader here.

We conclude from a careful examination of the record in this case that there is insufficient evidence to sustain Sader's charge that defendants began to press him on payment of his past due account only when he agreed to give a deposition in this case in 1979 to Langenderfer. [15] We conclude also that there is insufficient evidence to support an antitrust claim of tying defendants' imposition of limits and restraints upon Sader's credit during 1980 through 1983 to his part in Langenderfer's suit. Essentially, it seems clear that defendants and Sader were engaged in a series of commercial **[**41]** disputes concerning his accounts, scheduling of pick-ups at defendants' facilities, and whether or not defendants were carrying out alleged credit understandings with Sader. The claim of refusal to deal is inextricably bound with the commercial and contract disputes between the parties, and was not proven to be a practice related to antitrust conduct.

There was, moreover, similar to the M & B situation already considered, a failure by Sader to prove a relevant market in which Sader established the necessary essentials, including causation, under a *§ 2* Sherman Act claim. The physical location of alternative **[**42]** sources of stone and asphalt and other asphalt components to Sader's basic operations in Wood County and immediately adjacent areas might alone preclude any recovery of damages for antitrust injury in this case by Sader. There was also evidence of a number of competitors in the area. ***HN7***[] "The *§ 2* market definition looks to the existence of competitors as evidence of countervailing power which would preclude monopolization." *Columbia Metal Culvert Co., Inc. v. Kaiser Aluminum, 579 F.2d 20, 27 n.11* (3rd Cir.), *cert. denied*, *439 U.S. 876, 58 L. Ed. 2d 190, 99 S. Ct. 214 (1978)*. This plaintiff has essentially relied upon contentions of predatory or unfair low bidding by defendants on jobs in which he was interested, a basis we determined in *Langenderfer I* to be insufficient to support a damages claim for antitrust injury absent a showing that defendants' bids were below their total average costs.

There is insufficient proof in this record to show that defendants had a monopoly position, attempted a monopoly and had a dangerous probability of success in this regard, in the limited non-OTC, non-ODOT market in which Sader was involved. The vast weight of proof submitted by plaintiffs, upon which their experts relied, **[**43]** bore upon defendants' OTC and ODOT market share in a thirteen-county area. Sader was not a party who realistically competed in that market.

We are not satisfied from the proof adduced, after careful examination of the record, even if we assume the jury found that defendants cut Sader off from supplies at Portage in 1983 when suit was filed, that Sader established that this action was effected by an actual monopolist or one that threatened a realistic danger in the area of Sader's business activity in a relevant market. [16]

> ***HN8***[] The ultimate inquiry in any attempted monopolization case remains whether the defendant has or reasonably might come close to having the ability to control total market output and prices.

---

[15] Sader, upon cross examination, stated that he did not believe that his credit had been suspended in 1979 or 1980 when his deposition was taken and the first trial took place. He added that he would not have a problem if defendants "treated me like they treated everybody else" in credit matters. He conceded, however, that he had credit problems with defendants as early as 1978 and that this continued into 1983.

[16] Being "cut off" meant essentially that Sader was required to pay cash rather than rely on credit for certain periods of time. Sader was placed on a "permanent job basis" by defendants, after a number of revocations and reinstatements of credit, in August 1983.

Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1414 (7th Cir. 1989).

[44]** **[*1428]** Defendants may be held liable to Sader only if proven to have refused to deal with him for anticompetitive reasons as a monopolist or attempted monopolist in some established relevant market. Without objection by plaintiffs the district court instructed the jury that plaintiffs claimed the existence of three "appropriate relevant product markets" -- stone, sand, and asphalt -- "used on ODOT and OTC paving contracts" and "bidding on a performance of paving contracts awarded to prime contractors by ODOT and OTC." None of these claimed relevant markets were proved with respect to the defendants as to the limited geographic area in which Sader was operating, and certainly not so with respect to monopolization as to sand and stone. No reasonable jury could find, on the evidence presented, that Sader was "cut off" at Portage or that defendants refused to sell stone to Sader based on an attempted monopoly.

We observe similarities between this case and *Trace X Chemical v. Canadian Industries, 738 F.2d 261 (8th Cir. 1984)*, *cert. denied*, *469 U.S. 1160, 83 L. Ed. 2d 925, 105 S. Ct. 911 (1985)*. Plaintiff Trace X, like Sader, claimed that defendant had misused monopoly power to refuse to deal with it and had refused it **[**45]** credit.

> On the basis of the evidence presented, CIL's refusal to extend credit did not amount to unreasonable anti-competitive conduct, but rather constituted a valid exercise of business judgment. It is certainly not conduct that is "possible or effective only if taken by a firm that dominates its smaller rivals." *Berkey Photo* [*Co., Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)]* at 275.
>
> In support of its claim of anti-competitive conduct, Trace X argues that CIL threatened to discontinue supplying it with TNT unless Trace X paid for the $ 160,000 worth of TNT received but not paid for by Trace X. However, ***HN9***[] terminating or threatening to terminate deliveries to a purchaser who refuses to provide full payment is not predatory or unlawful anti-competitive conduct. *Fairdale Farms, Inc. v. Yankee Milk, Inc., 715 F.2d 30, 34 (2d Cir. 1983)*, *cert. denied*, *464 U.S. 1043, 104 S. Ct. 711, 79 L. Ed. 2d 174 (1984)*.
>
> This case does not involve a refusal to deal. CIL was willing to continue to supply Trace X with TNT; it merely refused to deal with Trace X on other than a cash basis. "*Section 2* of the Sherman Act does not give purchasers the exclusive right to dictate the terms **[**46]** on which they will deal," *Fairdale Farms, 715 F.2d at 34*, nor does it require a monopolist to accede to every demand of its competitors or customers. *Glen Eden Hospital v. Blue Cross & Blue Shield, 555 F. Supp. 337, 345 (E.D. Mich. 1983)*.

738 F.2d at 266-67 (footnote and citations omitted).

As did the defendant in *Trace X*, defendants here merely insisted on current payment and exercised "business judgment" and insisted on a "cash basis" method of doing business. As did the Eighth Circuit in *Trace X*, we likewise reverse the jury verdict rendered for Sader, and we note also that some evidence of anticompetitive conduct was present in *Trace X*.

For all these reasons then, (1) failure of proof concerning a relevant market and reasonably consequential damages; (2) failure to show defendants' monopoly position in asphalt, stone or sand in the principal area of Sader's operations during the period in question; (3) because the essential character of Sader's charges was related to ordinary commercial disputes rather than anticompetitive conduct; and (4) because a principal basis of Sader's proof of anticompetitive conduct was on predatory bid pricing, we must REVERSE **[**47]** and set aside the verdict for Sader. It again follows that the award of attorney fees and costs, based upon services rendered to Sader, must be reversed as well. Sader is entitled to no injunctive relief.

V. *MacRITCHIE MATERIALS, INC. CLAIM*

The plaintiffs' amended complaint sets out that MacRitchie has offices in West Millgrove where it operates a limestone quarry "which supplies stone and **[*1429]** sand to Langenderfer, NOAP and other asphalt producers." Members of the "MacRitchie family" are "principal shareholders" of Langenderfer, NOAP, and MacRitchie. Plaintiffs' exhibit 1 shows its quarry, and the adjacent asphalt plant operated by Langenderfer or NOAP. MacRitchie's claim was not considered in the first trial pursued by Langenderfer and NOAP. Defendants never bought stone or sand from MacRitchie, which claims injury and loss by reason of defendants' claimed monopolistic practices, which caused it to lose business and sales to related plaintiffs and others.

Defendants assert that they do not possess monopoly power in limestone as a matter of law because of their market share of stone in the thirteen-county market. They also respond to MacRitchie's claim by contending that it is a claim **[**48]** of "indirect and remote" injury not caused by its conduct, even if that conduct were deemed to be anticompetitive. Finally, defendants assert that MacRitchie's claim is speculative and "unsupported by the testimony."

We note at the outset that the MacRitchie quarry is situated nearer, or as near, to southeastern Wood County, to Seneca County, to Wyandot County, to eastern Hancock County, and to southern Sandusky County, than any of defendants' quarries. The entire southeast quarter of the thirteen-county area is better served by MacRitchie's quarry, or by independent stone producers including France, the largest limestone operation in the entire relevant market claimed by plaintiffs, than by defendants' quarries. Defendants' nearest operating quarry, at Portage, also in Wood County, was located about ten miles northwest of MacRitchie's West Millgrove quarry. From 1971 through 1975, Portage had the highest comparative quarry costs of all of defendants' quarries, and only defendants' Rocky Ridge quarry exceeded its costs in 1976. Portage's average cost of stone was the highest of defendants' quarries analyzed by plaintiffs from 1982 to 1985. [17] Consistently throughout the 1981 to 1985 **[**49]** period, Portage and Rocky Ridge, defendants' nearest quarries to MacRitchie's, had the lowest gross margins of profit of defendants' quarries analyzed by plaintiffs, measured by the difference between average price and cost per ton. Defendants suffered by far their lowest operating income (measured by percent of pretax income from their quarry operations) from 1980 through 1982. Defendants' after-tax return on net worth based on stone operations was considerably reduced from 1980 through 1983, but returned to more normal levels in 1984 and 1985. MacRitchie, then, had every opportunity to be competitive with defendants in its quarry and limestone operations.

It is evident from the analysis of this data that defendants' quarry at Portage, the one which serves as the nearest competitor to MacRitchie's quarry, has relatively high costs of **[**50]** production and is less profitable than other quarries operated by defendants. It is also evident that MacRitchie's geographic location is superior to that of any of defendants' quarries in much of the southeast quadrant of the relevant market area. There are a number of highway asphalt pavement competitors located within twenty or twenty-five miles of MacRitchie's quarry.

An examination of limestone production of defendants and others within the thirteen-county relevant market area, including MacRitchie, from 1979 to 1986 was made by plaintiffs (exhibit 21A) and indicates as follows (in millions of tons):

DEFENDANTS	**1979**	**1980**	**1981**	**1982**	**1983**	**1984**	**1985**	**TOTAL**
Defendants	2.116	2.310	1.592	1.384	.982	1.136	1.159	10.679
France	3.515	2.849	2.164	1.502	2.513	2.334	2.602	17.479
Nat'l Lime	1.033	.857	.734	.739	.719	.899	1.076	6.057
Basic	.349	.305	.156	.157	.063	--	--	1.030
MacRitchie	.187	.232	.103	.111	.159	.126	.172	1.090
Others	2.222	1.702	1.301	.836	1.647	1.094	1.205	9.007

[17] Rocky Ridge quarry, owned by defendants, slightly exceeded Portage's costs in 1983. Portage reflected no cost data in 1984, and its costs exceeded its average sales price in 1982.

DEFENDANTS	1979	1980	1981	1982	1983	1984	1985	TOTAL
13 County

TOTAL:	10.237	8.821	6.345	5.006	5.531	6.171	6.576	48.687

Plaintiffs' exhibit 21A.

[51]** **[*1430]** Michigan Stone is located outside the thirteen-county area in Michigan. Plaintiffs assert that because much of its production goes into the thirteen-county relevant market area, it should be considered as defendants' facility within the area. The percentage of road material furnished to the total market by defendants, by France, and by others (including MacRitchie) is reflected below. The figures in parentheses are arrived at by computing Michigan Stone's production into defendants' (and the market's) total:

YEAR:	DEFENDANTS:	FRANCE:	OTHERS*
1979	22.5% (28.6%)	37.3% (34.3%)	40.2%
1980	28.0% (32.6%)	34.5% (32.3%)	37.5%
1981	26.3% (29.7%)	35.8% (34.1%)	37.9%
1982	29.3% (33.2%)	31.8% (30.0%)	39.0%
1983	19.3% (25.9%)	49.4% (45.4%)	31.2%
1984	20.3% (27.8%)	41.8% (37.8%)	37.9%
1985	18.7% (23.1%)	41.9% (39.6%)	39.5%
Avg. 7 yrs.	23.6% (28.8%)	38.5% (35.9%)	38.0%

* Because all percentage figures have been rounded off to the nearest tenth, the figures across each row may not equal exactly 100 percent.

[52]** We doubt that it is proper for statistical purposes to include Michigan Stone's production/sales to the thirteen-county area, as is contended by plaintiffs. The more appropriate data would be the production of defendants' quarries in northwest Ohio, not including the Michigan facility. Including Michigan Stone's production, but excluding any other producers outside the thirteen-county area, skews the statistics in plaintiffs' favor.

The data reflects that after acquisition of all its quarries in the thirteen-county area, the last of which occurred in 1970, defendants from 1979 to 1985 (the period in which MacRitchie is involved as a plaintiff) controlled, on the average, 23.6 percent of the road material limestone in the relevant market alleged by plaintiffs. From 1983 through 1985, defendants controlled less than 20 percent. France, the largest factor in the road material limestone market, controlled, on the average, nearly 36 percent of the market between 1979 and 1985. In the last three years of that period, France controlled, on the average, 44.4 percent of the market. Even if we include the production of Michigan Stone with the defendants' Ohio quarries for purposes of calculating **[**53]** defendants' market share, we find that defendants averaged less than 29 percent of the applicable highway limestone during the 1979-1985 period while France averaged about 36 percent. It may be readily observed that during the latter part of the seven year period, reflected in the table, defendants' share of the total limestone market decreased, particularly in comparison to France's share.

[*1431] The limestone market share of defendants was, at most, around thirty percent and decreasing. Plaintiffs have cited no authority indicating that this meets Sherman Act *§ 2* requirements. There is no substantial evidence that defendants were capable of, much less achieved, the destruction of competition in limestone in any relevant market.

> *HN10*[] To prove its claim of attempted monopolization, [plaintiff] has to prove that [defendant] had engaged in anticompetitive conduct with the specific intent to monopolize and that the attempt had a dangerous probability of success. *United States v. Dairymen, Inc., 660 F.2d 192, 194 (6th Cir. 1981)*.
>
> *HN11*[] Anticompetitive conduct is conduct designed to destroy competition, not just to eliminate a competitor. Lively legal competition will result in the efficient and shrewd **[**54]** businessman routing the inefficient and imprudent from the field. The antitrust laws must be administered in such a way that they do not restrain such vigorous competition in order to protect inefficient competitors. As Judge Learned Hand has pointed out, "The successful competitor, having been urged to compete, must not be turned upon when he wins." *United States v. Aluminum Company of America, 148 F.2d 416, 430 (2d Cir. 1945)*. Merely to attempt to succeed in business is not anticompetitive conduct.

Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 823 (6th Cir. 1982).

In *Richter*, we considered market share and "dangerous probability of success" in attempted monopolization, observing:

> *HN12*[] The third element of attempted monopolization is a dangerous probability of success. The greater a firm's market power the greater the probability of successful monopolization. In order to be found liable for attempted monopolization, a firm must possess market strength that approaches monopoly power -- *the ability to control prices and exclude competition*.
>
> Market strength is often indicated by market share. During the relevant period, [defendant]'s market share declined **[**55]** from approximately 40% to approximately 30%. Given the facts of the case, such a share is not sufficient to establish [defendant]'s capacity to monopolize. *See* *United States v. Empire Gas Corp., 537 F.2d 296 (8th Cir. 1976)*, *cert. denied*, *429 U.S. 1122, 97 S. Ct. 1158, 51 L. Ed. 2d 572 (1977)* (50% market share does not establish dangerous probability of success); *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 102 S. Ct. 1277, 71 L. Ed. 2d 461 (1982)* (30% market share is not enough). The fact that [defendant's] share of the market was declining also belies whatever inference of capacity to monopolize that may be drawn from the size of its market share. *Forro Precision, Inc. v. International Business Machines Corp., 673 F.2d 1045, 1058 (9th Cir. 1982)*; *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 271 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 102 S. Ct. 1277, 71 L. Ed. 2d 461 (1982)*; *Nifty Foods Corp. v. Great Atlantic & Pacific Tea Co., 614 F.2d 832, 841 (2d Cir. 1980)*.

691 F.2d at 826 (emphasis added).

"Dangerous probability of success" is but one of the elements of a Sherman Act *§ 2* claim that must be proved by **[**56]** MacRitchie in order to succeed:

> *HN13*[] The offense of attempt to monopolize (Sherman Act *§ 2*) is composed of the following elements:
> 1. Specific intent to monopolize;
> 2. Anti-competitive conduct;
> 3. A dangerous probability of success.
>
> *Lorain Journal Co. v. United States, 342 U.S. 143, 153, 72 S. Ct. 181, 186, 96 L. Ed. 162 (1951)*. *Accord,* *Richter Concrete Corp. v. Hilltop Concrete Corp., supra, 691 F.2d at 823*; *United States v. Dairymen, Inc., supra, 660 F.2d at 194*; *Northeastern Telephone Co. v. American Tel. & Tel., 651 F.2d 76, 85 (2d Cir. 1981)*. *HN14*[] Monopolization is the market power to control prices or exclude competition. *United States v. Griffith, 334 U.S. 100, 107, **[*1432]** 68 S. Ct. 941, 945, 92 L. Ed. 1236 (1948)*. Specific intent to monopolize may be inferred from evidence of anticompetitive conduct, *Lorain Journal, supra*, but not from legitimate business

> practices aimed only at succeeding in competition. *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 626, 73 S. Ct. 872, 889, 97 L. Ed. 1277 (1953)*.

White & White, Inc. v. American Hosp. Supply Corp., 723 F.2d 495, 506-07 (6th Cir. 1983).

We reversed as "untenable" the district court's holding in **[**57]** *White & White* that a 25 percent market share [18] coupled with a finding of "leverage" and "link" practices satisfied the "dangerous probability of success" requirement. *Id. at 508* (citing *Richter Concrete, supra*, and *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 102 S. Ct. 1277, 71 L. Ed. 2d 461 (1982))*.

Other courts have reached the same result as in *Richter* and *White & White* in situations where a defendant charged with a Sherman Act violation had market shares larger than defendants have in this case (with respect to limestone). In *United States v. Empire Gas Corp., 537 F.2d 296 (8th Cir. 1976)*, *cert. denied*, *429 U.S. 1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 (1977)*, a 47 percent-50 percent share in LP gas in a relevant market was held to be insufficient. In *Lektro-Vend*, a 30 percent or more market share was found insufficient as a matter of law. In *Nifty Foods **[**58]** Corp. v. Great Atlantic & Pacific Tea Co., 614 F.2d 832 (2d Cir. 1980)*, a market share range of from 54.5 percent to 33 percent was determined to be insufficient. Similarly, in *Levitch v. Columbia Broadcasting System, 495 F. Supp. 649 (S.D.N.Y. 1980)*, a 33 percent maximum market share was held insufficient. Judgment for the defendant, which had a 34-38 percent market share, charged with anticompetitive conduct and antitrust violations, was affirmed because there was no dangerous probability of success of monopolization in *Shoppin' Bag of Pueblo v. Dillon Companies, 783 F.2d 159 (10th Cir. 1986)*. Even when plaintiff asserted that an alleged *§ 2* antitrust violator possessed a 65 percent market share, the court in *Hunt-Wesson Foods v. Ragu Foods, Inc., 627 F.2d 919, 926 (9th Cir. 1980)*, *cert. denied*, *450 U.S. 921, 67 L. Ed. 2d 348, 101 S. Ct. 1369 (1981)*, found only that "this may provide a basis for inferring that Ragu possessed monopoly power . . . [and] sufficient to withstand a motion to dismiss."

We adhere to the views of Areeda & Hovenkamp, ***Antitrust Law***, § 519.3 (1989 Supp.) that it would be rare indeed to find that a firm with only 25 percent or 50 percent of the market could control price **[**59]** over any significant period. "The monopolization offense is concerned with single firm conduct maintaining or expanding the economic power of a firm that is already a monopolist." *Id.*

There was no allegation by plaintiffs, no contention made, that defendants conspired with France with respect to monopolizing or attempting to monopolize the limestone market. Nor could there have been, since the evidence was that these entities were in direct competition, and the record showed that France was acquiring a greater market share during the later years despite defendants' acquisitions of quarries in the 1960s.

Plaintiffs introduced evidence at trial that combined the market shares of defendants and France, ostensibly in order to demonstrate market structure. Plaintiffs cite no authority in support of their theory and contention that they may combine the larger independent competitor France's limestone market share with defendants' share in order to establish the dangerous probability of success requirement. The fact that the prices and discount practices of these two substantial competitors may be similar is not evidence that they acted in conspiracy or concert to exclude competition, **[**60]** to control prices, or to commit unlawful anticompetitive practices. The testimony of plaintiffs' experts about anticompetitive **[*1433]** conduct of defendants was mistakenly based upon their assumption that the shares of France and defendants should be taken as combined.

MacRitchie is faced with a perplexing dilemma in that its claim is somewhat at odds with the claims of its fellow plaintiffs. While the other plaintiffs complained of Johnson's low bids on paving jobs, they also complained that

---

[18] Defendants in *White & White* were found to have a market share in various markets of as much as 45 percent and over 30 percent in others.

Johnson charged them supracompetitive prices for component materials. If this were the case, it would seem to accrue to MacRitchie's advantage as a limestone supplier, rather than to its detriment. Furthermore, as noted, evidence regarding the limestone market fails to demonstrate that Johnson possessed power over prices. Defendant quarries, for instance, granted prompt pay discounts, as did France, but plaintiffs' quarries, a profit resource, did not. MacRitchie bought nothing from defendants and apparently matched the limestone prices at Portage, except as to discount policies which differed. As to the number of limestone quarries for road and highway operators in the relevant area, Burton MacRitchie **[**61]** conceded in his testimony that there were twenty or more quarries and half that many competitors furnishing limestone for roads and highways in the relevant market area, including France and Martin Marietta Corporation. [19] According to Burton MacRitchie (principal officer of MacRitchie), "Portage and our quarry are quite similar in price."

As pointed out in *Indiana Grocery, Inc. v. Super Valu Stores, 864 F.2d 1409, 1413 (7th Cir. 1989)*, *§ 2* ***HN15***[] is directed to single firm conduct, whereas *§ 1* deals with concerted action and proscribes unreasonable restraints **[**62]** through combinations or conspiracies. See *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*, for a discussion of the basic distinction between the two:

> The conduct of a single firm is governed by *§ 2* alone and is unlawful only when it threatens actual monopolization. It is not enough that a single firm appears to "restrain trade" unreasonably, for even a vigorous competitor may leave that impression. For instance, an efficient firm may capture unsatisfied customers from an inefficient rival, whose own ability to compete may suffer as a result. This is the rule of the marketplace and is precisely the sort of competition that promotes the consumer interests that the Sherman Act aims to foster. In part because it is sometimes difficult to distinguish robust competition from conduct with long-run anticompetitive effects, Congress authorized Sherman Act scrutiny of single firms only when they pose a danger of monopolization. Judging unilateral conduct in this manner reduces the risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur.

Id. at 767-68 (footnotes omitted). "Concerted activity subject to *§ 1* is judged more **[**63]** sternly than unilateral activity under *§ 2*." *Id. at 758*.

> ***HN16***[] The officers of a single firm are not separate economic actors pursuing separate economic interests, so agreements among them do not suddenly bring together economic power that was previously pursuing divergent goals. Coordination within a firm is as likely to result from an effort to compete as from an effort to stifle competition. In the marketplace, such coordination may be necessary if a business enterprise is to compete effectively.

Id. at 769. Nor can activities of and between defendant entities be deemed anything but unilateral conduct, not concerted conduct for purposes of the Sherman Act analysis.

It is not necessary for us to rule on whether MacRitchie's claim for indirect **[*1434]** damages gives it standing within the allowable parameters of *Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079 (6th Cir. 1983)*, or *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*. It is sufficient for us to note that it is doubtful that MacRitchie has such standing. We note further that during the relevant period, MacRitchie's market share in limestone increased rather than decreased in comparison to that of the defendants. We **[**64]** conclude

---

[19] Martin Marietta was described in an antitrust suit by a sand and gravel operator which dealt in coarse gravel or stone used in construction of roads as "a large, diversified company with holdings in various fields including the production of sand and gravel (aggregates). It has aggregates holdings in fifteen states. . . ." *Chillicothe Sand & Gravel v. Martin Marietta Corp., 615 F.2d 427, 428 (7th Cir. 1980)*. France is owned by Koppers Corp., a large conglomerate.

that MacRitchie has failed to prove that defendants' limestone production share of the relevant market is sufficient, as a matter of law, to constitute a dangerous probability of monopolization. *See* *United States v. Syufy Enterprises, 903 F.2d 659 (9th Cir. 1990)*.

In summary, we conclude that MacRitchie has failed to establish his claim against defendants under the Sherman Act. MacRitchie has stated in its brief that "defendants' control of stone, sand and asphalt gave them power over asphalt paving in all markets." MacRitchie has proven no control by defendants over sand in any market; it has proven no dangerous probability of success of monopoly by defendants in road limestone in any relevant market, and MacRitchie's claim of injury by reason of defendants' power over asphalt paving is an indirect claim at best, and must fall by reason of the failure to demonstrate requisite monopoly control by defendants over asphalt paving components. MacRitchie is a competitor of defendants only in limestone for roads and highways, and there is a failure of proof of defendants' monopoly power in this respect. There is no basis in law for attributing France's limestone market share **[**65]** and power to defendants.

For these reasons we must also REVERSE the award pursuant to the jury verdict rendered to MacRitchie. [20] It follows that the award of attorney fees and costs made on behalf of MacRitchie must also be set aside, and that MacRitchie is not entitled to equitable relief.

VI. NOAP CLAIM

In the amended complaint NOAP sets out that it is a separate Ohio corporation with offices in West Millgrove, Ohio, the same address of Langenderfer and MacRitchie. It was "engaged in the business of purchasing sand and stone . . . called 'highway construction materials,' mixing asphaltic concrete . . . and selling the materials and asphaltic concrete to plaintiff Langenderfer" and others. NOAP differs from MacRitchie in that it had no quarry but purchased stone, as well as sand, and resold them **[**66]** after mixing into "asphaltic" materials for road and highway construction. For reasons stated with respect to MacRitchie in part V, we reiterate that plaintiffs have failed to prove that defendants have monopolized or achieved a dangerous probability of success in attempting to monopolize the quarrying, stone, or sand markets in the relevant thirteen-county market area since 1979. For the same reasons stated in part V, NOAP has proved no claim since that date due to defendants' quarrying and sand operations. NOAP is thus entitled to no damages due to these operations for this period of time because of a failure to prove the requisites of a *§ 2* Sherman Act claim, due primarily to the lack of the required market share of defendants in the relevant market.

We conclude, in short, that defendants have not been shown to have the power at any relevant time to *control* prices or exclude competition in the sand and stone markets. *United States v. duPont, 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; *Southaven Land Co. v. Malone & Hyde, 715 F.2d 1079, 1087 n.10 (6th Cir. 1983)*.

Through 1978, NOAP had four hot-mix plants in the relevant northwest Ohio area as noted in *Langenderfer I*, and we consider the claims **[**67]** of NOAP as an asphalt producer separately from the claims of monopoly or attempted monopoly in stone and sand production.

[*1435] Paragraph 18 of the amended complaint charges that defendants "overcharged [plaintiff] for highway production materials from 1980 through 1985" (when the amended complaint was filed), and will in the future. We conclude that the claim for overcharging for stone and sand must fail for the reasons stated. Stone prices of the defendants were generally consistent with the prices of the largest producer, France, and with plaintiff MacRitchie's prices at its quarry at West Millgrove.

Plaintiffs' exhibit No. 144 reflects the following data for the "concrete and road metal" market, 1974-1978, presumably including Michigan Stone's production:

[20] In closing argument, MacRitchie's attorney claimed basic damages of approximately $ 188,745 for MacRitchie; the jury awarded $ 200,000. As of March 31, 1985, MacRitchie had an accumulated deficit of $ 560,000.

YEAR:	DEFENDANTS:	FRANCE:	OTHERS:
1974	24%	24%	52%
1975	25%	22%	53%
1976	28%	32%	40%
1977	24%	32%	44%
1978	28%	29%	43%

(That same exhibit shows defendants' share **[**68]** of total quarry production for these years to be 17%, 18%, 19%, 18% and 19%, respectively).

It is clear from this data furnished by plaintiffs, even if Michigan Stone's production is included as applicable to the Ohio relevant market (which we conclude distorts the actual relevant market share allocations), that defendants come nowhere near as dominant a market position in stone prior to 1979 as in the years following 1979. This data indicates no dangerous probability of success for any attempted monopolization in this particular area of stone production. With respect to sand production for any pertinent year, plaintiffs have failed in their effort to establish a *§ 1* or *§ 2* claim against defendants. To the extent, then, that NOAP's claim of anticompetitive unlawful conduct is based upon monopolization or attempted monopolization of stone and sand, it must fall. There is, again, no basis for combining defendants' stone production or market share of "concrete and road metal" from their quarries with that of their principal competitor, France. Plaintiffs have alleged no conspiracy between defendants and France and merely point to a similarity of prices for quarries that are in the same **[**69]** general area. NOAP has always had available to it, moreover, the stone quarry at West Millgrove, which is nearer a three or four county area within the northwest Ohio relevant market claimed by plaintiffs than any quarry of defendants. [21]

Burton MacRitchie, chief operating officer of both NOAP and Langenderfer, testified that in 1976 he considered that there were eight major paving competitors in the relevant market area. [22] **[**71]** NOAP claimed that it occasionally received discounts on stone bought from quarries later acquired by defendants, but never received such discounts **[**70]** after defendants acquired them. However, MacRitchie conceded that "the prices did not make a drastic change" after the acquisitions. Neither France nor defendants allowed volume discounts but did give prompt pay discounts. Plaintiffs' discount policy was apparently just the opposite. When defendants acquired a sand facility, the same discount price policy applied. [23] **[*1436]** Plaintiffs contend that Union Quarries at Scott should be included in the thirteen-county relevant market area, although they are on the boundary line or just south of the line at the southeast edge. Production figures from this operation of defendants at Scott have been included in plaintiffs' statistical data. Ninety percent of stone purchased by NOAP and/or Langenderfer came from France or independents during the 1970s, and plaintiffs paid "board price" at France as well as at defendants' quarries.

In any event, accepting plaintiffs' proof (and some is distorted, as indicated), defendants' market share of stone before 1979 was insufficient to show a Sherman Act violation. In *Cargill, Inc. v. Monfort of Colorado, 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*, the Supreme Court discussed a similar market share ratio possessed by Excel, a party in that proceeding:

> According to Monfort's expert witness, however, Excel's postmerger share of market capacity would be only 28.4%. . . . Thus Excel acting alone would clearly lack sufficient capacity after the merger to satisfy all or most

---

[21] Burton MacRitchie testified that his company, NOAP, and/or other MacRitchie family enterprises, operated an asphalt batch plant at the West Millgrove quarry from 1960 to 1980. He purchased stone and manufactured sand from France. He testified that he only occasionally obtained sand from defendants. Mr. MacRitchie testified also that MATCO was to the S.E. Johnson Co. as NOAP was to Langenderfer, both producing asphalt utilized by their paving companies.

[22] Burton MacRitchie conceded that there were a number of independent sand producers in Wyandot County serving the south and east part of the relevant market area and others in Indiana and Michigan serving the western and northern portions.

[23] France apparently allowed discounts on stone prior to 1972. France's prices and those charged by independent quarries were different. Independent quarries sometimes gave a volume discount.

> of the demand . . . . With only a 28.4% share of market capacity and lacking a plan to collude, Excel would harm only itself by embarking on a sustained campaign of predatory pricing.

Id. at 120 n.15.

Cargill referred to a definition of predatory pricing set out in *Langenderfer I*, and made reference to Areeda & Turner, *Williamson* **[**72]** *on Predatory Pricing: A Strategic and Welfare Analysis*, 87 Yale L.J. 1337, 1348 (1978), suggesting that even a 60 percent share would not be enough. *Cargill, 479 U.S. at 119 n.15*. The Court discussed predatory pricing allegations further:

> ***HN17***[] Claims of threatened injury from predatory pricing must, of course, be evaluated with care. As we discussed in *Matsushita Electric Industrial Co. v. Zenith Radio Corp., [475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)]*, the likelihood that predatory pricing will benefit the predator is "inherently uncertain: the short-run loss [from pricing below cost] is definite, but the long-run gain depends on successfully neutralizing the competition . . . [and] on maintaining monopoly power for long enough both to recoup the predator's losses and to harvest some additional gain." *475 U.S. at 589*. Although the commentators disagree as to whether it is ever rational for a firm to engage in such conduct, it is plain that the obstacles to the successful execution of a strategy of predation are manifold, and that the disincentives to engage in such a strategy are accordingly numerous. *See, e.g., id. at 588-593* (discussing obstacles to successful predatory pricing conspiracy); R. Bork, The Antitrust Paradox **[**73]** 144-159 (1978); McGee, Predatory Pricing Revisited, 23 J. Law & Econ., at 291-300; Posner, The Chicago School of Antitrust Analysis, 117 U. Pa. L. Rev. 925, 939-940 (1979). As we stated in *Matsushita* "predatory pricing schemes are rarely tried, and even more rarely successful." *475 U.S., at 589*. Moreover, the mechanism by which a firm engages in predatory pricing -- lowering prices -- is the same mechanism by which a firm stimulates competition; because "cutting prices in order to increase business often is the very essence of competition . . . [;] mistaken inferences . . . are especially costly, because they chill the very conduct the antitrust laws are designed to protect." *Id., at 594*.

Id. at 121 n.17 (discussing § 16 of the Clayton Act).

In *Cargill*, the Court also discussed vigorous competition brought about by merger in a challenge by a smaller competitor:

> *Brunswick* holds that ***HN18***[] the antitrust laws do not require the courts to protect small businesses from the loss of profits due to continued competition, but only against **[*1437]** the loss of profits from practices forbidden by the antitrust laws. The kind of competition that Monfort alleges here, competition for **[**74]** increased market share, is not activity forbidden by the antitrust laws. It is simply, as petitioners claim, vigorous competition. To hold that the antitrust laws protect competitors from the loss of profits due to such price competition would, in effect, render illegal any decision by a firm to cut prices in order to increase market share. The antitrust laws require no such perverse result, for "it is in the interest of competition to permit dominant firms to engage in vigorous competition, including price competition." *Arthur S. Langenderfer, Inc. v. S. E. Johnson Co., 729 F.2d 1050, 1057* (CA6), *cert. denied*, *469 U.S. 1036, [83 L. Ed. 2d 401, 105 S. Ct. 510]* (1984).

Id. 479 U.S. at 116. The latter quotation was cited again with approval in *Atlantic Richfield Co. v. USA Petroleum Co., __ U.S. __, 109 L. Ed. 2d 333, 110 S. Ct. 1884, 1892-93 (1990)*. *See also* *United States v. Syufy Enterprises, 903 F.2d 659 (9th Cir. 1990)*.

But for NOAP's relationship as a principal supplier to Langenderfer, we find that it has established no antitrust injury by reason of defendants' stone and sand activities and mergers during any relevant period. Plaintiffs' exhibits Nos.

27 and 32 indicate that over a ten-year period (1967-1976), it purchased two and **[**75]** a half times as many tons of sand and stone from France's nine locations as it did from all defendants and paid the same average price over this period of time. (Included in the purchases from defendants were sand and stone purchased from Michigan Stone.) That same exhibit reflects a total of only 10,000 tons of sand purchased by plaintiffs from Tri-State, acquired by defendants. The record also indicates that none of the plaintiffs were among the largest customers buying sand and/or gravel from Tri-State or defendants. NOAP's claim of approximately $ 73,000 based on variation in prices charged and alleged overcharges at defendants' quarries for stone (and/or sand) is clearly unallowable in any event. NOAP also has failed to establish that it was directly injured by defendants' sand and stone or quarry operations, even if deemed to be designed as anticompetitive in nature or motivation. We find no entry barrier to the market insofar as sand production is concerned.

May NOAP nevertheless recover for indirect damages, apart from the sand and stone aspects of this controversy, by reason of anticompetitive conduct of defendants, as paving contractors, directed toward and harming Langenderfer? **[**76]** We must "evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them" to answer this question. *Associated General Contractors v. Calif. Council of Carpenters, 459 U.S. 519, 535, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*. This court has focused on the directness of the injury in a claim of this kind in *Volasco Products Co. v. Lloyd A. Fry Roofing, 308 F.2d 383 (6th Cir. 1962)*, *cert. denied*, *372 U.S. 907, 9 L. Ed. 2d 717, 83 S. Ct. 721 (1963)*. We have also looked to see whether the injury claimed is arguably within the zone of interests protected by the antitrust laws. *Malamud v. Sinclair Oil Corp., 521 F.2d 1142 (6th Cir. 1975)*. *See also* Sherman, *Antitrust Standing: From Loeb to Malamud*, 51 N.Y.U. L. Rev. 374 (1976). The inquiry resembles the "elusive" test of proximate cause in a given situation. *Associated General Contractors v. Carpenters, 459 U.S. at 535-36*.

A number of other factors may be controlling. In this case it is appropriate to focus on the nature of the plaintiff's alleged injury. As the legislative history shows, the Sherman Act was enacted to assure customers the benefits of price competition, and our prior cases have emphasized the central interest in protecting **[**77]** the economic freedom of participants in the relevant market. Last Term in *Blue Shield of Virginia v. McCready, supra* [457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540], we identified the relevance of this central policy to a determination of the plaintiff's right to maintain an action under § 4 [of the Clayton Act]. McCready alleged that she was a consumer of psychotherapeutic **[*1438]** services and that she had been injured by the defendants' conspiracy to restrain competition in the market for such services. The Court stressed the fact that "McCready's injury was of a type that Congress sought to redress in providing a private remedy for violations of the antitrust laws." 457 U.S., at 483, citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc. 429 U.S. 477, 487-489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. After noting that her injury "was inextricably intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy market," 457 U.S., at 484, the Court concluded that such an injury "falls squarely within the area of congressional concern." *Ibid.* *Associated General Contractors v. Carpenters, 459 U.S. at 538*.

NOAP claims damages because of the alleged wrongful injuries to sister corporation Langenderfer, its principal customer, **[**78]** leading to the latter's demise as a direct paving contractor competitor of defendants. A factor to consider under these circumstances is "the directness or indirectness of the asserted injury" *by NOAP*. Langenderfer, as an "immediate victim," suffered direct injury, which will be discussed below. *See* *Associated General Contractors, 459 U.S. at 540-41*.

We must look, then, under *Associated General Contractors* principles, to "the chain of causation," and whether "the alleged effects" on NOAP also "may have been produced by independent factors," and whether or not its claim is merely "speculative" in nature. *Id. at 541, 542*. Courts have a legitimate interest in these cases of avoiding the "risk of duplicate recoveries on the one hand or the danger of complex apportionment of damages on the other." *Id. at 543-44*. *See also* *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, and *Kansas and Missouri, etc. v. Utilicorp United, Inc., U.S. , 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990)*.

We have cited, with approval, a rule adopted in the Second Circuit:

> The oft-cited decision of *Calderone Enterprises v. United Artists Theatre Circuit, 454 F.2d 1292 (2d Cir. 1971)* provides the following rule:
>
> "This **[**79]** court has committed itself to the principles that ***HN19***[] in order to have 'standing' to sue for treble damages under § 4 of the Clayton Act, a person must be within the 'target area' of the alleged antitrust conspiracy, i.e., a person against whom the conspiracy was aimed, such as a competitor of the persons sued. Accordingly, we have drawn a line excluding those who have suffered economic damage by virtue of their relationships with 'targets' or with participants in an alleged antitrust conspiracy, rather than being 'targets' themselves."
>
> *Id. at 1295* (emphasis added). *Calderone*, therefore, excludes as targets those "who have suffered economic damages by virtue of their relationships with 'targets'." *Id. at 1295*.

Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079, 1081 (6th Cir. 1983) (footnote omitted).

We discussed the relationship between direct injury, proximate cause, and standing in light of *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*; *Blue Shield of Va. v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*; and *Associated General Contractors*, in *Southaven Land*. We concluded that

> ***HN20***[] innumerable elements, including proximity and directness, constitute proper **[**80]** areas of inquiry in identifying a "person" injured by reason of a violation of the antitrust laws within the meaning of § 4. Examination of these factors facilitates identification of "who is entitled to prosecute an action under § 4." *Associated General Contractors, supra.*

Id. at 1085 (footnote omitted). [24]

Although the issues are extremely close as to NOAP's antitrust claims of indirect **[*1439]** injury by reason of Langenderfer's direct injury, we conclude that NOAP may not claim damages in this indirect capacity. We recognize that NOAP may be encompassed by the broad language of the Sherman Act, but we are persuaded that the principles of *Associated General Contractors*, considered collectively, bar this claim. We reach this conclusion because (1) NOAP has no proven direct claim with regard to stone and sand; (2) its claim is essentially **[**81]** indirect and derivative of Langenderfer's; (3) NOAP was essentially only a minor consumer of defendants' products and had available independent and competitive resources; and (4) its indirect and separate claims are speculative and involve the serious risk of "duplicative recoveries." [25]

We, therefore, REVERSE the award of damages insofar as NOAP's claims are concerned and, consequently, we REVERSE any award of attorney fees based on a jury award to NOAP.

VII. ARTHUR S. LANGENDERFER CLAIM

For the second time a jury has examined the evidence adduced in this antitrust dispute between Langenderfer, a paving contractor, and defendants. At the first trial, the jury found "actual damages" of $ 982,117, which we set aside for a new trial. Upon the conclusion of the proof at the second trial, the jury returned a verdict of $ 1,675,000

---

[24] *Southaven Land*, like *Associated General Contractors*, discusses § 4 of the Clayton Act but it is entirely relevant to discussion of the anti-trust claims in this case.

[25] *See* *Associated General Contractors, 459 U.S. at 544*.

(coupled with the NOAP claim) based upon its response to interrogatories to the following effect (as to Langenderfer, **[**82]** a separate corporation):

(1) There was a relevant market consisting of limestone, sand, and asphalt used in ODOT and OTC asphalt paving contracts and Langenderfer competed in this market.

(2) There was a relevant product market consisting of both ODOT and OTC asphalt paving contracts and Langenderfer competed in these markets.

(3) There was a relevant geographic market or submarket for Langenderfer (the 13 counties).

(4) Defendants had monopoly power in the relevant markets as to limestone, sand, and asphalt used in ODOT and OTC contracts.

(5) Defendants willfully acquired and used monopoly power in each of these relevant markets.

(6) Defendant engaged in anticompetitive conduct by making acquisitions "to exclude and/or injure competition and increase Johnson's power which he succeeded in doing."

(7) Defendants' monopolization caused injury to the business and property of Langenderfer.

(8) Defendants had a specific intent to achieve a monopoly on the relevant markets and engaged in anticompetitive conduct to achieve a monopoly.

(9) Langenderfer suffered injury to its business or property as a result of defendants' attempt to monopolize.

Defendants moved for a judgment **[**83]** notwithstanding the verdict, which was overruled viewing the evidence on behalf of Langenderfer (and other plaintiffs who also obtained a favorable jury verdict) "in the light most favorable to plaintiffs," with the district court's statement that the "judge's duty is essentially to see that there is no miscarriage of justice." We have heretofore indicated that the district court was in error in failing to direct a verdict, or in refusing to grant j.n.o.v. with respect to other plaintiffs. After full consideration of all of the evidence in the view suggested by the district court, and after reviewing the applicable law, we are persuaded that Langenderfer was entitled to effect a recovery for damages from defendants.

In *Langenderfer I*, as noted by the district court, we held that

> *Brunswick* [*429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690]* requires that Langenderfer's injury result either from a lessening of competition **[*1440]** due to the acquisitions or from "anticompetitive acts made possible" by the acquisitions. . . . The issue of whether Langenderfer's injuries resulted from "anticompetitive acts made possible" by the acquisitions was properly a jury question.

729 F.2d at 1058-59.

The jury responded to an interrogatory **[**84]** that defendants made acquisitions to affect competition adversely and, in effect, succeeded in doing so. Our function is to determine whether the jury acted without any substantial or sufficient basis on the evidence in the case, considered favorably from Langenderfer's standpoint, in rendering its substantial verdict. Contrary to plaintiffs' assertions in their brief, we note first that much of the evidence in the case did relate to defendants' bidding practices characterized by various of plaintiffs' witnesses as unrealistically or oppressively low so as, allegedly, to foreclose successful bidding on ODOT and/or OTC jobs by others. The district court did instruct the jury, however, that "defendants' profitable bidding does not constitute anticompetitive conduct as a matter of law, and you may not base a verdict on the fact that defendants were able to bid lower than competitors and still make a profit." We believe that the instruction cured improper inferences that might otherwise have been drawn by the jurors to the effect that defendants' asserted predatory pricing practices (bidding too low) were the real basis for Langenderfer's (and other plaintiffs') cause of action for anticompetitive **[**85]** conduct.

The district court's jury instructions advised the jury that plaintiffs contended first that defendants were engaged in "monopolistic stone pricing." As previously noted, we conclude that plaintiffs' proof in that respect failed as a matter of law. The district court properly included in its jury instructions the following:

> In deciding whether defendants' limestone market share suggests to you that defendants have monopoly power, you may not combine defendants' market share with France's market share.

There was simply *no adequate evidence* to establish that defendants were engaged in monopolistic stone pricing, or that defendants controlled or attempted to control stone or quarrying in any relevant market claimed by plaintiffs. Nor was there meaningful evidence to show that defendants tied "the sale of stone and sand to the sale of asphalt," as contended by plaintiffs at trial. There was no showing that defendants controlled the sources or supply of sand in any relevant market claimed. This was one basis for holding that NOAP failed to prove its claim.

The remaining contentions of Langenderfer (and other plaintiffs except Sader), as included in the district court's jury **[**86]** instructions, were

(1) "price or profit squeezing and cross subsidization;" [26]

(2) "leveraging its [Johnson's] position in ODOT and OTC;"

(3) "intimidating, discouraging, coercing and retaliating against competitors."

See also supra note 1.

Langenderfer's brief tracks its contentions after noting that defendants had stipulated the "ODOT/OTC asphalt **[**87]** paving market in the thirteen counties in the *Langenderfer I* appeal. *729 F.2d at 1052-1053*." We conclude that this thirteen-county ODOT/OTC asphalt paving market is established. Langenderfer then claims that defendants' alleged "monopoly over OTC/ODOT work extended to various submarkets and gave defendants anticompetitive leverage over asphalt paving work for counties, municipalities, townships, **[*1441]** etc." In light of our previous detailed discussion about defendants' sand and stone operations, the relevant product markets are ODOT and turnpike asphalt paving contracts and the supply of asphalt used therein, but not "the supply of approved construction materials," such as stone and sand, which Langenderfer essentially obtained from its own sources, its sister corporation NOAP, and others. Plaintiffs concede that the market for ODOT/OTC work "is distinct from that done for counties, townships, municipalities and private parties." Plaintiffs' Brief at 7; *see* Burton MacRitchie's testimony.

Because we are concerned with respect to Langenderfer, not with defendants' stone and sand operations (which the proof failed, as a matter of law, to show were either monopolies or involved any dangerous **[**88]** probability of becoming monopolies), we will consider the asphalt and asphalt paving aspects of the case as proved by Langenderfer.

We conclude that defendants may not be held liable for antitrust conduct to the extent that, as asphalt paving contractors, they acquired additional limestone and/or sand sources which added to their efficiency and ability to submit profitable low bids on public highway contracts. Burton MacRitchie testified that during the time defendants began to expand and integrate their operations, he, as part owner and a principal in Langenderfer, desired to do the same when opportunities presented themselves. Arthur Langenderfer, the majority stockholder, however, declined to take advantage of such business opportunities, and MacRitchie conceded this was a bad business decision. Defendants' low bidding, of course, in a real sense, inured to the benefit of the public and extended over many years in the relevant market. We have found previously no proven predatory pricing by defendants. There is no substantial evidence that defendants refused to deal with Langenderfer (or other plaintiffs) in respect to limestone or sand sources except on rare occasions where defendants **[**89]** themselves needed to utilize these materials in their asphalt production and paving with respect to successful bids. Defendants' stone prices were competitive with France, the largest producer in the relevant market, and were not substantially different from prices charged by plaintiffs themselves, although such prices varied from one geographic area to another.

The acquisitions by defendants proved by Langenderfer were set out in *Langenderfer I*. The first pertinent acquisition other than quarrying or asphalt paving contracting or asphalt, as such, was the 1961 acquisition of C.P.

---

[26] The district court discussed in the jury instructions plaintiffs' contention about "price squeeze" or "profit squeeze" or "cross subsidizing." This contention was that "defendants have *used their monopoly power in stone* to gain an unfair advantage in paving." (emphasis added). As we have seen, however, defendants did not have sufficient market power or price control in limestone to constitute monopoly power. Plaintiffs' theory of "duopolization" through their expert witness, Dalton, simply had no legal basis of support in treating and combining the shares and practices of France with those of defendants to evidence alleged monopoly power and control.

Calaway, a bridge contractor. Nothing in this acquisition, however, would tend to show elimination of an asphalt paving contractor competitor, nor does it relate to control over asphalt supply or the "concrete and road metal" market, in our view. The acquisitions which might reasonably be deemed to bear upon asphalt paving competition began in 1969 with Price Companies. Mr. Price testified that his company was only a "very minor" competitor with defendants' one plant at Parkertown, near the eastern boundary of the relevant market area. Price sold one of his asphalt plants in the Toledo area to another **[**90]** party, and it was Price who contacted defendants to buy his asphalt paving business. Defendants met his asking price for the business in the eastern fringe of the thirteen-county area and required that he sign a noncompetition agreement. Defendants also agreed to buy sand from Price as a part of the package, with a right of first refusal in the event of a proposed sale of the sand operation. [27] It is difficult, under all the circumstances, to find the Price acquisition to be anticompetitive with respect to Langenderfer's operations located some considerable distance away. There is no indication that Price was ever in substantial competition with Langenderfer, and Price retained, and still operates, his sand production facilities.

[*1442] The first significant paving contractor acquisition by defendants **[**91]** was Ohio Engineering Co., which conducted about one-half of its operations in the thirteen-county area (the southeast portion) and one-half outside (Crawford, Hardin, Allen, and Marion Counties including Delaware). Ohio Engineering operated plants situated on National Lime & Stone's property in Findlay, Hancock County, when acquired by defendants in 1970, and one at Carey, Wyandot County. (Other Ohio Engineering Co. asphalt plants were situated south of the relevant market area but later moved within that area.) Ohio Engineering had been closely allied with National Lime & Stone Co., and it was a competitor of defendants "on rare occasions." Ohio Engineering Co. was purchased in 1970 and subsequently operated as a division of defendants.

In 1971, defendants acquired Creager, a competitor that was failing and ultimately was acquired by defendants for $ 1 plus the debt it owed for materials and supplies. No reason is shown why other parties, including plaintiffs, might not have acquired Creager for a nominal price in 1971 had any of them sought to do so. While this may be deemed to be acquisition of a failing competitor, a nonunion operator, it is of little practical or legal effect **[**92]** since it is clear that had no acquisition been made, Creager would have ceased to do business entirely. That competitor would simply have gone out of business in 1971. Creager, in other words, without dispute, was not a *viable* competitor in any sense when acquired in 1971.

With respect to Ohio Turnpike contracts awarded during the relevant period, plaintiffs' exhibit 69 reflects that Langenderfer bid successfully on one joint venture with Johnson from 1967 through 1969, during which time defendant Johnson won one other bid. In 1970 and 1971, Langenderfer was unsuccessful on one bid each year, whereas Johnson was successful on one bid each year. Johnson was the only successful OTC bidder on three jobs in 1972, Langenderfer unsuccessfully bidding on two. On the other hand, Langenderfer was successful on its one bid in 1973, Johnson on two of three; in 1974, there were no bids and in 1975, both Langenderfer and Johnson were successful in one of two bids. In 1976, Johnson was successful in its one ODOT bid, but lost to Langenderfer on the one competitive bid in 1977, apparently the last time Langenderfer bid on OTC projects. In sum, from 1973 through 1977 Langenderfer was successful **[**93]** on three of its five OTC bids and Johnson was successful on four of seven, but the latter won on the larger jobs. This evidence of plaintiffs, standing alone, is insufficient to establish monopolistic control of the OTC market by defendants from 1967 through 1977. During this same period, two other paving contractors bid successfully on OTC jobs, and there were a number of other bidders. This data of plaintiffs indicates, if anything, that Langenderfer became more active from 1973 through 1977 and was relatively more successful than it had been before that time on OTC bids.

According to plaintiffs' exhibit 70, defendants' share of the Ohio ODOT market decreased from 1966 through 1968 (down to 29 percent), but then increased dramatically in 1969 to 73 percent. During this period, Langenderfer's market share (approximately 3 percent of its own bids) remained relatively constant (up to 8 percent in 1968). In 1971, defendants' market share of the ODOT contracts dropped to 11.8 percent while Langenderfer's was 11.4 percent. Through 1971, then, there is clearly no statistical showing, as a matter of law, that defendants had

[27] Price's principal plant at Norwalk, Ohio, was *outside* the bounds of the thirteen-county area by a distance of approximately 15 miles, and he operated principally in Huron and Erie Counties, outside the relevant market area.

monopoly power or likelihood of monopoly power in the ODOT market. **[**94]** Plaintiffs' exhibit 71 reflects that Langenderfer's dollar amount bid successfully on contracts (ODOT and OTC) in 1971 was over $ 814,000, which was more than double the average of the comparable dollar amounts won from 1968-1970. Langenderfer's 1971 amount constituted a higher market share of ODOT and OTC contracts (8.7 percent) than it realized even in 1968 (6.4 percent), the year in which it realized its highest pretax net income. This would demonstrate no monopoly threat by defendants in 1971 even *after* the acquisitions of Price, Ohio Engineering and Creager. Excluding **[*1443]** the year 1969, which seems to be an anomaly, [28] defendants' average annual market share of the Ohio ODOT contract market from 1966 through 1971 was 34.6 percent, and there were numerous serious competitors, including Langenderfer, in that market. This is an entirely insufficient basis for a monopolization showing through 1971, especially since the defendants' share was decreasing in 1970 and 1971 with respect to ODOT asphalt paving business.

[95]** For the years following 1971 and until Langenderfer went out of business, plaintiffs' exhibit 70 reflected the following as to ODOT market share: [29]

1972	55% (65%)	5%
1973	52% (58%)	16%
1974	83% (83%)	7%
1975	38% (53%)	6%
1976	57% (63%)	10%
1977	75% (70%)	3%
1978	45% (51%)	-0-
Average (7 yrs.)	58% (63%)	7%

In contrast to the years through 1971, the above data, accompanied by the paving contractor and asphalt plant acquisitions made in 1970, 1971, and 1972, are sufficient to indicate that Langenderfer may reasonably have proved the cause of action alleged, coupled with the defendants' high percentage of ODOT winning bids from 1973 until Langenderfer's termination of business, and other circumstances of defendants' growing economic power. We reach this conclusion being mindful **[**96]** at the same time of this statement by a prominent authority in this respect: "There is substantial merit in a presumption that market shares below 50 or 60 percent do not constitute monopoly power." Areeda & Hovenkamp, ***Antitrust Law***, § 518.3 (1988 Supp.).

Langenderfer charges not only monopolization but also attempted monopolization for the pertinent period preceding its going out of business. There is evidence, as previously noted in *Langenderfer I*, that defendants "intended to eliminate competition and dominate the market." *729 F.2d at 1054*. We recognized also in *Langenderfer I* that "Johnson attained economies of scale which enabled it to operate at a much lower cost per paving project than its competitors." *729 F.2d at 1058*. Langenderfer has, we believe, made a sufficient factual showing to support the essence of the jury's finding that Langenderfer suffered **[**97]** injury by reason of defendants' conduct and that such injury resulted in significant part from "a lessening of competition due to acquisitions or from 'anticompetitive acts made possible' by the acquisitions." *Langenderfer I at 1058*. We do not find that plaintiffs have made any required showing of "monopolistic pricing" in stone and sand, as noted, but acquisitions, elimination of competition,

[28] The 1969 pretax profit figure of $ 189,382 for Langenderfer is indeed difficult to accept as "normal." It is considerably more than the same pretax profit totals for 1966, 1967, 1968, and 1970 *combined*. Plaintiffs' exhibit 71 reflects also that in 1969 Langenderfer was awarded bids on three ODOT and OTC contracts totalling only $ 237,168. It is not possible, therefore, that Langenderfer's profits for 1969 came from ODOT and OTC work. (In 1968, the successful bid awards for Langenderfer were $ 380,063; thus, this data reflects that ODOT and OTC contracts could not have carried over as a substantial part of a profit source in 1969.) We are, therefore, inclined to regard this 1969 figure as a less-than-reliable basis for claiming average profits by Langenderfer. The basis for any substantial profit in 1969 must have been from non-ODOT/OTC work.

[29] The figures in parentheses reflect defendants' combined ODOT/OTC market share. Plaintiffs' exhibit 71; *Langenderfer I, 729 F.2d at 1054 n.6*.

and other anticompetitive conduct by defendants, referred to also in *Langenderfer I*, support an award for Langenderfer. We find also that an interstate commerce nexus has been established based on the proof submitted.

Although "monopolistic pricing" in stone and sand was not established, acquisitions by defendants of quarry sites coupled with the use of lengthy non-competition agreements and other circumstances did foreclose production and efficient use of such quarries and limestone by Langenderfer and others as competitors of defendants. Plaintiffs point also to the comparative size and economic power of defendants, particularly from and after 1970, to support their argument in this respect. ***HN21***[] The jury is entitled "to look at the whole picture" with **[*1444]** respect to allegations and evidence **[**98]** of Sherman Act *§ 2* violations. *American Tobacco Co. v. United States, 147 F.2d 93, 106 (6th Cir. 1944)*, *aff'd*, *328 U.S. 781, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)*.

We conclude, although the issue is a very close one, that Langenderfer has presented sufficient proof for a reasonable jury to find defendants guilty of unlawful monopoly or attempted monopoly and anticompetitive acts in asphalt paving contracting in the northwest Ohio relevant market area in OTC and ODOT work during the 1973-1978 period.

Damages

Langenderfer was awarded damages by the jury of $ 1,675,000 (before trebling). This figure was arrived at using figures supplied by plaintiffs, and reflects injury for the years until 1978, the year Langenderfer went out of business, as well as for the years 1978-1987. This damage calculation includes damages for *both* Langenderfer and NOAP.

HN22[] An appellate court reviewing damages may adjust and/or correct the jury's award based on clear error in calculation and based on the actual claims submitted to the jury in closing argument. *H.J., Inc. v. Int'l Tel. & Tel. Corp., 867 F.2d 1531, 1549-50 (8th Cir. 1989)*. We find such an adjustment appropriate for several reasons. First, as noted, the jury's **[**99]** award was for Langenderfer and NOAP, and we have concluded that NOAP is entitled to no recovery. Furthermore, we find that some of the dollar figures offered by plaintiffs and their experts simply fail to reflect economic reality, and we shall make adjustments accordingly, while continuing to give Langenderfer the benefit of all reasonable inferences.

Base damages

The first step in computing damages suffered by Langenderfer as a result of defendants' anticompetitive activities is to arrive at a reliable estimate of Langenderfer's average profits in representative years before it suffered antitrust injury. At trial, plaintiffs introduced evidence of Langenderfer's profits for the years 1966-1970, and arrived at an average annual profit of $ 81,758, including NOAP. When NOAP's profits are eliminated, the average annual profit for Langenderfer alone for 1966-1970 is $ 58,353. Plaintiffs' exhibit 150. We believe that this figure is not a reliable barometer for computing losses suffered by Langenderfer.

The "principal portion" of Langenderfer's work in the seventies was "state highway work . . . [because] by that time the bulk of the interstate system was completed." (B. MacRitchie). **[**100]** This winding up of interstate work in the early 1970s had an adverse effect on many highway paving contractors in northwest Ohio, [30] and "the majority of the [public] work was ODOT and turnpike" for Langenderfer during the relevant damages period before it terminated its asphalt paving operations in 1978. During the pertinent times, Langenderfer (or its sister corporations) remained in the limestone quarry business, generally a more profitable business. While Langenderfer was losing money on its state work in the 1970s, it continued to do private road contracting and paving work profitably even though competing with defendants. In 1971, for example, private work constituted about 75 percent of Langenderfer's volume. Although after 1971 Langenderfer did an increased volume of state work, this became increasingly unprofitable whereas the private work remained profitable.

---

[30] Burton MacRitchie conceded than the amount of work available to paving contractors in northwest Ohio dropped by more than half during the early 1970s; it provided "fewer opportunities to bid." Langenderfer began losing money at the same time in 1971.

[101]** In the early 1970s, Langenderfer had a profit on the 75 percent of its paving business in the private (non-ODOT/OTC) area. Plaintiffs' exhibit 150, moreover, shows a precipitate drop in Langenderfer's "base period pretax profit" from 1968 to 1970-$ 85,047 and $ 24,812, respectively, in the last two years. This affords no legitimate basis for Langenderfer's claiming an "average" profit loss of $ 58,353 based on pretax profits during the years 1966-1970, when **[*1445]** interstate highway construction was at its peak, as Langenderfer has done here. Plaintiffs' exhibit 150.

We have indicated that there was insubstantial evidence that defendants had monopoly power in, or a dangerous probability of success at attempted monopolization in, the ODOT/OTC market through 1971 or 1972, and there is little hard evidence to justify using the 1966-1970 average annual pretax profits of $ 58,353 for Langenderfer as a basis for claiming "normal" profits to utilize as a comparison to the actual profits or losses from 1973 forward when defendants dominated the ODOT bidding. M & B's profits, as a realistic competitor, in comparison, reached its average 1966-1970 profits only once between 1980 and 1984. Defendants' **[**102]** average net profit expressed as a percentage of its consolidated asphalt and construction revenues was 4 percent between 1966 and 1970. Between 1979 and 1984, defendants' net profit percentage was only 2.3 percent. Plaintiffs' exhibit 119S. From 1978 through 1985, defendants' net income percentage, as reflected by the same exhibit, was less than 2.4 percent compared with the 1966-1970 figure of 4 percent. (Income from quarrying operations enjoyed a consistently higher ratio.)

An examination of plaintiffs' exhibit 71 reflects that for the years 1966-1970, plaintiffs successfully bid the following totals on ODOT/OTC contracts; the pretax profit and loss claimed during these years is also indicated (with losses indicated by parentheses):

YEAR	BID AMOUNT	LANGENDERFER PROFIT
1966	$ 314,755	$ 59,663
1967	349,812	67,140
1968	380,063	189,382
1969	237,168	85,047
1970	600,810	24,812

There is no correlation between the amount of profit reflected and the ODOT/OTC bidding and **[**103]** this important type of work done for these years claimed by plaintiffs to constitute the normal, non-monopoly base period. It would appear, however, that the less the amount of ODOT/OTC work done by Langenderfer, the greater was its profit. The profit realized from non-ODOT/OTC work is not relevant to Langenderfer's contention in this case that it is seeking damages from defendants because they illegally, through monopoly practices, deprived it of expected ODOT/OTC bids and work. We conclude, therefore, that a realistic allocation of ODOT/OTC profit for the base years would be at most one-half of the $ 58,353 annual profit for Langenderfer utilized by plaintiffs and their experts, or $ 29,177. This gives Langenderfer every reasonable favorable inference in a careful analysis of the proof.

Losses, 1973 through 1977

In the calculation of damages made by Langenderfer, three alternative calculations were offered by their accountant, Thomas Good, for the period until 1978 (the year Langenderfer went out of business), using the nearly $ 82,000 "base period profit" figure before taxes, which we have determined to be unreasonable, arbitrary and speculative, and thus not allowable.

[104]** Good's first method of calculating damages for Langenderfer through 1977 resulted in a claim of $ 818,085; the second $ 536,286, [31] **[**105]** and the third $ 664,261 (the so-called "yardstick method"). [32] This latter figure is not a reasonable estimation because it is based on a comparison of data not shown to be material to the relevant market. Nor can we accept, moreover, the first method utilized by Good. We do not consider it reasonable for Langenderfer to recover damages on jobs which it bid when it reasonably should have known it would realize a loss, taking into account its then known costs, direct, fixed, and variable. **[*1446]** Good's method one, in sum, included damages for losses which Langenderfer experienced on bids which were below costs. We conclude as a matter of law the taking of a loss under these circumstances is not justifiable. Langenderfer is held to the familiar principle of minimizing its damages. We, therefore, discard a recovery based on method one.

The highest basis for damages through 1977, then, would be Good's calculation of $ 536,286, utilizing Langenderfer's own calculations, and utilizing the second alternative method which excluded bids that exceeded "actual costs" (and based on the $ 81,758 annual pretax profit figure).

Because this $ 536,286 figure included NOAP and was based on an inflated annual base of $ 81,758, an adjustment is in order. The base figure arrived at above, $ 29,177, is 35.7 percent of the base figure used in plaintiffs' calculations. An appropriate award, then, for the years through 1977, is 35.7 percent of $ 536,286, or $ 191,454 (before trebling).

Losses, 1978-1987

As noted, Langenderfer sought and received a jury award including **[**106]** damages for the years 1978-1987 based on an annual profit figure that is not realistically supported by the evidence. Using the revised base figure arrived at above, $ 29,177, applied to the ten years in question, [33] Langenderfer may receive damages of $ 279,650 (before trebling) for the years 1978-1987.

Based on these figures, then, Langenderfer may receive damages in the amount of $ 191,454 for the years 1973-1977, and $ 279,650 for the years 1978-1987, for a total of $ 471,104 before trebling.

In sustaining an award for Langenderfer, we have given careful attention to defendants' market share, its comparative economic position, some evidence of anticompetitive acts, and other market factors in the asphalt paving aspect of the case as distinguished **[**107]** from claims of some other plaintiffs. The issues in the Langenderfer-Johnson dispute are fraught, however, with problems. Johnson chose to expand and to purchase assets and resources, some of which were, or might have been, available to Langenderfer, other plaintiffs, or to other parties. At a critical juncture, Langenderfer chose, as a matter of policy, to forego some expansion into limestone, quarrying, or sand sources within the relevant market. Langenderfer complains, nevertheless, because Johnson, and all defendants, made the choice to expand and to integrate operations -- asphalt paving and contracting, quarrying, sand production -- and to purchase additional strategic resources, and thus defendants became able to bid more efficiently. It is only by giving Langenderfer the full benefit of presumptions and inferences that may well have been made by the jury, to the extent not proscribed by other legal principles, that we are able to sustain an award of damages in this hotly contested controversy.

---

[31] The second method, unlike the first, eliminated bids made by Langenderfer on jobs in which concededly Langenderfer did not recover its fixed costs.

[32] This third method involved calculation of Langenderfer's "revenues on ODOT and turnpike projects for the work it performed during the period 1973 through 1977" based on "an analysis of what it would have had on those bids had it been able to bid at the levels being bid in the remainder of the state." We consider this method to be unsupported by the proof and highly conjectural.

[33] For the last two years in question, 1986 and 1987, plaintiffs discounted their claimed damages by 17.03 percent annually. Plaintiffs' exhibit 150. We have applied the same discount to the newly calculated damage figure. For 1986, this comes to $ 24,931; for 1987, $ 21,303.

Entry barriers, or the lack thereof; existence of other competition, or lessening thereof; and the very fact that government bidding at low prices over a lengthy period was at the heart **[**108]** of this case, all have figured into our final resolution of this complex antitrust lawsuit.

We have also considered the unusual posture of the State of Ohio in its brief as *amicus curiae* urging affirmance of the judgment of the district court with respect to monopolization "of the highway paving market in northwest Ohio." Reference was made in the *amicus* brief that defendants had an average share of the paving market from 1972 to 1985 of 58 percent and that defendants "likewise controlled the dominant share of the materials markets." We find no citation to the record or the proof, however, in support of this latter assertion, and we have concluded to the contrary. Ohio's Brief at 8 also makes the concession, citing III Kintner, Federal ***Antitrust Law*** 357-58 (1980), that "monopoly power is more likely to be found where market shares exceed 75-80%." We are prone to agree with this observation, and **[*1447]** this market share data makes Langenderfer's case close and problematic. Ohio, in any event, takes the position that benefits of defendants' low bidding in Ohio paving contracts over many years are merely transitory and are "outweighed by the dangers of the elimination of a competitive **[**109]** market place." We note, however, that Ohio never sought to intervene in *Langenderfer I* or in these proceedings, and never has sought to enforce its own antitrust laws against defendants over the fifteen years and more of their low and successful bidding, which presumably would benefit the state and its citizenry.

Taking all these factors into account, we can affirm the lesser award to Langenderfer on the evidence submitted, viewing the evidence favorably from Langenderfer's perspective, and resolving reasonable questions of damages in Langenderfer's favor.

We have adjusted the damage award in this case in light of reversal as to several plaintiffs and in order to avoid delay in further remand and hearings concerning damages as to Langenderfer. (We discuss the basis for equitable relief in this case beyond a single award of damages, costs, and redetermination of a reasonable attorney's fee in a separate section of this opinion.)

We AFFIRM a damage award for Langenderfer, therefore, in the amount of $ 471,104 before trebling.

VIII. ATTORNEY FEES

Insofar as attorney fees have been allowed plaintiffs and assessed against defendants by the district court based on legal services **[**110]** rendered for M & B, Sader, MacRitchie, and NOAP, we must set these fees aside. *See* *Wooldridge v. Marlene Industries, 898 F.2d 1169 (6th Cir. 1990)*. Plaintiffs' attorneys may not be compensated for time spent in investigating, pursuing and litigating these claims. We must remand the case for a proper award based only on services rendered for Langenderfer with respect to a reduced judgment amount (before trebling) of $ 471,104 instead of $ 1,675,000 awarded by the jury for both Langenderfer and NOAP. We find no error in denial of the enhancement to the lodestar fee claimed by counsel for plaintiffs nor in the ten percent adjustment directed by the district court, nor in the years for which fees were found to be allowable. Neither do we find error in the setting of a lodestar rate by the district court.

IX. INTEREST

Upon a thorough consideration of the action of the district court with respect to disallowance of postjudgment interest claim by Langenderfer and NOAP on the original *Langenderfer I* award, we find no error in the district court's handling of this issue. The district court's decision not to allow interest on the judgment vacated in *Langenderfer I* is, we believe, **[**111]** clearly supported by the Supreme Court's recent decision in *Kaiser Aluminum & Chemical Corp. v. Bonjorno, __ U.S. __, 108 L. Ed. 2d 842, 110 S. Ct. 1570 (1990)*. Upon remand, the district court may award postjudgment interest in a manner consistent with *Bonjorno*.

X. OTHER EQUITABLE RELIEF

Finally, we generally find no error in the terms of the injunctive relief granted by the district court. A five year term is well within the bounds of the discretion of the district judge, and we will not extend the time as requested by plaintiffs. With regard to the question of divestiture, we find no basis for invocation of that doctrine with respect to acquisitions by defendants of quarrying and limestone operations or leases, a bridge contractor, or sand pit operations. Nor do we find generally a basis for divestiture of quarries or sand pits that may have been operated by asphalt plant operators or asphalt paving competitors. As to possible divestiture of Ohio Engineering, Creager, Northwest Materials, Union Quarries (as to paving operations only) and Dailey Asphalt, we construe *California v. American Stores Co., __ U.S. __, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)* to indicate, even though it was an action brought by a state, **[**112]** not a private party such as Langenderfer, that this potential **[*1448]** § 16 Clayton Act remedy may apply contrary to our decision in *Langenderfer I*. [34] *American Stores, 110 S. Ct. at 1866* & n.28, citing 2 P. Areeda & D. Turner, ***Antitrust Law*** § 328b (1978), and *Cia. Petrolera Caribe, Inc. v. Arco Caribbean, Inc., 754 F.2d 404, 418-427 (1st Cir. 1985)*. *Cia. Caribe* found fault with *I.T.T. Corp. v. G.T.E. Corp., 518 F.2d 913 (9th Cir. 1975)*, a case we cited with approval in *Langenderfer I* for concluding that divestiture was not an "available remedy in a suit instituted by a private plaintiff." *729 F.2d at 1060*. *American Stores* also suggested that "equitable defenses such as laches . . . may protect consummated transactions. . . ." *110 S. Ct. at 1867*. In any event, we remand for further consideration the possibility of divestiture in the limited situations in which it may be available in this case subject to equitable defenses by defendants.

[113]** We find no error in the refusal of the district court to *restrict* competition as urged by Langenderfer -- to limit defendants from bidding "every other" (50 percent) contract invitation on ODOT, turnpike, and local government asphalt jobs in northwestern Ohio. Other competitors, not parties in this case, have emerged as bidders on these jobs during the relevant years, and some of them have grown in their particular markets. We find no error in the refusal to preclude defendants from future acquisitions of bridge contractors. We also find no error in the district court's decision not to enjoin defendants to charge the same prices for limestone and sand in the Toledo area as they charge for these materials in other areas of the relevant market.

Finally, we find no basis to disturb the district court's decision not to mandate that defendants charge themselves the same prices for sand, stone, and asphalt produced by their own facilities as they charge others for these materials. While defendants may not unfairly nor invidiously discriminate between customers in the same class or status, we find no error in the court's refusal to direct and control internal pricing policies among the several **[**114]** different entities comprising the defendants' group. *See* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*, and *Russ' Kwik Car Wash v. Marathon Petroleum Co., 772 F.2d 214 (6th Cir. 1985)*. We note that plaintiffs and other competing parties have employed their own quarries, sandpits, and asphalt plants as a basis for bidding competitively against others who may not have such resources, and there has been no proof one way or the other as to whether they have charged the same prices among subsidiary entities as they do with others. That NOAP has taken steps to reenter the business would indicate further such activity among plaintiff entities.

XI. SUMMARY

We REVERSE the judgments entered in this case for all plaintiffs except plaintiff Langenderfer. We REDUCE the amount of the judgment for Langenderfer (before trebling) to $ 471,104. We REMAND to the district court for a redetermination of reasonable attorney fees in light of our finding that the district court was not in error in its lodestar method of calculation and allowance of such fees. We find no error in denial of post-Langenderfer *I* interest.

We also REMAND to the district court **[**115]** for further consideration of possible divestiture as a part of the equitable remedy sought by Langenderfer, subject to equitable defenses presented by defendants. (We had previously determined in *Langenderfer I* that divestiture was not a proper remedy in a case brought by a private plaintiff and have reconsidered this view for the reasons indicated.)

The remands effected shall proceed in accordance with the principles herein expressed, but we entertain the hope that the parties themselves may reach agreement **[*1449]** after considering the import of our opinion in this lengthy and expensive litigation.

---

[34] *Langenderfer I* held that the order of the district court which did not include divestiture, provided "no ground for assignment of error."

Opinion

[*733] MEMORANDUM OPINION

HOWELL COBB, UNITED STATES DISTRICT JUDGE

The defendants, The Scott & Fetzer Co., and The Kirby Co. (Kirby), moved for partial summary judgment in this case on Counts I and II of the plaintiffs', Jerry and Miller Cranfill (The Cranfills) complaint. This motion for partial summary judgment (Kirby's first motion) was filed December 21, 1984. The Cranfills responded to Kirby's First Motion on December 31, 1984, filing their response to defendants' motion for partial summary judgment (The Cranfills' First Response).

[*734] On December 21, 1984, the same day Kirby's First Motion was filed, the Cranfills filed a First Amended Complaint, adding eight new counts. Kirby then filed its motion for judgment on the pleadings or partial summary judgment (Kirby's Second Motion) on January 4, 1985. In Kirby's Second Motion, Kirby sought judgment on all counts of the First Amended Complaint except Count IX. Additionally, Kirby filed a reply memorandum in support of defendants' motion for partial summary judgment (Kirby's First Memorandum).

For the next five years, **[**2]** as the case moved from judge to judge, the parties apparently did nothing. On October 5, 1989, the Cranfills filed plaintiffs' amended response to defendants' motion for judgment on the pleadings or partial summary judgment (The Cranfills' Second Response). This court reviewed all these documents, and decided a hearing was necessary.

On May 3, 1990, this court held a hearing on all pending motions. At that time, the court requested the parties file supplemental briefs on several specific issues. The Cranfills filed their supplemental brief in support of plaintiffs' amended response (The Cranfills' First Brief) on June 18, 1990, Kirby filed its supplemental memorandum in support of defendants' motion (Kirby's Second Memorandum) on June 22, 1990.

Apparently neither party was yet content with the quantity of paper filed in this case. On June 25, 1990, the Cranfills filed their response to defendant Kirby's supplemental memorandum (The Cranfills' Third Response). Kirby then filed its response to plaintiffs' supplemental brief (Kirby's First Response) on June 27, 1990. This court has now reviewed all of these materials.

Kirby's Second Motion effectively incorporates its First Motion, so **[**3]** this court will address only Kirby's Second Motion for judgment on the pleadings or for partial summary judgment. Obviously, this court has considered substantial documentation beyond the pleadings. Accordingly, this court treats Kirby's Second Motion as a motion for summary judgment under *FED. R. CIV. P. 56*.

HN1[] Summary judgment is only appropriate where no genuine issue of material fact exists, and the moving party is entitled to summary judgment as a matter of law. *Anderson v. Liberty Lobby, 477 U.S. 242, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. Kirby seeks summary judgment on four basic categories of claims found in the first amended complaint: the private right of action under the Federal Trade Commission Act; the federal antitrust claims; the Texas State Antitrust claims; and the Texas state breach of contract, fraud, and conversion claims. The court will address each category in turn.

1. PRIVATE RIGHT OF ACTION UNDER THE FEDERAL TRADE COMMISSION ACT

The Cranfills seek to bring a private right of action under the Federal Trade Commission Act. *15 U.S.C. § 45*. The Cranfills allege in Count III of the First Amended Complaint that an implied cause of action exists under that statute.

It is well settled law **[**4]** that ***HN2***[] no such implied private right of action exists. *Fulton v. Hecht, 580 F.2d 1243 (5th Cir. 1978)*; *Alfred Dunhill, Ltd. v. Interstate Cigar Corp., 499 F.2d 232 (2d Cir. 1974)*; *Holloway v. Bristol-Myers Corp., 158 U.S. App. D.C. 207, 485 F.2d 986 (D.C. Cir. 1973)*; *Carlson v. Coca-Cola Co., 483 F.2d 279 (9th Cir. 1973)*; *Atlanta Brick Co. v. O'Neal, 44 F. Supp. 39 (E.D. Tex. 1942)*. No material question of fact could exist on this claim. Kirby is entitled to summary judgment as a matter of law.

Accordingly, Kirby's motion for summary judgment is GRANTED as to Count III of the First Amended Complaint. Judgment will be entered by order of this same date.

2. FEDERAL ANTITRUST CLAIMS

The Cranfills bring Counts I, II, IV, V, and VI of the First Amended Complaint under the federal antitrust laws, specifically *15 U.S.C. § 4*. Kirby responds that the entry of final judgment in a *parens patriae* action brought against Kirby by the Attorney General of the State of Texas bars these claims. *The State of Texas as parens patriae v. The Scott & Fetzer Co.,* ***[*735]*** *et al*, Civil Action No. A-80-CA-415 (W.D. Tex. May 3, 1984) (*parens* action).

Judge Bunton's final judgment in the *parens* action contains **[**5]** an injunction prohibiting "plaintiff and those persons on whose behalf this action is brought" from bringing suit against these defendants based on "any alleged violation of the federal antitrust laws. . . ." *Id*. Kirby claims this injunctive provision applies to the Cranfills. Although there is no question that this is a suit based on federal antitrust laws, and that Kirby was a defendant in the *parens* action, Kirby completely misreads "those persons on whose behalf this [*parens*] action is brought. . . ."

States' attorneys general were authorized to bring *parens patriae* actions by the Hart-Scott-Rodino Antitrust Improvements Act of 1976. *15 U.S.C. § 15c*. The stated purpose of the Hart-Scott-Rodino amendment was to "provide the consumer an advocate in the enforcement process -- his state attorney general." H. R. Rep. No. 94-499, 94th Cong. 2d Sess., *reprinted in* 1976 U.S. Code Cong. & Admin. News 2572, 2574 (House Report). Such an advocate was necessary because "the economic burden of many antitrust violations is borne in large measure by the consumer in the form of higher prices for his goods and services." *Id. at 2573*. The House Report makes it very clear that **[**6]** "those persons on whose behalf [a *parens* action] is brought . . ." are the consumers of the state, *as consumers*.

Other courts, when applying various elements of the Hart-Scott-Rodino amendment and the federal antitrust laws, have similarly interpreted the purpose of a *parens patriae* action. Judge Young of Maryland said, in interpreting a venue provision of the Hart-Scott-Rodino amendment, "This interpretation is in keeping with the purposes of the *parens patriae* amendments, which was to make it easier for consumers to recover damages for violations of the antitrust laws." *In re Mid-Atlantic Toyota Antitrust Litigation, 525 F. Supp. 1265, 1279 (D. Md. 1981)*, *aff'd sub nom. Commonwealth of Pennsylvania v. Mid-Atlantic Toyota Distributors, Inc., 704 F.2d 125 (4th Cir. 1983)*.

Likewise, Judge Kaufman of the Second Circuit wrote, when reviewing a motion for disclosure of grand jury proceedings in a *parens* action, "Congress enacted the *parens patriae* provisions . . . to provide a meaningful remedy for small consumers injured by antitrust violations." *In Re: Grand Jury Investigation of Cuisinarts, Inc. 665 F.2d 24 (2d Cir. 1981)*, *cert. denied*, *460 U.S. 1068,* ***[**7]*** *75 L. Ed. 2d 945, 103 S. Ct. 1520 (1983)*.

Indeed, the Fifth Circuit has articulated the same purpose for *parens* actions. "As the legislative history makes apparent, the [Hart-Scott-Rodino] Act was aimed primarily at enlarging the potential for consumer recovery for antitrust violations. . . ." *State of Texas, as parens patriae, v. The Scott & Fetzer Co., et al, 709 F.2d 1024 (5th Cir. 1983)*. The same defendants were before the Fifth Circuit in *Scott & Fetzer* as are before this court now. In the seven years since *Scott & Fetzer* was decided, however, these defendants apparently have not learned anything. So once more, to ensure Kirby understands, ***HN3***[] a *parens patriae* action is brought on behalf of the *consumers* of a state.

This court finds the Cranfills were not consumers of Kirby's products. The Cranfills' allegations stem entirely from their dealings with Kirby as distributors of Kirby products. The Cranfills are not "those persons on whose behalf [the *parens* action] was brought." They are not enjoined from proceeding under the federal antitrust laws.

Accordingly, Kirby's motion for summary judgment is DENIED as to Counts I, II, IV, V, and VI of the First Amended Complaint. A pre-trial **[**8]** scheduling order will be issued with respect to those counts.

3. THE TEXAS STATE ANTITRUST CLAIMS

The Cranfills have alleged violations of both the Texas Antitrust statute existing prior to August 29, 1983, and the Texas antitrust statute existing subsequent to August 29, 1983. The court will address the application of each of these statutes.

[*736] A. THE TEXAS ANTITRUST STATUTE PRIOR TO AUGUST 29, 1983

Prior to August 29, 1983, Texas ***Antitrust law*** was controlled by "Trusts-Conspiracies Against Trade." TEX. REV. CIV. STAT. ANN. §§ 7426, *et seq*. (Vernon 1960) (The Old Texas Statute). Although it is difficult to determine from the face of the First Amended Complaint, apparently Count VII alleges a violation of The Old Texas Statute.

The Old Texas Statute was repealed effective August 29, 1983, with the implementation of the Texas Free Enterprise and Anti-Trust Act of 1983. *TEX. BUS. & COMM. CODE §§ 15.01 et seq*. (the New Texas Statute). Kirby argues that because the New Texas Statute contains no savings clause, Count VII fails as a matter of law.

The New Texas Statute does not, in fact, contain a savings clause. The Cranfills argue that no savings clause is needed; the **[**9]** action is preserved by the Texas Code Construction Act. *TEX. GOV'T CODE § 311.001, et seq.* This court agrees with the Cranfills.

HN4[] The Texas Code Construction Act applies to "each code enacted by the 60th or a subsequent legislature as part of the state's continuing statutory revision program. . . ." *TEX. GOV'T CODE § 311.002*. The new Texas Antitrust Code was enacted by the 68th Legislature. It effectively replaced the old Texas Antitrust statute. This court finds the Texas Code Construction Act is properly applied to the Texas antitrust laws, triggering the savings provision of the Texas Code Construction Act. *TEX. GOV'T CODE § 311.031*.

Both sides in this case cite *Knight v. International Harvester Credit Corporation, 627 S.W.2d 382 (Tex. 1982)*. The court finds this case inapposite, since the statute in question there, the Consumer Credit and Consumer Protection Act, was repealed without replacement. No Texas Code Section was enacted to cover the areas previously covered by the Consumer Credit and Consumer Protection Act. In contrast, the repealed Texas antitrust statute was replaced by a code provision specifically covering the areas previously covered by the statute.

Both parties **[**10]** have apparently inferred that Count VII of the amended complaint is brought under The Old Texas Statute, but neither has addressed the merits of the claim in the assorted documents filed. Because the savings provision of the Texas Code Construction Act control, the action survives. Any party who wishes to seek summary judgment on the merits of this claim may do so. Until that time, Kirby's motion for summary judgment on Count VII is DENIED. A pre-trial Scheduling Order will be issued on this count.

B. THE TEXAS ANTITRUST STATUTE SUBSEQUENT TO AUGUST 29, 1983

Count VIII of the Amended Complaint alleges violations of the new Texas Antitrust Statute. *TEX. BUS. & COMM. CODE § 15.01, et seq*. The Cranfills incorporate in Count VIII all the facts alleged in Count I, and charge that the acts complained of which occurred after August 29, 1983, are violations of the New Texas Statute.

It is clear that the effective date of the New Texas Statute is August 29, 1983. The only question is whether the Cranfills have actually alleged any acts occurring after that date. In opposition to Kirby's motion for summary judgment, the Cranfills argue, "the inescapable implication is that plaintiffs are **[**11]** alleging that defendants' wrongful conduct occurred past August 29, 1983, by virtue of defendants' failure to make proper distribution of funds under the various bonus plans initiated by defendant." The Cranfills' Second Response, p. 5.

The Cranfills agree the bonus plans mentioned were available to distributors of Kirby products. First Amended Complaint, Count I. The Cranfills' distributorship was terminated on December 13, 1979. After that date, they were no longer distributors of Kirby products. Kirby's alleged action of depriving them of earned bonus amounts had to occur while the Cranfills were distributors. Accordingly, none of the actions **[*737]** complained of could have occurred after December 13, 1979.

Summary judgment for Kirby is GRANTED as to Count VIII of the amended complaint. Judgment will be entered by order of this date.

4. THE TEXAS STATE BREACH OF CONTRACT, FRAUD AND CONVERSION CLAIMS

A. BREACH OF CONTRACT

Count X of the Amended Complaint alleges Kirby breached its contract with the Cranfills. Kirby argues this count is barred by the four-year statute of limitations on breach of contract actions. *TEX. CIV. PRAC. & REM. CODE § 16.004*.

The Cranfills entered their **[**12]** contract with Kirby in 1962. The alleged breach is Kirby's contracting for additional distributors in territory allegedly promised to the Cranfills. In Count V of the amended complaint, the Cranfills allege these breaches began in 1962. This suit was filed December 8, 1982, twenty years after the cause of action accrued.

This court finds the breach of contract action was not filed timely. Summary judgment for Kirby is GRANTED as to Count X. Judgment will be entered by order of this date.

B. FRAUD

Count XI alleges Kirby defrauded the Cranfills by allowing other distributors to make sales in what was allegedly the Cranfills' territory. Again, these allegations are based on acts beginning in 1962.

HN5[] The statute of limitations for fraud actions is two years. *TEX. CIV. PRAC. & REM. CODE § 16.003*. Again, this suit was filed in 1982, twenty years after the cause of action accrued. It is not timely.

Summary judgment for Kirby is GRANTED as to Count XI. Judgment will be entered by order of this date.

C. CONVERSION

Count XII alleges Kirby converted consideration given to Kirby by the Cranfills in exchange for the exclusive territory the Cranfills held. Kirby's contracting with other distributors **[**13]** in that territory, as discussed in Counts X and XI, led to that conversion. The money was paid to Kirby in 1962. It was allegedly converted in 1962.

HN6[] The statute of limitations for a conversion action is two years. *TEX. CIV. PRAC. & REM. CODE, § 16.003*.

This action was filed in 1982, twenty years after it accrued. It is not timely.

Summary judgment for Kirby is GRANTED as to Count XII. Judgment will be entered by order of this date.

SIGNED this 1st day of November, 1990.
